INTRODUCTION.

The first regular Census of the population of the Rewa State was taken on the 17th February 1881 synchronously with the rest of India, which was followed by the second on the 26th February 1891. On both these occasions the modified Schedule of only 8 columns was employed, the preliminaries were undertaken independently by the State and the materials were tabulated at the Baghelkhand Agency Headquarters, Satna, but no separate Census Report was written. The third Census was taken on the 1st March 1901 and the fourth on the 10th March 1911. The whole of the operations from beginning, to the writing of a small Report in 1901, and somewhat more elaborate one in 1911, were carried out at the Central Office at Indore. The present Report is the third of its kind compiled by the Provincial Superintendent of Census and forms a volume of the Central India State Census series.

The Report consists of two volumes. Volume I consists of two Parts, Part I deals with the Report and Part II the Tables. Volume II contains statistics for villages.

As soon as the decision of the Government of India was announced that a decennial Census would be taken the Council of Regency, acting on instructions from the Central India Agency Office, prepared a complete list of villages in the State, called Village Register, giving the number and names of inhabited villages and the Officials available for taking the Census. This is the ground plan for the enumeration. The Council thereafter appointed Rao Bahadur V. K. Mulye, B.A., the Revenue Member, to be the State Census Commissioner and placed him in direct correspondence with the Provincial Superintendent of Census, Central India.

The procedure followed in this Census closely corresponded to that of 1911; it is, therefore, not necessary to repeat in any detail the measures that were adopted. Since 1901 the States have become familiar with Census procedure and do not require to be reminded of the various stages of the operations. They were in brief as under:—

After the list of Census villages was prepared the next step taken was division of villages and towns into convenient Blocks and Circles. Generally a group of 40 houses formed a Block under an enumerator but where the supply of enumerators was not sufficient more than one Block had to be put in charge of an enumerator, care being taken not to include different villages in the same Block. The Blocks were so arranged as to be compact and facilitate the enumerator's work. From 10-15 Blocks constituted a Circle under a Supervisor. The whole State was divided into 15 Charges 10 of which were Tehsils, 4 Towns, and 1 the special Colliery Charge.

There were altogether 15 Charges, 96 Circles and 10,770 Blocks. The number of Charge Superintendents, Supervisors and Enumerators being respectively 14, 946 and 10,770. The average size of a Charge, Circle and Block was 26,995, 367 and 31 houses respectively.

Working Staff.—The Census staff was selected from almost all Departments of the State and where possible, persons with previous experience, were selected to work. In remote areas where State servants were not available private persons were entrusted with the work. Paid Supervisors and enumerators to the number of 91 were also engaged. The Charge Superintendents were Tehsildars and Officers of the Educational, Industrial and Permit Departments. The Supervisors were School Masters, Head-clerks of Departments and Officials of Forest, Police, Permit, etc. The enumerators were recruited mostly from village contractors, Patwaris, School masters, Senior students and private individuals. A statement showing the number recruited from the different departments is attached.

The Census Commissioner with four Tehsildars attended the training class opened at Sehore in June 1920 by the Provincial Superintendent and received practical training in the enumeration work, while at Sehore he received the Central India Census Procedure Code, the Manuals of Instructions for Charge Superintendents and Supervisors and instructions on the cover of the enumeration book for Enumerators. These were read and explained. The officers were then taken round and made to number a few houses and filled up particulars for persons. On returning to Rewa Schools of instruction were opened at convenient centres and all persons who were charged with Census duty were given theoretical and practical

training. Their knowledge was tested from time to time till the preliminary enumeration began. A sufficient number of copies of all rules received from the Provincial Superintendent were prepared at Rewa and freely distributed amongst the Census Staff which helped them a great deal in carrying out the work.

House numbering, which is the basis of enumeration, was next taken in hand. This operation was carried out by the Supervisor assisted by the Enumerators. The definition of the house as given in the Central India Census Procedure Code was followed throughout as in 1911. All camps were carefully numbered and not a single Baiga hut in the heart of the forest was omitted.

After completing the house numbering the Supervisor prepared his House List, extracts from this, (*i. e.*, Block List) were then distributed to the Enumerators showing the number of his Blocks and of houses in his charge.

When the enumerators were in possession of their Block List, they were made to enumerate the persons in their Block on loose schedules for practice. These were examined by the Supervisors and other Inspecting Oficers. The mistakes made were corrected and explained on the spot.

By the begining of January the Census agency was in possession of their census forms and prepared for their work. The preliminary enumeration began in rural areas on the 15th January and in urban areas 15th February. This preliminary record was checked by the Supervisors, Charge Superintendents, Inspecting Officers the Census Commissioner and his assistants. This process was completed everywhere by the 10th March. The preliminary enumeration figure stood at 1,434914.

The rules in the Census Code and instructions in the Manuals and on the cover of enumeration books were strictly followed and all stages of the operations were carried out up to times laid down in the Census Calendar showing the dates for the completion of eachstage. Correct maps of Charges and Circles were prepared and supplied to all Chage Superintendents and Supevisors which facilitated the work a great deal.

Colonel C. E. Luard visited Rewa in September 1920 and inspected the house numbering then in progess. Later on Major E.J. D. Colvin also visited Rewa in December and Umaria in February 1921. Each time house numbering with House List entries made by the enumerators in the Schedules were inspected and satisfaction expressed.

All State servants working as Supervisors and Enumerators were exempted from their ordinary duties on the 18th and 19th March 1921 to facilitate Final Census.

To secure reasonable expdition and minimise trouble to enumerators on the 17th and 18th March a proclamtion was made by beat of drum that at 6 p. m. on the 18th March all business should be susended and persons to return to their houses and remain there with a lamp burnig and doors open until the enumerator had visited the house and made is final check. On the 18th March two guns were fired at Rewa one at 6 p. m. a a waning to suspend business and to return home, and the second at 7 p. m. to instrut the enumerators to commence the final checking. The final enumeration accordingly began punctually at 7 p. m. and was completed by midnight, except in non-synchronous areas where the final check was carried out on the afternoon of the 18th March. All enumerators checked the entries of the Preliminary Enumeration striking out entries of persons who had left or died and making fresh entries in spare schedules of any new comers or any new born children. Special arrangements wemade for the enumeration of travellers by road and houseless wanderers. No travellers in running trains were enumerated within the limits of the State.

The President of the Council of Regency and the Census Commissioner visited different streets of Rewa Town and satisfied themselves that the work was going on satisfactorily. Sowars were posted at almost all Tehsils to collect figures and where there was no telegraph line special Dâk was laid to bring the figures to Rewa. This arrangement proved satisfactory.

Special arrangement was made in the Headquarter Office for collecting and checking the provisional totals, which included the figures of the Baghelkhand Agency Headquarters. According to the provisional figures the total population was 1,401,672 or 33,242 less than the preliminary figure.

After going through the proeses of abstraction, sorting and tabulation the final totals obtained were 1,401,524 which showed a decrease of 148 persons against 192 in 1911 or 1 person in 1000, a result which was very creditable to all concerned.

The enumeration forms and rules with their translation in vernacular were found sufficient, clear and instructive, and no difficulty was experienced by those concerned in the operations.

The attitude of the people was throughout friendly and helpful and no difficulty of any sort was experienced in any part of the State, even in non-synchronous tracts. The public are now accustomed to the taking of the Census and realise its importance.

As in 1911 an Industrial Census was also conducted on special Schedules A and B which were filled up by the Owners, Managers, or Agents for Factories, Mills, etc., in which not less than ten persons were employed on a normal working day between 1st February and 1st March 1921.

There were no special gatherings on the night of the Census.

After the despatch of the Provisional Totals the enumeration books were collected and forwarded with summaries and Circle Registers to the Central Office at Indore packed in boxes by Charges for the subsequent processes of abstraction and tabulation. Later on the State Census Commissioner deputed his assistant Mr. M. G. Solegaonkar to supervise the work. He was, however, replaced on 1st January 1922 by Mr. V. D. Mulye who completed the work.

The instructions contained in the Imperial Census Code Part II with such other supplementary instructions as were issued by the Superintendent and the Deputy Superintendent were strictly followed. The different processes were commenced and finished as shown in the inset in the Central Office at Indore.

Process.	Date began.	Date finished.
Slip copying ...	20th April 1921...	7th June 1921
Recounting ...	8th June 1921 ...	30th June 1921
Sorting ...	1st July 1921 ...	7th October 1921
Tabulation ...	1st September 1921	25th March 1922
Compilation ...	4th April 1922 ...	30th November 1922.

Establishment.—A statement showing the number of clerks employed in slip copying, sorting, tabulating, and compiling is given at the end.

The Report.—The writing up of the Report was taken in hand in December 1922 and the last Chapter was finished in April 1923.

Cost.—As the accounts are not yet finally made up and printing is still going on only approximate figures can be given for the cost. They may be taken as correct for all practical purposes. The total expenditure up to date amounts to Rs. 33,000 which gives 4·5 pies per head as the cost of Census.

Acknowledgments.—The Charge Superintendents and others noted in the margin have done excellent work during the enumeration and have received certificates of merit.

Mr. Phani bhusan Bhattacharya	Satna Town
Pandit Nandkishore Dube, M. A. ...	Raghurajnagar Tehsil
John E. Tyers, Esquire, M. I. M. E.	Umaria Town and Umaria Colliery
Sardar Narmada Prasad Singh ...	Huzur Tehsil
B. Badri Prasad Khare, B. A. ...	Mauganj Tehsil

Lal Radha Krishan Prasad Singh ...	Bandhogarh Tehsil
Sardar Rudra Sahai Singh ...	Beohari Tehsil
Captain Sultan Ahmad Khan ...	Gopadbanas Tehsil
Mr. Keshorao Martand Dighe ...	Sohagpur Tehsil

The preliminary work in this State was started rather late but after the appointment of Rao Bahadur Mulye, it was carried on with zeal and energy. His hands were tied by the famine which took place during the enumeration period but with the cordial support of the Council of Regency all difficulties were overcome with the result that the final enumeration was as successful as possible. I would express my indebtedness to the Regent Colonel His Highness Maharaja Sir Sajjan Singh, K. C. S. I., K. C. V. O., and the Council for having selected Rao Bahadur V. K. Mulye. The task was rendered very arduous as besides his own heavy responsibilities, the famine just at the enumeration time added greatly to the difficulties and it is due to his personal exertions that a successful result was achieved.

The drafting of the report was done by me. The compilation of the final tables and of the subsidiary tables for the report was done in my office by Mr. V. D. Mulye, who deserves commendation for the painstaking accuracy with which he prepared the statistics and the final copies of the chapters for the press.

To Mr. M. D. Kale my thanks are due for the general supervision of the Rewa Section of the Abstraction Office.

I would express my thanks to Rai Bahadur Pandit Janki Prasad in this, the third Census in which we have worked together, for the cordial help that he gave whenever I required it.

To Munshi Bishan Narayan, Proprietor, and Babu Kesri Das Seth, the Superintendent, Newul Kishore Press, Lucknow, I am much obliged for the courtesy shown to me at all times, and in sending me clear proofs promptly and the expeditiousness with which the printing of the report was carried out.

SEHORE, C. I.,
16th April 1923.

C. E. LUARD,
LIEUT.-COLONEL,
Superintendent of Census Operations in
Central India.

REPORT

ON THE

CENSUS OF REWA STATE

1921.

CHAPTER I.

Distribution and Movement of Population.

Area and Boundary.

The State of Rewa covers an area of 13,000 square miles, being the largest State in the Central India Agency, owing to the excision of Gwalior. It lies between 22°·30′ and 25°·12′ North and 80°·32′ and 82°·51′ East and is bounded on the North by the Banda, Allahabad and Mirzapur Districts of the United Provinces of Agra and Oudh; on the East by the Mirzapur District and the Feudatary States of Changbhakar and Korea of the Central Provinces; on the South by the Bilaspur and Mandla Districts of the Central Provinces, and on the West by the Jubbulpore District and the States of Maihar, Ajaigarh, Nagod, Sohawal, Kothi and Panna in the Baghelkhand and Bundelkhand political charges.

Natural and Administrative Divisions.

The State is divided into two Natural Divisions, the Lowlying or Northern Division with an area of 3,515 square miles and the Hilly or Southern Division with an area of 9,485 square miles. These areas differ slightly from those of 1911. This is due to readjustment in the Tehsils.

For Administrative purposes the State is divided into the ten Tehsils shewn in the inset under 1921. The changes which have taken place are as follows:—In 1911 Teonther was known as Sitlaha. Sirmaur is a new Tehsil to form which 275 villages were taken from Huzur Tehsil, 144 villages from Raghurajnagar and 90 villages from Sitlaha. In Mauganj 16 villages were added from Bardi and 50 villages from Huzur Tehsil. Gopadbanas, a new Tehsil, was formed of 319 villages from Bardi, 195 villages from Beohari and 190 villages from Huzur Tehsil. Deosar was called Bardi.

1921.		Area.	1911.		Area.

The last Decade. Epidemics and Famine.

Before dealing with the figures it is necessary to pass the years of the last decade in review and note any circumstances which may have affected the return. During the last ten years three epidemics and two bad years, one of scarcity and one of actual famine, occurred in the State. No proper vital statistics are kept and the futility of the returns sent is amply illustrated by the return of 481 deaths from Influenza in the Tehsils, while at least 20 times the number must have died.

In 1918-19 scarcity prevailed owing to short rainfall and in 1919-20 actual famine, which caused considerable emigration. On the last occasion timely relief saved many lives.

Rainfall

The rainfall return shows that in 1917 (61 inches) and 1919 (64 inches) the rainfall was excessive, a serious outbreak of malaria following in each case. Too minute a consideration of these figures would not, however, be useful as the returns from Tehsils are not reliable, Beohari, for instance, which gives a full return in the table, having in fact, no rain gauge.

Causes of fall in Population.

The population has fallen since 1911 by 113,700 persons or 7·5 per cent., the density being 117 in 1911 but only 108 in 1921. The causes assigned are, rise of wages in neighbouring areas in British India causing emigration, wages in Rewa State being abnormally low and the "Harwaha" system, a feudal institution, amounting practically to slavery which also affected the population.

The scarcity of 1918-19, the famine of 1919-20, the Plague and the Influenza epidemic of 1918, have all played their part in diminishing the population, the emigration due to these causes amounting to 33,000 persons in February and March 1920, in spite of all the efforts of the Regency Council to stop it. Of these adverse influences the Influenza epidemic of 1918 was the greatest catastrophe that has ever befallen the State. Lieut.-Col. His Highness the Maharaja Sir Venkat Raman Singh, G.C.S.I., was included among the victims of the disease.

Since no Land Records Department has so far existed in the State it is impossible to give any useful figures for cultivation and irrigation, though it may, incidentally be mentioned that irrigation is little practised. An irregular attempt at a settlement was made in part of the Northern area during the decade by an imperfectly trained staff and proved a failure, and some arbitrary enhancements were made in the Southern area. However, a regular Survey and Settlement are now being carried out under a Settlement Officer lent by the United Provinces Government and before the Census of 1931 full statistics will be available.

Communication.

The E. I. Railway traverses a part of the State vith Stations at Satna, Dabhaura and Tikori. A new line is being considered from Daltonganj to Katni which will traverse the State.

The only metalled roads are those from :—

Satna to Rewa	...	(32 miles.)
Rewa to Amarpatan	...	(about 24 miles.)
Rewa to Govindgarh	...	(about 12 miles.)
Rewa to Mirzapur	...	(about 58 miles.)

New Roads.

More than 240 miles of road have been aligned and surveyed and on these roads about 90 miles of earth-work as shown in the subjoined statement have been completed; but skilled artizans being few in Rewa, the bridging still remains to be done.

Name of road.	Length in miles.	Length in miles of which earth-work has been completed.
1. The Laur-Naigarhi Road ...	8½	8
2. The Rewa Baikunthpur-Sirmaur Road.	25	23
3. The Rewa Gurh-Badwar Road.	18	16
4. The Mangawan-Sohagi (Allahabad Road)	33	25
5. The Rhenchua-Chorhat Sidhi Road.	26	4
6. The Satna-Amarpatan Road...	20	5
7. The Beohari Sahdol Road ...	50	9
Total ...	180½	90

The formation and width of the principal old main road has been improved and widened for a considerable distance. Other roads are chiefly temporary cold weather roads made for shooting.

Industry.

The industries of the State are the coal mines, Shellac Factory and Ice Factory at Umaria, and several quarries for lime-stone and building stone. A Crundum mine is worked at Pipra in the Deosar District and jungle produce is collected at Sahdol.

Social.

There are encouraging figures of an awakening interest in education especially among the Rajputs, but a large proportion of the population consists of members of the Jungle tribes to whom education does not appeal. The local Brahman, however, shows but little desire to improve, and consistently refuses to put his hand to a plough. There is a general idea in the community that it is not necessary to work to live and this view is encouraged by the veneration locally accorded to the class.

The Kshatria community, with its hereditary claim to employment in the army, takes up a similar position, but the need for education is beginning to penetrate this community.

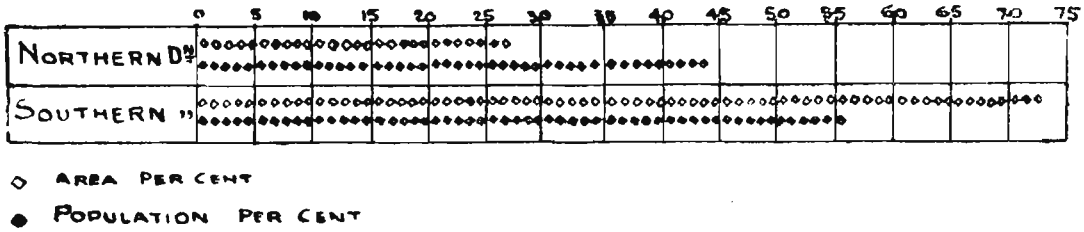

Banias are few, as there is, as yet, little trade to attract them.

The Shudra has till lately been systematically ignored, but the State is now alive to its responsibilities and steps are being taken to give educational facilities to this class.

The Population.

The population dealt with is that recorded on the 18th March 1921 and was taken on that night in all areas except non-synchronous tracts, given in the inset, where the rough nature of the country necessitated its being taken in the morning. This *de facto* population includes of course all temporary sojourners, such as, travellers by road and rail. However, in Rewa, these are a negligible quantity and scarcely affect the totals. Turning to Table I, we get the population, with area and occupied houses. The total population enumerated on March 18th was 1,401,524; of this population 619,000 resided in the Northern

Tehsil.	Area.	Population.
Gopadbanas (Sidhi) ...	1,594	193,718
Deosar ...	2,333	121,743
Bandhogarh ...	1,797	118,831
Sohagpur ...	2,641	237,289
Total ...	8,365	671,581

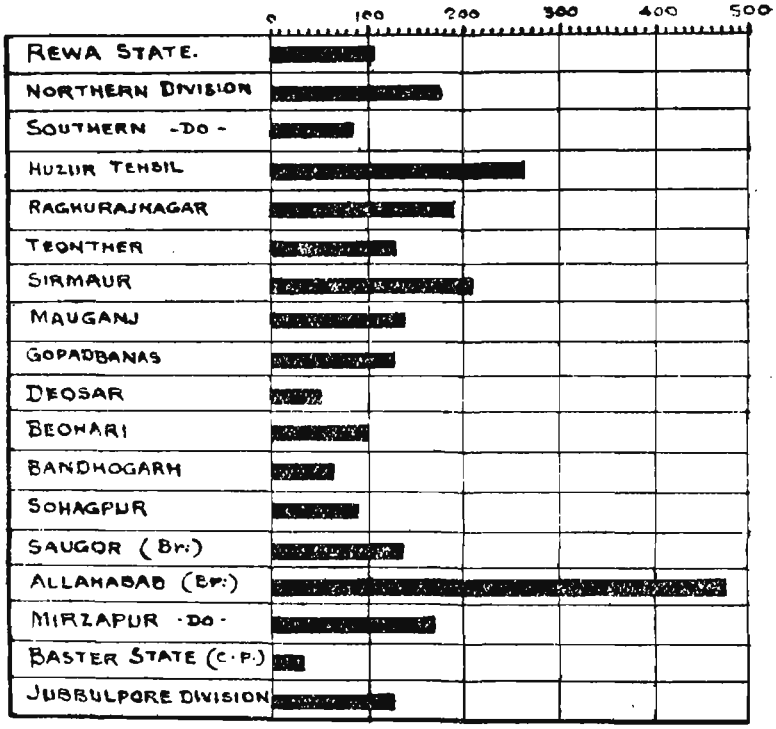

and 783,000 in the Southern portion, that is, the Southern portion supports 56 per cent. and the Northern portion 44 per cent. of the whole population, but the Southern Division is nearly three times the size of the Northern, so that with 73 per cent. of the whole area it only supports 56 per cent. of the population, owing to the large forest tracts which lie in it.

Density.

We may now consider the factor of density, in the State as a whole.

DIAGRAM SHOWING THE DENSITY OF POPULATION IN THE STATE AND A FEW BRITISH CONTIGUOUS DISTRICTS.

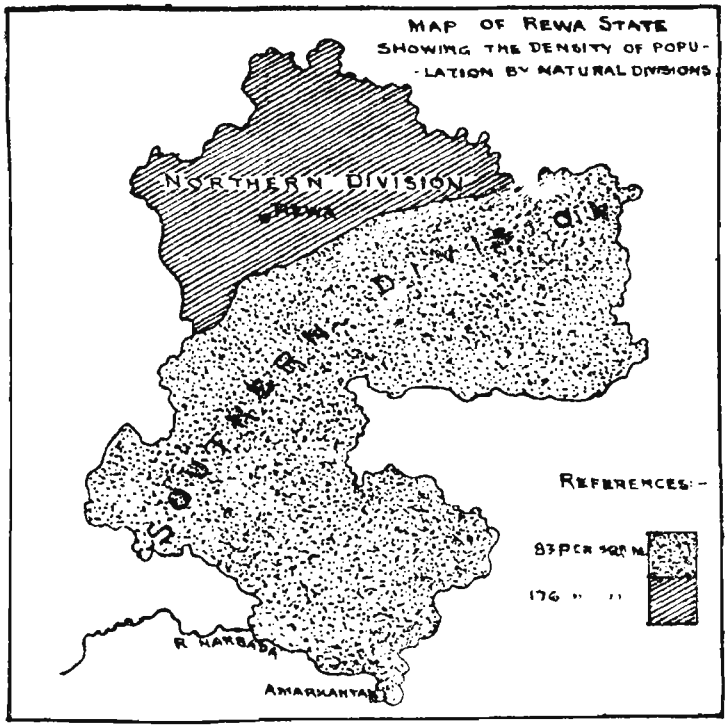

Assuming for the moment uniform distribution, we get a density of 108 persons per square mile.

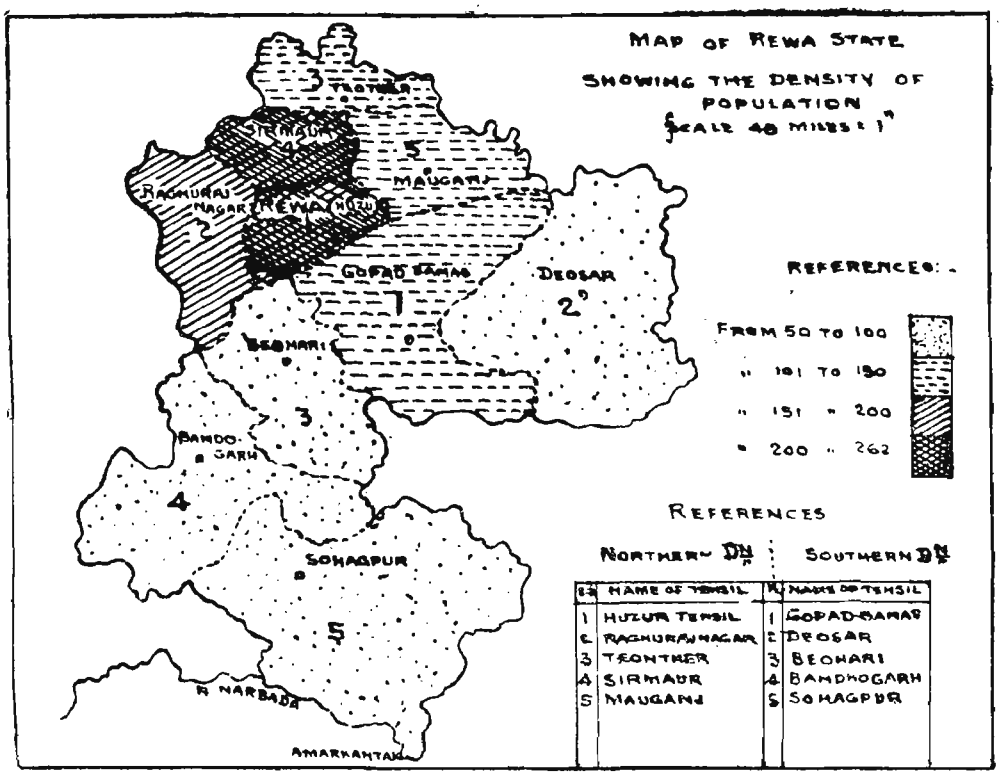

This we may compare with that of other States.

	Density.
India ...	175
Rewa ...	108
Panna ...	76
Ajaigarh ...	106
Bijawar ...	115
Bombay ...	137
Indore ...	121
Gwalior ...	121

When, however, we turn to the Natural Divisions and the Tehsils we see how the density varies locally.

The Northern or Low-lying Natural Division has a density of 176 per square mile, but the much larger Southern or Hilly area one of only 83. The Tehsil figures shew the same thing. The highest density is in Huzur Tehsil, including Rewa town, in the Northern Division (262), the lowest in Deosar (52) in the Southern Division. This is what is to be expected, the Southern Division being mainly forest area, with a low power of supporting

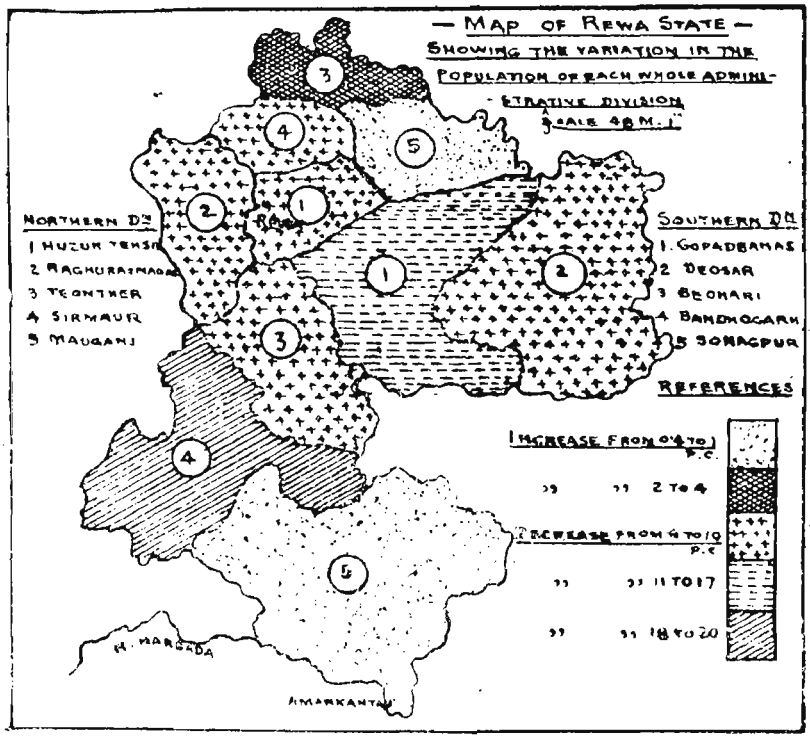

human life, with no good communications and a population living under very undeveloped social conditions. The rainfall returns are so problematical that one does not feel that it is any use dilating on the connection between rainfall and population. It is sufficient to point out that the Southern Division is generally speaking forest covered and undeveloped and its population uncivilized. The area is largely unhealthy and mortality is no doubt high and balances even the higher fecundity usual among jungle folk.

Subsidiary Table I is said to be unreliable owing to the absence of a proper Survey and Settlement, and hence it is best to leave consideration of the effect of rainfall, water supply and cultivation on density to the Census of 1931, but generally speaking density follows the most favoured area.

Variation.

12. In Table II we obtain the information we require in considering the variation of the population. It will be seen that no Tehsil figures can be given except for

1911 and 1921. The first Census taken was that of 1881, but the lack of detail detracts from the interest until we come to the 1911-21 period. We may take 1881 as 1,000 and see what the proportional variation has been in the five Censuses. The net variation since 1881, as seen in the inset, has thus been an increase of 7·4 per cent. There has been no variation in the area of the State and enumeration always tends to omit, to under, not over estimate, a population.

Year.	Population.	Variation.	Variation per cent.	Proportion to 1881.
1881	1,305,124	....	....	1,000
1891	1,508,180	+203,056	+15·6	1,156
1901	1,327,184	−180,996	−12·0	1,017
1911	1,515,237	+188,053	+14·2	1,161
1921	1,401,524	−113,713	−7·5	1,074

Only in 1901 and 1921 has a decrease been recorded. In 1901 this was due to the famine which prevailed in 1899-1900 and in 1921, mainly to the Influenza epidemic. The net result is a rise of 96,400 in the population between 1881 and 1921.

In Subsidiary Table IV we have the Natural population dealt with. That is the total population born in Rewa, wherever the persons were enumerated. The natural population is found to be 1,514,587 in 1921 and was 1,602,356 in 1911, a fall of 5·5 per cent. The number of emigrants has risen and of immigrants has fallen since 1911. This fact has been referred to in the introductory remarks to this chapter in connection with the administration.

Year.	Natural population.	Proportional variation since 1891.
* 1891	....	....
* 1901	....	....
1911	1,602,356	100
1921	1,514,587	94·5

* Natural population figures for 1891 and 1901 are not available.

Areality and Proximity.

13. A general idea of the way the population is distributed is given in the inset. It shows roughly the area commanded by each person and their proximity. An increase is noticeable in both factors since 1911 due to the fall in the population.

Division.	Areality (Acres.)		Proximity (Yards.)	
	1921	1911	1921	1911
Rewa State ...	5·94	5·49	182	175
Northern Division ...	3·64	3·48	142	139
Southern Division ...	7·75	6·98	298	192

Houses and Families.

14. The house is the unit on which the Census is based. A "House" was defined in 1911 and in 1921 as follows:—

(i) Any structure other than a dwelling house, such as tent, pavilion, temple, serai, etc., or a site, camping ground, ghat, etc., to which a separate number has been affixed.

(ii) The dwelling place of one or more families with their dependents and resident servants having an independent entrance, whether that entrance be from a road, gallery, balcony, corridor, courtyard, or otherwise.

The number of occupied houses in 1921 was 292,600 and in 1911 304,900, of these in 1921 10,500 were in towns and 282,100 in villages, and, in 1911, 12,100 in towns and 292,800 in villages.

The inset gives the variation in population and houses between 1911 and 1921. The number of persons per house was 4·7 in 1921 and just over 5 in all previous Censuses. The number of houses per square mile has fallen from 23 in 1911 to 22 in 1921.

Division.	Occupied houses in		Variation per cent. in population since 1911.
	Number.	Variation since 1911.	
Rewa State ...	292,651	− 4·0	− 7·5
Northern Division ...	130,271	− 3·6	− 4·2
Southern Division ...	162,380	− 4·4	− 9·9
Rewa Town ...	5,936	− 22·2	− 20·0

Summary.

15. In conclusion we may presume that but for the famine of 1900 and the Influenza of 1918, the two really disturbing influences of the decade, the population would have doubtless steadily increased, but it is not possible to calculate what the normal increase would have been.

There is clearly room for a much denser population and it is to be hoped that as the reforms begun in His Highness's minority commence to be felt, this defect in population will automatically right itself. Moreover, the undeveloped mineral wealth of the State is large as is also the minor forest produce, systematic care will certainly produce the desired result.

CHAPTER II.

The Population of Towns and Villages.

Towns and Villages.

16. This Chapter deals with Towns and Villages the statistics being collected in Tables III, IV and V and the Subsidiary Tables at the end of the Chapter

The definition of a "Town" is not easy but is solved in this instance by the adoption of the somewhat arbitrary definition given below, which was adopted first in 1901. Town includes :—

(1) Every Municipality.

(2) Every Cantonment of troops.

(3) All civil lines not included in a municipality

(4) All continuous collections of houses inhabited by 5,000 or more persons.

Towns.

17. Towns are generally speaking either overgrown villages, that is, large agricultural distributing centres or industrial or residential areas. In Rewa the only places with real urban characteristics are Rewa and Satna. Rewa Town is essentially of the residential type, its importance depending upon the fact that it is the Capital of the State, in time it may develop into the industrial type of city. Umaria with its coal mines is industrial. The State returns four towns and 5,434 villages, the urban population amounting to 38,800. The average population of the towns including Rewa is 9,700, in all India it is 13,800 and in Indian States generally, 9,800.

Of the population 28 per 1,000 reside in the towns. We may compare this with other States. The Natural Division figures give 54 for the Northern and 7 for the Southern Division. But if we deduct the population of the Rewa Town from the Northern or Low-lying Division, we get 20 per 1,000.

	Number per mille residing in towns.
Rewa ...	28
Baroda ...	207
Gwalior ...	97
Indore ...	207
C. I. Agency ..	92
Rajgarh ..	107

Classified by population we have one town, Rewa with over 20,000 inhabitants, two with over 5,000, Satna and Umaria and one Govindgarh with under 5,000. Most of the Urban population lives in Rewa which gives a home to 54 per cent. while 34 per cent. are found in Satna and Umaria.

Variation.

18. In Subsidiary Table III the variation in the urban population since 1891 is dealt with. The urban population rose 3 per cent. between 1891 and 1901 and 4 per cent between 1901 and 1911, but has fallen by 12 per cent. in the last decade, the final result being a decrease of 5 per cent. since 1891. It should be noted that in order to avoid the confusion which would be caused by a strict adherence to the definition of a town this comparison is made with towns as classed in previous enumerations. The fall in 1921 is due to the effects of Influenza, otherwise, there is little doubt that the urban population would have risen. Taking Rewa as a town of the residential class Satna as an agricultural distributing centre and Umaria as the industrial settlement, we find that in the last decade Rewa Town has lost about a quarter of its population and Umaria about a sixth, while Satna has increased by about a tenth. As all were similarly attacked by Influenza it may be considered that Satna, a trade centre on the railway, is growing in importance. The Umaria population varies with the amount of labour employed in the coal mines.

	Variation per cent.		
	1911-21	1901-11	1891-01
Rewa Town ...	−20·0	+6·7	+4·2
Satna ...	+11·2	−3·7	+10·3
Umaria ...	−13·3	+11·7	−5·5

Sex in Towns.

19. The number of females to males in towns is 888 per mille while for the whole State it is 1,007.

Density.

20. The urban density for the State is 9,072 per square mile. For Rewa town it is 21·0 per acre, for Satna 39·1, for Umaria 81·3 and for Govindgarh 3·2.

Religion in Towns.

21. In Table V and Subsidiary Table II the religious distribution of the population is given. Of the whole population 3 per cent. live in towns, but four religions exceed this percentage. Christians 66 per cent., Sikhs 59 per cent., Jains 43 per cent. and Musalmans 22 per cent.

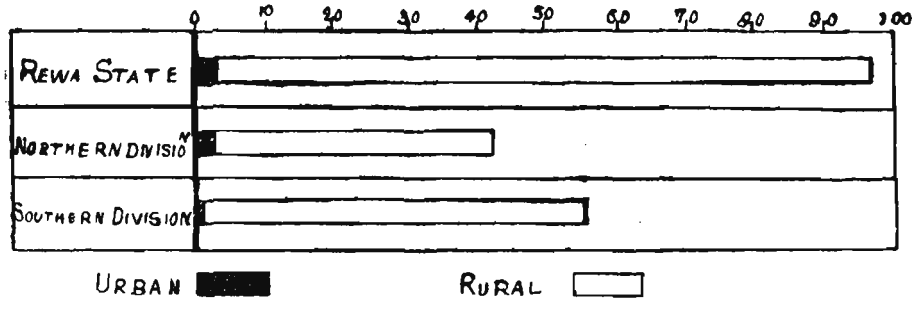

An examination of Table V for the State shows how these religions are concentrated. Of the individual religions Animists will be found practically in Umaria only, where they work in the colliery. Musalmans, mainly serving in State military and police while some are engaged in trade, in Rewa and Satna, Jains in Satna, which is an agricultural produce distributing town, and Sikhs in the police and army in Rewa.

Religion.	Total number.	Percentage.
	In the State	In Town.
Christian ...	179	66
Jain ...	669	43
Sikh ...	32	59
Musalman ...	31,259	22

Rural.

22. A village for Census purposes was the definite parent village and its hamlets. The State returns 5,464 villages. Of these 4,808 have population of under 500

DIAGRAM SHOWING THE TOTAL URBAN AND RURAL POPULATION OF REWA STATE IN THE DIFFERENT NATURAL DIVISIONS

and give a home to 60 per cent. of the rural population while 37 per cent. reside in villages of 500—2,000, and 3 per cent. in those of 2,000—5,000. The number of villages was, in 1911 5,404 and in 1901 5,565. The average population of a village is 249, being 238 in the Northern and 259 in the Southern Division. The Southern Division has more villages of 500—1,000 population than the Northern Division, the 5,464 villages containing 282,131 houses giving nearly 5 persons per house.

Summary.

23. In Rewa State, with its lack of communications and large undeveloped area, life in villages is much what it has been for generations, the type of house which is changing so rapidly in more developed areas in India, remaining practically the same as it has been for centuries. In the towns, of course, changes are taking place but even here it is mainly the well-to-do merchant class which is making these changes.

CHAPTER III.

Birthplace.

Introductory.

24. This Chapter contains the statistics of birthplace, the figures being given in Table XI and the Subsidiary Tables attached to the Chapter.

These statistics are here used to illustrate movement generally, that is, how the population moves, where it moves to or from, the volume of such movements and the reasons for them.

The return is not of course minutely accurate and cannot give direct answers to the questions given above, all it does is to give a clue as to whether a person is native born or an immigrant. Even thus the entry in column 12 is defective as stray passengers enumerated in trains, who were born elsewhere, will figure as immigrants while they perhaps remained half an hour at Satna Station, so too guests at a marriage or pilgrims; while a child, whose home is not in the State, but happens to be born there because his mother belongs to Rewa and returned to her father's house for her confinement, becomes a resident. Still, balancing these two sources of error, we get a sufficiently accurate idea of the trend of the population's movements.

The instructions to enumerators were to give the Tehsil of the person enumerated if he belonged to the State, if he came from any other part in India to write the district and province of the birth, and in the case of those born outside India to mention the country only, but as a rule only the State or province was recorded in the case of outsiders.

Migrational types.

25. Migration is usually divided into five types :—

Casual. (i) Movements between adjacent tracts and villages is ordinarily of this kind. It is chiefly due to the custom of seeking a wife in another village and females preponderate among the migrants. In the State this is much the commonest class.

Temporary. (ii) Caused by pilgrimages, fairs, such as that of Khajraho in Chhatarpur and temporary employment on works. In the former case females are apt to be in excess, but on works men preponderate.

Periodic. (iii) Due to migration for harvest work at stated seasons. Men ordinarily preponderate in this case. It is not a common form in Rewa.

Semi-permanent. (iv) This form is not common in the State. It is caused by men living in one place, where they earn their livelihood, while their families live elsewhere. In former days this was a common form in Maratha States, where the large following of Dakshani officials kept up a close touch with their homes South of the Narbada. Now, however, these families have to a very great extent become localised.

Permanent. (v) This is caused by overcrowding or attraction to or from other States.

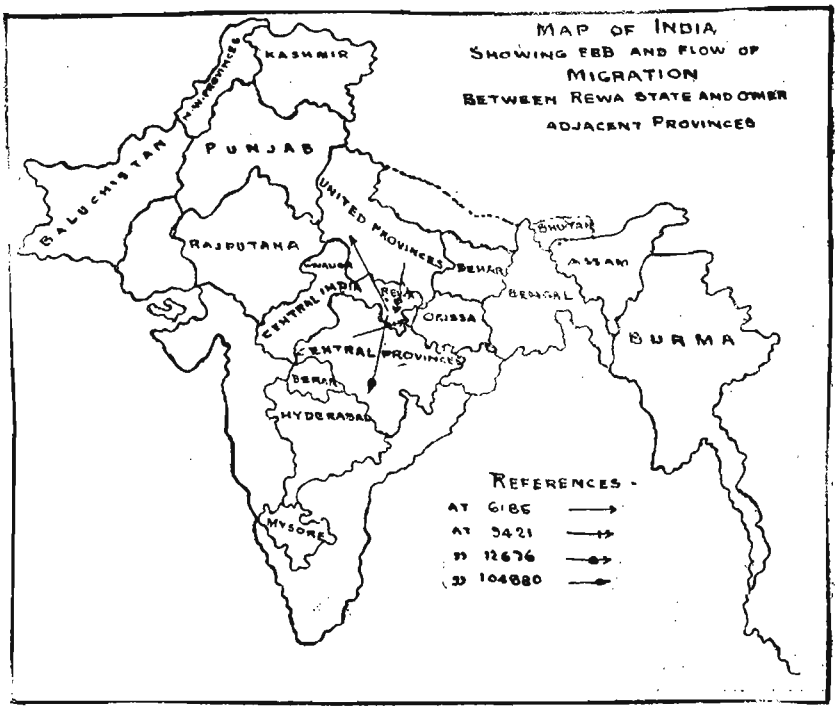

The Census does not distinguish these but an examination of the proportion of females to males gives a clue. Where marriage is the cause women preponderate, the same feature distinguishes pilgrimages. With Semi-permanent or Temporary migration, men are in excess and the further the domicile of the immigrants the fewer are the women who come. Women are in excess in all cases except the last.

Immigrants from.			Percentage of female immigrants to male.
Kind of area.	Males.	Females.	
Contiguous areas ...	9,660	16,637	172
Fairly near areas ...	2,501	4,020	161

Very remote areas ...	245	308	126
Outside India ...	65	22	34
Total ...	12,966	21,548	166

Immigration Statistics.

26. Of the total population of 1,401,524 those born within the State number 1,367,010 or 97·5 per cent., 34,514 or 2·5 per cent. were born outside it.

Of those born and enumerated within State limits 1,109,046 or 81·1 per cent.

were enumerated in the districts of their birth while 257,964 or 18·9 per cent. were born in one district of the State and enumerated in another.

Of those born outside the State but enumerated within it on March 18th 1921, 26,297 came from contiguous States or Provinces and 8,130 from non-contiguous tracts in India. Very few came from outside India, Afghanistan sending 56, Nepal 1 and the United Kingdom 30. The Tehsil figures show that Raghurajnagar which includes the town of Satna shows most from non-contiguous tracts and contiguous areas. The Sirmaur figure is curious, so few being local born, but it is due most probably to people not being aware of this new Tehsil, they were living in and returning Huzur or Raghurajnagar Tehsils, out of which Sirmaur was made.

Emigration Statistics.

27. The case of emigrants may be similarly dealt with. From Subsidiary Table II we get figures for persons enumerated outside Rewa State, while the marginal table shows how the movement took place. The contiguous tracts of the Central Provinces claim most, 104,880 or 71 per cent., while in 1911 it was 88,046, a rise of 19 per cent.

Proportion per mille of natural population enumerated in.	Born in.		
	State.	Northern Division.	Southern Division.

Non-contiguous areas ...	41	...	...
Outside India ...	...	...	...

Lieut.-Col. His Highness the Maharaja Sir Venkat Raman Singh, G. C. S. I., died in October 1918, and there was an interregnum of nearly 10 weeks till the Council was formed and the Regency Administration was declared. During this period, owing to scarcity and absence of action by the Durbar there was considerable

exodus from the Tehsils of Sohagpur, Deosar, Beohari and Bandhogarh in the South and from the Raghurajnagar and Huzur Tehsils in the North, in quest of labour in the neighbouring territories of the Central and the United Provinces. Famine operations started in February 1919 and migration was checked, but many people were permanently lost to the State. Some of them enlisted under Agents from Bilaspur and Jubbulpore and went to Assam.

The "Harwaha" or agricultural slavery system was then in force in the State and labour was difficult to get locally while the higher wages in the neighbouring British Territories attracted large numbers of the labouring classes to places like Katni, Allahabad, Jubbulpore and Nagpur as well as Assam where Rewa labour has formed a regular centre. Brahman beggars from Mauganj go to distant places seeking alms and many Brahmans go to Nagpur, Bombay, etc., and get employment in private service or in the Police.

Immediately following the floods of 1919-20 came the calamitous Famine, but this time the Council were prepared with their Road Programme, and where regular Famine works could not be started the gratuitous relief system so successfully worked in the immediately preceding Famine was adopted. These measures largely stopped emigration.

The curious case of emigration to Assam may be specially noted. It takes 16,000 persons and shows a rise of 10,000 since 1911. A colony of Rewa cultivators has formed in the tea gardens and the good treatment they receive as well as the high pay has resulted in an increased number seeking a livelihood there. Central India's contiguous tracts take 1,000, the United Provinces 6,000 and Bihar and Orissa 1,000 respectively.

Migration within the State.

28. Taking the Natural Divisions we get the figures in the margin. Unfortunately no comparison with 1911 is possible as Tehsil figures for readjustment are not to be had.

Natural Division.	Receives from other division.	
	1921	Variation.
Northern Division	34,779	+25,427
Southern Division	60,206	−25,427

Turning to the Tehsils the inset shows the movement. It will be seen that Gopadbanas, Sirmaur and Sohagpur Tehsils are very self contained getting scarcely any persons from outside. In all cases the chief movement takes place to contiguous areas. The sex ratio shews the nature of the movement as remarked above, where women are in excess, marriage is the cause.

Tehsil.	Population.	Born and enumerated in Tehsil.	Most emigrants go to.		Females to 1,000 males.
Bandhogarh ...	111,374	108,482	Sohagpur ...	2,188	1,340
Beohari ...	147,529	105,688	Gopadbanas ...	35,481	984

			Gopadbanas ...	51,799	958
Mauganj ...	111,655	104,616	Sirmaur ...	2,216	3,607
Raghurajnagar ...	130,388	109,453	Sirmaur ...	17,651	1,132
Sirmaur ...	9,628	8,599	...	...	...
Sohagpur ...	226,235	224,836	...	...	...
Teonthar ...	102,510	88,441	Sirmaur ...	12,758	826

Result.

29. The resultant of this movement to and from was a loss of 113,063 persons to the State in 1921 compared with a loss of 87,119 in 1911. The principal results are given in the inset.

Province or State.	Immigrants.		Emigrants.		Loss or Gain (−) (+) Total.

CHAPTER IV.

Religion.

This Chapter deals with religious beliefs as recorded in the Census. In Tables V, VI, XV and XVI religions are dealt with as well as in the Subsidiary Tables at the end of this Chapter. Age, Civil Condition, Education, etc., are also connected with beliefs, but will be dealt with in other Chapters.

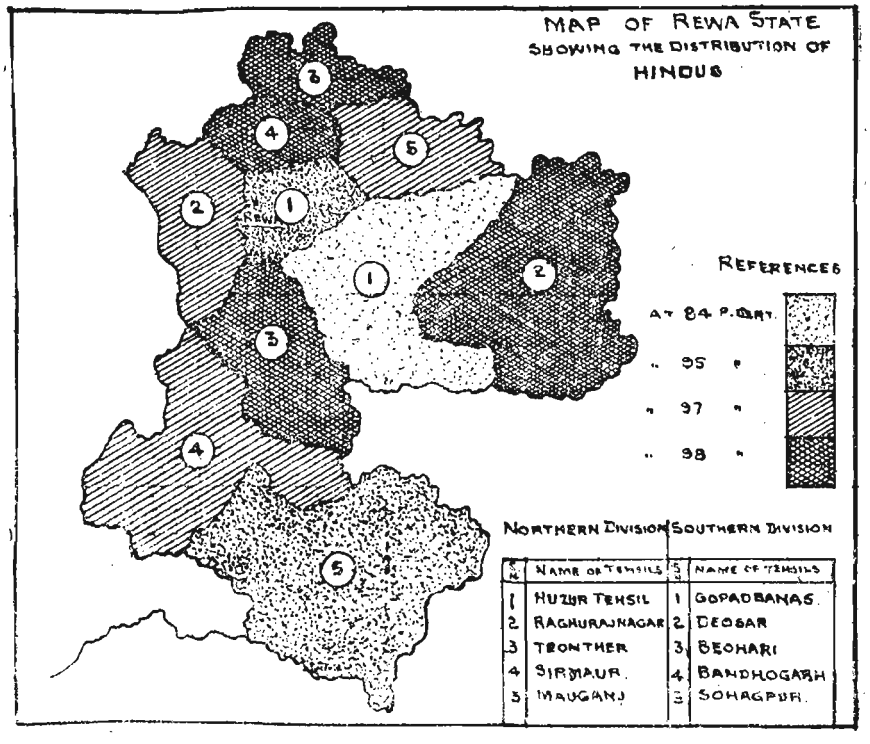

No attempt will be made here to discuss tenets of religious beliefs or the many cognate subjects which have so often been used to eke out the rather meagre information provided by the Census figures. Interesting as such discussions are, they require special machinery, if they are to be dealt with properly. The question of sects was not dealt with at all.

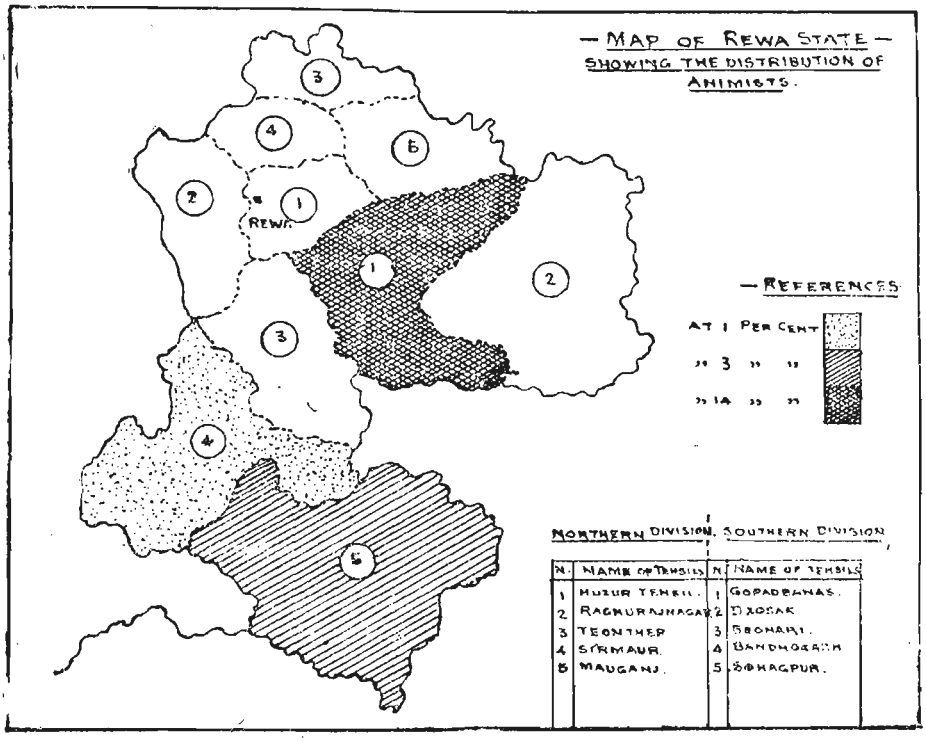

Principal Statistics.

30. The inset gives the distribution of the main religions. Hindus dominate the figures as is natural, claiming 95 per cent. of the population, 97 per cent. of the Northern and 93 per cent. of the Southern or Hilly tract, the last having 4 per cent. of Animists while the Northern Division has only 2 Animists per 10,000 of its population. Musalmans account for 2 per cent. forming 3 per cent. of the population of the Northern tract. The remaining religions are all present in less than 1 per cent.

Religion.	Number in 1921.	Proportion per mille.
Hindu ...	1,331,246	950
Jain ...	669	...
Musalman ...	31,259	22
Animist ...	38,134	27

Turning to the Tehsil figures. In Table VI we find that females predominate, but in Gopadbanas Animists are in large numbers. Generally speaking, however, Rewa is most markedly a Hindu State.

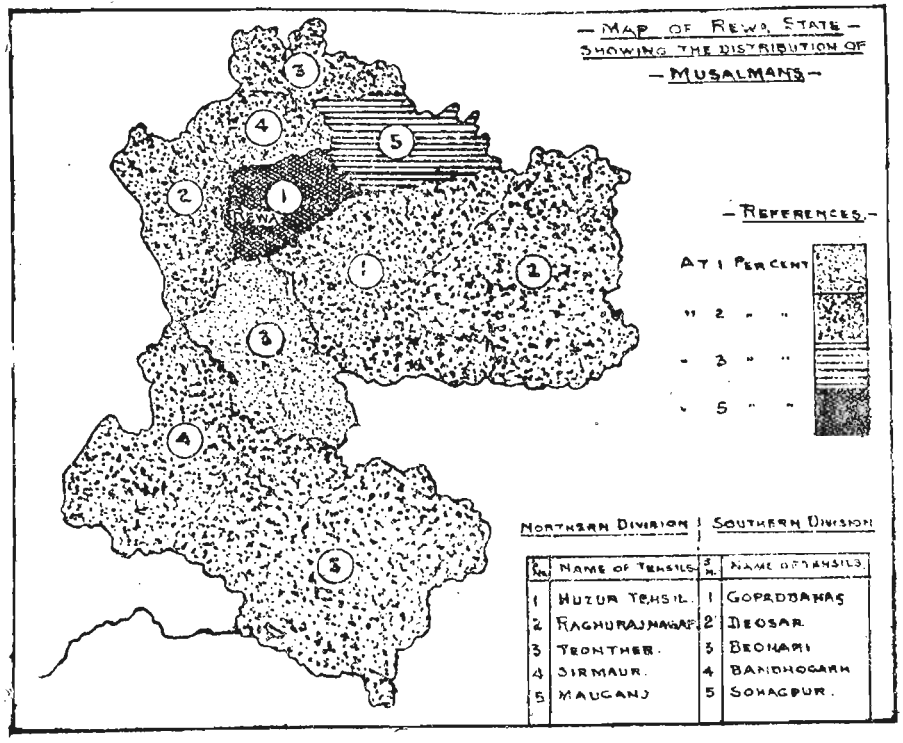

Hindus and Animists.

31. It is well nigh impossible to say where Hinduism ends and Animism begins and it would be better to omit the latter term altogether in future. The Animistic returns have always been unreliable owing to the idiosyncrasy of enumerators. The inset gives the return for Animists in 1921 and in 1911 by religion, by tribe and by dialect. In 1911 323,433 of these Animistic tribes returned themselves as Hindus, while in 1921 276,482 did. This was due to the different way the enumerator dealt with them. The tribal return is certainly the most accurate.

Animist.	1921.	1911.	Variation Increase (+) Decrease (−).
By religion ...	38,134	10	+38,124
By tribe ...	314,616	323,443	−8,827
Total ...	352,750	323,453	+29,297
By tribe ...	314,616	323,443	−8,827
By speech ...	219,369	178,022	+41,347

Islam.

32. The Musalmans form 2 per cent. of the population and so require no discussion.

The remaining religions are present in insignificant numbers.

Depressed Classes.

33. The inset gives figures for the depressed classes. Strictly speaking none such exist, but should the question of raising the depressed classes be taken up in the State, these are the classes which would have to be dealt with, roughly speaking.

Depressed Classes.

CHAPTER V.

Age.

The Tables dealt with here are Tables VII and XIV and the Subsidiary Tables at the end of the Chapter.

The return.

34. The figures used in the discussion will be the crude figures.

The age record is full of inaccuracies. Fortunately these inaccuracies are constant and hence do not affect consideration of the results at different Censuses.

The instructions were:—

Column 7 (age): enter the number of years each person will have completed on 18th March 1921. For infants less than one year old, enter the word "infant" (*bachha.*)

This appears simple enough but in practice it is not so easy as it seems.

The reasons for this are:—

(1) A preference for quinquennial and decennial periods.

(2) The effect of conventional figure groups used in common parlance, *e. g.*, "*do-tin*," "*bis-pachis*" and the like.

(3) The fact that an Indian always gives the current year, a man of 30 calling himself 31.

(4) Ignorance of age, which is met with in other countries also, but in India is general with all the uneducated and not uncommon with the educated.

(5) Deliberate mis-statements.

(6) To state the exact age is held by Hindus to shorten life.

(7) Dislike of enumerators to press for age in the case of females.

Deliberate mis-statements (5) and (6) are not very numerous. Unmarried girls, no longer young, may be returned as younger than they are, young wives overstate age, men and women of middle age understate, while the old overstate their age. But the cases are by no means numerous. The female age return is always less accurate than the male.

Mean age.

35. The mean age for the whole State is 23·4 for males and 24·1 for females. This mean age is nothing more than the average age of persons living at the Census and has no connection with the mean duration of life. It is not easy to draw any conclusions, however, from the mean age. If it is low it may be caused by a high birth-rate and low mortality in childhood or else high death-rate among adults, a high mean age being the complement to this. Influenza and similar epidemics which attack those in the prime of life lower the mean age.

It will be seen that the mean age has fallen considerably since 1911.

The Natural Divisions too, which show little difference in the male mean age, show a difference of nearly 2 years with females. The higher figures for females in all cases point to males preponderating among children or else to women living longer. The highest difference (0·89) is in 1911.

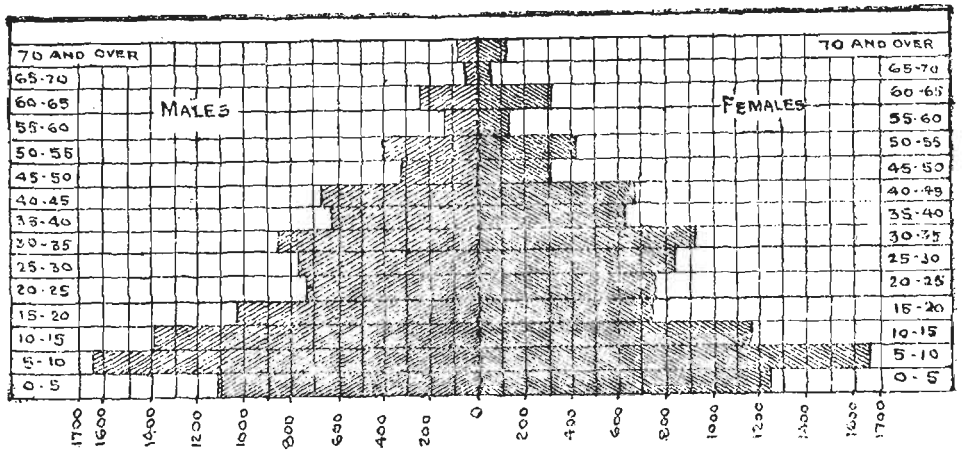

Year.	Males.	Females.
1901	29·32	30·05
1911	28·23	29·12
1921	23·44	24·17

Mean age by religion.

36. It will be seen that Musalmans and Animists have almost the same mean age, Hindus have a lower average. Animists, as usual, show the greatest fecundity and the lowest longevity.

Religion.	Mean age.	Proportion of children per 100 persons aged 15-40.	Proportion of persons over 60 per 100 aged 15-40.
Hindu ...	21·31	72	12
Musalman	22·54	69	12
Animist ...	21·99	83	10

DIAGRAM SHOWING THE DISTRIBUTION OF CRUDE AGE PERIODS OF 10000 PERSONS OF EACH SEX.

Age distribution.

37. The age distribution is illustrated in the diagram in the text. This gives crude age periods. Taking the male figures only we find in Subsidiary Table II that the numbers have fallen steadily since 1901. The period 0-5, that is, amongst those born between 1916 and 1921, at 5-10 or those born between 1911 and 1916 the 1921 figure is highest; at 20-25 it again falls, that is for those born between 1896 and 1901 while at 35-40 there is little difference.

Age period.	Number of males per 1,000.					
	1921.	Born in	1911.	Born in	1901.	Born in
0—5 ...	111	1916—1921	145	1906—1911	139	1896—1901
5—10 ...	163	1911—1916	151	1901—1906	105	1891—1896
10—15 ...	140	1906—1911	116	1896—1901	132	1886—1891
20—25 ...	72	1896—1901	80	1886—1891	82	1876—1881
35—40 ...	63	1881—1886	60	1871—1876	62	1861—1866
70 and over	9	...	8	...	...	...

The year 1900-1 was that of the great famine and possibly the low figure at 20-25 is accounted for by that, but it is not a very certain ground to dogmatise on.

The Natural Divisions show no marked difference, the Northern has generally a slightly higher figure.

Longevity.

38. Subsidiary Table V gives some clue to longevity by considering the proportions of those over 60 to those at 15-40, that is, in the prime of life, and also the proportion of children, which shows if a population is progressing or not, the number of old folk being a rough guide to longevity.

Taking the children under 10 it will be seen how low the proportion was in 1901, a certain indication of the great famine of 1899-1900. In 1911 and 1921 there is no marked variation. Passing on to persons over 60, it will be seen that the 1921 figure is very low, and points to the effects of Influenza in 1918.

The fall in the number of married female survivors at 15-40 is also very marked.

If we turn to Subsidiary Table V-A we get similar figures for the different religions. The preponderance of Hindus makes this figure similar to that for the whole State, while Animists show a rather higher prolificy. Musalmans have most persons over 60 and Animists, who live poorly and in unhealthy surroundings, least. There is little difference in the number of married women at 15-40.

Age and Caste.

39. The subject is dealt with in Subsidiary Table IV. Taking the State mean as a criterion we get the proportions in the margin. Selecting the important group of 15-40 we find that Brahmans, Rajputs and Banias show the greatest proportion of males. In the case of Banias it is no doubt due to merchants visiting Satna and other trade centres, and may also be due to the more prosperous condition and hence easier lives of these classes and their greater freedom from the Influenza epidemic. Musalmans and Animists show a figure below the

Caste.	Number per mille aged.	
	0—5	15—40
State mean ...	111	392
Bania ...	117	409
Brahman ...	111	429
Rajput ...	93	422
Musalman ...	108	398
Jungle tribes ...	127	356

normal. The Musalman population of Rewa is not well-to-do and the jungle tribes live in unhealthy surroundings. Rajput women have the lowest proportion of children. The jungle tribes show highest prolificy as usual.

Fecundity.

40. Turning once more to the Subsidiary Table V and V-A we can get some idea, though not a very accurate one, of fecundity by seeing the proportion of children under 10 to married women of 15-40.

This shows the steady rise since 1901, from 165 to 172 and 176.

For the different religions as given in Subsidiary Table V-A we find that Animists stand first (20), the Musalmans last (169).

Turning to Subsidiary Table IV-A where caste figures are given for the number of children under 1 to total married women of 15-40.

The jungle tribes show a very high proportion of children as do also Gujars and Bhats.

Brahman ...	199
Bania ...	191
Rajput ...	199
Musalman ...	196
Jungle tribes ...	312

Taking individual castes some very high figures are met with which can scarcely be correct, *e. g.*, Porwal (550), Sanadhya (648), Tonwar (396). All we deduce is that the lower classes seem to have most children.

CHAPTER VI.

Sex.

The Tables dealt with here are Tables I and VII and the Subsidiary Tables at the end of the Section.

In India generally females are in defect. The accuracy of the return of sex used formerly to be considerably impugned by European statisticians but careful investigation showed that the defect of females in India was due to social customs tending to an increase in male births and to greater mortality among female children, who are regarded as of less consequence, while the early marriage and parturition of females militates against longevity.

Sex ratio.

41. In Rewa this defect mentioned above does not occur.

The number of females is 1,007 to every 1,000 males, being highest (1,015) in the Northern and lowest (1,001) in the Southern Natural Division.

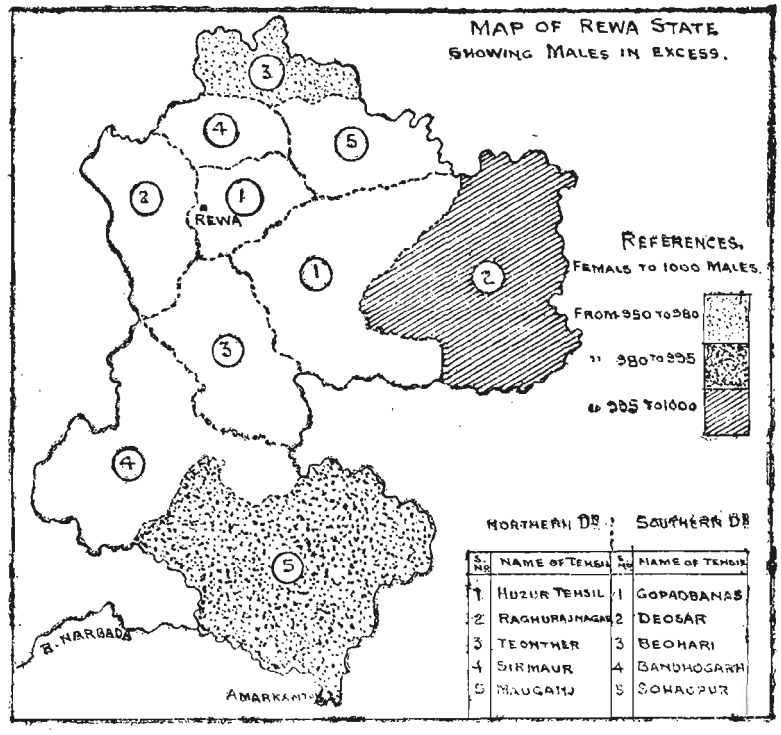

Thus we have a general excess of 7 females in every 1,000 males. Such excess usually points to a predominance of the so-called Animist or Jungle tribes.

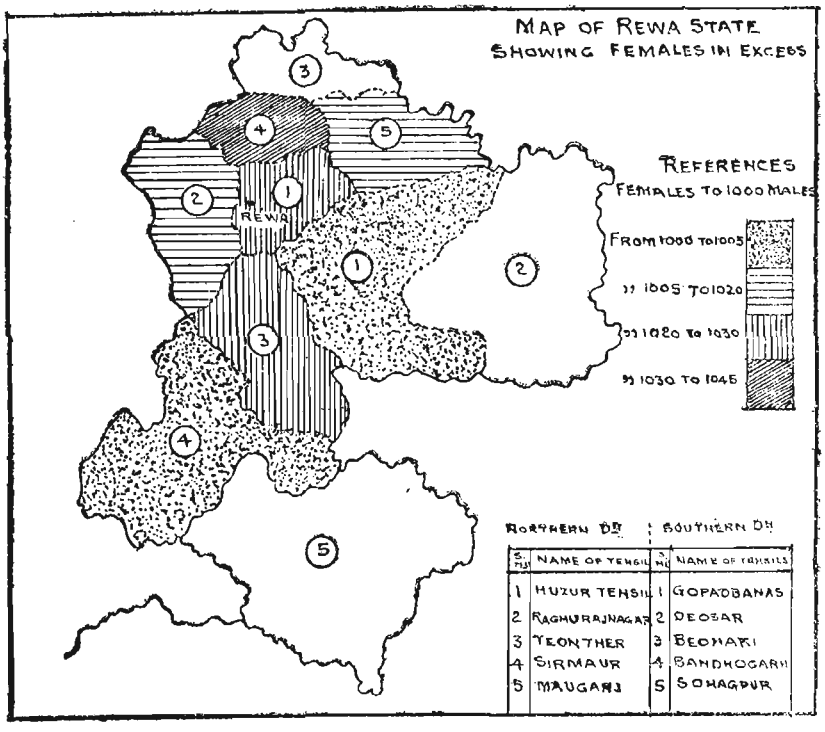

State.	Females per 1,000 males.
Rewa ...	1,007
Gwalior ...	884
Indore ...	917
Jhabua ...	981
Barwani ...	989
Alirajpur ...	954

The inset gives the ratio for other States in Central India and elsewhere. In the last three States Jungle tribes predominate.

In the Natural population the sex ratio falls to 993 females to 1,000 males which points to many males being absent from the State.

From the maps it will be seen that three Tehsils have an excess of males, *viz.*, Deosar, Teonther and Sohagpur, while seven show an excess of females: Huzur, Raghurajnagar, Sirmaur, Mauganj, Gopadbanas, Beohari and Bandhogarh, Sirmaur showing the highest ratio from 1,030-1,045 females to every 1,000 males. An examination of the religions in those Tehsils shows that only Gopadbanas and Sohagpur have a considerable population of Animists, but most members of Jungle tribes now return themselves as Hindus and though so recorded still have an excess of females as do many of the lower Hindu classes, such as Chamars.

For this reason in Rewa Hindus as a group show an excess of females 662,987 males to 668,259 females, which proves that large numbers of the Jungle tribes are included among Hindus. The inset shows where the excess of females is met with.

Tehsil.	Excess of females over males.	
	Hindu.	Animist.
Huzur Tehsil ...	1,829	...
Raghurajnagar,	1,310	...
Sirmaur ...	2,424	5
Mauganj ...	1,197	3
Deosar ...	54	...
Beohari ...	1,414	13
Bandhogarh ...	155	21

The Natural Division figures in Subsidiary Table I show that females are in greater excess in the Northern than in the Southern Division. If we examine the caste Table we find that this is due to an excess of females in certain castes among low clases of Hindus and among Jungle tribes.

The inset shows the castes which influence the ratio in each of the Tehsils. Of these Tehsils four lie in th Northern Division and three in the Southern Division, *viz.*, Gopadbanas, Beohar and Bandhogarh.

Caste.	Females to 1,000 males.						
	Huzur-Tehsil.	Raghu-rajnagar.	Sirmaur.	Mauganj.	Gopad-banas.	Beohari.	Bandho-garh.
Baiga	...	...	...	...	...	1,073	1,270
Bargunda	1,172	...	...	...	...	...	15,750
Chamar	1,126	1,128	1,013	1,026	1,043	1,619	...

Koli	1,023	...	...	1,212	1,129	1,522	...
Kotwal	1,133	1,010	1,256	...	1,034	1,336	...
Gond (Animist)	...	...	1,217	1,107	1,006	1,149	...
Kol (Animist)	...	...	...	...	1,114	...	1,083

Age Periods and Sex.

42. Subsidiary Table II gives s the sex ratios at different age periods. The ratio of females is higher than tha of males at age periods from 1-2 up to 5-10 and again from 20-25 to the nd. At 0-1 males are in excess except with Jains. Males are, however, always more delicate at birth than females and hence no doubt the fall after 0-1. The very few female figures at 15-20 may possibly be due to early parturition. But it is not safe to build too much on this. The general excess of females at most age periods is certainly unusual.

Sex and Religion.

43. When we turn to the religions we find that Hindus and Animists both show an excess of females. This is due, as has been noted above, to the prevalence of the Jungle tribes among Hindus. Compared with 1911 this ratio has fallen. If we turn to the age periods we find that except with Jains there is a defect of girls at 0-1. In other periods up to 0-5 the girls are in excess. At 10-15, 15-20 there is a defect of females except in the case of Christians where there is an enormous excess of females. The figures swing to and fro and are not worth going into in great detail. Since 1911 there has been but little variation in the figures except in the case of Christians at 4-5, 10-15 and 30-40.

Religion.	Females per 1,000 males.
All religions ...	1,007
Hindu ...	1,008
Animist ...	1,004
Jain ...	939
Musalman ..	973

Ratio of females to males.				
State.	Hindus.	Animist.	Jain.	Musalman.
India ...	954	996	931	909
Rewa ...	1,008	1,004	939	973
Gwalior ...	880	970	865	868
Indore ...	922	989	873	882
Barwani ...	988	992	770	1,005
Jhabua ...	953	1,001	903	814

There are also few material differences in the two Natural Divisions in Subsidiary Table III.

The great excess of females in Rewa is made clear if we compare the ratio in other places.

Caste and Sex.

44. Taking the different castes we get the group figures in the margin. Among Hindus, as given in the State Summary of Table XIII, 57 castes show an excess, amongst Jainsone, Porwal Banias, amongst Animists two, Gonds and Kols, but these tribes are returned mainly as Hindu. Musalmans nowhere show an excess.

Caste.	Females to 1,000 males.
Brahman ...	1,011
Bania ...	1,031
Rajput ...	978
Jungle tribes ...	1,034

It would appear as if locality influences this excess.

State and Caste.	Males.	Females.
Panna State—		
Chamar ...	11,750	12,105
Koli ...	1,894	1,968
Dhobi ...	1,138	1,182
Gadaria ...	1,404	1,457
Kahar ...	2,838	2,958
Ajaigarh State—		
Chamar ...	5,797	5,989

The inst gives figures for the adjoining Bundelkland area.

CHAPTER VII.

Civil Condition.

45. The statistics here considered are found in Tables VII and XIV and the Subsidiary Tables at the end of the Chapter.

This Chapter deals with figures only making no diversions into sociological questions connected with marriage.

The instructions to the enumerators were "Enter each person, whether infant or grown up, as married, unmarried, or widowed. Persons who have been divorced should be shown as widowed."

Marriage is well understood and many mistakes are unlikely though some child marriages may escape and a few prostitutes and kept women conceal their position, but as a rule they do not do this. The universality of marriage is what first strikes a European when he turns to the civil condition figures of the East, though it is obvious that the non-universality of marriage in Europe is in truth the abnormal condition. With Hindus the religious necessity of a son to perform one's obsequies makes marriage a sacrament and the prevalence of this custom has affected the view of the Musalman community in their midst. Generally speaking marriage is adult among the Jungle tribes and with Musalmans not carried away by the Hindu customs round them. Thus we find that of the whole population of Rewa 49 per cent. males and 50 per cent. females are married. More women are widowed than males owing to the prevalence of restrictions on re-marriage except amongst the lowest classes of Hindus.

Civil condition.	Per cent.	
	Males.	Females.
Unmarried ...	45	33
Married ...	49	50
Widowed ...	7	17

Civil condition and Religion.

46. We may now consider the different religions separately. The Hindu proportions are similar to those of the State population as a whole. The Animists show smaller ratios throughout. When we turn to the Musalmans we get higher ratios than even with Hindus. But the community is a small one while the Hindus as returned in this Census comprise, as we have seen, large numbers of the Jungle tribes. Jains who are opposed to the re-marriage of widows show much the highest figure in the case of widowed females and also the highest among males.

Religion.	Per cent.			
	Males.		Females.	
	Married.	Widowed.	Married.	Widowed.
Hindu ...	49	7	50	17
Animist ...	46	5	44	12
Musalman ...	50	7	51	16
Jain ...	46	9	40	25

Civil condition and age.

47. We may now consider the figures for marriage by age periods noting the effect of religion, caste and locality upon the figures. The inset gives figures of 0-5 and 5-10 for the main religions of those married at these periods in each sex. Animists have most males married at 0-5 and Jains most females. At 5-10 Hindus have most males married and Musalmans most females. The diagram below gives figures for those married at 0-10 by religions.

Religion.	Number per mille.			
	0—5		5—10	
	Males.	Females.	Males.	Females.
All Religions ...	24	34	88	170
Hindu ...	25	34	89	175
Animist ...	27	24	54	34
Musalman ...	19	42	79	178
Jain ...	26	67	23	38

DIAGRAM SHOWING THE NUMBER PER 1000 AGED 0-10 WHO ARE MARRIED (BY RELIGION)

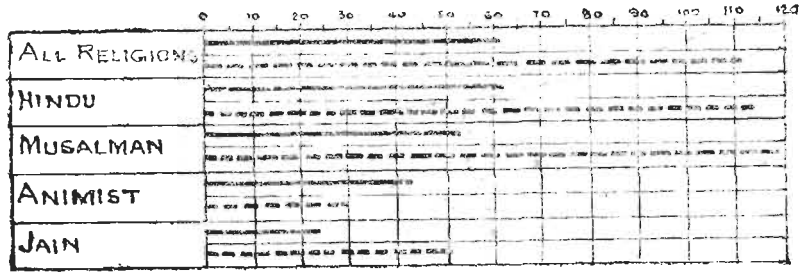

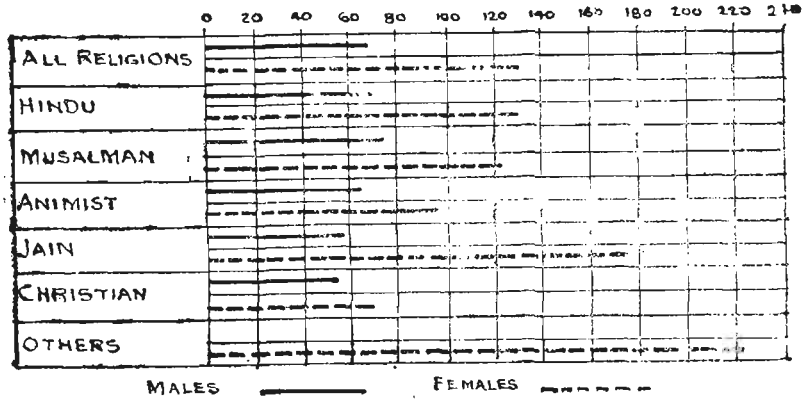

DIAGRAM SHOWING THE NUMBER PER 1000 AGED 15-40 WHO ARE WIDOWED
(BY RELIGION)

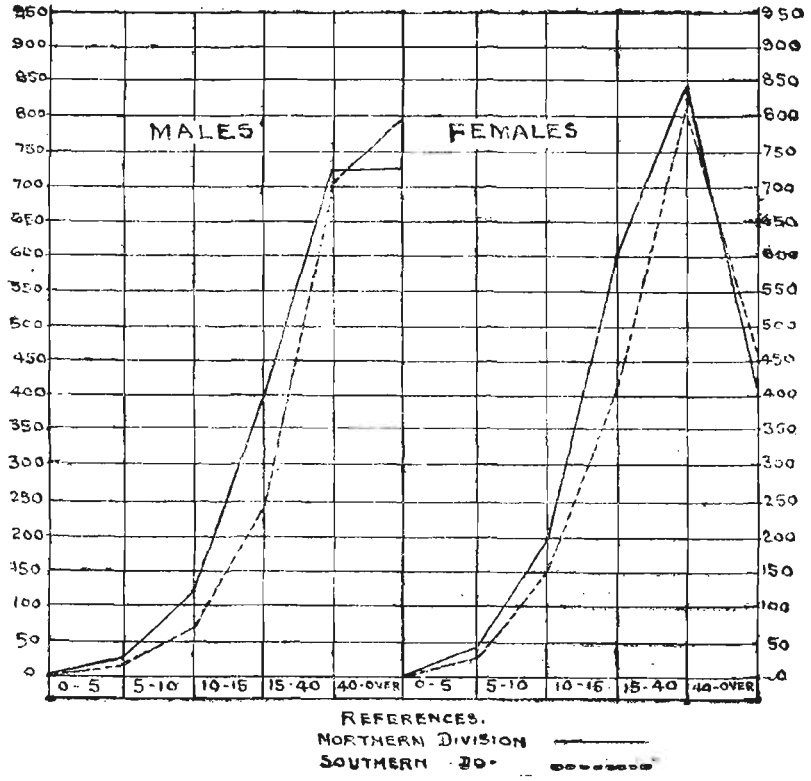

This inset gives the proper figures of widows in each religion at five age periods. There is a rapid rise at 15-20. At 0-5 there is little difference but at 5-10 Musalmans curiously enough come first and then Hindus, while Jains have no widows. At 10-15, however, Jains lead with a big majority though they fall at 15-20. At 40-60 Jains show most widows which is in agreement with their strict objection to re-marriage. Animists show fewest as they re-marry freely.

Religion.	Widows per mille.				
	0-5	5-10	10-15	15-20	40-60
All Religions ...	**4**	**11**	**27**	**50**	**472**
Hindu ...	4	10	26	51	477
Animist ...	3	4	19	36	362
Musalman ...	3	19	25	41	426
Jain ...	...	...	97	66	611

48. The Diagram shows the proportion of married by Natural Divisions for five age periods. **Civil condition and locality.**

DIAGRAM SHOWING THE PROPORTION OF THE MARRIED PER 1000 OF EACH AGE PERIOD BY NATURAL DIVISIONS.

The inset gives figures for the two Divisions for those married at certain ages and for widows. It shows that more males and females are married in the Northern Division at 0-5 and 10-15 and that there are more widows at 40 and over than in the Southern Division. There is therefore no very marked difference in the two Natural Divisions in this respect. Nor do the figures for religions vary to any marked extent.

Natural Division.	Married per 1,000.				Widows 40 and over.
	0—5		10—15		
	M.	F.	M.	F.	
Northern Division ...	27	40	383	604	571
Southern Division ...	22	30	236	414	533

Caste and civil condition.

49. In Subsidiary Table V certain castes are dealt with in this respect. First we may take the main Groups with reference to married children under 12 of each sex and widows 12-20. The Jungle tribes come first with males and Banias and the Jungle tribes with females at 0-5. At 5-12 Banias have by far most boys and girls married. Of girls who are widows at 12-20, Rajputs show most, Banias coming next. The individual caste figures do not seem to be very reliable. Among Banias, Agarwals marry their boys and girls young. Among Brahmans, Sarwarias marry their boys young and Sanadhyas their girls. Rathors stand first both as to boy and girl marriages at 0-5 while amongst Musalmans, the Shaikhs, mainly converted Hindu families, hold the first place for all sexes.

Caste.	No. per 1,000 married.				Widows 12—20
	0—5		5—12		
	M.	F.	M.	F.	
Brahman ...	19	40	99	197	71
Bania ...	21	45	173	307	78
Rajput ...	32	40	99	145	115
Jungle tribes ...	49	45	89	138	42
Musalman ...	23	37	86	174	47

As regards widows of 12-20 Mahesris among Banias surpass all other castes by a big margin; Sarwarias stand first among Brahmans, Ponwars among Rajputs and Shaikhs among Musalmans.

Age Group.	Proportion of female unmarried per mille of the sex.	
	1921	1911
10—15 ...	477	431
15—20 ...	152	113
20—40 ...	24	28

The inset gives unmarried females in 1911 and 1921 at three age periods.

This shows that fewer girls are married at the two earlier periods than was the case in 1911.

From Subsidiary Table II we can get an idea of the number of women of the productive age 15-40 who are condemned to celibacy by restrictions on re-marriage.

The inset taken from the Table shows how the Jains who object to re-marriage take the first place, while the Animists who readily allow re-marriage, come last. The State has not yet progressed sufficiently to have felt the influence of the modern tendencies which are opposing early marriage and urging the re-marriage of widows especially child widows.

Polygamy.

50. From Subsidiary Table IV we can form an idea of the number of wives to husbands. There are in all religions at 15-40, the reproductive age, 1,127 wives to 1,000 husbands. Animists and Jains alone show fewer wives than husbands, which is curious.

Religion.	Number per 1,000 women aged 15—40 who are widowed.	
	1921	1911
All religions ...	131	148
Hindu ...	131	152
Animist ...	96	...
Jain ...	174	136
Musalman ...	123	94

But as Emigration conceals the truth of these figures it is not easy to deduce anything from them.

CHAPTER VIII.

Language and Literacy.

51. The statistics will be found in Tables VIII, IX and X and the Subsidiary Tables at the end of this Chapter.

I. Language.

52. The instructions for recording language were :—

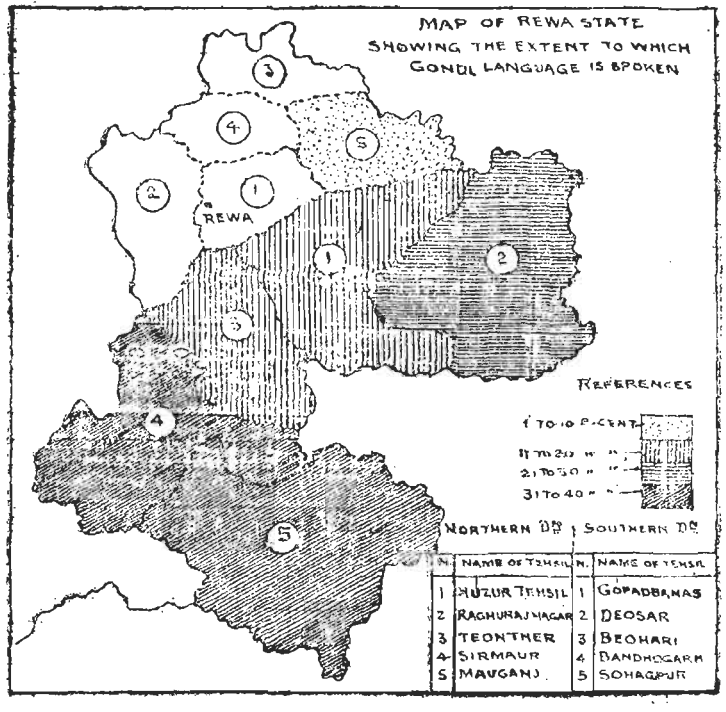

Column 13 (Language).—Enter here the language which each person ordinarily uses in his own home.

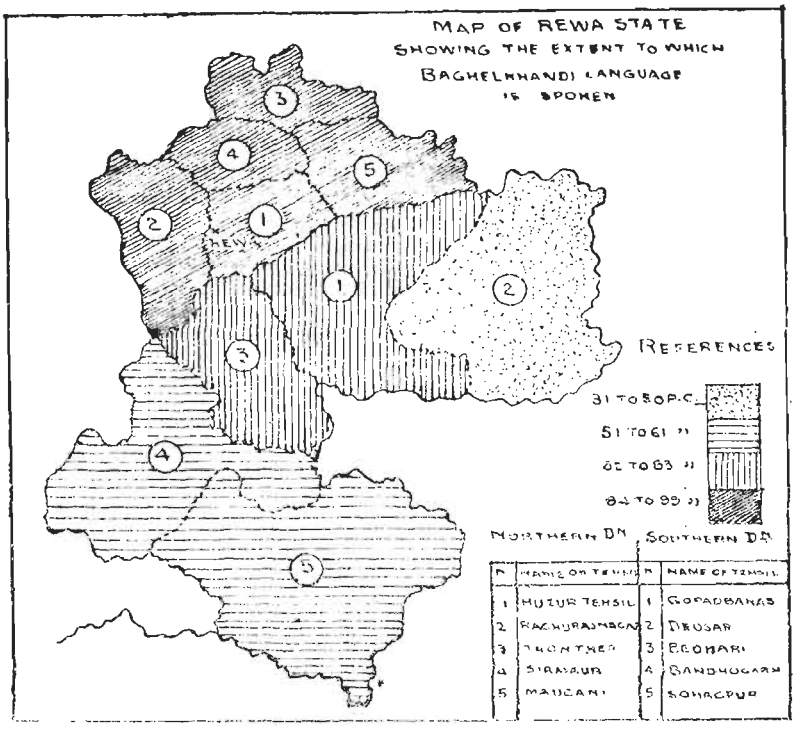

The record should be fairly accurate there being no subtle desire here to return any particular dialect as in some States.

Prevailing languages.	Number.	Per cent.
Baghelkhandi ...	1,114,296	79
Gondi ...	217,698	15
Awadhi ...	42,610	3
Bundelkhandi ...	16,768	1
Hindi ...	4,292	0·3

The most prevalent language is Baghelkhandi being spoken by 79 per cent. of the population and Gondi by 15 per cent. leaving only 6 per cent. for other languages.

The localities given in column 5 of Subsidiary Table I show how the various tongues are distributed. The two most important tongues are Baghelkhandi and Gondi. Their distribution is shown in the two attached maps. Baghelkhandi is found everywhere but more concentrated in the Northern Division (98 per cent.) while the reverse is true of Gondi. The absence of Malwi, Marwadi and even Urdu and Hindostani speakers in any great number is in striking contrast to what is met with in Western Central Indian States.

As regards Gondi, we may compare the number of the tribe with speakers of the language. There is always a tendency as a tribe becomes educated to reject its own dialect and proclaim itself as talking a more educated tongue, although it, in fact, still uses the more primitive form in conversation with its women folk.

Gondi.	Number.
Tribe ...	167,302
Speakers ...	217,698

II. LITERACY.

53. The record for literacy is contained in column 14. The instructions to the enumerators were:—

Column 14 (Literacy).—Enter in this column against each person who can both read and write any language, the names of all languages in which literate, if knowing only English enter the word "Literate." In the case of persons who cannot read and write any language write the word "Not."

The criterion is a simple one and is the same as that adopted in 1911. This criterion does not imply any high standard of education, but it suffices to show by the returns of each decade what progress has been made in dispelling the outer shades of ignorance. No record of the language of literates has been made on this occasion.

54. The actual number of literates returned is 23,755 of whom 1,319 were females: that is, of the total State population, only 19 per 1,000 of the population lay claim to even the low standard the Census requires; of those 36 per mille are males and 2 are females. If we take the age periods we find most literate males are returned at 20 and over, most females at 15-20. General.

Age period.	Literate per mille.	
	Males.	Females.
5—10 ...	8	1
10—15 ...	24	2
15—20 ...	38	4
20 and over ...	49	2

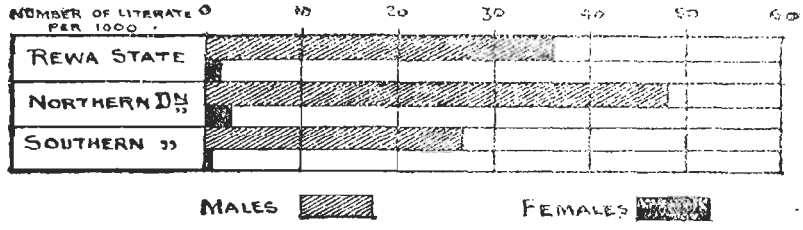

State.	Literate per mille.	
	Males.	Females.
Rewa ...	36	2
Gwalior ...	61	7
Indore ...	130	13
Orchha ...	32	1
Datia ...	86	2
Panna ...	28	1
Chhatarpur (including Nowgong Cantonment.)	44	4

The figures are low, if we compare the literates in other States

Local Distribution.

55. The Northern Division which includes Rewa and Satna Towns shows the highest figures for literates, 48 males per 1,000 while the Southern Division shows only 27. Rewa Town shows 313 males and 36 females. The attached maps and diagrams bring *this out. The Huzur Tehsil standing first.*

Diagram showing the number of persons per 1000 in each Natural Division who are literate

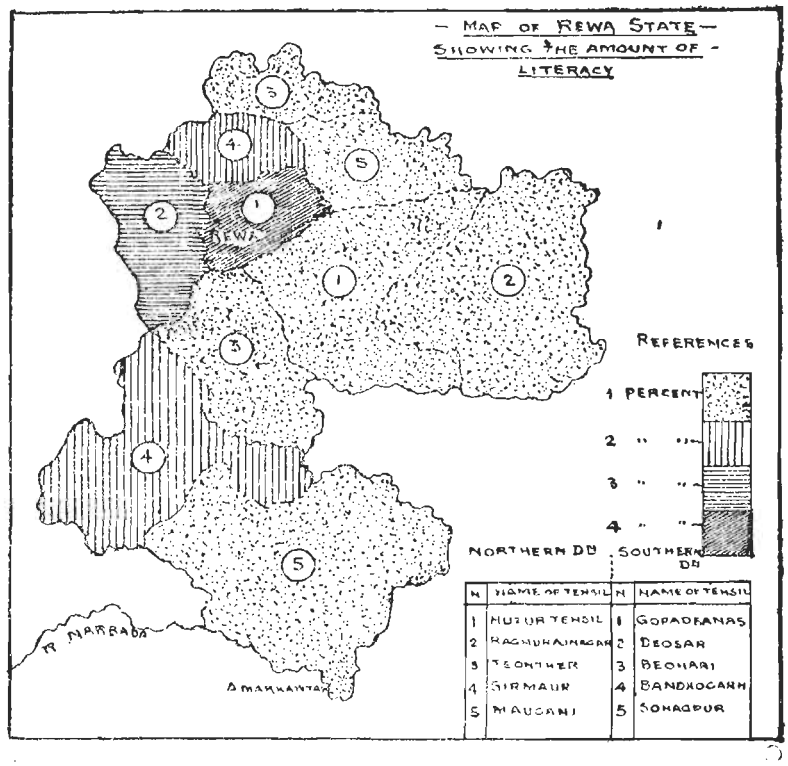

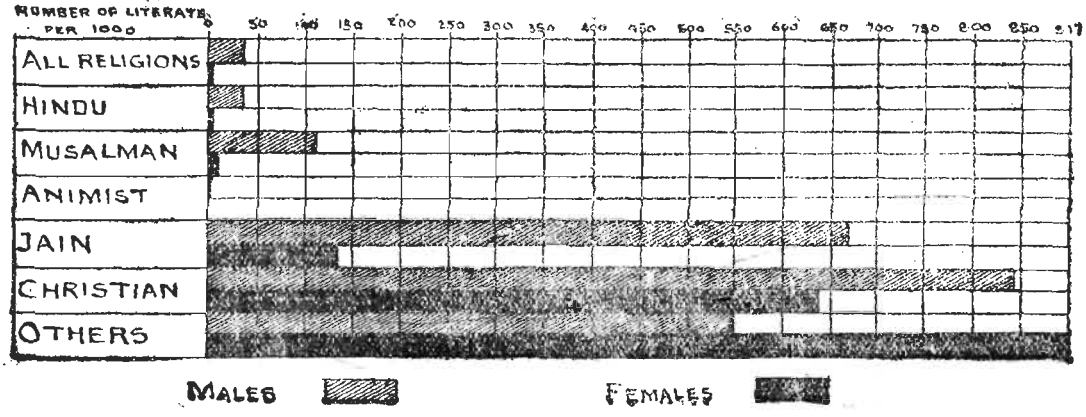

Diagram showing the number per 1000 of each main religion who are literate.

Literacy and Religion.

56. Turning to Subsidiary Tables I and III, we get the distribution by religion, locality and age periods. From the inset the general superiority of the Jain community is clearly shown. Musalmans coming next at a considerable interval. The Jain as a trader is obliged to learn to read and write and many of his women folk also do so as the return shows. Taking 15-20 as the age of serious education we find the same position held by the different religions. The Animist is very far behind.

Literate per mille.

Religion.	Literate all ages 5 and over.		Literate 15—20	
	Males.	Females.	Males.	Females.
All Religions ...	**36**	**2**	**38**	**4**
Hindu ...	35	2	37	3
Musalman ...	111	7	116	16
Jain ...	670	136	718	269
Animist ...	1	...	1	...

Turning to locality we find the influence of the Town of Rewa raises the Northern Division figures considerably. The figures for Hindus may be considered low, but as has been remarked before, the Hindu element in Rewa contains a large number of the Jungle tribes. However, even making such allowances literacy in the State is at a deplorably low ebb. From Subsidiary Table V we can get an idea of the progress made.

Literate per 1,000 males.

Natural Division.	Hindu.	Jain.	Musalman.
Northern Division ...	45	669	119
Southern Division ...	27	762	101
Rewa Town ...	335	419	214

Literate per mille.

Religion.	1921	1911
All Religions ...	**36**	**23**
Hindu ...	35	22
Jain ...	670	351
Musalman ...	111	58

From the inset the Hindus have progressed by 1 per cent. Jains by 32 per cent. and Musalmans by 6 per cent. which is at any rate encouraging.

List of Institutions.

57. The inset shows the comparative figures of Educational Institutions in the State. The State has made considerable progress during the last decade in this respect. At the last Census there were 52 Schools but now the State returns 122. The total number of pupils attending these Institutions has increased from 3,522 in 1911 to 7,581.

Institution.	1921.		1911.	
	Number.	Pupil.	Number.	Pupil.
High School ...	2	530	2	809
Primary School ...	110	6,656	43	2,451
Vedic School ...	5	201	2	41
Girls' School ...	5	194	5	221
Total ...	122	7,581	52	3,522

English Education.

58. *English education has not advanced.* For only 1 per mille is literate in English 2 males and no females. Jains show 2 males per cent. literate. Christians of course show a high average as it is their natural tongue and Indian Christians (16 per cent. males) invariably learn it, their females being also literate in it (13 per cent). In Subsidiary Table IV, we find the Northern Division, which contains Rewa and Satna Towns, stands first as regards English education with 32 males and 2 females per 10,000 knowing English. No detailed comparison is possible with 1911 but on that occasion 7 males per 10,000 were literate in English compared to 19 males per 10,000 in 1921.

Comparison with other States.

State.	Literate males per mille in English.
Rewa ...	2
Gwalior ...	6
Indore ...	17
Orchha ...	1
Datia ...	3
Panna ...	2
Chhatarpur ...	9

59. Rewa here, as in general literacy gives a low ratio which save Orchha's is the lowest.

Caste and Literacy.

60. In Subsidiary Table VI, we get the literacy returns for certain selected Castes. The inset gives the comparison with 1911. The comparison shows general progress. If we examine the individual castes we find Sanadhyas stand first (308 per mille), Jijhotias next (304) Shrigauds (222) and Sarwarias last (100). The Shrimali figures are not reliable. Among Banias, the Jains, who are traders, stand at the head of the list, Porwals having 573 literate males per 1,000, the only class with 50 per cent. of the Hindu section. Mahesris 267, Kharias 229. Of the Rajput classes Bundelas head the list with 409 while the Tonwars come last with only 7, Baghels showing 88. The Sayyads with 230 per mille are the most literate among Musalmans. English education is but little developed yet in the State.

Males literate per 1,000.		
Caste.	1921	1911
Brahman ...	101	64
Bania ...	176	89
Rajput ...	83	79

I. Language.

NOTE.—The figures in this table are for persons of 5 years of age and over only.

CHAPTER IX.

Infirmities.

61. These figures are dealt with in Tables XII—I, II and A, B and the Subsidiary Tables attached to this Chapter.

The enumerators' instructions were:—Column 16 (Infirmities.) If any person be blind of both eyes, or deaf and dumb or insane or suffering from corrosive leprosy enter the name of the infirmity in this column otherwise enter the word "not." Do not enter those blind of one eye only, or who are suffering from white leprosy only.

The words "From birth" after deaf and dumb and "Or have become deaf and dumb after birth" were not as in 1911 included in the instructions on this occasion.

Even these apparently simple instructions are by no means effective in keeping the return within its proper limits.

The return is always uncertain and hence special arrangements were made for Abstraction and Tabulation so as to correct errors as far as possible.

Infirmity.	1921	1911
Insane ...	125	73
Deaf-mute ...	350	326
Blind ...	1,221	747
Leper ...	66	50
Total ...	1,762	1,196

General Results.

62. The total number of afflicted in 1921 was 1,762 or 126 per 100,000 of the population. In 1911 it was 79 persons per 100,000. In no case are doubly afflicted recorded the number of afflicted and the sum of those affected by each infirmity being the same.

Insanity.

63. The total number recorded in 1921 is 125 of which 76 are males and 49 are females. This gives a ratio of 9 insane per 100,000, the sex ratio being 11 males and 7 females per 100,000. The comparative figures are given in the margin for 1911 and 1921. The figures have risen by 4 males and 4 females per 100,000. Errors of diagnosis are certainly common, those suffering from senile debility being often entered as insane. Turning to the local distribution we find from Table XII Part II and Subsidiary Table I that the Northern Division has most insane males, and the Sirmaur Tehsil. In 1911 Raghurajnagar had most. In 1921 the lowest figure is that of Raghurajnagar.

Year.	Actual number.		Per 100,000.	
	Males.	Females.	Males.	Females.
1921 ...	76	49	11	7
1911 ...	53	20	7	3

Turning to the age figures. In both 1911 and 1921 most insane are found at 15-20, 20-25 and 30-35 among males, among females at 10-15 and 15-20, except for the extraordinary rise at 60 and over showing that old women are being included.

But these age figures are clearly not such as to admit of any theorising, they are obviously too inaccurate.

Caste and Birthplace.

64. Turning to Table XII-A and B we get information by selected castes and by birthplace. Brahmans stand first with 23 insane (17 males and 6 females) all the other figures are insignificant.

The birthplace return shows that the insane are mostly local 119 out of 125 being born in Rewa, 32 in Huzur Tehsil and 19 in Deosar, other figures being very small.

Deaf-mutism.

65. The total number of deaf-mutes was 350 in 1921 (211 males and 139 females) and 326 in 1911. The ratio is 25 per 100,000, 30 males and 20 females per 100,000.

The inset gives comparative figures for 1921 and 1911. The figures have risen by 3 males and 4 females per 100,000. The return cannot be considered a very satisfactory one or worth lingering over.

Year.	Actual number.		Per 100,000.	
	Males.	Females.	Males.	Females.
1921 ...	211	139	30	20
1911 ...	207	119	27	16

As regards local distribution the Southern Division (202) and the Sohagpur, Gopadbanas and Deosar Tehsils return most of those thus afflicted.

Turning to the age returns the largest number of deaf-mutes is shown at 5-10, 39 persons (26 males and 13 females) giving a ratio of 1,232 males and 935 females afflicted per 10,000. The greatest number of males and females afflicted is returned at 10-15, 1,896 and 1,583 per 10,000 respectively.

Caste and Birthplace.

66. Among the castes most deaf-mutes are shown by Brahmans 47 in all (26 males and 21 females). Sarwaria Brahmans having 46 of these, Gonds and Kols coming next with 32 and 29 respectively.

Of the deaf-mutes 334 out of 350 were born in Rewa, 83 in Huzur Tehsil which includes Rewa Town, 46 in Beohari and 45 in Deosar.

Blindness.

67. Blindness should be the easiest infirmity to record but large numbers are certainly omitted and perhaps a few blind of one eye are admitted though this should not occur as a man blind of one eye is distinguished by a distinct term *Kana*. The figures have risen considerably since 1911; females as before are in excess of males.

Year.	Actual number.		Per 100,000.	
	Males.	Females.	Males.	Females.
1921 ...	549	672	79	95
1911 ...	368	379	49	50

The local distribution shows that most blind are returned from the Southern Division, 81 males and 106 females per 100,000 and from the Beohari Tehsil 109 males and 131 females per 100,000. The increase is possibly due to more careful recording.

Women are always greater sufferers from blindness owing to their living in dark ill-ventilated houses and working for many hours in the acid smoke of dung fires.

Turning to the age distribution the figures rise as we get to the older people, the figures rising rapidly from 50 onwards among males with an unaccountable fall at 55-60 and from 40 onwards among females.

Caste and Birthplace.

68. Blindness is most prevalent among Brahmans 188 being so returned (96 males and 92 females) the Sarwarias as before returning most. Gonds coming next with 137, then Kols with 110.

Of the 1,221 blind, 1,143 were born in Rewa, 273 in Huzur Tehsil, 108 in Deosar, 185 in Beohari, 175 in Sohagpur and 140 in Bandhogarh.

Leprosy.

69. The figures are certainly too low. This is a disease which is not readily acknowledged especially in the case of females, though the figures have risen since 1911 by 3 and 1 per 100,000 of males and females respectively.

Year.	Actual number.		Per 100,000.	
	Males.	Females.	Males.	Females.
1921 ...	47	19	7	3
1911 ...	32	18	4	2

The local distribution shows most in the Northern Division 8 males and 3 females per 100,000, and in the Tehsils of Sirmaur 16 males and 4 females, Bandhogarh 13 males and 4 females and Huzur Tehsil 11 males and 6 females. The age

distribution shows figures rising at later ages, up to 30-35 very few are returned while at 50-55 the figure is high. No doubt concealment is practised in early years, when also the disease may not have so strong a hold of the subject as later on.

Caste and Birthplace.

70. Brahmans again head the list with 10 lepers. Sarwarias claiming all of them, Kols show a similar number, all other returns being very low. The lepers, 66 in all, show 61 as born within the State, 27 in Huzur Tehsil.

Summary.

71. The general conclusion we come to from all these returns is that little value can be placed upon them for practical purposes and hence detailed discussion would be a waste of time. They are clearly not accurate.

State.	Number afflicted per 100,000.

CHAPTER X.

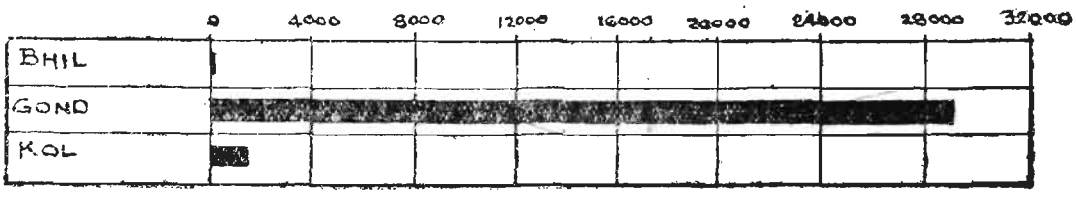

Caste.

72. The castes are dealt with in Table XIII and the Subsidiary Tables to this Chapter. The record of castes is never very accurate probably. Certainly the figures vary in a curious way and how far it is worth collecting them at the Census is open to question. In 1911 the attempt to classify castes by precedence certainly raised ill-feeling. On this occasion, however, nothing beyond mere consideration of the figures will be attempted. Caste, in relation to Literacy (Table IX), Infirmities (Table XII-A), Marriage and Age (Table XIV) and Occupation (Table XXI), is dealt with in Chapters concerned with the particular subject combined with caste.

To secure all possible accuracy a glossary of local castes was issued which greatly assisted the enumerator, but even so, many people give an occupation for a caste or sometimes even a sect or religion. Obvious mistakes were corrected in Abstraction and Tabulation. Intentional errors, with a view to raise the status of a community were not detected anywhere. If we examine the caste figures we find that the Hindu (including Jain) castes number 1,331,915 or 95 per cent. of the population. Among these the Sarwaria Brahmans (225,000), Gonds (138,000) and Kols (138,000), exceed 100,000. Then Ahirs (63,000), Chamars (81,000) and Kurmis (89,000) exceed 60,000 each, while six exceed 20,000. Of the Animist classes Gonds (29,000) alone exceed 20,000.

Main caste Group.	Total number.	Percentage of total population.
Brahman ...	231,745	17
Bania ...	37,630	3
Rajput ...	86,257	6
Jungle tribes ...	406,062	29
Musalman ...	31,259	2

We may separate out the forest tribes and low castes whether recorded as Hindu or Animist from among the rest as they form a very important element in the State.

Forest tribes.	Total number.	Percentage of total population.
Bagri ...	106	...
Baiga ...	26,265	2
Bhil ...	146	...
Gond ...	167,302	12
Kol ...	139,760	10
Kotwal ...	11,320	1
Majhi ...	1,763	...

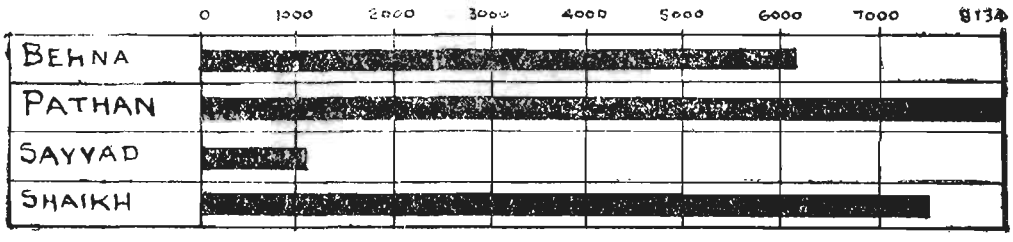

The most important of the forest tribes are Gonds and Kols, Gonds have risen since 1911 while Kols have decreased. The Kurmis and Chamars head the list of the low classes. Chamars have decreased since 1911 but Kurmis have risen considerably. It is difficult to account for these changes and often the idiosyncrasy of enumerators is responsible.

Low caste Hindu.	Total number.	Percentage of total population.
Balai ...	193	...
Bansphor ...	6,490	...
Bari ...	4,822	...
Chamar ...	81,297	6
Dhobi ...	7,193	1
Dom ... / Domar ...	2,796	...
Kanjar ...	4	...
Khangar ...	228	...
Khatik ...	1,552	...
Koli ...	17,864	1
Kurmi ...	89,379	6
Mahar ...	7,336	1
Mehtar ...	1,417	...
Mochi ...	181	...
Nai ...	19,789	1
Pasi ...	824	...

Musalmans.

73. The Divisions, Pathan, Sayyad, Shaikh, etc., are classes, racial, occupational or social, not castes. The total number is 31,000 of which most are Pathans (8,000) and Shaikhs (7,000), the Behnas (6,000), occupational group coming next.

Musalman Group.	Total number.	Percentage of total population.
Behna ...	6,122	...
Bohra ...	13	...
Moghal ...	195	...
Pathan ...	8,134	1
Sayyad ...	1,163	...
Shaikh ...	7,528	1

Local Distribution of Hindu and Jain Caste Groups.

74. The distribution of Hindu and Jain castes by locality is given in the inset. Most Brahmans live in the Northern Division which contains Rewa and Satna Towns, but most Banias in the Southern Division. Sarwarias predominate in both localities and Kanaujias are met with mainly in the Northern Division as also Sanadhyas. Kesar Banias are the most numerous in both Divisions.

Caste Group.	Northern Division.	Southern Division.
Brahman ...	160,810	70,935
Bania ...	15,903	21,727
Rajput ...	37,086	49,171
Jungle tribes ...	92,054	406,062

Passing on to the Rajputs. Of the Baghels, to which clan the ruling family belongs, twice as many are met with in the Northern Division, while of the Tehsils Sirmaur (4,182), Gopadbanas (3,429) and Raghurajnagar (3,200) give home to

most. Chauhans, the next most numerous clan, are met with almost wholly in the Gopadbanas Tehsil (4,666) of the Southern Division. Parihars, like the Baghels, an Agni-kula clan, are found in the Sirmaur and Huzur Tehsils of the Northern Division; they represent the stock from which the Raja of Nagod has sprung. Rathors live almost entirely in Bandhogarh. It is interesting to note that in spite of the proximity of Bundelkhand to Baghelkhand the distinction between the two tracts is clearly felt, as is shown by only 190 Bundelas being returned, practically all being in Huzur Tehsil.

Local distribution of the Jungle tribes.

75. The Jungle tribes are met with mainly in the Southern Division which is that covered by the principal forests in the State. Gonds have increased since 1911 from 153,000 to 167,000, Kewats are almost the same in number, Kols have fallen from 169,700 to 139,700, Kolis being about the same in number. Gonds occur mostly in Sohagpur (74,000), Bandhogarh (29,000) and Deosar (21,000), Kols in Gopadbanas (25,000) Sohagpur (16,000) and Beohari (15,000).

Caste Group.	Northern Division.	Southern Division.
Bagri ...	98	8
Baiga ...	1,209	25,056
Bargunda ...	208	15,526
Bhil (Hindu and Animist) ...	6	140
Gond (Hindu and Animist) ...	2,157	165,145
Kewat ...	2,679	23,123
Kol (Hindu and Animist) ...	65,600	74,160
Koli ...	11,130	6,734
Kotwal ...	8,494	2,826
Majhi ...	473	1,290

Variation in Castes.

76. In Subsidiary Table II the variation in chief castes is dealt with; figures for 1901 are not available. Most of these Groups show a decrease, but cultivators a considerable rise.

Group.	1921	1911	Variation per cent. 1911-1921.
Brahman ...	231,745	250,974	—8
Bania ...	37,630	39,797	—5
Rajput ...	86,257	127,800	—32
Cultivator ...	143,181	104,490	+37
Artizan ...	62,298	62,565	—1
Jungle tribes ...	357,621	405,379	—12
Pathan ...	8,134	9,768	—17
Shaikh ...	7,528	14,089	—47

Turning to the individual castes we find that among Brahmans the two important castes, Kanaujias and Sarwarias, have both decreased, Kanaujias by 60 per cent. Amongst Rajputs, Baghels, the caste of the ruling house, have fallen by 4 per cent. Chauhans have risen by 73 per cent. Amongst the Banias, Kesars have fallen by 68 per cent. and all have decreased somewhat. Of cultivating classes Kachhis show a rise of 6 per cent., Kurmis show a rise of 84 per cent. Of the artizan classes Kumhars, Luhars and Darzis show a fall while Sunars and Sutars have increased. Gonds show a rise of 9 per cent. among Jungle tribes, Baigas a rise of 13 per cent. Pathans and Shaikhs both shew a fall, the latter of as much as 47 per cent.

Rewa State is not yet sufficiently advanced for its people to show any signs of the disintegrating tendencies so noticeable in British India and more advanced States, especially in Towns where education and constant travel naturally weaken the exclusive customs still adhered to elsewhere. But the change will come and ten years hence it may be sufficiently noticeable for record. Similarly the striving after nationality is not yet conspicuous.

CHAPTER XI.

Occupation.

General.

77. The statistics for occupation are given in Tables XVII to XXII.

Table XVII gives a general statement of the number of people supported by each occupation according to the classification adopted, with those dependent on them. Table XVIII gives subsidiary occupations followed by those whose principal occupation is agriculture. Table XIX shews cases of dual occupations. Table XX gives occupation by religion. Table XXI gives occupation by selected Castes, Tribes or Races. Table XXII deals with Industries.

Proportional figures are given in the Subsidiary Tables at the end of the Chapter.

The enumerators' instructions were:—column 9.—(Principal occupation of actual workers). Enter the principal means of livelihood of all persons who actually do work or carry on business, whether personally or by means of servants, or who live on their Estate, Capital, etc., such as *house rent, pension, etc.* Enter the exact occupation and avoid vague terms such as, "service" or "writing" or "labour" write particulars, such as, "private servant Bania's cook," "clerk, Army Department." For example in the case of labour, say whether in the fields, or in a coal mine, or jute factory or cotton mill, or lac factory or earth-work, etc.. in the case of agriculture distinguish between persons who receive rent and those who pay rent (if any further sub-division of agriculturists is contemplated in any State, provision will have to be made for it in this rule). If a person makes the articles and also sells he should be entered as "maker and seller of them." Women and children who work at any occupation which helps to augment the family income must be entered in column 9 under that occupation and for them enter the word "not" in column 11. If any person maintains himself by means of *Ata Dal* shop and also by lending money enter *Ata Dal* shop in column 9 and in column 10 "lending money". In column 9 enter the word "none" for dependents.

Column 10.—(Subsidiary occupation of actual workers). Enter here any occupation which actual workers pursue at any time of the year in addition to their principal occupation. Thus if a person lives principally by his earnings as a boatman, but partly also by fishing, the word "boatman" will be entered in column 9 and fisherman in column 10. If an actual worker has no additional occupation, enter in column 10 the word "none". For dependents, enter the word "none" in this column

Column 11.—(Means of subsistence of dependents). For children and women and old or infirm persons who do not work, either personally or by means of servants, enter the principal occupation of the person who supports them. For actual workers, enter the word "none" in this column.

These instructions were supplemented by those in the Manual. In spite of all the care taken errors are inevitable in dealing with so complicated a subject, as the enumerators, especially in this State, are not of a particularly high standard in education, while most of the people are wholly ignorant. Vague terms like *Dukandar* (Shopkeeper) *Mazdur* (Cooly) occur, while it is most difficult often to decide when numbers of a household who assist the head of the house are actual workers, or whether a trader or a maker who also sells should be returned as trader or seller, and so on.

Then also, being the return of a single day, the 18th March 1921, people may be engaged in cutting crops whose real occupation is not daily labour of this class. In tabulation also errors may arise, though the fact that Abstraction, Tabulation and Compilation are all done in one office and have been since 1901 under the same superintendence on each occasion, at least minimises errors, by stereotyping the mistakes.

The Chapter then merely gives us a picture of the general occupational distribution of the population of the State and too much stress must not be laid on detail.

Changes in classification.

78. The scheme of classification adopted in 1901 (similar to that of 1891) was very complicated.

Sir J. A. Baine's Scheme, 1891 and 1901.			Bertillon Scheme adopted and revised, 1911-1921.		
Symbol.	Class.	Sub-class.	Symbol.	Class.	Sub-class.
A	Government ...	I. Administration II. Defence. III. Foreign and Feudatory service.	A	Production of raw materials.	I. Exploitation of Animals and Vegetation. II. Extraction of minerals.

Persons living on their income. X. Domestic service. XI. Insufficiently described occupations. XII. Unproductive.
E	Commerce, Transport and storage.	XVIII. Commerce. XIX. Transport and storage.			
F	Professions ...	XX. Learned and artistic professions. XXI. Sports and amusements			
G	Indefinite occupations and means of subsistence independent of occupation.	XXII. General labour. XXIII. Indefinite or disreputable occupations. XXIV. Independent of work.			

In 1911 this was greatly modified as shown in the statement. In the present Census a few changes were made. While the 4 classes and 12 sub-classes of 1911 hold good, there are now 56 orders instead of 55. Two new orders appear, Transport by Air (19) and Air Force (43), the old orders 18 and 19 being combined to give a new order "Other miscellaneous and undefined Industries" while orders 40 and 41 are united to give 40 "Trade of other sorts." The new order is 56 under sub-class "Unproductive" with the title "Other unclassified non-productive Industries." Groups have expanded from 169 to 191. Classification has also been improved: Editors and Journalists formerly classed under "Industries of Luxury" are now in a new order 50 "Letters and Arts and Sciences." in Group 177.

The principles of classification adopted are briefly these:—

(1) A maker and seller is classed as a *maker*.

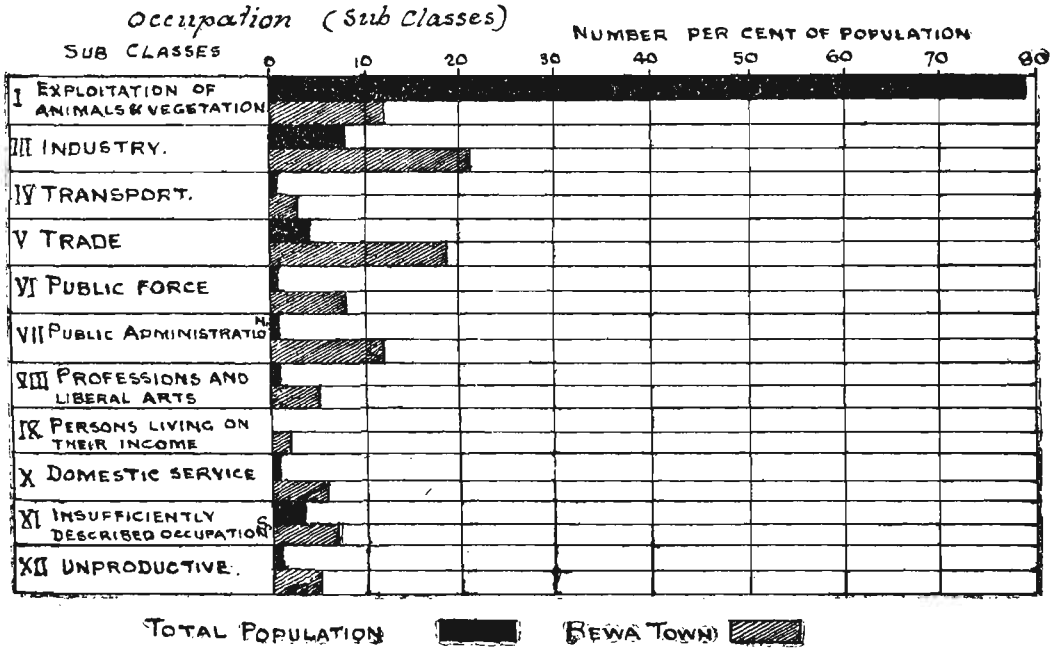

(2) Industrial and trading occupations are separated in regard to the materials worked in and the purpose served. For example, shoe makers come in order 13 Group 78, makers of saddlery in order 7, Group 40.

(3) Persons employed in Railway workshops are shown under Transport by Rail in order 22 as the company run their own shops in India.

(4) A man's profession is shown *e. g.* Engineer and Sub-divided *e. g.* Marine Engineer.

79. The Diagram below shows the general trend of occupations according to the 12 Sub-classes. **Analysis.**

Diagram showing the general distribution of the population by occupation (Sub Classes)

The exploitation of animals and vegetation naturally preponderates in so agricultural a place as Rewa, and absorbs 79 per cent. of the population; Industry, which comes next, occupies only 8 per cent.; Trade coming third, with 4 per cent., the insufficiently described occupations absorbing 4 per cent. In 1911 the insufficiently described occupations took up 6 per cent., so 1921 shows a marked improvement in this respect. The inset gives the comparative figures. It will be seen that "Public Force" has been much reduced. This is due to the reduction in the Military Forces of the State made during the minority. On the other hand the Civil Administration has been strengthened (1 to 5 per mille). Domestic service and Unspecified have both fallen.

Sub-class.		Number per mille.	
		1921	1911
I	Agriculture, etc.	793	756
II	Minerals	2	1
III	Industry	76	78
IV	Transport	5	4
V	Trade	43	44
VI	Public Force	5	13
VII	Public Administration ...	5	1
VIII	Professions	8	7
IX	Independent	0·4	0·1
X	Domestic service	13	20
XI	Unspecified	37	64
XII	Unproductive	13	12

Distribution by Natural Divisions

80. If we turn to the Natural Divisions we find that the Southern Division is more agricultural than the Northern, which is more of an Industrial and Trade centre. The Natural Divisions were not the same in 1911 and hence no comparison is possible.

Sub-class.	Number per mille.	
	Northern Division.	Southern Division.
Agriculture ...	752	788
Industry ...	91	65
Trade ...	54	34
Professions ...	8	8
Domestic service ...	16	10

Workers and Dependents.

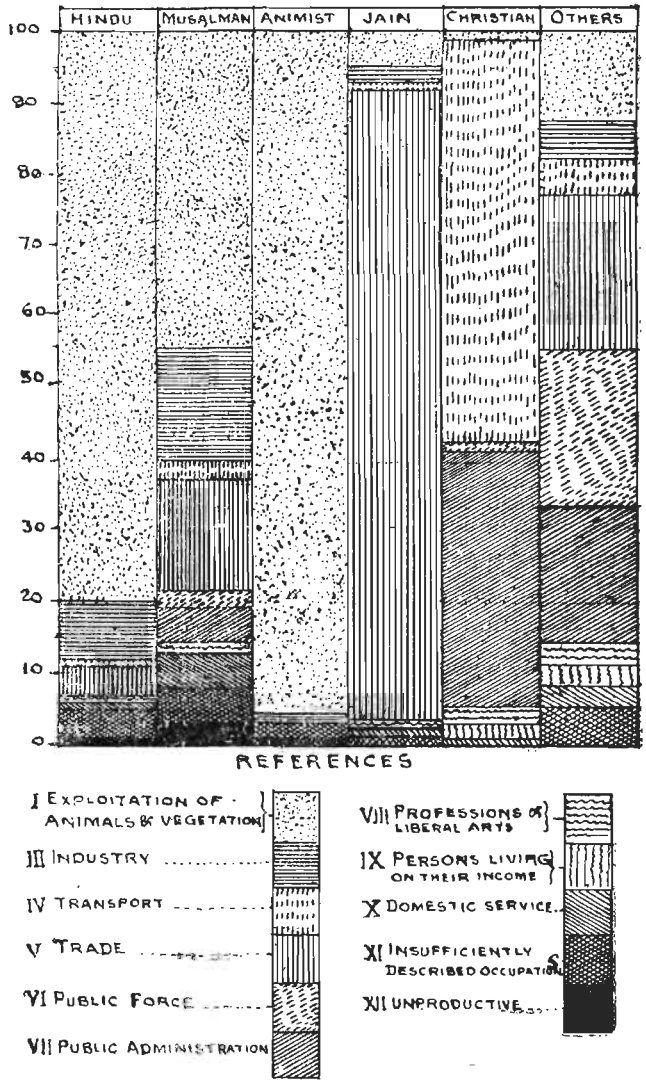

81. In Subsidiary Table III we get a ratio of workers and dependents. The Table is interesting as showing how little conditions in Rewa Town differ from those in the State, finally showing that, as yet, its Urban character is not very developed. Indeed turning to Industry it shows a lower figure than either Natural Division, though it holds its own in Trade. The fact is that Umaria, owing to its coal mines, etc., is more of an Industrial centre than the Capital. It is curious that the Southern Division should show so high a figure for professions.

Natural Division.	Workers per 100 supported by				
	Agriculture.	Industry.	Trade.	Professions.	Other occupations.
Rewa State ...	53	49	54	55	60
Northern Division.	55	49	56	51	65
Southern Division.	51	49	48	58	55
Rewa Town ...	57	45	58	52	58

Occupation and Religion.

82. In Subsidiary Table IX and the Diagram below we can get an idea of how occupations follow religion. It shows both distribution by religion of 10,000 persons in each occupation and the occupational distribution of 10,000 of each religion. Among Hindus 80 per cent. are supported by pasture and agriculture.

Diagram showing the main distribution by occupation (Sub Classes) for Religion.

Caste and Occupation.

83. The interesting point for examination here is to see how far castes still adhere to their traditional occupations. In Subsidiary Table VIII of the Caste, Chapter XI, these figures will be found and in the inset.

This inset shows the variation since 1911. Mochis show a large rise intimating that more are following their proper trade, but Rajput classes show a heavy fall, due to the disbanding of the former very large State forces. The abstention of the Teli from his proper occupation, is a phenomenon noticed everywhere, the import of cheap mineral oil destroying his trade.

Caste.	Name of traditional occupation.	Proportion of workers per mille in traditional occupation in	
	High figures.	**1921.**	**1911.**
Bhil	Agriculture ...	912	748
Bania (Oswal) ...	Trade ...	824	516

Teli	Oil pressers	106	331
Chamar	Leather workers ...	137	154
Kol	Hunting	195	302
Rajput (Khichi) ...	Military and Dominant ...	233	275

Urban and Rural Occupation.

84. The Diagram at para. 79 gives the prevalence of occupations in Rewa Town. Trade (combined with Transport) comes first. Industry follows it, while naturally Public Administration holds a high place, but even so agriculture accounts for 12 per cent. showing the rural character of the Capital. We may examine this in greater detail.

No.	Occupation.	Per cent. of population.
I	Agriculture	12
III	Industry	21
IV	Transport	3
V	Trade	19
VI	Public force	8
VII	Public Administration ...	12
VIII	Professions	5
IX	Independent	2
X	Domestic service	6
XI	Unspecified	7
XII	Unproductive	5

The principal Rural occupations are given in the inset Table. Landlords and their tenants head the list, labourers coming next. The number of grain dealers is small.

Common Rural Occupations.		
Names of occupations.	Groups included.	Total number.
Landlords, cultivating owners and tenants ...	1, 2, 7	746,182
Agricultural labourers	4, 5	295,354
General labourers (including construction coolies, etc.)	112, 119, 187	54,368
Metal workers	48, 49, 98	18,461
Oil pressers	61, 62, 133	16,068
Barbers	81	8,257
Dhobi	80	2,723
Leather workers	39, 123, 124	4,203
Grain dealers	121, 136	9,609
Tailors	77	4,683
Vegetable and fruit sellers	135	8,853
Makers of ornaments	52, 99, 149	3,677

One of the difficulties in separating occupations is distinguishing between workers and dependents and that in spite of the most careful instructions. For instance a woman in a family assists in agricultural operations and obviates the necessity for using hired labour, is such a woman a dependent or a worker? The test is whether the work done augments the general family income, but often it is not easy to decide. Hence the figures for workers have to be accepted somewhat conditionally. Domestic servants are probably the only class in which the distinction is easily made. It is usual for the better off to support large numbers of their less well-to-do relations. We see from the figures above that most dependents are shown by "Unproductive," "Domestic service" and "Exploitation of minerals."

No.	Sub-class.	Percentage of	
		Workers.	Dependents.
I	Exploitation of animals and vegetation ...	58	42
II	Exploitation of minerals	52	48
III	Industry	64	36
IV	Transport	69	31
V	Trade	58	42
VI	Public force	99	1
VII	Public administration	86	14
VIII	Professions and liberal arts	77	33
IX	Independent	66	34
X	Domestic service	52	48
XI	Unspecified	56	44
XII	Unproductive	51	49

If we go further into details we find that there is little difference in the Orders in sub-class I and II. When we come to III Industry, we see that the (15) Building Industries, have most workers, (13) Industries of Dress coming next while (12) Food Industries have most dependents. We may omit (7) Hide workers and (16) Construction of Transport as being faulty returns.

In IV Transport we have most actual workers under (20) Transport by water next (22) Transport by Rail while most dependents are supported by (21) Transport by Road.

Under V Trade, (37) Trade in means of Transport, (35) Trade in furniture and (34) Trade in clothes stand first as regards workers and (30) Trade in pottery as regards dependents.

Female Occupations.

85. In the whole State 69 women are workers to every 100 men which is a high average. In 1911 78 to 100 males were returned. II Exploitation of minerals, X Domestic service and XII Unproductive stand first. Many Gond women work in the coal mines and come under II. The women shown in VI Public Force are Chaukidarins, Sweeperesses etc., Public Force naturally shows least women workers.

Sub-Class. No.	Sub-Class. Designation.	Number of female workers per 100 males.
	WHOLE STATE	**69**
I	Exploitation of animals and vegetation ...	71
II	Exploitation of minerals ...	93
III	Industry	56
IV	Transport	16
V	Trade	72
VI	Public force	1
VII	Public administration	16
VIII	Professions and liberal arts	30
IX	Independent	51
X	Domestic service	92
XI	Unspecified	79
XII	Unproductive	95

It is interesting to go into this in greater detail and examine the Groups in the sub-classes. Thus the very large figures under cotton spinning and Rice pounding point to the inclusion of house-wives many of whom are scarcely genuine workers for gain. In the case of occupations of numbers 5, 45, 103, 133 and 139 men and women take an equal part in most of the work except ploughing.

Sub-class.	Group.	Designation.	Number of females per 100 males.
I	5	Field labourers	144
	11	Cattle breeders	140
III	26	Cotton spinning	938
	45	Basket makers	114
	61	Manufacture of vegetable oils ...	128
	65	Rice pounders	1,876
	103	Sweepers	145
V	133	Sellers of milk, ghee, etc. ...	212
	139	Dealers in hay and grass ...	315
XI	189	Beggars	103

It is not, however, the case here as in Europe, except in Factories, that the women workers oust the male. They occupy in all ordinary occupations entirely separate spheres of work and the scale of wages is always distinct, being lower for females. Hence no effect on general wages is produced as there is no competition.

Combined Occupations.

86. In Subsidiary Tables IV and V we get combined occupations where agriculture is the subsidiary and the chief occupation. In all Rewa 6 per mille are partially agriculturists, 9 per mille in the Northern Division and 5 in the Southern Division. Fishing and Hunting show a higher ratio, 116 per mille being also cultivators. Those engaged in the metal Industry come next with 81 per mille and after this Dress Industry with 73 Food Industries on the other hand do not use agriculture much and show only 3 per mille, who are culivators

Where agriculture is the chief occupation:—Of landlords 19 per cent. are rent payers also ; 4 per cent. are grain and money dealers ; and 8 per cent. other traders, mainly Banias who have agricultural land. Cultivators and farm servants follow but few Subsidiary Occupations. Of fruit and vegetable sellers 38 per cent. are rent payers while 7 per cent. are also general labourers.

Factory Industries.

87. In 1901 an attempt was made in the general Census to distinguish those who work at home from those working in Factories, but it was practically a failure. In 1911, therefore, a separate special return of Factories was called for in the case of all establishments of 20 and over. Various questions were also asked as to Supervision, Ownership, Control, etc. The statistics are collected in Table XXII and the special set of Subsidiary Tables connected with it.

The Return.

88. An Industrial Establishment for the purpose of the return was "Any premises wherein, or within the precincts of which, ten or more persons are employed on separate remuneration in any process for making ; repairing; ornamenting; finishing or otherwise adopting for use, for Transport or for sale any article or part of an article. It does not include such Industries as are carried on by members of a household in their joint interest with less than 10 hired labourers."

The State has ten such factories including one colliery at Umaria, a shellac factory, lime manufactory and ice factory. There are six other factories, *viz.*, coal quarry, stone factory, stone and lime factory, factories dealing with Harra, Kherwar and other Jungle products, a shoe factory and sand works. These ten factories employ 7,945 persons of whom 3 males are Europeans or Anglo-Indians and the rest are Indians. These statistics will be found in Industrial Subsidiary Table I.

Passing on to individual establishments we find those under sub-class IX, which includes the shellac factory at Umaria, and the Exploitation of Jungle products stand first as to the number of employes with 5,358 workers of which 2,308 are skilled. The next largest establishment is that of the colliery with 2,141 workers.

Statistics of Employes.

89. Of the 7,945 persons employed in factories 125 exercise supervision 3,037 are skilled workers and the rest unskilled. Among the workers 968 adult women and 506 children are employed to 1,000 males. Most females, 1,359 to 1,000 males, are employed in the collection of Jungle produce and in Quarries (1,239) and most children in the collection of Jungle produce, 815 to 1,000 males. Further details are given in Industrial Subsidiary Tables A and B. Of the skilled employes, who number 3,037, 2,329 come from the district they work in, 542 from other parts of the State and 166 from outside, 24 from the Central Provinces and 142 from the United Provinces. Of the 4,783 unskilled labourers, 4,068 come from the district they are employed in, 348 from the other part of the State, 367 from outside, 256 from the Central Provinces and 108 from the United Provinces. Of the 3 Europeans and Anglo-Indians all 3 are managers.

Organization.

90. Of these establishments 5 are State and 5 privately owned. Of these factories 4 are run on steam and one on oil. Of the private owners 1 is a European. 3 are Hindus and 1 is a Musalman.

Caste or Race in Factories.

91. In Part IV of Table XXII we get a return of the Castes and Races, Gonds stand first with 788 of whom 744 are employed in collecting jungle produce, mainly catechu, Kols come next with 714 and then Kherwar with 616 of whom 516 and 612 respectively are similarly employed. Baigas have 141 employed, 64 in the colliery and 76 in collecting jungle produce and working catechu, while 152 are Chamars working in mines (38), in Quarries (9), in collecting jungle produce (89), in the shellac factory (5) and shoe factory (11).

TABLE I.

AREA, HOUSES AND POPULATION.

1. This Table shows the number of towns and villages, the number of occupied houses, and the total urban and rural population by sexes for each Tehsil and Division.

2. The figures include the population on Railways traversing the Rewa State. It also gives similar particulars for the Head-quarters of the Baghelkhand Agency which lies in the Raghurajnagar Tehsil.

3. The figures of Rewa town, the capital of the State, have been included in the Huzur Tehsil, in this as well as in Tables II, III, and VI.

4. For the purpose of Natural Divisions the State has been divided as under :—

Lowlying—

Northern :—Huzur Tehsil, Raghurajnagar, Teonther, Sirmaur, and Mauganj.

Hilly—

Southern :—Gopad Banas, Deosar, Beohari, Bandhogarh, Sohagpur.

TABLE II.

VARIATION IN POPULATION SINCE 181.

1. This Table shows the variation in population of previous four Censuses for Rewa State as a whole.

2. Figures for each Tehsil for Censuses previous to1911 are not available, as the old Tehsils have undergone numerous changes an. figures for adjustment of population could not be supplied.

TABLE II. टेबल २.

TABLE III.

TOWNS AND VILLAGES CLASSIFIED BY POPULATION.

1. This Table shows the number of towns and villages arranged according to the population.

2. All hamlets have been included in their parent villages, as far as possible.

3. Encampments and travellers enumerated in trains have been shown separately in this table only. Elsewhere and for other purposes they have been included in the population of the towns or villages in which their enumeration was carried out.

REWA CENSUS, 1921.

TABLE VII.

AGE, SEX AND CIVIL CONDITION.

This Table is divided into four parts. Part A, Part B, Part C and Part D. Part A shows the distribution for the state as a whole, of the total population and of each religion by age, sex and civil condition. Part B shows the distribution for the two natural Divisions, Northern and Southern, of the total population and of each religion by age, sex and civil condition. Part C and D give similar details for separate Tehsils and for the town of Rewa.

N.-B.—From Table VII and onwards figures for Satna, Baghelkhand Agency Head-quarters, have been included in the Raghurajnagar Tehsil.

REWA CENSUS, 1921.

TABLE VIII.

EDUCATION BY RELIGION AND AGE.

I. This Table like Table VII is divided into four parts. Part A shows the extent of literacy in the state as a whole among the total population and for each religion returned. Part B gives details for the two Natural Divisions, for the total population and for each religion. Part C and part D give similar details for separate Tehsils and for the town of Rewa.

II. The Table shows the number of persons literate in their own Vernaculars. The number of persons literate in English has also been shown, such persons appear in both the columns "Literate" and "Literate in English."

TABLE VIII.—Education by Religion and Age.—*Part A—State Summary.*

REWA CENSUS, 1921.

TABLE IX.

Education by Selected Castes, Tribes or Races.

This Table repeats the information given in the Table VIII in respect of education, with this difference, that, whereas in that table the population is distributed by age and religion, it is here arranged according to the Caste or Tribe. Moreover, in the Table VIII the whole population is dealt with, but this table refers only to selected castes and tribes. The minor castes and tribes have been left out of account altogether.

TABLE IX.—Education by Selected Castes, Tribes or Races.

Appendix to Table X.

1. The following dialects have been included in Baghelkhandi :—

	Persons.	Males.	Females.
(1) Barme	7	6	1
(2) Gahora	48	20	28
(3) Jabbulpuri	41	39	2

2. The following dialect has been included in Bhili :—

	Persons.	Males.	Females.
(1) Pahadi	15	14	1

3. The following dialect has been included in Banjari :—

	Persons.	Males.	Females.
(1) Lavani	3	3	...

4. The following dialect has been included in Jaipuri :—

	Persons.	Males.	Females.
(1) Fatehpuri	1	...	1

5. The following dialects have been included in Marathi :—

	Persons.	Males.	Females.
(1) Deccani	1	...	1
(2) Maharashtri	5	4	1

6. The following dialects have been included in Awadhi :—

	Persons.	Males.	Females.
(1) Baiswari	58	25	33
(2) Gangapari	16	5	11
(3) Mirzapuri	3,103	1,388	1,715
(4) Sarjupari	4	4	...
(5) Uttarkhandi	4	4	...
(6) Uttari	41	10	31

7. *The following dialects have been included in Malvi :—*

	Persons.	Males.	Females.
(1) Banswadi	20	...	20
(2) Bhopali	2	1	1

8. The following dialect has been included in Pashto :—

	Persons.	Males.	Females.
(1) Kabuli	19	19	...

9. The following dialects have been included in Tamil :—

	Persons.	Males.	Females.
(1) Dravidi	3	3	...
(2) Madrasi	20	10	10

10. The following dialect has been included in Mewari :—

	Persons.	Males.	Females.
(1) Udeypuri	1	1	...

11. The following dialect has been included in Marwari :—

	Persons.	Males.	Females.
(1) Jodhpuri	1	...	1

12. The following dialect has been included in Hindi :—

	Persons.	Males.	Females.
(1) Nagari	1	...	1

REWA CENSUS, 1921

TABLE XI.

BIRTHPLACE.

This Table contains the statistics of Birthplace for the Sate as a whole, the figures for the two Natural Divisions, Northern and Southern for each Tehsil and for the town of Rewa are also shown separately.

TABLE XI.—

REWA CENSUS, 1921.

TABLE XII.

Infirmities.

1. The infirmities recorded at the Census were Insanity, Deaf-mutism, Blindness and Leprosy. The Table XII is divided into two Parts. Part I shows the distribution of persons afflicted according to age and part II shows the distribution of persons afflicted according to Tehsils.

2. Table XII-A shows the distribution of infirmities in Selected Castes while Table XII-B shows the birthplaces of the persons afflicted.

REWA CENSUS, 1921.

TABLE XIII.

CASTE, TRIBE OR RACE.

1. This Table deals with the Castes and Tribes of Hindus, Jains, Animists and Musalmans for the State as a whole. The figures for the two Natural Divisions, for each Tehsil and for the town of Rewa are also shown separately.

2. The figures for Christians are omitted from this Table as they are specially dealt with in Tables XV and XVI. The figures for Sikhs, Parsis and Others are also omitted.

3. All castes which have been selected for Tables IX, XII-A, XIV and XXI and some other castes of local importance have been shown separately in this Table. The remaining castes have been shown as " Others. " Some castes whose proper affiliation was uncertain and cases which did not return any real caste name have been grouped under the head " Unspecified " and included in " Others."

REWA CENSUS, 1921.

TABLE XVII.

OCCUPATION OR MEANS OF LIVELIHOOD.

This Table gives general information about occupation or means of livelihood for the whole State as well as for the two Natural Divisions, for each Tehsil and for the town of Rewa.

The term "Partially Agriculturists" includes only those people whose Subsidiary Occupation falls under groups 1—5.

There are four main classes into which all occupations are divided. These classes are further sub-divided into twelve sub-classes, fifty-six Orders and 191 Groups.

It was necessary for local purposes to sub-divide certain Groups in this Table and Table XX.

These are shown below :—

Group 2.—Ordinary cultivators.

Sub-Group 2-*a*.—Helpers in agriculture.

Group 8.—Forest officers, rangers, guards, etc., (Government employes.)

Sub-Group 8-*a*.—Forest officers, rangers, guards, etc., (Rewa State.)

Group 156.—Army, Imperial Service Troops.

Sub-Group 156-*a*.—Army, Rewa State.

Group 159.—Police (Imperial).

Sub-Group 159-*a*.—Police (Rewa State).

Group 162.—Service of Indian and Foreign States.

Sub-Group 162-*a*.—Ruling Chief and his family.

Do. 162-*b*.—Rewa State Officials.

Do. 162-*c*.—Rewa State menials.

Group 180.—Government Pensioners.

Sub-Group 180-*a*.—Proprietors (other than of agricultural land), fund and scholarship holders and Rewa State pensioners.

The Groups and Orders in which there were no entries have been omitted from this Table and Table XX.

REWA CENSUS, 1921.

TABLE XVIII.

SUBSIDIARY OCCUPATIONS OF AGRICULTURISTS—ACTUAL WORKERS ONLY.

This Table shows the Subsidiary Occupations of Agriculturists for the State as a whole.

It is divided into four parts.—

(*a*) Rent receivers *i. e.*, Group I of Table XVII.

(*b*) Rent payers *i. e.*, Groups 2 and 2*a* of Table XVII.

(*c*) Agricultural labourers *i. e.*, Group 5 of Table XVII.

(*d*) Growers of special products and market gardening *i. e.*, Group 7 of Table XVII.

TABLE XVIII.—(*c*) *Subsidiary Occupations of Agriculturul Labourers.*

Occupations.	Population.		
	Persons.	Males.	Females.
1	2	3	4
Total number of Agricultural Labourers (Actual Workers) ...	189,884	77,673	112,211
Number of actual workers who returned subsidiary occupations.	6,608	4,075	2,533
(*a*) Agricultural	561	457	104
Rent receivers	23	15	8
Rent payers	538	442	96
(*b*) Non-agricultural	6,047	3,618	2,429
General labourers	656	499	157
Village watchmen	43	26	17
Cattle breeders and milkmen	158	63	95
Fishermen and boatmen	42	35	7
Rice pounders	3	3	...
Traders of all kinds	48	30	18
Oil pressers	280	110	170
Weavers	130	112	18
Potters	88	37	51
Leather workers	1,246	1,219	27
Washermen	59	32	27
Blacksmiths and carpenters	114	83	31
Others	3,180	1,369	1,811

TABLE XVIII.—(*d*) *Subsidiary Occupations of Fruit, Flower, Vegetable Growers, etc.*

Occupations.	Population.		
	Persons.	Males.	Females.
1	2	3	4
Total number of Fruit, Flower, Vegetable Growers (Actual Workers).	3,195	2,189	1,005
Number of actual workers who returned subsidiary occupations.	1,802	1,148	654
(*a*) Agricultural	162	93	69
Rent payers	1,210	810	400
Agricultural labourers	162	93	69
(*b*) Non-agricultural	1,640	1,055	585
General labourers	229	123	106
Others	201	122	79

REWA CENSUS, 1921.

TABLE XIX.

MIXED OCCUPATIONS.

This Table shows for certain mixed occupations the number of persons who returned each occupation as their (*a*) Principal and (*b*) Subsidiary means of livelihood for the State as a whole.

TABLE XIX.—*Showing for certain Mixed Occupations the number of persons who returned each occupation as their* (A) *Principal and* (B) *Subsidiary means of livelihood.*

Occupation.		Number of persons (Actual Workers) who returned (occupation A) as their principal occupation.		Number of persons in preceding column who returned (occupation B) as their subsidiary occupation.		Number of persons (Actual Workers) who returned (occupation B) as their principal occupation.		Number of persons in preceding column who returned (occupation A) as their subsidiary occupation.

REWA CENSUS, 1921.

TABLE XXI.

OCCUPATION BY SELECTED CASTES, TRIBES OR RACES.

This Table gives statistics for the occupations of Europeans, Anglo-Indians, ndian Christians and certain castes selected on local conditions. The occupations re arranged under 12 main heads corresponding to the sub-classes of the scheme f classification given in Table XVII Columns 7 and 8 throw light on the extent o which traditional caste occupations are followed, while column 9 is intended to make it possible to discount the tendency of functional castes to return their traditional occupations as their principal means of livelihood. The figures in column 10 onward are exclusive of those shown in column 7.

TABLE XXI.—*Occupation*

Serial number.	Caste, Tribe or Race.	Sex.	Traditional occupation.	Population dealt with.		No. of actual workers whose traditional caste occupation was returned as their		Number of actual workers returning their traditional occupation as their principal means of livelihood who had some subsidiary occupation.	Recorded					
									I. Exploitation of animals and vegetation.					
				Actual workers.	Dependants (both sexes.)	Principal means of livelihood.	Subsidiary means of livelihood.		Income from rent of land.	Cultivators of all kinds.	Agents and managers of landed estates, planters, forest officers and their clerks, rent collectors, etc.	Field labourers, wood cutters, etc.	Raisers of livestock, milkmen and herdsmen.	Fishing and hunting.

REWA CENSUS, 1921.

TABLE XXII.

INDUSTRIAL STATISTICS.

This Table is based on information specially collected through the Managers of Industrial Establishments employing not less than 10 persons.

The Table is divided into 6 parts :—

PART I.—State Summary of Establishments classified according to the strength and nature of each. In this Part Establishments using mechanical power are shown under "A" and those not using it under "B."

PART II.—Distribution of Industries by Districts.

PART III.—Establishments classified according to the class of Owners and Managers.

PART IV.—Caste or Race and Birthplace of skilled workmen classified according to their occupation.

PART V.—Caste or Race and Birthplace of unskilled labourers.

PART VI.—Details of power used in Industries.

TABLE XXII.—INDUSTRIAL STATISTICS.—PART I, *State Summary* (*In this Part "A" indicates establishments in which mechanical power is used & "B" those in which it is not used.*)

Description of Establishment.	Classification of Establishment according to the number of persons employed (including management.)	Number of establishments.	Total of persons employed.		CLASSIFICATION OF PERSONS EMPLOYED.														Remarks.
					DIRECTION, SUPERVISION AND CLERICAL STAFF.						SKILLED WORKMEN.				UNSKILLED LABOURERS.				
					Managers.		Supervising and Technical Staff.		Clerical Staff.		Europeans and Anglo-Indians.		Indians.		Aged 14 and over.		Under 14.
