## Puruliya Chhau Dance

Chhau is a traditional and very popular folk dance inextricably mixed with the life and culture of the people of Puruliya, which has won international acclaim due to life-long efforts of Padmasree late Gambhir Sing Mura, a legendary figure in the realm of Chhau dance. It is quite distinct from the Chhau dance prevailing at Mayurbhanj of Orissa and at Seraikela of Jharkhand. The peculiar characteristic of Purulia Chhau dance lies in the fact that the artists are common day-labourers who toil in the field through out the day and after day's hard work, they perform this dance with their usual acrobatic skill and enthusiasm. Mask is also an important characteristic of Puruliya Chhau dance. Chorida in Baghmundi PS is famous for its being the home of the mask-makers of Chhau dance. A mask is made of paper pulp and covers the face of the dancer, leaving only four holes, two for the eyes and two for the nostrils. The cultural history of the district would be incomplete without a reference to the Jhumur songs of Purulia, which are mainly composed on Vaishnava themes and still retain the natural fragrance of folk music. The very music of Jhumur song has been nicely adopted in the grand mosaic of Chhau - a rare synthesis dear to all.

# Calendar of Events

**Calendar for Census 2001 upto Houselisting Operation :**

December, 1999

(i) Issue of all appointments of Charge Officers, Zonal Sub-Charge Officers and Charge Assistants etc., by the Principal Census Officer.

(ii) State level meeting with all Principal Census Officers to brief them on the different steps to be taken for conduct of Census-2001 to be convened by the Chief Secretary to the Government of West Bengal.

(iii) Meeting to be convened by all the Principal Census Officers at their respective H. Qtrs. to train all the Charge Officers and Sub-Charge Officers and Charge Assistants. The meetings to be attended by Director /Joint Director of Census Operations, West Bengal.

(iv) Principal Census Officers to write to all School Authorities, Govt. Offices, Semi Govt. Offices, local bodies etc., for sending list of officials for appointment as Enumerators and Supervisors.

(v) Collection and compilation of data for Village and Town Directory.

January, 2000

(i) Survey work for preparation of notional maps and layout sketches for formation of House listing Blocks on the basis of 1991 Enumeration Blocks.

(ii) Formation of House listing Blocks on the basis of Survey and Guideline No. 1.

(iii) Collection of list of School Teachers, Govt. Officials etc. from all respective authorities for appointment as Enumerators and Supervisors.

(iv) Preparation of Village Registers at all the Block Charge levels on the basis of data collected on Village Directory.

(v) Regular visit and liaison by the officials of Directorate of Census Operations to the different charges to impart spot training and oversee the Block formation.

February, 2000

(i) 2nd meeting of the Principal Census Officers at the State level to brief them about the House listing Schedules and Instruction Manual.

(ii) Subsequent meeting at the respective H. Qtrs. of all the Principal Census Officers to train all the Charge Officers, zonal Sub-Charge officers etc. on the House listing Schedule, Instruction Manual and House list Abstract – to be attended by Director/ Joint Director of Census Operations.

(iii) Subsequent training at all charges levels on the House listing Schedule, Instruction Manual and House list Abstract to all Zonal Charge Officers, Zonal Assistants by the Charge Officer. Regular contact by officials from the Directorate of Census Operations, West Bengal.

(iv) Completion of appointment of Enumerators and Supervisors and allotment of Houselisting blocks to them.

(v) Despatch of Houselisting Schedules and Instruction Manual, Abstract and other forms from the Directorate of Census Operations to all Districts and receipt/storage of the same at the District level and despatch to all Charge levels, Receipt, storage & giving of locational code numbers to the schedules at each charge levels.

March, 2000

(i) 1st training of Enumerators and Supervisors at the charge level.

(ii) Distribution of Houselisting Schedules, Instructions and Abstract to the Enumerators.

(iii) Completion of assignment of permanent house numbers to the houses by the Panchayats and Municipalities.

(iv) Preparations of the Charge Registers at each charge level.

April, 2000

(i) 2nd training of Enumerators and Supervisors at each charge level.

(ii) Issue of T.A./D.A. amount to the Enumerators/ Supervisors.

(iii) Issue of House-numbering materials to the Enumerators/ Supervisors or advance in lieu thereof.

(iv) Issue of badges/Identity Slips to the Enumerators/ Supervisors.

(v) Training of Enumerators at each circle level/Zone level by the Supervisors/Zonal Sub-Charge Officers.

17.04.2000 to 16.05.2000

(i) Houselisting Operations

(a) First 4 (four) days devoted to survey and preparation of layout sketches as per sketches already prepared at the charge level

(b) Next 20 (twenty) days devoted to house to house canvass of the Houselist Schedule.

(c) Last 2 (two) days devoted to preparation of Houselist Abstract and duplicate Houselist by Enumerators and handing over the same to the Supervisors.

17.05.2000 to 31.05.2000

Collection of the completed Houselist Schedule and Houselist Abstract from Supervisors/Zonal Charge Officers at the Charge level, preparation of Charge Abstract and onward transmission to this Directorate.

**Calendar for Enumeration Stage of Census of India – 2001**

1. Conference, Training of Principal Census Officers, Additional Principal Census Officer and District Census Officers.
   .....To be completed by 31st July, 2000
2. Training of Charge Officers
   ..... To be completed by 15.08.2000
3. Formation of Enumeration Blocks and despatch of Annexure 'N' by the Charge Officer to the Director of Census Operations, West Bengal.
   ..... To be completed by 31.09.2000
4. Writing of Abridged Houselist based on recarved Enumeration Block and preparation of fresh Charge, Registers after appointment of Enumerators and Supervisors for Each Enumeration Block.
   ..... To be completed by 31.07.2000
5. Despatch of materials to the districts by the Directorate of Census Operations and distribution of the same by the District Census Officers to the Charge Officers
   ..... To be completed 31.10.2000
6. 1st training of Enumerators and Supervisors
   ..... To be completed by 15th December, 2000
7. 2nd training of Enumerators and Supervisors
   .....To be completed by31st December, 2000
8. Field Training of Enumerators and Supervisors and handing over of materials required for Census taking.
   ..... To be completed by 15th January, 2001
9. Population Enumeration to begin on
   ..... 9th February, 2001
10. Population Enumeration to end on
    .....28th February, 2001
11. Enumeration of Houseless Population
    .....To be completed by night of 28th February, 2001
12. Revisional Round to be conducted for updating the information as on 00 hours of 1st March
    ..... To be completed by 1st – 5th March, 2001
13. Receipt of records by district census officers from all charge officers
    ..... To be completed by 07.03.2001
14. Compilation and checking of Population Totals by District Census Officers
    ..... 10.03.2001
15. State wise compilation of PPT by Director of Ceusus Operations and intimation to R.G.I.
    ..... To be completed by 12.03.2001
16. Receipts of records by District Census Officers from all Charge Officers.
    ..... To be completed by 15th March, 2001
17. Intimation of Preliminary Population Figures in respect of the following :
    ..... To be completed by 10.03.2001

(i) Total Population
    Total Male Population
    Total Female Population

(ii) Total Literate Population
    Total Male Literate Population
    Total Female Literate Population

(iii) Total Main workers
    Total Marginal Workers
    Total Non Workers

By the district Magistrates to the Director of Census Operations, West Bengal and Registrar General, India by Telephone and FAX.

# Economic Resources

**a) Forest Area :** The district has 116,171.9 hectares of land under forest. Out of the total area 56,184.7 hectares of land is under protected forest and 10,435.6 hectares of land is under reserved forest. From the forest produce the Government collected revenue of Rs.2,600,000 in 2000-02. (District Statistical Hand Book, 2001)

**b) Mineral :** The district has many minerals, although the deposits of only a few of them are adequate for commercial venture. Most important workable mineral deposit of the district is coal. Apart from that, there are deposits of a number of minerals like china clay, limestone, apatite, silimanite and road metal stones, glass sand, moulding sand in the district. Subject to the progress of exploration, the following minerals may be considered for industrial utilization :

| Item | Approx. Reserve |
|---|---|
| Coal | 456.00 m. tons |
| Rock Phosphate (Apatite) | 10.00 m. tons |
| Lime Stone | 20.00 m. tons |
| Road Metal | 45.00 m. cu. tons |
| Decorative Stone | 1.70 m. cu. tons |
| Moulding Sand | 2.00 m. tons |
| Glass Sand | 0.90 m. tons |
| China Clay | 4.73 m. tons |

**c) Soil and Cropping pattern :** The soils of the Damodar-Dwarakeswar Upland are red loamy, red sandy and alluvial which occur in major parts of the region. Recently formed soils are also found in the lower parts of the region towards the south-east. The soils found in the upper Kasai Basin has usually sandy loam. The highlands are of low fertility because of erosion and lower valleys are fertile due to the deposition of sediments. Soil erosion is the main problem of the region. Recently formed soils of clayey loam are also found in patches along the Baghmundi-Dalma Saddle and Subarnarekha.

Maize and groundnut are grown in the Damodar-Dwarakeswar Upland. Aus paddy, pulses and oilseeds are mainly grown in the lower areas of the upper Kasai Basin. Maize, groundnut and oilseeds are grown in the Baghmundi-Banduan upland. Rice is the principal food crop grown here. (Source : Regional Divisions of India - A Cartographic Analysis, Series 1, Vol. XXV, West Bengal.)

**d) Land and Land-use pattern :** According to the structure and land form, Puruliya is a part of the Ranchi peneplains, and this physical character is so dominant that the Government of India has classified this physiographic unit as an economic region. (Ashok Mitra-Census of India 1961, Vol.I, Part I-A(I) : Levels of Regional Development of India)

According to Department of Land Revenue, West Bengal, the total area of land is 623.29 thousand hectares. Out of the total area, 311.69 thousand hectares of land is under forest and 113.23 thousand hectares of land is under current fallow. (Source : District Statistical Hand Book, 2001, Govt. of West Bengal)

**e) Tenancy :** The State Government is the owner of all estate land since the enactment of West Bengal Estate Acquision Act, 1948. But in case of agricultural land the tenancy is contractual with the owner. After the land reform measures taken up by the State Government there is no intermediary system of tenancy in the district. In terms of operational land holding, more than 70.8 per cent falls under the marginal (below 1.0 acre) size of holding in the district. Till 30.09.2000, as per Board of Revenue, West Bengal, 28369.56 hectares of vested agricultural land have been distributed among 88,805 beneficiaries. Out of the total beneficiaries, 70.76 per cent belong to scheduled caste and scheduled tribe community when considered together. (Source : District Statistical Hand Book, 2001, Govt. of West Bengal)

**f) Agriculture :** The district has the broad categories of paddy producing land identified as (1) Bahal (2) Kalali and (3) Baid. Bahal lands are the quality paddy land, Kanali are the second class while Baid is the poorest class paddy land.

Agriculture is the principal occupation of the people. About 40% of the total land area is used for agricultural purposes. Cultivation in extensive way is done mostly in the Damodar Valley, for these area has good irrigation facility. The main agricultural crops are the paddy, pulses, oilseeds, maize, sugarcane and vegetables. The famous agriculture produce of the district is lac, production of which is at present on the wane. The district is gradually gaining reputation for tea and teak (Segun) cultivation also.

**g) Irrigation :** Out of the total area under crop, 70,260 hectares of land is under irrigation including the area under river lift irrigation. 27,330 hectares of land receives water from government canals, 27,810 hectares of land is irrigated by tanks and 1,020 hectares of land by wells. There are 132 river lift irrigations. (Source : District Statistical Hand Book 2001, Govt. of West Bengal)

**h) Animal Husbandry :** As per last Cattle Census Report, West Bengal and last Live Stock Census Report more than 8 lakhs cattle, 1 lakh 60 thousand buffaloes, 3 lakhs sheeps and 6 lakhs 47 thousand goats were returned in the district. Out of the total cattle 2.36 lakhs were cows (Source : District Statistical Hand Book, 2001, Govt. of West Bengal)

**i) Fishery :** Neither rich variety nor rich quantity of fresh water fishes is available in the district. However, some important edible fishes like magur, singi, ruhi, katla, mrigel, koi, maurala etc. are found in the ponds, large artificial reservoirs and the main rivers. Now there are a number of fish farms to culture quick growing of exotic varieties of fishes.

**j) Electricity & Power :** Electricity is generated in the Santaldih Thermal Power Station which is the only large scale power generating source in Puruliya. One Hydroelectric Power Generation Station at Ayodhya Hill of Bagmundi PS is under construction by the PPSP of W.B.S.E.B. in collaboration with a Japanese company. The proposed project would generate 900 MW energy after completion of the construction work. Presently Solar Power, Gobar Gas Plants under Lokdeep, Kuthir Jyoti Programme are also being installed in many areas. In the year 2000-2001, 91,845 units (thousands KWH) electricity were consumed. In the district there are 12 towns and 2,683 villages with 1,232 villages having been electrified. Of 1,232 villages, 1,189 villages are having electricity for domestic purpose, 156 villages for agricultural purpose, 305 villages for other purposes and 127 villages are using electricity for all purposes.

**k) Industry :** The infrastructural facility to set up industries like cement, ceramic, ministerial and other allied industries are available in Puruliya district.

**Present industrial status of the district is as follows :**

**Large Scale Industries :**

I) Santhaldih Thermal Power Station

II) Damodar Slag Cement

III) Puruliya pumped storage project by WBSEB with Japanish collaboration is under construction at Ayodhya Hills of Bagmundi PS with the targeted capacity of 900 MW.

**Medium Scale Industries :**

There are eleven different medium scale industries running in the district.

**Cottage & Small Scale Industries :**

IV) During 2nd All India Census of Small Scale industrial units registered upto 31st March 1998 were 1,879 out of which 1,570 were operational.

Beside it there are number of industries based on aericulture and lac. Brood lac and stoick lac in raw form are available in Jhalda and Balarampur. Tassor and silk of Raghunathpur Town are well known in the State. Cotton fabrics and bell metal products of Puruliya Town are other important handicrafts of the district. (Source : Information supplied by the District Administration )

**l) Trade and Commerce :** Paddy, straw, rice and lac - these are four important agro-forest commodities of the district. The main forest produce of the district is lac. The collection of lac is generally carried on by small cultivators mostly belonging to scheduled castes and scheduled tribes. They mainly depend on the rural markets i.e. hats for sale of lac. All these four important commodities, vegetables also included, are exported to other districts and states of the country.

**m) Transport :** Total roads maintained by PWD in the district of Puruliya are of 809.66 kms and total roads maintained by Zilla Parishad (Panchayat) are of 3,930 kms and by Municipalities are of 163.52 kms. Total number of registered Motor Vehicles plying on the roads is 33,294.

**(vi) Gram Panchayat :**

In West Bengal since 1978 the panchyat system began to function in full fledge. The Panchayat system is under 3-tier functionary. In the district at the top there is Zilla Parishad (ZP) at district Headquarters level; the Panchayat Samities (PS) and at CD Block and under them there are Gram Panchyat consisting of elected members from the respective villages. Since 1978 the panchayat system has been performing a vital role for the development from village level to district level and fund in regular manner are placed for implementing the economic plans from Gram Panchayat level to district level.

In spite of some shortcomings, the panchayat system has changed the village economy, social and

political system. In West Bengal small and marginal farmer have got cultivable land, the wages of agricultural labourers have been increased. Due to land reforms and other village development programmes the productions of agriculture has increased significantly. As a result, the intake of food has also increased.

The district has 15 panchayat samities with 170 gram panchayats consisting of 2,683 villages.

# major characteristics of the district

major characteristics of the district

**Major Characteristics of the district, contribution of the district in the form of any historical figure associated with the district**

The aboriginal people practising animism is the distinct part of characteristic of the district Puruliya. The other major characteristic of the district is its Manbhum dialect. Following historical figures are associated with the district :

(1) Nilmony Singha - Participant in the Sepoy Rebellion, 1857
(2) Gambhir Singh Mura - Eminent Chhou Danseur)
(3) Nibaran Chandra Dasgupta - Veteran Freedom Fighter & Social Activist

# Major Social and Cultural events, natural and administrative developments and significant activities during the decade

Innumerable fairs, festivals and socio-cultural events are held throughout the year in this district having wide admixture of religion, community and culture. The followers of the main faiths and some tribal groups observe their own religious festivals whereas they intermingle in *melas* (fairs) and ceremonies. Brief notes on the major festivals and *melas* (fairs) of the district are given below :

**Festivals**

**State level common :**

In all the districts of the state certain religious festivals are observed in such a huge magnitude that the impact is cross-cultural involving the overall market economy. Those are :

1. Durga Puja is the most popular annual festival of the Hindus held both at community level and at clan or household level. The four day festival relate to worshiping of the mother goddess 'Durga' and symbolising the victory of good over evil is held in the month of *Ashwin* (Bengali calender) or September-October. In folk culture this festival also represents the home coming of Mother Durga (Parbati) - wife of Lord Shiva along with her two sons and two daughters to visit her paternal home from their snowy abode of the Himalayas. This festival therefore also represents a family reunion of members staying at distant places.
2. In north India 'Deepavali' or the festival of lights is celebrated to commemorate the home coming of Lord Rama to Ayodha after fourteen years of punishment as per the epic Ramayana. But in Bengal Kalipuja or Diwali is related to worshiping goddess 'Kali' or 'Shakti' (the power) as another expression of mother cult. This one day event is held on the moon less night following Durga Puja in the month of *Kartik* (mid-Oct to mid-Nov). Decoration with lights is a part of the observation adding a flavour of the famous national festivity called the 'Festival of light or Deepawali'.
3. Dol Jatra or Holi is the festival of colours. In fact the colours of the spring time nature is celebrated with much grandeur for expressing the feeling of love and friendship as symbolized by the holy conjugation of Lord Krishna and Radha.
4. Rathajatra or the car festival of Jagannath, Balaram and Subhadra is held during *Ashadh* (mid-June to mid-July).
5. Id-ul-Fitr is the most popular religious festival of the Muhammedan population in the state. This is observed with a mass prayer *(Namaz)* and joyful get together after the month-long fasting during 'Ramzan'.
6. The next important festival of the Muhammedans, Idu'z Zuha or the Festival of Sacrifice, is also celebrated with mass prayers and exchange of gifts and sweet meat etc. with a spirit of brotherhood.
7. Muharram is another popular festival of the Mohammedans held on the thirtieth day after Idu'z Zuha to mourn the death of Hassan and Hussain - two grandsons of the Prophet Muhammed in the battle of Karbala. Tajiyas are built and taken in a procession symbolizing the memorial tombs of those two martyrs.
8. The Christmas day on 25$^{th}$ December and Good Friday in April are the two most important religious festivals of the Christian community. 'Christmas day', in particular, is observed with prayers in the church to commemorate the birth of Jesus Christ and the festivity continues till 1st January - the new calender year. The day of Christ's crucifixion is the day to pray again on Good Friday.
9. The Sikhs celebrate their most important religious festival on the occasion of Guru Nanak's birth day, the founder of the Sikhism.
10. The full moon day of May is observed as Buddha Purnima by the followers of Buddhism in different pockets of the State. This is the biggest festival for Buddhists to mark the occasion of the birth of Lord Buddha.
11. The followers of Jainism observe Mahabir Jayanti which is the birthday of Lord Mahabir in the month of April.

**District specific :**

Most of the festivals of Puruliya are related to agricultural operations like Sowing, Planting, harvesting and they move in cycles round the seasons.

**(1) Gajan of Siva -** Called *'Gnaer Parab'* (festival of the village) in Puruliya. The naming indicates how

popular the festival is. It is also called *'Chait Parab'* as it takes start during the closing week of *Chaitra* (mid-March to mid-April) and coincides with the Chadak. *Gajans* are always accompanied by local fairs - large or small. Thousands gather on the occasion of annual Gajan festival near the Siva temple. People of the aboriginal descent - men and women - collect on this occasion in large numbers and amuse themselves with group dances and music, in particular with 'Chhou' in Puruliya. Others mostly Hindus, participate in the hook-swinging *(chadak)* ceremony. Hook-swinging is held in imitaiton of the sun at the beginning of spring or at the solstices - a piece of magic to help the sun move. Previously there were gruesome rites like Ban - phore or Agun - sannyas but the rites are now banned by law.

**(2) Disum Sendra of Ajodhya Hill -** Once immensely popular but now on the wane due to denudation of forest, this festival takes place in Ajodhya Hill of Bagmundi. The word 'Disum Sendra' literally means hunting of the country and actually hunting of the wild animals. Previously its duration was of five days, but now because of scarcity and many prohibitions on killing of wild animals it is confined to a day only. It happens in the full moon night of Baisakh. At the end of the game during daytime the hunters assemble in a meeting place called Sitachatan. And then the festival starts in the moonlight.

**(3) Gajan of Dharmaraj -** Dharmathakur is the most popular village deity among the Bauris and the Doms of Puruliya. However, other scheduled and non-Brahmin castes also worship Dharma. There are various forms of the deity in the district. Gajan of Dharmaraj has all the necessary ingredients that the gajan of Siva and Chadak have.

**(4) Karam or Jawa Parab -** It is celebrated on the 11th day of the bright half of *Bhadra* (mid-Aug to mid-Sep). It is mainly woman's festival. In the month of Bhadra, every night, the women sing and dance and a few days before the closing of the month they fill some earthen bowls with sand and earth and throws seed on them. These are carefully tended and watered so as to germinate by the sankranti or last day of the month. On that day a branch of Karam tree is brought from nearby forest and planted in a suitable site of the village. Around this branch the seed-bowls with sprouting blades are placed (known as *Jawar dali sajano*) and the girls (mainly young) sit in a circle, listening to *dharmu - karmu bratakatha*. After the tales are told, they sing and dance in a circle and either return home or go to attend the Ind parab which is also held on that day. (Benoy Ghosh - Cultural Profile of Puruliya : District Census Hand Book 1961 - Puruliya)

**(5) Bhadu -** Bhadu is celebrated in the Bhadra. Men and boys usually participate in this dancing festival. Though one account of the origin of the Bhadu festival has been connected to a daughter of Panchet Raj family and another to a daughter of Raja of Kashipur. Actually the festival is related to fertility cult.

**(6) Tusu -** Tusu is also related to fertility cult. It is greatest of festivals of western border of Bengal and Puruliya is the epicentre of this festival. It is performed from the last day of the month of *Agrahayan* (November - December) to the last day of the month of Pous (December - January). Among all the strata and classes of Puruliya the festival is in practice. A small account of Tusu is given below :

"Generally, Tusu is worshipped widely with the symbol of an concave earthen plate. Tusu is placed in a corner of a room decorated with 'Alpana' or at the foot of the homestead pole (Bastu Khunti) or on a particular altar or in the niche of the room. The earthen plate is generally painted with the paste prepared out of rice-powder and water, and in many cases red and white lines are drawn on it with vermilion and chalk. On the earthen plate new paddy, husk of new paddy, balls made of cow-dung and husk, balls of cow-dung, paddy strewn on hemps of cow-dung, paddy and grass, mustard and radish flower, cowrie and mustard, etc. are placed. In certain places lighted earthen lamp is placed on the earthen plate. Next in importance to the earthen plate is Tusu ghat (small pitcher) - filled with water. Tusu ghats are of two types - (1) earthen pitcher painted with the face of a woman and (2) earthen pitcher having lines drawn with cow-dung and rice-paste with dots of vermilion. On the mouth of Tusu pitcher similar items are placed like that of Tusu plate. One of the distinct particulars of Tusu is Choral (differently pronounced as Chodal, Choudal, Choul); Choral is a chariot-like four-legged structure made of strips of bamboo sticks or wood covered with coloured papers. Their size vary from one cubit to five or seven cubits in height. In places the Tusu plate is placed inside the Choral or in some places Choral is placed beside the Tusu plate or Tusu image. In many places like Punyapukurbrata - sacred-pond rite, Tusu Puja is performed after digging a small pond-like hole filled with water in the courtyard of the house with paddy husk and flowers. In certain places Tusu image is also current. The rural potters make idols of various shapes big and small of Tusu. Though in some public festivities big images are found, but the traditional measurement

of Tusu is not more than one cubit generally. The complexion of Tusu is yellow and the wearing is blue. In the two hands of Tusu paper-lotus are held and behind the head of Tusu a similar hallow or a circular canvas of coloured papers are placed. The almost plain breast of the image represent the minor maiden character of Tusu. The Tusu image is decorated with various ornaments made of cork, coloured paper and tinfoil. The image of Tusu is found in standing posture generally. Although Tusu is without any carrier generally, in some places Tusu image is rarely seen seated on a swan. Perhaps in later times swan as carrier of Tusu was introduced by the influence of the image of Saraswati. The Tusu images are generally placed on a small wooden stool or on a belmetal plate.

There are some distinct stages of the festival and worship of Tusu - Sthapan, Palan, Jagaran and Bisarjan. On the last day of the month of Agrahayan the Tusu image is placed i.e., *Sthapan* (placing); throughout the month of Pous from the evening till late hours in the night the worship of. Tusu is performed with dance and song i.e., Palan (observance); throughout the night before the last day of the month of Pous Tusu Puja is performed with dance and song i.e., *Jagaran* (keeping awake); and on the next dawn i.e., on the last day of the month Pous Tusu is immersed in the river or in some local pond i.e., *Bisarjan* (immersion). In Tusu Puja from the start to finish there is no use of 'Shastric Mantra'. The Tusu festival is observed through dance and song." (Dr. Tushan Chattopadhyaya : Tusu - A Folk Festival - District Census Handbook, 1961- Puruliya)

**(7) Garaya or Saharai or Bandhua Parab** - This cattle festival is celebrated in *Kartick* (October-November) on the next day of Kali Puja. It begins on Kali Puja night with drink and dance. The cattle are kept awake by the constant beating of drums and loud ahira songs. "Next morning pujas are offered inside the cattle shed. The following day that is on brothers day the horns of cows and buffaloes are smeared with vermillion and oil and some are tied with strong ropes to different posts planted close to each other on village-streets. These are then frightened by frantic drumming and often by the display of red cloth, blanket or skin, till they break away from the posts." (Benoy Ghose : Cultural Profile of Purulia - District Census Handbook, 1961 - Puruliya)

**Fairs :**

Numerous fairs occasioned by festivals take place in Puruliya. A brief account of some of the fairs with maximum congregation and some with largest duration as per District Census Handbook, Puruliya 1961 is given below.

Among the fairs, mostly populated fairs used to take place in Tulin under Jhalda-I CD Block (gathering of 80,000 - 90,000 people) on two occasions of Makar Sankranti and Sib Puja on *Poush* (January) and *Chaitra* (March-April) respectively, duration being of a day for both the occasions. Next comes Balarampur (Town) where 40,000 people used to assemble in a fair on the day of Rathajara held in the month of *Asharh* (June-July). In Deuliharup (presently Deuli ?) under Baghmundi CD Block fair used to take place on the day of Sib Puja (Eruanath and Nakti Thakurani) in the month of *Jaistha* (June) in which the estimated attendance was 30,000-35,000. In both Sonathol village under Kashipur CD Block and Para village under Para CD Block attendance was estimated at 20,000-25,000 on the occasion of Dolejatra in the month of *Falgun* (mid-Feb to mid-March) and Dharmaraj Puja in the month of *Baisakh* (mid-April to mid-May) respectively. Duration of Dolejatra in Sonathol was of 4 days and of Dharmaraj puja was of 3 days.

The fair that used to continue for largest number of days was in Saltor village under Neturia CD Block on the occasion of Birth day of Pir Saheb in the month of *Chaitra* (mid-March to mid-April) in which the attendance was estimated at 3,000-4,000.

# Points to Note

**(1) New Sub-Divisions created subsequent to 1991**

| | |
|---|---|
| Puruliya | Sub Division:- Purulia Sadar (East) |
| do | Sub Division:- Purulia Sadar (West) |

**(2) Decrease in the area of CD blocks due to changes in administrative jurisdiction**

| | |
|---|---|
| Puruliya | Raghunathpur-II |

**(3) Increase in the area of CD blocks due to changes in administrative jurisdiction**

| | |
|---|---|
| Puruliya | Para |

**(4) New Towns created subsequent to 1991**

| | |
|---|---|
| Puruliya | Barabazar (CT) |
| do | Par Beliya (CT) |

**(5) New ward created /merged subsequent to 1991 due to increase / readjustment of statutory areas of the Municipality /M.Corp.subsequent to 1991 under statutory/ administrative order**

| | | | 1991 | 2001 |
|---|---|---|---|---|
| Puruliya | 41405000 | Raghunathpur (M) | 12 | 13 |
| do | 41409000 | Jhalda (M) | 9 | 12 |
| do | 41410000 | Puruliya (M) | 20 | 22 |

**(6) Increase /Decrease of village areas due to change in administrative jurisdiction**

| | | |
|---|---|---|
| Puruliya | 02365200 | Naudiha (P) |
| do | 02365700 | Raghabpur (P) |
| do | 02378200 | Palanja (P) (New J.L.-6) |
| do | 02378300 | Ketika (P) (New J.L.-5) |
| do | 02407700 | Bundla (P) |
| do | 02408400 | Bara Radi (P) |
| do | 02408500 | Nanduara (P) |
| do | 02363100 | Manguria (P) |
| do | 02378100 | Dulmi (P) |
| do | 02513800 | Jhalda (P) |

**(7) Parts of the villages falling under urban jurisdiction under statutory or administrative orders**

| | | |
|---|---|---|
| Puruliya | 02365200 | Naudiha (P) |
| do | 02365700 | Raghabpur (P) |
| do | 02378200 | Palanja (P) (New J.L.-6) |
| do | 02378300 | Ketika (P) (New J.L.-5) |
| do | 02407700 | Bundla (P) |
| do | 02408400 | Bara Radi (P) |
| do | 02408500 | Nanduara (P) |
| do | 02363100 | Manguria (P) |
| do | 02378100 | Dulmi (P) |
| do | 02513800 | Jhalda (P) |

**(8) Villages uninhabited in 1991 Census but inhabited in 2001 Census**

| | | |
|---|---|---|
| Puruliya | 02352700 | Nimudi |

| | | |
|---|---|---|
| do | 02354000 | Ritudi |
| do | 02355400 | Phuljhariya |
| do | 02390600 | Premsinghdih |
| do | 02412300 | Ganguradi |
| do | 02422600 | Ranpur |
| do | 02423300 | Sultandi |
| do | 02424700 | Jhagradi |
| do | 02424900 | Purna Panchakot |
| do | 02460200 | Phulberia |
| do | 02491900 | Burahatu Alias Kashidih |
| do | 02494300 | Harada |
| do | 02494900 | Gourangdi |
| do | 02500900 | Adhikaridi |
| do | 02526300 | Lalpur |
| do | 02552200 | Rangagora |
| do | 02564500 | Tipur |
| do | 02576200 | Sitaramgora |
| do | 02599400 | Pinrra |
| do | 02604900 | Dabladih |

**(9) Villages inhabited in 1991 Census but uninhabited in 2001 Census**

| | | |
|---|---|---|
| Puruliya | 02349100 | Aroyargari |
| do | 02373100 | Phulbaria |
| do | 02389500 | Maldi |
| do | 02441500 | Mahuljodha |
| do | 02467900 | Dhadkigora |
| do | 02583200 | Chak Manushtupa |

**(10) Villages uninhabited both in 1991 Census and in 2001 Census**

| | | |
|---|---|---|
| Puruliya | 02348200 | Labindi |
| do | 02353400 | Silphor |
| do | 02367000 | Raghuchak |

**(11)** The Village land area figure in Hectares has been converted from the village(mouza) wise land area in Acres as maintained by Director,Land Records & Survey (DLRS), Govt. of West Bengal.

**(12)** Villages marked as (P) indicate concerned village is partly Rural and partly Urban or is bifurcated into two CD Blocks. However the total area figure of the villages (mouzas) as per records maintained by DLRS, Govt. of West Bengal has been given here as no record of such bifurcated village area is available with DLRS, Govt. of West Bengal. In case parts of a village fall under more than one CD Block the total land area figures for these parts have been extimated on the basis of plot nos mentioned in the concerned Govt. order and through interpolation/extrapolation of the areas of the concerned plots from R.S. maps maintained by DLRS, Govt. of West Bengal.

**(13)** The area of CD Blocks as shown here is summation of land areas of all villages (mouzas) within the concerned Blocks and is estimated only. This is because no CD Block wise land area figures are available with DLRS, Govt. of West Bengal.

**(14)** In case of statutory and non statutory urban areas, the areas are given here are estimated only. This is because no town

wise area figures are available with DLRS, Govt. of West Bengal. The area figure have either been collected from the concerned town authorities or have been calculated from existing village (mouza) wise area figures as maintained by DLRS, Govt.of West Bengal.

**(15)** The total land area for State/ District as given here is as per area figures obtained from Survey of India. However, the totals of / villages / Blocks / Towns as given here are as per records maintained by Directors, Land Records & Survey (DLRS), Govt. of West Bengal.

# Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts : Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts : Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD Block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being the lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991

census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Vikram Sen, IAS, Director of Census Operations, West Bengal. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

# Preface

The task of publishing the District Census Handbook (DCHB) is a joint venture between the central and state government and the recent publication for 2001 Census happens to be the sixth in the series of its publication since the year 1951. Since then, in view of the contemporary requirement of data, the coverage of DCHB has widened and received regular refinement. Hence, it has become the most widely used publication compiled and prepared by the Census organization. The presentation of data is done in two parts, viz., the Part-XII-A and Part-XII-B seperately for the bigger districts and single combined volume for the each smaller district.

Part-XII-A contains Village & Town Directory data with some important tables depicting availability of basic civic amenities at the C.D. Block/Village and Town level. In the other hand, Part-XII-B presents district Primary Census Abstract (General), Primary Census Abstract for Scheduled Caste, Primary Census Abstract for Scheduled Tribe and CD Block/Villagewise Primary Census Abstract and Urban Primary Census Abstract. In addition to the above an effort is made to furnish various essential information about the district such as – historical background, administrative set-up, drainage, physiography, climate, place of historical, archaeological and tourists importance etc. The 2001 Census DCHB presents a variegated picture of the human life as reflected by the census data. The scope of analysis of census and non-census data has considerably increased through various summary tables and inset tables. Besides brief analysis of basic census data in the form of PCA and analysis of amenities and infrastructural facilities available in villages and towns in the form of Village Directory and Town Directory, the data on houses and household amenities have also been briefly analyzed and included in this volume. Not only this, we have made efforts to present comparative data on various aspects such as distribution of population, growth rate, density of population, sex ratio, work participation rates, literacy, language, religion, scheduled caste and schedule tribe population (since 1951 or 1961) mostly by residence for the benefit of data users. Likewise, in the annexures, brief analysis on some socio-demographic, economic, migration and cultural aspects of the population pertaining to 1991 Census has also been made.

There has been regular and continuous flow of suitable suggestions and advice from Shri J.K. Banthia, Registrar General, India, throughout completion of the work for which I express my deepest and sincere gratitude to him. Other officers in the office of the Registrar General, India, New Delhi, contributed their share in the befitting manner for which as well I record my thankfulness to Shri R.G. Mitra, Deputy Registrar General (C&T), Shri R.P. Singh, Deputy Registrar General (Map), Shri I.C. Agarwal, Senior Research Officer (S.S.) and Shri S.L. Jain, Deputy Director (S.S.), for without their timely help and guidelines this publication would not have appeared before us in time and in this form.

I shall be failing in my duties if I do not acknowledge the contributions made by the District Census Officers/ District Magistrates and innumberable Village, Block and Municipal level officials of all the districts of West Bengal for arranging collection of village and town directory data by the local officials from the villages/towns under their jurisdiction.

In my own office my thanks are due to each one of the staff members for their zeal and enthusiasm shown in completing this project successfully at various stages of work very much within the stipulated time. As it is not feasible to express my thanks individually a separate page of acknowledgement is included in this publication.

**Vikram Sen**
Director of Census Operations,
West Bengal

# Acknowledgements

A. The Directorate of Census Operations respectfully acknowledges the devoted, sincere hard work rendered by about one lakh fifty thousand Census Enumerators, Supervisors and Officials at the District, Block and Municipal levels without whose heroic efforts, the Census 2001 could never be undertaken. Three among these Enumerators also laid down their lives while in discharge of Census work.

B. The Census Directorate, West Bengal also gratefully acknowledges the sincere and dedicated work of the following officers/officials of this Directorate associated with the preparation of this Hand Book.

# District Highlights - 2001 Census

1. Puruliya district occupies 14th position in terms of population in the State.
2. Puruliya is one of the least urbanised districts of the State having slightly more than 10 per cent of the total population in urban areas, whereas more than 27 per cent of the State's total population lives in urban areas.
3. Puruliya's growth rate is not high and it ranks 15th in the State.
4. Puruliya has the lowest density (population per Sq. Km.) in the State (405).
5. The sex ratio of the district (954) is well above the State's sex ratio (934).
6. Literacy rate of the district is 55.6 per cent thereby making its rank 15th in the State.
7. There are 215 uninhabited villages in the district.
8. There is no village having population of 10,000 and above.
9. Jaypur (Jaipur CD Block) is the most populated (9052) and Premsinghdih (Raghunathpur-II CD Block), Jhagradi and Jambani ( both Neturia CD Block) are the least populated villages (1 person each).
10. Agriculture is the principal occupation of the people of the district. Nearly 55 per cent of the main workers of the district are engaged in agricultural sector.
11. Participation of women as Cultivators is equal to that of men, almost double of the males in Agricultural Labourers category and more than double in Household Industry category.
12. Manbazar-I CD Block has the highest number of villages (244) and Balarampur CD Block has the lowest (90).
13. Banida village of Bagmundi CD Block has the largest area (2084 hectares) and Gangtiadi of Santuri CD Block is the smallest (2 hectares).

# Important Statistics of the District - 2001 Census

| POPULATION | | WEST BENGAL | PURULIYA |
|---|---|---|---|

| | Urban | 1901 | 26,339 | 13,863 | 12,476 | - | - |
| | | 1911 | 30,688 | 16,246 | 14,442 | 4,349 | 16.5 |
| | | 1921 | 34,391 | 18,283 | 16,108 | 3,703 | 12.1 |
| | | 1931 | 40,037 | 21,514 | 18,523 | 5,646 | 16.4 |
| | | 1941 | 61,258 | 33,148 | 28,110 | 21,221 | 53.0 |
| | | 1951 | 78,470 | 40,849 | 37,621 | 17,212 | 28.1 |
| | | 1961 | 92,478 | 48,951 | 43,527 | 14,008 | 17.9 |
| | | 1971 | 132,367 | 70,018 | 62,349 | 39,889 | 43.1 |
| | | 1981 | 166,762 | 87,538 | 79,224 | 34,395 | 26.0 |
| | | 1991 | 210,006 | 110,599 | 99,407 | 43,244 | 25.9 |
| | | 2001 | 255,426 | 133,024 | 122,402 | 45,420 | 21.6 |

Puruliya has recorded continuous growth in its population with the only interruption in 1921 when it declined because of heavy mortality caused by influenza epidemic of 1918-19. The decadal population variation of 1921 is (-) 6.0 per cent with (-) 6.6 per cent in rural 12.1 per cent in urban. The highest growth is observed in 1991 (20.0 per cent).Considering the rural-urban growth separately, the maximum rural growth rate is noticed in 1991 (19.4 per cent) and the maximum urban growth rate is noticed in 1941 (53.0 per cent) but it decided to 28.1 per cent in 1951. As already discussed, 1921 is the year for the lowest growth rate for overall as well as its rural and urban components for the reason stated above.

**Note :** While calculating density, area figures have been taken upto two decimal points

Puruliya district is predominantly rural in terms of number of its urban population and area coverage under towns in relation to total population and total area of the district. There are 12 towns in the district, out of which 3 are statutory towns and rest are non-statutory, i.e., census towns. The density of population of the district is far below (405) the state average (903). Among the CD Blocks, the highest density is recorded in Para (559) while the lowest in Bundwan (238). There are 2,683 villages (2,468 inhabited and 215 uninhabited ) in the district. The highest number of inhabited villages is seen in Manbazar-I CD Block (217) and highest number of uninhabited villages is also noticed in the same Manbazar-I (27).

Among the urban units, Puruliya Municipality with 8,187 population per sq. km. is the most densely populated whereas Santaldih Thermal Power Project Census Town with 945 population per sq. km. is the most sparsely populated town.

| 23 | Raghunathpur (M) | Urban | 0 | 0 | 0 | 0 | 9 | 77 | 39 | 38 |

It can be seen from the above table that the houseless population in the district is 1,126 consisting of 614 males and 512 females. The rural urban break-up shows that out of total houseless population, 791 (422 males and 369 females) lives in rural areas and 335 (192 males and 143 females) lives in urban areas. Among the various CD Blocks and towns reporting houseless population, the highest number of houseless population is returned by Puruliya Municipality (126) consisting of males 81, females 45 against the lowest number found in Arra census town (4) with males 1 and females 3. The total institutional population in the district is 15,020 (males 11,432, females 3588) of which 12,335 (males 9,466 and females 2,869) lives in rural areas and 2,685 (males 1,966, females 719) lives in urban areas. Among the CD Blocks and towns, the highest number of institutional population lives in Purulia-I CD Block (1,650) followed by Purulia Municipality (1,616) and Purulia-II CD Block (1,413) against the lowest number recorded by Nabagram census town (20). Hijuli and Parbeliya census towns have no institutional population.

# History & Scope of District Census Handbook

**(i) History and Scope of the District Census Handbook**

The District Census Handbook a joint venture of the State Government/ Union Territory Administrations and the Census Organisation, is one of the most important publications, particularly in the context of planning and development at grass root level. It is perhaps the only source that gives village and town level information concerning several demographic and socio-economic characteristics and also on availability of important civic amenities. This publication was for the first time brought out in the 1951 Census. In fact it is the replacement of 'Village Statements' used to be prepared in the Censuses of Pre Independence period and since then it is published after each decennial Census with some innovations/ improvements.

**Scope & coverage of District Census Hand Books of 1951-1991 Censuses**

Initially the scope of the DCHB was confined to certain important census tables on population, economic and socio-cultural aspects and also the Primary Census Abstract (PCA) of each village and town of the district. The DCHB published after the 1961 Census contained a descriptive account of the district, administrative statistics, Census tables and Village and Town Directories including PCA. In 1971 Census the DCHBs were brought out in two parts viz. Part A comprising Village and Town Directories and Part B comprising Village and Town PCA in respect of all the States and Union Territories. The Third part of the DCHBs comprising of administrative statistics and district Census tables. During 1981 Census new features alongwith restructuring of the format of Village and Town Directory were introduced in the DCHB. These were published in two parts for each district. While Part A comprised of Village and Town Directories, the PCA of Village and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA upto tahsil/town level were provided in Part-B. To illustrate, all the amenities except electricity, were brought together in the Village Directory and if an amenity was not available in the referred village, the distance in broad ranges from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the Village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Direcotries also, keeping in view the requirements of the Minimum Needs Programme, a Statement (IV-A) on slums was provided so as to enable the planners to chalk out the programmes for providing civic amenities in the slums. In this statement details on civic and other amenities were presented for the notified slums of Class I and Class II towns. Apart from this, one column on the Scheduled Castes and Scheduled Tribes population and another on adult literacy classes/centres were added in statements IV and V respectively.

The manner of presentation of the DCHBs for the 1991 Census was more or less similar to that of 1981. However, the format of PCA was restructured slightly in the 1991 Census for the benefit of data users. Nine fold industrial classification of main workers was given as against four-fold, industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age group was also included in PCA for the first time with a view to enabling data users to compute more realistic literacy rate as all children below seven years of age have been treated as illiterate in 1991 Census. It was expected that these changes would help the planners in chalking out more effective developmental programmes.

One of the most important innovations in the 1991 Census was the Community Development Block (CD Block) level presentation of data in the Village Directory and PCA instead of the traditional Police Station level presentation. It was expected that the presentation of Village Directory and PCA data at CD Block level would help the planners in formulation of micro level development plans, as the Blocks are the lowest administrative unit for developmental planning. In order to facilitate the task of administrators, Planners and Researchers to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both the computer and manual codes for each Village were provided for the 1991 Census alongwith the corresponding codes of 1981.

**Scope & coverage of District Census Handbooks of India, 2001**

The District Census Hand books for Census of India, 2001 are more informative and exhaustive in terms of coverage and context. The coverage in Village Directory has been further broadened and includes facilities like banking, recreational, income and expenditure of Gram Panchayats and most important commodity/commodities manufactured in the village. Apart from these, more details on distance (s) of basic health and educational facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre, Primary Health Centre and Primary School), if not available in the village are proposed to be given for the first time.

The type and extent of basic amenities available in the villages and towns are proposed to be analyzed in depth with the help of a large number of cross classified inset table & statements. Brief analytical notes /accounts on important aspects concerning respective districts viz. (i) firstly, mortality and migration, (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/place of residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education & (vii) distribution of different mother tongue, all based on 1991 Census, will be given at the end of the text as separate annexures. It is also decided to provide two lists separately indicating names of colleges and hospitals available in the villages and towns in the district.

For the District Census Handbooks under Census of India, 2001 more emphasis has been given towards quality of village and town level amenity data. With a view to find out erratic or aberrant trends or in inexplicable fluctuations in amenity data, similar information brought out by the State and Central Government have been collected & these information have been used to verify the Village Directory & Town Directory data. The inconsistencies noticed in Village Directory & Town Directory data have been removed in consultation with the respective district administration as far as possible.

# Brief History of the District

Puruliya was not originally a part of Bengal at the time of Independence and partition in the year 1947. This uneven territory of Puruliya (within the erstwhile district of Manbhum) was acquired by the British Rulers with the *dewani* of Bengal, Bihar and Orissa in 1765. The area was known as the 'Jungle Mahal' for its coverage by dense natural forests. The British failed to revive loyality among the aboriginal inhabitants and petty Zamindars of this 'Jungle Mahal' in spite of launching several military operations. To improve administration, by bringing this wild area under the British Rulers, 'Jungle Mahal' was broken up by Regulation XIII of 1833 and a new district called 'Manbhum' with its headquarters at Manbazar was constituted. In 1838 the headquarters was shifted to Puruliya for its strategical importance, administrative convenience and commercial activity etc. Manbhum district was under the administration control of Commissioner Chhota Nagpur Division. This district consisted of many small estates, which were established by the respective chieftains. In all, there were thirty nine parganas, of which, Panchet was the largest estate consisting of nineteen parganas. Though nothing more than nominal gesture, the local king of Panchet (Pachet) had acknowledged the Mughal suzerainty at the time of reign of Emperor Akbar.

To the British, the purpose for improving administration was to augment collection of land revenue. The foreign rulers managed to influence the local chieftains, agents to exert pressure to the tillers of the land to realize appointed revenue, who reclaimed the Jungle for cultivation.

The situation deteriorated when the tillers, i.e. the Santal, Munda and the cultivators were threatened by eviction from their land. The Santal Mutiny of 1855-57 was the result of such aggression by the British rulers. Movement of Birsa Munda in the district of Ranchi, Bihar (presently Jharkhand) in 1901 was also for the same cause.

The struggle started by the aboriginals of Manbhum ultimately merged with the struggle for the freedom of this country. Finally on 1st November 1956, Puruliya came into being as a new district of West Bengal.

People of Puruliya normally speak in Bengali language but in a different style, called Manbhumi dialect, the words of which seems to originate from a group of Austric, Santhal, Kalarian or Non-Arya communities. The dialect made its deep rooted place in the local folk songs, dance, festivals and all other artistic forms. With the passage of time, many pure Bengali speaking and few Hindi speaking people became permanent inhabitants here, but Manbhumi dialect has survived.

# Administrative Set-up

**(i) Region of the state where district is located :**

Puruliya district is located at the extreme western frontier of the state of West Bengal sharing the boundary shoulder to shoulder with Jharkhand State, erstwhile Bihar.

**(ii) Total number of CD Blocks or the next Administrative units after district and changes therein including jurisdictional changes during 1991-2001 :**

Administratively the district is divided into 3 sub-divisions, viz., the Puruliya Sadar (east) Puruliya Sadar (west) and Raghunathpur. There are 20 police stations, namely, Jaipur, Puruliya Muffasil, Puruliya Town, Para, Santaldih, Raghunathpur, Neturia, Santuri, Kashipur, Hura, Kenda, Arsha, Puncha, Jhalda, Baghmundi, Balarampur, Barabazar, Manbazar, Boro and Bundwan.

There are in all 20 CD Blocks in the district, viz. Jaipur, Puruliya-I, Puruliya-II, Para, Raghunathpur-I, Raghunathpur-II, Neturia, Santuri, Kashipur, Hura, Puncha, Arsha, Jhalda-I, Jhalda-II, Bagmundi, Balarampur, Barabazar, Manbazar-I, Manbazar-II and Bundwan.

**(iii) Total number of Towns/Villages etc.**

Total number of urban units in Puruliya is 12, out of which there are 3 municipalities as statutory towns, namely, Puruliya Municipality, Jhalda Municipality and Raghunathpur Municipality and 9 non-municipal or census towns namely, Par Beliya, Barabazar, Balarampur, Arra, Chapari, Adra, Nabagram, Santaldih Thermal-Power Project and Hijuli and total number of villages in 1991-2001 is 2,683 that has come down from 2,685 of 1991 as a result of some administrative changes. The total number of non-municipal towns in the district has gone up to 9 with the inclusion of Par Belia and Barabazar, which was other wise 7 in 1991 census thereby reducing the number of villages to 2,683. One census town called Santaldih Thermal Power Project Town, which was in Raghunathpur CD Block in 1991 census has been transferred to Para CD Block in this census.

The district has 20 Panchayat Samities with 170 Gram Panchayats consisting of 2,683 villages.

**(iv) If the district is newly created, the area from which it has been carved out**

It is not a newly created district.

**(v) Urban Local Bodies**

The history of urban local bodies dates back in India to Indus Valley Civilisation. In modern India it originated during British rule when in 1687 the first Municipal Corporation was set up at Madras under a charter granted by James-II. There are different types of municipal bodies, namely, municipal corporations, municipalities, notified area comittees, cantonment boards etc. Except the cantonment boards all other types are created under state municipal laws. Cantonment boards owe their origin to the Central Act called Cantonment Acts, 1924. A municipality is a body politic and corporate, constituted by the incorporation of the inhabitants of a city or town and municipal corporations constitute the highest or topmost form of urban local governments and are created for big cities by the enactment of state legislatures or of Parliament in case of union territories. A notified area committee is created for an area which does not fulfil all the conditions laid down as necessary for the constitution of a municipality or it may also be created for newly developing towns or areas.The councils of all these corporate bodies except notified area comprise elected, coopted and associate members. They come through adult franchise based on secret ballot. The notified area is governed by the state government through a body nominated by it. Primary object of every urban local body is to provide certain civic amenities to the people at their footsteps and the overall development of the people.

As already stated, there are 3 municipalities in the Puruliya district, namely Puruliya, Jhalda and Raghunathpur. Puruliya Municipality was established in 1876, Jhalda Municipality in 1886 and Raghunathpur Municipality in 1888.

**Civil Administration**

The civil Administration of the District consists of the District Magistrate as the Principal Executive with the 3 Sub-Divisional head and under them there are Block Development Officers under each CD Block. Under Police administration, Superintendent of Police is the head of the district and under him there are three Sub-divisional Police Officers with Inspector in-charge/ Officer in-charge in each police station. At the district Head quarters, the District Judge is the head of the judiciary and Sub-divisional Judicial Magistrates are sitting in the courts at the sub-divisional level.

# Physical Features

**(i) Location and Size :**

Puruliya happens to be one of the 18th districts of the state of West Bengal. According to location, it is in the extreme west sharing its boundary with the neighbouring state of Jharkhand, erstwhile Bihar. It lies between 22°4′ to 23°45′ North Latitude and 85°55′ to 86°55′ East Longitude. The district is bounded by Jharkhand state in the north, west and south. In the east it is founded by Barddhaman,Bankura and Medinipur districts. Puruliya district is the fifth in respect of its area in the state covering an area of 6,259 sq.kms., while it is the 14th district in terms of its population which comes to 2,535,233 persons accounting 3.16 per cent of the State's total population.

**(ii) Physiography :**

The topographical feature shows gradual decent from the uneven Chhota Nagpur plateau to the plain land of the state in the east.The district of Puruliya is divided into three sub micro regions on the basis of elevation and the nature of topography, viz. the 1)Damodar - Darkeshwar Upland, 2)Upper Kasai Basin and 3)Bagmundi-Bundwan Upland.

**1. Damodar-Darkeshwar Upland :** This region lies in the north-east of the district bordering Jharkhand, the erstwhile Bihar State to the north,west and south. The area becomes undulating with hillocks of hard rocks, which are extended from the high plateau of Central India and Chhota Nagpur. There are some hills ranging from 150 to 750 meters approximately in altitude.

**2. Upper Kasai Basin :** The region extends in the central part of the district, where the Kasai river flows. The region has undulating land but in the lower part, there are degraded low lands. The elevation rises from 200 to 300 mts. And its general slope is from west to east and the south-east.

**3. Bagmundi-Bandwan Upland :** This region lies over the north-western and the southern portion of the district. It is a highland area descending from the Ranchi plateau. At some places the high lands are very steep and criss-crossed by the eroting streams. In Bagmundi and Balarampur areas, the Ayodhya Range forms the main high lands. It acts like the watershed for both Kasai & Subarnarekha. The elevation ranges from 475 to 700 meters approximately. The soil of the region are red sandy, red loamy and alluvial.The elevation of the district from main sea level is 677 metres.

**Flora & Fauna :**

The species of flora life predominant in the plateau area of Puruliya are the Palas, Kul, Mahul, Kenod, Bhela, Dha, Pial, Arjun, Asan, Chhatui, etc. Some of these trees bear both grand looking flowers and sweet fruits. In the forest are as Sal, Karum, Sisha, Gumhar, Akashmani, Kusum, Eucaliptus, Fig, Banyan, various bushes and herbs are found. Now-a-days wastelands are being brought under the green shed of various classes of plants by the Forest Department and the Panchayat functionaries.

As regards the species of Fauna World in the district, they are the elephant, found in the jungles of Ayodhya Region, Bundwan and Kuilapal. Besides elephants, the forest of Puruliya is also the wild abode of Bear, Wolf, Hyaena, wild Hog, Rabbit, Deer, Monkey, Bush Cat, Jackal fox etc. The abode of Avis are in the stones groves of Agodya, Jaichandi Phar, Panchet and the forest trees spread over the entire district, shere vultures, Falcon, Kite, Owl, Bat, Peacock, wild Crow, Dove, wild Fowl, Roseband, Parrot, Cuckoo, Sparrow and many other birds are found. Migratory birds are also seen on the quiet watery, greenery spots in the winter season.

**(iii) Drainage :**

The drainage of the district is mainly controlled by the river Kasai (Kangsabati). Other rivers flowing through the district are the Damodar, Subarnarekha, Dwarakeswar and Kumari. All the river have in general an easterly or south-easterly courses. Only the Subarnarekha flows south and receives west and south-west flowing tributaries. The tributaries are non-perennial and subject to flash floods. Their beds are usually deep in gravel and sand and banks are abrupt and broken into gullys.

The Kasai river drains more than three fifth of the district. It is the most important river of Puruliya district. Jabarban peak on the Ghoramara Pahar of Jhalda in western border is the place of origin of the river. It receives the water of many smaller hill streams before

it leaves for Bankura. From west to east it flows almost through the whole of district. Its upper course is non-perennial, but from the confluence of the Bhandu channel, it becomes a wide perennial channel. Its length of flow is 96 kms.

The Damodar marks the northern boundary of the district. Its course through the district is almost due east through the vast Panchet Hill Reservoir. It rises in hilly country of Palamou district of Chhota Nagpur. The most important right bank tributary of the Damodar emptying into the tail-end of the Panchet reservoir is the Gobai or Gowai river, the entire lower course of which is within Puruliya. It has nowhere infiltrated in the district but its valley being the principal coalmine belt of West Bengal and Jharkhand, it exercises great influence over the district.

The Subarnarekha is the westernmost river in Puruliya. It originates from a surface spring near south-east of Ranchi town and after descending to 300 metres from the 800 metres high Ranchi plateau by magnificent waterfalls (like Hudru) and deep easterly gorges, it takes a sharp elbow-bend southwards to describe the western boundary of the Puruliya district. Subarnarekha has good number of left bank tributaries flowing through the district.

The Dwarakeswar rises from the bad lands to the east of Bagalia rail station on the Asansol-Puruliya section. The Dwarakeswar flows east upto Kashipur and then south-east. It receives numerous tributaries on its both banks.

The Kumari issues from the eastern face of the Baghmundi uplands covered by the dense Sal forest. From its source above 630 metres to its confluence at an altitude about 230 metres, this river flows south-southeast almost in a straight and steep channel and then turns east. Near Manbazar it takes a sharp bend towards the south-east and becomes a perennial stream debouching into the Kangsabati reservoir.

Main water features such as tank, lake reservoir etc.

The two most important artificial lakes of the district are the Panchet and the Kangsabati reservoirs respectively. The Kansabati project is primarily an irrigation scheme with flood control as its secondly aim, the district has numerous small storage pools called bandhs, of which most noticeable example is the Sahibbandh at Puruliya. The district is very poor in the underground water resources because of her crystalline basement and the inhabitants resort to extraction of groundwater dug wells.

**(iv) Climate :**

The climate of Puruliya is sub-tropical. The district is well-known as a drought-prone and falls in semi-arid and region of the state. It is characterised by high evaporation and low precipitation. The monthly temperature varies between $7.8^0$C to $46.8^0$C from winter to summer. Average of the maximum and minimum temperature of the district for the preceding 10 years is as follows :

| Year | Maximum (in Celsius) | Minimum (in Celsius) |
|---|---|---|
| 1991 | 44 | 8 |
| 1992 | 43 | 9 |
| 1993 | 44 | 9 |
| 1994 | 43 | 9 |
| 1995 | 44 | 7 |
| 1996 | 45 | 9 |
| 1997 | 43 | 8 |
| 1998 | 38 | 7 |
| 1999 | 46 | 8 |
| 2000 | NA | NA |

**Note :** Yearwise data taken from District Statistical Hand Book, 1996 & 2001

The hottest month in Puruliya is May and the coldest month is January. Characteristic of the wind is generally light to moderate with slight increase in summer and south-west monsoon season. Direction during May and south-west monsoon season is between east and south, in winter between west and north, in March and April between north-west and south-west and in October winds are light and variable in direction. The rainfall is eratic in nature with occasional draught in between the rains in the later part of August. The average annual rainfall recorded during the last fifty years is 1,375.2 mm. About 81.0 percent of the annual rainfall comes during June to September, July being the rainiest month of the year. Storms and depressions from the Bay of Bengal in May and post monsoon season, depressions in the monsoon season, thunderstorms (called nor'westers and locally known as *Kalbaisakhi* for its violent form and association with squalls) in the afternoons during the hot weather season are the part of special weather phenomena of the district.

# Census Concepts

**Building :**

A 'building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, schools, places of entertainment, places of worship, godowns, stores, etc. It is also possible that buildings which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

**Permanent Houses :**

Houses, the walls and roof which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, brunt bricks, stones or concrete. Roof may be made of any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

**Semi-Permanent Houses :**

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

**Temporary Houses :**

Houses in which both walls and roof are made of materials which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch bamboo, wood, mud, plastic or polythene.

**Dwelling Room :**

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breath of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling room. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking etc. is regarded as dwelling room. In a situation where a census house is used as a shop or office etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant's quarter is used by a servant and if she/he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

**Census House :**

A 'Census House' is a building or part of a building used or recognized as a separate unit because of having a separate main entrance from the road or common courtyard or, staircase, etc. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder :

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure

with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storied ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storied structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area there are separate buildings owned by different persons then each such building is treated a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building should treated as a separate building. But if in any of these buildings there are flats in occupation of different households, each such flat should be reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it should not be realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat should be treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in three rooms and the second household occupying two rooms, then considering the use, the first three rooms together should be treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ hotel building should be treated as one census house. But if such hostels/hotels have out-houses or other structures used for different purposes of the same purpose, then each structure attached to the main hostel/hotel should be treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bathroom, baithak etc. Though each of the huts is a separate structure, they form single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts should be treated separate census houses. However, if there are also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, work-shed etc., these should be treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number is given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up is treated as a building.

**Rural-Urban Area :**

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village'; for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows :

(a) All places with a municipality, municipal corporation, cantonment board or notified town area committee, etc.

(b) A place which satisfy or are expected to satisfy the following criteria simultaneously :

i) A minimum population of 5,000;

ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits; and

iii) A density of population of at least 400 per square kilometre (1,000 per square mile).

For identification of places which would qualify to be classified as 'urban', all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activities were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban areas under Urban Agglomerations. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., may have come up near a statutory town or city but these are within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

**Household :**

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

**Institutional household :**

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

**Houseless household :**

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

**Scheduled Castes and Scheduled Tribes :**

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities, which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Castes in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given in the next page.

33 Oraon
34 Parhaiya
35 Rabha
36 Santal
37 Sauria Paharia
38 Savar

**Language and Mother Tongue :**

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

**Literate :**

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

**Literacy rate :**

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

**Educational Level :**

The highest level of education a person has completed.

**Work :**

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not

only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceeding the date of enumeration.

**Main Worker :**

A person who has worked for major part of the reference period (i.e. six months or more during the last one year precceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

**Marginal Worker :**

A person who worked for less than six months of the reference period (i.e. in the last one year preceeding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

**Non Worker :**

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceeding the date of enumeration) is termed as 'Non worker'.

**Cultivator :**

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

**Agricultural Labourer :**

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

**Household Industry Worker :**

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

**Other Worker :**

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

**Work Participation Rate :**

Percentage of workers (main + marginal) to total population.

**Population Density :**

Population density is the number of persons inhabited per square kilo-metre of the area.

**Age :**

Age is measured in terms of the completed number of years.

**Sex-ratio :**

Number of females per 1000 males in a population.

# Non-Census Concepts

**Improved drinking water :**

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.. It may be mentioned that such uniform definition may not be valid across all states.

**System of sewerage :**

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns, which are not provided with such underground sewerage system, it is served by open surface drain, box drain, silk pattern drain, etc., in these towns.

**Type of latrine and Method of disposal of night soil :**

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the street sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil, which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

**Fertility :**

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below.

**Crude birth rate (CBR) :**

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid–year Population}} \times 1{,}000$$

**Crude death rate (CDR) :**

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

**Natural growth rate :**

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

**Age specific fertility rate (ASFR) :**

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

**Age specific marital fertility rate (ASMFR) :**

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

**General fertility rate (GFR) :**

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

**General marital fertility rate (GMFR) :**

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years}} \times 1{,}000$$

**Total fertility rate (TFR) :**

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = 5 \times \frac{\sum_{15\text{-}19}^{45\text{-}49} ASFR}{1{,}000}$$

**Total marital fertility rate (TMFR) :**

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = 5 \times \frac{\sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1{,}000}$$

**Age-specificMortality rate (ASMR) :**

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

**$q_1$ :**

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

**$q_2$ :**

Probability of dying between birth and age 2.

**$q_5$ :**

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

**Infant mortality rate (IMR) :**

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

**Neo-natal mortality rate (NMR) :**

Number of infants dying within the first month of life (28 days or under ) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or underduring the year}}{\text{Number of live births during the year}} \times 1,000$$

**Early neo-natal mortality rate (ENMR) :**

$$ENMR = \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1,000$$

**Late neo-natal mortality rate(LNMR) :**

$$LNMR = \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1,000$$

**Post neo-natal mortality rate (PNMR) :**

$$PNMR = \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1,000$$

**Peri-natal mortality rate (PMR) :**

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

**Still birth rate (SBR) :**

$$SBR = \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

**Maternal mortality rate (MMR) :**

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 married women in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of married women aged 15-49}} \times 100,000$$

**Eligible couple (Couples per 1000 population) :**

Number of currently married females in the age group15-44 years per 1,000 persons of all ages.

**Child woman ratio (0-4) :**

Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

**Child woman ratio (5-9) :**

Number of children in the age group 5-9 years per 1,000 women in the age group 15-49 years.

**Migration :**

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another

place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/ relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

**Internal and International migration :**

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

**Rural - Urban components of migration :**

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

**Civic status of urban units :**

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation / Corporation, Municipal Committee/ Municipal council, Municipality etc.

**Size class of UA / town :**

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

**Slum area** :

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

**Mega city :**

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

# Census Findings - Population & its distribution

Census Findings - Population & its distribution

**Progress of Population**

As per Final Population Totals, Census of India, 2001, Puruliya has a population content of 25,36,516 and the rank, which was 14th in 1991, remains same in 2001. The percentage population distribution of the district among the rural and urban areas with respective percentage from 1951 is shown in Table 1 below :

**TABLE-1: RURAL AND URBAN POPULATION IN THE DISTRICT OF PURULIYA WITH PERCENTAGE TO TOTAL IN BRACKET (1951-2001)**

| | 1951 | 1961 | 1971 | 1981 | 1991 | 2001 |
|---|---|---|---|---|---|---|
| Total | 1,169,097 | 1,360,016 | 1,602,875 | 1,853,801 | 2,224,577 | 2,536,516 |
| Rural | 1,090,627 (93.3) | 1,267,538 (93.2) | 1,470,508 (91.7) | 1,687,039 (91.0) | 2,014,571 (90.6) | 2,281,090 (89.9) |
| Urban | 78,470 (6.7) | 92,478 (6.8) | 132,367 (8.3) | 166,762 (9.0) | 210,006 (9.4) | 255,426 (10.1) |

**(a) Distribution of population in rural-urban areas:**

It can be seen from the above table that the proportion of rural population has constantly declined from one census to other. It was 93.3 per cent in 1951 which has gone down to 89.9 per cent in 2001.Naturally it is so because of progressive improvement in the level of urbanisation as reflected by the increasing urban proportion. In 1951 share of the urban population was 6.7 per cent which has gone up to 10.1 per cent in 2001.

**(b) Size, class and status of town :**

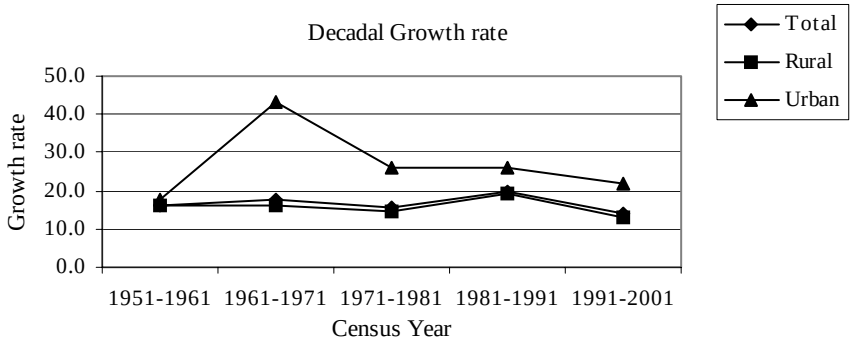

There are three municipalities in Puruliya district viz., Raghunathpur, Jhalda, and Puruliya. Puruliya with a population of 1,13,806 population belongs to Class-I, Raghunathpur with a population of 21,932 falls in Class-III and Jhalda with a population of 17,872 falls in Class IV category as per census classification. Apart from these municipalities, there are 9 census towns viz. Par Beliya, Barabazar, Balarampur, Arra, Chapari, Adra, Nabagram, Santaldih Thermal Power Project and Hijuli. Of them, Adra and Balarampur fall in Class III category with a population of 22,031 and 21,827 respectively. Arra falls in Class IV with a population of 19,924. Chapari, Nabagram, Hijuli, Par Beliya and Barabazar fall in Class V as all of them are having population in the range of 5,000 - 9,999 and Santaldih Thermal Power Project Town falls under Class VI category with a population below 5,000.

**Growth rate :**

During 1991-2001 the rural growth rate was 13.2 percent while the urban growth rate was 21.6 percent. The urban decadal growth rate in Puruliya district between 1951 - 2001 has always been higher than the rural growth rate. Puruliya's rural decadal growth rate as well as total decadal growth rate, are, however, in the lower range with 13.2 and 14.0 percent respectively in 2001. An overall picture of the growth rate of the district for the last five decades can be observed from Table No. - 2 below :

**TABLE- 2 : DECADAL GROWTH RATE OF POPULATION OF DISTRICT PURULIYA (1951-2001)**

| | 1951-1961 | 1961-1971 | 1971-1981 | 1981-1991 | 1991-2001 |
|---|---|---|---|---|---|
| Total | 16.3 | 17.9 | 15.7 | 20.0 | 14.0 |
| Rural | 16.2 | 16.0 | 14.7 | 19.4 | 13.2 |
| Urban | 17.9 | 43.1 | 26.0 | 25.9 | 21.6 |

**Sub - District level :**

Among the rural areas in Puruliya, Jhalda - II CD Block has the highest decadal growth rate at 18.2 percent followed by Jaipur at 18.0 and Jhalda - I at 17.0. Neturia has the lowest growth rate with 1.6.

Among the urban units, Adra census town has the lowest and negative growth rate of (-0.4 per cent) followed by Jhalda Municipality with 3.8 per cent and Nabagram census town with 7.9 per cent. On the other hand, decadal growth rate is highest in case of Puruliya Municipality at 23.2 per cent followed by Santaldih Thermal Power Project Town census town at 20.0 per cent.

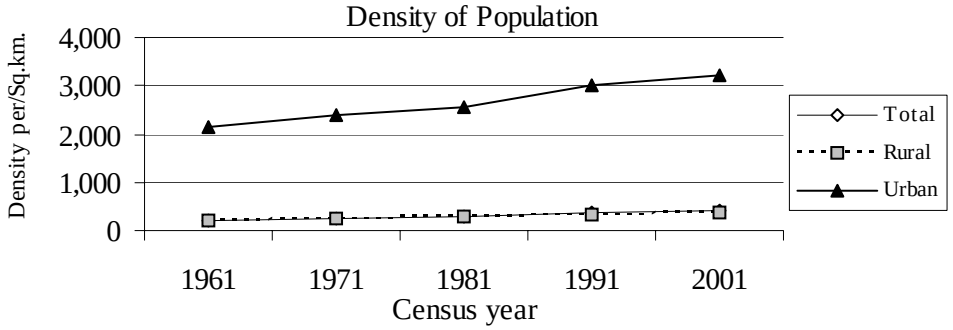

The chart at prepage shows that the total, urban and rural growth rate has almost been constant during 1951-1991. The urban growth line, however, shows a slight jump during 1961-71 but has almost touched the total line in 1971-81.

**Density of population :**

Puruliya had density of population at 355 persons per sq. km. in 1991 which has gone up to 405 per sq. km. in 2001. This is even less than the half of the State density of 903. It makes rank of the district 18th which is the lowest in the State. The rural urban trend of the district can be observed in the table 3 below :

**TABLE – 3 : DENSITY OF POPULATION IN THE DISTRICT OF PURULIYA (1961-2001)**

| T/ R/ U | 1961 | 1971 | 1981 | 1991 | 2001 |
|---|---|---|---|---|---|
| Total | 218 | 256 | 296 | 355 | 405 |
| Rural | 205 | 237 | 272 | 325 | 369 |
| Urban | 2,126 | 2,407 | 2,542 | 3,009 | 3,218 |

It is observed from the 'Chart' that the density of population in the district over 5 decades has generally shown increasing trend. The increase for the total and rural areas over the last 5 decades has been marginal. The increase of density in the urban areas has been high, but not very high like other districts.

**Sex ratio :**

Among the districts of West Bengal, Puruliya has continuously declining sex ratio between 1951 - 1991 that has slightly risen in 2001 as the following Table will indicate.

**TABLE 4 : SEX RATIO IN PURULIYA DISTRICT, 1951-2001**

| | Sex ratio | | |
|---|---|---|---|
| Census Year | Total | Rural | Urban |
| 1951 | 983 | 988 | 921 |
| 1961 | 973 | 979 | 889 |
| 1971 | 963 | 970 | 890 |
| 1981 | 957 | 962 | 905 |
| 1991 | 947 | 952 | 899 |
| 2001 | 954 | 958 | 920 |

It will be evident from the above table that the total sex ratio for the district had continuously declined from 1951 census upto 1991 and risen marginally in 2001. In case of rural areas the sex ratio has steadily declined beween 1951 - 91 from 988 females per 1000 males to 952, but has risen to 958 during 1991 - 2001. However, in case of the urban areas of this district the sex ratio declined in 1961 (889), improved by one point only in 1971 (890), improved again in 1981 (905), declined in 1991 (899) and again risen in 2001 (920).

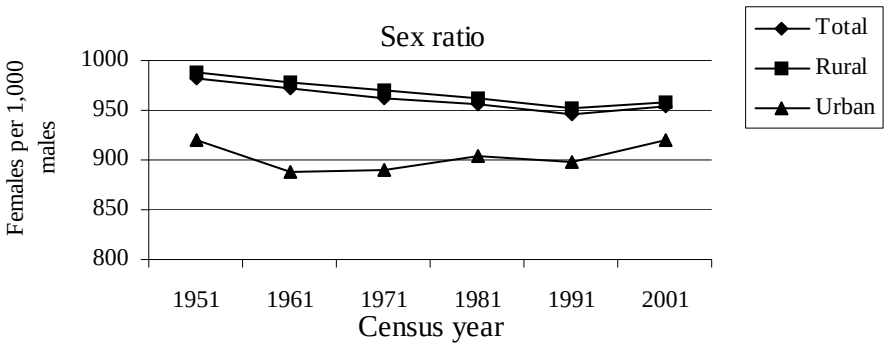

Chart indicates that the district has an almost unchanged sex ratio over the last 5 decades. The above trend has been reflected from the more or less constant sex ratio of rural area. The decadal urban sex ratio in the district has witnessed slightly fluctuating trend.

**Sub-district level :**

Among the rural areas of Puruliya, out of 20 CD Blocks, 15 CD Blocks have recorded improvement in sex ratio from the 1991 level. In 3 CD Blocks the sex ratio has declined and in 1 CD Block it is constant. The highest sex ratio of 985 females per 1000 males has been recorded in case of Manbazar-I CD Block. The lowest sex ratio has been recorded in case of Jaipur CD Block. Among the urban areas the highest sex ratio of 936 has been recorded in case of Adra census town.

**Work participation rate :**

No data is available for the district for 1951. The work participation rate by percentage of total workers and its rural-urban break up of both district and State can be found in the table below :

**TABLE 5 : PERCENTAGE OF TOTAL WORKERS (MAIN+MARGINAL) TO TOTAL POPULATION (1951-2001)**

| | Puruliya | | | West Bengal | | |
|---|---|---|---|---|---|---|
| Year | Total | Rural | Urban | Total | Rural | Urban |
| 1951 | 0.0 | 0.0 | 0.0 | 34.7 | 32.6 | 40.9 |
| 1961 | 48.7 | 50.1 | 29.4 | 33.2 | 32.7 | 34.7 |
| 1971 | 31.1 | 31.6 | 25.6 | 27.9 | 27.2 | 30.1 |
| 1981 | 38.3 | 39.5 | 25.9 | 30.2 | 30.3 | 29.8 |
| 1991 | 43.2 | 44.8 | 27.0 | 32.2 | 33.2 | 29.6 |
| 2001 | 44.5 | 46.2 | 28.7 | 36.8 | 37.9 | 33.9 |

**Note :** Concept of Main workers and Marginal workers was introduced in 1981

It would be apparent that from 1961 onward to 1991 the district percentages of total workers to total population were always higher than the State percentages and continues to be so upto 2001. But whereas the percentage of urban workers to the urban population of the State from 1961 to 2001 is always higher compared to the district. In case of rural areas the district percentage of total workers to total population has been higher than the State average all through. While at the State level a clear demarcation is observed as the percentage of urban workers compared to that of rural workers is higher from 1951 to 1971 and reverse from 1981 to 2001 at the district level, the percentage of urban workers has always been less than the percentage of rural workers. Another important factor in determining the occupational engagement of the population is the classification of workers into Main and Marginal workers. As can be seen from the definition at para (iii), Census Concept, a Main worker is one who has worked for six months or more in a producing capacity while the Marginal worker is one who has worked for less than six months in the year preceding the Census. We are giving below the percentage of Main workers by sex for Puruliya and West Bengal from 1951 to 2001 for ready comparison.

**TABLE 6 : PERCENTAGE OF MAIN WORKERS TO TOTAL POPULATION BY SEX (1951-2001)**

| | Puruliya | | | West Bengal | | |
|---|---|---|---|---|---|---|
| Year | Persons | Male | Female | Persons | Male | Female |
| 1951 | 0.0 | 0.0 | 0.0 | 34.7 | 54.8 | 11.3 |
| 1961 | 48.7 | 58.7 | 38.3 | 33.2 | 54.0 | 9.4 |
| 1971 | 31.1 | 52.0 | 9.4 | 27.9 | 48.8 | 4.4 |
| 1981 | 31.1 | 47.7 | 13.8 | 28.3 | 48.7 | 5.8 |
| 1991 | 35.4 | 49.4 | 20.5 | 30.2 | 50.7 | 8.0 |
| 2001 | 25.5 | 38.3 | 12.0 | 28.7 | 47.0 | 9.1 |

**Note :** Concept of Main workers and Marginal workers was introduced in 1981

It is seen that except in 2001 the district percentage of main workers to total population has always overtaken the State percentage. In case of the male main workers, the district percentage has been higher than the state average in 1961 and 1971 and reverse in 1981, 1991 and 2001. In case of the female main workers, the district percentage has always been higher than the State average with noteworthy difference in 1961 and 1991.

**Literacy rate :**

As Puruliya came into being as a district of West Bengal towards the end of 1956, no data is available for 1951. It will be evident from Table-7 below that during the decade 1991-2001 literacy rate in Puruliya district has improved by 12.3 per cent points which is the highest for this district in the post Independence period from 1961 onward. Similarly rural literacy in Puruliya has increased by 12.9 per cent points which is again the highest in the post Independence period. During the same period urban literacy has also increased by 4.82 per cent points which is, however, less than both 1981 (7.89) and 1991 (8.87) progression.

Comparative analysis of improvement in literacy rate of the district with that of the State shows that Puruliya, except 1991, has always overtaken the State percentage point increase. In Table-7 below we are giving the comparative literacy rate for Puruliya and West Bengal for 1961-2001 by residence and sex.

**TABLE – 7 : COMPARATIVE LITERACY RATE BY SEX AND RESIDENCE, WEST BENGAL AND PURULIYA WITH CHANGE IN DECENNIAL PERCENTAGE POINT IN PARENTHESIS (1951-2001)**

| | | West Bengal | | | Puruliya | | |
|---|---|---|---|---|---|---|---|
| Year | T/R/U | P | M | F | P | M | F |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |
| 1951 | T | 25.0 | 34.7 | 13.2 | -- | -- | -- |
| | R | 18.8 | 28.9 | 7.6 | -- | -- | -- |
| | U | 45.7 | 51.0 | 37.1 | -- | -- | -- |
| 1961 | T | 34.5 | 46.6 | 20.3 | 20.5 | 34.4 | 5.9 |
| | | (9.5) | (11.9) | (7.1) | -- | -- | -- |
| | R | 25.8 | 38.9 | 11.7 | 18.2 | 32.0 | 3.8 |
| | | (7.1) | (10.0) | (4.2) | -- | -- | -- |
| | U | 59.6 | 66.0 | 50.0 | 52.9 | 67.3 | 36.3 |
| | | (13.8) | (15.0) | (12.9) | -- | -- | -- |
| 1971 | T | 38.9 | 49.6 | 26.6 | 25.1 | 39.8 | 9.7 |
| | | (4.4) | (3.0) | (6.3) | (4.6) | (5.4) | (3.8) |
| | R | 30.6 | 42.3 | 18.1 | 22.5 | 37.3 | 7.0 |
| | | (4.8) | (3.4) | (6.3) | (4.3) | (5.3) | (3.2) |
| | U | 62.3 | 68.2 | 54.1 | 53.8 | 65.9 | 40.0 |
| | | (2.7) | (2.2) | (4.1) | (1.0) | -(1.4) | (3.8) |
| 1981 | T | 46.3 | 57.0 | 34.4 | 33.7 | 51.3 | 15.1 |
| | | (7.5) | (7.5) | (7.9) | (8.6) | (11.5) | (5.4) |
| | R | 37.9 | 49.7 | 25.3 | 30.9 | 49.0 | 11.9 |
| | | (7.3) | (7.4) | (7.3) | (8.4) | (11.7) | (4.9) |
| | U | 68.0 | 75.2 | 60.7 | 61.7 | 73.8 | 48.2 |
| | | (5.8) | (7.0) | (6.6) | (7.9) | (7.9) | (8.2) |
| 1991 | T | 57.7 | 67.8 | 46.6 | 43.3 | 62.2 | 23.2 |
| | | (11.4) | (10.8) | (12.1) | (9.6) | (10.9) | (8.2) |
| | R | 50.5 | 62.1 | 38.1 | 40.3 | 60.0 | 19.6 |
| | | (12.6) | (12.3) | (12.8) | (9.4) | (11.0) | (7.7) |
| | U | 75.3 | 81.2 | 68.3 | 70.6 | 81.7 | 58.1 |
| | | (7.3) | (6.0) | (7.5) | (8.9) | (7.9) | (9.9) |
| 2001 | T | 68.6 | 77.0 | 59.6 | 55.6 | 73.7 | 36.5 |
| | | (10.9) | (9.2) | (13.1) | (12.3) | (11.6) | (13.3) |
| | R | 63.4 | 73.1 | 53.2 | 53.2 | 72.4 | 33.2 |
| | | (12.9) | (11.1) | (15.0) | (12.9) | (12.4) | (13.7) |
| | U | 81.3 | 86.1 | 75.7 | 75.4 | 85.0 | 64.9 |
| | | (6.0) | (4.9) | (7.5) | (4.8) | (3.3) | (6.8) |

**Note :** 1) Puruliya district was added to West Bengal from Manbhum District of Bihar. (Reorganisation of Territories Act, 1956). As such data for Puruliya for 1951 is not available.

2) Upto 1971 Literacy rate was calculated excluding 0-4 age group population. From 1981 onwards Literacy rate is calculated excluding the 0-6 age group population)

**Sub - District level Literacy :**

The highest percentage point increase in literacy rate among the rural areas of Puruliya district has been noticed in case of Manbazar-II CD Block where the literacy jumped from 35.0 in 1991 to 53.5 in 2001 registering an increase of 18.5 per cent points. Next comes Hura CD Block wherein literacy rate increased from 41.8 to 59.0 showing an increase of 17.2 points between 1991-2001. However, the highest literacy rate in case of rural areas has been observed in Kashipur with 64.2 per cent followed by Hura with 59.0 per cent. In 1991 also Kashipur had the highest literacy rate among the rural areas with 54.6 followed by Raghunathpur-I with 50.3. In rural male as well as female literacy rate in 2001, same Kashipur has recorded the highest at 78.5 and 44.4 per cent respectively. The lowest rural literacy rate at 43.7 has been recorded at Jhalda-II CD Block. The lowest male literacy has been recorded at Bundwan CD Block with 66.5 per cent. Arsha has the lowest rural female literacy rate at 23.6. Among the urban areas of the district, Hijuli census town has recorded the highest decadal increase in literacy rate from 62.2 in 1991 to 71.6 in 2001 i.e. an increase of 9.4 points. However, Santaldih Thermal Power Project Town (CT) has the distinction of having the highest urban literacy rate in the district in 2001 with 93.6 per cent followed by Chapari census town with 86.4 and Adra census town with 81.4. Santaldih Thermal Power Project Town (CT) also has the highest urban male as well as female literacy rate at 98.1 and 87.9 per cent respectively. The lowest urban literacy rate has been recorded at Balarampur census town with 66.9 per cent.

**Religion :**

Religion is also one of the basic cultural characteristics of the population. In a secular country like India several religions have thrived and every decennial census has attempted to provide an interesting picture of the religious persuasion of the people of the country. The data on religion practised by persons give the content of population by each of the six major religious communities, viz, Hindus, Muslims, Christians, Sikhs, Buddhists and Jains. Other religions are combined under the head 'other religions and persuasions' and 'religion not stated'. The Table-8 gives the distribution of population by religion since 1961 of Puruliya district.

**TABLE – 8 : POPULATION BY RELIGION IN THE DISTRICT OF PURULIYA (1961-2001)**

| Year | Hindus | Muslims | Christians | Jains | Sikhs | Buddhists | Other Religion & Persuasions | Religion Not Stated | Total Population |
|---|---|---|---|---|---|---|---|---|---|
| | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 |
| 1961 | 1,266,537 | 81,521 | 4,335 | 435 | 338 | 41 | 6,809 | - | 1,360,016 |
| | (93.1) | (6.0) | (0.3) | (0.0) | (0.0) | (0.0) | (0.5) | (0.0) | (100.0) |
| 1971 | 1,488,851 | 74,410 | 5,023 | 1,538 | 392 | 33 | 32,628 | - | 1,602,875 |
| | (92.9) | (4.6) | (0.3) | (0.1) | (0.0) | (0.0) | (2.0) | (0.0) | (100.0) |
| 1981 | 1,698,530 | 101,044 | 5,529 | 1,496 | 627 | 43 | 46,532 | - | 1,853,801 |
| | (91.6) | (5.5) | (0.3) | (0.1) | (0.0) | (0.0) | (2.5) | (0.0) | (100.0) |
| 1991 | 2,023,143 | 133,119 | 4,516 | 645 | 618 | 71 | 62,012 | 453 | 2,224,577 |
| | (90.9) | (6.0) | (0.2) | (0.0) | (0.0) | (0.0) | (2.8) | (0.0) | (100.0) |
| 2001 | 2,116,037 | 180,694 | 7,008 | 2,221 | 604 | 185 | 226,912 | 2,855 | 2,536,516 |
| | (83.4) | (7.1) | (0.3) | (0.1) | (0.0) | (0.0) | (9.0) | (0.1) | (100.0) |

**Note :** Figures within brackets indicate percentage to total population

It is observed from the above table that Hindus constitute the maximum population by religion in Puruliya district, all along both in absolute number and percentage, Muslims come next upto 1991 though in both absolute number and percentage they are far behind. It is interesting to note that in 2001 population practising other religions and persuasions has overtaken the Muslims. While the Hindu population is all along increasing in absolute number, in terms of the percentage the decline is evident. With the Muslims, the trend is fluctuating. The absolute number and percentage of the Muslims declined in 1971, then rose in 1981 and further in 1991, but didn't transgress the percentage of 1961 until 2001. A steady progress of the population practising other religions and persuasions in terms of both absolute number and percentage is also observed which include religions like Sari Dharma, Baha, Manab Dharama etc. with Sari Dharma occupying the prominent place among them.

**TABLE-9 : AVAILABILITY OF UNIVERSITY EDUCATION IN THE DISTRICT OF PURULIYA**

| Serial Number | Name of the University | Total Number of University | Remarks |
|---|---|---|---|
| There is mo University in this District | | | |

| | **District Total :** | **2,224,577** | **2,014,571** | **210,006** | **2,536,516** | **2,281,090** | **255,426** | **14.0** | **13.2** | **21.6** | **9.4** | **10.1** |

Table 1 shows that during 1991-2001 there is marginal difference between the overall growth of the district total (14.0 per cent) and the rural total (13.2 per cent). However the urban growth rate is much higher (21.6 per cent) as against the district average during 1991-2001. Among the 20 CD Blocks, Jhalda-II has recorded the highest growth rate (18.2 per cent) and Manbazar-II the lowest with 8.0 per cent. Going by the district's rural frame, Neturia has recorded the lowest decadal variation (1.6 per cent). Conversely it becomes the CD Block with the highest decadal growth rate in urban portion of the CD block (125.7 per cent) as Par Beliya has been declared as a census town in 2001. Barabazar is another new census town in 2001 under Barabazar CD Block that has recorded lowest percentage urban population (5.1 per cent).

Total number of inhabited villages in the Puruliya district is 2,468 spread over 20 CD Blocks and the lowest population size of less than 200 persons is found in 320 villages (13.0 per cent). The highest population size of 5,000-9,999 has been reported in 22 villages (0.9 per cent). There is no village with population size of 10,000 and above. The highest number of 786 (31.8 per cent) villages is in the population size of 500-999. The number of villages in the population size of 200-499 is 604, the second highest being 24.5 per cent of the total number of villages in Puruliya.

**TABLE 3 : NEW TOWNS DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS**

| Serial Number | Name of the District | District Code | Serial Number | Name of Town |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| | District : Puruliya | 14 | | |
| ( a ) NEW | | | | |
| ( i ) Statutory Town | | : N I L : | | |
| ( ii ) Census Town | | | 1 | Par Beliya |
| | | | 2 | Barabazar |
| (b) Denotified | | | | |
| (i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns | | : N I L : | | |
| (ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria | | : N I L : | | |
| (iii) Census towns of 1991 census are notified as statutory town in 2001 census | | : N I L : | | |
| ( C ) DECLASSIFIED | | : N I L : | | |
| ( D ) WHOLLY MERGED WITH OTHER TOWN (S) | | : N I L : | | |

Note : Declassified means the Census Towns of 1991 census which failed to satisfy the demographic and economic criteria

It is observed from the table that district has no new statutory town in 2001 census. Par Beliya and Barabazar are the two census towns of the district which are new in 2001 census. The district has no town which is declassified or wholly merged with other towns in 2001 census.

**TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001**

| Range of population density (per square kilometer) | Total number of villages in each population density range | Percentage of villages in each population density range | Population | Percentage distribution of population |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| 0-10 | 11 | 0.4 | 100 | 0.0 |
| 11-20 | 14 | 0.6 | 421 | 0.0 |
| 21-50 | 31 | 1.3 | 2,340 | 0.1 |
| 51-100 | 103 | 4.2 | 23,473 | 1.0 |
| 101-200 | 329 | 13.3 | 144,562 | 6.3 |
| 201-300 | 489 | 19.8 | 335,739 | 14.7 |
| 301-500 | 801 | 32.5 | 783,274 | 34.3 |
| 501 + | 690 | 28.0 | 991,181 | 43.5 |
| Not known | 0 | 0.0 | 0 | 0.0 |
| **District Total :** | **2,468** | **100.0** | **2,281,090** | **100.0** |
| **Population Density (Rural) of the district :** | | **382.0** | | |

As per Table 4, the population density (Rural) of the district is 382 per sq. km. Out of 2,468 villages, 690 (28.0 per cent) villages have the highest range of population density of 501+, percentage distribution of population being 43.5 per cent. Eleven villages (0.4 per cent) have the lowest range of population density of 0-10 persons per sq. km. It is observed that 801 is the highest number of villages which is in the density range of 301-500 per sq. km. It can safely be concluded that the villages in Puruliya are basically of larger sizes.

**TABLE 5 : SEX RATIO OF STATE AND DISTRICT - 1901-2001**

| Census year | State - West Bengal | | | District -Puruliya | | |
|---|---|---|---|---|---|---|
| | Total | Rural | Urban | Total | Rural | Urban |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| 1901 | 945 | 994 | 650 | 1,011 | 1,015 | 900 |
| 1911 | 925 | 982 | 614 | 1,001 | 1,006 | 889 |
| 1921 | 905 | 971 | 591 | 997 | 1,002 | 881 |
| 1931 | 890 | 961 | 578 | 989 | 995 | 861 |
| 1941 | 852 | 945 | 559 | 977 | 985 | 848 |
| 1951 | 865 | 939 | 660 | 983 | 988 | 921 |
| 1961 | 878 | 943 | 701 | 973 | 979 | 889 |
| 1971 | 891 | 942 | 751 | 963 | 970 | 890 |
| 1981 | 911 | 947 | 819 | 957 | 962 | 905 |
| 1991 | 917 | 940 | 858 | 947 | 952 | 899 |
| 2001 | 934 | 950 | 893 | 954 | 958 | 920 |

**Note** : Sex ratio has been defined here as the numbers of Femals per 1,000 Males

The sex ratio of Puruliya has generally been higher than that of State average since 1901 to 2001. However, except 1951 and 2001, the trend has been declining. In comparison, the sex ratio of the State has continuously declined from 1901 to 1951 and then continuously increased from 1961 to 2001.

**TABLE 6 : SEX RATIO BY CD BLOCK, 2001**

| Serial number | Name of CD Block | Sex ratio | | |

| 18 | Manbazar - I | 985 |
| 19 | Manbazar - II | 966 |
| 20 | Bundwan | 979 |
| | **District (Rural) Total :** | **958** |

Table - 7 represents sex ratio of Puruliya district at exclusively rural level. Among the 20 CD Blocks of the district, Manbazar-I CD Block again has the highest sex ratio with 985, and this time con-jointly with Barabazar and Jaipur again have the lowest sex ratio at 921.

**TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001**

| Range of sex ratio for villages | Number of inhabited villages | Percentage of villages in each range | Population 2001 | Percentage distribution of population |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| Less than 700 | 22 | 0.9 | 10,288 | 0.5 |
| 700-749 | 7 | 0.3 | 1,487 | 0.1 |
| 750-799 | 36 | 1.5 | 7,846 | 0.3 |
| 800-849 | 124 | 5.0 | 59,568 | 2.6 |
| 850-899 | 243 | 9.8 | 196,110 | 8.6 |

| Range of sex ratio for villages | Number of inhabited villages | Percentage of villages in each range | Population 2001 | Percentage distribution of population |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| 900-949 | 627 | 25.4 | 725,290 | 31.8 |
| 950-999 | 679 | 27.5 | 787,836 | 34.5 |
| 1000-1099 | 578 | 23.4 | 435,968 | 19.1 |
| 1100+ | 152 | 6.2 | 56,697 | 2.5 |
| **District Total :** | **2,468** | **100.0** | **2,281,090** | **100.0** |
| **Sex ratio (Rural) for District :** | | **958** | | |

Puruliya being basically a rural district its maximum population, in absolute number 2,281,090 dwells in 2,468 villages and range of sex ratio for villages of the district extends from less than 700 to 1100+ as per Table 8. The highest number of villages being 679 which is 27.5 percent of the total number of villages and 34.5 percent of the population fall in the sex ratio range of 950-999. The lowest number of villages being 7 accounting for 0.3 percent of the total villages and 0.1 percent of total population come under sex ratio range of 700-749.

**TABLE-9 : SEX RATIO OF URBAN AGGLOMERATIONS/TOWNS, 2001**

| Serial Number | Name of UA/Town | Urban status of town | Sex ratio |
|---|---|---|---|
| 1 | 2 | 3 | 4 |
| 1 | Adra | CT | 936 |

| 20 | Bundwan | 12,833 | 6,521 | 6,312 | 968 |
| | **District (Rural) Total:** | **376,446** | **191,353** | **185,093** | **967** |

Puruliya's exclusively rural total population in the age group 0-6 is 376,446 of which 191,353 are males and 185,093 are females giving the total sex ratio of 967 as per Table 11. Out of total of 20, 10 CD blocks stay below the district's total child sex ratio, while 10 CD Blocks have higher sex ratio. Balarampur occupies the highest position with 990 and Raghunathpur-I is the lowest with 941.

**TABLE-12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001**

| Range of sex ratio for villages | Number of inhabited villages | Percentage distribution of villages | Population 2001 | Percentage distribution of population |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| Less than 700 | 221 | 9.0 | 9,359 | 2.5 |
| 700-749 | 88 | 3.6 | 9,023 | 2.4 |
| 750-799 | 136 | 5.5 | 17,077 | 4.5 |
| 800-849 | 207 | 8.4 | 30,974 | 8.2 |
| 850-899 | 223 | 9.0 | 41,122 | 10.9 |
| 900-949 | 274 | 11.1 | 60,451 | 16.1 |
| 950-999 | 222 | 9.0 | 60,952 | 16.2 |
| 1000-1099 | 496 | 20.1 | 83,532 | 22.2 |
| 1100+ | 601 | 24.4 | 63,956 | 17.0 |
| **District (Rural) Total :** | **2,468** | **100.0** | **376,446** | **100.0** |
| **Sex ratio (Rural) for District :** | | **967** | | |

The 0-6 age group population for Puruliya in 2001 is 376,446 living in 2,468 villages. The sex ratio range in maximum inhabited villages are 1,100+, the number and the percentage distribution of vilages being 601 and 24.4 respectively, while percentage distribution of 2001 population (63,956) is 17.0. The lowest number of villages is observed in the sex ratio range of 700-749, the number and the percentage of villages being 88 and 3.6 respectively, while percentage (9,023) is 2.4 per cent only.

| **District (Rural) Total :** | | **2,281,090** | **408,706** | **456,573** | **17.9** | **20.0** |

Table 15 presents total population of the rural district alongwith number and percentage of exclusively rural scheduled castes and scheduled tribes population in CD Blocks. The scheduled castes and Scheduled Tribes population constitute respectively 17.9 and 20.0 percent of the total rural population of the district. 12 CD Blocks have the percentage of scheduled castes population below the district rural total starting with 17.4 down to 5.6 which is found in Bundwan. The percentage of scheduled caste population of 8 CD Blocks are above the district total starting with 20.3 to 35.9 which is the highest and found in Raghunathpur-I.

In case of the scheduled tribe population, 9 CD blocks have the percentage below the district rural total starting with 19.2 down to 4.3 which is the lowest and recorded by Puruliya-II CD Block. The percentage of scheduled tribe population of 11 CD Blocks are above the district total starting with 22.0 to 51.1 which is the highest recorded by Bundwan CD Block.

**TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001**

| Percentage range of Scheduled Castes population to total population | Number of villages | Percentage | Scheduled Castes Population | Percentage |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| Nil | 812 | 32.9 | 0 | 0.0 |

| | **District (Urban) Total :** | **255,426** | **55,250** | **6,879** | **21.6** | **2.7** |

Number and percentage of scheduled caste and scheduled tribe population in UAs/Towns are 55,250 and 6,879 respectively. Scheduled castes constitute 21.6 and scheduled tribes constitute 2.7 per cent of total urban population of Puruliya. Puruliya Municipality has the biggest concentration of scheduled castes with 25,015 in percentage 22.0, but going by the percentage of scheduled caste population to total population of specific UAs/Towns it is not the highest. That position is occupied by Raghunathpur Municipality which has 7,008 scheduled castes out of total population of 21,932 that makes its percentage of 32.0. Likewise apparently Santaldih Thermal Power Project-Town (census town) has the lowest concentration of scheduled castes and lowest percentage to total population as well with 318 or 6.8 per cent. In case of the scheduled tribe population, Puruliya Municipality has the highest number of persons with 2,099 or 1.8 per cent to the total population, but going by the percentage of population to total population it is Par Beliya census town that has 1,365 schduled tribe population out of total population of 6,039 that makes its percentage 22.6, the highest. Nabagram census town and Raghunathpur Municipality both have the lowest percentage of scheduled tribe population which is 0.4 of the total town population.

| 20 | Bundwan | 971 | 987 |
| | **District (Rural) Total :** | **950** | **972** |

It will be seen from the above table no. 19 that the sex ratio for the scheduled castes and scheduled tribes are 950 and 972 respectively in the rural areas of the district. Manbazar-II has the highest sex ratio among the scheduled caste population with 988, Neturia having the lowest at 923. In case of the scheduled tribe, Hura has the highest sex ratio at 1,008 with Jaipur having the lowest at 925 females per 1,000 males.

**TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS/TOWNS, 2001**

| Serial Number | Name of UA/Town | Scheduled Castes sex ratio | Scheduled Tribes sex ratio |
|---|---|---|---|
| 1 | 2 | 3 | 4 |
| 1 | Adra (CT) | 1,004 | 967 |
| 2 | Arra (CT) | 979 | 982 |
| 3 | Balarampur (CT) | 937 | 864 |
| 4 | Barabazar (CT) | 897 | 1,008 |
| 5 | Chapari (CT) | 970 | 945 |
| 6 | Hijuli (CT) | 907 | 1,036 |
| 7 | Jhalda (M) | 1,004 | 829 |
| 8 | Nabagram (CT) | 922 | 786 |
| 9 | Par Beliya (CT) | 889 | 944 |
| 10 | Puruliya (M) | 956 | 905 |
| 11 | Raghunathpur (M) | 997 | 815 |
| 12 | Santaldih Thermal Power Project-Town (CT) | 787 | 875 |
| | **Sex ratio (Urban) for the district :** | **963** | **917** |

Table 20 above gives the urban sex ratio for Puruliya district for scheduled castes and schedule tribes. For scheduled castes it is 963 and for scheduled tribes it is 917 females per 1,000 males. Adra census town and Jhalda Municipality both have the highest sex ratio for scheduled castes with 1,004 while Santaldih Thermal Power Project-Town census town has the lowest with 787. For the scheduled tribes, Hijuli census town has the highest sex ratio at 1,036 with Nabagram census town having the lowest with 786.

Table no. 21 gives number of literates and illiterates at the CD Block level. The overall literacy rate for the district is 55.6 (male 73.7, female 36.5). The male literacy rate is higher by 37.2 points than that of females. The urban literacy rate (75.4) is higher by 22.2 per cent points than the rural literacy rate (53.2). The male-female literacy gap is more pronounced in rural areas.

There is also wide inter CD Block disparity in literacy rate. It is as high as 64.2 in Kashipur as low as 43.8 in Jhalda-II CD Block. By sex the higher literacy rate is recorded in Kashipur CD Block for both males (79.8) and females (48.0). The lowest literacy rate is obtained in Bundwan CD Block (66.5) for males and in Jhalda-II CD Block (18.4) for females. The maximum male-female literacy gap is observed in Jhalda-II CD Block (49.6) and the minimum in Raghunathpur-I CD Block (30.3).

| **District (Rural) Total :** | | **1,014,101** | **704,628** | **309,473** | **1,266,989** | **460,426** | **806,563** | **53.2** | **72.4** | **33.2** | **39.1** |

Table 22 gives the same data as in Table 21 but in respect of rural areas only. It can be seen from the above table that the overall literacy rate for the rural areas of the district is 53.2 (males 72.4, females 33.2). Higher literacy rate than the district is to be found in 13 CD Blocks. The CD Blocks recording lower literacy rate than the district is 7. The literacy position by sex indicates that the highest male rural literacy is reported from Kashipur (78.5) while the lowest is in Balarampur CD Block (65.4). In case of female literacy the highest literacy rate is registered by same Kashipur CD Block (44.4) and the lowest by Jhalda-II CD Block (18.4).

**TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001**

| Range of literacy rate for villages | Number of inhabited villages | Percentage distribution of villages | Population | Percentage distribution of population |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| 0 | 3 | 0.1 | 20 | 0.0 |
| 1-10 | 16 | 0.6 | 3,211 | 0.1 |
| 11-20 | 37 | 1.5 | 12,653 | 0.6 |
| 21-30 | 95 | 3.8 | 38,324 | 1.7 |
| 31-40 | 283 | 11.5 | 205,724 | 9.0 |
| 41-50 | 622 | 25.2 | 586,552 | 25.7 |
| 51-60 | 862 | 34.9 | 915,132 | 40.1 |
| 61-70 | 406 | 16.5 | 418,498 | 18.3 |
| 71-80 | 115 | 4.7 | 89,566 | 3.9 |
| 81-90 | 21 | 0.9 | 11,141 | 0.5 |
| 91-99 | 1 | 0.0 | 173 | 0.0 |
| 100 | 7 | 0.3 | 96 | 0.0 |
| **District Total :** | **2,468** | **100.0** | **2,281,090** | **100.0** |
| | **Literacy rate for District :** | **55.6** | | |

Table 23 gives the distribution of villages by range of literacy rate. It can be observed from the above table that there are three inhabited villages in which there is no literate. The share of this village to total district population is negligible. The above table also indicates that as the literacy rate increases from the base level, the number of inhabited villages, their percentage distribution, population and percentage distribution of population increases upto literacy rate range 51-60. Thereafter all variables start to decline except range of 100 when number of inhabited villages and its percentage distribution again increases (7.0 and 0.3 per cent). The highest number of villages (862), alongwith highest percentage distribution of villages (34.9), highest population (915,132) and maximum percentage share of population (40.1) fall in literacy range of 51-60.

**TABLE-24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS/TOWNS, 2001**

| 12 | Santaldih Thermal Power Project-Town (CT) | 4,052 | 2,371 | 1,681 | 627 | 224 | 403 | 93.6 | 98.1 | 87.9 | 10.2 |
| **District (Urban) Total :** | | **168,183** | **98,866** | **69,317** | **87,243** | **34,158** | **53,085** | **75.4** | **85.0** | **64.9** | **20.1** |

Table 24 as above gives the number of literates and literacy rate for the UAs and towns. The above table shows that on an average 75.4 per cent of urban population is literate. The male literacy (85.0 per cent) is higher by 20.1 per cent points than that of female literacy (64.9 per cent). Among the towns, Santaldih Thermal Power Project-Town (census town) has registered the highest literacy rate (93.6 per cent) while the lowest is reported in Balarampur census town (66.9 per cent). The highest male literacy (98.1 per cent) and the highest female literacy (87.9 per cent) is recorded in same Santaldih Thermal Power Project-Town (census town). Lowest male literacy is found in Par Beliya census town (78.6 per cent) while lowest female literacy is registered in Nabagram census town (50.9 per cent).

| 20 | Bundwan | 2,182 | 1,466 | 716 | 2,541 | 930 | 1,611 | 54.6 | 72.3 | 36.4 | 35.9 |
| **District (Rural) Total :** | | **150,235** | **108,664** | **41,571** | **258,471** | **100,911** | **157,560** | **44.5** | **62.7** | **25.3** | **37.4** |

The above table clearly demonstrates that 44.5 per cent of the rural scheduled caste population is literate with 62.7 per cent males and 25.3 per cent females giving a male-female literacy gap of 37.4 per cent points. The highest literacy rate is observed in Kashipur CD Block (55.4) closely followed by Bundwan CD Block (54.6) and Manbazar-II (53.5). The lowest is noticed in Bagmundi CD Block (25.8). The highest literacy rate among the males (73.3) is seen in Manbazar-II CD Block and the highest literacy rate among the females (36.7) is seen in Kashipur CD Block while the lowest for males (39.4) is seen in Bagmundi CD Block and the lowest for females (11.4) is returned by Jhalda-II CD Block. The highest male-female literacy gap is recorded in Balarampur CD Block (42.6) and the lowest in Bagmundi CD Block (27.6). The literacy situation in Bagmundi CD Block (25.8) is much behind the overall literacy average among the rural scheduled castes of the district (44.5). With a few exceptions, general better literacy is seen in those CD Blocks which have relatively larger scheduled caste population.

**TABLE-26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001**

| Range of literacy rate for villages | Number of inhabited villages | Percentage distribution of villages | Scheduled Castes Population | Percentage distribution of population |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| 0 | 31 | 1.9 | 314 | 0.1 |
| 1-10 | 46 | 2.8 | 4,223 | 1.0 |
| 11-20 | 109 | 6.6 | 12,050 | 2.9 |
| 21-30 | 203 | 12.3 | 40,480 | 9.9 |
| 31-40 | 346 | 20.9 | 107,896 | 26.4 |
| 41-50 | 378 | 22.8 | 116,200 | 28.4 |
| 51-60 | 267 | 16.1 | 77,363 | 18.9 |
| 61-70 | 155 | 9.4 | 33,519 | 8.2 |
| 71-80 | 73 | 4.4 | 14,024 | 3.4 |
| 81-90 | 25 | 1.5 | 2,329 | 0.6 |
| 91-99 | 3 | 0.2 | 244 | 0.1 |
| 100 | 20 | 1.2 | 64 | 0.0 |
| **District Total :** | **1,656** | **100.0** | **408,706** | **100.0** |
| **Literacy rate for District (Rural) :** | | **44.5** | | |

There are 31 such inhabited villages (1.9 per cent) consisting of 0.1 per cent of scheduled caste population where there is no literate. As literacy rate goes higher and higher the number of villages also increases and maximum villages (378) are concentrated in literacy range 41-50 per cent with highest proportion of villages (22.8 per cent) and the highest share of scheduled caste population (28.4 per cent). Thereafter, as the literacy range increases the number of villages, their proportion and population and its proportion tend to go down with the only exception in cent per cent literacy range where the number of villages, their proportion is increased but the percentage share of scheduled caste population is negligible.

**TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001**

| Sl. No. | Name and urban status of Town | Number of literates and illiterates | | | | | | | | | Gap in male/female literacy rate |

| 12 | Santaldih Thermal Power Project-Town (CT) | 234 | 156 | 78 | 84 | 22 | 62 | 81.0 | 94.5 | 62.9 | 31.6 |
| | **Puruliya (Urban) :** | **23,287** | **15,516** | **7,771** | **31,963** | **12,633** | **19,330** | **50.1** | **65.5** | **34.1** | **31.4** |

Among the urban scheduled caste population of Puruliya district,50.1 per cent are literates with males 65.5 per cent and females 34.1 per cent. Among the twelve urban units, Santaldih Thermal Power Project-Town (census town) with 81.0 per cent literacy is on the top and Raghunathpur Municipality with 40.1 per cent literacy is in the bottom in respect of literacy rate. Among the scheduled caste males, the highest literacy rate is recorded in Santaldih Thermal Power Project-Town (census town) (94.5) whereas the lowest in Balarampur census town (55.1). In case of scheduled caste females the highest literacy rate is returned by Chapari census town (64.4) and the lowest is in Raghunathpur Municipality (23.0). The overall male-females literacy gap in the urban scheduled caste population is 31.4 per cent points. The highest gap in male-female literacy rate is seen in Nabagram census town (39.7 per cent points) and the lowest in Par Beliya census town (19.5 per cent points). It is interesting to note that the gap in male-female literacy rate in Adra census town (19.5) is even much lower than the same prevailing in municipal towns of Puruliya (32.6), Jhalda (24.8) and Raghunathpur( M) (31.2) which indicates that there is greater amount of female autonomy and lesser gender bias towards females in the matter of education in Adra census town.

The literacy situation of rural scheduled tribe population suffers a setback because of female literacy rates. While 61.0 per cent males among the rural tribal population is literate, females are 23.0 per cent only thereby making the total 42.3. Among the various CD Blocks of the district Puruliya, the maximum literacy rate is registered by Kashipur CD Block(49.5) followed by Hura CD Block(49.0) and the minimum is seen in Jhalda-II CD Block(31.3). Among the males the highest literacy rate is observed in Para CD Block(68.1) followed by Kashipur CD Block(67.9) and the lowest in Jhalda-II CD Block(49.3). Among the females, the highest literacy rate is recorded in Hura CD Block(31.2) and the lowest in Jhalda-II CD Block(12.0).

The male literacy is higher by 38.0 per cent points than the female literacy rate. The largest gap in male-female literacy rate is found in Jaipur CD Block(43.4 per cent points) while the lowest in Raghunathpur-I(33.2 per cent points).

**TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001**

| Range of literacy rate for villages | Number of inhabited villages | Percentage distribution of villages | Scheduled Tribes Population | Percentage distribution of population |

| **Literacy rate for District :** | | **42.6** | | |

There are 34 such inhabited villages that have literate scheduled tribe population consisting of 1.8 per cent of villages and 0.1 per cent scheduled tribe population. As the literacy range goes up, the number of villages and their proportion, scheduled tribe population and its percentage distribution increases upto literacy range 41-50. The maximum number of villages are 494 and their corresponding proportion (26.6 per cent) and population and its percentage share are also maximum in literacy range of 41-50. Thereafter the number of villages tend to decrease as the literacy range increases upto literacy range 91-99, then in the last literacy range of 100 the number of villages and their proportion increased, though the percentage share of scheduled tribe population is negligible.

| 12 | Santaldih Thermal Power Project-Town (CT) | 59 | 35 | 24 | 16 | 5 | 11 | 84.3 | 94.6 | 72.7 | 21.9 |
| **Puruliya (Urban) :** | | **3,695** | **2,359** | **1,336** | **3,184** | **1,230** | **1,954** | **62.6** | **76.4** | **47.4** | **29.0** |

It can be seen from the above table that among the urban scheduled tribe population of the district, 62.6 per cent is literate with 76.4 per cent males and 47.4 per cent females. Among the towns having scheduled tribe population, the highest literacy rate is exhibited by Adra census town (87.3) and the lowest by Nabagram census town (31.8). The highest literacy rate among the males is recorded in Santaldih Thermal Power Project-Town(census town) (94.6) while the lowest in Raghunathpur Municipality (47.4). In case of females, the highest literacy rate is returned from Adra census town (81.1) whereas the lowest by Raghunathpur Municipality (18.9). The overall male-female literacy gap in the urban scheduled tribe population is 29.0 per cent points. The largest gap is seen in Nabagram census town (53.8 per cent points) followed by Balarampur census town (44.9) and the least in Arra census town (10.5 per cent points). It is to be noted here that Nabagram census town consists of only 7 males and no female literates.

Out of the total population of 2,536,516 in Puruliya the main workers account for 25.4 per cent, marginal workers 19.0 per cent, total workers 44.5 per cent and non-workers 55.5 per cent. The sex differentials in work participation reveals that a much lower percentage of the female population i.e. 36.2 per cent are engaged in economic activities compared to males (52.3 per cent). Further, among male and female workers, the proportion of male main workers is abnormally high than that of the female and under marginal workers category, female proportion is much higher than that of males.

The CD Block level analysis of work participation rate reveals that Bundwan CD Block recording 36.4 per cent main workers as the highest percentage while Raghunathpur-I CD Block with 19.0 per cent main workers as the lowest. In case of marginal workers, the highest proportion is noticed in Barabazar CD Block (25.3 per cent) whereas the lowest is in Neturia CD Block (14.8 per cent). In respect of total workers, the

highest proportion is recorded in Bundwan CD Block (57.5 per cent) and lowest in Neturia CD Block (34.2 per cent). In case of non-workers, Neturia CD Block has the highest percentage (65.8 per cent) and Bundwan CD Block has the lowest (42.5 per cent). The sex differentials in participation of economic activities reflect that the highest proportion of male total workers is registered in Bundwan CD Block (58.9 per cent) and the lowest in Neturia (48.0 per cent). So far as female total workers are concerned, the highest percentage is in Bundwan CD Block again (56.1 per cent) while the lowest is in Neturia CD Block (19.3 per cent).

The work participation in the rural areas of Puruliya district is shown in Table 32 above. It can be seen from the above table that in the rural areas 46.2 per cent of the rural population are workers and 53.8 per cent non-workers. The main workers constitute 25.5 per cent and marginal workers 20.7 per cent of the total population.

The highest rural proportion of main workers has been obtained in Bundwan CD Block (36.4 per cent) and the lowest in Raghunathpur-I CD Block (19.2 per cent). Among male main workers, the highest percentage is in Bundwan CD Block (47.7 per cent) while the lowest participation is recorded in Neturia CD Block (31.9 per cent). In case of female main workers, the highest proportion is noticed in Bundwan (24.9 per cent) and lowest in Raghunathpur-II CD Block (5.2 per cent).

The highest share of marginal workers in rural areas of this district has been registered in Barabazar CD Block (26.4 per cent) and the lowest in Neturia (16.4 per cent). The proportion of male marginal workers is lower than that of their female counterparts.

There is alternated increase in ratio between males and females participation rate in case of main and marginal workers i.e. male proportion is higher in main workers whereas female proportion is higher in marginal workers.

The largest proportion of total workers has been observed in Bundwan CD Block (57.5 per cent) which is much higher as compared to district rural average (46.2 per cent) while the lowest is in Neturia CD Block (35.9 per cent).

The highest proportion of non-workers is witnessed in Neturia CD Block (64.1 per cent) and the lowest is in Bundwan CD Block (42.5 per cent).

| | | Females | 2,084 | 96 | 4.6 | 3 | 0.1 | 99 | 4.8 | 1,985 | 95.2 |
| **District (Urban)** | | **Persons** | **255,426** | **64,059** | **25.1** | **9,158** | **3.6** | **73,217** | **28.7** | **182,209** | **71.3** |
| | | **Males** | **133,024** | **56,290** | **42.3** | **5,916** | **4.4** | **62,206** | **46.8** | **70,818** | **53.2** |
| | | **Females** | **122,402** | **7,769** | **6.3** | **3,242** | **2.6** | **11,011** | **9.0** | **111,391** | **91.0** |

It is evident from the above table that out of the total urban population of Puruliya district, 25.1 per cent is main workers, 3.6 per cent is marginal workers and 71.3 per cent is non-workers.

Individual town level analysis indicates that the highest proportion of main workers (29.4 per cent) is in Santaldih Thermal Power Project-Town (census town) and lowest (16.9 per cent) in Hijuli census town. In case of marginal workers the highest proportion is recorded in Arra census town (8.7 per cent) and lowest in Santaldih Thermal Power Project-Town (census town) (0.4 per cent). The proportion of non-workers varies from the lowest recorded in Santaldih Thermal Power Project-Town (census town) and Balarampur census town (70.1 per cent) to the highest in Hijuli census town (77.6 per cent). The proportion of female non-workers is as high as 96.6 per cent in Hijuli census town and 95.2 per cent in Santaldih Thermal Power Project-Town (census town) and Par Beliya census town.

Note: Percent of Worker to total worker are given in brackets

Table 34 above contains broad classification of the working population to number and percentage in case of Puruliya. It can be seen from the above table that the highest percentage of workers are engaged as Agricultural Labourers (36.0 per cent) followed by Cultivators (31.3 per cent), Other Workers (25.2 per cent) and Household Industry Workers (7.5 per cent) for the rural areas of the district. In case of Agricultural Labourers and Household Industry Workers, the female participation is remarkably higher (52.0 per cent and 10.1 per cent) than that of the males (25.5 per cent and 5.8 per cent).

The pattern of distribution of total workers into different categories at CD Block level portrays that the highest proportion of workers employed as Cultivators is registered in Bagmundi CD Block (43.4 per cent) and the lowest in Raghunathpur-I CD Block (18.9 per cent). The highest proportion in Agricultural Labourer category is returned from Manbazar-I CD Block (47.9 per cent) and the lowest is found in Jhalda-II CD Block (18.4 per cent). Under Household Industry Workers, the remarkably highest proportion is recorded in Jhalda-II CD Block (43.9 per cent) and the lowest in Neturia CD Block (2.2 per cent). So far as the Other Workers are concerned the highest percentage of workers employed in this sector is reported from Raghunathpur-I CD Block (43.0 per cent) and the lowest from Manbazar-II (9.0 per cent).

**Note :** Percent of Worker to total worker are given in brackets

The above table shows that in the rural areas of Puruliya 38.4 per cent of the Total Workers are Agricultural Labourers, 33.3 per cent are Cultivators, 20.5 per cent are engaged in Other works and remaining 7.8 per cent are employed as Household Industry workers. By sex, almost double percentage of female workers are reported to be engaged as Agricultural Labourers (53.1 per cent against 27.9 male workers). Under Household Industry proportion of female workers (10.2 per cent) is higher compared to male workers (6.1 per cent). But under Other Workers one can see the reverse trend i.e. proportion of the male workers (28.6 per cent) is much higher than that of the female workers (9.0 per cent).

The pattern of distribution of total workers among four industrial categories at CD Block level potrays that the highest percentage of Cultivators is as high as 43.9 in Barabazar CD Block and as low as 21.7 in Raghunathpur-I CD Block. The highest proportion in Agricultural Labourers category, the percentage of workers is lowest in Jhalda-II CD Block (18.4 per cent) to the highest in Manbazar-I CD Block (47.9 per cent). In Household Industry, the exceptionally highest proportion of workers are engaged in Jhalda-II CD Block (43.9 per cent) as against the lowest proportion in Raghunathpur-II and Neturia (both 2.4 per cent). Likewise, in case of Other Works, the highest proportion of workers have been noticed in Neturia CD Block (36.4 per cent) and the lowest in Manbazar-II CD Block (9.0 per cent).

Table 36 gives the townwise number and percentage of the four categories of workers. It can be observed from the above table that a majority of the urban working population (93.4 per cent) is engaged in Other Works followed by Household Industry (2.5 per cent). Agricultural Labours (2.3 per cent) and Cultivators (1.8 per cent) respectively. By sex 94.8 per cent of male workers and 85.6 per cent of female workers are engaged in Other Works. In Agricultural Labourers category, the percentage of female workers is much higher (7.2 per cent) compared to the male percentage (1.4 per cent).

The pattern of distribution of total workers in four categories shows that the largest portion of workers is employed as Cultivators and Agricultural Labourers are recorded in census town - Nabagram (10.5 per cent and 12.3 per cent respectively), among all the municipal and non-municipal towns (census towns). There is however no Cultivator and Agricultural Labourer in Santaldih Thermal Power Project-Town (census town). In case of Household Industry, the highest proportion of workers has been observed in the same Nabagram census town (7.8 per cent) followed by Barabazar census town (7.4 per cent). The proportion of Other Workers varies from the lowest being in Nabagram census town again (69.4 per cent) to highest obtained in Santaldih Thermal Power Project-Town (census town) (99.7 per cent).

**Note :** Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Collection of villagewise amenities has been a feature of Indian census since 1961. Though such amenities data is basically non-census in nature, they are very useful for having a direct view of the existing infrastructural status of each village in the district. They can also be used as important inputs for future development planning in the district.

In Table 37, CD Blockwise position of villages so far as availibility of amenities such as educational, medical, improved drinking water, post office, telephone, transport, banking, approach to villages and power are concerned. It can be seen from the above table that educational amenities is available in 87.7 per cent of villages, medical facility in 47.5 per cent villages, improved drinking water in 92.1 per cent villages, post office in 16.5 per cent villages, telephone in 13.7 per cent villages, transport communication in 27.0 per cent villages, Banks in 3.7 per cent villages, agricultural credit societies in 6.2 per cent villages, pucca road linkage in 31.5 per cent villages and electricity is available in 49.9 per cent villages in Puruliya.

Among the CD Blocks, Puruliya-II with 99.0 per cent villages is having largest percentage of villages with educational amenity. Manbazar-I is the least served CD Block with 71.4 per cent of villages having this facility. In case of medical facility, Bundwan CD Block (97.7 per cent) has the highest percentage of villages having this facility as against only 15.6 per cent obtained in Balarampur CD Block. So far the availability of improved drinking water is concerned, Para CD Block has the highest percentage of villages (99.2 per cent) having this facility as against 63.6 per cent obtained in Jhalda-I CD Block. Out of 20 CD blocks, nearly cent per cent villages are served by this facility in 15 CD blocks. The availability of postal facilities ranges from the highest proportion recorded in Puruliya-II CD Block (35.3 per cent) to the lowest in Kashipur CD Block (7.5 per cent). Telephone facility is available in 37.8 per cent of the villages in Para CD Block to 0.8 per cent noticed in Bundwan CD Block. In respect of availability of bus, rail or navigable waterways connectivity of the villages, Para CD Block (47.1 per cent) have the highest percentage of villages having this facility while least of the villages having this facility is observed in Jhalda-II CD Block (12.4 per cent). In case of availability of banking services, the most served CD Block is Arsha with 11.6 per cent of villages having this facility whereas the least served CD Block is Manbazar-I (1.4 per cent). The agricultural credit societies are available in as many as 15.7 per cent of villages in Puruliya-II CD Block against just 1.1 per cent registered in Santuri CD Block. In case of proportion of villages connected with pucca road, the highest is in Jaipur CD Block (97.3 per cent) while the lowest is in Raghunathpur-II CD Block (12.2 per cent). The highest number of villages have been electrified in Santuri CD Block (80.6 per cent) and the least in Bundwan CD Block (8.3 per cent).

**Note :** Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 has given the same data as Table 37 but for the population of rural areas in each CD Block. It can be seen from the above table that on an average 96.5 per cent of population of the district is served by some educational facility within their villages, medical facility is available to 61.2 per cent, improved drinking water to 96.6 per cent, post office to 36.8 per cent, telephone to 27.2 per cent, transport and communication facility to 39.3 per cent, banking services to 11.1 per cent, agricultural credit society to 12.0 per cent, approach by pucca road to 41.6 per cent and electricity is available to 65.1 per cent of population within the villages.

The analysis of availability of various infrastructural facilities to the rural population within their villages reflects that among CD Blocks, cent per cent villages are served by educational facility in Puruliya-II CD Block and nearly cent per cent or above ninety per cent villages are served by this facility in rest of the CD Blocks. Minimum percentage of population is served by educational facility in Manbazar-I CD Block (90.3 per cent). Maximum population is served by availability of medical facilities in Bundwan CD Block (99.3 per cent) while the minimum population served is in Balarampur CD Block (26.3 per cent). In case of availability of improved drinking water cent per cent villages are served by this facility in Raghunathpur-II CD Block. Out of 20 CD Blocks either above ninety or nearly cent per cent villages are served by this facility in 18 CD Blocks. The lowest percentage of population

is served in Jhalda-I CD Block (72.9 per cent). The highest percentage of population served by post office is noticed in Puruliya-II CD Block (52.3 per cent) whereas the lowest in Kashipur CD Block (16.3 per cent). The maximum population served by the telephone facility is observed in Para CD Block (60.0 per cent) while the minimum is found in Bundwan CD Block (6.3 per cent).

In case of availability of transport communication facilities Puncha CD Block with 55.7 per cent is the highest served and Jhalda-II CD Block with 21.2 per cent is the least served. The situation of availability of banking services shows that the highest percentage of population is served in Jhalda-I CD Block (21.3 per cent) while the lowest is obtained in Kashipur CD Block (2.4 per cent). The highest services of agricultural credit societies is available in Puruliya-II CD Block (22.1 per cent) while the lowest is seen in Manbazar-I CD Block (1.8 per cent). The cent per cent of population living in villages approachable by pucca road is in Jaipur CD Block as aginst the minimum percentage observed in Barabazar CD Block (20.2 per cent). The highest proportion of population served by electricity is found in Hura CD Block (89.3 per cent) in contrast to the lowest percentage in Bundwan CD Block (23.5 per cent).

On the basis of above analysis it is crystal clear that there is a wide disparity in availability of infrastructual facilities among the CD Blocks except in education and improved drinking water category. For the balanced socio-economic development it is essential that the infrastructural and basic amenities are available on uniform basis. Thus poorly served areas should have preferential treatment in allocation of scarce resources in local area planning.

**TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001**

| Village not having the amenity of | Distance range of place from the villages where the amenity is available | | | |
|---|---|---|---|---|
| | Less than 5 kilometres | 5-10 kilometres | 10+ kilometres | Total (Col. 2 - 4) |
| 1 | 2 | 3 | 4 | 5 |
| 1. Education :- | | | | |
| (a) Primary School | 296 | 35 | 2 | 333 |
| (b) Middle School | 1,116 | 918 | 164 | 2,198 |
| (c) Degree College | 157 | 440 | 1,865 | 2,462 |
| 2. Medical:- | | | | |
| (a) Hospital | 358 | 553 | 1,550 | 2,461 |
| (b) PHC | 512 | 1,041 | 849 | 2,402 |
| 3. Post Office | 1,498 | 516 | 47 | 2,061 |
| 4. Telephone | 922 | 534 | 675 | 2,131 |
| 5. Bus Service | 1,015 | 667 | 135 | 1,817 |
| 6. Banks | | | | |
| (a) Commercial Bank | 875 | 1,036 | 478 | 2,389 |
| (b) Cooperative Bank | 187 | 328 | 1,927 | 2,442 |
| 7. Agricultural Credit Societies | 789 | 550 | 976 | 2,315 |

For those villages which do not have some/any of the listed amenities, Table -39 shows the number of such villages in various distance ranges from the nearest available facilities. It can be seen from the above table that 333 villages have no primary school but majority of villages (296) can have this amenity within 5 kilometres. A total of 2,198 villages do not have middle school, but majority of villages (1,116) can have this amenity within a distance of 5 kilometres. In case of degree college level education, majority of the villages are away from this amenity.

For 2,461 villages which do not have the hospital in the village itself, most of the villages (1,550) can avail of the same at a distance range of 10 kilometres and above. Out of 2,402 village reported as not having primary health centre, most of the villages (1,041) can avail of it within 5 to 10 kilometres.

In case of post office, out of total 2,061 villages not having this amenity, most of the villages (1,498) can avail the same within 5 kilometres.

So far as the availability of telephone facility is

concerned, 2,131 villages do not have the same but a large number of the villages (922) can reach this facility within a distance of 5 kilometres from the village. In 1,817 villages there is no bus service, but most of the villages (1,015) can have the bus services within 5 kilometres.

In 2,389 villages there is no commercial bank but bulk of villages (1,036) can avail the commercial banking facility located within 5 to 10 kilometres. Further, out of 2,442 villages reporting not having co-operative bank, a majority of villages (1,927) can avail of this facility at a distance of 10 kilometres and above.

In 2,315 villages wherein agricultural credit societies are not available, a very large number of villages (976) can reach this facility located at a distance range of 10 kilometres and above rom their respective villages.

**TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001**

| Distance range from the nearest statutory town ( in kilometres) | Number of inhabited villages in each range | Type of amenity available | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| | | Education | Medical | Post Office # | Telephone | Transport communications $ | Banks | Agricultural Credit Societies | Approach by pucca road |

| | **(100.0)** | **(87.7)** | **(47.5)** | **(16.5)** | **(13.7)** | **(27.0)** | **(3.7)** | **(6.2)** | **(31.5)** |

# Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

With the analysis of this table, the urban effect on amenities of rural areas can easily be understood. In case of most of the amenities such as education, medical, telephone, transport communication, banks, agricultural credit societies and approach by pucca road, they tend to concentrate in less than 5 kilometres range from the nearest statutory towns in terms of proportion of villages having these amenities. When distance range goes up from less than 5 kilometers to 5-15 kilometres the proportion of villages having these amenities tend to go up in 5 categories and go up in 3 (medical, post office and telephone) When the distance range further increases to 16-50 kilometres proportion tend to go down in all and in 51 kilometers and above range it again decreases except in medical and in bank it remains constant.

**TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001**

| Population range | Number of inhabited villages in each range | Type of amenity available | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|

# Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

There is no village in the population range 10,000 and above in Puruliya. It can be seen from the above table that availability of various amenities is directly related to the population size of the villages. It means that with the increase in population size of the villages, the proportion of villages having these amenities also increases in each population range. The only exception is noticed in case of education in 2,000-4,999 range wherein the proportion of education declined by negligible margin of 0.1 per cent point when compared to previous population range.

**TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001**

| Serial number | Name of CD Block | Number of inhabited villages | Total area | Percentage of cultivable area to total area | Percentage of irrigated area to total cultivable area |
|---|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 | 6 |
| 1 | Jaipur | 110 | 22,834.3 | 58.4 | 30.4 |
| 2 | Purulia - II | 102 | 29,314.4 | 63.9 | 30.5 |
| 3 | Para | 119 | 29,341.3 | 61.8 | 18.9 |
| 4 | Raghunathpur - II | 90 | 18,582.0 | 47.9 | 44.2 |
| 5 | Raghunathpur - I | 80 | 18,082.3 | 62.1 | 23.6 |
| 6 | Neturia | 114 | 18,954.8 | 34.1 | 4.6 |
| 7 | Santuri | 93 | 17,463.3 | 80.9 | 24.5 |
| 8 | Kashipur | 199 | 43,158.9 | 55.5 | 25.7 |
| 9 | Hura | 111 | 37,887.4 | 62.1 | 13.8 |
| 10 | Purulia - I | 106 | 27,211.4 | 55.0 | 31.7 |
| 11 | Puncha | 98 | 32,397.4 | 53.4 | 18.4 |
| 12 | Arsha | 95 | 37,437.5 | 62.1 | 15.1 |
| 13 | Jhalda - I | 132 | 30,201.7 | 49.6 | 19.2 |
| 14 | Jhalda - II | 121 | 24,602.7 | 61.1 | 20.2 |
| 15 | Bagmundi | 137 | 41,592.0 | 45.2 | 19.8 |
| 16 | Balarampur | 90 | 29,136.9 | 74.2 | 18.0 |
| 17 | Barabazar | 198 | 40,089.8 | 64.6 | 13.4 |
| 18 | Manbazar - I | 217 | 36,430.0 | 52.0 | 11.3 |
| 19 | Manbazar - II | 124 | 27,428.1 | 64.8 | 4.2 |
| 20 | Bundwan | 132 | 35,004.4 | 43.3 | 3.3 |
| **District Total :** | | **2,468** | **597,150.6** | **57.3** | **18.9** |

**Note :** Cultivable area = irrigated area + unirrigated area

It can be observed from the above table that there are 2,468 inhabited villages in Puruliya spreading over an area of 597,150.6 hectares. Out of this total area, 57.3 per cent of land is cultivable and out of the

cultivable area 18.9 per cent area is under irrigation. Among the CD Blocks, the proportion of cultivable area varies between the lowest area recorded in Neturia (34.1 per cent) and the highest in Santuri (80.9 per cent). In case of the irrigated area, it varies between the lowest area recorded in Bundwan CD Block (3.3 per cent) and the highest in Raghunathpur-II CD Block (44.2 per cent). Irrigation is one of the most important input in agriculture for higher production and thus immediate attention to the CD Blocks with low percentage of cultivable area under irrigation is essential for improvement in agricultural production in Puruliya. The in-depth analysis of the pattern of irrigated area to total cultivable are at CD Block level shows that out of 20 CD Blocks, 9 CD Blocks (Neturia, Hura, Puncha, Arsha, Balarampur, Barabazar, Manbazar-I, Manbazar-II and Bundwan) are reported having less irrigated area than the district rural average (18.9 per cent) and one CD Block is having the equal irrigated area (Para at 18.9 per cent).

**TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS**

| Serial number | Class, name & urban status of the Town | Per capita receipt | | | Per capita expenditure | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | | Total | Through taxes | From all other sources | Total | General Administration | Public health and conveniences | Public works | Public institutions | Other(s) |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 |
| 1 | IV Jhalda (M) | 471.4 | 6.9 | 464.5 | 433.5 | 89.8 | 128.9 | 78.8 | 59.5 | 76.5 |
| 2 | I Puruliya (M) | 131.1 | 22.3 | 108.8 | 98.9 | 47.1 | 26.9 | 11.6 | 0.0 | 13.3 |
| 3 | III Raghunathpur (M) | 503.5 | 21.4 | 482.1 | 484.1 | 22.8 | 15.5 | 290.1 | 10.9 | 144.8 |
| | **District Total :** | **223.9** | **20.4** | **203.5** | **192.9** | **48.6** | **37.1** | **59.2** | **8.5** | **39.4** |

Puruliya district has three municipalities with a total per capita receipt of 223.9 rupees and per capita expenditure of 192.9 rupees. Among the receipt side, the per capita receipt through taxes contributes only 20.4 rupees, where as the per capita receipt through all other sources is 203.5 rupees. Among expenditure side, a maximum of 59.2 rupees per capita has been spent on public works head and a minimum of 8.5 per capita has been spent on public institutions.

Among the three municipalities, Raghunathpur Municipality has the highest per capita receipt and highest per capita expenditure. on the contrary Puruliya Municipality has the lowest per capita receipt and lowest per capita expenditure. Among expenditure side in Puruliya Municipality a maximum amount of 47.1 rupees per capita has been spent on general administration and a lowest amount of 11.6 rupees per capita has been spent on public works but surprisingly no amount has been spent on public institutions. Details of per capita receipt and expenditure of three statutory towns can be seen from the above table.

**TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001**

| Serial number | Name and urban status of Town | Type of educational institution | | | | |
|---|---|---|---|---|---|---|
| | | Primary | Junior Secondary / Middle | Secondary / Matriculation | Senior Secondary | College |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| 1 | Jhalda (M) | 11.2 | 1.7 | 1.7 | 1.1 | 0.6 |
| 2 | Puruliya (M) | 6.4 | 0.6 | 0.6 | 0.6 | 0.2 |
| 3 | Raghunathpur (M) | 9.6 | 1.4 | 1.4 | 1.4 | 0.5 |
| | **District Total :** | **7.4** | **0.8** | **0.8** | **0.8** | **0.3** |

It can be seen from the above Table No. 44 that in urban areas of Puruliya district there are 7.4 primary schools, 0.8 junior secondary / middle schools, 0.8 secondary matriculation schools, 0.8 senior secondary schools and 0.3 colleges for per 10,000 population according to 2001 census.

**TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001**

| Serial number | Name and urban status of the Town | Number of beds in medical institutions per 10,000 population |
|---|---|---|
| 1 | 2 | 3 |
| 1 | Adra (CT) | 112 |
| 2 | Arra (CT) | 0 |
| 3 | Balarampur (CT) | 14 |
| 4 | Barabazar (CT) | 0 |
| 5 | Chapari (CT) | 8 |
| 6 | Hijuli (CT) | 0 |
| 7 | Jhalda (M) | 0 |
| 8 | Nabagram (CT) | 0 |
| 9 | Par Beliya (CT) | 0 |
| 10 | Puruliya (M) | 74 |
| 11 | Raghunathpur (M) | 31 |
| 12 | Santaldih Thermal Power Project Town (CT) | 21 |
| | **Distrct Total :** | **47** |

The above table shows that in urban areas of the district Puruliya as a whole there are 47 beds in medical institutions per 10,000 population. The town-wise position reveals that in 6 census towns i.e. Arra, Barabazar, Hijuli, Nabagram and Par Beliya and in Jhalda Municipality there is no medical institutions. Adra census town is having the highest number of beds (112) per 10,000 population and lowest number of beds per 10,000 population is in Chapari census town (8).

**TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001**

| Serial Number | Name of the Town | Total population | Slum population | Percentage of slum population to total population |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| 1 | Jhalda (M) | 17,872 | 2,820 | 15.8 |
| 2 | Puruliya (M) | 113,806 | 38,300 | 33.7 |
| 3 | Raghunathpur (M) | 21,932 | 9,403 | 42.9 |
| | **District Total :** | **153,610** | **50,523** | **32.9** |

The slum population has been reported from the district only accounting for 32.9 per cent of the total population found only in 3 municipalities of the district. Raghunathpur Municipality is having the highest percentage of slum population i.e. 42.9 per cent, Puruliya is having 33.7 and Jhalda with 15.8 per cent is in the lowest position. It may be mentioned here that the estimated slum figure is supplied by the concerned town authority, so this may differ from the census figure as collected during the Census-2001.

**TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001**

| Serial Number | Name and urban status of Town | Most important commodity | |
|---|---|---|---|
| | | Manufactured | Exported |
| 1 | 2 | 3 | 4 |
| 1 | Adra (CT) | Broom | Broom |
| 2 | Arra (CT) | Soap<br>Muri | Rice<br>Muri |
| 3 | Balarampur (CT) | Lac Products<br>Biri | Lac Products<br>Biri<br>Green Vegetables |

| Serial Number | Name and urban status of Town | Most important commodity | |
|---|---|---|---|
| | | Manufactured | Exported |
| 1 | 2 | 3 | 4 |
| 4 | Barabazar (CT) | Mustard Oil<br>Biri<br>Bakery Items | Mustard Oil<br>Biri<br>Bakery Items |
| 5 | Chapari (CT) | Flour<br>Chira<br>Timber Furniture | Rice<br>Vegetables<br>Mustard Oil |
| 6 | Hijuli (CT) | Pottery Goods | Pottery Goods |
| 7 | Jhalda (M) | Shell lac<br>Biri<br>Cutlery Tools | Shell lac<br>Biri<br>Cutlery Tools |
| 8 | Nabagram (CT) | Earthen Pot<br>Rice | Earthen Pot<br>Rice |
| 9 | Par Beliya (CT) | | Coal |
| 10 | Puruliya (M) | Biri<br>Mustard Oil<br>Mask | Biri |
| 11 | Raghunathpur (M) | Handloom Products<br>Mustard Oil<br>Wooden Products | Tasar<br>Vegetables<br>Mustard Oil |
| 12 | Santaldih Thermal Power Project Town (CT) | Rice<br>Furniture | Tiles<br>Rice<br>Vegetables |

It is evident from the table that almost all the towns and municipalities have their own local manufactured goods, except Par Beliya census town which does not produce any manufactured goods. But Par Beliya census town has coal as its export commodity. It is seen that bidi and mustard oil are most commonly manufactured and exported items from town like Balarampur census town, Barabazar census town, Chapari census town, Jhaldah Municipality, Puruliya Municipality and Raghunathpur Municipality. Rice is also one of the most commonly manufactured and exported items from many towns like Arra census town, Chapari census town, Nabagram census town, and Santaldihi Thermal Power Project (census town). Other details of manufactured and exported items can be seen from the above table townwise.

**Data source :** Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

The analysis of ownership status of houses presents some uncommon features regarding occupation of number of room under different tenure categories.

It is interesting to note that the availability of living room in rented category is better than that of owned category for the district as a whole but with median number of 2 rooms. However, in rural areas the position is same for both categories with median number of 1 room size whereas in urban areas it is same for both categories with median number 2. In 'others' category, the median number room is 1 for the district as well as for its rural component. So far as the schedule caste households are concerned, the median size number of rooms is 1 for each tenure category. Among the scheduled tribe households, it is 1 for each tenure category in rural segment, 2 for each tenure category for urban segments but at the district level, situation of rented category is better for the district as a whole with median number of rooms being 2.

**TABLE 49 : PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001**

| | **District Total :** | **26.3** | **44.8** | **28.9** | **21.1** | **47.1** | **31.7** | **71.6** | **24.1** | **4.3** |

**Data source :** Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

**Note :** Permanent : 1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e. where, burnt briks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets.

Semi permanent : 2 Semi-permanent houses refer to those houses made of other types of materials.

Temporary : 3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc.

It can be seen from the above table that in Puruliya 26.3 per cent households live in permanent houses, 44.8 per cent in semi-permanent and 28.9 per cent live in temporary houses. The proportion of households living in permanent houses in urban areas (71.6 per cent) is much higher when compared to corresponding figures for rural areas (21.1 per cent). In sharp contrast, households living in urban areas in semi-permanent and temporary houses is much lower than the percentage of households living in rural areas which shows the poor housing condition found in rural areas in respect of durability of houses.

Among the CD Blocks, the highest percentage of households (41.2 per cent) live in permanent houses in Neturia and the lowest percentage (8.0 per cent) live in Bundwan. Again, the lowest proportion of households living in semi-permanent houses (22.9 per cent) is recorded in Manbazar-II and living in temporary houses (8.2 per cent) is recorded in Jhalda-I and the highest proportion of households living in semi-permanent houses (69.5 per cent) and temporary houses (68.7 per cent) are noticed in Jhalda-I and Manbazar-II CD Block respectively. The net result of the analysis is that the housing condition in Neturia CD Block is the best among all the CD Blocks.

**Data source :** Census of India 2001, H-series : Tables on Houses, Household amenities and Assets.

*Based on the improved drinding water source, drinking water source, drinding water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outsi

However, the concept of improved drinking water is state specific and this is to be considered accordingly.

**Note :** Percentage is to be given in brackets after the number of households.
Bathroom means bathroom within the house
Toilet means toilet within the house.
Drainage menas closed and open drainage.

It is evident from the above table that in Puruliya district, 32.1 per cent households have access to improved drinking water facility, 19.3 per cent have electricity, 8.1 per cent have bathroom, 9.8 per cent have toilet facility and 17.2 per cent households have drainage. As expected, the percentage of households having these facilities in urban areas is much higher as compared to corresponding figures in the rural areas. Water is the bare minimum necessity to support the human life which is available to the lowest proportion of households in Jhalda-I CD Block (8.5 per cent) and to the highest proportion of households in Neturia CD Block (55.6 per cent). The highest proportion of households served by electricity is noticed in Neturia CD Block (35.4 per cent) while the lowest in Maanbazar-II CD Block (3.2 per cent). In case of availability of bathroom, the maximum households have been found served in Kashipur CD Block (15.7 per cent) and the minimum in Manbazar-II CD Block (1.1 per cent). The availability of toilet facility varies between the lowest percentage returned in Manbazar-II CD Block (1.6 per cent) and the highest obtained in Kashipur CD Block (17.4 per cent). The highest percentage of households connected with drainage to dispose of waste water is reported from the Neturia CD Block (29.8 per cent) whereas the lowest is in Arsha CD Block (6.5 per cent).

Percentage in brackets

**Data source :** Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

It is observed from the table that 264,862 households (58.5 per cent) use fire wood as fuel for cooking out of which 259,982 (63.9 per cent) are the rural households and 4,880 (10.6 per cent) are the urban households. It is also seen from the table that out of 20 CD Blocks, fire wood is highest source for households of 16 CD Blocks. The percentage of households for the same varies from maximum of Bundwan CD Block (96.5 per cent) of the households to a minimum of Puruliya-II CD Block (28.5 per cent). But in terms of number of households Bagmundi has the highest with 20,161 and Raghunathpur-II has the lowest with 5,432.

In case of use of crop residue it is seen that 19,163 households (4.2 per cent) use this as a fuel for cooking with 18,554 (4.6 per cent) in the rural area and 609 (1.3 per cent) of the urban area .Among the CD Blocks the number of households varies from 1,811 in Barabazar to 220 in Neturia.

Use of cowdung cake is highest in Puruliya -II with 7,990 households followed by Jaipur with 6,958 and Purulia-I with 6,352. Only 8 households of Bundwan CD Block have used cowdung cake as fuel for cooking. Among all the CD Blocks, a very large percentage of households of two CD Blocks viz Jaipur and Puruliya-II have used cowdung cake as fuel for cooking.

Only 1,231 households (0.3 per cent) of the district have used electricity as fuel out of which 1,025 households (0.3 per cent) are the rural households and 206 (0.4 per cent) urban households. Maximum 171 households of Para CD Block and minimum 22 households of Raghunathpur-II CD Block have used electricity as fuel for cooking.

Coal /lignite (Charcoal) is the second highest source in case of use of fuel for cooking with 80,234 households (17.7 per cent) of which 53,287 (13.1 per

cent) of the rural households 26,947 or (58.3 per cent) urban households. The number of households using this as a fuel for cooking varies from maximum of 8,674 in Para to a minimum of 6 in Bundwan.

Cooking gas (LPG) has been used as fuel for cooking by 2,435 households of Kashipur and only 13 households of Arsha CD Block.

None of the households of Bagmundi CD Block have used bio-gas as a fuel whereas 216 households of Kashipur CD Block have used it.

In the district 2,227 households (0.5 per cent ) have used kerosene as a fuel out of which 890 (0.2) belong to rural areas and 1,337 (2.9 per cent) to urban areas.

**Data source :** Census of India 2001, H-series: Table on Houses, Household amenities and Assets.

In case of use of banking services by the households, it will be seen that out of total 452,897 households 139,030 (30.7 per cent) avail of banking facilities in the district. In rural areas, 27.4 per cent of the households avail of banking services while in urban areas 60.0 per cent of the households avail of this services. Among the CD Blocks, Kashipur has the highest number of households (13,966) availing of banking facilities followed by Para (9,595) and Purulia-II (8,761). Jhalda-II has the lowest number and per centage of bank user households (2,963) followed by Baghmundi (3,461) and Manbazar-II (3,985). Neturia has the highest per centage of bank user households (42.5 per cent).

It is seen from the table that most of the households (64.9 per cent) in the district have bicycle, of which 65.0 per cent are rural households and 63.8 per cent are the urban households. In case of rural radio/ transistor is the second highest asset 24.7 per cent of the households having this while for urban areas television is second choice (55.8 per cent). Among the CD Blocks, Kashipur has the highest number of households for all assets (radio/transistor, television, telephone, bicycle, scooter, motor cycle, moped) except car, jeep, van. So far availability of household assets concerned bicycle is the first for all the blocks with Radio/Transistor and Television in behind.

In case of household having assets like radio/ transistor it is seen that 25.4 per cent of the households have this with 24.7 per cent rural households and 32.3 per cent of the urban households. In Para 30.4 per cent of the households have radio/transistor, the highest per centage among all the CD blocks of the district and Arsha has the lowest per centage (20.7 per cent) in this regard.

In case of television it can be seen that 60,526 or 13.4 per cent of the total households in the district have television with 8.5 per cent of the rural households and 55.8 per cent of the urban households. The highest number of households having television is in Kashipur and Manbazar-II has the lowest.

In case of telephone services it may be seen that only 2.1 per cent of the households of the district have telephone facilities with 1.0 per cent of the rural households and 11.1 per cent of the urban households. Among the CD Blocks, 11.0 per cent of households in Kashipur have telephone, the highest in the district with Para (670) and Neturia (417) distant second and third Manbazar-II has the lowest number of households having telephones.

# Brief description of places of religious, historical or archaeological importance in villages and places of tourist interest in the towns of the district

**Place of Tourist interest :**

Purulia being located in the Chhota Nagpur Plateau region, is blessed with enourmous natural beauty. Hence it occupies important place in tourism map of the State. Places like Ajodhya, Jaichandi Pahar, Panchet hills has been attracting a good number of nature lovers. Besides these hill ranges, places like - Marguma lake of Jhalda, Kuilapal of Manbazar, Deer Park Saheb bandh near Adra railway station, Ramchandrapur irrigation scheme in Santuri also prove to be attractive for tourists. The bank of river Kasai, Darkeshwar, Subarnarekha, Damodar and Kumari has always attracted its visitors for second visit.

**Place of religious and Archaeological importance:**

Among the places of religious and archaeological interest we may name Siva Temple and the idol of Deulghata of Arsha, Krosejuri of Kashipur and Budhpur of Manbazar. “Purulia, of all districts, bears an eloquent testimony to this role of Jainism in West Bengal’s cultural history. And there is no other district in West Bengal which, from the archaeological and the historical points of view, is more important, and also more neglected, than Purulia for the study of Jainism in this part of our country. Jain images are considered to be scarce in Bengal. But there are plenty of Jain images in Purulia even today, on the old archaeological sites along the banks of the river Kasai, and also in that portion of Bankura through which the Kasai flows. One can still collect dozens of excellent images of Jain Tirthankaras from these sites, of various sizes, with at least one colossus about 8 feet high in Pakbirrah in Purulia. It appears from the prevalence of the naked images of the Tirthankaras on these sites that this whole area in Purulia along the Kasai, and the contiguous Kasai-bound Bankura, had once been the stronghold of the digambara sect of the Jains.(Benoy Ghose : Cultural Profile of Purulia - District Census Handbook,1961 - Puruliya) Baram, about 13 kms, from Purulia town boasts of oldest existing temple architecture in West Bengal and is more than one thousand years old. It is a single continious linear structure more akin to the Orissa School than the eight piller of Bengal structure mostly found in the temples of Bengal constructed during the middle ates or during the Muslim period. However, the structure is now almost in ruins due to poor maintainace. The preexisting deity of this temple is Lord Siva.

**Places of historical importance :**

Kashipur once the capital of Panchakotraj, though did not find its mention in the national history was well known. The ruins of Rajbari still tell the tale of the bygone days.

**Accommodation :**

There is a government tourist lodge in Ayodhya called Ayodhya Hills Tourist Lodge run by West Bengal Tourism Department. The Department of Sports and Youth Welfare of the Government of West Bengal also runs a youth hostel in Ayodhya. There are two forest Bunglow in Puruliya run by the West Bengal Forest Development Corporation Ltd., one in Duarsini and the other in Garh Panchakot respectively. Apart from all these, there are in all 10 Dak Bunglows in Raghunathpur-II, Kashipur, Hura, Puruliya Muffasil, Puncha (2 Dak Bungalows), Manbazar-I (2 Dak Bungalows), Manbazar - II and Barabazar CD Blocks. Two rest houses in Baghmundi and Arsha respectively and 15 Inspection Bunglows in Jaipur, Jhalda-I (3 Inspection Bunglows), Baghmundi, Para, Raghunathpur, Neturia, Santuri, Hura, Puncha, Manbazar-I, Banduan, Barabazar and Balarampur where tourist can get accommodation subject to approval of the concerned authority.

# Scope of Village & Town Directory

The "Village Directory'' is one of the traditional compilations of the census. The format of the directory is almost the same as was prescribed in the 1991 census. It bears the list of villages, their location code numbers, areas, population, amenities such as educational, medical, communications, drinking water facilities etc. available to them and also the land use pattern for each village. For this purpose, villages have been arranged CD Block wise in order of their location code numbers. The inclusion of alphabetical list of villages with 2001 census population and the map of every CD Block depicting location of villages by population size, urban-spread and important infrastructural facilities available therein will further help the reader in identifying any village in the CD Block.

'Village' is a statutorily recognized unit having a definite boundary and separate land records. In case a complete village is treated as an outgrowth of urban agglomeration, data on amenities and land use for that village have not been given in the Village Directory but shown along with the urban component. For those villages, which have partly merged in an outgrowth of U.A. data pertaining to remaining part of the village is shown in the Village Directory and for the part merged or treated as an outgrowth, the details have been given under the concerned urban agglomeration. Land use data for villages treated as Census Towns (Urban) in 2001 census can be seen in Appendix-III of the Village Directory.

If a village has fully merged into another village, the location code number and name of the merged village are given both in the Village Primary Census Abstract and the Village Directory at the appropriate place. Data in respect of these two villages put together appear against the village with which the other village has merged.

The uninhabited village (villages with no population) has been indicated as such after furnishing details in columns 1 to 3 i.e. the location code number, name and area of the village. In addition to the above details, following eight appendices to Village Directory have also been included.

Appendix – I - Abstract of educational, medical and other amenities in Villages - CD Block level

Appendix-IA - Villages by number of Primary Schools

Appendix-IB - Villages by Primary, Middle and Secondary Schools

Appendix-IC - Villages with different sources of drinking water facilities available

Appendix-II - Villages with 5,000 and above population which do not have one or more amenities available

Appendix-IIA - List of Census Towns which do not have one or more amenities

Appendix-III - Land utilisation data in respect of Census Towns/Non Municipal Towns

Appendix-IV - CD Block wise list of inhabited villages where no amenity other than drinking water facility is available

Appendix-V - Summary showing number of Villages having or not having Scheduled Caste Population

Appendix-VI - Summary showing number of Villages having or not having Scheduled Tribe Population

Appendix-VIIA - List of Villages according to the proportion of the Schedule Castes to the total population by ranges

Appendix-VIIB - List of Villages according to the proportion of the Schedule Tribes to the total population by ranges

Appendix-VIII - Number of Villages under each Gram Panchayat (CD Block wise)

The above eight appendices are expected to help the planners for planning inputs in areas / villages where basic infrastructure is lacking and also for evolving suitable plans for the welfare of Scheduled Castes and Scheduled Tribes, in particular.

The Village Directory format has 23 columns and

the details given under each column and the abbreviations used to explain availability of amenities are as under.

Column 1 – Serial No. of the villages.

Column 2 – The name and location code number of each village, as this is necessary for proper identification of the village. This also includes the forest and uninhabited villages.

Column 3 – The total area of the village (in hectares) as indicated by the State Revenue Department.

Column 4 – The total population in each village (2001 Census).

Column 5 – The total number of households in the village (2001 Census).

Data on amenities such as educational, medical, drinking water, post, telegraph and telephone, commercial and cooperative Banks, credit societies, Recreational & cultural facilities, communications etc. are shown under columns 6 to 13 of the Village Directory. In case if an amenity is not available within the referent village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz., up to 5 kms., 5-10 kms. and 10+ kms. to the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provision of goods and services as well, so as to minimize the regional imbalance in the process of development.

Column 6 shows the number of all kinds of educational institutions run by different agencies, government or private of the level of viz., primary school, middle school, secondary school, senior secondary, college, industrial school, training school adult literacy school / centre and other educational institutions (Sanskrit pathshala, senior basic school, makhtab etc).

If in a village, secondary school has middle and primary classes also, the same has been counted as three schools i.e., secondary, middle and primary school. In case there are more than one institution of any type in a village their number is indicated within brackets against the prescribed abbreviation.

Column 7 provides data on medical facilities available in the village.

Column 8 gives information regarding availability of drinking water within the village. In case more than one source is available to the village the same has been indicated.

Column 9 provides information about the existance of facilities such as post, telegraph and telephone connections available in the village.

Column 10 refers to the availability of banking service in the villages and this is shown by giving the number of commercial and co-operative banks separately.

Column 11 contains information on availability of credit societies in the village. The information is represented separately by recording the number of Agricultural, non-Agricultural and other credit societies.

Column 12 give information on availability of Recreational & Cultural facilities such as Cinema / Video Hall, Sports Club, Stadium / Auditorium, in the village.

Column 13 gives information as to whether the village is served by any mode of public transport like bus, rail and water-ways.

Column 14 refers to the state of roads etc. leading to the village, this is useful in determining as to whether the village is approachable both in fair and foul weather, and whether it is inaccessible only for some time in the year.

Column 15 gives the information about the nearest town and its distance in kilometers in bracket from the referent village. In case the nearest town is located in another state, the name of the state has also been furnished.

Column 16 relates to the availability of power supply in the village.

In case the power supply is released only for specific purpose, say agriculture or other it has been stated accordingly. In case the electricity is not available to the village, a dash (-) has been mentioned in the column.

Column 17 is regarding receipt of News Paper / Magazine in the village.

Column 18 has information regarding the name of the most important commodity, manufactured in the village.

Columns 19 to 23 give the details about land utilization. The land use pattern given in the Village Directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India.

Column 19 includes all lands classed as forests under any legal enactment dealing with forests or administered as forests, whether State-owned or private, and whether wooded or maintained as potential forest land. The area of crops raised in the forest and grazing lands or areas open for grazing within the forests has been included under the forest area.

Column 20 indicates extent of irrigated lands under various types of irrigation.

Column 21 cover all agricultural lands including the net area sown with crops and orchards or net cropped area and also current and other fallow lands, the latter would imply all lands which were taken up for cultivation, but are temporarily out of cultivation for a period of not less than one year and not more than five years. The columns does not include gross year sown or gross cropped area. Net area sown thus represents the area sown with crops and orchards. Area sown more than once in the same year has been counted only once.

Column 22 gives information on cultivable wastelands and includes all lands available for cultivation whether not taken up for cultivation once but not cultivated during the preceding five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles, which are not put to any use. These may be assessed or unassessed and may be in isolated blocks within cultivated holding. Lands under thatching grasses, bamboo, bushes and other groves for fuel etc., which are not included under orchards or forests are included in this category. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

Column 23 includes the land not available for cultivation such as barren, unculturable land and put to non-agricultural use. All lands occupied by buildings, roads, railways, rivers, canals, etc. form part of the land under non-agricultural uses. Barren and unculturable lands include mountains, rocks, deserts etc., which cannot be brought under cultivation, except at a very high cost.

Column 24 and 25 are once again the name of the villages and serial numbers respectively for the readers convinience.

**Town Directory :**

The town directory is presented for each town covering different aspects of urban life through a set of seven statements from I to VII. The data contained in these statements are about the identification particulars of town, the area, number of households (including houseless households), population and growth rate in 2001 and past censuses, density, sex ratio, physical aspects and location of towns, communications, municipal finances, civic and other amenities, medical, educational, recreational, cultural facilities, trade, commerce, industry, banking, and civic and other amenities in slums. It covers all the towns in the district statutorily notified as well as non-municipal towns (Census Towns). All the towns in the district are arranged in ascending order of location code number.

The data collected in these statements have largely been furnished by the municipal bodies. In case of non municipal towns (Census Towns) the Block level office supplied the information.

Statement I shows status and growth history of the towns in the district. Column 2 in this statement indicates class, name and civic administration status of town (as in 2000). Class of the town indicated under this column has been introduced to factilities the analysis of town directory data at the state and the national level. Census towns have no urban civic status.

**Size and Class of Towns :**

| Class | - | Size |
|---|---|---|
| I | - | 100,000 and above |
| II | - | 50,000 to 99,999 |
| III | - | 20,000 to 49,999 |
| IV | - | 10,000 to 19,999 |
| V | - | 5,000 to 9,999 |
| VI | - | below 5,000 |

Column 3 is for representing eight digit permanent code number for each town in the district.

Coulmn 4 indicates the name of police station in which the town is located.

Column 5 is for recording the name of CD Block if the town is located in it.

Column 6 gives area (in sq. kms.) of the town.

Column 7 gives information about number of households including houseless households.

Columns 8 to 18 gives population and growth rate of the town since the Censuses of 1901, which would help in drawing the trends in their growth rate.

Column 19 present density in 2001 Census and 20 to 22 represent the sex ratio.

Statement II shows physical aspects and location of towns. In physical aspects only the rainfall, maximum and minimum temperature data as obtained from the Director General of Meteorological Survey of India have been shown. Towns for which information could not be obtained from Meteorological Survey of India, the same has been collected locally or calculated in relation to the nearest town, to the extent possible. Columns 6 to 12 have been filled up on the basis of information received from the respective district authority. Distances respectively from the state, district and tahsil/CD Block headquarters as well as the nearest city (urban area with a population of 100,000+) would help in determining the location of a town. Communication facilities are shown mentioning railway station, bus route and navigable river/canal.

Statement III deals with municipal finance for the statutory and also non-statutory town bodies managing civic administration of the town provided they have separate budgets and accounts of their own.

Statement IV Scheduled Castes/Scheduled Tribes population figure given in columns 4 and 5 would help in measuring amenities in respect of population size of the weaker sections in the towns. The information on road length within the town shown under column 6 has been obtained from Municipality (except for the highways).

Columns 7 to 12 reflects the information on system of sewerage number of latrines and method of disposal of night soil.

Columns 13 and 14 indicate sources and system of storage with capacity of protected water supply to the inhabitants of the towns.

Column 15 gives information regarding availability of fire fighting services. In case, it is not available in the referent towns, the name of the nearest place where it is available has been mentioned and the distance from the town has also been indicated within brackets. Columns 16 to 20 pertain to the number of connection of electricity supply available for domestic, industrial, commercial, road lighting (points) and for any other purposes.

Statement V gives information regarding amenities like medical, educational, recreational and cultural facilities available in the town. 2001 population figures for each town have also been indicated and this will facilitate in analyzing data on facilities available to the people.

Data related to medical facilities have been obtained from the concerned district authority and shown under columns 4 and 5. All types of medical institutions whether allopathic, ayurvedic, unani or homoeopathic have been covered.

If the medical institution is Ayurvedic, Unani or Homoeopathic the same is indicated in bracket by recording the number of institutions.

In case, more than one institution of any type is available, the exact number is shown within the brackets.

The information on educational facilities are depicted in column 6 to 14.

Column 10 pertains to the number of recognized shorthand, typewriting and vocational training institutes ( grouped as others ) which include Applied Art / Painting college, Pharmacy college, B.Ed. college, Teacher's training institute, Music / Dancing, Nursing school, etc.

Column 15 shows the information in respect of Adult Literacy classes / Centres etc. Similarly in view of the spurt in the employment of women in towns, information on number of working women's hostels and seats available therein has been given under column 16. This data would help in formulating plans for opening new hostels in order to meet the problems of the single working women.

Columns 17 to 20 show recreational and cultural facilities available in the town. These include stadia , cinema, auditoria / drama / community halls, public libraries indicated as 'PL' and reading rooms indicated as 'RR'.

Statement VI presents information in respect of Trade, Commerce, Industry and Banking services in the town. Columns 3, 4 and 5 contain information about the three most important comodities exported out from the town, column number 6, 7 and 8 in the other hand bears information about the three most important commodities manufactured in the town. Column number 9, 10 and 11 show the number of agricultural and non-agricultural credit societies in the town.

Statement VII provides data in respect of civic and other amenities in the slums.

PEOPLE ORIENTED

# Abbreviation used in Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows :

**Columns 1 : Serial Number**

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

**Columns 2 : Name and Location Code Number of village**

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

**Column 3 : Area of the village**

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

**Column 4 : Total population**

The total population of the village as per 2001 Census is given against this column.

**Column 5 : Number of households**

The number of households as per 2001 Census is given in this column.

**Amenities :**

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz. <5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

**Column 6 : Educational**

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

| | | |
|---|---|---|
| (i) | Primary School | P |
| (ii) | Middle School | M |
| (iii) | Secondary School | S |
| (iv) | Senior Secondary School | PUC |
| (v) | College | C |
| (vi) | Industrial School | I |
| (vii) | Training School | Tr |
| (viii) | Adult literacy class/centre | AC |
| (ix) | Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab etc. | O |

More than one institution of a type in the village is indicated by the number within brackets against the

abbreviation, e.g. P(3), M(4), etc.

**Column 7 : Medical**

Availability of medical facility within the village is indicated by following codes :

| | | |
|---|---|---|
| (i) | Allopathic Hospital | H |
| | Ayurvedic Hospital | HA |
| | Unani Hospital | HU |
| | Homeopathic Hospital | Hom |
| (ii) | Allopathic Dispensary | D |
| | Ayurvedic Dispensary | DA |
| | Unani Dispensary | DU |
| | Homeopathic Dispensary | D Hom |
| (iii) | Maternity & Child Welfare | MCW |
| (iv) | Maternity Home | MH |
| (v) | Child Welfare Centre | CWC |
| (vi) | Health Centre | HC |
| (vii) | Primary Health Centre | PHC |
| (viii) | Primary Health Sub-Centre | PHS |
| (ix) | Family Welfare Centre | FWC |
| (x) | T.B. Clinic | TB |
| (xi) | Nursing Home | NH |
| (xii) | Registered Private Medical Practitioner | RMP |
| (xiii) | Subsidised Medical Practitioner | SMP |
| (xiv) | Community Health Worker | CHW |
| (xv) | Others | O |

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

**Column 8 : Drinking Water**

The type of the drinking water supply sources available within the village are indicated by codes as follows :

| | | |
|---|---|---|
| (i) | Tap Water | T |
| (ii) | Well Water | W |
| (iii) | Tank Water | TK |
| (iv) | Tubewell Water | TW |
| (v) | Handpump | HP |
| (vi) | River Water | R |
| (vii) | Canal | C |
| (viii) | Lake | L |
| (ix) | Spring | S |
| (x) | Others | O |
| (xi) | Summer Sorce | SS- |

**Column 9 : Post, Telegraph and Telephone**

It is indicated by codes as shown below whether within the village exists the following amenities :

| | | |
|---|---|---|
| (i) | Post Office | PO |
| (ii) | Telegraph Office | TO |
| (iii) | Post & Telegraph Office | PTO |
| (iv) | Telephone Connection | PH |

**Column 10 : Commercial & Co-operative Banks**

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given :

| | | |
|---|---|---|
| (i) | Commercial Bank | CM |
| (ii) | Co-operative Bank | CP |

**Column 11 : Credit Societies**

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

| | | |
|---|---|---|
| (i) | Agricultural Credit Society | ACS |
| (ii) | Non-Agricultural Credit Society | NCS |
| (iii) | Other Credit Society | OCS |

**Column 12 : Recreational & Cultural facilities**

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets :

| | | |
|---|---|---|
| (i) | Cinema / Video Hall | CV |
| (ii) | Sports Club | SP |
| (iii) | Stadium / Auditorium | ST |

**Column 13 : Communications**

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows :

| | | |
|---|---|---|
| (i) | Bus | BS |
| (ii) | Railway Station | RS |
| (iii) | Navigable Waterway | NW |

**Column 14 : Approach to village**

Approach to village refers to the state of road leading to village. The approach to the village is

लोकोन्मुख PEOPLE ORIENTED

indicated in following codes :

| | | |
|---|---|---|
| (i) | Paved Road | PR |
| (ii) | Mud road | MR |
| (iii) | Foot path | FP |
| (iv) | Navigable River | NR |
| (v) | Navigable Canal | NC |
| (vi) | Navigable waterways other than River, Canal | NW |

**Column 15 : Nearest Town and distance**

The distance is given in kilometers in brackets against the name of the town nearest to the village.

**Column 16 : Power supply**

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

| | | |
|---|---|---|
| (i) | Electricity for domestic use | ED |
| (ii) | Electricity for agricultural use | EAG |
| (iii) | Electricity for other purposes | EO |
| (iv) | Electricity for all purposes | EA |

**Column 17 : News Paper / Magazine**

If village receives any News Paper/Magazines the same is noted in this column using following codes :

| | | |
|---|---|---|
| (i) | News Paper | N |
| (ii) | Magazine | M |

**Column 18 : Most important commodities manufactured**

The name of three most important commodities manufactured in the village is recorded against this column.

**Column 19 to 23 : Land use i.e. area under different types of land use**

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

| | | |
|---|---|---|
| (i) | Government Canal | GC |
| (ii) | Private Canal | PC |
| (iii) | Well (without electricity) | W |
| (iv) | Well (with electricity) | WE |
| (v) | Tubewell (without electricity) | TW |
| (vi) | Tubewell(with electricity) | TWE |
| (vii) | Tank | TK |
| (viii) | River | R |
| (ix) | Lake | L |
| (x) | Waterfall | WF |
| (xi) | Others | O |
| (xii) | Total | T |

The village directory also carries the following appendices.

| | |
|---|---|
| Appendix-I | It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district. |
| Appendix-I-A | Indicates number of villages CD Block wise having one or more primary schools. |
| Appendix-I-B | Indicates number of villages CD Block wise having primary, middle and secondary schools. |
| Appendix-I-C | Shows number of villages CD Block wise with different sources of drinking water facilities. |
| Appendix-II | Indicates the list of villages with 5,000 and above population which do not have one or more important amenities. |
| Appendix-II-A | Indicates list of Census Towns which do not have one or more amenities. |
| Appendix-III | It gives the land utilization data in respect of Census Towns / non-municipal Towns. |
| Appendix-IV | CD Block wise list of inhabited villages where no amenity other than drinking water facility is available. |
| Appendix-V | Summary showing number of villages having or not having Scheduled Castes population. |
| Appendix-VI | Summary showing number of villages having or not having Scheduled Tribes population. |
| Appendix-VII A & VII B | The appendix shows the list of villages according to proportion of the Scheduled castes and Scheduled Tribes to the total population by ranges. |
| Appendix-VIII | Indicates CD Block wise number of villages under each Gram Panchayat. |

# Abbreviation used in Town Directory

**Town Directory Statements (I to VII)**

**Statement I :** Status and Growth History

**Column (2) :** Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

| Population | Class |
|---|---|
| 100,000 and above | I |
| 50,000 - 99,999 | II |
| 20,000 - 49,999 | III |
| 10,000 - 19,999 | IV |
| 5,000 - 9,999 | V |
| Below 5,000 | VI |

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

| | | |
|---|---|---|
| (i) | Municipal Corporation | M. Corp. |
| (ii) | Municipal Committee | MC |
| (iii) | Municipal Council | M Cl |
| (iv) | City Municipal Council | CMC |
| (v) | Town Municipal Council | TMC |
| (vi) | Municipal Board | MB |
| (vii) | Municipality | M |
| (viii) | Cantonment Board/Cantonment | CB |
| (ix) | Notified Area | NA |
| (x) | Notified Town | NT |
| (xi) | Notified Area Committee/ Notified Area Council | NAC |
| (xii) | Notified Town Area | NTA |
| (xiii) | Industrial Notified Area | INA |
| (xiv) | Industrial Township | ITS |
| (xv) | Township | TS |
| (xvi) | Town Panchayat | TP |
| (xvii) | Nagar Panchayat | NP |
| (xviii) | Town Committee/ Town Area Committee | TC |
| (xix) | Small Town Committee | ST |
| (xx) | Estate office | EO |
| (xxi) | Gram Panchayat | GP |
| (xxii) | Census Town | CT |

Others columns need no comments.

**Statement II - Physical Aspects and Location of towns, 1999.**

**Column 3 to 5 :** Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

**Column 6, 7 and 8 :**

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

**Column 9& 10 :**

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

**Column 11, 12 and 13 :**

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

**Statement III :** Municipal Finance 1998 - 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

**Statement IV :** Civic and Other amenities, 1999

**Column (1 to 5) :** Self explanatory.

**Column (6) :** Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

| | | |
|---|---|---|
| (i) | Pucca Road | PR |
| (ii) | Kutcha Road | KR |

**Column (7) :** System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface

are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

| | | |
|---|---|---|
| (i) | Sewer | S |
| (ii) | Open Surface Drains | OSD |
| (iii) | Box Surface Drains | BSD |
| (iv) | Sylk Drains | SD |
| (v) | Cesspool method | CP |
| (vi) | Pit System | Pt |
| (vii) | Others | O |

**Column 8 to 11 :** Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

**Column 12 :** Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

| | |
|---|---|
| Head Loads | HL |
| Basket | B |
| Wheel Barrows | WB |
| Septic Tank | ST |
| Pit System | Pt |
| Sewerage | S |
| Others | O |

**Column 13 and 14 :** Water supply

Source and capacity of storage system. The following codes are used in these columns:

**Column 13 :**

| | | |
|---|---|---|
| (i) | Tap water | T |
| (ii) | Tube-well water | TW |
| (iii) | Tank Water | TK |
| (iv) | Well water | W |

**Column 14 :**

| | | |
|---|---|---|
| (v) | Over Head Tank | OHT |
| (vi) | Service Reservoir | SR |
| (vii) | River Infiltration Gallery | RIG |
| (viii) | Bore Well Pumping System | BWP |
| (ix) | Pressure Tank | PT |

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

**Column 15 :** Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

**Column 16 to 20 :** Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

**Statement V :** Medical, Educational, Recreational and Cultural Facilities, 1999

**Column 1 to 3 :** Self explanatory.

**Column 4 & 5 :**

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

| | | |
|---|---|---|
| (i) | Hospital | H |
| (ii) | Dispensary | D |
| (iii) | Health Centre | HC |
| (iv) | Family Welfare Centre | FWC |
| (v) | T.B. Clinic | TB |
| (vi) | Nursing Home | NH |
| (vii) | Others | O |

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

| | |
|---|---|
| Ayurvedic | A |
| Unani | U |
| Homoeopathic | Hom. |

**Column 6 to 9 :**

The codes used for these columns are as follows :

| | | |
|---|---|---|
| (i) | Arts only | A |
| (ii) | Science only | S |
| (iii) | Commerce only | C |
| (iv) | Arts & Science only | AS |
| (v) | Arts & Commerce only | AC |
| (vi) | Combined for all categories Arts, Science and Commerce | ASC |
| (vii) | Law | L |
| (viii) | University | U |
| (ix) | Others | O |

**Column 10 :** Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

| | | |
|---|---|---|
| (i) | Vocational Training Institute | VT |
| (ii) | Shorthand | SH |
| (iii) | Typewriting | Type |
| (iv) | Shorthand & Typewriting | SH Type |
| (v) | Others | O |

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B.Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

**Column 11 to 14 :** Higher Secondary/Intermediate/ Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

**Column 15 :** Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

**Column 16 :** Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

**Column 17 to 19 :** Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

**Column 20 :** Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

| | | |
|---|---|---|
| (i) | Public Library | PL |
| (ii) | Reading room | RR |

**Statement VI :** Trade, Commerce, Industry and Banking, 1999

**Column 3 to 8 :** Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

**Column 9 :** Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

**Column 10 & 11 :** Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

**Statement VII :** Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

# Brief Note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

**Data Processing**

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

**Task Force on Quality Assurance**

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preli-minary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

**Primary Census Abstract**

The Primary Census Abstract which is yet another important publication 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institu-tional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication table provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

**Level of presentation in District Census Handbooks :**

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under :

| | Name of the Primary Census Abstract | Level of presentation |
|---|---|---|
| 1. | District Primary Census Abstract | District/CD Block/UA/City/Town |
| 2. | Primary Census Abstract for Scheduled Castes | District/CD Block/Town |
| 3. | Primary Census Abstract for Scheduled Tribes | District/CD Block/Town |
| 4. | Village Primary Census Abstract | CD Block/Village wise |
| 5. | Urban Primary Census Abstract | Town/Ward level |

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows :

**Area Figures**

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

## DISTRICT PRIMARY CENSUS ABSTRACT

| Location code number | District/ CD Block/ U.A./ City/ Town | Total/ Rural/ Urban | Area of Town/ Ward in square kilometre | Number of households | Total population (including institutional and houseless population) | | | Population in the age-group 0-6 | | | Scheduled Castes population | | | Scheduled Tribes population | | | Literates | | |

Out of 20 CD Blocks of the district, Kashipur CD Block has the highest number of Gram Panchayats (13) and Manbazar-I has the highest number of villages (244). The lowest number of Gram Panchayats (6) belongs to Santuri and Raghunathpur-II CD Block and the lowest number of villages belongs to Balarampur (90).

# Annexure

**Annexure - II : Fertility and Mortality, 1991 Census**

**Fertility :**

In 'demography' the science of population statistics Fertility is one of the main components of population change whereas others are 'Mortality' and Migration. Fertility deals with actual reproductive performances in a given community at a given period of time.

It has been customary in censuses to collect, compile and analyse the fertility data. In 1991 and 2001 Census, four questions relating to fertility were asked. These are age at marriage, number of children surviving at the time of questioning with their sex and number of children born alive by sex to all ever married woman only. Also, the question "Number of children born alive during last one year" was asked from the currently married women only. Different fertility ratios which are discussed here are based on mainly the answer of the question "Number of children born alive during last one year".

The very common indicator of fertility is Crude Birth Rate (CBR) which denotes the number of live births per 1,000 population. Other common fertility idicators are Age Specfic Fertility Rate (ASFR), General Fertility Rate (GFR), Total Fertility Rate (TFR), Age Specific Marital Fertility Rate (ASMFR), General Marital Fertility Rate (GMFR) and Total Marital Fertility Rate (TMFR). ASFR, GFR and TFR are calculated by taking total no. of women as denominator whereas for ASMFR, GMFR & TMFR are calculated by taking total number of currently married woman as denominator. The table below shows the fertility rate under different measures in the district as well as in the State.

# Annexure

**Annexure – II (A)**
**Age Specific Marital Fertility Levels - 1991**
**in the district of Puruliya**

| Age group | West Bengal | Puruliya |
|---|---|---|
| (1) | (2) | (3) |
| 15-19 | 0.16 | 0.159 |
| 20-24 | 0.191 | 0.223 |
| 25-29 | 0.133 | 0.179 |
| 30-34 | 0.082 | 0.122 |
| 35-39 | 0.05 | 0.08 |
| 40-44 | 0.03 | 0.037 |
| 45-49 | 0.016 | 0.024 |

**Source :** Fertility Tables –F Series 1991 Census

Annexure II(A) indicates that excepting the age group 15-19 the fertility levels in all age groups in the district are higher when compared with the State figures. The highest fertility levels both in the case of the district as well as the State has been reflected in the age group of 20-24. But just below this level higher fertility is found in the age group 15-19 for the State and in the age group 25-29 in the case of the district.

# Annexure

**Annexure – II (B)**
**Other fertility measures in the district of Puruliya**

| Fertility Measures | West Bengal | | Puruliya | |
|---|---|---|---|---|
| | 1981 | 1991 | 1981 | 1991 |
| G.F.R. | 153 | 122 | 126 | 130 |
| G.M.F.R. | 185 | 158 | 158 | 160 |
| T.F.R. | 4.3 | 3.61 | 4.1 | 4.08 |
| T.M.F.R. | 5.7 | 5.13 | 4.9 | 5.1 |
| C.B.R. | 34.67 | 29.01 | 30.28 | 30.99 |
| No. of children ever born per woman in the age group 45-49 | - | 4.56 | - | 3.94 |
| Mean age at Marriage | - | 17.21 | - | 16.66 |
| Child woman ratio | - | 71.14 | - | 78.13 |

It is observed from the Annexure II (B) on different fertility measures that levels of fertility are less as compared with the State in 1981 whereas in 1991 different fertility measures excepting TMFR show higher level of fertility in the district as compared with the State. The higher level of fertility in the district in 1991 appeared as compared with the State due to lower mean age of females in the district. And due to higher fertility in the district the child-woman ratio is also higher in 1991 as compared with the State.

# Annexure

**Mortality**

Apart from fertility and migration, mortality is also considered as the dynamics of population change demography. In census, information on the questions on children ever born and children surviving is collected from all ever married women. From this, estimates of child mortality have been worked out by age of mother by using Brass technique. The table below shows the estimates of child mortality in 1981-91 in the district of Puruliya.

**Annexure – II (C)**
**Estimate of Child Mortality, 1981-91**
**in the district of Puruliya**

| Mortality Level | Census Year | West Bengal | | | Puruliya | | |
|---|---|---|---|---|---|---|---|
| | | P | M | F | P | M | F |
| $q_1$ | 1981 | 95 | 103 | 57 | 75 | 96 | 56 |
| | 1991 | 62 | 75 | 51 | 55 | 58 | 74 |
| $q_2$ | 1981 | 102 | 106 | 98 | 88 | 94 | 81 |
| | 1991 | 81 | 79 | 83 | 66 | 69 | 63 |
| $q_3$ | 1981 | 111 | 113 | 110 | 86 | 87 | 85 |
| | 1991 | 86 | 86 | 85 | 71 | 73 | 70 |
| $q_5$ | 1981 | 124 | 123 | 125 | 99 | 100 | 99 |
| | 1991 | 94 | 94 | 92 | 76 | 76 | 77 |

**Source :** Occasional paper no. 1 of 1997

It is observed from Annexure II (C) that child mortality was much more higher in 1981 both in the district and in the State as compared with the child mortality 1991. The high child mortality in 1981 happened due to high male child mortality. In 1991 in the case of the district the female child mortality is higher in case $q_1$ and $q_5$. Child mortality in case of the State female child mortality is higher for $q_2$.

| 16. Barddhaman | 120 | 152 | 3.59 | 5.13 | 28.95 | 4.23 | 66.84 | 17.21 |
| 17. Birbhum | 131 | 161 | 3.81 | 5.05 | 31.34 | 4.55 | 79.04 | 16.89 |

**Source :** Occasional Papers No. 1 of 1997

It is observed from the above table that GFR, GMFR, TFR, TMFR and CBR for the State as a whole are 122, 158, 3.61, 5.13 and 29.01 respectively. Maldah occupies the first position in terms of GFR, TFR and CBR whereas in case of GMFR and TMFR South 24 Parganas is in the first position. Lowest position for GFR and CBR goes to Kolkata whereas the same position occupies by Hugli for GMFR, TFR and TMFR. Number of children ever borm per woman in age group 45-49 is maximum in Murshidabad with 5.72 which is much higher than the State average of 4.56 and the minimum number is observed in Kolkata. Child-woman ratio is highest in Murshidabad with 93.03 and Kolkata has the lowest with 37.22. State average mean age at marriage is 17.2. Mean age at marriage is maximum in Kolkata with 19.05 and Murshidabad with 16.49 is the minimum.

Annexure

## Annexure - IV

### Percentage distribution of Migrants by place of birth, 2001 Census

Migration is an important aspect in the analysis of population change as it affects the size, age and sex structure of the population. However, it can affect the population size at local level only. In most general sense, migration as ordinarily defined movement of people from one place to another place involving change of residence for some definite purpose. Migration may be categorized as internal and international migration. A person moves from his/her place of birth last residence to a new place with some definite reason, it may be economic, social, political or for any other reason. The main source of information on migration of our country is collected through regular decennial census. In 2001 Census, data on migration were collected on different aspects, such as reason for migration from the place of previous residence, duration of stay since migration etc. Tables on migration by place of birth; interstate migration; rural and urban composition of internal migrants by place of birth in the district and in the State are given below.

Annexure

**ANNEXURE – IV (A)**
**PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH, 2001 CENSUS**

| Place of Birth | West Bengal | | | Puruliya | | |
|---|---|---|---|---|---|---|
| | Persons | Males | Females | Persons | Males | Females |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| A. Migrants born within the state of Enumeration | 19,082,558 (77.4) | 4,489,736 (60.0) | 14,592,822 (84.9) | 589,585 (85.1) | 73,134 (81.8) | 516,451 (85.6) |
| i) Migrants born elsewhere in the district of Enumeration | 14,526,298 (58.9) | 2,892,376 (38.7) | 11,633,922 (67.7) | 514,999 (74.4) | 57,637 (64.4) | 457,362 (75.8) |
| ii) Migrants born in other districts of the State | 4,556,260 (18.5) | 1,597,360 (21.4) | 2,958,900 (17.2) | 74,586 (10.8) | 15,497 (17.3) | 59,089 (9.8) |
| B. Migrants born in other States of India | 2,491,932 (10.1) | 1,352,219 (18.1) | 1,139,713 (6.6) | 101,369 (14.6) | 15,418 (17.2) | 85,951 (14.3) |
| C. Migrants born in other countries | 3,090,393 (12.5) | 1,636,343 (21.9) | 1,454,050 (8.5) | 1,647 (0.2) | 890 (1.0) | 757 (0.1) |
| **Total Migrants** | **24,664,883 (100.0)** | **7,478,298 (100.0)** | **17,186,585 (100.0)** | **692,601 (100.0)** | **89,442 (100.0)** | **603,159 (100.0)** |

It is seen from Annexure IV(A) that in the district out of total migrants, 85.1 per cent migrants born within the State of enumeration and 74.4 per cent migrants born elsewhere in the district of enumeration. It is also observed that 14.6 per cent migrants and 0.2 per cent migrants had place of birth in other States of India and in other countries respectively. Similar trend has also been observed in the table pertaining to State.

# Annexure

**ANNEXURE – IV (B)**

**INTERSTATE MIGRANTS TO WEST BENGAL AND DISTRICT, 2001 CENSUS**

| Place of Birth | Migrants | | | Percentage to total migrants | | |
|---|---|---|---|---|---|---|
| | Persons | Males | Females | Persons | Males | Females |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| **STATE - WEST BENGAL 19** | | | | | | |
| 1. Bihar | 1,160,593 | 708,591 | 452,002 | 46.6 | 52.4 | 39.7 |
| 2. Jharkhand | 441,435 | 159,689 | 281,746 | 17.7 | 11.8 | 24.7 |
| 3. Uttar Pradesh | 309,315 | 190,832 | 118,483 | 12.4 | 14.1 | 10.4 |
| **Total for three states** | **1,911,343** | **1,059,112** | **852,231** | **76.7** | **78.3** | **74.8** |
| 4. Other States | 580,589 | 293,107 | 287,482 | 23.3 | 21.7 | 25.2 |
| **Total** | **2,491,932** | **1,352,219** | **1,139,713** | **100.0** | **100.0** | **100.0** |
| **DISTRICT - PURULIYA 14** | | | | | | |
| 1. Jharkhand | 85,623 | 8,164 | 77,459 | 84.5 | 53.0 | 90.1 |
| 2. Bihar | 9,025 | 4,322 | 4,703 | 8.9 | 28.0 | 5.5 |
| 3. Uttar Pradesh | 1,994 | 958 | 1,036 | 2.0 | 6.2 | 1.2 |
| **Total for three states** | **96,642** | **13,444** | **83,198** | **95.3** | **87.2** | **96.8** |
| 4. Other States | 4,727 | 1,974 | 2,753 | 4.7 | 12.8 | 3.2 |
| **Total** | **101,369** | **15,418** | **85,951** | **100.0** | **100.0** | **100.0** |

Regarding interstate migrants by place of birth as shown in Annexure IV(B) in respect of Puruliya district, it is evident that 84.5 per cent of the total migrants had their places of birth in Jharkhand, though the State average for the same shows highest percentage of migrants had place of birth in Bihar (46.6 per cent).

# Annexure

**ANNEXURE – IV (C)**

**RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH, 2001 CENSUS**

| Place of Birth | Place of Enumeration | | | | | |
|---|---|---|---|---|---|---|
| | West Bengal | | | Puruliya | | |
| | Total | Rural | Urban | Total | Rural | Urban |
| 1 | 3 | 4 | 5 | 6 | 7 | 8 |
| 1. Migrants born within the State of Enumeration | 19,082,558 | 14,106,837 | 4,975,721 | 589,585 | 531,798 | 57,787 |
| | (100.0) | (73.9) | (26.1) | (100.0) | (90.2) | (9.8) |
| 2. Migrants born in other States of India | 2,491,932 | 678,906 | 1,813,026 | 101,369 | 76,991 | 24,378 |
| | (100.0) | (27.2) | (72.8) | (100.0) | (76.0) | (24.0) |

Annexure IV C shows rural and urban composition of migrants by places of birth and places of enumeration in 2001 Census of Puruliya district. The district table shows that major portion of migrants born within the State of enumeration have been enumerated in rural areas (90.2 per cent) whereas the same figure for West Bengal is 73.9 per cent. Further in case of migrants born in other States of India, 24.0 per cent have been enumerated in urban areas and 76.0 per cent in rural areas of Puruliya district whereas the same for West Bengal is 72.8 per cent for urban and 27.2 per cent for rural area.

| Others | 226,912 | 225,812 | 1,100 | 8.9 | 99.5 | 0.5 |
| Religion not stated | 2,855 | 2,755 | 100 | 0.1 | 96.5 | 3.5 |

It is observed that in the district of Puruliya, the Hindus are the main religious community which occupy 83.4 per cent of the total population, followed by the Muslims 7.1 per cent and the Christians 0.3 per cent. It is to be noted that other religions (besides six major religions) constitute 8.9 per cent of the total population of the district.

Annexure

## Annexure - VI

**Marital Status of population as per 2001 Census**

**Marital Status :**

Information on sex and marital status of persons, particularly marital status of women population is very much important for measuring fertility rate by age group. Population of women belonging to currently married group is also important for measuring age specific marital fertility rate (ASMFR). A table classified by marital status and broad age group of population as per 2001 census is shown below :

Annexure

**ANNEXURE – VI (A)**
**PERCENTAGE DISTRIBUTION OF POPULATION CLASSIFIED BY MARITAL STATUS, BROAD AGE GROUP AND SEX, 1991-2001**

It is seen that the percentage of never married in 15-34 age group has increased to a great extent for both the sexes in 2001 over 1991 Census, although no significant changes in percentage is noticed in all ages for both the sexes. So far as married persons are concerned, its percentage has declined for both the sexes in the age group 15-34 and increased in the age group 35-54 and 55+ in 2001 as compared to 1991 census. It is to be noted that the percentage of widowed persons (males & females) have considerably decreased in the age group 35-54 and 55+ in 2001 census. It is also observed that the percentages of widowed and divorced/separated females are found to be higher than that of its male counterpart in all age groups for both the census years.

It is observed that 48.6 per cent of the total population of Puruliya district belonged to ‘Never Married’ status in 2001 Census. Although none was found in the married status in 0-9 age group in the district, only 1.3 per cent of 10-14 age group population have been found married in 2001 implying that child marriage still exists in the district though in minuscule form. The highest number of married females are found in 25-29 age group (97,507 persons) and married males in 35-39 age group (86,766 persons) indicating that late marriage is being preferred by both the sexes gradually. In ‘Widowed’ status widow have always overtaken the number of widower in all the age groups. The number of ‘Divorced or Separated’ females was also seen to be higher than the number of males in most of the age groups.

It is seen that in none of the sub-levels of literacy of Puruliya district, the females have been able to catch up the males in number in 2001 census. More than 55.6 per cent of the total population of Puruliya district is literates, 0-6 age group excluded, and number of literate males are more than double the number of females as per available absolute figures. Illiterates in the age-group 7-10 is 32.8 per cent with number of females being higher than the males and the highest illiteracy is found in 45+ group. Number of literates without any formal schooling including educational level is however very little - 20,259 for males and 10,471 for females are the figures for the district and likewise, number of graduates and above is also very little, i.e. only 4.2 per cent of the total literate population. Number of female graduates (9,410 persons) are also very less than the male graduates (40,015 persons).

# Annexure

## ANNEXURE - VIII

### Distribution of different mother tongues in the district, 2001 Census

Language is an important characteristic of a population particularly in a multi-lingual and multi-cultural society like India. The language census literature that has grown over the last one hundred years of Indian census history has shed light on the linguistic composition of our country. The table below shows the population by mother tongue of the district since 1961. It is to be noted that mother tongues shown in 1971 Census are mother tongues inclusive of language grouped under each. Data shown in 1981 Census is the language mainly spoken in the households.

The Annexure-VIII shows population by mother tongue for Puruliya district since 1961. As per 2001 Census, majority population of the district is Bengali by mother tongue (76.6 per cent), followed by Santali 11.4 per cent, Kurmali Thar 7.7 per cent, Hindi 1.9 per cent and Urdu 1.1 per cent. It is to be noted that among the five most spoken mother tongues of the district, Santali and Kurmali Thar happens to be two non-scheduled languages occupying the 2nd and 3rd position respectively.

# Annexure

## Annexure-IX : Scheduled Castes and Scheduled Tribes Population - Size and Growth

The collection of population statistics on the scheduled castes and the scheduled tribes as per the state scheduled castes and scheduled tribes lists in the State is one of the most important aspects of decadal census in post independence period. This information is required for the purpose of delimitation of the Assembly and Parliamentary constituencies in the State. The planning for development of these communities is mostly considered on the information of population size and its growth rate, sex-ratio, literacy rate, economic activities etc. Census is the only source which provides data for scheduled castes and scheduled tribes on various aspects of their life at the micro level.

In 1991 Census, the district registered a total scheduled caste population of 430,513 accounting for 19.4 per cent of the total population in the district which comprised 221,864 males and 208,649 females. Out of this bulk of scheduled caste population, 89.6 per cent was in rural and 10.4 per cent was in urban areas of the district. In all 59 scheduled caste communities were reported in the district and were scattered all over the district. The five major scheduled castes in order of population size were the (i) Bauri (188,063) (ii) Sunri (39,517) (iii) Rajwar (33,945) (iv) Hari (24,793) and (v) Bhuiya (21,689). Of these five major scheduled castes, the Bauri alone constituted 43.7 per cent of the total scheduled caste population of the district.

The literacy rate among scheduled castes was 31.8 per cent registering 48.9 per cent for males and 13.5 per cent for females against the general literacy rate of 43.3 per cent in the district in 1991.

In view of work participation practice among scheduled castes in the district, they registered 34.8 per cent Main Workers with the break up of 48.1 per cent males and 20.7 per cent females, corresponding to 35.4 per cent (49.4 per cent males and 20.5 per cent females) in the case of general population. The scheduled castes in the district were mainly working as Agricultural Labourers accounting for 43.6 per cent of the total scheduled caste main workers with the female proportion of 59.2 per cent.

Likewise the district had registered 427,766 total scheduled tribes population accounting for 19.2 per cent of the total population of the district which comprised 218,020 males and 209,746 females. A substantial portion (99.0 per cent) of this bulk of scheduled tribe population was in rural areas and the remaining only 1.0 per cent was in urban areas in the district. In all, 39 scheduled tribe communities were reported settled all over the district. The five major scheduled tribes in order of population size are the (i) Santal (274,539) (ii) Bhumij (86,131) (iii) Kora (22,507) (iv) Munda (8,641) and (v) Mahali (8,187). Of these 5 major scheduled tribes, the Santal alone constituted 64.2 per cent of the total scheduled tribes population of the district.

The literacy rate among scheduled tribes was 27.6 per cent with a break up of 43.9 for males and 10.6 for females against the general literacy rate of 43.3 in the district in 1991.

Work participation rate in the case of scheduled tribes communities was reported at 42.8 per cent main workers with the breakup of 53.0 per cent males and 32.1 per cent females. The scheduled tribes in the district were mainly working as Cultivators accounting for 55.1 per cent of the total scheduled tribes main workers of the district with the male proportion being greater which is 58.5 per cent.

As per 2001 Census, Puruliya district has 463,956 scheduled caste population comprising 227,724 males and 226,232 females accounting for 18.3 per cent of the total population of the district. Among the scheduled castes of the district, the first five major castes in order of population size are Bauri with 209,080 persons (45.1 per cent), Sunri (excluding Saha) with 44,076 persons (9.5 per cent), Rajwar with 40,333 persons (8.7 per cent), Hari/Methar/Methor/Bhangi with 26,278 persons (5.7 per cent) and Bhuiya with 26,142 persons (5.6 per cent). Out of these, only first three castes constitute 63.3 per cent of the total scheduled caste population of the district.

Further, the district has also recorded 463,452 scheduled tribe population comprising of 235,097 males and 228,355 females in 2001 Census acounting for 18.3 per cent of the total district population. Among these, the first five major tribes in order of population size are Santal with 303,321 persons (65.4 per cent), Bhumij with 94,028 persons (20.3 per cent), Kora with 21,690 persons (4.7 per cent), Mahali with 8,935 persons (1.9 per

cent) and Munda with 8,776 persons (1.9 per cent). Out of these, only first three tribes constitute 90.4 per cent of the total scheduled tribe population of the district.

The distribution of rural and urban scheduled caste/ tribe population for Puruliya district since 1961 can be observed in the following table :

**ANNEXURE - IX**
**SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN THE DISTRICT OF PURULIYA (1961-2001)**

| Total /Rural / Urban | 1961 | | 1971 | | 1981 | | 1991 | | 2001 | |
|---|---|---|---|---|---|---|---|---|---|---|
| | SC | ST | SC | ST | SC | ST | SC | ST | SC | ST |
| Total | 200,843 | 262,858 | 240,351 (19.7) | 313,793 (19.4) | 348,217 (44.9) | 348,375 (11.0) | 430,513 (23.6) | 427,766 (22.8) | 463,956 (7.8) | 463,452 (8.3) |
| Rural | 184,022 | 261,559 | 217,257 (18.1) | 311,448 (19.1) | 315,343 (45.2) | 345,442 (10.9) | 385,630 (22.3) | 423,415 (22.6) | 408,706 (6.0) | 456,573 (7.8) |
| Urban | 16,821 | 1,299 | 23,094 (37.3) | 2,345 (80.5) | 32,874 (42.4) | 2,933 (25.1) | 44,883 (36.5) | 4,351 (48.4) | 55,250 (23.1) | 6,879 (58.1) |

**Note :** Figures within brackets indicate decennial growth rate

It can be seen from the above annexure that there has been substantial increase in the growth rate of scheduled castes during 1971-81, i.e. from 19.7 in 1961-71 to 44.9 per cent in 1971-81, and then it declined to 23.6 per cent in 1981-91 and 7.8 per cent in 1991-2001. Both the rural and urban growth rates followed the similar pattern of trend up to 2001.

In case of scheduled tribe communities, the growth rate witnessed a fluctuating trend. During 1961-71 the growth rate was 19.4 per cent which declined to 11.0 per cent during 1971-81, then risen to 22.8 per cent during 1981-91 and again declined to 8.3 per cent during 1991-2001. In case of scheduled tribes also, the rural growth rate followed the similar pattern of trend as that of total up to 2001. But the urban growth rate substantially declined from 80.5 per cent in 1961-71 to 25.1 per cent in 1971-81, risen to 48.4 per cent in 1981-91 and further risen to 58.1 per cent in 1991-2001.

## ABOUT THE SAMPLE REGISTRATION SYSTEM (SRS) IN WEST BENGAL :

The Sample Registration System (SRS) is a large scale demographic sample survey for providing reliable annual estimates of birth rate, death rate and other fertility and mortality indicators at the national and sub-national levels. The field investigation consists of continuous enumeration of births and deaths by a resident part time enumerator and an independent half yearly survey by supervisor. The data obtained through these operations are matched. The unmatched and partially matched events are re-verified in the field and thereafter an unduplicated count of births and deaths is obtained. The SRS was initiated by the Office

of the Registrar General and Census Commissioner, India on a pilot basis in a few selected states in 1964-65 and it became fully operational during 1969-70 with about 3,700 sample units in India. Thereafter the number of sample units was periodically increased. After completion of 1991 Census these units were replaced during 1993-94 with 6,671 sample units (4,436 rural and 2,235 urban blocks) in all states and union territories. For West Bengal state total number of sample units were 475 (300 rural and 175 urban) after 1991 census. The sample unit in rural areas is a village or a segment of it if the village had a population of 2,000 or more. In urban areas the sampling unit is a census enumeration block with a population of 600 or 120 households. At present SRS is operational in 7,597 sample units (4,433 rural and 3,164 urban) spread across all States and Union territories and covers about 1.3 million households and 6.93 million population based on 2001 Census frame and these were effective from January 2004. In the state of West Bengal SRS is covering about 5.7 lakh population through 555 (310 rural and 245 urban) sample units which is highest among all states and UTs.
