THE PALACE AT KOCH BIHAR TOWN

Koch Bihar district from 1510 AD to 1949 AD was ruled by the famous Koch Dynasty. During British rule it was a Princely State. Amongst the immense archaeological monuments of Koch Bihar, the palace at Koch Bihar town with its beautiful architecture pulls us to the kingdom of a feudatory ruler also of British Government. The palace with huge surrounding garden area and its beautiful lighting system attract tourists of different parts of the country and is being admired by the tourists.

Major charecteristics of the district

Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district

The people of Koch Bihar are generally peace-loving. The district being pre-eminently agricultural, the relevant traits of a peasant can be found present in them. Koch Bihar was a princely State until the Government of India took it over by the Merger Agreement on 12th September 1949. The Kings of Koch Bihar in their times customarily patronized learning and letters. However the centres of learning in the beginning were confined to the Royal Court and its surroundings and they were Sanskrit-centric. The members of the royal family were also taught Persian for State purposes. Imparting of modern and western education to royal family as well as the people begun in the state from the time of Maharaja Narendranarayan (1847-1863). In 1857 a vernacular school was started in Koch Bihar and for imparting English education Jenkins School, which was established in honour of Col. Jenkins and at the request of Colonnel himself, started in 1861.

The modern Koch Bihar district can boast of the great Novelist Amiya Bhusan Mazumder who hailed from this district. He gave a new dimension to the regional novels and is considered as a master in this field. '*Mahiskurar Upakatha*' is his pioneering work.

Major Social and Cultural events, natural and administrative developments and significant activities during the decade

This district can boast of having a very rich heritage of folk culture. Folk song, folk play and folk craft abound in the district. The folk song of Koch Bihar is a bit different from the other districts of the state. The 'Bhaoiya' song of Koch Bihar is very famous and have occupied an important place in the colourful folk culture of Bengal. Besides 'Bhaoiya' there are a number of folk cultural plays in the form of 'Dotara' 'Kushan' 'Bhandi' and 'Chandi Dance' which are quite different in character from the other part of the state of West Bengal. The 'Bairati Dance', which is usually performed to receive the guests, is excellent.

Festivals

State level common :

In all the districts of the state certain religious festivals are observed in such a huge magnitude that the impact is cross-cultural involving the overall market economy. Those are :

1. Durga Puja is the most popular annual festival of the Hindus held both at community level and at clan or household level. The four day festival relate to worshiping of the mother god 'Durga' and symbolising the victory of good over evil is held in the month of *Ashwin* (Bengali calender) or September-October. In folk culture this festival also represents the home coming of Mother Durga (Parbati) - wife of Lord Shiva along with her two sons and two daughters to visit her paternal home from their snowy abode of the Himalayas. This festival therefore also represents a family reunion of members staying at distant places.
2. In north India 'Deepavali' or the festival of lights is celebrated to commemorate the home coming of Lord Rama to Ayodha after fourteen years of punishment as per the epic Ramayana. But in Bengal Kalipuja or Diwali is related to worshiping goddess 'Kali' or 'Shakti' (the power) as another expression of mother cult. This one day event is held on the new moon less night following Durga Puja in the month of *Kartik* (mid-Oct to mid-Nov). Decoration with lights is a part of the observation adding a flavour of the famous national festivity called the 'Festival of light or Deepawali'.
3. Dol Jatra or Holi is the festival of colours. In fact the colours of the spring time nature is celebrated with much grandeur for expressing the feeling of love and friendship as symbolized by the holy conjugation of Lord Krishna and Radha.
4. Rathajatra or the car festival of Krishna, Balaram and Subhadra is held during *Ashadh* (mid-June to mid-July).
5. Id ul Fitr is the most popular religious festival of the Muhammedan population in the state. This is observed with a mass prayer (Namaz) and joyful get together after the month-long fasting during 'Ramzan'.
6. The next important festival of the Muhammedans, Idu'z Zuha or the festival of sacrifice, is also celebrated with mass prayers and exchange of gifts and sweet meat etc. with a spirit of brotherhood.
7. Muharram is another popular festival of the Muhameddans held on the thirtieth day after Idu'z Zuha to mourn the death of Hassan and Hussain - two grandsons of the Prophet Muhammed in the battlwe of Karbala. Tajiyas are built and taken in a procession symbolizing the memorial tombs of those two martyrs.
8. The Christmas day on 25th December and Good Friday in April are the two most important religious festivals of the Christian community. 'Christmas day', in particular, is observed with prayers in the church to commemorate the birth of Jesus Christ and the festivity continues till 1st January - the new calender year. The day of Christ's crucifixion is the day to pray again on Good Friday.
9. The Sikhs celebrate their most important religious festival on the occasion of Guru Nanak's birth day, the founder of the Sikhism.
10. The full moon day of May is observed as Buddha Purnima by the followers of Buddhism in different pockets of the State. This is the biggest festival for Buddhists to mark the occasion of the birth of Lord Buddha.
11. The followers of Jainism observe Mahabir Jayanti which is the birthday of Lord Mahabir in the month of April.

District specific :

By far the largest group in the Koch Bihar district is the Rajbanshis, Today they are scheduled castes but actually they are a Hinduized tribe, the origin of which is, by all accounts, far from clear. The usual lines of investigation, i.e., the language and the anthropometric measurements none lead to any conclusive result. Their language is pure Bengali which is morphologically not different and they are speaking in this language since 12th/13th century. And so far the authropometric and anthropological investigations are concerned, while according to Mr. Buchanan-Hamilton the Rajbanshis were Koch and were aborigines of Kamrup, and different from the Garos, Meches and Rabhas, according to W. W. Hunter they were Koches and connected to the neighbouring tribes of Meches and Kacharis and were of trans-Himalayan extraction.On this point Dalton differs from Hunter, as, according to him the Meches, who are yellow, are the Mongolians of Indo-Chinese stock and the Koches being black are the Dravidians and so on. From all these divergent views it is safe to conclude that the Koches or Rajbanshis are a mixed people out of a Dravidian stock with marked admixture of Mongoloid blood.

It is already stated that they are a Hinduized tribe since long. Even Yuan Chwang in 7th century found that the religion followed by the local people was Brahmanic. At the present time the Rajbanshis claim themselves to be Kshatriyas in the caste hierachy of the Hindu fold. Today their chief god is Mahakal whom they worship as Mahadev. Originally the god Mahakal is the Mahakal mountain worshipped, feared and adored by almost all the hill people north of Koch Bihar and submontane people including the Bhutias. The synthesis of two gods ie., Mahakal and Mahadeb was made by the Koches or the Rajbanshis after they were Hinduized. Other Hindu gods are also there but the approach of worshipping sometimes differ from the regular form of Hindu approach.

Hari or Vishnu is worshipped in the month of *Baisakh* to *Bhadra* hoping for rains for the crop. *Manasa* better known as *Bishahari* is worshipped not as a snake-goddess but as a goddess to bring wealth and prosperity. She is worshipped in the month of *Baisakh* and *Bhadra*. Balaram is worshipped as the presiding god of agriculture. Chandi is worshipped as protector against Cholera and Kali as the goddess who can ward off all ills. Both these goddess are considered malevolent and require to be appeased.

"Madankam is another popular god. The rites of the worship of this god is reminiscent of a spring festival and fertility rites. From the fourteenth day of the bright fortnight of the month of *Chaitra* this god is worshipped for three days. Large straight bamboos decorated with alternate rings of white and red cloth and surmounted by a *chamar* (Yak's tail) are erected in the courtyard and *pujas* are offered to these. Great rejoicings prevail. Singing of lewd songs was part of the rite. These are now generally going out of use, but the merry-making remains. On the fourth day, the bamboos are taken off, their decorations are removed and they are thrown into rivers." (Quoted from West Bengal District Gazetteers Koch Bihar, February, 1971 edition, page 52-53).

Hindus of the Koch Bihar district are divided into two main sects __ Vaishnavas and Saktas. But the Vaishnavism in this part is more connected to Sankardev of Assam than to Sri Chaitanya. Sankardev was a contemporary of Sri Chaitanya and he was influenced to certain extent by the teachings of Sri Chaitanya. It was he who started *namgan* or singing of the name of Hari in the territory of the Ahom King of Assam. There are two sects of Vaishnavas of the district, the Sankarpanthi and the Damodarpanthi. Damodar is said to have been a disciple of Sankardev. But while Sankardev himself preached the Bhakti cult, Damodar preached the sastric ritualistic worship of Vishnu. The disciples of Sankardev are called Bhaktas and those of Domodar are called Madhis. The Madhis are mostly Brahmans. There is another undefined class of Vaishnavas known as *Bairagis*.

"There exists a priesthood who have their clientle mostly among the saktas. These are called *bhawariyas*. They are more sooth-sayers than priests and are generally consulted for warding off disease or other calamities in order to obtain prophecies from the gods. When consulted they repair to a *pat* or raised mound and there shake their head, as if in a trance to the accompaniment of drum. Soon a revealation or directive is obtained form the god thought to have been angered. The angry god is then propitiated by a puja with some profit for the *bhawariya*." (Quoted from West Bengal District Gazetteers-Koch Bihar, February, 1977 edition., Page 55)

Fairs : Details of some fairs on the basis of maximum congregation (10,000 and above) and longest duration (30 days and above) as per West Bengal District Gazetteers, Koch Bihar, 1977 are given below. The villages and police stations shown here correspond to the set up existing at the time of publication of the Gazetteers 1977 edition.

Maximum assemblage recorded was 50,000 and found in Cooh Behar Town (Koch Bihar PS) on the occasion of 'Rasyatra' in the month of *Kartik* (mid October to mid November). Next came assemblage of 30,000 found in Siddeswari and Baneswar Village (both Koch Bihar PS) on the occasion of 'Maghi Purnima as well as 'Gangapuja' and 'Sivaratri' respectively in the month of *Phalgun* (mid February to mid March). An assemblage of 25,000 was found in Rampur village (Tufanganj PS) on the occasion of 'Dolyatra' in the month of *Phalgun* (mid February to mid March). In Dinhata (Dinhata PS) recorded approximate attendance was 15,000-20,000 on the occasion of 'Baruni Snan' or 'Sakhir Mela' in the month of *Chaitra* (mid March to April) and in Chaora Hat (Dinhata PS) recorded approximate attendance was 10,000-12,000 on the occasion of 'Sankrantir Mela' in the month of *Paus* (mid December to mid January).

An approximate attendance of 10,000 was recorded in the following villages on the respective occasions in the respective months.

Police Station	Place	Time (Bengali month with corresponding English month)	Occasion
Koch Bihar	Khagrabari	Chaitra (May-April)	Baruni Srnan
	Cooch Behar Town	Aswin (Sep-Oct)	Durga puja
Matha-bhanga	Matha-bhanga Town	Chaitra (Mar-Apr)	Sivaratri
	Bherbheri Manabari	Baisakh (April-May)	Golok-nather Mela
Haldibari	Haldibari	Phalgun (Feb-Mar)	Pirer Utsav
	Andaran Khasbas Bakshiganj	Magh-Phalgun (Jan-Mar)	Death anniversary of a Muslim

The fair recording longest duration was in Chaora Hat (Dinhata PS) which used to continue for long 2 months on the occasion of Paus Sankranti. Next came the fair in Simulbari (Dinhata PS) which used to continue for 1 month on the occasion of Sannyasi Thakurer Mela in the month of *Magh-Phalgun* (mid January to mid March).

Calendar of Events

Calendar for Census 2001 upto Houselisting Operation :

December, 1999

(i) Issue of all appointments of Charge Officers, Zonal Sub-Charge Officers and Charge Assistants etc., by the Principal Census Officer.

(ii) State level meeting with all Principal Census Officers to brief them on the different steps to be taken for conduct of Census-2001 to be convened by the Chief Secretary to the Government of West Bengal.

(iii) Meeting to be convened by all the Principal Census Officers at their respective H. Qtrs. to train all the Charge Officers and Sub-Charge Officers and Charge Assistants. The meetings to be attended by Director /Joint Director of Census Operations, West Bengal.

(iv) Principal Census Officers to write to all School Authorities, Govt. Offices, Semi Govt. Offices, local bodies etc., for sending list of officials for appointment as Enumerators and Supervisors.

(v) Collection and compilation of data for Village and Town Directory.

January, 2000

(i) Survey work for preparation of notional maps and layout sketches for formation of House listing Blocks on the basis of 1991 Enumeration Blocks.

(ii) Formation of House listing Blocks on the basis of Survey and Guideline No. 1.

(iii) Collection of list of School Teachers, Govt. Officials etc. from all respective authorities for appointment as Enumerators and Supervisors.

(iv) Preparation of Village Registers at all the Block Charge levels on the basis of data collected on Village Directory.

(v) Regular visit and liaison by the officials of Directorate of Census Operations to the different charges to impart spot training and oversee the Block formation.

February, 2000

(i) 2nd meeting of the Principal Census Officers at the State level to brief them about the House listing Schedules and Instruction Manual.

(ii) Subsequent meeting at the respective H. Qtrs. of all the Principal Census Officers to train all the Charge Officers, zonal Sub-Charge officers etc. on the House listing Schedule, Instruction Manual and House list Abstract – to be attended by Director/ Joint Director of Census Operations.

(iii) Subsequent training at all charges levels on the House listing Schedule, Instruction Manual and House list Abstract to all Zonal Charge Officers, Zonal Assistants by the Charge Officer. Regular contact by officials from the Directorate of Census Operations, West Bengal.

(iv) Completion of appointment of Enumerators and Supervisors and allotment of Houselisting blocks to them.

(v) Despatch of Houselisting Schedules and Instruction Manual, Abstract and other forms from the Directorate of Census Operations to all Districts and receipt/storage of the same at the District level and despatch to all Charge levels, Receipt, storage & giving of locational code numbers to the schedules at each charge levels.

March, 2000

(i) 1st training of Enumerators and Supervisors at the charge level.

(ii) Distribution of Houselisting Schedules, Instructions and Abstract to the Enumerators.

(iii) Completion of assignment of permanent house numbers to the houses by the Panchayats and Municipalities.

(iv) Preparations of the Charge Registers at each charge level.

April, 2000

(i) 2nd training of Enumerators and Supervisors at each charge level.

(ii) Issue of T.A./D.A. amount to the Enumerators/ Supervisors.

(iii) Issue of House-numbering materials to the Enumerators/ Supervisors or advance in lieu thereof.

(iv) Issue of badges/Identity Slips to the Enumerators/ Supervisors.

(v) Training of Enumerators at each circle level/Zone level by the Supervisors/Zonal Sub-Charge Officers.

17.04.2000 to 16.05.2000

(i) Houselisting Operations

(a) First 4 (four) days devoted to survey and preparation of layout sketches as per sketches already prepared at the charge level

(b) Next 20 (twenty) days devoted to house to house canvass of the Houselist Schedule.

(c) Last 2 (two) days devoted to preparation of Houselist Abstract and duplicate Houselist by Enumerators and handing over the same to the Supervisors.

17.05.2000 to 31.05.2000

Collection of the completed Houselist Schedule and Houselist Abstract from Supervisors/Zonal Charge Officers at the Charge level, preparation of Charge Abstract and onward transmission to this Directorate.

Calendar for Enumeration Stage of Census of India – 2001

1. Conference, Training of Principal Census Officers, Additional Principal Census Officer and District Census Officers.
   .....To be completed by 31st July, 2000
2. Training of Charge Officers
   ..... To be completed by 15.08.2000
3. Formation of Enumeration Blocks and despatch of Annexure 'N' by the Charge Officer to the Director of Census Operations, West Bengal.
   ..... To be completed by 31.09.2000
4. Writing of Abridged Houselist based on recarved Enumeration Block and preparation of fresh Charge, Registers after appointment of Enumerators and Supervisors for Each Enumeration Block.
   ..... To be completed by 31.07.2000
5. Despatch of materials to the districts by the Directorate of Census Operations and distribution of the same by the District Census Officers to the Charge Officers
   ..... To be completed 31.10.2000
6. 1st training of Enumerators and Supervisors
   ..... To be completed by 15th December, 2000
7. 2nd training of Enumerators and Supervisors
   .....To be completed by31st December, 2000
8. Field Training of Enumerators and Supervisors and handing over of materials required for Census taking.
   ..... To be completed by 15th January, 2001
9. Population Enumeration to begin on
   ..... 9th February, 2001
10. Population Enumeration to end on
    .....28th February, 2001
11. Enumeration of Houseless Population
    .....To be completed by night of 28th February, 2001
12. Revisional Round to be conducted for updating the information as on 00 hours of 1st March
    ..... To be completed by 1st – 5th March, 2001
13. Receipt of records by district census officers from all charge officers
    ..... To be completed by 07.03.2001
14. Compilation and checking of Population Totals by District Census Officers
    ..... 10.03.2001
15. State wise compilation of PPT by Director of Ceusus Operations and intimation to R.G.I.
    ..... To be completed by 12.03.2001
16. Receipts of records by District Census Officers from all Charge Officers.
    ..... To be completed by 15th March, 2001
17. Intimation of Preliminary Population Figures in respect of the following :
    ..... To be completed by 10.03.2001

(i) Total Population
    Total Male Population
    Total Female Population

(ii) Total Literate Population
    Total Male Literate Population
    Total Female Literate Population

(iii) Total Main workers
    Total Marginal Workers
    Total Non Workers

By the district Magistrates to the Director of Census Operations, West Bengal and Registrar General, India by Telephone and FAX.

District Highlights - 2001 Census

1. Koch Bihar district occupies 15th position in terms of population in the state.
2. Koch Bihar is one of the least urbanised district of the state having 9.1 per cent of the total population in urban areas, whereas more than 27.0 per cent of the state's total population live in urban areas.
3. Koch Bihar's population growth rate is not high and ranks 14th in the state.
4. Koch Bihar's population density is 732 (population per sq. km) and rank is 10th in the state.
5. The sex ratio of the district is 949 which is well above the state's sex ratio of 934.
6. Literacy rate of the district is 66.3 per cent thereby making its rank 9th in the state.
7. There are 64 uninhabited villages in the district.
8. There are 18 villages having 10,000 and above population.
9. Sitalkuchi of Sitalkuchi CD Block is the most populated village with 31,750 persons and Chhat Duaisurai of Mathabhanga-I CD Block is the least populated village with 5 persons.
10. Agriculture is the principal occupation of the people of the district. Nearly 63.0 per cent of the main workers of the district are engaged in Agricultural sector.
11. Participation of women as cultivators is less than that of men and the reverse situation is observed for Agricultural Labourers. In case of Household Industry, the female work participation is almost four times that of male.
12. Mekliganj CD Block has the highest number of villages (187) and Sitai CD Block has the lowest (53).
13. Balarampur village of Tufanganj-I CD Block has the largest area (5052.29 hectares) and Chhit Panisala village of Mekliganj CD Block has the smallest (0.11 hectares).

Economic Resources

a) Forest Area : There is a small forest area in the north eastern side of the district. In the forest, there are Sal, Sishu, Segun, Debdaru and other tropical trees in plenty. This district is also replete with small bamboo and arecanut groves. Some kind of Aquatic grass grows abundantly in this district from which one kind of mat locally known as 'Sital Pati' is prepared. The total forest area in the district is 733071 hectares out of which 4127.43 hectares comes under protected forests.

b) Mineral product : Koch Bihar does not possess any type of mineral or mining product as economic resources.

c) Soil & Cropping Pattern : Both West Koch Bihar Plain and East Koch Bihar Plain are flat alluvial lands of rather recent formation. Shallow black, brown and alluvial soils occur in both the regions, what in common parlance is sandy loam. The proportion of sand, silt and clay however varies from place to place since the soil of the district is formation of the river system. The western part of the district contains more clay than sand and the eastern part of the district contains more sand than clay.

The principal crops of the district are (1) Paddy (mainly the *aus* and the *aman*) and rarely the *Boro* (2) Jute (3) Tobacco (4) Rape and Mustard seeds (5) Pulses - *mug*, *musur*, *khesari*, *thakri*, *kulti*, *arahar* (6) Wheat and Barley (7) Millets, china and *kaon* (8) *Makai* (Indian corn) (9) Arum and Potato, but also onion, garlic, ginger and turmeric (10) Fibre plants - hemp or *San*, *Reah* or *Kunkura* (11) Sugar - cane, and (12) *Mutha* or matting grass.

The *bitri* which is the local name for *aus* are of two kinds in the district. The earlier one is sown in January and harvested in the early part of June. Growing of the later one is more extensive and is sown in February to March and harvested in July and August. The early sowings are done on low lands of the *duiam* class or *awal* class. The later sowings are done on the *saiam* and *Chaharam* class. After harvest of the later *bitri* the land can be utilised for jute. And the *Amon* which is locally called *Haimanti* is transplanted in June to August in the same lands, ie. *awal* and *duaim* after the harvest of early *bitri* is complete. The *Amon* has also two modes of cultivation-*bowa* or *rowa*. The *bowa* is cultivated in very low lands bordering on bils and channels of rivers which are inundated early. The *rowa* variety requires a well-prepared ground and the preparation is done in the same way as for *bitri*.

Next comes jute. As already stated, *Saiam* and *chaharam* lands are sown with jute. The land is prepared in March with about 10 to 12 ploughings with the application of the manure at intervals. About a month is taken in the preparation of the land. Tobacco is generally grown on same *chaharam* land. It can be grown on the poorest land which is very sandy. Tobacco is the most important cash crop of the district.

d) Land and land-use pattern : Land of the district is fertile and soft, flat and alluvial in nature. Lowland of cultivable area accounts for 60 per cent, which is suitable for paddy and jute cultivation and on the other hand 40 per cent is high land classified as *danga*, which is suitable for tobacco cultivation. Koch Bihar is primarily a rural district. Cultivation is the main economic activity of the village people. Out of the total area of 331.8 thousand hectares, net-cropped area is 249.1 thousand hectares.

e) Tenancy :

At the abolition of the Jamindary system and in the event of merger of the kingdom with the State of West Bengal, the land tenancy is now dominated by the land laws of West Bengal and there is no other land distribution system.The State Government is now the owner of the all estate land since the enactment of West Bengal Estate Acquisition Act, 1948. But in case of agricultural land, the tenancy is contractual with the owner. After the land refom measures taken up by the State Government, there is no intermediary system of tenancy in the district.

In terms of operational land holding, more than 70.4 per cent falls under the marginal (below 1.0 acre) size class of holding in the district as per 1995-96 Agricultural Census, West Bengal. Till 30.09.2000, 25020.62 hectares of vested agricultural land have been distributed among 1,22,504 beneficiaries. Out of the total beneficiaries, 70.5 per cent beneficiaries belong to Scheduled Caste and Scheduled Tribe communities taken together. (Source : District Statistical Hand Book, 2001, Govt. of West Bengal)

f) Agriculture : Koch Bihar is basically an agricultural district. Among the agricultural crops, paddy, wheat, pulses, mustard are the main food crops and tobacco

and jute are main cash crops, which are being produced in plenty in this area. More than 80 percent of the people live in rural area and their main occupation is cultivation.

g) Irrigation : Out of the total area under crop, 68.6 thousand hectares (revised figure) of land is under irrigation as per 2000-01. In the district irrigation from Govt. canals and tanks is available. As per District Statistical Hand Book, 2001, area irrigated by Govt. Canals is 1,650 hectares and area irrigated by Tanks is 5,850 hectares. The greater source is from Deep Tubewells and other sources. There are 1,712 Shallow Tubewells and 254 River Lift Irrigation for watering the field under crop.(Source: District Statistical Hand Book Govt. of West Bengal, 1998)

h) Animal Husbandry : As per livestock Census Report, 1994, there are 975,790 cattles and 11,793 buffaloes in addition to other animals and poultry birds. The district has 6 Veterinary Hospitals and 21 Veterinary Dispensaries.

i) Fishery : Besides the rivers and huge number of tanks, there are substantial number of water areas formed out of the old and abandoned courses of rivers in all subdivisions of the district. Thus fishery is also a major activity among the people of Koch Bihar. Considerable numbers of all varieties of fishes are available. Hence fishery also plays some role to maintain livelihood of the rural people of the district.

j) Electricity & Power : In the district there are 1,202 villages with 583 villages having been electrified. Out of them, 537 villages are having electricity for domestic purpose, 26 villages for agricultural purpose, 208 villages for other purposes and 39 for all purposes. In the year 2000-2001, 79120 units (in thousand KWH) of electricity were consumed.

k) Industry : Koch Bihar has been considered generally as an industrially backward district. There is no infrastructure facility or scope for any large-scale industry in this district. Cotton weaving is the only small-scale industry in the district. There is sufficient scope and possibility for agro based industry.

Of late, this district has earned lot of name in two handicrafts like production of 'Sital Pati' (some kind of finely woven mat of a kind of aquatic grass) and Endi Chadar.

l) Trade and Commerce : Dinhata, Haldiari, Tufanganj, Mathabhanga and Mekliganj are the important trading centres and chief trading commodities are jute, tobacco, paddy, bamboo and timber wood. Koch Bihar town is also a large commercial centre engaged in trade with border State of Assam.

m) Transport : The district headquarter is not well connected with sub-divisions by railway facilities. As such, road transports are the main way of surface connection of the district. The villages are mostly covered by Maxi- Cab service facilities. There is a good number of inter state bus service routes towards the state of north east and other state of the country via Jalpaiguri - Siliguri and regular buses ply on the routes. The Broad Gauge Railway line of the northeast frontier railway connecting the northeastern zone of the country passes through this district. The N.H. - 31 connecting the northeastern part of the country with the rest of the country also passes through the district. In addition to this, there is a small Air Port located at Nilkuthi near Koch Bihar town.

(vi) Gram Panchayat

In West Bengal since 1978 the panchyat system began to function in full fledge. The Panchayat system is under 3-tier functionary. In the district at the top there is Zilla Parishad (ZP) at district Headquarters level; the Panchayat Samities (PS) and at CD block and under them there are Gram Panchyat consisting of elected members from the respective villages. Since 1978 the Panchayat system has been performing a vital role for the development from village level to district level and fund in regular manner are placed for implementing the economic plans from Gram Panchayat level to district level.

In spite of some shortcomings, the Panchayat system has changed the village economy, social and political system. In West Bengal small and marginal farmer have got cultivable land, the wages of agricultural labourers have been increased. Due to land reforms and other village development programmes the productions of agriculture has increased significantly. As a result, the intake of food has also increased.

In Koch Bihar district there are 12 Panchayat Samities and 128 Gram Panchayats. All the institutions have been performing a vital role in the district in respect of social and economic development of rural area.

Points to Note

(11) The Village land area figure in Hectares has been converted from the village(mouza) wise land area in Acres as maintained by Director, Land Records & Survey (DLRS), Govt. of West Bengal.

(12) Villages marked as (P) indicate concerned village is partly Rural and partly Urban or is bifurcated into two CD Blocks.However the total area figure of the villages (mouzas) as per records maintained by DLRS, Govt. of West Bengal has been given here as no record of such bifurcated village area is available with DLRS, Govt. of West Bengal. In case parts of a village fall under more than one CD Block the total land area figures for these parts have been estimated on the basis of plot nos mentioned in the concerned Govt order and through interpolation / extrapolation of the areas of the concerned plots from R.S. maps maintained by DLRS, Govt. of West Bengal.

(13) The area of CD Blocks as shown here is summation of land areas of all villages (mouzas) within the concerned Block and is estimated only.This is because no CD Block wise land area figures are available with DLRS, Govt. of West Bengal.

(14) In case of statutory and non statutory urban areas, the areas are given here are estimated only. This is because no town wise area figures are available with DLRS, Govt. of West Bengal.The area figure have either been collected from the concerned town authorities or have been calculated from existing village(mouza) wise area figures as maintained by DLRS, Govt.of West Bengal.

(15) The total land area for State/ District as given here is as per area figures obtained from Survey of India. However the totals of / villages / Blocks / Towns as given here are as per records maintained by Directors, Land Records & Survey (DLRS), Govt. of West Bengal.

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts : Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts : Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD Block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being the lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991

census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Vikram Sen, IAS, Director of Census Operations, West Bengal. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

Preface

The task of publishing the District Census Handbook (DCHB) is a joint venture between the central and state government and the recent publication for 2001 Census happens to be the sixth in the series of its publication since the year 1951. Since then, in view of the contemporary requirement of data, the coverage of DCHB has widened and received regular refinement. Hence, it has become the most widely used publication compiled and prepared by the Census organization. The presentation of data is done in two parts, viz., the Part-XII-A and Part-XII-B seperately for the bigger districts and single combined volume for the each smaller district.

Part-XII-A contains Village & Town Directory data with some important tables depicting availability of basic civic amenities at the C.D. Block/Village and Town level. In the other hand, Part-XII-B presents district Primary Census Abstract (General), Primary Census Abstract for Scheduled Caste, Primary Census Abstract for Scheduled Tribe and CD Block/Villagewise Primary Census Abstract and Urban Primary Census Abstract. In addition to the above an effort is made to furnish various essential information about the district such as – historical background, administrative set-up, drainage, physiography, climate, place of historical, archaeological and tourists importance etc. The 2001 Census DCHB presents a variegated picture of the human life as reflected by the census data. The scope of analysis of census and non-census data has considerably increased through various summary tables and inset tables. Besides brief analysis of basic census data in the form of PCA and analysis of amenities and infrastructural facilities available in villages and towns in the form of Village Directory and Town Directory, the data on houses and household amenities have also been briefly analyzed and included in this volume. Not only this, we have made efforts to present comparative data on various aspects such as distribution of population, growth rate, density of population, sex ratio, work participation rates, literacy, language, religion, scheduled caste and schedule tribe population (since 1951 or 1961) mostly by residence for the benefit of data users. Likewise, in the annexures, brief analysis on some socio-demographic, economic, migration and cultural aspects of the population pertaining to 1991 Census has also been made.

There has been regular and continuous flow of suitable suggestions and advice from Shri J.K. Banthia, Registrar General, India, throughout completion of the work for which I express my deepest and sincere gratitude to him. Other officers in the office of the Registrar General, India, New Delhi, contributed their share in the befitting manner for which as well I record my thankfulness to Shri R.G. Mitra, Deputy Registrar General (C&T), Shri R.P. Singh, Deputy Registrar General (Map), Shri I.C. Agarwal, Senior Research Officer (S.S.) and Shri S.L. Jain, Deputy Director (S.S.), for without their timely help and guidelines this publication would not have appeared before us in time and in this form.

I shall be failing in my duties if I do not acknowledge the contributions made by the District Census Officers/ District Magistrates and innumberable Village, Block and Municipal level officials of all the districts of West Bengal for arranging collection of village and town directory data by the local officials from the villages/towns under their jurisdiction.

In my own office my thanks are due to each one of the staff members for their zeal and enthusiasm shown in completing this project successfully at various stages of work very much within the stipulated time. As it is not feasible to express my thanks individually a separate page of acknowledgement is included in this publication.

Vikram Sen
Director of Census Operations,
West Bengal

Acknowledgements

A. The Directorate of Census Operations respectfully acknowledges the devoted, sincere hard work rendered by about one lakh fifty thousand Census Enumerators, Supervisors and Officials at the District, Block and Municipal levels without whose heroic efforts, the Census 2001 could never be undertaken. Three among these Enumerators also laid down their lives while in discharge of Census work.

B. The Census Directorate, West Bengal also gratefully acknowledges the sincere and dedicated work of the following officers/officials of this Directorate associated with the preparation of this Hand Book.

Drafting of analytical notes/ overall editing and checking at various stages :

Shri R.K. Ram	Joint Director	Shri P.K. Majumdar	Deputy Director
Dr. Palash Chandra Coomar	Deputy Director	Shri Debesh Roy	Deputy Director
Late G.C.Halder	Deputy Director	Shri S.K. Lodh	Deputy Director

Concept of Census Town :

Some administratively rural areas are identified and treated as urban pockets for the purpose of census are called Census Towns on the basis of the following demographic criteria :

(i) A minimum population of 5,000.

(ii) At least 75.0 per cent of the male working population engaged in non-agricultural pursuits, and

(iii) A density of population of at least 400 per sq. km.

Note : While calculating density, area figures have been taken upto two decimal points

Koch Bihar district is predominantly rural in relation to total population and total area of the district. There are 12 CD Blocks and 10 towns in the district. The density of population of the district (732) is lower as compared to state average (903). Among the CD Blocks, the highest density is recorded by Dinhata-I (911) while the lowest in Mekliganj (441). There are 1,202 villages in the district out of which 1138 are inhabited and 64 are uninhabited. The highest number of inhabited villages is seen in Cooch Behar-I CD Block (143) and highest number of uninhabited villages is noticed in Mekliganj CD Block (48). All the villages of Cooch Behar-II, Tufanganj-I, Tufanganj-II and Sitai CD Blocks are inhabited.

Among the urban units, Koch Bihar Municipality with 9,273 population per sq. km. is the most densely populated whereas Kharimala Khagrabari census town with 1,903 population per sq. km. is most sparsely populated town.

Note : 1. NA stands for Not Available
2. There is no Tahsil in West Bengal

All the 12 CD Blocks of the district contain villages having population 5,000 and above. There are 86 villages in the district spreading over all the 12 CD Blocks, out of which in 4 villages, CD Block headquarters is located. Out of total 86 villages, 14 have senior secondary school, only 2 have college, 13 have Primary Health Centre, 43 have Primary Health Sub-Centre, 31 have Tap Water facility, 8 villages are accessible by Railway station, 21 villages have Commercial Bank and 13 villages have Co-operative Banks.

The above table shows that there are 306 houseless households with 252 households in rural areas and 54 households in urban areas consisting of a total population of 868 (658 in rural areas and 210 in urban areas) in the district. It is most likely that they may not have even a plot to construct the house. If some of them may have plot, they may not have the finance to meet the cost of construction of house. It is painful fact that a majority of houseless population live in rural areas and they are unable to arrange even a thatched house. Among the CD Blocks the maximum houseless population lives in Dinhata-I CD Block (212) followed by Tufanganj-I (74) and Mathabhanga-II (64), while the minimum in Haldibari CD Block (13). Among all the urban units, the highest number of houseless population is seen in Mekliganj Municipality (84) and the lowest in Khagrabari Census Town (2). Kharimala Khagrabari Census Town, Guriahati Census Town, Bhangri Pratham Khanda Census Town and Tufanganj Municipality have not returned any houseless population.

There are 527 institutional households, out of which 427 households live in rural and 100 in urban areas. The total institutional population is 8,099 with 5,960 in rural and 2,139 in urban areas in the district. Among the CD Blocks, the maximum institutional population live in Cooch Behar-II CD Block (1,298) followed by Cooch Behar-I (844) and Dinhata-II (802) and the minimum in Haldibari CD Block (175). Among towns, Koch Bihar Municipality has the highest number of institutional households (42) with maximum population content (1,229) whereas, both the minimum number of households (1) and population (6) have been recorded in Guriahati Census Town.

History & Scope of District Census Handbook

(i) History and Scope of the District Census Handbook

The District Census Handbook a joint venture of the State Government/ Union Territory Administrations and the Census Organisation, is one of the most important publications, particularly in the context of planning and development at grass root level. It is perhaps the only source that gives village and town level information concerning several demographic and socio-economic characteristics and also on availability of important civic amenities. This publication was for the first time brought out in the 1951 Census. In fact it is the replacement of 'Village Statements' used to be prepared in the Censuses of Pre Independence period and since then it is published after each decennial Census with some innovations/ improvements.

Scope & coverage of District Census Hand Books of 1951-1991 Censuses

Initially the scope of the DCHB was confined to certain important census tables on population, economic and socio-cultural aspects and also the Primary Census Abstract (PCA) of each village and town of the district. The DCHB published after the 1961 Census contained a descriptive account of the district, administrative statistics, Census tables and Village and Town Directories including PCA. In 1971 Census the DCHBs were brought out in two parts viz. Part A comprising Village and Town Directories and Part B comprising Village and Town PCA in respect of all the States and Union Territories. The Third part of the DCHBs comprising of administrative statistics and district Census tables. During 1981 Census new features alongwith restructuring of the format of Village and Town Directory were introduced in the DCHB. These were published in two parts for each district. While Part A comprised of Village and Town Directories, the PCA of Village and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA upto tahsil/town level were provided in Part-B. To illustrate, all the amenities except electricity, were brought together in the Village Directory and if an amenity was not available in the referred village, the distance in broad ranges from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the Village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Direcotries also, keeping in view the requirements of the Minimum Needs Programme, a Statement (IV-A) on slums was provided so as to enable the planners to chalk out the programmes for providing civic amenities in the slums. In this statement details on civic and other amenities were presented for the notified slums of Class I and Class II towns. Apart from this, one column on the Scheduled Castes and Scheduled Tribes population and another on adult literacy classes/centres were added in statements IV and V respectively.

The manner of presentation of the DCHBs for the 1991 Census was more or less similar to that of 1981. However, the format of PCA was restructured slightly in the 1991 Census for the benefit of data users. Nine fold industrial classification of main workers was given as against four-fold, industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age group was also included in PCA for the first time with a view to enabling data users to compute more realistic literacy rate as all children below seven years of age have been treated as illiterate in 1991 Census. It was expected that these changes would help the planners in chalking out more effective developmental programmes.

One of the most important innovations in the 1991 Census was the Community Development Block (CD Block) level presentation of data in the Village Directory and PCA instead of the traditional Police Station level presentation. It was expected that the presentation of Village Directory and PCA data at CD Block level would help the planners in formulation of micro level development plans, as the Blocks are the lowest administrative unit for developmental planning. In order to facilitate the task of administrators, Planners and Researchers to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both the computer and manual codes for each Village were provided for the 1991 Census alongwith the corresponding codes of 1981.

Scope & coverage of District Census Handbooks of India, 2001

The District Census Hand books for Census of India, 2001 are more informative and exhaustive in terms of coverage and context. The coverage in Village Directory has been further broadened and includes facilities like banking, recreational, income and expenditure of Gram Panchayats and most important commodity/commodities manufactured in the village. Apart from these, more details on distance (s) of basic health and educational facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre, Primary Health Centre and Primary School), if not available in the village are proposed to be given for the first time.

The type and extent of basic amenities available in the villages and towns are proposed to be analyzed in depth with the help of a large number of cross classified inset table & statements. Brief analytical notes /accounts on important aspects concerning respective districts viz. (i) firstly, mortality and migration, (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/place of residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education & (vii) distribution of different mother tongue, all based on 1991 Census, will be given at the end of the text as separate annexures. It is also decided to provide two lists separately indicating names of colleges and hospitals available in the villages and towns in the district.

For the District Census Handbooks under Census of India, 2001 more emphasis has been given towards quality of village and town level amenity data. With a view to find out erratic or aberrant trends or in inexplicable fluctuations in amenity data, similar information brought out by the State and Central Government have been collected & these information have been used to verify the Village Directory & Town Directory data. The inconsistencies noticed in Village Directory & Town Directory data have been removed in consultation with the respective district administration as far as possible.

Brief History of the District

Koch Bihar is a comparatively recent name. The tract of land now forming the district of Koch Bihar once belonged to the much bigger kingdom of Kamrup. The western part of Kamrup known by the name of 'Kamata' contained today's Koch Bihar. The Ain-i-Akbari refers to a Koch country in which there were two kingdoms 'Kamata' and 'Kamrupa' (District Census Handbook, Cooch Behar, 1961, p.3). It means this specific part of land was fast becoming separate entity form the beginning of Mughal era. The name 'Koch Bihar' is compound of two words, 'Koch' and 'Bihar' and the name was first applied to this specific tract of land in Shah Jahan Nama. The word 'Koch' denotes the race of people who inhabit a large tract of country to the north east of Bengal. There are many conjectures over the suffix 'Bihar'. In absence of any definite conclusion, it may be said that 'Bihar' or 'Vihara' denotes abode or sport. Koch Bihar, in that sense, means the abode or land of the Koches. The Maharaja of Koch Bihar who used to call his capital 'Nijbehar', finally termed his kingdom as 'Koch Bihar' and since then it is so.

No prehistoric artefacts have been found in Koch Bihar, but it is true that the land belonged to a very ancient place. The early history of Koch Bihar is to be sought in the early history of Assam. The state which we know today as Assam, was in early times called Pragjyotish and later Kamrup. The mention of Pragjyotish can be found in the Ramayan, Mahabharat, Vishnu Puran and Harivamsa. The earliest mention of Kamrup in epigraphic records is in the Allahabad Inscription of Somudra Gupta. The last King of Gupta lineage who had some kind of control over Kamrup was Mahasen Gupta. The Gupta Empire wiped out with the rise of Yasodharman. The longevity of Yasodharman's empire is still beyond historian's knowledge as also its end. In the middle of the 7th century King of Kamrup was Bhaskarvarman. Shortly after his death one Saalasthambha, who has been called 'Mlechchha' began to rule Kamrup. The dynasty founded by Saalasthambha continued to rule Kamrup till about the end of the 10th century. With the extinction of this dynasty one Brahmapal of the dynasty of Bhagadatta was elected to rule Kamrup, whose line continued to rule Kamrup from 10th century onward. Kamarupnagar has been stated to be their capital. This Kamarupanagar was most probably the same Kamata or Kamtapur whose ruins lie in the district of Koch Bihar at Gossanimari. After the Pal line of kings of Kamrup came to an end, anarchy prevailed for a time during which the country was overrun by the Koch, Mech, Garo and Bhot tribes. During this anarchy a person of humble birth somehow acquired power and proclaimed himself King and assumed the name of Niladhvaj. Niladhvaj made Kamtapur his capital, improved the fortification of Kamtapur and erected the temple of Kamteswari. The dynasty of Niladhvaj continued till the rule of his grandson Nilambar who was conquered by Allaudin Hussain Shah as stated in coins issued in AD 1493-94 by the conqueror. However, Muslim army could not keep the Kamta Kingdom for long. Dulal Ghazi, the son of Hussain Shah who was in charge of Kamta Kingdom developed enmity with the Ahom King who attacked the Muslim army on the opportunate moment and Dulal Ghazi was either killed or had to make a dishonourable retreat with which Muslim occupation worsted.

Although the Ahom King expelled the Muslim army, he could not stop disintegration of Kamta Kingdom and the Kingdom split up into many petty principalities under small chiefs. These small chiefs are found in the history as *Bara Bhuinyas*.

This was the time when the Koch chiefs gradually became powerful. One of them was Hajo. It was from his grandson by the daughters' side that the future Kings of Koch Bihar originated. Most possibly, Visvasimha, Hajo's grandson, ascended the throne in 1510. E.A. Gait in his "History of Assam" assigns AD 1515-1540 as the duration of Visvasimha's reign.

The kingdom of Koch Bihar accepted the suzerainty of the Mughals at the time of Lakshminarayan, the grandson of Visvasimha. In the beginning it was partial submission. Lakshminarayan ascended the throne in 1584. Soon after his accession, Raghudev, his cousin, proclaimed himself as independent King of Kamrup and minted coins in his own name. This led to a war between Lakshminarayan and Raghudev. Whereas Raghudev sought the alliance of Isa Khan, one of the famous *Bara Bhuinyas*, Lakshminarayan sought alliance of Man Singh, the Mughal *Subahdar* of Bengal under Emperor Akbar. This led to a partial submission of the Kingdom of Koch Bihar to the Mughals. Acceptance of full suzerainty of

the Mughals by the Koch Bihar Kings took place at the time of Jehangir. During the period of Shah Jehan, Koch Bihar kings tried hard to deny the sovereignty of the Mughal power. But this success was short lived and Aurangzeb dealt with the denial firmly and got back the submission. Prannarayan was succeeded by his son Modnarayan who ascended to the throne in 1666. From his reign started the influence of Bhutan on Koch Bihar. Bhutias were invited by the sons of the Nazir Mahinarayan who wanted to rout Modnarayan and occupy the seat of Koch Bihar kingdom. The bid failed for the interventions of Raikats of Baikunthapur whose valiant attempts forced the Bhutias to retreat. The main line of Kings of Koch Bihar ended with the death of Mahindranarayan whom Raikats of Baikunthapur placed on the throne, for, the dynasty that started from Rupnarayan was the dynasty descended from the Nazir. Rupnarayan was the last King of Koch Bihar who held sway over western Kamrup. From his time the territory of Koch Bihar was confined practically to the present boundaries of the district.

It is already stated that Bhutan's influence over the district started from Modnarayan's reign. It temporarily lessened, but during the reign of Upandranarayan (1714 onward), the son of Rupnarayan, influx of the Bhutias in Koch Bihar began again and later Upendranarayan himself secured the help of Bhutan in order to give battle to the Mughal *Fouzdar*. During the period of Dhairyendranarayan (1765) the influence of the Bhutias had increased to such extent that an officer of Bhutan was permanently stationed at Koch Bihar with an army and his consent had to be taken in important matter of Administration. The Bhutias occupied Koch Bihar when Dharendranarayan, the son of Dhairyendranarayan was on the throne. The officers of the state removed the King, the dowager queen and the *Maharani* to Panga and themselves escaped to Rangpur. It was then the Nazir Khagendranarayan approached the East India Company for assistance. The East India Company's aggressive move worked and finally a peace was concluded between Bhutan and the East India Company on April 25, 1774. Just before the coronation of Harendranarayan, Henry Douglas was appointed commissioner for Koch Bihar. In 1800 the East India Company stopped the coining of *Narayani rupee* once and for all.

The modernization in the administration started by the British Commissioners continued by the *Maharaja* Nripendranarayan after assumption of power and the administrative machinery of the State created on the model of a British district. Jagddipendranarayan was the last *Maharaja* of Koch Bihar. He signed the Instrument of Accession on September 12, 1949, by virtue of which India owned the State on August, 1949.

Administrative Set-up

(i) Region of the state where district is located :

The district Koch Bihar is under Jalpaiguri division and is located in the Barind tract of lower Ganga plain.

(ii) Total Number of CD Blocks :

Administratively the district now consists of five sub-divisions namely Mekliganj, Mathabhanga, Cooch Bihar (Sadar), Tufanganj and Dinhata. There are in all 10 Police Stations in the district. Police Stations Haldibari, Kuchlibari and Mekliganj are under Mekliganj sub-division, Police Stations Mathabhanga, Ghoksadanga and Sitalkuchi are under Mathabhanga sub-division. Cooch Bihar (Sadar) and Tufanganj sub-divisions have only 1 Police Station each namely Koch Bihar and Tufanganj respectively. There are 2 Police Stations in Dinhata sub-division namely Dinhata and Sitai.

There are in all 12 CD Blocks. Mekliganj sub-division comprises 2 CD Blocks namely Haldibari and Mekliganj. Mathabhanga sub-division comprises 3 CD Blocks namely Mathabhanga-I, Mathabhanga-II and Sital Kuchi. Cooch Bihar (Sadar) and Tufanganj both comprises 2 CD Blocks each. They are Cooch Behar-I and Cooch Behar-II for Cooch Bihar (Sadar) sub-division and Tufanganj-I and Tufanganj-II for Tufanganj sub-division respectively. Sub-division Dinhata consists of 3 CD Blocks namely Dinhata-I, Dinhata-II and Sitai. Though the number of CD Blocks of Koch Bihar has remained at 1991 level, number of villages has remarkably increased in 2001. The number of villages that was 1,168 in 1991 has come up to 1,202 in 2001 indicating that 34 villages have gone back from urban frame to rural frame.

(iii) Total number of Towns/Villages etc. :

Total number of urban units in Koch Bihar is 10. There is no municipal corporation in Koch Bihar and the number of municipalities is 6. They are (i) Haldibari (ii) Mekliganj (iii) Mathabhanga (iv) Koch Bihar (v) Tufanganj, and (vi) Dinhata.

The number of non-municipal towns or census towns has increased from 3 in 1991 to 4 in 2001. The new census town is Khagrabari. Other 3 census towns are Kharimala Khagrabari, Guriahati and Bhangri Pratham Khanda.

As already stated there are 1,202 villages in Koch Bihar in 2001.

(iv) If the district is newly created, the area from which it has been carved out :

It is not a newly created district.

(v) Urban Local Bodies :

The history of urban local bodies dates back in India to Indus Valley Civilisation. In modern India it originated during British rule when in 1687 the first Municipal Corporation was set up at Madras under a charter granted by James II. There are different types of municipal bodies, namely, Municipal Corporations, Municipalities, Notified Area Comittees, Cantonment Boards etc. Except the Cantonment Boards all other types are created under state municipal laws. Cantonment Boards owe their origin to the Central Act called Cantonment Acts, 1924. A municipality is a body politic and corporate, constituted by the incorporation of the inhabitants of a city or town. Municipal corporations constitute the highest or topmost form of urban local governments and are created for big cities by the enactment of state legislatures or of Parliament in case of union territories. A Notified Area Committee is created for an area which does not fulfil all the conditions laid down as necessary for the constitution of a municipality or it may also be created for newly developing towns or areas. The councils of all these corporate bodies except notified area comprise elected, opted and associate members. The notified area is governed by the state governments through a body nominated by it. The primary object of every urban local body is to provide civic amenities to the people and the overall development of the town.

In 1944 after the Cooch Bihar Municipal Act was passed, the Town Committee of Koch Bihar was converted into a Municipality in 1946. It remained as the only municipality of the district for long. The Town Committee of Dinhata was converted into a Municipality much later, in 1973 and other 4 municipalities of Haldibari, Mekliganj, Mathabhanga and Tufanganj all came into being in the year 1983.

Civil Administration :

The Civil Administration of the district consists of the District Magistrate as the Principal Executive with 5 Sub-divisional Officers being the sub-divisional heads

and under them one Block Development Officer for each CD Block. Beside the Sadar Sub-division at Cooch Bihar (Sadar), the district has four other sub-divisions at Mekhliganj, Mathabhanga, Tufanganj and Dinhata respectively. Under the police administration, Superintendent of Police is the head of the district and under him there are 5 Sub-divisional police officers with Inspector-in-charge / Officer-in-charge in each police station. At the district Head Quarter District Judge is the head of the Judiciary. The sub-divisional Judicial Magistrate sits in the Courts at the sub-divisional level.

Physical Features

(i) Location and size :

The district is situated in the north and north-east corner of West Bengal. Koch Bihar lies approximately between $25^0$57´56´´ to $26^0$32´46´´ north latitudes and between $88^0$47´40´´ to $89^0$54´36´´ east longitudes. The total area of the district is 3,387 sq. kms. which contributes to 3.82 per cent landmass of the state of West Bengal. The extension of the district from north to south is 66.25 kms. and from east to west is 111.25 kms. Highest elevation of the district is 53 metres approximately from the mean sea level. The district is bounded by the district of Jalpaiguri in the north and west, state of Assam in the east and Bangladesh in the south. The other peculiar feature of this district is that there are a few enclaves commonly known as *Chhit Mahals*, which are outlying and detached tracts of land situated inside the district of Rangpur in Bangladesh.

(ii) Physiography :

Geographically the district belongs to the Barind tract of the Lower Ganga Plain where the Terai kind of vegetation prevails on the northern side. In the south-eastern side it is flat with a slight slope and some areas of it are noticed to be low and liable to inundation. Most of the high lands appertain to Lalbazar area and most of the low lands lie in Dinhata. The district is drained by many rivers flowing from north-west to south-east. There is no hill in the district and most of the areas of the district is under cultivation.

The district is divided into two sub-micro regions :

(1) West Koch Bihar Plain : The region covers the western part of the district. It is a flat alluvial land and the highest ranges here are from 45 to 53 metres approximately. The Jaldhaka river forms the eastern boundary line and divides the district into two parts. The greater part of the region is cultivated and covered with green fields studded with timber trees and an inferior variety of orange trees. The region is sloping slightly towards the south-east where the river Jaldhaka flows.

(2) East Koch Bihar Plain : The region is a flat alluvial land and covers the eastern half of the district. The elevation of the district ranges from 35 to 45 metres approximately and the region is sloping towards south-east along which the rivers flow. The Jaldhaka, the Torsa, the Raidak and the Sankoch have drained the region. Most of the rivers have changed their course very frequently as the river banks are abrupt and sandy.

Flora & Fauna :

Koch Bihar district is abounded with numerous plants. The commonest tree of the palm variety is the *gua* or betel-nut palm. This is largly cultivated in this district with great success. Two varieties are grown, one is called *deshwali* and the other *bangla*. There is another variety of areca locally known as the *ram-gua* and still another known as *cha-gua*. It is however worth noting that *khejur* (date-palm) and *tal* (ordinary palm) and *narikel* (coconut palm) are rare in the district. Five different kinds of bamboos are found in the district viz. *bara bansh, makla bansh, jaota bansh, beru bansh* and *nal-bansh*. The plantain grows in abundance and twelve varieties of them are found in the district. Of them, *bhartaman* is a speciality of the district. It has a green skin even when ripe, has a soft pump and tastes well. Almost all the common fruit trees of Bengal grow here, but by far the most abundant is the *kanthal* (jack fruit). Cinnamon, *tejpata*, clove and pepper are grown. *Nim kutraj, nishinda, apang, bach, bhang, svet-makal, gulancha* and *nata* are also found. *Shata-mul* and *ananta-mul* are found in the jungly parts. The *kuchli* is found in plenty. The chief of the cultivated creeps are the pumplin and gourd. Both grow well here and the pumpkin under proper manuring grows to enormous size. Cucumber is also grown but strangely enough no *patal* nor *uchchhe*. Two varieties of *pan* are grown, the *gachh-pan* and the *barui-pan*. Lotus plants of two varieties – the *kumud* (red) and the *padma* (white) are commonly found. Other aquatic plants are the *kesur, pana, sheola, sola*(pith), *kalmi, susuni* and *dal grass*. The commonest fern is *dhenki sag*. A few varieties of orchids grow wild on the trunks of trees. *Arum* of different kinds is grown and even grows wild. The *mankachu, panikachu* or *solakachu, ghatkachu* and *najikachu* are the chief varieties. Mushrooms of different kinds grow, of which two varieties are common. A kind of mildew also grows on trees. The *bat* (banyan) and the *aswattha* (peepul) attain huge proportions in the loose soils or the country with abundant rainfall. *Pakur* is quite common and so are two varieties of figs, ordinary *dumur* and *yajnadumur*. Of the timbers, *sal, sisu* and *teak are the chief. Champ* also grows. *Babla, khayer, dhawli, kat-gua* and *salti* provide hard wood.

Koch Bihar may aptly be called the land of flowers, which grow profusely all over the land. Roses of different varieties attain large size and give fine fragrance. The *canna* grows very well as well as magnolia. *Nag-kesar* or *nageswar* trees are very common and the Koch Bihar state planted these trees along the road in many places. The *ketaki* grows but does not flower.

The district produces the following cereals – paddy of two varieties, millet or two varieties, an inferior variety of wheat (with less of ghiten), barely and maize. The following pulses are grown – *mug, masur, matar* (pea), *arhar, khesari, kulti* and *thakri*. Of the oil seeds mustard, *til* and *tisi* are the ones generally cultivated. The fibre plants grown are jute and *mesta, shan* and *kukura*. Tobacco of two varieties are grown and fetches good cash money to the cultivators.

Among the garden vegetables potato, brinjal, radish, arum, onion and garlic are commonly grown. There is a special variety of potato with small tubers which is very much liked by the local people for its sweetness. Watermelon and muskmelon are grown on the sand banks of rivers after they recede in autumn and winter. (Great help taken from West Bengal District Gazetteers : Koch Bihar, February, 177 edition)

Fauna : There is no large forest in Koch Bihar and for that reason big animals are scarce. The low bushy jungles, unfit for cultivation, however, harbour some of the wild animals such as *go-bagha* (a small variety of tigers, *hakra* (leopard), wild pigs, barking deers or hog deers, *khatas* (tiger cat) and the civet cats. The mongoose is a very common animal which causes havoc to the plantain when ripe. The other animals include porcupines, otters, paddy field rats of very large size, mice and moles. Of the reptiles, Pythons are common in the forest and jungles. The brown and the black cobra are also not rare. Of the crocodiles, the *ghrariyal* with long jaws is seen in the larger rivers. There is no man-eater variety. *Gosap* or lizard, *anjana, kaklash* or chameleons are very common. Frogs of various kinds are seen.

Good number of fishes is available in the district. Of the carps, *catla, rui, kalbose, mrigel, chela, sarputi* of the cat fishes, *singi, magur, pabda, boal, bacha* etc. of the perch like fishes *bhada, chanda, koi* etc., of the snake headed fishes *sal, sol* etc. abound in the rivers, *bils* and ponds of the district.

(iii) Drainage :

The rivers in Koch Bihar flow from a north-easterly to south-westerly direction. The majority of them take their rise in the Himalayas, enter the district from the Western Duars, after passing through the district, flow into Bangladesh (District Rangpur) and finally join the Brahmaputra. Their banks are abrupt and beds sandy. At some places both banks are abrupt. Boulders, rock and gravel are common in the beds of rivers, as they are washed down from the hills. In the dry season the rivers are usually quiet, but the onrushes of water from the hill-tops during rain cause sudden rises in all the rivers and inevitable destructions of crops and homesteads follow. The rivers start regaining calmness by the end of October and become slow currents by March.

The rivers in Koch Bihar can be divided into six river systems. From the west to the east they are : (1) the Tista system (2) the Jaldhaka system (3) the Torsa system (4) the Kaljani system (5) the Raidak system, and (6) the Gadadhar system.

The Tista system : Though it is the largest river of the district, within the district it throws out no distributary nor does it receives any tributary. It enters Koch Bihar near Baxiganj. Flowing for about 15 miles in the district and separating Haldibari from Mekliganj PS, it passes out of the district by Kuchlibari to flow into Bangladesh. The bed is about a mile broad and sandy. The bank is high on one side and shelving on the other. The water is cool and limpid.

The Jaldhaka system : Jaldhaka rises in the Bhutan hills and flows through Bhutan under the name 'Di Chu'. It enters Koch Bihar through Dhulia Baldiahati after flowing by the east of Kalimpong (District Darjiling) and through the western Duars of the district Jalpaiguri and being augmented by the Murti and Diana. The river passes out of the district flowing almost along the southern border of Dinhata PS.

The Torsa system : The Torsa means 'angry water'. It has been the "Sorrow of Water" of Koch Bihar for long. So frequently it changed it course during the last two centuries that the entire northern portion of Mathabhanga PS stands devastated. The whole country is full of innumerable abandoned channels of the river covered with sand banks. The river rises outside India and flows through Bhutan by the name of *'Amo Chu'*. The river enters Koch Bihar from the north between Latabari in Mathabhanga PS and Bakshibos Putimari in Koch Bohar PS and flows nearly south with a few tortuous bends upon the north of Barabhita. In Barabhita the stream bifurcates and one branch goes eastwards under the name Torsa which is Torsa proper. It passes by the south of the town of Koch Bihar and turning south-east it receives the Ghargharia, its only tributary,

on its right bank after passing Mahisbathan and falls into the Kaljani in Balarampur west of Tufanganj town.

The Kaljani system : Though the Kaljani is a feeder of Sankos, it is an important river itself. Roughly speaking it separates Koch Bihar from Tufanganj. It is formed in the western Duars by the combination of Alaikuri and Disma and take the name Kaljani after their junction at Alipur, the headquarters of the Alipur Duars sub-division of Jalpaiguri. It enters Koch Bihar by the north of Kholta. Almost at the point of its entry into the district it receives on the right bank Gidani, a small stream which takes rise in western Duars, and a short way down, receives another small stream, the Katajani, which rises in the Duars. After the confluence of the Katajani in Bhelapeta the Kaljani passes by the west of Ghoramara Bunder in Chilakhana and joins the Torsa in Panisala. The Kaljani is a quick-flowing river with a formed bed, shelving banks, good depth and a width of 300 yards.

The Raidak system : There are two Raidaks. The western stream rises very high up in the Bhutan hills where it is called *'Chin Chi'*. It enters the district from the Duars in between Dorka and Chentimari about ten miles east of the point where the Gadadhar joins the Kaljani. The eastern stream also rises in the Bhutan hills and enters the district in between Khagrabari and Rampur and after a course of about ten miles falls into the great Gadadhar. The main current of the Raidak now flows through the Dipa which was originally a branch of the Raidak. The Dipa-Raidak now issues out of the original course of the Raidak in the north-east of Dorka (Tufanganj-II) and flowing by Andaran Phulbari, Chamta, Dwipar-par and Rajarkuthi of (Tufanganj-I) on the right bank, it takes up the course of the old Raidak from the original mouth of the Dipa. The sub-divisional town of Tufanganj is on the right bank of this river. Ordinarily this river now goes by the name of the Raidak.

The Gadadhar system : The river Gadadhar is named the Sankos in the upper course and the Gangadhar in the lower course. It rises in Bhutan and at present flows for about ten miles within the district of Koch Bihar. It receives a small stream named the Takulla after entering Koch Bihar from the east in Garbhanga. The river passes out of the district by the south of Chhat Bara Laokuti.

Main water features such as tank, lake reservoir etc.

The rivers of Koch Bihar have frequently changed their course. As a result, innumerable abandoned channels regain connections with the rivers during monsoon. Some are completely insular accumulation of water. These bils and marshes are used for growing fish and small tortoise and also provide water for the steeping of jute.

(iv) Climate :

Highly humid atmosphere and abundant rains with the rarely excessive temperatures characterize the climate of the district. The cold season is from mid November to the end of February followed by the hot season from March to May. June to about the beginning of October is the south-west monsoon and October to mid-November is the post-monsoon season. The average annual rainfall in the district is 3,201.3 mm. June is the rainiest month. About 70 per cent of the annual rainfall is received during the south-west monsoon season. On an overage there are about 102 rainy days (ie. days with rainfall of 2.5 mm. or more). January is the coldest month and April the hottest. The highest temperature recorded at Koch Bihar was 39.9º Celsius (103.8ºF) in May, 1960, and the lowest minimum temperature was 3.9º Celsius (39.0º F) on January, 1955. Although the temperature in the district is not excessive, a kind of dampness prevails in the weather of the district even in rainy season thereby making the weather rather unpleasant.

Average of the maximum and minimum temperature of the district for the preceding 10 years is as follows :

Year	Koch Bihar	
	Maximum (in Celsius)	Minimum (in Celsius)
1991	36	4
1992	39	4
1993	36	4
1994	37	8
1995	38	6
1996	38	8
1997	36	7
1998	39	8
1999	37	8
2000	37	7

Note : Yearwise data have been taken from District Statistical Hand Book, 1996 & 2001

Winds are generally light except during short spells of thunderstorms. Thunderstorms occur during the period of March to October. In the monsoon and post-monsoon seasons they cause widespread heavy rain and high winds.

Census Concepts

Building :

A 'building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, schools, places of entertainment, places of worship, godowns, stores, etc. It is also possible that buildings which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent Houses :

Houses, the walls and roof which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, brunt bricks, stones or concrete. Roof may be made of any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-Permanent Houses :

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary Houses :

Houses in which both walls and roof are made of materials which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch bamboo, wood, mud, plastic or polythene.

Dwelling Room :

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breath of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling room. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking etc. is regarded as dwelling room. In a situation where a census house is used as a shop or office etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant's quarter is used by a servant and if she/he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House :

A 'Census House' is a building or part of a building used or recognized as a separate unit because of having a separate main entrance from the road or common courtyard or, staircase, etc. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder :

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure

with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storied ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storied structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area there are separate buildings owned by different persons then each such building is treated a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building should treated as a separate building. But if in any of these buildings there are flats in occupation of different households, each such flat should be reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it should not be realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat should be treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in three rooms and the second household occupying two rooms, then considering the use, the first three rooms together should be treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ hotel building should be treated as one census house. But if such hostels/hotels have out-houses or other structures used for different purposes of the same purpose, then each structure attached to the main hostel/hotel should be treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bathroom, baithak etc. Though each of the huts is a separate structure, they form single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts should be treated separate census houses. However, if there are also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, work-shed etc., these should be treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number is given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up is treated as a building.

Rural-Urban Area :

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village'; for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows :

(a) All places with a municipality, municipal corporation, cantonment board or notified town area committee, etc.

(b) A place which satisfy or are expected to satisfy the following criteria simultaneously :

i) A minimum population of 5,000;

ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits; and

iii) A density of population of at least 400 per square kilometre (1,000 per square mile).

For identification of places which would qualify to be classified as 'urban', all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activities were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban areas under Urban Agglomerations. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., may have come up near a statutory town or city but these are within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

Household :

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Castes and Scheduled Tribes :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities, which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Castes in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given in the next page.

Language and Mother Tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate :

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate :

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational Level :

The highest level of education a person has completed.

Work :

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not

only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceeding the date of enumeration.

Main Worker :

A person who has worked for major part of the reference period (i.e. six months or more during the last one year precceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal Worker :

A person who worked for less than six months of the reference period (i.e. in the last one year preceeding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non Worker :

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceeding the date of enumeration) is termed as 'Non worker'.

Cultivator :

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural Labourer :

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household Industry Worker :

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other Worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work Participation Rate :

Percentage of workers (main + marginal) to total population.

Population Density :

Population density is the number of persons inhabited per square kilo-metre of the area.

Age :

Age is measured in terms of the completed number of years.

Sex-ratio :

Number of females per 1000 males in a population.

Non-Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.. It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns, which are not provided with such underground sewerage system, it is served by open surface drain, box drain, silk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil :

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the street sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil, which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below.

Crude birth rate (CBR) :

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid–year Population}} \times 1{,}000$$

Crude death rate (CDR) :

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate :

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR) :

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR) :

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR) :

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR) :

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years}} \times 1{,}000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = 5 \times \frac{\sum_{15\text{-}19}^{45\text{-}49} ASFR}{1{,}000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = 5 \times \frac{\sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1{,}000}$$

Age-specificMortality rate (ASMR) :

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q_1 :

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q_2 :

Probability of dying between birth and age 2.

q_5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal mortality rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or underduring the year}}{\text{Number of live births during the year}} \times 1,000$$

Early neo-natal mortality rate (ENMR) :

$$ENMR = \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1,000$$

Late neo-natal mortality rate(LNMR) :

$$LNMR = \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1,000$$

Post neo-natal mortality rate (PNMR) :

$$PNMR = \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1,000$$

Peri-natal mortality rate (PMR) :

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

Still birth rate (SBR) :

$$SBR = \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

Maternal mortality rate (MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 married women in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of married women aged 15-49}} \times 100,000$$

Eligible couple (Couples per 1000 population) :

Number of currently married females in the age group15-44 years per 1,000 persons of all ages.

Child woman ratio (0-4) :

Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9) :

Number of children in the age group 5-9 years per 1,000 women in the age group 15-49 years.

Migration :

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another

place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/ relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration :

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration :

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation / Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA / town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area :

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city :

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

Census Findings - Population & its distribution

Census Findings - Population & its distribution

Progress of Population

The population of West Bengal stands at 80,176,197 as on 0.00 hours of 1st March, 2001. West Bengal retains its position as the fourth largest state in India as was in 1991. West Bengal in 2001 has a share of 7.8 per cent of total population of India, while it occupies only 2.7 per cent of the total India's land area. Amongst the districts of the state, Koch Bihar has a population content of 2,479,155, the rank, which was 14th in 1991, now it is 15th. The population distribution of the district for the last five decades has been shown in Table-1 below :

TABLE-1 : RURAL AND URBAN POPULATION IN THE DISTRICT KOCH BIHAR WITH PERCENTAGE TO TOTAL IN BRACKETS (1951 - 2001)

Sector/ Census year	1951	1961	1971	1981	1991	2001
1	2	3	4	5	6	7
Total	**671,158**	**1,019,806**	**1,414,183**	**1,771,643**	**2,171,145**	**2,479,155**
Rural	620,978	948,360	1,317,531	1,649,383	2,001,648	2,253,537
	(92.5)	(93.0)	(93.2)	(93.1)	(92.2)	(90.9)
Urban	50,180	71,446	96,652	122,260	169,497	225,618
	(7.5)	(7.0)	(6.8)	(6.9)	(7.8)	(9.1)

The percentage of rural population of the district has declined from 92.5 in 1951 to 90.9 in 2001 i.e. only 1.6 percentage point decrease during last 50 years. Alternatively percentage of urban population has increased from 7.5 per cent in 1951 to 9.1 per cent in 2001. So the proportion of trend of urbanization is very less.

(a) Distribution of population in rural-urban areas :

It can be seen from the above table that the proportion of rural population has increased from 92.5 in 1951 to 93.2 in 1971. During 1971-81 there was marginal (0.1 percentage point) decrease of proportion of rural population and after that upto 2001 it has decreasing trend and gone down to 90.9 in 2001 but the maximum decline happened between 1991 to 2001. Alternatively, the proportion of urban population has decreased from 7.5 per cent in 1951 to 6.8 in 1971 and from 1981 to 2001 the percentage of urban population has increased form 6.9 to 9.1.

(b) Size, Class and status of town :

There are six municipalities viz. Haldibari, Mekliganj, Mathabhanga, Koch Bihar, Tufanganj and Dinhata in the district of Koch Bihar out of which Koch Bihar with population content of 76,874 falls in class II category, Mathabhanga municipality and Dinhata municipality with population content of 21,107 and 34,273 respectively fall in class III category, Haldibari municipality, Mekliganj municipality and Tufanganj municipality belong to class IV category.

Among four census towns, two census towns viz. Khagrabari and Guriahati belong to class IV category, Kharimala Khagrabari census town falls in class V category and Bhangri Pratham Khanda with population content of 4,113 falls in class VI category.

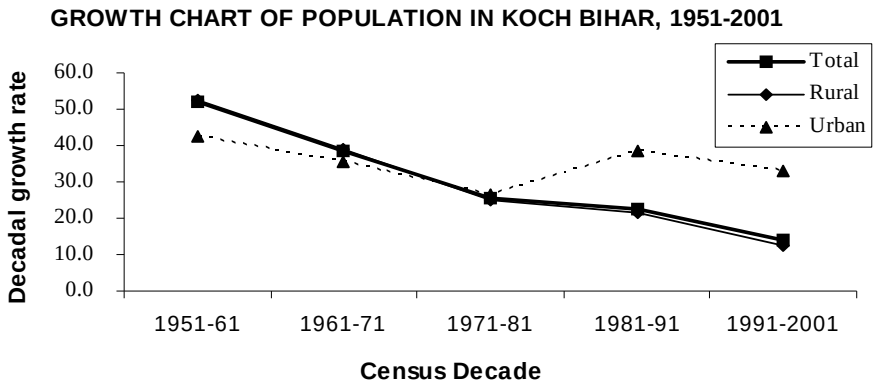

Growth Rate :

An overall picture of growth rate of the district for the last five decades can be observed from Table-2 below :

TABLE - 2 : DECADAL GROWTH RATE OF POPULATION IN THE DISTRICT OF KOCH BIHAR (1951 - 2001)

T/R/U	1951-61	1961-71	1971-81	1981-91	1991-2001
1	2	3	4	5	6
Total	**52.4**	**38.7**	**25.3**	**22.5**	**14.2**
Rural	53.3	38.9	25.2	21.4	12.6
Urban	42.4	35.3	26.5	38.6	33.1

It is observed from the above table that the total decadal growth rate of Koch Bihar district has decreased steadily from 52.4 per cent in 1951-61 to 14.2 in 1991-2001. Rural growth rate also declined from 53.3 per cent in 1951-61 to 12.6 in 1991-2001. But the urban growth rate does not follow any definite pattern. During 1951-61, the urban growth rate was 42.4, which declined to 35.3 in 1961-71 and 26.5 in 1971-81 and rose to 38.6 per cent in 1981-91 and declined to 33.1 per cent in 1991-2001.

The above chart shows that the district has decreasing trend both in total and rural segments during the last 5 decades. During the same period also the urban growth rate has decreasing trend except 1981-91.

Sub district level :

The highest decadal growth rate has been recorded in case of Haldibari CD Block at 20.6 per cent along with the maximum rural growth rate. The lowest growth rate is observed in Dinhata-I CD Block at 6.1 per cent with minimum rural and urban growth rate of 7.6 per cent and (-)33.1 per cent respectively. Out of 12 CD Blocks of the district, 7 have recorded higher decadal growth rate compared to district growth rate more than or equal to 20.0 per cent during 1991-2001.

Among the 10 urban units of the district the highest decadal growth rate has been recorded in the case of Dinhata Municipality with 93.7 per cent, followed by Mekliganj Municipality with 32.1 and Guriahati census town with 23.3. The lowest and minus growth rate is observed in Bhangri Pratham Khanda census town with (-)33.3 per cent. All the urban units except Dinhata Municipality have recorded lower growth rate as compared to average urban growth rate of the district.

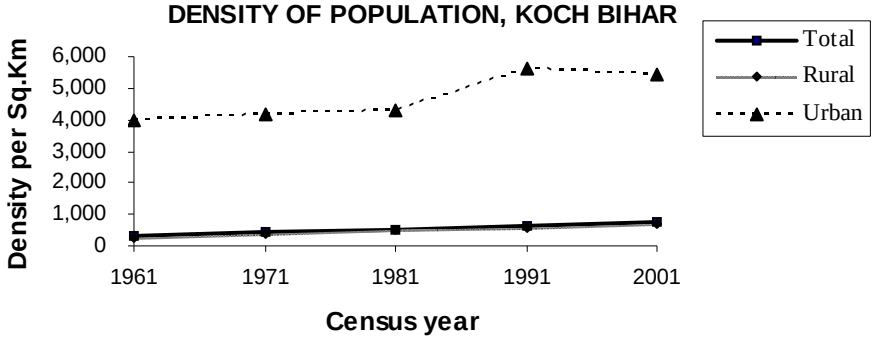

Density of population

West Bengal has the highest population density among the States at 904 persons per sq.km. It was 767 per sq. km. in 1991. Koch Bihar has density of population at 641 persons per sq. km. in 1991 which has gone up to 732 per sq. km. in 2001but is lower than the state density. The rank of the district in terms of density is 10th in the State in 2001. The rural urban trend of the district can be observed in the table (3) below :

TABLE - 3 : DENSITY OF POPULATION IN THE DISTRICT OF KOCH BIHAR (1961 - 2001)

T/R/U	1961	1971	1981	1991	2001
Total	**305**	**418**	**523**	**641**	**732**
Rural	280	392	491	596	674
Urban	3,969	4,184	4,282	5,648	5,458

It is seen from the above table that the total density of population for the district has increased steadily from 305 in 1961 to 732 in 2001.The rural and urban density of population also increased steadily from 1961 to 2001. The urban density of population, like other districts of West Bengal is much higher than that of overall district average and rural density.

It is observed from the chart that during 1961-2001 the increasing trend of total and rural density of the district is marginal. But in case of urban, during 1961-81 the increasing trend is marginal and in 1981-91 the density of population has increased maximum but in 2001 it has decreased in comparision to 1991 census.

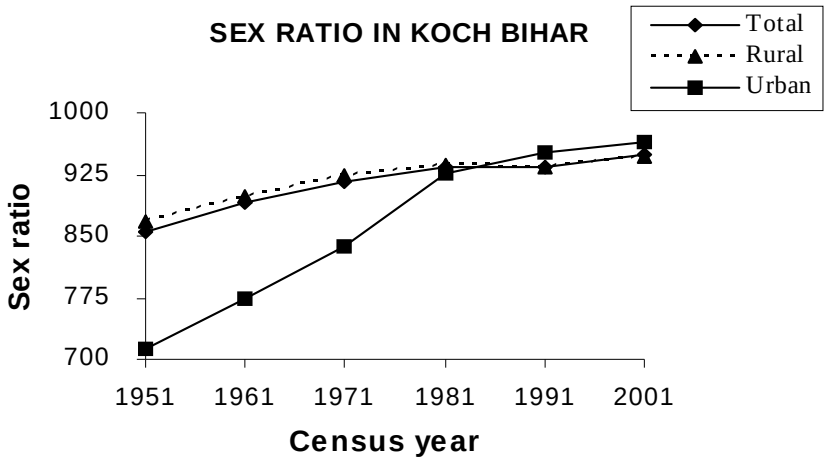

Sex ratio

The sex ratio of the district of Koch Bihar in 2001 is 949, which was 935 in 1991. For the last 50 years the sex ratio of Koch Bihar by rural urban has been shown in Table-4 below :

TABLE - 4 : SEX-RATIO IN KOCH BIHAR DISTRICT (1951-2001)

	Sex Ratio		
Census Year	Total	Rural	Urban
1951	855	867	713
1961	890	899	774
1971	916	923	837
1981	935	936	927
1991	935	933	951
2001	949	947	964

It is evident from the above table that the sex ratio for total, rural and urban areas of the district has increased steadily except total and rural areas of 1991. In case of district average, it has increased from 855 in 1951 to 949 in 2001 but in 1981 and 1991 the sex ratio was same at 935. In rural areas the sex ratio has increased from 867 in 1951 to 936 in 1981 and declined to 933 in 1991 and again increased to 947 in 2001. In urban areas, the sex ratio has increased steadily from 713 in 1951 to 964 in 2001 but in 1981, the highest increase is observed and in 2001 it is the minimum. The urban sex ratio, except 1991 and 2001, has always been lower than that of rural and the district total.

The above chart indicates that the sex ratio of the district at all levels, i.e. overall 5 decades has growing trend. From 1981 to 2001 both total and rural sex ratios are almost same. The urban sex ratio has increased steadily but during 1991 and 2001 it is more than that of total and rural.

Sub district level :

In the case of all the CD Blocks of Koch Bihar district, there is similar improvement in the sex ratio in favour of the females. The highest sex ratio has been observed both in Tufanganj-II and Dinhata-II with 965 females per 1,000 males. In 1991, Sitai CD Block had the highest sex ratio at 951 whereas Tufanganj-II and Dinhata-II were the second and third highest respectively with 945 and 943. Among all the urban units of the district, Kharimala Khagrabari census town has the highest sex ratio with 985 and Mekliganj municipality has the lowest with 939 in 2001.

Work participation rate

The work participation rate by percentage of total workers and its rural-urban break up of both district and state can be found in the table below :

TABLE- 5 : PERCENTAGE OF TOTAL WORKERS (MAIN +MARGINAL) TO TOTAL POPULATION (1951-2001)

Year	Koch Bihar			West Bengal		
	Total	Rural	Urban	Total	Rural	Urban
1951	29.6	29.4	31.9	34.7	32.6	40.9
1961	31.8	32.0	29.7	33.2	32.7	34.7
1971	27.6	27.7	27.1	27.9	27.2	30.1
1981	29.8	30.0	26.6	30.2	30.3	29.8
1991	32.1	32.5	28.4	32.2	33.2	29.6
2001	39.0	39.6	32.5	36.8	37.9	33.9

Note : Concept of Main workers and Marginal workers was introduced in 1981

It is apparent that since 1951 the district percentage of total workers to total population has continuously been lower than the state average except 2001, where it is higher than the state average. In case of rural areas, except 1971 and 2001, all the years since 1951 the district percentage of total workers to total population has been lower than that of state average. For urban areas, it is observed that since 1951 to 2001 the district percentage of total workers to total population has continuously been lower than the State average. While in case of state, it is observed that the percentage of urban workers compared to that of rural workers is higher from 1951 to 1971 and lower from 1981 to 2001 but at the district level, the percentage of urban workers has always been less than the percentage of rural workers except 1951. Another important factor in determining the occupational engagement of the population in the classification of workers into main and marginal workers. As can be seen from the definition of para (iii) census concept, a main worker is one who has worked for six months or more in a producing capacity while the marginal worker is one who has worked for less than six months in the year preceding the census. The percentage of main workers by sex for Koch Bihar and West Bengal from 1951-2001 is given in the table below for ready comparison.

TABLE 6 : PERCENTAGE OF MAIN WORKERS TO TOTAL POPULATION BY SEX (1951-2001)

Year	Koch Bihar			West Bengal		
	Person	Male	Female	Person	Male	Female
1951	29.6	50.4	5.2	34.7	54.8	11.3
1961	31.8	56.8	3.7	33.2	54.0	9.4
1971	27.6	51.4	1.7	27.9	48.8	4.4
1981	29.0	53.0	3.4	28.3	48.7	5.8
1991	30.6	53.3	6.3	30.2	50.7	8.0
2001	30.4	50.3	9.5	28.7	47.0	9.1

Note : Concept of Main workers and Marginal workers was introduced in 1981

It is seen from the above table that 1951 to 1971 the district percentage of main workers is lower than that of state and after that upto 2001 district percentage overtakes the state percentage. In case of male main workers, the district percentage has been higher than the State percentage upto 2001 except 1951. In case of female main workers, the district percentage is lower than the State percentage for all the census years from 1951 to 1991 and slightly higher in 2001.

Comparative trend of literacy rate

It is evident from table-7 below that during the decade 1991-2001 literacy rates in Koch Bihar district has improved by 20.5 per cent points which is the highest for this district in the post independence period. Similarly, rural literacy in Koch Bihar has increased by 21.4 per cent and urban literacy by 8.0 per cent points during the same period.

Comparative analysis of improvement in literacy rate at district level with that of State shows that in 1981 and 2001 Koch Bihar overtakes the State percentage points until 2001. In 2001, Koch Bihar's percentage point increase of 20.5 as against 10.9 percentage points for the State is very significant.

TABLE – 7 : COMPARATIVE LITERACY RATE BY SEX AND RESIDENCE, WEST BENGAL AND KOCH BIHAR WITH CHANGE IN DECENNIAL PERCENTAGE POINT IN PARENTHESIS (1951-2001)

		West Bengal			Koch Bihar		
Year	T/R/U	P	M	F	P	M	F

		(10.9)	(9.2)	(13.1)	(20.5)	(18.6)	(22.8)
	R	63.4	73.1	53.2	64.3	74.4	53.6
		(12.9)	(11.1)	(15.0)	(21.4)	(19.3)	(23.8)
	U	81.3	86.1	75.7	85.2	90.4	79.8
		(6.0)	(4.9)	(7.5)	(8.0)	(7.8)	(8.2)

Note : Upto 1971 Literacy rate was calculated excluding 0-4 age group population. From 1981 onwards Literacy rate is calculated excluding 0-6 age group population.

Sub district level :

The highest percentage point increase in literacy rate among the rural areas of Koch Bihar district has been noticed in case of Mathabhanga-II CD Block, where the literacy rate jumped from 40.4 in 1991 to 67.4 in 2001 registering an increase of 27.0 per cent points. Next comes Dinhata-II CD Block wherein literacy rate increased from 41.4 to 65.9 showing an increase of 24.5 points between 1991-2001. However, among the CD Blocks, the highest literacy rate has been observed in Cooch Behar-II with 73.9 in 2001. In 1991 also, Cooch Behar-II CD Block had the highest literacy rate among all the CD Blocks with 56.5, followed by Cooch Behar-I with 49.2 and Tufanganj-I with 44.6. In case of male and female literacy rate in 2001 among the CD Blocks, Cooch Behar-II has recorded the highest with 82.5 for male and 64.7 for female. The lowest literacy rate among the CD Blocks has been observed in Sitai CD Block, which also has the lowest male literacy rate in 2001 at 63.8 and lowest female literacy rate at 41.8. Among the urban units of the district, Koch Bihar Municipality has recorded the highest decadal growth of literacy rate from 79.1 in

1991 to 88.6 in 2001, i.e. an increase of 9.5 points. However, the highest literacy rate has been observed in Tufanganj Municipality with 89.9, followed by Koch Bihar Municipality at 88.6 whereas the lowest literacy rate is observed in Mekliganj Municipality at 69.8 per cent.

Religion

Religion is also one of the basic cultural characteristics of the population. In a secular country like India, several religions have thrived and every decennial census has attempted to provide an interesting picture of the religious persuasion of the people of the country. The data on religion practised by persons gives the content of population of each of the six major communities viz. Hindus, Muslims, Christians, Sikhs, Buddhists and Jains and combined figures for 'other religions and persuasions' and 'religion not stated'. The table-8 below gives the distribution of population by religion since 1961 for Koch Bihar district.

TABLE - 8 : POPULATION BY RELIGION IN KOCH BIHAR DISTRICT (1961-2001)

Year	Hindu	Muslim	Jain	Christian	Buddhist	Sikh	Other Religion & Persuasions	Religion Not Stated	Total Population
	1	2	3	4	5	6	7	8	9
1961	775,514	242,371	867	745	107	202	-	-	1,019,806
	(76.1)	(23.8)	(0.1)	(0.1)	(0.0)	(0.0)			(100.0)
1971	1,111,017	300,496	1,524	1,076	49	21	-	-	1,414,183
	(78.6)	(21.3)	(0.1)	(0.1)	(0.0)	(0.0)			(100.0)
1981	1,399,844	368,176	2,000	1,333	273	14	3	-	1,771,643
	(79.0)	(20.8)	(0.1)	(0.1)	(0.0)	(0.0)	(0.0)		(100.0)
1991	1,659,733	506,728	2,093	1,467	353	215	52	504	2,171,145
	(76.4)	(23.3)	(0.1)	(0.1)	(0.0)	(0.0)	(0.0)	(0.0)	(100.0)
2001	1,871,857	600,911	2,193	2,162	474	330	489	739	2,479,155
	(75.5)	(24.2)	(0.1)	(0.1)	(0.0)	(0.0)	(0.0)	(0.0)	(100.0)

Note : Figures within brackets indicate percentage to total population

It is observed from the above table that Hindus constitute the maximum population by religion in Koch Bihar district being followed by Muslims and Jains. The percentage of Hindu population to total population has increased from 76.1 in 1961 to 79.0 in 1981 and decreased to 76.4 in 1991 and again decreased to 75.5 in 2001. The percentage of Muslim population has decreased to 23.8 in 1961 to 20.8 in 1981 and increased to 23.3 in 1991 and again increased to 24.2 in 2001. The third highest position is occupied by Jains, whose percentage follows an uniform pattern from 1961 to 2001. A table pertaining to six numerically biggest religions is shown in Annexure-V.

TABLE - 9 : AVAILABILITY OF UNIVERSITY EDUCATION IN THE DISRICT OF KOCH BIHAR

18	Tufanganj (M)	16,418	0	16,418	19,310		19,310	17.6	-	17.6	100.0	100.0
	District Total :	**2,171,145**	**2,000,648**	**169,497**	**2,479,155**	**2,253,537**	**225,618**	**14.2**	**12.6**	**33.1**	**7.8**	**9.1**

Table 1 shows that during 1991-2001 there is marginal difference between the overall growth of the district total (14.2 per cent) and the rural total (12.6 per cent). However, the urban growth rate is much higher (33.1 per cent) as against the district average during 1991-2001. Among the 12 blocks, Haldibari has recorded the highest growth rate (20.6 per cent) and Dinhata-I the lowest with 6.1 percent because of declassification of its urban portion in 2001 (merger of its part mouza with Dihata Municipality. The second highest growth rate being Mekliganj (20.0 per cent). Going by the district's rural frame, Haldibari becomes the highest with 20.6 per cent growth rate and Dinhata-I the lowest with 7.6 per cent. The urban proportion in CD Block Cooch Behar-I is 9.2 per cent in 2001, which is the highest and Dinhata-I with 1.6 per cent is the lowest among all the CD blocks which have urban portion.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Serial Number	District / CD Block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percentage of villages

Total number of inhabited villages in the Koch Bihar district is 1,138 spread over 12 CD Blocks and the lowest population size of less than 200 persons is found in 82 villages (7.2 per cent). The highest population size of 10,000 and above have been reported in 18 villages (1.6 per cent). The highest number of 279 (24.5 per cent) villages are in the population size of 2,000-4,999. The number of villages in the population size of 1,000-1,999 are 275, the second highest 24.2 per cent of the total numbers of villages in Koch Bihar.

TABLE 3 : NEW TOWNS DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

Serial Number	Name of the District	District Code	Sl. No.	Name of Town
(a) New				
(i) Statutory Town				
	: N I L :			
(ii) Census Town				
1	Koch Bihar	03	1	Khagrabari
(b) Denotified				
(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns				
	: N I L :			
(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria				
	: N I L :			
(iii) Census towns of 1991 census are notified as statutory town in 2001 census				
	: N I L :			
(c) Declassified				
	: N I L :			
(d) Wholly merged with other town (s)				
	: N I L :			

Note : Declassified means the Census Towns of 1991 census which failed to satisfy the demographic and economic criteria.

As per Table 3, no new statutory town has been created in the Koch Bihar district during 2001 Census. One new census town has been created, viz., Khagrabari in 2001. There has been no de-notification whatsoever in 2001. There is no town in the district which has been wholly merged with other town. No census town of 1991 census has been notified as statutory town in 2001 Census.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	1	0.1	11	0.0
11-20	2	0.2	39	0.0
21-50	3	0.3	214	0.0
51-100	9	0.8	5,327	0.2
101-200	29	2.5	17,040	0.8
201-300	43	3.8	30,724	1.4
301-500	186	16.3	214,696	9.5
501 +	865	76.0	1,985,486	88.1
Not known	0	0.0	0	0.0
District Total :	**1,138**	**100.0**	**2,253,537**	**100.0**
Population Density (Rural) of the district :		**678.5**		

As per Table 4, the population density (Rural) of the district is 678.5 per sq. km. Out of 1,138 villages, 865 (76.0 per cent) villages have the highest range of population density of 501+, percentage distribution of population being 88.1 per cent. 1 village (0.1 per cent) has the lowest range of population density of 0-10 persons per sq. km. Percentage distribution of villages in density range 11-20 person is 2 (0.2 per cent). The second highest number of villages in the density range of 301-500 per sq. km. are 186 villages. It can safely be concluded that the villages in Koch Bihar are basically of larger sizes.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census year	West Bengal			Koch Bihar		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	945	994	650	881	892	540
1911	925	982	614	873	885	529
1921	905	971	591	877	888	875
1931	890	961	578	886	896	621
1941	852	945	559	879	893	608
1951	865	939	660	855	867	713
1961	878	943	701	890	899	744
1971	891	942	751	916	923	837
1981	911	947	819	935	936	927
1991	917	940	858	935	933	951
2001	934	950	893	949	947	964

Note : Sex ratio has been defined here as the numbers of Femals per 1,000 Males.

The sex ratio of Koch Bihar has been lower than that of state average from 1901 to 1931 and also in 1951 and higher in 1941 and from 1961 to 2001. The sex ratio of the state has continuously declined from 1901 to 1941 and then continuously increased from 1951 to 2001 whereas sex ratio of the district has increased from 1921 to 1931, declined in 1941 and 1951 and again increased continuously from 1961 to 2001.

TABLE 6 : SEX RATIO BY CD BLOCKS, 2001

Serial Number	Name of CD Block	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Haldibari	937	937	-
2	Mekliganj	930	930	-

9	Dinhata - I	948
10	Dinhata - II	965
11	Sitai	955
12	Sitalkuchi	941
	District (Rural) Total :	**947**

Table-7 represents sex ratio of Koch Bihar district at exclusively rural level. Among the 12 CD Blocks of the district, Tufanganj-II and Dinhata-II both the CD blocks again have the highest sex ratio with 965 and Mekliganj again has the lowest sex ratio at 930.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	8	0.7	1,449	0.1
700-749	6	0.5	4,013	0.2
750-799	17	1.5	6,322	0.3
800-849	45	4.0	26,454	1.2
850-899	132	11.6	143,871	6.4
900-949	379	33.3	999,911	44.4
950-999	372	32.7	908,469	40.3
1,000-1,099	152	13.4	153,511	6.8
1,100+	27	2.4	9,537	0.4
District Total :	**1,138**	**100.0**	**2,253,537**	**100.0**
Sex ratio (Rural) for District :		**947**		

Koch Bihar being basically a rural district its maximum population, in absolute number 2,253,537, dwells in 1,138 villages and range of sex ratio for villages of the district extends from less than 700 to 1100+ as per Table 8. The highest number of villages being 379 which is 33.3 per cent of the total number of villages and 44.4 per cent of the population fall in the sex ratio range of 900-949. The lowest number of villagers being 6 accounting for 0.5 per cent of the total villages and 0.2 per cent of total population come under sex ratio range of 700-749.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial Number	Name of UA / Town	Urban status of town	Sex ratio
1	2	3	4
1	**Dinhata**	**UA**	**962**
	(a) Bhangri Pratham Khanda	CT	946

It is observed from Table 14 that 50.1 per cent and 0.6 per cent of total population of Koch Bihar belong to scheduled castes and scheduled tribes respectively. Scheduled castes constitute 53.1 per cent of the rural and 19.9 per cent of the urban population. Scheduled tribes constitute of 0.6 per cent of rural and only 0.5 per cent of the urban population.

At the CD Block level the highest percentage of scheduled castes population is found in Mekliganj at 71.4 and the lowest percentage of scheduled castes is in Cooch Behar-I at 40.5. Likewise, the highest percentage of scheduled tribes are found in Tufanganj-II at 1.9 and the lowest percentage are in Sitai (in percentage 0 and in absolute number 8). Out of 12 CD Blocks 9 are totally rural. The rural scenario is identical with exception of Cooch Behar-I, Cooch Behar-II and Dinhata-I which have rural-urban break up and therefore percentage of SC and ST population of these three CD Blocks in rural areas differ from its CD Block total.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN CD BLOCKS, 2001

Serial Number	Name of CD Block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population

District (Rural) Total :		**2,253,537**	**1,197,449**	**13,136**	**53.1**	**0.6**

Table 15 presents total population of the rural district alongwith number and percentage of exclusively rural scheduled caste and scheduled tribes population in CD Blocks. Koch Bihar district being basically rural with only exception of Cooch Behar-I, Cooch Behar-II and Dinhata-I. Exclusively rural scheduled caste population of Cooch Behar-I, Cooch Behar-II and Dinhata-I are 111,326, 131,915 and 110,695 in absolute number and scheduled tribe population are 980, 2712 and 743 respectively. The scheduled caste and scheduled tribe population constitute respectively 53.1 and 0.6 per cent of the total rural population of

the district. It is higher in 6 CD Blocks in the range of 54.8 to 71.4, 6 CD Blocks have percentage of SC population below the district rural total starting with 50.6 down to 43.1 the lowest. In case of the ST population the district rural total is 0.6 per cent with 8 CD Blocks having lowest percentage than the district rural average and 4 CD Blocks have highest percentage than the district rural total.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	26	2.3	0	0.0
Less than 5	33	2.9	1,131	0.1
5-10	44	3.9	5,075	0.4
11-20	76	6.7	27,623	2.3
21-30	80	7.0	52,428	4.4
31-40	104	9.1	92,877	7.8
41-50	115	10.1	174,370	14.6
51-75	281	24.7	413,560	34.5
76 and above	379	33.3	430,385	35.9
District Total :	**1,138**	**100.0**	**1,197,449**	**100.0**

It is seen from Table 16 that total scheduled caste population of Koch Bihar is 1,197,449 living in 1,112 villages. Out of them 379 villages have more than 76.0 per cent of the total population being scheduled caste the highest range. 26 villages have no scheduled caste population and 33 villages have less than 5 per cent of the total population being scheduled caste.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	948	83.3	0	0.0
Less than 5	151	13.3	4,028	30.7
5-10	21	1.8	3,135	23.9
11-20	12	1.1	3,133	23.9

	(b) Dinhata (M)	34,273	5,240	84	15.3	0.2
2	Haldibari (M)	13,185	4,296	234	32.6	1.8
3	Khagrabari (CT)	19,787	4,941	50	25.0	0.3
4	**Koch Bihar (UA)**	**103,008**	**15,244**	**550**	**14.8**	**0.5**
	(a) Guriahati (CT)	18,901	3,073	46	16.3	0.2
	(b) Kharimala Khagrabari (CT)	7,233	956	64	13.2	0.9
	(c) Koch Bihar (M)	76,874	11,215	440	14.6	0.6
5	Mathabhanga (M)	21,107	4,318	55	20.5	0.3
6	Mekliganj (M)	10,835	5,517	78	50.9	0.7
7	Tufanganj (M)	19,310	4,079	59	21.1	0.3
	District (Urban) Total :	**225,618**	**44,925**	**1,110**	**19.9**	**0.5**

Number and percentage of scheduled caste and scheduled tribe population in UAs/Towns are 44,925 and 1,110 respectively. Scheduled castes constitute 19.9 and scheduled tribes constitute 0.5 per cent of total urban population of Koch Bihar. Koch Bihar (UA) has the biggest concentration of scheduled castes with 15,244 in percentage 14.8, but going by the number and percentage of scheduled caste population to total population of specific UAs/Towns it is not the highest. That position is occupied by Mekliganj Municipality which has 5,517 SCs out of total population of 10,835 that makes its percentage of 50.9 the highest. Kharimala Khagrabari census town has the lowest scheduled caste population in absolute number and percentage of 956 (13.2) to total population. In case of the scheduled tribe population Koch Bihar UA also has the highest number of persons with 550 or 0.5 per cent to the total population. However, both Dinhata Municipality and Gutiahati CT have the lowest percentage of scheduled tribe population which is 0.2 per cent of the total urban population.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN CD BLOCKS, 2001

Serial Number	Name of CD Block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Haldibari	936	939
2	Mekliganj	939	880
3	Mathabhanga - I	944	684
4	Mathabhanga - II	947	974
5	Cooch Behar - I	943	929
6	Cooch Behar - II	941	863
7	Tufanganj - I	970	1061
8	Tufanganj - II	976	943
9	Dinhata - I	949	987
10	Dinhata - II	963	894
11	Sitai	961	333
12	Sitalkuchi	949	195
	District (Rural) Total :	**951**	**916**

As per above table no. 19, the sex ratio for the scheduled castes and scheduled tribes are 951 and 916 respectively in the rural areas of the district. Tufanganj-II has the highest sex ratio among the scheduled caste population with 976. Haldibari having the lowest at 936. In case of the scheduled tribes, Tufanganj-I has the highest sex ratio at 1,061 with Sitalkuchi having in the lowest at 195 females per 1,000 males.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial Number	Name of U.A./ Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	**Dinhata UA**	**981**	**1,000**
	(a) Bhangri Pratham Khanda (CT)	960	0
	(b) Dinhata (M)	986	1,000
2	Haldibari (M)	972	828
3	Khagrabari (CT)	981	724
4	**Koch Bihar (UA)**	**1,018**	**1,029**
	(a) Guriahati (CT)	941	1,000
	(b) Kharimala Khagrabari (CT)	975	1,065
	(c) Koch Bihar (M)	1,044	1,028
5	Mathabhanga (M)	989	719
6	Mekliganj (M)	936	902
7	Tufanganj (M)	990	1,185
	Sex ratio (Urban) for the district :	**988**	**947**

Table 20 above gives the urban sex ratio for Koch Bihar district for scheduled castes and schedule tribes. Sex ratio for scheduled castes for the district is 988 and for scheduled tribes it is 947 females per 1,000 males. Koch Bihar Municipality has the highest sex ratio for scheduled castes with 1,044 while Mekliganj Municipality has the lowest with 936. For the scheduled tribes, Tufanganj (M) has highest sex ratio at 1,185 and Mathabhanga (M) having the lowest with 719.

Table no. 21 gives number of literates and illiterates at the CD Block level. The overall literacy rate for the district is 66.3 (male 75.9, female 56.1). The male literacy rate is higher by 19.8 points than that of females. The urban literacy rate (85.2) is higher by 20.9 per cent points than the rural literacy rate (64.3). The male-female literacy gap is more pronounced in rural areas.

There is also wide inter CD Block disparity in literacy rate. It is as high as 73.9 in Cooch Behar-II CD Block and as low as 53.1 in Sitai CD Block. By sex the highest literacy rate is recorded both for male and female in Cooch Behar-II with 82.5 and 64.7 respectively. The lowest literacy rate is obtained in Sitai CD Block both for males (63.8) and for females (41.8). The maximum male-female literacy gap is observed in Mekliganj and Mathabhanga-I CD Block (24.4) and the minimum in Cooch Behar-II CD Block (17.8).

12	Sitalkuchi	76,616	47,030	29,586	87,092	37,315	49,777	56.9	67.5	45.5	22.0
District (Rural) Total :		**1,214,404**	**722,947**	**491,457**	**1,039,133**	**434,294**	**604,839**	**64.3**	**74.4**	**53.6**	**20.8**

Table 22 gives the same data as in Table 21 but in respect of rural areas only. It can be seen from the above table that the overall literacy rate for the rural areas of the district is 64.3 (males 74.4, females 53.6). The CD Blocks – Mathabhanga-II, Cooch Behar-I, Cooch Behar-II, Tufanganj-I, Tufanganj-II and Dinhata-II have registered higher literacy rate than the district. Haldibari, Mekliganj, Mathabhanga-I, Dinhata-I, Sitai and Sitalkuchi have recorded lower literacy rate than that of rural district average. The literacy position by sex indicates that the highest rural literacy both for male and female is in Cooch Behar-II (male 81.9, female 63.6) while the lowest is in Sitai CD Block (male 63.8, female 41.8).

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	0	0.0	0	0.0
1-10	1	0.1	394	0.0
11-20	0	0.0	0	0.0
21-30	3	0.3	274	0.0
31-40	24	2.1	19,529	0.9
41-50	92	8.1	112,488	5.0
51-60	302	26.5	617,640	27.4
61-70	439	38.6	993,293	44.1
71-80	220	19.3	445,880	19.8
81-90	52	4.6	62,762	2.8
91-99	4	0.4	1,264	0.1
100	1	0.1	13	0.0
District Total :	**1,138**	**100.0**	**2,253,537**	**100.0**
Literacy rate for District :		**66.3**		

Table 23 gives the distribution of villages by range of literacy rate. It can be observed from the above table that there is no inhabited village in which there is illiterate. The above table also indicates that as the literacy rate increases from the base level, the number of inhabited villages, their percentage distribution, population and percentage distribution of population increase upto literacy rate range 61-70 excepting literacy range of 11-20 where there is no illiterate. Thereafter all variables start to decline. The highest number of villages (439), alongwith highest percentage distribution of villages (38.6), highest population (993,293) and maximum percentage share of population (44.1) fall in literacy range of 61-70.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name and urban status of UA/Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

	District (Urban) Total :	**172,561**	**93,249**	**79,312**	**53,057**	**21,604**	**31,453**	**85.2**	**90.4**	**79.8**	**10.6**

Table 24 as above gives the urban literates and literacy rate for the UAs and towns. The above table shows that on an average 85.2 per cent of urban population is literate. The male literacy (90.4 per cent) is higher by 10.6 per cent points than that of female literacy (79.8 per cent). Among the towns, Tufanganj Municipality has registered the highest literacy rate (89.9 per cent) while the lowest is reported in Mekliganj Municipality (69.8 per cent). The highest both male and female literacy is also noticed in Tufanganj Municipality (male 95.0, female 84.7). Lowest male and female literacy is found in Mekliganj Municipality (male 78.3, female 60.8).

TABLE 25 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN CD BLOCKS, 2001

Serial Number	Name of CD Block	Number of literates and illiterates						Percentage of literates			Gap in male/ female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Haldibari	29,120	18,150	10,970	28,950	11,846	17,104	61.4	73.8	48.1	25.7

10	Dinhata - II	53,787	31,692	22,095	38,683	15,424	23,259	67.8	78.5	56.7	21.8
11	Sitai	29,379	18,228	11,151	35,490	14,856	20,634	53.8	65.5	41.6	23.9
12	Sitalkuchi	42,614	26,628	15,986	47,176	19,434	27,742	56.9	69.2	43.9	25.3
District (Rural) Total :		**646,925**	**392,218**	**254,707**	**550,524**	**221,635**	**328,889**	**63.9**	**75.5**	**51.7**	**23.8**

The above table clearly demonstrates that 63.9 per cent of the rural scheduled caste population is literate with 75.5 per cent males and 51.7 per cent females giving a male-female literacy gap of 23.8 per cent points. The highest literacy rate is observed in Cooch Behar-II CD Block (70.9) closely followed by Dinhata-II CD Block (67.8) and the lowest is noticed in Sitai CD Block (53.8). Again, the highest literacy rate among the males (81.7) and females (59.4) is seen in Cooch Behar-II CD Block while the lowest for males (65.5) and females (41.6) is returned by Sitai CD Block. The highest male-female literacy gap is recorded in Mathabhanga-I CD Block (27.4) and the lowest in Tufanganj-I CD Block (21.1). The literacy situation in Sitai CD Block (53.8) is much behind the overall literacy average among the rural scheduled castes of the district (63.9). The literacy among the people of Sitalkuchi (56.9) and Mathabhanga-I (60.4) CD Blocks is slightly better than that of Sitai CD Block. It is also seen from the table that literacy rate for all the CD Blocks is more than 50 per cent.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	2	0.2	3	0.0
1-10	0	0.0	0	0.0
11-20	3	0.3	61	0.0
21-30	5	0.4	207	0.0
31-40	21	1.9	6,378	0.5
41-50	80	7.2	58,064	4.8
51-60	280	25.2	304,435	25.4
61-70	435	39.1	609,003	50.9
71-80	238	21.4	203,094	17.0
81-90	42	3.8	15,737	1.3
91-99	3	0.3	453	0.0
100	3	0.3	14	0.0
District Total :	**1,112**	**100.0**	**1,197,449**	**100.0**
Literacy rate for District (Rural) :		**63.9**		

There are only 2 such inhabited villages (0.2 per cent) consisting of negligible per cent (3 in absolute number) of scheduled caste population where there is no literate. As literacy rate goes higher and higher, the number of villages also increases and maximum villages (435) are concentrated in literacy range 61-70 per cent with highest proportion of villages (39.1 per cent) and the highest share of scheduled

caste population (50.9 per cent). Thereafter, as the literacy range increases the number of villages their proportion and population and its proportion tend to go down with the only exception in cent per cent literacy range where the number of villages, their proportion is same as the literacy range of 91-99 but the percentage share of scheduled caste population is negligible.

TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Sl. No.	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/ female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

7	Kharimala Khagrabari (CT)	647	348	299	309	136	173	76.4	82.5	70.4	12.1
8	Guriahati (CT)	2,063	1,191	872	1,010	392	618	75.6	84.8	65.9	18.9
9	Khagrabari (CT)	3,150	1,769	1,381	1,791	725	1,066	72.4	80.9	63.9	17.0
10	Bhangri Pratham Khanda (CT)	709	413	296	581	245	336	63.7	72.8	54.2	18.6
	District (Urban) Total :	**29,799**	**16,548**	**13,251**	**15,126**	**6,045**	**9,081**	**74.9**	**83.1**	**66.7**	**16.4**

Among the urban scheduled caste population of Koch Bihar district, 74.9 per cent are literates with males 83.1 per cent and females 66.7 per cent. Among the 10 urban units, Tufanganj Municipality with 84.4 per cent literacy is on the top and Mekliganj Municipality with 61.2 per cent literacy is on the bottom in respect of literacy rate. In case of the scheduled caste males, the highest literacy rate is recorded in Tufanganj Municipality (92.3) whereas the lowest in Mekliganj Municipality (72.4). In case of scheduled caste females also the highest literacy rate is returned by Tufanganj Municipality (76.5) and the lowest by Mekliganj Municipality (49.3). The overall male-female literacy gap in the urban scheduled caste population is 16.4 per cent points. The highest gap in male-female literacy rate is seen in Mekliganj Municipality (23.0 per cent) and the lowest in Kharimala Khagrabari census town (12.1 per cent points). It is interesting to note that the gap in male-female literacy rate in Kharimala Khagrabari census town (12.1) is even much lower than that of prevailing in all the six municipal towns of the district which indicates that there is greater amount of female autonomy and lesser gender bias towards females in the matter of education in Kharimala Khagrabari census town.

TABLE 28 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN CD BLOCKS, 2001

Serial Number	Name of CD Block	Number of literates and illiterates						Percentage of literates			Gap in male/ female literacy rate
		Number of literates			Number of illiterates

Contd. ..

Serial Number	Name of CD Block	Number of literates and illiterates						Percentage of literates			Gap in male/ female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
10	Dinhata - II	440	302	138	456	171	285	56.9	71.7	39.2	32.5
11	Sitai	5	5	0	3	1	2	83.3	100.0	0.0	100.0
12	Sitalkuchi	43	38	5	6	3	3	91.5	97.4	62.5	34.9
District (Rural) Total :		**5,879**	**3,733**	**2,146**	**7,257**	**3,122**	**4,135**	**53.6**	**65.3**	**40.9**	**24.4**

The literacy situation of rural scheduled tribe population is very bleak. Just 53.6 per cent among the rural tribal population is literate with 65.3 per cent males and 40.9 per cent females. Among the various CD Blocks of the district Koch Bihar, the maximum literacy rate is registered by Sitalkuchi CD Block (91.5) followed by Sitai CD Block (83.3) and Cooch Behar-I CD Block (64.0) and the minimum is seen in Mathabhanga-I CD Block (40.4). Among the males the highest literacy rate is observed in Sitai CD Block (100) followed by Sitalkuchi CD Block (97.4) and Cooch Behar-I (75.2) and the lowest in Mathabhanga-I CD Block (50.0). Among the females, the highest literacy rate is recorded in Sitalkuchi CD Block (62.5) and the lowest in Sitai CD Block where all the females (2) are illiterate.

The male literacy is higher by 24.4 per cent points than the female literacy rate. The largest gap in male-female literacy rate is found in Sitai CD Block (100 per cent points) while the lowest in Tufanganj-I (17.3 per cent points). While analysing the literacy situation prevailing in different CD Blocks it is important to keep in mind that the very small numerical size of population of Haldibari, Mathabhanga-I, Tufanganj-I, Sitai and Sitalkuchi CD Blocks for considering only proportion would not give the clear picture in relation to large population of other CD Blocks.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	14	7.4	37	0.3
1-10	1	0.5	75	0.6
11-20	3	1.6	76	0.6
21-30	9	4.7	663	5.0
31-40	11	5.8	437	3.3
41-50	24	12.6	3,944	30.0
51-60	31	16.3	5,143	39.2

71-80	13	6.8	861	6.6
81-90	12	6.3	279	2.1
91-99	4	2.1	80	0.6
100	48	25.3	140	1.1
District Total :	**190**	**100.0**	**13,136**	**100.0**
Literacy rate for District (Rural) :		**55.3**		

There are 14 such inhabited villages without any literate scheduled tribe population consisting of 7.4 per cent of villages and 0.3 per cent scheduled tribe population. As the literacy range goes up, the number of villages and their proportion, scheduled tribe population and its percentage distribution increases upto literacy range 51-60 excepting the literacy range of 31-40 where scheduled tribe population and its percentage distribution has decreased. The maximum number of villages (48) and their corresponding proportion (25.3 per cent) are maximum in the range of literacy rate of 100. The number of villages tend to decrease as the literacy range increases from 61-70 upto literacy range of 91-99 then in the next literacy range of 100, it increased again. Only 1 such inhabited village is there in the literacy range of 1-10 consisting of 0.5 percent of villages and 0.6 per cent scheduled tribe population.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial Number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/ female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Haldibari (M)	38	24	14	196	104	92	20.3	25.0	15.4	9.6
2	Mekliganj (M)	51	26	25	27	15	12	81.0	86.7	75.8	10.9
3	Mathabhanga (M)	47	29	18	8	3	5	92.2	96.7	85.7	11.0
4	Koch Bihar (M)	355	190	165	85	27	58	89.0	96.0	82.1	13.9
5	Tufanganj (M)	42	21	21	17	6	11	93.3	100.0	87.5	12.5
6	Dinhata (M)	62	32	30	22	10	12	92.5	94.1	90.9	3.2
7	Kharimala Khagrabari (CT)	45	19	26	19	12	7	86.5	79.2	92.9	-13.7
8	Guriahati (CT)	35	18	17	11	5	6	89.7	90.0	89.5	0.5
9	Khagrabari (CT)	38	23	15	12	6	6	84.4	88.5	78.9	9.5
District (Urban) Total :		**713**	**382**	**331**	**397**	**188**	**209**	**75.2**	**79.7**	**70.6**	**9.2**

It can be seen from the above table that among the urban scheduled tribe population of the district, 75.2 per cent is literate with 79.7 percent males and 70.6 per cent females. Among the towns having scheduled tribe population, the highest literacy rate is exhibited by Tufanganj Municipality (93.3) and the lowest by Haldibari Municipality (20.3). The highest literacy rate among the males is recorded in Tufanganj Municipality (100.0) while the lowest in Haldibari Municipality (25.0). In case of females, the highest literacy rate is returned from Kharimala Khagrabari census town (92.9) whereas the lowest by Haldibari Municipality (15.4). The overall male-female literacy gap in the urban scheduled tribes population is 9.2 per cent points. The largest gap is seen in Koch Bihar Municipality (13.9 per cent points) and the least in Kharimala Khagrabari census town (-13.7 per cent points).

Out of the total population of 24,79,155 in Koch Bihar the main workers account for 30.4 per cent, marginal workers 8.6 per cent, total workers 39.0 per cent and non-workers 61.0 per cent. The sex differentials in work participation reveals that a much lower percentage of the female population i.e. 22.2 per cent are engaged in productive activities compared to males (54.9 per cent). Further, among male and female workers, the proportion of male main workers is abnormally high than that of the females and under marginal workers category, female proportion is much higher than that of males.

The CD Block level analysis of work participation rate reveals that Mathabhanga-I CD Block recording 33.9 per cent main worker as the highest percentage. Haldibari CD Block with 27.8 per cent main workers as the lowest. In case of marginal workers, the highest proportion is noticed in Dinhata-II CD Block (16.7 per cent) whereas the lowest is in Haldibari CD Block (2.9 per cent). In respect of total workers, the highest proportion is recorded in Dinhata-II CD Block (48.5 per cent) and lowest in Haldibari CD Block (30.7 per cent). In case of non-workers, Haldibari CD Block has the highest percentage (69.3 per cent) and Dinhata-II CD Block has the lowest (51.5 per cent). The sex differentials in participation of economic activities reflect that the highest proportion of male total workers is registered in Dinhata-II CD Block (58.7 per cent) and the lowest in Haldibari (52.2 per cent). So far as female total workers are concerned, the highest percentage is in Dinhata-II CD Block (37.9 per cent) while the lowest is in Haldibari CD Block (7.8 per cent).

		Females	**1,096,296**	**103,547**	**9.4**	**151,705**	**13.8**	**255,252**	**23.3**	**841,044**	**76.7**

The work participation in the rural areas of Koch Bihar district is shown in Table 32 above. It can be seen from the above table that in the rural areas 39.6 per cent of the rural population are workers and 60.4 per cent non-workers. The main workers constitute 30.4 per cent and marginal workers 9.2 per cent of the total population.

The highest rural proportion of main workers has been obtained in Mathabhanga-I CD Block (33.9 per cent) and the lowest in Haldibari CD Block (27.8 per cent). Among male main workers, the highest percentage is in Mathabhanga-I CD Block (53.0 per cent) while the lowest participation is recorded in Tufanganj-II CD Block (48.0 per cent). In case of female main workers, the highest proportion is noticed in Mathabhanga-I (13.7 per cent) and lowest in Haldibari CD Block (5.1 per cent).

The highest share of marginal workers in rural areas of this district has been registered in Dinhata-II CD Block (16.7 per cent) and the lowest in Haldibari (2.9 per cent). The proportion of male marginal workers is lower than that of their female counterparts.

There is increase in ratio between males' and females' participation rate in case of main and marginal workers i.e. male proportion is higher in main workers whereas female proportion is higher in marginal workers.

The largest proportion of total workers has been observed in Dinhata-II CD Block (48.5 per cent) which is much higher as compared to district rural average (39.6 per cent), while the lowest is in Haldibari CD

Block (30.7 per cent).

The highest proportion of non-workers is witnessed in Haldibari CD Block (69.3 per cent) and the lowest is in Dinhata-II CD Block (51.5 per cent).

It is evident from the above table that out of the total urban population of Koch Bihar district, 30.4 per cent is main workers, 2.1 per cent is marginal workers and 67.5 per cent is non-workers.

Individual town level analysis indicates that the highest proportion of main workers (31.7 per cent) is in Mathabhanga Municipality and lowest (27.4 per cent) in Mekliganj Municipality. In case of marginal workers, the highest proportion is recorded in Mekliganj Municipality (4.3 per cent) and lowest in Koch Bihar

Municipality (1.1 per cent). The proportion of non-workers varies from the lowest recorded in Mathabhanga Municipality (65.1 per cent) to the highest in Mekliganj Municipality (68.2 per cent). The proportion of female non-workers is as high as 90 per cent in Dinhata Municipality.

Note : Percent of Worker to total worker are given in brackets

Table 34 as above contains broad classification of the working population to number and percentage in case of Koch Bihar. It can be seen from the above table that the highest percentage of workers are engaged as Cultivators (37.4 per cent) followed by Agricultural Labourers (29.5 per cent), Other Workers (29.0 per cent) and Household Industry Workers (4.1 per cent) for the rural areas of the district. The male and female participation as cultivators is more or less closer (males 39.7 per cent, females 31.5 per cent). In case of Agricultural Labourer, the female participation is remarkably higher (43.0 per cent) than that of the males (24.4 per cent). Female workers have shown encouraging representation in other works also, though their proportion (17.6 per cent) is still much lower as compared to their male counterparts (33.4 per cent).

The pattern of distribution of total workers into different categories at CD Block level portrays that the highest proportion of workers employed as Cultivators is registered in Sitalkuchi CD Block (56.2 per cent) and the lowest in Tufanganj-I CD Block (31.5 per cent). The highest proportion in agricultural labourer category is returned from Sitai CD Block (41.3 per cent) and the lowest is found in Cooch Behar-I CD Block (25.5 per cent). Under Household Industry, the highest proportion is recorded in Tufanganj-I CD Block (12.9 per cent) and the lowest in Mekliganj CD Block (0.8 per cent). So far as the Other Worker is concerned the highest percentage of workers employed in this sector is reported from Cooch Behar-II CD Block (36.7 per cent) and the lowest from Sitai (11.9 per cent).

Note : Percent of Worker to total worker are given in brackets

The above table shows that in the rural areas of Koch Bihar 40.4 per cent of the Total Workers are Cultivators, 31.8 per cent Agricultural Labourers, 4.0 per cent are engaged in Household Industry and remaining 23.7 per cent are employed as Other Workers. By sex, female Agricultural Labourers (45.1 per cent) are much higher compared to male Agricultural Labourers (26.5 per cent). Under household industry proportion of female workers (7.7 per cent) is much higher compared to male workers (2.5 per cent). But under Other Workers one can see the reverse trend, i.e., proportion of the male workers (27.6 per cent) is much higher than that of the female workers (14.1 per cent).

The CD Block level analysis of distribution of total workers among four industrial categories indicates that there is wide disparity in the economic activities among the various CD Blocks. Percentage of Cultivators is as high as 56.2 in Sitalkuchi CD Block and as low as 31.5 in Tufanganj-I CD Block. In case of Agricultural Labourers, the percentage of workers varies greatly from the lowest being in Tufanganj-I CD Block (26.5 per cent) to the highest in Sitai CD Block (41.3 per cent). In Household Industry, the highest proportion of workers are engaged in Tufanganj-I CD Block (12.9 per cent) as against the lowest proportion found in Mekliganj (0.8 per cent). Likewise, in case of other works, the highest proportion of workers have been noticed in Cooch Behar-II CD Block (34.0 per cent) and the lowest in Sitai CD Block (11.9 per cent).

Table 36 gives the town wise number and percentage of the four categories of workers. It can be observed from the above table that a majority of the urban working population (92.9 per cent) are engaged in Other Works followed by Household Industry (4.4 per cent). More than one per cent of the workers are engaged as Cultivators as well as Agricultural Labourers. By sex 94.5 per cent of male workers and 85.3 per cent of female workers are engaged in Other Works. In Household Industry, the percentage of female workers is much higher (12.3 per cent) compared to the male percentage (2.7 per cent). Almost same proportion of male and female workers are reported to be engaged as Agricultural Labourers (male 1.6, female 1.7).

The pattern of distribution of total workers in four categories shows that the largest proportion of workers are employed as Cultivators and Agricultural Labourers are recorded in Mekliganj Municipality (5.4 per cent and 7.3 per cent) respectively, among all the municipal and non-municipal towns (census towns). In case of Household Industry, the highest proportion of workers

has been observed in Tufanganj Municipality (10.8 per cent) followed by Kharimala Khagrabari (9.4 per cent) and Bhangri Pratham Khanda census town (8.2 per cent), Khagrabari census town (7.5 per cent) and Guriahati census town (5.9 per cent). The proportion of Other Workers varies from the lowest being in Bhangri Pratham Khanda (82.9 per cent) to highest obtained in Koch Bihar Municipality (97.5 per cent).

Brief Analysis of Inset Tables based on Village & Town Directory (37-47)

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Collection of village-wise amenities has been a feature of Indian census since 1961. Though such amenities data is basically non-census in nature, they are very useful for having a direct view of the existing infrastructural status of each village in the district. They can also be used as important inputs for future development planning in the district.

In Table 37 we have given CD Block-wise position of villages so far as availability of educational, medical, improved drinking water, post office, telephone, transport, banking, approach to villages and power supply. It can be seen from the above table that education amenity is available in 83.2 per cent villages, medical facility in 66.6 per cent villages, improved drinking water in 99.3 per cent villages, post office in 21.1 per cent villages, telephone in 14.9 per cent villages,

transport and communication in 31.1 per cent villages, banks in 7.3 per cent villages, agricultural credit societies in 17.9 per cent villages, pucca road linkage in 45.6 per cent villages and electricity is available in 51.2 per cent villages in Koch Bihar.

In case of educational facilities among the CD Blocks, the most served CD Block is Tufanganj-II with 94.4 per cent villages having educational amenity. Mekliganj is the least served CD Block with 54.0 per cent of villages having this facility. In case of medical facility, Tufanganj-II CD Block (83.3 per cent) has the highest percentage of villages having this facility as against only 37.0 per cent obtained in Tufanganj-I CD Block. So far as the availability of improved drinking water is concerned out of 12 CD Blocks, cent per cent villages are served by this facility in 7 CD Blocks. (Mathabhanga-I, Mathabhanga-II, Cooch Bihar-I, Cooch Bihar-II, Tufanganj-I, Sitai and Sitalkuchi). Of the remaining CD Blocks, the level of availability varies from Dinhata-I and Dinhata-II CD Block (99.2 per cent each) to Tufanganj-II CD Block (94.4 per cent). The availability of postal facilities ranges from the highest proportion recorded in Tufanganj-II CD Block (37.0 per cent) to the lowest in Mekliganj CD Block (13.7 per cent). Telephone facility is available in 37.4 per cent of the villages in Cooch Behar-II CD Block to 0.7 per cent noticed in Mekliganj CD Block. In respect of availability of bus, rail or navigable waterway connectivity of the villages, Tufanganj-II CD Block (55.6 per cent) has the highest percentage of villages having this facility while least of the villages having this facility is observed in Mathabhanga-I CD Block (17.8 per cent). In case of availability of banking services, the most served CD Block is Tufanganj-I with 12.3 per cent of villages having this facility whereas the least served CD Block is Mekliganj (3.6 per cent). The Agricultural Credit Societies are available in as many as 53.0 per cent of villages in Cooch Behar-II CD Block against just 7.1 per cent registered in Haldibari CD Block. In case of proportion of villages connected with pucca road, the highest is in Tufanganj-I CD Block (57.5 per cent) while the lowest is in Sitai CD Block (18.9 per cent). The highest number of villages has been electrified in Cooch Behar-I CD Block (69.2 per cent) and the least in Mathabhanga-I CD Block (22.8 per cent).

		(100)	**(95.7)**	**(82.6)**	**(99.4)**	**(46.0)**	**(29.0)**	**(49.0)**	**(21.0)**	**(34.9)**	**(60.7)**	**(67.4)**

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 has given the same data as Table 37 but for the rural areas in each CD Block. It can be seen from the above table that on an average 95.7 per cent of population of the district is served by some educational facility within their villages; medical facility is available to 82.6 per cent, improved drinking water to 99.4 per cent, post office to 46.0 per cent, telephone to 29.0 per cent, transport and communication facility to 49.0 per cent, banking services to 21.0 per cent, Agricultural Credit Society to 34.9 per cent, approach by pucca road to 60.7 per cent and electricity is available to 67.4 per cent of population within the villages.

The analysis of availability of various infrastructural facilities to the rural population within their villages reflects that among CD Blocks, maximum population is served by educational facility in Tufanganj-II CD Block (99.6 per cent) and minimum in Mekliganj CD Block (79.3 per cent). Maximum population is served by availability of medical facilities in Haldibari CD Block (94.9 per cent) while the minimum population served is in Mekliganj CD Block (61.7 per cent). In case of availability of improved drinking water the highest percentage of population is served in Dinhata-II CD Block (99.6 per cent) while the lowest in Tufanganj-II CD Block (95.8 per cent). It may be mentioned here that improved drinking water is available to the entire population in Mathabhanga-I, Mathabhanga-II, Cooch Behar-I, Cooch Behar-II, Tufanganj-I, Sitai and Sitalkuchi CD Blocks. Thus out of 12 CD Blocks it is available to total population in 7 CD Blocks and in 5 CD Blocks it is available to more than 95 per cent of the entire population. The highest percentage of population served by post office is noticed in Tufanganj-II CD Block (64.4 per cent) whereas the lowest in Dinhata-I CD Block (26.0 per cent). The maximum population served by the telephone facility is observed in Haldibari CD Block (64.8 per cent) while the minimum is found in Mekliganj CD Block (0.9 per cent).

In case of availability of transport communication facilities Tufanganj-II CD Block with 69.8 per cent is the highest served and Mathabhanga-I CD Block with 27.8 per cent is the least served. The situation of availability of banking services shows that the highest percentage of population is served in Tufanganj-I CD Block (41.4 per cent) while the lowest is obtained in Sitai CD Block (2.6 per cent). The highest services of Agricultural Credit Societies is available in Cooch Behar-II CD Block (70.8 per cent) while the lowest is seen in Tufanganj-I CD Block (14.1 per cent) against the overall average of the district (34.9 per cent). The highest percentage of population living in villages approachable by pucca road is in Haldibari CD Block (79.8 per cent) as against the minimum percentage observed in Sitai CD Block (23.3 per cent). The highest proportion of population served by electricity is found in Tufanganj-I CD Block (80.6 per cent) in contrast to the lowest percentage registered in Mathabhanga-I CD Block (33.4 per cent).

On the basis of above analysis it is crystal clear that there is a wide variation in availability of

infrastructual facilities among the CD Blocks. For the balanced socio-economic development it is essential that the infrastructural and basic amenities are available on uniform basis. Thus poorly served areas should have preferential treatment in allocation of scarce resources in local area planning.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	189	27	0	216
(b) Middle School	603	283	68	954
(c) Degree College	99	261	775	1,135
2. Medical:-				
(a) Hospital	266	385	487	1,138
(b) PHC	311	457	330	1,098
3. Post Office	704	184	11	899
4. Telephone	348	272	349	969
5. Bus Service	529	246	26	801
6. Banks				
(a) Commercial Bank	593	383	107	1,083
(b) Cooperative Bank	149	289	671	1,109
7. Agricultural Credit Societies	518	235	181	934

For those villages which do not have some/any of the listed amenities, Table -39 shows the number of such villages in various distance ranges from the nearest available facilities. It can be seen from the above table that 216 villages have no primary school but majority of villages (189) can have this amenity within 5 kilometres. A total of 954 villages do not have middle school but majority of villages (603) can have this amenity within a distance of 5 kilometres. In case of degree college level education, majority of the villages are away from this amenity.

For 1,138 villages which do not have the hospital in the village itself most of the villages (487) can avail of the same at a distance range of 10 kilometres and above. Out of 1,098 villages reported as not having primary health centre, most of the villages (457) can avail of it within 5-10 kilometres.

In case of post office, out of total 899 villages not having this amenity, most of the villages (704) can avail the same within 5 kilometres.

So far as the availability of telephone facility is concerned, 969 villages do not have the same but most of the villages (349) can reach this facility at a distance of 10 kilometres and above from the village. In 801 villages there is no bus station, but most of the villages (529) can have the bus services within 5 kilometres.

In 1,083 villages there is no commercial bank but bulk of villages (593) can avail the commercial banking facility located within just 5 kilometres. Further, out of 1,109 villages reporting not having co-operative bank, a majority of villages (671) can avail of this facility at a distance of 10 kilometres and above.

In 934 villages wherein Agricultural Credit Societies are not available, a majority of villages (518) can reach this facility located within 5 kilometres range for the respective villages.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office #	Telephone	Transport communi-cations $	Banks	Agricultural Credit Societies	Approach by pucca road
1	2	3	4	5	6	7	8	9	10
less than 5	48	34	27	5	10	19	4	3	35
	(100.0)	(70.8)	(56.3)	(10.4)	(20.8)	(39.6)	(8.3)	(6.3)	(72.9)
5 -15	659	545	438	147	113	210	49	135	314
	(100.0)	(82.7)	(66.5)	(22.3)	(17.1)	(31.8)	(7.4)	(20.5)	(47.6)
16 - 50	412	352	279	82	45	119	28	64	163
	(100.0)	(85.4)	(67.7)	(19.9)	(10.9)	(28.9)	(6.8)	(15.5)	(39.6)
51+	14	11	12	4	1	5	1	2	6
	(100.0)	(78.6)	(85.7)	(28.6)	(7.1)	(35.7)	(7.1)	(14.3)	(42.9)
Unspecified	5	5	2	2	0	1	1	0	1
	(100.0)	(100.0)	(40.0)	(40.0)	(0.0)	(20.0)	(20.0)	(0.0)	(20.0)
District total :	**1,138**	**947**	**758**	**240**	**169**	**354**	**83**	**204**	**519**
	(100.0)	**(83.2)**	**(66.6)**	**(21.1)**	**(14.9)**	**(31.1)**	**(7.3)**	**(17.9)**	**(45.6)**

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

With the analysis of this table, the urban effect on amenities of rural areas can easily be understood. In case of most of the amenities such as telephone, transport communication, banks and approach by pucca road, they tend to concentrate within 5 kilometres range from the nearest statutory towns in terms of proportion of villages having these amenities. In case of education when distance range goes up from less than 5 kilometres to 16-50 kilometres the proportion of villages goes up and then go down in the distance range of 51+ kilometres, but in case of medical the proportion of villages continuously going up to the distance range of 51+ kilometres. For post offices proportion of villages goes up from less than 5 kilometres to 5-15 kilometres, goes down in 16-50 kilometres and again goes up in 51+ kilometres. Proportion of villages continuously goes down as the distance range increases from less than 5 kilometres to 51+ kilometres for telephone. Proportion of villages is maximum in the distance range of 5-15 kilometres for Agricultural Credit Societies.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Population range	Number of inhabited villages in each range	Type of amenity available									
		Educa-tion	Medical	Improved drinking water*	Post Office #	Tele-phone	Transport communi-cations $	Banks	Agricultural Credit Societies	Approach by Pucca road	Power supply

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

It can be seen from the above table that availability of various amenities is directly related to the population size of the villages. It means that with the increase in population size of the villages, the proportion of villages having these amenities also increases in each population range. The only exception is noticed in case of improved drinking water in the range of 1,000 - 1,999 and 2,000 - 4,999 wherein the proportion of villages availing improved drinking water facility marginally declined by 0.3 and 0.4 respectively.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial Number	Name of CD Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Haldibari	56	15,080.30	78.6	23.5
2	Mekliganj	139	28,398.07	73.4	9.4
3	Mathabhanga - I	101	31,703.65	71.5	23.9
4	Mathabhanga - II	92	30,924.07	59.7	14.9
5	Cooch Behar - I	143	35,125.90	78.2	9.8
6	Cooch Behar - II	115	37,969.05	76.5	8.7
7	Tufanganj - I	73	31,699.88	76.8	28.7
8	Tufanganj - II	54	26,569.38	69.0	18.5
9	Dinhata - I	127	27,713.51	79.9	14.7
10	Dinhata - II	118	24,697.84	76.2	19.6
11	Sitai	53	16,081.96	79.6	15.3
12	Sitalkuchi	67	26,190.19	80.0	11.9
	District Total :	**1,138**	**332,153.80**	**74.6**	**16.1**

Note : Cultivable area = irrigated area + unirrigated area

It can be observed from the above table that there are 1,138 inhabited villages in Koch Bihar spreading over an area of 3,32,153.8 hectares. Out of this total area, 74.6 per cent of land is cultivable and out of the cultivable area 16.1 per cent area is under irrigation. Among the CD Blocks, the proportion of cultivable area varies between the lowest area recorded in Mathabhanga-II (59.7 per cent) and the highest in Sitalkuchi (80.0 per cent). The proportion of irrigated area and the cultivable area varies among the CD Blocks. It is found that the lowest is 8.7 per cent in Cooch Behar-II CD Block and the highest is 28.7 per cent in Tufanganj-I. Irrigation is one of the most important input in agriculture for higher production and thus immediate attention to the CD Blocks with low percentage of cultivable area under irrigation is essential for improvement in agricultural production in Koch Bihar. The in-depth analysis of the pattern of irrigated area to total cultivable are at CD Block level shows that out of 12 CD Blocks, 7 CD Blocks (Mekliganj, Mathabhanga-II, Cooch Behar-I, Cooch Behar-II, Dinhata-I, Sitai and Sitalkuchi) are reported having less irrigated area than the district rural average (16.1 per cent).

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial Number	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Admini-stration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	III Dinhata (M)	453.6	54.9	398.7	280.7	51.7	24.6	15.4	0.0	189.0
2	IV Haldibari (M)	944.2	34.0	910.2	851.8	193.1	252.3	325.9	13.3	67.2
3	II Koch Bihar (M)	784.3	103.2	681.1	426.5	97.9	181.6	20.9	5.9	120.2
4	III Mathabhanga (M)	273.5	67.3	206.2	221.5	98.6	22.4	18.8	0.0	81.6
5	IV Mekliganj (M)	898.2	39.5	858.7	898.2	189.4	190.5	455.6	53.6	9.1
6	IV Tufanganj (M)	420.7	24.8	395.9	400.3	109.1	53.4	235.1	1.8	0.9
	District Total :	**637.4**	**71.7**	**565.7**	**431.5**	**103.0**	**123.6**	**92.9**	**7.1**	**105.0**

The above table reveals that in all the 6 towns (Dinhata, Haldibari, Koch Bihar, Mathabhanga, Mekliganj and Tufanganj) the main source of revenue of the local bodies is income derived from municipal properties and power apart from taxation. In case of Dinhata Municipality per capita expenditure is the highest (189.0) in the field of others while it is lowest (15.4) in public works and per capita expenditure is zero in public institutions. In Haldibari Municipality public works has recorded the highest (325.9) per capita expenditure and the lowest in public institutions (13.3). Public health and conveniences is the highest (181.6) field of per capita expenditure for Koch Bihar Municipality whereas public institutions are the lowest (5.9). In Mathabhanga Municipality general administration has recorded the highest (98.6) per capita expenditure and lowest (18.8) in public works and nil expenditure being in public institutions. In Mekliganj Municipality per capita expenditure is the highest in the field of public works (455.6) and lowest in other (9.1) and in Tufanganj muinicipality public works (235.1) is the highest and public institutions (1.8) is the lowest in terms of per capita expenditure.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial Number	Name and urban status of Town	Type of educational institution

6	Tufanganj (M)	10.4	2.1	2.1	2.1	0.5
	District Total :	**7.7**	**1.7**	**1.7**	**1.3**	**0.4**

It can be seen from the above table that in urban areas of Koch Bihar, there are 7.7 primary schools, 1.7 middle schools, 1.7 secondary schools, 1.3 senior secondary schools and 0.4 colleges per 10,000 population. In case of primary school it is highest in Tufanganj Municipality (10.4 per cent). Mathabhanga Municipality had recorded highest number of middle schools and secondary schools with 2.4 per cent each. Haldibari Municipality has 0.8 colleges which is the highest whereas Mathabhanga Municipality and Mekliganj Municipality have no colleges.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial Number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Bhangri Pratham Khanda (CT)	0
2	Dinhata (M)	53
3	Guriahati (CT)	0
4	Haldibari (M)	46
5	Khagrabari (CT)	0
6	Kharimala Khagrabari (CT)	0
7	Koch Bihar (M)	75
8	Mathabhanga (M)	57
9	Mekliganj (M)	111
10	Tufanganj (M)	40
	Distrct Total :	**50**

The above table shows that in urban areas of the district Koch Bihar as a whole there are 50 beds in medical institutions per 10,000 population. The town-wise position reveals that in census town Bhangri Pratham Khanda, Guriahati, Kharibari and Kharimala Khagrabari there is no medical institution. Mekliganj Municipality is having the highest number of beds (111) per 10,000 population and 40 beds in Tufanganj Municipality per 10,000 population is the minimum.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial Number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
There is no Slum in the District				

There is no town in Koch Bihar district, which have slum area.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial Number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Bhangri Pratham Khanda (CT)	Bidi	Tobacco
			Jute
2	Dinhata (M)	Clothes	Jute
		Bidi	Tobacco
		Tobacco Products	Vegetables
3	Guriahati (CT)	Tobacco Products	Jute
			Timber
			Tobacco
4	Haldibari (M)	Tobacco	Vegetables
		Jute Products	Jute
		Bamboo Products	Tobacco

Serial Number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
5	Khagrabari (CT)	Muri	Paddy
		Chira	Jute
		Bidi	Vegetables
6	Kharimala Khagrabari (CT)	Handloom Sarees	Jute
			Tobacco
7	Koch Bihar (M)	Tobacco Products	Handloom Sarees
		Plywood	Tobacco Products
		Handloom Sarees	Jute
8	Mathabhanga (M)	Tobacco Products	Jute
		Plyboard	Tobacco
		Soap	Timber
9	Mekliganj (M)	Mekhla	Tobacco
			Jute
10	Tufanganj (M)	Mustard Oil	Jute
		Bidi	Betelnut
		Handloom Clothes	Mustard Seeds

It can be seen from the above table that mainly tobacco products are manufactured in Dinhata Municipality, Guriahati census town, Haldibari Municipality, Koch Bihar Municipality and Mathabhanga Municipality and exported from all urban units of the district except Kharibari census town and Tufanganj Municipality. Jute is another important commodity in the district, which is exported from all the urban units.

Brief Analysis of Inset Tables based on Houses & Household Amenities data of Houselisting Operations (48-52)

Data source : Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

The analysis of ownership status of houses presents some uncommon features regarding occupation of number of room under different tenure categories.

It is observed from the table that the availability of living room in owned category is better than that of rented category for the district as a whole and also for rural and urban areas with median number of 2 rooms. In 'others' category, the median room number is one for the district as well as for its rural and urban components. So far as the schedule caste households are concerned, the median size number of rooms is two for the district as a whole and also for rural areas. However in urban areas the position is same for all (owned, rented and others) the categories with median number of one room. Among the scheduled tribe households, it is one for each tenure category at the district level and also in rural urban segments, except in rented category in urban areas where it is 2 rooms.

TABLE 49 : PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Sl. No.	District/ CD Block	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary

District Total :		**14.7**	**56.8**	**28.3**	**10.6**	**58.6**	**30.7**	**57.2**	**38.9**	**3.8**

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note:-

Permanent :- 1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e. where, burnt briks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets bricks, lime and stone and RBC/RCC concreate are used for roof.

Semi permanent:- 2 Semi-permanent houses refer to those houses made of other types of materials.

Temporary:- 3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo, mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc.are used for roofs.

It can be seen from the above table that in Koch Bihar 14.7 per cent households live in permanent houses, 56.8 per cent in semi-permanent and 28.3 per cent live in temporary houses. The proportion of households living in permanent houses in urban areas (57.2 per cent) is much higher when compared to corresponding figures for rural areas (10.6 per cent). In contrast, households living in urban areas in semi-permanent and temporary houses is much lower than the percentage of households living in rural areas which shows the poor housing condition found in rural areas in respect of durability of houses.

Among the CD Blocks, the highest percentage of households (15.4 per cent) live in permanent houses in Cooch Behar-I and the lowest percentage (6.3 per cent) live in Haldibari. Again, the lowest proportion of households living in semi-permanent (40.0 per cent) and living in temporary houses (16.2 per cent) are recorded in Sitalkuchi and Tufanganj-I and the highest proportion of households living in semi-permanent houses (74.3 per cent) and temporary houses (52.1 per cent) are noticed in Tufanganj-I and Sitalkuchi CD Block respectively.

TABLE 50 : PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE , ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

*Based on the improved drinding water source, drinking water source, drinding water supply has been classified as Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is comsidered as having access to 'Inproved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note : Percentage is to be given in brackets after the number of households.
Bathroom means bathroom within the house
Toilet means toilet within the house.
Drainage menas closed and open drainage.

It is evident from the above table that in Koch Bihar district, 80.4 per cent households have access to improved drinking water facility, 12.8 per cent have electricity, 8.6 per cent have bathroom facility, 29.0 per cent have toilet facility and 13.4 per cent households have drainage. As expected, the percentage of households having these facilities in urban areas is much higher as compared to corresponding figures in the rural areas. Water is the bare minimum necessity to support the human life, which is available to the lowest proportion of households in Mekliganj CD Block (12.9 per cent) and to the highest proportion of households in Sitai CD Block (92.6 per cent). The highest proportion of households served by electricity is noticed in Cooch Behar-II CD Block (16.0 per cent) while the lowest in Mathabhanga-I CD Block (3.1 per cent). In case of availability of bathroom, the maximum households have been found served in Cooch Behar-II CD Block (10.1 per cent) and the minimum in Mathabhanga-I CD Block (2.3 per cent). The availability of toilet facility varies between the lowest percentage returned in Mekliganj CD Block (10.2 per cent) and the highest obtained in Cooch Behar-II CD Block (45.3 per cent). The highest percentage of households connected with drainage to dispose of waste water is reported from the Cooch Behar-I Block (13.1 per cent) whereas the lowest is in Sitai CD Block (5.3 per cent).

Percentage in brackets

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

The pattern of fuel for cooking in Koch Bihar district shows that the percentage of household using firewood for cooking is higher in rural areas (54.4 per cent) than that of urban (46.0 per cent). Surprisingly the proportion of households using electricity for cooking is same in rural areas (0.1 per cent) and urban areas (0.1 per cent). Another striking feature is that the percentage of households using bio-gas as fuel for cooking is zero in rural areas as compared to 0.2 per cent recorded in urban areas. It shows near absence of technical know-how and financial constraint for constructing bio-gas plant in rural areas. Fire wood is the main fuel for cooking (53.7 per cent) in the district followed by crop residue (32.0 per cent), others (5.7 per cent), cooking gas (LPG) (4.0 percent), cow-dung cake (2.6 per cent), kerosene (1.0 per cent), coal/lignite (charcoal) (0.2 per cent), electricity (0.1 per cent) and bio-gas (0.0 per cent). About 1.0 per cent (0.7) households have no cooking in their houses. Undoubtedly, they have taken meal outside.

Among the CD Blocks the predominant fuel used for cooking is firewood in Koch Bihar district except Haldibari where crop residue is the predominant fuel for cooking.

Data source : Census of India 2001, H-series: Table on Houses, Household amenities and Assets.

Out of a total number of 5,21,425 households in the district, 101,102 (19.4 per cent) are availing banking services. Further, out of total households, radio/ transistor is available to 87,240 (16.7 per cent) households, television to 57,101 (11.0 per cent) households, telephone to 12,735 households (2.4 per cent), bicycle to 2,12,601 (40.8 per cent) households scooter/motor cycle/moped to 11,191 (2.1 per cent) households, car/jeep/van to 5,737 (1.1 per cent) households and 2,67,980 (51.4 per cent) households have none of these assets. This number is much higher in urban areas as compared to rural areas. Banking services are very much instrumental in bringing about socio-economic change and development in our society but is availed by about one-fifth of the total households.

CD Block level analysis shows that the highest proportion of households availing banking services is returned from Cooch Behar-II (24.6 per cent) while lowest from Sitai (7.4 per cent). The proportion of households having none of the specified assets is highest in Sitai CD Block (67.0 per cent) whereas the lowest in Cooch Behar-II CD Block (42.6 per cent). This shows wide inter CD Block disparity prevailing in the social and economic status of the people.

Brief description of places of religious, historical or archaeological importance in villages and places of tourist interest in the towns of the district and major charecteristics of the district

The Koch Bihar town has been declared as a heritage town for its immense archaeological monuments among whom the palace of the Koch Bihar is very beautiful which attracts tourists from different parts of the country. Of late, the Archaeological Survey of India has taken the palace along with the huge surrounding garden area. They have renovated the palace and the surrounding garden in proper tune. Beautiful lighting system has also been fitted which is admired by the tourists.

Gossanimari : Kamteswari temple is situated in Gossanimari. This temple carries the heritage of the Bengali Temple Architecture of the 17th Century AD. Both the deity and the temple are very impressive. It is located 13 kilometres away from Dinhata town on the south. It is also known as Kamtapur and is associated with the history of Koch Bihar.

Rajpat : In this place the capital of the erstwhile Koch Bihar kingdom is said to have been located. The fort of the place is ascribed to Raja Nilambara, the 3rd and last king of Khen (1430-1498) who was overthrown by Hussain Shah of Bengal. Rajpat sitated about 11 kilometres away from Dinhata town.

Baneswar : This place is located about 13 kilometres north - east of Koch Bihar town and famous for an ancient Siva Temple built by King Prannarayan during the year 1665. At the time of Sivaratri - a big fair is held at this place and pilgrims from distant places visit this temple.

The temple itself along with the pond and the surrounding garden is very beautiful.

Dhuliabari : This place is located 7 kilometres away from Koch Bihar town. A famous temple of God Siva is located there. Maharaja Upendranarayan (1714-1760) built this temple.

Fulbari : This place is located at a distance of 2 kilometres from Tufanganj town. There is a ruin of the palace built by Chila Roy, the general and the brother of King Naranarayan can be witnessed here.

Madhopur Dham : This place is located about 8 kilometres away in north west of Koch Bihar town. A famous Vishnu Temple is located there, which was built by the religious preacher Sankaradeb of Assam. It is a holy place among the people of Assam and people from different parts of Assam use to pay visit the temple.

Madan Mohan Temple : The most famous and beautiful temple called 'Madan Mohan Temple' is located in the heart of the Koch Bihar town. The high temple of Madan Mohan along with temples of Siva, Durga, Kali and different 'Avatars' of lord 'Vishnu' are located in a large campus decorated with beautiful garden and ornamental plants and trees. During the time of Rash Purnima a big fair is held every year which is the biggest fair in West Bengal. People from far away use to come to see the nice looking well decorated temple and the deity every day.

Brahma Mandir : The Brahma Mandir, located by the side of Sunity Road, is stated to be the place of worship and meeting of the Brahma Samaj.

Rasikbil : Koch Bihar's Eco-Tourism flourished with the Rasikbil Bird Sancterary visited by many since its inception.

Accomodation

As per District Census Hand Book Koch Bihar, 1991 there are 4 Dak Banglows in Koch Bihar situated at Cooch Behar Town, Dinhata, Tufanganj and Haldibari respectively. There are also 14 Rest Houses situated at Cooch Behar Town, Mathabhanga, Mekliganj, Sitalkuchi, Sitai, Dinhata and Tufanganj respectively.

Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district

The people of Koch Bihar are generally peace-loving. The district being pre-eminently agricultural, the relevant traits of a peasant can be found present in them. Koch Bihar was a princely State until the Government of India took it over by the Merger Agreement on 12th September 1949. The Kings of Koch Bihar in their times customarily patronized learning and letters. However the centres of learning in the beginning were confined to the Royal Court and

its surroundings and they were Sanskrit-centric. The members of the royal family were also taught Persian for State purposes. Imparting of modern and western education to royal family as well as the people begun in the state from the time of Maharaja Narendranarayan (1847-1863). In 1857 a vernacular school was started in Koch Bihar and for imparting English education Jenkins School, which was established in honour of Col. Jenkins and at the request of Colonnel himself, started in 1861.

The modern Koch Bihar district can boast of the great Novelist Amiya Bhusan Mazumder who hailed from this district. He gave a new dimension to the regional novels and is considered as a master in this field. '*Mahiskurar Upakatha*' is his pioneering work.

Scope of Village & Town Directory

The "Village Directory'' is one of the traditional compilations of the census. The format of the directory is almost the same as was prescribed in the 1991 census. It bears the list of villages, their location code numbers, areas, population, amenities such as educational, medical, communications, drinking water facilities etc. available to them and also the land use pattern for each village. For this purpose, villages have been arranged CD Block wise in order of their location code numbers. The inclusion of alphabetical list of villages with 2001 census population and the map of every CD Block depicting location of villages by population size, urban-spread and important infrastructural facilities available therein will further help the reader in identifying any village in the CD Block.

'Village' is a statutorily recognized unit having a definite boundary and separate land records. In case a complete village is treated as an outgrowth of urban agglomeration, data on amenities and land use for that village have not been given in the Village Directory but shown along with the urban component. For those villages, which have partly merged in an outgrowth of U.A. data pertaining to remaining part of the village is shown in the Village Directory and for the part merged or treated as an outgrowth, the details have been given under the concerned urban agglomeration. Land use data for villages treated as Census Towns (Urban) in 2001 census can be seen in Appendix-III of the Village Directory.

If a village has fully merged into another village, the location code number and name of the merged village are given both in the Village Primary Census Abstract and the Village Directory at the appropriate place. Data in respect of these two villages put together appear against the village with which the other village has merged.

The uninhabited village (villages with no population) has been indicated as such after furnishing details in columns 1 to 3 i.e. the location code number, name and area of the village. In addition to the above details, following eight appendices to Village Directory have also been included.

Appendix – I - Abstract of educational, medical and other amenities in Villages - CD Block level

Appendix-IA - Villages by number of Primary Schools

Appendix-IB - Villages by Primary, Middle and Secondary Schools

Appendix-IC - Villages with different sources of drinking water facilities available

Appendix-II - Villages with 5,000 and above population which do not have one or more amenities available

Appendix-IIA - List of Census Towns which do not have one or more amenities

Appendix-III - Land utilisation data in respect of Census Towns/Non Municipal Towns

Appendix-IV - CD Block wise list of inhabited villages where no amenity other than drinking water facility is available

Appendix-V - Summary showing number of Villages having or not having Scheduled Caste Population

Appendix-VI - Summary showing number of Villages having or not having Scheduled Tribe Population

Appendix-VIIA - List of Villages according to the proportion of the Schedule Castes to the total population by ranges

Appendix-VIIB - List of Villages according to the proportion of the Schedule Tribes to the total population by ranges

Appendix-VIII - Number of Villages under each Gram Panchayat (CD Block wise)

The above eight appendices are expected to help the planners for planning inputs in areas / villages where basic infrastructure is lacking and also for evolving suitable plans for the welfare of Scheduled Castes and Scheduled Tribes, in particular.

The Village Directory format has 23 columns and

the details given under each column and the abbreviations used to explain availability of amenities are as under.

Column 1 – Serial No. of the villages.

Column 2 – The name and location code number of each village, as this is necessary for proper identification of the village. This also includes the forest and uninhabited villages.

Column 3 – The total area of the village (in hectares) as indicated by the State Revenue Department.

Column 4 – The total population in each village (2001 Census).

Column 5 – The total number of households in the village (2001 Census).

Data on amenities such as educational, medical, drinking water, post, telegraph and telephone, commercial and cooperative Banks, credit societies, Recreational & cultural facilities, communications etc. are shown under columns 6 to 13 of the Village Directory. In case if an amenity is not available within the referent village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz., up to 5 kms., 5-10 kms. and 10+ kms. to the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provision of goods and services as well, so as to minimize the regional imbalance in the process of development.

Column 6 shows the number of all kinds of educational institutions run by different agencies, government or private of the level of viz., primary school, middle school, secondary school, senior secondary, college, industrial school, training school adult literacy school / centre and other educational institutions (Sanskrit pathshala, senior basic school, makhtab etc).

If in a village, secondary school has middle and primary classes also, the same has been counted as three schools i.e., secondary, middle and primary school. In case there are more than one institution of any type in a village their number is indicated within brackets against the prescribed abbreviation.

Column 7 provides data on medical facilities available in the village.

Column 8 gives information regarding availability of drinking water within the village. In case more than one source is available to the village the same has been indicated.

Column 9 provides information about the existance of facilities such as post, telegraph and telephone connections available in the village.

Column 10 refers to the availability of banking service in the villages and this is shown by giving the number of commercial and co-operative banks separately.

Column 11 contains information on availability of credit societies in the village. The information is represented separately by recording the number of Agricultural, non-Agricultural and other credit societies.

Column 12 give information on availability of Recreational & Cultural facilities such as Cinema / Video Hall, Sports Club, Stadium / Auditorium, in the village.

Column 13 gives information as to whether the village is served by any mode of public transport like bus, rail and water-ways.

Column 14 refers to the state of roads etc. leading to the village, this is useful in determining as to whether the village is approachable both in fair and foul weather, and whether it is inaccessible only for some time in the year.

Column 15 gives the information about the nearest town and its distance in kilometers in bracket from the referent village. In case the nearest town is located in another state, the name of the state has also been furnished.

Column 16 relates to the availability of power supply in the village.

In case the power supply is released only for specific purpose, say agriculture or other it has been stated accordingly. In case the electricity is not available to the village, a dash (-) has been mentioned in the column.

Column 17 is regarding receipt of News Paper / Magazine in the village.

Column 18 has information regarding the name of the most important commodity, manufactured in the village.

Columns 19 to 23 give the details about land utilization. The land use pattern given in the Village Directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India.

Column 19 includes all lands classed as forests under any legal enactment dealing with forests or administered as forests, whether State-owned or private, and whether wooded or maintained as potential forest land. The area of crops raised in the forest and grazing lands or areas open for grazing within the forests has been included under the forest area.

Column 20 indicates extent of irrigated lands under various types of irrigation.

Column 21 cover all agricultural lands including the net area sown with crops and orchards or net cropped area and also current and other fallow lands, the latter would imply all lands which were taken up for cultivation, but are temporarily out of cultivation for a period of not less than one year and not more than five years. The columns does not include gross year sown or gross cropped area. Net area sown thus represents the area sown with crops and orchards. Area sown more than once in the same year has been counted only once.

Column 22 gives information on cultivable wastelands and includes all lands available for cultivation whether not taken up for cultivation once but not cultivated during the preceding five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles, which are not put to any use. These may be assessed or unassessed and may be in isolated blocks within cultivated holding. Lands under thatching grasses, bamboo, bushes and other groves for fuel etc., which are not included under orchards or forests are included in this category. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

Column 23 includes the land not available for cultivation such as barren, unculturable land and put to non-agricultural use. All lands occupied by buildings, roads, railways, rivers, canals, etc. form part of the land under non-agricultural uses. Barren and unculturable lands include mountains, rocks, deserts etc., which cannot be brought under cultivation, except at a very high cost.

Column 24 and 25 are once again the name of the villages and serial numbers respectively for the readers convinience.

Town Directory :

The town directory is presented for each town covering different aspects of urban life through a set of seven statements from I to VII. The data contained in these statements are about the identification particulars of town, the area, number of households (including houseless households), population and growth rate in 2001 and past censuses, density, sex ratio, physical aspects and location of towns, communications, municipal finances, civic and other amenities, medical, educational, recreational, cultural facilities, trade, commerce, industry, banking, and civic and other amenities in slums. It covers all the towns in the district statutorily notified as well as non-municipal towns (Census Towns). All the towns in the district are arranged in ascending order of location code number.

The data collected in these statements have largely been furnished by the municipal bodies. In case of non municipal towns (Census Towns) the Block level office supplied the information.

Statement I shows status and growth history of the towns in the district. Column 2 in this statement indicates class, name and civic administration status of town (as in 2000). Class of the town indicated under this column has been introduced to factilities the analysis of town directory data at the state and the national level. Census towns have no urban civic status.

Size and Class of Towns :

Class	-	Size
I	-	100,000 and above
II	-	50,000 to 99,999
III	-	20,000 to 49,999
IV	-	10,000 to 19,999
V	-	5,000 to 9,999
VI	-	below 5,000

Column 3 is for representing eight digit permanent code number for each town in the district.

Coulmn 4 indicates the name of police station in which the town is located.

Column 5 is for recording the name of CD Block if the town is located in it.

Column 6 gives area (in sq. kms.) of the town.

Column 7 gives information about number of households including houseless households.

Columns 8 to 18 gives population and growth rate of the town since the Censuses of 1901, which would help in drawing the trends in their growth rate.

Column 19 present density in 2001 Census and 20 to 22 represent the sex ratio.

Statement II shows physical aspects and location of towns. In physical aspects only the rainfall, maximum and minimum temperature data as obtained from the Director General of Meteorological Survey of India have been shown. Towns for which information could not be obtained from Meteorological Survey of India, the same has been collected locally or calculated in relation to the nearest town, to the extent possible. Columns 6 to 12 have been filled up on the basis of information received from the respective district authority. Distances respectively from the state, district and tahsil/CD Block headquarters as well as the nearest city (urban area with a population of 100,000+) would help in determining the location of a town. Communication facilities are shown mentioning railway station, bus route and navigable river/canal.

Statement III deals with municipal finance for the statutory and also non-statutory town bodies managing civic administration of the town provided they have separate budgets and accounts of their own.

Statement IV Scheduled Castes/Scheduled Tribes population figure given in columns 4 and 5 would help in measuring amenities in respect of population size of the weaker sections in the towns. The information on road length within the town shown under column 6 has been obtained from Municipality (except for the highways).

Columns 7 to 12 reflects the information on system of sewerage number of latrines and method of disposal of night soil.

Columns 13 and 14 indicate sources and system of storage with capacity of protected water supply to the inhabitants of the towns.

Column 15 gives information regarding availability of fire fighting services. In case, it is not available in the referent towns, the name of the nearest place where it is available has been mentioned and the distance from the town has also been indicated within brackets. Columns 16 to 20 pertain to the number of connection of electricity supply available for domestic, industrial, commercial, road lighting (points) and for any other purposes.

Statement V gives information regarding amenities like medical, educational, recreational and cultural facilities available in the town. 2001 population figures for each town have also been indicated and this will facilitate in analyzing data on facilities available to the people.

Data related to medical facilities have been obtained from the concerned district authority and shown under columns 4 and 5. All types of medical institutions whether allopathic, ayurvedic, unani or homoeopathic have been covered.

If the medical institution is Ayurvedic, Unani or Homoeopathic the same is indicated in bracket by recording the number of institutions.

In case, more than one institution of any type is available, the exact number is shown within the brackets.

The information on educational facilities are depicted in column 6 to 14.

Column 10 pertains to the number of recognized shorthand, typewriting and vocational training institutes (grouped as others) which include Applied Art / Painting college, Pharmacy college, B.Ed. college, Teacher's training institute, Music / Dancing, Nursing school, etc.

Column 15 shows the information in respect of Adult Literacy classes / Centres etc. Similarly in view of the spurt in the employment of women in towns, information on number of working women's hostels and seats available therein has been given under column 16. This data would help in formulating plans for opening new hostels in order to meet the problems of the single working women.

Columns 17 to 20 show recreational and cultural facilities available in the town. These include stadia , cinema, auditoria / drama / community halls, public libraries indicated as 'PL' and reading rooms indicated as 'RR'.

Statement VI presents information in respect of Trade, Commerce, Industry and Banking services in the town. Columns 3, 4 and 5 contain information about the three most important comodities exported out from the town, column number 6, 7 and 8 in the other hand bears information about the three most important commodities manufactured in the town. Column number 9, 10 and 11 show the number of agricultural and non-agricultural credit societies in the town.

Statement VII provides data in respect of civic and other amenities in the slums.

Abbreviation used in Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows :

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz. <5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the

abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Sorce	SS-

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities :

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial & Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given :

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational & Cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets :

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows :

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is

लोकोन्मुख PEOPLE ORIENTED

indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell(with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.
Appendix-I-A	Indicates number of villages CD Block wise having one or more primary schools.
Appendix-I-B	Indicates number of villages CD Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages CD Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VII A & VII B	The appendix shows the list of villages according to proportion of the Scheduled castes and Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates CD Block wise number of villages under each Gram Panchayat.

List of villages merged in towns and outgrowths at 2001 Census

Serial Number	Name of CD Block	Villages in 1991 merged into new/ existing towns in 2001	JL No.	Remarks
1	2	3	4	5
1	Cooch Behar-II	Khagrabari	89	New Town

Abbreviation used in Town Directory

Town Directory Statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/ Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 - 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface

are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom.

Column 6 to 9 :

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B.Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 : Higher Secondary/Intermediate/ Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 : Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

Brief Note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preli-minary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institu-tional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication table provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks :

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under :

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows :

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

Annexure - II

Fertility and Mortality, 1991 Census

Fertility :

In 'demography' the science of population statistics Fertility is one of the main components of population change whereas others are 'mortality' and migration. Fertility deals with actual reproductive performances in a given community at a given period of time.

It has been customary in censuses to collect, compile and analyse the fertility data. In 1991 and 2001 Census, four questions relating to fertility were asked. These are age at marriage, number of children surviving at the time of questioning with their sex and number of children born alive by sex to all ever married woman only. Also, the question "Number of children born alive during last one year" was asked from the currently married women only. Different fertility ratios which are discussed here are based on mainly the answer of the question "Number of children born alive during last one year".

The very common indicator of fertility is Crude Birth Rate (CBR) which denotes the number of live births per 1,000 population. Other common fertility idicators are Age Specfic Fertility Rate (ASFR), General Fertility Rate (GFR), Total Fertility Rate (TFR), Age Specific Marital Fertility Rate (ASMFR), General Marital Fertility Rate (GMFR) and Total Marital Fertility Rate (TMFR). ASFR, GFR and TFR are calculated by taking total no. of women as denominator whereas for ASMFR, GMFR & TMFR are calculated by taking total number of currently married woman as denominator. The table below shows the fertility rate under different measures in the district as well as in the State.

Annexure

Annexure – II (A)

Age Specific Marital Fertility Levels - 1991 in the district of Koch Bihar

Age group	West Bengal	Koch Bihar
(1)	(2)	(3)
15-19	0.160	0.162
20-24	0.191	0.212
25-29	0.133	0.135
30-34	0.082	0.101
35-39	0.050	0.054
40-44	0.030	0.030
45-49	0.016	0.020

Source : Fertility Table - F Series 1991 Census

The above table indicates that fertility rates in the district are higher as compared to the state figures in all the age groups except 40-44 age group, where it is exactly the same. The higher fertility rates both in case of state and the district are reflected in the age group of 15-19 and 20-24. The fertility differentials between the district and the state are very significant in the age group of 20-24 and 30-34.

Annexure

Annexure – II (B)

Other fertility measures in the district of Koch Bihar, 1981-91

Fertility Measures	West Bengal		Koch Bihar	
	1981	1991	1981	1991
G.F.R.	153	122	170	141
G.M.F.R.	185	158	214	176
T.F.R.	4.3	3.61	5.1	4.09
T.M.F.R.	5.7	5.13	6.3	5.41
C.B.R.	34.67	29.01	38.57	32.82
No. of children ever born per woman in the age group 45-49	-	4.56	-	4.92
Mean age at Marriage	-	17.21	-	16.76
Child woman ratio	-	71.14	-	81.54

The different fertility measures reveal higher levels of fertility in the district compared to the state average in both 1981 and 1991. Lower age at marriage of females in the district compared to the state average may be attributed to higher fertility in the district to the some extent.

Annexure

Mortality

As already mentioned, mortality is one of basic components of population change. In census, information on the questions on children ever born and children surviving collected from all ever married women. From this, estimates of child mortality have been worked out by age of mother by using Brass technique. The table below shows the estimates of child mortality in 1981 and 1991 in the district of Koch Bihar.

Annexure – II (C)
Estimate of Child Mortality, 1981-91
in the district of Koch Bihar

Mortality Level	Census Year	West Bengal			Koch Bihar		
		P	M	F	P	M	F

	1991	94	94	92	128	127	129

Source : Occasional Paper No. 1 of 1997

It is found that male child mortality is higher in all specified ages in 1981 than that of female child mortality in the district. In 1991 also male child mortality is higher at ages 1 and 2 but lower at ages 3 and 5 in the district as compared with corresponding mortality levels prevailing in females. The child mortality of the district in all specified ages as such is much higher as compared to the state in both 1981 and 1991.

Source : Occasional Papers No. 1 of 1997

It is observed from the above table that GFR, GMFR, TFR, TMFR and CBR for the State as a whole are 122, 158, 3.61, 5.13 and 29.01 respectively. Maldah occupies the first position in terms of GFR, TFR and CBR whereas in case of GMFR and TMFR South 24 Parganas is in the first position. Lowest position for GFR and CBR goes to Kolkata whereas the same position occupies by Hugli for GMFR, TFR and TMFR. Number of children ever borm per woman in age group 45-49 is maximum in Murshidabad with 5.72 which is much higher than the State average of 4.56 and the minimum number is observed in Kolkata. Child-woman ratio is highest in Murshidabad with 93.03 and Kolkata has the lowest with 37.22. State average mean age at marriage is 17.2. Mean age at marriage is maximum in Kolkata with 19.05 and Murshidabad with 16.49 is the minimum.

	(12.5)	(21.9)	(8.5)	(18.2)	(35.0)	(11.6)
Total Migrants	**24,664,883**	**7,478,298**	**17,186,585**	**625,223**	**174,683**	**450,540**
	(100.0)	**(100.0)**	**(100.0)**	**(100.0)**	**(100.0)**	**(100.0)**

It is seen from table IV(A) that out of total migrants in the district, 71.3 per cent migrants were born within the State of enumeration, 10.6 per cent and 18.2 per cent migrants had their places of birth in other States of India and other countries respectively. Similar trend has been observed in the table pertaining to State. The female proportion of the migrants born within the State of enumeration is higher than males in respect of both the district and State.

Percentage distribution of Migrants by place of birth, 2001 Census

Migration is an important aspect in the analysis of population change as it affects the size, age and sex structure of the population. However, it can affect the population size at local level only. In most general sense, migration as ordinarily defined movement of people from one place to another place involving change of residence for some definite purpose. Migration may be categorized as internal and international migration. A person moves from his/her place of birth last residence to a new place with some definite reason, it may be economic, social, political or for any other reason. The main source of information on migration of our country is collected through regular decennial census. In 2001 Census, data on migration were collected on different aspects, such as reason for migration from the place of previous residence, duration of stay since migration etc. Tables on migration by place of birth; interstate migration; rural and urban composition of internal migrants by place of birth in the district and in the State are given below.

ANNEXURE – IV (A)
PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH, 2001 CENSUS

Place of Birth	West Bengal			Koch Bihar		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
A. Migrants born within the state of Enumeration	19,082,558 (77.4)	4,489,736 (60.0)	14,592,822 (84.9)	503,566 (68.1)	114,742 (48.7)	388,824 (77.2)
i) Migrants born elsewhere in the district of Enumeration	14,526,298 (58.9)	2,892,376 (38.7)	11,633,922 (67.7)	441,372 (59.7)	98,362 (41.7)	343,010 (68.1)
ii) Migrants born in other district of the State	4,556,260 (18.5)	1,597,360 (21.4)	2,958,900 (17.2)	62,194 (8.4)	16,380 (6.9)	45,814 (9.1)
B. Migrants born in other State of India	2,491,932 (10.1)	1,352,219 (18.1)	1,139,713 (6.6)	38,799 (5.2)	15,095 (6.4)	23,704 (4.7)
C. Migrants born in other countries	3,090,393 (12.5)	1,636,343 (21.9)	1,454,050 (8.5)	196,906 (26.6)	105,910 (44.9)	90,996 (18.1)
Total Migrants	**24,664,883 (100.0)**	**7,478,298 (100.0)**	**17,186,585 (100.0)**	**739,271 (100.0)**	**235,747 (100.0)**	**503,524 (100.0)**

It can be seen from the above table that the proportion of migrants born within the state of enumeration is much lower (68.1 per cent) in the district as against the state average of 77.4 per cent. The migrants born in other state of India for the district are 5.2 per cent, whereas it is 10.1 per cent for the state. The migrants born in other countries for the district are 26.6 per cent whereas for the state it is 12.5 per cent.

ANNEXURE – IV (C)

RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH, 2001 CENSUS

Place of Birth	Place of Enumeration					
	West Bengal			Koch Bihar		
	Total	Rural	Urban	Total	Rural	Urban
1	3	4	5	6	7	8
1. Migrants born within the state of Enumeration	19,082,558	14,106,837	4,975,721	503,566	451,367	52,199
	(100.0)	(73.9)	(26.1)	(100.0)	(89.6)	(10.4)
2. Migrants born in other State of India	2,491,932	678,906	1,813,026	38,799	27,365	11,434
	(100.0)	(27.2)	(72.8)	(100.0)	(70.5)	(29.5)

The above table shows rural and urban composition of migrants by place of birth and place of enumeration in 2001 Census of Koch Bihar district. The district table shows that major portion of migrants born within the state of enumeration have been enumerated in rural areas (89.6 per cent) whereas the same figure for West Bengal is 73.9 per cent. Further in case of migrants born in other states of India, 70.5 per cent have been enumerated in rural areas of Koch Bihar district whereas the same figure for West Bengal is 27.2 per cent only. It is to be noted that migrants in both the category, urban percentage is very much lower than the rural percentage in the district.

		(3.8)	(10.1)	(1.9)	(5.6)	(12.9)	(3.4)	(100.0)	(100.0)	(100.0)

It is seen from Annexure-IV(D) that in terms of total migrants in absolute figure, North 24 Parganas with 3,693,336 persons comes in first position followed by Medinipur with 2,709,165 persons and Barddhaman with 2,364,020 persons. In case of people born in West Bengal, 9 districts of the State overtake the State percentage of 77.4. So far people born in other states are concerned, 8 districts overtake the State average of 10.1 per cent and regarding people born in other district of West Bengal, only 6 districts overtake the State average of 18.5 per cent. The percentage of people born elsewhere in the district of enumeration varies between the maximum of 87.5 in Medinipur and the minimum of 38.7 in North 24 Parganas district. Similarly, the percentage of people born in other countries varies between the maximum of 33.9 in Nadia and the minimum of 0.2 in Puruliya district.

Annexure

Annexure -IX : Scheduled Castes and Scheduled Tribes Population - Size and Growth

The collection of population statistics on the scheduled castes and the scheduled tribes as per the state scheduled castes and scheduled tribes lists in the State is one of the most important aspects of decadal census in post independence period. These information is required for the purpose of delimitation of the Assembly and Parliamentary constituencies in the State. The planning for development of these communities is mostly considered on the information of population size and its growth rate, sex-ratio, literacy rate, economic activities etc. Census is the only source, which provides data for scheduled castes and scheduled tribes and other various aspects of their life at the micro level.

In 1991 census, the district registered a total scheduled castes population of 1,123,719 accounting for 51.8 per cent of the total population in the district, which comprised of 580,384 males and 543,335 females. Out of this bulk of scheduled caste population 97.1 per cent was in rural and 2.9 per cent was in urban areas of the district. In all 59 scheduled castes communities were reported in the district and were scattered all over the district. The five major scheduled castes in order of population size were the (i) Rajbanshi (865,622), (ii) Namasudra (146,279) (iii) Jalia Kaibartta (46,184) (iv) Jhalo Malo (13,109) and (v) Chamar/ Charmakar/ Mochi/ Muchi/ Rabidas/ Ruidas/ Rishi (10,145). Of these five major scheduled castes, the first three alone constituted 94.2 per cent of the total scheduled castes population of the district.

The literacy rate among scheduled castes of the district was 41.1 per cent registering 54.3 per cent for males and 26.9 per cent for females against the general literacy rate of 45.8 per cent in the district in 1991.

In view of work participation practice among scheduled castes in the district, they registered 31.3 per cent of main worker with the break up of 54.3 per cent males and 6.7 per cent females, corresponding to 30.6 per cent (53.3 per cent males and 6.3 per cent females) in case of the general population. The scheduled castes in the district were mainly working as Cultivator accounting for 54.4 per cent of the total scheduled caste main workers of the district with the female proportion of 23.9 per cent.

Likewise the district had registered 13,275 total scheduled tribe population accounting for 0.6 per cent of the total population of the district which comprised of 6,957 males and 6,318 females. A substantial portion (95.4 per cent) of this bulk of scheduled tribe population was in rural areas and the remaining 4.6 per cent was in urban areas of the district. The five major Scheduled Tribes in order of population size were the (i) Oraon (4,940), (ii) Rabha (2,732), (iii) Munda (1,417), (iv) Santhal (940) and (v) Garo (623). Of these five major scheduled tribes the first three constituted 68.5 per cent of the total Scheduled Tribes population of the district.

The literacy rate among scheduled tribes was 32.9 per cent with a break up of 44.9 per cent for males and 19.3 per cent for females against the general literacy rate of 45.8 in the district in 1991.

Work participation rate (main workers) in case of the scheduled tribe communities was reported at 38.0 per cent with the breakup of 55.8 per cent males and 18.4 per cent females. The scheduled tribes in the district were also mainly working as Cultivator accounting for 36.6 per cent of the total scheduled tribes main workers of the district with the female proportion being 23.5 per cent.

As per 2001 Census, Koch Bihar district has 1,242,374 scheduled castes population comprising of 636,446 males and 605,928 females accounting for 50.1 per cent of the total population of the district. Among the scheduled castes of the district, the first five major castes in order of population size are Rajbanshi with 972,803 persons (78.3 per cent), Namasudra with 165,514 persons (13.3 per cent), Jalia Kaibartta with 45,330 persons (3.6 per cent), Jhalo Malo/Malo with 15,830 persons (1.3 per cent) and Dhoba/Dhobi with 9,764 persons (0.8 per cent). Out of these only first two castes constitute 91.6 per cent of the total scheduled castes population of the district.

Further, the district has also recorded 14,246 scheduled tribe population comprising of 7,425 males and 6,821 females in 2001 Census acounting for 0.6 per cent of the total district population. Among these, the first five major tribes in order of population size are Oraon with 5,916 persons (41.5 per cent), Rabha with 2,280 persons (16.0 per cent), Munda with 1,309 persons (9.2 per cent), Santal with 999 persons (7.0 per cent) and Bedia/Bediya with 702 persons (4.9 per

cent). Out of these, only first four tribes constitute 73.7 per cent of the total scheduled tribe population of the district.

The distribution of rural and urban scheduled castes / tribes population for Koch Bihar district since 1961 can be observed in the following table :

ANNEXURE - IX
SCHEDULED CASTE AND SCHEDULED TRIBE POPULATION IN THE DISTRICT OF KOCH BIHAR (1961-2001)

	1961		1971		1981		1991		2001	
T/R/U	SC	ST	SC	ST	SC	ST	SC	ST	SC	ST
Total	478,313	8,809	665,020	10,611	883,084	10,105	1,123,719	13,275	1,242,374	14,246
			(39.0)	(20.5)	(32.8)	-(4.8)	(27.2)	(31.4)	(10.6)	(7.3)
Rural	473,152	8,719	656,394	10,454	867,502	9,666	1,091,093	12,662	1,197,449	13,136
			(38.7)	(19.9)	(32.2)	(7.5)	(25.8)	(31.0)	(9.7)	(3.7)
Urban	5,161	90	8,626	157	15,582	439	32,626	613	44,925	1,110
			(67.1)	(74.4)	(80.6)	(179.6)	(109.4)	(39.6)	(37.7)	(81.1)

Note : Figures within brackets indicate decennial growth rate.

It can be seen from the above table that there has been a continuous decreasing trend of growth rate in the scheduled caste population from 1961-2001 censuses. It has decreased from 39.0 per cent in 1961-71 to 32.8 per cent in 1971-81, again to 27.2 per cent in 1981-91 and 10.6 per cent in 1991-2001. The rural growth rate also followed the similar pattern of trend upto 2001. But for urban, it is observed that the growth rate of scheduled caste population has a increasing trend from 67.1 in 1961-71 to 109.4 in 1981-91 but during 1991-2001 it has increased merely to 37.7 per cent.

In case of scheduled tribe communities, it is observed that during 1961-71, the growth rate was 20.5 per cent that has come down to (-) 4.8 per cent during 1971-81, then increased to 31.4 per cent during 1981-91 and further declined to 7.3 per cent during 1991-2001. The rural growth rate of scheduled tribe population also followed the similar pattern of trend upto 2001. But in case of urban, it is seen that during 1961-71 the growth rate was 74.4 per cent that has increased to 179.6 per cent during 1971-81, then rate of increase has dropped to only 39.6 per cent during 1981-91 and again increased to 81.1 per cent during 1991-2001.

Annexure

ANNEXURE - V

BRIEF ACCOUNT OF MAIN RELIGIONS IN THE STATE AND DISTRICT, 2001 CENSUS

Religious communities	Total	Rural	Urban	Per cent to all religions	Percent to total	
					Rural	Urban
1	2	3	4	5	6	7
WEST BENGAL-19						
All Religions	80,176,197	57,748,946	22,427,251	100.0	72.0	28.0
Hindus	58,104,835	39,406,984	18,697,851	72.5	67.8	32.2
Muslims	20,240,543	16,845,034	3,395,509	25.2	83.2	16.8

Buddhists	243,364	171,455	71,909	0.3	70.5	29.5
Jains	55,223	9,354	45,869	0.1	16.9	83.1
Others	895,796	875,354	20,442	1.1	97.7	2.3
Religion not stated	54,895	36,649	18,246	0.1	66.8	33.2
KOCH BIHAR-03						
All Religions	2,479,155	2,253,537	225,618	100.0	90.9	9.1
Hindus	1,871,857	1,668,720	203,137	75.5	89.1	10.9
Muslims	600,911	580,777	20,134	24.2	96.6	3.4
Christians	2,162	1,682	480	0.1	77.8	22.2
Sikhs	330	263	67	0.0	79.7	20.3
Buddhists	474	192	282	0.0	40.5	59.5
Jains	2,193	729	1,464	0.1	33.2	66.8
Others	489	465	24	0.0	95.1	4.9
Religion not stated	739	709	30	0.0	95.9	4.1

It is observed that in Koch Bihar the Hindus occupy the first place with 75.5 per cent followed by Muslims 24.2 per cent of the total population of the district indicating that they are the two main religions in the district. Among them it is to be noted that 89.1 per cent of the Hindu population and 96.6 per cent of Muslim population live in rural sector of the district.

Annexure

Annexure - VI

Marital Status of Population as per 2001 Census

Information on sex and marital status of the population is very much important for demographic analysis. Particularly marital status of women population is very much important for measuring fertility rate by age group. Population of women belonging to status of married or currently married is also important for measuring age specific marital fertility rate (ASMFR). A table classified by marital status and broad age group is presented below :

Annexure

Annexure - VI

Marital Status of Population as per 2001 Census

Information on sex and marital status of the population is very much important for demographic analysis. Particularly marital status of women population is very much important for measuring fertility rate by age group. Population of women belonging to status of married or currently married is also important for measuring age specific marital fertility rate (ASMFR). A table classified by marital status and broad age group is presented below :

ANNEXURE – VI (A)
PERCENTAGE DISTRIBUTION OF POPULATION CLASSIFIED BY MARITAL STATUS, BROAD AGE GROUP AND SEX, 1991-2001

			Marital Status							
			Never married		Married		Widowed		Divorced or Separtated	
Year	Age	Total	Males	Females	Males	Females	Males	Females	Males	Females
1	2	3	4	5	6	7	8	9	10	11
1991	0-14	100.0	99.9	99.5	0.1	0.5	0.0	0.0	-	0.0
	15-34	100.0	57.3	18.3	42.2	78.8	0.3	1.9	0.3	1.1
	35-54	100.0	2.6	0.6	94.8	80.4	2.1	18.1	0.5	1.0
	55+	100.0	3.6	1.7	84.7	33.5	11.3	64.2	0.5	0.6
	All ages	100.0	59.4	46.8	38.9	43.6	1.4	9.0	0.2	0.6
2001	0-14	100.0	99.8	99.4	0.2	0.6	0.0	0.0	0.0	0.0
	15-34	100.0	56.9	20.6	42.8	77.0	0.2	1.4	0.2	1.0
	35-54	100.0	2.1	0.9	96.3	82.8	1.2	14.9	0.4	1.4
	55+	100.0	1.9	1.2	88.6	39.7	9.0	58.5	0.6	0.6
	All Ages	100.0	55.6	43.7	43.1	46.5	1.1	9.1	0.2	0.7

It is seen that the percentage of never marrieds (in all ages) has gone down in 2001 over 1991 census both for the males and females. So far as married persons are concerned, its percentage has increased (in all ages) in 2001 census over 1991 census for both the sexes. It is noteworthy to mention here that the percentage of widows has gone down in 2001 census over 1991 census in all age groups. But the percentage of widowes is much higher in comparison to all age groups. Both the percentage of widower males in the age group of 35-54 and 55+ in both the census years, i.e. 1991 and 2001. Further, it is seen that the percentage of divorced/separated females are found to be higher than its male counterparts in all age groups in both the census years, except 55+ age group (2001 Census) where it is equal for both the sexes (0.6 per cent).

It is observed that 36.4 per cent of the total population of Koch Bihar district belong to 0-14 age group and naturally constitute the bulk of the never married as per 2001 Census. Although none is found in the married status in 0-9 age group of the district, 1.0 per cent of 10-14 age group population of the district has been found married implying that child marriage still exists in the district. Number of females however is being greater than males. The highest number of married females is found in 25-29 age group (104,891 persons) and highest married males (91,533 persons) in 35-39 age group indicating that gradually late marriage is being preferred by both the sexes. A pointer to mortality is the number of widows, which is remarkably higher than that of widowed males in all age groups. The highest number of widows is found in 60-64 age group (17,289 persons) and highest widowers are found in the age group 70-74 (2,036 persons). The number of divorced or separated females is always higher than the number of males in all age groups except in the age group 70-74, 75-79 and 80+.

It is seen that in none of the sub-levels of literacy of Koch Bihar district, the females have been able to catch up the males in number in 2001. It is observed that 66.3 per cent of the total population of Koch Bihar district is literate, 0-6 age group excluded and number of literate males is higher than that of females as per absolute figure. It is noteworthy that 19.5 per cent of the age group 7-10 still remains illiterate. The highest illiteracy of 52.3 per cent is observed in the age group 45+, number of males being more than double the number of females. Number of literates without any formal schooling including education level is very little - 13,785 for males and 9,639 for females are the figures for the district. Likewise, percentage of graduates and above is also very little, which is only 1.6 per cent of total population and only 2.9 per cent of the total literate population.

Annexure

ANNEXURE - VIII

Distribution of different mother tongues in the district, 2001 Census

Language is an important characteristic of a population particularly in a multi-lingual and multi-cultural society like India. The language census literature that has grown over the last one hundred years of Indian census history has shed light on the linguistic composition of our country. The table below shows the population by mother tongue of the district since 1961. It is to be noted that mother tongues shown in 1971 Census are mother tongues inclusive of language grouped under each. Data shown in 1981 Census is the language mainly spoken in the households.

ABOUT THE SAMPLE REGISTRATION SYSTEM (SRS) IN WEST BENGAL :

The Sample Registration System (SRS) is a large scale demographic sample survey for providing reliable annual estimates of birth rate, death rate and other fertility and mortality indicators at the national and sub-national levels. The field investigation consists of continuous enumeration of births and deaths by a resident part time enumerator and an independent half yearly survey by supervisor. The data obtained through these operations are matched. The unmatched and partially matched events are re-verified in the field and thereafter an unduplicated count of births and deaths is obtained. The SRS was initiated by the Office of the Registrar General and Census Commissioner, India on a pilot basis in a few selected states in 1964-65 and it became fully operational during 1969-70 with about 3,700 sample units in India. Thereafter the number of sample units was periodically increased. After completion of 1991 Census these units were replaced during 1993-94 with 6,671 sample units (4,436 rural and 2,235 urban blocks) in all states

and union territories. For West Bengal state total number of sample units were 475 (300 rural and 175 urban) after 1991 census. The sample unit in rural areas is a village or a segment of it if the village had a population of 2,000 or more. In urban areas the sampling unit is a census enumeration block with a population of 600 or 120 households. At present SRS is operational in 7,597 sample units (4,433 rural and 3,164 urban) spread across all States and Union territories and covers about 1.3 million households and 6.93 million population based on 2001 Census frame and these were effective from January 2004. In the state of West Bengal SRS is covering about 5.7 lakh population through 555 (310 rural and 245 urban) sample units which is highest among all states and UTs.
