WEST BENGAL

DISTRICT HAORA

NAME OF C. D. BLOCK
A – BALLY–JAGACHHA

Police Station headquarters of UDAYNARAYANPUR, JAYPUR, AMTA, DOMJUR, ULUBERIA, BAGNAN and SHYAMPUR are also C. D. Block headquarters.

TOTAL AREA OF THE DISTRICT	1467.00 Sq. Kms.
TOTAL POPULATION OF THE DISTRICT	4273099
TOTAL NUMBER OF NON–STATUTORY TOWNS	50
TOTAL NUMBER OF STATUTORY TOWNS	3
TOTAL NUMBER OF VILLAGES	734
DISTANCE FROM STATE CAPITAL TO DISTRICT HEADQUARTERS	3 Kms.

BOUNDARY, DISTRICT
" POLICE STATION
" C.D. BLOCK
HEADQUARTERS : DISTRICT, POLICE STATION, C. D. BLOCK
NATIONAL HIGHWAY — NH 6
IMPORTANT METALLED ROAD
RAILWAY LINE WITH STATION, BROAD GAUGE — R.S.
RIVER AND STREAM
VILLAGE HAVING 7000 AND ABOVE POPULATION WITH NAME — Masila
TOWNS WITH POPULATION SIZE AND CLASS I, II, III, IV, V, & VI
DEGREE COLLEGE AND TECHNICAL INSTITUTION
IMPORTANT TOURIST LODGE / OTHER GOVT. REST HOUSE

NAME OF CENSUS TOWNS

C. D. BLOCK SANKRAIL
1. ARGARI (CT)
2. ANDUL (CT)
3. DHUILYA (CT)
4. JHORHAT (CT)
5. PODARA (CT)
6. PANCH PARA (CT)
7. HATGACHHA (CT)
8. RAMCHANDRAPUR (CT)
9. BANUPUR (CT)
10. SANKRAIL (CT)
11. MANIKPUR (CT)
12. NALPUR (CT)
13. RAGHUDEBBATI (CT)
14. SARENGA (CT)

C. D. BLOCK DOMJUR
1. KHANTORA (CT)
2. NATIBPUR (CT)
3. KESABPUR (CT)
4. KALARA (CT)
5. BIPRA NOAPARA (CT)
6. BHANDARDAHA (CT)
7. MAHIARI (CT)
8. ANKURHATI (CT)

Vidyasagar Setu

Haora, situated at the west bank of river Hooghly is called the twin to Kolkata. High density of population, habitation of people with a wide variety of culture, language and ethnicity has given the district a clad of cosmopolitan city on municipal corporation, two municipalities, 14 blocks, 734 mouzas constitute the administrative atlas of the district. Geographically, it is located between 22.12 degree and 22.48 degree north altitude and 88.23 degree and 87.50 degree east longitude. The district is connected with Kolkata by two bridges on the river Hooghly - Rabindra Setu built in 1943 and other – Vidyasagar Setu, finest contribution to architecture and technology. Belur Math founded by Swami Vivekananda and Botanical Garden are the main places of tourist attraction. The district is connected with other parts of the country through South Eastern Railways, Eastern Railways, National Highway 11, National Highway 2 and National Highway 6. The age-old 'Mongla Hat' – the weekly rural market has nowadays become one of the most important trading centres of south-eastern region of ready-made garments. About 75.60 per cent of the total population is economically dependent on non-agricultural activities, whereas only 24.40 per cent have agro-based livelihood. Due to its positional advantage, the district had got a commendable infrastructure for industrial development and had attained a commanding height of industrial performance during the boom. But due to recessional trend of late a bulk of capital flight caused a good deal of concern.

Calendar of Events

Calendar for Census 2001 upto Houselisting Operation :

December, 1999

(i) Issue of all appointments of Charge Officers, Zonal Sub-Charge Officers and Charge Assistants etc., by the Principal Census Officer.

(ii) State level meeting with all Principal Census Officers to brief them on the different steps to be taken for conduct of Census-2001 to be convened by the Chief Secretary to the Government of West Bengal.

(iii) Meeting to be convened by all the Principal Census Officers at their respective H. Qtrs. to train all the Charge Officers and Sub-Charge Officers and Charge Assistants. The meetings to be attended by Director /Joint Director of Census Operations, West Bengal.

(iv) Principal Census Officers to write to all School Authorities, Govt. Offices, Semi Govt. Offices, local bodies etc., for sending list of officials for appointment as Enumerators and Supervisors.

(v) Collection and compilation of data for Village and Town Directory.

January, 2000

(i) Survey work for preparation of notional maps and layout sketches for formation of House listing Blocks on the basis of 1991 Enumeration Blocks.

(ii) Formation of House listing Blocks on the basis of Survey and Guideline No. 1.

(iii) Collection of list of School Teachers, Govt. Officials etc. from all respective authorities for appointment as Enumerators and Supervisors.

(iv) Preparation of Village Registers at all the Block Charge levels on the basis of data collected on Village Directory.

(v) Regular visit and liaison by the officials of Directorate of Census Operations to the different charges to impart spot training and oversee the Block formation.

February, 2000

(i) 2nd meeting of the Principal Census Officers at the State level to brief them about the House listing Schedules and Instruction Manual.

(ii) Subsequent meeting at the respective H. Qtrs. of all the Principal Census Officers to train all the Charge Officers, zonal Sub-Charge officers etc. on the House listing Schedule, Instruction Manual and House list Abstract – to be attended by Director/ Joint Director of Census Operations.

(iii) Subsequent training at all charges levels on the House listing Schedule, Instruction Manual and House list Abstract to all Zonal Charge Officers, Zonal Assistants by the Charge Officer. Regular contact by officials from the Directorate of Census Operations, West Bengal.

(iv) Completion of appointment of Enumerators and Supervisors and allotment of Houselisting blocks to them.

(v) Despatch of Houselisting Schedules and Instruction Manual, Abstract and other forms from the Directorate of Census Operations to all Districts and receipt/storage of the same at the District level and despatch to all Charge levels, Receipt, storage & giving of locational code numbers to the schedules at each charge levels.

March, 2000

(i) 1st training of Enumerators and Supervisors at the charge level.

(ii) Distribution of Houselisting Schedules, Instructions and Abstract to the Enumerators.

(iii) Completion of assignment of permanent house numbers to the houses by the Panchayats and Municipalities.

(iv) Preparations of the Charge Registers at each charge level.

April, 2000

(i) 2nd training of Enumerators and Supervisors at each charge level.

(ii) Issue of T.A./D.A. amount to the Enumerators/ Supervisors.

(iii) Issue of House-numbering materials to the Enumerators/ Supervisors or advance in lieu thereof.

(iv) Issue of badges/Identity Slips to the Enumerators/ Supervisors.

(v) Training of Enumerators at each circle level/Zone level by the Supervisors/Zonal Sub-Charge Officers.

17.04.2000 to 16.05.2000

(i) Houselisting Operations

(a) First 4 (four) days devoted to survey and preparation of layout sketches as per sketches already prepared at the charge level

(b) Next 20 (twenty) days devoted to house to house canvass of the Houselist Schedule.

(c) Last 2 (two) days devoted to preparation of Houselist Abstract and duplicate Houselist by Enumerators and handing over the same to the Supervisors.

17.05.2000 to 31.05.2000

Collection of the completed Houselist Schedule and Houselist Abstract from Supervisors/Zonal Charge Officers at the Charge level, preparation of Charge Abstract and onward transmission to this Directorate.

Calendar for Enumeration Stage of Census of India – 2001

1. Conference, Training of Principal Census Officers, Additional Principal Census Officer and District Census Officers.
   .....To be completed by 31st July, 2000
2. Training of Charge Officers
   ..... To be completed by 15.08.2000
3. Formation of Enumeration Blocks and despatch of Annexure 'N' by the Charge Officer to the Director of Census Operations, West Bengal.
   ..... To be completed by 31.09.2000
4. Writing of Abridged Houselist based on recarved Enumeration Block and preparation of fresh Charge, Registers after appointment of Enumerators and Supervisors for Each Enumeration Block.
   ..... To be completed by 31.07.2000
5. Despatch of materials to the districts by the Directorate of Census Operations and distribution of the same by the District Census Officers to the Charge Officers
   ..... To be completed 31.10.2000
6. 1st training of Enumerators and Supervisors
   ..... To be completed by 15th December, 2000
7. 2nd training of Enumerators and Supervisors
   .....To be completed by31st December, 2000
8. Field Training of Enumerators and Supervisors and handing over of materials required for Census taking.
   ..... To be completed by 15th January, 2001
9. Population Enumeration to begin on
   ..... 9th February, 2001
10. Population Enumeration to end on
    .....28th February, 2001
11. Enumeration of Houseless Population
    .....To be completed by night of 28th February, 2001
12. Revisional Round to be conducted for updating the information as on 00 hours of 1st March
    ..... To be completed by 1st – 5th March, 2001
13. Receipt of records by district census officers from all charge officers
    ..... To be completed by 07.03.2001
14. Compilation and checking of Population Totals by District Census Officers
    ..... 10.03.2001
15. State wise compilation of PPT by Director of Ceusus Operations and intimation to R.G.I.
    ..... To be completed by 12.03.2001
16. Receipts of records by District Census Officers from all Charge Officers.
    ..... To be completed by 15th March, 2001
17. Intimation of Preliminary Population Figures in respect of the following :
    ..... To be completed by 10.03.2001

(i) Total Population
    Total Male Population
    Total Female Population

(ii) Total Literate Population
    Total Male Literate Population
    Total Female Literate Population

(iii) Total Main workers
    Total Marginal Workers
    Total Non Workers

By the district Magistrates to the Director of Census Operations, West Bengal and Registrar General, India by Telephone and FAX.

Economic Resources

(a) Forest Area : There is no forest in the district.

(b) Minerals : The district has no mines.

(c) Soil & Copping Pattern : The soil throughout the district of Haora is alluvial and varies from sand in the river beds to sticky clay in the interior along the silted up streams and mud in the swamps. Clayey and deep loamy soils prevail in the north and lighter loams in the south, where the deposits are more recent. According to composition, the soil may be leele or sandy, entel or clayey, penko or muddy, dhasa or marshey and so forth.

The soils of the Rupnarayan-Damodar Plain contain sandy clay, sandy loam and silty clay and are more suitable for the growth of Paddy, Jute, Potato etc. In the southern parts of this region the soils are saline and coconut trees are grown extensively. The soils of the Hooghly-Damodar Plain contain mainly clay loamy soils which are very much suitable for the growth of Paddy. Besides Paddy, Musuri pulses and Khesari are also grown in this region. The soils of the Hooghly Flats contain silt clay, sandy clay, loam and saline soils. Sandy loams are the coarse texture soils which occur along the river beds. In the lower parts of this region the saline soil occurs. This type of soil is very much suited for the luxuriant growth of coconut trees. Vegetables like Potato, Cabbage, Cauliflower, Radish and Brinjal are extensively grown in this region. A compact area especially within Bally and Sankrail Police Stations under the last two regions named above is devoted to horticulture. The light soils of Haora district are eminently suitable for the cultivation of garden crops all the year round and require very little of land management.

(d) Land and land-use pattern : Haora is long since a district least dependent on agriculture for the support of its population. The city of Haora is the second biggest in West Bengal and is inhabited by more than a quarter of the total population of the district which is mainly employed in non-agricultural fields. The district consists of 727 inhabited villages of which 165 villages are in the urbanized Sadar sub-division while the remaining 562 villages are in Uluberia, a comparatively rural sub-division. It is already stated that there is no forest in the district. Out of the total land area of the district, 4,907 hectares of land is under current fallow, 641 hectares of land is under other than current fallow and 87,044 hectares of land is net-cropped in 200-01.

(Source : Directorate of Agriculture, Govt. of West Bengal)

(e) Tenancy : The State Government is the owner of all estate land since the enactment of West Bengal Estate Acquisition Act, 1948. But in case of agricultural land, the tenancy is contractual with the owner. After the land reform measures taken up by the State Government there is no intermediary system of tenancy in the district.

Upto September 2000, 1,798.59 hectares of agricultural land were distributed amongst 24,693 beneficiaries out of which 23.9 per cent belonged to Scheduled Castes and 2.2 per cent belonged to Scheduled Tribes.

(Source : District Statistical Handbook, Howrah, 2001)

(f) Agriculture : It is relevant to note that the cultivators of the district divide land into several levels for convenience. When the land is below the water level, it is called Jala (i.e. usually sali or paddy land), when the land is above the water level, it is called suna and when the land is at a higher level it is called danga. Interestingly out of the two other levels i.e. bastu (homestead) and udbastu (the land immediately round the homestead), the last named is important in terms of agriculture for production of garden crops. Out of the first three levels of land, the sali and suna lands are most important for cultivation and there are also some classes of these lands in terms of yield. Awal is the first, doyam is the second, seyam is the third and chaharam is the fourth class.

Out of the total net cropped area, 114,700 hectares were under cereals as per 2000-01 statistics. The main crops of the district are rice and potato and the cash crop is jute.

(Source : District Statistical Hand Book, Howrah, 2001)

(g) Irrigation : In 2000-01, 27,360 hectares of land in the district was under irrigation. Out of the total irrigated area, 10,050 hectares of land was irrigated by Government canals, 8,310 hectares by Tanks, 4,750 hectares by Wells and 4,250 hectares by other sources. Sources of minor irrigation included 133 deep tube wells, 127 river lift irrigations and 1,125 shallow tube wells in 2000-01.

(Source : District Census Hand Book, Howrah, 2001)

(h) Animal Husbandry : As per the last Livestock Census Report, 448,724 cattle, 13,820 buffaloes and 261,473 goats were returned in 1994. In the same year the district had 1,259,964 poultry birds under Animal Husbandry.

(Source : District Census Hand Book, Howrah, 2001)

(i) Fishery : The district has an amazing variety of fishes. In brackish water the estuarine fishes such as *Ilish, Phasa, Bhangon, Parse, Gurjaoli, Bhola, Bhetki, Bete, Gang Dhara,* prawns and lobster etc. are available. In fresh water tanks, ponds, *jheels* and bils are available various species of carps such as *Katla, Rui, Bata, Mrigel* etc., cat fishes such as *Boal, Air, Tangra* etc. Besides there are fishes which thrive in the mud such as *Kai, Lota, Shol, Magur* etc. other sweet water fishes worth mentioning are *Beley, Saral Punti, Maurala* etc. Various schemes for developing fisheries in the district are operative at present.

(j) Electricity & Power : There is no hydro-electric or thermal power station in the distict. All power consumed here is obtained from the generating station of the Calcutta Electrict Supply Corporation Ltd. Situated in the 24 Parganas as also from the DVC System.

The district has in all 734 villages of which 682 villages are electrified. Of them, 92 villages are using electricity for agricultural purposes, 679 villages for domestic purposes, 331 for other purposes and 56 villages for all purposes. In the year 2000-01 a total of 240,410 (in 1000 KWH) units of electricity was consumed.

(k) Industry : Notwithstanding the district Haora being famous for its small-scale and large-scale industries, its old time traditional cottage industries also deserve noting. During 18th and 19th centuries silk-industry thrived in the district, when mulberry cultivation and the raising of domesticated silk-worms used to be carried on in certain areas. Handloom weaving of cotton fabrics was once an important cottage industry of the district. In the late twenties and the early thirties of the present century the main handloom weaving centres were located in the northern parts of the district. Village pottery is an important cottage industry in the district. The principal raw materials like river silt, common clay and a little sand turn into images, toys and numerous earthen wares in the hands of the hereditary artisans. Many other cottage industries besides the industries above named once flourished in the district, such as Hookah, Chicken, Jari, Fishing nets, Solapith, Handmade paper, Bamboo and Cane work, Brassware, Coir etc. Most of these industries are on the wane now except zari that has survived the fate and of late has made considerable progress. Today the application of zari is no longer confined to dress materials only and another novel feature of the industry is that lot of women today participate in the production. Some of the district's unique and unusual old cottage industries once famous but now almost dead are manufacture of polo balls, football and shuttle cocks, hair wig and lock. Since 1955 the State Government has been running a Central Lock Factory at Baragachhia. It produces padlocks and lock components for the rural artisans.

Being facilitated by the availability of electricity in the rural belt and also by the good communication links with the city, many villages of the Sadar sub-division flourished in small semi-urban industries such as repair of automobiles, bicycles and watches, manufacture of furniture and cutlery, textile printing and tailoring etc. More important of the small scale industries of the district were however agre-based such as rice, flour and oil mills. Besides, the engineering establishments form the bulk of the industries of Haora, both small-scale and medium. They serve as feeders and ancillaries of the giant industrial machinery in the district.

The growth of large-scale industries in the district was greatly influenced by Haora's becoming an important railway terminus since 1854. The railway lines also extended upto Mughalsarai within next eight years. In 1874 the Howrah Pontoon Bridge opened which also accelerated the growth of large-scale industries. With this must be added the Swadeshi impetus of 1905 that helped establish a number of large-scale industries such as jute, iron, steel and engineering factories as well as small-scale units. Of the large-scale industries, the heavy industry of ship building and ship repairing date back to 1706 A.D., nay, to 1586 A.D., for Betor was well-known as the place of anchorage of large sea-going vessels, particularly of the Portuguese, furthest up the river from that time as per historical chronicles. Such was the background even before the consolidation of the East India Company command towards the end of the 18th century. It is interesting to note that though today there is no forest in the district once an abundance of forests in this part of Bengal used to supply the needs of the boat-building industries which thrived well in the riverside area near the Hooghly town in the 17th century. The riverside above Haora had been famous from the 14th century for the overseas trade. Roperies, another large-scale industry was fairly well-established

in the district towards the end of 18th century. The business depended on the crews visiting the various dockyards on the Haora side of the river. Subsequently twine and cordage also began to be manufactured in most of these establishments. In 1925 all the important roparies in India were in Haora except a minor one in Rawalpindi. In 1965 the district possessed nine roparies. Other industries like textiles and paints came on the scene before 1825. Paper, canvas, distillery and jute factories followed in quick succession. Large jute manufactories like the Howrah Jute Mills and the Ganges Jute Mills were started in 1874-75 simultaneously with the establishment of chemicals, wood, oil and printing firms. But with the partition of India in 1947 the richest jute producing area went to Pakisthan resulting in closure of most of the jute mills in Haora district and sickness being a long-lasting symptom in the jute industry.

The congested strip of land of Haora along the Bhagirathi, had, in near past, a complex industrial base for which not only West Bengal but India as well could feel proud. The myriad of large, medium and small industrial units producing a diverse range of commodities despite several inconveniences once earned for it the name "Sheffield of India".

As per District Statistical Handbook, 2001 for the district Haora in the year 1997-98 there were 415 Basic metal and alloy industries, manufactories of Metal products and parts except machinery and equipment numbered at 196, manufactories machinery and equipment other than transport equipment were 158, manufactories of rubber, plastic, petroleum and coal products and processing of nuclear fuels were 97, manufactories of transport equipment and parts were 81 and so on. The total number of factories reported in the district of Haora for the year 1997-98 were 1,180.

(l) Trade and Commerce : Uluberia sub-division forms the main assembling centre for locally produced paddy, betel leaf, vegetables and cattle, while Howrah sub-division is an assembling centre for imported jute, vegetables, dry coconut, betel leaf, rice, pulses, oil seeds and fish. Twenty years back the district was highly deficit in rice. The situation since then has somewhat improved, thanks to the reclamation of waste lands. However arrival of rice still continues across the Rupnarayan river from the neighboring district, Medinipur. Locally produced rice passes in small quantities from the producers to the stockists in the assembling markets and then to the consumers through retailers. Wholesale transaction in rice or paddy is not done on a large scale in the market. The market of jute is now controlled by the Jute Corporation of India. Betel leaf is an important cash crop of the district and in Uluberia sub-division it is carried by the producers to the assembling markets where there are two sets of intermediaries who are responsible for assembling the commodity. The distant buyers of these leave belong to the states of Bihar, Uttar Pradesh, Madhya Pradesh, Assam and other states. They however do not present themselves and purchase it through the chalandars. In Howrah sub-division the growers themselves sell their produce to the buyers with no intermediaries between them. The market for pulses and oil-seeds is housed in a small railway shed opposite Howrah goods shed. The supply is mainly received from outside states, viz. Bihar, Punjab, Madhya Pradesh, Uttar Pradesh, Rajasthan and Chennai. The fish market is located near the Howrah railway station and is commonly known as the Howrah Bridge Market. The supply is received mainly from Agra, Kanpur, Delhi, Orissa, Punjab, Rajasthan, Mumbai, Andhra Pradesh, Chennai, Bihar and Uttar Pradesh by rail.

A few lines on Howrah Hat popularly known as Mongla Hat should be written here. As it sits on every Tuesday (in vernacular Mangalbar). It comprises several privately owned marts, consisting of more than 5,000 permanent and temporary stalls besides several hundred pavement stalls. It specializes in handling handloom and hosiery products and is perhaps the biggest market of its kind in India. Articles from this hat are sent all over the country and prior to World War II they even found their way to Myanmar, Sri Lanka and other foreign countries.

(m) Transport : Haora must have a few arterial waterways and feeder highways in old time as a hinterland of Tamralipi, the famous sea port of Eastern India. However the roads in the modern sense of the word were unknown before the advent of British rule. The country being intersected by rivers, creeks and channels, the waterways, then as now, furnished a natural and easy means of transit. The river Hooghly formed the great highway of commerce. It was used by boats and small ships, and had on its banks several important hats or markets. Besides there was a network of channels among which the Saraswati, the Kana, the Damodar and the Rupnarayan served as tributaries to the Hooghly and the small creeks as their sub-tributaries.

Building up of modern roads started during British period. By the middle of the nineteenth century there were four roads known as imperial roads. The oldest of them was the old Benares Road or Ahalyabai Road

or New Military Road. The other three were the Grand Trunk Road, the Orissa Trunk Road and a branch of G.T. Road from Salkia to Bally Khal. The Grand Trunk Road which starting from Shibpur joined the main branch near Ghireti at Chandernagore was begun in 1804 and completed during the administration of Lord William Bentinck. Besides imperial and municipal roads there were six local roads during that time. Today, as per District Statistical Handbook, Haora, 2001, 540.43 kilometres of road, fully surfaced, are maintained by PWD and 1,447.40 kilometres of road are maintained by Zilla Parishad (Panchayat) out of which 498.72 kms are surfaced and 948.68 kms. are un-surfaced. The total length of roads maintained by PWD is divided into 4 (four) categories - National Highways, State Highways, District Roads and Village Roads. Out of the total length of 540.43 kms. of road, 62.43 kms. come under National Highways, 21 kms. come under State Highways, 225 kms. under District Roads and 232 kms. under Village Roads. The roads maintained by the Municipalities and Municipal Corporations together are 725.40 kms. and when sub-divided, surfaced stands for 627.95 kms. and un-surfaced for 97.45 kms. A total of 97,555 registered motor vehicles are plying on the roads of the district out of them 16,922 are the goods vehicles. Motor cars and jeeps together stands for 7,918, motor cycles and scooters together stands for 66,441, taxis and contract carriages together stands for 1,359, 1,470 are the auto rickshaws, 811 mini buses, 1,651 state carriages, 379 are tractors and trailers and 604 are others. Here it is worth noting that almost a century back the mode of transport of the district also included electric trams, though not running at present.

While concluding it should be added that the district is endowed with the famous Howrah Railway Terminus commonly known as Howrah Station, which in its present form, dates back to 1906 and is one of the busiest railway stations in India with more than 20 platforms, dealing with 2 lakhs of passengers and ……. mails, expresses, passengers and suburban trains on an average per day. As the terminal station of two important railways it provides direct rail-link to most important places all over the country.

Among the rivers, the Hooghly, the Damodar and the Rupnarayan and among the creeks the Bally Khal, the Sankrail Khal, the Kalsapa Khal, the Mithakundu Khal, the Pukuria Khal, the Banspati Khal, the Madaria Khal and the Gaighata-Bakshi Khal still continue to work as navigable waterways though to a lesser extent.

Gram Panchayat

The three tier Panchayat system has been functional in West Bengal since 1978. In the district at the top there is Zilla Parishad (ZP); the Panchayat Samities (PS) are cotermins with at CD block. There are Gram Panchyat at the lowest level consisting of elected members from the respective villages. Since 1978 the panchayat system has been performing a vital role for the development activists from village to district level and fund are placed for implementing the development plans from GP level to district level.

In spite of some shortcomings, the Panchayat System has changed the village economy, social and political system. In West Bengal small and marginal farmer have got cultivable land, the wages of agricultural labourers have increased. Due to land reforms and other village development program the productions of agriculture have also increased significantly. As a result the intake of food has also increased.

The district has 14 Panchayat Samities with 157 Gram Panchayats consisting of 734 villages.

Major Social and Cultural events, natural and administrative developments and significant activities during the decade

Innumerable fairs, festivals and socio-cultural events are held throughout the year in this district having wide admixture of religion, community and culture. The followers of the main faiths observe their own religious festivals whereas they intermingle in certain *melas* (fairs) and ceremonies. Brief notes on the major festivals and *melas* (fairs) of the district are given below along with a list of fairs.

Festivals

State level common :

In all the districts of the state certain religious festivals are observed in such a huge magnitude that the impact is cross-cultural involving the overall market economy. Those are :

1. Durga Puja is the most popular annual festival of the Hindus held both at community level and at clan or household level. The four day festival relate to worshiping of the mother goddess 'Durga' and symbolising the victory of good over evil is held in the month of *Ashwin* (Bengali calender) or September-October. In folk culture this festival also represents the home coming of Mother Durga (Parbati) - wife of Lord Shiva along with her two sons and two daughters to visit her paternal home from their snowy abode of Himalayas. This festival therefore also represents a family reunion of members staying at distant places.
2. In north India 'Deepavali' or the festival of lights is celebrated to commemorate the home coming of Lord Rama to Ayodha after fourteen years of punishment as per the epic Ramayana. But in Bengal Kalipuja or Diwali is related to worshiping goddess 'Kali' or 'Shakti' (the power) as another expression of mother cult. This one day event is held on the moon less night following Durga Puja in the month of *Kartik* (Oct-Nov). Decoration with lights is a part of the observation adding a flavour of the famous national festivity called the 'Festival of light' or 'Deepawali'.
3. Dol Jatra or Holi is the festival of colours. In fact the colours of the spring time nature is celebrated with much grandeur for expressing the feeling of love and friendship as symbolized by the holy conjugation of Lord Krishna and Radha.
4. Rathajatra or the car festival of Krishna, Balaram and Subhadra is held during *Ashadh* (mid-June to mid-July).
5. Id ul Fitr is the most popular religious festival of the Muhammedan population in the state. This is observed with a mass prayer (*Namaz*) and joyful get together after the month-long fasting during 'Ramzan'.
6. The next important festival of the Muhammedans, Idu'z Zuha or the festival of sacrifice, is also celebrated with mass prayers and exchange of gifts and sweet meat etc. with a spirit of brotherhood.
7. Muharram is another popular festival of the Muhameddans held on the thirtieth day after Idu'z Zuha to mourn the death of Hassan and Hussain - two grandsons of the Prophet Muhammed in the battlwe of Karbala. Tajiyas are built and taken in a procession symbolizing the memorial tombs of those two martyrs.
8. The Christmas day on 25th December and Good Friday in April are the two most important religious festivals of the Christian community. 'Christmas day', in particular, is observed with prayers in the church to commemorate the birth of Jesus Christ and the festivity continues till 1st January - the new calender year. The day of Christ's crucifixion is the day to pray again on Good Friday.
9. The Sikhs celebrate their most important religious festival on the occasion of Guru Nanak's birth day, the founder of the Sikhism.
10. The full moon day of May is observed as Buddha Purnima by the followers of Buddhism in different pockets of the State. This is the biggest festival for Buddhists to mark the occasion of the birth of Lord Buddha.
11. The followers of Jainism observe Mahabir Jayanti which is the birthday of Lord Mahabir in the month of April.

District specific :

The cult of Sakti : Haora is famous for Kali-worship. As per Brahminical Hindu religion the *Sakti* is called Kali when conceived as the divine mother or the female consort of the supreme creator Siva. The goddess is worshipped in several forms in the district, namely *Raksha Kali, Samsan Kali* and others. Curiously, the

district is fascinated by the large images of the goddess.

The district abounds in *Chandi*, a *Sakta* deity of supposedly non-Aryan origin having references in the *Puran*. No other district in West Bengal shows such a varied worship of this deity under so many different names. Of numerous *Chandis* of the district some are connected to different professions, some to different diseases, e.g. *Kalyanchandi* is the goddess of archers or, *Mangalchandi* is of tradesmen and likewise *Olaichandi* is the goddess curing cholera or, Basantachandi is curing small pox. Of the most popular *Chandis* of the district mention may be made of *Melaichandi* at Amta, *Makarchandi* at Makardaha and *Olaichandi* at Kasundia.

The goddess *Bisalakshi* (also known as *Basuli* or *Bansuli*) and *Sitala* - two other forms of the mother principle - are also worshipped in the district Haora. *Bisalakshi* is mostly worshipped as tiger-goddess and *Sitala* as the controlling deity of small pox. The worship of *Sitala* (also called *Basantachandi*) is widespread in the district. She is represented by the image seated on an ass, carrying broomstick in one hand and a pot in the other with a winnowing fan on her head. Interestingly in Bagnan P.S. of Haora district *Gajan* is celebrated in the honour of both the goddesses.

The cult of Siva : Siva is highly beloved god in Bengal. This ferocious and mighty non-Aryan Pre-Vedic god called *'Rudra'* got himself, at a later point of time, included in the Hindu pantheon as calm and sober 'Siva'. His tranquil appearance though not devoid of anger at necessary moments and his benign type have long since made him Bengal's hot favourite. He is not only a god to the Bengal psyche, more than that, he is Bengal's blood-relation. He is considered as a symbol of Bengal's manhood. Bengal, therefore, lovingly ascribed some folk characteristics to him such as simplicity, joviality, attributes of a stoic familyman etc. These folk characteristics are best manifest in two *Kavyas* - Sivayan by Ramswar Bhattacharya and Annada Mangal by Bharat Chandra Roy, both of Haora.

*Siver Gaja*n or *Niler Gajan* held at the end of the Bengali year, is the main festival associated with Siva. Various physical mortifications are connected to these *Gajans* some of which are legally banned long ago. *Chadak* and *Gajan* festivals are celebrated all over the district, particularly in the Amta and Bagnan *thana* areas. *Sivaratri* or *Siva Chaturdasi* festival is held on the 14th day of the new moon in the Bengali month of *Phalgun* (February-March). This is mainly women's festival. Unmarried girls fast and perform rites to be blessed with tolerant husbands like Siva and married women in expectation of getting good children. Siddheswar in Jagatballavpur P.S. and Bagandaha in Syampur P.S. are famous for *Sivaratri*. At Garh Bhabanipur in Udaynarayanpur P.S. where the Bhursut royal family had its seat in the past, special worship of *Maninath* Siva is held on the last Sunday of the Bengali month of *Sravan*.

Panchananda : *Panchananda* or *Panchu Thakur* is a folk-god who looks after the welfare of children. Elsewhere he is taken for Siva, but in Haora district he retains his distinction. Here he is seated with a fierce look on the back of a horse. Panchanantala locality of Haora city derives its name from one such Panchananda. He is worshipped in Jaypur (Amta P.S.), in Golpara and Sasati (Syampur P.S.) and in Narna (Domjur P.S.).

Pirs : Many fairs and festivals are held at different places of the district in honour of the departed *Pirs*. There is an astana of *Pir* Gayesuddin in Gayespur village in Domjur P.S. The fair of *Pir Sahib* takes place for a day in January at Amta Bandar in Amta P.S. In Jagatballavpur, *Manik Pir mela* takes place in January at Manikpur and Brahminpara. At Sudanandabati in Panchla P.S. a fair called *Sufridsahi mela* is held in January and February. At Jangalbilas in Uluberia P.S. the *Pir mela* comes off in January. The *Pir Sahib's astana* at Kalyanpur in Amta P.S. is well-known in the neighbourhood. The *astana* of another *Pir* lying by the main road near Amragori in Amta P.S. was renovated, according to a marble plaque on it, by a Hindu. Indeed, the influence of *Pirs* appears to have been fairly widespread in the district in the past. (Taken from West Bengal District Gazetteers, Howrah, November 1972 edition, pages 129-130).

Some more Folk Festivals :

Haora is noted for some more folk festivals exclusively its own, such as, the *Soyla* festival, the festival of *Entel Thakur*, the festival of *Ghentu Thakur*, the *Dhela Fela* festival, the *Heleni* festival etc.

The *Soyla* is *Manasa* centric. It takes place in *Phalgun* to *Chaitra* (mid-February to mid-April) and also held in *Bhadra* - the time for annual worship of *Manasa*. The novelty of the festival is that it seeks to establish a kind of friendship between persons of the same sex.

The festival of *Entel Thakur* perhaps originated

from Sun worship. It takes place only on Sundays (*Rabi-bar* in vernacular) throughout *Agrahayan* (mid-November to mid-December). He is represented by a soft clay image improvised by men on a big earthen pot and by women on an earthen plate and two earthen pots decorated with floral designs. The ritual has got a semblance with the festivals of Tusu or Itu at other places.

On the festival of *Ghentu Thakur* it is tempting to quote from the West Bengal District Gazetteers, Howrah, November, 1972 : "In the Bengali month of Chaitra, young men move from village to village singing songs in praise of the folk-god Ghentu and carrying his image on their shoulders. As he is considered to be a variant form of Siva, a Siva image and a lighted lamp are also carried by the processionists. The image of the God is also formed in the following manner : the back of an old and used earthen pot is smeared with cow-dung on which two small cowries are set for his eyes and a vermilion mark put on the forehead. He is placed on a broken winnowing fan at the time of worship. The journey over (when the men in the procession collect rice and coins from each household), the image is taken to a road-crossing and after some chants have been uttered, the pot symbolizing Ghentu is broken to pieces. Ghentu is regarded as the god of skin diseases and appears to have non-Aryan origin", (page 138).

The *Dhela Fela* festival of the district (elsewhere known as *Arandhan* i.e. cessation of cooking) is also connected to the snake goddess *Manasa*. It takes place on the *Dasahara* day in *Jyaistha* (mid-May to mid-June) or on the last day of *Sravan* (mid-July to mid-August). It is called *Chachchari puja* when taken place on a Tuesday or Saturday of *Bhadra* (mid-August to mid-September) and called *Ramna puja* when celebrated on the last day of *Bhadra*.

The cultivators of the district celebrate the *Heleni* festival at the end of *Bhadra* when young paddy plants grow in the fields. Taking three sips of water they go to the north-east corner of their plots and chant prayers wishing a bumping harvest.

Fairs :

Largest congregation (in the range of 20,000 - 5,000)

Place of Occurence	Police Station	Month of Occurrence		Religious or Other occassion	Attendance (approx.)
		English Calendar	Bengali Calendar

(5) Increase /Decrease town areas due to changes in administrative jurisdiction.

Haora	41653000	Uluberia (M)

(6) New ward created /merged subsequent to 1991 due to increase / readjustment of statutory areas of the Municipality /M.Corp.subsequent to 1991 under statutory / administrative order.

			1991	2001
Haora	41603000	Bally (M)	25	29
do	41653000	Uluberia (M)	19	28

(7) Villages uninhabited in 1991 Census but inhabited in 2001 Census

Haora	03810100	Kazir Chak
do	03837900	Kulepairi

(8) Villages inhabited in 1991 Census but uninhabited in 2001 Census

Haora	03818300	Chak Mahishjol
do	03839800	Char Orphuli

(9) Villages uninhabited both in 1991 Census and in 2001 Census

Haora	03799600	Paschim Jaypur
do	03806400	Sahapur
do	03808000	Jotsadar
do	03810000	Chaksadar
do	03816500	Chak Patmura

(10) The Village land area figure in Hectares has been converted from the village(mouza) wise land area in Acres as maintained by Director,Land Records & Survey (DLRS), Govt. of West Bengal.

(11) Villages marked as (P) indicate concerned village is partly Rural and partly Urban or is bifurcated into two CD Blocks.However the total area figure of the villages (mouzas) as per records maintained by DLRS, Govt. of West Bengal has been given here as no record of such bifurcated village area is available with DLRS, Govt. of West Bengal. In case parts of a village fall under more than one CD Block the total land area figures for these parts have been estimated on the basis of plot nos. mentioned in the concerned Govt order and through interpolation / extrapolation of the areas of the concerned plots from R.S. maps maintained by DLRS, Govt. of West Bengal.

(12) The area of CD Blocks as shown here is summation of land areas of all villages (mouzas) within the concerned Block and is estimated only.This is because no CD Block wise land area figures are available with DLRS, Govt. of West Bengal.

(13) In case of statutory and non statutory urban areas, the areas are given here are estimated only. This is because no town wise area figures are available with DLRS, Govt. of West Bengal.The area figure have either been collected from the concerned town authorities or have been calculated from existing village(mouza) wise area figures as maintained by DLRS, Govt.of West Bengal.

(14) The total land area for State/ District as given here is as per area figures obtained from Survey of India. However the totals of / villages / Blocks / Towns as given here are as per records maintained by Directors, Land Records & Survey (DLRS), Govt. of West Bengal.

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts : Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts : Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD Block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being the lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991

census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Vikram Sen, IAS, Director of Census Operations, West Bengal. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

PEOPLE ORIENTED

Preface

The task of publishing the District Census Handbook (DCHB) is a joint venture between the central and state government and the recent publication for 2001 Census happens to be the sixth in the series of its publication since the year 1951. Since then, in view of the contemporary requirement of data, the coverage of DCHB has widened and received regular refinement. Hence, it has become the most widely used publication compiled and prepared by the Census organization. The presentation of data is done in two parts, viz., the Part-XII-A and Part-XII-B seperately for the bigger districts and single combined volume for the each smaller district.

Part-XII-A contains Village & Town Directory data with some important tables depicting availability of basic civic amenities at the C.D. Block/Village and Town level. In the other hand, Part-XII-B presents district Primary Census Abstract (General), Primary Census Abstract for Scheduled Caste, Primary Census Abstract for Scheduled Tribe and CD Block/Villagewise Primary Census Abstract and Urban Primary Census Abstract. In addition to the above an effort is made to furnish various essential information about the district such as – historical background, administrative set-up, drainage, physiography, climate, place of historical, archaeological and tourists importance etc. The 2001 Census DCHB presents a variegated picture of the human life as reflected by the census data. The scope of analysis of census and non-census data has considerably increased through various summary tables and inset tables. Besides brief analysis of basic census data in the form of PCA and analysis of amenities and infrastructural facilities available in villages and towns in the form of Village Directory and Town Directory, the data on houses and household amenities have also been briefly analyzed and included in this volume. Not only this, we have made efforts to present comparative data on various aspects such as distribution of population, growth rate, density of population, sex ratio, work participation rates, literacy, language, religion, scheduled caste and schedule tribe population (since 1951 or 1961) mostly by residence for the benefit of data users. Likewise, in the annexures, brief analysis on some socio-demographic, economic, migration and cultural aspects of the population pertaining to 1991 Census has also been made.

There has been regular and continuous flow of suitable suggestions and advice from Shri J.K. Banthia, Registrar General, India, throughout completion of the work for which I express my deepest and sincere gratitude to him. Other officers in the office of the Registrar General, India, New Delhi, contributed their share in the befitting manner for which as well I record my thankfulness to Shri R.G. Mitra, Deputy Registrar General (C&T), Shri R.P. Singh, Deputy Registrar General (Map), Shri I.C. Agarwal, Senior Research Officer (S.S.) and Shri S.L. Jain, Deputy Director (S.S.), for without their timely help and guidelines this publication would not have appeared before us in time and in this form.

I shall be failing in my duties if I do not acknowledge the contributions made by the District Census Officers/ District Magistrates and innumberable Village, Block and Municipal level officials of all the districts of West Bengal for arranging collection of village and town directory data by the local officials from the villages/towns under their jurisdiction.

In my own office my thanks are due to each one of the staff members for their zeal and enthusiasm shown in completing this project successfully at various stages of work very much within the stipulated time. As it is not feasible to express my thanks individually a separate page of acknowledgement is included in this publication.

Vikram Sen

Acknowledgements

A. The Directorate of Census Operations respectfully acknowledges the devoted, sincere hard work rendered by about one lakh fifty thousand Census Enumerators, Supervisors and Officials at the District, Block and Municipal levels without whose heroic efforts, the Census 2001 could never be undertaken. Three among these Enumerators also laid down their lives while in discharge of Census work.

B. The Census Directorate, West Bengal also gratefully acknowledges the sincere and dedicated work of the following officers/officials of this Directorate associated with the preparation of this Hand Book.

Drafting of analytical notes/ overall editing and checking at various stages :

Shri R.K. Ram	Joint Director	Shri P.K. Majumdar	Deputy Director
Dr. Palash Chandra Coomar	Deputy Director	Shri Debesh Roy	Deputy Director

The district Haora has recorded continuous expansion of growth of population over a period of 100 years, i.e. from 1901 upto 2001. The growth of population from its preceding census years was maximum in 1941 (35.6 per cent) followed by 1961 (26.5 per cent) and 1991 (25.7 per cent). The lowest growth of population was enumerated in 1911-1921 (5.7 per cent) and second lowest growth was envisaged during 1941-1951 (8.1 per cent). The growth of population from 1991-2001 is recorded as 14.6 per cent which is considered to be a very good sign of growth of population.

If we consider rural-urban growth separately, the rural growth rate exhibits almost similar trend as that of total growth rate. Highest rural growth rate is noticed in 1941 (25.7 per cent) while lowest growth rate is observed in 1951 (2.7 per cent). Rural growth is enumerated as 12.8 per cent in 2001 which is 2.7 per cent less than the rural growth of 1991.

Urban scenario also shows a steady growth of population since 1901. However, the growth rate is not uniform. Decadal population variation is maximum in 1941 (68.4 per cent) followed by 1961 (58.0 per cent) and minimum in 1921 (8.5 per cent). The decadal variation of growth is 16.4 per cent in 2001.

Note : While calculating density, area figures have been taken upto two decimal points

Haora district is predominantly rural in terms of area as more than 85.0 per cent of its area is rural. However, more than half of the population of Haora is urban people. There are altogether 53 urban units in the district, among them there is 1 Municipal Corporation, 2 municipalities and rest 50 is recognized as census towns, besides 2 out growths (OG) are also located in Haora.

The density of population of Haora (2,913) and its rural (1,700) and urban (9,816) areas are much higher than the State average (903 persons per cent per sq. km.). Among the CD Blocks, highest density is enumerated in Bally Jagachha (5,275) while lowest density is recorded in Amta-II (1,377). There are altogether 734 (727 inhabited and 7 uninhabited) villages in Hoara. The highest number of inhabited villages is found in Amta-I CD Block (77) while lowest number of inhabited village is seen in Bally Jagachha CD Block (3). The largest number of uninhabited villages is, however, envisaged in Amta-I CD Block (3). Among the CD Blocks maximum population is enumerated in Domjur CD Block (311,432) while minimum population is noted in Bagnan-II CD Block (146,298). As far as the urban unit is concerned, numerical strength of Haora Municipal Corporation is highest as it is populated with 1,007,532 individuals. Balarampota Census Town is the least populated urban unit of the district with a population of 4,496. Population density of Banupur Census Town (22,398) is highest while, it is lowest in Naupala Census Town (1,857). However, as far as statutory town is concerned, Bally Municipal Town (22,092) is most densely populated and Uluberia Municipal Town is the most sparsely populated town of Haora district. One Municipal Corporation, 2 municipalities and 38 census towns of Haora district are the part of Kolkata UA.

Note : There is no Tahsil in West Bengal

In Haora there are 97 villages with the population of 5,000 and above. They are spread over all the 14 CD Blocks of the district. Among them Jujarsaha village of Panchla CD Block is the most populated village of the district with a population of 20,125 followed by Dhulagari village of Sankrail CD Blocks (19,975) while Karatbar of Uluberia-II CD Block (5,003) is the least populated and Chandipur of Uluberia-I CD Block (5,023) is the second lowest populated village amongst the villages having 5,000 and above population. As far as educational amenities are concerned there are 11 villages with 5,000 and above population having Senior Secondary School and college is located in only 6 such villages. In the area of medical institutions, Primary Health Centre is located in 21 large size villages with a population of 5,000 and above and 47 Primary Health Sub-Centre are located in 41 villages each with a population of 5,000 and above. Very few villages with a population of 5,000 and above are having amenities like tap water (in 30 villages), railway station (in 4 villages), commercial bank (30 commercial banks in 28 villages) and co-operative banks (in 10 villages).

STATEMENT - 8

Statement-9 shows that there are 890 households without any house. Among them 213 households are situated in rural areas and remaining 677 are located in urban areas. Among 4,404 (3,257 males and 1,147 females) houseless population 790 (495 males and 295 females) live in rural areas while 3,614 (2,762 males and 852 females) individuals reside in urban areas. It is interesting to note that a vast majority of the houseless population are male. It is most likely that they may not have even a plot to construct the house nor can they afford to stay in flats or rental accommodations including slums. If some of them may have a plot, they may not have finance for construction of house. As Haora is a predominantly urban area with rapid growth of industrialization, a vast majority of the houseless population lives in urban areas. Among the CD Blocks maximum number of houseless population lives in Domjur CD Block (371), while minimum number of houseless population resides in Shyampur-I CD Block (16). Among the urban units, the highest number of houseless population is seen in urban areas under Haora Municipal Corporation (2,443) and lowest population is enumerated in Chakpara Census Town and Nalpur Census Town with just 1 person each. There are altogether 29 Census Towns viz. Domjur, Kantlia, Salap, Kalara, Nitibpur, Mahiari, Chamrail, Eksara, Khalia, Argari, Andul, Ramchandrapur, Podara, Panchpara, Hatgachha, Jhorhat, Benupur, Manikpur, Raghudebbati, Baikihakola, Beldubi, Jalakendua, Gabberia, Paniara, Panchla, Santoshpur, Belarampota, Uttar Pirpur and Bagnan where no houseless population are enumerated.

There are 2,032 institutional households in the district. Out of which 621 households are in rural areas and 1,411 households are in urban areas. The total institutional population is 26,008 (7,284 rural and 18,724 urban). Numerically males (4,315 in rural areas and 15,403 in urban areas and total 19,718) are much larger than their female (2,969 in rural areas, 3,321 in urban areas and total 6,290) counterparts. Among the CD Blocks maximum institutional population lives in Domjur (2,043) followed by Bagnan-II (1,058) and Udaynarayanpur (1,032) while minimum is in Amta-I (242). Among towns, Haora Municipal Corporation has the highest institutional population of 7,926 followed by Bally Municipality 6,564 while Banupur Census Town is the habitat of least number of institutional population, i.e. 7 nos. There is no institutional population enumerated from 7 census towns namely Khantora, Tentulkuli, Andul, Sarenga, Jala Kendua, Sahapur and Balarampota.

History & Scope of District Census Handbook

(i) History and Scope of the District Census Handbook

The District Census Handbook a joint venture of the State Government/ Union Territory Administrations and the Census Organisation, is one of the most important publications, particularly in the context of planning and development at grass root level. It is perhaps the only source that gives village and town level information concerning several demographic and socio-economic characteristics and also on availability of important civic amenities. This publication was for the first time brought out in the 1951 Census. In fact it is the replacement of 'Village Statements' used to be prepared in the Censuses of Pre Independence period and since then it is published after each decennial Census with some innovations/ improvements.

Scope & coverage of District Census Hand Books of 1951-1991 Censuses

Initially the scope of the DCHB was confined to certain important census tables on population, economic and socio-cultural aspects and also the Primary Census Abstract (PCA) of each village and town of the district. The DCHB published after the 1961 Census contained a descriptive account of the district, administrative statistics, Census tables and Village and Town Directories including PCA. In 1971 Census the DCHBs were brought out in two parts viz. Part A comprising Village and Town Directories and Part B comprising Village and Town PCA in respect of all the States and Union Territories. The Third part of the DCHBs comprising of administrative statistics and district Census tables. During 1981 Census new features alongwith restructuring of the format of Village and Town Directory were introduced in the DCHB. These were published in two parts for each district. While Part A comprised of Village and Town Directories, the PCA of Village and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA upto tahsil/town level were provided in Part-B. To illustrate, all the amenities except electricity, were brought together in the Village Directory and if an amenity was not available in the referred village, the distance in broad ranges from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the Village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Direcotries also, keeping in view the requirements of the Minimum Needs Programme, a Statement (IV-A) on slums was provided so as to enable the planners to chalk out the programmes for providing civic amenities in the slums. In this statement details on civic and other amenities were presented for the notified slums of Class I and Class II towns. Apart from this, one column on the Scheduled Castes and Scheduled Tribes population and another on adult literacy classes/centres were added in statements IV and V respectively.

The manner of presentation of the DCHBs for the 1991 Census was more or less similar to that of 1981. However, the format of PCA was restructured slightly in the 1991 Census for the benefit of data users. Nine fold industrial classification of main workers was given as against four-fold, industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age group was also included in PCA for the first time with a view to enabling data users to compute more realistic literacy rate as all children below seven years of age have been treated as illiterate in 1991 Census. It was expected that these changes would help the planners in chalking out more effective developmental programmes.

One of the most important innovations in the 1991 Census was the Community Development Block (CD Block) level presentation of data in the Village Directory and PCA instead of the traditional Police Station level presentation. It was expected that the presentation of Village Directory and PCA data at CD Block level would help the planners in formulation of micro level development plans, as the Blocks are the lowest administrative unit for developmental planning. In order to facilitate the task of administrators, Planners and Researchers to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both the computer and manual codes for each Village were provided for the 1991 Census alongwith the corresponding codes of 1981.

Scope & coverage of District Census Handbooks of India, 2001

The District Census Hand books for Census of India, 2001 are more informative and exhaustive in terms of coverage and context. The coverage in Village Directory has been further broadened and includes facilities like banking, recreational, income and expenditure of Gram Panchayats and most important commodity/commodities manufactured in the village. Apart from these, more details on distance (s) of basic health and educational facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre, Primary Health Centre and Primary School), if not available in the village are proposed to be given for the first time.

The type and extent of basic amenities available in the villages and towns are proposed to be analyzed in depth with the help of a large number of cross classified inset table & statements. Brief analytical notes /accounts on important aspects concerning respective districts viz. (i) firstly, mortality and migration, (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/place of residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education & (vii) distribution of different mother tongue, all based on 1991 Census, will be given at the end of the text as separate annexures. It is also decided to provide two lists separately indicating names of colleges and hospitals available in the villages and towns in the district.

For the District Census Handbooks under Census of India, 2001 more emphasis has been given towards quality of village and town level amenity data. With a view to find out erratic or aberrant trends or in inexplicable fluctuations in amenity data, similar information brought out by the State and Central Government have been collected & these information have been used to verify the Village Directory & Town Directory data. The inconsistencies noticed in Village Directory & Town Directory data have been removed in consultation with the respective district administration as far as possible.

Brief History of the District

The district of Haora (also spelt as Howrah) being completely composed of multiple layers of riverine alluvium deposited by the river Hugli or Bhagirathi offers little archaeological support in reconstructing the pre-history or even early history of the land. It may be inferred from the low lying marshy character of the land surrounded by great rivers of Hooghly and Rupnarayan, Damodar and numerous water bodies, creeks and channels that the earliest inhabitants belonged to fishing and boating communities in most places. In fact, until a few decades back, the Kaibarttas, the great Bengali fishermen castes held the major share of population. The presence of Tamralipti (Tamluk); a famous sea port of Eastern India until the end of the first half of seventh century AD, not far south of this district indicates its past importance as trade route. Tamralipti had often been mentioned in Mahabharata, in old Jaina and Buddhist scriptures and Ptolemy's Geography. At the dawn of history, this district was probably a part of either the territory of Suhmas or of Tamraliptas, and eventually became attached to a separate kingdom of Tamralipti, as mentioned by Yuan Chwang (Hiuen Tsiang). On decline of Tamralipti the administration was passed on to the more powerful Suhma kingdom or as they were later called the 'Radhs'.

Moreover, from the palm-leaf chronicles of the Jagannath temple, it is probable that the Ganga Kingdom extended upto the old Damodar and included Uluberia sub-division, leaving Howrah sub-division still in Radh.

A period of complex harmony prevailed in 500 years - from 12th to 16th century - in this part of Bengal owing to the suzerainty exercised by various invading Muslim rulers and opposing Hindu kings of which Chodaganga, the first Ganges king of Orissa (13th - 14th century) need to be mentioned.

The Haora district and its adjoining areas were under administration of Sultan Sulaiman Kararani and was known as Sarkar Sulaimanabad for about a decade since 1568 AD till the defeat and death of Daud Kararani in 1570 AD.

The district was, most likely, allocated among the Sarkars of Satgaon, Sulaimanabad and Mandaran during the reign of Akbar the Great as recorded in the 1582 rent-roll of Todar Mull's.

In the Bengali poem 'Manasha Mangal Kabya' written by Bipradasa in 1495 AD certain local details of the early period of the district are available. In this poem places like Ghusuri (north-west part of Haora city), Betor (south of Shibpur) are described during the voyage of the merchant Chand Saudagar, the central character, from Barddhaman to the sea.

A few more names of place have been found in the old maps of Gastaldi and De Barros of which Pesolta or Pisacoly has been identified with the modern village of Pichhaldaha 3 kms. north-west of Fort Morington Point in southern most tip of the Uluberia sub-division.

In the writings of Venetian Cesare Federici, the first European writer to describe any place of the district, there is an interesting account of Betor on his visit to the place in 1578. From this account it is evident that Betor was an important hub of trading activities with the main centre at Satgaon. The expansion of trade in Bengal led to extension of cultivation, weaving and other artisans. Gradually the Dutch, English and the French started sharing the trade which was originally monopolized by the Portuguese. On the other hand substantial increase in the river and sea going vessels also attracted pirates.

In the twenties of the 18th century almost the entire Haora district was brought under the *zamindari* of Barddhaman (erstwhile Burdwan). A separate *zamindari* called Muhammad Aminpur was formed for the long strip of land along the bank of river Hugli. During mid-eighteen century, the East India Company took up the governance of the districts of Medinipur (erstwhile Midnapur), Barddhaman, Chittagong and Burdwan (in 1760) in which Haora was included.

To check the frequent raids of those river pirates Muslim Government built, apparently about 1666, a fort on the west bank known as Tanna Fort, some twenty miles by land route southward from Hugli. This fort was shown in Valentijn's map and was maintained by an agent Streynsham Master's diary under date 30th November 1676.

After the rupture with the Viceroy Shaista Khan in December 1686 the British under Job Charnock retreated from Hugli (also spelt as Hooghly) triggering a long continued conflict between the two. The war

was concluded in August 1687 and the British was allowed to settle in a place near Uluberia but they were forbidden to go beyond Tanna fort. In fact at first Charnock had recommended to build British Headquarters at Uluberia. But soon after the Bengal Council changed its mind and it found that the place not really suitable for their purpose. Subsequently, as we all know, Charnock and his group arrived at Sutanuti for the third and final time to build their centre. This chain of events indicates that Uluberia, now a small municipal town, might have been the capital of India.

The foundation of Kolkata (erstwhile Calcutta) influenced the growth of the district Haora on the other bank. But slowly Betor declined as most of the trades was transferred to Kolkata across the river.

After the removal of Ali Vardi Khan by the aggression of Maratha Cavalry under Bhaskar Pandit, the whole of west bank came under possession of the Marathas including the Tanna Fort.

By an imperial sanad dated 11th October 1760 Mirkasim assigned to the East India Company, for military charges, the districts Barddhaman, Medinipur and Chittagong, a few years after the victory of Plassey (Palashi) by the English. As Haora was included in Barddhaman it naturally became a British territory.

In 1795, the district of Hugli was created anew and it included Haora. It became independent of Hugli from 1938 onward. The 1948 Government Notification that specifies 14 districts constituting the province of West Bengal also mentions the district Haora as a separate entity. Finally in the year 1963 the district Haora was taken away from Burdwan Division and attached to Presidency Division.

Naming :

There are varied explanations to the origin or derivation of the name 'Haora'.

O'Malley and Chakraborty (Howrah District Gazetteer, 1909) mentioned that the name came from 'Haborh' a form of 'Haorh' meaning low water logged land in eastern Bengal though the term is not really common in western Bengal.

In the Howrah Civic Companion compiled by J. Banerjee, Secretary - Howrah Municipality (1955) it is strongly commented that the name has evoked from 'Harhirha', which has its roots in words 'Harhoa' or 'Hoyarh', alternatively 'Haorh' or 'Hayar', else 'Hayar' or 'Sayar' - primarily meaning sea or ocean. In pre-historic terms the region, it is believed, was near the sea coast. On the other hand 'Haborh' in Oriya language means depression, canal, creek or water logged areas - and that the area was once under the administrative control of Oriya kings.

Shri Ashit Kumar Bandyapadhyay (Haora Saharer Itibritya, 1994) claimed that the area was called 'Haborh' by the general people during early 19th century to early 20th century from which the present name derived. As per some other opinions the name of the district was derived from Harhiyara or Harhyarha and that the suffix 'arha' meant the high embankment of any water body in local dialect. But the above assumptions are largely based on hearsay and very difficult to be proved in absence of supporting documents.

Eminent archaeologist and folklorist Tarapada Santra was of the opinion that there are many village names ending with 'arha' found all over the 'Rarh' region of West Bengal. Later 'arha' denotes dwellings/houses. So he opined that a place of dwelling (arha) of the Hari community (surnamed 'Harrah') was called Harhirha and gradually transformed to Hairhiya-Hairhya-Haorha. Even a group of village name experts found it is possibly linked to the common plant 'Harirha' mentioned in by poet Mukundaram.

Whatever the root may be, the name was officially printed as 'Howrah' in 'The Calcutta Gazette' dated 1st March 1843 perhaps for the first time. Later on 15th August 1854 Tuesday, 'Howrah' was declared the terminal railway station of the erstwhile East India Railway. It is important to note that Census of India adopted the spelling 'Haora' since 1991 and the same spelling has been adopted and printed in the maps published by the Survey of India, the Government agency in-charge maintaining correctness of the maps in India.

Geology :

The district as a whole is a part of delta proper under the Lower Ganga Plain region. In fact it occupies the western most portion of the great Ganga Delta (Singh, 2004). Geologically its origin is a recent phenomena during middle Miocene period when the rivers from Himalayas filled the 'Sag' or 'foredeep' caused by the Himalayan mountain building process. The pre-existing narrow neck of the Peninsular (Gondwana) landmass foundered at a later stage resulting in the formation of the Rajmahal-Garo gap ultimately diverting the waters of the ancient Siwalik

river southward into the Bay of Bengal. The gap was gradually filled by sediments like sands, silts and clays which are associated with occasional gravel beds and lenses of peaty organic matter (Wadia, 1939 & Krishnan, 1949)

It is pertinent to believe that the western portion of the district drained by Rupnarayan and Damodar, two major rivers from Chhotanagpur, has an older origin than the eastern tract drained by more recently by the Ganga and Saraswati. The existence of older alluvium of Damodar in some parts and relatively higher elevation of the western tract further justify the belief (Chatterjee, A.B. 1967).

The formation of the Garo-Rajmahal gap and subsequent deposition of huge recent (late Plistocene) alluvium caused successive southward marh of the delta plains. "This 'accident' did aggravate the actions of the tributaries coming from the Himalayas and the physical landscape was reshaped to some extent owing to the instability introduced in the river regimes. This rather major event was sufficient to disturb the isostatic equilibrium of the earth surface locally and the result was recurring subsidence, alleviations, river diversions, shaping and re-shaping of the deltaic and other consequent landscapes of the Lower Ganga Plain in general and of the southern part in particular." (Singh, R.L. 2004)

The gradual southward development of the delta and resulting recession of the sea is also supported by various observation as well. Betor, meaning 'shoreless', is an old locality south of Howrah Railway Station, shown in early European maps in the southern part of an island. The older generation of the Santals, the oldest inhabitants of the western districts of Bengal, believe in existence of a sea near their homeland (Chatterjee A.B. 1967).

More recent findings from the survey by the Indo-Stanvac Petroleum Project reveals that the Bengal Basin is underlain by a geosynclinical trough and that there have been many marine transgressions and regressions. The thickness of sediments range between 3,529 m. at Jalangi (near Murshidabad) to 4,041 m. at Port Canning (South 24 Paraganas) resting on a basement which lies a few thousand metres below the surface. The basement is formed of basalt strata roughly corresponding to the Rajmahal gap and probably of the Jurassic age (Banerjee A.M. 1972). Further from the results of borings made around Kolkata in 1835-40, beds of peat and wood were found at a depth of 30 feet below the surface i.e. about 10 feet below the sea level. Those woods are found to be remains of 'Sundari' (Heritiera Littoralis), a mangrove spicy found in the muddy saline flats of Sunderbans while another sample resembles a climbing plant Briedelia. At considerable depths bones of terrestrial mammals and fluviatile reptiles were found, but the only piece of shell of fresh water origin, were noticed at 380 feet. Pebble beds were found at depths of 175-195 feet, 200-325 feet and again throughout the lower 85 feet of the bore holes.

Administrative Set-up

(i) Region of the state where district is located :

Lying to the west of the river Hooghly, the district of Haora falls within the jurisdiction of Presidency Division. It is the smallest district in the State except the city of Kolkata.

(ii) Total number of CD Blocks or the next Administrative units after district and changes therein including jurisdictional changes during 1991-2001 :

There are two sub-divisions in Haora, one is Uluberia and the other is Howrah (Sadar). There are in all 19 Police Stations in the district, namely : (1) Udaynarayanpur (2) Jaypurpur (3) Amta (4) Uluberia (5) Bagnan (6) Shampur (7) Jagatballavpur (8) Domjur (9) Liluah (10) Sankrail (11) Panchla (12) Bauria (13) Bally (14) Haora (15) Bantra (16) Malipanchghara (17) Golabari (18) Shibpur, and (19) Jagachha. Altogether there are 14 CD Blocks, namely (1) Udaynarayanpur (2) Amta-I (3) Amta-II (4) Uluberia-I (5) Uluberia-II (6) Bagnan-I (7) Bagnan-II (8) Shyampur-I (9) Shyampur-II (10) Jagatballavpur (11) Domjur (12) Bally-Jagachha (13) Sankrail, and (14) Panchla.

The number of CD Blocks in Haora remains the same, as in 1991. But in case of number of villages it has gone down from 741 in 1991 to 734 in 2001. This means that 7 villages have gone to urban frame from the rural frame.

(iii) Total number of Towns/Villages etc. :

The total number of urban units in Haora has increased from 47 in 1991 to 53 in 2001. While the number of Municipal Corporations and Municipalities has remained the same at 1 and 2 respectively, there has been deletion of 8 non-municipal (Census) towns of 1991 due to non-fulfillment of the criteria as discussed earlier or due to merger with statutory towns. On the other hand, 14 new non-municipal (Census) towns have come up and thus the total number of non-municipal (Census) towns in Hoara has gone up from 44 to 50.

As for outgrowths (OC), 4 OGs have been declassified while 1 new OG has come up. Thus the total number of OGs has been reduced from 5 in 1991 to 2 in 2001.

Haora Municipal Corporation is the only Municipal Corporation of the district and names of the two municipalities are Bally and Uluberia respectively.

The total number of villages in the district of Haora is 734.

(iv) If the district is newly created, the area from which it has been carved out :

It is not a newly created district.

(v) Urban Local Bodies :

The history of urban local bodies dates back in India to Indus Valley Civilization. In Modern India it originated during British rule when in 1687 the first Municipal Corporation was set up at Madras under a charter granted by James-II. There are different types of municipal bodies, namely, Municipal Corporations, Municipalities, Notified Area Committees, and Cantonment Boards etc. Except the Cantonment Boards all other types are created under state municipal laws. Cantonment Boards owe their origin to Central act called Cantonment Acts; 1924. A municipality is a body politic and corporate, constituted by the incorporation of the inhabitants of a city or town. Municipal corporations constitute the highest or topmost form of the urban local governments and are created for big cities by the enactment of state legislatures or of parliament in case of union territories. A Notified Area Committee is created for an area that does not fulfil all the conditions laid down as necessary for the constitution of a municipality or it may also be created for newly developing towns or areas. The councils of all these corporate bodies except notified area comprise elected, opted and associate members. The state governments through a body nominated by it govern the notified area. The primary object of every local body is to provide civic amenities to the people and the overall development of the town.

The oldest municipality of the district is Haora Municipality. It was established in the year 1862. Later, the West Bengal Act XVII of 1965 authorized the establishment of Haora Municipal Corporation. Out of the 2 municipalities of Haora, Bally is the other oldest municipality which was established in the year 1885. The Municipality of Uluberia is a very recent one, it was formed in 1982.

Civil Administration :

The Civil Administration of the district of Haora consists of the District Magistrate as the Principal Executive with 2 Sub-divisional Officers being the sub-divisional heads and under them one Block Development Officer for each Community Development Block. Beside the Sadar Sub-division at Haora, the district has another sub-division, namely Uluberia. Under the police administration, Superintendent of Police is the head of the district and under him there are 2 Sub-divisional police officers with Inspector in-charge / Officer in- charge in each police station. At the district Head Quarter District Judge is the head of the Judiciary. The sub-divisional Judicial Magistrate sits in the Courts at the sub-divisional level.

Physical Features

(i) Location and size :

Haora is the sixteenth district of the total eighteen in West Bengal state as per Census 2001. Its geographical extent is bounded by $22^0 12' 13''$ and $22^0 46' 55''$ north latitude and $87^0 58' 45''$ and $88^0 22' 10''$ east longitude. Haora is among the smaller districts occupying 1,467 sq. km. area sharing only 1.6 per cent of the total geographical area of West Bengal.

The district shares common boundaries on the north and north-east with Arambag and Srirampur sub-division of Hugli district; Tamluk and Ghatal sub-divisions of Medinipur district in the west and south-west; the Kolkata district and Barrackpur sub-division of North 24 Paraganas on the east.

(ii) Physiography :

The district is a flat alluvial plain, with a gradual slope towards south east direction. Physiographically, three tracts are formed in the district, viz. the eastern tract stretching from the Hugli and its branch Saraswati, the central tract traversed by the Damodar and its branch Kana Damodar or Kausiki and the western tract between the Damodar and the Rupnarayan rivers. The average height of the areas ranges from 5 to 6 metres above the mean sea level.

On the basis of the physiographical factors the district is divided into three sub-micro regions.

1. Rupnarayan-Damodar Plain : The region represents the western tract, lying between the Damodar on the east and the Rupnarayan on the west. The northern part of the region is higher than the Hugli and the other regions. The region is plain with a gradual slope towards south and south-east. There are many swamps and water creeks, riverine landscape and embankments built along the river course. In the region the settlements are distributed on the embankments. The Rupnarayan river flows along the district boundary and does not intersect the district. It becomes very wide at the lower portion and enters the Hugli river at the Hugli point.

2. Hugli-Damodar Plain : The region covers the central low land areas between Damodar on the west and the Hugli on the east. The region has a gentle slope and consequently the rivers flow to the south. The physical landforms are almost similar to the region of Rupnarayan-Damodar Plain. The region is drained by the Damodar and its branch Kana Damodar and the Saraswati. The Kana Damodar is the old or deserted river channel of the Damodar. Similarly the Saraswati has also become a dead or dry river. Many swamps and marshes are found in the region. There is little highland where the villages are situated and being surrounded with the trees. The paddy fields are found stretching to the verge of the marshes.

3. Hugli Flats : The region lies over the entire stretch of the alluvial flat area of Hugli district. Topographically, the northern part is higher than the southern part. The higher lands are relatively found replete with villages. These villages are intersected with low lying marshes and paddy fields. The swamps and their outlets drain towards south east to the Hugli. The region is influenced by the flow of the Hooghly river. It enters the district at the outfall of the Bally Khal just north of the Vivekananda Bridge. Between this point and the Howrah Bridge (Rabindra Setu), there is a single meander at Malipanchghara. The deep channel flowing in a meandering course from the Salimar and it broadens at the lower stage. The lower Hooghly is under the tidal forces and the biggest navigable river for the big streams to the open sea. (Taken from Regional Divisions of India - A Cartographic Analysis, Series 1, Vol. XXV, West Bengal)

Flora & Fauna :

Flora : The vegetation of the district Haora is composed almost exclusively of the aquatic or palustrine plants such as Hydrilla, Utricularia, Caesulia, since the area entirely consists of low-lying swampy land laid out in rice fields. The vegetation is also composed of semi-spontaneous plants that form the village shrubberies of Central Bengal, such as Glycosmis, Trema, Urena, Solanum, Datura, Leonotis and the like. The weedy vegetation of the waste places is one of the striking features of the district for its occurrence in these places in exotic extent. Many of these weeds are actually the natives of America, such as Scoparia, Ageratum, Evolvulus, Nummularius and Peperomia pellucida.

Haora has the unique distinction of having the largest Botanical Garden in India and one of the largest in Asia. The Indian Botanic Garden (formerly called

the Royal Botanic Garden) is situated within the Shibpur Police Station, just outside the limits of the Howrah Municipal Corporation and on the right bank of Bhagirathi. It spreads over an area of 273 acres.

Indian Botanic Garden : "Trees of the rarest kinds from Nepal and the Cape, Brazil and Penang, Java and Sumatra are gathered together in that spot. The mahogany towers there, and the Cuba palms form an avenue like the aisle of some lofty cathedral. Noble mango trees and tamarinds are dotted about the grassy lawns, and there are stately casuarinas, around whose stems are trained climbing plants. There are plantains of vast size and beauty from the Malay Archipelago and giant creepers from South America. The crimson hibiscus and scarlet passion-flower dazzle the eye, and the odour of the champak and innumerable jassamines float upon the breeze."

This is the description of the general appearance of the Indian Botanic Garden as written in Mr. Forrest's Cities of India and cited in Bengal District Gazetteers, Howrah, 1909 (L.S.S. O'Malley and Monmohan Chakraborti).

Indian Botanic Garden was established in 1787. It was the result of a governmental look out for some substitute or supplementary food plants (which could be utilized and grown in poorer soil and which would not normally require a lot of attention) against the backdrop of a very serious famine caused by vagaries of weather and successive crop failures in India during the second half of the eighteenth century. Lieutenant Colonel Robert Kyd of the Bengal Army, Military Secretary to the then Governor of Bengal and a distinguished botanist having his own research garden at Shalimar in the neighbourhood, was entrusted with the task of finding suitable land on the western bank of the river Hooghly. Colonel Kyd selected an area near Thana Makua where an old fort and barracks formally stood. This fort fell to the British under the leadership of Lord Clive at the time of the recapture of Kolkata. The condition of this part of the ground was at that time more or less in a state of perfect jungle and was subject to the overflow of the tide. Colonel Kyd dug a deep trench around the land and erected a trench and then planted some commercial plants like cinnamon, black peeper, cardamom and also planted Persian dates, cherries, oranges, teak and sandal wood and other trees. Many of these plants did not survive owing to unsuitable climate and soil of Bengal.

Col. Kyd was succeeded by Dr. William Roxburgh, the father of Indian Botany, according to whose list there were about 3,500 plants in the Garden at his time. Dr. Roxburgh was the first botanist who attempted to draw up a systematic account of the plants of India in his famous Flora Indica.

The great cyclone of Kolkata, accompanied by a huge tidal bore from the river Hooghly laid the greater part of the Garden under water in 1864. In some cases the depth of water was of six to seven feet and two ships were carried inside the Garden with great violence. This resulted in destruction of nearly 1,000 trees and innumerable herbs and shrubs and in complete loss of more than half of the trees and shrubs. Three years later another cyclone came and destroyed over 750 of the surviving trees.

The Garden was restored from its miserable state by Dr. King, F.R.S. when he joined as the Superintendent of the Garden in 1871. He re-oganized it by considerable hard labour and careful planning. He cleared the swampy growth of the grass, excavated a number of artificial lakes, raised the general level of the Garden with available earth, created colourful avenues and planted many trees grouping them on a geographical basis. It was also he who was responsible for the establishment of the Botanical Survey of India on 1890 with the object of surveying in detail the vegetable covering of the country. On January 1, 1963, the Botanical Survey of India assumed full control of the Garden and the post of Superintendent was abolished. Since then the directorial hierarchy controls the Garden.

The Garden had introduced many desirable plants in India from aboard, e.g. Cinchona from the Andes. The plants of para-rubber were introduced in 1874. Other economic plants first tried out in the Garden were vanilla, flax hemp, henbanc, baobab, carob, eucalyptus, paper mulberry, nutmeg, Cloves, cinnamon, black-pepper, cardamom, tapioca, coca, jalap, mangosteen, potato, tobacco, coffee (Arabian and Liberian) and many others. In the field of horticulture, many exotic trees and plants have been introduced in the country through the agency of the Garden. The giant water lily Victoria-regia was brought over from the Amazon in 1887 and still flourishes here. Teak, mahagony and sisal plants were also introduced by the Garden. Another important item is Tea. The introduction of tea plant from China and the establishment of the tea trade in the Himalayas and Assam as well are among the Garden's greatest triumphs as per Sir Joseph Hooker. The garden authorities worked hand in hand with the Agri-Horticultural Society of India in the

improvement of Indian Cotton and in the introduction of both of that and of jute to the markets of Europe. The Garden is also responsible for improvement in quality and quantity of sugar crop in India by introducing some of the best kinds of sugarcane from the West Indies and dissemination of them to all parts of India.

The Botanic Garden has approximately 12,000 plants from many countries and these are growing in perfect harmony. There are two nurseries inside the Garden which specialize in growing ornamental and annual flower plants. There are 1,500 orchid plants in the nursery and a fairly good collection of cacti and succulents. The Garden also exchanges plants and seeds with other botanic gardens or similar institutes. It has an up-to-date library and a small laboratory for conducting researches and scientific experiments. It has also a collection of dried, classified and named specimens of Asiatic plants numbering about 2.5 million.

The pride of the Garden is the Great Banyan Tree near its western limit. Its main trunk is 51 feet in girth at a height of $5^{1}/_{2}$ feet from the ground, and it has no less than 562 alluvial roots rooted in the soil. The circumference of its leafy head is 997 feet and the diameter of the space covered by it at its longest is 287 feet and at its shortest 264 feet. It is not known exactly how old the tree is, but tradition says it was in existence in 1782. The finest object in the garden, as Lord Valentia remarked, is this Ficus Bengalensis. (Great help taken from West Bengal District Gazetteers, Howrah, November, 1972 Edn./Pages : 502-508).

Fauna : As there is no extensive forest area and the district is fringed with factories and under cultivation elsewhere, wild animals have always been scarce in the district. Even in O'Malley's time (1909) leopards were seldom seen. The mammals that occur in the district include some fox-type animals, some types of cat, otters, civets, mongooses, hare, porcupine, squirrel, house mouse and rats, rhesus macaque and langur (in the vicinity of Sibpur Botanical Garden), flying fox (badur), Indian False Vampire (Chamchika) and of course, the Gangetic Dolphin (Susuk). There are some 66 species of bird in the district. In the cold weather snipe of two or three varieties are fairly numerous in the paddy fields within the Domejur, Sankrail and Jagatballavpur thanas in the Headquarters sub-division and also in the Uluberia sub-division. The common, whistling and cotton teal are found in fair numbers in the flooded area between Maju and Amta, and sometimes two or three of the common varieties of duck. Of late, Santragachhi has been shot into fame as an aviary for the migratory birds. Crocodiles are sometimes to be seen on the banks of the Hooghly and Damodar rivers during the winter months; and during the rains they frequently find their way into tanks and flooded lowlands near the river. The principal varieties of river fish netted in the Hooghly river are hilsa, bhetki, tengra, and, during the season, tapsi or mange-fish. The Hooghly from Uluberia to Diamond Harbour is, in fact, noted for the delicious fish last named. Members of the carp family are found in almost every tank, and rui, mrigel and katla spawns are reared extensively.

(iii) Drainage :

In this part of the Gangetic delta, two major rivers from western plateau, the Damodar and the Rupnarayan, debouch into the south flowing Bhagirathi or Hugli river. All these three great rivers have manifested remarkable shifts in their courses, the phenomena could easily be understood from the dried up and truncated old river courses and even from memories still living in the people's mind.

Bhagirathi or Hugli is the most westerly channel through which a major volume of the Ganga flows to the sea after being diverted from the main river near Rajmahal on the north. The course touches the district near the confluence of Bally Khal just north of the Vivekananda Bridge. The river has a large meander spar near Malipanchghara forming a convex bulge near the Rabindra Setu and gradually turns due west near Shalimar Point. It pursues a southwesterly course to receive the Damodar opposite Falta Point and Rupnarayan opposite Hugli Point further south. Its main course, however, was further west of the present Saraswati river according to Rennel's observation in 1783. It is further opined that the minor deltas of the Chotanagpur rivers had pushed the Hugli further east by the silts they carried. The Hugli river is known to have shifted its channel further east from the Haora side during the first half of the 19th century (Banerjee, C.N. 1872) roughly a hundred feet off Salkia. A remarkable man made alteration in the Hugli course is evident from several old records. The present course below Tolly's Nullah is mentioned in the Calcutta record as Kata Ganga co-insides with the cutting and deepening of the bed by the Dutch engineers during the reign of Ali Vardi Khan i.e. middle of the eighteenth century. But the portion of the present course north of Betor was the main channel since the beginning of the 16th century. It is further opined that the main course of the Bhagirathi flowed through the Saraswati form at least 12th century to 16th century (Banerjee A.K.

1972). During the 16th century Hugli at Betor was much deeper where combined water of Damodar and Saraswati entered.

The entire course of the Hugli river is under the influence of tidal forces which has become much weaker at present owing to formation of sand bars and shoals - at regular intervals. This condition induces overflow and inundation of low lying areas on either banks particularly during extreme high spring tides of rainy season added with heavy release of water by the Damodar Valley Corporation. But during major period of the year the course here remains shallow and not accessible for heavier vessels beyond Kidderpore (Kolkata) Port.

The Saraswati, which exists today, is in fact a mere relict of what it was before 16th century except for the few miles above its confluence. The river branches off from Bhagirathi at Tribeni in Hugli district and enters Haora district at Baluhati as a very insignificant shallow stream. It flows southward in a lazy winding course through Domjur and Andul to meet the Hugli river just above Sankrail. Till O'Malley's time (1909) it was navigable upto Andul by boats with 5 tons of loads. There are several large pools or bils, commonly called dahas, on either sides of its present course. The ancient royal port of Bengal was situated on Saraswati as recorded in various old maps and write ups.

The Damodar, from its source in the Chotanagpur plateau in Hazaribagh district of Jharkhand, enters the district near the village of Dihi Bhursut and flows south to Amta for meeting Hugli river near Falta Point. It has two important branches viz. the Kana Damodar or Kausiki and a branch on the west also called the Damodar. The whole stretch of its course has an average width of about a kilometre with sandy bed which becomes fordable in many places during hot and cold seasons but turns totally turbulent during rains. The river is influenced by tides almost upto Raspur, two miles north of Amta though the problems of siltation is vividly growing day by day.

Though no major shift in the river course has been observed for many years, this once mighty river used to be described as the 'sorrow of Bengal' in the popular belief of the people. After descending suddenly from the plateau the river tends to release its loads of silt and create flash floods followed by shift in the channel. From several sources it is clear that the Damodar flowed through three different courses in 16th, 17th and 18th century before settling down to the present path.

The Rupnarayan has its origin near Ghatal in Medinipur by the confluence of Silabati and Dwarakeswar rivers both rising east of Puruliya. Later it enters Haora district at its confluence with the Mundeswari river in Uttar Bhatora village. Then the river takes south and south-easterly course receiving the Hoorhoora and Baksi Khals at Baksi. From this point widens up upto its confluence with the Hugli at Geonkhali opposite Hooghly Point. The river form the western physical boundary of the district. The tidal influence is limited upto the mouth of Baksi Khal and is navigated by boats and steamers all through the year. Islands are common in the river channel. Perhaps due to its resemblance in size with the great river Ganga, several old maps pointed out this by various names like Guenga, Tamalee, Tomberlie, Patraghatta, Old Ganges and even Ganga. The main channel of Damodar is still connected with Rupnarayan by Kana Dwarakeswar.

Creeks, Canals and Swamps : One unique feature of the district Haora so far drainage is concerned is that it is intersected by numerous *khals* and creeks. The tidal offshoots of the Bhagirathi serve the purpose of short distance journeys inland by small country boats. The lower reaches of the Saraswati and the Kana Damodar are called the Sankrail and Sijberia *khals* respectively. The Madaria, Banspati and Gaighata *khals* are the three most important offshoots out of twelve distributaries of Rupnarayan and the Hoorhoora and Bakshi *khals* are the two most important offshoots out of six distributaries of Damodar. The Bakshi and the Gaighata *khals* further combine to form a tortuous navigable channel between the Damodar and the Rupnarayan. In the southern part of the district, the Uluberia, Lahiripara and Nakali *khals* are the three most important connectors of the two river systems.

Haora is also one of the first districts where the long distance canals were excavated for navigation by the government. One such canal is the Medinipur Canal (that passes through the district) which was opened to traffic even before the construction of the Eden Canal. The other is called the Gaighata-Bakshi *khal*. Although the Gaighata and Bakshi *khals* were natural channels, a $7^{1}/_{2}$ miles long connecting link was created by the government to join the two rivers - the Damodar and the Rupnarayan.

Biggest headache concerning drainage in the district however is the swamps. Three sets of swamps lie between the raised banks of the rivers and their principal branches. One set - the Haora swamps is between the Hugli and the Saraswati, another - the

Rajapur swamps - is between the Saraswati and the Kana Damodar and a third - the Amta swamps - between the Kana Damodar and the Damodar. Following a report in 1869 that defective drainage caused by the silting up of rivers and khals was a main cause of Burdwan fever which that time had taken shape of epidemic in Hugli and parts of Haora, the reclamation of the Dankuni, Katlia and Rajapur swamps was recommended. Government approved a portion of the scheme for draining the Dankuni marsh which lies just outside the district with its outfall in the Bally Khal and the work was taken in hand. Subsequently three schemes for the reclamation of the three sets of swamps were suggested. - (1) the Amta scheme for the drainage of 84 square miles lying in the western drainage basin; (2) the Rajapur scheme for the drainage of the tidal portion of the central basin comprising the Rajapur, Panchla and Barajol (or barajhil) swamps; and (3) the Haora scheme for the drainage of the tract lying between the Bally Khal on the north, the river Hugli on the east and south, and the Saraswati on the west.

The Haora scheme was begun in November 1884 and completed in October 1885. The larger Rajapur scheme was next begun and completed in 1894-95. The Amta scheme was taken up far later and the work is still going on. All the drainage schemes have proved to be of immense benefit in reclaiming the waste swamps and improving the other lands. As the Commissioner did put it in 1905, the surplus water is drained out by the canals and sluices in years of heavy rainfall; while in years of drought water from the river is let in for cultivation and drinking purposes. The schemes have been of great benefit to the people of the neighboring tracts, who can reap a good harvest in years of drought as well as in years of heavy rainfall.

(iv) Climate

The district's climate enjoys the moderating effect of the sea being under the influence of the Bay of Bengal branch of the monsoon. The climate and weather of the district consist of three conventional seasons - the cold dry season, the hot dry season and the rainy season.

The period from November to February is the cold dry season. The coldest month in the district is January which is part of this season. The period from March to the middle of June is the hot dry or, say, summer season. May is the hottest month in the district and falls in this season. The monsoon lasts from the middle of June to October. July and August are the rainiest months.

The mean daily temperature varies between 130C in the winter to 35.50C in the summer. Following is the average of the maximum and minimum temperature of the district for preceding 10 years.

Year	Maximum (in Celsius)	Minimum (in Celsius)
1991	…	11
1992	…	9
1993	…	8
1994	37	9
1995	41	9
1996	40	10
1997	38	9
1998	38	9
1999	37	10
2000	36	9

(Year wise data have been taken from District Statistical Handbook, Howrah, 1996 & 2001)

The average annual rainfall in the district is 1,664.9 mm (65.55″). The monsoon rainfall from June to September constitutes about 75.0 per cent of the annual normal rainfall. On an average there are 81 rainy days in a year in the district.

Fogs, mostly of radiation type, occur only during cold dry season - particularly in January and February - causing poor visibility while the Howrah city and its environs are enveloped in the evenings in unhealthy smoke fog or smog. Kal-Baisakhi or nor'wester usually occurs in the month of Baisakh which corresponds to the period from the middle of April to the middle of May. During this period temperature falls substantially with the visitations of thunderstorms. Squalls and thunderstorms begin to decrease in frequency from the end of June. Heavy rain follows the burst of the monsoon which is usually accompanied by a cyclonic storm.

To sum up in L.S.S. O'Malley's words, "the healthiest season is from the middle of January to middle of March, when it is mildly cold and fairly bracing. In the hot weather from the middle of March to the middle of May, the heat, though great in the day-time, is alleviated in the afternoon by a southerly sea breeze. This season consequently not unpleasant and is fairly healthy. The most unhealthy season is from September to the middle of January, when dews fall and the air and earth are charged with moisture, malarial fevers and bowel complaints being common."

Census Concepts

Building :

A 'building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, schools, places of entertainment, places of worship, godowns, stores, etc. It is also possible that buildings which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent Houses :

Houses, the walls and roof which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, brunt bricks, stones or concrete. Roof may be made of any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-Permanent Houses :

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary Houses :

Houses in which both walls and roof are made of materials which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch bamboo, wood, mud, plastic or polythene.

Dwelling Room :

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breath of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling room. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking etc. is regarded as dwelling room. In a situation where a census house is used as a shop or office etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant's quarter is used by a servant and if she/he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House :

A 'Census House' is a building or part of a building used or recognized as a separate unit because of having a separate main entrance from the road or common courtyard or, staircase, etc. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder :

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure

with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storied ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storied structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area there are separate buildings owned by different persons then each such building is treated a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building should treated as a separate building. But if in any of these buildings there are flats in occupation of different households, each such flat should be reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it should not be realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat should be treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in three rooms and the second household occupying two rooms, then considering the use, the first three rooms together should be treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ hotel building should be treated as one census house. But if such hostels/hotels have out-houses or other structures used for different purposes of the same purpose, then each structure attached to the main hostel/hotel should be treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bathroom, baithak etc. Though each of the huts is a separate structure, they form single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts should be treated separate census houses. However, if there are also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, work-shed etc., these should be treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number is given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up is treated as a building.

Rural-Urban Area :

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village'; for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows :

(a) All places with a municipality, municipal corporation, cantonment board or notified town area committee, etc.

(b) A place which satisfy or are expected to satisfy the following criteria simultaneously :

i) A minimum population of 5,000;

ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits; and

iii) A density of population of at least 400 per square kilometre (1,000 per square mile).

For identification of places which would qualify to be classified as 'urban', all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activities were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban areas under Urban Agglomerations. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., may have come up near a statutory town or city but these are within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

Household :

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Castes and Scheduled Tribes :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities, which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Castes in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given in the next page.

LIST OF SCHEDULED CASTES
WEST BENGAL

1 Bagdi, Duley
2 Bahelia
3 Baiti
4 Bantar
5 Bauri
6 Beldar
7 Bhogta
8 Bhuimali
9 Bhuiya

34 Parhaiya
35 Rabha
36 Santal
37 Sauria Paharia
38 Savar

Language and Mother Tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate :

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate :

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational Level :

The highest level of education a person has completed.

Work :

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not

only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceeding the date of enumeration.

Main Worker :

A person who has worked for major part of the reference period (i.e. six months or more during the last one year precceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal Worker :

A person who worked for less than six months of the reference period (i.e. in the last one year preceeding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non Worker :

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceeding the date of enumeration) is termed as 'Non worker'.

Cultivator :

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural Labourer :

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household Industry Worker :

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other Worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work Participation Rate :

Percentage of workers (main + marginal) to total population.

Population Density :

Population density is the number of persons inhabited per square kilo-metre of the area.

Age :

Age is measured in terms of the completed number of years.

Sex-ratio :

Number of females per 1000 males in a population.

Non-Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.. It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns, which are not provided with such underground sewerage system, it is served by open surface drain, box drain, silk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil :

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the street sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil, which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below.

Crude birth rate (CBR) :

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid–year Population}} \times 1{,}000$$

Crude death rate (CDR) :

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate :

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR) :

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR) :

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR) :

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR) :

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years}} \times 1{,}000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = 5 \times \frac{\sum_{15\text{-}19}^{45\text{-}49} ASFR}{1{,}000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = 5 \times \frac{\sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1{,}000}$$

Age-specificMortality rate (ASMR) :

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q_1 :

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q_2 :

Probability of dying between birth and age 2.

q_5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal mortality rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or underduring the year}}{\text{Number of live births during the year}} \times 1,000$$

Early neo-natal mortality rate (ENMR) :

$$ENMR = \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1,000$$

Late neo-natal mortality rate(LNMR) :

$$LNMR = \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1,000$$

Post neo-natal mortality rate (PNMR) :

$$PNMR = \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1,000$$

Peri-natal mortality rate (PMR) :

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

Still birth rate (SBR) :

$$SBR = \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

Maternal mortality rate (MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 married women in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of married women aged 15-49}} \times 100,000$$

Eligible couple (Couples per 1000 population) :

Number of currently married females in the age group15-44 years per 1,000 persons of all ages.

Child woman ratio (0-4) :

Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9) :

Number of children in the age group 5-9 years per 1,000 women in the age group 15-49 years.

Migration :

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another

place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/ relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration :

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration :

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation / Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA / town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area :

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city :

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

Census Findings - Population & its distribution

Census Findings - Population & its distribution

Progress of Population :

As per 2001 Census the population of Haora district is 4,273,099, which occupy the 9th rank in the State by size of population. During 1991 Census also, this district had 9th rank in the State. Table-1 shows the distribution of Rural and Urban population of the district Haora for the last five decades i.e. from 1951 to 2001. The population of the district is increasing in every Census.

TABLE 1: DISTRIBUTION OF RURAL AND URBAN POPULATION IN THE DISTRICT OF HAORA WITH PERCENTAGE TO TOTAL IN BRACKETS (1951-2001)

Sector/ Census year	1951	1961	1971	1981	1991	2001
1	2	3	4	5	6	7
Total	**1,611,373**	**2,038,477**	**2,417,286**	**2,966,861**	**3,729,644**	**4,273,099**
	(100.0)	(100.0)	(100.0)	(100.0)	(100.0)	(100.0)
Rural	1,089,053	1,213,385	1,403,753	1,628,068	1,880,530	2,121,109
	(67.6)	(59.5)	(58.1)	(54.9)	(50.4)	(49.6)
Urban	522,320	825,092	1,013,533	1,338,793	1,849,114	2,151,990
	(32.4)	(40.5)	(41.9)	(45.1)	(49.6)	(50.4)

(a) Distribution of population in rural-urban areas :

The above table reveals that as a result of the process of continuous urbanization in the district, the proportion of rural population has declined and that of urban population has increased from one census to another. However, the tempo of urbanizations is not uniform at each census year. The urban proportion has increased by 8.1 per cent points during 1951-61 which is the maximum as compared to 0.8 per cent point recorded during 1991-2001 is the minimum. To sum up, the rural population has decreased from 67.6 per cent in 1951 to 49.6 per cent in 2001 while the urban population has increased from 32.4 per cent in 1951 to 50.4 per cent in 2001.

(b) Size, Class and status of town :

Growth Rate :

Among million plus Municipal Corporations of West Bengal, the other Municipal Corporation beside Kolkata is Haora with population of 1,007,532. Another 2 municipalities of Haora district namely Bally and Uluberia with population of 260,906 and 202,135 respectively belong to Class I category. Apart from these three municipalities i.e. Haora, Bally and Uluberia, there are fifty census towns in Haora district, out of which 1 census town namely Bally (CT) is the largest census town with a population of 92,912 belongs to Class II town category as per census classification. Out of remaining 49 census towns 7 belongs to Class III, 14 belongs to Class IV, 23 belongs to Class V and 5 belongs to Class VI category. Further, out of total 53 towns of Haora district 1 Municipal Corporation, 2 municipalities and 31 census towns are the constituent units of Kolkata Urban Agglomeration also. There are only 2 out growths, namely Chak Srikrishna and Khalisani of Uluberia (M) of Haora district.

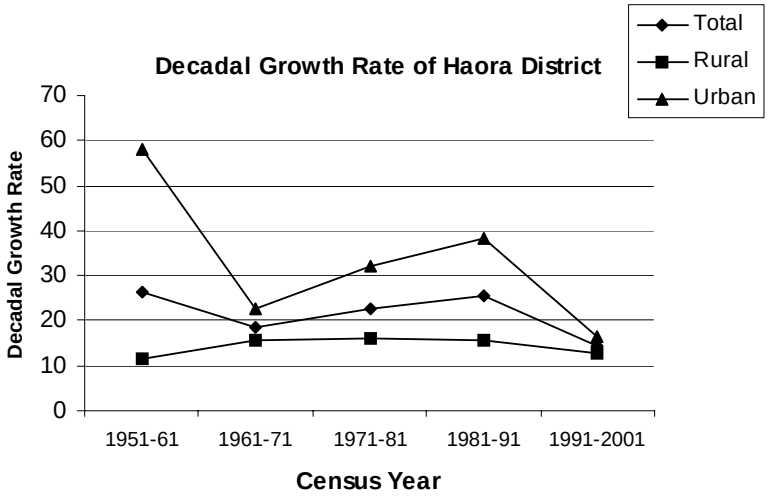

Decadal growth rates for the last five decades have been shown in the following Table-2 :

TABLE 2 : DECADAL GROWTH RATE OF POPULATION OF HAORA DISTRICT (1951-2001)

T/R/U	1951-61	1961-71	1971-81	1981-91	1991-2001
Total	**26.5**	**18.6**	**22.7**	**25.7**	**14.6**
Rural	11.4	15.7	16.0	15.5	12.8
Urban	58.0	22.8	32.1	38.1	16.4

It can be seen from the above table that the growth rate of population in Haora district has been erratic since 1951. It was 26.5 per cent during 1951-61 which declined to 18.6 per cent in 1961-71and gone up to 22.7 per cent during 1971-81 and again increased to 25.7 per cent during 1981-91 and again dropped to 14.6 per cent in 1991-2001. The fluctuations of growth rate between 1981-91 and 1991-2001 is 11.1 per cent point

and it is highest since 1951. Almost similar trend has been observed in both the areas viz. rural and urban. But the fluctuations in the rural growth rate is not so pronounced as noticed in case of urban areas. A steep fall in urban growth rate is recorded during 1961-71 when it declined from 58.0 per cent during 1951-61 to 22.8 per cent during 1961-71 registering 35.2 per cent points drop and increased substantially to 32.1 per cent during 1971-81 and further increased to 38.1 per cent during 1981-91 but declining significantly to 16.4 per cent during 1991-2001 (fluctuations of decadal growth in urban areas between 1981-91 and 1991-2001 is by 21.7 per cent points). It is hard to explain this growth behaviour of urban populations. Most probably, migrations to urban areas is one of the basic contributory factors in shaping the growth trend of urban population. The level of migration has influenced the magnitude of the growth rate.

It is observed from the above chart that total and urban growth rate of the district has followed almost the same trend since 1951-61 to 1991-2001 and urban growth rate is always higher than that of total and rural. But from 1951-61 upto 1971-81, rural growth rate has increased marginally. However, from 1961-71 to 1981-91, the rural growth rate is almost same. Rural growth rate is always (from 1951-61 to 1991-2001) lower than that of total and urban.

Sub-district level :

Among the 14 CD Blocks of the district, Bally Jagachha CD Block has recorded the highest decadal growth rate (28.6 per cent) followed by Domjur (22.2 per cent) and Sankrail (19.5 per cent). The lowest decadal growth rate is observed in Uluberia-II CD Block (1.9 per cent) due to transfer of some areas and population to Uluberia Municipality. Going by the district's rural frame, Sankrail CD Block has shown the highest decadal growth rate (100.6 per cent) whereas Bally Jagachha CD Block has negetive growth rate (-27.5 per cent). The lowest rural decadal growth rate has been observed in Panchla (3.4 per cent). The highest urban growth rate is noticed in Panchla CD Block (56.4 per cent) whereas negetive growth rate is observed in Sankrail (-0.5 per cent) and Uluberia-II (-25.4 per cent).

Density of Population :

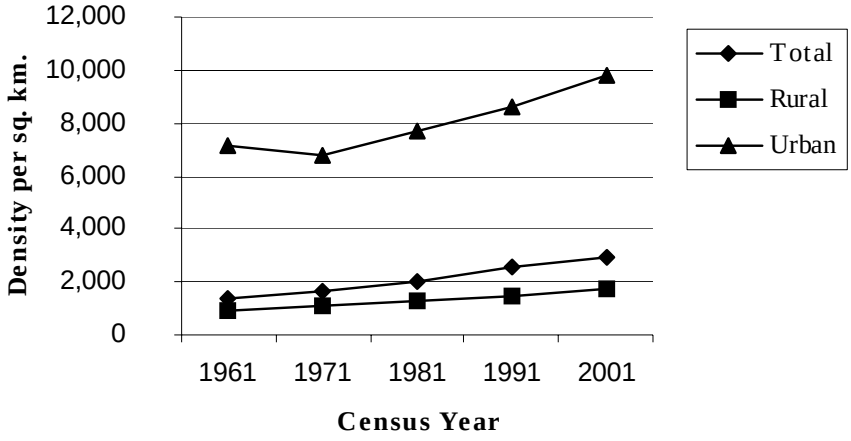

West Bengal has the highest population density among the States at 903 persons per sq. km. as per 2001 Census. It was 767 per sq. km. in 1991. The rural-urban trend of the district can be observed in Table-3 :

TABLE 3 : DENSITY OF POPULATION IN THE DISTRICT OF HAORA (1961-2001)

T/R/U	1961	1971	1981	1991	2001
Total	**1,405**	**1,640**	**2,022**	**2,542**	**2,913**
Rural	909	1,060	1,259	1,502	1,700
Urban	7,162	6,743	7,694	8,600	9,816

The above table indicates that the density has constantly increased from 1,405 per sq. km. in 1961 to 2,913 per sq. km. in 2001. The growing trend has been observed in both the segments of rural and urban, except a decline in urban density in 1971. The rural density of population has gone up from 909 persons per sq. km. in 1961 to 1,700 persons per sq. km. in 2001, while the urban density has risen to 9,816 persons per sq. km. in 2001 from 7,162 persons per sq. km. observed in 1961.

DENSITY OF POPULATION IN HAORA DISTRICT

It is seen from the chart that total and rural density of population of the district have followed almost the same trend since 1961 to 2001 and urban density of population is always much higher than that of total and rural density of population. Both total and rural density of population has steadily increased from 1961 to 2001. The urban density of population also has increasing trend from 1961 to 2001 with only exception to 1971 where it has decreased.

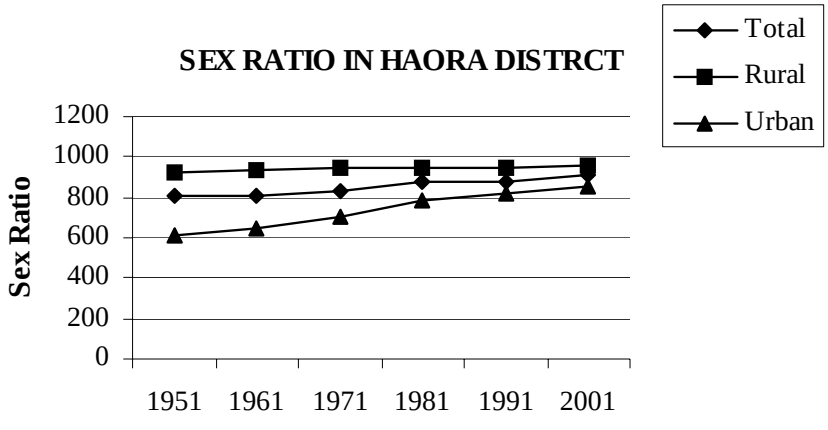

Sex ratio :

The sex ratio has been a very important demographic issue in every census. The overall sex ratio of the district has continuously improved from 810 in 1951 to 906 in 2001 with only interruption in 1961 when it has decreased to 808 (that is decrease by two points per thousand males). Upto 1991 from 1951, the sex ratio of the district has been less than 900. The district being an important industrial centre naturally attracts male population in search of work and livelihood which has probably resulted in this imbalance. For the last 50 years the rural-urban sex ratio of the district has been shown below in Table-4.

TABLE 4 : SEX RATIO IN HAORA DISTRICT (1951-2001)

	Sex Ratio		
Census Year	Total	Rural	Urban
1951	810	925	610
1961	808	940	644
1971	833	941	702
1981	873	951	787
1991	881	941	824
2001	906	958	858

The above table shows that barring 1991, there has been continuous improvement in the rural sex ratio of the district. The rural sex ratio has increased from 925 in 1951 to 958 in 2001. Urban sex ratio of the district has increased from 610 in 1951 to 858 in 2001. The urban sex ratio since 1951 has been much lower than that of rural and total probably due to male migration in search of work and livelihood.

The above 'Chart' indicates that the district has an almost unchanged sex ratio over the last 5 decades. The above trend has been reflected from the more or less constant sex ratio of rural area. The urban decadal sex ratio of the district has witnessed an increasing trend upto 2001.

CD Block level :

Among the 14 CD Blocks of the district, Jagatballavpur CD Block has recorded the highest sex ratio with 973 females per 1000 males followed by Shyampur-II (967) and Uluberia-I (963) CD Blocks and both Bally-Jagachha and Sankrail has recorded the lowest sex ratio.

Work participation rate

The work participation rate by percentage of total workers and its rural-urban break up of both district and state can be found in the table below :

TABLE 5 : PERCENTAGE OF TOTAL WORKER (MAIN +MARGINAL) TO TOTAL POPULATION (1951-2001)

	Haora			West Bengal		
Year	Total	Rural	Urban	Total	Rural	Urban
1951	35.0	30.9	43.6	34.7	32.6	40.9
1961	30.9	26.8	36.9	33.2	32.7	34.7
1971	26.6	23.5	30.8	27.9	27.2	30.1
1981	26.9	24.7	29.7	30.2	30.3	29.8
1991	29.1	28.1	30.1	32.2	33.2	29.6
2001	33.7	33.4	34.0	36.8	37.9	33.9

Note : Concept of Main workers and Marginal workers was introduced in 1981.

The above table shows that there is not much difference between the work participation rates of the district Haora and state of West Bengal and the work participation rate of the district has follwed the trend of West Bengal. In case of both the district as well as state of West Bengal the work participation rate has declining trend upto 1971 and increasing trend since 1981. The woke participation rate of the state has always been marginally higher than that of the district except 1951 wherein the work participation rate of the district was slightly higher. In case of the district, the work participation rate has always stayed above the rural work participation rate. However, in case of West Bengal, urban work participation rate was higher from 1951 to 1971 and lower from 1981 to 2001 than that of rural. Though the work participation rate of the district has witnessed an increasing trend from 1981, yet it is lower in 2001 (33.7) than that of 1951 level (35.0). As discussed above, the work participation rate of the state has also recorded increasing trend from 1981, and it has surpassed the 1951 mark (34.7) in 2001 (36.8).

TABLE 6 : PERCENTAGE OF MAIN WORKERS TO TOTAL POPULATION BY SEX (1951-2001)

	Haora			West Bengal		
Year	Person	Male	Female	Person	Male	Female
1951	35.0	57.7	7.0	34.7	54.8	11.3
1961	30.9	53.7	2.6	33.2	54.0	9.4

Year	Haora			West Bengal		
	Person	Male	Female	Person	Male	Female
1971	26.6	47.6	1.4	27.9	48.8	4.4
1981	26.2	47.4	2.0	28.3	48.7	5.8
1991	28.6	51.1	3.0	30.2	50.7	8.0
2001	28.7	49.5	5.7	28.7	47.0	9.1

Note : Concept of Main workers and Marginal workers was introduced in 1981.

It can be seen from the above table that the proportion of main workers has registered an increasing trend from 1991 in the district and from 1981 in the state but the state average further declined in 2001 which reached to almost 1981 level (28.3). Further, the proportion of main workers in the district and state (28.7 per cent) are same and also below the 1951 level which are 35.0 per cent and 34.7 per cent respectively. The proportion of female main workers is much lower as compared to the proportion of male main workers. Normal household duties may be the reason for lower participation of females in economic activities. When we consider the period from 1951 to 2001, it is noticed that the proportion of female main workers has registered decreasing trend up to 1971 and increasing trend from 1981 which continued till 2001 in both the cases. The proportion of female main workers of the district has always been lower than that of state female average. In 2001, the proportion of male main workers in the district is little higher (49.5 per cent) as compared to corresponding state average (47.0 per cent). But in the case of females it is (5.7 per cent) lower than the State average of 9.1 per cent in 2001 Census.

Comparative trend of literacy rate :

The decadal variation of literacy rate is shown clearly below in the Table-7 :

TABLE 7 : COMPARATIVE LITERACY RATE BY SEX AND RESIDENCE, WEST BENGAL AND HAORA WITH CHANGE IN DECENNIAL PERCENTAGE POINT IN PARENTHESIS (1951-2001)

Year	T/R/U	West Bengal			Haora		
		P	M	F	P	M	F
1	2	3	4	5	6	7	8
1951	T	25.0	34.7	13.2	33.0	44.9	17.6
	R	18.8	28.9	7.6	27.1	41.3	11.2
	U	45.7	51.0	37.1	45.6	51.1	35.7
1961	T	34.5	46.6	20.3	42.9	55.5	26.9
		(9.5)	(11.9)	(7.1)	(9.9)	(10.6)	(9.3)
	R	25.8	38.9	11.7	35.2	51.7	17.4
		(7.1)	(10.0)	(4.2)	(8.1)	(10.5)	(6.3)
	U	59.6	66.0	50.0	53.7	59.9	43.5
		(13.8)	(15.0)	(12.9)	(8.1)	(8.8)	(7.9)
1971	T	38.9	49.6	26.6	47.1	57.6	34.0
		(4.4)	(3.0)	(6.3)	(4.2)	(2.1)	(7.2)
	R	30.6	42.3	18.1	38.6	51.0	25.1
		(4.8)	(3.4)	(6.3)	(3.4)	(-0.7)	(7.7)
	U	62.3	68.2	54.1	58.1	65.1	47.7
		(2.7)	(2.2)	(4.1)	(4.4)	(5.2)	(4.1)
1981	T	46.3	57.0	34.4	57.7	67.8	46.1
		(7.5)	(7.5)	(7.9)	(10.6)	(10.1)	(12.0)
	R	37.9	49.7	25.3	49.9	62.4	36.5
		(7.3)	(7.4)	(7.3)	(11.2)	(11.4)	(11.4)
	U	68.7	75.2	60.7	67.0	73.5	58.6
		(6.5)	(7.0)	(6.6)	(8.9)	(8.4)	(11.0)
1991	T	57.7	67.8	46.6	67.6	76.1	57.8
		(11.4)	(10.8)	(12.1)	(9.9)	(8.4)	(11.8)
	R	50.5	62.1	38.1	61.3	72.2	49.6
		(12.6)	(12.3)	(12.8)	(11.4)	(9.8)	(13.1)
	U	75.3	81.2	68.3	73.7	79.6	66.4
		(6.5)	(6.0)	(7.5)	(6.7)	(6.1)	(7.8)

Year	T/R/U	West Bengal			Haora		
		P	M	F	P	M	F
1	2	3	4	5	6	7	8
2001	T	68.6	77.0	59.6	77.0	83.2	70.1
		(10.9)	(9.2)	(13.1)	(9.4)	(7.1)	(12.3)
	R	63.4	73.1	53.2	72.8	80.7	64.6
		(12.9)	(11.1)	(15.0)	(11.5)	(8.5)	(14.9)
	U	81.3	86.1	75.7	81.0	85.5	75.8
		(6.0)	(4.9)	(7.4)	(7.3)	(5.9)	(9.4)

Note : Upto 1971 Literacy rate was calculated excluding 0-4 age group population. From 1981 onwards Literacy rate is calculated excluding the 0-6 age group population.

It can be observed from the above table that the literacy rate in both district Haora and the state has continiously increased from one census to another. During 1951-2001, it has increased by 44.0 per cent points in the district as against 43.6 per cent points of the state average. In other words the literacy rate in the district has improved from 33.0 in 1951 to 77.0 in 2001 while the overall literacy in the state has improved from 25.0 to 68.6 during the same period. Though, the percentage gain in the literacy rate of the district has always been much higher than the corresponding literacy rate of the state. The district of Haora is mostly urbanised consequently having better education facility which ultimately resulted in higher literacy rate. By sex also, the literacy rate in the district has always been higher than that of corresponding figures of the state.

CD Block level :

Out of 14 CD Blocks of the district, in 12 CD Blocks the percentage of literates is more than 70.0 per cent and in 2 CD Blocks it is more than 65.0 per cent. The highest literacy rate is observed in Bally Jagachha CD Block (82.4 per cent) followed by Bagnan-I and Bagnan-II (both have 75.5 per cent) and Shyampur-II (75.4 per cent). Uluberia-II CD Block has the lowest literacy rate with 66.8 per cent. By sex the highest male and female literacy rate is recorded in Bally Jagachha CD Block with 89.2 per cent and 75.2 per cent respectively. The lowest literacy rate for both male (74.7 per cent) and female (58.3 per cent) is observed in Uluberia-II CD Blocks. The maximum male-female literacy gap is shown in Amta-II CD Block (18.0 per cent) and the minimum in Domjur CD Block (13.2 per cent).

Religion

Religion is also one of the basic cultural characteristics of the population. In a secular country like India, several religions have thrived and every decennial census has attempted to provide an interesting picture of the religious persuasion of the people of the country. The data on religion practised by persons give the content of population of each of the six major religious communities, viz, Hindus, Muslims, Christians, Sikhs, Buddhists and Jains and combined figures for 'other religions and persuasions' and 'religion not stated'. Table-8 the distribution of population by religion since 1961 of the district.

TABLE 8 : POPULATION BY RELIGION IN THE HAORA DISTRICT (1961-2001)

Year	Hindus	Muslims	Jains	Christians	Sikhs	Budd-hists	Other Religions and persuasions	Religion not stated	Total Population
	1	2	3	4	5	6	7	8	9
1961	1,698,306	333,481	402	3,170	2,853	194	71	-	2,038,477
	(83.3)	(16.4)	(0.0)	(0.2)	(0.1)	(0.0)	(0.0)	-	
1971	1,977,551	435,199	513	1,974	1,764	184	101	-	2,417,286
	(81.8)	(18.0)	(0.0)	(0.1)	(0.1)	(0.0)	(0.0)	-	
1981	2,358,785	598,448	1,616	4,640	2,478	654	28	212	2,966,861
	(79.5)	(20.2)	(0.1)	(0.2)	(0.1)	(0.0)	(0.0)	(0.0)	
1991	2,889,019	828,740	4,054	3,788	2,816	770	415	42	3,729,644
	(77.5)	(22.2)	(0.1)	(0.1)	(0.1)	(0.0)	(0.0)	(0.0)	
2001	3,204,077	1,044,383	9,585	6,284	3,779	1,085	1,299	2,607	4,273,099
	(75.0)	(24.4)	(0.2)	(0.2)	(0.1)	(0.0)	(0.0)	(0.1)	

Note : Figures within brackets indicate percentage to total population.

It can be seen from the above table that a majority of the population are Hindus (75.0 per cent) followed by Muslims (24.4 per cent) as per 2001 census. The Christians and Sikhs constitute 0.2 per cent and 0.1 per cent of the total population of the district respectively. The proportion of Hindus has gone down from 83.3 per cent in 1961 to 75.0 per cent in 2001 while the proportion of Muslims has gone up from 16.4 per cent in 1961 to 24.4 per cent in 2001. Thus the proportion of Hindus has declined by 8.3 per cent points as against an increase in the proportion of Muslims by around 8.0 per cent points during 1961-2001.

TABLE 9 : AVAILABILITY OF UNIVERSITY EDUCATION IN THE DISRICT OF HAORA

Serial Number	Name of the University	Territorial Jurisdiction	Remarks
1	Bengal Engineering College Shibpur, Howrah-711 103	Residential Deemed University	It was established in the year 1856 as a Govt. College and got the status of a Deemed University in the year 1992.

Brief Analysis of Inset Tables based on PCA (1-36)

TABLE 1 : DECADAL CHANGE IN POPULATION OF CD BLOCKS BY RESIDENCE, 1991-2001

	District Total :	**3,729,644**	**1,880,530**	**1,849,114**	**4,273,099**	**2,121,109**	**2,151,990**	**14.6**	**12.8**	**16.4**	**49.6**	**50.4**

Table 1 shows that during 1991-2001 there is little difference between the overall growth of the district total (14.6 per cent), rural total (12.8 per cent) and the urban growth rate (16.4 per cent). Among the 14 CD Blocks Bally Jagachha CD Block has recorded the highest growth (28.6 per cent) and Uluberia-II CD Block shows the lowest with 1.9 per cent. Going by the district's rural frame, Sankrail CD Block with 100.6 percentage of growth rate becomes the highest and Bally Jagachha CD Block has enumerated the lowest with -27.5 per cent. The highest urban proportion is Panchla CD Block (56.4 per cent) in 2001 followed by Domjur CD Block (49.2 per cent) while Sankrail CD Block has recorded the lowest with -0.5 per cent.

In urban areas Bally Municipality has recorded the highest growth (41.4 per cent) and Uluberia Municipality has recorded the second highest growth (30.3 per cent) in 2001.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Sl. No.	District / CD Block	Total number of inhabited villages	Total rural population Persons	Males	Females	Number and percentage of villages	Population less than 200 Males	Females	Number and percentage of villages	Population 200-499 Males	Females

(i) Statutory Town				
		: N I L :		
(ii) Census Town				
			1	Manshinhapur
			2	Eksara
			3	Khalia
			4	Bhandardaha
			5	Tentulkuli
			6	Kesabpur
			7	Natibpur
			8	Nalpur
			9	Jalakendua
			10	Gabberia
			11	Paniara
			12	Naupala
			13	Balarampota
			14	Uttar Pirpur
(b) Denotified				
(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns				
		: N I L :		
(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria				
		: N I L :		
(iii) Census towns of 1991 census are notified as statutory town in 2001 census				
		: N I L :		
(c) Declassified				
			1	Amta (NM)
			2	Barunda (NM)
			3	Dhulagari (NM)
			4	Rahudebpur (NM)
			5	Ula (NM)
			6	Masila (NM)
			7	Khalishani (NM)
(d) Wholly merged with Other Town (s)				
			1	Fort Gloster (NM)
			2	Chak Madhu (OG)
			3	Khaskhamar (OG)

Note : Declassified means the Census Towns of 1991 census which failed to satisfy the demographic and economic criteria

As per Table-3, no new statutory town has been created in the Haora District in 2001. There are 14 new census towns in the district which have been created, viz. Manshinhapur, Eksara, Khalia, Bhandardaha, Tentulkuli, Kesabpur, Natibpur, Nalpur, Jalakendua, Gabberia, Paniara, Naupala, Balarampota and Uttar Pirpur. There has been no de-notification whatsoever in 2001. Non-municipal towns (7) viz. Amta, Barunda, Dhulagari, Rahudebpur, Ula, Masila and Khalishani of 1991 have been declassified for their failure to be identified as census town based on demographic and economic criteria, 1 non-municipal town viz. Fort Glosler and 2 out growths viz. Chak Madhu and Khaskhamar have been wholly merged with other towns.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	1	0.1	5	0.0
11-20	1	0.1	14	0.0
21-50	0	0.0	0	0.0
51-100	2	0.3	408	0.0
101-200	4	0.6	1,190	0.1
201-300	4	0.6	2,451	0.1
301-500	10	1.4	6,454	0.3
501 +	705	97.0	2,110,587	99.5
Not known	0	0.0	0	0.0
District Total :	**727**	**100.0**	**2,121,109**	**100.0**
Population Density (Rural) of the district :		**1,822**		

As per Table-4, the population density (rural) of the district is 1,822 per sq. km. Out of 727 villages, 705 (97.0 per cent) villages have the highest range of population density of 501+, percentage distribution of population being 99.5 per cent. There is only 1 village (0.1 per cent) in the district having the lowest range of population density of 0-10 persons per sq. km. In the population density range of 21-50 persons per sq. km., there are no villages in the district.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

	West Bengal			Haora		
Census year	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	945	994	650	935	1,054	584
1911	925	982	614	892	1,006	564
1921	905	971	591	864	990	520
1931	890	961	578	834	948	537
1941	852	945	559	788	921	528
1951	865	939	660	810	925	610
1961	878	943	701	808	940	644
1971	891	942	751	833	941	702
1981	911	947	819	873	951	787
1991	917	940	858	881	941	824
2001	934	950	893	906	958	858

Note : Sex ratio has been defined here as the numbers of Femals per 1000 Males.

The total sex ratio of Haora has been lower than that of the state average since 1901 to 2001. The sex ratio of the state has continuously declined from 1901 to 1941 and then continuously increased from 1951 to 2001. In case of district also, it has witnessed declining trend from 1901 to 1941 and growing trend from 1951 to 2001, except 1961 where it has declined from 1951.

TABLE 6 : SEX RATIO BY CD BLOCKS, 2001

Serial Number	Name of CD Block	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Udaynarayanpur	946	946	0
2	Amta - II	941	941	0
3	Amta - I	959	959	0
4	Jagatballavpur	973	974	922
5	Domjur	961	1,016	936
6	Bally Jagachha	903	938	899
7	Sankrail	903	944	883
8	Panchla	958	960	955
9	Uluberia - II	936	935	940

Serial Number	Name of CD Block	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
10	Uluberia - I	963	963	0
11	Bagnan - I	953	952	963
12	Bagnan - II	941	944	878
13	Shyampur - I	961	961	0
14	Shyampur - II	967	967	0
	District Total :	**906**	**958**	**858**

It is observed from Table-6 that the sex ratio in 2 out of 14 CD Blocks of Haora district is equal to or below the district average of 906. Both Bally Jagacha and Sankrail CD Blocks have the lowest sex ratio of 903 while Jagatballavpur has the highest sex ratio of 973 females per 1,000 males. Sex ratio in rural areas of different CD Blocks depicts that the average sex ratio in rural areas is 958. The highest sex ratio in rural areas is observed in Domjur (1,016) while lowest is Uluberia-II CD Block (935). Bagnan-I CD Block has highest urban sex ratio of 963 while Bagnan-II CD Block has lowest sex ratio of 878 females per 1000 males.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial Number	Name of CD Block	Sex ratio
1	2	3
1	Udaynarayanpur	946
2	Amta - II	941
3	Amta - I	959
4	Jagatballavpur	974
5	Domjur	1,016
6	Bally Jagachha	938
7	Sankrail	944
8	Panchla	960
9	Uluberia - II	935
10	Uluberia - I	963
11	Bagnan - I	952
12	Bagnan - II	944
13	Shyampur - I	961
14	Shyampur - II	967
	District (Rural) Total :	**958**

Table-7 represents sex ratio of Haora district at rural level. Among the 14 CD Blocks of the district, Domjur CD Block has the highest sex ratio of 1,016 and Uluberia-II has the lowest sex ratio at 935.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	2	0.3	185	0.0

District (Rural) Total :		**2,121,109**	**465,837**	**8,543**	**22.0**	**0.4**

Table-15 presents total population of the rural areas of the district along with number and percentage of Scheduled Castes and Scheduled Tribes population in CD Blocks. The Scheduled Caste and Scheduled Tribe population constitute respectively 22.0 and 0.4 per cent of the total rural population of the district. It is higher than district rural total percentage in 8 CD Blocks in the range of 22.2 to 46.4 per cent, 6 CD Blocks have percentage of Scheduled Caste population below the district rural total percentage starting with 20.0 down to 10.8 being the lowest. In case of the Scheduled Tribe population, 4 CD Blocks are having higher percentage (in the range of 0.5 to 1.2) than the district rural average and 9 CD Blocks are below (0.1 to 0.3) the district rural total and 1 CD Block has the same percentage of Scheduled Tribe population equal to district total (rural) average.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	51	7.0	0	0.0
Less than 5	112	15.4	7,722	1.7
5-10	113	15.5	29,215	6.3
11-20	143	19.7	69,877	15.0
21-30	104	14.3	91,536	19.6
31-40	66	9.1	79,312	17.0
41-50	40	5.5	55,404	11.9
51-75	46	6.3	58,796	12.6
76 and above	52	7.2	73,975	15.9
District Total :	**727**	**100.0**	**465,837**	**100.0**

It is seen from Table-16 that total Scheduled Castes population in Haora is 465,837 living in 676 out of 727 villages. Out of the total, 52 villages have more than 76.0 per cent of Scheduled Caste population in each, 51 villages have no Scheduled Caste population and 112 villages have less than 5.0 per cent Scheduled Caste population in each. The maximum villages (143) accounting for 19.7 per cent of total villages with 15.0 per cent Scheduled Castes population are noticed in the percentage range of 11-20.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	573	78.8	0	0.0
Less than 5	138	19.0	4,872	57.0
5-10	10	1.4	1,601	18.7
11-20	6	0.8	2,070	24.2

	District (Urban) Total :	**2,151,990**	**192,870**	**10,625**	**9.0**	**0.5**

Number and percentage of Scheduled Caste and Scheduled Tribe population in UAs/Towns are 192,870 and 10,625 respectively. Scheduled Castes constitute 9.0 and Scheduled Tribes constitute 0.5 per cent of total urban population of Haora. Haora Municipal Corporation has the biggest concentration of Scheduled Castes with 48,759 in percentage 4.8, but going by the percentage of Scheduled Caste population to total population of specific UAs / Towns it is not the highest. That position is occupied by Tentulkuli census town which has 3,469 Scheduled Castes out of total population of 5,127 that makes its percentage of 67.7 the highest. Likewise Natibpur census town has the lowest concentration of Scheduled Castes population with only 5 or 0.1 per cent. In case of the Scheduled Tribes population, Haora Municipal Corporation also have the highest number of persons with 3,691 or 0.4 per cent to the total population. Here also in terms of percentage the highest is Naupala census town (10.6 per cent). However, Uttar Pirpur census town is the lowest in terms of absolute number (1). No Scheduled Tribe population is enumerated from 11 census towns of Haora.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN CD BLOCKS, 2001

Serial Number	Name of CD Block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio

	Sex ratio (Urban) for the district :	**917**	**846**

Table 20 above gives the urban Sex ratio for Haora district for Scheduled Castes and Scheduled Tribes. It is 917 females for Scheduled Castes and 846 females for Scheduled Tribes per 1,000 males. Natibpur census town has the highest sex ratio for Scheduled Castes with 4,000 where total Scheduled Castes population is 5 while Banupur census town has the lowest with 668. It is worthwhile mentioning that in case of the Scheduled Tribes, both Chamrail and Jagadishpur census town have the highest with 2,000 females per 1,000 males and Panchpara census town is having the lowest with 133 only reveals the wide disparity that the district has been subjected to so far the sex ratio of the Scheduled Tribes is concerned.

Table 21 gives number of literates and illiterates at the CD Block level. The overall literacy rate for the district is 77.0 per cent (males 83.2 per cent, females 70.1 per cent). The male literacy rate is higher by 13.2 per cent points than that of females. The urban literacy rate (81.0 per cent) is higher by 8.2 per cent points than the rural literacy rate (72.8 per cent). The male-female literacy gap is more pronounced in rural areas.

Out of 14 CD Blocks, in 12 CD Blocks the literacy rate is more than 70.0 per cent and in the rest 2 CD Blocks each have the literacy rate of 68.6 per cent. It is as high as 84.4 per cent in Bally Jagachha CD Block and as low as 68.6 in Uluberia-I and Uluberia-II CD Block. By sex the highest literacy rate is recorded in same Bally Jagachha CD Block for both males (89.2) and females (79.1). The lowest literacy rate is obtained in Uluberia-II CD Block both for males (76.3) and for females (60.4). The maximum male-female literacy gap is observed in Amta-II CD Block (18.0 per cent) and the minimum in Bally Jagachha CD Block (10.2 per cent).

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN CD BLOCKS, 2001

District (Rural) Total :		**1,336,819**	**757,262**	**579,557**	**784,290**	**326,148**	**458,142**	**72.8**	**80.7**	**64.5**	**16.2**

Table 22 gives the same data as in Table 21 but in respect of rural areas only. It can be seen from that above table that the overall literacy rate for the rural areas of the district is 72.8 per cent (males 80.7 per cent, females 64.5 per cent). Out of 14 CD Blocks of the district, 8 have registered higher literacy rate than that of rural district average while rest 6 CD Blocks have recorded lower literacy rate than that of rural district average. The literacy position by sex indicates that the highest male literacy is reported from Bally Jagachha (89.2 per cent) while the lowest is in Uluberia-II CD Block (74.7 per cent). In case of females literacy also, the highest literacy rate is registered by Bally Jagachha CD Block (75.2 per cent) and the lowest by Uluberia-II CD Block (58.3 per cent). The maximum gap in male-female literacy rate is observed in Amta-II CD Block (18.0 per cent) and minimum in Domjur CD Block (13.2 per cent).

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

100	0	0.0	0	0.0
District Total :	**727**	**100.0**	**2,121,109**	**100.0**
Literacy rate for District :		**77**		

Table 23 gives the distribution of villages by range of literacy rate. The above table also indicates that as the literacy rate increases from the base level, the number of inhabited villages, their percentage distribution, population and percentage distribution of population increases up to literacy rate range 71-80 per cent excepting the literacy range of 21-30 per cent where no villages exists at all. The highest number of villages (323), along with highest percentage distribution of villages (44.4), highest population (1,008,473) and maximum percentage share of population (47.5) fall in literacy range of 71-80. Thereafter all variables start to decline. It is also observed that not even a single village falls under literacy category of 0 per cent, 1-10 per cent and 100 per cent.

Table 24 above gives the urban literates and literacy rate for the UAs and towns. The above table shows that on an average 81.0 per cent of urban population is literate. The male literacy (85.5 per cent) is higher by 9.7 per cent points than that of female literacy (75.8 per cent). Among the towns, Andul census town has registered the highest literacy rate (91.9 per cent) while the lowest is reported in Jala Kendua census town (59.9 per cent). Both the highest male and female literacy is noticed in same Andul census town (94.8 per cent and 88.9 per cent). Lowest male and female literacy is also found in Jala Kendua census town (67.5 per cent and 52.5 per cent).

District (Rural) Total :		**228,894**	**135,580**	**93,314**	**236,943**	**99,592**	**137,351**	**57.2**	**67.2**	**47.0**	**20.2**

Table-25 above gives the CD Block wise literates and literacy rate of Scheduled Castes by sex. The above table clearly demonstrates that 57.2 per cent of the rural Scheduled Caste population is literate with 67.2 per cent males and 47.0 per cent females giving a male-female literacy gap of 20.2 per cent points. The highest literacy rate among the Scheduled Castes is observed in Bally Jagachha CD Block (80.1 per cent) followed by Sankrail CD Block (64.3 per cent) and Uluberia-I CD Block (63.9 per cent). The lowest is noticed in Jagatballavpur CD Block (49.9 per cent). Again, by sex the highest literacy rate among the males (88.3 per cent) and females (71.3 per cent) is seen in same Bally Jagachha CD Block, while the lowest for males (60.2 per cent) and females (39.6 per cent) both are returned in Jagatballavpur CD Block. The highest male-female literacy gap is recorded in Amta-II CD Block (25.3 per cent) and the lowest in Bally Jagachha CD Block (17.0 per cent).

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of vinhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	2	0.3	5	0.0
1-10	0	0.0	0	0.0
11-20	4	0.6	892	0.2
21-30	16	2.4	4,600	1.0
31-40	53	7.8	34,531	7.4
41-50	129	19.1	107,805	23.1
51-60	173	25.6	132,195	28.4
61-70	164	24.3	118,507	25.4
71-80	98	14.5	57,581	12.4
81-90	29	4.3	9,673	2.1
91-99	1	0.1	11	0.0
100	7	1.0	37	0.0
District Total :	**676**	**100.0**	**465,837**	**100.0**
Literacy rate for District (Rural) :		**57.2**		

There are 2 such inhabited villages (0.3 per cent) consisting of negligible Scheduled Caste population (5 persons) where there is no literate. As literacy rate goes higher and higher the number of villages also increases and maximum villages (173) are concentrated in literacy range 51-60 per cent with highest proportion of villages (25.6 per cent) and the highest share of Scheduled Castes population (28.4 per cent). Thereafter, as the literacy range increases the number of villages their proportion and population and its proportion tend to go down except literacy rate range of 100.0 per cent.

Haora (Urban) :		**120,783**	**69,887**	**50,896**	**72087**	**30702**	**41385**	**70.4**	**78.0**	**62.1**	**15.9**

Among the urban Scheduled Caste population of Haora district, 70.4 per cent are literates with males 78.0 per cent and females 62.1 per cent. Among the 54 urban units, Podara census town with 85.4 per cent literacy is on the top and Jala Kendua census town with 48.3 per cent literacy is on the bottom in respect of literacy rate. Among the Scheduled Caste males, the highest literacy rate is recorded in Khalor census town (91.7 per cent) whereas the lowest in Jala Kendua census town (58.1 per cent). In case of Scheduled Caste females the highest literacy rate is returned by Natibpur census town (100.0 per cent) and lowest by Gabberia census town (38.4 per cent). The overall male-female literacy gap among the urban Scheduled Caste population is 15.9 per cent points. The highest gap in male-female literacy rate is seen in Bankra census town (27.1 per cent) and the lowest in Natibpur census town (-100.0 per cent points) because out of 5 person of this census town 3 are literate females and 1 male and 1 female are illiterate.

TABLE 28 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN CD BLOCKS, 2001

District (Rural) Total :		**2,525**	**1,615**	**910**	**6,018**	**2,587**	**3,431**	**34.1**	**44.4**	**24.2**	**20.2**

The literacy situation of rural Scheduled Tribe population is not very bright as just 34.1 per cent among the rural Scheduled Tribe population is literate with 44.4 per cent males and 24.2 per cent females. Among the various CD Blocks of the district Haora, the maximum literacy rate is registered by Uluberia-II CD Block (71.2 per cent) followed by Uluberia-I CD Block (66.7 per cent) and Sankrail CD Block (66.7 per cent) and the minimum is seen in Bagnan-II CD Block (9.8 per cent). Among the males the highest literacy rate is observed in Uluberia-I CD Block (80.9 per cent) followed by Uluberia-II (79.7 per cent) and Sankrail CD Block (75.8 per cent) while the lowest in Bagnan-II CD Block (17.6 per cent). Among the females, the highest literacy rate is recorded in Uluberia-II CD Block (62.5 per cent) and the lowest is observed both in Bagnan-II and Shyampur-I CD Block (3.1 per cent). In Bally Jagachha census town no females is returned as literate.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	23	14.9	707	8.3
1-10	9	5.8	1,796	21.0
11-20	11	7.1	528	6.2

81-90	5	3.2	178	2.1
91-99	2	1.3	65	0.8
100	18	11.7	56	0.7
District Total :	**154**	**100.0**	**8,543**	**100.0**
Literacy rate for District (Rural) :		**34.1**		

There are 23 such inhabited without any literate Scheduled Tribe population consisting of 14.9 per cent of villages and 8.3 per cent Scheduled Tribe population. As the literacy range goes up, the number of villages and their proportion, Scheduled Tribe population and its percentage distribution increases upto literacy range 31-40 per cent. The maximum number of villages (18) and their corresponding proportion (11.7 per cent) and

Scheduled Tribe (1,860) population and its percentage share (21.8 per cent) are also maximum. Thereafter the numbers of villages tend to decrease with the only exception in the population range at 61-70 per cent and cent per cent literacy range where the number of villages, their proportion, the Scheduled Tribes population and its percentage share all increased.

	Haora (Urban) :	**6,210**	**3,724**	**2,486**	**4,415**	**2,033**	**2,382**	**66.2**	**73.2**	**58.0**	**15.2**

It can be seen from the above table that among the urban Scheduled Tribes population of the district, 66.2 per cent is literate with 73.2 per cent males and 58.0 per cent females. Among the towns having Scheduled Tribe population, the highest literacy rate is exhibited by Jagadishpur, Kantila, Khalia and Uttar Pirpur census towns (100.0 per cent each). Similarly the highest literacy rate for males (100.0 per cent) is observed in Andul, Argari, Eksara, Jagadishpur, Kantlia, Khalia, Podara, Salap and Uttar Pirpur census town and for females Jagadishpur, Kantlia, Khalia and Panchpara census towns have cent per cent literacy rate because small numbers of Scheduled Tribe population are there and they are all literate. Likewise the lowest literacy rate is exhibited by Sarenga census town (3.8 per cent) which also recorded the lowest rate both for the males (6.2 per cent) and females (0.9 per cent). There are 3 census towns viz. Argari, Eksara and Uttar Purpur for which gap in male-female literacy is 100 per cent point because their female literacy rate is zero. The overall male-female literacy gap in the urban Scheduled Tribe population is 15.2 per cent points. The largest gap is seen in Balarampota census town (42.9 per cent points) and the least in Panchpara census town (-50.0 per cent points). While analyzing the literacy situation prevailing in different towns, it is important to keep in mind the very small numerical size of Scheduled Tribe population of Jagadishpur, Kantlia, Khalia and Uttar Pirpur census towns and by considering only proportion would not give clear picture in relation to relatively large population concentration of Scheduled Tribes of other towns. In Nalpur census town no Scheduled Tribe is enumerated as literate.

Out of the total population 4,273,099 in Haora, the main workers account for 28.7 per cent, marginal workers 5.0 per cent, total workers 33.7 per cent and non-workers 66.3 per cent. The sex differentials in work participation reveals that a much lower percentage of the female population i.e. only 9.2 per cent are engaged in productive activities compared to males (55.9 per cent). Further, among male and female workers, the proportion of male main workers (49.5 per cent) is abnormally high than that of the females (5.7 per cent) but under marginal workers category, female proportion (3.5 per cent) is almost half that of male (6.4 per cent).

The CD Block level analysis of work participation rate reveals that Bally Jagachha CD Block recording 31.0 per cent main workers is the CD Block with the highest percentage. Uluberia-I CD Block with 21.5 per cent main workers are the lowest. In case of marginal workers, the highest proportion is noticed in Shyampur-I CD Block (10.6 per cent) whereas the lowest is in Bally Jagachha CD Block (2.9 per cent). In respect of total workers, the highest proportion is recorded in Panchla CD Block (37.3 per cent) and lowest in Bagnan-I CD Block (29.0 per cent). In case of non-workers, Bagnan-I CD Block has the highest percentage (71.0 per cent) and Panchla CD Block has the lowest (62.7 per cent). The sex differentials in participation of economic activities reflect that the highest proportion of male total workers is registered Udaynarayanpur CD Block (58.9 per cent) and the lowest in Bagnan-I (50.5 per cent). So far as female total workers are concerned, the highest percentage is in Panchla CD Block (16.2 per cent) while the lowest is in Bagnan-I CD Block (6.5 per cent).

The work participation in the rural areas of Haora district is shown in Table 32 above. It can be seen from the above table that in the rural areas 33.4 per cent of the rural population are workers and 66.6 per cent non-worker. The main workers constitute 26.4 per cent and marginal workers comprise 7.0 per cent of the total population.

The highest rural proportion of main workers has been obtained in Panchla CD Block (31.1 per cent) and the lowest in Uluberia-I CD Block (21.5 per cent).

Among male main workers, the highest percentage is in Domjur CD Block (54.1 per cent) while the lowest participation is recorded in Uluberia-I CD Block (38.5 per cent). In case of female main workers, the highest proportion is noticed in Panchla (9.1 per cent) and lowest in both Shyampur-I and Shyampur-II CD Block (3.3 per cent each).

The highest share of marginal workers in rural areas of this district has been registered in Shyampur-I CD Block (10.6 per cent) and the lowest in Bally Jagachha CD Block (4.8 per cent).

In case of Haora district male proportion is much higher in main workers than their female counterparts, but in case of marginal workers the proportion of male is slightly more than double than their female counterparts.

The largest proportion of total workers has been observed in Panchla CD Block (38.5 per cent) which is higher as compared to district rural average (33.4 per cent) while the lowest is in Bagnan-I CD Block (29.0 per cent).

The highest proportion of non-workers is witnessed in Bagnan-I CD Block (71.0 per cent) and the lowest is in Panchla CD Block (61.5 per cent).

District (Urban) Total :		**Persons**	**2,151,990**	**665,433**	**30.9**	**65,105**	**3.0**	**730,538**	**33.9**	**1,421,452**	**66.1**
		Males	**1,158,488**	**605,344**	**52.3**	**45,261**	**3.9**	**650,605**	**56.2**	**507,883**	**43.8**
		Females	**993,502**	**60,089**	**6.0**	**19,844**	**2.0**	**79,933**	**8.0**	**913,569**	**92.0**

It is evident from the above table that out of the total urban population of Haora district, 30.9 per cent is main workers, 3.0 per cent is marginal workers and 66.1 per cent is non-workers. The table also shows 52.3 per cent males and 6.0 per cent females are main workers; 3.9 per cent males and 2.0 per cent females are marginal workers and 43.8 per cent males and 92.0 per cent females are non-workers.

Individual town level analysis indicates that the highest population of main workers (37.1 per cent) is in Bipra Noapara census town and lowest (15.5 per cent) in Uttar Pinpur census town. In case of marginal workers the highest proportion is recorded in Naupala census town (12.8 per cent) and lowest in Ankurhati census town (0.6 per cent). The proportion of non-workers varies from the lowest recorded in Bipra Noapara census town (59.4 per cent) to the highest in Uttar Pinpur census town (72.3 per cent). The proportion of female non-workers is more that 90 per cent in maximum towns of Haora.

Note : Per cent of Worker to total worker are given in brackets

Table 34 above contains broad classification of the working population to number and percentage in case of Haora district. It can be seen from the above table that the highest percentage of workers are engaged as Other Workers (73.1 per cent) followed by Household Industry Workers (11.5 per cent), Agricultural Labourers (10.2 per cent) and Cultivators (5.2 per cent) for the rural areas of the district. Under Household Industry Worker category the proportion of the female workers (26.8 per cent) is much higher than that of the male workers (9.2 per cent). Female workers have shown encouraging representation in other works also though their proportion (61.9 per cent) is still lower as compared to their male counterparts (74.8 per cent).

The pattern of distribution of total workers into different categories at CD Block level portrays that the highest proportion of workers employed as Cultivators is registered in Udaynarayanpur CD Block (18.3 per cent) and the lowest in Bally Jagachha CD Block (0.5 per cent). The highest proportion in Agricultural Labourers category is returned both from Shyampur-I and Shyampur-II CD Block (30.4 per cent each) and the lowest is found in Bally Jagachha CD Block (1.5 per cent). Under Household Industry Workers, the highest proportion is recorded in Panchla CD Block (42.0 per cent) and the lowest in Shyampur-I CD Block (3.5 per cent). So far as the Other Workers category is concerned the highest percentage of workers employed in this sector is reported from Bally Jagachha CD Block (93.1 per cent) and the lowest from Panchla CD Block (47.0 per cent).

Note : Per cent of Worker to total worker are given in brackets

The above table shows that in the rural areas of Haora 10.2 per cent of the total workers are Cultivators, 19.7 per cent are Agricultural Labourers, 14.0 per cent are engaged in Household Industry Workers and remaining 56.1 per cent are employed as Other Workers. Under Household Industry Worker category the proportion of the female workers (32.0 per cent) is much higher than that of the male workers (10.8 per cent). Under Cultivators and Agricultural Labourers category, the proportion of male workers is fairly higher compared to female worker. But under the category of Other Workers the gap between the

proportion of male and female workers reported to be engaged as Other Workers is rather little (male 57.3 per cent; female 49.4 per cent).

The CD Block level analysis of distribution of total workers among four economic categories indicates that there is wide disparity in the economic activities among the workers of various CD Blocks. Percentage of Cultivators is as high as 18.3 per cent in Udaynarayanpur CD Block and as low as 2.1 per cent in Bally Jagachha CD Block. In case of Agricultural Labourers, the percentage of workers varies greatly from the lowest being in Bally Jagachha CD Block (4.8 per cent) to the highest both in Shyampur-I and Shyampur-II CD Block (30.4 per cent). In Household Industry, the highest proportion of workers is engaged in Panchla CD Block (40.4 per cent) as against the lowest proportion found in Shyampur-I (3.5 per cent). Likewise, in case of other works, the highest proportion of workers has been noticed in Bally Jagachha CD Block (89.0 per cent) and the lowest in Uluberia-II CD Block (45.5 per cent).

TABLE 36 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY OF URBAN AGGLOMERATIONS / TOWNS, 2001

Table 36 gives the town wise number and percentage of the four categories of workers. It can be observed from the above table that a vast majority of the urban working force (89.5 per cent) is engaged as Other Workers followed by Household Industry Workers (9.1 per cent) and Agricultural Labourers (1.0 per cent). Less than 1.0 per cent of the workers are engaged as Cultivators. By sex, 90.9 per cent of male workers and 78.6 per cent of female workers are engaged in Other Workers. In Household Industry worker category the percentage of female workers is much higher (19.7 per cent) compared to the male percentage (7.8 per cent). In case of Agricultural Labourers and Cultivators the percentage of male (1.0 per cent) and female (0.8 per cent) workers are almost equal. However, percentage of female cultivators (0.9 per cent) are more than their male counterparts (0.3 per cent).

The pattern of distribution of total workers in four categories shows, that the largest proportion of workers are employed as Cultivators in Tentulkuli census town (5.4 per cent) and largest proportion of Agricultural Labourers in Naupala census town (13.4 per cent) among all the municipal and non-municipal towns (census towns). In case of both Household Industry Workers and Other Workers the wide disparity is observed among the various CD Blocks. The highest proportion of workers in household industry has been observed in Jala Kendua census town (75.3 per cent) and lowest in Khalor census town (1.4 per cent). The proportion of Other Workers varies from the lowest being in Jala Kendua census town (19.3 per cent) to highest obtained in Banupur census town (98.2 per cent).

Brief Analysis of Inset Tables based on Village & Town Directory (37-47)

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.

However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Collection of data on village-wise amenities has been a feature of Indian census since 1961. Though such amenities data is basically non-census in nature, they are very useful for having a direct view of the existing infra-structural status of each village in the district. They can also be used as important inputs for future development planning in the district.

In Table 37 we have given CD Block wise position of villages so far as availability of educational and medical facilities, improved drinking water, post office, telephone, transport, banking, approach to villages and power. It can be seen from the above table that educational amenities is available in 93.9 per cent of villages, medical facility in 56.4 per cent villages, improved drinking water in 98.5 per cent villages, Post Office in 26.8 per cent villages, telephone in 36.7 per cent villages, transport and communication in 49.0 per cent villages, banks in 10.0 per cent villages, agricultural credit societies in 24.6 per cent villages, pucca road linkage in 85.7 per cent villages and electricity is available in 93.8 per cent villages in Haora.

In case of educational facilities among the CD Blocks, cent per cent villages of Bally Jagachha are having educational amenity. Shyampur-I is the least served CD Block with 82.1 per cent of villages having this facility. In case of medical facility, Bally Jagachha CD Block (100.0 per cent) has the highest percentage of villages having this facility as against only 26.7 per cent of the villagers obtained the same in Jagatballavpur CD Block. So far as the availability of improved drinking water is concerned, out of 14 CD Blocks, cent per cent villages are served by this facility in 12 CD Blocks (Udaynarayanpur, Amta-II, Jagatballavpur, Domjur, Bally Jagachha, Sankrail, Panchla, Uluberia-II, Uluberia-I, Bagnan-II, Shyampur-I and Shyampur-II). Of the remaining 2 CD Blocks, the level of availability varies from 98.7 per cent in Amta-I CD Block to 79.6 in Bagnan-I CD Block. The availability of postal facilities ranges from the highest proportion recorded in Panchla CD Block (53.8 per cent) to the lowest in Jagatballavpur CD Block (13.3 per cent). None of the villages of Bally Jagachha CD Block have post offices. Telephone facility is available in the highest proportion (100.0 per cent) of the villages in Bally Jagachha CD Block while the lowest proportion (3.9 per cent) noticed in Shyampur-II CD Block. In respect of availability of bus, rail or navigable waterway connectivity of the villages, Sankrail CD Block (73.9 per cent) have the highest percentage of villages having this facility while least of the villages having this facility is observed in Shyampur-II CD Block (28.9 per cent). In case of availability of banking services, the most served CD Block is Uluberia-II with 21.9 per cent of villages having this facility whereas the least served CD Block is Domjur (2.6 per cent). Rural population of Bally Jagachha CD Block is not served by this facility at all. The Agricultural Credit Societies are available in as many as 42.1 per cent of villages in Shyampur-II CD Block as against just 14.1 per cent registered in Uluberia-II CD Block. Rural proportion of Domjur, Bally Jagachha and Sankrail CD Blocks are not served by this facility at all. In case of proportion of villages connected with pucca road, the highest is observed in Bally Jagachha, Bagnan-I and Bagnan-II CD Block (100.0 per cent) while the lowest is in Uluberia-I CD Block (42.3 per cent). In case of power supply cent per cent villages of Bagnan-II CD Block have been covered and the least is in Bally Jagachha CD Block (66.7 per cent).

TABLE 38 : NUMBER AND PER CENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Sl. No.	Name of CD Block	Total population of inhabited villages	Type of amenity available: Education	Medical	Improved drinking water*	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by pucca road	Power supply
1	2	3	4	5	6	7	8	9	10	11	12	13

13	Shyampur - I	182,549 (100)	162,742 (89.1)	112,954 (61.9)	182,549 (100.0)	86,290 (47.3)	52,869 (29.0)	83,535 (45.8)	22,927 (12.6)	104,320 (57.1)	169,883 (93.1)	156,160 (85.5)
14	Shyampur - II	171,078 (100)	167,057 (97.6)	98,915 (57.8)	171,078 (100.0)	71,901 (42.0)	11,766 (6.9)	63,613 (37.2)	24,305 (14.2)	103,669 (60.6)	160,072 (93.6)	154,065 (90.1)
District Total :		**2,121,109 (100)**	**2,062,872 (97.3)**	**1,459,057 (68.8)**	**2,073,348 (97.7)**	**910,565 (42.9)**	**957,753 (45.2)**	**1,182,124 (55.7)**	**372,725 (17.6)**	**700,131 (33.0)**	**1,833,471 (86.4)**	**1,996,821 (94.1)**

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.

However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 has given the same data as Table 37 but for the rural areas in each CD Block. It can be seen from the above table that on an average 97.3 per cent of population of the district is served by some educational facility within their villages; medical facility is available to 68.8 per cent, improved drinking water to 97.7 per cent, post office to 42.9 per cent, telephone to 45.2 per cent, transport communications facility to 55.7 per cent, banking services to 17.6 per cent. Agricultural Credit Societies to 33.0 per cent, approach by pucca road to 86.4 per cent and electricity is available to 94.1 per cent of population within the villages.

The analysis of availability of various infrastructural facilities to the rural population within their villages reflects that among CD Blocks, cent per cent population is served by educational facility in both Bally Jagachha and Bagnan-I CD Block and minimum in Shyampur-I CD Block (89.1 per cent). Maximum population is served by availability of medical facilities in Bally Jagachha CD Block (100.0 per cent) while the minimum population is served in Jagatballavpur CD Block (38.4 per cent). It may be mentioned here that improved drinking water is available to the entire population of all the CD Blocks of Haora district except Bagnan-I where 72.5 per cent of population availed this facility. The highest percentage of population served by post office is noticed in Panchla CD Block (75.0 per cent) whereas the lowest in Jagatballavpur CD Block (25.8 per cent). The maximum population served by telephone facility is observed in Bally Jagachha CD Block (100.0 per cent) while the minimum is found in Shyampur-II CD Block (6.9 per cent).

In case of availability of transport communication facilities, both Jagatballavpur and Sankrail CD Block (73.5 per cent) are the highest served while both Bagnan-II and Shyampur-II CD Block (37.2 per cent) are the least served. The situation of availability of banking services shows that the highest percentage of population is served in Uluberia-II CD Block (33.3 per cent) while the lowest is obtained in Domjur CD Block (4.5 per cent). Rural population of Bally Jagachha is not served by this facility at all. The highest services in Agricultural Credit Societies is available in Shyampur-II CD Block (60.6 per cent) while the lowest is seen in Panchla CD Block (14.8 per cent) against the overall average of the district (33.0 per cent). Rural population of Domjur, Bally Jagachha and Sankrail are not served by this facility at all. Cent per cent population living in villages approachable by pucca road is in Bally Jagachha, Bagnan-I and Bagnan-II CD Block as against the minimum percentage observed in Domjur CD Block (43.5 per cent). The cent per cent proportion of population served by electricity is found in Bagnan-I and Bagnan-II CD Block in contrast to the lowest percentage registered in Bally Jagachha CD Block (73.1 per cent).

On the basis of above analysis it is crystal clear that there is a wide variation in availability of infrastructural facilities among the CD Blocks. For the balanced socio-economic development it is essential that the infrastructural and basic amenities are available on uniform basis. Thus poorly served areas should have preferential treatment in allocation of scarce resources in local area planning.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

	Distance range of place from the villages where the amenity is available			
Village not having the amenity of	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :				
(a) Primary School	41	3	0	44
(b) Middle School	321	203	7	531
(c) Degree College	118	312	291	721
2. Medical :				
(a) Hospital	145	195	383	723
(b) PHC	282	330	69	681
3. Post Office	468	63	1	532

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
4. Telephone	316	101	43	460
5. Bus Service	285	108	3	396
6. Banks :				
(a) Commercial Bank	483	163	17	663
(b) Cooperative Bank	144	269	294	707
7. Agricultural Credit Societies	358	67	123	548

For those villages which do not have some/any of the listed amenities, Table-39 shows the number of such villages in various distance ranges from the nearest available facilities. It can be seen from the above table that 44 villages have no primary school. Large number of villages (321) can avail the amenities of middle school within 5 kilometres. In case of degree college level education, majority of the villages are away from this amenity.

For 723 villages which do not have the hospital in the village itself most of the villages (383) can avail of the same at a distance range of more than10 kilometres. Out of 681 villages reported as not having primary health centre, most of the villages (330) can avail of it within 5-10 kilometres.

In case of post office, out of total 532 villages not having this amenity, most of the villages (468) can avail the same within 5 kilometres.

So far as the availability of telephone facility is concerned, 460 villages do not have the same but most of the villages (316) can reach this facility within a distance of 5 kilometres from the village. In 396 villages there is no bus station, but most of the villages (285) can have the bus services within 5 kilometres.

In 663 villages there is no commercial bank but bulk of villages (483) can avail the commercial banking facility located within just 5 kilometres. Further, out of 707 villages reporting not having co-operative bank, a majority of villages (294) can avail of this facility at a distance of more than10 kilometres.

In 548 villages wherein Agricultural Credit Societies are not available, a majority of villages (358) can reach this facility located within 5 kilometres range from the respective villages.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office #	Telephone	Transport communi-cations $	Banks	Agricultural Credit Societies	Approach by pucca road
1	2	3	4	5	6	7	8	9	10
less than 5	21	19	14	5	10	8	3	0	19
	(100.0)	(90.5)	(66.7)	(23.8)	(47.6)	(38.1)	(14.3)	(0.0)	(90.5)
5 -15	311	289	192	84	95	144	30	64	242
	(100.0)	(92.9)	(61.7)	(27.0)	(30.5)	(46.3)	(9.6)	(20.6)	(77.8)
16 - 50	385	365	197	104	158	199	39	112	355
	(100.0)	(94.8)	(51.2)	(27.0)	(41.0)	(51.7)	(10.1)	(29.1)	(92.2)
51+	4	4	2	1	2	1	1	2	3
	(100.0)	(100.0)	(50.0)	(25.0)	(50.0)	(25.0)	(25.0)	(50.0)	(75.0)
Unspecified	6	6	5	1	2	4	0	1	4
	(100.0)	(100.0)	(83.3)	(16.7)	(33.3)	(66.7)	(0.0)	(16.7)	(66.7)
District Total :	**727**	**683**	**410**	**195**	**267**	**356**	**73**	**179**	**623**
	(100.0)	**(93.9)**	**(56.4)**	**(26.8)**	**(36.7)**	**(49.0)**	**(10.0)**	**(24.6)**	**(85.7)**

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

It is observed from the table that for all the amenities they largely tend to concentrate within the distance range of 16-50 km. range from the nearest statutory town in terms of number of villages having these amenities followed by distance range of 5-15 km. When distance range goes up from less than 5 km. to 5-15 km. the proportion of villages having these amenities tends to go down with the exception of education, post offices, transport communication and Agricultural Credit Societies. When the distance range further increases to 16-50 km., the proportion increases except in medical amenities where it goes down and post office where it is same compared to the previous one and in 51 km and above range, it again increases in education, telephone, banks and Agricultural Credit Societies.

TABLE 41 : DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Population range	Number of inhabited villages in each range	Type of amenity available									
		Education	Medical	Improved drinking water*	Post Office #	Tele-phone	Transport communicat ions $	Banks	Agricultural Credit Societies	Approach by Pucca road	Power supply

\# Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

It can be seen from the above table that availability of various amenities is directly related to the population size of the villages. It means that with the increase in population size of the villages, generally the proportion of villages having these amenities also increases in each population range. But in case of improved drinking water as the population size increases from the range of 1,000-1,999, the number of villages availing this facility is going down. Exceptions are also observed in case of post office in the population range 500-999, telephones in population range 10,000+, for transport communication in the population range of 5000-9999 and 10,000+ for Agricultural Credit Societies also in 10,000+, approach by pucca road it is in the population range of 2,000-4,999 and for power supply it is both in the population range of 1,000-1,999 and 10,000+.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of CD Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Udaynarayanpur	75	10,960.85	76.70	53.90
2	Amta - II	68	13,483.51	68.70	60.50
3	Amta - I	77	11,555.88	69.30	12.60
4	Jagatballavpur	75	12,606.37	54.80	53.60

Serial number	Name of CD Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
5	Domjur	38	5,735.05	56.70	42.80
6	Bally Jagachha	3	589.76	45.40	72.80
7	Sankrail	23	3,349.94	41.60	19.50
8	Panchla	26	5,422.96	66.60	17.90
9	Uluberia - II	32	6,447.69	70.40	77.60
10	Uluberia - I	71	9,685.09	65.10	73.10
11	Bagnan - I	49	7,641.86	81.40	85.30
12	Bagnan - II	47	7,094.14	76.70	40.80
13	Shyampur - I	67	11,709.77	75.50	53.20
14	Shyampur - II	76	10,131.83	76.30	36.10
	District Total :	**727**	**116,414.70**	**68.90**	**50.50**

Note : Cultivable area = irrigated area + unirrigated area

It can be seen from the above table that there are 727 inhabited villages in Haora spreading over an area of 116,414.7 hectares. Out of this total area, 68.9 per cent of land is cultivable and out of the cultivable area 50.5 per cent area is under irrigation. Among the CD Blocks, the proportion of cultivable area varies between the lowest area recorded in Sankrail (41.6 per cent) and the highest in Bagnan-I (81.4 per cent). In case of irrigated area, though it is as low as 12.6 per cent in Amta-I CD Block and as high as 85.3 per cent in Bagnan-I CD Block of the total cultivable area. The in-depth analysis of the pattern of irrigated area to total cultivable area at CD Block level shows that out of 14 CD Blocks, 6 CD Blocks are reported having less irrigated area than the district rural average (50.5 per cent). There are only 4 CD Blocks in the districts which have more than 70.0 per cent irrigated area and 4 CD Blocks are having 50.0-70.0 per cent irrigated area.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Sl. No.	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	I Bally (M)	2.0	0.4	1.6	2.0	1.4	0.1	0.5	0.0	0.0
2	I Haora (M. Corp)	41.5	4.2	37.2	41.5	24.3	2.4	14.8	0.0	0.0
3	I Uluberia (M+OG)	1.8	0.1	1.7	1.8	0.2	0.7	0.7	0.1	0.1
	District Total :	**28.8**	**3.0**	**25.8**	**28.8**	**16.8**	**1.8**	**10.3**	**0.0**	**0.0**

Table 43 depicts the status if municipal finance (income and expenditure) in respect of all statutory towns in the district. The overall per capita receipt of revenue for the urban population living in the statutory towns comes to 28.8 rupees and per capita expenditure is also 28.8 rupees. Here we can see that Haora Municipal Corporation recorded both the highest per capita receipt of 41.5 rupees (4.2 through taxes and 37.2 from all other sources) and the highest per capita expenditure of 41.5 rupees. The amount has been spent mainly in the process of infrastructural developmental activities. The highest share of 24.3 rupees was spent on the subject like General Administration in Haora Municipal Corporation followed by Public works (14.8 rupees). Expenditure in Public Institutions for 2 statutory towns is zero.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Bally (M)	2.3	1.1	1.1	0.4	0.1
2	Haora (M. Corp)	4.0	1.2	1.1	0.3	0.0
3	Uluberia (M+OG)	4.1	0.6	0.3	0.2	0.1
	District Total :	**3.7**	**1.1**	**1.0**	**0.3**	**0.1**

It can be seen from the table 44 in the earlier page that in the urban areas of Haora district the number of primary schools are 3.7 per 10,000 population. Also there are 1.1 middle schools, 1.0 secondary schools, 0.3 senior secondary schools and 0.1 colleges per 10,000 population.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population	Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3	1	2	3

2	Ankurhati (CT)	0	29	Khalia (CT)	0
3	Argari (CT)	0	30	Khalor (CT)	0
4	Bagnan (CT)	46	31	Khantora (CT)	0
5	Balarampota (CT)	0	32	Mahiari (CT)	0
6	Bally (M)	24	33	Makardaha (CT)	0
7	Bally (CT)	1	34	Manikpur (CT)	0
8	Bankra (CT)	1	35	Mansinhapur (CT)	0
9	Banupur (CT)	0	36	Nalpur (CT)	0
10	Beldubi (CT)	0	37	Natibpur (CT)	0
11	Bhandardaha (CT)	0	38	Naupala (CT)	0
12	Bikihakola (CT)	0	39	Nibra (CT)	0
13	Bipra Noapara (CT)	0	40	Panchla (CT)	0
14	Chakapara (CT)	0	41	Panchpara (CT)	0
15	Chamrail (CT)	0	42	Paniara (CT)	0
16	Dakshin Jhapardaha (CT)	0	43	Podara (CT)	0
17	Dhuilya (CT)	0	44	Raghudebbati (CT)	3
18	Domjur (CT)	15	45	Ramchandrapur (CT)	0
19	Eksara (CT)	0	46	Sahapur (CT)	0
20	Gabberia (CT)	237	47	Salap (CT)	0
21	Haora (M. Corp)	17	48	Sankrail (CT)	0
22	Hatgachha (CT)	0	49	Santoshpur (CT)	0
23	Jagadishpur (CT)	12	50	Sarenga (CT)	0
24	Jala Kendua (CT)	0	51	Tentulkuli (CT)	0
25	Jhorhat (CT)	0	52	Uluberia (M+OG)	21
26	Kalara (CT)	2	53	Uttar Pirpur (CT)	0
27	Kantlia (CT)	0		**Distrct Total :**	**14**

The above table shows that in urban areas of the district Haora as a whole there are 14 beds in medical institutions per 10,000 populations. The town-wise position reveals that out of 53 urban units, there is no bed in medical institution in 41 towns. Gabberia census town is having the highest number of beds (237) per 10,000 populations and 1 bed each in Bally and Bankra census towns per 10,000 populations is in the lowest position.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Bally (M)	260,906	82,650	31.7
2	Haora (M. Corp.)	1,007,532	328,150	32.6
3	Uluberia (M+OG)	215,405	81,418	37.8
	District Total :	**1,483,843**	**492,218**	**33.2**

The slum population has been reported from all 3 statutory towns accounting for 33.2 per cent of the total population. The highest proportion of slum population is returned by Uluberia Municipality (37.8) and the lowest proportion in Bally Municipality (31.7). It may be mentioned here

that the estimated slum figure is supplied by the concerned town authorities, so this may differ from the census figure as collected during the Census 2001.

53	Uttar Pirpur (CT)	Shuttle Cock	

It can be seen from the above table that predominantly agro and non-agro based products are manufactured in 47 out of 53 towns and exported from 43 towns of district Haora. In all 48 important commodities are manufactured in the towns of the district and 42 important commodities are exported from the district. Readymade garments is the item which is manufactured and exported in maximum towns (14). Imitation ornaments, jute products, zari, engineering goods are main items which are basically exported in the district.

Brief Analysis of Inset Tables based on Houses & Household Amenities data of Houselisting Operations (48-52)

Data source : Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

The analysis of ownership status of houses indicates that Haora is in better off position regarding occupation of number of room under different tenure categories.

The availability of living room in owned category is equal with the median number of two rooms for the total and urban households and for rural it is one. But both in rented and other categories, the median number of rooms for the total, rural and urban is one. But so far as the Scheduled Castes households are concerned, the median size number of rooms is one for owned rented and other tenure category for the total, rural and urban component. Among the Scheduled Tribes households, it is one for owned, rented and others tenure category at the district level and also in rural and total segments except the urban component of owned category where it is two.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial Number	District/ CD Block	Total			Rural			Urban		
		Per-manent	Semi-permanent	Tem-porary	Per-manent	Semi-permanent	Tem-porary	Per-manent	Semi-permanent	Tem-porary

	District Total :	**68.2**	**27.9**	**3.9**	**50.6**	**41.6**	**7.7**	**84.2**	**15.3**	**0.5**

Permanent : 1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e. where, burnt bricks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets bricks, lime and stone and RBC/RCC concreate are used for roof.

Semi permanent : 2 Semi-permanent houses refer to those houses made of other types of materials.

Temporary : 3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc.are used for roofs.

It can be seen from the above table that in Haora 68.2 per cent households live in permanent houses, 27.9 per cent in semi-permanent and 3.9 per cent live in temporary houses. The proportion of households living in permanent houses in urban areas (84.2 per cent) is much higher when compared to corresponding figures for rural areas (50.6 per cent). In contrast, households living in urban areas in semi-permanent and temporary houses is much lower than the percentage of households living in rural areas which shows the poor housing condition found in rural areas in respect of durability of houses.

Among the CD Blocks, the highest percentage of households (79.3 per cent) live in permanent houses in Sankrail and the lowest live in Jagatballavpur (43.4 per cent). Again, the lowest proportion of households living in semi-permanent houses (20.1 per cent) is recorded in Sankrail and living in temporary houses (0.4 per cent) is recorded in Bally Jagachha and the highest proportion of households living in semi-permanent houses (52.2 per cent) and temporary houses (20.9 per cent) is noticed in Jagatballavpur and Amta-II CD Block respectively. The net result of the analysis is that the housing condition in Sankrail CD Block is the best among all the CD Blocks.

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

* Based on the improved drinding water source, drinking water source, drinding water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is comsidered as having access to 'Inproved drinking water source'.
However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note : Percentage is to be given in brackets after the number of households.
Bathroom means bathroom within the house
Toilet means toilet within the house.
Drainage menas closed and open drainage.

It is evident from the above table that in Haora District, 75.7 per cent households have access to improved drinking water facility, 56.1 per cent have electricity, 29.4 per cent have bathroom, 60.9 per cent have toilet facility and 41.1 per cent households have drainage. As expected, the percentage of households having these facilities in urban areas is much higher as compared to corresponding figures in the rural areas except improved drinking water. Water is the bare minimum necessity to support the human life which is available to the lowest proportion of households in Bally Jagachha CD Block (57.2 per cent) and to the highest proportion of households in Jagatballavpur CD Block (84.5 per cent). The highest proportion of households served by electricity is noticed in Bally Jagachha CD Block (72.5 per cent) while the lowest in Shyampur-I CD Block (11.3 per cent). In case of both availability of bathroom and toilet facility, the maximum proportion has been found in Bally Jagachha CD Block (47.0 and 88.5 per cent respectively) and the minimum in Shyampur-I CD Block (2.1 and 28.7 per cent respectively). The highest percentage of households

connected with drainage to dispose of waste water is reported from Bally Jagachha CD Block (37.5 per cent) whereas the lowest is in Amta-II CD Block (7.3 per cent).

TABLE 51 : NUMBER AND PERCENT OF HOUSEHOLDS BY TYPE OF FUEL USED FOR COOKING, 2001

Percentage in brackets

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Fire wood is the main fuel for cooking (24.9 per cent) in the district followed by coal/lignite (charcoal) (23.0) per cent, cooking gas (20.4 per cent), crop residue (12.1 per cent), Kerosene (19.8 per cent). Remaining fuels are used in small proportion. About 1.8 per cent households have not done cooking in their houses. Undoubtedly, they have taken meal outside.

Among the CD Blocks the predominant fuel used for cooking is firewood in Udaynarayanpur, Amta-II, Amta-I, Jagatballavpur, Panchla, Uluberia-II, Uluberia-I, Bagnan-I, Bagnan-II, Shyampur-II, cow dung cake in Shyampur-I and coal/ligniate (charcoal) in Domjur, Bally Jagachha and Sankrail CD Block.

Data source : Census of India 2001, H-series : Table on Houses, Household amenities and Assets.

Out of a total number of 838,235 households in the district, 370,323 (44.2 per cent) are availing banking services. Further, out of total households, radio/ transistor is available to 414,007 (49.4 per cent) households, television to 314,341 (37.5 per cent) households, telephone to 75,900 (9.1 per cent) households, bicycle to 412,792 (49.2 per cent) households, scooter/motor cycle/moped to 56,250 (6.7 per cent) households, car/jeep/van to 14,313 (1.7 per cent) households and 225,062 (26.8 per cent) households have none of these assets. Total number and percentage of households availing assets are much higher in urban areas than that of rural areas except radio/transistor, bicycle. banking services are very much instrumental in bringing about socio-economic change and development in our society and is availed

by marginally less than half of the total households.

CD Block level analysis shows that the highest proportion of households availing banking services is returned from Sankrail CD Block (48.6 per cent) while lowest from Amta-II CD Block (26.3 per cent). The proportion of households having none of the specified assets is the highest Amta-II CD Block (37.6 per cent) whereas the lowest in Bally Jagachha CD Block (21.7 per cent). These shows inter CD Block disparity prevailing in the socio-economic status of the people.

Brief description of places of religious, historical or archaeological importance in villages and places of tourist interest in the towns of the district and major charecteristics of the district

A very few flints and spearheads made of animal bones have so far been collected as chance findings from Harinarayanpur village of mouza Mugkalyan under Bagnan Police Station. These implements are primarily detected as having Neolithic Origin. These collections are preserved in the "Ananda Niketan Kirtisala" a district museum at Bagnan founded by Late Tarapada Santra, an archaeologist of repute. Mention may be made here of a terracotta image from Char Radhapur on Rupnarayan river bank resembling the Roman god of war 'Janus' according to archaeologists. As the site is located in geographical proximity of Tamralipta Port of Medinipur, it is deduced that there might have been Greek-Roman trade linkage with this region. Further, several stone and terracotta art works, mostly potteries and Hindu religious images have been collected which, as per researchers, relate mostly to Pal dynasty of mid eighth century AD to mid twelfth century AD (Howrah Zila Parisad, Haora Zela Parikrama : pp. 57-72).

Notes on some temples in Howrah District by David McCutchion

For architectural style and decoration, the temples of Howrah are an extension of those predominating in the adjoining district of Hooghly. The favourite type is the at-chala (hut style with tower duplicate), which at its most developed has a porch on to columns with three archways and a façade fully decorated with terracottas : Ramayana and other mythological scenes above the archways, scenes of contemporary life along the base with Krishnalila frieze above them, small panels depicting gods, goddesses, avatars, sadhus, dancers, doorkeepers and the like rising either side and continuing across the top, and small blocks of similar subject matter in threes at the outer edges. Much less common is the nava-ratna (nine-pinnacled) type. Other traditional designs are rare in temples of any importance, and I have come across no single or twin bangle (elongated hut with gable ends) type at all. The temples of interest that remain are mainly from the second half of the 18th century, although a few survive from the 17th. The art of terracotta decoration seems to have died out earlier than in the adjacent areas of Hooghly and Midnapore, and produced no 19th century school : at Penro-Basantapur in Amta P.S. on a temple dated 1791 the terracotta style is already extremely degenerate. Subsequently stucco is employed, or large statuary of brick and mortar under the new European influence (e.g. on the Bareshwar Siva temple at Kushberia near Amta). At the same time flat-roofed temples with European decorative features became common. All temples are of brick, though fragments of stone lintels, etc. from earlier periods may be found (e.g. at Jaypur or Khariap in Amta P.S.). In some temples, as at Radhapur or Baradabarh in Shampur P.S., the wooden doors to the shrine are carved with figures in similar style to the terracottas. Two local museums, at Panitras (Sarat Smriti Sangrahasala) and Nabasan (Anandaniketan Kirtisala) contain terracotta plaques from temples that have since disappeared.

Amta Police Station :

Garh Bhabanipur : The former temple of Gopinath now stands abandoned and overgrown in the fields to the west of the village, The façade on the east has fallen, so that nothing remains of its former terracotta decoration. It had a central chamber, with two side chambers, front verandah, and a upper storey; presumably the original design was a large at-chala or nava-ratna. It is said that the terracotta figures incorporated in the modern entrance archway of the rebuilt Maninath temple came from the old Gopinath temple.

Singti : Small at-chala temple of Lakshmi-Janardan, with terracotta panels above the archway only, depicting scenes from the life of Krishna. The temple is in a ruinous condition. In better condition nearby is a similar at-chala temple of Sitala, with Ramayan and other Puranic scenes above the archway. The Lakshmi-Janardan temple is dated 1699 sakabda (c. 1777 A.D.), and the Sitala temple would presumably date from the same period. Both temples are in worship.

Asanda : Large nava-ratna temple of Sridhar, with façade fully decorated in rather crude style. Apart from the usual Battle of Lanka, the archway panels includes some curious subject matter. The temple was built in 1711 sakabda (c. 1789 A.D.), and is in a somewhat neglected condition. A salagram (Narayansilda) is in worship.

Jhikira : The adjacent villages of Jhikira and Rautara have the richest collection of decorated temples in Howrah district, extending over a period of about a centurt. (1) At-chala Damodar temple of the Mandal family, dated 1699 sakabda (c. 1769 A.D.). The fully decorated façade has most of its terracottas intact, including a complete Krishnalila frieze, with scenes of upper class and military life below : among them may be seen riders on camels and horses, a European boat protected by soldiers, a raja being carried in a palanquin, another reclining with his hookah, horsemen spearing deer, and so forth; the archway panels have lively battle scenes centering on Rama's fight with Ravana. (2) At-chala Sitanath temple in Kararpara, dated 1705 sakabda (c. 1783 A.D.) : similar decoration, but the base friezes are more damaged. The archway panels include a variety of Ramayana scenes, and the battle of Chandi with Sumbha and Nisumbha on the left; beneath the Krishnalila frieze, there is a vigorous hunting scene with Europeans along the base on the right. In this, as in the temple of the Mandal family, a salagram is in worship. (3) Navaratna temple of Sridhar : this was either built or renovated in the 19th century, and has incised geometrical and floral plasterwork above the archways. (4) At-chala Syam-sundar temple of Mallik family, dated 1613 sakabda (c. 1691 A.D.) - the oldest temple in the village. This has neither archway panels nor Krishnalila frieze, but interesting hunting and processional scenes along the base, especially depicting the early European and their ships. The temple contains a blackstone Krishna, eight-metalled Radha, a salagram called Damodar. (5) Nava-ratna temple of Garh Chandi, dated 1717 sakabda (c. 1795 A.D.). The local people claim this is a repair date and that the original structure goes back to the time of Husain Shah; the temple was renovated in 1940 and thickly whitewashed. A single row of weak rounded terracottas runs round the facade. A painted wooden image of Garh Chandi, seated fully dressed with one hand up and the other down, is in worship, along with two pots. (6) At-chala temple of Jay Chandi, dated 1672 sakabda (c.1750 A.D.). The temple is at present white washed, with no decoration apart from scattered lotus medallions and terracotta plaques of Ganesa, Durga and Kartikeya; the original decoration may have been removed when the temple was repaired in 1894. The image similar to that of Garh Chandi, with a crown. (7) At-chala temple of Damodar in Paschimpara, dated 1698 sakabda (c. 1776 A.D.). Fully decorated facade, with Ramayana above the archways; and unusual feature is that the Krishnalila and social scenes do not extend the whole length of the base, but only at the bottom left and right. Among the latter (bottom left) is a curious scene in which two prisoners are brought struggling frantically before a raja seated with his hookah. The details of the terracottas have been blurred by recent colouring. (8) Near nava-ratna temple of Syamsundar : this was renovated some ten years ago and now offers little of artistic interest; it is decorated with stucco figures. In both these temples of Paschimpara a salagram is in worship.

Ratuta : (9) At-chala sitaram temple of the Ghosh family, dated 1622 sakabda (c. 1700 A.D.). Fully decorated facade with Ramayana and Puranic scenes above the archways, and Krishnalila along the base; below the life of Krishna are interesting depictions of the 17th century. Europeans - riding on horses or elephants, walking accompanied by a servant, shouldering their rifles, hunting, or sailing in their big flat-bottomed boats. Sitaram is worshipped in the form of a salagram, along with a blackstone Krishna (Gopinath), brass Radhika, two more salagrams named Sridhar and Lakshmi-Janardan, and Drga, Kali, Mahadev, etc. (10) Nearby at-chala temple of Damodar in Keranibati, built in the Bengali year 1123 (c. 1716 A.D.) according to the owner. Its only decoration is scattered lotus medallions, and it has recently been whitewashed. The object of worship is a coconut on a pot. (11) At-chala Damodar temple of the Ray family, dated 1684 sakabda (c. 1762 A.D.). Fully decorated facade, with Krishnalila and contemporary scenes along the base, and Ramayana above the archways. Nearby is an at-chala dolmancha, the columns of which are also decorated with mythological subject matter. The main object of worship is a salagram, but the coconuts on pots representing Manasa, Sitala and Chandi are also under worship in the same temple.

Amaragari : There are two fairly large at-chala temples in this village, with fully decorated facades. The older one is the temple of Gaja-Lakshmi, dated 1651 sakabda (c. 1729 A.D.). This has neither Krishnalila frieze along the base, nor Ramayana scenes above the archways : the archway panels are filled with tight scrollwork, while rows of geese and cattle run along the base above the usual hunting and processional scenes, with European boats at the base of the columns. The image has been removed to the adjacent house, and the temple is now used for storing straw. More fully decorated with figures is the temple of Dadhimadhab, dated 1686 sakabda (c. 1764 A.D.). This has particularly vigorous hunting and processional scenes along the base, mainly depicting the Europeans, including their sea-going vessels. All three panels above the archways are given over to the Battle of Lanka,

while the usual Krishnalila frieze runs along the base above the sahibs. A salagram is in worship. Both these temples are approaching a ruinous condition, with trees growing on the roofs.

Jaypur : The oldest temple in this village is the at-chala temple of Motilal Dharma, which was built in 1606 sakabada (c. 1684 A.D.) according to Binoy Ghosh in his Paschimbanger Sanskriti. It is reported to have been fully decorated with terracottas, most of which had fallen off, before it was rebuilt few years age - a process which destroyed its original architectural form and left only a single row of the original terracottas on the left side. The temple of Sridhar in Jaychanditola is a larger at-chala design, dated 1704 sakabda (c. 1782 A.D.). The facade is fully decorated with terracottas in the weak rounded style which developed towards the end of the century : they can hardly be seen properly through the half washed-off whitewashed. A salagram is in worship. Two more temples of interest in Jaypur have been renovated and whitewashed : the temple of Lakshmi-Janardan, a double-storyed flat-roofed design, built in the Bengali year 1112 (c. 1705 A.D.) by Kaliram Ray according to Sri Binoy Ghose; and the Jaleshwar Siva temple, and at-chala design with a char-chala porch.

Gajpur : There are a number of temples in this village, only two of which are of any artistic interest. The Govinda temple of the Majumbar family, like the Lakshmi-Janardan temple of Jaypur, is another instance of the two-storeyed flat-roofed design, dated 1636 sakabda (c. 1718 A.D.), not to be confused with the 19th century flat-roofed temples built under European influence. The upper storey was for removing the image to safety in times of flood. The façade is decorated with large lotus medallions in square panels, and two isolated plaques of Rama and Ravana above the central archway. A blackstone Krihna and eight-metalled Raadhika are under worship. Nearby to the north-east is the ruin of an at-chala Siva temple, dated 1697 sakabda (c. 1775 A.D.). Something of the terracotta decoration still remains on the East and South facades : scrollwork in the archway panels, and a row of avataras above on the south.

Mahishamuri : At-chala temple of Bhubaneshwari, dated 1601 sakabada (c. 1679 A.D.). A rare instance of a fully decorated 17th century facades : Battle of Lanka in the archway panels, Ramayana frieze bottom left, Krishnalila frieze bottom right, processional scenes beneath, and the full complement of side panels and groups at the edges. Unfortunately, frequent renovation (there are five date plaques) has entirely destroyed the artistic and much of the historical value of this temple : large plaster figures have been introduced, enamel paint has been applied to the terracottas blurring the edges and eliminating the details, and the whole has been thickly limewashed in a variety of garish colours. A blackstone Krishna and eight-metalled Radhika are in worship.

Bagnan Police Station :

Mellak : Massive at-chala temple of Madan Gopal, dated 1573 sakabda (c. 1651 A.D.). On a base 28 by 34 ½ feet and over 40 feet high, this is the largest as well as the oldest temple still in worship in Howrah district. The facade is sparsely decorated, mainly with lotus medallions, and there are no base friezes, but a narrow series of plaques runs above the archway panels : these are badly worn, and depict gods, goddesses, avataras and battle scenes. The centre archway panel has two small plaques of Rama pursuing Maricha. A blackstone Krishna and Radha are in worship; a pre-Muslim Vishnu image stands in the porch. Small trees are growing on the roof, which is starting to crumble.

Kalayanpur : Situated in a private courtyard is a large nava-ratna temple of Damodar, dated 1708 sakabda (c.1786 A.D). The three archway panels depict (centre) Battle of Lanka, (right) Krishnalila, (left) social and erotic scenes, including husking rice and a barber at work ; there are no bottom friezes. More than one salagram and pots are in worhip. The temple is in a crumbling condition. A hundred yards or so to the east is a flat-roofed temple of Kali, dated 1744 sakabda (c. 1822 A.D.). Here the traditional terracotta decoration has entirely disappeared, replaced above the arches by floral plasterwork with birds. Both inside the porch and on the outer walls are fixed large, almost life-size terracotta figures - probably inspired by British statuary. A stone image of Kali on a blue jackal is in worship.

Shampur Police Station :

Sultanpur : Char-chala temple of Khatiyal Siva, dated 1588 sakabda (c. 1666 A.D.). The temple has been frequently renovated and much of the facade cemented over, but the archway panel is intact, depicting the pursuit of Maricha by Rama; as at Mellak these two plaques are set amidst scattered flower-heads, and a series of rampant lions eating lotuses runs round the archway. The temple is small, and houses a linga.

Jagatballavpur Police Station :

Jagatballavpur : The most extensively decorated temple is the at-chala Siva temple of the Pal family,

dated 1686 sakabda (c. 1764 A.D.). This has the usual battle scenes above the archways, and Krishnalila above hunting and processional scenes along the base. It has recently been coloured pink, white, and blue. About 100 yards east along the same road is another recently renovated at-chala Siva temple, with the battle of Lanka in the single archway panel. Another smaller at-chala temple with the Battle of Lanka above the archway and no further terracotta decoration, apart from lotus medallions and large dwarapalas, is in Shasthitola and appears to belong to the late 18th century. Nearby is a larger at-chala temple, dated 1724 sakabda (c. 1802 A.D.) , with scattered lotus decoration, dedicated to Mahandresvara Siva.

Many more temples decorated with terracottas are reported from Jagatballabhpur P.S., especially in the area round Patihal and Bargachhia.

(reproduced from District Census Handbook, Howrah, 1961; Appendix - II; pages 89-91)

Places of Tourist Interest :

Gadiara : In the extreme south-east of the district in Syampur P.S. close to the confluence of the Bhagirathi and the Rupnarayan stands the picturesque place called Gadiara. It looks fabulous when the sun sets in. It is an ideal spot for picnicking. Another attraction of the place is provided by the ruins of a fort called Fort Mornington Point said to have been built by Lord Clive to guard the entrance of vessels up either the rivers.

Garhchumuk : Another very charming picnic spot and heaven for strolling is Garhchumuk.To the east of Garhchumuk is the Hooghly river and to the west is the Damodar. There are 58 Sluice Gates for which it is also called 'Atanna Gate' in vernacular. Arrangement for boating in the rivers can also be made. Alongside the banks of canals there is a little forest and a deer park providing further charm to the place.

Samtaberia-Panitras : Sarat Chandra Chattopadhyay, the celebrated Bengali novelist, spent his last days in Samtaberia in a country house built by himself. The house now contains some of his personal effects and a portion of his library and attracts many visitors. In the adjoining village of Panitras the local people runs an institution called Sarat Smriti Mandir where there is also a library and a museum worth seeing.

Ananda Niketan Kirtisala : Ananda Niketan Kirtisala, run by the Ananda Niketan Society at Tenpur - Nabasan, a village in Bagnan P.S. is perhaps one of the best privately managed museums in the rural areas of West Bengal. The museum is devoted to art, archaeology, history and folk arts and crafts of South West Bengal. Its exhibits include terracotta plaques, free-standing terracotta figurines, toys, dolls and ritual objects from the late ancient period to the present times including folk objects of timeless style. They also include coins, store sculptures, votive terracotta sealings, metal sculptures, Jadu-pats and a few beautiful nakshi kanthas.

Indian Botanic Garden : It has been discussed in detail in 'Flora'.

Belur Math : It is a monastery of the disciples of Sri Ramkrishna Paramhansadev, the great 19th century seer. The Math was originally set up at Baranagar on October 1886 shortly after Sri Ramakrishna passed away. After about six years, the original Math was shifted to Alambazar in Kolkata sometime during 1892. But when this new Math was considerably damaged by the great earthquake of 1897, it was again removed from there in February, 1898, to the garden-houses of Nilambar Mukherjee in the village at Belur on the western bank of the Ganges. On May 1, 1897 Swami Vivekananda, after his triumphant return from the west, formed an association under the name of Ramkrishna Mission. Now in order to provide a permanent home for the Ramkrishna order and to train a band of monks for self-realization and for acquisition of a capacity to serve the world in all possible ways, he selected a plot at Belur, the money for purchase of which was provided by Swamiji's English admirer Miss Henrietta F. Muller and his American follower Mrs. Ole Bull. The consecration ceremony of this new monastery was performed by Swamiji himself on December 9, 1898 in spite of his failing health. From 1st January, 1899 this place, now known as Belur Math, became the headquarters of the monks of the Ramkrishna Mission and from 1909 onward the management of the Ramkrishna Mission was vested in a Governing Body consisting of the Tsrustees of the Belur Math. Today the Math and the Mission together have 162 branch centres all over India and in different parts of the world. Belur Math itself is architecturally beautiful and is famous as a heaven for peace.

Howrah Station : When on August 15, 1854 Driver Joshua Greenbow started the engine of the first train for its ongoing journey of 24 mile distance to Hooghly, the main booking office of the East Indian Railway was at Armenian Ghat on the eastern bank of the river Hooghly. The fare covered the journey by ferry to the station. Howrah Station then consisted of a tin shed with a small booking office and a single line flanked by narrow platform. Where the Howrah Station stands today was an orphanage for children run by the

Dominican Sect of Missionaries. Next to it was a small church run by the same sect. Unfortunately the outbreak of plague led to the orphanage being shifted to Kolkata. The place was sold to East Indian Railway. The construction of the new station building on the plot started only after it was first decided to build the station in 1896. The first station was a modest structure of red brick with a roof of corrugated iron sheets and one platform to which some more platforms were added time to time. The need for a new station building became imperative as soon as Bengal Nagpur Railway laid a line connecting Howrah. The English architect, designer and journalist Halsey Ricardo was entrusted with the job of designing. "Halsey Ricardo chose the Romanesque style for designing Howrah. The design feature consisted of brick built arches and windows articulated by eight square towers on the front elevation from the east. The construction which began in 1901 carried on till 1911. The building with its towers looked impressive even when seen from the opposite bank, standing there like a sentinel, as if guarding the quite flowing Hooghly. The grand concourse inside was equally impressive. A picture of geometry in rhythm, the building plan and elevation, its symmetrical repetition of arches and circular cut-outs give the building a unique identity, thereby enhancing its landmark quality"
(Taken from Vibrant Edifice - The Saga of Howrah Station, 2005, page16)

Howrah Bridge : Howrah Bridge; The Gateway of Kolkata, is one of the finest cantilever bridges in the world. By 18th century AD the need for bridging the Hooghly river was first felt by the British and thus the famous Floating Pontoon Bridge was built using timber on pontoon but had got its own demerits. High tides used to make it very steep, inconvenient for bullok carts, besides it was also feared that it would affect river currents and cause sitting problems. Inadequaly for the ever increasing traffic also developed with the passin of time. To overcome these difficulties and to facilitate military tranportation between Kolkata and the industrical town of Haora during World War II construction of the new bridge was undertaken in 1937 and was built between 1937 and 1943. The New Howrah Bridge (also called the Rabindra Setu) is technically a balanced cantilever suspension bridge, constructed entirely by rivering, without nuts or bolts. The bridge is 750 metres long and 97 feet wide. More than 26,500 mtrs. of high-tensil steel went into this unique bridge supported by two piers, each nearly 90 mtrs. above the road. An engineering marvel, it expands as much as a metre during a summer day. The eight lane bridge carries a steady flow of approximately 150,000 vehicles, 4,000,000 pedestrians and thousands of cattle every day.

Accomodation :

As per O'Malley and Chakravarti's observation in the old Howrah District Gazetteer once the district had three inspection bungalows at Domjur, Jagatballavpur and Syampur, one Dale bungalow at Uluberia maintained by Public Works Department, three embankment bungalows at Amta and Mahishrekha on the Damodar and at Sasati on the Rupnarayan and two drainage bungalows at Rajapur and Sijberia. Many rest houses for touring officials or the general tourists have been constructed since then by the Governement, the Zilla Parishad, the Hooghly Irrigation Division, the Rupnarayan Bridge Special Roads Division and the Uluberia Special Roads Division, such as, Uluberia Dak Bungalow, Singti Dak Bungalow, Sijberia Inspecting Bungalow, Mahishrekha Inspecting Bungalow, Sibganja Inspecting Bungalow, Mankur Inspecting Bungalow, Naupala Inspecting Bungalow and so on. Besides the West Bengal Tourism Development Corporation Ltd. runs a tourist lodge named Rupnarayan Tourist Lodge at Gadiara. The Howrah Zilla Parishad has a 3 roomed Holiday Home at Garchumuk. There is also the Irrigation Bungalow along the bank of the Ganga in Garchumuk.

Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district

"Of all the districts in Bengal, Howrah is the least dependent on agriculture for the support of its population. It is practically a metropolitan district, a large proportion of its inhabitants obtaining employment in the adjoining city of Calcutta and in the numerous industrial concerns along the Hooghly. These concerns are situated in the long riparian strip of high land which stretches from the Bally Khal on the north to the mouth of the Damodar River on the south. It contains the populous city of Howrah and the town of Bally, and below them are numerous mills, brick-fields and scattered homesteads. Even in the interior the villages tend to be semi-urban in character and the villages contribute largely to the artisan class".

That is what O'Malley said in the 1909 publication of the Howrah District Gazetteers. While it being true that both Kolkata and Haora are Metropolitan districts, Haora is not cosmopolis like Kolkata. Unlike Kolkata, Haora has its own rural counterpart and even the on-going process of famous industrialization and consequent urbanization the people who take part income mostly

from the rural areas of the district itself. This gives the district a rural tinge.

Following historical figures were associated with the district :

1) Roy Gunakar Bharat Chandra
– Poet of Anandamangal fame
2) Mahamahopadhyay Maheschandra Nyayratna
– Famous Logician
3) Sarat Chandra Chattopadhyay
– Famous Novelist
4) Tulsi Chakraborty
– Renowned Actor
5) Asit Kr. Bandopadhyay
– Renowned Professor of Bengali Language
6) Tarapada Santra
– Noted Scholar

Scope of Village & Town Directory

The "Village Directory'' is one of the traditional compilations of the census. The format of the directory is almost the same as was prescribed in the 1991 census. It bears the list of villages, their location code numbers, areas, population, amenities such as educational, medical, communications, drinking water facilities etc. available to them and also the land use pattern for each village. For this purpose, villages have been arranged CD Block wise in order of their location code numbers. The inclusion of alphabetical list of villages with 2001 census population and the map of every CD Block depicting location of villages by population size, urban-spread and important infrastructural facilities available therein will further help the reader in identifying any village in the CD Block.

'Village' is a statutorily recognized unit having a definite boundary and separate land records. In case a complete village is treated as an outgrowth of urban agglomeration, data on amenities and land use for that village have not been given in the Village Directory but shown along with the urban component. For those villages, which have partly merged in an outgrowth of U.A. data pertaining to remaining part of the village is shown in the Village Directory and for the part merged or treated as an outgrowth, the details have been given under the concerned urban agglomeration. Land use data for villages treated as Census Towns (Urban) in 2001 census can be seen in Appendix-III of the Village Directory.

If a village has fully merged into another village, the location code number and name of the merged village are given both in the Village Primary Census Abstract and the Village Directory at the appropriate place. Data in respect of these two villages put together appear against the village with which the other village has merged.

The uninhabited village (villages with no population) has been indicated as such after furnishing details in columns 1 to 3 i.e. the location code number, name and area of the village. In addition to the above details, following eight appendices to Village Directory have also been included.

Appendix – I - Abstract of educational, medical and other amenities in Villages - CD Block level

Appendix-IA - Villages by number of Primary Schools

Appendix-IB - Villages by Primary, Middle and Secondary Schools

Appendix-IC - Villages with different sources of drinking water facilities available

Appendix-II - Villages with 5,000 and above population which do not have one or more amenities available

Appendix-IIA - List of Census Towns which do not have one or more amenities

Appendix-III - Land utilisation data in respect of Census Towns/Non Municipal Towns

Appendix-IV - CD Block wise list of inhabited villages where no amenity other than drinking water facility is available

Appendix-V - Summary showing number of Villages having or not having Scheduled Caste Population

Appendix-VI - Summary showing number of Villages having or not having Scheduled Tribe Population

Appendix-VIIA - List of Villages according to the proportion of the Schedule Castes to the total population by ranges

Appendix-VIIB - List of Villages according to the proportion of the Schedule Tribes to the total population by ranges

Appendix-VIII - Number of Villages under each Gram Panchayat (CD Block wise)

The above eight appendices are expected to help the planners for planning inputs in areas / villages where basic infrastructure is lacking and also for evolving suitable plans for the welfare of Scheduled Castes and Scheduled Tribes, in particular.

The Village Directory format has 23 columns and

the details given under each column and the abbreviations used to explain availability of amenities are as under.

Column 1 – Serial No. of the villages.

Column 2 – The name and location code number of each village, as this is necessary for proper identification of the village. This also includes the forest and uninhabited villages.

Column 3 – The total area of the village (in hectares) as indicated by the State Revenue Department.

Column 4 – The total population in each village (2001 Census).

Column 5 – The total number of households in the village (2001 Census).

Data on amenities such as educational, medical, drinking water, post, telegraph and telephone, commercial and cooperative Banks, credit societies, Recreational & cultural facilities, communications etc. are shown under columns 6 to 13 of the Village Directory. In case if an amenity is not available within the referent village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz., up to 5 kms., 5-10 kms. and 10+ kms. to the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provision of goods and services as well, so as to minimize the regional imbalance in the process of development.

Column 6 shows the number of all kinds of educational institutions run by different agencies, government or private of the level of viz., primary school, middle school, secondary school, senior secondary, college, industrial school, training school adult literacy school / centre and other educational institutions (Sanskrit pathshala, senior basic school, makhtab etc).

If in a village, secondary school has middle and primary classes also, the same has been counted as three schools i.e., secondary, middle and primary school. In case there are more than one institution of any type in a village their number is indicated within brackets against the prescribed abbreviation.

Column 7 provides data on medical facilities available in the village.

Column 8 gives information regarding availability of drinking water within the village. In case more than one source is available to the village the same has been indicated.

Column 9 provides information about the existance of facilities such as post, telegraph and telephone connections available in the village.

Column 10 refers to the availability of banking service in the villages and this is shown by giving the number of commercial and co-operative banks separately.

Column 11 contains information on availability of credit societies in the village. The information is represented separately by recording the number of Agricultural, non-Agricultural and other credit societies.

Column 12 give information on availability of Recreational & Cultural facilities such as Cinema / Video Hall, Sports Club, Stadium / Auditorium, in the village.

Column 13 gives information as to whether the village is served by any mode of public transport like bus, rail and water-ways.

Column 14 refers to the state of roads etc. leading to the village, this is useful in determining as to whether the village is approachable both in fair and foul weather, and whether it is inaccessible only for some time in the year.

Column 15 gives the information about the nearest town and its distance in kilometers in bracket from the referent village. In case the nearest town is located in another state, the name of the state has also been furnished.

Column 16 relates to the availability of power supply in the village.

In case the power supply is released only for specific purpose, say agriculture or other it has been stated accordingly. In case the electricity is not available to the village, a dash (-) has been mentioned in the column.

Column 17 is regarding receipt of News Paper / Magazine in the village.

Column 18 has information regarding the name of the most important commodity, manufactured in the village.

Columns 19 to 23 give the details about land utilization. The land use pattern given in the Village Directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India.

Column 19 includes all lands classed as forests under any legal enactment dealing with forests or administered as forests, whether State-owned or private, and whether wooded or maintained as potential forest land. The area of crops raised in the forest and grazing lands or areas open for grazing within the forests has been included under the forest area.

Column 20 indicates extent of irrigated lands under various types of irrigation.

Column 21 cover all agricultural lands including the net area sown with crops and orchards or net cropped area and also current and other fallow lands, the latter would imply all lands which were taken up for cultivation, but are temporarily out of cultivation for a period of not less than one year and not more than five years. The columns does not include gross year sown or gross cropped area. Net area sown thus represents the area sown with crops and orchards. Area sown more than once in the same year has been counted only once.

Column 22 gives information on cultivable wastelands and includes all lands available for cultivation whether not taken up for cultivation once but not cultivated during the preceding five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles, which are not put to any use. These may be assessed or unassessed and may be in isolated blocks within cultivated holding. Lands under thatching grasses, bamboo, bushes and other groves for fuel etc., which are not included under orchards or forests are included in this category. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

Column 23 includes the land not available for cultivation such as barren, unculturable land and put to non-agricultural use. All lands occupied by buildings, roads, railways, rivers, canals, etc. form part of the land under non-agricultural uses. Barren and unculturable lands include mountains, rocks, deserts etc., which cannot be brought under cultivation, except at a very high cost.

Column 24 and 25 are once again the name of the villages and serial numbers respectively for the readers convinience.

Town Directory :

The town directory is presented for each town covering different aspects of urban life through a set of seven statements from I to VII. The data contained in these statements are about the identification particulars of town, the area, number of households (including houseless households), population and growth rate in 2001 and past censuses, density, sex ratio, physical aspects and location of towns, communications, municipal finances, civic and other amenities, medical, educational, recreational, cultural facilities, trade, commerce, industry, banking, and civic and other amenities in slums. It covers all the towns in the district statutorily notified as well as non-municipal towns (Census Towns). All the towns in the district are arranged in ascending order of location code number.

The data collected in these statements have largely been furnished by the municipal bodies. In case of non municipal towns (Census Towns) the Block level office supplied the information.

Statement I shows status and growth history of the towns in the district. Column 2 in this statement indicates class, name and civic administration status of town (as in 2000). Class of the town indicated under this column has been introduced to factilities the analysis of town directory data at the state and the national level. Census towns have no urban civic status.

Size and Class of Towns :

Class	-	Size
I	-	100,000 and above
II	-	50,000 to 99,999
III	-	20,000 to 49,999
IV	-	10,000 to 19,999
V	-	5,000 to 9,999
VI	-	below 5,000

Column 3 is for representing eight digit permanent code number for each town in the district.

Coulmn 4 indicates the name of police station in which the town is located.

Column 5 is for recording the name of CD Block if the town is located in it.

Column 6 gives area (in sq. kms.) of the town.

Column 7 gives information about number of households including houseless households.

Columns 8 to 18 gives population and growth rate of the town since the Censuses of 1901, which would help in drawing the trends in their growth rate.

Column 19 present density in 2001 Census and 20 to 22 represent the sex ratio.

Statement II shows physical aspects and location of towns. In physical aspects only the rainfall, maximum and minimum temperature data as obtained from the Director General of Meteorological Survey of India have been shown. Towns for which information could not be obtained from Meteorological Survey of India, the same has been collected locally or calculated in relation to the nearest town, to the extent possible. Columns 6 to 12 have been filled up on the basis of information received from the respective district authority. Distances respectively from the state, district and tahsil/CD Block headquarters as well as the nearest city (urban area with a population of 100,000+) would help in determining the location of a town. Communication facilities are shown mentioning railway station, bus route and navigable river/canal.

Statement III deals with municipal finance for the statutory and also non-statutory town bodies managing civic administration of the town provided they have separate budgets and accounts of their own.

Statement IV Scheduled Castes/Scheduled Tribes population figure given in columns 4 and 5 would help in measuring amenities in respect of population size of the weaker sections in the towns. The information on road length within the town shown under column 6 has been obtained from Municipality (except for the highways).

Columns 7 to 12 reflects the information on system of sewerage number of latrines and method of disposal of night soil.

Columns 13 and 14 indicate sources and system of storage with capacity of protected water supply to the inhabitants of the towns.

Column 15 gives information regarding availability of fire fighting services. In case, it is not available in the referent towns, the name of the nearest place where it is available has been mentioned and the distance from the town has also been indicated within brackets. Columns 16 to 20 pertain to the number of connection of electricity supply available for domestic, industrial, commercial, road lighting (points) and for any other purposes.

Statement V gives information regarding amenities like medical, educational, recreational and cultural facilities available in the town. 2001 population figures for each town have also been indicated and this will facilitate in analyzing data on facilities available to the people.

Data related to medical facilities have been obtained from the concerned district authority and shown under columns 4 and 5. All types of medical institutions whether allopathic, ayurvedic, unani or homoeopathic have been covered.

If the medical institution is Ayurvedic, Unani or Homoeopathic the same is indicated in bracket by recording the number of institutions.

In case, more than one institution of any type is available, the exact number is shown within the brackets.

The information on educational facilities are depicted in column 6 to 14.

Column 10 pertains to the number of recognized shorthand, typewriting and vocational training institutes (grouped as others) which include Applied Art / Painting college, Pharmacy college, B.Ed. college, Teacher's training institute, Music / Dancing, Nursing school, etc.

Column 15 shows the information in respect of Adult Literacy classes / Centres etc. Similarly in view of the spurt in the employment of women in towns, information on number of working women's hostels and seats available therein has been given under column 16. This data would help in formulating plans for opening new hostels in order to meet the problems of the single working women.

Columns 17 to 20 show recreational and cultural facilities available in the town. These include stadia , cinema, auditoria / drama / community halls, public libraries indicated as 'PL' and reading rooms indicated as 'RR'.

Statement VI presents information in respect of Trade, Commerce, Industry and Banking services in the town. Columns 3, 4 and 5 contain information about the three most important comodities exported out from the town, column number 6, 7 and 8 in the other hand bears information about the three most important commodities manufactured in the town. Column number 9, 10 and 11 show the number of agricultural and non-agricultural credit societies in the town.

Statement VII provides data in respect of civic and other amenities in the slums.

PEOPLE ORIENTED

Abbreviation used in Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows :

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz. <5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the

abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Sorce	SS-

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities :

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial & Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given :

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational & Cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets :

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows :

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is

लोकोन्मुख PEOPLE ORIENTED

indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell(with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.
Appendix-I-A	Indicates number of villages CD Block wise having one or more primary schools.
Appendix-I-B	Indicates number of villages CD Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages CD Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VII A & VII B	The appendix shows the list of villages according to proportion of the Scheduled castes and Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates CD Block wise number of villages under each Gram Panchayat.

Abbreviation used in Town Directory

Town Directory Statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/ Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 - 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface

are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom.

Column 6 to 9 :

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B.Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 : Higher Secondary/Intermediate/ Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 : Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

Brief Note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preli-minary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institu-tional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication table provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks :

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under :

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows :

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

Out of 14 CD Blocks of Haora district, the CD Block Domjur has the highest number of Gram Panchayats (18) whereas, CD Block Amta-I has the highest number of villages (78+4 part villages). The second position in terms of number of Gram Panchayat is occupied by Sankrail CD Block (16) whereas Shaympur-II CD Block occupies the second position in terms of number of villages (76).

Annexure

Annexure - II : Fertility and Mortality, 1991 Census

Fertility :

In 'demography' the science of population statistics Fertility is one of the main components of population change whereas others are 'Mortality' and Migration. Fertility deals with actual reproductive performances in a given community at a given period of time.

It has been customary in censuses to collect, compile and analyse the fertility data. In 1991 and 2001 Census, four questions relating to fertility were asked. These are age at marriage, number of children surviving at the time of questioning with their sex and number of children born alive by sex to all ever married woman only. Also, the question "Number of children born alive during last one year" was asked from the currently married women only. Different fertility ratios which are discussed here are based on mainly the answer of the question "Number of children born alive during last one year".

The very common indicator of fertility is Crude Birth Rate (CBR) which denotes the number of live births per 1,000 population. Other common fertility idicators are Age Specfic Fertility Rate (ASFR), General Fertility Rate (GFR), Total Fertility Rate (TFR), Age Specific Marital Fertility Rate (ASMFR), General Marital Fertility Rate (GMFR) and Total Marital Fertility Rate (TMFR). ASFR, GFR and TFR are calculated by taking total no. of women as denominator whereas for ASMFR, GMFR & TMFR are calculated by taking total number of currently married woman as denominator. The table below shows the fertility rate under different measures in the district as well as in the State.

Annexure

ANNEXURE – II (A)

AGE SPECIFIC MARITAL FERTILITY LEVELS - 1991 IN THE DISTRICT OF HAORA

Age Group	Haora	West Bengal
1	2	3
15-19	0.163	0.160
20-24	0.161	0.191
25-29	0.113	0.133
30-34	0.066	0.082
35-39	0.036	0.050
40-44	0.019	0.030
45-49	0.010	0.016

Source : Fertility Table - F Series 1991 Census

The fertility level in the district in all age groups except in the age group of 15-19 is lower as compared with State figures. The highest fertility level for the district is seen in the age group 15-19 and for the State it is in the age group of 20-24. The fertility differentials between the district and the State are highest in the age group of 20-24.

Annexure

ANNEXURE – II (B)
OTHER FERTILITY MEASURES IN THE DISTRICT OF HAORA, 1981-91

	Haora		West Bengal	
1	2	3	4	5
Fertility Measures	1981	1991	1981	1991
G.F.R	146	121	153	122
G.M.F.R	206	167	185	158
T.F.R	4.6	3.6	4.3	3.6
T.M.F.R	6.6	5.9	5.7	5.1
C.B.R	34.4	28.8	34.7	29.0
No. of children ever born per woman in the age group 45-49	-	4.3	-	4.6
Mean age at marriage	-	17.7	-	17.2
Child woman ratio	-	63.0	-	71.1

It is evident from Annexure - II(B) that in terms of fertility measure of G.F.R. and C.B.R. both for 1981 and 1991, the State has higher level than that of the district and in case of T.M.F.R. both for 1981 and 1991 and for T.F.R. in 1981 district has the higher level as compared to the State average. In 1991, T.F.R. is same both for the district and the State. Number of children ever born per woman in the age group 45-49 and child-woman ratio are higher in State than that of district. But the mean-age at marriage is higher in the district as compared to the State.

Annexure

Mortality

Apart from fertility and migration, mortality is also considered as the dynamics of population change in demography. In census, information on the questions on children ever born and children surviving is collected from all ever married women. From this, estimates of child mortality have been worked out by age of mother by using Brass technique. The table below shows the estimates of child mortality in 1991 in the district of Haora.

ANNEXURE – II (C)
ESTIMATE OF CHILD MORTALITY, 1981-91 IN THE DISTRICT OF HAORA

Mortality Level	Census Year	Haora			West Bengal		
		P	M	F	P	M	F
1	2	3	4	5	6	7	8
q_1	1981	56	55	57	95	103	57
	1991	45	46	45	62	75	51
q_2	1981	66	68	64	102	106	98
	1991	51	49	52	81	79	83
q_3	1981	75	77	74	111	113	110
	1991	66	61	59	86	86	85
q_5	1981	88	86	90	124	123	125
	1991	71	74	70	94	94	92

Source : Occassional Paper No. 1 of 1997

The estimates of child mortality by ages 1, 2, 3 and 5 have been shown in the table as q_1, q_2, q_3 and q_5. It is evident from the table that both male and female child mortality are higher in the State as compared to that of female in both the years 1981 and 1991 excepting female mortality in the age of 1 where it is same both for State and district. It is also observed from the table that the mortality rate is lower in 1991 for all the ages as compared to 1981.

Source : Occasional Papers No. 1 of 1997

It is observed from the above table that GFR, GMFR, TFR, TMFR and CBR for the State as a whole are 122, 158, 3.61, 5.13 and 29.01 respectively. Maldah occupies the first position in terms of GFR, TFR and CBR whereas in case of GMFR and TMFR South 24 Parganas is in the first position. Lowest position for GFR and CBR goes to Kolkata whereas the same position occupies by Hugli for GMFR, TFR and TMFR. Number of children ever borm per woman in age group 45-49 is maximum in Murshidabad with 5.72 which is much higher than the State average of 4.56 and the minimum number is observed in Kolkata. Child-woman ratio is highest in Murshidabad with 93.03 and Kolkata has the lowest with 37.22. State average mean age at marriage is 17.2. Mean age at marriage is maximum in Kolkata with 19.05 and Murshidabad with 16.49 is the minimum.

Annexure - IV

Percentage distribution of Migrants by place of birth, 2001 Census

Migration :

Migration is an important aspect in the analysis of population change as it affects the size, age and sex structure of the population. However, it can affect the population size at local level only. In most general sense, migration as ordinarily defined movement of people from one place to another place involving change of residence for some definite purpose. Migration may be categorized as internal and international migration. A person moves from his/ her place of birth last residence to a new place with some definite reason, it may be economic, social, political or for any other reason. The main source of information on migration of our country is collected through regular decennial census. In 2001 Census, data on migration were collected on different aspects, such as reason for migration from the place of previous residence, duration of stay since migration etc. Tables on migration by place of birth; interstate migration; rural and urban composition of internal migrants by place of birth in the district and in the State are given below :

Percentage distribution of Migrants by place of birth, 2001 Census

Migration is an important aspect in the analysis of population change as it affects the size, age and sex structure of the population. However, it can affect the population size at local level only. In most general sense, migration as ordinarily defined movement of people from one place to another place involving change of residence for some definite purpose. Migration may be categorized as internal and international migration. A person moves from his/her place of birth last residence to a new place with some definite reason, it may be economic, social, political or for any other reason. The main source of information on migration of our country is collected through regular decennial census. In 2001 Census, data on migration were collected on different aspects, such as reason for migration from the place of previous residence, duration of stay since migration etc. Tables on migration by place of birth; interstate migration; rural and urban composition of internal migrants by place of birth in the district and in the State are given below.

ANNEXURE – IV (A)
PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH, 2001 CENSUS

Place of Birth	West Bengal			Haora		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
A. Migrants born within the state of Enumeration	19,082,558 (77.4)	4,489,736 (60.0)	14,592,822 (84.9)	1,059,729 (79.4)	274,132 (61.0)	785,597 (88.8)
i) Migrants born elsewhere in the district of Enumeration	14,526,298 (58.9)	2,892,376 (38.7)	11,633,922 (67.7)	769,939 (57.7)	170,090 (37.8)	599,849 (67.8)
ii) Migrants born in other district of the State	4,556,260 (18.5)	1,597,360 (21.4)	2,958,900 (17.2)	289,790 (21.7)	104,042 (23.1)	185,748 (21.0)
B. Migrants born in other State of India	2,491,932 (10.1)	1,352,219 (18.1)	1,139,713 (6.6)	234,619 (17.6)	154,126 (34.3)	80,493 (9.1)
C. Migrants born in other countries	3,090,393 (12.5)	1,636,343 (21.9)	1,454,050 (8.5)	39,929 (3.0)	21,359 (4.8)	18,570 (2.1)
Total Migrants	**24,664,883 (100.0)**	**7,478,298 (100.0)**	**17,186,585 (100.0)**	**1,334,277 (100.0)**	**449,617 (100.0)**	**884,660 (100.0)**

It is observed from Annexure - IV(A) that out of 24,664,883 migrants in the State, 77.4 per cent were born within the State of enumeration. Among the total migrants 58.9 per cent migrants were born elsewhere in the district of enumeration, whereas 18.5 per cent were born in the district outside the district of enumeration. It is also observed from the State figures that out of the total migrants 10.1 per cent and 12.5 per cent migrants having place of birth in other states of India and in other countries respectively. In the district of Haora it is found that 79.4 per cent of the migrants had born within the State of enumeration. Among the total migrants 57.7 per cent had born within the district of enumeration whereas 21.7 per cent of them had born outside the district of enumeration. The female migrant population is greater than that of male migrant population in case of migrants born within the State of enumeration and migrants born elsewhere in the district of enumeration.

Annexure

ANNEXURE – IV (B)

INTERSTATE MIGRANTS TO WEST BENGAL AND DISTRICT, 2001 CENSUS

Place of Birth	Migrants			Percentage to total migrants		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
STATE - WEST BENGAL 19						
1. Bihar	1,160,593	708,591	452,002	46.6	52.4	39.7
2. Jharkhand	441,435	159,689	281,746	17.7	11.8	24.7
3. Uttar Pradesh	309,315	190,832	118,483	12.4	14.1	10.4
Total for three states	**1,911,343**	**1,059,112**	**852,231**	**76.7**	**78.3**	**74.8**
4. Other States	580,589	293,107	287,482	23.3	21.7	25.2
Total	**2,491,932**	**1,352,219**	**1,139,713**	**100.0**	**100.0**	**100.0**
DISTRICT - HAORA 16						
1. Bihar	117,236	80,530	36,706	50.0	52.2	45.6
2. Uttar Pradesh	52,818	35,283	17,535	22.5	22.9	21.8
3. Orissa	16,123	11,354	4,769	6.9	7.4	5.9
Total for three states	**186,177**	**127,167**	**59,010**	**79.4**	**82.5**	**73.3**
4. Other States	48,442	26,959	21,483	20.6	17.5	26.7
Total	**234,619**	**154,126**	**80,493**	**100.0**	**100.0**	**100.0**

Annexure - IV(B) on interstate migrants shows that during 2001 Census, out of total interstate migrants of the State 46.6 per cent migrants had place of birth in Bihar, 17.7 per cent in Jharkhand and 12.4 per cent in Uttar Pradesh whereas in case of district out of total migrants enumerated in the district of Haora 50.0 per cent had place of birth in Bihar, 22.5 per cent had in Uttar Pradesh and 6.9 per cent in Orissa.. This trend indicates that the major migration in case of interstate migrants had taken place from Bihar.

Annexure

ANNEXURE – IV (C)

RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH, 2001 CENSUS

Place of Birth	Place of Enumeration					
	West Bengal			Haora		
	Total	Rural	Urban	Total	Rural	Urban
1	3	4	5	6	7	8
1. Migrants born within the state of Enumeration	19,082,558 (100.0)	14,106,837 (73.9)	4,975,721 (26.1)	1,059,729 (100.0)	606,279 (57.2)	453,450 (42.8)
2. Migrants born in other State of India	2,491,932 (100.0)	678,906 (27.2)	1,813,026 (72.8)	234,619 (100.0)	8,486 (3.6)	226,133 (96.4)

Annexure - IV(C) presents composition of internal migrants by place of birth in 2001 census. Table shows that most of the migrants born within the state of enumeration are living in rural areas both in the district as well as in the State. The percentage of the said category of migrants living in rural areas is comparatively higher in the State (73.9 per cent) than the district (57.2 per cent). However, most of the migrants born in other states of India are living in urban areas both for the State and the district. Percentage of the aforesaid category of migrants living in urban areas are relatively higher in Haora (96.4 per cent) than West Bengal (72.8 per cent). The picture clearly shows that both in the district and in the State intra-state migrants are mostly living in rural areas while inter-state migrants are mostly urbanite people.

Annexure

ANNEXURE – IV (D)

PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF LAST RESIDENCE, 2001 CENSUS

It is seen from Annexure-IV(D) that in terms of total migrants in absolute figure, North 24 Parganas with 3,693,336 persons comes in first position followed by Medinipur with 2,709,165 persons and Barddhaman with 2,364,020 persons. In case of people born in West Bengal, 9 districts of the State overtake the State percentage of 77.4. So far people born in other states are concerned, 8 districts overtake the State average of 10.1 per cent and regarding people born in other district of West Bengal, only 6 districts overtake the State average of 18.5 per cent. The percentage of people born elsewhere in the district of enumeration varies between the maximum of 87.5 in Medinipur and the minimum of 38.7 in North 24 Parganas district. Similarly, the percentage of people born in other countries varies between the maximum of 33.9 in Nadia and the minimum of 0.2 in Puruliya district.

ANNEXURE - V

BRIEF ACCOUNT OF MAIN RELIGIONS IN THE STATE AND DISTRICT, 2001 CENSUS

Religious communities	Total	Rural	Urban	Per cent to all religions	Percent to total	
					Rural	Urban
1	2	3	4	5	6	7
WEST BENGAL-19						
All Religions	80,176,197	57,748,946	22,427,251	100.0	72.0	28.0
Hindus	58,104,835	39,406,984	18,697,851	72.5	67.8	32.2
Muslims	20,240,543	16,845,034	3,395,509	25.2	83.2	16.8
Christians	515,150	393,358	121,792	0.6	76.4	23.6
Sikhs	66,391	10,758	55,633	0.1	16.2	83.8
Buddhists	243,364	171,455	71,909	0.3	70.5	29.5
Jains	55,223	9,354	45,869	0.1	16.9	83.1
Others	895,796	875,354	20,442	1.1	97.7	2.3
Religion not stated	54,895	36,649	18,246	0.1	66.8	33.2
HAORA-16						
All Religions	4,273,099	2,121,109	2,151,990	100.0	49.6	50.4
Hindus	3,204,077	1,568,706	1,635,371	75.0	49.0	51.0
Muslims	1,044,383	549,687	494,696	24.4	52.6	47.4
Christians	6,284	675	5,609	0.1	10.7	89.3
Sikhs	3,779	193	3,586	0.1	5.1	94.9
Buddhists	1,085	143	942	0.0	13.2	86.8
Jains	9,585	11	9,574	0.2	0.1	99.9
Others	1,299	216	1,083	0.0	16.6	83.4
Religion not stated	2,607	1,478	1,129	0.1	56.7	43.3

It is observed that in the district of Haora, the Hindus occupy the first place with 75.0 per cent of the total population in the district being followed by the Muslims with 24.4 per cent indicating that they are the two main religions of the district. Among the Hindus 49.0 per cent and among the Muslims 52.6 per cent resided in rural areas. Rests of the religions are pursued by very small or insignificant number of people. The profile is almost akin to in the state of West Bengal as a whole where 72.5 per cent of the population are Hindus and 25.2 per cent of the population are Muslims. These two religions are followed by most of the people of West Bengal.

Annexure - IV

Percentage distribution of Migrants by place of birth, 2001 Census

Migration :

Migration is an important aspect in the analysis of population change as it affects the size, age and sex structure of the population. However, it can affect the population size at local level only. In most general sense, migration as ordinarily defined movement of people from one place to another place involving change of residence for some definite purpose. Migration may be categorized as internal and international migration. A person moves from his/ her place of birth last residence to a new place with some definite reason, it may be economic, social, political or for any other reason. The main source of information on migration of our country is collected through regular decennial census. In 2001 Census, data on migration were collected on different aspects, such as reason for migration from the place of previous residence, duration of stay since migration etc. Tables on migration by place of birth; interstate migration; rural and urban composition of internal migrants by place of birth in the district and in the State are given below :

Annexure

Annexure - VI

Marital Status of Population as per 2001 Census

Information on Sex and Marital status of persons, particularly marital status of women population is very much important for measuring various fertility rates by age group. A table classified by marital status and broad age group of population as per 2001 census is shown below.

ANNEXURE – VI (A)
PERCENTAGE DISTRIBUTION OF POPULATION CLASSIFIED BY MARITAL STATUS, BROAD AGE GROUP AND SEX, 1991-2001 CENSUS

			Marital Status							
			Never married		Married		Widowed		Divorced or Separated	
Year	Age	Total	Males	Females	Males	Females	Males	Females	Males	Females
1	2	3	4	5	6	7	8	9	10	11
1991	0-14	100.0	99.8	99.3	0.2	0.6	0.0	0.1	0.0	0.0
	15-34	100.0	57.2	26.4	42.4	71.3	0.2	1.2	0.2	1.0
	35-54	100.0	4.0	2.1	94.5	85.2	1.2	11.3	0.4	1.4
	55+	100.0	3.2	1.8	88.1	45.4	8.2	52.1	0.4	0.7
	All Ages	100.0	53.9	43.4	44.7	47.7	1.1	8.2	0.2	0.7
2001	0-14	100.0	99.7	99.4	0.2	0.5	0.0	0.1	0.0	0.0
	15-34	100.0	63.8	34.3	35.9	64.0	0.1	1.0	0.2	0.7
	35-54	100.0	5.6	2.6	93.1	86.0	1.0	10.4	0.4	1.1
	55+	100.0	4.3	2.0	88.7	45.4	6.7	52.1	0.3	0.5
	All Ages	100.0	53.9	43.9	44.9	47.2	1.0	8.3	0.2	0.6

No significant changes did occur in the percentage in all round marital status of 0-14 age group in 2001. In the age group of 15-34, percentage of both married males and females has largely decreased (from 42.4 per cent to 35.9 per cent for males and 71.3 per cent to 64.0 per cent for females) in 2001. No major significant changes did occur in the percentage of married males and females in 35-54 and 55+ age group in 2001 in comparison to 1991.

It is observed that 49.2 per cent of the total population of Haora district belong to never married status in 2001. Out of the total never married, 37.1 per cent belong to 0-9 age group, 23.1 per cent belong to 10-14 age group, 18.6 per cent belong to 15-19 age group and 11.0 per cent belong to 20-24 age group thereby making a total of 89.8 per cent never married belong to 4 consecutive age groups from 0-9 to 20-24. The highest numbers of married female are found in 25-29 age group and married male are found in 35-39 age group. In widowed status, numbers of widows are always much higher than the widower. In most of the age groups, the number of divorced or separated females is also higher than the number of males.

It is seen that in none of the levels of literacy of Haora district the females have been able to catch up the males in number in any age group in 2001. The number of females is also higher in all the age groups of illiterate category except 0-6 age group. Highest illiteracy observed in 45+ age group (35.1 per cent) and lowest illiteracy in 11-14 age group (12.3 per cent). Out of total population of the district 77.0 per cent are literate, 0-6 age group excluded. Number of literates without any formal schooling including education level of Haora district for male is 21,464 and for female it is 16,067. The highest percentage of literacy is observed in below primary level (23.7 per cent) and lowest percentage of literacy is observed in non-technical diploma or certificate not equal to degree which is very negligible. Further, graduate & above is found to be only 7.3 per cent of the total literate population.

Annexure

ANNEXURE - VIII

Distribution of different mother tongues in the district, 2001 Census

Language is an important characteristic of a population particularly in a multi-lingual and multi-cultural society like India. The language census literature that has grown over the last one hundred years of Indian census history has shed light on the linguistic composition of our country. The table below shows the population by mother tongue of the district since 1961. It is to be noted that mother tongues shown in 1971 Census are mother tongues inclusive of language grouped under each. Data shown in 1981 Census is the language mainly spoken in the households.

It is observed from Annexure – VIII that Bengali is the mother tongue of more than 84.0 per cent of the total population of Haora in all the censuses from 1961 to 2001 and mother tongue of second major population is Hindi (10.5 per cent in 2001) and for the same third position is occupied by Urdu (3.2 per cent in 2001). It is interesting to note that population with Hindi as mother tongue has been increased from 8.9 per cent in 1961 to 10.5 per cent in 2001.

Annexure

ANNEXURE - IX : Scheduled Castes and Scheduled Tribes population - Size and Growth

The collection of population statistics on the Scheduled Castes and the Scheduled Tribes as per the state Scheduled Castes and Scheduled Tribes lists in the state is one of the most important aspects of decadal census in post independence period. These information are required for the purpose of delimitation of the Assembly and Parliamentary constituencies in the State. The planning for development of these communities is mostly considered on the information of population size and its growth rate, sex-ratio, literacy rate, economic activities etc. Census is the only source which provides data for Scheduled Castes and Scheduled Tribes on various aspects of their life at the micro level.

In 1991 Census, the district registered a total Scheduled Castes population of 588,907 which comprises 304,375 males and 284,532 females accounting for 15.8 per cent of the total population of the district. Out of this total Scheduled Castes population 70.5 per cent was in rural and other 29.5 per cent in urban areas of the district. The five major Scheduled Castes in order of population size were the (1) Bagdi (203,232) (2) Pod (74,538) (3) Rajbanshi (58,900) (4) Namasudra (51,691) and (5) Kaora (38,249).

The literacy rate among the Scheduled Castes was 44.9 per cent (56.0 per cent for males and 32.9 per cent for females) as against general literacy rate of 67.6 per cent in the district.

So far as the work participation rate is concerned, the district has registered 28.4 per cent with the breakup of 50.6 per cent males and 4.7 per cent females, corresponding to 28.6 per cent (51.1 per cent males and 3.0 per cent females) in case of general population. The Scheduled Castes in the district were mainly working as agricultural labourer accounting for 35.7 per cent of the total Scheduled Castes main workers of the district with female proportion of 23.0 per cent.

Likewise, the district had registered 10,090 total Scheduled Tribes population comprising 5,398 males and 4,692 females accounting for 0.3 per cent of the total population of the district. Out of them 40.9 per cent Scheduled Tribes population were in rural areas and remaining 59.1 per cent were distributed scatteredly in urban areas of the district. The five major Scheduled Tribe communities in the order of numerical strength were the (1) Santal (3,968) (2) Oraon (1,868) (3) Munda (1,464) (4) Bhumij (815) and (5) Saran (420).

The literacy rate among the Scheduled Tribes was 42.4 per cent recording a breakup of 51.0 per cent among males and 32.0 per cent among females as against the general literacy rate of 67.6 per cent in the district.

In view of work participation practice among Scheduled Tribes in the district, they registered 27.7 per cent with the break up of 50.2 per cent males and 3.6 per cent females, corresponding to 28.6 per cent (51.1 per cent males and 3.0 per cent for females) in case of general population. The Scheduled Tribe population in the district were mainly working in the category of manufacturing, processing, servicing and repairing (i.e.other than household industry) accounting 38.5 per cent of the total Scheduled Tribes main workers of the district with female proportion being 42.5 per cent.

As per 2001 Census, Haora district has 658,707 Scheduled Castes population comprising of 335,761 males and 322,946 females accounting for 15.4 per cent of the total population of the district. Among the Scheduled Castes of the district, the first five major communities in order of population size are the (1) Bagdi/ Duley with 235,448 persons (35.7 per cent) (2) Pod/Poundra with 84,323 persons (12.8 per cent) (3) Rajbanshi with 62,782 persons (9.5 per cent) (4) Namasudra with 58,253 persons (8.8 per cent) and (5) Kaora with 45,074 persons (6.8 per cent). These five communities constitute 73.6 per cent of the total Scheduled Castes population of the district.

Further, the district has also recorded 19,168 Scheduled Tribe population comprising of 9,959 males and 9,209 females in 2001 Census acounting for 0.4 per cent of the total district population. Among these, the first five major Scheduled Tribes in order of population size are the (1) Santal with 5,765 persons (30.1 per cent) (2) Munda with 2,690 persons (14.0 per cent) (3) Kora with 2,393 persons (12.5 per cent), (4) Oraon with 2,276

persons (11.9 per cent) and (5) Bhumij with 658 persons (3.4 per cent). These five communities constitute 71.9 per cent of the total Scheduled Tribe population of the district.

The distribution of rural and urban Scheduled Castes / Tribes population for Haora district since 1961 can be observed in the following table :

ANNEXURE - IX

SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN THE DISTRICT OF HAORA (1961-2001)

Total/ Rural/	1961		1971		1981		1991		2001	
Urban	SC	ST	SC	ST	SC	ST	SC	ST	SC	ST
1	2	3	4	5	6	7	8	9	10	11
Total	299,791	6,111	297,571	3,364	452,322	7,280	588,907	10,090	658,707	19,168
			(-0.7)	(-45.0)	(52.0)	(116.4)	(30.2)	(38.6)	(11.9)	(90.0)
Rural	235,485	3,909	253,270	1,938	344,429	3,313	415,172	4,124	465,837	8,543
			(7.6)	(-50.4)	(36.0)	(70.9)	(20.5)	(24.5)	(12.2)	(107.2)
Urban	64,306	2,202	44,301	1,426	107,893	3,967	173,735	5,966	192,870	10,625
			(-31.1)	(-35.2)	(143.6)	(178.2)	(61.0)	(50.4)	(11.0)	(78.1)

Note : Figures within brackets indicate decennial growth rate

It can be seen from the above table that there was been declining trend of growth rate of Scheduled Castes population from 1981 to 2001. The growth rate observed during 1961-71 was (-) 0.7 per cent which increased to 52.0 per cent during 1971-81 and decreased to 11.9 per cent during 1991-2001. Rural growth rate of Scheduled Castes population followed an overall gradual decreasing trend upto 2001 after 1981. Urban growth rate of Scheduled Castes population during 1961-71 was (-) 31.1 per cent which increased to 143.6 per cent during 1971-81 and then decreased to 61.0 per cent in 1981-91 and finally decreased to 11.0 per cent during 1991-2001.

In case of Scheduled Tribes population it is observed that the growth rate has decreased to (-) 45.0 per cent during 1961-71 and then increased to 116.4 per cent during 1971-81. After that it has decreased to 38.6 per cent in 1981-91 and then increased to 90.0 per cent during 1991-2001. The same trend of growth rate is observed in the Scheduled Tribe population for both rural and urban areas. For rural areas, negative growth rate (-50.4 per cent) is observed in 1961-71, then it has increased to 70.9 per cent in 1971-81 which has declined to 24.5 per cent during 1981-91 and again increased to 107.2 per cent during 1991-2001. In urban areas also negative growth rate of -35.2 per cent is observed during 1961-71, after that it has increased to 178.2 per cent during 1971-81, but declined to 50.4 per cent during 1981-91 and again increased to 78.1 per cent during 1991-2001.

ABOUT THE SAMPLE REGISTRATION SYSTEM (SRS) IN WEST BENGAL :

The Sample Registration System (SRS) is a large scale demographic sample survey for providing reliable annual estimates of birth rate, death rate and other fertility and mortality indicators at the national and sub-national levels. The field investigation consists of continuous enumeration of births and deaths by a resident part time enumerator and an independent half yearly survey by supervisor. The data obtained through these operations are matched. The unmatched and partially matched events are re-verified in the field and thereafter an unduplicated count of births and deaths is obtained. The SRS was initiated by the Office

of the Registrar General and Census Commissioner, India on a pilot basis in a few selected states in 1964-65 and it became fully operational during 1969-70 with about 3,700 sample units in India. Thereafter the number of sample units was periodically increased. After completion of 1991 Census these units were replaced during 1993-94 with 6,671 sample units (4,436 rural and 2,235 urban blocks) in all states and union territories. For West Bengal state total number of sample units were 475 (300 rural and 175 urban) after 1991 census. The sample unit in rural areas is a village or a segment of it if the village had a population of 2,000 or more. In urban areas the sampling unit is a census enumeration block with a population of 600 or 120 households. At present SRS is operational in 7,597 sample units (4,433 rural and 3,164 urban) spread across all States and Union territories and covers about 1.3 million households and 6.93 million population based on 2001 Census frame and these were effective from January 2004. In the state of West Bengal SRS is covering about 5.7 lakh population through 555 (310 rural and 245 urban) sample units which is highest among all states and UTs.
