PREFACE

The compilation of District Census Handbooks is an innovation of the 1951 Census which was highly appreciated by the data users. In view of their acknowledged utility, in the 1961 Census significant additions were introduced in the form of the District Census Handbooks by enlarging their scope with a view to presenting through them a comprehensive picture of the districts. The 1971 District Census Handbooks follow more or less the pattern adopted in 1961.

The 1971 Census publication programme envisaged bringing out the District Census Handbooks in three parts for each district. Part A contains the Village and Town Directory, Part B deals with Primary Census Abstract and Part C, which is the main and the most important part, contains the census tables, tables on Village Directory and Primary Census Abstract prepared mechanically and the non-census tables on administrative, welfare and developmental statistics pertaining to the district. It was, however, subsequently felt that collection of data from various agencies for non-census tables would take a long time which the census data users could ill afford to wait. It was, therefore, decided to publish Parts A and B at the earliest without waiting for compilation of Part C.

District Census Handbooks (Parts A and B combined) for all the districts of Assam have already been published and the present volume is the first in the Part C Series.

The generation of census tables incorporated in this handbook is the fruitful culmination of very hard labour put in by a team of most sincere and dedicated workers in this directorate. The Central Tabulation Unit in the office of the Registrar General, India did a commendable job in scrutinizing the tables prepared manually and the Data Processing Division provided us with the mechanically prepared tables with remarkable efficiency. All of them deserve our sincere thanks.

We are deeply indebted to Shri P. Padmanabha, Registrar General, India for his unfailing inspiration in bringing out this publication.

INTRODUCTION

The District Census Handbooks were first introduced in 1951* Census. It contained a general account of the district and its people, data on area, houses, population, small scale industries, distribution of population by livelihood classes for each village and town of the district and other census tables. The scope and contents of these Handbooks were developed in 1961 by extending the coverage by incorporating administrative statistics for each district. The tables on administrative statistics included in the 1961 District Census Handbooks were on (1) Rainfall and Temperature, (2) Vital Statistics, (3) Land Utilisation and Agriculture, (4) Livestock, (5) Industries, (6) Administration, (7) Public Health and Medical Statistics, (8) Education Statistics, (9) Statistics on Public Entertainment, Press and Journals, (10) Communication Statistics, (11) Statistics on Local Bodies, (12) Community Development, (13) Statistics on Banks and Small Savings, (14) List of Fairs and Festivals, Hats and Markets, (15) Calendar on Important Events, and (16) Brief notes on Ancient Monuments, Places of Worship and Gazetteers of Place Names.

In the 1971 Census an attempt was made to make the District Census Handbooks more informative by enlarging and improving its scope and contents. One of the improvements is the introduction of the Village Directory and Town Directory in elaborate form. The Village Directory introduced in 1961 Census was limited to a few information putting into a single column along with the Primary Census Abstract.

The District Census Handbook of 1971 unlike the previous censuses is divided into three parts. Part A includes Village and Town Directory. The Village Directory contains information relating to (1) Area, (2) Amenities available within the village such as Educational, Medical, Power Supply, Drinking Water, Communication, Post and Telegraph, (3) Staple food, (4) Land use pattern such as Forest lands, Irrigation and Unirrigated lands, Cultivable wastes, Area not available for cultivation, (5) Nearest town and its distance from the village, (6) Day or days of the Market, Hat, if any held in the village (7) Existence of anything relating to Religious, Historical and Archaeological interest.

The Town Directory comprising seven statements gives information pertaining to (i) Status, Growth history and Functional categories of individual towns, (ii) Physical Aspects and their locations, (iii) Municipal Finance during 1968-69, (iv) Civic and other Amenities in 1969, (v) Medical, Educational, Recreational and Cultural Facilities available during 1969, (vi) Trade, Commerce, Industry and Banking Facilities in 1969, and (vii) Population by Religion in 1971. Part B presents data on Primary Census Abstract (P. C. A) like area, census houses, and households, population, castes and tribes, literate and educated persons, workers by industrial categories and non-workers for each village, town, urban ward and urban enumerators' block.

Another improvement is the presentation of the Police Station maps demarcating the boundaries of each and every villages and towns with their location code numbers.

Part C furnishes the census tables, secondary tables based on Village Directory and P.C.A. data and tables relating to administrative, welfare and developmental activities.

Tables prepared on administrative, welfare and developmental statistics mainly contain informations on (1) Rainfall figures, (2) Roads and communication system, (3) Medical and Public Health activities, (4) Educational statistics, (5) Banking facilities available in the district, (6) Agricultural and Veterinary activities, (7) Business and Commercial houses, (8) Number of Circuit Houses, Inspection Bungalows and Guest houses with their location, (9) Family Planning activities, (10) Statistics on Jail, Local Bodies etc.

Definitions and Concepts

Village :— In the plains district where most of the areas have been cadastrally surveyed, the cadastral village has been taken as a village for

* Prior to 1951, Village statistics for each district used to be printed after the census giving the population for each village and showing the distribution of communities and of literate persons.

census. In the non-cadastral pockets like 'char' and forest areas of the plains a village is taken to be a 'gaon' or 'gram' together with its adjacent 'tolas', 'paras' etc. In the hill districts a village has been taken to be a collection of houses bearing a separate name and situated within certain boundaries traditionally recognised by the villagers. The tea gardens with their housing colonies of the staff and workers are treated as villages. Settlement made by the forest department within the forest reserves which are commonly known as forest villages are also included in the list of villages.

Town :— For the first time in 1961 census uniform and somewhat rigid tests were sought to be applied throughout the country for an urban area to be recognised as an urban unit. For 1971 census, the definition adopted for an urban area generally follows that of 1961 which is as follows :—

(a) All places with a Municipality, Town Committee, Corporation or Cantonment and Notified Town area, (b) All other places which satisfied the following criteria :—

(i) A minimum population of five thousand, (ii) Atleast 75 per cent of the male working population is non-agricultural, (iii) A density of population of atleast 400 per sq. km. (i.e. 1,000 per sq. mile)

The Directors of Census Operations were however, given some discretion in respect of some marginal cases in consultation with the State government to include some places that had distinct urban characteristics and to exclude undeserving cases.

Ward :— Each urban area or town of this state is divided into several wards with reference to its population for administrative convenience. Every ward is comprised of one or more localities with distinct local names. In municipal maps these wards are distinctly demarcated with their boundaries.

Urban Blocks :— The urban block is the smallest unit of census division and usually corresponds to the jurisdiction of an enumerator. Enumerator's jurisdiction in an urban bloek in 1971 census was approximately an area with about 120 households or 600 persons.

Census House :— A census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc. used or recognised as a separate unit. It may be inhabited or vacant. It may be used for a residential or non-residential purpose or both.

Census Household :— A household is a group of persons who commonly live together and take meals from a common kitchen unless the exigencies of work prevent any one of them from doing so. There may be one member households, two member households or multi-member households. For census purposes,, each one of these types is regarded as a 'Household'. Again, these may be households of persons related by blood or households of unrelated persons ; the latter are boarding houses, hotels, residential hostels, orphanages, rescue homes, ashrams, etc. These are called 'Institutional Households.'

Scheduled Caste and Scheduled Tribe

The Constitution of India has not defined the Scheduled Caste and Scheduled Tribe, but according to Article 341 and 342 the President of India may specify by public notification a list of Scheduled Caste and Scheduled Tribe. According to the Constitution Scheduled Caste Order, 1950 and Scheduled Tribe Order, 1950 as modified by the Scheduled Caste and Scheduled Tribe List Modification, Order 1956 and all subsequent amending notifications, the following 16 Castes with 9 synonyms and 35 Tribes with 45 sub-tribes and synonyms were declared as Scheduled for Assam. It may be noted that the Scheduled Castes are recognised only by the Hindus and the Sikhs, while the members of the Scheduled Tribe may belong to any other religion. It, therefore, follows that on conversion to any other religion a Scheduled Caste person ceases to be Scheduled Caste.

It may also be noted that the Scheduled Castes are regarded as such throughout the state of Assam, but the Scheduled Tribes are confined to certain scheduled areas within the state. A Scheduled Tribe of the Autonomous district can be regarded as such anywhere within any of the autonomous districts of Assam, but he cannot be regarded as Scheduled Tribe if he goes outside the precints of the autonomous district. For example a Mikir cannot be regarded as a Scheduled Tribe in Kamrup. Similarly a Miri or Rabha cannot be regarded as a Scheduled Tribe if he lives in the autonomous districts. This is the strict interpretation of the President's order. It is quite natural that the total number of Scheduled Tribes would be more than what has been recorded by the census, but for the strict application of the President's order. The Scheduled Castes and Scheduled Tribes in Assam as listed in the Scheduled Castes and

Scheduled Tribes List Modification Order, 1956 are noted below :—

Scheduled Castes in Assam

1. Bansphor
2. Bhuinmali or Mali

4. Hojai
5. Kachari including Sonowal
6. Lalung
7. Mech
8. Miri
9. Rabha

Literates :—A person who can both read and write in any language with understanding is to be taken as literate. A person who can merely read but cannot write is not to be treated as literate. The test for reading is the ability to read a portion of the Instruction Booklet for enumerators. The test for writing is the ability to write a simple letter. Children aged 4 and below are treated as illiterate.

Workers :—A 'worker' is a person whose main activity is participation in any economically productive work by his physical or mental activity. Work includes not only actual work but active supervision and direction of work.

The reference period is one week prior to the date of enumeration in the case of regular work. If a person had participated in any regular work on any one of the days during the reference period and this has been returned as his main activity the person will be categorised accordingly. A person who normally works but had been absent from his regular work during the reference period on account of illness, travel, strike, etc. is regarded as engaged in regular work in which he would otherwise have been employed but for his temporary absence. Persons under training such as apprentices with or without stipends or wages are considered as economically active and recorded as working. For seasonal work like cultivation, livestock keeping, plantations, etc. a person's main activity was ascertained with reference to the work normally attended to by him in the course of the last one year.

Non-workers :— All persons other than workers are termed as 'non-workers'. Non-workers consist of those persons who are engaged in unpaid household duties and also those who are termed as students, retired or rentiers, dependents, beggars and vagrants, convicts in jail or inmates of a penal, mental or charitable institution and others.

The code numbers of Divisions and Major Groups of National Industrial Classification, 1970 and National Classification of Occupations, 1968 used in case of B and E-Series Tables are explained at the end of the book.

EXPLANATORY NOTE ON CENSUS TABLES

Table A-I : Area, Houses and Population.

This is the basic population table for the census and furnishes data for the District/Subdivision/Police Station/Town for rural and urban areas separately. It presents area in sq. Kms., density of population per Sq. Km., number of inhabited and uninhabited villages, number of towns, number of occupied residential houses, number of households and population by males and females according to 1971 census. In case of area for units lower than district such as police stations and towns, the figures as supplied by the Director of Land Records, Assam and local authorities have been shown.

Appendix—I : This appendix shows 1961 territorial units constituting the present set-up of each unit.

Appendix—II : One of the criteria for a place to be declared as town is that it should normally have a population of 5,000 and over. For various reasons many places with a population of 5,000 and over are not treated as towns. On the other hand a few places with a population under 5,000 had to be treated as urban as they are declared as towns by the state government under the municipal laws or had marked urban characteristics otherwise. This appendix gives the number of such places with their population.

Appendix—III : This appendix furnishes figures for the number of houseless and institutional households and houseless and institutional population separately.

Table A-II : Decadal Variation in Population since 1901.

This table furnishes data on the population for the past eight censuses from 1901 to 1971 and the variation of population. This is a very important table as it gives the growth of population from decade to decade.

Appendix : Gives for the district the area in Km^2 for 1971 and 1961, the population in 1971, the population in 1961 according to the jurisdiction prevailing in 1961, the population in 1961 adjusted to the jurisdiction of 1971 and the variation by net increase or decrease.

Table A-III : Villages Classified by population.

This table gives the total number of inhabited villages classified by various population sizes of (i) less than 200, (ii) 200-499, (iii) 500-999, (iv) 1,000-1,999, (v) 2,000-4,999, (vi) 5,000-9,999, and (vii) 10,000 and above indicating therein the total rural population by persons, males and females down to police station level.

Table A-IV : Towns and Urban Agglomerations classified by population in 1971 with variation since 1901.

This table furnishes the total population of each town separated by males and females. Decadal variation in population since 1901 has been given both in absolute figures and percentages. The area of the towns have also been given.

For purpose of census all towns are divided into six classes according to their population sizes :—

I—Population of 100,000 and over ;

II— Population of 50,000-99,999 ; III—Population of 20,000-49,999 ; IV—Population of 10,000-19,999 ; V—Population of 5,000-9,999 and VI—Population of less than 5,000. A town with a population of 100,000 or over is termed as a city.

Appendix : This shows the new towns added in 1971 and the towns of 1961 declassified in 1971. This appendix is followed by an annexure containing the name, area and population as in 1961 of each village constituting the new towns.

Table B-I Part A : Workers and Non-workers according to Main Activity classified by Sex and Age-groups.

This is the basic economic table and shows distribution of the entire population into two broad

classes of workers and non-workers. Workers are further classified into nine broad industrial categories, cross classified into eight age groups viz. 0-14, 15-19, 20-24, 25-29, 30-39, 40-49, 50-59 and 60+ .

B II—Workers and Non-workers in cities and non-city urban areas according to main activity classified by sex and age-groups.

This table is similar to Table B-I Part A with the difference that it is confined to the presentation of data for city/non-city urban/town/urban agglomeration.

B-III Part A : Classification of workers and non-workers according to main activity by educational levels in urban areas only.

This table gives classification of workers and non-workers according to their main activity by educational levels in urban areas at district level.

B-III Part B : Classification of workers and non-workers according to main activity by educational level in rural areas only.

This table is similar to B-III Part A but confined to the presentation of data for rural areas only.

B-IV Part A : Industrial classification of persons at work other than at cultivation as main activity by sex and divisions, major groups and minor groups.

This table gives industrial classification of persons at work other than cultivation as main activity by sex and divisions, major groups and minor groups of the National Industrial Classification, 1970 which has been adopted with suitable modifications wherever necessary.

Appendix : This appendix shows industrial classification of workers engaged in manufacturing, processing, servicing and repairs by household industry and non-household industry.

B-IV Part D : Industrial classification by sex and class of workers of persons at work in non-household industry trade, business, profession or service as main activity.

This table deals with persons at work in non-household industry, trade, business, profession or service by the four statuses of employment only for urban. This table gives data only for divisions and major groups.

B-VI Part A (i) : Occupational classification of persons at work according to main activity other than cultivation by sex and age-groups in urban areas only.

This table gives details of workers other than at cultivation classified by occupation upto divisions and groups of National Classification of Occupations, 1968. The population under each division and group of N. C. O. is classified by sex and age-groups. This is confined to urban areas only.

B-VI Part A (ii) Occupational classification of persons at work according to main activity other than cultivation classified by sex and educational levels in urban areas only.

This table is prepared upto divisions and groups of National Classification of Occupations, which is further cross-classified by sex and broad educational levels, such as Primary, Middle, Matriculation or Higher Secondary and Graduate and above. This table relates to urban areas only.

B-VI Part B (i) : Occupational Classification of persons at work according to main activity other than cultivation by sex and age-groups in rural areas only.

This table is similar to table B-VI Part A (i) but data are presented for rural areas only.

B-VI Part B (ii) : Occupational classification of persons at work according to main activity other than cultivation classified by sex and educational levels in rural areas only.

This table is also similar to table B-VI A (ii) and is prepared for rural areas.

B-VII : Secondary work i. e, persons having main activity (i) cultivators, (ii) agricultural labourers, (iii) household industry, (iv) non-household industry, (v) Non-workers classified by sex and by secondary work (i) household industry, (ii) cultivators, (iii) labourer or (iv) non-household industry, trade, business or service.

Table B-VII is a new and comprehensive table of 1971 census providing statistics of main activity and secondary work of population. The persons having main activity as cultivators; agricultural labourers; working at household industry ; at non-household industry, trade, business or service and non-workers are further cross-tabulated in case of persons whose secondary work is either (i) as cultivator or (ii) as agricultural labourer or (iii) at household industry or (iv) at non-household industry, trade business, service etc,

B-VIII . Persons classified as non-workers according to main activity cross-classified by sex, age groups and type of activity.

In Table B-VIII as against eight categories of non-working population in 1961 census, the data is presented for seven categories of non-workers in this table, the last category 'Others' comprising the 'Unemployed'. This table is comparable at district level to the Table B-IX of 1961 Census wherein the details of non-working population by sex and broad age groups such as 0-14, 15-34, 35–59, 60+ 'Age not stated' are given for each type of activity of non-working population. As against five broad age-groups in 1961 census, this table presents here nine age-groups viz., 0-14, 15-19, 20-24, 25-29 30-39, 40-49, 50-59, 60+ and age not stated.

C-I Part A—Composition of households by relationship to head of household classified by age-groups.

This table shows the composition of household by relationship to head according to different age-groups.

C-III Part A-Age, Sex and Education in all areas.

This table gives information on age, sex and education for all areas. In the last census the educational levels were limited to three while in this census these are extended upto seven.

C-III Part B-Age, Sex and Education in urban areas only.

This table is similar to table C-III Part A but is confined to urban areas only. The only difference is that this table shows the break-up of educational level 'Graduates and above.'

C-V Part A (ii) Distribution of languages (inclusive of mother-tongues grouped under each) specified in Schedule VIII to the Constitution of India.

Shows the distribution of speakers of the languages (inclusive of mother-tongues grouped under each) specified in Schedule VIII to the Constitution of India for the Police Stations and Towns in the district for total areas only cross-classified by sex. The data for the rural areas of the Police Stations are not presented but they can be derived by subtracting data in respect of Town (s) within the Police Station from the total Police Station figures.

C-V Part B (ii) Distribution of languages/mother-tongues other than those specified in Schedule VIII to the Constitution of India.

This table presents speakers of languages/ mother-tongues (inclusive of mother-tongues where grouped) other than those shown under Part A (ii) for the total areas of the District, Police Stations and Towns cross-classified by sex.

C-VII—Religion

This table gives the distribution of population according to religion.

C-VIII Part A-Classification by literacy and industrial category of workers and non-workers according to main activity among Scheduled Castes.

This table gives the total population of Scheduled Castes and their distribution by literacy and classification of workers into different industrial categories and the total number of non-workers.

C-VIII Part B-Classification by literacy & industrial category of workers and non-workers according to main activity among Scheduled Tribes.

This table gives the total population of Scheduled Tribes and their distribution by literacy and classification of workers into different industrial categories.

C-VIII Part A—Appendix : Scheduled Castes classified by literates and illiterates.

Individual Scheduled Castes population classified by literates and illiterates are presented in this appendix.

C-VIII Part B—Appendix : Scheduled Tribes classified by literates and illiteates.

Individual Scheduled Tribes population classified by literates and illiterates are presented in this appendix.

All tables pertaining to migration presented in thes handbook are prepared on sample basis (10% rural and 20% urban)

D-I-Population Classified by Place of Birth.

This table gives the distribution of population by birth place according to rural and urban areas. It corresponds to Table D-II of 1961 census, in which the place of birth was classified as rural/ urban for those individuals whose birth place happened to be within the country. Similarly, the place of enumeration was classified separately by urban and rural areas. This gives an indication of the rural/urban migration based on the place of birth.

Appendices I and II : These give information on inter-district migration

D-V Migrant Workers and Non-workers according to Main Activity Classified by Place of Last Residence.

This table gives the distribution of workers and non workers in each of the industrial categories according to the place of last residence in rural and urban areas. It indicates the industrial categories attracting migrants and whether in the different industrial categories the flow of migrants is from the rural to urban areas or vice-versa. This is considered more relevant for studying migration as against the table D-VI of 1961 census.

D-VI Migrants Classified by Place of Last Residence, Age Group, duration of Residence and Marital Status.

This is a new table of 1971 census which gives the distribution of migrants based on the place of last residence by age group, marital status, duration of residence and by sex.

E-I Distribution of Establishments by Broad Types.

This is a new table for the 1971 census and is prepared for total, rural and urban areas for District/City and gives the distribution of all establishments by three broad types viz., (1) manufacturing, processing or servicing establishments ; (2) trade or business establishments and (3) other establishments in each of (a) government or quasi-government ; (b) private and (c) co-operative sectors of the economy. The manufacturing, processing or servicing establishments are further classified as registered factories, unregistered workshops and household industries. The trade or business establishments are classified as wholesale, retail and others. Lastly, the 'other establishments' are classified as educational institutions, public health instituions and others.

E-II Part A-Distribution of Manufacturing, Processing or Servicing Establishments other than Household Industries classified by Registered Factories, Unregistered Work-shops and Size of Employment.

This table shows distribution of manufacturing, processing or servicing establishments other than household industries for total, rural and urban areas for District/City separately. It gives useful information about the size of employment and the number of units under each of the categories (a) registered factories and (b) unregistered workshops in each Division/Major Group of National Industrial Classification, 1970.

E-II Part B:Distribution of Manufacturing, Processing or Servicing Establishments other than Household Industries classified by Industry, Fuel/Power or Manual used and Size of Employment.

In this table, the number of factories and workshops are presented for total, rural and urban areas for District/City and by Division/Major Group of National Industrial Classification, 1970 and by size of employment. This gives information about the kind of fuel or powar used in the industries.

E-II Part C-Distribution of Household Industry Establishments classified by Industry, Fuel-power used and Size of Employment.

This table furnishes information of household industry establishments by Division and Major Group of National Industrial Classification, 1970 about the kind of fuel or power used by broad employment size groups for total, rural and urban areas for District/City separately.

E-III Distribution of Trade/Commercial Establishments classified by the Type of Business or Trade and size of Employment.

This is a new table for 1971 and is prepared for the trade/commercial establishments classified by the type of business or trade and size of employment for total, rural and urban areas for District/City. All trade/commercial establishments are classified under each Division/Major Group of National Industrial Classification, 1970.

E-IV Distribution of Establishments (other than Manufacturing, Processing or Servicing or Business and Trade Establishments) by size of Employment.

This table gives the distribution of establishments (other than manufacturing, processing or servicing or business and trade establishments) by size of employment for total, rural and urban areas for District/City in each Division and Major Group of National Industrial Classification, 1970. All establishments (other than manufacturing, processing or servicing or business and trade) are further classified by bread size-groups of employment in each Division/Major Group of National Industrial Classification, 1970. This table which has been attempted for the first time in 1971 Census also provides frame for the establishments not covered by Table E-II (Part A & B) and E-III.

Table H-I gives estimates of Census Houses and the use to which they are put. This table corresponds to Table E-I of 1961 with a few changes.

H-II Distribution of Census Houses by predominant material of wall and predominant material of roof.

This table gives distribution of Census Houses by predominant material of wall and predominant material of roof, giving the structural condition of the houses according to the type of material used for wall and roof. This table corresponds to table E-IV of 1961 with the difference that in 1971 this table is prepared for census houses while in 1961 census housesholds living in census houses used wholly or partly as dwellings were classified by material of wall and roof.

H-III Households classified by number of members and by number of rooms occupied.

This table gives distribution of households classified by number of members and by number of rooms occupied. The table will help in the measurement of congestion and overcrowding in households. This table corresponds to table E-V of 1961 census excepting that additional information for households with unspecified number of rooms and households with details unspecified are shown in 1971. Institutional households are not reckoned for the purpose of this table.

NOTE : 1. The area figures given in column 3 for District represent "geographical area" figures supplied by the Surveyor General of India. The figures for urban areas are those supplied by the local bodies/State authorities. Area figures for rural areas of District are derived by subtracting the urban area from the total area of the District. Similarly, rural areas of Police Station are derived by subtracting the urban area from the total area of the Police Station supplied by Director of Land Records, Assam. The total of the area figures of Police Stations will not tally with the district figures because the former represent "land use" area and are derived from the figures supplied by Director of Land Records, Assam.

2. The density figures per Km² shown under column 4 for urban areas of District/Subdivision/Police Station are worked out using the area figures corrected upto two places of decimals obtained by adding the area of individual towns in the respective units and not using the area figures given in the table. For total and rural the density is worked out on area figures corrected upto one place of decimal.

3. Towns treated as such for the first time in 1971 Census are printed in Italics.

4. Towns treated as such for the first time in 1961 Census which continue as towns in 1971 are shown with asterisk (*) on their left.

5. The following abbreviations are used to denote the civic status of towns, in case of towns which have no civic status the space is left blank.

   (i) 'M' ... Municipality
   (ii) 'TC' ... Town Committee

6. Other abbreviations used are—

   T : Total
   R : Rural
   U : Urban
   P.S. : Police Station

NOTE ON TABLES ON VILLAGE DIRECTORY AND PRIMARY CENSUS ABSTRACT DATA

A set of ten tables based on village Directory and Primary Census Abstract data, generated on electronic computor by the Data Processing Division in the office of the Registrar General, India, New Delhi have been included in this volume. These tables elicit a wide range of useful information on villages of the district.

Owing to non-simultaneous processing of data there are some marginal differences between the figures presented in these tables and those published earlier in the context of Village Directory and Primary Census Abstract.

Tables to follow are as listed below :—

Table 1. Distribution of villages with reference to area.

" 2. Distribution of villages by select amenities, infrastructure and land-use data with reference to distance from nearest town.

" 3. Distribution of villages by select demographic characteristics and distance range from nearest town.

" 4. Average size of village by distance range from the nearest town by size-class.

" 5. Distribution of villages by size-class of population having select servicing institutions and demographic characteristics.

" 6. Distribution of villages by number of hamlets and percentage of Scheduled Castes and Scheduled Tribes population combined to total population.

" 7. Distribution of villages by density of population per hectare.

" 8. Distribution of villages by proportion of Scheduled Castes and Scheduled Tribes population.

" 9. Villages by percentage of irrigated area to total Cultivated area and density of population per hectare.

" 10. Villages by percentage of literacy having and not having telephone with reference to nearest town.

All these tables are presented upto the level of a Police Station.

INTRODUCING THE OFFICIAL STATISTICS

The tabulation plan for the 1971 census envisaged incorporation of official statistics on a large variety of subjects for each district in the District Census Handbooks. The data were to be collected from various administrative departments of the Central and State Governments and other statutory organisations and processed and compiled in the office of the Director of Census Operations.

But, in practice the collection of data proved to be an extremely arduous task. The subjects listed to be collected embraced almost all spheres of the socio-economic life of the people and the governmental activities connected therewith. But, in spite of persistent pursuance not only by letters and reminders but also by personal contacts all the data, initially contemplated to be included in this volume, could not be collected. Some informations were not available at all, while some departments were not very cooperative.

The data on official statistics were proposed to be presented through a set of 74 tables. But, we had to remain content with a total of 30 tables only data for which were uniformly available for all the districts in the state. The tables included in this handbook are as listed below. The table headings are self explanatory and therefore do not call for any elaboration.

Table 1 : Rainfall Statistics—District average in mm. by months and years.

Table 2 : Length of roads in Kms. (by nature of materials) as maintained by (a) P.W.D. and other Government Departments (b) Local Bodies.

Table 3 : Major Roads.

Table 4 : Polymetric table of distance (in Kms) of towns, markets and other important places on the National Highway.

Table 5 : Polymetric table of distance (in Kms) of towns, markets and other important places on the district road.

Table 6 : Bus routes, 1970.

Table 7 : Circuit Houses/Inspection Bungalows/Tourist Homes/Youth Hostels/Travellers Bungalows maintained by P.W.D., Local Bodies etc.

Table 8 : Railway Stations in the district, amenities provided and distance from District and State headquarters (new railway stations opened during 1961-71 are shown by asterisk mark)

Table 9 : Particulars of Banks and their branches.

Table 10 : Medical and Public Health Institutions

Table 11 : Hospitals/Dispensaries and related statistics.

Table 12 : Medical and para-medical personnel.

Table 13 : Public Health Activities (vaccination, malaria control, B.C.G.)

Table 14 : Drinking water.

Table 15 : Number of Towns/Villages by source of drinking water as on 1969-70.

Table 16 : Number of Primary, Secondary, Higher Secondary and other Non-Collegiate Educational Institutions together with the strength of Pupils as on 31.3.1970.

Table 17 : Number of Primary, Secondary, Higher Secondary and other Non-Collegiate Educational Institutions together with the strength of teachers as on 31.3.1970.

Table 18 : Colleges and Technical Institutions (including Arts, Science, Commerce, Industrial Schools, Fine Arts, Architecture, Agriculture, Music, Dance, etc.) together with the strength of teachers and students.
