PREFACE

The Government used to compile and publish District Manuals for each district prior to 1905. The manuals became obsolete within a few years of their publication, containing as they did not only matter of a more or less permanent character such as physical characteristics, history, religion and ethnography, but also statistical matters which soon became out of date. The Government decided to replace the District Manuals by another publication known as the District Gazetteer, consisting of two volumes, A and B. The A volume contained descriptive matter and such general figures, as might be necessary to explain the text, and the B volume contained detailed statistics. They also decided that the B volume should be brought out periodically, especially after each decennial census. Between 1905 and 1927 A volumes for thirteen districts were published. In 1927 they were discontinued. B volumes for all the districts were published between 1906 and 1915. They were continued to be published even after the 1931 census. They were not published after the 1941 census.

Village Statistics, containing the results of the census for every village in the State, were first compiled and published in 1872, at the instance of Mr. C. E. Gover, who was then the Census Officer in Madras. His successor, in 1882, considered that this publication led to needless expenditure and trouble in printing the tables villagewar, but the Government decided that the Village Statistics should continue to be published. The practice of issuing Village Statistics at every census was followed subsequently. The Village Statistics merely showed the number of occupied houses and population of each village and town by religions.

The idea of preparing the present volume, viz., the District Census Handbook for each district was put forward by Sri R. A. Gopalaswami, I.C.S., Registrar-General, India, and ex-officio Census Commissioner of India, as part of a plan intended to secure an effective method of preserving the census records prepared for areas below the District level. He proposed that all the district census tables and census abstracts prepared during the process of sorting and compilation should be bound together in a single manuscript volume, called the District Census Handbook, and suggested to the State Governments that the handbook (with or without the addition of other useful information relating to the district) should be printed and published, at their own cost, in the same manner as the Village Statistics in the past. In accepting this suggestion, the Government of Madras decided to print and publish the more important portion of statistical data relating to the district and to preserve the rest of the records in a manuscript volume for any future use to which they may be put.

2. The statistical data embodied in the District Census Handbook have to be understood from the background of the changes introduced in the 1951 census. The most important and fundamental change introduced in the 1951 census consists in the substitution of an economic classification of the people for the classification based on Religion and Communities

adopted in the past. The people were divided into two broad livelihood categories, the Agricultural and Non-Agricultural. Four agricultural classes and four non-agricultural classes were prescribed as shown below :—

Agricultural Classes—

I. Cultivators of land, wholly or mainly owned, and their dependants,

II. Cultivators of land, wholly or mainly unowned, and their dependants.

III. Cultivating labourers and their dependants.

IV. Non-cultivating owners of land, agricultural rent receivers and their dependants.

Non-Agricultural Classes—

Persons (including their dependants) who derive their principal means of livelihood from—

V. Production other than cultivation,

VI. Commerce,

VII. Transport, and

VIII. Other services and miscellaneous sources.

Each of the above eight livelihood classes were divided into three sub-classes with reference to their economic status as below : —

(i) Self-supporting persons,

(ii) Non-earning dependants, and

(iii) Earning dependants.

These livelihood sub-classes have been defined in detail in the fly-leaf notes attached to Economic Table B-I included in this Handbook.

All non-earning dependants are economically passive, and all earning dependants are economically semi-active, All self-supporting persons are ordinarily economically active but the classes and groups specified below constitute an exception to this rule :—

(1) Self-supporting persons of Agricultural Class IV,

(2) Self-supporting persons of Livelihood Class VIII who derive their principal means of livelihood from any source other than through economic activity, viz.—

(*a*) Non-working owners of non-agricultural property,

(*b*) Pensioners and remittance holders,

(*c*) Persons living on charity and other persons with unproductive occupations, and

(*d*) Inmates of penal institutions and asylums.

Economically active persons engaged in cultivation are either cultivators or cultivating labourers. Economic Table B-I gives particulars of the population classified according to the eight livelihood classes and the three sub-classes mentioned above.

Economically active persons engaged in industries and services have been classified with reference to the nature of the commodity produced or service performed. They are further divided into three sections, viz., Employers, Employees and Independent Workers.

Economic Table B-III gives particulars of the economically active persons classified under the divisions and subdivisions of industries and services of the Indian Census Economic Classification Scheme.

Table C-I, included in this Handbook covers the population of sample households and Tables C-II and C-IV cover a ten per cent sample population. The method adopted for extracting these samples has been described in detail in the fly-leaf notes attached to the relevant tables.

3. *Scheme of the Census Handbook*.—The Handbook has been divided into two parts; Part I consists of three sections, namely, Section (i) containing the general population tables (A series), the Economic Tables (B series), Summary figures for Taluks (Table E), Tables I, II and III relating to Small Scale Industrial establishments and Table L showing the incidence of leprosy; Section (ii) containing the Rural statistics, and Section (iii) containing the urban statistics, and Part II containing the Household (size) Table C-I, and Tables showing Livelihood classes and literacy by age groups (C-II and C-IV), the Social and Cultural Tables (D series) and an abstract of non-agricultural occupations in the district. Among the tables included in the Handbook, Table A-IV—Towns classified by population with variations since 1901, Economic Table B-II—Secondary means of livelihood under each livelihood class and Table C-II—Livelihood classes by age groups furnish information at the district level. The other population tables in the A-series, the summary figures for Taluks (Table E) and the infirmity Table L showing the incidence of leprosy furnish information for each taluk in the district with a district total. The rural statistics in Part I—Section (ii) furnish basic information in respect of every village and town arranged according to census tracts. In addition to the total population of the villages, and its distribution among the eight livelihood classes, information regarding the number of literates, the cultivated area, the number of small-scale industrial establishments under categories, textile and non-textile and the number of leprosy cases and doubtful cases has been included.

The urban statistics in Part I Section (iii) furnish similar information except that relating to cultivated area in respect of every unit classified as city or census town in the district with ward-wise data. All other tables included in the Handbook provide information for units called census tracts with totals for the district.

4. *Census Tracts*.—A distinctive feature of the census statistics is its rural urban break-up designed with a view to compare the conditions and characteristics of the rural and urban population. The rural areas of each district were therefore kept distinct from the urban areas. For facilitating tabulation these areas were divided into a number of rural and urban tracts. As far as possible, the rural area in each taluk was constituted into a single rural tract. In a few cases however where the taluks were small in size with reference to their population, the rural areas of more than one taluk were taken together as a single rural tract. The urban tracts have been formed out of areas declared as cities and census towns in each district. Every city was treated as a separate tract. Towns other than cities were grouped together to form non-city urban tracts. Wherever possible, the towns in each taluk were constituted into a single non-city urban tract. In cases where the towns in a taluk had a population of less than 50,000 the towns in more than one taluk were grouped

together to form a non-city urban tract. All the rural tracts in the State have been assigned numbers in one series, the non-city urban tracts in another series and the city tracts in a third series. In all the tables where the data have been furnished for tracts, the tracts have been denoted by numbers that have been assigned to them. A list of tracts into which the district has been divided and the areas comprised in each is furnished in the fly-leaf note to economic Table B-I relating to the district.

The districts, taluks and villages mentioned in the Tables and Abstracts have been shown along with the census location code numbers assigned to them for purposes of census operations.

The numbers given to the Tables in this publication correspond to those given in the State Census Report.

Elaborate notes explaining the scheme of each Table have been introduced in the fly-leaf attached to each with a view to enable the reader to get a precise idea of the data furnished in the Table.

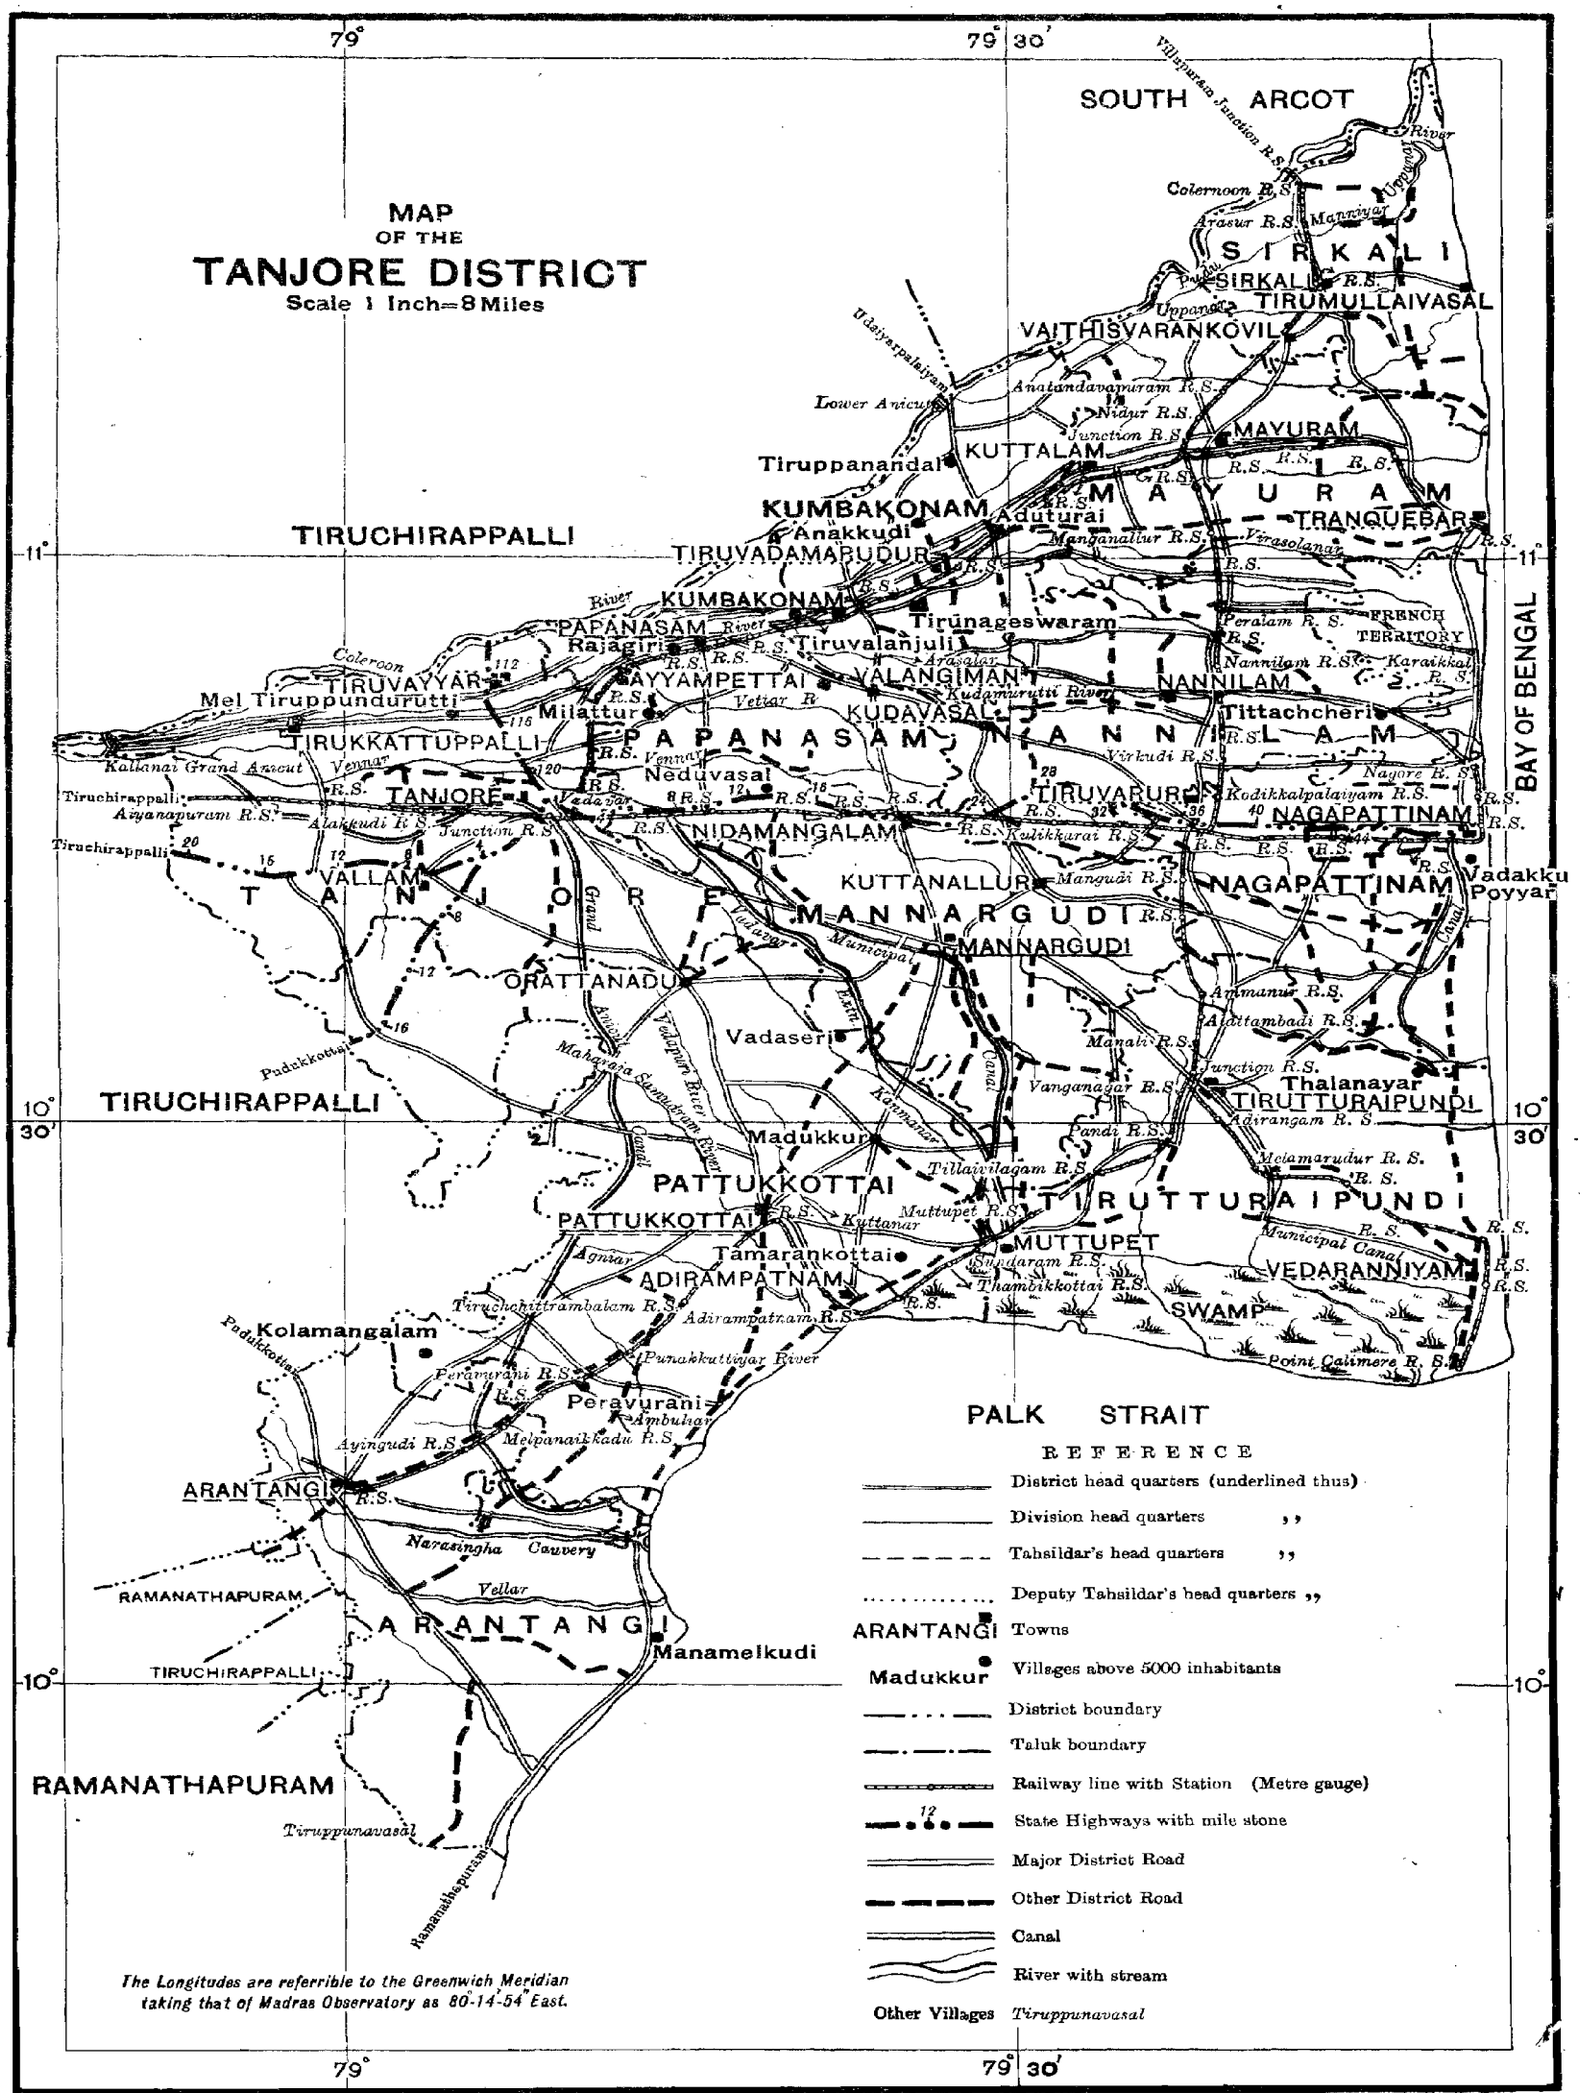

5. *Tables relating to Small-scale Industries.*—In the year 1950 a census of Small-scale Industries was instituted under the orders of the Government. The object was to get some idea about small industries such as cottage and home industries, small establishments, workshops, etc., where articles were produced, repaired or otherwise treated for sale, use or disposal and small mines. The enquiry was confined to establishments to which the Factories Act was not applicable. Individuals who worked on their own and did not employ other people were left out of account. From the data collected three Tables were prepared and they have been included in the Handbook. Information giving village-wise and ward-wise information for Small-scale Industries have been incorporated in the rural and urban statistics. The details collected and embodied in the Tables are not to be considered accurate or exhaustive, as the enumeration staff employed had not been trained for the purpose and some cases of under enumeration were noticed. However, the figures given in the Tables may be sufficient to give an insight into the nature of the industries prevalent in the different parts of the district.

6. Opportunity has been taken to put in a short introductory note detailing the salient points connected with the district, such as the physical features, climate, rainfall, irrigation and drainage facilities, roads and other communications, crop statistics, education, industries and other matters of general interest. The information contained in the introductory note is based on the materials furnished by Collectors of districts and Departments of Government. The District Gazetteer was also freely referred to. The relevent paragraph of the 1951 Census Report discussing the growth of population in the district has also been incorporated in the proper place.

A district map showing taluk boundaries, physical features, important roads and places with a population exceeding 5,000 is also attached.

It is hoped that this Handbook will serve as a book of reference on matters relating to the district and that it will be found useful both by Departments of Government and the public

INTRODUCTION

TO

TANJORE DISTRICT.

I. (*a*) *Situation and Physical Characteristics.*—The district lies on the east coast of the Madras State. It is situated between 9°·50′ and 11°·25′ of the northern latitude and 78° 45′ and 79° 50′ of the eastern longitude. On the north the river Coleroon separates it from Tiruchirappalli and South Arcot districts. On the west it is bounded by the Tiruchirappalli district and on the south by the Palk Strait and the Ramanathapuram district. The sea board on the east consists of two parts, viz., (1) the Bay of Bengal extending from the north eastern corner of the district almost in a straight line due south up to Point Calimere and (2) the Palk Strait separating west Ceylon from the main land. The district consists of the following eleven taluks comprised in six Revenue Divisions.

Name of Revenue Division.	Headquarters of the Revenue Division.	Taluks comprised in the Revenue Division.	Area in square miles.	Headquarters of the taluk.
Tanjore	Tanjore	Tanjore	421	Tanjore.

The district has within its boundaries, the small French Settlement of Karaikal, situated on the coast midway between the mouth of the Coleroon and Point Calimere. The French Settlement contains 110 villages. The taluks of Sirkali, Mayuram, Nagapattinam, Tiruthuraipundi, Pattukkottai and Arantangi about the sea.

The district consists of two natural divisions, namely, (i) the delta area and (ii) the uplands. The upland area consists of the southern part of the Tanjore taluk, the north-west and south-west portions of Pattukkottai taluk and a major portion of Arantangi taluk. The delta area consists of what are known as the old delta and the new delta. The old delta represents the area irrigated by the river Cauvery and its tributaries; while the area irrigated by the Grand Anicut canal and its branches of the Cauvery Mettur Project constitutes the new delta.

There are no hills whatever in the district. The Vallam Table Land comprising sedimentary rocks of laterite and sand stone situated to the south and south-west of Tanjore town forms a small plateau slightly above the level of the surrounding country. The old delta area is a large alluvial even plain of paddy fields diversified by groves of cocoanuts, mangoes and other trees. The level of the land in the district slopes gently from west to east. There is also a gentle slope from north to south noticeable in Mannargudi taluk and the north-eastern portion of Arantangi taluk. In Pattukkottai taluk the slope is from north-west to south-east towards the sea. The villages bordering the coast in Tiruthuraipundi taluk are sandy. There are sand dunes for a width of two miles on the coast in Nagapattinam taluk. In the south of Tiruthuraipundi taluk there is a thick growth of jungle from Vedaranyam to Muthupet intercepted by salt swamps and lagoons.

(*b*) *Rivers.*—The Cauvery is the chief river of the district. Rising in the mountains of Coorg the river traverses the Mysore State; flowing thence along the northern boundary of the Coimbatore district, the river skirts parts of the western and southern boundary of the Salem district and enters the Tiruchirappalli district. At a spot 9 miles west of

Tiruchirappalli the river goes into two branches, the northern branch bearing the name of Coleroon and the southern branch retaining the name of Cauvery. On the border of the Tanjore district the two very nearly reunite; thereafter the Coleroon takes a north-easterly course, passes along the entire northern boundary of the taluks of Tanjore, Papanasam, Kumbakonam, Mayuram and Sirkali and enters the sea at the extreme north eastern corner of the district; while the Cauvery splits itself into numerous branches to cover the whole of the delta with a vast network of rivers and irrigation channels. The parent stream flows through Tanjore, Papanasam, Kumbakonam and Mayuram taluks and debouches into the sea at Kaveripatnam about eight miles north of Tranquebar. The main branches of the Cauvery are the Vennar, the Kudamurutiyar and the Arasalar and these again branch themselves into smaller rivers.

The Vennar gives off two branches. Vadavar and Vettar in Tanjore taluk. The Vadavar flows through Tanjore, Papanasam and Mannargudi taluks and empties itself in Vaduvoor eri. The Vettar flows through Papanasam, Nannilam and Nagapattinam taluks, giving up a distributary called Odambokkiyar in Nannilam taluk. On the border of Mannargudi taluk the Vennar lets off two more branches called the Pamaniyar flowing through Mannargudi, Tiruthuraipoondi and Pattukkottai taluks and the Korayar flowing through Mannargudi and Tiruthuraipundi taluks. Still further down the Vennar supplies two more distributaries, namely, the Pandavayar and the Vellayar flowing through Mannargudi and Nagapattinam taluks.

Mulliyar and its branch Adappar and the Harichandranathi are distributaries of the Korayar flowing through Tiruthuraipundi taluk.

The Kodamuruti branch of the Cauvery gives rise to the Thirumalairajanar and the Mudikondan flowing through Papanasam, Kumbakonam and Nannilam taluks. Lower down the Kodamurutiyar bifurcates itself into two rivers and they go by the name of the Puttar and the Sholasudamaniyar. The latter flows through Papanasam and Nannilam taluks.

The Puttar flows through Papanasam and Nannilam taluks and gives off a branch called the Valappar which flows through Nannilam taluk.

The Arasalar, the third main distributary of the Cauvery flows through Papanasam, Kumbakonam and Nannilam taluks.

The Nattar and its branch the Kirtimanar are distributaries of Arasalar and flow through Kumbakonam and Nannilam taluks.

The Veerasholanar is a distributary of the Cauvery flowing through Kumbakonam and Mayuram taluks.

The Grand Anicut canal of the Cauvery Mettur Project flows through Tanjore, Pattukkottai and Arantangi taluks.

Manniar which was formerly a distributary from the Coleroon has now been given direct supply from the Cauvery. The old course from Coleroon is no longer in use.

Mudalamuthuvari and Cholagampattivari are two jungle streams in Tanjore taluk which discharge the flood water of their catchment area into the Vennar.

The Uppanar is a drainage river in Sirkali taluk.

There is a navigation channel called the Vedaranyam canal running almost parallel to the coast from Nagapattinam to Vedaranyam.

The drainage channel Chakkilian Voikkal with catchment area in Tiruthuraipundi and Nagapattinam taluks has been connected to the sea to make it function properly as a drainage course.

The other important streams in Pattukkottai taluk are the Kattar, the Nasavaniar, the Maharaja Samudram, the Agniar, the Ponaikuthiyar and the Ambuliyar and they serve as major drainages. The Kannanar is another drainage course in this taluk.

The rivers in the Arantangi taluk are merely jungle streams, the chief of which are the Narasinga Cauvery flowing west to east and the Vellar flowing parallel to it further south.

(c) *Forests.*—The forests in the district cover an area of 40·24 square miles. They are situated in Tiruthuraipundi, Pattukkottai and Arantangi taluks. The forests in Tiruthuraipundi taluk covering an extent of 38·16 square miles are reserved forests containing mangroves and scrub jungle. The extent of forest in Pattukkottai taluk is 1·51 square miles of scrub jungle consisting of estate forest taken over. The forests in Arantangi taluk comprise 0·31 square mile of estate forest taken over and 0·26 square mile of estate forest not taken over. These are fuel forests of average quality.

(d) *Climate and Rainfall.*—The atmosphere of the delta is somewhat damp. The hot season begins from March and the heat subsides after June, when water is let into the canals and fields. The thermometer drops gradually till December and January and begins to rise again from February. A statement showing the monthly mean of daily maximum and daily minimum temperature, highest recorded and lowest recorded temperature and the

mean monthly rainfall for the years 1881—1940 and the monthly mean of daily maximum and daily minimum temperature, the highest recorded and lowest recorded temperature and the monthly rainfall for the year 1951 as recorded at Nagapattinam is given below :—

The average annual rainfall and the average number of rainy days in a year for each taluk are given below :—

Taluk.	Average annual rainfall in inches.	Number of rainy days in a year.	Taluk.	Average annual rainfall in inches.	Number of rainy days in a year.
Sirkali	53·80	56·0	Mannargudi	44·86	55·8

Papanasam	42·18	50·7	Arantangi	35·33	53·5
Nannilam	48·18	53·5			

Most of the rainfall is had during the north-east monsoon from October to January. The taluks on the coast of the Bay get more rainfall than those further inland.

(*e*) *Soils.*—The northern and eastern portions of the district form the delta of the Cauvery. They comprise Kumbakonam, Mayuram, Sirkali and Nannilam taluks and parts of Tanjore, Papanasam, Mannargudi, Tiruthuraipundi and Nagapattinam taluks. The southern part of the district lies about 50 feet higher with light soils and comprises the whole of Pattukkottai and Arantangi taluks, southern portions of Tanjore and Papanasam taluks and the western portion of Mannargudi taluk.

The soils may be divided into four classes—Alluvial, regar, red and arenaceous. Alluvial and regar cover a large extent of the district, the alluvial being confined to the taluks of Tanjore, Papanasam, Kumbakonam, Mayuram and Nannilam and the regar occurs in all taluks except Pattukkottai and Arantangi. The percentage distribution of soils under 'wet' and 'dry' in each taluk of the district is given below :—

(f) Irrigation and drainage facilities and liability to famine.—The district ranks high in the State with regard to irrigation facilities. The irrigation is carried on mostly from the river Cauvery through a number of its branches and channels. The Cauvery gives an assured supply of water. After the completion of the reservoir at Mettur, water-supply for irrigation has been properly regulated with reference to the requirements of the ayacut and wastage has been minimised. The construction of the reservoir at Mettur has made it possible for the ryots to bring an additional 301,000 acres of dry land under wet cultivation. The irrigation sources in the tracts outside the delta are mostly tanks and they are found almost entirely in the upland taluks of Pattukkottai, Tanjore and Arantangi. There are many private wells irrigating limited extents.

Sirkali taluk.—The taluk is irrigated partly by the Cauvery and partly by the Coleroon. The supply from Coleroon is got from the South Rajan channel taking off from an anicut built across the Coleroon called the Lower Anicut. Pudumanniyar branching from the Coleroon receives also supply from the Cauvery. There are some channels like Poraivoikal, Kazhumalayar, Manikarnikiyar which serve both as irrigation and drainage channels. Being at the tail end of the Delta, the taluk gets its supply last. The taluk is a low lying tract subject to drainage difficulties. Improvements to the existing drainage are under way. Famine is practically unknown in the taluk.

Mayuram taluk.—The Manniar and the South Rajan Channel irrigate the northern part of the taluk. The Cauvery and its branches serve the southern portion of the taluk. The tail end suffers from drainage difficulties during heavy rains. Rectification of defects in drainage is being carried out from time to time. The taluk is immune from famine.

Kumbakonam taluk.—A network of channels taking off from the Cauvery and its branches irrigate this taluk. The South Rajan Channel from the Lower Anicut irrigates a small area in this taluk also. Famine is unknown in the area.

Tanjore taluk.—The river Cauvery, its branch the Vennar and the Grand Anicut Canal of the Cauvery Mettur Project irrigate the northern and eastern portions of the taluk. Uyyakondan extension channel, a branch of the Kattalai high level channel of the Tiruchirappalli district supplements the supply from the rainfed streams of the upland region. There are 197 minor irrigation works, mostly rainfed, in the upland tracts of the taluk. The upland portions of the taluk are liable to drought in the event of failure of the monsoon. But the people do not suffer on account of this, as they migrate to the adjoining deltaic parts of the district for food and employment.

Papanasam taluk.—The entire taluk is under wet cultivation with good facilities for irrigation from the Cauvery and its branches. There is no possibility of famine in this taluk.

Nannilam taluk.—The taluk is irrigated by the branches of the Cauvery and the Vennar which are also used for drainage. The taluk does not suffer much from drainage difficulties. There is no possibility of famine in this taluk.

Mannargudi taluk.—The north-western portion of the taluk which is comparatively high in level was originally mostly a dry area. The advent of the Cauvery-Mettur Project has made it possible to bring the entire area under wet cultivation. The rivers Vennar, Koraiyar, Pamaniyar, and the Vadavar Extension channel of the Cauvery Mettur Project are the main irrigation sources. There are no drainage difficulties as the taluk gently slopes from north to south, and west to east. The taluk is not liable to famine.

Nagapattinam taluk.—The taluk is served by the Vennar, the Vettar, the Odambokiar, the Pandavayar, the Kattar, and the Vellayar. Improvements to the Chakkilian Voikkal, a major drain, have been recently executed. In a few coastal villages which are higher in level than the villages to their west, paddy is raised with the help of monsoon rains. Dry crops are also raised in these villages with the aid of spring water from small ponds dug in the fields. The taluk is not liable to famine.

Pattukkottai taluk.—River Pamaniar irrigates about a dozen villages in the eastern fringe of the taluk. The Grand Anicut Canal irrigates the eastern and southern portions of the taluk. The north western part of the taluk and a small portion in the south-west are dry areas with a few rainfed minor irrigation tanks. In the event of failure of crops under the rainfed tanks the people migrate to the deltaic areas. There are a number of jungle streams draining the taluk, the chief of which are the Agniar, the Maharaja Samudram and the Kannanar.

Tiruthuraipundi taluk.—The Vennar, the Harischandranadhi, the Mulliar, the Adappar, the Korayar and the Pamaniyar all belonging to the Cauvery river system irrigate the taluk. The extension of

irrigation partly by pumping and partly by gravitation under the Mulliar river is a special feature undertaken recently by which nearly 5,000 acres of manavari lands are sought to be brought under wet cultivation. The coastal villages are dependent on rains. The taluk usually suffers from drainage congestion, particularly during the North-East Monsoon and considerable damage to crops is caused by submersion of the crops. But improvements which are now being effected are expected to give much relief. The taluk is not liable to famine.

Arantangi taluk.—The Grand Anicut Canal and its extension channel irrigate about one-third of the area of this taluk. Irrigation in the rest of the taluk is carried on from rainfed tanks. The upland areas are liable to drought in the event of the failure of the rains, but the people manage the situation by migrating to the neighbouring taluks.

The particulars of the number of Minor Irrigation works in each taluk and the area served by them and the area served by the major irrigation works are furnished below :—

(*g*) *Area cultivated with food and commercial crops.*—Paddy is the chief food crop of the district and is raised extensively throughout the district. Cholam, Cumbu, Ragi, Varagu and Maize are cultivated in small areas. Greengram, Redgram and Blackgram are the pulses cultivated in the district. Chillies, Gingelly Groundnut, cotton and tobacco are raised on small extents here and there. Cocoanut and plantain are the main garden crops, grown in backyards and riversides. A statement showing the area of the food-crops, pulses and commercial crops cultivated in the various taluks of the district in 1949–50 which was a normal year for the district is furnished in *Annexure I.*

(*h*) *Communications*—(i) *Roads.*—The district is connected with the Tiruchirappalli district by roads leading to Udayarpalayam in the north-west, Tiruchirappalli City in the west and Pudukkottai in the south-west. The district has 3,421 miles of roads comprising 101 miles of Provincial Highways, 953 miles of Major district roads, 641 miles of other district roads, 1,065 miles of village roads, 408 miles of Public Works Department roads and 253 miles of Municipal roads. The taluk wise distribution of the roads except Public Works Department and Municipal roads is given below :—

The Provincial Highways and Public Works Department roads are maintained in fair condition throughout the district. The District Board roads in Nagapattinam, Mannargudi, Mayuram and portions

of Tiruthuraipundi taluks are not in good condition. The roads in Tanjore, Papanasam, Kumbakonam, Sirkali, Pattukkottai and Arantangi taluks are maintained in fair condition. The village roads are generally in a bad state. The maintenance of roads is a problem owing to great difficulty in getting metal at reasonable cost. Acquisition of lands for new roads is being attended to.

(ii) *Railways.*—The district has 302 miles of Metre-gauge line of the Southern Railway of which 10¼ miles are in French territory. The main line from Madras to Dhanushkodi runs via Sirkali, Mayuram, Kumbakonam, Papanasam and Tanjore taluks. A branch line from Tanjore via Nidamangalam, Tiruvarur and Nagapattinam runs up to Nagore. From Mayuram a branch line proceeds to Tranquebar and another line up to Karaikudi in Ramanathapuram district passing through Peralam, Tiruvarur, Tiruthuraipundi, Pattukkottai and Arantangi. From Peralam a branch line takes off to Karaikal. From Thiruthuraipundi a branch line takes off to Point Calimere. A branch line connects Nidamangalam with Mannargudi. All the taluk headquarters are connected by railway.

There is a railway out-agency at Tiruvaiyaru for passengers, parcels and goods served by Tanjore Junction and an out-agency at Tirukattupalli for parcels and goods served by Budalur Railway Station. There is an out-agency at Vallam for parcels and goods served by Tanjore Junction.

(iii) *Posts and Telegraphs.*—There are Post and Telegraph Head Offices at Nagapattinam, Tanjore and Kumbakonam. There are 55 Sub-Post and Telegraph offices, 33 non-combined Sub-Post offices and 641 branch Post offices in the district. Their talukwise distribution is given below :—

"The recorded population has registered an increase of 16·4 per cent during the decade 1941–51 as against 7·4 per cent in the previous decade. This is a purely agricultural district and constitutes the heart of the Cauvery delta. The Cauvery-Mettur Project came into operation during the decade 1931–40. Being a heavy surplus district for rice, the district has prospered very well indeed during the decade 1941–51. Even normally, this district requires a lot of extra labour during the transplantation season, i.e., during the months of July—September and the harvesting season, January—March. But, owing to the food scarcity during the decade 1941–51, and particularly on account of the failure of the north-east monsoon since 1947, there has been a large-scale immigration of labouring classes for work and food. The immigrant population in this district, as enumerated at this Census is 172,500. The chief contributors are Ramanathapuram district, 65,076; Tiruchirapalli district, 41,258 and South Arcot district, 21,558. The number of people who have gone out of the district is not far less: 139,872—52,038 to Tiruchirappalli, 33,548 to Madras City, 18,018 to South Arcot district, 5,548 to Chingleput district and 4,329 to Coimbatore district. This number includes of course a certain number of temporary absentees, but the rest are mostly persons who are employed in the services or are engaged in professional or business activities.

The large increase of 33 per cent in Pattukkottai taluk reflects the fact that this is the taluk, which has been most benefited by the extension of irrigation made possible by the Cauvery-Mettur Project. The same cause explains the large increase in Arantangi taluk (18·9 per cent). The low increase of 9·9 per cent in Nagapattinam is due to the migration to Malaya from this taluk.

Papanasam taluk has shown the lowest increase (7·4 per cent) in this district. It is a purely agricultural taluk and is surrounded by the much more attractive and advanced taluks of Tanjore, Kumbakonam and Mannargudi."

(Extracted from the Census Report—Part I.)

(ii) *Vital Statistics.*—Particulars of yearly births and deaths and deaths due to various causes in the district for the decennium 1941–50 are given in Annexure II. The district has returned an average birth-rate of 27·7 per mille during the decade against the rate of 31·7 for the State. The birth-rate gradually decreased from 28·75 in 1941 to 24·43 in 1945 and then increased to 29·20 in 1951. The average death-rate was 22·1—a little more than the average rate of 21·2 for the State. Cholera is epidemic in the district and has had its toll in all the years except 1941, 1945 and 1946. The deaths from smallpox in the district in 1944-45 were very high and represented three-fourths of total deaths from that disease during the decade. The average mortality rate from fevers is 2·0 per mille and is very low when compared to the average rate of 5·4 for the State. The average death-rates from dysentery and diarrhœa and respiratory diseases are less than the normal for the State. The average maternal mortality rate of 13·8 has been very high as compared with that of 8·1 per 1,000 births for the State.

V. *Items of general importance.*—Nagapattinam is a sea-port town with wharf. Ships are anchored off the coast. Coastal steamers call at the port to discharge and take in cargo. The passenger steamer to the Federated Malay States regularly calls at the port.

The Brahadeswarar temple at Tanjore is a fine piece of ancient architecture. The Bull 'Nandi' carved out of one solid piece of rock and installed in front of the idol is a remarkable piece of sculpture.

The Saraswathi Mahal Library in the Tanjore Palace contains ancient and rare manuscripts.

There is a Tuberculosis Sanatorium at Singipatti in Tanjore taluk.

The Mahamakham festival at Kumbakonam takes place once in 12 years and it attracts very large crowds from all over India.

The Dharmapuram Mutt and Tiruvadudurai Mutt in Mayuram taluk are devoted to Saivite religion and culture.

The Dargah at Nagore and the Roman Catholic Church at Velanganni in Nagapattinam taluk are famous centres of pilgrimage attracting people of all religions.

Tanjore district is reputed as the home of the Carnatic Music. Saint Thyagaraja and Muthuswami Dikshitar, two of the music trinities were born in Tanjore district. They composed and propagated their songs there. An annual music festival is held in January at Tiruvaiyaru in Tanjore taluk in honour of Sri Thygaraja.

A—GENERAL POPULATION TABLES.

A-I—Area, Houses and Population.

This table shows for the rural and urban areas of each taluk and for the district, the area, the number of inhabited villages and towns, occupied houses and the total population with distribution by sex.

2. The district area shown in column (2) of this table is that supplied by the Surveyor-General of India. Area figures furnished by the Central Survey Office, Madras, have been adopted for the taluks. The total area of the taluks as furnished by the Central Survey Office, Madras, shown within brackets in column 2 differs from the area of the district furnished by the Surveyor-General.

3. "Village" is the revenue administrative unit within defined boundaries. This table gives particulars in respect of all villages containing one or more groups of habitations. Villages with no habitations are not included in this table.

4. "Town" is a place of usually not less than 5,000 inhabitants, possessing distinct urban characteristics. Cantonments have been treated as forming part of the towns in which they are situated. The following places not having the population minimum of 5,000 have been treated as towns for the reason that they possess definitely urban characteristics :—

(1) Needamangalam in Mannargudi taluk.

(2) Vaitheeswarankoil in Sirkali taluk.

5. "*House.*"—Every dwelling with a separate main entrance has been treated as a house for census purposes.

18. TANJORE DISTRICT.

A-II—Variation in Population during fifty years.

This table compares the population, of the district and of each taluk in the district as ascertained at the Census of 1951 with the corresponding figures of the five previous Censuses. The figures recorded at the previous Censuses have been adjusted for subsequent territorial changes, if any, in order to afford a correct basis for comparison. The adjusted figures show the population of taluks and the district as constituted at present.

18. TANJORE DISTRICT.

A-IV—Cities and Towns classified by Population with variations since 1901.

This table shows the population and distribution of sex of cities and towns of the district at each of the last six enumerations.

2. The following towns have been treated as cities for the 1951 Census :—

(1) Tanjore.

(2) Kumbakonam.

(3) Nagapattinam.

3. The cities and towns have been arranged in this table according to their population in 1951 under the following six classes :—

Class.	Limits of Population.
I	100,000 and over.
II	50,000 to 100,000.
III	20,000 to 50,000.
IV	10,000 to 20,000.
V	5,000 to 10,000.
VI	Under 5,000.

4. Where possible, the former population of places treated for the first time as towns in 1941 and at this Census has been extracted from Village Statistics. Where this could not be done, the columns have been left blank.

5. The population of towns for previous Censuses are those then recorded. No adjustments have been made for intervening changes in area.

6. Municipality, Panchayat and Cantonment are indicated by the use of the letters (M), (P), (C), respectively within brackets.

7. Towns newly appearing at this census have been printed in *italics*.

18. TANJORE DISTRICT.

A-V—Towns arranged talukwise with Population by Livelihood Classes.

This table shows the analysis of the Urban population in towns by livelihood classes, instead of by communities as in the previous Censuses.

2. Under the Indian Census Economic Classification Scheme, the people have been divided into two broad livelihood categories, viz., the Agricultural classes and the Non-agricultural classes. There are four Agricultural classes and four Non-agricultural classes as shown below :—

(i) *Agricultural Classes.*

I. Cultivators of land wholly or mainly owned and their dependants.

II. Cultivators of land wholly or mainly unowned and their dependants.

III. Cultivating labourers and their dependants.

IV. Non-cultivating owners of land, agricultural rent receivers and their dependants.

(ii) *Non-Agricultural Classes.*

Persons (including dependants) who derive their principal means of livelihood from—

V. Production (other than cultivation).

VI. Commerce.

VII. Transport.

VIII. Other services and miscellaneous sources.

3. In this table the figures for the agricultural livelihood classes I to III are not given separately but have been clubbed together.

4. The towns in each taluk of the district are arranged in the order of their population as in Table A-IV.

5. Municipality, Panchayat and Cantonment are indicated by the use of the letters (M), (P), (C), respectively within brackets.

6. For the definition of a "Town" see fly-leaf to Table A-I.

7. Towns newly appearing at this Census have been printed in *italics*.

18. TANJORE DISTRICT.

E—Summary figures by taluks.

The data contained in this table have been given for each taluk in the district.

2. The areas shown in column (2) of the table for the district and the taluk "total" are the latest figures furnished by the Central Survey Office, Madras. The areas given for "urban" are those furnished by the District Officers. The areas for "rural" have been obtained by deducting the figures for "urban" from those for district and taluk "total."

3. The district area furnished by the Surveyor-General, India, which has been shown in Table A-I, could not be adopted in this table as Talukwise figures have not been furnished by him. The district areas given by the Surveyor-General differ in varying degrees from those furnished by the Central Survey Office, Madras.

4. Previous census figures of population have been adjusted with reference to the merger of States, transfer of enclaves, and inter district transfers, if any. The rural and urban population figures have been taken as they were at the 1941 and 1931 censuses and as they are at the present Census, regardless of the changes of rural areas into urban areas and *vice versa* from Census to Census, for the purpose of calculating percentage variation between 1931 and 1941 and between 1941 and 1951. For calculating density for "rural" and "urban" for 1941, the areas of the towns newly formed at the present Census rounded to the nearest square mile have been deducted from the areas given for urban in column (2) for 1951 and added to the areas given for "rural," in the district and taluks where new towns have been recognized.

3. The livelihood classification is based on the principal means of livelihood of the self-supporting persons, the principal means of livelihood for earning and non-earning dependants being the same as that of the self-supporting persons on whom they are dependant.

4. "The principal means of livelihood" is the means of livelihood which provides the largest or the major part of the income in the case of self-supporting persons who have more than one means of livelihood. In the case of other self-supporting persons, it is the only means of livelihood.

5. A person has been regarded as "Self-supporting" if the income secured by the person is sufficient at least for his (or her) own maintenance at the level of living and adopted by him (or her) at the time of the Census. The income secured may be in cash or kind. Anyone who is not a "Self-supporting" person in this sense has been regarded as a dependant. An "earning" dependant is a person who secures an income which is not sufficient to support him (or her). A person who does not secure any income either in cash or kind, is a "non-earning" dependant.

6. The non-earning dependants include persons performing housework or other domestic or personal services for other members of the same family household, but do not include "unpaid family workers" or persons who take part along with the members of the family household in carrying on cultivation or a home industry as a family enterprise. These latter persons have been classed as either self-supporting or earning dependants according to the share of income attributable to them.

7. The self-supporting persons shown in Livelihood Class VIII include also persons who derive their income otherwise than through productive activity, i.e., persons coming under the following groups, details for which are given in the fly-leaf to Economic Table B-III :—

(1) Persons living principally on income from non-agricultural property ;

(2) Persons living principally on pensions, remittances, scholarships and funds ;

(3) Inmates of jails, asylums, alms, houses and recipients of doles ;

(4) Beggars and vagrants ; and

(5) All other persons living principally on income derived from non-productive activity.

18. TANJORE DISTRICT.

B-II—Secondary means of Livelihood.

This table gives for the district the number of persons in each of the eight livelihood classes mentioned in Economic Table B-I, who possess a secondary means of livelihood; and cross classifies them (according to the nature of such means of livelihood) under the same eight livelihood classes.

2. The secondary means of livelihood shown for self-supporting persons is the means of livelihood next in importance to their principal means of livelihood. In respect of earning dependants, it is the means of livelihood which provides the earning, or the largest part of their income if they have more than one source of income.

3. Non-earning dependants and self-supporting persons who have no secondary means of livelihood are excluded from this Table.

18. TANJORE DISTRICT.

B-III—Employers, Employees and Independent Workers in Industries and Services by Divisions and Subdivisions.

This table gives figures for each census tract in the district. The areas comprised in each census tract have been specified in the fly leaf to Table B-1. In this table the self-supporting persons in the four Non-agricultural classes given in Economic Table B-I are distributed in the various divisions and subdivisions of Industries and services under the Indian Census Economic Classification Scheme, according to their secondary economic status, namely, Employer, Employee, and Independent worker.

2. (An) Employer (is) a person who employs other persons in order to carry on the business from which he secures his livelihood and pays them a salary or wage in cash or kind.

3. (An) Employee (is) a person who ordinarily works for some other person for a salary or a wage, whether in cash or in kind in order to earn his livelihood.

4. (An) Independent worker (is) a person who works on his own without being employed by anyone for a salary or wage and who does not also employ anyone else in order to earn his livelihood.

5. Under the New Indian Census Economic Classification Scheme, all Employers and Independent workers have been classified with reference to the commodity produced or services performed by them individually. As regards Employees, all persons engaged in Production, Commerce, or Transport (and not being domestic servants) have been classified with reference to their own activity and without reference to that of their employer. Domestic servants have been classified in one subdivision without reference to the nature of their work. All other Employees (including all managerial and supervisory employees, clerical services, messengers, watchmen and unskilled labour of every description) have been classified with reference to the commodity produced or services rendered by their Employers.

6. The Non-agricultural classes classified in Economic Table B-I correspond to the divisions and subdivisions into which they are distributed in this table as follows :—

Livelihood class.	Division and Subdivisions of the I.C.E.C. Scheme.
Class V—Production other than cultivation.	Division 0.—Primary Industries not elsewhere specified. Division 1.—Mining and Quarrying. Division 2.—Processing and Manufacture of Foodstuffs, Textiles, Leather and products thereof. Division 3.—Processing and Manufacture—Metals, Chemicals and Products thereof. Division 4.—Processing and Manufacture—Not elsewhere specified.
Class VI—Commerce.	Division 6.—Commerce.
Class VII—Transport.	Subdivisions 7·0 to 7·4 of Division 7.—Transport, Storage and Communications.
Class VIII—Other Services and miscellaneous sources.	Division 5.—Construction and Utilities. Division 7.—Transport, Storage and Communications with the exception of subdivisions 7·0 to 7·4. Division 8.—Health, Education and Public Administration ; and Division 9.—Services not elsewhere specified.

Class VIII also includes persons who derive their principal means of livelihood from miscellaneous sources (otherwise than through economic activity), e.g., income from investments, pensions and family remittances, proceeds of begging and other unproductive activities. These are not, however, included in this table as it is limited to Industries and Services. Hence, there will be a difference to this extent between the total self-supporting persons of the Non- gricultural classes in Economic Table B-I and the total of this table. The reconciliation will be effected by adding the figures given in the next paragraph.

7. Details of persons who derive their principal means of livelihood otherwise than through productive activity and who are included under livelihood Class VIII mentioned in the fly-leaf to Economic Table B-I are given below :—

SMALL-SCALE INDUSTRIES.

I—Distribution of Small-scale Industries by Tracts.

This table gives for each census tract, the number of small-scale industrial establishments under categories, non-textile and textile, with details for perennial and seasonal establishments.

2. The table covers only those establishments, to which the Factories Act does not apply. It relates, therefore, to all associate activities, where articles are produced, repaired or otherwise treated for sale, use or for disposal. Small mines not covered by the Indian Mines Act have also been included. The table does not include plantation industries of any kind.

3. The areas covered by each census tract in the district denoted by its number in column (1) have been given in the fly-leaf to Economic Table B-I.

Tract No.	Total number of establishments.			Number of non-textile establishments.				Number of textile establishments.			
	Total.	Non-Textile.	Textile.	Perennial (nine months and over).	Six months and over but less than nine months.	Three months and over but less than six months.	Less than three months.	Perennial (nine minths and over).	Six months and over but less than nine months.	Three months and over but less than six months.	Less than three months.

Section (ii)

Rural Statistics.

This is an abstract giving a complete list of villages and towns in each taluk in the district with sex-wise distribution of population in each livelihood class in the villages alone. Among the other items of statistical information furnished, those relating to occupied houses, households, inmates of institutions and houseless persons and literates, were obtained from the National Register of Citizens prepared for each village from the information recorded in the enumeration slips. Village-wise statistics of textile and non-textile establishments collected in the course of the Census of Small-scale Industries and the number of leprosy cases and doubtful cases are also given in the abstract.

2. For detailed explanation of the livelihood classes I to VIII see fly-leaf to general population Table A-V.

3. The areas included in each census tract in the district have been furnished in the fly-leaf to Table B-I.

4. A list of villages with a population exceeding 5,000 but treated as rural is given below :—

PART II

C—HOUSEHOLD AND AGE (SAMPLE) TABLES.

C-I—Household (size).

This table has been prepared in respect of a population covering the members of sample households selected from the entries in the National Register of Citizens on the basis of one household for every one thousand households. The sample households selected include roughly every tenth household in every hundredth house-numbering block in the Rural areas and every fiftieth household in every twentieth house-numbering block or locality in Urban areas.

2. The Agricultural and the non-agricultural classes refer to the four agricultural and the four non-agricultural classes given in Table A-V. The Backward Classes include the Scheduled Castes, the Scheduled Tribes and other classes not treated as non-backward by the State Government for the purpose of 1951 Census. Anglo-Indians are included among the non-backward classes.

3. Columns (2) to (5) of the table relate to the households and household population in each tract in the district while columns (6) to (17) relate to the sample households selected.

4. The figures have been given for each Census tract vide fly-leaf to Table B-I in the district.

C-II—Livelihood Classes by Age-groups.

This table shows the livelihood distribution by age-groups for Rural, Urban and District totals in respect of a sample population based on a ten per cent sample taken out when the enumeration slips were initially sorted. The ten per cent sample was taken out as follows :—

Each enumeration pad which consisted generally of 100 enumeration slips was broken and the slips relating to displaced persons which had been noticed during the process of the preliminary scrutiny were removed from the pack of slips for being dealt with separately. The pack was then "cut" as in a card-game. The lower portion was placed above the upper portion and the slips were dealt into two pigeon holes one marked "G" and the other marked "S" as follows :—

The first five slips were placed in the pigeon hole "G" then one slip was placed in the pigeon hole "S." Thereafter for every nine slips placed in the pigeon hole "G," one slip was placed in the pigeon hole "S" until the total number of slips left was less than 9 and these residuary slips were all put into hole "G." All the slips contained in the pigeon hole marked "S" were taken out, counted and marked as 'Sample' slips.

2. No smoothing formula has been adopted in preparing the table as in previous Censuses and the figures have been tabulated as actually returned in suitable age-groups.

3. The figures under age '0' represent infants below one year.

C-IV—Age and Literacy.

This is yet another table prepared in respect of the ten per cent samples of the general population (vide fly-leaf to Table C-II).

2. Age groups 0 and 1 to 4 given in Table C-II have been combined into one age group, and the age group 5 to 14 has been split into two sub-groups 5 to 9 and 10 to 14. Persons of age-group 0 to 4 are treated as illiterate.

3. The figures are given for each census tract denoted by its number in column (1). The areas covered by each census tract in the district have been specified in the fly-leaf to Table B-I.

4. 'Literates' are those who are able to read and write any simple letter in any language.

5. Persons who are partly literate, i.e., persons who are able to read only, have been included among the illiterates. Details for such persons are give below:—
