PART X—C

DISTRICT CENSUS HANDBOOK

ANALYTICAL REPORT AND ADMINISTRATION
STATEMENTS AND DISTRICT CENSUS TABLES

MAYURBHANJ

B. TRIPATHI
OF THE INDIAN ADMINISTRATIVE SERVICE
DIRECTOR OF CENSUS OPERATIONS, ORISSA

PREFACE

The District Census Handbook is an innovation of 1951 Census. In that Census as well as in the next Census of 1961 the District Census Handbook was brought out in one volume. As indicated in the preface to the handbook Part-A, D. C. H. has been split into three parts for the first time in 1971 Census and brought out separately. The first part; Part-A consists of the Town Directory and the Village Directory incorporating some important statistical information relating to each Town and array of statistical data relating to land use and various other amenities available in each village. These are mostly of non-census character.

Part-B contains the essence of the Census data known as Primary Census Abstract. It gives demographic details of each District, Sub-division, Tahsil and Police Station down to each village and town and within the town each ward and enumerator block. The statistical information are enriched by administrative maps of the district, tahsils and Police Stations.

Part-C, the present publication contains the Census tables, tables on Village Directory and Primary Census Absrtact data generated on the Computor and tables on administrative welfare and developmental statistics.

A considerable portion of this Handbook could not have been compiled but for the co-operation and assistance of the State Government and respective departments. The department concerned extended their unfailing co-operation in furnishing whatever notes or information were required from time to time. I wish to record my appreciation and thanks for all the co-operation thus received from the departments of State Government.

I am also grateful to the Registrar General, India and Director of Census Operations, Orissa, for giving an outline of the scheme for preparation of the Handbook and for their valuable guidance from time to time.

I am glad to place on record my unstinted appreciation of the zeal and perseverance with which the officers and staff of this organisation contributed to the preparation of the Handbook. Many of the facts and figures embodied herein had to be built up with a great amount of diligence from raw material, some of which were recovered by personal contact with the lower administrative units and some picked up and screened from a mass of reports and annual returns. Without the sincere co-operation of the officers and staff of this organisation it would have been hardly possible to present the formidable array of statistics and many other materials of non-census and census origin which fill the pages of the volume.

I owe a special debt of gratitude to the Director of Printing, Stationery and Publications, Orissa and his deputy and staff for the immense care they took in bringing out this volume.

B. C. Das
Deputy Director

CHAPTER I

INTRODUCTION

The District Census Handbook was first introduced as an ancillary to 1951 Census. In Orissa it appeared as a State government publication in a more elaborate form in 1961. The District Census Handbook of 1961 was brought out as one volume comprising 3 parts for each of the 13 districts of the State. Part I of the handbook gave narrative accounts of the district in a brief but comprehensive manner on various aspects of basic amenities and infrastructural facilities; Part II incorporated various census tables and the primary census data of each village and town; and Part III contained a mass of official statistics of various departments of government. This apart, inclusion of administrative maps of the district and lower administrative units enhanced the value of the publication. Notwithstanding the limitations it was acknowledged to be highly useful.

The utility of District Census Handbook was somewhat impaired due to late publication. The publication had to wait till conclusion of the tabulation programme and also for collection and compilation of administrative statistics from different sources. With a view to avoid the delay and to release the census data soon after the conclusion of the census operations it was decided to bring out the District Census Handbook of 1971 in 3 parts separately with the data becoming available from stage to stage. The scope and contents of each part are briefly indicated below :

Part-A of the District Census Handbook incorporates the Town Directory and the village Directory of the district. The Town Directory contains certain essential data compiled in 6 statements relating to each town of the district. The Village Directory, besides giving statistical data relating to various amenities existing in a village also provides, basic data bearing on land use. These are mostly of non-census character.

Part-B contains the essence of the census data known as Primary Census Abstract or simply P. C. A. It gives demographic details of each district, sub-division, tahsil and police station down to each village and town and within the town each ward and enumerator's block. The aforementioned statistical information is further enriched by administrative maps of the districts, tahsils and police stations.

To facilitate easy location of a village, lists of villages, police station-wise, have been arranged in alphabetical order and placed immediately before the P. C. A.

Part-C, the last part of District Census Handbook presents the (a) census tables (b) tables on village directory and P. C. A. data generated on the computor and (c) tables on administrative, welfare and developmental statistics.

Section (a) of the handbook includes the following census tables of the 1971 census that gives data of the district and its lower limits.

A-Series—General Population Tables :

Table A-I	...	...	Area, houses and population
Appendix I to table A-I	...	...	Statement showing the 1961 territorial units constituting the present set up of each police station of district and details of net area gain or loss in the changed territories during the decade 1961—71
Appendix II to table A-I	...	...	Number of villages with a population of 5,000 and over and towns with a population under 5,000
Appendix III to table A-I	...	...	Houseless and Institutional population
Table A-II	...	...	Decadal variation in population since 1901
Appendix to table A-II	...	...	Statement showing 1961 population according to their territorial jurisdiction in 1961 changes in area and population of 1961 adjusted to jurisdiction of 1971
Table A-III and its appendix	...	...	Villages classified by population
Table A-IV	...	...	Towns and urban agglomerations classified by population in 1971 with variation since 1901
Appendices to table A-IV	...	...	New towns added in 1971 and towns in 1961 declassified in 1971

B-Series—Economic Tables :

Table B-I Part A	..	...	Workers and non-workers according to main activity classified by sex and age-groups
Table B-II	...	...	Workers and non-workers in cities and non-city urban areas according to main activity classified by sex and age-groups
Table B-III Part A	...	...	Classification of workers and non-workers according to main activity by educational levels in urban areas only
Table B-III Part B	...	...	Classification of workers and non-workers according to main activity by educational levels in rural areas only
Table B-IV Part A	...	...	Industrial classification of persons at work other than at cultivation as main activity by sex and divisions, major groups and minor groups

Appendix to B-IV Part A	...	...	Distribution of workers in manufacturing, processing, servicing and repairs by household industry and non-household industry
Table B-IV Part D	..	...	Industrial classification by sex and class of workers of persons at work in non-household industry, trade, business, profession or service as main activity
Table B-VI Part A (i)	....	.	Occupational classification of persons at work according to main activity other than cultivation classified by sex and broad age-groups in urban areas only
Table B-VI Part A (ii)	...	...	Occupational classification of persons at work according to main activity other than cultivation classified by sex and educational level in urban areas only
Table B-VI Part B (i)	...	...	Occupational classification of persons at work according to main activity other than cultivation classified by sex and broad age-groups in rural areas only
Table B-VI Part B (ii)	...	...	Occupational classification of persons at work according to main activity other than cultivation classified by sex and educational levels in rural areas only
Table B-VII	...	...	Secondary work i.e. persons having main activity (i) cultivators, (ii) Agricultural Labourers, (iii) Household Industry, (iv) Non-household Industry, Trade, Business or Service and (v) Non-workers classified by sex and by secondary work (i) cultivators, (ii) Agricultural labourers (iii) Household Industry, (iv) Non-household Industry, Trade, Business or Service
Table B-VIII	...	...	Persons classified as non-workers according to main activity crossclassified by sex, age-groups and type of activity
C-Series—Social and Cultural Tables :			
Table C-I Part A	...	...	Members of households by relationship to head of household classified by age-groups
Table C-I Part B (i)	...	...	Households where the Head is a male by relationship of members with the head
Table C-I Part B (ii)	...	...	Households where the Head is a female by relationship of members with the head
Table C-II	...	...	Age and marital status

Table C-III Part A	...	...	Age, sex and education in all areas
Table C-III Part B	...	...	Age, sex and education in urban areas only
Appendix to C-IV	...	...	Distribution of persons by five year age groups
Table C-V Part A (i)	...	...	Distribution of languages (inclusive of mother tongues grouped under each) specified in Schedule VIII to the Constitution of India
Table C-V Part A (ii)	...	...	Distribution of languages (inclusive of mother tongues grouped under each) specified in Schedule VIII to the Constitution of India for district/sub-divisions/tahsils/police stations and towns
Table C-V Part B (i)	...	...	Speakers of languages/mother tongues (inclusive of mother tongues where grouped) other than those specified in Schedule VIII to the Constitution of India for the district
Table C-V Part B (ii)	...	...	Speakers of languages/mother tongues (inclusive of mother tongues where grouped) other than those specified in Schedule VIII to the Constitution of India for district/sub-divisions/tahsils/police stations and towns
Table C-VII	...	..	Religion
Table C-VIII Part A	...	...	Classification by literacy and Industrial Category of Workers and Non-workers according to main activity among Scheduled Castes
Table C-VIII Part B	...	...	Classification by literacy and Industrial Category of Workers and Non-workers according to main activity among Scheduled Tribes
Appendix to C-VIII Part A	...	...	Scheduled Castes classified by literates and Illiterates
Appendix to C-VIII Part B	...	...	Scheduled Tribes classified by literates and Illiterates
D-Series—Migration Tables :			
Table D-I	...	...	Population classified by place of birth
Appendix I to Table D-I	...	...	Persons born in other district of the State and enumerated in this district
Table D-III	...	...	Migrants to urban units (including agglomeration) having 100,000 and above population classified by sex, broad age groups, educational levels and in case of workers by occupational divisions

Table D-IV	...	...	Population of urban units (including agglomeration) having 100,000 and above population classified by place of last residence and duration of residence
Table D-V	...	...	Migrant workers and non-workers according to main activities classified by place of last residence
Table D-VI	...	...	Migrants classified by place of last residence, age groups duration of residence and marital status

E-Series—Establishment Tables :

Table E-I	...	...	Distribution of establishments by broad types
Table E-II Part A	...	...	Distribution of manufacturing, processing or servicing establishments other than household industries classified by Registered Factories, Unregistered workshops and size of employment
Table E-II Part B	...	...	Distribution of manufacturing, processing or servicing establishments other than household industries classified by industry, fuel/power or manual used and size of employment
Table E-II Part C	...	...	Distribution of household industry establishments classified by industry fuel/power used and size of employment
Table E-III	...	...	Distribution of Trade/Commercial establishment classified by the type of business or trade and size of employment
Table E-IV	...	...	Distribution of establishments (other than manufacturing, processing or servicing or business and trade establishments) by size of employment

H-Series—Housing Tables :

Table H-I	...	...	Census Houses and the uses to which they are put
Table H-II	...	...	Distribution of Census houses by predominant material of wall and predominant material of roof
Table H-III	...	...	Households classified by number of members and by number of rooms occupied

In Section (b) a set of tables on Village Directory and Primary Census Abstract data, generated on the Computor are presented. These are :

Table 1—Distribution of villages with reference to area (in hectares)

Table 2—Distribution of villages by selected amenities, infrastructure and land use data with reference to distance from nearest town

Table 3—Distribution of villages by selected demographic characteristics and distance range from nearest town

Table 4—Average size of villages by distance range from the nearest town by size class

Table 5—Distribution of viliages by size class of population having selected servicing institutions and demographic characteristics

Table 6—Distribution of villages by number of hamlets and percentage of Scheduled Caste and Scheduled Tribe population

Table 7—Distribution of villages by density of population per hectare

Table 8—Distribution of villages by proportion of scheduled castes and scheduled tribes population

Table 9—Villages by percentage of irrigated area to total cultivated area and density of population per hectare

Table 10—Villages by percentage of literacy having and not having telephone with reference to nearest town

In Section (c) of the Handbook administrative welfare and developmental statistics collected from various departments of Government, local bodies, institutions are presented on the following topics :

I. Temperature and Rainfall
II. Major events of the decade
III. Road and Transport
IV. Irrigation
V. Electricity
VI. Banks
VII. Medical and Public Health
VIII. Education
IX. Cultural and Recreational Activities
X. Agriculture
XI. Animal Husbandry
XII. Fisheries
XIII. Forest and Forest Products
XIV. Mines
XV. Joint Stock Company
XVI. Trade and Commerce
XVII. Land Revenue, Tenancy and Settlement
XVIII. Co-operative Societies
XIX. Family Welfare Centres
XX. Administration (Civil and Judicial)
XXI. Taxes and Fees
XXII. Community Development and Panchayati Raj and Local Bodies

Important concepts and definitions occurring in the column headings of the Census Tables are briefly explained.

Village

Village means a defined tract of land declared as such under law and includes both uninhabited village and unsurveyed village. Village area connotes the area contained within its exterior limits and excludes forest areas declared as reserved or protected forest under the Indian Forest Act, 1927 or any other law for the time being in force. However, it includes the unreserved forests known as Khesra forest or Gramya jungle. An unsurveyed village is considered as a village for all purposes of the Census but does not have demarcated exterior limits. It may contain one or many groups of houses or hamlets or may not contain any houses at all. An inhabited village is one in which human being reside while an uninhabited village is one which does not have any residential population.

Town

The definition of town for 1971 census was more or less the same as adopted in 1961 which is as follows :

(a) All places with a municipality, corporation or Cantonment or a notified area council

(b) All other places which satisfy the following criteria :

(i) minimum population of 5,000;

(ii) at least 75% of the male working population is non-agricultural;

(iii) density of population of at least 400 per square kilometre (i.e. 1,000 per square mile) ;

(iv) there should be distinct urban characteristics.

Urban Agglomeration

The concept of Urban Agglomeration is also a new feature of 1971 Census. In several areas around a core city or statutory town have come up fairly large well-recognised Railway colonies, University campuses, Port areas, Military camps, etc., and even though outside the statutory limits of a Corporation, Municipality or Cantonment they fall within the revenue boundary of the place by which the town itself is known. It may not be altogether realistic to treat such areas lying outside the statutory limits of a town as rural units; and at the same time each such individual area by itself may not satisfy the minimum population limit to qualify as an independent urban unit. Sometimes, even if these constituent units qualify to be recognised as towns in their own merits, if they are cut away from the main town to which they are agglomerated, the demographic and socio-economic characteristics of the agglomerated urban area may be lost.

There are different situations in which Urban Agglomerations would be constituted, for example,

(i) A city with continuous outgrowth ;

(ii) One town with similar outgrowth or two or more adjoining towns with their outgrowths as in (i) ; and

(iii) A city and one or more adjoining towns with their outgrowth all of which formed a continuous spread.

Enumerator's Block

The Enumerator's block generally consisted of a population of 750 in rural areas and 600 in urban areas. Basically, every village, big or small, was treated as an independent census block. In some cases bigger villages were split into more than one Enumerator's block depending on area, nature of terrain and population. Similarly, in some other areas, two or more small villages were combined to constitute the jurisdiction of one Enumerator while each such village continued to remain as an independent block. In towns, the ward was split to form Enumerator's block In terms of the above mentioned yardstick.

Establishment

An "Establishment" is defined as a place where goods are produced or manufactured not solely for domestic consumption or where servicing and/or repairing is done such as factory, workshop or household industry or servicing and/or repair workshop or a place where retail or wholesale business is carried on or commercial services are rendered or an office—public or private or a place of entertainment or a place where educational, religious, social or entertainment services are rendered. It is an indispensable condition to qualify as an establishment that one or more persons should be actually working in such a place. Thus an establishment will cover manufacturing, trade and other establishments where people work.

House

A "Census House" is a building or a part of a building having a separate main entrance from the road or common courtyard or stair case etc. used or recognised as a separate unit. It may be inhabited or vacant. It may be used for a residential or non-residential purpose or both.

Occupied Residential House

An "Occupied residential house" is a Census house which is partly or wholly used for the purpose of residence at the time or census enumeration.

Household

A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so.

Scheduled Castes and Scheduled Tribes

A person is a scheduled caste or scheduled tribe if he/she belongs to any one of the castes or tribes specified in the lists of scheduled castes and scheduled tribes of Orissa as per order 1956 and subsequent corrigenda and notifications.

Literate

A person is said to be "Literate" if he/she can both read and write with understanding in any language. A person who can merely read but cannot write is not a literate.

Worker

A "Worker" is a person whose main activity is participation in any economically productive work by his physical or mental activity. Work involved not only actual work but effective supervision and direction of work.

The total workers have been classified into the following nine industrial categories :

I. Cultivators
II. Agricultural Labourers
III. Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied Activities
IV. Mining and Quarrying
V. (a) Manufacturing, Processing, Servicing and Repairs at Household Industry
V. (b) Manufacturing, Processing, Servicing and Repairs other than Household Industry
VI. Construction
VII. Trade and Commerce
VIII. Transport, Storage and Communication
IX. Other Services

Non-worker

A person is basically a non-worker if he or she does not come under any of the categories of 'workers' mentioned above. A person who has been merely offered work but has not actually joined it, is to be treated as a non-worker. The activities of non-workers have been classified into the following seven categories.

(a) *Household duties* : This covers all those persons basically engaged in unpaid home duties doing no other work or even if such a person may also be participating in some other work, it is not to the same extent as a whole-time worker and if the person has returned his or her main activity as attending to household duties. When a person whose main activity is attending to household duties, also engages oneself in some other economic activity such as helping in family cultivation or preparing cowdung cakes at odd times for sale, etc., that economic activity is covered as secondary work.

(*b*) *Student* : This refers to those whose main activity is returned as a student. This will cover all full-time students or children attending school. Even if such persons participated in some work but not to the same extent as a full-time worker, by merely helping casually as an unpaid family worker in family cultivation, household industry, trade or business, they should be treated primarily as students, if that is their main activity.

(*c*) *Retired person or a Rentier* : A person who has retired from service and is doing no other work, i.e., not employed again in some full-time work or does not engage himself in some other work as cultivation in business, trade, etc., or a person who is a rentier or living on agricultural or non-agricultural royalty, rent or dividend, or any other person of independent means for securing which he does not have to work, comes under this category.

(*d*) *Dependent* : This includes all dependents such as infants or children not attending school or a person permanently disabled from work because of illness or old age.

(*e*) *Beggars, etc.* : This covers beggars, or vagrants or such cases as independent women without indication of source of income and those of unspecified sources of subsistence and who are not engaged in any economically productive work.

(*f*) *Inmates of institutions* : This includes convicts in jails or inmates of a penal, mental or charitable institution.

(*g*) *Other non-workers* : All non-workers who may not come under any of the six categories above but are seeking work they are included in this category.

CHAPTER II

INTRODUCING THE DISTRICT

Mayurbhanj district is located in the northern part of Orissa. The district is surrounded by the Singhbhum district of Bihar, Midnapur district of West Bengal, Balasore and Keonjhar districts of Orissa state. The climate of the district is too hot in summer with the maximum temperature of 47° C (117° F) in May and too cold in winter with the minimum temperature of 12° C (53·6° F) in December during the decade. The normal annual rainfall is 1648·2 m. m. with high humidity during the rainy season. The district has two main rivers, the Burabalanga and Salandi. The river Baitarani flows along its western boundary for a short distance. The soil of Mayurbhanj is mostly red soil and less fertile. The hills are thickly wooded to their very summit and are generally inaccessible. 'Santal' is the predominant tribe of this district.

The sub-tropical forests of the district is rich in forest resources. The important species grown in these forests are *Sal, Piasal, Sisu, Kurum, Bandhan, Gambhari, Kendu, Mahua, Asan and Mango.* Other forest produce are tusser, cocoon, lac, myrobalam, sunari bask, arrowroot, etc. The plantations nearby Baripada yield Sabai grass used for ropes, furniture and paper.

The district is rich in mineral deposits like, iron-ore, magnetite ore, laterite, asbestos, andalusile, kyanite, Dumortierite, steatite, white clay, glass sand, kankar, alluvial cold, etc. The mineral of greatest economic value is iron-ore of Gorumahisani, Badampahar and Suliapat.

Since 1956 a national park has been established within Similipal forests to conserve natural fauna and protect the wild lives.

The District during the Decade

Area

The area of Mayurbhanj district is 10,412·0 sq. kms. according to the area figures received from the Surveyor General of India which falls short by 4·4 sq. kms. than the area figures reported by the State Revenue authorities (10,416·4. sq. kms.). The difference between these two sets of figures is due to varying methods of computation of area figures adopted by the Surveyor General and the State Revenue authorities. The area figures of the former agency have been adopted for presentation of area figures, calculation of density and other similar purposes. During the decade (1961—71), neither the district boundary nor the jurisdiction of its police stations and towns has undergone any change. Mayurbhanj district is ranked 8th in area among the districts having 6·68 per cent of the State's area during 1971.

The district has four sub-divisions, five tahsils and 21 police stations. Table A-I gives the particulars of area, population, number of villages, towns, occupied residential houses and households of the district and also each of its lower administrative units.

Baripada tahsil with an area of 3,202·7 sq. kms. is the largest tahsil of the district. It alone claims 30·76 per cent of the total area of the district. Among 21 police stations, Bangriposi police station is the largest police station, the area of which (1,226·2 sq. kms.) exceeds the area of Betnoti tahsil (989·1 sq. kms.). Betnoti is the smallest tahsil in the district.

Baripada was the only town of the district till 1951. During the decade (1951—61) Rairangpur was declared as a town. Total number of towns became two by 1961. During the decade 1961—71, no new town has emerged in the district. The urban areas of the district have not undergone any change during 1971.

Size and distribution of population

The population of Mayurbhanj district is 1,434,200 as at the sunrise of 1st April, 1971,

out of which 721,914 are males and 712,286 are females. The district accommodates 6·54 per cent of State's population compared to 6·86 per cent in 1961. The district continues to maintain the 7th position in the State.

The population within the district is not also evenly distributed. It differs from tahsil to tahsil and within the tahsil, from police station to police station, depending on the suitability of land for cultivation and some other related advantages which is evident from statement-1

STATEMENT—1

Distribution of population of tahsils

Below State average 1	State average 2	Above state average 3
Betnoti tahsil (203,147)	(213,005)	Baripada tahsil (416,315) Rairangpur tahsil (331,173) Karanjia tahsil (264,738) Udala tahsil (218,827)

Among tahsils only Betnoti is placed below the State average. It is the smallest tahsil of the State with regard to area.

Density of Population

On an average 138 persons live in one sq. km. area in the district of Mayurbhanj. During the decade the density has increased by 22 persons per sq. km. area due to 19·12 per cent growth in population. The density of population of the district is not far behind the State average of 141 persons per sq. km.

STATEMENT—2

Distribution of tahsils above and below the district density of population per sq. km.

Below the district average 1	State/District average 2	Above the district average 3
Baripada (130) Karanjia (86)	State average (141) District average (138)	Betnoti (205) Udala (177) Rairangpur (174)

Betnoti tahsil is most densly populated followed by Udala and Rairangpur tahsils. The areas of Betnoti and Udala are suitable for agriculture while extensive deposits of iron ore found at Gorumahisani under Rairangpur tahsil. An industrial complex has been developed near Gorumahisani by TISCO. Besides several other industries like the Vanadium factory near Rairangpur, glass works near Bahalda and potteries near Kuldiha have been set up. Karanjia with large tracts of forests is the least densely populated tahsil of the district.

Households

The total number of houses of all categories including vacant houses in the district of Mayurbhanj are 296,895. Of these, 238,587 are occupied residential houses which constitute 6·35 per cent of the State (3,758,551) compared to 6·62 per cent in the 1961 Census. As many as 261,310 households live in these houses. This reveals that about 11 households live in 10 houses.

On an average five persons live in a household of Mayurbhanj district.

Houseless population

Appendix-III of Table A-I of section-A of the Handbook presents the houseless and institutional population of the district and its lower administrative units. In this district 1,436 persons in 1971 as against 487 persons in 1961 live without dwelling.

About 58 per cent of the houseless population are males and the rest are females. The number of houseless persons have increased at most three folds during the decade. The present position seems to be very disquieting in comparison to 1961. The increase is due to seasonal migration of the workers to mining, industrially and agriculturally advanced areas of the district, where the employment opportunities are adequate.

The urban areas of the district claim only 133 houseless persons compared to 1,303 in the rural areas.

Institutional population

As many as 7,669 persons live as inmates of institutions like, jails, hostels and hospitals, etc.. Of the total institutional population, 5,818 are males and 1,851 are females. The institutional population recorded under the rural and urban areas, are 5,632 and 2,037 persons respectively.

Growth of population

The population of Mayurbhanj district has increased by 19·12 % during the decade 1961—71 with a net addition of 230,157 persons. Statement-3 shows the decadal growth rate of the district and state from 1901.

STATEMENT—3

	Mayurbhanj district		Orissa state	
Year	Population	Percentage of growth rate during the decade	Population	Percentage of growth rate during the decade
1	2	3	4	5
1901	610,383	..	10,302,917	..
1911	729,218	+ 19·47	11,378,875	+ 10·44
1921	754,314	+ 3·44	11,158,586	— 1·94
1931	889,603	+ 17·94	12,491,056	+ 11·94
1941	984,741	+ 10·69	13,767,988	+ 10·22
1951	1,028,825	+ 4·48	14,645,946	+ 6·38
1961	1,204,043	+ 17·03	17,548,846	+ 19·82
1671	1,434,200	+ 19·12	21,944,615	+ 25·05

It appears from statement-3 that during earlier four decades (1901—1941) the growth of population in the district of Mayurbhanj was faster than that of the state. But during the last three decades the rate of growth was far less than that of the growth rate for state.

The decade 1951—61 witnessed 17·03 % rise in population of the district. It was a period of economic prosperity with the launching of 1st and 2nd five year plans during the decade, there was all round development in the field of economic and social activities. With expansion of the communication facilities trade and commerce flourished. The opening of the N. E. S. blocks made an impact on the rural development. All these factors led to the faster growth of population of the district.

The decade 1961—71 is marked with 19·12 % rise in population. A very high growth rate could however be checked due to the implementation of the family planning programme. The standard of public health was quite good during the decade. The district was included under the National Malaria Eradication Programme. The blocks under C. D. and N.E.S. have gone a long way in taking up improved methods of agriculture. The death declined due to the all round improvement in the public health activities. Minerals were exploited. Trade and commerce specially in iron-ore and forest products flourished. A Tahsilwise growth rate during the decade is shown in statement-4.

STATEMENT—4

District/Tahsil	Percentage growth in 1961—71
1	2
Mayurbhanj district	+ 19·12 %
Batnoti tahsil	+ 19·90 %
Karanjia tahsil	+ 19·77 %
Udala tahsil	+ 21·79 %
Baripada tahsil	+ 22·83 %
Rairangpur tahsil	+ 12·27 %

The growth rate of Baripada tahsil is the highest. Baripada town is the district headquarter and has industrial and commercial importance. The next tahsil to follow Baripada is Udala. The reasons for higher growth are mainly due to availability of surplus land and exploitation of forest resources.

Rural and urban population

In Mayurbhanj district there are as many as 3,982 villages of different sizes inclusive of 270 uninhabited villages. The rural population of

STATEMENT -5

Average population size of a village

District/Tahsil	Average population of a village 1971
Mayurbhanj district	376
Baripada tahsil	329
Betnoti tahsil	340
Rairangpur tahsil	425
Karanjia tahsil	374
Udala tahsil	461

the district is, 1,394,249 and they constitute 97·2% of the total population of the district. On an average 376 persons live in a village of this district which is far below the state average of 428 persons.

Average population size of a village of each of Baripada, Betnoti and Karanjia tahsils is below the state and district average. Rairangpur tahsil is below the state average but above the district average whereas Udala tahsil is well above the district and state average. Concentration of rural population in the areas of Udala tahsil is mainly due to availability of fertile land for agricultural activities while Rairangpur tahsil is rich in mining and industry.

Urban

Mayurbhanj is the least urbanised district of the state with 2·8 % of its total population live in its two towns. The total urban area of the district during 1971 was 22·4 sq. km.

During the decade (1961—71) no new town has emerged in the district. Of the five tahsils three do not contain urban population. Statement-6 shows the percentage of urban population of the remaining tahsils.

STATEMENT—6

Name of Tahsil	No. of towns	Percentage of urban population to total urban population of the district 1971	Percentage of urban population to total population of the tahsil 1971
1	2	3	4
Baripada	1	71·90	6·90
Rairangpur	1	28·10	3·39

Baripada tahsil alone claims 71·90 % of the total urban population of the district. Both of the tahsils are very poor urbanised.

Statement-7 shows the classification of towns on the basis of their population size during 1961 and 1971.

STATEMENT – 7

Name of Town	Population		Size class of town in	
	1961	1971	1961	1971
Baripada (M)	20,301	28,725	III	III
Rairangpur (NAC)	8,119	11,226	V	IV

Rairangpur which appeared as a class-V town in 1961 has turned to class-IV town in 1971 whereas the oldest town Baripada has not undergone any change in size of classification. Size class and functional classification of towns in the district are given in Statement-8.

STATEMENT—8

Size class of town	Total no. of towns	Name of town	Functional category
1	2	3	4
III	1	Baripada	Service
IV	1	Rairangpur	Service-cum-Primary

There is one monofunctional and one bifunctional town in the district.

Sex ratio

Sex ratio (females per 1,000 males) of Mayurbhanj district is 987 which is nearly at par with the state average of 988. It has declined from 991 in 1961 to 987 in 1971. The district is showing a steady fall in sex ratio from the year 1921. The sex ratio of the district from 1901 to 1971 is given in statement-9.

STATEMENT—9

Year	Mayurbhanj district			Orissa state		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	1,013	1,015	782	1,037	1,039	967
1911	1,011	1,013	792	1,056	1,058	947
1921	1,015	1,017	796	1,086	1,089	963
1931	1,011	1,013	763	1,067	1,071	924
1941	1,005	1,008	728	1,053	1,058	914
1951	1,001	1,004	742	1,022	1,029	881
1961	991	996	810	1,001	1,015	807
1971	987	991	840	988	1,002	845

Statement-9 shows that the sex ratio in urban areas of the district is remarkably lower than that of the rural areas for all the decades.

A tahsilwise comparison of the sex ratio has been illustrated in statement-10.

STATEMENT—10

Sex ratio (females per 1,000 males)

District/Tahsil	1971		
	Total	Rural	Urban
1	2	3	4
Mayurbhanj district	987	991	840
Baripada tahsil	962	974	808
Betnoti ,,	982	982	..
Rairangpur ,,	1,018	1,021	927
Karanjia ,,	1,008	1,008	..
Udala ,,	967	967	...

Favourable sex ratio is found in respect of Rairangpur and Karanjia tahsil. Among the of tahsils of the district, Baripada has the lowest sex ratio of 962 females per 1,000 males. The reason for such low sex ratio can be ascribed to the location of Baripada town within the jurisdiction of this tahsil. The working population mostly came from rural areas leaving behind their family members.

Age structure

Population has been divided into three broad age groups—young, adult and old. Persons in the age group of 0—14 are included in the first group, those between 15—59 years in the second group and the rest aged 60 and above are in the third group. In Orissa, population under young, adult and old age groups are 42·4 %, 51·6 % and 6·0 % respectively. The distribution of population according to these broad age groups is shown in the statement-11.

STATEMENT—11

Age Group	1961						1971					
	Persons	Percentage to total persons	Males	Percentage to total males	Females	Percentage to total females	Persons	Percentage to total persons	Males	Percentage to total males	Females	Percentage to total females
1	2	3	4	5	6	7	8	9	10	11	12	13
All Ages	1,204,043	100·00	604,756	100·00	599,287	100·00	1,434,200	100·00	721,914	100·00	712,286	100·00
0—14	502,470	41·73	256,737	42·45	245,733	41·00	628,680	43·83	317,779	44·02	310,901	43·65
15—59	646,623	53·71	325,366	53·80	321,257	53·61	735,389	51·28	373,346	51·71	362,043	50·83
60 +	54,072	4·49	22,205	3·67	31,867	5·32	69,982	4·88	30,726	4·26	39,256	5·51
Age not stated	878	0·07	448	0·08	430	0·07	149	0·01	63	0·01	86	0·01

Viewed against the background of the 1961 census the proportion of population in young age group of 0—14 years has increased whereas the proportion of population in working age group of 15—59 has declined considerably. As a result the dependancy ratio has considerably increased during the decade.

Literacy and education

According to the 1971 census, 258,887 out of 1,434,200 persons in the district of Mayurbhanj are recorded as literates. The district occupies 11th place in respect of literacy (including population in age 0—4) in the state. The number of literates of this district has gone up from 14·18 % in 1961 to 18·05 % in 1971. The literate males form 27·97 % of the total male population of the district. Whereas literate females constitute only 8·00 % of the female population as indicated in statement-12.

STATEMENT—12

Census Year	Percentage of literates (including population in age group 0—4)	
	Males	Females
1	2	3
1971	27·97	8·00
1961	23·74	4·53

In rural areas literates form 17·00 % compared to 54·63 % for urban areas. Statement-13 gives the literacy rate of the rural and urban population of the district and its tahsils.

STATEMENT—13

Tahsilwise literacy (including population in age 0—4) 1971

District/Tahsil		Persons	Males	Females
1		2	3	4
Mayurbhanj District	T	18·05	27·97	8·00
	R	17·00	26·84	7·08
	U	54·63	64·49	42·90
Baripada tahsil	T	20·26	29·75	10·39
	R	17·49	26·75	7·99
	U	57·61	66·88	46·12
Betnoti tahsil	R	19·46	29·35	9·39
Rairangpur tahsil	T	16·01	26·56	5·65
	R	14·92	25·40	4·66
	U	47·02	57·96	35·22
Karanjia tahsil	R	17·07	27·78	6·44
Udala tahsil	R	16·82	25·61	7·74

Among the tahsils, Baripada records the highest percentage of literates and Rairangpur tahsil records the lowest rate. The literacy rate (including population in age 0—4) of Baripada and Rairangpur towns are 57·61 and 47·02 % respectively.

Mother tongue

As many as 51 languages including 15 languages (inclusive of mother tongues grouped under each) specified in the schedule VIII to the constitution of India has been returned as mother tongue from the Orissa state in 1971 census. Of these 23 languages are spoken as mother tongue in Mayurbhanj district. Excepting Kannada, Kashmiri, Sanskrit and Sindhi all other languages as specified in the schedule-VIII to the Constitution of India has been returned from the district. Besides 13 other languages (inclusive of mother tongue where grouped) are spoken as mother tongue in the district of Mayurbhanj. Statement-14 depicts the percentage distribution of population among major languages in the district in 1971.

It would be seen that Oriya language is spoken by majority of the population of this district. But compared to other districts of the state this district records the lowest percentage of Oriya speakers i.e., 57·06 % of the district population. 'Santali' is the next predominant language of this district with speakers of 21·48 % of the district population. The languages Santali, Ho, Mundari and Munda: spoken as mother tongue, together constitute 37·22 % of the total population of the district. The sixth major language/mother tongue of the district is 'Bengali' with 2·76 % population of the district. This is not surprising as this district is adjacent to West Bengal. Speakers of other 17 languages together constitute 2·96 % population of the district.

STATEMENT—14

Percentage distribution of population among major languages 1971

Mother Tongue	Percentage to total population		
	Total	Rural	Urban
1	2	3	4
Total	100·00	100·00	100·00

Kurukh/Oraon	0·15	0·15	0·01
Others	0·31	0·28	1·26

Religion

The decennial census provides an interesting picture of the religious persuasion of the population. Table C-VII gives the distribution of population among the six major religious communities, viz., Hindus, Christians, Muslims, Sikhs, Buddhists and Jains in 1971 count. The table also gives the combined figures of all other religions and persuasions. Statement-15 depicts the percentage of population belonging to different religion in 1961 and 1971.

It is seen that 92·88 % of the total population of this district are Hindus. The percentage of followers of other religion like Islam,

STATEMENT– 15

Percentage distribution of population among religious communities 1961 and 1971

Religious communities	Percentage to total population					
	1961			1971		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
Total	100·00	100·00	100·00	100·00	100·00	100·00
Hindus	99·17	99·44	87·77	92·88	92·84	94·27
Muslims	0·63	0·40	10·08	0·79	0·68	4·67
Christians	0·07	0·04	1·52	0·14	0·13	0·57
Sikhs	N	N	..	N	N	0·04
Buddhists	0·01	N	0·20	N	N	..
Jains	N	..	0·01	0·06	0·06	0·06
Other religions and persuasions	0·12	0·12	0·42	6·13	6·29	0·39

N—Negligible

Christianity is quite negligible in the district in spite of slight increase over the percentage of 1961. A new religion i. e. 'Sarna' has a large number of followers in the district. Their number 87,839 comes next to Hindu religion in the district. The followers of this religion in the district were as few as 1,498 in 1961. Other religion together constitute about one per cent of the district population.

Compared to the 1961 census figures there has been a remarkable decline in the percentage of Hindus and consequent increase in the percentage of Sarna followers. Further it is seen that the percentage of the followers of Hinduism, Islam, and Christianity are higher in urban areas whereas followers of Sarna religion are mainly constituted in the rural areas of the district.

Migration

Movement of people from one place to the other under economic necessity and social ties is called migration.

Birth place migrant

A change in the usual place of residence with reference to the birth place is defined as a migration in accordance with 'birth place' concept. The extent of migration in Mayurbhanj district as determined by the place of birth is shown in statement-16.

STATEMENT—16

	Birth place	Persons	Males	Females
	1	2	3	4
A.	Born in India	1,431,325 (99·80 %)	721,539 (99·95 %)	709,786 (99·65 %)
I.	Within the state of enumeration	1,396,335 (97·36 %)	710,784 (98·46 %)	685,551 (96·25 %)
	(a) Born in place of enumeration	1,011,969 (70·56 %)	616,383 (85·38 %)	395,586 (55·54 %)
	(b) Born elsewhere in the district of enumeration	345,951 (24·12 %)	83,176 (11·52 %)	262,775 (36·89 %)
	(c) Born in other districts of the state	38,415 (2·68 %)	11,225 (1·56 %)	27,190 (3·82 %)
II.	Born in the states in India beyond the state of enumeration	34,990 (2·44 %)	10,755 (1·49 %)	24,235 (3·40 %)
B.	Born in countries in Asia beyond India (including USSR)	410 (0·03 %)	240 (0·03 %)	170 (0·02 %)
C.	Countries in oceania	5 (N)	5 (N)	...
	Unclassifiable	2,460 (0·17 %)	130 (0·02 %)	2,330 (0·33 %)

N—Negligible.

Statement-16 reveals that 70·56 % of the total population of the district have been enumerated at their place of birth while 24·12 % are enumerated elsewhere in the district of enumeration. As high as 85·38 % of males and 55·54 % of females are born in the place of enumeration.

Persons having their birth place in other districts of the state, but migrated to Mayurbhanj district, constitute, 1·56 % of males and 3·82 % of females. Immigrants of this district whose birth place is in other states of India constitute 2·44 % of the population. In this category 1·49 % are males and 3·40 % are females. The higher percentage of female migrants can be attributed to marriages.

Last residence migrant

A change in the usual place of residence of an individual with reference to his previous usual residence is termed as a migration in accordance with 'Last residence' concept. The classification of such migrants into nine industrial categories of workers and non-workers is indicated in statement-17.

Most of the migrants are agricultural labourers having their last residence within the state of enumeration but out side the place of enumeration. Next predominant group of migrants are cultivators. It is evident from statement-17 that migrants to the district are mostly engaged in primary sector of economy. Persons having their last residence within the district of enumeration constitute the majority of the migrants.

Female migrants are more in number than that of males in category II (Agricultural labourer) and category X (Non-workers). Higher female participation as agricultural labourers may be due to the poor economic conditions. Higher rate of female migration in the category of non-workers is mainly due to marriages.

Workers & Non-workers

Out of the total population of 1,434,200 persons in the district, 395,627 males and 82,612 females are workers and the rest are non-workers. Workers constitute 66·65 % of the total population of the district. The proportion of workers to total population in 1971 has gone down significantly. This is mainly due to the change in the concept of worker in 1971. The definition of workers was too flexible in the 1961 census. Owing to the changes in the definition of workers the figures of the 1961 and 1971 censuses are not strictly comparable. Statement-18 depicts the percentage of workers to total population of the district.

STATEMENT—18

	Females	N	N	3
VIII. Transport, storage and communications	Males	4	3	33
	Females	N	N	N
IX. Other services	Males	37	33	173
	Females	4	3	36
X. Non-workers	Males	452	449	545
	Females	884	882	945

Note : 'N' stands for negligible.

Statement-18 shows that 54·80 % of the male population and 11·60 % of the female population are workers. Consequently 45·20 % of the male population and 88·40 % of the female population are non-workers.

Workers have been divided into nine categories as shown in the statement-19.

From statement-19 it is seen that cultivators and agricultural labourers account for the largest proportion of workers in the district. Compared to other districts of the state, the proportion of agricultural labourers to the total workers in the district is the highest.

Workers under different categories are further grouped under 3 sectors of economy, namely, primary, secondary and tertiary. Primary sector constitutes workers under categories I to IV; secondary sector includes categories V and VI and the tertiary sector includes categories VII to IX. The distribution of working population of the district in different sectors of economy is given in statement-20.

STATEMENT—20

Percentage distribution of workers by sectors for all areas, 1971

Sector of economy	Percentage distribution 1971		
	Persons	Males	Females
1	2	3	4
All sectors	100·00	100·00	100·00
Primary sector	86·18	85·60	88·90
Secondary sector	5·63	5·37	6·92
Tertiary sector	8·19	9·03	4·18

It would be seen from the statement-20 that, more than four-fifth of the working population of the district come under the primary sector. The lowest proportion of workers in the secondary sector indicates the stagnation in the industrial sector. It is further seen that the proportion of female participation is higher in primary and secondary sectors. In rural areas of the district, 87·78 % of the working population are engaged in the primary sector. The remaining 12 22 % are distributed in the other two sectors, i.e., with 5·42 % in the secondary and 6·80 % in the tertiary sector.

STATEMENT—21

Percentage distribution of workers by sectors in rural areas for each sex, 1971

Sector of economy	Persons	Males	Females
1	2	3	4
All sectors	100·00	100·00	100·00
Primary sector	87·78	87·38	89·71
Secondary sector	5·42	5 10	6·91
Tertiary sector	6·80	7·52	3·38

In urban areas, there is a concentration of workers in the tertiary sector as evident from statement-22

STATEMENT—22

Percentage distribution of workers by sectors in urban areas for each sex, 1971

Sector of economy	Percentage distribution		
	Persons	Males	Females
1	2	3	4
All sectors	100·00	100·00	100·00
Primary sector	17·10	16·59	22·08
Secondary sector	15·16	15·84	8·44
Tertiary sector	67·74	67·57	69·48

Workers by broad age group

The working population is sub-divided into three broad age group of 0-14 years, 15-59 years, 60 years and above as indicated in the statement-23.

STATEMENT - 23

Percentage of workers to total population in each broad age group, 1971

Age group	Percentage of workers, 1971		
	Persons	Males	Females
1	2	3	4
Total	33·35	54·80	11·60
0—14	6·60	9·99	3·13
15—59	55·74	91·21	19·17
60 +	38·27	75·88	8·84
Age not stated	26·85	47·62	17·63

It is surprising to note that 6·60 % of workers are in the tender age group of 0-14. This indicates that the parents engage them in work instead of sending them to schools due to

their poor economic condition. The next age group 15-59 which forms the core of the working force contain workers more than half of the total population in the age group. The percentage of male and female workers in this age group are 91·21 % and 19·17 % respectively. In the age group of 60 years and above, 38·27 % of the population are workers.

Statement-24 indicates that maximum number of workers in age 0-14 belong to the primary sector of economic. They mostly assist their parents in various agricultural occupations and in tending cattle, etc.

STATEMENT—24

Percentage distribution of workers by primary, secondary and tertiary sectors of economy in each age group, 1971

Age group	Total	Percentage distribution		
		Primary	Secondary	Tertiary
1	2	3	4	5
0—14	100·00	84·17	5·36	10·47
15—59	100·00	86·07	5·69	8·24
60 & above	100·00	90·88	5·25	3·87
Age not stated	100·00	57·50	5·00	37·50

Among the total workers in the age group of 15-59, 86·07 % are engaged in the primary sector, 5·69 % in secondary sector and 8·24 % in tertiary sector. The workers in old age group of 60 and above are mostly engaged in the primary sector.

Non-workers

All those persons who are not economically active or whose main activities do not come under any economically productive work are basically non-workers. The number of such persons in the 1971 census is 955,961 or 66·65 % of the district's total population. As high as 66·48 % of rural population and 72·76 per cent of the urban population are non-workers.

The total non-working population is further classified into seven categories, namely, (i) students, (ii) Household duties, (iii) Dependants and infants, (iv) Retired, Rentiers and persons of independent means, (v) Beggars, vagrants, etc., (vi) Inmates of penal, mental and charitable institutions and (vii) others. The disposition of all those non-workers is shown in statement-25.

STATEMENT—25

Classification of non-workers	1971	
	Persons	Percentage
1	2	3
Total non-working population	955,961	100·00
i) Students	99,955	10·46
ii) Household duties	375,435	39·27
iii) Dependants & infants	473,161	49·49
iv) Retired, rentier & persons of independant means	642	0·07
v) Beggars, vagrants, etc.	1,687	0·18
vi) Inmates of penal, mental, and charitable institutions	550	0·06
vii) Others	4,531	0.47

Statement-25 reveals that the majority of non-workers are dependants and infants. Persons engaged in household duties stand next. Students form 10·46 % of total non-working population.

Scheduled Castes

A total number of 103,713 persons in the district have been recorded under 44 scheduled castes in 1971. They form 7·23 per cent of the

STATEMENT - 26

Karanjia tahsil	19,615	7·41	9,837	7·46	9,778	7·36
Udala tahsil	14,609	6·68	7,437	6·69	7,172	6·67

district population compared with the State average of 15·09 per cent. The Scheduled Castes of the district form 3·13 per cent of the total Scheduled Caste population of the State. The percentage of the scheduled caste persons to the total population of the district in 1971 has gone down to 7·23 from 8·66 in 1961.

Statement-26 reveals that Udala tahsil recorded the lowest percentage of Scheduled Castes (6·68) as against the highest concentration of 8·85 per cent in Betnoti tahsil. Compared to 19·12 per cent growth of total population of the district, the growth rate for Scheduled caste population stands at 0·54 per cent during the decade as evident from Statement-27. This is the only district of the State whose Scheduled Caste population has declined.

STATEMENT—27

Census year	Scheduled Caste population ot the district	Decadal Variation	Percentage decade variation	SC Males	SC Females
1	2	3	4	5	6
1961	104,273	..	..	52,647	51,626
1971	108,713	(—)560	(—)0·54	52,467	51,246

Sex ratio of the State and the district

The sex ratio of Orissa and Mayurbhanj district has declined. Likewise the sex ratio of the Scheduled Castes community has also declined from 981 females per 1,000 males in 1961 to 977 females per 1,000 males in 1971.

Distribution of major Scheduled Castes

Patial, Patikar, Patratanti or Patuas constitute the majority of the scheduled caste population in the district. Statement-28 indicates the population of ten major scheduled caste communities of the district during 1971.

Among the ten major communities, the Scheduled Caste population has declined in respect of the castes like Patial, Patikar, Patratanti or Patua, Pan or Pano, Amanat or Amat and Tamudia during 1971. The population of Patratanti or Patua has remarkably

STATEMENT—28

Name of Scheduled Castes	Population	Percentage of Scheduled Castes to total Scheduled Caste population
1	2	3
1. Patial, Patikar, Patratanti or Patua	16,626	16·03
2. Dhoba or Dhobi	14,830	14·30

5. Pan or Pano	6,170	5·95
6. Amanat or Amat	5,608	5·41
7. Tamudia	5,590	5·39
8. Ghasi or Ghasia	5,029	4·85
9. Haddi, Hadi or Hari	4,709	4·54
10. Ujia	2,340	2·26

declined from 26,094 in 1961 to 16,626 in 1971 whereas the population of Pantanti has increased from 8,547 to 13,958. The number of Pans or Panos have also considerably decreased from 11,174 in 1961 to 6,170 in 1971. The reason for the rise and fall in population of Pantanti and Pans may be attributed to the erroneous classification by the enumerator due to equivalent pronounced names.

Literacy among Scheduled Castes

The literacy rate (including population in 0-4 age group) among Scheduled Castes of Mayurbhanj stands at 17·23 per cent as against

STATEMENT—29

Literacy (including population in 0-4 age group) among Scheduled Castes, 1971

District/Tahsil		Percentage of literates		
		P	M	F
1		2	3	4

Karanjia Tahsil	R	20·12	33·87	6·28
Udala Tahsil	R	15·57	25·40	5·37

15·61 per cent for the State. This rate among Scheduled Castes males and females is 28·59 and 5·60 per cent respectively. The percentage of literates among Scheduled Castes has increased from 12·36 per cent in 1961 to 17·23 per cent in 1971.

Statement-29 reveals that Karanjia Tahsil claims the highest (20·12) percentage of Scheduled Castes literates. Next comes Baripada Tahsil with 17·45 per cent.

Among the major castes literacy is quite high among Dhobas.

Workers among the Scheduled Caste Population

A total number of 34,278 persons or 33 per cent of the total Scheduled Caste population of the district are workers and the rest 67 per cent are non-workers. Male workers constitute 52·76 per cent of the male Scheduled Caste population whereas the female workers constitute 12·87 per cent of Scheduled Caste females.

STATEMENT—30

Percentage of workers by sex among Scheduled Castes, 1971

District		Percentage of workers		
		P	M	F
1		2	3	4
Mayurbhanj	T	33·05	52·76	12·87
	R	33·07	52·86	12·86
	U	32·52	50·54	13·16

Statement 31 shows the distribution of Scheduled Caste Workers as per nine industrial categories. It is evident that 62·01 per cent of the Scheduled Caste workers are cultivators and agricultural labourers. A good percentage of Scheduled Caste Workers are also engaged in household industry. The rest 15·82 per cent of workers are scattered in other categories of work.

STATEMENT—31

Scheduled Tribe

A total number of 43 Scheduled tribe communities have been recorded in the district of Mayurbhanj during the 1971 Census. The tribals constitute 58·56 per cent of the total population of the district compared to the State average of 23·11 per cent. A total number of 839,835 persons of the schedule tribe have been returned in the 1971 Census as against 729,764 in 1961 Census. Statement-32 shows the growth rate of Scheduled Tribes population during the decade.

STATEMENT—32

1961	729,764	..	..	361,924	367,840
1971	839,835	+110,071	+15·08	419,118	420,717

The Scheduled Tribe population of the district has remarkably increased during the decade. Rate of growth of the Scheduled Tribe population during the decade 1961-71 is 15·08 per cent.

The sex-wise break-up of the population of scheduled tribes reveals that 419,118 males and 420,717 females have been returned in 1971 as against 361,924 males and 367,840 females in 1961. The sex ratio of Scheduled tribe which was 1016 in 1961 has dropped to 1004 in 1971.

Coming to tahsils of the district, Udala tahsil has the highest concentration (65·37 per cent) of Scheduled Tribes followed by Rairangpur (64·39 per cent), Karanjia (63·44 per cent), Baripada (53·31 per cent) and Betnoti (46.11 per cent).

STATEMENT—33

Tahsilwise percentage of scheduled tribes to total persons, males and females

District/Tahsil	Persons	Percentage	Males	Percentage	Females	Percentage
1	2	3	4	5	6	7
Mayurbhanj district	839,835	58·56	419,118	58·06	420,717	59·07
Baripada tahsil	221,941	53·31	112,131	52·84	109,810	53·80
Rairangpur tahsil	213,239	64·39	104,761	63·82	108,478	64·95
Karanjia tahsil	167,944	63·44	83,048	62·99	84,896	63·88
Udala Tahsil	143,046	65·37	72,294	65·00	70,752	65·76
Betnoti tahsil	93,665	46·11	46,884	45·74	46·781	46·48

The distribution of S. T. population in urban areas shows that percentage of Scheduled Tribe population to total population is more in Rairangpur (15·17%) town than in Baripada town (6·68%).

STATEMENT—34

Name of Town	Total population	Percentage of Scheduled tribes to total population
Baripada Town (M)	28,725	6·68
Rairangpur Town (N.A.C.)	11,226	15·17

Distribution of major Scheduled Tribes

Numerically important ten scheduled tribes communities are shown in Statement 35.

STATEMENT—35

Name of the S.T.	Population	Percentage to total population
1	2	3
1. Santal	359,506	42·81
2. Kolha	137,824	16·41
3. Bhumij	96,742	11.52
4. Bathudi	72,286	8·61
5. Bhuiya or Bhuyan	37,909	4·51
6. Gond or Gondo	25,747	3·07
7. Ho	20,593	2·45
8. Kharia or Kharian	13,738	1·64
9. Sounti	13,572	1·62
10. Munda, Munda-Lohara or Munda Mahalis	8,893	1·06

Santal, Kolha, Bhumij and Bathudi communities constitute the majority (79·35 per cent) of the Scheduled Tribe population of the district. The population of all the major Scheduled Tribes except Ho have increased in 1971 compared to the 1961 Census.

Literacy among the Scheduled Tribes

The literacy rate (including population in age 0-4) among Scheduled Tribes of Mayurbhanj stands at 9·64 per cent as against 9·45 per cent for the State. The Scheduled Tribes lag far behind the literacy rate of 18·05 and 26·18 per cent respectively for the general population of the district and the State.

STATEMENT—36

Literacy including population in 0-4 age among Scheduled tribes

District/Tahsil		Percentage of literates		
		Persons	Males	Females
1		2	3	4
Mayurbhanj District	T	9·64	17·17	2·14
	R	9·54	17·05	2·06
	U	31·91	41·40	21·14
Baripada Tahsil	T	10·00	16·99	2.86
	R	9·80	16·71	2.76
	U	32·45	45·15	15.70
Betnoti Tahsil	R	7·76	14·25	1·24
Rairangpur Tahsil	T	9·91	18·09	2·00
	R	9·73	17·95	1·80
	U	31.30	36·49	26·32
Karanjia Tahsil	R	10·86	19.45	2·47
Udala Tahsil	R	8·46	15·36	1·42

Statement-36 reveals that percentage of literates is more in urban areas than in the rural areas of the district. However Karanjia tahsil without any urban area records the highest(10·86) percentage of literates among all the five tahsils of the district. Next to Karanjia comes Baripada with 10·00 per cent of literates. Compared to the major tribes Gond or Gondos constitute the highest percentage of literate persons.

Workers

A total number of 298,319 persons or 35·52 per cent of the total tribal population of the district are workers and the rest 64·48 per cent are non-workers. Male workers constitute 56·73 per cent of the male Scheduled tribe population and female workers account for 14·39 per cent of the total tribal female population of the district. Concentration of Scheduled Tribe workers in urban areas is proportionately higher than the rural areas.

STATEMENT—37

Percentage of workers by sex among Scheduled tribes, 1971.

District		Percentage of workers 1971		
		P	M	F
Mayurbhanj	T	35·52	56·73	14·39
	R	35·52	56·75	14·39
	U	35·72	53·61	15·43

Statement 38 reveals that majority of the working population are cultivators and agricultural labourers with 91·02 per cent. The rest 8·98 percent of workers are scattered in other categories of workers.

STATEMENT 38

Percentage distribution of Scheduled Tribe workers by different industrial categories

Category of Workers	Persons	Percentage	Males	Percentage	Female	Percentage

Particulars :—

Average annual rainfall (in m. m.) 1,507.6

Average number of rainy days :—

A. Gross area Sown under :—

I. Kharif crop (name the Specific crops according to local importance)	Area in (Hectares)
1. Rice	307,000
2. Ragi	377
3. Maize	5,813
4. Jawar	248
5. Bajra	7
6. Small millets	6,391
7. Tur	910
8. Mung	289
9. Biri	2,261
10. Kiulthi	..
11. Cowpea	293
12. Other Pulses	346
13. Ground-nut	2,908
14. Til	2,240
15. Castor	176
16. Naizer	..
17. Sugar-cane	314
18. Sweet Potato	1,431
19. Other vegetables	6,731
20. Jute	550
21. Mesta	2,079
22. Sunhemp	493
23. Cotton	
24. Chillies	383
25. Ginger	307
26. Turmeric	454

II. Rabi Crop (Name the Specific crops according to local importance)	
1. Rice	1,071
2. Wheat	,017
3. Ragi	..
4. Maize	83
5. Gram	4,176
6. Mung	3,270
7. Biri	3,065
8. Kulthi	13,310
9. Cowpea	29
10. Fieldpea	159
11. Other Rabi Pulses	1,280
12. Ground-nnt	28
13. Til	17
14. Castor	72
15. Nizer	10,108
16. Mustard	2,312
17. Linseed	2,475
18 Safflower	

Name of the crop	Area in (Hectares)
19. Potato	192
20. Sweet Potato	6
21. Onion	951
22. Other vegetables	7,031
23. Chillies	392
24. Coriander	332
25. Garlic	332
26. Tobacco	382

B. Gross area irrigated under :

I. Kharit (name the Specific Crops according to local importance)	
1. Rice	24,094.37
2. Sugar-cane	48.54
3. Jute	20.00
These crops are in Total (Both Kharif and Rabi)	
1. Maize	33.75
2. Vegetable	2,171.02
3. Ground-nut	30.70
4. Other Crops	6.40
5. Chillies	40.00

II. Rabi Cname the Specific crops according to local importance)	
1. Rice	9 3.11
2. Wheat	370.86
3. Mustard	39.00
4. Tobacco	25.00
5. Gram	6 50
6. Potato	12,00
7. Onion and Garlic	44.40
8. Other pulses	5.54

C. Estimated yield of main crops (K. G. Per Hectares)	
1. Rice	8.0
2. Wheat	15.0
3. Ragi	5.0
4. Maize	10.0
5. Jawar	5.5
6. Bajra	5.7
7. Small millets	5.6
8. Tur	7.1
9. Gram	9.2
10. Mung	4.8
11. Biri	5.0
12. Kulthi	5.1
13. Cowpea	4.2
14. Fieldpea	4.5
15. Other pulses	2.9
16. Ground-nut	14.3
