Gaur, Adina Pandua and Jagjibanpur

The district of Maldah in West Bengal has long and rich historical traditions. In early middle ages Gour was the capital of Bengal and its famous ruins still draw visitors from all over the country. They silently speak of the splendours of a bygone era. These splendid ruins are also a constant source of inspirations to the people of Maldah to strive harder to achieve a future as brilliant as their past.

Calendar of Events

Calendar for Census 2001 upto Houselisting Operation :

December, 1999

(i) Issue of all appointments of Charge Officers, Zonal Sub-Charge Officers and Charge Assistants etc., by the Principal Census Officer.

    Total Male Literate Population
    Total Female Literate Population

(iii) Total Main workers
    Total Marginal Workers
    Total Non Workers

By the district Magistrates to the Director of Census Operations, West Bengal and Registrar General, India by Telephone and FAX.

Economic Resources

a) Forest Area : The district has 1,976.92 hectares of land under forest. Out of the total forest area 376.00 hectares of land is under protected forest and 806.50 hectares of land is under reserved forest. From the forest produce the government-collected revenue of Rs.3,828,000 in 2000-2001. (Source: District Statistical Hand Book, 2001, Govt. of West Bengal)

b) Mineral product : The district has no mines. However, brickfield, tiles and sand are available in the district.

c) Soil & Cropping Pattern : In the east of Mahananda the soil is red of older alluvial formation; in the west of Mahananda the soil is light loam called *"do-ash"*. A third type of soil in the low-lying areas, beels and valleys are called *'Matial'* (greater admixture of clay). Along the Ganga the *'chars'* and other low-lying areas are liable to inundation and silt are deposited which is known as *'Chama'*.

Jackfruit, peepal, tamarind, mango, thorny bamboos and date palm are the common species of the lower Mahananda plain region. It is a low-lying area, subject to inundation with the rise of rivers, but is almost entirely under cultivation. In the northern part principal crops are jute and paddy and in further south rabi crops are also cultivated. In the barind of the Maldah plain the green expanse of winter rice can be observed. In the Mahananda-Ganga interfluve Aus paddy, wheat, barley, oats and mustard are produced. Sugarcane is also grown in some areas.(Source : Census of India, 1991, Regional Divisions of India - A Cartographic Analysis Series 1, Vol. XXV, West Bengal.)

d) Land and land-use pattern : The land of Maldah district is more or less plain. The land is fertile for agricultural production. Out of the total area, 77.0 per cent of land is cultivable area and 0.45 per cent is under forest and 15.68 per cent of land is current by fallow. (Source: Directorate of Agriculture, Govt. of W.B., 2001).

e) Tenancy : The State Government is the owner of the all estate land since the enactment of West Bengal Estate Acquisition Act, 1948. But in case of agricultural land the tenancy is contractual with the owner. After the land reform measures taken up by the State Government there is no intermediary system of tenancy in the district. Till 2000, 30 thousand hectares of vested agricultural land have been distributed among 1 lakh 50 thousand beneficiaries. Out of the total beneficiaries 45 per cent beneficiaries belong to Scheduled Castes and Tribes community. (Source: District Statistical Hand Book, 2001, Govt. of W.B.).

f) Agriculture : The economy of the district is based on agriculture and growing of mangoes. In 1998, 287 thousand hectares of lands was under net cropped area. The main agricultural crops are paddy, wheat, jute and pulses. The area under paddy crop, wheat, jute and pulses in 1998 were 559,000; 124,000; 272,000 and 21,000 hectares. (B.A.E & Statistics, Govt. of West Bengal).

g) Irrigation : Out of the total area under crop 112,896 hectares of land is under irrigation. In the district irrigation from govt. and private canal and from well is nil. The source is mainly tanks and from tubewell. In the district, sources of river irrigation are available. There are 32,837 shallow tube wells, 446 deep tube wells, and 384 river lift irrigation for watering the field under crop. (Source : District Statistical Hand Book, 2001, Govt. of West Bengal)

h) Animal Husbandry : As per the latest Cattle Census Report, and Live Stock Census Report more than 6 lakhs cattles 59 thousand buffaloes and almost 20 lakhs goats were returned in the district. Out of the total cattle 5.39 lakhs are cows. (Source : District Statistical Hand Book, 2001, Govt. of West Bengal)

i) Fishery : As the district contains a large number of beels and tanks (Dighi) and traversed by a number of rivers and streams, different kinds of fishes are still available. Of them Airh (Bagha), Bacha, Batasi, Bann,Bhangle bata, Bauspata, Belay, Hilsa, Boal, Chital are available. Of late pisciculture has been undertaken according to modern scientific methods to increase the productions of certain species of fish.

j) Electricity & Power : In the district there are 5 towns and 1,799 villages with 1,126 villages having been electrified. Out of them, 1,069 villages are having electricity for domestic purpose, 535 villages out of 1,126 for agricultural purpose and 408 villages out of 1,126 for other purposes and 259 villages out of 1,126 are using electricity for all purposes. In the year 2001 193,251 units (1,000 KWH.) of electricity were consumed.

k) Industry : Large-scale industries are not found in the district. There are some agro-based small scale

industries in the district. About 13 thousand registered with the Directorate of Cottage and small-scale units are functioning in the district. 209,307 persons are engaged in household industry out of which 205,074 are in rural and 4,233 are in urban areas.

l) Trade and Commerce : After the normalization of relation with Bangladesh, trading activities with Bangladesh through Mahedipur of the district has increased remarkably. Apart from this, jute, silk product and mangoes during summer are exported to other district and states of the country.

m) Transport : About 610 km of roads in the district of MAldah are maintained by P.W.D. West Bengal, Highway Divisions and by the local authorities. In addition Municipal authorities maintain 317 km. roads. More than 20 thousand carriages including three wheeler carrying goods and passengers are plying in the district.

(vi) Gram Panchayat

The three tier Panchayat system has been functional in West Bengal since 1978. In the district at the top there is Zilla Parishad (ZP); the Panchayat Samities (PS) are coterminus with the CD Block. There are Gram Panchyat at the lowest level consisting of elected members from the respective villages. Since 1978 the panchayat system has been performing a vital role for the development activists from village to district level and fund are placed for implementing the development plans from GP level to district level.

In spite of some shortcomings, the Panchayat System has changed the village economy, social and political system. In West Bengal small and marginal farmer have got cultivable land, the wages of agricultural labourers have increased. Due to land reforms and other village development program the productions of agriculture have also increased significantly. As a result the intake of food has also increased.

Maldah district has 15 panchayat samitis with 147 gram panchayats consisting of 1,799 villages.

Major Characteristics of the District, Contribution of the District in the form of any Historical Figure Associated with the District

In Maldah, the rules of the Hindu, Jain, Muslim and Buddhist Kings have contributed to the growth of a cosmopolitan culture which is ever-flourishing in a continuous process.

Following eminent modern personalities have dignified this ancient capital by way of their contribution.

1) Golam Hosain – Eminent Historian
2) Prof. Binoy Kr. Sarkar – Eminent Economist and social scientist
3) Sibram Chakraborty – Eminent Writer
4) Abid Ali Khan – Historian
5) Haridas Palit – Folklorist
6) Rajani Kanto Chakraborty – Historian
7) Charu Chandra Bandopadhyay – Eminent Writer
8) Bidhu Sekhar Sastri – Eminent Professor

Major Social and Cultural events, natural and administrative developments and significant activities during the decade

Innumerable fairs, festivals and socio-cultural events are held throughout the year in this district having wide admixture of religion, community and culture. The followers of the main faiths and some tribal groups observe their own religious festivals whereas they intermingle in melas (fairs) and ceremonies. Brief notes on the major festivals and melas (fairs) of the district are given below:

Festivals

State level common :

In all the districts of the state certain religious festivals are observed in such a huge magnitude that the impact is cross-cultural involving the overall market economy. Those are :

1. Durga Puja is the most popular annual festival of the Hindus held both at community level and at clan or household level. The four day festival relate to worshiping of the mother god 'Durga' and symbolising the victory of good over evil is held in the month of *Ashwin* (Bengali calender) or September-October. In folk culture this festival also represents the home coming of Mother Durga (Parbati) - wife of Lord Shiva along with her two sons and two daughters to visit her paternal home from their snowy abode of Himalayas. This festival, therefore, also represents a family reunion of members staying at distant places.
2. In north India 'Deepavali' or the festival of lights is celebrated to commemorate the home coming of Lord Rama to Ayodha after fourteen years of punishment as per the epic Ramayana. But in Bengal Kalipuja or Diwali is related to worshiping goddess 'Kali' or 'Shakti' (the power) as another expression of mother cult. This one day event is held on the moon less night following Durga Puja in the month of *Kartik* (mid Oct to mid Nov). Decoration with lights is a part of the observation adding a flavour of the famous national festivity called the 'Festival of light or Deepawali'.
3. Dol Jatra or Holi is the festival of colours. In fact the colours of the spring time nature is celebrated with much grandeur for expressing the feeling of love and friendship as symbolized by the holy conjugation of Lord Krishna and Radha.
4. Rathajatra or the car festival of Krishna, Balaram and Subhadra is held during *Ashadh* (mid-June to mid-July).
5. Id-ul-Fitr is the most popular religious festival of the Muhammedan population in the state. This is observed with a mass prayer (Namaz) and joyful get together after the month-long fasting during 'Ramzan'.
6. The next important festival of the Muhammedans, Idu'z Zuha or the Festival of Sacrifice, is also celebrated with mass prayers and exchange of gifts and sweet meat etc. with a spirit of brotherhood.
7. Muharram is another popular festival of the Mohammedans held on the thirtieth day after Idu'z Zuha to mourn the death of Hassan and Hussain - two grandsons of the Prophet Muhammed in the battle of Karbala. Tajiyas are built and taken in a procession symbolizing the memorial tombs of those two martyrs.
8. The Christmas day on 25th December and Good Friday in April are the two most important religious festivals of the Christian community. 'Christmas day', in particular, is observed with prayers in the church to commemorate the birth of Jesus Christ and the festivity continues till 1st January - the new calender year. The day of Christ's crucifixion is the day to pray again on Good Friday.
9. The Sikhs celebrate their most important religious festival on the occasion of Guru Nanak's birth day, the founder of the Sikhism.
10. The full moon day of May is observed as Buddha Purnima by the followers of Buddhism in different pockets of the State. This is the biggest festival for Buddhists to mark the occasion of the birth of Lord Buddha.
11. The followers of Jainism observe Mahabir Jayanti which is the birthday of Lord Mahabir in the month of April.

District specific :

Fairs and Festivals in the district of Maldah are numerous. They are broadly divided into two categories- religious and secular. Religious festivals grow on the basis of mystic ideas about the phenomenon of nature like The Sun, The Earth, The River and so on. But the secular festivals develop on the basis of practical socio economic needs of the people. Maldah is a district of

different faiths, the Hindus, the Muslims, the Christians and the Tribes. More than one hundred fairs and festivals are held annually in different parts of the district. Of them, some important melas (fairs) take place on the occasion of Hindu Festivals.

Hindu Festivals :

Gambhira Festival :

The most important festival of this district is Gambhira festival. The festival has been a long tradition in the life and culture of this region. Now *Gambhira* is identified with Siva. Originally *Gambhira* was held on the last day of *Chaitra* (Bengali calendar) and on three preceeding days. Even fifty years ago, it was regarded as a major festival of the district. In the past, most of the villages where majority of the people were Rajbanshis, Koches and Poliyas etc, *Gambhira Than* and *Gambhira* festival was used to be held with great fervency.

River Festival :

The commonest form of Ganga worship is Snan or ceremonial bathing. The most important place of this district in this connection is Sadullapur (English Bazar), an ancient burning ghat for the Hindus on the bank of Old Ganga course. The fairs are held in Maghi Purnima for two days, Paus Sankranti for one day, Bhadra Sankranti for one day, Bhadra Purnima for one day and Ganga-Dashahara for two days.

Muslim Festivals :

Apart from the regular Muslim festivals such as Muharram, Id-ul-Fitr, Idu'z Zuha and lesser celebrations, the chief religious festivals are held at Pandua. Pandua Melas are instituted in connection with the Bais Hazari and the Sashazari Wokf Estates. These fairs are in honour of the saints Makdum Shah Jalal and Kutub Shah.

Festivals of the tribes :

The chief festival of the Santals is the *Sahrai* or *Badna Parob* - the harvest festival. It is celebrated in *Paus* (mid Nov. to Dec.) after the chief crop of the year has been harvested. Next the *Baha puja* is held in the month of *Falgun* (mid Feb. to mid March) when the Sal flowers and Erok-sen showing festival kept in *Asadh* (mid May to mid June).

Fairs :

Numerous fairs and festivals take place in Maldah. A brief account of fairs considering only the highest attendances taken from the District Census Hand Book, Maldah, 1961 is given here.

Most populated fairs used to take place in various places of Maldah. In Makdumpur under English Bazar CD Block (part of the village is also under English Bazar municipality now) on the occasion of Rathajatra in the month of *Asadh* (mid June to mid July) a gathering of 10,000 people was recorded. Next comes Ramkeli under the same CD Block with Dharampur (now called Uttar Dharampur) under Manikchak CD Block was also famous for a fair on the occasion of Bansuli Puja in the month of *Baisakh* (mid April to mid May) in which 10,000 people used to attend. On the occasion of Kangsabrata in the month of *Magh* (mid January to mid February) on the day of *Maghi Purnima* 10,000 people used together in Dhawail under Gazole CD Block.

In terms of continuance of longest period, Jaharatala under English Bazar CD Block was nost famous where the fair used to continue for 30 days long on the occasion of Jaharakali Puja in the month of *Baisakh* (mid April mid May), though the total attendance was negligible (500-1,000).

Significant activities during the last decade

During the last decade Border Area Development Programme (B.A.D.P.) a major effort was entirely sponsored by Govt. of India.

The program has been implemented in the CD Blocks (viz. Bamangola,Habibpur, Old Maldah English Bazar, Kaliachak-III) as well as in English Bazar and Old Malda municipalities of Maldah district which have boundaries with Bangladesh. The programme is aimed at improvement of the qualities of life of the people residing in the border areas. Among the types of schemes taken up so far, the following sectors have received maximum attention:

(a) Communication;

(b) Improvement in power supply, and rural electrification;

(c) Water supply, mainly spot sources;

(d) Irrigation schemes.

Priority has also been given to employment generation, schemes such as PMRY and FAS. The emphasis under such schemes have been development of irrigation, flood control, rural road etc.

This program is carried by the District Administrative Machinery with the active involvement of Panchayats / Municipal Functionaries. From 1994 - 95 to 2000 - 2001 total Rs. 86,313,209/- was sanctioned out of which Rs. 66,660,325/- has been utilized.

Points to Note

1. New Towns created subsequent to 1991

Maldah	Aiho	CT
do	Kachu Pukur	CT
do	Kendua	CT

2. New Village created subsequent to 1991

Maldah	00716100	Sahapur

3. Declassified Census Towns/OGs coming back to rural fold subsequent to 1991

Maldah	00716100	Sahapur

4. Increase/Decrease town areas due to changes in administrative jurisdiction

Maldah	40601000	Old Maldah (M)

5. New ward created/merged subsequent to 1991 due to increase/readjustment of statutory areas of the Municipality/M.Corp. subsequent to 1991 under statutory/administrative order

			1991	2001

12. The village land area figure in hectares has been converted from the village (mouza) wise land area in Acres as maintained by Director, Land Records and Survey (DLRS), Govt. of West Bengal.

13. Villages marked as (P) indicate concerned village is partly Rural and partly Urban or is bifurcated into two CD Blocks. However the total area figure of the villages (mouzas) as per records maintained by DLRS, Govt. of West Bengal has been given here as no record of such bifurcated village area is available with DLRS, Govt. of West Bengal. In case parts of a village fall under more than one CD Block the total land area figures for these parts have been estimated on the basis of plot nos. mentioned in the concerned Government order and through interpolation/extrapolation of the areas of the concerned plots from R.S. maps maintained by DLRS, Govt. of West Bengal.

14. The area of CD Blocks as shown here is summation of land areas of all villages (mouzas) within the concerned Block and is estimated only. This is because no CD Block wise land area figures are available with DLRS, Govt. of West Bengal.

15. In case of statutory and non statutory urban areas, the area given here are estimated only. This is because no town wise area figures are available with DLRS, Govt. of West Bengal.The area figure have either been collected from the concerned town authorities or have been calculated from existing village(mouza) wise area figures as maintained by DLRS, Govt.of West Bengal.

16. The total land area for State/District as given here is as per area figures obtained from Survey of India. However the totals of villages/Blocks/Towns as given here are as per records maintained by Directors, Land Records & Survey (DLRS), Govt. of West Bengal.

17. With the changes of course of the river Ganga,18 villages which were earlier in Maldah District of West Bengal have gone to the side of Jharkhand State from the midstream of the river and have been included in Udhwa CD Block of Shaibganj District (formerly within the State of Bihar). However both the State Governments have been claiming that these villages belong to them. This situation existed at the time of 1991 Census also and similar situation exists even at present as the dispute has not yet been finally resolved. In consultations with the Director of Census perations, Jharkhand and as per the guide line issued by The Registrar General and Census Commissioner of India's office, the Census of 2001 of these 18 villages under dispute was conducted by both the States independently, as was done during 1991 Census. It was decided that the respective Directors of Census Operations to include the population of these 18 villages in their respective PS/CD Block/District/State.It was also instructed that they may publish a comparative statement in relevent publication of 2001 for both the states giving population of these 18 villages under appropriate administrative units. Accordingly the list of these 18 villages as noted below have been included in the PCA for Manikchak and Kaliachak-II CD Blocks under Maldah District. Their comparative population for West Bengal and Jharkhand with location particulars are shown below.

COMPARATIVE STATEMENT SHOWING LIST OF 18 DISPUTED VILLAGES WITH POPULATION ENUMERATED IN BOTH WEST BENGAL AND JHARKHAND, CENSUS OF INDIA, 2001

State : West Bengal District : Maldah							State : Jharkhand District : Shaibganj

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts : Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts : Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD Block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being the lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991

census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Vikram Sen, IAS, Director of Census Operations, West Bengal. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

Preface

The task of publishing the District Census Handbook (DCHB) is a joint venture between the central and state government and the recent publication for 2001 Census happens to be the sixth in the series of its publication since the year 1951. Since then, in view of the contemporary requirement of data, the coverage of DCHB has widened and received regular refinement. Hence, it has become the most widely used publication compiled and prepared by the Census organization. The presentation of data is done in two parts, viz., the Part-XII-A and Part-XII-B seperately for the bigger districts and single combined volume for the each smaller district.

Part-XII-A contains Village & Town Directory data with some important tables depicting availability of basic civic amenities at the C.D. Block/Village and Town level. In the other hand, Part-XII-B presents district Primary Census Abstract (General), Primary Census Abstract for Scheduled Caste, Primary Census Abstract for Scheduled Tribe and CD Block/Villagewise Primary Census Abstract and Urban Primary Census Abstract. In addition to the above an effort is made to furnish various essential information about the district such as – historical background, administrative set-up, drainage, physiography, climate, place of historical, archaeological and tourists importance etc. The 2001 Census DCHB presents a variegated picture of the human life as reflected by the census data. The scope of analysis of census and non-census data has considerably increased through various summary tables and inset tables. Besides brief analysis of basic census data in the form of PCA and analysis of amenities and infrastructural facilities available in villages and towns in the form of Village Directory and Town Directory, the data on houses and household amenities have also been briefly analyzed and included in this volume. Not only this, we have made efforts to present comparative data on various aspects such as distribution of population, growth rate, density of population, sex ratio, work participation rates, literacy, language, religion, scheduled caste and schedule tribe population (since 1951 or 1961) mostly by residence for the benefit of data users. Likewise, in the annexures, brief analysis on some socio-demographic, economic, migration and cultural aspects of the population pertaining to 1991 Census has also been made.

There has been regular and continuous flow of suitable suggestions and advice from Shri J.K. Banthia, Registrar General, India, throughout completion of the work for which I express my deepest and sincere gratitude to him. Other officers in the office of the Registrar General, India, New Delhi, contributed their share in the befitting manner for which as well I record my thankfulness to Shri R.G. Mitra, Deputy Registrar General (C&T), Shri R.P. Singh, Deputy Registrar General (Map), Shri I.C. Agarwal, Senior Research Officer (S.S.) and Shri S.L. Jain, Deputy Director (S.S.), for without their timely help and guidelines this publication would not have appeared before us in time and in this form.

I shall be failing in my duties if I do not acknowledge the contributions made by the District Census Officers/ District Magistrates and innumberable Village, Block and Municipal level officials of all the districts of West Bengal for arranging collection of village and town directory data by the local officials from the villages/towns under their jurisdiction.

In my own office my thanks are due to each one of the staff members for their zeal and enthusiasm shown in completing this project successfully at various stages of work very much within the stipulated time. As it is not feasible to express my thanks individually a separate page of acknowledgement is included in this publication.

Vikram Sen
Director of Census Operations,
West Bengal

Acknowledgements

A. The Directorate of Census Operations respectfully acknowledges the devoted, sincere hard work rendered by about one lakh fifty thousand Census Enumerators, Supervisors and Officials at the District, Block and Municipal levels without whose heroic efforts, the Census 2001 could never be undertaken. Three among these Enumerators also laid down their lives while in discharge of Census work.

B. The Census Directorate, West Bengal also gratefully acknowledges the sincere and dedicated work of the following officers/officials of this Directorate associated with the preparation of this Hand Book.

Drafting of analytical notes/ overall editing and checking at various stages :

Shri R.K. Ram	Joint Director	Shri P.K. Majumdar	Deputy Director

District Highlights - 2001 Census

1. Maldah disrtict occupies 11th position in terms of population in the State.
2. Maldah is one of the least urbanised districts of the State having less than 8.0 per cent of the total population in urban areas, whereas more than 27 per cent of the State's population live in urban areas.
3. Maldah has an alarmingly high growth rate (24.8 per cent) that makes its rank 2nd in the State.
4. So far density (population per sq.km.) is concerned, Maldah district occupies 8th position in the State.
5. The sex-ratio of the district (948) is above the State's sex ratio (934).
6. Maldah has the second lowest literacy rate (50.28 per cent) in the State.
7. There are 157 uninhavited villages in the district.
8. There are 34 villages having population of 10,000 and above.
9. Sultanganj (Kaliachak I & III) is the most populated (39,092) and both Paschim Bilahara and Fatepur (English Bazar) are the two least populated villages (3 persons each).
10. The economy of the district is based on agriculture. Nearly 51 per cent of the main workers of the district is engaged in agricultural sector.
11. The district occupies prominent place in production of Mangoes and in Sericulture in the state.
12. Gazole CD Block has the highest number of villages (293) and Ratua-II the lowest (51).
13. Kankribandha Jhaubona village of Kaliachak-II CD Block has the largest area (2,739 hectares) and Basakbari village of Bamangola CD Block the smallest (5 hectares).

The district of Maldah has recorded continuous growth in its population with the only interruption in 1921 when it declined by 1.8 per cent with rural 1.7 per cent and urban 4.8 per cent. The influenza epidemic of 1918-19 caused heavy mortality resulting in decline of population at the 1921 Census. The highest growth is observed in 1971 (32.0 per cent).

If we consider rural-urban growth separately, the maximum rural growth rate is noticed in 1971 (31.9 per cent) and the maximum in urban area is noticed in 1991 (91.9 per cent) which is a landmark but it declined to 29.2 percent in 2001.

As already discussed, the lowest growth rate being in 1921 when population declined in absolute numbers for the over all population of the district as well as in its rural and urban components.

Note : While calculating density, area figures have been taken upto two decimal points

Maldah district is predominantly rural in relation to total population and total area of the district. There are only 5 towns in the district. The density of population of the district is lower (881) as compared to State average (903). Among the C.D. Blocks, the highest density is recorded by Kaliachak - I CD Block (2951) while the lowest in Habibpur (474). There are 1,799 villages (1,642 inhabited and 157 uninhabited) in the district. The highest number of inhabited villages is seen in Gazole CD Block (288) and highest number of uninhabited villages is noticed in Habibpur CD Block (58).

Among the urban units, English Bazar Municipality with 11,846 population per sq. Kilometre is the most densely populated whereas Kendua census town with 4,811 population per sq. kilometre is most sparsely populated town.

19	Old Maldah (M)	Urban	0	0	0	0	21	258	193	65
20	English Bazar (M)	Urban	16	109	100	9	91	1,333	1,037	296

The above table shows that there are 231 houseless households, with 214 households in rural areas and 17 households in urban areas, consisting of a total population of 889 (779 in rural areas and 110 in urban) in the district. It is most likely that they may not have even a plot to construct the house. If some of them may have the plot, they may not have the finance to meet the cost of construction of house. It is a painful fact that a majority of the houseless population lives in rural areas and they are unable to arrange even a thatched house. Among the CD Blocks the maximum houseless population lives in English Bazar CD Block (151) followed by Kaliachak - I CD Block (112) while the minimum in Kaliachak-II CD Block (4). Among the urban units, the highest number of houseless population is seen in English Bazar municipality (109) and the lowest in Kendua census town (1). Kachu Pukur census town, Aiho census town and Old Maldah municipality have not returned any houseless population.

There are 811 institutional households, 699 households living in rural areas and 112 in urban. The total institutional population is 11,090 with 9,499 in rural areas and 1,591 in urban areas in the district. Males are numerically much larger than their female counterparts (males 8,077, females 3,013). Among the CD Blocks, the maximum institutional population lives in Maldah (Old) CD Block (1,423) followed by Gazole CD Block (1,271) and Kaliachak -III CD Block (1,270) and the minimum in Chanchal - II CD Block (257). Among towns, English Bazar municipality has a total institutional population of 1333 and Old Maldah municipality 258. No institutuional population is reported from census towns of Kachu Pukur, Kendua or Aiho.

History & Scope of District Census Handbook

(i) History and Scope of the District Census Handbook

The District Census Handbook a joint venture of the State Government/ Union Territory Administrations and the Census Organisation, is one of the most important publications, particularly in the context of planning and development at grass root level. It is perhaps the only source that gives village and town level information concerning several demographic and socio-economic characteristics and also on availability of important civic amenities. This publication was for the first time brought out in the 1951 Census. In fact it is the replacement of 'Village Statements' used to be prepared in the Censuses of Pre Independence period and since then it is published after each decennial Census with some innovations/ improvements.

Scope & coverage of District Census Hand Books of 1951-1991 Censuses

Initially the scope of the DCHB was confined to certain important census tables on population, economic and socio-cultural aspects and also the Primary Census Abstract (PCA) of each village and town of the district. The DCHB published after the 1961 Census contained a descriptive account of the district, administrative statistics, Census tables and Village and Town Directories including PCA. In 1971 Census the DCHBs were brought out in two parts viz. Part A comprising Village and Town Directories and Part B comprising Village and Town PCA in respect of all the States and Union Territories. The Third part of the DCHBs comprising of administrative statistics and district Census tables. During 1981 Census new features alongwith restructuring of the format of Village and Town Directory were introduced in the DCHB. These were published in two parts for each district. While Part A comprised of Village and Town Directories, the PCA of Village and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA upto tahsil/town level were provided in Part-B. To illustrate, all the amenities except electricity, were brought together in the Village Directory and if an amenity was not available in the referred village, the distance in broad ranges from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the Village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Direcotries also, keeping in view the requirements of the Minimum Needs Programme, a Statement (IV-A) on slums was provided so as to enable the planners to chalk out the programmes for providing civic amenities in the slums. In this statement details on civic and other amenities were presented for the notified slums of Class I and Class II towns. Apart from this, one column on the Scheduled Castes and Scheduled Tribes population and another on adult literacy classes/centres were added in statements IV and V respectively.

The manner of presentation of the DCHBs for the 1991 Census was more or less similar to that of 1981. However, the format of PCA was restructured slightly in the 1991 Census for the benefit of data users. Nine fold industrial classification of main workers was given as against four-fold, industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age group was also included in PCA for the first time with a view to enabling data users to compute more realistic literacy rate as all children below seven years of age have been treated as illiterate in 1991 Census. It was expected that these changes would help the planners in chalking out more effective developmental programmes.

One of the most important innovations in the 1991 Census was the Community Development Block (CD Block) level presentation of data in the Village Directory and PCA instead of the traditional Police Station level presentation. It was expected that the presentation of Village Directory and PCA data at CD Block level would help the planners in formulation of micro level development plans, as the Blocks are the lowest administrative unit for developmental planning. In order to facilitate the task of administrators, Planners and Researchers to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both the computer and manual codes for each Village were provided for the 1991 Census alongwith the corresponding codes of 1981.

Scope & coverage of District Census Handbooks of India, 2001

The District Census Hand books for Census of India, 2001 are more informative and exhaustive in terms of coverage and context. The coverage in Village Directory has been further broadened and includes facilities like banking, recreational, income and expenditure of Gram Panchayats and most important commodity/commodities manufactured in the village. Apart from these, more details on distance (s) of basic health and educational facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre, Primary Health Centre and Primary School), if not available in the village are proposed to be given for the first time.

The type and extent of basic amenities available in the villages and towns are proposed to be analyzed in depth with the help of a large number of cross classified inset table & statements. Brief analytical notes /accounts on important aspects concerning respective districts viz. (i) firstly, mortality and migration, (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/place of residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education & (vii) distribution of different mother tongue, all based on 1991 Census, will be given at the end of the text as separate annexures. It is also decided to provide two lists separately indicating names of colleges and hospitals available in the villages and towns in the district.

For the District Census Handbooks under Census of India, 2001 more emphasis has been given towards quality of village and town level amenity data. With a view to find out erratic or aberrant trends or in inexplicable fluctuations in amenity data, similar information brought out by the State and Central Government have been collected & these information have been used to verify the Village Directory & Town Directory data. The inconsistencies noticed in Village Directory & Town Directory data have been removed in consultation with the respective district administration as far as possible.

Brief History of the District

Mention of the name of Maldah was first found during the reign of Akbar in Abul Fazal's celebrated book, A-in-i-Akbari. Probably it was applicable to a particular area i.e. present Old Maldah. However, in our humble opinion the word "Maldaha" is a pre-muslim word. The Sanskrit word Mal (Mal+ghang) means "the elevated land" and the word "Daha" in the regional dialect denotes "a part or portion of it". The later has been suffixed and finally the term becomes Maldah or Malda.

The district of Maldah is within the limits of ancient "Gour" and "Pandua" (Pundrabardhan). They were the capitals of Bengal in ancient and medieval ages. The rise and development of Gour as an imperial city is shrouded in mystery and its boundary has been changed in different ages since 5th Century B.C.

Pandua (Pundranagar) was the provincial capital of imperial Mourya rulers. After the Guptas, Sasanka ruled independently as the King of Karna Subarna as well as the King of Gour for more than three decades. The Palas ruled Bengal from middle of 8th Century to 11th Century A.D. After Palas, the Sena kings ruled Bengal. Lakshmansena, the last independent Hindu king of Bengal ruled from 1179 to 1207 A.D. During his reign, Maldah was known as Lakshmanavati after his name and that was one of the capitals of Sena kings.

Thereafter, Bakhtyar Khalji advancing rapidly from Bihar suppressed Lakshmansena in his capital at Nadiya in 1204 A.D. and started the Turk-Pathan rule over Bengal, which lasted for over five hundred years i.e. before final annexation of Bengal by Akbar in 1576 A.D. During the Muslim period Malda (Gour) was an important centre for administration, trade and culture. Relics of the period at Gaud about ten kilometres from the present district are still one of the major tourist attractions in Maldah.

The present district of Maldah was formed from the outlying portions of Purnea, Dinajpur and Rajsahi districts in 1813 by the then British Government. The district boundary was published by a Govt. Notification in 1875. Subsequently minor transfer of 65 villages of Murshidabad district and 237 villages from Dinajpur were made to add to the district boundaries. The transfer of Bhutni Diara, a large island (Char) in the Ganga from Santal Parganas to Maldah in 1929 is also noteworthy.

Administrative Set-up

(i) Region of the state where district is located :

Maldah is the southernmost of the North Bengal districts and is included under the Jalpaiguri Division.

(ii) Total number of CD Blocks or the next Administrative units after district and changes therein including jurisdictional changes during 1991-2001 :

The district has a single sub-division (Sadar). There are 11 police stations namely, 1) English Bazar, 2) Old Maldah 3) Gazole, 4) Habibpur, 5) Bamangola, 6) Ratua, 7) Harishchandrapur, 8) Kharba, 9) Kaliachak, 10) Manikchak, and 11) Baishnabnagar. During 1991-2001, Mangalbari Samundai which was non-municipal town in 1991 has been merged with Old Maldah Municipality as per notification no. 533/C-4/MIM-25/91 dated 15.11.1994.

There are in all 15 CD Blocks in the District namely Harishchandrapur-I, Harishchandrapur-II, Chanchal-I, Chanchal-II, Ratua-I, Ratua-II, Gazole, Bamangola, Habibpur, Maldah(Old), English Bazar, Manikchak, Kaliachak-I, Kaliachak-II and Kaliachak-III.

(iii) Total number of Towns/Villages etc. :

Total number of urban units in Maldah is 5, out of which 2 are municipalities or statutory towns namely Maldah and English Bazar and 3 are the census towns i.e. non-municipal towns viz. Kachupukur, Kendua and Aiho.Total number of villages is 1,799 as per 2001. Maldah also have an Urban Agglomeration (UA) called Englishbazar, consisting of the above-mentioned 2 municipalities.

(iv) If the district is newly created, the area from which it has been carved out :

It is not a newly created district.

(v) Urban Local Bodies :

The history of urban local bodies dates back in India to Indus Valley Civilisation. In modern India it originated during British rule when in 1687 the first Municipal Corporation was set up at Madras under a charter granted by James II. There are different types of municipal bodies, namely, Municipal Corporations, Municipalities, Notified Area Comittees, Cantonment Boards etc. Except the Cantonment Boards all other types are created under State municipal laws. Cantonment Boards owe their origin to a Central Act called the Cantonment Act, 1924. A municipality is a body politic and legal entity, constituted by a Statutory Act. Municipal Corporations constitute the highest or topmost form of urban local governments and are created for big cities by the enactment of state legislatures or of Parliament in case of union territories. A Notified Area Committee is created for an area which does not fulfil all the conditions laid down as necessary for the constitution of a municipality or it may also be created for newly developing towns or areas. The councils of all these corporate bodies except notified area comprise of elected, opted and associate members. The notified area is governed by the state governments through a body nominated by it. The primary object of every urban local body is to provide civic amenities to the people and the overall development of the town.

The municipalities of Krishnanagar and Ranaghat were constituted in the year 1864. Shantipur, Nabadwip, Birnagar and Chakdaha municipalities were constituted successively in the respective years of 1865, 1869, 1869 and 1886. Municipalities of both Kalyani and Gayespur have been constituted in the year 1995.

Civil Administration :

The Civil Administration of the district consists of District Magistrate as the principal excutive with 1 sub-divisional head and under them there are Block level officers under each CD Block. Under Police administration, Superintendent of police is the head of the district and under him there are 1 sub-divisional police officer with Inspector-in-charges/officer in-charges in each police station. At the District Headquarters, District judge is the head of the Judiciary and Sub-divisional Judicial Magistrate is sitting in the court at the sub-divisional level.

Physical Features

(i) Location and size

The district Maldah lies between 25^{O} 32′08″ N and 24^{O}40′20″ N, Latitude and in between 88^{O}28′10″ E & 87^{O}45′50″ E longitude. The district is surrounded by North Dinajpur and South Dinajpur in the North, the river Ganga in the south, Bangladesh in the east and Purnia district of Bihar in the west. In 1935, the total area of the district was 1,987 sq. miles as per report on the survey and settlement operations. At the time of partition of India it covered 2,004 sq. miles, but now the area is 3,733 sq. km. Its ranking in respect of area is 11th (eleventh) in the state.

(ii) Physiography :

Maldah is situated on the Western part of alluvium filled gap between the Rajmahal Hills on the west and Garo Hills on the east. East of river Mahananda, the soil of barind is red soil of older alluvial formation. It is composed of stiff clay containing iron and lime. West of Mahananda, the soil is light loam called 'do-ash' (an admixture of clay and sand). On the eastern side the properties of clay is greater. But towards Ganga the proportion of sand becomes greater. The third type of soil in the low-lying areas beels and valley, there is a dark loam called 'matial' with greater admixture of clay. There are four distinct regions of the district - 1:Barind 2 : Tal, 3 : Diara and 4 : central area including thorny Jungle named "Kantal".The district is at an elevation of about 50-100 feet above the sea level being intersected with frequent deep nalas and resemblances of small hills. The river Mahananda flowing from north to south throughout the entire length of the district divides it almost in two equal parts. To the east of it lies the undulating tract known as the varind. Its characteristic feature is the relatively high lands of the red clay soil of the old alluvium. It has an elevation from 15.50 meters above the level of the Ganga. The west of the Mahananda, the region is again divided into two parts by the river Kalindri. The area to the north of Kalindri is called "Tal" as it slopes gradually down. It covers Harishchandrapur and Ratua Block between the Mahananda in the north and Kalindri river in the south. The remainder of this tract goes down to the border of the low-lying land along the river and was once entirely occupied with thorny jungle called Kantal. The "Diara" means a strip of sandy land rising out of bed of the river (the river Ganga) above the water level. The formation of this type of land is the result of silt carrying action of the Ganga through the centuries.

Flora & Fauna :

From time immemorial, Maldah is famous for mango. Other fruits like jackfruits,custard apple, mulberry, peach, gooseberry, wood apple, betel nut and coconut are available. Among the jungle trees babool, wild palm, pepul, acacia, burged, tamarisk, sisoo, sagoon, toon, gamar, arjun, bamboo, simuel are noteworthy. Presently extensive efforts are being taken for afforestation by the Govt. level. Wild animals were abundant till the first quarter of the nineteenth century. Among them Rhinoceros, Tiger, Samber, Leopard, Bara singha deer, spotted deer, Antelope, Wildcat, the Wild buffaloes, Hyena, Wolf, Pole cat, other civil cats were available. Among amphibious reptiles the snub-nosed crocodiles were found in large number in the Tangan and Punarbhava and Gharial in the Ganga. But due to the over-increasing pressure of population most of the wild animals of late suffered extinction in Maldah and shifted their habitat further north.

(iii) Drainage

The Ganga flowing through Bihar first touches the western boundary of the district opposite Rajmahal, where there is a big island by the name of "Bhutni Diara". It proceeds towards south for about 24.2 km. and then turns south-east again crossing the Farakka Barrage leaving the district near its junction with the Mahananda.

The Mahananda rises in the lower slopes of the Himalayas enters Malda district at the extreme corner. It then flows eastwards and acts as a boundary between Blocks of Ratua and Gazole and then turns south almost straight through the middle of the district and flows along the towns of English Bazar and Old Malda. Ultimately it joins the Ganga through Nawabganj at Godabari of Bangladesh. The length of the river in the district is 88.6 km.

The Kalindri is an offshoot of the branch of Ganga, but actually it is a branch of the Mahananda. It enters the district of Maldah near Mianhat of Harishchandrapur Block from where it is known as the Kalindri. It takes a sharp bend to the south flows along a winding course in the south-eastern direction

until it falls into the Mahananda just opposite to the town of Old Maldah. In the north, the kalindri receives as its tributaries the rivulets of Kalkos, Kankar, Kos and Baromasia. The total length of the river is 85.3 km.

The Punarbhva is a tributary of the Mahananda and goes into Bangladesh. It leaves the district of Uttar Dinajpur and forms the boundary between Maldah and Dakshin Dinajpur for a few kilometers between Tapan block of Southern Dinajpur and Bamangola of Malda. Further south it also acts as the eastern boundary between Dakshin Dinajpur and Rajsahi district of Bangladesh. It throws out two important channels at Mahadevpur and Khutadsha in the Bamangola block. Its length in the district is 64.4 km.

The Tangan rises in South Dinajpur district and flows southwards into Maldah district between Gazole and Bamangola Block and then flows between Old Maldah and Habibpur until it falls into the Mahananda at Aiho.

Farakka Barrage Project :

*Years back Jean Racine in his famous compilation of seminar contributions titled 'Calcutta 1981 – The City, Its Crisis and the Debate on Urban Planning and Development' wrote that, "Its object is to maintain by a derivation of the water from a major branch into the Hooghly, a minimum of 1130 m^3/s required by the port of Calcutta, while guaranteering to Bangladesh at least 80.0 per cent of the water flowing in the Ganges in the dry season. This condition has been respected. But the flow has lessened in the course of the years. The pressure from Bangladesh has induced Delhi to reduce the Hooghly's share to 450 m^3/s. It was increased only to 588 m^3/s in 1977. This frustrates Calcutta, without pleasing Dhaka. It seems that the operation, though an incorrect evaluation of the flow of the Ganges waters, did not satisfy anybody nor guaranteed the future well-being of the port of Calcutta." (Publication year 1990, pp.188 & 192)

This situation has further worsened with the passing of time. Most of the scientists are now vocal about the utter lack of regard to multi-dimensional fluvial dynamics of the river that has frustrated the basic objective. As the eminent River Expert Rudra sums up, "The sediment movement in tidal estuary of the Hugli is the function of a complex fluvial system that can hardly be governed by inducing 40000 cusec (1123 cumec) of water. Our conservative estimate based on the Tide Tables for 2004 published by Kolkata Port Trust reveals that during the high tide in May total amount of water induced into the estuary varies from 2559-6790$\times10^6$ m^3 with the sediment load ranging from 2.60-6.80$\times10^6$ ton. A similar estimate during August-September shows those to be 1857-6813$\times10^6$ m^3 and 1.86-6.81$\times10^6$ ton respectively. The south flowing peak discharge in the Hugli even during monsoon hardly exceeds 4246 cumec only. This poses most serious constraints for silt management in the estuary.

"While constructing barrage across Ganga at Farakka and even during the last three decades of its operation, the silt management in the Farakka pond was given scant or no attention. It was largely the silt that has been trapped upstream of the barrage and that caused the disastrous consequences. The river bed upstream of the barrage is now so clogged with sediment that even a country boat can not negotiate freely during lean months. The river has been gnawing its left bank to open a new outlet outflanking the Farakka Barrage. The Geo-political scenario of the subcontinent has so changed since 1971 that operation of Farakka Barrage does not find a smooth passage. Since the introduction of high yielding technology and expansion of irrigation in the upper and middle Ganga plain, the available water at Farakka during lean months dwindles far below the threshold limit and thereby exerts stress on the Indo-Bangladesh relationship. Nor the recommended discharge of 1132 cumec is induced for the port of Kolkata that continues to face the problem of navigational hazards. The annual discharge hydrograph of Bhagirathi at Jangipur below the outfall of feeder canal for the year 2000 was extremely skewed as tributaries like Bansloi, Pagla, Madhabjani, Kanloi contributed huge discharge because of a cloud burst in late September over uplands of Santal Parganas in Jharkhand. The lean season induced discharge in the river was below the threshold limit fixed for the maintenance of the navigability of the port of Kolkata. The fluvial dynamics in the Hugli river is so complex that the concept of flushing the sediment seems to be a myth. One should also keep in mind that Farakka Barrage Project was designed on the database of late 1950. But the catchment area of the Ganga has been drastically modified during last five decades and the present situation demands the review of the project afresh." (Prelude; The Encroaching Ganga and Social Conflicts : The Case of West Bengal, India by Kalyan Rudra, 2004)

The unabated change of course of the Ganga both upstream and downstream of the Farakka Barrage has posed a serious threat to the Barrage itself. In the words of Rudra, "The uninterrupted encroachment of

the river towards left bank may outflank the barrage and open a new course through the present Kalindri-Mahananda route. Since the programme of silt management was totally denied, the riverbed continues to be elevated and opening of a new course in no distant period cannot be ruled out."(ibid) This has already become serious concern of the Government of West Bengal as well. It would be worth quoting here an unpublished State Irrigation Department report (for 1997-2001) cited by Rudra in his article. It goes, "*The continued swing of the river Ganga on the left bank in the district of Malda upstream of the Farakka Barrage is not only eroding densely populated villages, fertile cultivable lands, roads and communication systems and causing floods almost every year, but also holds a possibility of the Farakka Barrage being outflanked once the Ganga is allowed to avulse into one of its abandoned palaeo-channel on the left bank.*"(ibid)

With this, the question of rehabilitation of the millions of erosion victims treating them as environmental refugees also comes up. The land eroded from left bank of Ganga in Malda is more than 200 sq.km., while that from Murshidabad is about 356 sq.km.

Main water features such as tank, lake reservoir etc.

There are many marshes called Beels. They are like large lakes and are formed due to direct or indirect result of fluvial action. So there is chain of beels stretching north of the Tangan and Punarbhava rivers. In Diara the beels are the depressions left by the Ganga due to its successive new courses. There is also a chain of beels situated near the present relics of Gaud contiguous to the river Mahananda due to indirect river action. Some large tanks under the name of "Dighi" (Pra. Dighia Skt. Dirghika) were made for drinking purpose by the kings and sultans of ancient and medieval periods. Some large beels of the district are Bamangola Beel, Jagdala Beel, Raniganj Beel, Bhair Beel, Ahora Beel (Gazole), Kowakhon Beel, Sabdalpur Beel (Kaliachak), Dhajora Beel, Madhaipur Beel (Old Malda), and Godrail Beel of English Bazar.

(iv) Climate

The climatic condition of the district is marked by a hot and severe summer, ample rain and humidity throughout the year. The monthly temperature varies between 5^0 Celsius in the winter to 45^0 Celsius in the hot summer. Average of the maximum and minimum temperature of the district for the preceding 10 years is as follows :

Year	Maldah	
	Maximum (in Celsius)	Minimum (in Celsius)
1991	40	5
1992	43	8
1993	40	9
1994	45	11
1995	41	9
1996	43	11
1997	41	9
1998	43	8
1999	42	9
2000	40	8

Note : Yearwise data taken from District Statistical Hand Book, 1996 & 2001

The hottest month in Maldah is May and the coldest month is January. Characteristic of the wind is generally moderate with some increase in speed in the late summer and monsoon season. In the beginning of winter the winds are variable in direction, then gradually appear from directions between west and north-east and from west to north. Southerlies and south westerlies appear in March then become variable in direction and in May from directions between north-east and south. In monsoon season winds blow mostly from directions between south and east. The average annual rainfall in the district is 1697 mm which generally increases from the south-west to the north-west and comes within 67 rainy days on an average and about 78.0 per cent of the annual total rainfall comes from the south-west monsoon lasting for four months, that is, June to September. August is the month for the highest rainfall in Maldah. During March to May thunderstorms in afternoons come from north-west with heavy rain and severe squalls. This violent phenomena locally known as 'Kalbaisakhi' cause sharp drop in temperature.

Census Concepts

Building :

A 'building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, schools, places of entertainment, places of worship, godowns, stores, etc. It is also possible that buildings which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent Houses :

Houses, the walls and roof which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, brunt bricks, stones or concrete. Roof may be made of any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-Permanent Houses :

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary Houses :

Houses in which both walls and roof are made of materials which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch bamboo, wood, mud, plastic or polythene.

Dwelling Room :

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breath of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling room. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking etc. is regarded as dwelling room. In a situation where a census house is used as a shop or office etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant's quarter is used by a servant and if she/he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House :

A 'Census House' is a building or part of a building used or recognized as a separate unit because of having a separate main entrance from the road or common courtyard or, staircase, etc. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder :

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure

with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storied ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storied structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area there are separate buildings owned by different persons then each such building is treated a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building should treated as a separate building. But if in any of these buildings there are flats in occupation of different households, each such flat should be reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it should not be realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat should be treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in three rooms and the second household occupying two rooms, then considering the use, the first three rooms together should be treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ hotel building should be treated as one census house. But if such hostels/hotels have out-houses or other structures used for different purposes of the same purpose, then each structure attached to the main hostel/hotel should be treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bathroom, baithak etc. Though each of the huts is a separate structure, they form single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts should be treated separate census houses. However, if there are also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, work-shed etc., these should be treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number is given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up is treated as a building.

Rural-Urban Area :

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village'; for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows :

(a) All places with a municipality, municipal corporation, cantonment board or notified town area committee, etc.

(b) A place which satisfy or are expected to satisfy the following criteria simultaneously :

i) A minimum population of 5,000;

ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits; and

iii) A density of population of at least 400 per square kilometre (1,000 per square mile).

For identification of places which would qualify to be classified as 'urban', all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activities were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban areas under Urban Agglomerations. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., may have come up near a statutory town or city but these are within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

Household :

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Castes and Scheduled Tribes :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities, which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Castes in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given in the next page.

37 Sauria Paharia
38 Savar

Language and Mother Tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate :

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate :

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational Level :

The highest level of education a person has completed.

Work :

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not

only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceeding the date of enumeration.

Main Worker :

A person who has worked for major part of the reference period (i.e. six months or more during the last one year precceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal Worker :

A person who worked for less than six months of the reference period (i.e. in the last one year preceeding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non Worker :

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceeding the date of enumeration) is termed as 'Non worker'.

Cultivator :

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural Labourer :

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household Industry Worker :

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other Worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work Participation Rate :

Percentage of workers (main + marginal) to total population.

Population Density :

Population density is the number of persons inhabited per square kilo-metre of the area.

Age :

Age is measured in terms of the completed number of years.

Sex-ratio :

Number of females per 1000 males in a population.

Non-Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.. It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns, which are not provided with such underground sewerage system, it is served by open surface drain, box drain, silk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil :

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the street sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil, which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below.

Crude birth rate (CBR) :

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid–year Population}} \times 1{,}000$$

Crude death rate (CDR) :

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate :

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR) :

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR) :

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR) :

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR) :

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years}} \times 1{,}000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = 5 \times \frac{\sum_{15\text{-}19}^{45\text{-}49} ASFR}{1{,}000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = 5 \times \frac{\sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1{,}000}$$

Age-specificMortality rate (ASMR) :

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q_1 :

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q_2 :

Probability of dying between birth and age 2.

q_5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal mortality rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or underduring the year}}{\text{Number of live births during the year}} \times 1,000$$

Early neo-natal mortality rate (ENMR) :

$$ENMR = \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1,000$$

Late neo-natal mortality rate(LNMR) :

$$LNMR = \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1,000$$

Post neo-natal mortality rate (PNMR) :

$$PNMR = \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1,000$$

Peri-natal mortality rate (PMR) :

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

Still birth rate (SBR) :

$$SBR = \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

Maternal mortality rate (MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 married women in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of married women aged 15-49}} \times 100,000$$

Eligible couple (Couples per 1000 population) :

Number of currently married females in the age group15-44 years per 1,000 persons of all ages.

Child woman ratio (0-4) :

Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9) :

Number of children in the age group 5-9 years per 1,000 women in the age group 15-49 years.

Migration :

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another

place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/ relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration :

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration :

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation / Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA / town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area :

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city :

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

Census Findings - Population & its distribution

Census Findings - Population & its distribution

(vii) 2001 Census findings – Population and its distribution :

Progress of Population

As per Final Population Total, Census of India, 2001 Maldah district of West Bengal has a population content of 3,290,468 with a rank of 11th in the state. This is slightly higher that its rank of 12th in 1991. The percentage of population distribution of the district of Maldah among the rural and urban areas along with respective percentage from 1951 is shown in Table-1 below :

TABLE - 1 : RURAL AND URBAN POPULATION OF THE DISTRICT MALDAH WITH PERCENTAGE TO TOTAL IN BRACKETS (1951-2001)

Sector/ Census Year	1951	1961	1971	1981	1991	2001
Total	937,580	1,221,923	1,612,657	2,031,871	2,637,032	3,290,468
Rural	902,419	171,138	1,544,631	1,934,675	2,450,495	3,049,528
	(96.2)	(95.8)	(95.8)	(95.2)	(92.9)	(92.7)
Urban	35,161	50,785	68,026	97,196	186,537	240,940
	(3.8)	(4.2)	(4.2)	(4.8)	(7.1)	(7.3)

(a) Distribution of population in rural-urban areas:

It can be seen from the above table that the proportion of rural population has constantly declined from one census to other. It was 96.2 per cent in 1951 which has gone down to 92.7 per cent in 2001. Naturally, it is so because of progressive improvement in the level of urbanisation as reflected by the increasing urban proportion. In 1951 share of the urban population was 3.8 per cent which has gone up to 7.3 per cent in 2001. Even then Maldah remains the district with lowest per cent of urban population and conversely the highest concentration of rural population in the state.

(b) Size, Class and status of town :

There are two municipalities in Maldah district viz. English Bazar and Old Maldah. English Bazar with a population of 1,61,456 belongs to Class-I and Old Maldah with population of 62,959 falls in Class-II category as per census classification. Apart from these municipalities, there are 3 Census towns viz. Kachupukur, Kendua and Aiho. All of them have population above 5,000 and come under Class - V category.

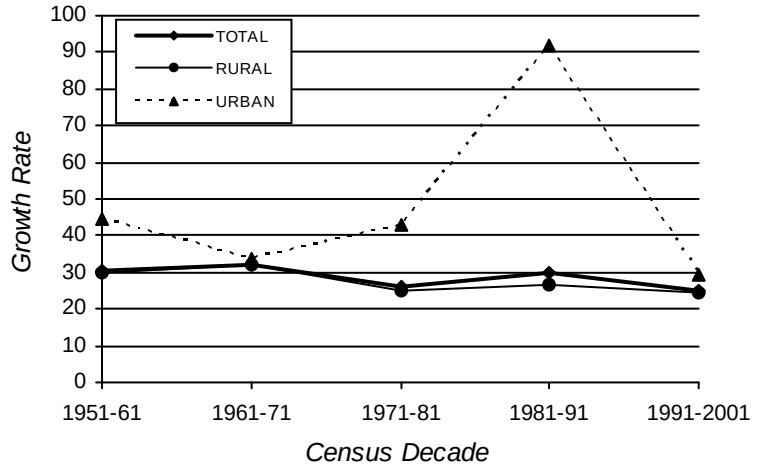

Growth Rate :

During 1991-2001 the rural growth rate was 24.4 per cent while the urban growth rate was 29.2 per cent. The urban decadal growth rate in Maldah between 1951-2001 has always been higher than the rural growth rate. Maldah, however, has the second highest rural decadal growth rate in 2001 at 24.4 per cent next only to Uttar Dinajpur at 30.6 per cent. Consequently, the total decadal growth rate for Maldah is also the second highest in the State at 24.8 per cent next only to Uttar Dinajpur at 28.7 per cent. An overall picture of the growth rate of the district for the last five decades can be observed from Table- 2 below :

TABLE - 2 : DECADAL GROWTH RATE OF POPULATION OF MALDAH (1951-2001)

Total/ Rural/ Urban	1951-61	1961-71	1971-81	1981-91	1991-2001
Total	30.3	32.0	26.0	29.8	24.8
Rural	29.8	31.9	25.3	26.7	24.4
Urban	44.4	33.9	42.9	91.9	29.2

GROWTH CHART OF POPULATION IN MALDAH, 1951-2001

CD Block Level :

Among the rural areas in the district of Maldah, Maldah (Old) CD Block has the highest decadal growth rate at 33.0 per cent followed by Kaliachak-III at 32.4 and Kaliachak-II at 29.0. Habibpur CD Block has the lowest growth rate with 1.6. Out of 15 Blocks in Maldah district, 10 have recorded decadal growth rate at more that 25.0 per cent during 1991-2001. If the present growth rate continues, Maldah district will nearly double its population by next 40 years. This is rather alarming because, like in case of Uttar Dinajpur district, there is as yet no sign of reduction in the rural growth rate as evident in the case of other districts.

The above chart shows that the total urban and rural growth rate has almost been constant during 1951-1991. It showed a slight declining trend during 1971-81 but rose again during the next decade of 1981-91 possibly due to migrant factors. But linear presenting during 1991-2001 again shows a clear declining trend. Like the rural growth rate the urban growth line also shows a sudden jump during 1981-91 but has fallen by even higher rate during 1991-2001 to almost touch the total line similar to 1961-71. It is also for the first time in 50 years that the urban growth rate in Malda has fallen below 30.0.

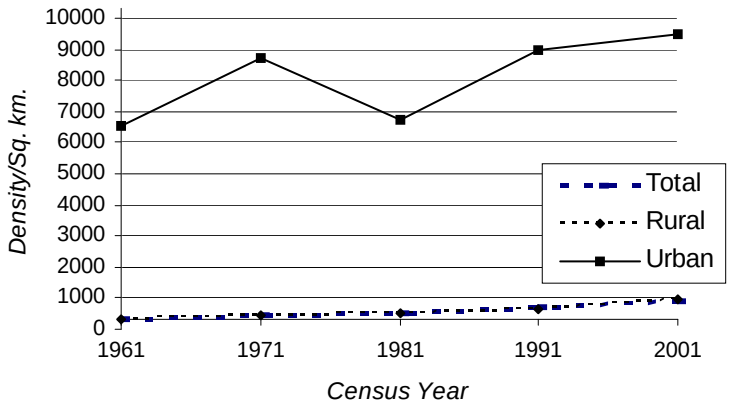

Density of population

Maldah had density of population at 706 persons per sq. km. in 1991 which has gone up to 881 per sq. km. in 2001 but is lower than the State density of 903. The rank of the district has remained unchanged being 8th in the State in 2001. The rural urban trend of the district can be observed in the table 3 below :

TABLE – 3 : DENSITY OF POPULATION OF MALDAH (1961-2001)

T/ R/ U	1961	1971	1981	1991	2001
Total	339	434	544	706	881
Rural	325	417	520	660	823
Urban	6,511	8,721	6,750	8,985	9,497

Density of Population in Maldah

It is observed from the 'Chart' that the density of population in the district over 5 decades has generally shown increasing trend except for urban areas during 1971-81. But the increase for the total and rural areas over the last 5 decades has been marginal. However, the increase of density in the urban areas has been like other parts of the State, very high (except 1971-81).

Sex ratio

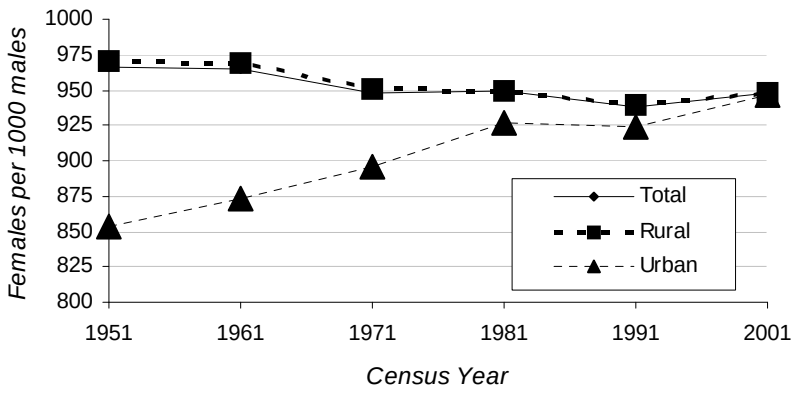

Among the districts of West Bengal, Maldah has an exceptionally fluctuating sex-ratio between 1951-2001 as the following Table will indicate.

TABLE 4 : SEX RATIO IN MALDAH DISTRICT 1951-2001

	Sex-ratio		
Census Year	Total	Rural	Urban
1951	966	971	853
1961	965	969	873
1971	948	951	896
1981	949	950	927
1991	938	939	924
2001	948	948	947

It will be evident from the above table that the total sex ratio for the district for 1951 had declined during 1961 and 1971, rose slightly during 1971-81, declined in 1991 again and risen again during 1991-2001. In case of rural areas the sex ratio has steadly declined between 1951-91 from 971 females per 1,000 males to 939, but has risen to 948 during 1991-2001. In case of the urban areas of this district the sex ratio steadly improved from 1951 to 1981, declined in 1991 but has improved again during 1991-2001. Such fluctuation in the sex ratio is hard to explain except intervention of external factors like migration.

SEX RATIO IN MALDAH

'Chart' indicates that the district has an almost unchanged sex ratio over the last 5 decades. The above trend has been reflected from the more or less constant sex ratio of rural area. The decadal sex ratio in urban in the district has witnessed increasing trend except 1991.

CD Block level :

Among the rural areas of Maldah, all the CD Blocks have recorded improvements in sex-ratio from the 1991 level. The highest sex-ratio of 977 females per 1,000 males has been recorded in case of Habibpur CD Block which also had the highest rural sex-ratio in 1991. The lowest sex-ratio of 934 has been recorded in case of Ratua-I CD Block. Among the urban areas the highest sex-ratio of 994 has been recorded in case of Aiho Census town.

Work participation rate

The work participation rate by percentage of total workers and its rural-urban break up of both district and State can be found in the table below :

TABLE-5 : PERCENTAGE OF TOTAL WORKERS (MAIN+MARGINAL) TO TOAL POPULATION (1951-2001)

Year	West Bengal			Maldah		
	Total	Rural	Urban	Total	Rural	Urban
1951	34.7	32.6	40.9	26.9	26.8	30.5
1961	33.2	32.7	34.7	32.8	33.0	27.4
1971	27.9	27.2	30.1	27.1	27.2	24.8
1981	30.2	30.3	29.8	30.3	30.6	25.5
1991	32.2	33.2	29.6	34.7	35.3	27.3
2001	36.8	37.9	33.9	40.8	41.5	31.7

Note : Concept of Main Workers and Marginal Workers was introduced in 1981

It would be apparent that between 1951 to 1971 the district percentages of total workers to total population was lower than the State percentage. But since 1981 it is continually higher than the State average. Although the percentage of urban workers to the urban population of the State from 1951 to 2001 is always higher compared to the district, but the gap is steadily decreasing. In case of rural areas the district percentage of total workers to total population has always been higher than the State average except in 1951. While at the State level a clear demarcation is observed as the percentage of urban workers compared to that of rural workers is higher from 1951 to 1971 and reverse from 1981 to 2001 while at the district level, except 1951, the percentage of urban workers has always been less than the percentage of rural workers. Another important factor in determining the occupational engagement of the population in the classification of workers into Main and Marginal workers. As can be seen from the definition at para(iii), Census Concept, a Main worker is one who has worked for six months or more in a producing capacity while the Marginal worker is one who has worked for less than six months in the year preceeding the Census. We are giving below the percentage of Main workers by sex for Maldah and West Bengal from 1951 to 2001 for ready comparison.

TABLE - 6 : PERCENTAGE OF MAIN WORKERS TO TOAL POPULATION BY SEX (1951-2001)

Year	Maldah district			West Bengal		
	Person	Male	Female	Person	Male	Female
1951	26.9	45.8	7.4	34.7	54.8	11.3
1961	32.8	53.4	11.5	33.2	54.0	9.4
1971	27.1	49.5	3.4	27.9	48.8	4.4
1981	27.3	47.7	5.8	28.3	48.7	5.8
1991	31.6	50.6	11.5	30.2	50.7	8.0
2001	29.4	44.7	13.3	28.7	47.0	9.1

Note : Concept of Main workers and Marginal workers was introduced in 1981

It is seen that the district percentage of main workers to total population overtakes the State percentage in 1991. In case of the male Main workers, the district percentage has always been lower than the State average, except 1971. In case of the female Main workers, the district percentage has been higher in 1961, 1991 and 2001 and exactly equal in 1981 and lower in 1951 and 1971.

Literacy rate :

It will be evident from Table-7 below that during the decade 1991-2001 literacy rate in Maldah district has improved by 14.7 per cent points which is the highest for this district in the post independence period. Similarly rural literacy in Maldah has increased by 15.2 per cent points, which is again the highest in the post independence period. During the same period urban literacy has also increased by 7.2 per cent points.

Comparative analysis of improvement in literacy rate of the district with that of the State shows that Maldah could never overtake the State percentage point increase until 2001. In 2001 Maldah's percentage point increase of 14.7 as against 10.9 points for the State is therefore very significant.

In Table-7 below we are giving the comparative literacy rate for Maldah and West Bengal for 1951-2001 by residence and sex :

TABLE – 7 : COMPARATIVE LITERACY RATE BY SEX AND RESIDENCE, WEST BENGAL AND MALDAH WITH CHANGE IN DECENNIAL PERCENTAGE POINT IN PARENTHESIS (1951-2001)

		West Bengal			Maldah		
Year	T/R/U	Person	Male	Female	Person	Male	Female
1	2	3	4	5	6	7	8
1951	T	25.0	34.7	13.2	11.7	18.2	5.0

		(6.5)	(7.0)	(6.6)	(3.0)	(3.1)	(3.2)
1991	T	57.7	67.8	46.6	35.6	45.6	24.9
		(11.4)	(10.8)	(12.1)	(9.1)	(9.5)	(8.6)
	R	50.5	62.1	38.1	32.6	42.8	21.6
		(12.6)	(12.3)	(12.8)	(8.3)	(8.8)	(7.6)
	U	75.3	81.2	68.3	72.1	79.8	65.8
		(6.5)	(6.0)	(7.6)	(2.1)	(2.4)	(3.8)
2001	T	68.6	77.0	59.6	50.3	58.8	41.3
		(10.9)	(9.2)	(13.1)	(14.7)	(13.2)	(16.3)
	R	63.4	73.1	53.2	47.8	56.6	38.4
		(12.9)	(11.1)	(15.0)	(15.2)	(13.8)	(16.8)
	U	81.3	86.1	75.7	79.3	84.4	73.9
		(6.0)	(4.9)	(7.5)	(7.2)	(4.6)	(8.1)

Note : Upto 1971 literacy rate was calculated excluding 0-4 age group population. From 1981 onwards literacy rate is calculated excluding 0-6 age group population

Sub-district level literacy :

The highest percentage point increase in literacy rate among the rural areas of Maldah district has been noticed in case of Gazole CD Block wherein the literacy jumped from 31.1 in 1991 to 51.0 in 2001 registering an increase of 19.9 per cent points. Next comes Kaliachak-I CD Block wherein literacy rate increased from 35.1 to 54.3 showing an increase of 19.2 points between 1991-2001. However, the highest literacy rate in case of rural areas has been observed in Bamangola and Chanchal-I with 56.1 in both cases. In 1991 also Chanchal-I had the highest literacy rate among the rural areas with 39.8 followed by Bamangola with 37.5. In rural male literacy rate in 2001 Bamangola has also recorded the highest at 67.5 while in case of rural female literacy Chanchal-I has the highest percentage at 48.0. The lowest rural literacy rate at 40.7 has been recorded at Harischandrapur-II Block which also has the lowest male literacy rate in 2001 at 47.7. Kaliachak-III has the lowest rural female liteacy rate at 30.7. Among the urban areas of the district Old Maldah Municipality has recorded the highest decadal increase in literacy rate from 63.4 in 1991 to 70.6 in 2001 i.e. an increase of 7.2 points. However, English Bazar Municipality has the distinction of having the highest urban literacy rate in the district in 2001 with 83.0 per cent followed by Kachu Pukur census town with 80.4 and Kendua census town

with 70.4. Kachu Pukur census town also has the highest urban male literacy rate at 87.3 per cent while English Bazar Municipality has the highest female literacy rate at 78.6 per cent. The lowest urban literacy rate has been recorded at Aiho census town with 70.6 per cent.

TABLE –8 : POPULATION BY RELIGION IN THE DISTRICT OF MALDAH (1961-2001)

Year	Muslims	Hindus	Christians	Jains	Sikhs	Buddhists	Other Religion and persuasions	Religion not Stated	Total Population
	1	2	3	4	5	6	7	8	9
1961	564,331	655,415	2,040	85	47	5	-	-	1,221,923
	(46.2)	(53.6)	(0.2)	(0.0)	(0.0)	(0.0)			(100.0)
1971	695,504	913,283	3,492	191	136	51	-	-	1,612,657
	(43.1)	(56.7)	(0.2)	(0.0)	(0.0)	(0.0)			(100.0)
1981	919,918	1,107,192	4,020	395	127	108	110	1	2,031,871
	(45.3)	(54.5)	(0.2)	(0.0)	(0.0)	(0.0)	(0.0)	(0.0)	(100.0)
1991	1,252,292	1,377,844	5,118	224	183	64	1,130	177	2,637,032
	(47.5)	(52.3)	(0.2)	(0.0)	(0.0)	(0.0)	(0.0)	(0.0)	(100.0)
2001	1,636,171	1,621,468	8,388	293	283	164	22,350	1,351	3,290,468
	(49.7)	(49.3)	(0.3)	(0.0)	(0.0)	(0.0)	(0.7)	(0.0)	(100.0)

Note: Figures within brackets indicate percentage to total population

Religion :

Religion is also one of the basic cultural characteristics of the population. In a secular country like India, several religions have thrived and every decennial census has attempted to provide an interesting picture of the religious persuasion of the people of the country. The data on religion practised by the people gives the content of population of each of the six major religious communities, viz., Hindus, Muslims, Christians, Sikhs, Buddhists and Jains and combined figures for other religions and persuasions and 'religion not stated' by total. Table-8 above gives the distribution of population by religion since 1961 of Maldah district.

It is observed from the above table that in all census years excepting 2001 Hindus constitute the maximum population by religion in Maldah district, being closely followed by Muslims. While in absolute numbers Hindu population is all along increasing with their counterpart communities, i.e., Muslims. Going by the percentage to total population, the progress is uneven for both the communities as in 1971 when the percentage of Hindu population to total increased but it declined in case of Muslims. Again, since 1981 the percentage of Hindu population to total has declined from 54.5 per cent to 49.3 per cent in 2001 while it has increased for the Muslims from 45.3 per cent in 1981 to 49.7 per cent in 2001. The third highest position by percentage is occupied by the Christians whose percentage has remained constant from the year 1961 to 1991 at 0.2 per cent and during 2001 it has slightly increased (0.3 per cent), though in absolute figures its population has shown an increasing trend in all the above census years. Among various religious groups, Hindus, Muslims and Christians have registered constant growth in their size. During 2001 census Maldah district has registered the highest number of Muslims at 1,636,171 (49.7 per cent), being closely followed by Hindus at 1,621,468 (49.3 per cent) the second highest, Christians at 8,388 (0.3 per cent) the third highest and other religions at 22,350 (0.7 per cent). A table pertaining to six numerically biggest religions is shown in Annexure-V.

TABLE-9 : AVAILABILITY OF UNIVERSITY EDUCATION IN THE DISTRICT OF MALDAH

Serial Number	Name of the University	Total Number of University	Remarks
There is no University in this District

15	Kaliachak - III	214,721	214,721	0	284,376	284,376	0	32.4	32.4	0	0	0
16	OLD MALDAH (M)	13,021	0	13,021	62,959	0	62,959	383.5	0.0	383.5	100.0	100.0
17	ENGLISH BAZAR (M)	139,204	0	139,204	161,456	0	161,456	16.0	0.0	16.0	100.0	100.0
	District Total :	**2,637,032**	**2,450,495**	**186,537**	**3,290,468**	**3,049,528**	**240,940**	**24.8**	**24.5**	**29.2**	**7.07**	**7.3**

Table 1 shows that during 1991-2001 there is marginal difference between the overall growth of the district total (24.8 per cent) and the rural total (24.5 per cent). However the urban growth rate is much higher (29.2 per cent) as against the district average during 1991-2001. Among the 15 blocks, Kaliachak-III has recorded the highest growth rate (32.4 points) and Maldah(Old) the lowest with -1.3 per cent because of declassification of its urban portion in 2001 (merger of its part mouzas and one Census town with the municipality), the second highest growth rate being Kaliachak-II (29.0 per cent). Going by the district's rural frame, Maldah(Old) becomes the highest with 33.0 percent growth rate and Habibpur the lowest with 1.6 percent. The urban proportion in CD Block Habibpur is 8.8 per cent in 2001 as a result of formation of three census towns. Contrary to this, the entire urban population of Maldah (Old) CD Block which was 25.8 per cent in 1991 has fully gone off in 2001 due to declassification of one census town.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Serial number	District/CD block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200	
			Persons	Males	Females		Males	Females

Total number of inhabited villages in the Maldah district is 1,642 spread over 15 C.D.Blocks and the lowest population size of less than 200 persons is found in 129 villages (7.9 per cent). The highest population size of 10,000 and above have been reported in 34 villages (2.1 per cent). The highest number of 360 (21.9 per cent) villages are in the population size of 500-999.The number of villages in the population size of 1,000-1,999 are 350, the second highest 21.3 per cent of the total numbers of villages in Maldah.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

Serial Number	Name of the District	District Code	Serial Number	Name of Town
1	2	3	4	5
	Maldah	06		
(a) NEW				
(i) Statutory Town				: N I L :
(ii) Census Town			1	Kachu Pukur
			2	Kendua
			3	Aiho
(b) Denotified				
(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns				: N I L :
(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria				: N I L :
(iii) Census towns of 1991 census are notified as statutory town in 2001 census				: N I L :
(C) DECLASSIFIED				
			1	Sahapur (NM)
(D) WHOLLY MERGED WITH OTHER TOWN (S)				
			1	Mangalbari Samundai (NM)

Note : Declassified means the Census Towns of 1991 census which failed to satisfy the demographic and economic criteria.

As per Table 3, no new statutory town has been created in the Maldah district during 2001 Census. 3 new census towns have been created, viz., Kachu Pukur, Kendua and Aiho in 2001. There has been no de-notification whatsoever in 2001. However, Sahapur (NM) has been declassified for its failure to be identified as census town based on demographic and economic criteria. Another non-municipal town viz. Mangalbari Samundai has been wholly merged with another town. No census town of 1991 Census has been notified as statutory town in 2001 Census.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	7	0.4	87	0.0
11-20	3	0.2	56	0.0
21-50	7	0.4	996	0.0
51-100	25	1.5	3,362	0.1
101-200	71	4.3	23,049	0.8
201-300	131	8.0	66,250	2.2
301-500	388	23.6	321,534	10.5
501 +	1,009	61.4	2,611,395	85.6
Not known	1	0.1	22,799	0.7
District Total:	**1,642**	**100.0**	**3,049,528**	**100.0**
Population Density (Rural) of the district :		**886.5**		

As per Table 4, the population density (Rural) of the district is 886.5 per sq. Km. Out of 1,642 villages, 1,009 (61.4 per cent) villages have the highest range of population density of 501+, percentage distribution of population being 85.6 per cent. 7 villages (0.4 per cent) have the lowest range of population density of 0-10 persons per sq. km. Percentage distribution of villages in density range 11-20 persons is 3 (0.2 points). The second highest number of villages in the density range of 301-500 per sq. km. are 388 villages. It can safely be concluded that the villages in Maldah are basically of larger sizes.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

	State - West Bengal			District -Maldah		
Census year	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	945	994	650	1,007	1,012	854
1911	925	982	614	1,004	1,008	861
1921	905	971	591	0,911	0,996	802
1931	890	961	578	0,989	0,995	814
1941	852	945	559	0,983	0,988	827
1951	865	939	660	0,966	0,971	853
1961	878	943	701	0,965	0,969	873
1971	891	942	751	0,948	0,951	896
1981	911	947	819	0,949	0,950	927
1991	917	940	858	0,938	0,939	924
2001	934	950	893	0,948	0,948	947

Note : Sex ratio has been defined here as the number of females per 1,000 males

The sex ratio of Maldah has always been higher than that of State average since 1901 to 2001. Excepting 1981 and 2001, the trend has been declining. The sex ratio of the State has continuously declined from 1901 to 1951 and then continuously increased from 1961 to 2001.

TABLE 6 : SEX RATIO BY CD BLOCK, 2001

		Sex ratio		
Serial number	Name of CD Block	Total	Rural	Urban
1	2	3	4	5
1	Harischandrapur - I	954	954	---
2	Harischandrapur - II	940	940	---
3	Chanchal - I	953	953	---
4	Chanchal - II	962	962	---
5	Ratua - I	934	934	---

7	Gazole	961	15	Kaliachak - III	936
8	Bamangola	950		**District (Rural) Total :**	**948**

Table - 7 represents sex ratio of Maldah district at exclusively rural level. Among the 15 CD Blocks of the district, Habibpur CD Block again has the highest sex ratio with 977 and Ratua-I again has the lowest sex ratio at 934.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	14	0.9	2,776	0.1
700-749	6	0.4	1,636	0.1
750-799	12	0.7	9,328	0.3
800-849	46	2.8	23,635	0.8
850-899	185	11.3	241,766	7.9
900-949	501	30.5	1,361,323	44.6
950-999	491	29.9	1,105,030	36.2
1,000-1,099	308	18.8	274,434	9.0
1,100+	79	4.8	29,600	1.0
District Total :	**1,642**	**100.0**	**3,049,528**	**100.0**
Sex ratio (Rural) for District :		**948**		

Maldah being basically a rural district its maximum population, in absolute number 3,049,528, dwells in 1,642 villages and range of sex ratio for villages of the district extends from less than 700 to 1,100+ as per Table 8. The highest number of villages being 501 which is 30.5 per cent of the total number of villages and 44.6 per cent of the population fall in the sex ratio range of 900-949. The lowest number of villages being 6 accounting for 0.4 per cent of the total villages and 0.1 per cent of total population comes under sex ratio range of 700-749.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town	Urban status of town	Sex ratio
1	2	3	4
1	Aiho	CT	994
2	English Bazar	UA	945
	(a) English Bazar	M	949
	(b) Old Maldah	M	937
3	Kachu Pukur	CT	957
4	Kendua	CT	954
Sex ratio (Urban) for the district :			**947**

The urban sex ratio for Maldah is 947, Old Maldah municipality has recorded the lowest sex ratio of 937. Aiho census town has the highest urban sex ratio of 994 females per 1,000 males.

	District (Rural) Total :	**610,798**	**310,908**	**299,890**	**965**

Maldah's exclusively rural total population in the age group 0-6 is 610,798 of which 310,908 are males and 2,99,890 are females giving the total sex ratio of 965 as per Table 11. 7 CD Blocks out of total of 15 stay below the districts' total child sex ratio while 8 Blocks who have higher sex ratio. Habibpur occupies the highest position with 988 and Harishchandrapur-I is the lowest with 934.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	93	5.7	4,449	0.7
700-749	46	2.8	5,409	0.9
750-799	76	4.6	11,018	1.8
800-849	112	6.8	22,224	3.6
850-899	153	9.3	57,629	9.4
900-949	267	16.3	150,470	24.6
950-999	251	15.3	183,931	30.1
1,000-1,099	346	21.1	131,453	21.5
1,100+	298	18.1	44,215	7.2
District (Rural) Total :	**1,642**	**100.0**	**610,798**	**100.0**
Sex ratio (Rural) for District:		**965**		

The 0-6 age group population for Maldah in 2001 is 6,10,798 living in 1,642 villages. The sex ratio range in maximum inhabited villages are 1,000-1,099, the number of villages being 346, the percentage villages being 21.1. While percentage distribution of population is 21.5. The lowest sex ratio of 700-749, 2.8 per cent of the total number of villages and the population is 5,409 or 0.9 only.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females

		Rural	**3,049,528**	**518,987**	**224,698**	**17.0**	**7.4**
		Urban	**240,940**	**35,178**	**2,349**	**14.6**	**1.0**

It is observed from Table 14 that 16.8 per cent and 6.9 per cent of total population of Maldah belong to scheduled castes and scheduled tribes respectively. Scheduled castes constitute 17.0 per cent of the rural and 14.6 per cent of the urban population. Scheduled tribes constitue of 7.4 of rural and only 1.0 per cent of the urban population.

At the Block level the highest percentage of scheduled caste population is found in Bamongola at 49.9 and the lowest percentage of scheduled castes is in Kaliachak-I at 2.7. Likewise, the highest percentage of scheduled tribes are found in Habibpur at 29.8 and the lowest percentage is in Kaliachak-II (in percentage 0 and in absolute number 13). As 14 out of 15 CD Blocks are totally rural, the rural scenario is identical with exception of Habibpur only - which has rural-urban break up and therefore percentage of SC and scheduled tribe population of Habibpur rural differ from its block total.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN CD BLOCKS, 2001

15	Kaliachak - III	284,376	22,351	732	7.9	0.3
	District (Rural) Total :	**3,049,528**	**518,987**	**224,698**	**17.0**	**7.4**

Table 15 presents total population of the rural district alongwith number and percentage of exclusively rural scheduled caste and scheduled tribe population in CD Blocks. Maldah district is basically rural with only exception of Habibpur. Habibpur's exclusively rural scheduled caste population is 81,349 in absolute number and scheduled tribe population is 55,777. The scheduled castes and scheduled tribes population constitute respectively 17.0 and 7.4 per cent of the total rural population of the district. It is higher in by 5 CD Blocks in the range of 25.1 to 49.9, 10 CD Blocks have percentage of scheduled castes population below the district rural total starting with 15.5 down to 2.7 the lowest. In case of the scheduled tribe population the district rural total is 7.4 per cent with 5 CD Blocks having highest per cent than the district rural average and 10 CD Blocks are below the district rural total.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	304	18.5	0	0.0
Less than 5	269	16.4	18,323	3.5
5-10	181	11.0	43,529	8.4
11-20	220	13.4	78,090	15.0
21-30	143	8.7	59,489	11.5
31-40	100	6.1	41,040	7.9
41-50	88	5.4	46,138	8.9
51-75	192	11.7	118,913	22.9
76 and above	145	8.8	113,465	21.9
District Total :	**1,642**	**100.0**	**518,987**	**100.0**

It is seen from Table 16 that total scheduled caste population of Maldah district is 5,18,987 living in 1,338 villages. Out of them 145 villages have more than 76.0 per cent of the total population being scheduled castes the highest range. 304 villages have no scheduled caste population and 269 villages have less than 5.0 per cent of the total population being scheduled caste.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	738	44.9	0	0.0
Less than 5	200	12.2	6,806	3.0
5-10	92	5.6	12,592	5.6
11-20	120	7.3	32,433	14.4
21-30	101	6.2	31,029	13.8
31-40	94	5.7	32,144	14.3
41-50	63	3.8	22,648	10.1
51-75	135	8.2	55,049	24.5
76 and above	99	6.0	31,997	14.2
District Total :	**1,642**	**100.0**	**224,698**	**100.0**

It is seen from Table 17 that in 904 villages out of total of 1,642 villages in Maldah district have schedule tribe population. 99 villages or 6.0 per cent of the total villages have 76.0 per cent and above scheduled tribe population to total population while 738 villages or 44.9 per cent have no scheduled tribe population. 200 villages or 12.2 per cent have less than 5.0 per cent scheduled tribe population.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Aiho (CT)	5,409	2,268	0	41.9	0.0
2	English Bazar UA	224,415	29,662	2,165	13.2	1.0
	(a) English Bazar (M)	161,456	18,297	1,751	11.3	1.1
	(b) Old Maldah (M)	62,959	11,365	414	18.1	0.7
3	Kachu Pukur (CT)	5,343	1,593	156	29.8	2.9
4	Kendua (CT)	5,773	1,655	28	28.7	0.5
District (Urban) Total :		**240,940**	**35,178**	**2,349**	**14.6**	**1.0**

Number and percentage of scheduled caste and scheduled tribe population in UAs/Towns are 35,178 and 2,349 respectively. Scheduled Castes constitute 14.6 and scheduled tribes constitute 1.0 per cent of total urban population of Maldah. English Bazar(UA) has the biggest concentration of scheduled castes with 29,662 in percentage 13.2, but going by the number and percentage of scheduled caste population to total population of specific UAs/Towns it is not the highest. That position is occupied by Aiho census town which has 2,268 SCs out of total population of 5,409 that makes its percentage of 41.9 the highest. Likewise apparently Kachupukur has the lowest concentration of scheduled castes with 1,593 or 29.8 per cent. But English Bazar (M) has the lowest scheduled caste percentage of 11.3 to total population. In case of the scheduled tribe population English Bazar UA also have the highest number of persons with 2,165 or 1.0 per cent to the total population.However, Kendua census town has the lowest percentage of scheduled tribe population which is 0.5 of the total town population.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN CD BLOCKS, 2001

Serial number	Name of CD Block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Harischandrapur - I	950	980
2	Harischandrapur - II	927	970
3	Chanchal - I	966	966
4	Chanchal - II	996	989
5	Ratua - I	937	948
6	Ratua - II	962	1,016
7	Gazole	946	1,017
8	Bamangola	934	1,009
9	Habibpur	962	1,029
10	Maldah (Old)	943	1,010
11	English Bazar	921	996
12	Manikchak	931	934
13	Kaliachak - I	922	845
14	Kaliachak - II	935	300
15	Kaliachak - III	943	891
	District (Rural) Total :	**946**	**1,001**

It will be seen from the above table no. 19 that the sex ratio for the scheduled castes and scheduled tribes are 946 and 1,001 respectively in the rural areas of the district. Chanchal-II has the highest sex ratio among the scheduled caste population with 996. English Bazar having the lowest at 921. In case of the scheduled tribes, Habibpur has the highest sex ratio at 1,029 with Kaliachak-II having in the lowest at 300 females per 1,000 males.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Aiho (CT)	970	0
2	English Bazar UA	952	933
	(a) English Bazar (M)	954	922
	(b) Old Maldah (M)	949	981
3	Kachu Pukur (CT)	1,004	950
4	Kendua (CT)	1,001	333
	Sex ratio (Urban) for the district :	**958**	**924**

Table 20 above gives the urban Sex ratio for Maldah district for scheduled castes and schedule tribes is 958 and for scheduled tribes it is 924 females per 1,000 males. Kachu Pukur census town has the highest sex ratio at 1,004 for scheduled castes while Old Maldah has the lowest with 949. For the scheduled tribes Old Maldah (M) has highest sex ratio at 981 with Kendua Census town having the lowest with 333.

Table no. 21 gives number of literates and illiterates at the CD Block level. The overall literacy rate for the district is 50.3 (male 58.8, female 41.3). The male literacy rate is higher by 17.5 points than that of females. The urban literacy rate (79.3) is higher by 31.5 per cent points than the rural literacy rate (47.8). The male-female literacy gap is more pronounced in rural areas.

There is also wide inter CD Block disparity in literacy rate. It is as high as 56.1 in Chanchal-I and Bamangola CD Blocks and as low as 40.7 in Harishchandrapur-II CD Block. By sex the higher literacy rate is recorded in Bamangola CD Block (67.5) for males and in Chanchal-I CD Block (48.0) for females. The lowest literacy rate is obtained in Harishchandrapur-II CD Block (47.7) for males and in Kaliachak-III CD Block (30.7) for females. The maximum male-female literacy gap is observed in Manikchak CD Block (23.6) and the minimum in Ratua-II CD Block (13.7).

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN CD BLOCKS, 2001

13	Kaliachak - I	135,205	79,062	56,143	175,730	81,002	94,728	54.3	61.6	46.6	15.0
14	Kaliachak - II	77,523	46,784	30,739	133,883	62,137	71,746	46.1	53.8	37.8	16.0
15	Kaliachak - III	93,297	60,241	33,056	191,079	86,635	104,444	41.8	52.1	30.7	21.4
District (Rural) Total :		**1,164,757**	**709,933**	**454,824**	**1,884,771**	**855,721**	**1,029,050**	**47.8**	**56.6**	**38.4**	**18.2**

Table 22 gives the same data as in Table 21 but in respect of rural areas only. It can be seen from the above table that the overall literacy rate for the rural areas of the district is 47.8 (males 56.6, females 38.4). The literacy rate in Ratua-II CD Block (47.8) is exactly matching with the district rural average (47.8). The CD Blocks – Chanchal-I, Gazole, Bamangola, English Bazar and Kaliachak-I have registered higher literacy rate than the district. Harishchandrapur-I, Harishchandrapur-II, Chanchal-II, Ratua-I, Habibpur, Maldah (Old), Manikchak, Kaliachak-II and Kaliachak-III have recorded lower literacy rate than that of rural district average. The literacy position in respect of male indicates that the highest rural literacy is reported from Bamangola (67.5) while the lowest is in Harishchandrapur-II CD Block (47.7). In case of female literacy the highest literacy rate is registered by Chanchal-I CD Block (47.9) and the lowest by Kaliachak-III CD Block (30.7).

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	1	0.1	3	0.0
1-10	19	1.2	21,247	0.7
11-20	60	3.7	33,295	1.1
21-30	181	11.0	197,047	6.5
31-40	340	20.7	555,514	18.2
41-50	454	27.6	1,076,908	35.3
51-60	344	21.0	653,977	21.4
61-70	174	10.6	417,024	13.7
71-80	55	3.3	77,708	2.5
81-90	12	0.7	16,541	0.5
91-99	1	0.1	261	0.0
100	1	0.1	3	0.0
District Total :	**1,642**	**100.0**	**3,049,528**	**100.0**
Literacy rate for District :		**50.3**		

Table 23 gives the distribution of villages by range of literacy rate. It can be observed from the above table that there is only one inhabited village in which there is no literate. The share of this village to total district population is negligible. The above table also indicates that as the literacy rate increases from the base level., the number of inhabited villages, their percentage distribution, population and percentage distribution of population increases upto literacy rate range 41-50. Thereafter all variables start to decline. The highest number of villages (454), alongwith highest percentage distribution of villages (27.6), highest population (10,76,908) and maximum percentage share of population (35.3) fall in literacy range of 41-50.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial Number	Name and urban status of UA / Town	Number of literates and illiterates									Gap in male-female literacy rate
		Number of literates			Number of illiterates			Percentage of literates			
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

4	Kendua (CT)	3,523	2,058	1,465	2,250	896	1,354	70.4	79.7	60.5	19.3
District(Urban) Total		**167,947**	**91,837**	**76,110**	**72,993**	**31,915**	**41,078**	**79.3**	**84.4**	**73.8**	**10.6**

Table 24 as above gives the urban literates and literacy rate for the UAs and towns. The above table shows that on an average 79.3 per cent of urban population is literate. The male literacy (84.4 per cent) is higher by 10.6 per cent points than that of female literacy (73.8 per cent). Among the towns, English Bazar municipality has registered the highest literacy rate (83.0 per cent) while the lowest is reported in Kendua census town (70.4 per cent). The highest male literacy is noticed in English Bazar municipality and Kachu Pukur census town (87.3 per cent) and the highest female literacy is recorded in English Bazar municipality (78.6 per cent) Lowest male literacy is found in Aiho census town (76.0 per cent) while lowest female literacy is registered in Kendua census town (60.5 per cent).

TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN CD BLOCKS, 2001

Serial Number	Name of CD Block	Number of literates and illiterates: Number of literates			Number of illiterates			Percentage of literates			Gap in male-female literacy rate
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

14	Kaliachak - II	6,917	4,510	2,407	10,432	4,457	5,975	48.9	61.3	35.5	25.8
15	Kaliachak - III	6,910	4,562	2,348	13,604	6,004	7,600	41.8	53.8	29.2	24.6
District (Rural) Total :		**213,182**	**135,847**	**77,335**	**305,805**	**130,912**	**174,893**	**50.0**	**61.8**	**37.4**	**24.4**

The above table clearly demonstrates that 50 per cent of the rural scheduled caste population is literate with 61.8 per cent males and 37.4 per cent females giving a male-female literacy gap of 24.4 per cent points. The highest literacy rate is observed in Bamangola CD Block (57.8) closely followed by Gazole CD Block (56.2) and the lowest is noticed in Chanchal-II CD Block (33.3). Again, the highest literacy rate among the males (69.8) and females (44.8) is seen in Bamangola CD Block while the lowest for males (45.4) and females (21.2) is returned by Chanchal-II CD Block. The highest male-female literacy gap is recorded in Ratua-I CD Block (27.6) and the lowest in English Bazar CD Block (20.0). The literacy situation is Chanchal-II CD Block (33.3) is much behind the overall literacy average among the rural scheduled castes of the district (50). The literacy among the people of Harishchandrapur-I (38.1) and Harishchandrapur-II (38.2) CD Blocks is slightly better than that of Chanchal-II CD Block. With a few exceptions, general better literacy is seen in those CD Blocks which have relatively larger scheduled castespopulation.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	22	1.6	585	0.1
1-10	29	2.2	6,495	1.3
11-20	70	5.2	15,598	3.0
21-30	132	9.9	35,300	6.8
31-40	222	16.6	82,240	15.8
41-50	281	21.0	121,276	23.4
51-60	270	20.2	121,024	23.3
61-70	189	14.1	97,879	18.9
71-80	83	6.2	31,776	6.1
81-90	26	1.9	6,430	1.2
91-99	6	0.4	365	0.1
100	8	0.6	19	0.0
District Total :	**1,338**	**100.0**	**518,987**	**100.0**
Literacy rate for District (Rural) :		**51.2**		

There are 22 such inhabited villages (1.6 per cent) consisting of 0.1 per cent of scheduled caste population where there is no literate. As literacy rate goes higher and higher the number of villages also increases and maximum villages (281) are concentrated in literacy range 41-50 per cent with highest proportion of villages (21.0 per cent) and the highest share of scheduled caste population (23.4 per cent). Thereafter, as the literacy range increases the number of villages their proportion and population and its proportion tend to go down with the only exception in cent per cent literacy range where the number of villages, their proportion is increased but the percentage share of scheduled caste population is negligible.

TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial Number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/ female literacy rate
		Number of literates			Number of illiterates

3	Kachu Pukur (CT)	981	541	440	612	254	358	72.6	80.9	64.5	16.4
4	Kendua (CT)	835	496	339	820	331	489	59.1	69.6	48.5	21.1
5	Old Maldah (M)	5,798	3,452	2,346	5,567	2,379	3,188	60.8	70.0	50.9	19.1
	Maldah (Urban)	**20,524**	**11,735**	**8,789**	**14,654**	**6,232**	**8,422**	**67.7**	**75.7**	**59.3**	**16.4**

Among the urban scheduled caste population of Maldah district, 67.7 per cent are literates with males 75.7 per cent and females 59.3 per cent. Among the five urban units, English Bazar municipality with 72.9 per cent literacy is on the top and Kendua census town with 59.1 per cent literacy is on the bottom in respect of literacy rate. Among the scheduled caste males, the highest literacy rate is recorded in Kachu Pukur census town (80.9) whereas the lowest in Aiho census town (66.3). In case of scheduled caste females the highest literacy rate is returned by English Bazar municipality (65.2) and the lowest by Kendua census town (48.5). The overall male-females literacy gap in the urban scheduled caste population is 16.4 per cent points. The highest gap in male-female literacy rate is seen in Kendua census town (21.1 per cent) and the lowest in Aiho census town (10.7 per cent points). It is interesting to note that the gap in male-female literacy rate in Aiho census town (10.7) is even much lower than that of prevailing in municipal towns of Old Maldah (19.1) and English Bazar (15.1) which idicates that there is greater amount of female autonomy and lesser gender bias towards females in the matter of education in Aiho census town.

TABLE 28 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN CD BLOCKS, 2001

14	Kaliachak - II	9	8	1	4	2	2	81.8	100.0	33.3	66.7
15	Kaliachak - III	370	240	130	360	146	214	62.9	75.2	48.3	26.9
District (Rural) Total :		**57,883**	**40,328**	**17,555**	**166,815**	**71,988**	**94,827**	**31.8**	**44.4**	**19.2**	**25.1**

The literacy situation of rural scheduled tribe population is very bleak. Just 31.8 per cent among the rural tribal population is literate with 44.4 per cent males and 19.2 per cent females. Among the various CD Blocks of the district Maldah, the maximum literacy rate is registered by Kaliachak-II CD Block (81.8) followed by Kaliachak-III CD Block (62.9) and Ratua-II CD Block (60.5) and the minimum is seen in Maldah (Old) CD Block (21.4). Among the males the highest literacy rate is observed in Kaliachak-II CD Block (100) followed by Kaliachak-III CD Block (75.2) and Ratua-II (73.6) and the lowest in Maldah(Old) CD Block (30.5). Among the females, the highest literacy rate is recorded in Kaliachak-III CD Block (48.3) and the lowest in Maldah (Old) CD Block (12.4).

The male literacy is higher by 25.1 per cent points than the female literacy rate. The largest gap in male-female literacy rate is found in Kaliachak-II CD Block (66.7 per cent points) while the lowest in Englishbazar (15.8 per cent points). While analysing the literacy situation prevailing in different CD Blocks it is important to keep in mind the very small numerical size of population of Kaliachak-I, Kaliachak-II and Kaliachak-III CD Blocks and Chanchal-I CD Block for considering. Only proportion would not give the clear picture in relation to large population of other CD Blocks.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	34	3.8	393	0.2
1-10	54	6.0	8,983	4.0
11-20	167	18.5	36,757	16.4
21-30	234	25.9	64,196	28.6

51-60	36	4.0	6,681	3.0
61-70	18	2.0	2,422	1.1
71-80	22	2.4	1,781	0.8
81-90	7	0.8	1,952	0.9
91-99	2	0.2	49	0.0
100	35	3.9	164	0.1
District Total :	**904**	**100.0**	**224,698**	**100.0**
Literacy rate for District (Rural) :		**32.2**		

There are 34 such inhabited villages without any literate scheduled tribe population consisting of 3.8 per cent of villages and 0.2 per cent scheduled tribe population. As the literacy range goes up, the number of villages and their proportion, scheduled tribe population and its percentage distribution increases upto literacy range 21-30. The maximum number of villages (234) and their corresponding proportion (25.9 per cent) and population and its percentage share are also maximum. Thereafter the number of villages tend to decrease as the literacy range increases upto literacy range 61-70 then in the next literacy range of 71-80, it increased again and the number of villages start declining in literacy range 81-90 which continued till literacy range 91-99. The number of villages again increased in cent per cent literacy range.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial Number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Female

4	Kendua (CT)	15	12	3	13	9	4	65.2	75.0	42.9	32.1
5	Old Maldah (M)	148	99	49	266	110	156	43.0	53.2	31.0	22.2
	Maldah (Urban) :	**1,330**	**782**	**548**	**1,019**	**439**	**580**	**66.1**	**74.1**	**57.3**	**16.7**

It can be seen from the above table that among the urban scheduled tribes population of the district, 66.1 per cent is literate with 74.1 percent males and 57.3 per cent females. Among the towns having scheduled tribes population, the highest literacy rate is exhibited by English Bazar municipality (73.4) and the lowest by Kachu Pukur census town (42.9). The highest literacy rate among the males is recorded in English bazar (80.5) while the lowest in Old Maldah municipality (53.2). In case of females, the highest literacy rate is returned from English Bazar municipality (65.7) whereas the lowest by Kachu Pukur census town (28.1). The overall male-female literacy gap in the urban scheduled tribes population is 16.7 per cent points. The largest gap is seen in Kendua census town (32.1 per cent points) and the least in English Bazar municipality (14.8 per cent points).

Out of the total population of 32,90,468 in Maldah the main workers account for 29.4 per cent, marginal workers 11.4 per cent, total workers 40.7 per cent and non-workers 59.3 per cent. The sex differentials in work participation (main) reveals that a much lower percentage of the female population i.e. 13.3 per cent are engaged in productive activities compare to males (44.7 per cent). Further, among male and female workers, the proportion of male main workers is abnormally high than that of the female and under marginal workers category, female proportion is much higher than that of males.

The CD Block level analysis of work participation rate reveals that Kaliachak-I CD Block recording 40.4 per cent main worker as the highest percentage Ratua-I CD Block with 23.4 per cent main workers as the lowest. In case of marginal workers, the highest proportion is noticed in Kaliachak-I CD Block (17.6 per cent) whereas the lowest is in English Bazar CD Block (6.3 per cent). In respect of total workers, the highest proportion is recorded in Kaliachak-I CD Block (58.0 per cent) and lowest in Harishchandrapur-I CD Block (32.3 per cent). In case of non-workers, Harishchandrapur-I CD Block has the highest percentage (67.7 per cent) and Kaliachak-I CD Block has the lowest (42.0 per cent). The sex differentials in participation of economic activities reflect that the highest proportion of male total workers is registered in Kaliachak-I CD Block (59.0 per cent) and the lowest in Manikchak (48.9 per cent). So far as female total workers are concerned, the highest percentage is in Kaliachak-I CD Block (56.9 per cent) while the lowest is in Harishchandrapur-I CD Block (13.8 per cent).

District (Rural) Total :		**Persons**	**3,049,528**	**896,295**	**29.4**	**367,950**	**12.1**	**1,264,245**	**41.5**	**1,785,283**	**58.5**
		Males	**1,565,654**	**694,698**	**44.4**	**130,248**	**8.3**	**824,946**	**52.7**	**740,708**	**47.3**
		Females	**1,483,874**	**201,597**	**13.6**	**237,702**	**16.0**	**439,299**	**29.6**	**1,044,575**	**70.4**

The work participation in the rural areas of Maldah district is shown in Table 32 above. It can be seen

from the above table that in the rural areas 41.5 per cent of the rural population are workers and 58.5 per cent non-worker. The main workers constitute 29.4 per cent and marginal workers 12.1 per cent of the total population.

The highest rural proportion of main workers has been obtained in Kaliachak-I CD Block (40.4 per cent) and the lowest in Ratua-I CD Block (23.4 per cent). Among male main workers, the highest percentage is in Maldah (Old) CD Block (48.3 per cent) while the lowest participation is recorded in Manikchak CD Block (38.7 per cent). In case of female main workers, the highest proportion is noticed in Kaliachak-I (34.9 per cent) and lowest in Ratua-I CD Block (4.8 per cent).

The highest share of marginal workers in rural areas of this district has been registered in Kaliachak-I CD Block (17.6 per cent) and the lowest in English Bazar (6.3 per cent). The proportion of male marginal workers is lower than that of their female counterparts.

There is increase in ratio between males and females participation rate in case of main and marginal workers i.e. male proportion is higher in main workers whereas female proportion is higher in marginal workers.

The largest proportion of total workers has been observed in Kaliachak-I CD Block (58.0 per cent) which is much higher as compared to district rural average (41.5 per cent) while the lowest is in Harishchandrapur-I CD Block (32.3 per cent).

The highest proportion of non-workers is witnessed in Harishchandrapur-I CD Block (67.7 per cent) and the lowest is in Kaliachak-I CD Block (42.0 per cent).

TABLE 33: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

It is evident from the above table that out of the total urban population of Maldah district, 29.4 per cent is main workers, 2.3 per cent is marginal workers and 68.3 per cent is non-workers.

Individual town level analysis indicates that the highest population of main workers (35.3 per cent) is in Aiho census town and lowest (25.4 per cent) in Kachu Pukur census town. In case of marginal workers the highest proportion is recorded in Kendua census town (6.4 per cent) and lowest in English Bazar municipality (1.6 per cent). The proportion of non-workers varies from the lowest recorded in Aiho census town (60.3 per cent) to the highest in Kachu Pukur census town (70.9 per cent). The proportion of female non-workers is as high as around 90 per cent in English Bazar municipality and Kachu Pukur census town.

Note : Percent of Worker to total worker are given in brackets

Table 34 as above contains broad classification of the working population to number and percentage in case of Maldah. It can be seen from the above table that the highest percentage of workers are engaged as other workers (32.8 per cent) followed by Agricultural Labourers (30.7 per cent), Cultivators (20.8 per cent) and Household Industry (15.6 per cent) for the rural areas of the district. The male and female participation as agricultural labourer is almost the same (males 30.6 per cent, females 31.0 per cent). In case of household industry, the female participation is remarkably higher (36.8 per cent) than that of the males (4.8 per cent). Female workers have shown encouraging representation in other works also though their proportion (24.5 per cent) is still much lower as compared to their male counterparts(37.1 per cent).

The pattern of distribution of total workers into different categories at CD Block level portrays that the highest proportion of workers employed as

Cultivators is registered in Bamangola CD Block (37.3 per cent) and the lowest in Kaliachak-I CD Block (3.6 per cent). The highest proportion in agricultural labourer category is returned from Harishchandrapur-I CD Block (52.5 per cent) and the lowest in found in Kaliachak - I CD Block (9.4 per cent). Under Household Industry, the highest proportion is recorded in Kaliachak-III CD Block (52.4 per cent) and the lowest in Bamangola CD Block (2.0 per cent). So far as the Other Worker is concerned the highest percentage of workers employed in this sector is reported from Kaliachak-II CD Block (54.0 per cent) and the lowest from Bamangola (14.1 per cent).

				(29.6)	**(7.9)**	**(31.9)**	**(37.4)**	**(22.8)**

Note : Percent of Worker to total worker are given in brackets

The above table shows that in the rural areas of Maldah 22 per cent of the Total Workers are Cultivators, 32.5 per cent Agricultural Labourers, 16.2 per cent are engaged in Household Industry and remaining 29.2 per cent are employed as Other Workers. By sex, almost the same proportion of male and female workers are reported to be engaged as agricultural labourers. Under household industry proportion of female workers (37.4 per cent) is much higher compared to male worker (5 per cent). But under Other Workers one can see the reverse trend i.e. proportion of the male workers(32.6 per cent) is much higher than that of the female workers (22.8 per cent).

The CD Block level analysis of distribution of total workers among four industrial categories indicates that there is wide disparity in the economic activities among the various CD Blocks. Percentage of Cultivators is as high as 37.3 in Bamangola CD Block and as low as 3.6 in Kaliachak - I CD Block. In case of Agricultural Labours, the percentage of workers varies greatly from the lowest being in Kaliachak-I CD Block (9.4 per cent) to the highest in Harishchandrapur-I CD Block (52.5 per cent). In Household Industry, the highest proportion of workers are engaged in Kaliachak-III CD Block (52.4 per cent) as against the lowest proportion found in Bamangola (2.0 per cent). Likewise, in case of other works, the highest proportion of workers have been noticed in Kaliachak-II CD Block (54.0 per cent) and the lowest in Habibpur CD Block (13.6 per cent).

				(11.6)	**(1.1)**	**(1.3)**	**(16.6)**	**(81.0)**

Table 36 gives the town wise number and percentage of the four categories of workers. It can be observed from the above table that a majority of the urban working population (92.6 per cent) are engaged in Other Works followed by Household Industry (5.5 per cent). About one per cent of the

workers are engaged as Cultivator as well as Agricultural Labourers. By sex 95.1 per cent of male workers and 81.0 per cent of female workers are engaged in Other Works. In Household Industry, the percentage of female workers is much higher (16.6 percent) compared to the male percentage (3.1 per cent).

The pattern of distribution of total workers in four categories shows that the largest proportion of workers are employed as Cultivators and Agricultural Labours are recorded in census town - Kendua (10.3 per cent and 7.9 per cent) respectively, among all the municipal and non-municipal towns (census towns). In case of Household Industry, the highest proportion of workers has been observed in Aiho census town (33.6 per cent) followed by Kendua census town (18.4 per cent) and Old Maldah (9.7 per cent), Kachu Pukur census town (4.6 per cent) and English Bazar (2.0 per cent). The proportion of other workers varies from the lowest being in Aiho census town (61.8 per cent) to highest obtained in English Bazar municipality (97.1 per cent).

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Collection of village wise amenities has been a feature of Indian census since 1961. Though such amenities data is basically non-census in nature, they are very useful for having a direct view of the existing infra-structural status of each village in the district. They can also be used as important inputs for future development planning in the district.

In Table 37 we have given CD Blockwise position of villages so far as availibility of educational, medical, improved drinking water, Post Office, Telephone, Transport, banking, approach to villages and power. It can be seen from the above table that educational amenities is available in 73.6 per cent of Villages, medical facility in 48.4 per cent villages, improved drinking water in 94.9 per cent villages, post office in 18.0 per cent villages, telephone in 33.3 per cent villages, transport and communication in 25.4 per cent villages banks in 4.9 per cent villages, agricultural credit societies in 9.5 per cent villages, pucca road linkage in 36.0 per cent villages and electricity is available in 68.6 per cent villages in Maldah.

In case of educational facilities among the CD Blocks, Ratua-II with 97.9 per cent villages having educational amenity. Habibpur is the least served CD Block with 56.1 per cent of villages having this facility. In case of medical facility, Chanchal-I CD Block (98.0 per cent) has the highest percentage of villages having this facility as against only 13.9 per cent obtained in Harishchandrapur-II CD Block. So far as the availability of improved drinking water is concerned out of 15 CD Blocks, cent per cent villages are served by this facility in 7 CD Blocks (Harishchandrapur-I, Harishchandrapur-II, Chanchal-I, Ratua-II, Manikchak, Kaliachak-II and Kaliachak-III). Of the remaining CD Blocks, the level of availability varies from Ratua-I CD Block (98.9 per cent) to Gazole CD Block (84.0 per cent). The availability of postal facilities ranges from the highest proportion recorded in Kaliachak-I CD Block (41.0 per cent) to the lowest in Habibpur CD Block (8.7 per cent). Telephone facility is available in 83.3 per cent of the villages in Ratua-II CD Block to 10.6 per cent noticed in Bamangola CD Block. In respect of availability of bus, rail or navigable waterway connectivity of the villages, Kaliachak CD Block (47.3 per cent) have the highest percentage of villages having this facility while least of the villages having this facility is observed in Harishchandrapur-II CD Block (18.1 per cent). In case of availability of banking services, the most served CD Block is Kaliachak-I with 13.1 per cent of villages having this facility whereas the least served CD Block is Maldah (Old) (1.7 per cent). The Agricultural Credit Societies are avgailable in as many as 21.2 per cent of villages in Harishchandrapur-I CD Block against just 2.1 per cent registered in Ratua-II CD Block. In case of proportion of villages connected with pucca road, the highest is in English Bazar CD Block (68.8 per cent) while the lowest is in Chanchal-I CD Block (23.2 per cent). The highest number of villages have been electrified in Chanchal-I CD Block (96.0 per cent) and the least in Kaliachak-III CD Block (36.4 per cent).

* Based on the improved drinking water source, drinking water supply has been classified as `Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water sou However, the concept of improved drinking water is state specific and this is to be considered according

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table38 has given the same data as Table 37 but for the rural areas in each CD Block. It can be seen from the above table that on an average 92.2 per cent of population of the district is served by some educational facility within their villages; medical facility is available to 63.7 per cent, improved drinking water to 98.4 per cent, post office to 42.6 per cent, telephone to 56.6 per cent, transport and communication facility to 41.6 per cent, banking services to 14.4 per cent, Agricultural Credit Society to 19.6 per cent, approach by pucca road to 51.8 per cent and electricity is available to 79.8 per cent of population within the villages.

The analysis of availability of various infrastructural facilities to the rural population within their villages reflects that among CD Blocks, maximum population is served by educational facility in Ratua-II CD Block (99.6 per cent) and minimum in Habibpur CD Block (78.2 per cent). Maximum population is served by availability of medical facilities in Chanchal-I CD Block (99.8 per cent) while the minimum population served is in Harishchandrapur-II CD Block (18.6 per cent). In case of availability of improved drinking water the highest percentage of population is served in Ratua-I and English Bazar CD Block (99.9 per cent each) while the lowest in Gazole CD Block (88.3 per cent). It may be mentioned here that improved drinking water is available to the entire population in Harishchandrapur-I, Harishchandrapur-II, Chanchal-I, Ratua-II, Manikchak, Kaliachak-II and Kaliachak-III CD Blocks. Thus out of 15 CD Blocks it is available to total population in 7 CD Blocks and in 8 CD Blocks it is available to more than 90 per cent of the entire population except Gazole where it is available in 88.3 per cent of the population. The highest percentage of population served by post office is noticed in Kaliachak-III CD Block (63.3 per cent) whereas the lowest in Maldah (Old) CD Block (21.7 per cent). The maximum population served by the telephone facility is observed in Ratua-II CD Block (89.1 per cent) while the minimum is found in Bamangola CD Block (22.4 per cent).

In case of availability of transport communication facilities Kaliachak-II CD Block with 62.1 per cent is the highest served and Chanchal-II CD Block with 23.4 per cent is the least served. The situation of

availability of banking services shows that the highest percentage of population is served in English Bazar CD Block (24.8 per cent) while the lowest is obtained in Harishchandrapur-II CD Block (6.3 per cent). The highest services of agricultural credit societies is available in Harishchandrapur-I CD Block (38.8 per cent) while the lowest is seen in Ratua-II CD Block (1.7 per cent) against the overall average of the district (19.6 per cent). The highest percentage of population living in villages approachable by pucca road is in English Bazar CD Block (81.4 per cent) as aginst the minimum percentage observed in Chanchal-II CD Block (22.4 per cent). The highest proportion of population served by electricity is found in Chanchal-I CD Block (99.1 per cent) in contrast to the lowest percentage registered in Kaliachak-III CD Block (51.6 per cent).

On the basis of above analysis it is crystal clear that there is a wide variation in availability of infrastructual facilities among the CD Blocks. For the balanced socio-economic development it is essential that the infrastructural and basic amenities are available on uniform basis. Thus poorly served areas should have preferential treatment in allocation of scarce recources in local area planning.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

	Distance range of place from the villages where the amenity is available			
Village not having the amenity of	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :				
(a) Primary School	393	101	4	498
(b) Middle School	861	433	86	1,380
(c) Degree College	92	278	1,267	1,637
2. Medical :				
(a) Hospital	330	537	769	1,636
(b) PHC	374	565	657	1,596
3. Post Office	990	320	41	1,351
4. Telephone	528	352	216	1,096
5. Bus Service	679	482	113	1,274
6. Banks :				
(a) Commercial Bank	795	559	224	1,578
(b) Cooperative Bank	352	480	784	1,616
7. Agricultural Credit Societies	842	422	222	1,486

For those villages which do not have some/any of the listed amenities, Table-39 shows the number of such villages in various distance ranges from the nearest available facilities. It can be seen from the above table that 498 villages have no primary school but majority of villages (393) can have this amenity within 5 kilometers. A total of 1,380 villages do not have middle school but majority of villages (861) can have this amenity within a distance of 5 kilometers. In case of degree college level education, majority of the villages are away from this amenity.

For 1,636 villages which do not have the hospital in the village itself most of the villages (769) can avail of the same at a distance range of 10 kilometres and above. Out of 1,596 village reported as not having primary health centre, most of the villages (657) can avail of it at a distance range of 10 kilometres and above.

In case of post office, out of total 1,351 villages not having this amenity, most of the villages (990) can avail the same within 5 kilometres.

So far as the availability of telephone facility is concerned, 1,096 villages do not have the same but most of the villages (528) can reach this facility within a distance of 5 kilometres from the village. In 1,274 villages there is no bus station, but most of the villages (679) can have the bus services within 5 kilometres.

In 1,578 villages there is commercial bank but bulk of villages (795) can avail the commercial banking facility located within just 5 kilometres.

Further, out of 1,616 villages reporting not having co-operative bank, a majority of villages (784) can avail of this facility at a distance of 10 kilometres and above.

In 1,486 villages wherein agricultural credit societies are not available, a majority of villages (842) can reach this facility located within 5 kilometres range for the respective villages.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office #	Tele-phone	Transport communicat ions $	Banks	Agricultural Credit Societies	Approach by pucca road

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

With the analysis of this table, the urban effect on amenities of rural areas can easily be understood. In case of most of the amenities such as education, medical, telephone, transport communication, banks, agricultural credit societies and approach by pucca road, they tend to concentrate within 5 kilometers range from the nearest statutory towns in terms of proportion of villages having these amenities. When distance range goes up from less than 5 kilometers to 5-15 kilometers the proportion of villages having these amenities tend to go down with the only exception of post office. But when the distance range further increases to 16-50 kilometers proportion increases except medical amenity and in 51 kilometers and above range it again increases in education, medical and agricultural credit societies.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Population range	Number of inhabited villages in each range	Type of amenity available										
		Education	Medical	Improved drinking water*	Post Office #	Tele-phone	Transport communic ations $	Banks	Agricultural Credit Societies	Approach by Pucca road	Power supply
1	2	3	4	5	6	7	8	9	10	11	12

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

It can be seen from the above table that availability of various amenities is directly related to the population size of the villages. It means that with the increase in population size of the villages, the proportion of villages having these amenities also increases in each population range. The only exception is noticed in case of power supply in ten thousand and above range wherein the proportion of electrified village marginally declined by 5.9 per cent point.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of CD block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Harischandrapur - I	104	17084.4	85.7	78.5
2	Harischandrapur - II	72	21530.8	78.2	50.4
3	Chanchal - I	99	16038.4	76.5	47.6
4	Chanchal - II	88	19934.3	87.3	33.8
5	Ratua - I	91	22306.5	76.6	18.8
6	Ratua - II	48	17017.1	80.8	27.1
7	Gazole	288	51033.7	83.3	27.8
8	Bamangola	141	20476.6	87.4	3.3
9	Habibpur	230	33227.2	83.6	33.1
10	Maldah (old)	115	21285.4	80.5	35.7
11	English Bazar	112	22660.9	55.8	51.5
12	Manikchak	72	28079.1	70.3	42.9
13	Kaliachak - I	61	10133.6	76.0	12.2
14	Kaliachak - II	55	20047.8	49.2	35.3
15	Kaliachak - III	66	23792.4	80.3	83.3
	District Total :	**1,642**	**344648.0**	**77.3**	**38.2**

Note : Cultivable area = irrigated area + unirrigated area

It can be observed from the above table that there are 1,642 inhabited villages in Maldah spreading over an area of 3,44,648.0 hectares. Out of this total area, 77.3 per cent of land is cultivable and out of the cultivable area 38.2 per cent area is under irrigation. Among the CD Blocks, the proportion of cultivable area varies between the lowest area recorded in Kaliachak-II (49.2 per cent) and the highest in Bamangola (87.4 per cent). In case of irrigated area, the proportion noteably varies among the CD Blocks. It is as low as 3.3 per cent in Bamangola CD Block and as high as 83.3 per cent in Kaliachak-III of the total cultivable area. Irrigation is one of the most important input in agriculture for higher production and thus immediate attention to the blocks with low percentage of cultivable area under irrigation is essential for improvement in agricultural production in Maldah. The in-depth analysis of the pattern of irrigated area

to total cultivable are at CD Block level shows that out of 15 CD Blocks, 9 CD Blocks (Chanchal-II, Ratua-I, Ratua-II, Gazole, Bamangola, Habibpur, Maldah(Old), Kaliachak-I and Kaliachak-II) are reported having less irrigated area than the district rural average (38.2 per cent).

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS, 2001

Serial number	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	I English Bazar (M)	197.8	45.4	152.4	157.2	15.5	101.3	6.1	4.9	29.3
2	II Old Maldah (M)	472.4	18.6	453.8	181.0	58.8	45.3	66.6	0.0	10.2
	District Total :	**274.8**	**37.8**	**237.0**	**163.8**	**27.7**	**85.6**	**23.1**	**3.5**	**24.0**

The above table reveals that in both the towns (English Bazar and Old Maldah) the main source of revenue of the local bodies is income derived from municipal properties and power apart from taxation. In case of English Bazar Municipality per capita expenditure is the highest (101.3) in the field of public health and convenience while it is lowest (4.9) in public institutions. In Old Maldah municipality public works had recorded the highest (66.6) per capita expenditure and nil expenditure being in public institutions.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	English Bazar (M)	5.6	0.8	0.8	0.4	0.1
2	Old Maldah (M)	3.3	0.8	0.6	0.3	0.2
	District Total :	**5.0**	**0.8**	**0.8**	**0.4**	**0.1**

It can be seen from the above table that in urban areas of Maldah, there are 5 primary schools, 0.8 middle school, 0.8 secondary school, 0.4 senior secondary school and 0.1 college for per 10,000 population.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Aiho(CT)	0
2	English Bazar(M)	41
3	Kachu Pukur(CT)	0
4	Kendua(CT)	0
5	Old Maldah(M)	2
	Distrct Total :	**28**

The above table shows that in urban areas of the district Maldah as a whole there are 28 beds in medical institutions per 10,000 population. The town-wise position reveals that in Census Town Aiho and Kachu Pukur there is no medical institutions. English Bazar municipality is having the highest number of beds (41) per 10,000 population and 2 beds in Old Maldah municipality per 10,000 population.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	English Bazar (M)	161,456	---	0.0
2	Old Maldah (M)	62,959	16,636	26.4
	District Total :	**62,959**	**16,636**	**26.4**

The slum population has been reported from the Old Maldah municipality only accounting for 26.4 per cent of the total population. It may be mentioned here that the estimates slum figure is supplied by the concerned town authority, so this may differ from the census figure as collected during the Census-2001.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Aiho (CT)	Rice	Rice
		Mustard Oil	Jute
		Bidi	Paddy
2	English Bazar (M)	Silk Fabric	Mango
		Mango Processing	Silk
		Mustard Oil	Fish
3	Kachu Pukur (CT)	Mustard Oil	Rice
			Jute
			Paddy
4	Kendua (CT)	Bidi	Rice
			Jute
			Paddy
5	Old Maldah (M)	Mango Products	Jute
		Biri	Mango
		Tiles & Bricks	Paddy

It can be seen from the above table that in municipal towns, as expected, predominantly, agro and non-agro based products are manufactured and mango products are exported from both the towns - English Bazar and Old Maldah. Mango, silk and fish are exported from English Bazar and jute, mango and paddy are exported from Old Maldah.In case of census towns, Aiho appears to be economically multi-functional wherein rice, mustard oil and bidi are manufactured. In Kachu Pukur and Kendua, rice, jute and paddy are exported.

Note : 1. Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

2. All Percentage shown in bracketts is per centage to Totals

The analysis of ownership status of houses presents some uncommon features regarding occupation of number of room under different tenure categories.

It is interesting to note that the availability of living room in rented category is better than that of owned category for the district as a whole and also for rural areas with median number of 2 rooms. However, in urban areas the position is same for both categories with median numbers of 2 room size. In 'others' category, the median room number is one for the district as well as for its rural and urban components. So far as the schedule caste households are concerned, the median size number of rooms is one for each tenure category. Among the scheduled tribe households, it is one for each tenure category at the district level and also in rural urban segments, except in owned category in urban areas and rented category in rural areas where it is 2 rooms.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

		Total			Rural			Urban		
Sl. No.	District/ CD Block	Permanent	Semi-perma-nent	Temporary	Permanent	Semi-perma-nent	Temporary	Permanent	Semi-perma-nent	Temporary

	District Total :	**30.8**	**55.7**	**13.5**	**26.8**	**58.5**	**14.6**	**76.5**	**22.8**	**0.7**

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note : Permanent : Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e. where, burnt G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, bricks, zinc or other metal sheets asbestos sheets bricks, lime and stone and RBC/RCC concreate are used for roof.

Semi permanent : 2 Semi-permanent houses refer to those houses made of other types of materials.

Temporary : 3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc.are used for roofs.

It can be seen from the above table that in Maldah 30.8 per cent households live in permanent houses, 55.7 per cent in semi-permanent and 13.5 per cent live in temporary houses. The proportion of households living in permanent houses in urban areas (76.5 per cent) is much higher when compared to corresponding figures for rural areas (26.8 per cent). In contrast, households living in urban areas in semi-permanent and temporary houses is much lower than the percentage of households living in rural areas which shows the poor housing condition found in rural areas in respect of durability of houses.

Among the CD Blocks, the highest percentage of households (74.2 per cent) live in permanent houses in Kaliachak-I and the lowest percentage (7.4 per cent) live in Bamangola. Again, the lowest proportion of households living in semi-permanent (23.9 per cent) and living in temporary houses (1.8 per cent) is recorded in Kaliachak-I and the highest proportion of households living in semi-permanent houses (79.9 per cent) and temporary houses (31.7 per cent) is noticed in Harishchandrapur-II and Bamangola CD Block respectively. The net result of the analysis is that the housing condition in Kaliachak-I CD Block is the best among all the CD Blocks.

TABLE 50 : NUMBER & PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE, ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

Serial number	CD Block	Total / Rural / Urban	Number of households	Number and percentage of households having				
				Improved drinking water*	Electricity	Bathroom	Toilet	Drainage
1	2	3	4	5	6	7	8	9

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

*Based on the improved drinding water source, drinking water source, drinding water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/ tube well situated within or outside the premises it is comsidered as having access to 'Inproved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note : Percentage is to be given in brackets after the number of households.
Bathroom means bathroom within the house
Toilet means toilet within the house.
Drainage menas closed and open drainage.

It is evident from the above table that in Maldah district, 72.8 per cent households have access to improved drinking water facility, 18.5 per cent have electricity, 10.6 per cent have bathroom, 21.3 per cent have toilet facility and 18.3 per cent households have drainage. As expected, the percentage of households having these facilities in urban areas is much higher as compared to corresponding figures in the rural areas. Water is the bare minimum necessity to support the human life which is available to the lowest proportion of households in Gazole CD Block (26.0 per cent) and to the highest proportion of households in Kaliachak-III CD Block (91.7 per cent). The highest proportion of households served by electricity is noticed in Kaliachak-I CD Block (26.2 per cent) while the lowest in Maldah (Old) CD Block (9.7 per cent). In case of availability of bathroom, the maximum households have been found served in Kaliachak-I CD Block (11.3 per cent) and the minimum in Chanchal-II CD Block (3.5 per cent). The availability of toilet facility varies between the lowest percentage returned in Chanchal-II CD Block (8.4 per cent) and the highest obtained in Kaliachak-I CD Block (28.3 per cent). The highest percentage of households connected with drainage to dispose of waste water is reported from the English Bazar CD Block (28.7 per cent) whereas the lowest is in Harishchandrapur-I CD Block (8.1 per cent).

Note : Percentage in brackets

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

The pattern of fuel for cooking in Maldah district shows that the percentage of household using firewood for cooking is higher in urban areas (25.4 per cent) than that of rural (20.9 per cent). Surprisingly the proportion of households using electricity for cooking is higher in rural areas (0.4 per cent) as compared to urban areas (0.1 per cent). Another striking feature is that the percentage of households using bio-gas as fuel for cooking is negligible in rural areas as compared to 0.1 per cent recorded in urban areas though cow dung is abundantly found in rural areas. It shows near absence of technical know how and financial constraint for constructing bio-gas plant in rural areas. Crop residue is the main fuel for cooking (41.8 per cent) in the district followed by firewood (21.3 per cent), cowdung cake (14.3 per cent), others (14.2 percent), coal/lignite (charcoal) (3.5 per cent), cooking gas (3.4 per cent), kerosene (0.6 per cent), electricity (0.3 per cent) and bio-gas (0.1 per cent). About one percent households have no cooking in their houses. Undoubtedly, they have taken meal out side.

Among the CD Blocks the predominant fuel used for cooking is firewood in Maldah (Old), English Bazar and Kaliachak-I, while it is crop residue in Harishchandrapur-I, Harishchandrapur-II. Chanchal-I, Chanchal-II, Ratua-I, Ratua-II, Gazole, Bamangola, Manikchak and Kaliachak-III and cow dung cake in Habibpur and other fuel in Kaliachak-II CD Block.

Data source : Census of India 2001, H-series: Table on Houses, Household amenities and Assets.

Out of a total number of 629,916 households in the district, 165,695 (26.3 per cent) are availing banking services. Further, out of total households, radio/transistor is available to 148,939 (23.6 per cent) households, television to 72,958 (11.6 per cent) households telephone to 21,752 households(3.5 per cent), Bicycle 301,887 (47.9 per cent) households scooter/motor cycle/moped 13,822 (2.2 per cent) households, car/jeep/van 7,421 (1.2 per cent) households and 275,579 (43.7 per cent) households have none of these assets is much higher in urban areas as compared to rural areas in each case barring radio/transistor where rural proportion of population is marginally higher than that of the urban. Banking services are very much instrumental in bringing about socio-economic change and development in our society but is availed by about one-fourth of the total households.

At CD Block level analysis shows that the highest proportion of households availing banking services is returned from English Bazar (32.2 per cent) while lowest from Chanchal-II (11.1 per cent). The proportion of households having none of the specified assets is the highest in Habibpur CD Block (51.2 per cent) whereas the lowest in Kaliachak-III CD Block (36.0 per cent). This shows wide inter Block disparity prevailing in social and economic type of the people.

Brief description of places of religious, historical or archaeological importance in villages and places of tourist interest in the towns of the district and major charecteristics of the district

Gour and Pandua, the two forgotten ancient capitals of Bengal are now mere relics of their past grandeur. The extant remains of the two cities within the jurisdiction of Maldah district as the places of interest at Gour are Baro Sona Masjid, Dhakhil Darwaja, Firoz Miner, the Qadam Rasul, Shaji Darwaza, Mansoleum of Fath Khan, Chika Building, Gumti Gate, Lotton Masjid, Gunmant Masjid, Chamkati Masjid, Tantipara Masjid and Jan Jahanian Masjid. Pandua boasts of Bari Dargah, Salami Darwaja, Eklakhi Mausoleum. Among the mosques; the Adina Mosque was built by Sikandar Saah. In size it is the third largest mosque in the world.

Accommodation :

There is a government tourist lodge in Maldah run by West Bengal Tourism Development Corporation Ltd. This Department of Sports and Youth Welfare of the Government of West Bengal runs one youth hostel in Maldah town called 'Sibram Bhavan'. There are also four Inspection Bunglows in Harishchandrapur, Chanchal, Ratua and Manikchak respectively.

(xiii) Major Characteristics of the District, Contribution of the District in the form of any Historical Figure Associated with the District

In Maldah, the rules of the Hindu, Jain, Muslim and Buddhist Kings have contributed to the growth of a cosmopolitan culture which is ever-flourishing in a continuous process.

Following eminent modern personalities have dignified this ancient capital by way of their contribution.

1) Golam Hosain – Eminent Historian
2) Prof. Binoy Kr. Sarkar – Eminent Economist and social scientist
3) Sibram Chakraborty – Eminent Writer
4) Abid Ali Khan – Historian
5) Haridas Palit – Folklorist
6) Rajani Kanto Chakraborty – Historian
7) Charu Chandra Bandopadhyay – Eminent Writer
8) Bidhu Sekhar Sastri – Eminent Professor

Scope of Village & Town Directory

The "Village Directory'' is one of the traditional compilations of the census. The format of the directory is almost the same as was prescribed in the 1991 census. It bears the list of villages, their location code numbers, areas, population, amenities such as educational, medical, communications, drinking water facilities etc. available to them and also the land use pattern for each village. For this purpose, villages have been arranged CD Block wise in order of their location code numbers. The inclusion of alphabetical list of villages with 2001 census population and the map of every CD Block depicting location of villages by population size, urban-spread and important infrastructural facilities available therein will further help the reader in identifying any village in the CD Block.

'Village' is a statutorily recognized unit having a definite boundary and separate land records. In case a complete village is treated as an outgrowth of urban agglomeration, data on amenities and land use for that village have not been given in the Village Directory but shown along with the urban component. For those villages, which have partly merged in an outgrowth of U.A. data pertaining to remaining part of the village is shown in the Village Directory and for the part merged or treated as an outgrowth, the details have been given under the concerned urban agglomeration. Land use data for villages treated as Census Towns (Urban) in 2001 census can be seen in Appendix-III of the Village Directory.

If a village has fully merged into another village, the location code number and name of the merged village are given both in the Village Primary Census Abstract and the Village Directory at the appropriate place. Data in respect of these two villages put together appear against the village with which the other village has merged.

The uninhabited village (villages with no population) has been indicated as such after furnishing details in columns 1 to 3 i.e. the location code number, name and area of the village. In addition to the above details, following eight appendices to Village Directory have also been included.

Appendix – I - Abstract of educational, medical and other amenities in Villages - CD Block level

Appendix-IA - Villages by number of Primary Schools

Appendix-IB - Villages by Primary, Middle and Secondary Schools

Appendix-IC - Villages with different sources of drinking water facilities available

Appendix-II - Villages with 5,000 and above population which do not have one or more amenities available

Appendix-IIA - List of Census Towns which do not have one or more amenities

Appendix-III - Land utilisation data in respect of Census Towns/Non Municipal Towns

Appendix-IV - CD Block wise list of inhabited villages where no amenity other than drinking water facility is available

Appendix-V - Summary showing number of Villages having or not having Scheduled Caste Population

Appendix-VI - Summary showing number of Villages having or not having Scheduled Tribe Population

Appendix-VIIA - List of Villages according to the proportion of the Schedule Castes to the total population by ranges

Appendix-VIIB - List of Villages according to the proportion of the Schedule Tribes to the total population by ranges

Appendix-VIII - Number of Villages under each Gram Panchayat (CD Block wise)

The above eight appendices are expected to help the planners for planning inputs in areas / villages where basic infrastructure is lacking and also for evolving suitable plans for the welfare of Scheduled Castes and Scheduled Tribes, in particular.

The Village Directory format has 23 columns and

the details given under each column and the abbreviations used to explain availability of amenities are as under.

Column 1 – Serial No. of the villages.

Column 2 – The name and location code number of each village, as this is necessary for proper identification of the village. This also includes the forest and uninhabited villages.

Column 3 – The total area of the village (in hectares) as indicated by the State Revenue Department.

Column 4 – The total population in each village (2001 Census).

Column 5 – The total number of households in the village (2001 Census).

Data on amenities such as educational, medical, drinking water, post, telegraph and telephone, commercial and cooperative Banks, credit societies, Recreational & cultural facilities, communications etc. are shown under columns 6 to 13 of the Village Directory. In case if an amenity is not available within the referent village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz., up to 5 kms., 5-10 kms. and 10+ kms. to the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provision of goods and services as well, so as to minimize the regional imbalance in the process of development.

Column 6 shows the number of all kinds of educational institutions run by different agencies, government or private of the level of viz., primary school, middle school, secondary school, senior secondary, college, industrial school, training school adult literacy school / centre and other educational institutions (Sanskrit pathshala, senior basic school, makhtab etc).

If in a village, secondary school has middle and primary classes also, the same has been counted as three schools i.e., secondary, middle and primary school. In case there are more than one institution of any type in a village their number is indicated within brackets against the prescribed abbreviation.

Column 7 provides data on medical facilities available in the village.

Column 8 gives information regarding availability of drinking water within the village. In case more than one source is available to the village the same has been indicated.

Column 9 provides information about the existance of facilities such as post, telegraph and telephone connections available in the village.

Column 10 refers to the availability of banking service in the villages and this is shown by giving the number of commercial and co-operative banks separately.

Column 11 contains information on availability of credit societies in the village. The information is represented separately by recording the number of Agricultural, non-Agricultural and other credit societies.

Column 12 give information on availability of Recreational & Cultural facilities such as Cinema / Video Hall, Sports Club, Stadium / Auditorium, in the village.

Column 13 gives information as to whether the village is served by any mode of public transport like bus, rail and water-ways.

Column 14 refers to the state of roads etc. leading to the village, this is useful in determining as to whether the village is approachable both in fair and foul weather, and whether it is inaccessible only for some time in the year.

Column 15 gives the information about the nearest town and its distance in kilometers in bracket from the referent village. In case the nearest town is located in another state, the name of the state has also been furnished.

Column 16 relates to the availability of power supply in the village.

In case the power supply is released only for specific purpose, say agriculture or other it has been stated accordingly. In case the electricity is not available to the village, a dash (-) has been mentioned in the column.

Column 17 is regarding receipt of News Paper / Magazine in the village.

Column 18 has information regarding the name of the most important commodity, manufactured in the village.

Columns 19 to 23 give the details about land utilization. The land use pattern given in the Village Directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India.

Column 19 includes all lands classed as forests under any legal enactment dealing with forests or administered as forests, whether State-owned or private, and whether wooded or maintained as potential forest land. The area of crops raised in the forest and grazing lands or areas open for grazing within the forests has been included under the forest area.

Column 20 indicates extent of irrigated lands under various types of irrigation.

Column 21 cover all agricultural lands including the net area sown with crops and orchards or net cropped area and also current and other fallow lands, the latter would imply all lands which were taken up for cultivation, but are temporarily out of cultivation for a period of not less than one year and not more than five years. The columns does not include gross year sown or gross cropped area. Net area sown thus represents the area sown with crops and orchards. Area sown more than once in the same year has been counted only once.

Column 22 gives information on cultivable wastelands and includes all lands available for cultivation whether not taken up for cultivation once but not cultivated during the preceding five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles, which are not put to any use. These may be assessed or unassessed and may be in isolated blocks within cultivated holding. Lands under thatching grasses, bamboo, bushes and other groves for fuel etc., which are not included under orchards or forests are included in this category. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

Column 23 includes the land not available for cultivation such as barren, unculturable land and put to non-agricultural use. All lands occupied by buildings, roads, railways, rivers, canals, etc. form part of the land under non-agricultural uses. Barren and unculturable lands include mountains, rocks, deserts etc., which cannot be brought under cultivation, except at a very high cost.

Column 24 and 25 are once again the name of the villages and serial numbers respectively for the readers convinience.

Town Directory :

The town directory is presented for each town covering different aspects of urban life through a set of seven statements from I to VII. The data contained in these statements are about the identification particulars of town, the area, number of households (including houseless households), population and growth rate in 2001 and past censuses, density, sex ratio, physical aspects and location of towns, communications, municipal finances, civic and other amenities, medical, educational, recreational, cultural facilities, trade, commerce, industry, banking, and civic and other amenities in slums. It covers all the towns in the district statutorily notified as well as non-municipal towns (Census Towns). All the towns in the district are arranged in ascending order of location code number.

The data collected in these statements have largely been furnished by the municipal bodies. In case of non municipal towns (Census Towns) the Block level office supplied the information.

Statement I shows status and growth history of the towns in the district. Column 2 in this statement indicates class, name and civic administration status of town (as in 2000). Class of the town indicated under this column has been introduced to factilities the analysis of town directory data at the state and the national level. Census towns have no urban civic status.

Size and Class of Towns :

Class	-	Size
I	-	100,000 and above
II	-	50,000 to 99,999
III	-	20,000 to 49,999
IV	-	10,000 to 19,999
V	-	5,000 to 9,999
VI	-	below 5,000

Column 3 is for representing eight digit permanent code number for each town in the district.

Coulmn 4 indicates the name of police station in which the town is located.

Column 5 is for recording the name of CD Block if the town is located in it.

Column 6 gives area (in sq. kms.) of the town.

Column 7 gives information about number of households including houseless households.

Columns 8 to 18 gives population and growth rate of the town since the Censuses of 1901, which would help in drawing the trends in their growth rate.

Column 19 present density in 2001 Census and 20 to 22 represent the sex ratio.

Statement II shows physical aspects and location of towns. In physical aspects only the rainfall, maximum and minimum temperature data as obtained from the Director General of Meteorological Survey of India have been shown. Towns for which information could not be obtained from Meteorological Survey of India, the same has been collected locally or calculated in relation to the nearest town, to the extent possible. Columns 6 to 12 have been filled up on the basis of information received from the respective district authority. Distances respectively from the state, district and tahsil/CD Block headquarters as well as the nearest city (urban area with a population of 100,000+) would help in determining the location of a town. Communication facilities are shown mentioning railway station, bus route and navigable river/canal.

Statement III deals with municipal finance for the statutory and also non-statutory town bodies managing civic administration of the town provided they have separate budgets and accounts of their own.

Statement IV Scheduled Castes/Scheduled Tribes population figure given in columns 4 and 5 would help in measuring amenities in respect of population size of the weaker sections in the towns. The information on road length within the town shown under column 6 has been obtained from Municipality (except for the highways).

Columns 7 to 12 reflects the information on system of sewerage number of latrines and method of disposal of night soil.

Columns 13 and 14 indicate sources and system of storage with capacity of protected water supply to the inhabitants of the towns.

Column 15 gives information regarding availability of fire fighting services. In case, it is not available in the referent towns, the name of the nearest place where it is available has been mentioned and the distance from the town has also been indicated within brackets. Columns 16 to 20 pertain to the number of connection of electricity supply available for domestic, industrial, commercial, road lighting (points) and for any other purposes.

Statement V gives information regarding amenities like medical, educational, recreational and cultural facilities available in the town. 2001 population figures for each town have also been indicated and this will facilitate in analyzing data on facilities available to the people.

Data related to medical facilities have been obtained from the concerned district authority and shown under columns 4 and 5. All types of medical institutions whether allopathic, ayurvedic, unani or homoeopathic have been covered.

If the medical institution is Ayurvedic, Unani or Homoeopathic the same is indicated in bracket by recording the number of institutions.

In case, more than one institution of any type is available, the exact number is shown within the brackets.

The information on educational facilities are depicted in column 6 to 14.

Column 10 pertains to the number of recognized shorthand, typewriting and vocational training institutes (grouped as others) which include Applied Art / Painting college, Pharmacy college, B.Ed. college, Teacher's training institute, Music / Dancing, Nursing school, etc.

Column 15 shows the information in respect of Adult Literacy classes / Centres etc. Similarly in view of the spurt in the employment of women in towns, information on number of working women's hostels and seats available therein has been given under column 16. This data would help in formulating plans for opening new hostels in order to meet the problems of the single working women.

Columns 17 to 20 show recreational and cultural facilities available in the town. These include stadia , cinema, auditoria / drama / community halls, public libraries indicated as 'PL' and reading rooms indicated as 'RR'.

Statement VI presents information in respect of Trade, Commerce, Industry and Banking services in the town. Columns 3, 4 and 5 contain information about the three most important comodities exported out from the town, column number 6, 7 and 8 in the other hand bears information about the three most important commodities manufactured in the town. Column number 9, 10 and 11 show the number of agricultural and non-agricultural credit societies in the town.

Statement VII provides data in respect of civic and other amenities in the slums.

PEOPLE ORIENTED

Abbreviation used in Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows :

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz. <5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the

abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Sorce	SS-

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities :

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial & Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given :

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational & Cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets :

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows :

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is

लोकोन्मुख PEOPLE ORIENTED

indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

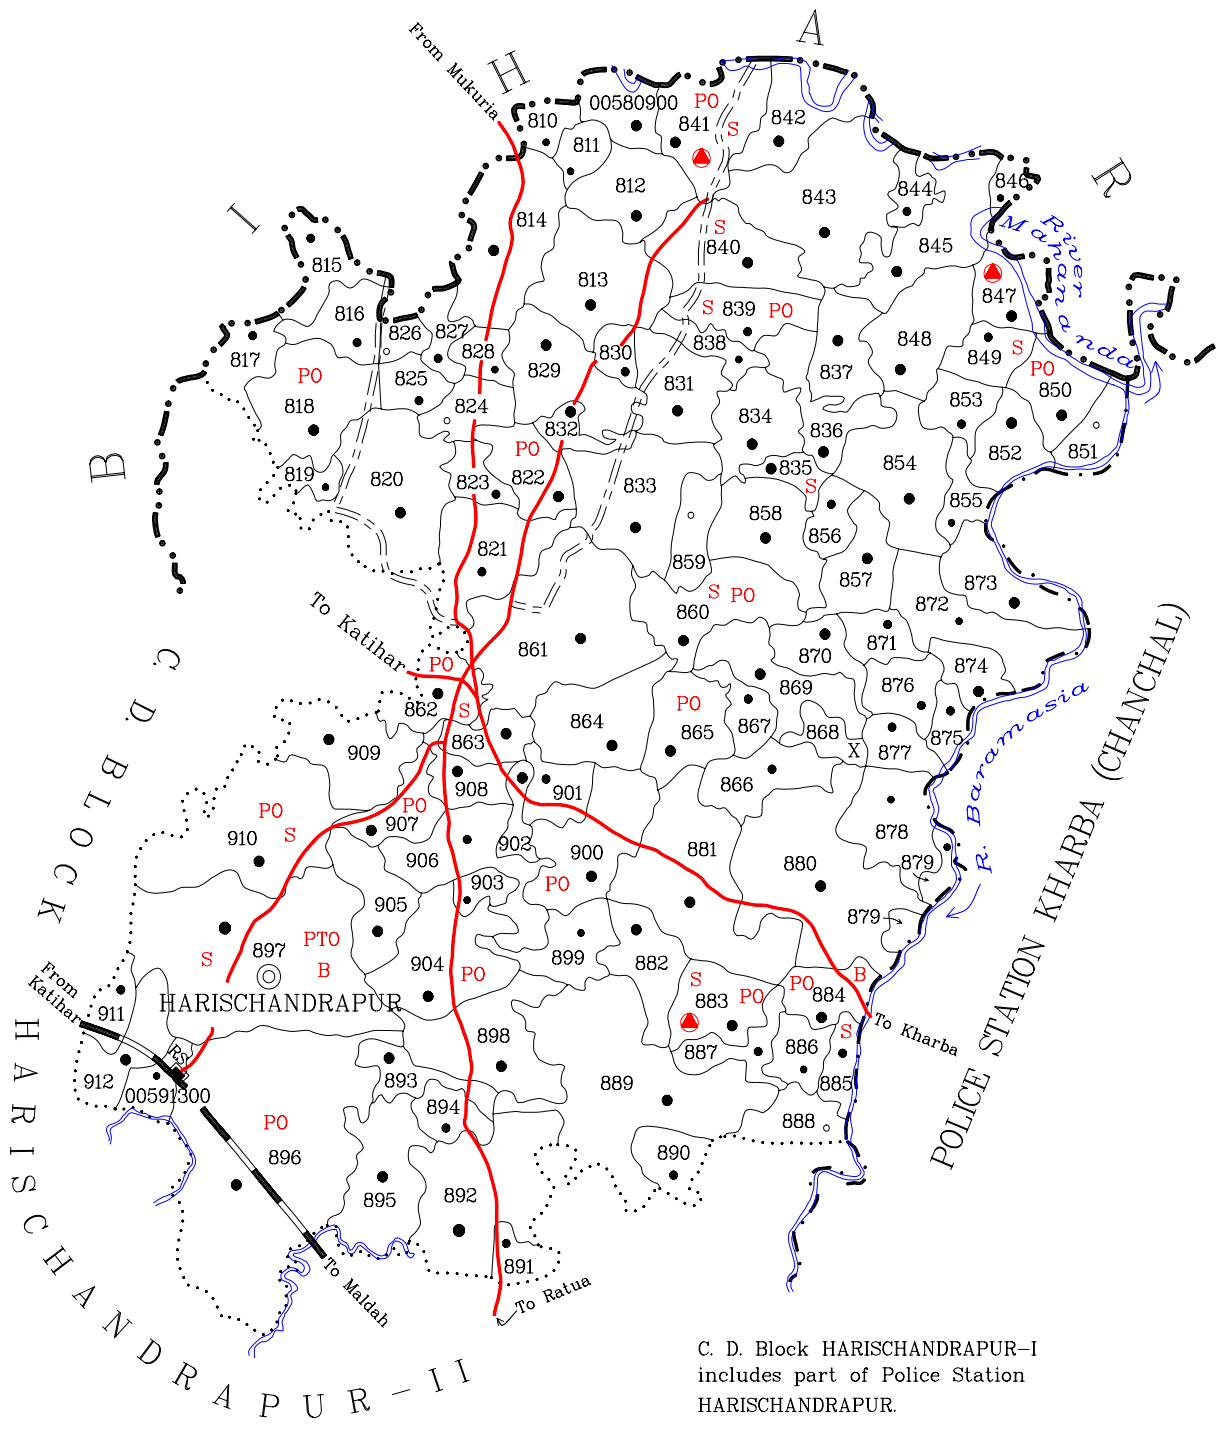

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell(with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.
Appendix-I-A	Indicates number of villages CD Block wise having one or more primary schools.
Appendix-I-B	Indicates number of villages CD Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages CD Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VII A & VII B	The appendix shows the list of villages according to proportion of the Scheduled castes and Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates CD Block wise number of villages under each Gram Panchayat.

Abbreviation used in Town Directory

Town Directory Statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/ Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 - 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface

are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom.

Column 6 to 9 :

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B.Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 : Higher Secondary/Intermediate/ Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 : Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

Brief Note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preli-minary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institu-tional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication table provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks :

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under :

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows :

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

Out of 15 CD Blocks in the district, Gazole CD Block has the highest number of Gram Panchayats (15) while both Bamangola and Old Maldah CD Block has the lowest (6). Similarly, in terms of number of villages in a CD Block, Gazole tops the list with 293 villages and Ratua-II is at the bottom with 57 villages.

Annexure

Annexure - II : Fertility and Mortality, 1991 Census

Fertility :

In 'demography' the science of population statistics Fertility is one of the main components of population change whereas others are 'Mortality' and Migration. Fertility deals with actual reproductive performances in a given community at a given period of time.

It has been customary in censuses to collect, compile and analyse the fertility data. In 1991 and 2001 Census, four questions relating to fertility were asked. These are age at marriage, number of children surviving at the time of questioning with their sex and number of children born alive by sex to all ever married woman only. Also, the question "Number of children born alive during last one year" was asked from the currently married women only. Different fertility ratios which are discussed here are based on mainly the answer of the question "Number of children born alive during last one year".

The very common indicator of fertility is Crude Birth Rate (CBR) which denotes the number of live births per 1,000 population. Other common fertility idicators are Age Specfic Fertility Rate (ASFR), General Fertility Rate (GFR), Total Fertility Rate (TFR), Age Specific Marital Fertility Rate (ASMFR), General Marital Fertility Rate (GMFR) and Total Marital Fertility Rate (TMFR). ASFR, GFR and TFR are calculated by taking total no. of women as denominator whereas for ASMFR, GMFR & TMFR are calculated by taking total number of currently married woman as denominator. The table below shows the fertility rate under different measures in the district as well as in the State.

Annexure

Annexure – II (A)
Age Specific Marital Fertility Levels - 1991 in the district of Maldah

Age group	Maldah	West Bengal
(1)	(2)	(3)

20-24	0.210	0.191
25-29	0.187	0.133
30-34	0.139	0.082
35-39	0.093	0.050
40-44	0.052	0.030
45-49	0.028	0.016

The fertility levels in the district in all age groups excepting the age group 15-19 are higher as compared with the state figures. The higher fertility levels in both the district and the state has been reflected in the age group of 20-24. The fertility differentials between the district and the state are so pronounced in the age group of 25-29 and 30-34.

Annexure – II (B)

Mean age at Marriage		16.8		17.2
Child woman ratio		94.8		71.1

Source : Fertility Tables - F Series, 1991 Census

The different fertility measures reveal higher levels of fertility in the district compared to state average in both 1981 and 1991. Lower literacy and relatively lower age at marriage of females in the district compared to the state average could be attributed to higher fertility in district.

Mortality :

Apart from fertility and migration, mortality is also considered as the dynamics of population change demography. In census, information on the questions on children ever born and children surviving is collected from all ever married women. From this, estimates of child mortality have been worked out by age of mother by using Brass technique. The table below shows the estimates of child mortality in 1991 in the district of Maldah.

Annexure – II (C)
Estimate of Child Mortality, 1981-91 in the district of Maldah

Mortality Level	Census Year	Maldah P	Maldah M	Maldah F	West Bengal P	West Bengal M	West Bengal F
q_1	1981	128	134	120	95	103	57
	1991	96	96	95	62	75	51
q_2	1981	145	150	140	102	106	98

	1991	140	130	150	94	94	92

Source : Occasional papers no. 1 of 1997)

From the indirect estimates of child mortality the level of mortality at ages 1, 2, 3 and 5 has given above as q_1, q_2, q_3 and q_5. In q_3 and q_5 both in 1981 and 1991 female mortality is higher than their male counterparts whereas in q_1 male mortality is higher in the district. However, incase of q_2 for males it was higher in 1981 than the female mortality level but in 1991 the situation is reversed. It is noticed that the mortality level in the district was higher for both the sexes at ages 1, 2, 3 and 5 in 1981 and 1991 as compared to the corresponding figure of the state. This shows the poor health status prevailing in the population of the district. Another table on fertility of all districts of the State is shown in Annexure–III (D).

It is observed from the above table that GFR, GMFR, TFR, TMFR and CBR for the state as a whole are 122, 158, 3.61, 5.13 and 29.01 respectively. Maldah occupies the first position in terms of GFR, TFR and CBR whereas in case of GMFR and TMFR South 24 Parganas is in the first position. Lowest position for GFR and CBR goes to Kolkata whereas the same position occupies by Hugli for GMFR, TFR and TMFR. Number of children ever born per woman in age group 45-49 is maximum in Murshidabad with 5.72 which is much higher than the state average of 4.56 and the minimum number is observed in Kolkata. Child-woman ratio is highest in Murshidabad with 93.03 and Kolkata has the lowest with 37.22. State average mean age at marriage is maximum in Kolkata with 19.05 and Murshidabad with 16.49 is the minimum.

Annexure - IV

Percentage distribution of Migrants by place of birth, 2001 Census

Migration is an important aspect in the analysis of population change as it affects the size, age and sex structure of the population. However, it can affect the population size at local level only. In most general sense, migration as ordinarily defined movement of people from one place to another place involving change of residence for some definite purpose. Migration may be categorized as internal and international migration. A person moves from his/her place of birth last residence to a new place with some definite reason, it may be economic, social, political or for any other reason. The main source of information on migration of our country is collected through regular decennial census. In 2001 Census, data on migration were collected on different aspects, such as reason for migration from the place of previous residence, duration of stay since migration etc. Tables on migration by place of birth; interstate migration; rural and urban composition of internal migrants by place of birth in the district and in the State are given below.

ANNEXURE – IV (A)
PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH, 2001 CENSUS

Place of Birth	West Bengal			Maldah		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
A. Migrants born within the state of Enumeration	19,082,558 (77.4)	4,489,736 (60.0)	14,592,822 (84.9)	715,722 (83.1)	140,077 (68.5)	575,645 (87.6)
i) Migrants born elsewhere in the district of Enumeration	14,526,298 (58.9)	2,892,376 (38.7)	11,633,922 (67.7)	643,485 (74.7)	118,501 (57.9)	524,984 (79.9)
ii) Migrants born in other district of the State	4,556,260 (18.5)	1,597,360 (21.4)	2,958,900 (17.2)	72,237 (8.4)	21,576 (10.5)	50,661 (7.7)
B. Migrants born in other State of India	2,491,932 (10.1)	1,352,219 (18.1)	1,139,713 (6.6)	51,900 (6.0)	14,621 (7.1)	37,279 (5.7)
C. Migrants born in other countries	3,090,393 (12.5)	1,636,343 (21.9)	1,454,050 (8.5)	93,774 (10.9)	49,887 (24.4)	43,887 (6.7)
Total Migrants	**24,664,883 (100.0)**	**7,478,298 (100.0)**	**17,186,585 (100.0)**	**861,396 (100.0)**	**204,585 (100.0)**	**656,811 (100.0)**

It is observed from Annexure - IV (A) that out of 24,664,883 migrants in the State 77.4 per cent were born within the state of enumeration and out of them 58.9 per cent migrants were born elsewhere in district of enumeration. It is also observed from the state figures that out of the total migrants, 10.1 per cent and 12.5 per cent migrants are having place of birth in other state of India and in other countries respectively. The similar trend is found in the district of Maldah also. The females generally move within short distance and because of this fact the proportion of female migrants born elsewhere in the district of enumeration is abnormally higher than that of their male counterparts. Further, this remarkable high proportion of female migrants may be attributed to marriage migration.

ANNEXURE – IV (B)
INTERSTATE MIGRANTS TO WEST BENGAL AND DISTRICT, 2001 CENSUS

Place of Birth	Migrants			Percentage to total migrants		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
STATE - WEST BENGAL 19						
1. Bihar	1,160,593	708,591	452,002	46.6	52.4	39.7
2. Jharkhand	441,435	159,689	281,746	17.7	11.8	24.7
3. Uttar Pradesh	309,315	190,832	118,483	12.4	14.1	10.4
Total for three states	**1,911,343**	**1,059,112**	**852,231**	**76.7**	**78.3**	**74.8**
4. Other States	580,589	293,107	287,482	23.3	21.7	25.2
Total	**2,491,932**	**1,352,219**	**1,139,713**	**100.0**	**100.0**	**100.0**
MALDAH 06						
1. Bihar	36,571	9,310	27,261	70.5	63.7	73.1
2. Jharkhand	9,030	2,230	6,800	17.4	15.3	18.2
3. Uttar Pradesh	2,077	1,093	984	4.0	7.5	2.6
Total for three states	**47,678**	**12,633**	**35,045**	**91.9**	**86.4**	**94.0**
4. Other States	4,222	1,988	2,234	8.1	13.6	6.0
Total	**51,900**	**14,621**	**37,279**	**100.0**	**100.0**	**100.0**

The Annexure - IV (B) on interstate migrants shows that at 2001 Census out of the total interstate migrants 46.6 per cent had place of birth in Bihar, 17.7 per cent in Jharkhand, 12.4 per cent in Uttar Pradesh and 23.3 per cent had in other states in case of West Bengal whereas in the case of Maldah district out of the total migrants enumerated in the district, 70.5 per cent had place of birth in Bihar, 17.4 per cent in Jharkhand, 4.0 per cent in Uttar Pradesh and 8.1 per cent had in other states. This trend indicates that the major migration in case of interstate migrants had taken place from Bihar state for the state as a whole and also for the district of Maldah.

ANNEXURE – IV (C)
RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH, 2001 CENSUS

Place of Birth	Place of Enumeration					
	West Bengal			Maldah		
	Total	Rural	Urban	Total	Rural	Urban
1	3	4	5	6	7	8
1. Migrants born within the state of Enumeration	19,082,558	14,106,837	4,975,721	715,722	654,276	61,446
	(100.0)	(73.9)	(26.1)	(100.0)	(91.4)	(8.6)
2. Migrants born in other State of India	2,491,932	678,906	1,813,026	51,900	42,285	9,615
	(100.0)	(27.2)	(72.8)	(100.0)	(81.5)	(18.5)

The above table shows rural and urban composition of migrants by place of birth and by place of enumeration in 2001 Census of Maldah district. District table shows that major portion of migrants born within the state of enumeration have been enumerated in rural area (91.4 per cent) whereas the same figure for West Bengal is 73.9 per cent. In case of migrants born in other state of India, 81.5 per cent have been enumerated in rural area of Maldah district whereas the same is 27.2 per cent in case of West Bengal.

		(3.8)	(10.1)	(1.9)	(5.6)	(12.9)	(3.4)	(100.0)	(100.0)	(100.0)

It is seen from Annexure-IV(D) that in terms of total migrants in absolute figure, North 24 Parganas with 3,693,336 persons comes in first position followed by Medinipur with 2,709,165 persons and Barddhaman with 2,364,020 persons. In case of people born in West Bengal, 9 districts of the state overtake the state percentage of 77.4. So far people born in other states are concerned, 8 districts overtake the State average of 10.1 per cent and regarding people born in other district of West Bengal, only 6 districts overtake the State average of 18.5 per cent. The percentage of people born elsewhere in the district of enumeration varies between the maximum of 87.5 in Medinipur and the minimum of 38.7 in North 24 Parganas district. Similarly, the percentage of people born in other countries varies between the maximum of 33.9 in Nadia and the minimum of 0.2 in Puruliya district.

ANNEXURE - V

BRIEF ACCOUNT OF MAIN RELIGIONS IN THE STATE AND DISTRICT, 2001 CENSUS

Religious communities	Total	Rural	Urban	Per cent to all religions	Percent to total	
					Rural	Urban
1	2	3	4	5	6	7
WEST BENGAL-19						
All Religions	80,176,197	57,748,946	22,427,251	100.0	72.0	28.0
Hindus	58,104,835	39,406,984	18,697,851	72.5	67.8	32.2
Muslims	20,240,543	16,845,034	3,395,509	25.2	83.2	16.8
Christians	515,150	393,358	121,792	0.6	76.4	23.6
Sikhs	66,391	10,758	55,633	0.1	16.2	83.8
Buddhists	243,364	171,455	71,909	0.3	70.5	29.5
Jains	55,223	9,354	45,869	0.1	16.9	83.1
Others	895,796	875,354	20,442	1.1	97.7	2.3
Religion not stated	54,895	36,649	18,246	0.1	66.8	33.2
MALDAH-06						
All Religions	3,290,468	3,049,528	240,940	100.0	92.7	7.3
Hindus	1,621,468	1,407,962	213,506	49.3	86.8	13.2
Muslims	1,636,171	1,609,596	26,575	49.7	98.4	1.6
Christians	8,388	7,962	426	0.3	94.9	5.1
Sikhs	283	215	68	0.0	76.0	24.0
Buddhists	164	96	68	0.0	58.5	41.5
Jains	293	160	133	0.0	54.6	45.4
Others	22,350	22,288	62	0.7	99.7	0.3
Religion not stated	1,351	1,249	102	0.0	92.5	7.5

It is observed that in Maldah the Muslims occupy the first place with 49.7 per cent of the total population of the district, being closely followed by the Hindus with 49.3 per cent indicating that they are the two main religions of the district competing with each other in number. The competition is evident when it comes to rural sector where the Muslims with 98.4 per cent outnumber the Hindus with 86.8 per cent.

Annexure - VI

Marital Status of the population as per 2001 Census :

Information on sex and marital status of persons, particularly marital status of women population is very much important for measuring fertility rate by age group. Population of women belonging to currently married group is also important for measuring age specific marital fertility rate (ASMFR). A table classified by marital status, broad age group and sex of 1991 and 2001 is shown below :

ANNEXURE – VI (A)

PERCENTAGE DISTRIBUTION OF POPULATION CLASSIFIED BY MARITAL STATUS, BROAD AGE GROUP AND SEX, 1991-2001

Year	Age	Total	Marital Status							
			Never married		Married		Widowed		Divorced or Separated	
			Males	Females	Males	Females	Males	Females	Males	Females
1	2	3	4	5	6	7	8	9	10	11
1991	0-14	100.0	99.6	98.8	0.4	1.1	0.0	0.0	0.0	0.0
	15-34	100.0	51.8	18.8	47.6	78.1	0.4	1.6	0.3	1.5
	35-54	100.0	3.1	1.1	93.9	83.2	2.5	14.6	0.5	1.2
	55+	100.0	5.9	3.4	83.1	40.9	10.7	55.0	0.4	0.7
	All ages	100.0	59.3	48.5	39.1	43.9	1.4	6.9	0.2	0.8
2001	0-14	100.0	99.8	99.4	0.2	0.6	0.0	0.0	0.0	0.0
	15-34	100.0	50.8	19.6	48.7	77.7	0.2	1.4	0.2	1.3
	35-54	100.0	1.7	1.1	96.8	83.8	1.2	13.4	0.3	1.7
	55+	100.0	2.2	1.6	88.5	44.7	9.0	53.0	0.4	0.7
	All Ages	100.0	58.0	47.9	40.9	44.3	0.9	7.0	0.2	0.8

Note : Figures of age not stated are included in all ages. Unspecified Marital status is included in total population.

It is observed from the above table that the proportion of never married males and females in the age group 0-14 has slightly increased in 2001 over 1991 census, whereas the proportion of married (males and females) in the same age group has decreased over the same time period. Under the age-group 35-54 the proportion of married persons (both male and female) have increased in 2001 over 1991. A remarkable decrease in the percentage of never married males and females is observed in the age group of 55+, whereas the proportion of married males and females has significantly increased in the same age group in 2001 census. It is to be noted that the proportion of widowed males and females in the age group of 15-34, 35-54 and 55+ has reduced to a great extent, indicating a substantial decline in the mortality rate. Further, it is seen that the proportion of divorced/ separated females is also higher than the corresponding male population in both the census years. A table classified by marital status, broad age group, sex and residence has been shown in Annexure-VI (B) for Maldah district of 2001 Census.

It is observed that more than 41.0 per cent of the total population of Maldah district belong to 0-14 age group and naturally constitute the bulk of the never married as per 2001 census. Although none is found in the married status in 0-9 age group of the district, 1.1 per cent of 10-14 age group population of the district has been found married implying that child marriage still exists in the district. Number of females however being greater than the males. The highest number of married are found in 25-29 female age group (130,979) and in 30-34 male age group (112,053) indicating that gradually late marriage is being preferred by both the sexes. A pointer to mortality is the number of female widowed which is more than eight times of the male widowed and it is highest for male in the 70-74 age group (2,189) and for female in 60-64 age group (18,345). The number of divorced or separated females is also higher than the number of males in most of the age groups.

Age not stated	213	132	157	100	88	45	40	15	0	0	2	1	38	16

It is seen that in none of the sub-levels of literacy of Maldah district, the females have been able to catch up the males in number in 2001 census. More than 50.0 per cent of the total populations of Maldah district are literates, excluding 0-6 age group and numbers of literate males (801,770) are much higher than the number of females (530,934) as per absolute figures. It is noteworthy to mention that 42.7 per cent of the age group 7-10 still remain illiterates, male-female ratio being almost equal and the highest illiteracy, that is 65.4 per cent is observed in age group 45+, number of females being higher than the number of males. Number of literates without any formal schooling including education level is very little - 17,858 for males and 11,361 for females are the figures for the district and likewise number of graduates and above is also very little i.e. only 3.3 per cent of the total literate population.

ANNEXURE - VIII

Distribution of different mother tongues in the district, 2001 Census

Language is an important characteristic of a population particularly in a multi-lingual and multi-cultural society like India. The language census literature that has grown over the last one hundred years of Indian census history has shed light on the linguistic composition of our country. The table below shows the population by mother tongue of the district since 1961. It is to be noted that mother tongues shown in 1971 Census are mother tongues inclusive of language grouped under each. Data shown in 1981 Census is the language mainly spoken in the households.

	(0.0)	(0.0)	(0.0)	(0.0)	(0.0)	(0.5)	

The above table shows population by mother tongue for Maldah district since 1961. It is seen that 88.1 per cent of the total population of Maldah district is Bengali by mother tongue as per 2001 census. Santali comes next with 4.5 per cent, followed by Khortha/ Khotta 4.4 per cent, Hindi 1.2 per cent and Bhojpuri 0.4 per cent. It is to be noted that among the first five major mother tongues of the district, Santali, Khortha/ Khotta and Bhojpuri happen to be three non-scheduled languages and they jointly contribute 9.3 per cent of the total district population.

Annexure -IX : Scheduled Castes and Scheduled Tribes Population - Size and Growth

The collection of population statistics on the Scheduled Castes and the Scheduled Tribes as per the state Scheduled Castes and Scheduled Tribes lists in the State is one of the most important aspects of decadal census in post independence period. These information are required for the purpose of delimitation of the Assembly and Parliamentary constituencies in the State. The planning for development of these communities is mostly considered on the information of population size and its growth rate, sex-ratio, literacy rate, economic activities etc. Census is the only source which provides data for Scheduled Castes and Scheduled Tribes on various aspects of their life at the micro level.

The district in 1991 Census returned 477,896 Scheduled Castes persons comprising of 247,369 males and 230,527 females accounting for 18.1 per cent of the total population of the district. Of this bulk of Scheduled Castes population 94.6 per cent were in rural areas and 5.4 per cent in urban areas of the district. In all 59 Scheduled Castes were reported and were scattered all over the district. The first four major castes in order of population size were the Rajbanshi, Namasudra, Bind and Chamar, Charmakar, Mochi etc. Together, these four castes constituted 50.9 per cent of the total Scheduled Castes population of the district. Among these Rajbanshi with 114,697 persons alone constituted 24.0 per cent of the total Scheduled Castes population of the district.

The literacy rate among Scheduled Castes was 33.9 per cent as against general literacy rate of 35.6 per cent in the district. 46.6 per cent of the males and 20.2 per cent of the females were literates among all Scheduled Castes.

The participation rate among Scheduled Castes was 36.6 per cent corresponding to 34.7 per cent in the general population. The Scheduled Caste workers in the district were mainly working as Agricultural Labourers (38.5 per cent) with the female proportion being substantially higher at 65.0 per cent compared to males.

Likewise, the district recorded 171,326 Scheduled Tribe persons comprising of 85,963 males and 85,363 females accounting 6.5 per cent of the district's total population. Of this bulk of scheduled tribes population 99.1 per cent were in the rural areas and 0.9 per cent only in urban areas of the district. In all 36 Scheduled Tribes out of 38 were reported in the district having scattered all over the district. The first four major tribes in order of population size were the Santal, Oraon, Kharwara and Kora. Together, these four tribes constituted 92.3 per cent of the total Scheduled Tribes population of the district. Among these four, Santal tribe with 133,807 population single handedly constituted 78.1 per cent of the total Scheduled Tribes population of the district.

The literacy rate among Scheduled Tribes was 15.8 per cent as against general literacy rate of 35.6 per cent in the district. 25.1 per cent of the males and 6.4 per cent of females were literates among all Scheduled Tribes.

The work participation rate among Scheduled Tribes was 51.7 per cent corresponding to 34.7 per cent in the general population. The Scheduled Tribes in the district were mainly working as Agricultural Labourers (54.6 per cent) with the female proportion being higher at 77.3 per cent compared to males.

As per 2001 Census, Maldah district has 554,165 Scheduled Castes population comprising of 284,726 males and 269,439 females accounting for 16.8 per cent of the total population of the district. Among the Scheduled Castes of the district, the first five major castes in order of population size are Rajbanshi with 144,158 persons (26.0 per cent), Namasudra with 101,444 persons (18.3 per cent), Bind with 30,303 persons (5.5 per cent), Jhalo Malo/Malo with 28,165 persons (5.1 per cent) and Paliya with 27,636 persons (5.0 per cent). These five major castes constitute 59.9 per cent of the total Scheduled Castes population of the district.

Further, the district has also recorded 227,047 Scheduled Tribe population comprising of 113,537 males and 113,510 females in 2001 Census acounting for 6.9 per cent of the total district population. Among these, the first five major tribes in order of population size are Santal with 146,723 persons (64.6 per cent), Oraon with 13,125 persons (5.8 per cent), Kharwar with 8,404 persons (3.7 per cent), Kora with 5,998 persons (2.6 per cent) and Munda with 4,901 persons (2.2 per cent). These five tribes constitute 78.9 per cent of the total Scheduled Tribe population of the district.

The distribution of rural and urban Scheduled Castes / Tribes population for Maldah district since 1961 can be observed in the following table :

ANNEXURE - IX
SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN THE DISTRICT OF MALDAH (1961-2001)

	1961		1971		1981		1991		2001	
T/R/U	SC	ST	SC	ST	SC	ST	SC	ST	SC	ST
Total	163,433	99,522	265,697	130,715	343,089	153,300	477,896	171,326	554,165	227,047
			(62.6)	(31.3)	(29.1)	(17.3)	(39.3)	(11.8)	(16.0)	(32.5)
Rural	159,396	99,419	261,938	130,658	334,015	153,077	452,275	169,807	518,987	224,698
			(64.3)	(31.4)	(27.5)	(17.2)	(35.4)	(10.9)	(14.8)	(32.3)
Urban	4,037	103	3,759	57	9,074	223	25,621	1,519	35,178	2,349
			(-6.9)	(-44.7)	(141.4)	(291.2)	(182.4)	(581.2)	(37.3)	(54.6)

Note : Figures within bracket indicate decennial growth rate

It will be seen from the above table that the proportion of Scheduled Castes population decreased from 62.6 in 1961-71 to 16.0 in 1991-2001. But, the Scheduled Tribes population increased from 31.3 to 32.5 points respectively during the same period. These fluctuating growth rates are certainly pointer to uneven character of the progress of Scheduled Castes and Scheduled Tribes population in the district. The rural sector follows almost the same trend as that of total, but in case of the urban sector, strange fluctuations observed. During 1961-71, both urban Scheduled Castes and Scheduled Tribes population declined by -6.9 per cent and -44.7 per cent respectively. This was followed by steep percentage increase during 1971-81 by 141.4 and 291.2 points respectively and this went up further by 182.4 and 581.2 points respectively during 1981-91. However sign of restoration of somewhat normal growth rate is seen during 1991-2001.

No. of children ever born per woman in the age group 45-49		5.6		4.6
Mean age at Marriage		16.8		17.2
Child woman ratio		94.8		71.1

Source : Fertility Tables - F Series, 1991 Census

The different fertility measures reveal higher levels of fertility in the district compared to state average in both 1981 and 1991. Lower literacy and relatively lower age at marriage of females in the district compared to the state average could be attributed to higher fertility in district.

ANNEXURE – III

Source : Occasional papers No. 1 of 1997

It is observed from the above table that GFR, GMFR, TFR, TMFR and CBR for the state as a whole are 122, 158, 3.61, 5.13 and 29.01 respectively. Maldah occupies the first position in terms of GFR, TFR and CBR whereas in case of GMFR and TMFR South 24 Parganas is in the first position. Lowest position for GFR and CBR goes to Kolkata whereas the same position occupies by Hugli for GMFR, TFR and TMFR. Number of children ever born per woman in age group 45-49 is maximum in Murshidabad with 5.72 which is much higher than the state average of 4.56 and the minimum number is observed in Kolkata. Child-woman ratio is highest in Murshidabad with 93.03 and Kolkata has the lowest with 37.22. State average mean age at marriage is maximum in Kolkata with 19.05 and Murshidabad with 16.49 is the minimum.

Annexure - IV

Percentage distribution of Migrants by place of birth, 2001 Census

Migration is an important aspect in the analysis of population change as it affects the size, age and sex structure of the population. However, it can affect the population size at local level only. In most general sense, migration as ordinarily defined movement of people from one place to another place involving change of residence for some definite purpose. Migration may be categorized as internal and international migration. A person moves from his/her place of birth last residence to a new place with some definite reason, it may be economic, social, political or for any other reason. The main source of information on migration of our country is collected through regular decennial census. In 2001 Census, data on migration were collected on different aspects, such as reason for migration from the place of previous residence, duration of stay since migration etc. Tables on migration by place of birth; interstate migration; rural and urban composition of internal migrants by place of birth in the district and in the State are given below.

ANNEXURE – IV (A)
PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH, 2001 CENSUS

Place of Birth	West Bengal			Maldah		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
A. Migrants born within the state of Enumeration	19,082,558 (77.4)	4,489,736 (60.0)	14,592,822 (84.9)	715,722 (83.1)	140,077 (68.5)	575,645 (87.6)
i) Migrants born elsewhere in the district of Enumeration	14,526,298 (58.9)	2,892,376 (38.7)	11,633,922 (67.7)	643,485 (74.7)	118,501 (57.9)	524,984 (79.9)
ii) Migrants born in other district of the State	4,556,260 (18.5)	1,597,360 (21.4)	2,958,900 (17.2)	72,237 (8.4)	21,576 (10.5)	50,661 (7.7)
B. Migrants born in other State of India	2,491,932 (10.1)	1,352,219 (18.1)	1,139,713 (6.6)	51,900 (6.0)	14,621 (7.1)	37,279 (5.7)
C. Migrants born in other countries	3,090,393 (12.5)	1,636,343 (21.9)	1,454,050 (8.5)	93,774 (10.9)	49,887 (24.4)	43,887 (6.7)
Total Migrants	**24,664,883 (100.0)**	**7,478,298 (100.0)**	**17,186,585 (100.0)**	**861,396 (100.0)**	**204,585 (100.0)**	**656,811 (100.0)**

It is observed from Annexure - IV (A) that out of 24,664,883 migrants in the State 77.4 per cent were born within the state of enumeration and out of them 58.9 per cent migrants were born elsewhere in district of enumeration. It is also observed from the state figures that out of the total migrants, 10.1 per cent and 12.5 per cent migrants are having place of birth in other state of India and in other countries respectively. The similar trend is found in the district of Maldah also. The females generally move within short distance and because of this fact the proportion of female migrants born elsewhere in the district of enumeration is abnormally higher than that of their male counterparts. Further, this remarkable high proportion of female migrants may be attributed to marriage migration.

ANNEXURE – IV (B)
INTERSTATE MIGRANTS TO WEST BENGAL AND DISTRICT, 2001 CENSUS

Place of Birth	Migrants			Percentage to total migrants		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
STATE - WEST BENGAL 19						
1. Bihar	1,160,593	708,591	452,002	46.6	52.4	39.7
2. Jharkhand	441,435	159,689	281,746	17.7	11.8	24.7
3. Uttar Pradesh	309,315	190,832	118,483	12.4	14.1	10.4
Total for three states	**1,911,343**	**1,059,112**	**852,231**	**76.7**	**78.3**	**74.8**
4. Other States	580,589	293,107	287,482	23.3	21.7	25.2
Total	**2,491,932**	**1,352,219**	**1,139,713**	**100.0**	**100.0**	**100.0**
MALDAH 06						
1. Bihar	36,571	9,310	27,261	70.5	63.7	73.1
2. Jharkhand	9,030	2,230	6,800	17.4	15.3	18.2
3. Uttar Pradesh	2,077	1,093	984	4.0	7.5	2.6
Total for three states	**47,678**	**12,633**	**35,045**	**91.9**	**86.4**	**94.0**
4. Other States	4,222	1,988	2,234	8.1	13.6	6.0
Total	**51,900**	**14,621**	**37,279**	**100.0**	**100.0**	**100.0**

The Annexure - IV (B) on interstate migrants shows that at 2001 Census out of the total interstate migrants 46.6 per cent had place of birth in Bihar, 17.7 per cent in Jharkhand, 12.4 per cent in Uttar Pradesh and 23.3 per cent had in other states in case of West Bengal whereas in the case of Maldah district out of the total migrants enumerated in the district, 70.5 per cent had place of birth in Bihar, 17.4 per cent in Jharkhand, 4.0 per cent in Uttar Pradesh and 8.1 per cent had in other states. This trend indicates that the major migration in case of interstate migrants had taken place from Bihar state for the state as a whole and also for the district of Maldah.

ANNEXURE – IV (C)
RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH, 2001 CENSUS

Place of Birth	Place of Enumeration					
	West Bengal			Maldah		
	Total	Rural	Urban	Total	Rural	Urban
1	3	4	5	6	7	8
1. Migrants born within the state of Enumeration	19,082,558	14,106,837	4,975,721	715,722	654,276	61,446
	(100.0)	(73.9)	(26.1)	(100.0)	(91.4)	(8.6)
2. Migrants born in other State of India	2,491,932	678,906	1,813,026	51,900	42,285	9,615
	(100.0)	(27.2)	(72.8)	(100.0)	(81.5)	(18.5)

The above table shows rural and urban composition of migrants by place of birth and by place of enumeration in 2001 Census of Maldah district. District table shows that major portion of migrants born within the state of enumeration have been enumerated in rural area (91.4 per cent) whereas the same figure for West Bengal is 73.9 per cent. In case of migrants born in other state of India, 81.5 per cent have been enumerated in rural area of Maldah district whereas the same is 27.2 per cent in case of West Bengal.

ANNEXURE – IV (D)

		(3.8)	(10.1)	(1.9)	(5.6)	(12.9)	(3.4)	(100.0)	(100.0)	(100.0)

It is seen from Annexure-IV(D) that in terms of total migrants in absolute figure, North 24 Parganas with 3,693,336 persons comes in first position followed by Medinipur with 2,709,165 persons and Barddhaman with 2,364,020 persons. In case of people born in West Bengal, 9 districts of the state overtake the state percentage of 77.4. So far people born in other states are concerned, 8 districts overtake the State average of 10.1 per cent and regarding people born in other district of West Bengal, only 6 districts overtake the State average of 18.5 per cent. The percentage of people born elsewhere in the district of enumeration varies between the maximum of 87.5 in Medinipur and the minimum of 38.7 in North 24 Parganas district. Similarly, the percentage of people born in other countries varies between the maximum of 33.9 in Nadia and the minimum of 0.2 in Puruliya district.

ANNEXURE - V

BRIEF ACCOUNT OF MAIN RELIGIONS IN THE STATE AND DISTRICT, 2001 CENSUS

Religious communities	Total	Rural	Urban	Per cent to all religions	Percent to total	
					Rural	Urban
1	2	3	4	5	6	7
WEST BENGAL-19						
All Religions	80,176,197	57,748,946	22,427,251	100.0	72.0	28.0
Hindus	58,104,835	39,406,984	18,697,851	72.5	67.8	32.2
Muslims	20,240,543	16,845,034	3,395,509	25.2	83.2	16.8
Christians	515,150	393,358	121,792	0.6	76.4	23.6
Sikhs	66,391	10,758	55,633	0.1	16.2	83.8
Buddhists	243,364	171,455	71,909	0.3	70.5	29.5
Jains	55,223	9,354	45,869	0.1	16.9	83.1
Others	895,796	875,354	20,442	1.1	97.7	2.3
Religion not stated	54,895	36,649	18,246	0.1	66.8	33.2
MALDAH-06						
All Religions	3,290,468	3,049,528	240,940	100.0	92.7	7.3
Hindus	1,621,468	1,407,962	213,506	49.3	86.8	13.2
Muslims	1,636,171	1,609,596	26,575	49.7	98.4	1.6
Christians	8,388	7,962	426	0.3	94.9	5.1
Sikhs	283	215	68	0.0	76.0	24.0
Buddhists	164	96	68	0.0	58.5	41.5
Jains	293	160	133	0.0	54.6	45.4
Others	22,350	22,288	62	0.7	99.7	0.3
Religion not stated	1,351	1,249	102	0.0	92.5	7.5

It is observed that in Maldah the Muslims occupy the first place with 49.7 per cent of the total population of the district, being closely followed by the Hindus with 49.3 per cent indicating that they are the two main religions of the district competing with each other in number. The competition is evident when it comes to rural sector where the Muslims with 98.4 per cent outnumber the Hindus with 86.8 per cent.

Annexure - VI

Marital Status of the population as per 2001 Census :

Information on sex and marital status of persons, particularly marital status of women population is very much important for measuring fertility rate by age group. Population of women belonging to currently married group is also important for measuring age specific marital fertility rate (ASMFR). A table classified by marital status, broad age group and sex of 1991 and 2001 is shown below :

ANNEXURE – VI (A)

PERCENTAGE DISTRIBUTION OF POPULATION CLASSIFIED BY MARITAL STATUS, BROAD AGE GROUP AND SEX, 1991-2001

Year	Age	Total	Marital Status							
			Never married		Married		Widowed		Divorced or Separated	
			Males	Females	Males	Females	Males	Females	Males	Females
1	2	3	4	5	6	7	8	9	10	11
1991	0-14	100.0	99.6	98.8	0.4	1.1	0.0	0.0	0.0	0.0
	15-34	100.0	51.8	18.8	47.6	78.1	0.4	1.6	0.3	1.5
	35-54	100.0	3.1	1.1	93.9	83.2	2.5	14.6	0.5	1.2
	55+	100.0	5.9	3.4	83.1	40.9	10.7	55.0	0.4	0.7
	All ages	100.0	59.3	48.5	39.1	43.9	1.4	6.9	0.2	0.8
2001	0-14	100.0	99.8	99.4	0.2	0.6	0.0	0.0	0.0	0.0
	15-34	100.0	50.8	19.6	48.7	77.7	0.2	1.4	0.2	1.3
	35-54	100.0	1.7	1.1	96.8	83.8	1.2	13.4	0.3	1.7
	55+	100.0	2.2	1.6	88.5	44.7	9.0	53.0	0.4	0.7
	All Ages	100.0	58.0	47.9	40.9	44.3	0.9	7.0	0.2	0.8

Note : Figures of age not stated are included in all ages. Unspecified Marital status is included in total population.

It is observed from the above table that the proportion of never married males and females in the age group 0-14 has slightly increased in 2001 over 1991 census, whereas the proportion of married (males and females) in the same age group has decreased over the same time period. Under the age-group 35-54 the proportion of married persons (both male and female) have increased in 2001 over 1991. A remarkable decrease in the percentage of never married males and females is observed in the age group of 55+, whereas the proportion of married males and females has significantly increased in the same age group in 2001 census. It is to be noted that the proportion of widowed males and females in the age group of 15-34, 35-54 and 55+ has reduced to a great extent, indicating a substantial decline in the mortality rate. Further, it is seen that the proportion of divorced/ separated females is also higher than the corresponding male population in both the census years. A table classified by marital status, broad age group, sex and residence has been shown in Annexure-VI (B) for Maldah district of 2001 Census.

It is observed that more than 41.0 per cent of the total population of Maldah district belong to 0-14 age group and naturally constitute the bulk of the never married as per 2001 census. Although none is found in the married status in 0-9 age group of the district, 1.1 per cent of 10-14 age group population of the district has been found married implying that child marriage still exists in the district. Number of females however being greater than the males. The highest number of married are found in 25-29 female age group (130,979) and in 30-34 male age group (112,053) indicating that gradually late marriage is being preferred by both the sexes. A pointer to mortality is the number of female widowed which is more than eight times of the male widowed and it is highest for male in the 70-74 age group (2,189) and for female in 60-64 age group (18,345). The number of divorced or separated females is also higher than the number of males in most of the age groups.

Age not stated	213	132	157	100	88	45	40	15	0	0	2	1	38	16

It is seen that in none of the sub-levels of literacy of Maldah district, the females have been able to catch up the males in number in 2001 census. More than 50.0 per cent of the total populations of Maldah district are literates, excluding 0-6 age group and numbers of literate males (801,770) are much higher than the number of females (530,934) as per absolute figures. It is noteworthy to mention that 42.7 per cent of the age group 7-10 still remain illiterates, male-female ratio being almost equal and the highest illiteracy, that is 65.4 per cent is observed in age group 45+, number of females being higher than the number of males. Number of literates without any formal schooling including education level is very little - 17,858 for males and 11,361 for females are the figures for the district and likewise number of graduates and above is also very little i.e. only 3.3 per cent of the total literate population.

ANNEXURE - VIII

Distribution of different mother tongues in the district, 2001 Census

Language is an important characteristic of a population particularly in a multi-lingual and multi-cultural society like India. The language census literature that has grown over the last one hundred years of Indian census history has shed light on the linguistic composition of our country. The table below shows the population by mother tongue of the district since 1961. It is to be noted that mother tongues shown in 1971 Census are mother tongues inclusive of language grouped under each. Data shown in 1981 Census is the language mainly spoken in the households.

ANNEXURE - VIII

POPULATION BY MOTHER TONGUE IN THE DISTRICT OF MALDAH (1961-2001)

	(0.0)	(0.0)	(0.0)	(0.0)	(0.0)	(0.5)	

The above table shows population by mother tongue for Maldah district since 1961. It is seen that 88.1 per cent of the total population of Maldah district is Bengali by mother tongue as per 2001 census. Santali comes next with 4.5 per cent, followed by Khortha/ Khotta 4.4 per cent, Hindi 1.2 per cent and Bhojpuri 0.4 per cent. It is to be noted that among the first five major mother tongues of the district, Santali, Khortha/ Khotta and Bhojpuri happen to be three non-scheduled languages and they jointly contribute 9.3 per cent of the total district population.

Annexure -IX : Scheduled Castes and Scheduled Tribes Population - Size and Growth

The collection of population statistics on the Scheduled Castes and the Scheduled Tribes as per the state Scheduled Castes and Scheduled Tribes lists in the State is one of the most important aspects of decadal census in post independence period. These information are required for the purpose of delimitation of the Assembly and Parliamentary constituencies in the State. The planning for development of these communities is mostly considered on the information of population size and its growth rate, sex-ratio, literacy rate, economic activities etc. Census is the only source which provides data for Scheduled Castes and Scheduled Tribes on various aspects of their life at the micro level.

The district in 1991 Census returned 477,896 Scheduled Castes persons comprising of 247,369 males and 230,527 females accounting for 18.1 per cent of the total population of the district. Of this bulk of Scheduled Castes population 94.6 per cent were in rural areas and 5.4 per cent in urban areas of the district. In all 59 Scheduled Castes were reported and were scattered all over the district. The first four major castes in order of population size were the Rajbanshi, Namasudra, Bind and Chamar, Charmakar, Mochi etc. Together, these four castes constituted 50.9 per cent of the total Scheduled Castes population of the district. Among these Rajbanshi with 114,697 persons alone constituted 24.0 per cent of the total Scheduled Castes population of the district.

The literacy rate among Scheduled Castes was 33.9 per cent as against general literacy rate of 35.6 per cent in the district. 46.6 per cent of the males and 20.2 per cent of the females were literates among all Scheduled Castes.

The participation rate among Scheduled Castes was 36.6 per cent corresponding to 34.7 per cent in the general population. The Scheduled Caste workers in the district were mainly working as Agricultural Labourers (38.5 per cent) with the female proportion being substantially higher at 65.0 per cent compared to males.

Likewise, the district recorded 171,326 Scheduled Tribe persons comprising of 85,963 males and 85,363 females accounting 6.5 per cent of the district's total population. Of this bulk of scheduled tribes population 99.1 per cent were in the rural areas and 0.9 per cent only in urban areas of the district. In all 36 Scheduled Tribes out of 38 were reported in the district having scattered all over the district. The first four major tribes in order of population size were the Santal, Oraon, Kharwara and Kora. Together, these four tribes constituted 92.3 per cent of the total Scheduled Tribes population of the district. Among these four, Santal tribe with 133,807 population single handedly constituted 78.1 per cent of the total Scheduled Tribes population of the district.

The literacy rate among Scheduled Tribes was 15.8 per cent as against general literacy rate of 35.6 per cent in the district. 25.1 per cent of the males and 6.4 per cent of females were literates among all Scheduled Tribes.

The work participation rate among Scheduled Tribes was 51.7 per cent corresponding to 34.7 per cent in the general population. The Scheduled Tribes in the district were mainly working as Agricultural Labourers (54.6 per cent) with the female proportion being higher at 77.3 per cent compared to males.

As per 2001 Census, Maldah district has 554,165 Scheduled Castes population comprising of 284,726 males and 269,439 females accounting for 16.8 per cent of the total population of the district. Among the Scheduled Castes of the district, the first five major castes in order of population size are Rajbanshi with 144,158 persons (26.0 per cent), Namasudra with 101,444 persons (18.3 per cent), Bind with 30,303 persons (5.5 per cent), Jhalo Malo/Malo with 28,165 persons (5.1 per cent) and Paliya with 27,636 persons (5.0 per cent). These five major castes constitute 59.9 per cent of the total Scheduled Castes population of the district.

Further, the district has also recorded 227,047 Scheduled Tribe population comprising of 113,537 males and 113,510 females in 2001 Census acounting for 6.9 per cent of the total district population. Among these, the first five major tribes in order of population size are Santal with 146,723 persons (64.6 per cent), Oraon with 13,125 persons (5.8 per cent), Kharwar with 8,404 persons (3.7 per cent), Kora with 5,998 persons (2.6 per cent) and Munda with 4,901 persons (2.2 per cent). These five tribes constitute 78.9 per cent of the total Scheduled Tribe population of the district.

The distribution of rural and urban Scheduled Castes / Tribes population for Maldah district since 1961 can be observed in the following table :

ANNEXURE - IX
SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN THE DISTRICT OF MALDAH (1961-2001)

	1961		1971		1981		1991		2001	
T/R/U	SC	ST	SC	ST	SC	ST	SC	ST	SC	ST
Total	163,433	99,522	265,697	130,715	343,089	153,300	477,896	171,326	554,165	227,047
			(62.6)	(31.3)	(29.1)	(17.3)	(39.3)	(11.8)	(16.0)	(32.5)
Rural	159,396	99,419	261,938	130,658	334,015	153,077	452,275	169,807	518,987	224,698
			(64.3)	(31.4)	(27.5)	(17.2)	(35.4)	(10.9)	(14.8)	(32.3)
Urban	4,037	103	3,759	57	9,074	223	25,621	1,519	35,178	2,349
			(-6.9)	(-44.7)	(141.4)	(291.2)	(182.4)	(581.2)	(37.3)	(54.6)

Note : Figures within bracket indicate decennial growth rate

It will be seen from the above table that the proportion of Scheduled Castes population decreased from 62.6 in 1961-71 to 16.0 in 1991-2001. But, the Scheduled Tribes population increased from 31.3 to 32.5 points respectively during the same period. These fluctuating growth rates are certainly pointer to uneven character of the progress of Scheduled Castes and Scheduled Tribes population in the district. The rural sector follows almost the same trend as that of total, but in case of the urban sector, strange fluctuations observed. During 1961-71, both urban Scheduled Castes and Scheduled Tribes population declined by -6.9 per cent and -44.7 per cent respectively. This was followed by steep percentage increase during 1971-81 by 141.4 and 291.2 points respectively and this went up further by 182.4 and 581.2 points respectively during 1981-91. However sign of restoration of somewhat normal growth rate is seen during 1991-2001.

Annexure

Mortality :

Apart from fertility and migration, mortality is also considered as the dynamics of population change demography. In census, information on the questions on children ever born and children surviving is collected from all ever married women. From this, estimates of child mortality have been worked out by age of mother by using Brass technique. The table below shows the estimates of child mortality in 1991 in the district of Maldah.

Annexure – II (C)
Estimate of Child Mortality, 1981-91
in the district of Maldah

Mortality Level	Census Year	Maldah			West Bengal		
		P	M	F	P	M	F
q_1	1981	128	134	120	95	103	57
	1991	96	96	95	62	75	51
q_2	1981	145	150	140	102	106	98
	1991	122	112	125	81	79	83
q_3	1981	155	154	157	111	113	110
	1991	127	115	134	86	86	85
q_5	1981	172	169	175	124	123	125
	1991	140	130	150	94	94	92

Source : Occasional papers no. 1 of 1997)

From the indirect estimates of child mortality the level of mortality at ages 1, 2, 3 and 5 has given above as q_1, q_2, q_3 and q_5. In q_3 and q_5 both in 1981 and 1991 female mortality is higher than their male counterparts whereas in q_1 male mortality is higher in the district. However, incase of q_2 for males it was higher in 1981 than the female mortality level but in 1991 the situation is reversed. It is noticed that the mortality level in the district was higher for both the sexes at ages 1, 2, 3 and 5 in 1981 and 1991 as compared to the corresponding figure of the state. This shows the poor health status prevailing in the population of the district. Another table on fertility of all districts of the State is shown in Annexure–III (D).

State / District	GFR	GMFR	TFR	TMFR	CBR	Number of children ever born per woman in age group 45-49	Child-Woman Ratio	Mean age at Marriage
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
13. Medinipur	130	165	3.7	5.1	30.9	5.0	74.1	16.8
14. Bankura	117	151	3.5	4.9	28.3	4.1	68.6	16.8
15. Puruliya	130	160	4.1	5.1	31.0	3.9	78.1	16.7
16. Barddhaman	120	152	3.6	5.1	29.0	4.2	66.8	17.2
17. Birbhum	131	161	3.8	5.1	31.3	4.6	79.0	16.9

Source : Occasional papers No. 1 of 1997

It is observed from the above table that GFR, GMFR, TFR, TMFR and CBR for the state as a whole are 122, 158, 3.61, 5.13 and 29.01 respectively. Maldah occupies the first position in terms of GFR, TFR and CBR whereas in case of GMFR and TMFR South 24 Parganas is in the first position. Lowest position for GFR and CBR goes to Kolkata whereas the same position occupies by Hugli for GMFR, TFR and TMFR. Number of children ever born per woman in age group 45-49 is maximum in Murshidabad with 5.72 which is much higher than the state average of 4.56 and the minimum number is observed in Kolkata. Child-woman ratio is highest in Murshidabad with 93.03 and Kolkata has the lowest with 37.22. State average mean age at marriage is maximum in Kolkata with 19.05 and Murshidabad with 16.49 is the minimum.

Annexure - IV

Percentage distribution of Migrants by place of birth, 2001 Census

Migration is an important aspect in the analysis of population change as it affects the size, age and sex structure of the population. However, it can affect the population size at local level only. In most general sense, migration as ordinarily defined movement of people from one place to another place involving change of residence for some definite purpose. Migration may be categorized as internal and international migration. A person moves from his/her place of birth last residence to a new place with some definite reason, it may be economic, social, political or for any other reason. The main source of information on migration of our country is collected through regular decennial census. In 2001 Census, data on migration were collected on different aspects, such as reason for migration from the place of previous residence, duration of stay since migration etc. Tables on migration by place of birth; interstate migration; rural and urban composition of internal migrants by place of birth in the district and in the State are given below.

ANNEXURE – IV (A)
PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH, 2001 CENSUS

Place of Birth	West Bengal			Maldah		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
A. Migrants born within the state of Enumeration	19,082,558 (77.4)	4,489,736 (60.0)	14,592,822 (84.9)	715,722 (83.1)	140,077 (68.5)	575,645 (87.6)
i) Migrants born elsewhere in the district of Enumeration	14,526,298 (58.9)	2,892,376 (38.7)	11,633,922 (67.7)	643,485 (74.7)	118,501 (57.9)	524,984 (79.9)
ii) Migrants born in other district of the State	4,556,260 (18.5)	1,597,360 (21.4)	2,958,900 (17.2)	72,237 (8.4)	21,576 (10.5)	50,661 (7.7)
B. Migrants born in other State of India	2,491,932 (10.1)	1,352,219 (18.1)	1,139,713 (6.6)	51,900 (6.0)	14,621 (7.1)	37,279 (5.7)
C. Migrants born in other countries	3,090,393 (12.5)	1,636,343 (21.9)	1,454,050 (8.5)	93,774 (10.9)	49,887 (24.4)	43,887 (6.7)
Total Migrants	**24,664,883 (100.0)**	**7,478,298 (100.0)**	**17,186,585 (100.0)**	**861,396 (100.0)**	**204,585 (100.0)**	**656,811 (100.0)**

It is observed from Annexure - IV (A) that out of 24,664,883 migrants in the State 77.4 per cent were born within the state of enumeration and out of them 58.9 per cent migrants were born elsewhere in district of enumeration. It is also observed from the state figures that out of the total migrants, 10.1 per cent and 12.5 per cent migrants are having place of birth in other state of India and in other countries respectively. The similar trend is found in the district of Maldah also. The females generally move within short distance and because of this fact the proportion of female migrants born elsewhere in the district of enumeration is abnormally higher than that of their male counterparts. Further, this remarkable high proportion of female migrants may be attributed to marriage migration.

ANNEXURE – IV (B)
INTERSTATE MIGRANTS TO WEST BENGAL AND DISTRICT, 2001 CENSUS

Place of Birth	Migrants			Percentage to total migrants		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
STATE - WEST BENGAL 19						
1. Bihar	1,160,593	708,591	452,002	46.6	52.4	39.7
2. Jharkhand	441,435	159,689	281,746	17.7	11.8	24.7
3. Uttar Pradesh	309,315	190,832	118,483	12.4	14.1	10.4
Total for three states	**1,911,343**	**1,059,112**	**852,231**	**76.7**	**78.3**	**74.8**
4. Other States	580,589	293,107	287,482	23.3	21.7	25.2
Total	**2,491,932**	**1,352,219**	**1,139,713**	**100.0**	**100.0**	**100.0**
MALDAH 06						
1. Bihar	36,571	9,310	27,261	70.5	63.7	73.1
2. Jharkhand	9,030	2,230	6,800	17.4	15.3	18.2
3. Uttar Pradesh	2,077	1,093	984	4.0	7.5	2.6
Total for three states	**47,678**	**12,633**	**35,045**	**91.9**	**86.4**	**94.0**
4. Other States	4,222	1,988	2,234	8.1	13.6	6.0
Total	**51,900**	**14,621**	**37,279**	**100.0**	**100.0**	**100.0**

The Annexure - IV (B) on interstate migrants shows that at 2001 Census out of the total interstate migrants 46.6 per cent had place of birth in Bihar, 17.7 per cent in Jharkhand, 12.4 per cent in Uttar Pradesh and 23.3 per cent had in other states in case of West Bengal whereas in the case of Maldah district out of the total migrants enumerated in the district, 70.5 per cent had place of birth in Bihar, 17.4 per cent in Jharkhand, 4.0 per cent in Uttar Pradesh and 8.1 per cent had in other states. This trend indicates that the major migration in case of interstate migrants had taken place from Bihar state for the state as a whole and also for the district of Maldah.

ANNEXURE – IV (C)
RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH, 2001 CENSUS

Place of Birth	Place of Enumeration					
	West Bengal			Maldah		
	Total	Rural	Urban	Total	Rural	Urban
1	3	4	5	6	7	8
1. Migrants born within the state of Enumeration	19,082,558	14,106,837	4,975,721	715,722	654,276	61,446
	(100.0)	(73.9)	(26.1)	(100.0)	(91.4)	(8.6)
2. Migrants born in other State of India	2,491,932	678,906	1,813,026	51,900	42,285	9,615
	(100.0)	(27.2)	(72.8)	(100.0)	(81.5)	(18.5)

The above table shows rural and urban composition of migrants by place of birth and by place of enumeration in 2001 Census of Maldah district. District table shows that major portion of migrants born within the state of enumeration have been enumerated in rural area (91.4 per cent) whereas the same figure for West Bengal is 73.9 per cent. In case of migrants born in other state of India, 81.5 per cent have been enumerated in rural area of Maldah district whereas the same is 27.2 per cent in case of West Bengal.

ANNEXURE – IV (D)

PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF LAST RESIDENCE, 2001 CENSUS

Sl. No.	State /District	Born elsewhere in the district of enumeration			Born in other district of West Bengal			Born in West Bengal

It is seen from Annexure-IV(D) that in terms of total migrants in absolute figure, North 24 Parganas with 3,693,336 persons comes in first position followed by Medinipur with 2,709,165 persons and Barddhaman with 2,364,020 persons. In case of people born in West Bengal, 9 districts of the state overtake the state percentage of 77.4. So far people born in other states are concerned, 8 districts overtake the State average of 10.1 per cent and regarding people born in other district of West Bengal, only 6 districts overtake the State average of 18.5 per cent. The percentage of people born elsewhere in the district of enumeration varies between the maximum of 87.5 in Medinipur and the minimum of 38.7 in North 24 Parganas district. Similarly, the percentage of people born in other countries varies between the maximum of 33.9 in Nadia and the minimum of 0.2 in Puruliya district.

ANNEXURE - V

BRIEF ACCOUNT OF MAIN RELIGIONS IN THE STATE AND DISTRICT, 2001 CENSUS

Religious communities	Total	Rural	Urban	Per cent to all religions	Percent to total	
					Rural	Urban
1	2	3	4	5	6	7
WEST BENGAL-19						
All Religions	80,176,197	57,748,946	22,427,251	100.0	72.0	28.0
Hindus	58,104,835	39,406,984	18,697,851	72.5	67.8	32.2
Muslims	20,240,543	16,845,034	3,395,509	25.2	83.2	16.8
Christians	515,150	393,358	121,792	0.6	76.4	23.6
Sikhs	66,391	10,758	55,633	0.1	16.2	83.8
Buddhists	243,364	171,455	71,909	0.3	70.5	29.5
Jains	55,223	9,354	45,869	0.1	16.9	83.1
Others	895,796	875,354	20,442	1.1	97.7	2.3
Religion not stated	54,895	36,649	18,246	0.1	66.8	33.2
MALDAH-06						
All Religions	3,290,468	3,049,528	240,940	100.0	92.7	7.3
Hindus	1,621,468	1,407,962	213,506	49.3	86.8	13.2
Muslims	1,636,171	1,609,596	26,575	49.7	98.4	1.6
Christians	8,388	7,962	426	0.3	94.9	5.1
Sikhs	283	215	68	0.0	76.0	24.0
Buddhists	164	96	68	0.0	58.5	41.5
Jains	293	160	133	0.0	54.6	45.4
Others	22,350	22,288	62	0.7	99.7	0.3
Religion not stated	1,351	1,249	102	0.0	92.5	7.5

It is observed that in Maldah the Muslims occupy the first place with 49.7 per cent of the total population of the district, being closely followed by the Hindus with 49.3 per cent indicating that they are the two main religions of the district competing with each other in number. The competition is evident when it comes to rural sector where the Muslims with 98.4 per cent outnumber the Hindus with 86.8 per cent.

Annexure - VI

Marital Status of the population as per 2001 Census :

Information on sex and marital status of persons, particularly marital status of women population is very much important for measuring fertility rate by age group. Population of women belonging to currently married group is also important for measuring age specific marital fertility rate (ASMFR). A table classified by marital status, broad age group and sex of 1991 and 2001 is shown below :

ANNEXURE – VI (A)

PERCENTAGE DISTRIBUTION OF POPULATION CLASSIFIED BY MARITAL STATUS, BROAD AGE GROUP AND SEX, 1991-2001

Year	Age	Total	Marital Status							
			Never married		Married		Widowed		Divorced or Separated	
			Males	Females	Males	Females	Males	Females	Males	Females
1	2	3	4	5	6	7	8	9	10	11
1991	0-14	100.0	99.6	98.8	0.4	1.1	0.0	0.0	0.0	0.0
	15-34	100.0	51.8	18.8	47.6	78.1	0.4	1.6	0.3	1.5
	35-54	100.0	3.1	1.1	93.9	83.2	2.5	14.6	0.5	1.2
	55+	100.0	5.9	3.4	83.1	40.9	10.7	55.0	0.4	0.7
	All ages	100.0	59.3	48.5	39.1	43.9	1.4	6.9	0.2	0.8
2001	0-14	100.0	99.8	99.4	0.2	0.6	0.0	0.0	0.0	0.0
	15-34	100.0	50.8	19.6	48.7	77.7	0.2	1.4	0.2	1.3
	35-54	100.0	1.7	1.1	96.8	83.8	1.2	13.4	0.3	1.7
	55+	100.0	2.2	1.6	88.5	44.7	9.0	53.0	0.4	0.7
	All Ages	100.0	58.0	47.9	40.9	44.3	0.9	7.0	0.2	0.8

Note : Figures of age not stated are included in all ages. Unspecified Marital status is included in total population.

It is observed from the above table that the proportion of never married males and females in the age group 0-14 has slightly increased in 2001 over 1991 census, whereas the proportion of married (males and females) in the same age group has decreased over the same time period. Under the age-group 35-54 the proportion of married persons (both male and female) have increased in 2001 over 1991. A remarkable decrease in the percentage of never married males and females is observed in the age group of 55+, whereas the proportion of married males and females has significantly increased in the same age group in 2001 census. It is to be noted that the proportion of widowed males and females in the age group of 15-34, 35-54 and 55+ has reduced to a great extent, indicating a substantial decline in the mortality rate. Further, it is seen that the proportion of divorced/ separated females is also higher than the corresponding male population in both the census years. A table classified by marital status, broad age group, sex and residence has been shown in Annexure-VI (B) for Maldah district of 2001 Census.

It is observed that more than 41.0 per cent of the total population of Maldah district belong to 0-14 age group and naturally constitute the bulk of the never married as per 2001 census. Although none is found in the married status in 0-9 age group of the district, 1.1 per cent of 10-14 age group population of the district has been found married implying that child marriage still exists in the district. Number of females however being greater than the males. The highest number of married are found in 25-29 female age group (130,979) and in 30-34 male age group (112,053) indicating that gradually late marriage is being preferred by both the sexes. A pointer to mortality is the number of female widowed which is more than eight times of the male widowed and it is highest for male in the 70-74 age group (2,189) and for female in 60-64 age group (18,345). The number of divorced or separated females is also higher than the number of males in most of the age groups.

It is seen that in none of the sub-levels of literacy of Maldah district, the females have been able to catch up the males in number in 2001 census. More than 50.0 per cent of the total populations of Maldah district are literates, excluding 0-6 age group and numbers of literate males (801,770) are much higher than the number of females (530,934) as per absolute figures. It is noteworthy to mention that 42.7 per cent of the age group 7-10 still remain illiterates, male-female ratio being almost equal and the highest illiteracy, that is 65.4 per cent is observed in age group 45+, number of females being higher than the number of males. Number of literates without any formal schooling including education level is very little - 17,858 for males and 11,361 for females are the figures for the district and likewise number of graduates and above is also very little i.e. only 3.3 per cent of the total literate population.

ANNEXURE - VIII

Distribution of different mother tongues in the district, 2001 Census

Language is an important characteristic of a population particularly in a multi-lingual and multi-cultural society like India. The language census literature that has grown over the last one hundred years of Indian census history has shed light on the linguistic composition of our country. The table below shows the population by mother tongue of the district since 1961. It is to be noted that mother tongues shown in 1971 Census are mother tongues inclusive of language grouped under each. Data shown in 1981 Census is the language mainly spoken in the households.

The above table shows population by mother tongue for Maldah district since 1961. It is seen that 88.1 per cent of the total population of Maldah district is Bengali by mother tongue as per 2001 census. Santali comes next with 4.5 per cent, followed by Khortha/ Khotta 4.4 per cent, Hindi 1.2 per cent and Bhojpuri 0.4 per cent. It is to be noted that among the first five major mother tongues of the district, Santali, Khortha/ Khotta and Bhojpuri happen to be three non-scheduled languages and they jointly contribute 9.3 per cent of the total district population.

Annexure -IX : Scheduled Castes and Scheduled Tribes Population - Size and Growth

The collection of population statistics on the Scheduled Castes and the Scheduled Tribes as per the state Scheduled Castes and Scheduled Tribes lists in the State is one of the most important aspects of decadal census in post independence period. These information are required for the purpose of delimitation of the Assembly and Parliamentary constituencies in the State. The planning for development of these communities is mostly considered on the information of population size and its growth rate, sex-ratio, literacy rate, economic activities etc. Census is the only source which provides data for Scheduled Castes and Scheduled Tribes on various aspects of their life at the micro level.

The district in 1991 Census returned 477,896 Scheduled Castes persons comprising of 247,369 males and 230,527 females accounting for 18.1 per cent of the total population of the district. Of this bulk of Scheduled Castes population 94.6 per cent were in rural areas and 5.4 per cent in urban areas of the district. In all 59 Scheduled Castes were reported and were scattered all over the district. The first four major castes in order of population size were the Rajbanshi, Namasudra, Bind and Chamar, Charmakar, Mochi etc. Together, these four castes constituted 50.9 per cent of the total Scheduled Castes population of the district. Among these Rajbanshi with 114,697 persons alone constituted 24.0 per cent of the total Scheduled Castes population of the district.

The literacy rate among Scheduled Castes was 33.9 per cent as against general literacy rate of 35.6 per cent in the district. 46.6 per cent of the males and 20.2 per cent of the females were literates among all Scheduled Castes.

The participation rate among Scheduled Castes was 36.6 per cent corresponding to 34.7 per cent in the general population. The Scheduled Caste workers in the district were mainly working as Agricultural Labourers (38.5 per cent) with the female proportion being substantially higher at 65.0 per cent compared to males.

Likewise, the district recorded 171,326 Scheduled Tribe persons comprising of 85,963 males and 85,363 females accounting 6.5 per cent of the district's total population. Of this bulk of scheduled tribes population 99.1 per cent were in the rural areas and 0.9 per cent only in urban areas of the district. In all 36 Scheduled Tribes out of 38 were reported in the district having scattered all over the district. The first four major tribes in order of population size were the Santal, Oraon, Kharwara and Kora. Together, these four tribes constituted 92.3 per cent of the total Scheduled Tribes population of the district. Among these four, Santal tribe with 133,807 population single handedly constituted 78.1 per cent of the total Scheduled Tribes population of the district.

The literacy rate among Scheduled Tribes was 15.8 per cent as against general literacy rate of 35.6 per cent in the district. 25.1 per cent of the males and 6.4 per cent of females were literates among all Scheduled Tribes.

The work participation rate among Scheduled Tribes was 51.7 per cent corresponding to 34.7 per cent in the general population. The Scheduled Tribes in the district were mainly working as Agricultural Labourers (54.6 per cent) with the female proportion being higher at 77.3 per cent compared to males.

As per 2001 Census, Maldah district has 554,165 Scheduled Castes population comprising of 284,726 males and 269,439 females accounting for 16.8 per cent of the total population of the district. Among the Scheduled Castes of the district, the first five major castes in order of population size are Rajbanshi with 144,158 persons (26.0 per cent), Namasudra with 101,444 persons (18.3 per cent), Bind with 30,303 persons (5.5 per cent), Jhalo Malo/Malo with 28,165 persons (5.1 per cent) and Paliya with 27,636 persons (5.0 per cent). These five major castes constitute 59.9 per cent of the total Scheduled Castes population of the district.

Further, the district has also recorded 227,047 Scheduled Tribe population comprising of 113,537 males and 113,510 females in 2001 Census acounting for 6.9 per cent of the total district population. Among these, the first five major tribes in order of population size are Santal with 146,723 persons (64.6 per cent), Oraon with 13,125 persons (5.8 per cent), Kharwar with 8,404 persons (3.7 per cent), Kora with 5,998 persons (2.6 per cent) and Munda with 4,901 persons (2.2 per cent). These five tribes constitute 78.9 per cent of the total Scheduled Tribe population of the district.

The distribution of rural and urban Scheduled Castes / Tribes population for Maldah district since 1961 can be observed in the following table :

ANNEXURE - IX
SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN THE DISTRICT OF MALDAH (1961-2001)

	1961		1971		1981		1991		2001	
T/R/U	SC	ST	SC	ST	SC	ST	SC	ST	SC	ST
Total	163,433	99,522	265,697	130,715	343,089	153,300	477,896	171,326	554,165	227,047
			(62.6)	(31.3)	(29.1)	(17.3)	(39.3)	(11.8)	(16.0)	(32.5)
Rural	159,396	99,419	261,938	130,658	334,015	153,077	452,275	169,807	518,987	224,698
			(64.3)	(31.4)	(27.5)	(17.2)	(35.4)	(10.9)	(14.8)	(32.3)
Urban	4,037	103	3,759	57	9,074	223	25,621	1,519	35,178	2,349
			(-6.9)	(-44.7)	(141.4)	(291.2)	(182.4)	(581.2)	(37.3)	(54.6)

Note : Figures within bracket indicate decennial growth rate

It will be seen from the above table that the proportion of Scheduled Castes population decreased from 62.6 in 1961-71 to 16.0 in 1991-2001. But, the Scheduled Tribes population increased from 31.3 to 32.5 points respectively during the same period. These fluctuating growth rates are certainly pointer to uneven character of the progress of Scheduled Castes and Scheduled Tribes population in the district. The rural sector follows almost the same trend as that of total, but in case of the urban sector, strange fluctuations observed. During 1961-71, both urban Scheduled Castes and Scheduled Tribes population declined by -6.9 per cent and -44.7 per cent respectively. This was followed by steep percentage increase during 1971-81 by 141.4 and 291.2 points respectively and this went up further by 182.4 and 581.2 points respectively during 1981-91. However sign of restoration of somewhat normal growth rate is seen during 1991-2001.

Source : Occasional Papers No. 1 of 1997

It is observed from the above table that GFR, GMFR, TFR, TMFR and CBR for the State as a whole are 122, 158, 3.61, 5.13 and 29.01 respectively. Maldah occupies the first position in terms of GFR, TFR and CBR whereas in case of GMFR and TMFR South 24 Parganas is in the first position. Lowest position for GFR and CBR goes to Kolkata whereas the same position occupies by Hugli for GMFR, TFR and TMFR. Number of children ever borm per woman in age group 45-49 is maximum in Murshidabad with 5.72 which is much higher than the State average of 4.56 and the minimum number is observed in Kolkata. Child-woman ratio is highest in Murshidabad with 93.03 and Kolkata has the lowest with 37.22. State average mean age at marriage is 17.2. Mean age at marriage is maximum in Kolkata with 19.05 and Murshidabad with 16.49 is the minimum.

ANNEXURE – IV (A)

PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH, 2001 CENSUS

Place of Birth	West Bengal			Uttar Dinajpur		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
A. Migrants born within the state of Enumeration	19,082,558	4,489,736	14,592,822	445,608	91,204	354,404
	(77.4)	(60.0)	(84.9)	(71.3)	(52.2)	(78.7)
i) Migrants born elsewhere in the district of Enumeration	14,526,298	2,892,376	11,633,922	338,438	52,425	286,013
	(58.9)	(38.7)	(67.7)	(54.1)	(30.0)	(63.5)
ii) Migrants born in other district of the State	4,556,260	1,597,360	2,958,900	107,170	38,779	68,391
	(18.5)	(21.4)	(17.2)	(17.1)	(22.2)	(15.2)
B. Migrants born in other State of India	2,491,932	1,352,219	1,139,713	66,039	22,334	43,705
	(10.1)	(18.1)	(6.6)	(10.6)	(12.8)	(9.7)
C. Migrants born in other countries	3,090,393	1,636,343	1,454,050	113,576	61,145	52,431
	(12.5)	(21.9)	(8.5)	(18.2)	(35.0)	(11.6)
Total Migrants	**24,664,883**	**7,478,298**	**17,186,585**	**625,223**	**174,683**	**450,540**
	(100.0)	**(100.0)**	**(100.0)**	**(100.0)**	**(100.0)**	**(100.0)**

It is seen from table IV(A) that out of total migrants in the district, 71.3 per cent migrants were born within the State of enumeration, 10.6 per cent and 18.2 per cent migrants had their places of birth in other States of India and other countries respectively. Similar trend has been observed in the table pertaining to State. The female proportion of the migrants born within the State of enumeration is higher than males in respect of both the district and State.

ANNEXURE – IV (B)

Annexure - IV

Percentage distribution of Migrants by place of birth, 2001 Census

Migration is an important aspect in the analysis of population change as it affects the size, age and sex structure of the population. However, it can affect the population size at local level only. In most general sense, migration as ordinarily defined movement of people from one place to another place involving change of residence for some definite purpose. Migration may be categorized as internal and international migration. A person moves from his/her place of birth last residence to a new place with some definite reason, it may be economic, social, political or for any other reason. The main source of information on migration of our country is collected through regular decennial census. In 2001 Census, data on migration were collected on different aspects, such as reason for migration from the place of previous residence, duration of stay since migration etc. Tables on migration by place of birth; interstate migration; rural and urban composition of internal migrants by place of birth in the district and in the State are given below.

ANNEXURE – IV (A)
PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH, 2001 CENSUS

Place of Birth	West Bengal			Maldah		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
A. Migrants born within the state of Enumeration	19,082,558 (77.4)	4,489,736 (60.0)	14,592,822 (84.9)	715,722 (83.1)	140,077 (68.5)	575,645 (87.6)
i) Migrants born elsewhere in the district of Enumeration	14,526,298 (58.9)	2,892,376 (38.7)	11,633,922 (67.7)	643,485 (74.7)	118,501 (57.9)	524,984 (79.9)
ii) Migrants born in other district of the State	4,556,260 (18.5)	1,597,360 (21.4)	2,958,900 (17.2)	72,237 (8.4)	21,576 (10.5)	50,661 (7.7)
B. Migrants born in other State of India	2,491,932 (10.1)	1,352,219 (18.1)	1,139,713 (6.6)	51,900 (6.0)	14,621 (7.1)	37,279 (5.7)
C. Migrants born in other countries	3,090,393 (12.5)	1,636,343 (21.9)	1,454,050 (8.5)	93,774 (10.9)	49,887 (24.4)	43,887 (6.7)
Total Migrants	**24,664,883 (100.0)**	**7,478,298 (100.0)**	**17,186,585 (100.0)**	**861,396 (100.0)**	**204,585 (100.0)**	**656,811 (100.0)**

It is observed from Annexure - IV (A) that out of 24,664,883 migrants in the State 77.4 per cent were born within the state of enumeration and out of them 58.9 per cent migrants were born elsewhere in district of enumeration. It is also observed from the state figures that out of the total migrants, 10.1 per cent and 12.5 per cent migrants are having place of birth in other state of India and in other countries respectively. The similar trend is found in the district of Maldah also. The females generally move within short distance and because of this fact the proportion of female migrants born elsewhere in the district of enumeration is abnormally higher than that of their male counterparts. Further, this remarkable high proportion of female migrants may be attributed to marriage migration.

Annexure

ANNEXURE – IV (B)
INTERSTATE MIGRANTS TO WEST BENGAL AND DISTRICT, 2001 CENSUS

Place of Birth	Migrants			Percentage to total migrants		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
STATE - WEST BENGAL 19						
1. Bihar	1,160,593	708,591	452,002	46.6	52.4	39.7
2. Jharkhand	441,435	159,689	281,746	17.7	11.8	24.7
3. Uttar Pradesh	309,315	190,832	118,483	12.4	14.1	10.4
Total for three states	**1,911,343**	**1,059,112**	**852,231**	**76.7**	**78.3**	**74.8**
4. Other States	580,589	293,107	287,482	23.3	21.7	25.2
Total	**2,491,932**	**1,352,219**	**1,139,713**	**100.0**	**100.0**	**100.0**
MALDAH 06						
1. Bihar	36,571	9,310	27,261	70.5	63.7	73.1
2. Jharkhand	9,030	2,230	6,800	17.4	15.3	18.2
3. Uttar Pradesh	2,077	1,093	984	4.0	7.5	2.6
Total for three states	**47,678**	**12,633**	**35,045**	**91.9**	**86.4**	**94.0**
4. Other States	4,222	1,988	2,234	8.1	13.6	6.0
Total	**51,900**	**14,621**	**37,279**	**100.0**	**100.0**	**100.0**

The Annexure - IV (B) on interstate migrants shows that at 2001 Census out of the total interstate migrants 46.6 per cent had place of birth in Bihar 17.7 per cent in Jharkhand, 12.4 per cent in Uttar Pradesh and 23.3 per cent had in other states in case of West Bengal whereas in the case of Maldah district out of the total migrants enumerated in the district, 70.5 per cent had place of birth in Bihar, 17.4 per cent in Jharkhand, 4.0 per cent in Uttar Pradesh and 8.1 per cent had in other states. This trend indicates that the major migration in case of interstate migrants had taken place from Bihar state for the state as a whole and also for the district of Maldah.

It is seen from Annexure-IV(D) that in terms of total migrants in absolute figure, North 24 Parganas with 3,693,336 persons comes in first position followed by Medinipur with 2,709,165 persons and Barddhaman with 2,364,020 persons. In case of people born in West Bengal, 9 districts of the state overtake the state percentage of 77.4. So far people born in other states are concerned, 8 districts overtake the State average of 10.1 per cent and regarding people born in other district of West Bengal, only 6 districts overtake the State average of 18.5 per cent. The percentage of people born elsewhere in the district of enumeration varies between the maximum of 87.5 in Medinipur and the minimum of 38.7 in North 24 Parganas district. Similarly, the percentage of people born in other countries varies between the maximum of 33.9 in Nadia and the minimum of 0.2 in Puruliya district.

ANNEXURE - V

BRIEF ACCOUNT OF MAIN RELIGIONS IN THE STATE AND DISTRICT, 2001 CENSUS

Religious communities	Total	Rural	Urban	Per cent to all religions	Percent to total	
					Rural	Urban
1	2	3	4	5	6	7
WEST BENGAL-19						
All Religions	80,176,197	57,748,946	22,427,251	100.0	72.0	28.0
Hindus	58,104,835	39,406,984	18,697,851	72.5	67.8	32.2
Muslims	20,240,543	16,845,034	3,395,509	25.2	83.2	16.8
Christians	515,150	393,358	121,792	0.6	76.4	23.6
Sikhs	66,391	10,758	55,633	0.1	16.2	83.8
Buddhists	243,364	171,455	71,909	0.3	70.5	29.5
Jains	55,223	9,354	45,869	0.1	16.9	83.1
Others	895,796	875,354	20,442	1.1	97.7	2.3
Religion not stated	54,895	36,649	18,246	0.1	66.8	33.2
MALDAH-06						
All Religions	3,290,468	3,049,528	240,940	100.0	92.7	7.3
Hindus	1,621,468	1,407,962	213,506	49.3	86.8	13.2
Muslims	1,636,171	1,609,596	26,575	49.7	98.4	1.6
Christians	8,388	7,962	426	0.3	94.9	5.1
Sikhs	283	215	68	0.0	76.0	24.0
Buddhists	164	96	68	0.0	58.5	41.5
Jains	293	160	133	0.0	54.6	45.4
Others	22,350	22,288	62	0.7	99.7	0.3
Religion not stated	1,351	1,249	102	0.0	92.5	7.5

It is observed that in Maldah the Muslims occupy the first place with 49.7 per cent of the total population of the district, being closely followed by the Hindus with 49.3 per cent indicating that they are the two main religions of the district competing with each other in number. The competition is evident when it comes to rural sector where the Muslims with 98.4 per cent outnumber the Hindus with 86.8 per cent.

Annexure - VI

Marital Status of the population as per 2001 Census :

Information on sex and marital status of persons, particularly marital status of women population is very much important for measuring fertility rate by age group. Population of women belonging to currently married group is also important for measuring age specific marital fertility rate (ASMFR). A table classified by marital status, broad age group and sex of 1991 and 2001 is shown below :

ANNEXURE – VI (A)

PERCENTAGE DISTRIBUTION OF POPULATION CLASSIFIED BY MARITAL STATUS, BROAD AGE GROUP AND SEX, 1991-2001

Year	Age	Total	Marital Status							
			Never married		Married		Widowed		Divorced or Separated	
			Males	Females	Males	Females	Males	Females	Males	Females
1	2	3	4	5	6	7	8	9	10	11
1991	0-14	100.0	99.6	98.8	0.4	1.1	0.0	0.0	0.0	0.0
	15-34	100.0	51.8	18.8	47.6	78.1	0.4	1.6	0.3	1.5
	35-54	100.0	3.1	1.1	93.9	83.2	2.5	14.6	0.5	1.2
	55+	100.0	5.9	3.4	83.1	40.9	10.7	55.0	0.4	0.7
	All ages	100.0	59.3	48.5	39.1	43.9	1.4	6.9	0.2	0.8
2001	0-14	100.0	99.8	99.4	0.2	0.6	0.0	0.0	0.0	0.0
	15-34	100.0	50.8	19.6	48.7	77.7	0.2	1.4	0.2	1.3
	35-54	100.0	1.7	1.1	96.8	83.8	1.2	13.4	0.3	1.7
	55+	100.0	2.2	1.6	88.5	44.7	9.0	53.0	0.4	0.7
	All Ages	100.0	58.0	47.9	40.9	44.3	0.9	7.0	0.2	0.8

Note : Figures of age not stated are included in all ages. Unspecified Marital status is included in total population.

It is observed from the above table that the proportion of never married males and females in the age group 0-14 has slightly increased in 2001 over 1991 census, whereas the proportion of married (males and females) in the same age group has decreased over the same time period. Under the age-group 35-54 the proportion of married persons (both male and female) have increased in 2001 over 1991. A remarkable decrease in the percentage of never married males and females is observed in the age group of 55+, whereas the proportion of married males and females has significantly increased in the same age group in 2001 census. It is to be noted that the proportion of widowed males and females in the age group of 15-34, 35-54 and 55+ has reduced to a great extent, indicating a substantial decline in the mortality rate. Further, it is seen that the proportion of divorced/ separated females is also higher than the corresponding male population in both the census years. A table classified by marital status, broad age group, sex and residence has been shown in Annexure-VI (B) for Maldah district of 2001 Census.

It is observed that more than 41.0 per cent of the total population of Maldah district belong to 0-14 age group and naturally constitute the bulk of the never married as per 2001 census. Although none is found in the married status in 0-9 age group of the district, 1.1 per cent of 10-14 age group population of the district has been found married implying that child marriage still exists in the district. Number of females however being greater than the males. The highest number of married are found in 25-29 female age group (130,979) and in 30-34 male age group (112,053) indicating that gradually late marriage is being preferred by both the sexes. A pointer to mortality is the number of female widowed which is more than eight times of the male widowed and it is highest for male in the 70-74 age group (2,189) and for female in 60-64 age group (18,345). The number of divorced or separated females is also higher than the number of males in most of the age groups.

It is seen that in none of the sub-levels of literacy of Maldah district, the females have been able to catch up the males in number in 2001 census. More than 50.0 per cent of the total populations of Maldah district are literates, excluding 0-6 age group and numbers of literate males (801,770) are much higher than the number of females (530,934) as per absolute figures. It is noteworthy to mention that 42.7 per cent of the age group 7-10 still remain illiterates, male-female ratio being almost equal and the highest illiteracy, that is 65.4 per cent is observed in age group 45+, number of females being higher than the number of males. Number of literates without any formal schooling including education level is very little - 17,858 for males and 11,361 for females are the figures for the district and likewise number of graduates and above is also very little i.e. only 3.3 per cent of the total literate population.

ANNEXURE - VIII

Distribution of different mother tongues in the district, 2001 Census

Language is an important characteristic of a population particularly in a multi-lingual and multi-cultural society like India. The language census literature that has grown over the last one hundred years of Indian census history has shed light on the linguistic composition of our country. The table below shows the population by mother tongue of the district since 1961. It is to be noted that mother tongues shown in 1971 Census are mother tongues inclusive of language grouped under each. Data shown in 1981 Census is the language mainly spoken in the households.

	(0.0)	(0.0)	(0.0)	(0.0)	(0.0)	(0.5)	

The above table shows population by mother tongue for Maldah district since 1961. It is seen that 88.1 per cent of the total population of Maldah district is Bengali by mother tongue as per 2001 census. Santali comes next with 4.5 per cent, followed by Khortha/ Khotta 4.4 per cent, Hindi 1.2 per cent and Bhojpuri 0.4 per cent. It is to be noted that among the first five major mother tongues of the district, Santali, Khortha/ Khotta and Bhojpuri happen to be three non-scheduled languages and they jointly contribute 9.3 per cent of the total district population.

Annexure -IX : Scheduled Castes and Scheduled Tribes Population - Size and Growth

The collection of population statistics on the Scheduled Castes and the Scheduled Tribes as per the state Scheduled Castes and Scheduled Tribes lists in the State is one of the most important aspects of decadal census in post independence period. These information are required for the purpose of delimitation of the Assembly and Parliamentary constituencies in the State. The planning for development of these communities is mostly considered on the information of population size and its growth rate, sex-ratio, literacy rate, economic activities etc. Census is the only source which provides data for Scheduled Castes and Scheduled Tribes on various aspects of their life at the micro level.

The district in 1991 Census returned 477,896 Scheduled Castes persons comprising of 247,369 males and 230,527 females accounting for 18.1 per cent of the total population of the district. Of this bulk of Scheduled Castes population 94.6 per cent were in rural areas and 5.4 per cent in urban areas of the district. In all 59 Scheduled Castes were reported and were scattered all over the district. The first four major castes in order of population size were the Rajbanshi, Namasudra, Bind and Chamar, Charmakar, Mochi etc. Together, these four castes constituted 50.9 per cent of the total Scheduled Castes population of the district. Among these Rajbanshi with 114,697 persons alone constituted 24.0 per cent of the total Scheduled Castes population of the district.

The literacy rate among Scheduled Castes was 33.9 per cent as against general literacy rate of 35.6 per cent in the district. 46.6 per cent of the males and 20.2 per cent of the females were literates among all Scheduled Castes.

The participation rate among Scheduled Castes was 36.6 per cent corresponding to 34.7 per cent in the general population. The Scheduled Caste workers in the district were mainly working as Agricultural Labourers (38.5 per cent) with the female proportion being substantially higher at 65.0 per cent compared to males.

Likewise, the district recorded 171,326 Scheduled Tribe persons comprising of 85,963 males and 85,363 females accounting 6.5 per cent of the district's total population. Of this bulk of scheduled tribes population 99.1 per cent were in the rural areas and 0.9 per cent only in urban areas of the district. In all 36 Scheduled Tribes out of 38 were reported in the district having scattered all over the district. The first four major tribes in order of population size were the Santal, Oraon, Kharwara and Kora. Together, these four tribes constituted 92.3 per cent of the total Scheduled Tribes population of the district. Among these four, Santal tribe with 133,807 population single handedly constituted 78.1 per cent of the total Scheduled Tribes population of the district.

The literacy rate among Scheduled Tribes was 15.8 per cent as against general literacy rate of 35.6 per cent in the district. 25.1 per cent of the males and 6.4 per cent of females were literates among all Scheduled Tribes.

The work participation rate among Scheduled Tribes was 51.7 per cent corresponding to 34.7 per cent in the general population. The Scheduled Tribes in the district were mainly working as Agricultural Labourers (54.6 per cent) with the female proportion being higher at 77.3 per cent compared to males.

As per 2001 Census, Maldah district has 554,165 Scheduled Castes population comprising of 284,726 males and 269,439 females accounting for 16.8 per cent of the total population of the district. Among the Scheduled Castes of the district, the first five major castes in order of population size are Rajbanshi with 144,158 persons (26.0 per cent), Namasudra with 101,444 persons (18.3 per cent), Bind with 30,303 persons (5.5 per cent), Jhalo Malo/Malo with 28,165 persons (5.1 per cent) and Paliya with 27,636 persons (5.0 per cent). These five major castes constitute 59.9 per cent of the total Scheduled Castes population of the district.

Further, the district has also recorded 227,047 Scheduled Tribe population comprising of 113,537 males and 113,510 females in 2001 Census acounting for 6.9 per cent of the total district population. Among these, the first five major tribes in order of population size are Santal with 146,723 persons (64.6 per cent), Oraon with 13,125 persons (5.8 per cent), Kharwar with 8,404 persons (3.7 per cent), Kora with 5,998 persons (2.6 per cent) and Munda with 4,901 persons (2.2 per cent). These five tribes constitute 78.9 per cent of the total Scheduled Tribe population of the district.

The distribution of rural and urban Scheduled Castes / Tribes population for Maldah district since 1961 can be observed in the following table :

ANNEXURE - IX
SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN THE DISTRICT OF MALDAH (1961-2001)

	1961		1971		1981		1991		2001	
T/R/U	SC	ST	SC	ST	SC	ST	SC	ST	SC	ST
Total	163,433	99,522	265,697	130,715	343,089	153,300	477,896	171,326	554,165	227,047
			(62.6)	(31.3)	(29.1)	(17.3)	(39.3)	(11.8)	(16.0)	(32.5)
Rural	159,396	99,419	261,938	130,658	334,015	153,077	452,275	169,807	518,987	224,698
			(64.3)	(31.4)	(27.5)	(17.2)	(35.4)	(10.9)	(14.8)	(32.3)
Urban	4,037	103	3,759	57	9,074	223	25,621	1,519	35,178	2,349
			(-6.9)	(-44.7)	(141.4)	(291.2)	(182.4)	(581.2)	(37.3)	(54.6)

Note : Figures within bracket indicate decennial growth rate

It will be seen from the above table that the proportion of Scheduled Castes population decreased from 62.6 in 1961-71 to 16.0 in 1991-2001. But, the Scheduled Tribes population increased from 31.3 to 32.5 points respectively during the same period. These fluctuating growth rates are certainly pointer to uneven character of the progress of Scheduled Castes and Scheduled Tribes population in the district. The rural sector follows almost the same trend as that of total, but in case of the urban sector, strange fluctuations observed. During 1961-71, both urban Scheduled Castes and Scheduled Tribes population declined by -6.9 per cent and -44.7 per cent respectively. This was followed by steep percentage increase during 1971-81 by 141.4 and 291.2 points respectively and this went up further by 182.4 and 581.2 points respectively during 1981-91. However sign of restoration of somewhat normal growth rate is seen during 1991-2001.

Annexure

It is seen from Annexure-IV(D) that in terms of total migrants in absolute figure, North 24 Parganas with 3,693,336 persons comes in first position followed by Medinipur with 2,709,165 persons and Barddhaman with 2,364,020 persons. In case of people born in West Bengal, 9 districts of the State overtake the State percentage of 77.4. So far people born in other states are concerned, 8 districts overtake the State average of 10.1 per cent and regarding people born in other district of West Bengal, only 6 districts overtake the State average of 18.5 per cent. The percentage of people born elsewhere in the district of enumeration varies between the maximum of 87.5 in Medinipur and the minimum of 38.7 in North 24 Parganas district. Similarly, the percentage of people born in other countries varies between the maximum of 33.9 in Nadia and the minimum of 0.2 in Puruliya district.

ANNEXURE - V

BRIEF ACCOUNT OF MAIN RELIGIONS IN THE STATE AND DISTRICT, 2001 CENSUS

Religious communities	Total	Rural	Urban	Per cent to all religions	Percent to total	
					Rural	Urban
1	2	3	4	5	6	7
WEST BENGAL-19						
All Religions	80,176,197	57,748,946	22,427,251	100.0	72.0	28.0
Hindus	58,104,835	39,406,984	18,697,851	72.5	67.8	32.2
Muslims	20,240,543	16,845,034	3,395,509	25.2	83.2	16.8
Christians	515,150	393,358	121,792	0.6	76.4	23.6
Sikhs	66,391	10,758	55,633	0.1	16.2	83.8
Buddhists	243,364	171,455	71,909	0.3	70.5	29.5
Jains	55,223	9,354	45,869	0.1	16.9	83.1
Others	895,796	875,354	20,442	1.1	97.7	2.3
Religion not stated	54,895	36,649	18,246	0.1	66.8	33.2
MALDAH-06						
All Religions	3,290,468	3,049,528	240,940	100.0	92.7	7.3
Hindus	1,621,468	1,407,962	213,506	49.3	86.8	13.2
Muslims	1,636,171	1,609,596	26,575	49.7	98.4	1.6
Christians	8,388	7,962	426	0.3	94.9	5.1
Sikhs	283	215	68	0.0	76.0	24.0
Buddhists	164	96	68	0.0	58.5	41.5
Jains	293	160	133	0.0	54.6	45.4
Others	22,350	22,288	62	0.7	99.7	0.3
Religion not stated	1,351	1,249	102	0.0	92.5	7.5

It is observed that in Maldah the Muslims occupy the first place with 49.7 per cent of the total population of the district, being closely followed by the Hindus with 49.3 per cent indicating that they are the two main religions of the district competing with each other in number. The competition is evident when it comes to rural sector where the Muslims with 98.4 per cent outnumber the Hindus with 86.8 per cent.

It is observed from the above table that the proportion of never married males and females in the age group 0-14 has slightly increased in 2001 over 1991 census, whereas the proportion of married (males and females) in the same age group has decreased over the same time period. Under the age-group 35-54 the proportion of married persons (both male and female) have increased in 2001 over 1991. A remarkable decrease in the percentage of never married males and females is observed in the age group of 55+, whereas the proportion of married males and females has significantly increased in the same age group in 2001 census. It is to be noted that the proportion of widowed males and females in the age group of 15-34, 35-54 and 55+ has reduced to a great extent, indicating a substantial decline in the mortality rate. Further, it is seen that the proportion of divorced/ separated females is also higher than the corresponding male population in both the census years. A table classified by marital status, broad age group, sex and residence has been shown in Annexure-VI (B) for Maldah district of 2001 Census.

It is observed that more than 41.0 per cent of the total population of Maldah district belong to 0-14 age group and naturally constitute the bulk of the never married as per 2001 census. Although none is found in the married status in 0-9 age group of the district, 1.1 per cent of 10-14 age group population of the district has been found married implying that child marriage still exists in the district. Number of females however being greater than the males. The highest number of married are found in 25-29 female age group (130,979) and in 30-34 male age group (112,053) indicating that gradually late marriage is being preferred by both the sexes. A pointer to mortality is the number of female widowed which is more than eight times of the male widowed and it is highest for male in the 70-74 age group (2,189) and for female in 60-64 age group (18,345). The number of divorced or separated females is also higher than the number of males in most of the age groups.

It is seen that in none of the sub-levels of literacy of Maldah district, the females have been able to catch up the males in number in 2001 census. More than 50.0 per cent of the total populations of Maldah district are literates, excluding 0-6 age group and numbers of literate males (801,770) are much higher than the number of females (530,934) as per absolute figures. It is noteworthy to mention that 42.7 per cent of the age group 7-10 still remain illiterates, male-female ratio being almost equal and the highest illiteracy, that is 65.4 per cent is observed in age group 45+, number of females being higher than the number of males. Number of literates without any formal schooling including education level is very little - 17,858 for males and 11,361 for females are the figures for the district and likewise number of graduates and above is also very little i.e. only 3.3 per cent of the total literate population.

ANNEXURE - VIII

Distribution of different mother tongues in the district, 2001 Census

Language is an important characteristic of a population particularly in a multi-lingual and multi-cultural society like India. The language census literature that has grown over the last one hundred years of Indian census history has shed light on the linguistic composition of our country. The table below shows the population by mother tongue of the district since 1961. It is to be noted that mother tongues shown in 1971 Census are mother tongues inclusive of language grouped under each. Data shown in 1981 Census is the language mainly spoken in the households.

The above table shows population by mother tongue for Maldah district since 1961. It is seen that 88.1 per cent of the total population of Maldah district is Bengali by mother tongue as per 2001 census. Santali comes next with 4.5 per cent, followed by Khortha/ Khotta 4.4 per cent, Hindi 1.2 per cent and Bhojpuri 0.4 per cent. It is to be noted that among the first five major mother tongues of the district, Santali, Khortha/ Khotta and Bhojpuri happen to be three non-scheduled languages and they jointly contribute 9.3 per cent of the total district population.

Annexure -IX : Scheduled Castes and Scheduled Tribes Population - Size and Growth

The collection of population statistics on the Scheduled Castes and the Scheduled Tribes as per the state Scheduled Castes and Scheduled Tribes lists in the State is one of the most important aspects of decadal census in post independence period. These information are required for the purpose of delimitation of the Assembly and Parliamentary constituencies in the State. The planning for development of these communities is mostly considered on the information of population size and its growth rate, sex-ratio, literacy rate, economic activities etc. Census is the only source which provides data for Scheduled Castes and Scheduled Tribes on various aspects of their life at the micro level.

The district in 1991 Census returned 477,896 Scheduled Castes persons comprising of 247,369 males and 230,527 females accounting for 18.1 per cent of the total population of the district. Of this bulk of Scheduled Castes population 94.6 per cent were in rural areas and 5.4 per cent in urban areas of the district. In all 59 Scheduled Castes were reported and were scattered all over the district. The first four major castes in order of population size were the Rajbanshi, Namasudra, Bind and Chamar, Charmakar, Mochi etc. Together, these four castes constituted 50.9 per cent of the total Scheduled Castes population of the district. Among these Rajbanshi with 114,697 persons alone constituted 24.0 per cent of the total Scheduled Castes population of the district.

The literacy rate among Scheduled Castes was 33.9 per cent as against general literacy rate of 35.6 per cent in the district. 46.6 per cent of the males and 20.2 per cent of the females were literates among all Scheduled Castes.

The participation rate among Scheduled Castes was 36.6 per cent corresponding to 34.7 per cent in the general population. The Scheduled Caste workers in the district were mainly working as Agricultural Labourers (38.5 per cent) with the female proportion being substantially higher at 65.0 per cent compared to males.

Likewise, the district recorded 171,326 Scheduled Tribe persons comprising of 85,963 males and 85,363 females accounting 6.5 per cent of the district's total population. Of this bulk of scheduled tribes population 99.1 per cent were in the rural areas and 0.9 per cent only in urban areas of the district. In all 36 Scheduled Tribes out of 38 were reported in the district having scattered all over the district. The first four major tribes in order of population size were the Santal, Oraon, Kharwara and Kora. Together, these four tribes constituted 92.3 per cent of the total Scheduled Tribes population of the district. Among these four, Santal tribe with 133,807 population single handedly constituted 78.1 per cent of the total Scheduled Tribes population of the district.

The literacy rate among Scheduled Tribes was 15.8 per cent as against general literacy rate of 35.6 per cent in the district. 25.1 per cent of the males and 6.4 per cent of females were literates among all Scheduled Tribes.

The work participation rate among Scheduled Tribes was 51.7 per cent corresponding to 34.7 per cent in the general population. The Scheduled Tribes in the district were mainly working as Agricultural Labourers (54.6 per cent) with the female proportion being higher at 77.3 per cent compared to males.

As per 2001 Census, Maldah district has 554,165 Scheduled Castes population comprising of 284,726 males and 269,439 females accounting for 16.8 per cent of the total population of the district. Among the Scheduled Castes of the district, the first five major castes in order of population size are Rajbanshi with 144,158 persons (26.0 per cent), Namasudra with 101,444 persons (18.3 per cent), Bind with 30,303 persons (5.5 per cent), Jhalo Malo/Malo with 28,165 persons (5.1 per cent) and Paliya with 27,636 persons (5.0 per cent). These five major castes constitute 59.9 per cent of the total Scheduled Castes population of the district.

Further, the district has also recorded 227,047 Scheduled Tribe population comprising of 113,537 males and 113,510 females in 2001 Census acounting for 6.9 per cent of the total district population. Among these, the first five major tribes in order of population size are Santal with 146,723 persons (64.6 per cent), Oraon with 13,125 persons (5.8 per cent), Kharwar with 8,404 persons (3.7 per cent), Kora with 5,998 persons (2.6 per cent) and Munda with 4,901 persons (2.2 per cent). These five tribes constitute 78.9 per cent of the total Scheduled Tribe population of the district.

The distribution of rural and urban Scheduled Castes / Tribes population for Maldah district since 1961 can be observed in the following table :

ANNEXURE - IX
SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN THE DISTRICT OF MALDAH (1961-2001)

	1961		1971		1981		1991		2001	
T/R/U	SC	ST	SC	ST	SC	ST	SC	ST	SC	ST
Total	163,433	99,522	265,697	130,715	343,089	153,300	477,896	171,326	554,165	227,047
			(62.6)	(31.3)	(29.1)	(17.3)	(39.3)	(11.8)	(16.0)	(32.5)
Rural	159,396	99,419	261,938	130,658	334,015	153,077	452,275	169,807	518,987	224,698
			(64.3)	(31.4)	(27.5)	(17.2)	(35.4)	(10.9)	(14.8)	(32.3)
Urban	4,037	103	3,759	57	9,074	223	25,621	1,519	35,178	2,349
			(-6.9)	(-44.7)	(141.4)	(291.2)	(182.4)	(581.2)	(37.3)	(54.6)

Note : Figures within bracket indicate decennial growth rate

It will be seen from the above table that the proportion of Scheduled Castes population decreased from 62.6 in 1961-71 to 16.0 in 1991-2001. But, the Scheduled Tribes population increased from 31.3 to 32.5 points respectively during the same period. These fluctuating growth rates are certainly pointer to uneven character of the progress of Scheduled Castes and Scheduled Tribes population in the district. The rural sector follows almost the same trend as that of total, but in case of the urban sector, strange fluctuations observed. During 1961-71, both urban Scheduled Castes and Scheduled Tribes population declined by -6.9 per cent and -44.7 per cent respectively. This was followed by steep percentage increase during 1971-81 by 141.4 and 291.2 points respectively and this went up further by 182.4 and 581.2 points respectively during 1981-91. However sign of restoration of somewhat normal growth rate is seen during 1991-2001.

Annexure

Annexure - VI

Marital Status of the population as per 2001 Census :

Information on sex and marital status of persons, particularly marital status of women population is very much important for measuring fertility rate by age group. Population of women belonging to currently married group is also important for measuring age specific marital fertility rate (ASMFR). A table classified by marital status, broad age group and sex of 1991 and 2001 is shown below :

Annexure

ANNEXURE – VI (A)
PERCENTAGE DISTRIBUTION OF POPULATION CLASSIFIED BY MARITAL STATUS, BROAD AGE GROUP AND SEX, 1991-2001

			Marital Status							
			Never married		Married		Widowed		Divorced or Separated	
Year	Age	Total	Males	Females	Males	Females	Males	Females	Males	Females
1	2	3	4	5	6	7	8	9	10	11
1991	0-14	100.0	99.6	98.8	0.4	1.1	0.0	0.0	0.0	0.0
	15-34	100.0	51.8	18.8	47.6	78.1	0.4	1.6	0.3	1.5
	35-54	100.0	3.1	1.1	93.9	83.2	2.5	14.6	0.5	1.2
	55+	100.0	5.9	3.4	83.1	40.9	10.7	55.0	0.4	0.7
	All ages	100.0	59.3	48.5	39.1	43.9	1.4	6.9	0.2	0.8
2001	0-14	100.0	99.8	99.4	0.2	0.6	0.0	0.0	0.0	0.0
	15-34	100.0	50.8	19.6	48.7	77.7	0.2	1.4	0.2	1.3
	35-54	100.0	1.7	1.1	96.8	83.8	1.2	13.4	0.3	1.7
	55+	100.0	2.2	1.6	88.5	44.7	9.0	53.0	0.4	0.7
	All Ages	100.0	58.0	47.9	40.9	44.3	0.9	7.0	0.2	0.8

Note : Figures of age not stated are included in all ages. Unspecified Marital status is included in total population.

It is observed from the above table that the proportion of never married males and females in the age group 0-14 has slightly increased in 2001 over 1991 census, whereas the proportion of married (males and females) in the same age group has decreased over the same time period. Under the age-group 35-54 the proportion of married persons (both male and female) have increased in 2001 over 1991. A remarkable decrease in the percentage of never married males and females is observed in the age group of 55+, whereas the proportion of married males and females has significantly increased in the same age group in 2001 census. It is to be noted that the proportion of widowed males and females in the age group of 15-34, 35-54 and 55+ has reduced to a great extent, indicating a substantial decline in the mortality rate. Further, it is seen that the proportion of divorced/ separated females is also higher than the corresponding male population in both the census years. A table classified by marital status, broad age group, sex and residence has been shown in Annexure-VI (B) for Maldah district of 2001 Census.

It is observed that more than 41.0 per cent of the total population of Maldah district belong to 0-14 age group and naturally constitute the bulk of the never married as per 2001 census. Although none is found in the married status in 0-9 age group of the district, 1.1 per cent of 10-14 age group population of the district has been found married implying that child marriage still exists in the district. Number of females however being greater than the males. The highest number of married are found in 25-29 female age group (130,979) and in 30-34 male age group (112,053) indicating that gradually late marriage is being preferred by both the sexes. A pointer to mortality is the number of female widowed which is more than eight times of the male widowed and it is highest for male in the 70-74 age group (2,189) and for female in 60-64 age group (18,345). The number of divorced or separated females is also higher than the number of males in most of the age groups.

It is seen that in none of the sub-levels of literacy of Maldah district, the females have been able to catch up the males in number in 2001 census. More than 50.0 per cent of the total populations of Maldah district are literates, excluding 0-6 age group and numbers of literate males (801,770) are much higher than the number of females (530,934) as per absolute figures. It is noteworthy to mention that 42.7 per cent of the age group 7-10 still remain illiterates, male-female ratio being almost equal and the highest illiteracy, that is 65.4 per cent is observed in age group 45+, number of females being higher than the number of males. Number of literates without any formal schooling including education level is very little - 17,858 for males and 11,361 for females are the figures for the district and likewise number of graduates and above is also very little i.e. only 3.3 per cent of the total literate

Annexure

ANNEXURE - VIII

Distribution of different mother tongues in the district, 2001 Census

Language is an important characteristic of a population particularly in a multi-lingual and multi-cultural society like India. The language census literature that has grown over the last one hundred years of Indian census history has shed light on the linguistic composition of our country. The table below shows the population by mother tongue of the district since 1961. It is to be noted that mother tongues shown in 1971 Census are mother tongues inclusive of language grouped under each. Data shown in 1981 Census is the language mainly spoken in the households.

The above table shows population by mother tongue for Maldah district since 1961. It is seen that 88.1 per cent of the total population of Maldah district is Bengali by mother tongue as per 2001 census. Santali comes next with 4.5 per cent, followed by Khortha/Khotta 4.4 per cent, Hindi 1.2 per cent and Bhojpuri 0.4 per cent. It is to be noted that among the first five major mother tongues of the district, Santali, Khortha/Khotta and Bhojpuri happen to be three non-scheduled languages and they jointly contribute 9.3 per cent of the total district population.

Annexure

Annexure -IX : Scheduled Castes and Scheduled Tribes Population - Size and Growth

The collection of population statistics on the Scheduled Castes and the Scheduled Tribes as per the state Scheduled Castes and Scheduled Tribes lists in the State is one of the most important aspects of decadal census in post independence period. These information are required for the purpose of delimitation of the Assembly and Parliamentary constituencies in the State. The planning for development of these communities is mostly considered on the information of population size and its growth rate, sex-ratio, literacy rate, economic activities etc. Census is the only source which provides data for Scheduled Castes and Scheduled Tribes on various aspects of their life at the micro level.

The district in 1991 Census returned 477,896 Scheduled Castes persons comprising of 247,369 males and 230,527 females accounting for 18.1 per cent of the total population of the district. Of this bulk of Scheduled Castes population 94.6 per cent were in rural areas and 5.4 per cent in urban areas of the district. In all 59 Scheduled Castes were reported and were scattered all over the district. The first four major castes in order of population size were the Rajbanshi, Namasudra, Bind and Chamar, Charmakar, Mochi etc. Together, these four castes constituted 50.9 per cent of the total Scheduled Castes population of the district. Among these Rajbanshi with 114,697 persons alone constituted 24.0 per cent of the total Scheduled Castes population of the district.

The literacy rate among Scheduled Castes was 33.9 per cent as against general literacy rate of 35.6 per cent in the district. 46.6 per cent of the males and 20.2 per cent of the females were literates among all Scheduled Castes.

The participation rate among Scheduled Castes was 36.6 per cent corresponding to 34.7 per cent in the general population. The Scheduled Caste workers in the district were mainly working as Agricultural Labourers (38.5 per cent) with the female proportion being substantially higher at 65.0 per cent compared to males.

Likewise, the district recorded 171,326 Scheduled Tribe persons comprising of 85,963 males and 85,363 females accounting 6.5 per cent of the district's total population. Of this bulk of scheduled tribes population 99.1 per cent were in the rural areas and 0.9 per cent only in urban areas of the district. In all 36 Scheduled Tribes out of 38 were reported in the district having scattered all over the district. The first four major tribes in order of population size were the Santal, Oraon, Kharwara and Kora. Together, these four tribes constituted 92.3 per cent of the total Scheduled Tribes population of the district. Among these four, Santal tribe with 133,807 population single handedly constituted 78.1 per cent of the total Scheduled Tribes population of the district.

The literacy rate among Scheduled Tribes was 15.8 per cent as against general literacy rate of 35.6 per cent in the district. 25.1 per cent of the males and 6.4 per cent of females were literates among all Scheduled Tribes.

The work participation rate among Scheduled Tribes was 51.7 per cent corresponding to 34.7 per cent in the general population. The Scheduled Tribes in the district were mainly working as Agricultural Labourers (54.6 per cent) with the female proportion being higher at 77.3 per cent compared to males.

As per 2001 Census, Maldah district has 554,165 Scheduled Castes population comprising of 284,726 males and 269,439 females accounting for 16.8 per cent of the total population of the district. Among the Scheduled Castes of the district, the first five major castes in order of population size are Rajbanshi with 144,158 persons (26.0 per cent), Namasudra with 101,444 persons (18.3 per cent), Bind with 30,303 persons (5.5 per cent), Jhalo Malo/Malo with 28,165 persons (5.1 per cent) and Paliya with 27,636 persons (5.0 per cent). These five major castes constitute 59.9 per cent of the total Scheduled Castes population of the district.

Further, the district has also recorded 227,047 Scheduled Tribe population comprising of 113,537 males and 113,510 females in 2001 Census acounting for 6.9 per cent of the total district population. Among these, the first five major tribes in order of population size are Santal with 146,723 persons (64.6 per cent), Oraon with 13,125 persons (5.8 per cent), Kharwar with 8,404 persons (3.7 per cent), Kora with 5,998 persons (2.6 per cent) and Munda with 4,901 persons (2.2 per cent). These five tribes constitute 78.9 per cent of the total Scheduled Tribe population of the district.

The distribution of rural and urban Scheduled Castes / Tribes population for Maldah district since 1961 can be observed in the following table :

ANNEXURE - IX
SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN THE DISTRICT OF MALDAH (1961-2001)

	1961		1971		1981		1991		2001	
T/R/U	SC	ST	SC	ST	SC	ST	SC	ST	SC	ST
Total	163,433	99,522	265,697	130,715	343,089	153,300	477,896	171,326	554,165	227,047
			(62.6)	(31.3)	(29.1)	(17.3)	(39.3)	(11.8)	(16.0)	(32.5)
Rural	159,396	99,419	261,938	130,658	334,015	153,077	452,275	169,807	518,987	224,698
			(64.3)	(31.4)	(27.5)	(17.2)	(35.4)	(10.9)	(14.8)	(32.3)
Urban	4,037	103	3,759	57	9,074	223	25,621	1,519	35,178	2,349
			(-6.9)	(-44.7)	(141.4)	(291.2)	(182.4)	(581.2)	(37.3)	(54.6)

Note : Figures within bracket indicate decennial growth rate

It will be seen from the above table that the proportion of Scheduled Castes population decreased from 62.6 in 1961-71 to 16.0 in 1991-2001. But, the Scheduled Tribes population increased from 31.3 to 32.5 points respectively during the same period. These fluctuating growth rates are certainly pointer to uneven character of the progress of Scheduled Castes and Scheduled Tribes population in the district. The rural sector follows almost the same trend as that of total, but in case of the urban sector, strange fluctuations observed. During 1961-71, both urban Scheduled Castes and Scheduled Tribes population declined by -6.9 per cent and -44.7 per cent respectively. This was followed by steep percentage increase during 1971-81 by 141.4 and 291.2 points respectively and this went up further by 182.4 and 581.2 points respectively during 1981-91. However sign of restoration of somewhat normal growth rate is seen during 1991-2001.

ABOUT THE SAMPLE REGISTRATION SYSTEM (SRS) IN WEST BENGAL :

The Sample Registration System (SRS) is a large scale demographic sample survey for providing reliable annual estimates of birth rate, death rate and other fertility and mortality indicators at the national and sub-national levels. The field investigation consists of continuous enumeration of births and deaths by a resident part time enumerator and an independent half yearly survey by supervisor. The data obtained through these operations are matched. The unmatched and partially matched events are re-verified in the field and thereafter an unduplicated count of births and deaths is obtained. The SRS was initiated by the Office

of the Registrar General and Census Commissioner, India on a pilot basis in a few selected states in 1964-65 and it became fully operational during 1969-70 with about 3,700 sample units in India. Thereafter the number of sample units was periodically increased. After completion of 1991 Census these units were replaced during 1993-94 with 6,671 sample units (4,436 rural and 2,235 urban blocks) in all states and union territories. For West Bengal state total number of sample units were 475 (300 rural and 175 urban) after 1991 census. The sample unit in rural areas is a village or a segment of it if the village had a population of 2,000 or more. In urban areas the sampling unit is a census enumeration block with a population of 600 or 120 households. At present SRS is operational in 7,597 sample units (4,433 rural and 3,164 urban) spread across all States and Union territories and covers about 1.3 million households and 6.93 million population based on 2001 Census frame and these were effective from January 2004. In the state of West Bengal SRS is covering about 5.7 lakh population through 555 (310 rural and 245 urban) sample units which is highest among all states and UTs.
