Tebhaga Movement

Paschim Dinajpur - after bifurcation - Dakshin Dinajpur is the august land for initiating Tebhaga Movement of 1946-1948 organised by the poor cultivators and share croppers against the Zaminders, feudal lords and money lenders for establishing the rights for their 'right-share' of production of crop in the State. The sacrifice of lives to the Police bullets of British Govt. of the poor cultivators and share croppers for establishing their right place them as Martyrs to the people of the country.

Calendar of Events

Calendar for Census 2001 upto Houselisting Operation :

December, 1999

(i) Issue of all appointments of Charge Officers, Zonal Sub-Charge Officers and Charge Assistants etc., by the Principal Census Officer.

(ii) State level meeting with all Principal Census Officers to brief them on the different steps to be taken for conduct of Census-2001 to be convened by the Chief Secretary to the Government of West Bengal.

(iii) Meeting to be convened by all the Principal Census Officers at their respective H. Qtrs. to train all the Charge Officers and Sub-Charge Officers and Charge Assistants. The meetings to be attended by Director /Joint Director of Census Operations, West Bengal.

(iv) Principal Census Officers to write to all School Authorities, Govt. Offices, Semi Govt. Offices, local bodies etc., for sending list of officials for appointment as Enumerators and Supervisors.

(v) Collection and compilation of data for Village and Town Directory.

January, 2000

(i) Survey work for preparation of notional maps and layout sketches for formation of House listing Blocks on the basis of 1991 Enumeration Blocks.

(ii) Formation of House listing Blocks on the basis of Survey and Guideline No. 1.

(iii) Collection of list of School Teachers, Govt. Officials etc. from all respective authorities for appointment as Enumerators and Supervisors.

(iv) Preparation of Village Registers at all the Block Charge levels on the basis of data collected on Village Directory.

(v) Regular visit and liaison by the officials of Directorate of Census Operations to the different charges to impart spot training and oversee the Block formation.

February, 2000

(i) 2nd meeting of the Principal Census Officers at the State level to brief them about the House listing Schedules and Instruction Manual.

(ii) Subsequent meeting at the respective H. Qtrs. of all the Principal Census Officers to train all the Charge Officers, zonal Sub-Charge officers etc. on the House listing Schedule, Instruction Manual and House list Abstract – to be attended by Director/ Joint Director of Census Operations.

(iii) Subsequent training at all charges levels on the House listing Schedule, Instruction Manual and House list Abstract to all Zonal Charge Officers, Zonal Assistants by the Charge Officer. Regular contact by officials from the Directorate of Census Operations, West Bengal.

(iv) Completion of appointment of Enumerators and Supervisors and allotment of Houselisting blocks to them.

(v) Despatch of Houselisting Schedules and Instruction Manual, Abstract and other forms from the Directorate of Census Operations to all Districts and receipt/storage of the same at the District level and despatch to all Charge levels, Receipt, storage & giving of locational code numbers to the schedules at each charge levels.

March, 2000

(i) 1st training of Enumerators and Supervisors at the charge level.

(ii) Distribution of Houselisting Schedules, Instructions and Abstract to the Enumerators.

(iii) Completion of assignment of permanent house numbers to the houses by the Panchayats and Municipalities.

(iv) Preparations of the Charge Registers at each charge level.

April, 2000

(i) 2nd training of Enumerators and Supervisors at each charge level.

(ii) Issue of T.A./D.A. amount to the Enumerators/ Supervisors.

(iii) Issue of House-numbering materials to the Enumerators/ Supervisors or advance in lieu thereof.

(iv) Issue of badges/Identity Slips to the Enumerators/ Supervisors.

(v) Training of Enumerators at each circle level/Zone level by the Supervisors/Zonal Sub-Charge Officers.

17.04.2000 to 16.05.2000

(i) Houselisting Operations

(a) First 4 (four) days devoted to survey and preparation of layout sketches as per sketches already prepared at the charge level

(b) Next 20 (twenty) days devoted to house to house canvass of the Houselist Schedule.

(c) Last 2 (two) days devoted to preparation of Houselist Abstract and duplicate Houselist by Enumerators and handing over the same to the Supervisors.

17.05.2000 to 31.05.2000

Collection of the completed Houselist Schedule and Houselist Abstract from Supervisors/Zonal Charge Officers at the Charge level, preparation of Charge Abstract and onward transmission to this Directorate.

Calendar for Enumeration Stage of Census of India – 2001

1. Conference, Training of Principal Census Officers, Additional Principal Census Officer and District Census Officers.
   .....To be completed by 31st July, 2000
2. Training of Charge Officers
   ..... To be completed by 15.08.2000
3. Formation of Enumeration Blocks and despatch of Annexure 'N' by the Charge Officer to the Director of Census Operations, West Bengal.
   ..... To be completed by 31.09.2000
4. Writing of Abridged Houselist based on recarved Enumeration Block and preparation of fresh Charge, Registers after appointment of Enumerators and Supervisors for Each Enumeration Block.
   ..... To be completed by 31.07.2000
5. Despatch of materials to the districts by the Directorate of Census Operations and distribution of the same by the District Census Officers to the Charge Officers
   ..... To be completed 31.10.2000
6. 1st training of Enumerators and Supervisors
   ..... To be completed by 15th December, 2000
7. 2nd training of Enumerators and Supervisors
   .....To be completed by31st December, 2000
8. Field Training of Enumerators and Supervisors and handing over of materials required for Census taking.
   ..... To be completed by 15th January, 2001
9. Population Enumeration to begin on
   ..... 9th February, 2001
10. Population Enumeration to end on
    .....28th February, 2001
11. Enumeration of Houseless Population
    .....To be completed by night of 28th February, 2001
12. Revisional Round to be conducted for updating the information as on 00 hours of 1st March
    ..... To be completed by 1st – 5th March, 2001
13. Receipt of records by district census officers from all charge officers
    ..... To be completed by 07.03.2001
14. Compilation and checking of Population Totals by District Census Officers
    ..... 10.03.2001
15. State wise compilation of PPT by Director of Ceusus Operations and intimation to R.G.I.
    ..... To be completed by 12.03.2001
16. Receipts of records by District Census Officers from all Charge Officers.
    ..... To be completed by 15th March, 2001
17. Intimation of Preliminary Population Figures in respect of the following :
    ..... To be completed by 10.03.2001

(i) Total Population
    Total Male Population
    Total Female Population

(ii) Total Literate Population
    Total Male Literate Population
    Total Female Literate Population

(iii) Total Main workers
    Total Marginal Workers
    Total Non Workers

By the district Magistrates to the Director of Census Operations, West Bengal and Registrar General, India by Telephone and FAX.

Economic Resources

a) Forest Area : The district has a total area of 628 hectares covered by reserved forest while 231 hectares account for protected and unclassed State forest. The Govt. owned forest area is distributed over 25 patches in 8 blocks having Sal, Sishu, Sagoon, and Arjun as the major species of trees. Social forestry essentially includes road side strip plantation and covers around 1,394 hectare along various roads and canal banks. During 2000-2001 the district earned revenue of Rs.20,000/- from forest produce and had incurred expenditure of Rs.2,996,000/- (Source : District Statistical Hand Book, Dakshin Dinajpur, 2001).

b) Mineral product : The district has no mines.

c) Soil & Cropping Pattern : Dakshin Dinajpur falls under old alluvial agro climatic zone. Here soil type is lighter in higher situation and generally heavier in texture in lower situation. Soil reaction is acidic to natural. Soils are fairly fertile in northern part and fertile in southern part. In the western Kushmundi CD Block, the soil is Gangetic riverine with occasional flat lands interspersed. The area is derived mostly by the alluvial action of the Ganges and its tributaries and has soils rich in calcium and bases. The soils vary from sandy loam, loam, silty clay to silt. Parts of the CD Block of Bansihari, Gangarampur, Balurghat, Hilli, Tapan, Eastern part of Kushmundi have reddish soil. The texture of soil in the high lands is sandy loam, and in the low lands stiff clay. This area is locally known as Khiar. In this area isolated patches of lighter soil are to be found here and there.

In this agro climatic zone with this soil type there are mainly three cropping seasons : Kharif -starts from mid June and ended in September and Rabi which starts from October and ended in January and Pre-kharif which starts from February as ended in June.The prevalent cropping patterns in the district are Aman paddy - Lentil - fallow, Aman paddy - Vegetables - Fallow, Aman paddy - Mustard/ Lentil/ Vegetables-Vegetables. Aus- mustard - Mung is a practice followed in upland irrigated heavy soils. Remunerative crops like Turmeric, Banana, Arecanut, are grown. Homestead crops of Mango, Guava, Coconut and Papaya are grown. (Source : Status Report, Volume I, Old Alluvial Zone, Bidhan Chandra Krishi Viswavidyalaya).

d) Land and land-use pattern : Dakshin Dinajpur is situated on a plain land. The land is formed with alluvial & soil generated from the different rivers in the district. The land is fertile for agricultural production. Out of the total land area of the district, 932 hectare of land is under forest; 1,487 hectares of land is under current fallow; 34 hectares of land is under other than current fallow and 190,462 hectares of land is under net-cropped area in 2000-2001. (Source : Directorate of Agriculture, Govt. of W.B.)

e) Tenancy : The State Government is the owner of the all estate land since the enactment of West Bengal Estate Acquisition Act, 1948. But in case of agricultural land the tenancy is contractual with the owner. After the land reform measures taken up by the State Government there is no intermediary system of tenancy in the district.

So far the land tenure system is concerned, Dakshin Dinajpur has its own history of struggle and participation in **Tebhaga Movement** which is worth mentioning. Tebhaga Movement was the movement of the poor cultivators and sharecroppers called *Adhiyars* against the Zaminders, Feudal Lords and Money-lenders etc. An *Adhiyar* was essentially a poor peasant who used to cultivate with his own plough and cattle such a land that belonged not to him, but somebody who had no permanent interest in the soil of that land. Besides, he was often subjected to the threat of withholding adhi settlement extended by the land-owning class on a plea. Against this backdrop, the *Adhiyar* demanded (1) Two-third of the produce, (2) Permanent tenancy right on the land they til, (3) Storing of the produce in their granaries, (4) Issuance of receipt against their shares, (5) End to numerous illegal exactions to which they were frequently subjected, (6) Right to cultivate arable fallow land and (7) End to land owning class's frequent threats to withhold adhi settlement at will.

The impact of this movement over the later land settlements in the state has been great.

Following is an excerpt from 'An account of Land Management, 1870-1952' published in West Bengal District Handbook, 1951 which provides the backdrop in detail.

"Out of 1,524 *adhiars* 692 held less than one acre in tenancy right and a further 518 between one and five acres. That is, four-fifths of the *adhiars* held less

land than is necessary to maintain a family and have to take *adhi* land in addition. As many as 103 were shown as having over ten acres. Perhaps co-sharer's lands were included, but is was agreed that a number of substantial cultivators, take settlement of *adhi* lands to get extra profits and to secure maximum employment of their stock. It is not usually for the same *adhiars* to remain long on the same piece of ground. Indeed the attraction of the system is that men can be changed, or could try their fortunes elsewhere every fresh season.

"The following shows in percentage the duration of *adhi* land held by present *adhiars* :

Up to 3 years	..	..	56
3 to 6 years	..	..	23
6 to 12 years	..	..	11
Over 12 years	..	..	10

Such a statement must be accepted with caution and many among the Settlement staff thought that through fear that long possession would create a right, the landholders understated the length of time the *adhiars* had been in possession, and frightened the *adhiars* into consent. Nevertheless as returns are more or less uniform there is truth in these figures.

"A certain number of people give land in *adhi* because they are incapable through widowhood, minority, or old age and from sickness from cultivating themselves and supervising work of labourers. But the enquiries made by the kanungos working for the Land Revenue Commission clearly proved that most land is given to *adhiars* because the raiyat or jotedar has got more land than he can cultivate himself, even if he and his family worked full time on the land.

"Although the extent of the system is some indication of its popularity, there is evidence that more jotedars of cultivating stock prefer to cultivate by their own ploughs, or by hired labourers, and give land in *adhi* because they have not time to superintend the work on all their lands. Big Muslim or Rajbangshi jotedars may cultivate as many as 100 bighas by their own ploughs and labourers, and one Mahisya jotedar was reported to keep as many as 138 ploughs. Such people say that 'nij hal' is more profitable than cultivation through *adhiars*. But poor soil may be better cultivated through *adhiars*, because it is better to get half of anything than to lose money on paying for labourers. The unfortunate *adhiar*, being anxious to make any sort of income, has to take any land offered.

"On the other hand, the non-resident, or non-agricultural man who has land prefers to cultivate through *adhiars*. It is said '*Adhi* is more suited for gentlemen.'

"Any proposal to give tenant rights to *adhiars* must be considered in the light of local ideas as to customary rights. The argument for making *adhiars* into tenants is that the *adhiar* is essentially a peasant; a man who cultivates the land for his family subsistence, using his own plough and cattle; that his present position is precarious, and it is not in the public interest to have a large mass of people in the countryside with no permanent interest in the soil. It is true that the *adhiars* holds a precarious position and instances have been found by the threat of withholding adhi settlement has been used to force surrender in social quarrels, and civil and communal litigation.

"The argument for refusing to extend rights to *adhiars*, is that the *adhiars* do not regard themselves as having any rights; that they change their land and their 'giri' (the jotedars) very frequently; and generally, by the custom of the country are regarded more as a servant of the jotedar or landlord than as independent landholders. They are mostly the poorer villagers and jotedar also decides what crop is grown, and it is frequently divided at the *khamar*, or other place appointed by the jotedar, a sign of the master and servant relationship." (Pages - xl-xli)

Upto September, 2000, 34,505 hectares of agricultural land were distributed amongst 72,473 beneficiaries out of which 25.2 per cent belonged to Scheduled Castes and 64 per cent belonged to Scheduled Tribes. (Source : District Statistical Hand Book, Dakshin Dinajpur, 2001).

f) Agriculture : Out of the total net-cropped area, 225,100 hectare of land was under food grain of which 221,000 hectares were under cereals as per 2000-2001 statistics. The main crops of the district are Rice, Wheat, Rape and Mustard and the cash crop is Jute. Now the district is growing Potato, Pulses and Chillies. In the year 1999-2000 cereal productions stood at 492,500 tones (Source : District Statistical Hand Book, Dakshin Dinajpur, 2001)

g) Irrigation : In 2000-2001, 48,240 hectare of land in the district was under irrigation. Out of the total irrigated area, 20,670 hectares of land was irrigated by Tanks and 27,570 was by other sources. Sources of minor irrigation such as 128 deep tube wells, 260 liver lift irrigations and 9,659 shallow tube wells were working in 2000-2001 (Source: District Statistical Hand

Book, Dakshin Dinajpur, 2001)

h) Animal Husbandry : As per the last Cattle Census Report - 1994, before bifurcation of the district 453,808 cattle and 27,712 Buffaloes were returned. In the same year the district had 1,076,346 poultry birds in the undivided district.

i) Fishery : Open Eco-System in inland areas comprising rivers, canals, beels form potential fisheries. Pond fisheries are prevalent. Fish farming is still primitive in this district. A predominant section cultivates, with fingerlings collected from rivers, in the ponds. Net area under fisheries in the nineties is 13,205 acres with net area under effective pisciculture being 5,100 acres with an approximate annual production of 25,560 quintals. (Source : Bureau of Applied Economics and statistics, Govt. of West Bengal - 1991)

j) Electricity & Power : The District Dakshin Dinajpur has 1,638 villages and 2 Municipal towns. Out of the total village, 892 villages electrified. Of them, 842 villages are using electricity for domestic purpose, 379 villagers for agricultural purpose, 379 for other purposes and 212 villages are using electricity for all purpose. In the year 2000-2001 a total of 4,047 (in 1000 KWH) units of electricity has been consumed.

k) Industry : The district is not connected by Railways or National, Highways thereby creating major handicap for the growth of large, medium as well as small scale industry. Thereby the marketing network has not spreader properly. The West Bengal State Electricity Board is also not in a position to supply uninterrupted power supply, which is a key factor for growth of industries and as such this district does not have any large and medium scale industry.

In spite of these impediments, a few cottage and small scale units have been set up with the help of the limited infrastructural facilities (skilled man power and raw material) in areas like handloom, handicrafts and engineering works. Since the climatic condition of this area is favourable for agro-based industries, some rice milling, oil milling and wheat grinding industries are also there. There is also some prospect of other types of agro-based industries like processing of pulses (Dal Mill), manufacture of jute-based product and diversified jute product. There are 180 Agro-based small-scale Industries (SSI) employing 2,000 persons and 220 Forest - based SSI employing 900 persons in the district.

l) Trade and Commerce : The district has no large scale industry. So apart from agro products, the items of day to day requirement imported from other district and other states. Due to lack of railway link to the district, the trading activities are confined by road transport only. There is an international point of trading with Bangladesh at Hilli under Hilli CD Block.

m) Transport : Dakshin Dinajpur is a backward district of West Bengal. Out of the total road in the district maintained by PWD, 122 kms. are under State Highway; 305 kms. under village Roads and 14 kms. are under Other Roads. Apart from this, Dakshin Dinajpur Zilla Parishad maintains a total 191.05 kms. of village road. Road transport is the only mode of transport in the district. One has to transverse a long distance of 110 kms. from the district headquarters to avail oneself of the train from the nearest railway station in the district of Malda. The Eklakhi - Balurghat Railway project, which will entail the laying of 87 kms. of railway tracks, is expected to be completed in near future.

(vi) Gram Panchayat

In West Bengal the panchayat system began to function in full fledge since 1978. The Panchayat system is under 3-tier functionary. In the district at the top there is Zilla Parishadv (ZP) at district Headquarters level; the Panchayat Samities (PS) are functioning at CD Block and under them there are Gram Panchayats consisting of elected members from (Panchayat member) Revenue Villages and has its office in the village. Since 1978 the panchayat system has been performing a vital role for the development from village level to district level and fund in regular manner is placed for implementing the economic plan from GP Level to district level.

In West Bengal, there are 333 Panchayat Samity in 341 CD Blocks and 3,248 Gram Panchayat (GP) in 40,742 villages. In spite of some shortcomings, the Panchayat System has changed the village economy, social and political system. In West Bengal on account of panchayat system small and marginal farmers got cultivable land, the wages of agricultural labourers has increased. Due to land reforms and other village development program the production of agriculture has increased significantly. As a result per capita intake of food has also increased. Thus the Panchayat system in the State has helped for improvement of rural economy of the State.

In Dakshin Dinajpur district there are 8 Panchayat Samities and 65 Gram Panchayats. All the institutions have been performing a vital role in the district in respect of social and economic development of rural areas.

Major characteristics of the district

Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district

Mr. F.W. Strong in his Eastern Bengal District Gazetteers, Dinajpur, 1912 remarked that “Any one who has had much experience of them will give the people of the Dinajpur district a good character. They are a simple and contented race, neither insolent and ostentatious in prosperity nor yielding readily to despair in adversity. They cannot be described as quarrelsome, serious rioting being almost unknown ……”. It is noteworthy that the same people of the district Dakshin Dinajpur made remarkable contribution in Tebhaga Movement of 1946-48 which proves that not only simple and contented, they are equally full of self-esteem.

Following historical figures were associated with the district.

1. Jagat Jiban Ghosal, the poet of Manasamangal.
2. William Carey, the famous Baptist Missionary. His effort to publish books in Bengali by establishing a vernacular press took start in this district. He was something of a botanist and expert in agriculture and his Remarks on the state of agriculture in the district of Dinajpur was published in volume 10 of the Asiatic Researches.
3. Maharaja Girija Nath Roy. He took leading part in the agitation against the partition of Bengal in 1905.
4. Purna Chandra Das, the noted freedom fighter.

Major Social and Cultural events, natural and administrative developments and significant activities during the decade

Numerous fairs, festivals and socio-cultural events are held throughout the year in this district having wide admixture of religion, community and culture. The followers of the main faiths and some tribal groups observe their own religious festivals whereas they intermingle in *melas* (fairs) and ceremonies. Brief notes on the major festivals and *melas* (fairs) of the district are given below :

Festivals

State level common :

In all the districts of the state certain religious festivals are observed in such a huge magnitude that the impact is cross-cultural involving the overall market economy. Those are :

1. Durga Puja is the most popular annual festival of the Hindus held both at community level and at clan or household level. The four day festival relate to worshiping of the mother god 'Durga' and symbolising the victory of good over evil is held in the month of *Ashwin* (Bengali calender) or September-October. In folk culture this festival also represents the home coming of Mother Durga (Parbati) - wife of Lord Shiva along with her two sons and two daughters to visit her paternal home from their snowy abode of Himalayas. This festival therefore also represents a family reunion of members staying at distant places.
2. In north India 'Deepavali' or the festival of lights is celebrated to commemorate the home coming of Lord Rama to Ayodha after fourteen years of punishment as per the epic Ramayana. But in Bengal Kalipuja or Diwali is related to worshiping goddess 'Kali' or 'Shakti' (the power) as another expression of mother cult. This one day event is held on the moon less night following Durga Puja in the month of *Kartik* (mid Oct-mid Nov). Decoration with lights is a part of the observation adding a flavour of the famous national festivity called the 'Festival of light or Deepawali'.
3. Dol Jatra or Holi is the festival of colours. In fact the colours of the spring time nature is celebrated with much grandeur for expressing the feeling of love and friendship as symbolized by the holy conjugation of Lord Krishna and Radha.
4. Rathajatra or the car festival of Krishna, Balaram and Subhadra is held during *Ashadh* (mid-June to mid-July).
5. Id ul Fitr is the most popular religious festival of the Muhammedan population in the state. This is observed with a mass prayer (Namaz) and joyful get together after the month-long fasting during 'Ramzan'.
6. The next important festival of the Muhammedans, Idu'z Zuha or the festival of sacrifice, is also celebrated with mass prayers and exchange of gifts and sweet meat etc. with a spirit of brotherhood.
7. Muharram is another popular festival of the Muhameddans held on the thirtieth day after Idu'z Zuha to mourn the death of Hassan and Hussain - two grandsons of the Prophet Muhammed in the battlwe of Karbala. Tajiyas are built and taken in a procession symbolizing the memorial tombs of those two martyrs.
8. The Christmas day on 25th December and Good Friday in April are the two most important religious festivals of the Christian community. 'Christmas day', in particular, is observed with prayers in the church to commemorate the birth of Jesus Christ and the festivity continues till 1st January - the new calender year. The day of Christ's crucifixion is the day to pray again on Good Friday.
9. The Sikhs celebrate their most important religious festival on the occasion of Guru Nanak's birth day, the founder of the Sikhism.
10. The full moon day of May is observed as Buddha Purnima by the followers of Buddhism in different pockets of the State. This is the biggest festival for Buddhists to mark the occasion of the birth of Lord Buddha.
11 . The followers of Jainism observe Mahabir Jayanti which is the birthday of Lord Mahabir in the month of April.

District specific :

The goddess Kali is the most popular deity in Dakshin Dinajpur. She is worshipped in many places in one of her Puranic forms - Chamunda. Apart from this form she is also widely worshipped in this district in various local forms and called Masankali, Joykali, Paglikali, Burikali etc. Hilli town is famous for worshipping Chamunda. It is a 150 years old festival. The festival continues for 8 days long. In Balurghat

town there is few public Kali worships arranged by the tribal communities.

Then there is *Chadak* held in the month of *Chaitra* (March-April) with much pomp and grandeur. Holy bathing which is called Baruni Snan is another important event in the life of the pious Hindus held in the same month. Gambhira which is the most popular festival in Maldah district in the month of *Chaitra* (mid March-mid April) has considerable impact over some parts of Dakshin Dinajpur too.

A kind of syncretism is observed in religious practices of the inhabitants of the district. The local deities like Garam or Maharaja are also worshipped by the Hindus. Garam is supposed to reside in the neighbouring jungle and is the protecting deity of the villages. The Hindus even offer sinni at the place of the local pir, that is, Muslim holy man. As per the account given by Mr. F.W. Strong in his 1912 Dinajpur Gazetteers, the Muhammedans of the district (especially the Balurghat Sub-division) are chiefly the descendants of Rajbanshis. In Muharrams and other Muslim parabs also the syncretism is evident.

The tribal life centres round three big festivals - the Pausna parab, the Fagua parab and the Chaitra parab. The first is a form of harvest festival and the second corresponds to the festival of holi among the Hindus and the third, that is the Chaitra parab is an occasion for rejoicing.

Dakshin Dinajpur may not be a seat of high learning but it is reputed to be the cradle of culture in North Bengal.

The literacy rate in the district stood at 64.46 at the 2001 census which was lower than the total State average 69.22 and the national average 65.38. Against this backdrop, the Total Literacy Campaign (TLC) has assumed a special significance in improving the literacy status of the district.

Culturally speaking, Dakshin Dinajpur has every right to take pride in its rich heritage and tradition of art and culture. There is a galaxy of dramatic associations and drama clubs. Of these Balurghat Natya Mandir, Trithirtha, Natya Tirtha, Tunir and Pragati are worthy of mention. Of them Balurghat Natya Mandir is the oldest one.

Satyajit Mancha and Manmatha Roy Natya Charcha Kendra are the centres where plays are enacted. Workshops and seminars on folk art and culture are also arranged. They are a treat to the connoisseurs of art and culture.

Balurghat College is endowed with a Museum. The district also boasts of another Museum. It is housed in the premises of the office of the District Library, Balurghat. The treasure trove of these Museums include sculptures made of either stone or bronze, silver coins of the Mughal period, stone inscriptions, fossils, manuscripts, terra-cotta objects, weapons belonging to the Mughal period etc.

Fairs :

There are many fairs occasioned by the festivals in the district. Some of the fairs with a few details on the basis of maximum congregation and longest duration as per District Census Handbook, 1961 are mentioned below.

Maximum congregation of 50,000-100,000 was recorded in Dhaldighi (Purano Para) under Gangarampur PS on the occasion of a fair in memory of a pir or Fakir in the month of *Magh-Falgun* (mid January-mid March). Also in Shibbati (Kesabpur) under same PS approximate total attendance on the occasion of Baruni Snan in the month of *Chaitra* (mid March-mid April) recorded was 50,000 people. An assemblege of 25,000 was recorded in Karanji under Kushmundi PS on the occasion of Kansa Brata in the month of *Magh* (mid January-mid February). In Batun under Kumarganj PS 10,000 to 12,000 people used to attend the Chamunda Kali Puja in the month of *Jaistha* (mid May-mid June). Also in Balupara under same PS a congregation of 10,000 people at the time of Shiva Kali Puja and Charak ina the month of *Chaitra* (mid March-mid April) was recorded.

The longest duration recorded was of 60 days in the fair in memory of a Pir or Fakir in the month of *Magh-Falgun* (mid January to mid March) in Dhaldighi. As already stated this was also a fair with maximum congregation. The next longest duration is of 30 days recorded in both Kushmundi and Banshihari PS during a fair in memory of Dhakar Sidh Pir and Muharram respectively.

Points to Note

(1) New Districts created subsequent to 1991

District Dakshin Dinajpur

(13) The Village land area figure in Hectares has been converted from the village(mouza) wise land area in Acres as maintained by Director,Land Records & Survey (DLRS), Govt. of West Bengal.

(14) Villages marked as (P) indicate concerned village is partly Rural and partly Urban or is bifurcated into two CD Blocks.However the total area figure of the villages (mouzas) as per records maintained by DLRS, Govt. of West Bengal has been given here as no record of such bifurcated village area is available with DLRS, Govt. of West Bengal. In case parts of a village fall under more than one CD Block the total land area figures for these parts have been estimated on the basis of plot nos. mentioned in the concerned Govt order and through interpolation / extrapolation of the areas of the concerned plots from R.S. maps maintained by DLRS, Govt. of West Bengal.

(15) The area of CD Blocks as shown here is summation of land areas of all villages (mouzas) within the concerned Block and is estimated only.This is because no CD Block wise land area figures are available with DLRS, Govt. of West Bengal.

(16) In case of statutory and non statutory urban areas, the areas are given here are estimated only. This is because no town wise area figures are available with DLRS, Govt. of West Bengal. The area figure have either been collected from the concerned town authorities or have been calculated from existing village(mouza) wise area figures as maintained by DLRS, Govt.of West Bengal.

(17) The total land area for State/ District as given here is as per area figures obtained from Survey of India. However the totals of / villages / Blocks / Towns as given here are as per records maintained by Directors, Land Records & Survey (DLRS), Govt. of West Bengal.

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts : Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts : Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD Block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being the lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991

census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Vikram Sen, IAS, Director of Census Operations, West Bengal. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

Preface

The task of publishing the District Census Handbook (DCHB) is a joint venture between the central and state government and the recent publication for 2001 Census happens to be the sixth in the series of its publication since the year 1951. Since then, in view of the contemporary requirement of data, the coverage of DCHB has widened and received regular refinement. Hence, it has become the most widely used publication compiled and prepared by the Census organization. The presentation of data is done in two parts, viz., the Part-XII-A and Part-XII-B seperately for the bigger districts and single combined volume for the each smaller district.

Part-XII-A contains Village & Town Directory data with some important tables depicting availability of basic civic amenities at the C.D. Block/Village and Town level. In the other hand, Part-XII-B presents district Primary Census Abstract (General), Primary Census Abstract for Scheduled Caste, Primary Census Abstract for Scheduled Tribe and CD Block/Villagewise Primary Census Abstract and Urban Primary Census Abstract. In addition to the above an effort is made to furnish various essential information about the district such as – historical background, administrative set-up, drainage, physiography, climate, place of historical, archaeological and tourists importance etc. The 2001 Census DCHB presents a variegated picture of the human life as reflected by the census data. The scope of analysis of census and non-census data has considerably increased through various summary tables and inset tables. Besides brief analysis of basic census data in the form of PCA and analysis of amenities and infrastructural facilities available in villages and towns in the form of Village Directory and Town Directory, the data on houses and household amenities have also been briefly analyzed and included in this volume. Not only this, we have made efforts to present comparative data on various aspects such as distribution of population, growth rate, density of population, sex ratio, work participation rates, literacy, language, religion, scheduled caste and schedule tribe population (since 1951 or 1961) mostly by residence for the benefit of data users. Likewise, in the annexures, brief analysis on some socio-demographic, economic, migration and cultural aspects of the population pertaining to 1991 Census has also been made.

There has been regular and continuous flow of suitable suggestions and advice from Shri J.K. Banthia, Registrar General, India, throughout completion of the work for which I express my deepest and sincere gratitude to him. Other officers in the office of the Registrar General, India, New Delhi, contributed their share in the befitting manner for which as well I record my thankfulness to Shri R.G. Mitra, Deputy Registrar General (C&T), Shri R.P. Singh, Deputy Registrar General (Map), Shri I.C. Agarwal, Senior Research Officer (S.S.) and Shri S.L. Jain, Deputy Director (S.S.), for without their timely help and guidelines this publication would not have appeared before us in time and in this form.

I shall be failing in my duties if I do not acknowledge the contributions made by the District Census Officers/ District Magistrates and innumberable Village, Block and Municipal level officials of all the districts of West Bengal for arranging collection of village and town directory data by the local officials from the villages/towns under their jurisdiction.

In my own office my thanks are due to each one of the staff members for their zeal and enthusiasm shown in completing this project successfully at various stages of work very much within the stipulated time. As it is not feasible to express my thanks individually a separate page of acknowledgement is included in this publication.

Vikram Sen
Director of Census Operations,
West Bengal

Acknowledgements

A. The Directorate of Census Operations respectfully acknowledges the devoted, sincere hard work rendered by about one lakh fifty thousand Census Enumerators, Supervisors and Officials at the District, Block and Municipal levels without whose heroic efforts, the Census 2001 could never be undertaken. Three among these Enumerators also laid down their lives while in discharge of Census work.

B. The Census Directorate, West Bengal also gratefully acknowledges the sincere and dedicated work of the following officers/officials of this Directorate associated with the preparation of this Hand Book.

Drafting of analytical notes/ overall editing and checking at various stages :

Shri R.K. Ram	Joint Director	Shri P.K. Majumdar	Deputy Director

District Highlights - 2001 Census

1. Dakshin Dinajpur disrtict occupies 18th position in terms of population in the State.
2. Dakshin Dinajpur is one of the least urbanised districts of the state having 13.1 per cent of the total population in urban areas, whereas more than 27 per cent of the State's population live in urban areas.
3. Dakshin Dinajpur has population growth rate of 22.2 per cent that makes its rank 6th in the State.
4. So far as density (population per sq. km.) is concerned, Dakshin Dinajpur district occupies 13th position in the State.
5. The sex ratio of the district (951) is above the State's sex ratio (934).
6. Dakshin Dinajpur has the literacy rate of 63.6 per cent that makes its rank 11th in the State.
7. There are 59 uninhabited villages in the district.
8. There is no village having population of 10,000 and above.
9. Patiram (Balurghat CD Block) is the most populated (8,968) and Meria (Balurghat CD Block) is the least populated village (2) in the district.
10. The economy of the district is based on agriculture and 65.4 per cent of the main workers of the district are engaged in agricultural sector.
11. The proportion of female participation in Agricultural Labourers (43.0 per cent) and in Household Industry category (10.4 per cent) is far greater than their male counterparts (27.4 per cent and 2.9 per cent respectively).
12. Balurghat CD Block has the highest number of villages (309) and Hilli CD Block has the lowest (82).
13. Ramchandrapur village of Tapan CD Block has the largest area (885.1 hectares) and Jamirbari of Kumarganj CD Block is the smallest (38.6 hectares).

Important Statistics of the District - 2001 Census

Important Statistics of the District - 2001 Census

POPULATION		WEST BENGAL	DAKSHIN DINAJPUR
TOTAL	Persons	80,176,197	1,503,178

	Inhabited	37,945	1,579
	Uninhabited	2,837	59
Number of Towns		375	2

Concept of Census Town :

Some administratively rural areas are identified and treated as urban pockets for the purpose of census are called Census Towns on the basis of the following demographic criteria :

(i) A minimum population of 5,000.

(ii) At least 75.0 per cent of the male working population engaged in non-agricultural pursuits, and

(iii) A density of population of at least 400 per sq. km.

		2001	196,854	100,539	96,315	32,629	19.9

Note : 1. The rural-urban break up for Dakshin Dinajpur is not available for the year 1901-1941 and sex break up is not available for the year 1951.

2. Till 1991 both Uttar Dinajpur and Dakshin Dinajpur were undivided West Dinajpur District which was bifurcated subsequent to 1991.

After independence district of Dakshin Dinajpur or West Dinajpur shows continuous growth up to 1971 barring 1921. Total growth rate is the highest in 1971(37.1). However, after 1971 the growth rate has declined sharply. Interruption in 1921 Census recorded a negative growth of -12.1, which is probably caused by influenza epidemic of 1918-1919.

The rural-urban break up for Dakshin Dinajpur is not available for the year 1901-1941 and sex break up is not available for the year 1951. From 1951 growth rate is not uniform as the high growth rate of 1961-81 was broken by lower growth rate of 1991. But it has again slightly increased in 2001.

Urban scenario shows a different trend though here also highest percentage is observed in 1971 (106.1) but it declined remarkably in 1991 (16.1), which is slightly increased in 2001.

Note : While calculating density, area figures have been taken upto two decimal points

Dakshin Dinajpur district is predominantly rural in relation to total population and total area of the district. There are 1,638 villages and only 2 municipal towns in the district. The density of population of the district is much lower (677) as compared to State average (903). Among the CD Blocks, the highest density is recorded in Hilli CD Block (851) while Tapan CD Block has the lowest density (507). There are 1,638 villages (1,579 inhabited and 59 uninhabited) in the district. The largest number of inhabited villages is seen in Balurghat CD Block (296) and maximum number of uninhabited villages is noticed in Kumarganj CD Block (14).

Among the urban units, Balurghat Municipality with 12,977 population per sq. km. is the most densely populated.

The above table shows that there are 136 houseless households, with 88 households in rural areas and 48 households in urban areas, consisting of a total houseless population of 617 (271 in rural areas and 346 in urban) in the district. It is most likely that they may not have even a plot to construct the house. Even if some of them may have the plot, they may not have the finance to meet the cost of construction of house. Among the CD Blocks the maximum houseless population live in Kushmundi CD Block (81) followed by Balurghat CD Block (59) while the minimum number is in Hilli CD Block (3). Among the two municipalites, the higher number of houseless population is seen in Balurghat Municipality (279) and the lower in Gangarampur Municipality (67).

There are 415 institutional households, 277 households live in rural areas and 138 in urban. The total institutional population is 8,492 with 5,532 in rural areas and 2,960 in urban areas of the district. Male inmates of these institutional households are numerically much larger than their female counterparts (males 5,935, females 2,557). Among the CD Blocks, the maximum institutional population live in Balurghat CD Block (2,986) followed by Kushmundi CD Block (540) and Hilli CD Block (500) and the minimum in Bansihari CD Block (186). Among towns, Gangarampur Municipality has a total institutional population of 1,328 and Balurghat Municipality 1,537.

History & Scope of District Census Handbook

(i) History and Scope of the District Census Handbook

The District Census Handbook a joint venture of the State Government/ Union Territory Administrations and the Census Organisation, is one of the most important publications, particularly in the context of planning and development at grass root level. It is perhaps the only source that gives village and town level information concerning several demographic and socio-economic characteristics and also on availability of important civic amenities. This publication was for the first time brought out in the 1951 Census. In fact it is the replacement of 'Village Statements' used to be prepared in the Censuses of Pre Independence period and since then it is published after each decennial Census with some innovations/ improvements.

Scope & coverage of District Census Hand Books of 1951-1991 Censuses

Initially the scope of the DCHB was confined to certain important census tables on population, economic and socio-cultural aspects and also the Primary Census Abstract (PCA) of each village and town of the district. The DCHB published after the 1961 Census contained a descriptive account of the district, administrative statistics, Census tables and Village and Town Directories including PCA. In 1971 Census the DCHBs were brought out in two parts viz. Part A comprising Village and Town Directories and Part B comprising Village and Town PCA in respect of all the States and Union Territories. The Third part of the DCHBs comprising of administrative statistics and district Census tables. During 1981 Census new features alongwith restructuring of the format of Village and Town Directory were introduced in the DCHB. These were published in two parts for each district. While Part A comprised of Village and Town Directories, the PCA of Village and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA upto tahsil/town level were provided in Part-B. To illustrate, all the amenities except electricity, were brought together in the Village Directory and if an amenity was not available in the referred village, the distance in broad ranges from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the Village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Direcotries also, keeping in view the requirements of the Minimum Needs Programme, a Statement (IV-A) on slums was provided so as to enable the planners to chalk out the programmes for providing civic amenities in the slums. In this statement details on civic and other amenities were presented for the notified slums of Class I and Class II towns. Apart from this, one column on the Scheduled Castes and Scheduled Tribes population and another on adult literacy classes/centres were added in statements IV and V respectively.

The manner of presentation of the DCHBs for the 1991 Census was more or less similar to that of 1981. However, the format of PCA was restructured slightly in the 1991 Census for the benefit of data users. Nine fold industrial classification of main workers was given as against four-fold, industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age group was also included in PCA for the first time with a view to enabling data users to compute more realistic literacy rate as all children below seven years of age have been treated as illiterate in 1991 Census. It was expected that these changes would help the planners in chalking out more effective developmental programmes.

One of the most important innovations in the 1991 Census was the Community Development Block (CD Block) level presentation of data in the Village Directory and PCA instead of the traditional Police Station level presentation. It was expected that the presentation of Village Directory and PCA data at CD Block level would help the planners in formulation of micro level development plans, as the Blocks are the lowest administrative unit for developmental planning. In order to facilitate the task of administrators, Planners and Researchers to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both the computer and manual codes for each Village were provided for the 1991 Census alongwith the corresponding codes of 1981.

Scope & coverage of District Census Handbooks of India, 2001

The District Census Hand books for Census of India, 2001 are more informative and exhaustive in terms of coverage and context. The coverage in Village Directory has been further broadened and includes facilities like banking, recreational, income and expenditure of Gram Panchayats and most important commodity/commodities manufactured in the village. Apart from these, more details on distance (s) of basic health and educational facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre, Primary Health Centre and Primary School), if not available in the village are proposed to be given for the first time.

The type and extent of basic amenities available in the villages and towns are proposed to be analyzed in depth with the help of a large number of cross classified inset table & statements. Brief analytical notes /accounts on important aspects concerning respective districts viz. (i) firstly, mortality and migration, (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/place of residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education & (vii) distribution of different mother tongue, all based on 1991 Census, will be given at the end of the text as separate annexures. It is also decided to provide two lists separately indicating names of colleges and hospitals available in the villages and towns in the district.

For the District Census Handbooks under Census of India, 2001 more emphasis has been given towards quality of village and town level amenity data. With a view to find out erratic or aberrant trends or in inexplicable fluctuations in amenity data, similar information brought out by the State and Central Government have been collected & these information have been used to verify the Village Directory & Town Directory data. The inconsistencies noticed in Village Directory & Town Directory data have been removed in consultation with the respective district administration as far as possible.

Brief History of the District

In the ancient times the area of undivided Dinajpur was a part of 'Paundrabardhanbhukti' (Bhukti >Division). There is a reference in the Mahabharata of the king Bamdeb who ruled after Banraja. At the time of the Mauryan Emperor Asok, there was the influence of both Buddha and Jain religions in the area. In the Mauryan period, the area was also a part of the Bishoy (District) of 'Katibargha' with its headquarter located at Debikat now known as Bangarh in the Gangarampur PS. The founder of the Gupta Empire Chandragupta-I is thought to have hailed from this region.

In the 8th Century A.D. at the time of Pal kings when this area was part of 'Barendrabhumi' many memorable incidents were linked with north Bengal region specially during the administration of Mahipal in this area. At the time of 2nd Mahipal, the Kaibarta leader Dibya revolted and became the king of this area. After the end of his reign, the Sen dynasty ruled this area and at that time this area was a part of 'Gour Desh'.

After the fall of Sen Dynasty in 1202 Muslim rule started in Bengal. In 1414-15 A.D. the Makim Ganesh captured the throne of Bengal. In the history, he is known as Danujmardandeb. After his fall Muslim rule again came back to Bengal. According to one version, in 1414 a Hindu Zamindar rose from strength to strength and proclaimed himself as the ruler of Gour. The Hindu Zaminder was a generous and an influential landlord DANUJMARDANDAIBA. He was the Messiah of the lower echelon of the society. He eventually became popular as DINRAJ. The undivided district derived its first name DINRAJPUR from the name DINRAJ. Hence the erstwhile name was-DINAJPUR.

West Dinajpur was curved out of the erstwhile Dinajpur District in 1947 at the time of partition of India. Earlier in 1786, Dinajpur got the status of the district in the British period. The rest of Dinajpur is now in Bangladesh. West Dinajpur was enlarged in 1956 with addition of some area of Bihar and was bifurcated into Uttar Dinajpur and Dakshin Dinajpur on 1.4.1992. This was followed by subsequent readjustment by merging of Saiyadpur and Gokarna Gram Panchyats of Itahar Block of Uttar Dinajpur with Bansihari Block (now the two GPs fall in Harirampur Block) of Dakshin Dinajpur. The headquarter of the erstwhile West Dinajpur was retained as the headquaerter of Dakshin Dinajpur at Balurghat. It is 450 Kms. from Kolkata.

Administrative Set-up

(i) Region of the state where district is located :

Dakshin Dinajpur is situated on the north-eastern periphery of the state of West Bengal and included in the Jalpaiguri division. As a part of West Dinajpur District, it formed the eastern international boundary of state bordering Bangladesh from 1947 when India was independent.

(ii) Total number of CD Blocks or the next Administrative units after district and changes therein including jurisdictional changes during 1991-2001 :

The district has two sub-divisions, viz. 1)Balurghat, 2) Gangarampur. There are 8 Police Stations in the district, namely 1)Kushmundi, 2) Gangarampur, 3) Kumarganj, 4)Hilli 5)Balurghat 6) Tapan, 7) Bansihari, 8) Harirampur. There has been no jurisdictional change in the district during 1991-2001.

Altogether there are 8 Community Development Blocks in the district namely, 1)Kushmundi, 2)Gangarampur, 3) Kumarganj, 4)Hilli 5)Balurghat 6)Tapan, 7) Bansihari, 8) Harirampur.

(iii) Total number of Towns/Villages etc. :

Total number of urban units in Dakshin Dinajpur is 2. One is Balurghat Municipality and the other is Gangarampur Municipality. There is no Census Town in this district.

Total number of villages in the district is 1,638.

(iv) If the district is newly created, the area from which it has been carved out :

Dakshin Dinajpur is a relatively new district of West Bengal. It is, in fact, tucked away in a corner of North Bengal. As a result of bifurcation of the erstwhile West Dinajpur of 1st April, 1992, Dakshin Dinajpur came into existence alongwith Uttar Dinajpur. The headquarter of the erstwhile West Dinajpur was retained as the headquarter of Dakshin Dinajpur at Balurghat. It is 450 Kms. away from kolkata. Total area of West Dinajpur, as per District Census Handbook, West Dinajpur, 1991 was 5,359 Sq. Kms. from which carved out area of Dakshin Dinajpur is 2,219 Sq. Kms.

(v) Urban Local Bodies :

The history of urban local bodies dates back in India to Indus Valley Civilisation. In modern India it originated during British rule when in 1687 the first Municipal Corporation was set up at Madras under a charter granted by James II. There are different types of municipal bodies, namely, Municipal Corporations, Municipalities, Notified Area Comittees, Cantonment Boards etc. Except the Cantonment Boards all other types are created under state municipal laws. Cantonment Boards owe their origin to the Central Act called Cantonment Acts, 1924. A municipality is a body politic and corporate, constituted by the incorporation of the inhabitants of a city or town. Municipal corporations constitute the highest or topmost form of urban local governments and are created for big cities by the enactment of state legislatures or of Parliament in case of union territories. A Notified Area Committee is created for an area which does not fulfil all the conditions laid down as necessary for the constitution of a municipality or it may also be created for newly developing towns or areas. The councils of all these corporate bodies except notified area comprise elected, opted and associate members. The notified area is governed by the state governments through a body nominated by it. The primary object of every urban local body is to provide civic amenities to the people and the overall development of the town.

As already stated, there are 2 municipalities in Dakshin Dinajpur, one is Balurghat and the other is Gangarampur. The municipality of Balurghat was constituted by Notifiacation No. M.1M-40/50(1) dated the 24th May, 1951 and the municipality of Gangarampur has been constituted after the Dakshin Dinajpur came into existence as a new district as per Notification No. 442/C-4/M.1M-5/90 dated 8th September, 1993.

Civil Administration :

The Civil Administration of the district consists of the District Magistrate as the Principal Executive with 2 Sub-divisional Officers being the sub-divisional heads and under them one Block Development Officer for each CD Block. Beside the Sadar Sub-division at Balurghat, the district has its second sub-division, the recently created Gangarampur with headquarter at Buniadpur. Under the police administration, Superintendent of Police is the head of the district and under him there are 2 Sub-divisional police officers with Inspector in charge / Officer in charge in each police station. At the district Head Quarter District Judge is the head of the Judiciary. The sub-divisional Judicial Magistrate sits in the Courts at the sub-divisional level.

Physical Features

(i) Location and size

The district Dakshin Dinajpur is located between 25º10'55" and 25º35'15" North Latitudes and 88º09'07" and 89º0'30" East Longitudes. The district is surrounded on the north, east and south-east by Bangladesh, on the South-west by Maldah District and on the West Uttar Dinajpur district of West Bengal. The area of the district is 2,219 Sq. Kms. and its rank in respect of area in the state is 16. The north to south extension of the district is 45 Kms and that of east to west is 85 Kms.

(ii) Physiography :

The general appearance of the district is flat, sloping gently southwards as is evident by the trend of rivers. The region seem to be continuation of 'Barind' tract - a geological formation if old alluvium. There is no hill in the district, but the surface is undulating. The elevation of the district from the mean Sea level is 15 metres.

The district can be divided into 2 sub-micro regions.

1. Sudhani-Mahananda-Gamari Plain - The region covers the northern part of the district. The region has a few clumps of trees suited to the tropical and moist type of climate, but Marshes are many forms by the overflowing of the rivers. These are also large number of tanks varying in size from splendid stretches of water to small confines.

2. Balurghat Plain - The region is a flat alluvial plain. It occupies the south-eastern part of the district. Many rivers are found flowing in this region from north to south. The Tangon, the Punarbhaba, the Atreyi and the Ichhamati are the important rivers of this region. The Tangon is a big river and during rain overflows its bank, and inundates. These are many banks in the district.

The elevation of the district form the mean sea level is 15 metres.

Flora & Fauna :

This district is by no means deficient in vegetation. Mango, jackfruits, custard apple, Khejur, tal, peach and coconut are available. Among the jungle trees babool, wild palm, pepul, banyan, nim,, tamarisk, sisoo, bamboo, simul are noteworthy. Here are to be found many species of grasses and reeds such as nagarmutha, nal, khaskhas and sola. Two type of cane, a thick and thin variety are found in this district. Presently extensive efforts are being taken for afforestation by the Govt. level. Wild animals were abundant till the first quarter of the nineteenth century. Among them Lepord, Wild pigs, Wild cats, were common.

(iii) Drainage :

There were large numbers of rivers in the undivided West Dinajpur. The general direction of the main rivers of Dakshin Dinajpur flow from north to south. The main river of the district is Punarbhaba, which is the tributary of Mahananda. Atrai, which is the important offshoot of Tista and it flows through the town Balurghat. Apart from this there are more rivers named as Tangon, Chhiramati, Baliakhari, Brahmani, Kesiani & Ghagra.In the rainy season the main rivers are navigable but in dry season they are either dry or dwindle to a string of pool.

The Punarbhaba enters the district across the northern boundary of the CD Block of Gangarampur and Tapan and then enters Bangladesh.For a part of its course it forms the boundary between the distrits of Malda and Dakshin Dinajpur. The Punarbhaba throws a shallow stream two miles north of Gangarampur which is known as Brahmani. The Brahmani traverses Gangarampur and Tapan CD Block and then leaves the district.

The Atrai enters the district on the north in Kumarganj and Balurghat CD Block. Both Kumarganj and Balurghat town are situated on the banks of the Atrai. The bed of the ri Atrai is wide, but the entire bed remains full of water only during the rains.

The Tangan river rises in that part of the Jalpaiguri district which now forms part of Bangladesh and enters the district of Dakshin Dinajpur at tri-junction point of Piraganj and Bochaganj Police Station of Bangladesh and Kaliganj CD Block. It passes through the CD Blocks of Kaliganj (Uttar Dinajpur),Kushmundi and

Bansihari and then enters the district of Malda. In some parts of its course it acts as the boundary between the CD Blocks of Gangarampur and Bansihari. The headquarter of Bansihari CD Block is situated on the bank of the Tangan. Tha Tangan is a fairly large river and usually overflows its banks during the rains thereby inundating some areas along its banks, although the extent of such inundation is usually not very alarming.

The Ichhamati originates in Bangladesh and runs almost parallel to the Atrai, keeping a safe ridge width of six to eoght miles. At its point of origin, it forms the boundary of Kumarganj CD Block and flowing through Kumarganj, joins the Atrai at Radhanagar. At lower reaches it also forms a boundary between Kumarganj and Balurghat CD Blocks.

The river Yamuna enters the district from the north at the eastern extremity of the Hilli CD Block and after flowing part of the town oh Hilli leaves the district and enters Bangladesh. The length of its course in the district is approximately three miles. It is a small river.

Main water features such as tank, lake reservoir etc.

Throughout the district tanks are common and numerous. These tanks points to an extensive system of tank irrigation. Their depth and high banks are best preserved in the khyar country, as in Bansihari, Kusumundi, Gangarampur and Tapan Blocks. The more famous tanks are Daldighi,Kaladighi, Pransagar in Gangarampur; Altadighi,Maliandighi, Gourdighi in Bansihari; Mahipaldighi in Kusmandi and Tapandighi in Tapan Block. These tanks are used for pisciculture, irrigation and other domestic purposes of the locality. There are also a number of marshes or Bills formed by the overflowing of rivers.

(iv) Climate

As this district is a constituent of North Bengal and is in close proximity to the Darjeeling or for that matter the Himalayan region, the climate is generally cool and comfortable through the major part of the year. The minimum temperature of the district lies within the range of 7º and 24º Celsius in the month of January and August respectively and maximum temperature lies within 23º and 41º in the month of December and May respectively. Meteorological condition of Dakshin Dinajpur is same as those of other districts of West Bengal during the winter season. Rainfall is associated with the passage of western disturbances traveling eastwards and consequent incursion of moisture from the Bay of Bengal, but they reach almost in a dissolving condition when they come over to this district. On the average 10 to 30 mm. rainfall occurs during whole winter season. Nor-wester generally passes over the district in the month of March and April. During March to April occurrences of squalls, cyclonic storm coupled with thunderstorms are regular feature with some rain.

	Dakshin Dinajpur	
Year	Maximum (in Celsius)	Minimum (in Celsius)
1991	36	7
1992	41	7
1993	37	8
1994	42	9
1995	42	6
1996	41	7
1997	40	7
1998	39	7
1999	37	7
2000	38	7

Normally pre-monsoon shower starts from late April, continues up to May, and places the district with congenial conditions for sowing of Jute and Aus paddy. Monsoon generally sets in late May and continues up to October. Usually monsoon withdraws by 10th October. Annual average day-night temperature varies from 17.5º Celsius to 33.4º Celsius. During the hot summer months, maximum temperature rises up to 39º Celsius and during the peak winter season, minimum temperature falls to as low as 3.5º Celsius.

Census Concepts

Building :

A 'building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, schools, places of entertainment, places of worship, godowns, stores, etc. It is also possible that buildings which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent Houses :

Houses, the walls and roof which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, brunt bricks, stones or concrete. Roof may be made of any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-Permanent Houses :

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary Houses :

Houses in which both walls and roof are made of materials which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch bamboo, wood, mud, plastic or polythene.

Dwelling Room :

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breath of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling room. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking etc. is regarded as dwelling room. In a situation where a census house is used as a shop or office etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant's quarter is used by a servant and if she/he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House :

A 'Census House' is a building or part of a building used or recognized as a separate unit because of having a separate main entrance from the road or common courtyard or, staircase, etc. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder :

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure

with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storied ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storied structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area there are separate buildings owned by different persons then each such building is treated a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building should treated as a separate building. But if in any of these buildings there are flats in occupation of different households, each such flat should be reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it should not be realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat should be treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in three rooms and the second household occupying two rooms, then considering the use, the first three rooms together should be treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ hotel building should be treated as one census house. But if such hostels/hotels have out-houses or other structures used for different purposes of the same purpose, then each structure attached to the main hostel/hotel should be treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bathroom, baithak etc. Though each of the huts is a separate structure, they form single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts should be treated separate census houses. However, if there are also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, work-shed etc., these should be treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number is given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up is treated as a building.

Rural-Urban Area :

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village'; for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows :

(a) All places with a municipality, municipal corporation, cantonment board or notified town area committee, etc.

(b) A place which satisfy or are expected to satisfy the following criteria simultaneously :

i) A minimum population of 5,000;

ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits; and

iii) A density of population of at least 400 per square kilometre (1,000 per square mile).

For identification of places which would qualify to be classified as 'urban', all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activities were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban areas under Urban Agglomerations. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., may have come up near a statutory town or city but these are within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

Household :

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Castes and Scheduled Tribes :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities, which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Castes in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given in the next page.

38 Savar

Language and Mother Tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate :

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate :

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational Level :

The highest level of education a person has completed.

Work :

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not

only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceeding the date of enumeration.

Main Worker :

A person who has worked for major part of the reference period (i.e. six months or more during the last one year precceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal Worker :

A person who worked for less than six months of the reference period (i.e. in the last one year preceeding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non Worker :

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceeding the date of enumeration) is termed as 'Non worker'.

Cultivator :

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural Labourer :

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household Industry Worker :

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other Worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work Participation Rate :

Percentage of workers (main + marginal) to total population.

Population Density :

Population density is the number of persons inhabited per square kilo-metre of the area.

Age :

Age is measured in terms of the completed number of years.

Sex-ratio :

Number of females per 1000 males in a population.

Non-Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.. It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns, which are not provided with such underground sewerage system, it is served by open surface drain, box drain, silk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil :

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the street sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil, which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below.

Crude birth rate (CBR) :

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid–year Population}} \times 1{,}000$$

Crude death rate (CDR) :

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate :

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR) :

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR) :

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR) :

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR) :

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years}} \times 1{,}000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = 5 \times \frac{\sum_{15\text{-}19}^{45\text{-}49} ASFR}{1{,}000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = 5 \times \frac{\sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1{,}000}$$

Age-specificMortality rate (ASMR) :

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q_1 :

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q_2 :

Probability of dying between birth and age 2.

q_5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal mortality rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or underduring the year}}{\text{Number of live births during the year}} \times 1,000$$

Early neo-natal mortality rate (ENMR) :

$$ENMR = \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1,000$$

Late neo-natal mortality rate(LNMR) :

$$LNMR = \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1,000$$

Post neo-natal mortality rate (PNMR) :

$$PNMR = \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1,000$$

Peri-natal mortality rate (PMR) :

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

Still birth rate (SBR) :

$$SBR = \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

Maternal mortality rate (MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 married women in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of married women aged 15-49}} \times 100,000$$

Eligible couple (Couples per 1000 population) :

Number of currently married females in the age group15-44 years per 1,000 persons of all ages.

Child woman ratio (0-4) :

Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9) :

Number of children in the age group 5-9 years per 1,000 women in the age group 15-49 years.

Migration :

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another

place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/ relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration :

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration :

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation / Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA / town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area :

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city :

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

Census Findings - Population & its distribution

Census Findings - Population & its distribution

Progress of Population

The final population total of West Bengal stands at 80,176,197 as on 00.00 hours of 1st of March 2001. West Bengal retains its position as the fourth largest state in India as in1991. West Bengal in 2001 has a share of 7.79 per cent of total population of India while it occupies only 2.70 per cent of the area. The population distribution of Dakshin Dinajpur for the last five decades has been shown in table-1 below :

TABLE-1 : RURAL AND URBAN POPULATION OF THE DISTRICT DAKSHIN DINAJPUR WITH PERCENTAGE TO TOTAL IN BRACKETS (1951-2001)

Census year	1951	1961	1971	1981	1991	2001
1	2	3	4	5	6	7
Total	**448,275**	**563,598**	**772,618**	**989,294**	**1,230,608**	**1,503,178**
Rural	421,808	520,896	684,625	847,845	1,066,383	1,306,324
	(94.1)	(92.4)	(88.6)	(85.7)	(86.7)	(86.9)
Urban	26,467	42,702	87,993	141,449	164,225	196,854
	(5.9)	(7.6)	(11.4)	(14.3)	(13.3)	(13.1)

(a) Distribution of population in rural-urban areas:

It can be seen from the above table that the total population in the district has increased significantly from 1951 to 2001. It is mainly due to the constant increase in urban population which was 5.9 per cent in 1951 has gone upto 14.3 per cent in 1981 and declined to 13.3 per cent in 1991 and again slightly decreased in 2001 (13.1 per cent). Rapid urbanisation after 1961 is reflected by the increasing urban population.

(b) Size, Class and status of town :

There are two municipalities in Dakshin Dinajpur that is Balurghat and Gangarampur. Balurghat with a population of 1,35,737 belongs to class-I and Gangarampur with population 53,533 falls in class - II category as per census classification.

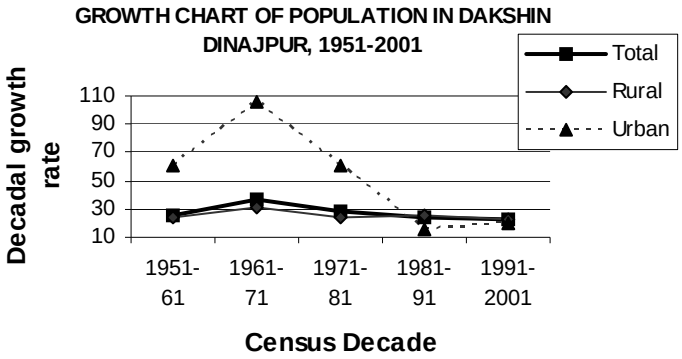

Growth Rate :

The one of the most important point of information of the district is the population growth rate during the last decade. The decennial growth rate between 1991 to 2001 for the country, state and the district indicates the success and failure in our attempt of population control, which is now one of the most important agenda before the nation. So far the state of West Bengal is concerned the decennial growth rate has decreased from 24.7 per cent in 1981-1991 to 17.8 per cent in between 1991-2001. Thus the decennial growth rate in the last decade has gone down by 6.9 per cent points as compared to previous decade. An over all picture of the growth rate of Dakshin Dinajpur district for the last five decades can be observed from Table - 2 below :

TABLE - 2 : DECADAL GROWTH RATE OF POPULATION, DAKSHIN DINAJPUR (1951-2001)

T/R/U	1951-61	1961-71	1971-81	1981-91	1991-2001
1	2	3	4	5	6
Total	**25.7**	**37.1**	**28.0**	**24.4**	**22.2**
Rural	23.5	31.4	23.8	25.8	22.5
Urban	61.3	106.1	60.8	16.1	19.9

It is observed from the above table that total growth rate of population since 1951-61 to 1991-2001 has shown continuous declining trend except a considerable increase in 1961-71. The urban growth rate has been much fluctuating as compared to that of rural. It is interesting to note that during 1981-91 and 1991-2001, urban growth rate is lower than rural growth rate. The highest total, rural and urban growth rate have been recorded in 1961-71.

The above chart shows that total and rural growth rate of the district has followed almost the same trend since 1951-61 to 1991-2001. In 1961-71 urban growth rate reached the peak compared to that of toal and rural and after 1971-81 it is even lower than the total and rural.

Sub district level :

Among the 8 blocks of Dakshin Dinajpur district highest growth rate has been observed in Hilli (25.0) followed by Harirampur (24.7) and Bansihari (24.6). Gangarampur has the lowest growth rate of 1.0 per cent due to declassification of urban population in 2001.

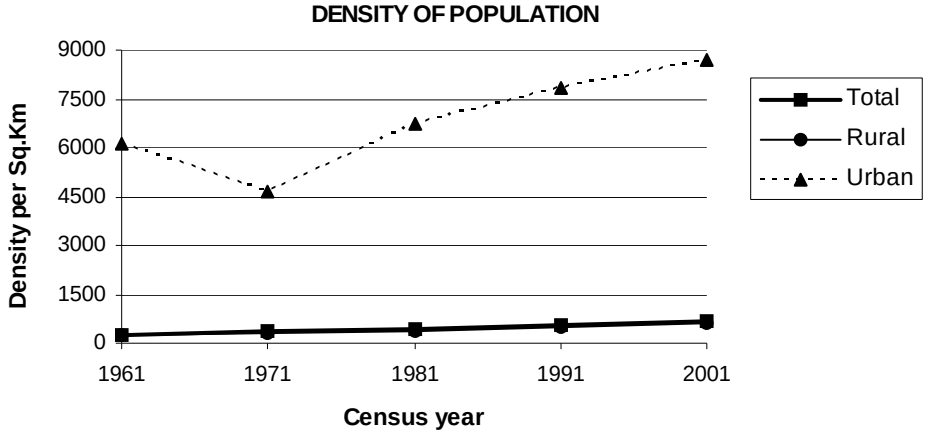

Density of population

Dakshin Dinajpur had density of population at 555 persons per sq. km. in 1991 but it has gone up to 677 per sq. km. in 2001. The rank of the district has remained unchanged being 13th in the State in 2001. The rural-urban trend of density of the district can be observed in the Table-3 below :

TABLE - 3 : DENSITY OF POPULATION, DAKSHIN DINAJPUR (1961-2001)

T/R/U	1961	1971	1981	1991	2001
Total	**254**	**348**	**446**	**555**	**677**
Rural	235	311	386	485	595
Urban	6,100	4,631	6,736	7,817	8,672

It is observed from the above table that from 1961 density of total and rural population shows a consistent growth but urban density increases very rapidly from 1981.

The above chart shows that the density of population in the district gradually increased from 1961. This trend is also true for rural areas. But the increase for the total and rural areas over last 5 decades has been marginal. The increase of density in the urban areas has been very high except a decline in 1971.

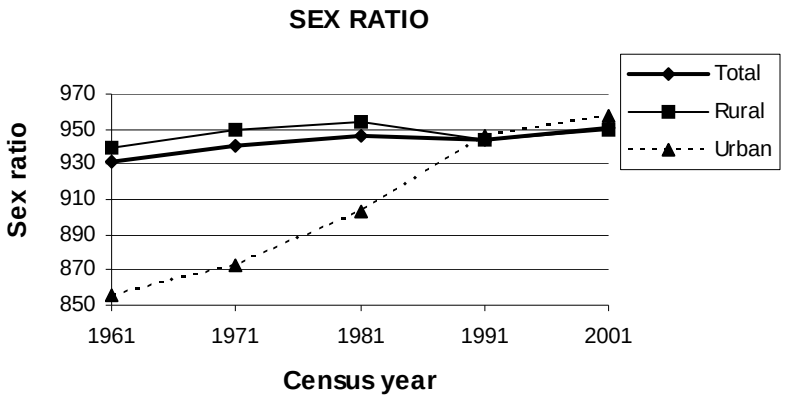

Sex ratio

The sex ratio has been a very important demographic issue in every Census. Since 1951 there has been increase of sex ratio in favour of female in the state. The sex ratio has been increased from 917 females per 1,000 males in 1991 to 934 females per 1,000 male in 2001 in the State whereas the sex ratio of the district has gone up from 944 in 1991 to 951 in 2001. For the last 50 years the rural urban sex ratio of the district has been shown in table-4 below :

TABLE - 4 : SEX-RATIO IN DAKSHIN DINAJPUR DISTRICT (1951-2001)

	Sex Ratio		
Census Year	Total	Rural	Urban
1961	932	939	856
1971	941	950	873
1981	946	954	903
1991	944	944	946
2001	951	950	958

The above table shows that barring 1991, there has been continuous improvement in the sex ratio of the district. It is interesting to note that the urban sex ratio is higher than the rural sex ratio in 1991 and 2001.

It is observed from the chart that the sex ratio in the district over 5 decades has remained almost constant. Rural sex ratio is little above the total though it exhibits the same trend. But the decadal sex ratio in urban has witnessed an increasing trend till 2001.

Sub district level sex ratio :

Among the rural areas of Dakshin Dinajpur Hairrampur and Kushmundi has recorded the highest sex ratio with 964 females per 1,000 males and lowest sex ratio has been observed in Balurghat. Among the two municipalities highest sex ratio of 971 has been recorded in Balurghat Municipality.

Work participation rate

The economic data for 2001 Census have been presented according to four broad classification of workers. The work participation by persons in the district as well as in the State can be found in the table below :

TABLE-5 : PERCENTAGE OF TOTAL WORKER (MAIN + MARGINAL) TO TOTAL POPULATION (1951-2001)

	Dakshin Dinajpur			West Bengal		
Year	Total	Rural	Urban	Total	Rural	Urban
1951	29.8	29.7	31.4	34.7	32.6	40.9
1961	32.7	33.1	27.8	33.2	32.7	34.7
1971	28.0	28.4	23.6	27.9	27.2	30.1
1981	32.1	32.8	25.8	30.2	30.3	29.8
1991	34.9	36.3	25.9	32.2	33.2	29.6
2001	40.8	42.1	31.7	36.8	37.9	33.9

Note : 1. Concept of Main workers and Marginal workers was introduced in 1981

2. Till 1991 both Uttar and Dakshin Dinajpur were undivided West Dinajpur District which was bifurcated subsequent to 1991. As such these figures are common for both the districts upto 1981. 1991 data have been recasted.

From the above table it is observed that work participation rate (main + marginal) in the district has shown an increasing trend since 1951 to 2001, excepting the year 1971 when it has decreased to the extent of 4.7 per cent. The years 1991 and 2001 relates to Dakshin Dinajpur district, where work participation rate in the district was higher as compared to the state figures. It has been possible because of higher work participation in the rural area of the district. The proportion of main workers in male and female population can be observed in the table below :

TABLE-6 : PERCENTAGE OF MAIN WORKERS TO TOTAL POPULATION BY SEX (1951-2001)

	Dakshin Dinajpur			West Bengal		
Year	Person	Male	Female	Person	Male	Female
1951	29.8	49.9	6.9	34.7	54.8	11.3
1961	32.7	56.5	6.5	33.2	54.0	9.4
1971	28.0	51.2	2.8	27.9	48.8	4.4
1981	29.9	52.6	5.6	28.3	48.7	5.8
1991	33.3	54.3	11.0	30.2	50.7	8.0
2001	31.4	50.1	11.7	28.7	47.0	9.1

Note : 1. Concept of Main workers and Marginal workers was introduced in 1981

2. Till 1991 both Uttar and Dakshin Dinajpur were undivided West Dinajpur District which was bifurcated subsequent to 1991. As such these figures are common for both the districts upto 1981. 1991 data have been recasted.

It is observed that percentage of main worker to total population in the district since 1971 is higher than the state percentage. It is also observed from the above table that during 1961-2001 the proportion of male main workers in West Dinajpur was higher as compared to State's male work participation. But it is observed only in 1991 and 2001 relating to Dakshin Dinajpur that the proportion of main female worker is higher as compared to the corresponding figures of the State.

Comparative trend of literacy rate

Any development process anywhere in the world is to a large extent attributable to the increase in literacy rate. It is indeed one of the major failures that even after more than 50 years since Independence we are still far from achieving total literacy in our country. But there has been a drive for achieving total literacy as undertaken by National literacy Mission since more than a decade. The compaign on total literacy has been initiated in all the districts of the State and this has been reflected in the improved literacy rate during the last decade. The table below shows that literacy rate in the district is much lower than that of the State's average literacy rate for the last 50 years.

TABLE – 7 : COMPARATIVE LITERACY RATE BY SEX AND RESIDENCE, DAKSHIN DINAJPUR AND WEST BENGAL WITH CHANGE IN DECENNIAL PERCENTAGE POINT IN PARENTHESIS (1951-2001)

		West Bengal			Dakshin Dinajpur		
Year	T/R/U	P	M	F	P	M	F
1	2	3	4	5	6	7	8
1951	T	25.0	34.7	13.2	14.0	22.7	4.0
	R	18.8	28.9	7.6	12.8	21.5	3.0
	U	45.7	51.0	37.1	46.5	51.3	38.4
1961	T	34.5	46.6	20.3	20.7	31.0	8.9
		(9.5)	(11.9)	(7.1)	(6.7)	(8.3)	(4.9)
	R	25.8	38.9	11.7	17.7	28.2	6.0
		(7.1)	(10.0)	(4.2)	(4.9)	(6.7)	(3.0)
	U	59.6	66.0	50.0	55.9	63.7	46.1
		(13.8)	(15.0)	(12.9)	(9.4)	(12.4)	(7.7)
1971	T	38.9	49.6	26.6	27.0	37.6	15.3
		(4.4)	(3.0)	(6.3)	(6.4)	(6.6)	(6.4)
	R	30.6	42.3	18.1	23.0	33.9	11.0
		(4.8)	(3.4)	(6.3)	(5.3)	(5.7)	(5.1)
	U	62.3	68.2	54.1	63.2	69.8	55.3
		(2.7)	(2.2)	(4.1)	(7.3)	(6.1)	(9.3)
1981	T	46.3	57.0	34.4	31.1	41.5	19.8
		(7.5)	(7.5)	(7.9)	(4.0)	(3.9)	(4.5)
	R	37.9	49.7	25.3	26.1	36.9	14.5
		(7.3)	(7.4)	(7.3)	(3.1)	(3.0)	(3.5)
	U	68.7	75.2	60.7	68.7	75.5	61.0
		(6.5)	(7.0)	(6.6)	(5.5)	(5.7)	(5.7)
1991	T	57.7	67.8	46.6	46.4	56.8	35.3
		(11.4)	(10.8)	(12.1)	(15.4)	(15.3)	(15.5)
	R	50.5	62.1	38.1	41.0	52.1	29.1
		(12.6)	(12.3)	(12.8)	(14.9)	(15.2)	(14.5)
	U	75.3	81.2	68.3	79.9	85.5	74.0
		(6.5)	(6.0)	(7.5)	(11.2)	(9.9)	(13.0)
2001	T	68.6	77.0	59.6	63.6	72.4	54.3
		(11.1)	(9.2)	(13.1)	(17.2)	(15.7)	(19.0)
	R	63.4	73.1	53.2	60.4	69.9	50.3
		(12.9)	(11.1)	(15.0)	(19.4)	(17.9)	(21.3)
	U	81.3	86.1	75.7	83.3	87.8	78.6
		(6.0)	(4.9)	(7.5)	(3.4)	(2.4)	(4.5)

Note : 1) Upto 1971 Literacy Rate was calculated excluding 0-4 age group population. From 1981 onwards Literacy Rate is calculated excluding 0-6 age group population.

2) Till 1991 both Uttar and Dakshin Dinajpur were undivided West Dinajpur District which was bifurcated subsequent to 1991. As such these figures are common for both the districts upto 1981. 1991 data have been recasted.

It is seen from the above table that from 1951 upto 2001, literacy rate of the district is lower than the literacy rate of the State. During this period literacy rate of the district for both male and female all along was low as compared to the State figures. But during the same period percentage point increase of total literacy rate except 1961 and 1981, district figure is higher than the State figure. The same trend has been observed in the literacy rate of both male and female persons.

Sub district level :

Among the 8 CD Blocks in rural areas of Dakshin Dinajpur highest literacy is observed in Kumarganj CD Block (65.8 per cent) followed by Balurghat (64.5 per cent) and Hilli (64.2 per cent).

The highest rural male literacy rate has been recorded in Balurghat (74.6 per cent) while female literates are highest in Kumarganj (56.9 per cent). The lowest literacy rate is observed in Harirampur (52.8 per cent) which also has the lowest male and female literacy rate (63.0 per cent for male and 42.3 per cent for female). Among the urban areas of the district Balurghat has recorded the highest literacy rate (86.0 per cent). This municipality also has the highest male (89.8 per cent) and female (82.1 per cent) literacy rate

among the urban areas.

Religion

Religion is one of the basic cultural characteristics of the population. In a secular country like India, several religions have thrived and every decennial census has attempted to provide an interesting picture of the religious persuasion of the people of the country. The data on religious practised by person gives the content of population of each of the six major religious communities, viz, Hindus, Muslims, Christians, Sikhs, Buddhists and Jains and combined figures for 'other religions and persuasions' and 'religion not stated' by total. The table-8 gives the distribution of population by religion for the last 40 year of the district.

TABLE – 8 : POPULATION BY RELIGION, DAKSHIN DINAJPUR DISTRICT (1961-2001)

Year	Hindus	Muslims	Christians	Jains	Sikhs	Buddhists	Other Religions and Persuasions	Religion Not Stated	Total Population
	1	2	3	4	5	6	7	8	9
1961	792,534	521,758	8,491	904	18	92	-	-	1,323,797
	(59.9)	(39.4)	(0.6)	(0.1)	(0.0)	(0.0)			
1971	1,172,930	667,547	17,750	970	116	167	407	-	1,859,887
	(63.1)	(35.9)	(1.0)	(0.1)	(0.0)	(0.0)	(0.0)		
1981	1,521,416	860,797	19,481	1,604	153	279	1,217	-	2,404,947
	(63.3)	(35.8)	(0.8)	(0.1)	(0.0)	(0.0)	(0.1)		
1991	926,860	289,279	13,643	165	21	35	603	2	1,230,608
	(75.3)	(23.5)	(1.1)	(0.0)	(0.0)	(0.0)	(0.0)	(0.0)	
2001	1,112,575	361,047	22,039	235	215	175	6,028	864	1,503,178
	(74.0)	(24.0)	(1.5)	(0.0)	(0.0)	(0.0)	(0.4)	(0.1)	

Note : 1 Figures within brackets indicate percentage to total population

2 Till 1991 both Uttar and Dakshin Dinajpur were undivided West Dinajpur District which was bifurcated subsequent to 1991. As such these figures are common for both the districts upto 1981. 1991 data have been recasted.

During the 2001 Census a majority of population in the district are Hindus followed by Muslims, Christians, Jains, Sikhs and Buddhists in that order. The sudden increase in the percentage of Hindu population and corresponding decline in Muslim population between 1981-1991 is of course due to bifurcation of the district subsequent to 1991.

TABLE-9 : AVAILABILITY OF UNIVERSITY EDUCATION IN THE DISRICT OF DAKSHIN DINAJPUR

Serial Number	Name of the University	Total No of Universities	Remarks
There is no university in this District			

Brief Analysis of Inset Tables based on PCA (1-36)

TABLE 1 : DECADAL CHANGE IN POPULATION OF CD BLOCK/TOWN BY RESIDENCE, 1991-2001

Serial Number	CD Block /Town	Population 1991 Total	1991 Rural	1991 Urban	Population 2001 Total	2001 Rural	2001 Urban	Percentage decadal variation 1991-2001 Total	Rural	Urban	Percentage urban population 1991	2001
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Kushmundi	144,470	144,470	-	175,086	175,086	0	21.2	21.2	-	0.0	0.0
2	Gangarampur	204,518	173,341	31,177	206,640	206,640	0	1.0	19.2	-100.0	15.2	0.0
3	Kumarganj	129,676	129,676	-	153,042	153,042	0	18.0	18.0	-	0.0	0.0
4	Hilli	61,806	54,983	6,823	77,250	77,250	0	25.0	40.5	-100.0	11.0	0.0
5	Balurghat	185,204	178,775	6,429	228,736	221,152	7,584	23.5	23.7	18.0	3.5	3.3
6	Tapan	186,953	186,953	-	226,136	226,136	0	21.0	21.0	-	0.0	0.0
7	Bansihari	98,027	98,027	-	122,091	122,091	0	24.6	24.6	-	0.0	0.0
8	Harirampur	100,158	100,158	-	124,927	124,927	0	24.7	24.7	-	0.0	0.0
9	Gangarampur (M)	-	-	-	53,533	-	53,533	-	-	-	-	
10	Balurghat (M)	119,796	-	119,796	135,737	-	135,737	13.3	-	13.3	100.0	
	District Total :	**1,230,608**	**1,066,383**	**164,225**	**1,503,178**	**1,306,324**	**196,854**	**22.2**	**22.5**	**19.9**	**13.3**	**13.1**

Table 1 shows during 1991-2001 rural growth (22.5 per cent) is marginally higher as against the overall growth of the district (22.2 per cent). The urban growth is lower than that of the district. Among the 8 CD blocks, Hilli has recorded the highest growth rate with 25.0 per cent and Gangarampur has the lowest growth rate of 1.0 per cent due to inclusion of some parts of this CD Block in the Gangarampur Municipality in 2001. The high growth rate of Hilli may be a result of cross border migration. In rest of other CD Blocks there is 18 to 24.7 per cent of decadal growth. Going by the district's rural frame, Kumarganj CD Block shows the lowest growth of 18.0 per cent. Balurghat CD Block is the only CD Block which contains urban population in 2001. The cent per cent decline in urban population of Gangarampur and Hilli CD Block may be attributed to notification of Gangarampur census town of 1991 as statutory town in 2001 and declassification of Hilli census town of 1991 in 2001 respectively.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Serial Number	District / CD Block	Total number of inhabited villages	Total rural population Persons	Males	Females	Number and percentage of villages	Population less than 200 Males	Females	Number and percentage of villages

The total number of inhabited villages in Dakshin Dinajpur district is 1,579 spread over 8 CD Blocks. Among them Balurghat has the highest number of villages with 296 and Hilli with 78 villages has the lowest number. In this district there is no village which has population size above 10,000. The highest population range of this district is 5,000-9,999, which is found in only 6 villages (0.4 per cent). The lowest population size of less than 200 is found in only 173 villages (11.0 per cent). 510 villages (32.3 per cent) have population size of 500-999 and 481 villages (30.5 per cent) have population size 200-499. Rest of the population range categories altogether comprise only 409 villages (25.9 per cent) of the total inhabited villages in the district.

3.	Dakshin Dinajpur	05	1	Hilli (NM)
(D) WHOLLY MERGED WITH OTHER TOWN (S)				
4	Dakshin Dinajpur	05	1	Gangarampur (NM)

Note : Declassified means the Census Towns of 1991 census which failed to satisfy the demographic and economic criteria.

As per table 3 only one new statutory town has been created in Dakshin Dinajpur District at the 2001 census. Hilli, a non-municipal town of 1991 census has been declassified in 2001 for its failure to be identified as Census town based on demographic and economic criteria. Gangarampur, a non-municipal town of 1991 has got the status of statutory town with municipality in 2001 Census.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	2	0.1	6	0.0
11-20	1	0.1	11	0.0
21-50	12	0.8	369	0.0
51-100	25	1.6	2,175	0.2
101-200	83	5.3	15,118	1.2
201-300	148	9.4	48,054	3.7
301-500	459	29.1	294,358	22.5
501 +	849	53.8	946,233	72.4
Not known	0	0.0	0	0.0
District Total :	**1,579**	**100.0**	**1,306,324**	**100.0**
Population Density (Rural) of the district :		**595.6**		

As per table 4, the population density of rural Dakshin Dinajpur is around 596 persons per square kilometre. Out of 1,579 villages highest percentage of villages (53.8) falls in the highest population density range of 501 and above accounting for 72.4 percentage of the total rural population. Almost three quarter of the total villages are densely populated. The 2nd highest number of villages is 459 in the density range of 301-500 per square km. Only 2 villages have the lowest population density of range 0-10 per sq. km. There is a general trend of the villages to increase in number with the increase in the range of population density.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT - 1901-2001

Census year	West Bengal			Dakshin Dinajpur		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	945	994	650	918	-	-
1911	925	982	614	920	-	-
1921	905	971	591	929	-	-
1931	890	961	578	923	-	-
1941	852	945	559	910	-	-
1951	865	939	660	-	-	-
1961	878	943	701	932	939	856
1971	891	942	751	941	950	873
1981	911	947	819	946	954	903
1991	917	940	858	944	944	946
2001	934	950	893	951	950	958

Note : Sex ratio has been defined here as the number of Females per 1,000 Males.

During 1901-2001 Dinajpur district always had greater sex ratio than the state average except the first two decades of 1901 and 1911. It is also true for Dakshin Dinajpur that in 2001 rural sex ratio (950) is at par with the corresponding state average and the urban sex ratio is much higher than that of state urban. The sex ratio of the state has continuously declined from 1901-1941 and then continuously increased upto 2001 but in case of the district, it is increased upto 1921 then declined during 1931–1941 again increased during 1961–1981, slightly declined again in 1991 and has gone up in 2001 exhibiting no definite trend. When the sex ratio of 2001 is compared with the corresponding sex ratio of 1901 it is noticed that the sex ratio of West Bengal has declined from 945 in 1901 to 934 in 2001, while during the same period the sex ratio of Dakshin Dinajpur has gone up from 918 to 951.

TABLE 6 : SEX RATIO BY CD BLOCKS, 2001

Serial Number	Name of CD Block	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Kushmundi	964	964	-
2	Gangarampur	941	941	-
3	Kumarganj	946	946	-
4	Hilli	954	954	-
5	Balurghat	939	939	948
6	Tapan	953	953	-
7	Bansihari	952	952	-
8	Harirampur	964	964	-
District Total :		**951**	**950**	**958**

Table 6 represents the sex ratio of 8 CD Blocks of Dakshin Dinajpur by residence. Highest sex ratio of 964 is observed in the Blocks of Kushmundi and Harirampur. Balurghat has the lowest sex ratio with 939 in rural frame. In this district only Balurghat CD Block has urban population with sex ratio of 948 which falls below the district urban total.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial Number	Name of CD Block	Sex ratio
1	2	3
1	Kushmundi	964
2	Gangarampur	941
3	Kumarganj	946
4	Hilli	954
5	Balurghat	939
6	Tapan	953
7	Bansihari	952
8	Harirampur	964
District (Rural) Total :		**950**

Table 7 represents the sex ratio of Dakshin Dinajpur exclusively at rural level. Among the 8 blocks, 5 have greater sex ratio than the rural total of 950 and the rest have sex ratio less than the rural total. Kushmundi and Harirampur have the highest sex ratio of 964, where as Balurghat has the lowest sex ratio of 939.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	8	0.5	1,959	0.1
700-749	12	0.8	7,399	0.6
750-799	16	1.0	4,869	0.4
800-849	84	5.3	39,397	3.0
850-899	191	12.1	145,916	11.2
900-949	434	27.5	433,998	33.2
950-999	416	26.3	421,829	32.3
1,000-1,099	362	22.9	232,789	17.8
1,100+	56	3.5	18,168	1.4
District Total :	**1,579**	**100.0**	**1,306,324**	**100.0**
Sex ratio (Rural) for District :		**950**		

It is evident from the table that the maximum number of villages (434) falls in the sex ratio range of 900-949 and the second highest, 416 villages in the range of 950-999 as against the district average sex ratio of 950. 8 villages accounting for 0.1 per cent of total population and 0.5 per cent of the total villages come under the lowest range of less than 700. The highest sex ratio range of 1,100 and above is found in 56 villages (3.5 per cent). Among 1,579 villages, 834 villages have (52.7 per cent) sex ratio of 950 or more, the district average. It can be concluded that 418 (26.4 per cent) of the total villages of this district have a sex ratio of 1,000 and above.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial Number	Name of UA / Town	Urban status of town	Sex ratio
1	2	3	4
1	**Balurghat**	**UA**	**970**
	(a) Balurghat	M+OG	970
	(i) Balurghat	M	971
2	Gangarampur	M	927
Sex ratio (Urban) for the district :			**958**

Gangarampur municipality has the lower sex ratio 927 and Balurghat municipality has higher (971) sex ratio than the urban district average (958).

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR CD BLOCKS, 2001

District (Rural) Total :		**225,482**	**114,676**	**110,806**	**966**

Table 11 shows that the rural population of Dakshin Dinajpur, in the age group of 0-6, is 225,482 comprising 114,676 males and 110,806 females giving a sex ratio of 966. In this age group, Banshihari CD Block has the highest sex ratio with 975 and Kushmundi has the lowest sex ratio of 953. Further, 4 CD Blocks have a higher sex ratio in the range from 971 to 975 and 4 have lower sex ratio in the range of 953 to 964 as compared to the district average (966).

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	146	9.2	9,060	4.0
700-749	70	4.4	6,968	3.1
750-799	96	6.1	11,493	5.1
800-849	120	7.6	18,919	8.4
850-899	117	7.4	19,435	8.6
900-949	159	10.1	30,752	13.6
950-999	146	9.2	31,495	14.0
1,000-1,099	318	20.1	54,245	24.1
1,100+	407	25.8	43,115	19.1
District (Rural) Total :	**1,579**	**100.0**	**225,482**	**100.0**
Sex ratio (Rural) for District :		**966**		

The child population living in the 1,579 villages, up to age of six, is 225,482. The highest sex ratio range 1100 and above is observed in 25.8 per cent of the villages which constitutes 19.1 per cent of the population. The maximum population (24.1 per cent) live in 318 villages which correspond to the sex ratio range of 1,000-1,099. While minimum population of 3.1 per cent (6,968), of age group 0-6, live in 4.4 per cent (70) of total villages having 700-749 sex ratio range. It is also noted that 146 villages (9.2 per cent) have extremely low sex ratio of less than 700.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial Number	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group

	District (Rural) Total :	**1,306,324**	**397,599**	**236,271**	**30.4**	**18.1**

Table 15 presents that the scheduled caste and scheduled tribe population in CD Blocks of Dakshin Dinajpur district at exclusively rural level. Here total rural scheduled caste population is 397,599 and total rural scheduled tribe population is 236,271 which shares 30.4 and 18.1 per cent of the total rural population of the district respectively. Except Kushumundi and Tapan which have highest (44.4 per cent) and second highest (33.5 per cent) percentage of scheduled castes population respectively, rest of the CD Blocks all have lower percentage of scheduled caste population than the rural district average (30.4). On the other hand, 3 CD Blocks namely Balurghat (26.1), Tapan (22.3) and Banshihari (19.9) have greater percentage of scheduled tribe population than the rural district average (18.1), while other 5 CD Blocks have lower proportion.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	336	21.3	0	0.0
Less than 5	138	8.7	2,916	0.7
5-10	122	7.7	8,830	2.2
11-20	208	13.2	36,640	9.2
21-30	162	10.3	42,504	10.7
31-40	137	8.7	58,461	14.7
41-50	122	7.7	54,888	13.8
51-75	171	10.8	102,719	25.8
76 and above	183	11.6	90,641	22.8
District Total :	**1,579**	**100.0**	**397,599**	**100.0**

As per table 16 the total rural scheduled caste population of Dakshin Dinajpur is 397,599 which is scattered in 1,243 villages (78.7 per cent) out of total 1579 inhabited villages. Out of them, 183 villages having 22.8 per cent of the total population being scheduled castes fall in the highest range of 76 per cent and above. Highest percentage of scheduled caste population (25.8 per cent) live in 171 villages fall under percentage range of 51-75 and there are 138 villages (8.7 per cent) which have less than 5 percentage of scheduled caste population of the total population of the respective villages.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	429	27.2	0	0.0
Less than 5	132	8.4	3,170	1.3
5-10	160	10.1	14,401	6.1
11-20	225	14.2	40,967	17.3
21-30	179	11.3	43,665	18.5
31-40	143	9.1	37,488	15.9
41-50	93	5.9	31,375	13.3
51-75	122	7.7	40,634	17.2
76 and above	96	6.1	24,571	10.4
District Total :	**1,579**	**100.0**	**236,271**	**100.0**

It is seen from table 17 that the total rural scheduled tribe population of Dakshin Dinajpur is 236,271 living in 1,150 villages out of total 1,579 villages as 429 villages have not recorded scheduled tribe population. There are 96 villages where the percentage of scheduled tribe population is 76 and above of the total population in the respective villages. The maximum percentage of scheduled tribe population 18.5 of the district is scattered over 179 villages. In these villages the percentage range of scheduled tribe population is 21-30. The minimum percentage of scheduled tribe population (1.3) is distributed over 132 villages, where the percentage range is less than 5.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial Number	Name of UA / Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	**Balurghat (UA)**	**143,321**	**17,861**	**2,956**	**12.5**	**2.1**
	(a) Balurghat (M+OG)	143,321	17,861	2,956	12.5	2.1
	(i) Balurghat (M)	135,737	16,611	2,906	12.2	2.1
2	Gangarampur (M)	53,533	17,200	3,090	32.1	5.8
	District(Urban) Total :	**196,854**	**35,061**	**6,046**	**17.8**	**3.1**

It is evident from table 18 that among the total urban population of the district (196,854) 17.8 per cent belongs to scheduled caste and 3.1 per cent belongs to scheduled tribe population. Gangarampur Municipality has the higher proportion of scheduled caste and scheduled tribe population both with 32.1 and 5.8 per cent respectively as compared with State average.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN CD BLOCKS, 2001

Serial Number	Name of CD Block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Kushmundi	951	996
2	Gangarampur	944	979
3	Kumarganj	950	974
4	Hilli	965	974
5	Balurghat	944	970
6	Tapan	948	985
7	Bansihari	942	981
8	Harirampur	961	996
	District (Rural) Total :	**949**	**980**

Table 19 shows that the overall sex ratio among the rural scheduled caste population is 949 which is slightly lower than the rural district average (950). Hilli CD Block with 965 has the highest and Bansihari (942) has the lowest scheduled caste sex ratio. In the case of rural scheduled tribes population, the sex is 980 which is much greater than district's rural average (950). Harirampur and Kushmundi have the same sex ratio (996) which is the highest. Similarly, Kumarganj and Hilli have the same sex ratio (974). Balurghat CD Block has the lowest scheduled tribe sex ratio at 970.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial Number	Name of UA / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	**Balurghat (UA)**	**957**	**949**
	(a) Balurghat (M+OG)	957	949
	(i) Balurghat (M)	955	948
2	Gangarampur (M)	927	937
	Sex ratio (Urban) for the district :	**942**	**943**

As per the above Table no. 20, it is seen that the urban scheduled caste sex ratio of Dakshin Dinajpur district is 942 and scheduled tribe sex ratio is 943. In Gangarampur Municipality the sex ratio of both scheduled caste and scheduled tribe is below the district average.

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY CD BLOCKS, 2001

In 2001 census Dakshin Dinajpur has a total of 799,479 literate population of which 467,296 are males and 3,32,183 females account for 72.4 and 54.3 per cent respectively. Rural male-female literacy gap is higher (19.6) than the corresponding district total. The urban literacy gap among male-female is almost half (9.3) of district total (18.2). It indicates that the males are more privileged in rural areas whereas in urban areas such divisions among male-female education are less. Among the CD Blocks, Kumarganj is most literate block with literacy percentage of 65.8 while Harirampur has the lowest literacy rate of 52.8 per cent. By sex the highest male and female literacy rate is recorded in Balurghat and Kumarganj CD Block respectively with 74.9 and 56.9 per cent. Only Balurghat has urban units where male and female literates account for 84.1 and 72.0 per cent respectively. Male-female literacy gap is maximum both in Kushmundi and Bansihari with 21.2 each and minimum in Kumarganj (17.3).

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN CD BLOCKS, 2001

Serial Number	Name of CD Block	Number of literates and illiterates									Gap in male-female literacy rate
		Number of literates			Number of illiterates			Percentage of literates			
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

7	Bansihari	59,949	36,157	23,792	62,142	26,377	35,765	59.0	69.3	48.1	21.2
8	Harirampur	52,810	32,047	20,763	72,117	31,548	40,569	52.8	63.0	42.3	20.7
District (Rural) Total :		**652,646**	**388,207**	**264,439**	**653,678**	**281,589**	**372,089**	**60.4**	**69.9**	**50.3**	**19.6**

Table 22 presents rural literacy scenario among 8 CD Blocks of rural areas of Dakshin Dinajpur district. It can be seen from the above table that the overall literacy rate for the rural areas of the district is 60.4 (male 69.9, female 50.3). The CD Blocks - Kumarganj, Balurghat, Hilli and Gangarampur have registered higher literacy rate than the rural district average. Kushmundi, Harirampur, Tapan and Bansihari have recorded lower literacy rate than that of rural district average. The literacy position by sex indicates that the highest male literacy is reported from Balurghat (74.5) while the lowest is in Harirampur CDBlock (63). In case of female literacy the highest literacy rate is registered by Kumarganj CD Block (56.9) and the lowest by Harirampur CD Block having 42.3 per cent female literates.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	2	0.1	6	0.0
1-10	2	0.1	164	0.0
11-20	13	0.8	3,126	0.2
21-30	31	2.0	12,350	0.9
31-40	104	6.6	52,313	4.0
41-50	251	15.9	197,653	15.1
51-60	403	25.5	366,119	28.0
61-70	444	28.1	416,006	31.8
71-80	249	15.8	215,376	16.5
81-90	75	4.7	42,496	3.3
91-99	3	0.2	648	0.0
100	2	0.1	67	0.0
District Total :	**1,579**	**100.0**	**1,306,324**	**100.0**
Literacy rate for District :		**63.6**		

Table 23 shows the distribution of 1,579 villages of Dakshin Dinajpur district by literacy rate range. It can be observed from the above table that there are two inhabited villages in which there is no literate and two inhabited village of total literate. However the share of these villages to rural district population is negligible. The above table also indicates that as the literacy rate increases from the base level, the number of inhabited villages, their percentage distribution, population and percentage distribution of population increases up to literacy rate range 61-70. Thereafter all variables start to decline. The highest number of villages (444), along with highest percentage distribution of villages (28.1), with highest population (416,006) and maximum percentage share of population (31.8) fall in the literacy range of 61-70.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial Number	Name and urban status of UA /Town	Number of literates and illiterates									Gap in male-female literacy rate
		Number of literates			Number of illiterates			Percentage of literates			
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	**Balurghat (UA)**	**111,360**	**59,085**	**52,275**	**31,961**	**13,679**	**18,282**	**85.6**	**89.5**	**81.6**	**7.9**
	(a) Balurghat (M+OG)	111,360	59,085	52,275	31,961	13,679	18,282	85.6	89.5	81.6	7.9
	(i) Balurghat (M)	106,025	56,131	49,894	29,712	12,740	16,972	86.0	89.8	82.1	7.7
2	Gangarampur (M)	35,473	20,004	15,469	18,060	7,771	10,289	76.8	83.3	69.8	13.5
	District (Urban) Total :	**146,833**	**79,089**	**67,744**	**50,021**	**21,450**	**28,571**	**83.3**	**87.8**	**78.5**	**9.3**

Table 24 shows that literacy rate is higher in Balurghat Municipality (86.0) than the district average (83.3) in Dakshin Dinajpur district. Here male female literacy gap is also very low (7.7). Among the urban population of the district the male literacy (87.8 percent) is higher than that of female literacy (78.5 per cent). Gangarampur municipality has lower literacy rate (76.8) than the district total. Here male female literacy gap is also very high with 13.5. The analysis reveals that Gangarampur, the new statutory town of Dakshin Dinajpur, is less progressive than Balurghat.

TABLE 25 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN CD BLOCKS, 2001

Serial Number	Name of CD Block	Number of literates and illiterates						Percentage of literates			Gap in male/ female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Kushmundi	31,014	20,457	10,557	46,742	19,391	27,351	49.1	63.3	34.2	29.1
2	Gangarampur	26,546	16,795	9,751	33,834	14,262	19,572	53.3	65.4	40.5	24.9
3	Kumarganj	18,809	11,426	7,383	19,883	8,413	11,470	58.3	68.8	47.1	21.7

8	Harirampur	9,594	6,422	3,172	18,175	7,737	10,438	42.8	56.3	28.7	27.6
District (Rural) Total :		**175,966**	**110,844**	**65,122**	**221,633**	**93,164**	**128,469**	**53.5**	**65.7**	**40.7**	**24.9**

Total literates of scheduled caste population of Dakshin Dinajpur district is 1,75,966 of which 65.7 per cent are males and 40.7 per cent females that means the male-female literacy gap is 24.9 per cent points which is very alarming.

The highest literacy rate is noticed in Balurghat CD Block (58.5) followed by Kumarganj CD Block (58.3) and the lowest is recorded in Harirampur CD Block (42.8). The highest male literacy among the scheduled caste population is observed in Balurghat (69.9) whereas maximum female literacy is in Kumarganj CD Block with 47.1 percent. In Harirampur literacy rates are lowest among both males and females with 56.3 per cent and 28.7 per cent respectively. The male female literacy gap is highest in Kushmundi (29.1), with a very low female literacy (34.2) and the lowest in Kumarganj (21.7). This reflects that the literacy programmes and other improvement efforts failed to bring about desired response on part of the scheduled caste community of rural Dakshin Dinajpur.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population

61-70	268	21.6	84,186	21.2
71-80	98	7.9	14,205	3.6
81-90	28	2.3	2,374	0.6
91-99	7	0.6	398	0.1
100	10	0.8	41	0.0
District Total :	**1,243**	**100.0**	**397,599**	**100.0**
Literacy rate for District :		**54.6**		

According to table 26 the total rural scheduled castes population of Dakshin Dinajpur 397,599 living in 1243 villages at varying literacy rates. There are 10 villages that are totally literates and 9 villages which are totally illiterates. Literacy rate for district is 54.6 As literacy rate, goes higher and higher, the number of villages also increases and maximum villages (322) are concentrated in literacy range 51-60 per cent with highest proportion of villages (25.9 per cent) and the highest share of schedule caste population (34.7 per cent). Thereafter, as the literacy range increases, the number of villages, their proportion, population and its proportion tend to go down with the only exception in cent per cent literacy range where the number of villages and their proportion have increased but the percentage share of scheduled caste population is negligible.

TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial Number	Name and urban status of Town	Number of literates and illiterates									Gap in male/female literacy rate
		Number of literates			Number of illiterates			Percentage of literates			
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Balurghat (M)	10,198	5,744	4,454	6,413	2,753	3,660	70.1	77.4	62.6	14.8
	2 OGs of Balurghat (M)	775	435	340	475	196	279	70.4	78.9	61.8	17.1
2	Gangarampur (M)	8,702	5,239	3,463	8,498	3,688	4,810	60.7	70.1	50.5	19.7
Dakshin Dinajpur (Urban) :		**19,675**	**11,418**	**8,257**	**15,386**	**6,637**	**8,749**	**65.6**	**73.9**	**56.8**	**17.1**

It is seen in the above Table 27 that among urban scheduled caste population of Dakshin Dinajpur district, 65.6 per cent are literates with males 73.9 per cent and females 56.8 per cent. The percentage of literates in Gangarampur and Balurghat municipalities are 60.7 (male 70.1 and female 50.5) and 70.1 (male 77.4 and female 62.6) respectively. The gap in male-female literacy rate in Gangarampur Municipality is 19.7 and in Balurghat Municipality it is 14.8 per cent points.

TABLE 28 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN CD BLOCKS, 2001

Serial Number	Name of CD Block	Number of literates and illiterates									Gap in male/female literacy rate
		Number of literates			Number of illiterates			Percentage of literates			
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Kushmundi	3,545	2,458	1,087	10,254	4,455	5,799	32.8	45.1	20.2	24.9
2	Gangarampur	9,919	6,416	3,503	18,926	8,157	10,769	42.2	54.0	30.1	23.9
3	Kumarganj	9,804	6,494	3,310	16,692	6,928	9,764	45.0	58.9	30.7	28.2
4	Hilli	5,400	3,406	1,994	8,484	3,628	4,856	47.4	59.8	35.0	24.8
5	Balurghat	23,153	14,853	8,300	34,642	14,484	20,158	48.7	61.3	35.5	25.8
6	Tapan	16,999	10,928	6,071	33,510	14,518	18,992	41.4	52.7	29.8	23.0
7	Bansihari	7,249	5,015	2,234	17,018	7,233	9,785	36.7	50.3	22.9	27.4
8	Harirampur	4,787	3,388	1,399	15,889	6,969	8,920	29.4	41.6	17.1	24.4
District (Rural) Total:		**80,856**	**52,958**	**27,898**	**155,415**	**66,372**	**89,043**	**42.1**	**54.5**	**29.3**	**25.2**

Table 28 shows that 80,856 persons are literate and 155,415 illiterate among the scheduled tribe population of rural Dakshin Dinajpur. That means only 42.1 percentage of scheduled tribe population is literate among which 54.5 per cent are males and only 29.3 per cent are females giving a gap of male-female literacy of 25.2.

Among 8 CD Blocks, Balurghat scores the highest in literates with 48.7 per cent, followed by Hilli (47.4) and Kumarganj (45.0). The minimum literates are found in Harirampur (29.4). Among the males and females highest literacy rate for both is observed in Balurghat CD Block 61.3 and 35.5 respectively followed by Hilli CD Block (59.8 and 35 respectively). On the other hand for male and female both lowest literacy rates are observed in Harirampur CD Block (41.6 and 17.1 respectively). The largest gap in male-female literacy rate is found in Kumarganj CD Block (28.2 per cent points) while the lowest in Tapan CD Block (23 per cent point).

These values reveal that the female members are not spared for education among the backward sections of the society.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	19	1.7	181	0.1
1-10	25	2.2	2,415	1.0
11-20	81	7.0	11,172	4.7
21-30	159	13.8	30,501	12.9
31-40	252	21.9	59,240	25.1
41-50	307	26.7	74,297	31.4
51-60	180	15.7	40,004	16.9
61-70	78	6.8	14,078	6.0
71-80	29	2.5	3,030	1.3
81-90	6	0.5	1,209	0.5
91-99	3	0.3	95	0.0
100	11	1.0	49	0.0
District Total :	**1,150**	**100.0**	**236,271**	**100.0**
Literacy rate for District :		**42.8**		

Table 29 shows that 1,150 villages of Dakshin Dinajpur District have total scheduled tribe population of 236,271 where district total literacy rate is 42.8. There are 19 such inhabited villages without any literate scheduled tribe population consisting of 1.7 per cent of villages and 0.1 per cent of scheduled tribe population. As the literacy range goes up, the number of villages and their proportion, scheduled tribe population and its percentage distribution increases up to literacy range 41-50. The maximum number of villages (307) their corresponding proportion (26.7 per cent) and population and its percentage share (31.4) are noticed in this range (41-50). Thereafter the numbers of villages tend to decrease as the literacy range increases up to the literacy range of 91-99. There are 11 villages with full literates comprising 1.0 per cent of total inhabited villages and negligible percentage of total population.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial Number	Name and urban status of Town	Number of literates and illiterates									Gap in male/female literacy rate
		Number of literates			Number of illiterates			Percentage of literates			
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Balurghat (M)	1,750	978	772	1,156	514	642	68.3	73.0	63.1	9.9
	2 OGs of Balurghat (M)	30	16	14	20	9	11	68.2	72.7	63.6	9.1
2	Gangarampur (M)	1,948	1,103	845	1,142	492	650	72.7	80.0	65.0	15.0
Dakshin Dinajpur (Urban) :		**3,728**	**2,097**	**1,631**	**2,318**	**1,015**	**1,303**	**70.5**	**76.5**	**64.1**	**12.5**

Table 30 reflects that urban Scheduled Tribe literacy scenario is good in Dakshin Dinajpur. A total population of 3,728 scheduled tribe live in the urban area giving a literacy percentage of 70.5 with 76.5 among the males and 64.1 among females. The percentage of literates in Gangarampur Municipality is 72.7. The male literacy percentage of this town is 80 which is marginally higher than the district average (76.5) but the female literacy being just 65 resulting in higher gap of male female literacy rate (15). On the other hand Balurghat Municipality has lower percentage of literates (68.3 per cent) than the district average.

TABLE 31 : NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN CD BLOCKS, 2001

Table 31 shows the work participation rate of Dakshin Dinajpur district. The table reflects that 40.8 per cent people are engaged in economically productive work. Among total population of 1,503,178, the male plays a greater role with 55.6 per cent of the economic activities and the female comprises just 25.1 per cent. A similar trend is reflected in the main workers category where 50.1 per cent are males and only 11.7 per cent females. However, in the case of marginal workers category, females are engaged in greater proportion (13.5 per cent) than the males (5.6 per cent).

At the CD block level Hilli has the highest proportion in work participation rate (49.0 per cent) having highest main workers, strength of 38.1 per cent whereas Harirampur CD Block with 28.6 per cent main workers recorded the lowest position. In respect of marginal workers, the highest proportion is recorded in Tapan CD Block (13.6 per cent) and lowest in Kumarganj CD Block (6.0 percent). In case of total workers, the lowest is in Kumarganj CD Block (37.3 per cent). In case of non-workers, Kumarganj CD Block has the highest percentage (62.7 per cent) and Hilli CD Block has the lowest (51 per cent). The sex differentials in participation of economic activities reflect that the highest proportion of male total workers is registered in Hilli CD Block (59.4 per cent) and the lowest in Harirampur (54.3 per cent). So far as female total workers are concerned, the highest percentage is also noticed in Hilli CD Block (38.1 per cent) while the lowest is in Kumarganj (17 per cent). The female non-working population ranges between 61.9 - 83.0 per cent as against district average of 74.9 per cent.

TABLE 32 : NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN CD BLOCKS, 2001

Dakshin Dinajpur being basically a rural district, here rural work participation also reflects the same trend as district total. It can be seen from the above table that in the rural areas 42.1 per cent of the rural population are workers and 57.9 per cent non-workers. The main workers constitute 31.7 per cent and marginal workers 10.4 per cent of the total population. The highest rural proportion of main workers has been obtained in Hilli CD Block (38.1 per cent) and the lowest in Harirampur CD Block (28.6 per cent). Among the male main workers, the highest percentage is also in Hilli CD Block (53.2 per cent) while the lowest participation is recorded in Harirampur CD Block (47.6 per cent). In case of female main workers, the highest proportion is noticed again in Hilli (22.3 per cent) and lowest in Bansihari CD Block (8.6 per cent).

The highest share of marginal workers in rural areas of this district has been registered in Tapan CD Block (13.6 per cent) and the lowest in Kumarganj (6 per cent). The proportion of male marginal workers is lower than that of their female counterparts in each CD Block. The largest proportion of total workers has been observed in Hilli CD Block (49 per cent), while the lowest is in Kumarganj CD Block (37.3 per cent). The highest proportion of non-workers is witnessed in Kumarganj CD Block (62.7 per cent) and the lowest is in Hilli CD Block (51.0 per cent).

		Males	27,775	13,402	48.3	757	2.7	14,159	51.0	13,616	49.0
		Females	25,758	2,196	8.5	1,822	7.1	4,018	15.6	21,740	84.4
District (Urban) Total :		**Persons**	**196,854**	**57,058**	**29.0**	**5,310**	**2.7**	**62,368**	**31.7**	**134,486**	**68.3**
		Males	**100,539**	**46,654**	**46.4**	**2,386**	**2.4**	**49,040**	**48.8**	**51,499**	**51.2**
		Females	**96,315**	**10,404**	**10.8**	**2,924**	**3.0**	**13,328**	**13.8**	**82,987**	**86.2**

It is seen from the above Table 35 than in the urban set up the total workers is only 31.7 per cent among 196,854 persons. This is a result of low participation of females with only 13.8 per cent which is much lower than that of males (48.8 per cent). The total male workers comprise 49,040 persons among which 46.4 per cent are main workers and only 2.4 per cent marginal workers as compared to district overage (31.7 per cent).

Work participation is higher in Gangarampur Municipality with 34.0 per cent of total workers. Male main workers are also higher (48.3 per cent) than the corresponding district figure (46.4 per cent). The proportion of female main workers is maximum in Balurghat Municipality (11.8 per cent). Female marginal workers are only noticeable in Gangarampur with 7.1 per cent. The percentage of non-working class is also high in these urban areas ranging from 66.0 to 69.2 per cent, which is economically not suitable for these urban areas.

Note : Percent of Worker to total worker are given in brackets

As per table 34 the total number of workers is 612,728 which is 40.8 per cent of the total district population. Being a predominantly rural district, it has 36.2 percentage of total workers as agricultural labourers and 31.0 per cent as cultivators. In these two categories males are dominant in cultivator class as they registered 37.3 per cent of the total male workers and among agricultural labourers females play a greater role with 50.2 per cent of the total female workers. This trend is also true for household industry workers with greater female participation (9.6 per cent) as compared to males (2.8 per cent). Other workers have registered 27.9 per cent of districts total workers with 29.7 per cent males and 23.9 per cent females.

Economic activity of CD Blocks displayed a diverse character. Among the CD Blocks, Hilli has the highest percentage of total workers (49.0 per cent) while lowest is observed in Kumarganj (37.3 per cent). Among the four categories of economic activities the lowest proportion of cultivators (24.5 per cent) and agricultural labourers (28.3 per cent) is registered in Hilli CD Block. But this CD Block has the highest percentage of household industry workers (8.3 per cent) and other workers (38.9 per cent). Cultivators are highest in Kushmundi (43.6 per cent) where male and female both participate in high percentage. The maximum percentage of agricultural labourers and lowest percentage of other workers are registered in Harirampur CD Block with 49.6 per cent and 13.5 per cent respectively. Here females are engaged in this category in large numbers (68.2 per cent). The proportion of males is also highest (41.8 per cent) in this economic category among CD Blocks. Lowest proportion of household industry workers is (2.2 per cent) found in Tapan CD Block.

Note : Percent of Worker to total worker are given in brackets

The above table shows that in the rural areas of Dakshin Dinajpur 34.4 per cent of the total workers are Cultivators, 40.0 per cent Agricultural Labourers, 4.6 per cent are engaged in Household Industry and remaining 21.1 per cent are employed as Other Workers. By sex, there is not much difference between the proportion of male and female workers reported to be engaged as other workers. Under Agricultural Labourers and Household Industry workers, the proportion of female workers (53.7 and 8.9 per cent) are much higher compared to male workers (33.9 and 2.6 per cent). But under Cultivators one can see the reverse trend i.e. proportion of the male workers (42.0 per cent) is much higher than that of the female workers (17.4 per cent).

The CD Block level analysis of distribution of total workers among four industrial categories indicates that there is wide disparity in the economic activities among the various CD Blocks. Percentage of Cultivators is as high as 43.6 in Kushmundi CD Block and as low as 24.5 per cent in Hilli CD Block. In case of Agricultural Labourers, the percentage of workers varies greatly from the highest being in Harirampur CD Block (49.6 per cent) to the lowest in Hilli CD Block (28.3 per cent). In Household Industry, the highest proportion of workers is engaged in Hilli CD Block (8.3 per cent) as against the lowest proportion found in Tapan (2.2 per cent). Likewise, in case of other works, the highest proportion of workers have been noticed in Hilli CD Block (38.9 per cent) and the lowest in Harirampur CD Block (13.5 per cent).

				(13.8)	**(0.6)**	**(6.0)**	**(18.3)**	**(75.2)**

Table 36 gives the town wise number and percentage of the four categories of workers. It can be observed from the above table that a majority of the urban working population (88.6 per cent) is engaged in Other Works category followed by Household Industry (7.5 per cent). About three per cent of the workers are engaged as Agricultural Labourers and 1.1 per cent as cultivators. By sex, 92.3 per cent of male workers and 75.2 per cent of female workers are engaged in Other Works. In Household Industry, the percentage of female workers is much higher (18.3 per cent) compared to the males (4.5 per cent).

The pattern of distribution of total workers in four categories shows that the largest proportion of workers employed as Cultivators, Agricultural Labourers and Household Industry workers are recorded in Gangarampur Municipality (2.0 per cent, 7.5 per cent and 18.4 per cent) respectively among the towns. In case of other workers category the highest proportion of workers have been observed in Balurghat Municipality (95.9 per cent).

Brief Analysis of Inset Tables based on Village & Town Directory (37-47)

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Serial Number	Name of CD Block	Number of inhabited villages	Type of amenity available									
			Education	Medical	Improved drinking water*	Post Office #	Tele-phone	Transport communic ations $	Banks	Agri-cultural Credit Societies	Approach by pucca road	Power supply

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, Telegraph office and Post and Telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Collection of villagewise amenities has been a feature of Indian census since 1961. Though such amenities data is basically non-census in nature, they are very useful for having a direct view of the existing infrastructural status of each village in the district. They can also be used as important inputs for future development planning in the district.

In Table 37 we have given CD Blockwise position of villages so far as availability of educational, medical, improved drinking water, Post Office, Telephone, Transport, banking, approach to villages and power is concerned. It can be seen from the above table that education amenity is available in 70.9 per cent villages, medical facility in 39.7 per cent villages, improved drinking water in 98.9 per cent villages, post office in 9.5 per cent villages, telephone in 18.2 per cent villages, transport and communication in 20.5 per cent villages, banks in 2.8 per cent villages, agricultural credit societies in 10.8 per cent villages, pucca road linkage in 23.4 per cent villages and electricity is available in 56.5 per cent villages in Dakshin Dinajpur.

Regarding educational facilities among the CD Blocks, Hilli with 78.2 per cent villages is having better educational amenity. Bansihari is the least served CD Block with 53.2 per cent of villages having this facility. In case of medical facility, Gangarampur CD Block with 57.8 percentage villages having medical units is the best block and in Hilli only 16.7 per cent villages record medical facilities. So far as the availability of improved drinking water is concerned out of 8 CD

Blocks, cent per cent villages are served by this facility in 3 CD Blocks (Kushmundi, Kumarganj and Hilli). Remaining CD Blocks also have these facilities in 97 to 99.6 per cent villages. The availability of postal facilities ranges from the highest proportion recorded in Kumarganj CD Block (10.3 per cent) to the lowest in Bansihari CD Block (8.9 per cent). Telephone facility is available to the highest proportion of villages (52.6 per cent) in Hilli CD Block against the lowest (3.1 per cent) noticed in Kushmundi CD Block. In respect of availability of bus, rail or navigable waterway connectivity of the villages, Hilli CD Block (29.5 per cent) have the highest percentage of villages having this facility while least of the villages having this facility is observed in Kushmundi CD Block (13.7 per cent). In case of availability of banking services, the most served CD Block is Harirampur with 10.3 per cent of villages having this facility whereas the least served CD Block is Balurghat (1.0 per cent). The Agricultural Credit Societies are available in as many as 15.8 per cent of villages in Bansihari CD Block against just 6.4 per cent registered in Balurghat CD Block. In case of proportion of villages connected with pucca road, the highest is in Hilli CD Block (50.0 per cent) while the lowest is in Bansihari CD Block (14.6 per cent). The highest number of villages has been electrified in Hilli CD Block (88.5 per cent) and the least in Gangarampur CD Block (34.2 per cent).

TABLE 38 : NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Sl. No.	Name of CD Block	Total population of inhabited villages	Type of amenity available									
			Education	Medical	Improved drinking water *	Post Office #	Tele-phone	Trans-port commun ications $	Banks	Agri-cultural Credit Societies	Approach by pucca road	Power supply

		(100)	(82.7)	(63.4)	(100.0)	(20.0)	(16.4)	(37.1)	(11.5)	(16.3)	(34.6)	(76.0)
District Total :		**1,306,324**	**1,125,713**	**710,222**	**1,285,495**	**279,465**	**382,589**	**408,281**	**70,384**	**261,551**	**430,480**	**883,559**
		(100)	**(86.2)**	**(54.4)**	**(98.4)**	**(21.4)**	**(29.3)**	**(31.3)**	**(5.4)**	**(20.0)**	**(33.0)**	**(67.6)**

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved' or otherwise. If the household to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having acc `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered acco

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

It can be seen from the above table that on an average 86.2 per cent of population of the district is served by some educational facility within their villages; medical facility is available to 54.4 per cent, improved drinking water to 98.4 per cent, post office to 21.4 per cent, telephone to 29.3 per cent, transport and communication facility to 31.3 per cent, banking services to 5.4 per cent, agricultural credit society to 20.0 per cent, approach by pucca road to 33.0 per cent and electricity is available to 67.6 per cent of

population within the villages.

The analysis of availability of various infrastructural facilities to the rural population within their villages reflects that among CD Blocks, maximum population is served by educational facility in Hilli CD Block with 92.6 per cent and minimum in Bansihari CD Block (78.8 per cent). Maximum population is served by availability of medical facilities in Gangarampur CD Block with 70.1 per cent while the minimum population is served in Hilli CD Block (27.1 per cent). In case of availability of improved drinking water cent per cent population is served in 4 CD blocks, namely Kushmundi, Kumarganj, Harirampur and Hilli while the lowest in Balurghat CD Block (93.2 per cent).This facility is also found in high percentage in Tapan CD block (99.9 per cent). The highest percentage of population served by post office is noticed in Balurghat CD Block (24.6 per cent) whereas the lowest in Gangarampur CD Block (19.2 per cent). In case of availability of telephone and transport communication facilities Hilli CD Block with 67.8 and 45.1 per cent respectively is the highest and the minimum of these facilities are found in Kushmundi CD Block (8.6 per cent and 19.8 per cent). The situation of availability of banking services shows that the highest percentage of population is served in Harirampur CD Block (11.5 per cent) while the lowest is obtained in Balurghat CD Block (1.7 per cent). The highest services of agricultural credit societies is available in Bansihari CD Block (29.0 per cent) while the lowest is seen in Kushmundi CD Block (13.4 per cent). The highest percentage of population living in villages approachable by pucca road is in Hilli CD Block (64.0) as against the minimum percentage observed in Bansihari CD Block (19.1 per cent). The highest proportion of population served by electricity is found in Hilli CD Block (90.9 per cent) in contrast to the lowest percentage registered in Gangarampur CD Block (48.4 per cent).

On the basis of above analysis it is clear that there is a wide variation in availability of infrastructual facilities among the CD Blocks. For the balanced socio-economic development, it is essential that the infrastructural and basic amenities are available on uniform basis. Thus poorly served areas should have preferential treatment in allocation of scarce resources in local planning.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

	Distance range of place from the villages where the amenity is available			
Village not having the amenity of	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	259	320	2	581
(b) Middle School	499	928	13	1,440
(c) Degree College	36	273	1,269	1,578
2. Medical:-				
(a) Hospital	42	203	1,332	1,577
(b) PHC	266	841	447	1,554
3. Post Office	785	637	7	1,429
4. Telephone	353	760	178	1,291
5. Bus Service	440	765	51	1,256
6. Banks				
(a) Commercial Bank	372	1,016	163	1,551
(b) Cooperative Bank	134	508	915	1,557
7. Agricultural Credit Societies	585	772	52	1,409

Table 39 shows the distribution of villages not having infrastructural facilities, arranged on the basis of distance range from the places having respective facilities. It can be seen from the above table that 581 villages have no primary school. However, 259 villages can have access to this amenity within 5 kilometres. There are 1,440 villages which do not have middle school and majority (928) of the villages can reach this facility within a distance of 5-10 kilometres. Only 36 villages have degree college level education within 5 kilometres but majority of the villages (1,269) are remote from this amenity.

There are 1,557 villages which do not have the hospital in the village itself. Most of the villages (1,332)

can avail of the same at a distance range of 10 kilometres and above. Out of 1,554 villages reported as not having primary health centre, maximum of 841 villages can avail of it within a range of 5-10 kilometres.

In case of post office, out of total 1,429 villages not having this amenity, most of the villages (785) can avail the same within 5 kilometres.

So far as the availability of telephone facility is concerned, 1,291 villages do not have the same and majority of villages (760) can reach this facility within a distance of 5-10 kilometres. There is no bus station in 1,256 villages, majority of the villages (765) can have the bus services within 5-10 kilometres.

In 1,551 villages there is no commercial bank but bulk of villages (1,016) can avail the commercial banking facility located within 5-10 kilometres. Further, out of 1,557 villages reporting not having co-operative bank, a majority of villages (915) can avail this facility at a distance of 10 kilometres and above.

In 1,409 villages wherein agricultural credit societies are not available, a majority of villages (772) can reach this facility located within 5-10 kilometres range from the respective villages.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by pucca road
1	2	3	4	5	6	7	8	9	10
less than 5	11	10	8	1	4	4	0	0	4
	(100.0)	(90.9)	(72.7)	(9.1)	(36.4)	(36.4)	(0.0)	(0.0)	(36.4)
5 -15	1,215	840	447	112	227	246	37	130	293
	(100.0)	(69.1)	(36.8)	(9.2)	(18.7)	(20.2)	(3.0)	(10.7)	(24.1)
16 - 50	347	265	168	36	57	74	8	40	73
	(100.0)	(76.4)	(48.4)	(10.4)	(16.4)	(21.3)	(2.3)	(11.5)	(21.0)
51+	5	3	3	1	0	0	0	0	0
	(100.0)	(60.0)	(60.0)	(20.0)	(0.0)	(0.0)	(0.0)	(0.0)	(0.0)

	(100.0)	**(70.9)**	**(39.7)**	**(9.5)**	**(18.2)**	**(20.5)**	**(2.8)**	**(10.8)**	**(23.4)**

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

With the analysis of this table, the urban effect on amenities of rural areas can be easily understood. In case of most of the amenities such as education, medical, telephone, transport communication and approach by pucca road, they tend to concentrate within 5 kilometres range from the nearest statutory towns in terms of proportion of villages having these amenities. When distance range goes up from less than 5 kilometres to 5-15 kilometres the proportion of villages having these amenities tend to go down with the only exception of Banks and Agricultural credit societies. However, when the distance range further increases to 16-50 kilometres proportion increases except bank, telephone and approach by pucca road facility and in 51+ kilometres and above range it again increases in medical and post office facility.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Population range	Number of inhabited villages in each range	Type of amenity available									
		Education	Medical	Improved drinking water*	Post Office #	Tele-phone	Transport commu-nications $	Banks	Agricultural Credit Societies	Approach by Pucca road	Power supply
1	2	3	4	5	6	7	8	9	10	11	12

5,000-9,999	6	6	6	5	4	4	3	0	2	2	5
	(100.0)	(100.0)	(100.0)	(83.3)	(66.7)	(66.7)	(50.0)	(0.0)	(33.3)	(33.3)	(83.3)
10,000 +	0	0	0	0	0	0	0	0	0	0	0
	(0.0)	(0.0)	(0.0)	(0.0)	(0.0)	(0.0)	(0.0)	(0.0)	(0.0)	(0.0)	(0.0)
District total :	**1,579**	**1,119**	**627**	**1,560**	**150**	**288**	**327**	**45**	**170**	**370**	**892**
	(100.0)	**(70.9)**	**(39.7)**	**(98.8)**	**(9.5)**	**(18.2)**	**(20.7)**	**(2.8)**	**(10.8)**	**(23.4)**	**(56.5)**

\# Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

It can be seen from the above table that availability of various amenities is directly related to the population size of the villages. It means that with the increase in population size of the villages, the proportion of villages having these amenities also increases in each population range. The exception is noticed in case of improved water supply from the population range of 1,000-1,999 to the range of 5,000-9,999 where it has decreased. Agricultural credit societies and approach by pucca road in 5,000-9,999 range wherein the proportion of villages declined.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial Number	Name of CD Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Kushmundi	227	30,841.7	82.9	21.9
2	Gangarampur	199	31,328.6	84.9	28.7
3	Kumarganj	204	27,820.9	78.9	28.0
4	Hilli	78	8,860.7	73.2	19.9
5	Balurghat	296	35,960.7	84.5	35.6
6	Tapan	271	44,047.4	80.1	15.1
7	Bansihari	158	19,502.8	80.9	57.3
8	Harirampur	146	20,950.5	74.9	32.4
District Total :		**1,579**	**219,313.2**	**81.0**	**28.7**

Note : Cultivable area = irrigated area + unirrigated area

Dakshin Dinajpur has a total geographical area 219,313.2 hec. For 1,579 villages 81.0 per cent cultivable area. Out of this total cultivable area only 28.7 per cent is under irrigation. Among the CD Blocks, Gangarampur has the highest cultivable area of 84.9 per cent and Hilli has the lowest cultivable area of 73.2 per cent. Being a district with monsoon type of climate, irrigation is one of the most important outputs for agriculture. But among the CD Blocks, the percentage of irrigated area to

total cultivated area varies. Only in Bansihari CD Block 57.3 per cent area is under irrigation which is the highest. Except Harirampur, Balurghat, Bansihari, and Gangarampur, other CD Blocks have lower percentage of irrigated area than the district average. In Tapan CD Block only 15.1 per cent area is under irrigation which is lowest and in Hilli it is 19.9 per cent.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial Number	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	I Balurghat (M+OG)	241.4	38.9	202.5	241.4	109.7	21.7	89.9	18.7	1.5
2	II Gangarampur (M)	208.1	0.5	207.7	132.1	17.1	5.9	108.1	1.1	0.0
	District Total :	**232.3**	**28.4**	**203.9**	**211.7**	**84.5**	**17.4**	**94.8**	**13.9**	**1.1**

The above table reveals that in both the towns, the main source of revenue of the local bodies is income derived from all other sources. Balurghat municipality has received revenue of Rs. 38.9 through taxes. In case of Balurghat Municipality per capita expenditure is the highest (Rs. 109.7) in the field of general administration while it is lowest (Rs. 1.5) in others. In Gangarampur municipality public works had recorded the highest (Rs. 108.1) per capita expenditure and only Rs. 1.1 the lowest in public institutions.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial Number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Balurghat (M+OG)	4.6	1.0	1.0	0.4	0.1
2	Gangarampur (M)	5.2	0.7	0.7	0.4	0.2
	District Total :	**4.8**	**0.9**	**0.9**	**0.4**	**0.2**

It can be seen from the above table that in urban areas of Dakshin Dinajpur, there are 4.8 primary schools, 0.9 middle schools, 0.9 secondary schools, 0.4 senior secondary schools and 0.2 colleges per 10,000 population. In case of primary schools and colleges it is higher in Gangarampur Municipality (5.2 and 0.2) than Balurghat Municipality (4.6 and 0.1). The facilities of Junior secondary, middle school and secondary/ matriculation level education for 10,000 population is higher in Balurghat which is also a district town.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial Number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Balurghat (M+OG)	24
2	Gangarampur (M)	47
	Distrct Total :	**30**

The above table shows that in urban areas of the district Dakshin Dinajpur as a whole there are 30 beds in medical institutions per 10,000 population. The town-wise position reveals that Municipal Town Gangarampur has major number of beds (47) and Balurghat Municipality has 24 beds per 10,000 population.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial Number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Balurghat (M+OG)	143,321	50,337	35.1
2	Gangarampur (M)	53,533	32,105	60.0
	District Total :	**196,854**	**82,442**	**41.9**

The total slum population reported from the statutory towns of Dakshin Dinajpur is 82,442 accounting for 41.9 per cent of the total population. It is very much noticeable in Gangarampur municipality with 60 per cent whereas Balurghat has 35.1 per cent of slum population to its total population.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial Number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Balurghat (M)	Potteries	Bidi
		Bakery Products	Bakery Products
		Polythene Bags	Polythene Bags
2	Gangarampur (M)	Handloom Sarees	Jute
		Potteries	Handloom Products
		Bakery Products	Paddy

Table 47 shows multi-functional economic characteristics of two municipal towns. Potteries, bakery product and polythene bags are mainly manufactured in Balurghat municipality and in Gangarampur Municipality handloom sarees, potteries and bakery product are manufactured. Most important commodities exported from Balurghat is bidi, bakery product and polythene bags. Mainly jute, paddy and handloom products are exported from Gangarampur Municipality.

Data source : Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

The analysis of ownership status of houses presents some uncommon features regarding occupancy of number of room under different tenure categories. In this district availability of living room in owned category is better than the rented category as a whole and also for rural areas with median number of one room. However, in urban areas the position is same for both categories. In 'others' category, the median room number is one for the district as well as for its rural and urban components. So far as the scheduled caste households are concerned, the median size number of room is one for each tenure category. Among the scheduled tribe households, it is one for each tenure category at the district level and in rural urban segments, except, in rented category in rural areas where it is two rooms.

TABLE 49 : PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Sl. No.	District/CD Block	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary
1	2	3	4	5	6	7	8	9	10	11
1	Kushmundi	7.6	56.3	36.1	7.6	56.3	36.1	0.0	0.0	0.0
2	Gangarampur	8.1	74.4	17.5	8.1	74.4	17.5	0.0	0.0	0.0
3	Kumarganj	5.4	80.3	14.3	5.4	80.3	14.3	0.0	0.0	0.0
4	Hilli	12.1	79.8	8.1	12.1	79.8	8.1	0.0	0.0	0.0
5	Balurghat	9.0	80.5	10.5	7.8	81.4	10.8	44.0	54.3	1.6

8	Harirampur	6.1	65.6	28.3	6.1	65.6	28.3	0.0	0.0	0.0
District Total :		**13.3**	**69.1**	**17.7**	**7.4**	**72.7**	**19.8**	**56.1**	**42.1**	**1.8**

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note Permanent:- 1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e. where, burnt briks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets bricks, lime and stone and RBC/RCC concreate are used for roof.

Semi permanent:- 2 Semi-permanent houses refer to those houses made of other types of materials.

Temporary:- 3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc.are used for roofs.

It can be seen from the above table that in Dakshin Dinajpur, 13.3 per cent households live in permanent houses, 69.1 per cent in semi-permanent and 17.7 per cent live in temporary houses. The proportion of households living in permanent houses in urban areas (56.1 per cent) is much higher when compared to corresponding figures for rural areas (7.4 per cent). In contrast, households living in urban areas in semi-permanent and temporary houses are much lower than the percentage of households living in rural areas, which shows the poor housing condition found in rural areas in respect of durability of houses.

Among the CD Blocks, the highest proportion of households (12.1 per cent) live in permanent houses in Hilli and the lowest proportion (5.0 per cent) live in Tapan. Again, the highest proportion of households living in semi-permanent (80.5 per cent) houses observed in Balurghat and living in temporary houses (36.1 per cent) is recorded in Kushmundi. The lowest proportion of households living in semi-permanent houses (56.3 per cent) and temporary houses (8.1 per cent) is noticed in Kushmundi and Hilli CD Block respectively. The net result of the analysis is that the housing condition in Hilli CD Block is the best among all the CD Blocks.

TABLE 50 : PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE , ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

* Based on the improved drinking water source, drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outs.

Note : Percentage is to be given in brackets after the number of households.

Bathroom means bathroom within the house.

Toilet means toilet within the house.

Drainage means closed and open drainage.

It is evident from the above table that in Dakshin Dinajpur district 82.3 per cent households have access to improved drinking water facility, 19.4 per cent have electricity, 11.0 per cent have bathroom, 23.8 per cent have toilet facility and 27.7 per cent households have drainage. As expected, the percentage of households having these facilities in urban areas is much higher as compared to corresponding figures in the rural areas. Water is the bare minimum necessity to support the human life which is available to the lowest proportion of households in Tapan CD Block (70.9 per cent) and to the highest proportion of households in Gangarampur CD Block (88.9 per cent). This table also reveals that rural areas of this district are very poorly connected with electric supply. The highest proportion of households served by electricity is noticed in Hilli CD Block (22.9 per cent) while the lowest in Kushmundi CD Block (9.2 per cent). In case of availability of bathroom, the maximum households found served is in Hilli CD Block (12.7 per cent) and the minimum in Gangarampur CD Block (3.7 per cent). In case of the availability of toilet facility, highest proportion is observed in Hilli CD Block (23.9 per cent) and the lowest recorded in Kushmundi CD Block (8.4 per cent). The highest percentage of households connected with drainage to dispose of wastewater is reported from the Tapan CD Block (39.5 per cent) whereas the lowest is in Gangarampur CD Block (14.4 per cent).

TABLE 51 : NUMBER AND PERCENT OF HOUSEHOLDS BY TYPE OF FUEL USED FOR COOKING, 2001

Serial Number	CD Block	Total/ Rural/ Urban	Total house-holds	Fire wood	Crop residue	Cow dung cake	Electri-city	Coal / Lignite (charcoal)	Cooking gas (L.P.G.)	Bio-gas	Kero-sene	Others	No cook-ing

Percentage in brackets

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

The pattern of fuel for cooking in Dakshin Dinajpur district shows that the percentage of household using firewood for cooking is higher in urban areas (25.9 per cent) than that of rural (17.1 per cent). Almost half (52.9 per cent) of the total population uses crop residue for cooking in this district. But it is of less use in urban areas (7.9 per cent) than that of rural area (59.1 per cent). Another striking feature is that the percentage of households using biogas as fuel for cooking is very low in rural areas as compared to 0.2 per cent recorded in urban areas though cow dung is abundantly found in rural areas. It shows near absence of technical know how and financial constraint for constructing biogas plant in rural areas. Cooking gas is the main fuel for cooking (34.9 per cent) in the urban areas of the district followed by firewood (25.9 per cent), Coal/lignite (charcoal) (21.0). It is interesting to note that among the CD Blocks the predominant fuel used for cooking is crop residue followed by firewood, cow dung cake and 'others' type of fuels.

Data source : Census of India 2001, H-series : Table on Houses, Household amenities and Assets.

The above table shows the availability of banking services and possession of various household assests by the households in the district. Out of the total households 22.9 per cent is availing the facility of banking services, 26.3 per cent having radio / transister, 16.3 per cent television, 3.4 per cent telephone, 47.3 per cent bicycle, 2.1 per cent scooters, motor cycles, mopeds, 0.9 per cent car, jeep, van and 41.9 per cent households is having none of the specified assests. The proportion of households availing banking services and having various assests is higher in urban areas compared to that of rural areas except radio / transistor.

Among the CD Blocks, the highest proportion of households having radio/ transsistor is recorded by Tapan CD Block (29.9 per cent) and least in Balurghat (22.8 per cent). Hilli CD Block is on the top in respect of possession of television with 17.7 per cent in contrast to lowest recorded in Kushmundi (7.6 per cent). The maximum proportion of households having telephone is observed in Bansihari CD Block (2.9 per cent) and the minimum is observed both in Kushmundi and Gangarampur with 1.0 per cent each. In case of bicycle, the highest proportion is observed for Kushmundi (56.1 per cent) and the lowest is for Gangarampur (37.1 per cent). For scooter, motor cycle, moped and car, jeep, van, the highest proportion is observed for Hilli whereas Gangarampur is the lowest for scooter, motor cycle, moped and both Gangarampur and Tapan are lowest for car, jeep, van.

Brief description of places of religious, historical or archaeological importance in villages and places of tourist interest in the towns of the district and major charecteristics of the district

Dhaldighi : This large dighi has immense religious significance which is situated near Gangarampur. On the bank of dighi, there is a Mosque (Dargah) of Saint Mullah Ata (Cira 13th Century). On the right hand side of the door of the Dargah, there is an Arabic Inscription. The Inscription records the construction of the mosque of Shamsuddin Muzaffa Shah in Hijlli 896 (1490-1491). The Gothic architecture of the Dargah is a rarity in this area and is a major point of attraction.

Dumduma : Located at Narayanpur close to Dhaldighi. The ruins of Military fort and troops quarter of Bakhtiyar Khilji are still found. The body of Bakhtiyar lay in a tomb in Dumduma.

Bangarh : Situated near Gangarampur. The ruins of the places of Raja Bana have been unearthed during excavation. The visible part of the palace is still attractive.

Shivbati : Located close to Banagarh. The ruins of the temple of Virupakshya Shiva can still be found which is a major attraction for tourists.

Mahipaldighi : Mahipaldighi is located close to Banshihari. King Mahipal excavated this Dighi during 988-1038 A.D. In 1793 one indigo factory had been founded by Mr. Thomas, the ruins of which are still found near Mahipaldighi.

Bairhatta and Kichaka Kunda : Bairhatta is situted near Harirampur. The ruins of the palace of king Birat can still be found here. According to mahabharata, the Pandavas took shelter in the palace of king Birat.

Tapan Dighi : It is situated at Tapan. The king Bana was worshiper of Shiva. He excavated Tapan Dighi in Tapan PS to offer Tarpana to Shiva. This Dighi is still very much attractive to the people.

District Library : It is situated at Balurghat Town. A good number of objects of archaeological importance of different ages (viz. Paul, Gupta etc.) have been preserved here which is much attractive to the tourist.

Balurghat College Museum : It is situated at Balurghat Town. Many archaeological objects of this district belonging to different periods are preserved in this Collage Museum, which is much attractive to the tourists and interested persons.

Pancha Ratna Temple : This temple is situated at Mahurkismat near Gangarampur (CIRCA 18th Century A.D.). The exterior of the temple is decorated with various attractive pictures of Hindu Deities in terracotta. The motif resembles the temples of Bishnupur at Bankura. This temple is also attractive to the tourists and other people.

Eco-Tourism : The climate of Dakshin Dinajpur district is favourable for plantation and eco-beautification. ARANYAK situated at Balurghat near Fire Brigade and SARANBARI forest situated at Hilli PS near Teor Kalibari are two such examples worth mentioning. Besides these two Eco-tourism Centres, two beautiful parks are also there at Balurghat town, one near Rabindra Bhavan and another near Balurghat Circuit House.

Accomodation

There is a Bungalow at Banshihari on the bank of river Tangon named Banshihari Bungalow which can be used as a tourist spot. The view of this spot is very enjoyable in the morning and evening. As per District Census Handbook, 1991 there is an Inspection Bungalow in Gangarampur PS.

Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district

Mr. F.W. Strong in his Eastern Bengal District Gazetteers, Dinajpur, 1912 remarked that “Any one who has had much experience of them will give the people of the Dinajpur district a good character. They are a simple and contented race, neither insolent and ostentatious in prosperity nor yielding readily to despair in adversity. They cannot be described as quarrelsome, serious rioting being almost unknown ……”. It is noteworthy that the same people of the district Dakshin Dinajpur made remarkable contribution in Tebhaga Movement of 1946-48 which proves that not only simple and contented, they are equally full of self-esteem.

Following historical figures were associated with

the district.

1. Jagat Jiban Ghosal, the poet of Manasamangal.
2. William Carey, the famous Baptist Missionary. His effort to publish books in Bengali by establishing a vernacular press took start in this district. He was something of a botanist and expert in agriculture and his Remarks on the state of agriculture in the district of Dinajpur was published in volume 10 of the Asiatic Researches.
3. Maharaja Girija Nath Roy. He took leading part in the agitation against the partition of Bengal in 1905.
4. Purna Chandra Das, the noted freedom fighter.

Scope of Village & Town Directory

The "Village Directory'' is one of the traditional compilations of the census. The format of the directory is almost the same as was prescribed in the 1991 census. It bears the list of villages, their location code numbers, areas, population, amenities such as educational, medical, communications, drinking water facilities etc. available to them and also the land use pattern for each village. For this purpose, villages have been arranged CD Block wise in order of their location code numbers. The inclusion of alphabetical list of villages with 2001 census population and the map of every CD Block depicting location of villages by population size, urban-spread and important infrastructural facilities available therein will further help the reader in identifying any village in the CD Block.

'Village' is a statutorily recognized unit having a definite boundary and separate land records. In case a complete village is treated as an outgrowth of urban agglomeration, data on amenities and land use for that village have not been given in the Village Directory but shown along with the urban component. For those villages, which have partly merged in an outgrowth of U.A. data pertaining to remaining part of the village is shown in the Village Directory and for the part merged or treated as an outgrowth, the details have been given under the concerned urban agglomeration. Land use data for villages treated as Census Towns (Urban) in 2001 census can be seen in Appendix-III of the Village Directory.

If a village has fully merged into another village, the location code number and name of the merged village are given both in the Village Primary Census Abstract and the Village Directory at the appropriate place. Data in respect of these two villages put together appear against the village with which the other village has merged.

The uninhabited village (villages with no population) has been indicated as such after furnishing details in columns 1 to 3 i.e. the location code number, name and area of the village. In addition to the above details, following eight appendices to Village Directory have also been included.

Appendix – I - Abstract of educational, medical and other amenities in Villages - CD Block level

Appendix-IA - Villages by number of Primary Schools

Appendix-IB - Villages by Primary, Middle and Secondary Schools

Appendix-IC - Villages with different sources of drinking water facilities available

Appendix-II - Villages with 5,000 and above population which do not have one or more amenities available

Appendix-IIA - List of Census Towns which do not have one or more amenities

Appendix-III - Land utilisation data in respect of Census Towns/Non Municipal Towns

Appendix-IV - CD Block wise list of inhabited villages where no amenity other than drinking water facility is available

Appendix-V - Summary showing number of Villages having or not having Scheduled Caste Population

Appendix-VI - Summary showing number of Villages having or not having Scheduled Tribe Population

Appendix-VIIA - List of Villages according to the proportion of the Schedule Castes to the total population by ranges

Appendix-VIIB - List of Villages according to the proportion of the Schedule Tribes to the total population by ranges

Appendix-VIII - Number of Villages under each Gram Panchayat (CD Block wise)

The above eight appendices are expected to help the planners for planning inputs in areas / villages where basic infrastructure is lacking and also for evolving suitable plans for the welfare of Scheduled Castes and Scheduled Tribes, in particular.

The Village Directory format has 23 columns and

the details given under each column and the abbreviations used to explain availability of amenities are as under.

Column 1 – Serial No. of the villages.

Column 2 – The name and location code number of each village, as this is necessary for proper identification of the village. This also includes the forest and uninhabited villages.

Column 3 – The total area of the village (in hectares) as indicated by the State Revenue Department.

Column 4 – The total population in each village (2001 Census).

Column 5 – The total number of households in the village (2001 Census).

Data on amenities such as educational, medical, drinking water, post, telegraph and telephone, commercial and cooperative Banks, credit societies, Recreational & cultural facilities, communications etc. are shown under columns 6 to 13 of the Village Directory. In case if an amenity is not available within the referent village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz., up to 5 kms., 5-10 kms. and 10+ kms. to the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provision of goods and services as well, so as to minimize the regional imbalance in the process of development.

Column 6 shows the number of all kinds of educational institutions run by different agencies, government or private of the level of viz., primary school, middle school, secondary school, senior secondary, college, industrial school, training school adult literacy school / centre and other educational institutions (Sanskrit pathshala, senior basic school, makhtab etc).

If in a village, secondary school has middle and primary classes also, the same has been counted as three schools i.e., secondary, middle and primary school. In case there are more than one institution of any type in a village their number is indicated within brackets against the prescribed abbreviation.

Column 7 provides data on medical facilities available in the village.

Column 8 gives information regarding availability of drinking water within the village. In case more than one source is available to the village the same has been indicated.

Column 9 provides information about the existance of facilities such as post, telegraph and telephone connections available in the village.

Column 10 refers to the availability of banking service in the villages and this is shown by giving the number of commercial and co-operative banks separately.

Column 11 contains information on availability of credit societies in the village. The information is represented separately by recording the number of Agricultural, non-Agricultural and other credit societies.

Column 12 give information on availability of Recreational & Cultural facilities such as Cinema / Video Hall, Sports Club, Stadium / Auditorium, in the village.

Column 13 gives information as to whether the village is served by any mode of public transport like bus, rail and water-ways.

Column 14 refers to the state of roads etc. leading to the village, this is useful in determining as to whether the village is approachable both in fair and foul weather, and whether it is inaccessible only for some time in the year.

Column 15 gives the information about the nearest town and its distance in kilometers in bracket from the referent village. In case the nearest town is located in another state, the name of the state has also been furnished.

Column 16 relates to the availability of power supply in the village.

In case the power supply is released only for specific purpose, say agriculture or other it has been stated accordingly. In case the electricity is not available to the village, a dash (-) has been mentioned in the column.

Column 17 is regarding receipt of News Paper / Magazine in the village.

Column 18 has information regarding the name of the most important commodity, manufactured in the village.

Columns 19 to 23 give the details about land utilization. The land use pattern given in the Village Directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India.

Column 19 includes all lands classed as forests under any legal enactment dealing with forests or administered as forests, whether State-owned or private, and whether wooded or maintained as potential forest land. The area of crops raised in the forest and grazing lands or areas open for grazing within the forests has been included under the forest area.

Column 20 indicates extent of irrigated lands under various types of irrigation.

Column 21 cover all agricultural lands including the net area sown with crops and orchards or net cropped area and also current and other fallow lands, the latter would imply all lands which were taken up for cultivation, but are temporarily out of cultivation for a period of not less than one year and not more than five years. The columns does not include gross year sown or gross cropped area. Net area sown thus represents the area sown with crops and orchards. Area sown more than once in the same year has been counted only once.

Column 22 gives information on cultivable wastelands and includes all lands available for cultivation whether not taken up for cultivation once but not cultivated during the preceding five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles, which are not put to any use. These may be assessed or unassessed and may be in isolated blocks within cultivated holding. Lands under thatching grasses, bamboo, bushes and other groves for fuel etc., which are not included under orchards or forests are included in this category. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

Column 23 includes the land not available for cultivation such as barren, unculturable land and put to non-agricultural use. All lands occupied by buildings, roads, railways, rivers, canals, etc. form part of the land under non-agricultural uses. Barren and unculturable lands include mountains, rocks, deserts etc., which cannot be brought under cultivation, except at a very high cost.

Column 24 and 25 are once again the name of the villages and serial numbers respectively for the readers convinience.

Town Directory :

The town directory is presented for each town covering different aspects of urban life through a set of seven statements from I to VII. The data contained in these statements are about the identification particulars of town, the area, number of households (including houseless households), population and growth rate in 2001 and past censuses, density, sex ratio, physical aspects and location of towns, communications, municipal finances, civic and other amenities, medical, educational, recreational, cultural facilities, trade, commerce, industry, banking, and civic and other amenities in slums. It covers all the towns in the district statutorily notified as well as non-municipal towns (Census Towns). All the towns in the district are arranged in ascending order of location code number.

The data collected in these statements have largely been furnished by the municipal bodies. In case of non municipal towns (Census Towns) the Block level office supplied the information.

Statement I shows status and growth history of the towns in the district. Column 2 in this statement indicates class, name and civic administration status of town (as in 2000). Class of the town indicated under this column has been introduced to factilities the analysis of town directory data at the state and the national level. Census towns have no urban civic status.

Size and Class of Towns :

Class	-	Size
I	-	100,000 and above
II	-	50,000 to 99,999
III	-	20,000 to 49,999
IV	-	10,000 to 19,999
V	-	5,000 to 9,999
VI	-	below 5,000

Column 3 is for representing eight digit permanent code number for each town in the district.

Coulmn 4 indicates the name of police station in which the town is located.

Column 5 is for recording the name of CD Block if the town is located in it.

Column 6 gives area (in sq. kms.) of the town.

Column 7 gives information about number of households including houseless households.

Columns 8 to 18 gives population and growth rate of the town since the Censuses of 1901, which would help in drawing the trends in their growth rate.

Column 19 present density in 2001 Census and 20 to 22 represent the sex ratio.

Statement II shows physical aspects and location of towns. In physical aspects only the rainfall, maximum and minimum temperature data as obtained from the Director General of Meteorological Survey of India have been shown. Towns for which information could not be obtained from Meteorological Survey of India, the same has been collected locally or calculated in relation to the nearest town, to the extent possible. Columns 6 to 12 have been filled up on the basis of information received from the respective district authority. Distances respectively from the state, district and tahsil/CD Block headquarters as well as the nearest city (urban area with a population of 100,000+) would help in determining the location of a town. Communication facilities are shown mentioning railway station, bus route and navigable river/canal.

Statement III deals with municipal finance for the statutory and also non-statutory town bodies managing civic administration of the town provided they have separate budgets and accounts of their own.

Statement IV Scheduled Castes/Scheduled Tribes population figure given in columns 4 and 5 would help in measuring amenities in respect of population size of the weaker sections in the towns. The information on road length within the town shown under column 6 has been obtained from Municipality (except for the highways).

Columns 7 to 12 reflects the information on system of sewerage number of latrines and method of disposal of night soil.

Columns 13 and 14 indicate sources and system of storage with capacity of protected water supply to the inhabitants of the towns.

Column 15 gives information regarding availability of fire fighting services. In case, it is not available in the referent towns, the name of the nearest place where it is available has been mentioned and the distance from the town has also been indicated within brackets. Columns 16 to 20 pertain to the number of connection of electricity supply available for domestic, industrial, commercial, road lighting (points) and for any other purposes.

Statement V gives information regarding amenities like medical, educational, recreational and cultural facilities available in the town. 2001 population figures for each town have also been indicated and this will facilitate in analyzing data on facilities available to the people.

Data related to medical facilities have been obtained from the concerned district authority and shown under columns 4 and 5. All types of medical institutions whether allopathic, ayurvedic, unani or homoeopathic have been covered.

If the medical institution is Ayurvedic, Unani or Homoeopathic the same is indicated in bracket by recording the number of institutions.

In case, more than one institution of any type is available, the exact number is shown within the brackets.

The information on educational facilities are depicted in column 6 to 14.

Column 10 pertains to the number of recognized shorthand, typewriting and vocational training institutes (grouped as others) which include Applied Art / Painting college, Pharmacy college, B.Ed. college, Teacher's training institute, Music / Dancing, Nursing school, etc.

Column 15 shows the information in respect of Adult Literacy classes / Centres etc. Similarly in view of the spurt in the employment of women in towns, information on number of working women's hostels and seats available therein has been given under column 16. This data would help in formulating plans for opening new hostels in order to meet the problems of the single working women.

Columns 17 to 20 show recreational and cultural facilities available in the town. These include stadia , cinema, auditoria / drama / community halls, public libraries indicated as 'PL' and reading rooms indicated as 'RR'.

Statement VI presents information in respect of Trade, Commerce, Industry and Banking services in the town. Columns 3, 4 and 5 contain information about the three most important comodities exported out from the town, column number 6, 7 and 8 in the other hand bears information about the three most important commodities manufactured in the town. Column number 9, 10 and 11 show the number of agricultural and non-agricultural credit societies in the town.

Statement VII provides data in respect of civic and other amenities in the slums.

PEOPLE ORIENTED

Abbreviation used in Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows :

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz. <5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the

abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Sorce	SS-

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities :

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial & Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given :

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational & Cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets :

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows :

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is

लोकोन्मुख PEOPLE ORIENTED

indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell(with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.
Appendix-I-A	Indicates number of villages CD Block wise having one or more primary schools.
Appendix-I-B	Indicates number of villages CD Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages CD Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VII A & VII B	The appendix shows the list of villages according to proportion of the Scheduled castes and Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates CD Block wise number of villages under each Gram Panchayat.

Section II
Town Directory

Note explaning the abbreviations used in Town Directory :

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/ Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 - 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage

system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom.

Column 6 to 9 :

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U

(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B.Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 : Higher Secondary/Intermediate/ Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 : Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

Part : B
Primary Census Abstract

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible

cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institu-tional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication table provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made

available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks :

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under :

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

Appendices to Village Directory

APPENDIX II - A CENSUS TOWN

CENSUS TOWNS WHICH DO NOT HAVE ONE OR MORE AMENITIES

					Amenities not available (indicate N. A. where amenity not available)						
Sl. No.	Name of census town	Location code number	Name of CD Block	Population	Senior Secondary School	College	Health Centre	Tap drinking water	Bus facility	Approach by Pucca road	Banks
1	2	3	4	5	6	7	8	9	10	11	12
There is no Census Town in this district											

Appendices to Village Directory

APPENDIX - III

LAND UTILISATION DATA IN RESPECT OF CENSUS TOWNS/NON-MUNICIPAL TOWNS

Serial Number	Name of the Census Town and CD Block within Brackets	Total Area	Ferest	Irrigated by Source	Unirrigated	Culturable waste (Including gauchar and groves)	Area not available for cultivation
1	2	3	4	5	6	7	8
There is no Census Town in the district

1	2	3
There is no such village merged in Towns and out growths in this district at 2001 Census		

Abbreviation used in Town Directory

Town Directory Statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/ Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 - 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface

are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom.

Column 6 to 9 :

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B.Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 : Higher Secondary/Intermediate/ Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 : Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

Brief Note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preli-minary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institu-tional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication table provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks :

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under :

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows :

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

Out of 8 CD Blocks of the district, three CD Blocks namely Gangarampur, Balurghat and Tapan have the highest number of Gram Panchayats (11). The highest number of villages is contained in Balurghat CD Block (309) which is also one of the highest as far as the number of Gram Panchayats are concerned. Hilli has the lowest number of villages (82) and lowest number of Gram Panchayats(5). The Gram Panchayat having maximum number of villages is Maligaon (41) under Kushmundi CD Block.

Fertility and Mortality, 1991 Census

Fertility :

In 'demography' the science of population statistics Fertility is one of the main components of population change whereas others are 'Mortality' and Migration. Fertility deals with actual reproductive performances in a given community at a given period of time.

It has been customary in censuses to collect, compile and analyse the fertility data. In 1991 and 2001 Census, four questions relating to fertility were asked. These are age at marriage, number of children surviving at the time of questioning with their sex and number of children born alive by sex to all ever married woman only. Also, the question "Number of children born alive during last one year" was asked from the currently married women only. Different fertility ratios which are discussed here are based on mainly the answer of the question "Number of children born alive during last one year".

The very common indicator of fertility is Crude Birth Rate (CBR) which denotes the number of live births per 1,000 population. Other common fertility idicators are Age Specfic Fertility Rate (ASFR), General Fertility Rate (GFR), Total Fertility Rate (TFR), Age Specific Marital Fertility Rate (ASMFR), General Marital Fertility Rate (GMFR) and Total Marital Fertility Rate (TMFR). ASFR, GFR and TFR are calculated by taking total no. of women as denominator whereas for ASMFR, GMFR & TMFR are calculated by taking total number of currently married woman as denominator. The table below shows the fertility rate under different measures in the district as well as in the State.

Annexure

Annexure – II (A)

Age Specific Marital Fertility Levels - 1991 in the district Dakshin Dinajpur

Age group	West Bengal	Dakshin Dinajpur
(1)	(2)	(3)
15-19	0.160	0.145
20-24	0.191	0.195
25-29	0.133	0.158
30-34	0.082	0.110
35-39	0.050	0.073
40-44	0.030	0.049
45-49	0.016	0.022

Source : Fertility Table - F Series 1991 Census
Note : The figures belong to West Dinajpur

The Age Specific Marital Fertility rates in 1991 for all age groups, excepting the age group 15-19 is higher in the district as compared to the State. The Age specific Marital Fertility rates for the district are very high specifically in the age groups 25-29, 30-34 & 35-39 as compared to State figure.

Annexure – II (B)

Other fertility measures in the district Dakshin Dinajpur, 1981-91

Fertility Measures	West Bengal		Dakshin Dinajpur	
	1981	1991	1981	1991
G.F.R.	153	122	162	145
G.M.F.R.	185	158	208	184
T.F.R.	4.3	3.61	5.2	4.42
T.M.F.R.	5.7	5.13	6.4	5.83
C.B.R.	34.67	29.01	37.83	33.88
No. of children ever born per woman in the age group 45-49	-	4.56	-	4.9
Mean age at Marriage	-	17.21	-	17.38
Child woman ratio	-	71.14	-	84.84

Note : The figures belong to West Dinajpur.

It is observed from different fertility measures of 1981 as well as 1991 that fertility rate is higher in the district of Dakshin Dinajpur as compared to the State both in 1981 and 1991.

Annexure

Mortality

Apart from fertility and migration, mortality is also considered as the dynamics of population change in demography. In census, information on the questions on children ever born and children surviving is collected from all ever married women. From this, estimates of child mortality have been worked out by age of mother by using Brass technique. The table below shows the estimates of child mortality in 1981-91 in the district of Dakshin Dinajpur.

Annexure – II (C)
Estimate of Child Mortality, 1981-91
in the district Dakshin Dinajpur

Mortality Level	Census Year	West Bengal			Dakshin Dinajpur		
		P	M	F	P	M	F
q_1	1981	95	103	57	116	120	113
	1991	62	75	51	89	96	78
q_2	1981	102	106	98	130	139	121
	1991	81	79	83	95	101	88
q_3	1981	111	113	110	138	143	132
	1991	86	86	85	102	107	104
q_5	1981	124	123	125	151	152	151
	1991	94	94	92	113	113	114

Source : Occassional Paper No. 1 of 1997
Note : The figures belong to West Dinajpur.

From the estimates of child mortality, number of deaths by ages 1, 2, 3 and 5 has been shown in the table as q_1, q_2, q_3 and q_5. In q_1, q_2 and q_3 both in 1981 and 1991 it is evident from the above table that male mortality is high over the females whereas in q_5 of 1991 female mortality is slightly higher than the male mortality in the district. At each ages the mortality levels in West Dinajpur are higher than the state average for both the sexes in 1981 and 1991. Table in Annexure III will give a detail fertility picture of all the districts in the State of West Bengal.

Source : Occasional Papers No. 1 of 1997

It is observed from the above table that GFR, GMFR, TFR, TMFR and CBR for the State as a whole are 122, 158, 3.61, 5.13 and 29.01 respectively. Maldah occupies the first position in terms of GFR, TFR and CBR whereas in case of GMFR and TMFR South 24 Parganas is in the first position. Lowest position for GFR and CBR goes to Kolkata whereas the same position occupies by Hugli for GMFR, TFR and TMFR. Number of children ever borm per woman in age group 45-49 is maximum in Murshidabad with 5.72 which is much higher than the State average of 4.56 and the minimum number is observed in Kolkata. Child-woman ratio is highest in Murshidabad with 93.03 and Kolkata has the lowest with 37.22. State average mean age at marriage is 17.2. Mean age at marriage is maximum in Kolkata with 19.05 and Murshidabad with 16.49 is the minimum.

Annexure - IV

Percentage distribution of Migrants by place of birth, 2001 Census

Migration is an important aspect in the analysis of population change as it affects the size, age and sex structure of the population. However, it can affect the population size at local level only. In most general sense, migration as ordinarily defined movement of people from one place to another place involving change of residence for some definite purpose. Migration may be categorized as internal and international migration. A person moves from his/her place of birth last residence to a new place with some definite reason, it may be economic, social, political or for any other reason. The main source of information on migration of our country is collected through regular decennial census. In 2001 Census, data on migration were collected on different aspects, such as reason for migration from the place of previous residence, duration of stay since migration etc. Tables on migration by place of birth; interstate migration; rural and urban composition of internal migrants by place of birth in the district and in the State are given below.

Annexure

ANNEXURE – IV (A)
PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH, 2001 CENSUS

Place of Birth	West Bengal			Dakshin Dinajpur		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
A. Migrants born within the state of Enumeration	19,082,558	4,489,736	14,592,822	340,840	68,304	272,536
	(77.4)	(60.0)	(84.9)	(67.3)	(43.9)	(77.7)
i) Migrants born elsewhere in the district of Enumeration	14,526,298	2,892,376	11,633,922	286,620	55,071	231,549
	(58.9)	(38.7)	(67.7)	(56.6)	(35.4)	(66.0)
ii) Migrants born in other district of the State	4,556,260	1,597,360	2,958,900	54,220	13,233	40,987
	(18.5)	(21.4)	(17.2)	(10.7)	(8.5)	(11.7)
B. Migrants born in other State of India	2,491,932	1,352,219	1,139,713	7,922	3,707	4,215
	(10.1)	(18.1)	(6.6)	(1.6)	(2.4)	(1.2)
C. Migrants born in other countries	3,090,393	1,636,343	1,454,050	157,908	83,684	74,224
	(12.5)	(21.9)	(8.5)	(31.2)	(53.7)	(21.1)
Total Migrants	**24,664,883**	**7,478,298**	**17,186,585**	**506,670**	**155,695**	**350,975**
	(100.0)	**(100.0)**	**(100.0)**	**(100.0)**	**(100.0)**	**(100.0)**

It is observed from above annexure that migrants born within the State of Enumeration in the district is 67.3 per cent, which is lower than the State percentage (77.4 per cent). Out of total 506,670 migrants in Dakshin Dinajpur district, only 1.6 per cent were born in other States of India. This trend is almost similar to that of State's average (10.1 per cent) whereas, the proportion of migrants born in other countries and enumerated in the district is 31.2 per cent that is significantly higher than the State average of 12.5 per cent.

Annexure

ANNEXURE – IV (B)
INTERSTATE MIGRANTS TO WEST BENGAL AND DISTRICT, 2001 CENSUS

Place of Birth	Migrants			Percentage to total migrants		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
STATE - WEST BENGAL 19						
1. Bihar	1,160,593	708,591	452,002	46.6	52.4	39.7
2. Jharkhand	441,435	159,689	281,746	17.7	11.8	24.7
3. Uttar Pradesh	309,315	190,832	118,483	12.4	14.1	10.4
Total for three states	**1,911,343**	**1,059,112**	**852,231**	**76.7**	**78.3**	**74.8**
4. Other States	580,589	293,107	287,482	23.3	21.7	25.2
Total	**2,491,932**	**1,352,219**	**1,139,713**	**100.0**	**100.0**	**100.0**
Dakshin Dinajpur 05						
1. Bihar	4,383	2,126	2,257	55.3	57.4	53.5
2. Jharkhand	1,024	458	566	12.9	12.4	13.4
3. Uttar Pradesh	759	395	364	9.6	10.7	8.6
Total for three states	**6,166**	**2,979**	**3,187**	**77.8**	**80.4**	**75.6**
4. Other States	1,756	728	1,028	22.2	19.6	24.4
Total	**7,922**	**3,707**	**4,215**	**100.0**	**100.0**	**100.0**

As observed from above annexure regarding interstate migration in Dakshin Dinajpur district, 55.3 per cent of the total migrants had their place of birth in Bihar whereas, the corresponding figure for interstate migration in respect of the State is 46.6 per cent.

Annexure

ANNEXURE – IV (C)

RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH, 2001 CENSUS

Place of Birth	Place of Enumeration					
	West Bengal			Dakshin Dinajpur		
	Total	Rural	Urban	Total	Rural	Urban
1	3	4	5	6	7	8
1. Migrants born within the state of Enumeration	19,082,558	14,106,837	4,975,721	340,840	306,420	34,420
	(100.0)	(73.9)	(26.1)	(100.0)	(89.9)	(10.1)
2. Migrants born in other State of India	2,491,932	678,906	1,813,026	7,922	5,126	2,796
	(100.0)	(27.2)	(72.8)	(100.0)	(64.7)	(35.3)

From the above table on rural and urban composition of internal migrants by place of birth, it is observed that in the district of Dakshin Dinajpur in 2001 Census, major portion of migrants born within the State of Enumeration have been enumerated in rural areas (89.9 per cent), whereas the same figure for West Bengal is 73.9 per cent. In case of migrants born in other States of India, 64.7 per cent have been enumerated in rural areas whereas the same is 27.2 per cent in case of West Bengal.

It is seen from Annexure-IV(D) that in terms of total migrants in absolute figure, North 24 Parganas with 3,693,336 persons comes in first position followed by Medinipur with 2,709,165 persons and Barddhaman with 2,364,020 persons. In case of people born in West Bengal, 9 districts of the State overtake the State percentage of 77.4. So far people born in other states are concerned, 8 districts overtake the State average of 10.1 per cent and regarding people born in other district of West Bengal, only 6 districts overtake the State average of 18.5 per cent. The percentage of people born elsewhere in the district of enumeration varies between the maximum of 87.5 in Medinipur and the minimum of 38.7 in North 24 Parganas district. Similarly, the percentage of people born in other countries varies between the maximum of 33.9 in Nadia and the minimum of 0.2 in Puruliya district.

Marital Status of Population as per Census of India, 2001

Information on Sex and Marital status of persons are very much needed for fertility analysis. Particularly marital status of women population is very much important for measuring various fertility rates by age group. A table classified by marital status and broad age group of population as per 2001 census is shown below.

Annexure

ANNEXURE – VI (A)
PERCENTAGE DISTRIBUTION OF POPULATION CLASSIFIED BY MARITAL STATUS, BROAD AGE GROUP AND SEX, 1991-2001

			Marital Status							
			Never married		Married		Widowed		Divorced or Separated	
Year	Age	Total	Males	Females	Males	Females	Males	Females	Males	Females
1	2	3	4	5	6	7	8	9	10	11
1991	0-14	100.0	99.8	99.5	0.2	0.5	0.0	0.0	-	0.0
	15-34	100.0	56.3	21.6	43.2	75.7	0.3	1.5	0.2	1.1
	35-54	100.0	3.0	0.6	94.9	83.1	1.8	15.2	0.3	1.1
	55+	100.0	3.2	1.5	85.7	39.3	10.6	58.4	0.4	0.8
	All Ages	100.0	59.2	48.7	39.4	43.4	1.3	7.3	0.2	0.6
2001	0-14	100.0	99.8	99.4	0.2	0.5	0.0	0.1	0.0	0.0
	15-34	100.0	51.8	18.2	47.8	79.0	0.2	1.5	0.3	1.3
	35-54	100.0	2.5	1.3	95.9	83.1	1.2	14.1	0.4	1.6
	55+	100.0	2.3	1.5	88.3	42.1	8.9	55.5	0.5	0.8
	All Ages	100.0	53.7	42.4	44.9	48.0	1.1	8.7	0.2	0.9

Note : 1. Figures of "age not stated" are included in all ages. 2. Unspecified Marital status is included in total population.

3. 1991 Census figures belong to undivided West Dinajpur district.

No significant change did occur in the percentage of all round Marital status of 0-14 age group in 2001. It is also seen that the percentages of marrieds (both males and females) are found to be increased in all age groups in 2001 Census over 1991 Census, excepting 35-54 female age group where it is seen as constant (83.1 per cent) in both the census years. So far as widowed persons are concerned, its percentages are steadily decreasing (for both males and females) in all age groups in 2001 Census over 1991 Census. But the percentages of female widoweds are seen to be much higher than their male counterparts. In divorced/separated category also, the percentages of females are higher than the males.

It is observed that 48.2 per cent of the total population of Dakshin Dinajpur belonged to Never Married status in 2001. Although none was found in the married status in 0-9 age group in the district, only 1.0 per cent of 10-14 age group population have been found married implying that child marriage still exists in the minuscule form. The highest number of married females (65,434 persons) is found in 25-29 age group and that of married males (57,538 persons) is found in 35-39 age group implying that late marriage is being preferred by both the sexes. In 'Widowed' status female widoweds had always overtaken the number of male widoweds. The number of divorced or separated females is also higher than the number of males in most of the age groups.

It is seen that in none of the levels of literacy of Dakshin Dinajpur district the females have been able to catch up the males in number in any age group in 2001. The number of females was also seen to be higher in all the age groups of illiterate category, except 0-6 age group. The highest illiteracy is observed in 45+ age group (53.3 per cent) and the lowest in 11-14 age group (14.5 per cent). Only 63.6 per cent of the total population is literate, excluding 0-6 age group. Number of literates without any formal schooling including education level is not satisfactory as it is just 10,215 for males and 7,165 for females. The Highest percentage of literacy is observed in Primary Level (22.8 per cent) and the lowest in non-technical diploma or certificate not equal to degree (0.01 per cent). Number of graduates and above is also very little in the district, i.e. 20,146 for males and 7,372 for females, which accounts for only 3.4 per cent of the total literate population.

ANNEXURE - VIII

Distribution of different mother tongues in the district, 2001 Census

Language is an important characteristic of a population particularly in a multi-lingual and multi-cultural society like India. The language census literature that has grown over the last one hundred years of Indian census history has shed light on the linguistic composition of our country. The table below shows the population by mother tongue of the district since 1961. It is to be noted that mother tongues shown in 1971 Census are mother tongues inclusive of language grouped under each. Data shown in 1981 Census is the language mainly spoken in the households.

Note : Till 1991, both Uttar Dinajpur and Dakshin Dinajpur were under the undivided West Dinajpur District which was bifurcated subsequent to 1991 Census. As such the figures before 2001 Census are common for both the districts.

The above table shows population by mother tongue for Dakshin Dinajpur district since 1961. As per 2001 Census, Bengali is the most spoken mother tongue (82.2 per cent) of the district. Santali is the second major mother tongue (10.3 per cent) spoken in the district, followed by Hindi (1.8 per cent), Kurukh/Oraon (1.7 per cent), Munda and Sadan/Sadri each 0.5 per cent. It is to be noted that 1.7 per cent of the total population speak in other languages as their mother tongue.

Annexure

Annexure -IX : Scheduled Caste and Scheduled Tribe Population - Size and Growth

The collection of population statistics on the scheduled caste and the scheduled tribe as per the state scheduled caste and scheduled tribe list in the State is one of the most important aspects of decadal census in post independence period. This information is required for the purpose of delimitation of the assembly and parliamentary constituencies in the State. The planning for development of these communities is mostly considered on the information of population size and its growth rate, sex-ratio, literacy rate, economic activities etc. Census is the only source which provided data for scheduled castes and scheduled tribes on various aspects of their life at the micro level.

In 1991 Census, the district (undivided West Dinajpur) registered a total scheduled caste population of 9,07,553 which comprises 4,70,758 males and 4,36,795 females accounting for 29.0 per cent of the total population of the district. Out of this bulk of scheduled caste population, 93.1 per cent was in rural and the other 6.9 per cent in the urban areas of the district. In all 58 scheduled castes were reported in the district and were scattered all over the district. The five major scheduled castes in order of population size were the (i) Rajbanshi (4,89,642), (ii) Paliya (1,06,448), (iii) Namasudra (1,05,014), (iv) Jalia Kaibartta (31,282), (v) Hari Mehtor (23,373).

The literacy rate among scheduled castes was 33.1 per cent (45.7 per cent for males and 19.1 per cent for females) as against the general literacy rate of 39.3 in the district.

So far the work participation practice among the scheduled castes in the district had increased and they registered 34.2 per cent with the break up of 55.4 per cent males and 11.3 per cent females, corresponding to 32.7 per cent (54.0 per cent males and 9.8 per cent females) in the case of general population. The scheduled castes in the district were mainly working as Cultivators accounting for 42.6 per cent of the total scheduled caste main workers of the district with the female proportion of 15.2 per cent.

Likewise the district had registered 307,487 total scheduled tribe population comprising 156,298 males and 151,189 females accounting for 9.8 per cent of the total population of the district. A substantial portion of 97.9 per cent of scheduled tribes population were in rural areas and remaining 2.1 per cent only were in urban areas scattered in the district. In all 35 scheduled tribe were reported settled all over in the district. Of these 35 Scheduled Tribes, 5 major scheduled tribe in the order of population size are (i) Santhal (2,18,815), (ii) Oraon (44,349), (iii) Munda (23,189), (iv) Kora (5,043), (v)Bedia (4,384).

The literacy rate among scheduled tribes was 18.9 per cent recording a break of 28.4 per cent among males and 9.1 per cent among females against the general literacy rate of 39.3 per cent in the district.

In view of work perticipation practice among scheduled tribes in the district, they registered 47.4 per cent with the break up of 59.8 per cent males and 34.6 per cent females, corresponding to 32.7 per cent (54.0 per cent males and 9.8 per cent females) in the case of general population. The scheduled tribes in the district were mainly working as Agricultural Labourers accounting 61.3 per cent of the total scheduled tribes main workers of the district with the female proportion of 78.8 per cent.

As per 2001 Census, Dakshin Dinajpur district has 432,597 scheduled castes population comprising of 222,063 males and 210,597 females accounting for 28.8 per cent of the total population of the district. Among the scheduled castes of the district, the first five major castes in order of population size are Rajbanshi with 224,988 persons (52.0 per cent), Paliya with 69,369 persons (16.0 per cent), Nama Sudra with 39,172 persons (9.1 per cent), Bhuimali with 16,833 persons (3.9 per cent) and Jhalo Malo/Malo with 15,688 persons (3.6 per cent). These five castes constitute 77.1 per cent of the total scheduled caste population of the district.

Further, the district has also recorded 242,317 scheduled tribe population comprising of 122,442 males and 119,875 females in 2001 Census acounting for 16.1 per cent of the total district population. Among these, the first five major tribes in order of population size are Santal with 153,634 persons (63.4 per cent), Oraon with 41,797 persons (17.2 per cent), Munda with 26,496 persons (10.9 per cent), Beida/Bediya with 7,018 persons (2.9 per cent) and Mahali with 3,133 persons (1.3 per cent). These five tribes constitute 91.5 per cent of the total scheduled tribe population of the district.

The distribution of rural and urban scheduled caste / tribe population for Dakshin Dinajpur district since 1961 can be observed in the following table :

ANNEXURE-IX

SCHEDULED CASTE AND SCHEDULED TRIBE POPLULATION IN THE DISTRICT OF DAKSHIN DINAJPUR (1961-2001)

	1961		1971		1981		1991		2001	
T/R/U	SC	ST	SC	ST	SC	ST	SC	ST	SC	ST
1	2	3	4	5	6	7	8	9	10	11
Total	134,621	120,176	192,255	148,062	263,375	173,812	356,646	205,971	432,660	242,317
			(42.8)	(23.2)	(37.0)	(17.4)	(35.4)	(18.5)	(21.3)	(17.7)
Rural	129,901	118,836	186,186	146,121	247,963	169,185	331,797	201,439	397,599	236,271
			(43.3)	(23.0)	(33.2)	(15.8)	(33.8)	(19.1)	(19.8)	(17.3)
Urban	4,720	1,340	6,069	1,941	15,412	4,627	24,849	4,532	35,061	6,046
			(28.6)	(44.9)	(154.0)	(138.4)	(61.2)	-(2.1)	(41.1)	(33.4)

Note : 1. Figures within brackets indicate decennial growth rate.

2. These figures belong to Dakshin Dinajpur as all the figures since 1961 and onwards have been recasted.

It can be seen from the above table that there has been declining trend of growth rate up to 2001 for the scheduled caste population. The growth rate observed during 1961-71 was 42.8 per cent, which decreased to 21.3 per cent during 1991-2001. Except a little rise during 1981-91, (33.8 per cent) rural growth rate followed an overall decreasing trend up to 2001. Urban growth during 1961-71 was 28.6 per cent but it rises significantly in 1971-81 (154.0 per cent). After that, it decreased until 2001 (41.1 per cent). In case of scheduled tribes there is also a trend of declining population growth rate except 1981-91 when it was 18.5 per cent. The decades 1961-71, 1971-81 and 1991-2001 registered a growth rate of 23.2, 17.4 and 17.7 per cent respectively. This trend is also true for rural growth where growth rate of scheduled tribe population during 1961-71 was 23.0, which declined during 1971-81 to 15.8 per cent, rose to 19.1 per cent in 1981-91 and then again falls to 17.3 per cent during 1991-2001. However, in urban area, the growth rate varies significantly as 44.9 per cent of 1971 increased upto 138.4 during 1971-81 but declined during 1981-91 recording a negative growth of -2.1. During 1991-2001, it again obtained an increased growth rate of 33.4 per cent.

ABOUT THE SAMPLE REGISTRATION SYSTEM (SRS) IN WEST BENGAL :

The Sample Registration System (SRS) is a large scale demographic sample survey for providing reliable annual estimates of birth rate, death rate and other fertility and mortality indicators at the national and sub-national levels. The field investigation consists of continuous enumeration of births and deaths by a resident part time enumerator and an independent half yearly survey by supervisor. The data obtained through these operations are matched. The unmatched and partially matched events are re-verified in the field and thereafter an unduplicated count of births and deaths is obtained. The SRS was initiated by the Office

of the Registrar General and Census Commissioner, India on a pilot basis in a few selected states in 1964-65 and it became fully operational during 1969-70 with about 3,700 sample units in India. Thereafter the number of sample units was periodically increased. After completion of 1991 Census these units were replaced during 1993-94 with 6,671 sample units (4,436 rural and 2,235 urban blocks) in all states and union territories. For West Bengal state total number of sample units were 475 (300 rural and 175 urban) after 1991 census. The sample unit in rural areas is a village or a segment of it if the village had a population of 2,000 or more. In urban areas the sampling unit is a census enumeration block with a population of 600 or 120 households. At present SRS is operational in 7,597 sample units (4,433 rural and 3,164 urban) spread across all States and Union territories and covers about 1.3 million households and 6.93 million population based on 2001 Census frame and these were effective from January 2004. In the state of West Bengal SRS is covering about 5.7 lakh population through 555 (310 rural and 245 urban) sample units which is highest among all states and UTs.
