PREFACE

The Government used to compile and publish District Manuals for each district prior to 1905. The manuals became obsolete within a few years of their publication, containing as they did not only matter of a more or less permanent character such as physical characteristics, history, religion and ethnography, as also statistical matters which soon became out of date. The Government decided to replace the District Manuals by another publication known as the District Gazetteer, consisting of two volumes, A and B. The A volume contained descriptive matter and such general figures, as might be necessary to explain the text, and the B volume contained detailed statistics. They also decided that the B volume should be brought out periodically, especially after each decennial census. Between 1905 and 1927 A volumes for thirteen districts were published. In 1927 they were discontinued. B volumes for all the districts were published between 1906 and 1915. They were continued to be published even after the 1931 census. They were not published after the 1941 census.

Village Statistics, containing the results of the census for every village in the State, were first compiled and published in 1872, at the instance of Mr. C. E. Gover, who was then the Census Officer in Madras. His successor, in 1882, considered that this publication led to needless expenditure and trouble in printing the tables villagewar, but the Government decided that the Village Statistics should continue to be published. The practice of issuing Village Statistics at every census was followed subsequently. The Village Statistics merely showed the number of occupied houses and population of each village and town by religions.

The idea of preparing the present volume, viz., the District Census Handbook for each district was put forward by Sri R. A. Gopalaswami, I.C.S., Registrar-General, India, and ex-officio Census Commissioner of India, as part of a plan intended to secure an effective method of preserving the census records prepared for areas below the District level. He proposed that all the district census tables and census abstracts prepared during the process of sorting and compilation should be bound together in a single manuscript volume, called the District Census Handbook, and suggested to the State Governments that the handbook (with or without the addition of other useful information relating to the district) should be printed and published, at their own cost, in the same manner as the Village Statistics in the past. In accepting this suggestion, the Government of Madras decided to print and publish the more important portion of statistical data relating to the district and to preserve the rest of the records in a manuscript volume for any future use, to which they may be put.

2. The statistical data embodied in the District Census Handbook have to be understood from the background of the changes introduced in the 1951 census. The most important and fundamental change introduced in the 1951 census consists in the substitution of an economic classification of the people for the classification based on Religion and Communities

adopted in the past. The people were divided into two broad livelihood categories, the Agricultural and non-Agricultural. Four agricultural classes and four non-agricultural classes were prescribed as shown below :—

Agricultural Classes—

I. Cultivators of land, wholly or mainly owned, and their dependants,

II. Cultivators of land, wholly or mainly unowned, and their dependants,

III. Cultivating labourers and their dependants,

IV. Non-cultivating owners of land, agricultural rent receivers and their dependants.

Non-Agricultural Classes—

Persons (including their dependants) who derive their principal means of livelihood from—

V. Production other than cultivation,

VI. Commerce,

VII. Transport, and

VIII. Other services and miscellaneous sources.

Each of the above eight livelihood classes were divided into three sub-classes with reference to their economic status as below :—

(i) Self-supporting persons,

(ii) Non-earning dependants, and

(iii) Earning dependants.

These livelihood sub-classes have been defined in detail in the fly-leaf notes attached to Economic Table B-I included in this Handbook.

All non-earning dependants are economically passive, all earning dependants are economically semi-active. All self-supporting persons are ordinarily economically active, but the classes and groups specified below constitute an exception to this rule :—

(1) Self-supporting persons of Agricultural Class IV,

(2) Self-supporting persons of Livelihood Class VIII, who derive their principal means of livelihood from any source other than through economic activity, viz.—

(*a*) Non-working owners of non-agricultural property ;

(*b*) Pensioners and remittance holders ;

(*c*) Persons living on charity and other persons with unproductive occupations ; and

(*d*) Inmates of penal institutions and asylums.

Economically active persons engaged in cultivation are either cultivators or cultivating labourers. Economic Table B-I gives particulars of the population classified according to eight livelihood classes and three sub-classes mentioned above.

Economically active persons engaged in industries and services have been classified with reference to the nature of the commodity produced or service performed. They are further divided into three sections, viz., Employers, Employees and Independent Workers.

Economic Table B-III gives particulars of the economically active persons classified under the divisions and subdivisions of industries and services of the Indian Census Economic Classification Scheme.

Table C-I included in this Handbook covers the population of sample households and Tables C-II and C-IV cover a 10 per cent sample population. The method adopted for extracting these samples has been described in detail in the fly-leaf notes attached to the relevant tables.

3. *Scheme of the Census Handbook.*—The Handbook has been divided into two parts ; Part I consists of three sections, namely, Section (i) containing the general population tables (A-series), the Economic Tables (B series), Summary figures for Taluks (Table E), Tables I, II and III relating to Small-scale Industrial establishments and Table L showing the incidence of leprosy ; Section (ii) containing the Rural statistics, and Section (iii) containing the Urban statistics ; and Part II containing the Household (size) Table C-I, and Tables showing Livelihood classes by age groups and literacy (C-II and C-IV), the Social and Cultural Tables (D-series) and an abstract of non-agricultural occupations in the district. Among the tables included in the Handbook, Table A-IV Towns classified by population with variations since 1901, Economic Table B-II—Secondary means of livelihood under livelihood class and Table C-II—Livelihood classes by age groups furnish information at the district. The other population tables in the A-series, the summary figures for Taluks (Table E) and the infirmity (Table L) showing the incidence of leprosy furnish information for each taluk in the district with a district total. The rural statistics in Part I—Section (ii) furnish basic information in respect of every village and town arranged according to census tracts. In addition to the total population of the villages, and its distribut on among the eight livelihood classes, information regarding the number of literates, the cultivated area, the number of small scale industrial establishments under categories, textile and non-textile and the number of leprosy cases and doubtful cases has been included.

The urban statistics in Part I, Section (iii) furnish similar information except that relating to cultivated area in respect of every unit classified as city or census town in the district with ward-wise data. All other tables included in the Handbook provide information for units called census tracts with totals for the district.

4. *Census Tracts.*—A distinctive feature of the census statistics is its rural urban break up designed with a view to compare the conditions and characteristics of the rural and urban population. The rural areas of each district were therefore kept distinct from the urban areas. For facilitating tabulation these areas were divided into a number of rural and urban tracts. As far as possible, the rural area in each taluk was constituted into a single rural tract. In a few cases however where the taluks were small in size with reference to its population, the rural areas of more than one taluk were taken together as a single rural tract. The urban tracts have been formed out of areas declared as cities and census towns in each district. Every city was treated as a separate tract. Towns other than cities were grouped together to form non-city urban tracts. Wherever possible, the towns in each taluk were constituted into a single non-city urban tract. In cases where the towns in a taluk had a population of less than 50,000 the towns in more than one taluk were grouped

together to form a non-city urban tract. All the rural tracts in the State have been assigned numbers in one series, the non-city urban tracts in another series and the city tracts in a third series. In all the tables where the data have been furnished for tracts, the tracts have been denoted by numbers that have been assigned to them. A list of tracts into which the district has been divided and the areas comprised in each is furnished in the fly-leaf note to economic Table B-I relating to the district.

The districts, taluks and villages mentioned in the Tables and Abstracts have been shown along with the census location code numbers assigned to them for purposes of census operations.

The numbers given to the Tables in this publication correspond to those given in the State Census Report.

Elaborate notes explaining the scheme of each Table has been introduced in the fly-leaf attached to each with a view to enable the reader to get a precise idea of the data furnished in the Tables.

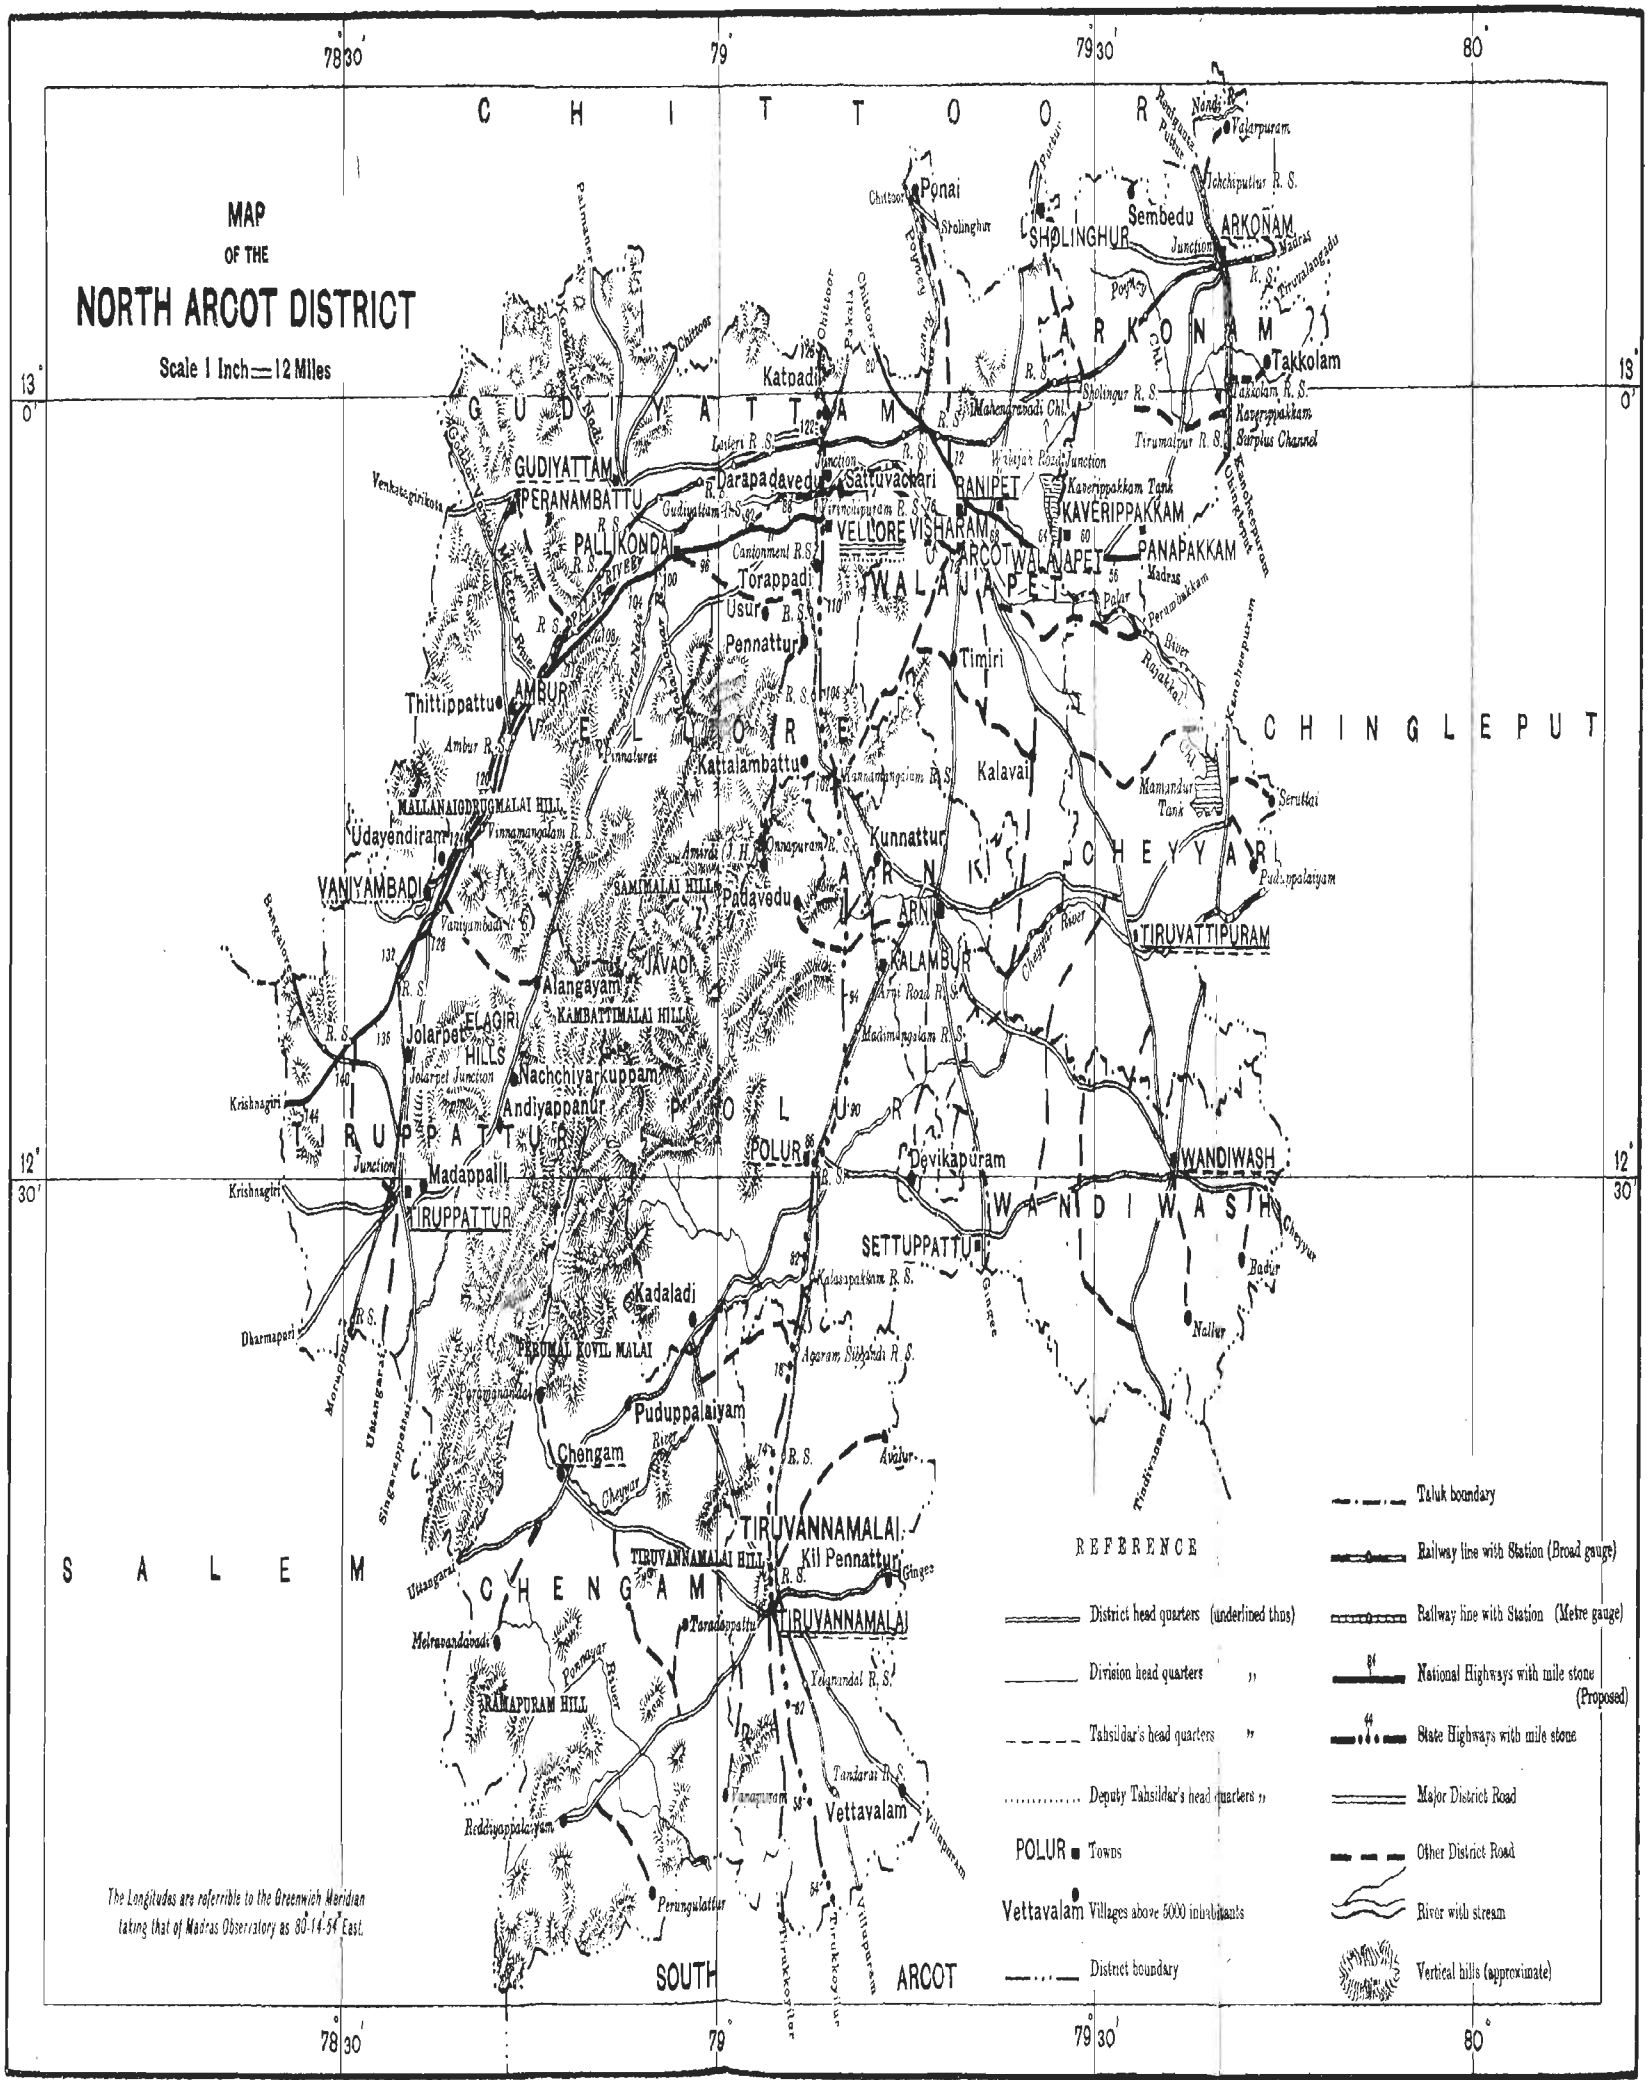

5. *Tables relating to Small-scale Industries.*—In the year 1950 a census of Small-scale Industries was instituted under the orders of the Government. The object was to get some idea about small industries such as cottage and home industries, small establishments, workshops, etc., where articles were produced, repaired or otherwise treated for sale, use or disposal and small mines. The enquiry was confined to establishments to which the Factories Act was not applicable. Individuals who worked on their own and did not employ other people were left out of account. From the data collected three Tables were prepared and they have been included in the Handbook. Information giving villagewise and wardwise information for Small-scale Industries have been incorporated in the rural and urban statistics. The details collected and embodied in the Tables are not to be considered accurate or exhaustive, as the enumeration staff employed had not been trained for the purpose and some cases of underenumeration were noticed. However, the figures given in the Tables may be sufficient to give an insight into the nature of the industries prevalent in the different parts of the district.

6. Opportunity has been taken to put in a short introductory note detailing the salient points connected with the district, such as the physical features, climate, rainfall, irrigation and drainage facilities, roads and other communications, crop statistics, education, industries and other matters of general interest. The information contained in the introductory note is based on the materials furnished by Collectors of districts and Departments of Government. The District Gazetteer was also freely referred to. The relevent paragraph of the 1951 Census Report discussing the growth of population in the district has also been incorporated in the proper place.

A district map showing taluk boundaries, physical features, important roads and places with a population exceeding 5,000 is also attached.

It is hoped that this Handbook will serve as a book of reference on matters relating to the district and that it will be found useful both by Departments of Government and the public.

INTRODUCTION TO NORTH ARCOT DISTRICT.

I. (*a*) *Situation and physical characteristics.*—The North Arcot district lies between 12° and 13° 15′ of the northern lattitude and 78° 25′ and 79° 50′ of the eastern longitude. The district is bounded on the north by the Chittoor district, on the east by the Chingleput district, on the south by the South Arcot district and on the west by the Salem and Chittoor districts. The district consists of eleven taluks comprised in 3 Revenue Divisions as below :—

Name of the Revenue Division.	Headquarters of Revenue Division.	Taluks comprised in Revenue Division.	Area of taluk (in sq. miles).	Headquarters of the taluk.
Tiruppattur	Tiruppattur	Gudiyatham	481	Gudiyatham.
		Tiruppattur	589	Tiruppattur.
		Vellore	432	Vellore.
Ranipet	Ranipet	Walajapet	395	Walajapet.
		Arkonam	319	Arkonam.
		Arni	176	Arni.
		Cheyyar	327	Cheyyar.
Tiruvannamalai	Tiruvannamalai	Chengam	652	Chengam.
		Polur	568	Polur.
		Tiruvannamalai	375	Tiruvannamalai.
		Wandiwash	340	Wandiwash.
		Total	4,654	

The shape of the district is irregular. Gudiyatham taluk occupies the north-western part of the district with Vellore taluk to the south of it. Walajapet taluk is situated to the east of these two taluks. Arkonam taluk lies to the east of Walajapet and occupies the north-eastern corner of the district. Tiruppattur taluk is in the western part of the district, south of Gudiyatham and Vellore taluks. Polur and Chengam taluks lie to the east of Tiruppattur taluk. Tiruvannamalai taluk lies to the south of Polur taluk and Arni taluk is to the east of Polur taluk. Cheyyar and Wandiwash taluks are the easternmost taluks adjoining the Chingleput district.

The north-western part of the district contains portions of the eastern Ghats and their spurs.

The Javadis are the loftiest mountains in the district. The Javadis cover the eastern part of Tiruppattur taluk, the north-western portion of Chengam taluk, and the western part of Polur taluk with spurs running into Vellore taluk up to within 6 miles of Vellore. The general elevation of the Javadis is 2,500 feet, with peaks rising up to 4,200 feet. The highest peaks are Swamimalai, 4,200 feet, and Kambugudi, 3,840 feet in Tiruppattur taluk, Karmatigar, 3,124 feet in Polur taluk and Kailasagiri, 2,743 feet in Vellore taluk.

The Elagiri hills lie in the central part of Tiruppattur taluk. The hills in the southern part of Chengam taluk, are parts of the Kalrayan range in the South Arcot district. A large number of small hills lie scattered in Vellore, Polur and Chengam taluks. The general slope of the country is from west to east.

(*b*) *Rivers.*—The Palar is the most important river of the district. Rising near Nandidrug in Mysore, it enters the district in the north-western corner of the Tiruppattur taluk. Flowing thence in an east-north-easterly direction through that taluk it strikes an easterly course along the boundary between Gudiyatham and Vellore taluks, cuts across Walajapet taluk and passing along the boundary between Arkonam and Cheyyar taluks enters the Chingleput district.

The next important river of the district is the Cheyyar. It rises in the Javadi hills. Flowing in a southerly direction at first it turns south-eastwards near Chengam, and after flowing in that direction over a distance of about 8 miles it strikes a north-easterly course and passes through Polur, Wandiwash and Cheyyar taluks. Within the limits of Cheyyar taluk the river flows almost west to east and enters the Chingleput district to unite with the Palar in that district.

The Poiney river is a tributary of the Palar. It rises in the Chittoor district and flows along the western boundary of Walajapet taluk till it joins the Palar.

The rivers Goddar and the Kaundanya are also tributaries of the Palar flowing from north to south in the Gudiyatham taluk. They join the Palar near Ambur and Gudiyatham respectively. The surplus course of the Kaveripakkam tank in Arkonam taluk gives rise to the Courtellayar river flowing into Chingleput district.

(*c*) *Forests.*—The area of forests in the district is 1,198·43 square miles which is about a quarter of the

area of the entire district. The talukwise distribution of the forest is given below :—

Name of taluk.	Extent of reserved forests. (sq. miles).	Extent of estate forests taken over. (sq. miles).	Total. (sq. miles).

The forests in Gudiyatham taluk are of fuel and scrub type. The reserved forests in the other taluks consist of hill forests, plains forests, scrub growth and Palar river plantations. The hill forests contain sandalwood and bamboos. The estate forests taken over in Arni and Tiruppattur taluks contain scrub jungle.

Arkonam, Cheyyar, Polur and Wandiwash taluks have a moderate climate all the year round, while Vellore, Arni, Walajapet and Gudiyatham taluks which have patches of rocky hillocks are hot in summer and cold in winter. The climate of Tiruvannamalai, Chengam and Tiruppattur is cold in winter and moderate in other seasons.

(*e*) *Soils.*—The eastern portion of the district is almost a stretch of unbroken plain. The central and southern parts are mostly hilly. The western portion rises gradually towards the Mysore plateau along the Kangundi Zamindari of Chittoor district. The soils are red ferruginous loams and sands, with black area about 16 per cent. This black soil is confined to the neighbourhood of the rivers Palar, Poiney and Cheyyar and to the ayacuts of a few big tanks. The black series clay occurs in Gudiyatham, Wallajapet, Arkonam, Cheyyar and Vellore taluks.

The distribution of soil in the various taluks is given below :—

The figures are in thousands of acres.

(*f*) *Irrigation and drainage facilities and liability to famine.*—The rainfall in the district is dependant

both on the south-west and the north-east monsoons. Both of them get weak when they reach the district. The former is somewhat stronger except in the eastern taluks of Arkonam, Cheyyar and Wandiwash. The rainfall is generally inadequate. Irrigation is based on water supplies from tanks, river channels, spring channels, Kasam channels and wells. The three major rivers which contribute largely to irrigation in the district are the Palar, the Poiney and the Cheyyar across which anicuts have been constructed. Channels often several miles long are dug in the sandy beds of rivers to tap the underground flow which is remarkably copious. Spring channels are also dug especially in Gudiyatham taluk to utilize spring water. Several hill streams feed numerous tanks and the precarious sources are supplemented by a very large number of wells which are a feature of the district. Many tanks depend on the rains for supply. Under the Grow More Food Scheme works involving the restoration of damaged anicuts, the repair of the existing supply channels, and excavation of new supply channels, etc., have been undertaken. Owing to dependence mostly on rainfall the district suffers from drought and failure of crops in years of poor rainfall.

The irrigation facilities in the taluks are dealt with below :—

Gudiyatham taluk.—Most of the irrigation in this taluk is had from channels taken from the river Palar. In the eastern portion, the lands are irrigated by the Poiney anicut water. There are also rainfed tanks and Kasam channels.

Vellore taluk.—The channels from the river Palar irrigate portions of the taluk. There are a few hill streams used as sources of irrigation. The tanks are all rainfed.

Walajapet taluk.—The taluk is irrigated by channels and tanks connected with the Palar, the Cheyyar and the Poiney.

Arkonam taluk.—The taluk is irrigated by the big Kaveripakkam tank commanding an ayacut of about 6,000 acres and by other tanks supplied by the Palar. There are also rainfed tanks.

Tiruppattur taluk.—The irrigation sources in this taluk largely depend upon rain. River Palar is also used for irrigation.

Polur taluk.—The river Cheyyar is a source of supply to some tanks in the taluk. Some tanks receive supply from rivulets. There are numerous rainfed tanks in this taluk.

Arni taluk.—Irrigation is done with the help of the river Cheyyar and its tributary the Kamandala Naga Nadi. There are also rainfed tanks.

Cheyyar taluk.—The Cheyyar and the Palar irrigate the taluk. There are also rainfed tanks.

Wandiwash taluk.—The Cheyyar river gives supply to some tanks in the taluk. The other irrigation sources consist of rainfed tanks.

Chengam taluk.—Although the Cheyyar flows through this taluk, almost all the irrigation sources consist of rainfed tanks.

Tiruvannamalai taluk.—A few channels taken from Cheyyar and its tributaries irrigate small extents in this taluk. The taluk depends almost entirely on rainfed tanks for irrigation.

A statement showing the number of minor irrigation sources and their ayacuts as well as the ayacut of major irrigation works in the taluks of the district is given below :—

(*g*) *Area cultivated with food and commercial crops.*—Paddy, cholam, cumbu, samai, ragi and varagu are the chief food crops raised in the district Korra and maize are also cultivated in limited extents.

Groundnut and gingelly are the chief commercial crops of the district. Sugarcane is grown on considerable extents. A statement showing the extent of cultivation of the various food crops, pulses and commercial crops in the taluks of the district in 1940–41 (the latest normal year) is furnished in Annexure I.

(*h*) *Communications*—(i) *Roads.*—A number of roads traverse the district connecting important places in the district with each other and also those in the adjoining districts. The most important of them are the Madras-Bangalore and the Cuddalore-Chittoor Trunk Roads.

The district has 1,731 miles of roads consisting of the following :—

National Highways	104 miles.
Provincial Highways	74 ,,
Major district roads	593 ,,
Other district roads	396 ,,
Village roads	403 ,,
Public Works department roads ..	1 mile.
Municipal roads..	160 miles.
Total ..	1,731 miles.

" The recorded population has shown an increase of 10·9 per cent during the decade 1941–51, as against 13·7 per cent during the previous decade. This is another district badly affected by the failure of the North-East Monsoon successively from 1947–48 onwards, and there has been, in consequence, migration on an appreciable scale from this district to Madras City, Bangalore, Shimoga, Kolar and other places. The large increase in Vellore taluk (23·5 per cent) is partly due to migration from Madras City during the evacuation period (1941–42) of families, who have settled down in this taluk. The southern taluks of Chengam, Tiruvannamalai, Wandiwash and Cheyyar were the ones most affected by the adverse seasonal conditions and this is reflected in the rural figures–decrease of 1·3 per cent in Tiruvannamalai taluk, and low increases of 0·9 per cent, 3·9 per cent and 5·1 per cent in Chengam, Wandiwash and Cheyyar taluks. Migrations have taken place on a larger scale from Chengam and Tiruvannamalai taluks."

(Extracted from the Census Report—Part I.)

(ii) *Vital Statistics.*—A statement showing the births and deaths and deaths due to various causes for the decennium 1941–50 for the district according to the vital statistics is furnished in Annexure II.

The high death-rate of 28·4 per mille registered in 1943 was mainly due to increased mortality from Cholera—4·8 per mille against the average rate of 0·8 per mille for the district and 0·6 per mille for the State during the decade, while the high death-rate of 30·2 per mille in 1944 was partly due to increase in deaths from fevers, viz., 8·5 per mille as against 5·2 per mille, the average death-rate from fevers for the district for the decade and the average fever death-rate of 5·4 per mille for the State. While the average death-rates from small-pox and respiratory diseases were about the normal for the State, that from dysentery and diarrhœa (2·2) per mille was higher than the rate of (1·6) per mille for the State. Except in 1950, the district was not free from plague. The incidence of plague deaths was however small except in 1947.

The average maternal mortality rate of 6·3 per 1,000 births was less than the rate of 8·1 for the State during the decade. The infant mortality rates have registered a decline in the latter half of the decade.

There is a police training school at Vellore. The Vellore Fort is a remarkable specimen of military architecture.

Tiruvannamalai is an important place of pilgrimage. It contains one of the most famous temples sacred to the Hindus in the State. The temple is situated at the foot of a small picturesque hill 9 miles in circumference at its foot. The hill itself is held sacred as representing the deity. The deity worshipped here is one of the Panchalingams representing the 'fire' element among the five elements. Ether, Air, Fire, Water and Earth. The Holy Beacon lit on the Krithigai day in the Tamil month of Karthigai is symbolic of this representation. Nattukkottai Nagarathars have constructed numerous chattrams for accommodating the worshippers who hail from all parts of India.

A-V—Towns arranged talukwise with Population by Livelihood Classes.

This table shows the analysis of the Urban population in towns by livelihood classes, instead of by communities as in the previous censuses.

2. Under the Indian Census Economic Classification Scheme, the people have been divided into two broad livelihood categories, viz., the Agricultural classes and the Non-agricultural classes. There are four Agricultural classes and four Non-agricultural classes as shown below :—

(i) *Agricultural Classes.*

I. Cultivators of land wholly or mainly owned and their dependants.

II. Cultivators of land wholly or mainly unowned and their dependants.

III. Cultivating labourers and their dependants.

IV. Non-cultivating owners of land; agricultural rent receivers and their dependants.

(ii) *Non-Agricultural Classes.*

Persons (including dependants) who derive their principal means of livelihood from—

V. Production (other than cultivation).
VI. Commerce.
VII. Transport.
VIII. Other services and miscellaneous sources.

3. In this table the figures for the agricultural livelihood classes I to III are not given separately but have been clubbed together.

4. The towns in each taluk of the district are arranged in the order of their population as in Table A-IV.

5. Municipality, Panchayat and Cantonment are indicated by the use of the letters (M), (P), (C) respectively within brackets.

6. For the definition of a " Town " see fly-leaf to Table A-I.

2. The areas shown in column (2) of the table for the district and the taluk " total " are the latest figures furnished by the Central Survey Office, Madras. The areas given for " urban " are those furnished by the District Officers. The areas for " rural " have been obtained by deducting the figures for " urban " from those for district and taluk " total."

3. The district area furnished by the Surveyor-General, India, which has been shown in Table A-I, could not be adopted in this table as Talukwise figures have not been furnished by him. The district areas given by the Surveyor-General differ from those furnished by the Central Survey Office, Madras.

4. The rural and urban population figures have been taken as they were at the 1941 and 1931 Censuses and as they are at the present Census, regardless of the changes of rural areas into urban areas and *vice versa* from census to census, for the purpose of calculating percentage variation between 1931 and 1941 and between 1941 and 1951.

5. In respect of Chengam taluk which has no urban areas, the figures represent the total alone.

3. The livelihood classification is based on the principal means of livelihood of the self-supporting persons, the principal means of livelihood for earning and non-earning dependants being the same as that of the self-supporting persons on whom they are dependant.

4. " The principal means of livelihood " is the means of livelihood which provides the largest or the major part of the income in the case of self-supporting persons who have more than one means of livelihood. In the case of other self-supporting persons it is the only means of livelihood.

5. A person has been regarded as " Self-supporting " if the income secured by the person is sufficient at least for his (or her) own maintenance at the level of living adopted by him (or her) at the time of the Census. The income secured may be in cash or kind. Anyone who is not a " Self-supporting " person in this sense has been regarded as a dependant. An " earning " dependant is a person who secures an income which is not sufficient to support him (or her). A person who does not secure any income either in cash or kind is a " non-earning dependant."

6. The non-earning dependants include persons performing housework or other domestic or personal services for other members of the same family household, but do not include " unpaid family workers " or persons who take part along with the members of the family household in carrying on cultivation or a home industry as a family enterprise. These latter persons have been classed as either self-supporting or earning dependants according to the share of income attributable to them.

7. The self-supporting persons shown in Livelihood Class VIII include also persons who derive their income otherwise than through productive activity, i.e., persons coming under the following groups, details for which are given in the Economic Table B-III :—

(1) Persons living principally on income from non-agricultural property ;

(2) Persons living principally on pensions, remittances, scholarships and funds ;

(3) Inmates of jails, asylums, alms houses and recipients of doles ;

(4) Beggars and Vagrants : and

(5) All other persons living principally on income derived from non-productive activity.

B-II—Secondary means of Livelihood.

This table gives for the district the number of persons, in each of the eight livelihood classes mentioned in Economic Table B-I, who possess a secondary means of livelihood and cross classifies them (according to the nature of such means of livelihood) under the same eight livelihood classes.

2. The secondary means of livelihood shown for self-supporting persons is the means of livelihood next in importance to their principal means of livelihood. In respect of earning dependants, it is the means of livelihood which provides the earning, or the largest part of their income if they have more than one source of income.

3. Non-earning dependants and self-supporting persons who have no secondary means of livelihood are excluded from this Table.

B-III—Employers, Employees and Independent Workers in Industries and Services by Divisions and Subdivisions.

This table gives figures for each Census tract in the district. The areas comprised in each census tract denoted by its number in column (1) have been specified in the fly-leaf to Table B-I. In this table the Self-supporting persons in the four Non-agricultural Classes given in Economic Table B-I are distributed in the various divisions and subdivisions of Industries and Services under the Indian Census Economic Classification Scheme, according to their secondary Economic Status, namely, Employer, Employee and Independent worker.

2. (An) Employer (is) a person who employs other persons in order to carry on the business from which he secures his livelihood and pays them a salary or wage in cash or kind.

3. (An) Employee (is) a person who ordinarily works for some other person for a salary or a wage, whether in cash or in kind in order to earn his livelihood.

4. (An) Independant worker (is) a person who works on his own without being employed by anyone for a salary or wage and who does not also employ anyone else in order to earn his livelihood.

5. Under the New Indian Census Economic Classification Scheme all Employers and Independant workers have been classified with reference to the Commodity produced or services performed by them individually. As regards Employees, all persons engaged in Production, Commerce, or Transport (and not being Domestic servants) have been classified with reference to their own activity and without reference to that of their employer. Domestic servants have been classified in one subdivision without reference to the nature of their work. All other Employees (including all managerial and supervisory employees, clerical services, messengers, watchmen and unskilled labour of every discription) have been classified with reference to the commodity produced or services rendered by their Employers.

6. The Non-agricultural classes classified in Economic Table B-I, correspond to the divisions and subdivisions into which they are distributed in this table as follows :—

Livelihood class.	Division and subdivisions of the I.C.E.C. Scheme.
Class V—Production other than cultivation.	Division 0.—Primary Industries not elsewhere specified.
	Division 1.—Mining and Quarrying.
	Division 2.—Processing and Manufacture of Foodstuffs, Textiles, Leather and products thereof.
	Division 3.—Processing and Manufacture—Metals, Chemicals and Products thereof.
	Division 4.—Processing and Manufacture—Not elsewhere specified.
Class VI—Commerce.	Division 6.—Commerce.
Class VII—Transport.	Subdivisions 7·0 to 7·4 of Division 7.—Transport, Storage and Communications.
Class VIII—Other Services and Miscellaneous sources.	Division 5.—Construction and Utilities.
	Division 7.—Transport, Storage and Communications with the exception of subdivisions 7·0 to 7·4.
	Division 8.—Health, Education and Public Administration ; and
	Division 9.—Services not elsewhere specified.

Class VIII also includes persons who derive their principal means of livelihood from miscellaneous sources (otherwise than through economic activity), e.g., income from investments, Pensions and family remittances, proceeds of begging and other unproductive activities. These are not, however, included in this table as it is limited to Industries and Services. Hence there will be a difference to this extent between the total self-supporting persons of the Non-agricultural class in Economic Table B-1 and the total of this table. The reconciliation will be effected by adding the figures given in the next paragraph.

C—HOUSEHOLD AND AGE (SAMPLE) TABLES.

C-I—Household (Size).

This table has been prepared in respect of a population covering the members of Sample households selected from the entries in the National Register of Citizens on the basis of one household for every one thousand households. The sample households selected cover roughly every tenth household in every hundredth House-numbering Block in the Rural areas and every fiftieth household in every twentieth House-numbering block or locality in Urban areas.

2. The Agricultural and the Non-Agricultural classes refer to the four agricultural and the four non-agricultural classes given in Table A-V. The Backward Classes include the Scheduled Castes, the Scheduled tribes and other classes not treated as non-backward by the State Government for the purpose of 1951 Census. Anglo-Indians are included among the non-backward classes.

3. Columns (2) to (5) of the table relate to all the households and household population in the entire district while columns (6) to (17) relate to the sample households selected.

4. The figures have been given for each Census Tract denoted by its number in column (1). The areas covered by each Census tract have been given in the fly leaf to Table B-I.

C-II—Livelihood Classes by Age-groups

This table shows the livelihood distribution by age-groups for Rural, Urban and District totals in respect of a sample population based on a ten per cent sample taken out when the enumeration slips were initially sorted. The ten per cent sample was taken out as follows :—

Each enumeration pad which consisted generally of 100 enumeration slips was broken and the slips relating to displaced persons which had been noticed during the process of the preliminary scrutiny were removed from the pack of slips for being dealt with separately. The pack was then " cut " as in a card-game. The lower portion was placed above the upper portion and the slips were dealt into two pigeon-holes one marked " G " and the other marked " S " as follows :—

The first five slips were placed in the pigeon-hole " G ", then one slip was placed in the pigeon-hole " S ", Thereafter for every nine slips placed in the pigeon-hole " G ", one slip was placed in the pigeon-hole " S " until the total number of slips left was less than 9 and these residuary slips were all put into hole " G ". All the slips contained in the pigeon-hole marked " S " were taken out, counted and marked as " Sample " slips.

2. No smoothing formula has been adopted in preparing the table as in previous Censuses and the figures have been tabulated as actually returned in suitable age-groups.

3. The figures under age " 0 " represent infants below one year.

2. Age-groups 0 and 1 to 4 given in Table C-II have been combined into one age-group, and the age-group 5 to 14 has been split into two sub-groups 5 to 9 and 10 to 14. Persons of age-group 0 to 4 are treated as illiterate.

3. The figures are given for each Census tract denoted by its number in column (1). in the district (vide fly-leaf to Table B-I) but not analysed by religion as in the previous Censuses.

4. ' Literates ' are those who are able to read and write any simple letter in any language.

5. Persons who are partly literate, i.e., persons who are able to read only, have been included among the illiterates, details for such persons are given below :—

2. The circumstances leading to the substitution of revised figures are briefly as follows

(i) At the time of sorting the enumeration slips in 1951, the sorters were given a list of the 77 Scheduled Castes shown in Roman types in the list in paragraph (ii) below. No instructions were given to the sorters as to how the slips were to be treated in the case of persons who returned themselves by a generic Scheduled Caste name such as Harijan or Depressed Class or Adivasi or by a recognized synonym such as Pulacheruman Eralan, Kudan, Rolan, Alén, Paramban (for Cheruman), with the result that sorters in Tabulation Offices classified the communities according to their own interpretation. Consequently, a number of Scheduled Caste members who had returned themselves by generic names or by synonymous names were left out of the Scheduled Castes count. This situation came to the notice of the Government of India, who decided after careful consideration that persons who had returned themselves by generic or synonymous Scheduled Caste names should be counted as Scheduled Castes and that the Census Tables already published should be revised, where necessary, to show the correct position. In order to arrive at the correct figures of Scheduled Castes population a fresh sorting of the 1951 Census slips was accordingly organized in Madras.

(ii) Before commencing the sorting, a list of synonymous names, i.e., names synonymous with those of the communities published in the 'Constitution (Scheduled Castes) Order, 1950' was prepared in consultation with the Collectors of districts and sent to the State Governments of Madras and Andhra for acceptance. The list as finally accepted by the State Governments was got approved by the Government of India. Castes printed in Roman characters in the list below have been declared to be Scheduled Castes in the composite Madras State (as it existed before the formation of the Andhra State) by the 'Constitution (Scheduled Castes) Order, 1950' issued by the President under Article 341 (1) of the Constitution of India. The names in *italics* represent the synonyms of the names printed above them in Roman characters. The approved generic names adopted are the three names, Harijan, Depressed Class and Adivasi shown under Generic names, in the list below:—
