PREFACE

In this report, the cultural tables will relate to family composition of sample households (based on 20 per cent sample), age and marital status, age and educational level, single year ages, mother tongues, bilingualism, religion and Scheduled Castes and Scheduled Tribes separately classified by illiterates and literates and educated persons and by the nine industrial categories of workers and non-workers. The table on age and education will contain an appendix giving the tables for the special Census of Scientific and Technical Personnel.

The migration Tables will give classification of non-Indian nationals by nationality, distribution of population by place of birth, migrants classified by place of birth and duration of residence in place of enumeration and distribution of industrial categories of workers and non-workers by place of birth.

Sometimes my readers would feel that the 1961 Census was over quite a few years ago and the volume is coming out now. I beg of them to realise that after a population count is over, it takes anything from 18 months to 2 years to tabulate all the information which was to be used in nearly 30 publications. That was thoroughly checked in the Tabulation Office and by the Linguist in Calcutta. Then we sent this to the Press. At times we had to make some additions which were inevitable to bring out a comprehensive report.

This was the work in which hundreds of my colleagues during all these years—sorters, supervisors and other tabulation staff had to labour very hard day-after-day.

My first and foremost acknowledgement goes to Shri Asok Mitra, ICS, Registrar General, India, who had shown very great interest, guidance and sympathy.

Then the Deputy Registrar General, India, Shri D. Natarajan, had always found a solution in his unassuming ways.

Shri K. D. Ballal, Central Tabulation Officer and his colleagues who with utmost patience looked through our tables carefully.

Shri R. C. Nigam, Linguistic, India had shown the indefatigable candour in his knowledge as a linguist and been of very great help.

As for my colleagues here, they were labouring ceaselessly; toiling over years under the greatest pressure. I have a very sincere gratitude and admiration for them. This small group of devoted colleagues was lead by Shri Durga Singh, my colleague for so many years who had shown quite a phenomenal patience and consideration. The very hard working Bishan Dass, S. S. Sarwal, S.P. Shabi and Roop Chand Sharma remained devoted in their works over long years. The typists Jamit Singh, Krishan Chand, Des Raj Khanna and Jagdish Chander Gautam had to type and re-type for one reason or the other and they toiled over long hours and on holidays. Then my stenographers Ram Swaroop Bajaj and P. C. Bali had to sit late hours and to come on holidays, to them and to Onkar Nath Bhutani, Prem Nath Sharma, Om Prakash and Karam Chand, Proof Readers, who also rose to the occasion of work, I owe my gratitude.

Apart from my colleagues I take this opportunity of conveying my warm gratitudes to Shri P.S. Ramchandran who was at one time Manager of Government of India Press, Simla, his successor Shri K. Jankiraman, the Assistant Manager Shri Mudaliar and to their junior colleagues, who did their best to make our publications attractive. I hope this volume is profusely referred to and adequately used by Administrators, Planners and Scholars.

INTRODUCTION

Eleven cultural and five migration tables are presented in Part II-C. 1961 Census data about compo ition of sample households, age & marital status, age, sex & education, single year age returns, mother tongue, bilingualism and religions has been tabulated in nine tables, called C-Series or Cultural Tables. Two other tables have been added to this series, which show the total population of Scheduled Castes and Scheduled Tribes, classified by literacy and industrial category of workers and non-workers.

D-Series or Migration Tables give information about non-Indian nationals, distribution of population by place of birth, migrants and distribution of industrial categories of workers and non-workers by place of birth, which has been presented in five tables for Himachal Pradesh.

The scope of each of these tables printed in the succeeding pages has been explained in the fly-leaf that briefly introduces each table. Fly-leaf of Table C-V Mother tongue has been prepared by Shri R.C. Nigam the Linguist, Office of the Registrar General, India.

Many terms are used in the table such as Household, Head of Household, Size of Land Cultivated, Age, Marital Status, Sex, Education, Mother Tongue, Bilingualism, Religion, Literacy, Industrial Category of Workers and Non-Workers, Scheduled Castes, Scheduled Tribes, Non-Indian Nationals, Place of Birth, Migrants. These terms have been explained in the fly-leafs.

The table present the information for administrative divisions that existed at the time of 1961 Census, for rural and urban areas separately. In the fly-leafs the exact coverage of each of the tables has been shown. The administrative divisions and the towns are listed on the next page.

SOCIAL AND CULTURAL TABLES

TABLE C-I

COMPOSITION OF SAMPLE HOUSEHOLDS BY RELATIONSHIP TO HEAD OF FAMILY CLASSIFIED BY SIZE OF LAND CULTIVATED

FLY-LEAF

Definitions and explanations

Household—A household means the entire group of persons who commonly live together in a census house and take their meals from a common mess unless the exigencies of work prevent them from doing so. For purposes of the Census a census house has been defined as a structure or a part of structure, a dwelling, a shop, workshop, factory or place of business, or shop-*cum*-dwelling giving on the road or a common staircase or a common courtyard leading to a main gate or enjoying a separate entrance. In some census houses there may be more than one group of persons, each group with a common mess in such cases, each group has been regarded as a separate household for purposes of the census.

Institutions like boarding houses, messes and chummeries have been regarded as census households but of unrelated persons living together. If in an institution separate families have been living, each such family has been treated as a census household.

For each household a schedule called Part I—Household Schedule has been filled in recording information on the extent of land cultivated by the household either owned or held from government or held from private persons or institutions for payment in money, kind or share land given to private persons for cultivation for payment in money, kind or share, nature of household industry conducted by the household and the duration of the industry in a year along with number of family workers and hired workers engaged in cultivation or household industry or in both. At the back of the Household Schedule there was a Census Population record giving an abstract of information for each individual enumerated in the household.

Head of the Household—The Head of the household for census purposes is a person on whom falls the chief responsibility for the maintenance of the household. The Head of the household need not necessarily be the eldest male member but may even be a female or a younger member of either sex.

The person who was actually acknowledged as Head of the household was recognised and recorded for enumeration as such in the household Schedule.

If the Head of the household was a person who spent the week days in town or elsewhere and spent the week ends at home, he was recognised and recorded as Head of the household and entered for enumeration at his home. If he was away for a fairly long-time which covered the entire enumeration period fixed then the person who was incharge in his absence was recognised and recorded as the Head of the household.

The Head of the household in an institution was the manager or superintendent or the person who had administrative responsibilities or who by common consent was regarded as the Head. In the case of separate families living in an institution, who were regarded as separate households, the names of recognised Heads of the households were recorded.

Size of Land Cultivated—Land under cultivation by household, (*i*) owned or held from government and (*ii*) held from private persons or institutions for payment in money, kind or share, was recorded.

Land included all land normally used for cultivation purposes, including temporary fallows where ploughing, sowing and harvesting was done for production of crops such as listed below and did not include land used for fruit growing or keeping orchards or groves, or working for plantations like tea, coffee, rubber, cinchona and other medicinal plantations.

(1) Cereal crops (including Bengal gram), such as rice, wheat, *jowar*, *bajra*, maize; roots and tubers like potato, sweat potato, ginger, reddish turnip, beet and sugarcane.

(2) Pulses, such as *arhar*, *moong*, *masur*, *urd*, *khesari*, other gram.

(3) Raw jute and kindred fibre crops.

(4) Raw cotton and kindred fibre crops.

M/B(N)11SOO(HP)—3

Only those plots or parcels of land which were cultivated by the household itself, that is lands which lie within the village, or in adjacent villages, or within such a distance as enabled the household to work on the land or actually supervise the cultivation had been recorded in respect of each household engaged in cultivation. Land owned or held in distant places where distance itself was a bar to active cultivation, constant supervision or direction, had not been recorded.

Extent of land under cultivation had been ascertained from the household and recorded in acres. Where, however, the area could not be obtained in acres at all satisfactorily, the area in local measures had been ascertained and with the help of a conversion table recorded in acres.

Household Industry—The test for a Household Industry is mainly threefold.

(*a*) Household Industry should embrace manufacture, processing or servicing and may include sale but should not be confined simply to buying and selling. At least part of the goods offered for sale from the household should be manufactured or processed by members of the household.

(*b*) Hosehold Industry should be on the household scale where the workers mainly will be Head of the household himself and members of the household, the role of hired workers from outside being of secondary importance. Thus, in any Household Industry, members of the household should be in a position to lend a hand in the industry whenever they find the time in the course of their daily chores. Household Industry cannot, therefore, be on the scale of a registered factory but can use machinery and employ power like steam engine or oil engine or electricity to drive the machinery.

(*c*) Location also is important, for proximity decides participation by members of the household. In a village this participation is possible if the Household Industry is located at home or within the village, because village organisation is such as makes it possible for members of the household to move about freely in the village to look after their work. In urban areas, such a free movement is not possible and therefore, for Household Industry in urban areas we should consider only those industries which are located at home. Where, however, part of the work is done outside the house, *e.g.*, preparing and dyein the yarn for weaving or winding into warp and wool or cleaning metal surfaces before electro-plating in baths, it should still be considered a Household Industry, even in Urban areas, as the main operation of weaving or of electroplating is conducted within the house and only one or two operations are conducted outside.

The following activities should be regarded as illustrative of Household Industry. Biri-makers who either alone or with help of members of the family roll biris at home, for wages at piece rates, while the contractor supplies the materials. Certain processes like buttoning and handsewing of tailored clothes, dyeing and printing of cloth, are carried out at home by members of the household both at residence and at 'place of work' or where women folk of the household fill in at home with lac gold, ornaments prepared at the shop by male members of the household.

It was ascertained from the head of the house hold whether there were any household industries conducted by the head of the household himself and or mainly by members of the household at home or within the village in rural areas and only at home in urban areas. If there was any household industry so conducted that was recorded.

Scope and coverage of the Table C-I

In the canvaseer method of enumeration that was employed in the 1961 Census, an enumerator called at every household or on every human being and took down particulars relating to the household and individuals in prescribed forms. For each household a household schedule and for each human being an individual slip was filled.

The table under reference has been prepared on a 20% sample basis from the household schedules and separately for total, rural and urban areas down to the district level. The administrative divisions, *i.e.*, districts, tehsils/sub-tehsils subdivisions and towns that existed at the time of taking the census are shown in the map of Himachal Pradesh printed in this publication.

As a general rule, all persons who were normally residents in the household, those who lived in the household and also those who had become

members of the household through marriage o birth or other vital social or domestic ties, who were present in the household residence at the time of enumerators visit during the enumeration period fixed, were counted filling an individual slip for each person.

Similarly all persons who were normal residents in the household even if they were absent at the enumerator's visit, were enumerated, provided they had left the household on or after the start of the enumeration period or had left earlier than the start of the enumeration period and were likely to return before the close of the fixed enumeration period. Again a visitor, a boarder, or a guest found in a household at the time of the enumerator's visit was counted in that very household, if he had not been enumerated before and if he was to be away from his own household during the enumeration period. He was warned not to permit any other enumerator to enumerate him even if he went back before the close of the enumeration period.

As soon as the enumerator had completed the enumeration of the individuals in a household by recording their particulars on individual slips, a record about them was made in the prescribed schedule called the Part II—Census Population Record. In this name of each person enumerated in a household, the sex of the person, relationship to the head of the household, age, marital status, and description of work in the case of worker was recorded. On the basis of the census population record, the tabulation of the composition of members in households, as shown in the table, has been done.

By definition, a 'census household' is not the same as a 'family'. The household includes persons who are not members of the family but are residing with the family during the census period. However, while giving composition of households, heads of households and their spouses have been shown. Both can be males or females. Their married sons and other married relations are also shown separately by sex. The other relations and unrelated persons are shown separately by sex. This information is of sociological interest indicating the strength of the joint family system.

As regard tabulated information about (*a*) households engaged neither in cultivation nor in-household industry, (*b*) households engaged in household industry and (*c*) households engaged in cultivation (size of land), the same has been provided by the data collected in Part I—Household Schedule.

The table corresponds only in parts to 1951 Census Table C-1—Household Size and Composition.

(*a*) Households engaged neither in cultivation nor in household industry.

(*b*) Households engaged in household industry.

(*c*) Households engaged in cultivation only (Size of holding).

Note: The heads of households are shown as less than the total number of households in some areas on account of the fact that some enumerators had apparently not indicated any person as the head of the household in the 'Population Record' where the conventional head of household was absent from the household at the time of enumeration and had not been enumerated in that household.

TABLE C-II

AGE AND MARITAL STATUS

FLY-LEAF

Definitions and explanations

Age—Age in years completed last birthday was recorded for every person enumerated during the 1961 Census. For infants below one year of age then '0' was recorded

Marital Status—For a person who had never been married, 'Never Married' was the status recorded. For a person married, whether for the first or another time, the status recorded was 'Married'. The status 'Married' was recorded for persons who were recognised by custom or society as married and for persons in stable *de facto* union. Even if a marriage was disputed in the locality, the status recorded was 'Married' if the person concerned said he or she was married or in stable *de facto* union. For a widowed person whose husband or wife was dead, and who has not been married again, status 'Widowed' was recorded. For a person who had been divorced in a lawful manner, either by decree of a law court or by a regular, social or religious custom but who had not remarried,or a person who had been separated from wife or husband and was living apart with no apparent intention of living together again, the status recorded was 'Divorced or Separated'. For a prostitute the return to be recorded was as declared by her.

Scope and Coverage of the Table C-II

The table has been prepared separately for total, rural and urban population on full count, down to the district level. The corresponding table at the 1951 Census was prepared on a 10 per cent sample. This is a very important demographic table. The age-groups adopted for tabulation conform to the international requirements. From the table it can be ascertained whether proportions in the various marital status conditions have increased or decreased since the last census and whether any trend is observed in the age of marriage. This will give an indication of mortality in different marital statuses and in different age-groups. The data on married femaler by age-groups can be utilized for forecasting the future births from age specific birth rates.

TABLE C-III—PART A

AGE, SEX AND EDUCATION *IN ALL AREAS*

FLY-LEAF

Definitions and explanations

Age—(*See definition given in the Table C-II*).

Education—In 1961 census, a person who could neither read nor write or could merely read but could not write in any language was considered illiterate. A person who could both read and write with understanding was considered literate. In the case of a person who could both read and write and had also passed a written examination or examinations as proof of an educational standard attained, the highest examination passed had been recorded.

Scope and Coverage of the Table C-III—Part A

The table has been prepared for all areas of Himachal Pradesh and its six districts. The corresponding table at the 1951 Census was prepared on a 10 per cent sample, whereas the present table has been prepared on the full count. While at the previous Census the sample population was classified in the table into illiterate and literate only under different age-groups, in the present table, classification by broad educational levels has been done. Five yearly age-groups upto 34, one group from 35—44, another from 45—59 and still another for 60+ have been adopted for tabulation. This table will measure the growth of literacy in the total population as well as in the different age-groups since the last Census.

Definitions and explanations

Age—(For definition see Table C-II).

Education—(For definition see Table C-III—Part A).

Scope and coverage of the Table C-III—Part-B

This table too presents data like the Table C-III —Part A about Age, Sex and Education. It is about urban areas only in Himachal Pradesh and its five districts of Chamba, Mandi, Bilaspur, Mahasu and Sirmur. There is no town in Kinnaur District. In C-III—Part A educational levels adopted for classification were (*i*) Primary or Junior Basic and (*ii*) Matriculation and above. In the present table educational levels above Matriculation have been shown in detail.

Age-group	Total Population			Illiterate		Literate (without Educational level)		Educational level: Primary or Junior Basic		Matriculation or Higher Secondary		Technical diploma not equal to degree		Non-Technical diploma not equal to degree

1961 Census—Scientific & Technical Personnel

FLY-LEAF

A decision had been taken about special enumeration of scientific and technically qualified personnel in the second conference of Superintendents of Census Operations held in New Delhi in August, 1960. It was agreed that during the Census special enumeration cards should be left in the household at the time of the count and collected at the time of the revisional round. Those who did not hand over the filled up cards were to be requested to post them. A specimen of the reply paid card is given here—

COVERAGE

In respect of some States the special enumeration was to be confined to all the urban areas and selected rural areas while in the case of other States it was to be conducted in all parts of the State.

In Himachal Pradesh the special enumeration was confined to urban areas and only selected rural areas. The count in snowbound areas of Himachal Pradesh had taken place in September—November, 1960, earlier than the general census count in February-March, 1961. Arrangements for special enumeration such as printing of cards and the issue of instructions were completed in January, 1961. So the snow-bound rural areas of the Pradesh could not be brought under the scope of the special enumeration. The towns of Theog, Narkanda and Rampur in snowbound areas, had this special enumeration by special arrangements.

A sufficient number of cards were sent to the Charge Officers through the District Census Officers. Instructions were issued that during population count in the towns and selected rural areas of non-snowbound areas, the enumerator would leave cards in the household where he finds scientific and technical personnel residing, and collect the cards, duly filled during the revisional round. The cards collected were to be routed to the District Census Officers through Supervisors and Charge Officers alongwith other census schedules. The District Census Officers had instructions to send the cards to the Office of the Registrar General, India, where the data collected was tabulated. Those persons who did not hand over the cards to the enumerators during the revisional round had been requested to post them.

The data tabulated has certain limitations.

These are—

(1) The data tabulated does not provide coverage for the whole of the Pradesh.

(2) The tables prepared relate to all the towns but does not ensure complete coverage because—

(*a*) some scientific and technical personnel who did not hand over the cards to the enumerators during the revisional round may not have posted them to the Registrar General, India; and

(*b*) In the three towns of snowbound areas, there was a possibility that all such personnel who were counted there during the population census earlier might not be all present during the special enumeration.

DATA COLLECTED

Persons holding the following degrees and diplomas were regarded as scientific and technical personnel to whom the cards were issued for the special enumeration—

1. *Science*—Anybody holding B.A. or B.Sc., M.A. or M.Sc. or higher degrees (Ph.D., etc.) in Science subjects like Physics, Mathematics, Chemistry, Agriculture, Geology, Geo-Physics, Geography, etc.
2. *Engineering*—Anyone holding recognised Degree or Diploma in Engineering.
3. *Technology*—Anyone holding Degree or Diploma in technical subjects like Chemical Technology, Leather Technology, Textile Techonology, Glass and Ceramic Technology, Food Technology etc.
4. *Medicine*—Persons holding Degree or Diploma in medicine and/or Surgery.

Thus the Under-Graduates scientists (i.e., those who had not got any Bachelor's Degree) or Mechanics and Technicians even though holding certificates did not come under the enumeration.

The data collected has been processed and tabulated into the following eight tables :—

STATE TABLE I—Classification by each Branch and Sub-Branch of Science or Technology.

STATE TABLE II—Type of Activity and Marital Status of Persons in each Branch of Science or Technology.

STATE TABLE III—Year of obtaining Post-Graduate Degrees in Physical Sciences and Graduates and Doctorates in Engineering, Technology and Selected Branches of Medicine.

STATE TABLE IV—Persons holding Degrees in Engineering and Technology and also holding degrees in Selected Branches of Physical Sciences.

STATE TABLE V—Nature and Sector of Employment of Persons in each Branch of Science or Technology.

STATE TABLE VI—Total Monthly income of Persons Employed in each Branch of Science or Technology by Sector of Employment.

STATE TABLE VII—Tenure and Sector of Employment of persons in each Branch of Science or Technology.

STATE TABLE VIII—Age and Period of Unemployment of Un-employed persons qualified in any Branch of Science or Technology.

APPENDIX (AGE, SEX AND EDUCATION)—contd.

TABLE C-IV

SINGLE YEAR AGE RETURNS

FLY-LEAF

Definitions and explanations

Age in completed years last birth day :—The following Instructions were given to enumerators for recording age returns of persons enumerated.

"Write age in years completed last birthday. For infants below one year of age, write, '0'. You will find many persons who cannot state their age correctly. You should assist them to state the correct age. If you are not able to elicit correct age directly, you should stimulate their memory by referring to historical incidents or religious events etc. You may use any local calendar of such events that may have been prepared for the purpose."

Local calendars of historical incidents or religious events and other events of importance had been prepared and printed in the books of instructions issued to the enumerators. The calendars were of great help to the persons enumerated and the enumerators to record correct age returns. But even then the bias in age returns at the Census cannot be completely eliminated, such as more people above 19 years giving their age returns as 20, 25, 30, 35, 40, 45, 50, 55, 60, 65, 70, 75, 80, 85, 90, 95 and 100.

Scope and coverage of the Table C-IV

The table has been prepared separately for total, rural and urban population down to the district level. It is a very important demographic table, helpful to the Census Actuary for compiling the mortality rates from the age data of the earlier Censuses and for the preparation of life tables. It affords a useful study on bias in age returns at the Census. The present table has been prepared on the full count and the corresponding table at the 1951 Census was prepared on a 10 per cent sample.

It will be observed from the table that all ages above 100 have been shown as 'Over 100'.

TABLE C-V

MOTHER TONGUE

FLY-LEAF

NOTE 1—

(*i*) The mother tongues arranged in alphabetical order in Col. 1 of the Statement 1 given below as per Table C-V have been classified in the Linguistic Survey of India. The Linguistic Survey of India Classification No. is mentioned against each mother tongue in Col. 3.

(*ii*) If in Col. 3 no Classification No. is given against any mother tongue of Col. 1 then it would mean that the name refers to either old or middle Indo Aryan Language or language group or branch of family name from the Linguistic Survey of India.

(*iii*) Wherever a tongue is mentioned in Col. 3 it is to be understood that the mother tongue is either a dialect or another name or form of the tongue mentioned against it in Col. 1 which in its turn has been classified by the Linguistic Survey of India in the appropriate place for that tongue.

(*iv*) If in Col. 1, there is a tongue which bears no classification number in the Linguistic Survey of India then in Col. 2 the name of the classified language or group will be given of which the mother tongue of Col. 1 is either a dialect or another name or form. In such a case the number of classified language of Col. 2 has been given in Col. 3.

(*v*) In Col. 2 standardized spellings according to Linguistic Survey of India has been given against each mother tongue of Col. 1.

NOTE 6—

There are four appendices printed after the Table C-V. These are —

Appendix I—Linguistic Survey of India—Classified List.

Appendix II—Abstract of Classified and Unclassified Languages.

Appendix III—Statements showing percentage changes in each decade (1911-61) or population of three numerically most important languages (including dialects) as of 1961.

Appendix IV—Names of mother tongues—Relation to area names or Tribe names.

The first two appendices have been prepared by the Linguist, Office of the Registrar General India, the third one by the Central Tabulation Office and the last one by Superintendent of Census Operations Tabulation Unit at Simla.

TABLE C-V—MOTHER TONGUE

NOTES—

1. Mother tongues printed in italics belong to countries outside the Indian sub-continent.
2. Names occurring after hyphen (-) have been introduced by the Linguist to indicate groupings.
3. Asterisk (*) means that the mother tongue is unclassified in Linguistic Survey of India (L.S.I.)

NOTES—1. @Includes dialects as per Annexures I to IV.

2. †Includes Hindi, Urdu, Punjabi and Pahari.

3. *Indicates that total population of all languages, if derived would be slightly less than the population given in A-II Table of 1961, due to the fact that adjustment of minor portions has not been done. Calculations are based on actual population and not on A-II population.

4. Since Kinnaur District has been formed out of Mahasu and the exact details of the former were not available for previous decades, therefore, both have been combined.

NOTES— 1. †Includes the figures of Punjabi and Urdu also.

2. *Indicates that total population of all languages, if derived would be slightly less than the population given in A-II Table of 1961, due to the fact that adjustment of minor portions has not been done. Calculations are based on actual population and not on A-II population.

3. Since Kinnaur District has been formed out of Mahasu and the exact details of the former were not available for previous decades, therefore, both have been combined.

FLY-LEAF

Definitions and explanations

MOTHER TONGUE AND ANY OTHER LANGUAGE(S)—Instructions to enumerators for recording entries about mother tongue and any other language(s) in 1961 Census were—

"Write the mother tongue in full including dialect as returned by the person enumerated. Mother tongue is language spoken in childhood by the person's mother to the person or mainly spoken in the household. If the Mother died in infancy write the language mostly spoken in the person's home in childhood. In the case of infants and deaf mutes give the language usually spoken by the mother.

After recording the mother tongue enquire whether the person knows any other language(s), Indian or foreign, and write the language(s) returned by him against this question. In case he does not know any other language put 'X'.

The number of language recorded against this question should not be more than two. These languages should be other than his mother tongue which he speaks and understands best and can use with felicity in communicating with others. Such language or languages will exclude dialects of the same language."

Scope and coverage of the Table C-VI

The table has been prepared down to the district level. This table is important especially for linguistic borders where one language impinges on the other. The table shows data regarding total speakers of mother tongue; total number of persons returned as speaking a language subsidiary to the mother tongue and break-up of subsidiary language into male and female speakers.

C-VI—BILINGUALISM

NOTE—Mother tongues, the speakers of which do not speak subsidiary language/languages (in the sense that they are not bilingual) have been omitted from this table.

TABLE C-VII—RELIGION

FLY-LEAF

Definitions and explanations

Religion—Instructions to enumerators to record religions of persons enumerated were—

"For Hindu	write H
Muslim	write M
Christian	write C
Jain	write J
Buddhist	write B
Sikh	write S

For others write the answers actually returned."

Scope and coverage of the Table C-VII

The table has been prepared separately for total, rural and urban population down to the district level. It gives information about the distribution of the population according to Religions. In Censuses before 1951 it was the practice to show the distribution of population by religions down to the village or town but since the last Census this practice has been discontinued. This is an important sociological table.

Part A—**Classification by Literacy and Industrial Category of Workers and Non-workers among Scheduled Castes.**

Part B—**Classification by Literacy and Industrial Category of Workers and Non-workers among Scheduled Tribes.**

FLY-LEAF

Definitions and explanations

Scheduled Castes and Scheduled Tribes—Instructions were given to the enumerators to record entries to the question in the enumeration slips about scheduled castes and scheduled tribes—

"The answer to this question will be recorded only if a person belongs to a Scheduled Caste or Scheduled Tribe. If the person belongs to a Scheduled Caste or Scheduled Tribe obtaining in your State, or in your district write the name of the caste or tribe to which he belongs. For all others, write 'X' in this column. A list* of Scheduled Castes and Scheduled Tribes, obtaining in your State or in your district is given elsewhere in these instructions.

If the person belonging to a Scheduled Caste or Scheduled Tribe returns his caste or tribe by a synonym or a generic name of a caste or tribe as given in your list, write the name as returned and the name of the relevant caste or tribe, as per printed list, within brackets.

Do not write the names of Scheduled Castes in general terms as 'Harijan', 'Achhut'. You should ascertain the name of the caste when it is returned and write it. If a person is negligent and insists on calling himself merely 'Harijan' tell him that this description will not earn the person any benefits under the Constitution permissible to Scheduled Castes and Scheduled Tribes. This may persuade him to give out the correct name.

Scheduled Castes can belong only to the Hindu or Sikh religions. * * * *

Scheduled Tribes may belong to any religion."

Literacy:—(See definition of Education given in the fly-leaf to the Table C-III—Part A).

Industrial Category of Workers and Non-Workers—In the 1961 Census according to instructions prescribed, a worker was recorded working as cultivator, or as agricultural labourer or at household industry or doing any other work, according to the work he did. If he was working at more than one of the above categories, he was so recorded. In the case of a person working at household industry, the nature of his work, the nature of the household industry and whether he was an employee, were recorded.

For a person who was doing work other than as cultivator or as agricultural labourer or at household industry, the nature of his work, the nature of industry, profession, trade or service in which he was employed, were recorded. In addition class of worker, whether he was an employer, employee, single worker or family worker was recorded. The name of the establishment in which he was working was recorded.

In the case of those who were not working, their activities were returned under the eight categories specified in the instructions.

For economic classification of the population, the emphasis was laid on work. All those who worked, even if a worker derived no income for himself, such as an apprentice without stipend or wages, were workers, exception being an adult woman who was engaged in household duties but doing no other productive work to augment the family resources. Even part-time workers such as women or children, who were engaged in work, such as rice pounding for sale or wages, or in domestic services for wages for others or minding cattle or selling fire wood or making and selling cowdung cakes or grass etc., or any such work, were treated as workers. Work included not only actual work but effective supervision and direction of work. A person, even though deriving an income, but doing no productive work, such as a retired person receiving a pension and not employed again, or a rentier or a person living on agricultural or non-agricultural royalty, rent or dividend for securing which he did not have to work and who did no

* See Annexure to the Fly-Leaf.

other work, was not a worker. He was a non-worker.

Thus all the working population engaged in any branch of productive work are basically termed as 'Workers' and all others not engaged in any productive work as 'Non-workers' in 1961 Census economic classification. The 'Workers' have further been classified into nine broad industrial categories.

In the data collected in the case of any person more than one/two productive activity/activities or work/works could have been recorded. In such cases his principal and secondary works were clearly recorded during enumeration with the help of significant symbols. The principal work was the one on which he spent the most time and the secondary work was the next in importance to his principal work.

Workers Classified into Nine Broad Industrial Categories—The economic classification of the 1961 Census population in tables is based on the Indian Standard Industrial Classification and the National Classification of Occupations, adopted by the Government of India. The industrial classification of the workers according to the different sectors of economic activities with which they are connected, and the occupational classifications according to exact functions performed in those sectors of economic activities are presented in different tables. Primarily they have been classified or grouped into the following nine broad industrial categories.

Category I—As Cultivator—This category includes cultivators of land. A person was considered working as a cultivator if he or she was engaged either as employer, single worker, or family worker in (*a*) cultivation of land or supervision or direction of cultivation of land owned or held from Government and (*b*) cultivation of land or supervision or direction of cultivation of land held from private persons or institutions for payment in money, kind or share.

Points of significance to note are that—

(*i*) an agricultural labourer was not a cultivator (see Category II below);

(*ii*) a person engaged in fruit growing, orchardry or plantations like tea, coffee, rubber, cinchona and other medicinal plantations was not a cultivator;

(*iii*) a person who had given out his land to another person or persons for cultivation for money, kind or share of crop and who did not even supervise or direct cultivation of land, was not a cultivator.

Category II—As Agricultural Labourer—This category includes all those persons who worked in another person's land only as labourers without exercising any supervision or direction in cultivation, for wages in cash, kind or share such as share of produce.

Category III—In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities—This category includes—

(*i*) persons working in mining and quarrying not on household industry basis (see Category IV below);

(*ii*) persons engaged in the economic activity of livestock and hunting not on household industry basis;

(*iii*) persons engaged in the economic activity of forestry and fishing not on household industry basis; and

(*iv*) persons engaged in plantation of crops, fruit growing or orchardry and allied activities not on household industry basis.

Category IV—At Household Industry—A household industry was not to be on the scale of a registered factory. It should have been conducted by the Head of the household himself and/or mainly member of the household at home or within the village in rural areas and only at home in urban areas. Main criterion for a household industry was the participation of one or more members of a household in rural areas. In the urban areas the industry should have been confined to the house. A household industry related to production, processing, servicing, repairing or making and selling of goods. It did not include professions such as pleader or doctor or barber or waterman or astrologer. Persons working at household industry, are classified in this category of workers.

Persons not working in their own household industries but working as paid employees in another person's household industry are also included in this Category IV.

Category V—In Manufacturing other than Household Industry—Persons working in the registered factories are included in this category. It includes all persons engaged in processing, manufacture and repairing not included in Category IV.

Category VI—In Construction—All persons engaged in construction and maintenance of buildings including erection, flooring, decorative constructions, electrical and sanitary installations are included in this category. This includes persons engaged in construction and maintenance of roads, railways, bridges, tunnels, telegraph and telephone lines, waterways and water reservoirs such as bund, embankments, dam, canal, tank, tube-wells, wells.

Category VII—In Trade and Commerce—All persons engaged or employed in trade—retail or wholesale, are included in this category. In addition this includes persons employed or engaged in commercial activities like importing and exporting of goods and commodities, real estate and properties, stocks, shares and futures, providents and insurances, money lending (indigenous), banking and similar type of financial operation, auctioneering, distribution of motion pictures, and all other activities connected with trade and commerce not covered above, including hiring out of durable goods such as electric fans, microphone, rickshaw etc.

Category VIII—In Transport, Storage and Communications—All persons engaged or employed in any form or mode of transport, storage and warehousing activities, and communications such as postal, telegraphic, wireless, signal, telephone, are included in this category. Persons engaged or employed in information and broadcasting too come under this category.

Category IX—In Other Services—Persons employed in electricity, gas, water and sanitary services, public services, educational and scientific services, medical and health services, religious and welfare services, legal services, business services, community services, trade and labour associations, recreation services, personal services, services not elsewhere classified, and in activities not adequately described, are included in this category. General labourers, accustomed to work on various miscellaneous jobs, are classed in this category.

Non-Workers—All those persons who were not engaged in any productive activity have been treated in the light of instructions prescribed as 'Non-workers' such as—

1. A full-time student or child attending school who does no other work, such as make articles at home for sale, nor even help part-time in his own family cultivation, industry, trade or business.
2. A person engaged in unpaid home duties (like housewife or other adult female) who does no other work, such as make articles at home for sale or wages, nor help regularly even part-time in family cultivation, industry, trade or business.
3. Any dependent, including an infant or child not attending school, a person permanently disabled from work because of illness or old age.
4. A retired person who is not employed again, rentier, person living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work and who does no other work.
5. A beggar, vagrant or independent woman without indication of source of income and others of unspecified source of existence.
6. A convict in jail (an under trial prisoner will be shown as a worker if he used to work before he was apprehended) or an inmate of a penal, mental or charitable institution.
7. A person who has not been employed before but is seeking employment for the first time.
8. A person employed before but now out of employment and seeking employment.

Scope and coverage of the Table C-VIII

The table has been prepared separately for total, rural and urban population down to the district level. It gives separately the total population of the Scheduled Castes in Part A and of the Scheduled Tribes in Part B of the Table and their distribution by literacy and classification as Workers into nine broad Industrial Categories and the total number of Non-workers. The principal works of the workers have been taken into account for their classification.

This is a general table that has been prepared for the Scheduled Castes and Scheduled Tribes. In addition a number of special tables have been prepared which relate to each Scheduled Caste and Scheduled Tribe. They are printed separately. Literacy figures of Scheduled Castes and Scheduled Tribes have been given for the first time in 1961 Census.

D—SERIES MIGRATION TABLES

TABLE D-I—NON-INDIAN NATIONALS

FLY-LEAF

Definitions and explanations

Nationality—Nationality of every person enumerated was recorded during the Census.

Scope and coverage of the Table D-I

This table shows the number of persons who belong to different foreign nationalities, found in Himachal Pradesh during the 19 1 Census. It, however, excludes non-Indian Nationals who were employees in Foreign Embassies, Missions, etc.

Nationals of countries included in 'Elsewhere' in the Table D-I are shown by 'Nationality' in the Appendix to the table.

TABLE D-II—PLACE OF BIRTH

FLY-LEAF

Definitions and explanations

Birth Place—To every person enumerated during 1961 Census the following questions were put and entries recorded regarding birth place—

1. If born in village or town in which enumerated—Place of enumeration recorded.
2. If born in another village or town district in which enumerated—District of enumeration recorded.
3. If born in another district in the State of enumeration—Name of district recorded.
4. If born in another State in India—Name of district and State recorded if name of district known; otherwise name of State recorded.
5. If born in a country outside India *e.g.*, Pakistan or any other country—Name of country recorded.
6. Persons born at sea or in air or in railway carriages or on road, transport, *e.g.*, buses etc.,—Entered as such.

Whether born in village or town—Information about birth in rural and urban areas was elicited and recorded separately in the case of those born in India with the help of the following questions—

1. If born in a village.
2. If born in a town which is considered a town at the present time even if it was not so considered at the time of birth.
3. If the person enumerated is not in a position to say whether the place of birth is a village or town, the name of the place of birth as returned by him to be recorded.

Scope and coverage of the Table D-II

This table is usually prepared in all Censuses giving the distribution of population by birth place. An important change as compared to previous Indian Censuses is that births in rural and urban areas have been given separately in the case of those born in India. A special question was asked at the 1961 Census for this purpose—'Whether born in village or town?' Similarly the place of enumeration has been classified separately into rural and urban areas. This will give indication of the Rural/Urban migration.

TABLE D-III—MIGRANTS CLASSIFIED BY PLACE OF BIRTH AND DURATION OF RESIDENCE IN PLACE OF ENUMERATION

FLY-LEAF

Definitions and Explanations

Birth Place—(For definition and explanations see fly-leaf to the Table D-II).

Duration of Residence in Place of Enumeration—Instructions to the enumerators to record duration of residence in place of enumeration of an individual were as under—

"1. For a person born in village or town or city in which enumerated	Write X
2. For a person born in another village or town or city of district of enumeration or who was not born in the district of enumeration	Write the number of completed years this person has been in the village/town/city of enumeration. (*Do not take into account periods of temporary absence on leave or holiday or tour or business*).
3. If the duration of residence is less than one year . . .	Write 0
4. If the duration of residence is one year or more . . .	Write the actual number of completed years of residence".

Scope and coverage of the Table D-III

This is a new table based on a special question asked at the 1961 Census regarding the duration of residence at the place of enumeration in the case of persons born outside the place of enumeration. The residence period in tabulation has been grouped under six categories, *viz.*,

1. Less than 1 year;
2. 1-5 years;
3. 6-10 years;
4. 11-15 years;
5. 16 years and over;
6. Period not stated.

This table is intended to supplement the information produced by the previous table relating to birth place, for a detailed study of immigration.

Classified by Age Groups

Fly Leaf

Definitions and explanations

Age—See definition given in the Table C-II)

Birth Place—(See definition given in the Table D-II).

Duration of Residence—(See definition given in the table D-III).

SCOPE AND COVERAGE OF THE TABLE D-III-A

Migrants to Himachal Pradesh from other States and outside India, with less than 5 years as duration of residence in Himachal Pradesh, have been tabulated. These are classified into age groups 0-2, 3-12, 13-22, 23-32, 33-42, 43-52, 53 plus and Age not stated. The duration of residence of the migrants has been grouped into three categories, *viz.*, Less than 1 year; 1-2 years; and 3-5 years. It is a useful study of migrants during the last five years before the 1961 Census.
