# PREFACE

The Government used to compile and publish District Manuals for each district prior to 1905. The manuals became obsolete within a few years of their publication, containing as they did not only matter of a more or less permanent character such as physical characteristics, history, religion and ethnography, as also statistical matters which soon became out of date. The Government decided to replace the District Manuals by another publication known as the District Gazetteer, consisting of two volumes, A and B. The A volume contained descriptive matter and such general figures, as might be necessary to explain the text, and the B volume contained detailed statistics. They also decided that the B volume should be brought out periodically, especially after each decennial census. Between 1905 and 1927 A volumes for thirteen districts were published. In 1927 they were discontinued. B volumes for all the districts were published between 1906 and 1915. They were continued to be published even after the 1931 census. They were not published after the 1941 census.

Village Statistics, containing the results of the census for every village in the State, were first compiled and published in 1872, at the instance of Mr. C. E. Gover, who was then the Census Officer in Madras. His successor, in 1882, considered that this publication led to needless expenditure and trouble in printing the tables villagewar, but the Government decided that the Village Statistics should continue to be published. The practice of issuing Village Statistics at every census was followed subsequently. The Village Statistics merely showed the number of occupied houses and population of each village and town by religions.

The idea of preparing the present volume, viz., the District Census Handbook for each district was put forward by Sri R. A. Gopalaswami, I.C.S., Registrar-General, India, and ex-officio Census Commissioner of India, as part of a plan intended to secure an effective method of preserving the census records prepared for areas below the district level. He proposed that all the district census tables and census abstracts prepared during the process of sorting and compilation should be bound together in a single manuscript volume, called the District Census Handbook, and suggested to the State Governments that the handbook (with or without the addition of other useful information relating to the district) should be printed and published, at their own cost, in the same manner as the Village Statistics in the past. In accepting this suggestion, the Government of Madras decided to print and publish the more important portion of statistical data relating to the district and to preserve the rest of the records in a manuscript volume for any future use, to which they may be put.

2. The statistical data embodied in the District Census Handbook have to be understood from the background of the changes introduced in the 1951 census. The most important and fundamental change introduced in the 1951 census consists in the substitution of an economic classification of the people for the classification based on Religion and Communities

adopted in the past. The people were divided into two broad livelihood categories, the Agricultural and Non-Agricultural. Four agricultural classes and four non-agricultural classes were prescribed as shown below :—

*Agricultural Classes—*

I. Cultivators of land, wholly or mainly owned, and their dependants,
II. Cultivators of land, wholly or mainly unowned, and their dependants,
III. Cultivating labourers and their dependants,
IV. Non-cultivating owners of land, agricultural rent receivers and their dependants.

*Non-Agricultural Classes—*

Persons (including their dependants) who derive their principal means of livelihood from—

V. Production other than cultivation,
VI. Commerce,
VII. Transport, and
VIII. Other services and miscellaneous sources.

Each of the above eight livelihood classes were divided into three sub-classes with reference to their economic status as below :—

(i) Self-supporting persons,
(ii) Non-earning dependants, and
(iii) Earning dependants.

These livelihood sub-classes have been defined in detail in the fly-leaf notes attached to Economic Table B-I included in this Handbook.

All non-earning dependants are economically passive, all earning dependants are economically semi-active. All self-supporting persons are ordinarily economically active, but the classes and groups specified below constitute an exception to this rule :—

(1) Self supporting persons of Agricultural Class IV,

(2) Self-supporting persons of Livelihood Class VIII, who derive their principal means of livelihood from any source other than through economic activity, viz.—

(*a*) Non-working owners of non-agricultural property ;

(*b*) Pensioners and remittance holders ;

(*c*) Persons living on charity and other persons with unproductive occupations ; and

(*d*) Inmates of penal institutions and asylums.

Economically active persons engaged in cultivation are either cultivators or cultivating labourers. Economic Table B-I gives particulars of the population classified according to eight livelihood classes and three sub-classes mentioned above.

Economically active persons engaged in industries and services have been classified with reference to the nature of the commodity produced or service performed. They are further divided into three sections, viz., Employers, Employees and Independent Workers.

Economic Table B-III gives particulars of the economically active persons classified under the divisions and subdivisions of industries and services of the Indian Census Economic Classification Scheme.

Table C-I included in this Handbook covers the population of sample households and Tables C-II and C-IV cover a 10 per cent sample population. The method adopted for extracting these samples has been described in detail in the fly-leaf notes attached to the relevant tables.

3. *Scheme of the Census Handbook.*—The Handbook has been divided into two parts; Part I consists of three sections, namely, Section (i) containing the general population tables (A series), the Economic Tables (B series), Summary figures for Taluks (Table E), Tables I, II and III relating to Small-scale Industrial establishments and Table L showing the Incidence of Leprosy; Section (ii) containing the Rural statistics and Section (iii) containing the Urban statistics; and Part II containing the Household (size) Table C-I, and Tables showing Livelihood classes and Literacy by Age-groups (C-II and C-IV), the Social and Cultural Tables (D series) and an abstract of non-agricultural occupations in the district. Among the tables included in the Handbook, Table A-IV—Towns classified by population with variations since 1901, Economic Table B-II—Secondary means of livelihood under each livelihood class and Table C-II—Livelihood classes by age-groups furnish information at the district level. The other population tables in the A series, the summary figures for taluks (Table E) and the Infirmity (Table L) showing the incidence of leprosy furnish information for each taluk in the district with a district total. The rural statistics in Part I—Section (ii) furnish basic information in respect of every village and town arranged according to census tracts. In addition to the total population of the villages, and its distribution among the eight livelihood classes, information regarding the number of literates, the cultivated area, the number of small-scale industrial establishments under categories, textile and non-textile and the number of leprosy cases and doubtful cases has been included.

The Urban statistics in Part I, Section (iii) furnish similar information except that relating to cultivated area in respect of every unit classified as city or census town in the district with ward-wise data. All other tables included in the Handbook provide information for units called census tracts with totals for the district.

4. *Census Tracts.*—A distinctive feature of the census statistics is its rural urban break up designed with a view to compare the conditions and characteristics of the rural and urban population. The rural areas of each district were therefore kept distinct from the urban areas. For facilitating tabulation these areas were divided into a number of rural and urban tracts. As far as possible, the rural area in each taluk was constituted into a single rural tract. In a few cases however where the taluks were small in size with reference to their population, the rural areas of more than one taluk were taken together as a single rural tract. The urban tracts have been formed out of areas declared as cities and census towns in each district. Every city was treated as a separate tract. Towns other than cities were grouped together to form non-city urban tracts. Wherever possible, the towns in each taluk were constituted into a single non-city urban tract. In cases where the towns in a taluk had a population of less than 50,000 the towns in more than one taluk were grouped

together to form a non-city urban tract. All the rural tracts in the State have been assigned numbers in one series, the non-city urban tracts in another series and the city tracts in a third series. In all the tables where the data have been furnished for tracts, the tracts have been denoted by numbers that have been assigned to them. A list of tracts into which the district has been divided and the areas comprised in each is furnished in the fly-leaf note to Economic Table B-I relating to the district.

The districts, taluks and villages mentioned in the Tables and Abstracts have been shown along with the census location code numbers assigned to them for purposes of census operations.

The numbers given to the Tables in this publication correspond to those given in the State Census Report.

Elaborate notes explaining the scheme of each Table have been introduced in the fly-leaf notes attached to each with a view to enable the reader to get a precise idea of the data furnished in the Table.

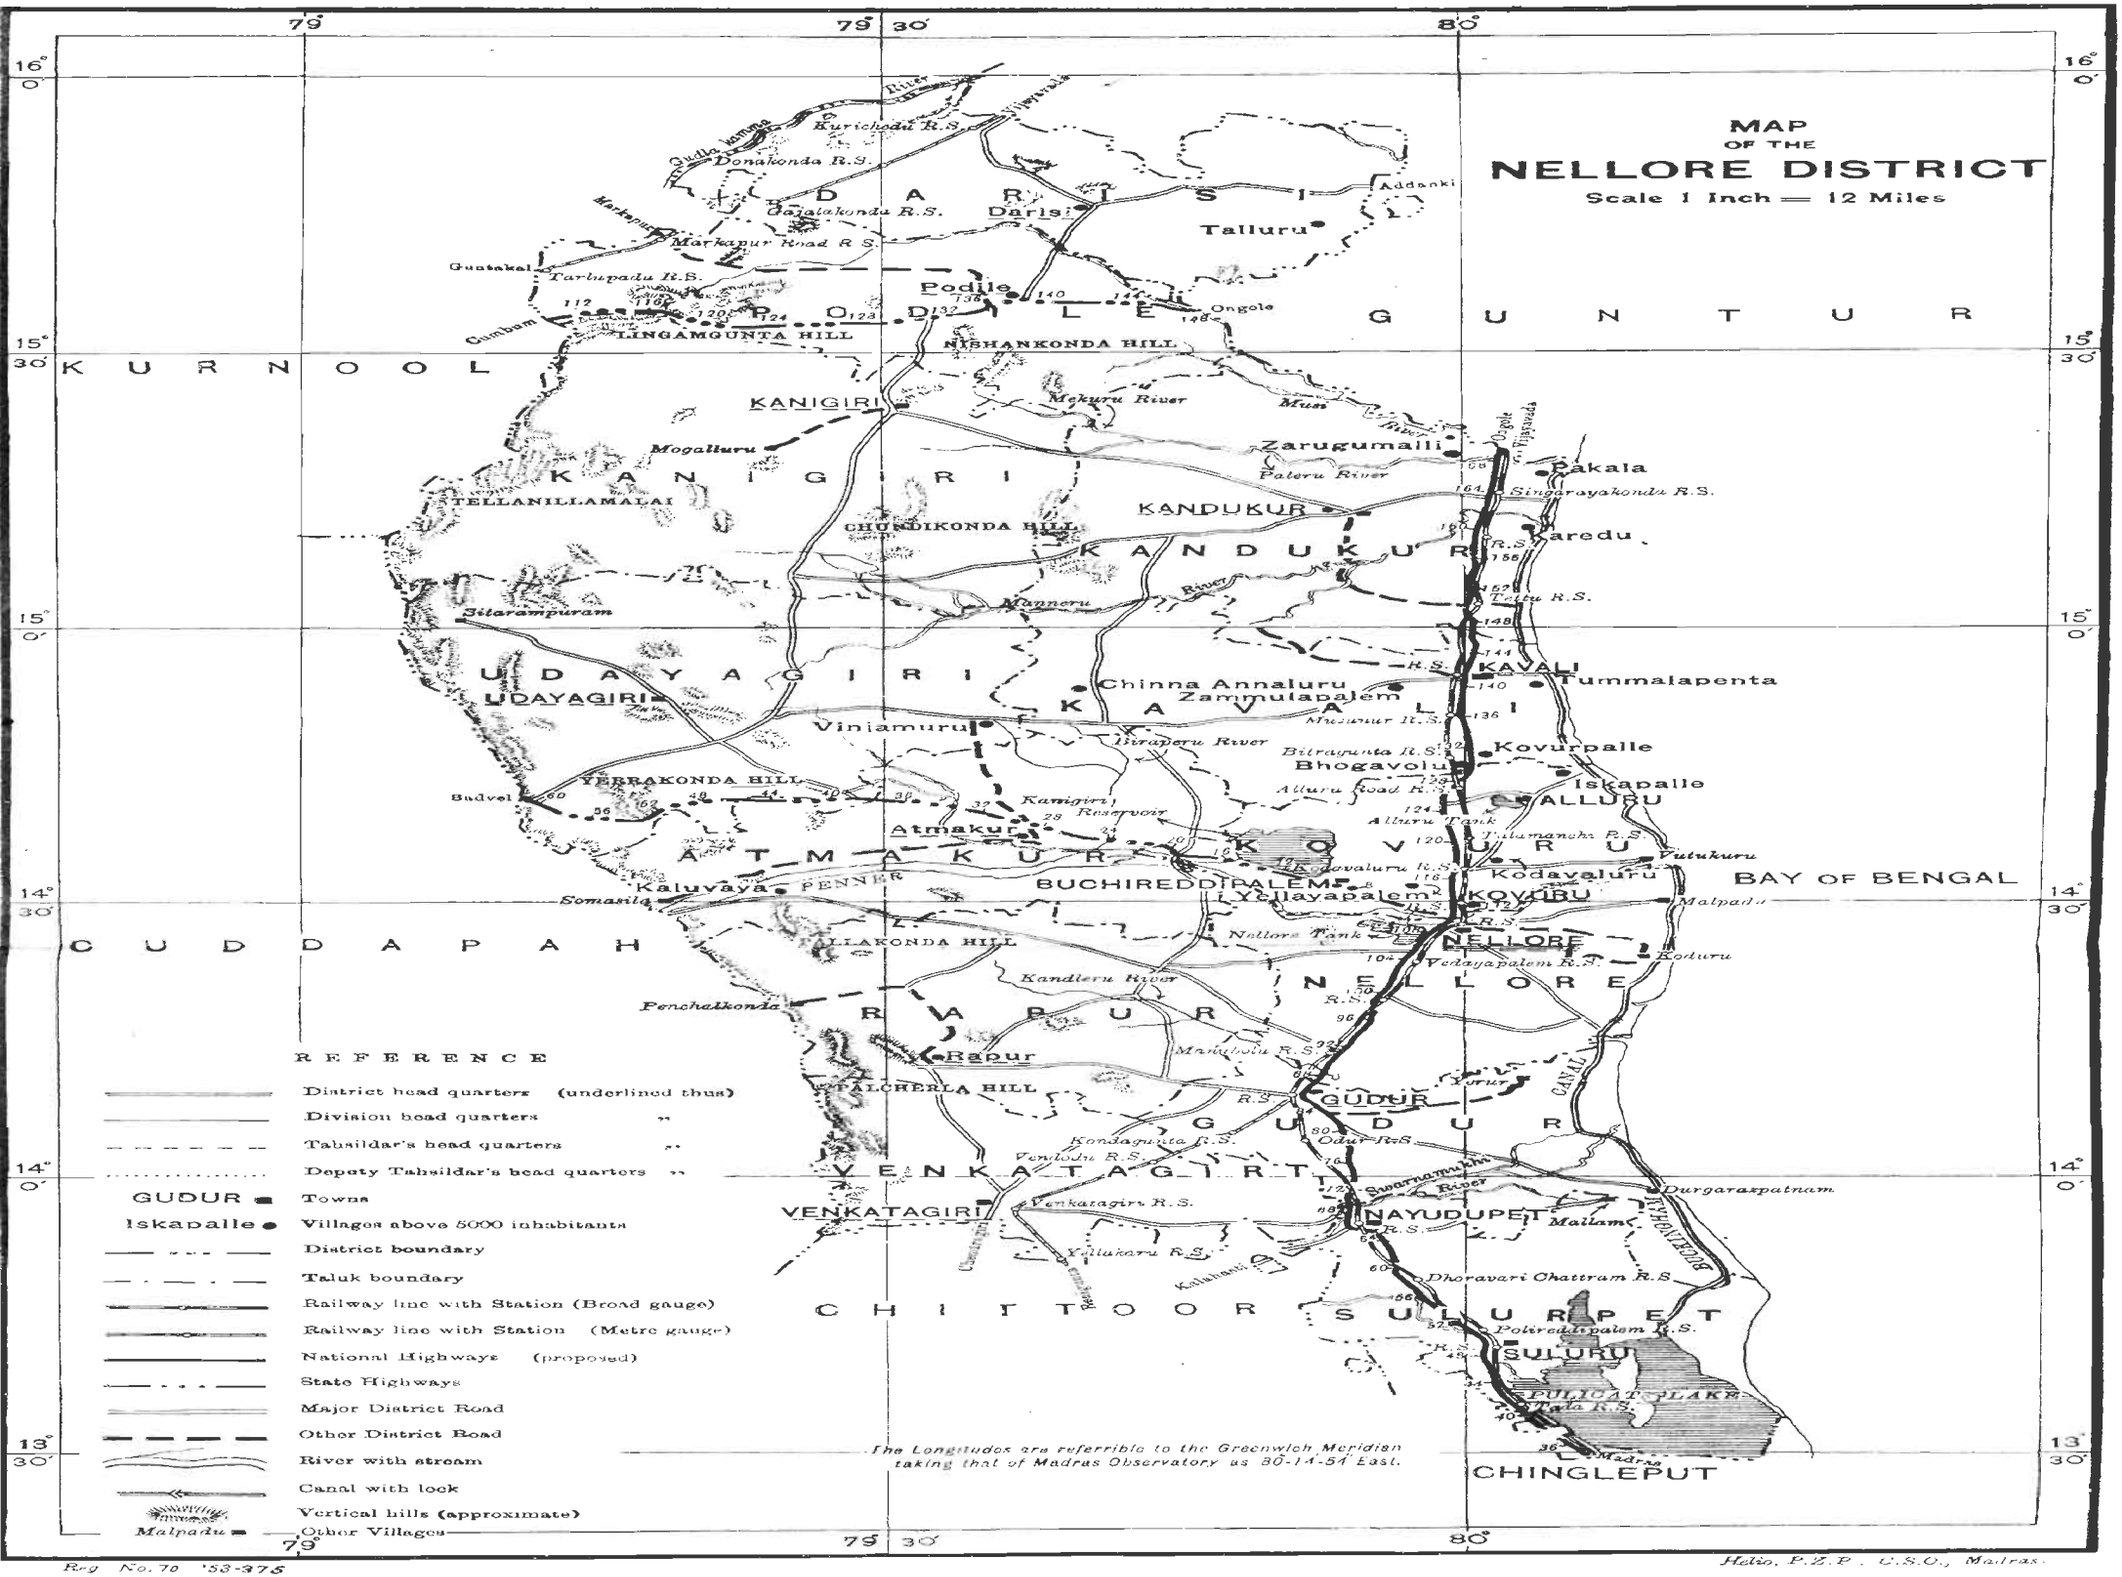

5. *Tables relating to Small-scale Industries.*—In the year 1950 a census of Small-scale Industries was instituted under the orders of the Government. The object was to get some idea about small industries such as cottage and home industries, small establishments, workshops, etc., where articles were produced, repaired or otherwise treated for sale, use or disposal and small mines. The enquiry was confined to establishments to which the Factories Act was not applicable. Individuals who worked on their own and did not employ other people were left out of account. From the data collected three Tables were prepared and they have been included in the Handbook. Information giving village-wise and ward-wise information for Small-scale Industries have been incorporated in the rural and urban statistics. The details collected and embodied in the Tables are not to be considered accurate or exhaustive, as the enumeration staff employed had not been trained for the purpose and some cases of under enumeration were noticed. However, the figures given in the Tables may be sufficient to give an insight into the nature of the industries prevalent in the different parts of the district.

6. Opportunity has been taken to put in a short introductory note detailing the salient points connected with the district, such as the physical features, climate, rainfall, irrigation and drainage facilities, roads and other communications, crop statistics, education, industries and other matters of general interest. The information contained in the introductory note is based on the materials furnished by Collectors of districts and Departments of Government. The District Gazetteer was also freely referred to. The relevant paragraph of the 1951 Census Report discussing the growth of population in the district has also been incorporated in the proper place.

A district map showing taluk boundaries, physical features, important roads and places with a population exceeding 5,000 is also attached.

It is hoped that this Handbook will serve as a book of reference on matters relating to the district and that it will be found useful both by Departments of Government and the public.

# INTRODUCTION TO NELLORE DISTRICT

I. (*a*) *Situation and physical characteristics.*—The Nellore district lies between 13° 30′ and 16° of the northern latitude and 79° 5′ and 80° 15′ of the eastern longitude. It is bounded on the north by the Guntur district, on the east by the Bay of Bengal, on the south by Chittoor and Chingleput districts and on the west by Cuddapah and Kurnool districts.

The district consists of 13 taluks comprised in three Revenue Divisions as shown below :—

The district is roughly 150 miles long and 60 miles wide.

The district forms part of the plains of the Carnatic and is a gently undulating country rising from the sea board in a westward direction up to the Veligonda hills. The coastal taluks from north to south are Kandukur, Kavali, Kovvur, Nellore, Gudur and Sulurpet. Adjoining these on the west from north to south are situated the taluks of Darsi, Podili, Kanigiri, Udayagiri, Atmakur, Rapur and Venkatagiri. The general aspect of the coast is that of a sandy plain with large tracts of scrub jungle interspersed with cocoanut palms, palmyrahs and casuarina plantations. The island of Sriharikota in the south-east corner of the district covering an area 35 miles long and 6 miles broad forms a low ridge of sand containing jungly growth and casuarina plantations.

The eastern half of the district abutting the coast is fairly fertile with large cultivated areas and handsome topes. The western half consists of large tracts of low scrub jungle with rocky hills and stony plains presenting a poor appearance. There are numerous backwaters along the coast the best known among them being the Pulicat lake.

*Hills.*—The Veligonda hills which are part of the eastern ghats run along the western boundary of the district from the south-western corner of Venkatagiri taluk to the north of Kanigiri taluk. The highest point has an elevation over 3,000 feet. The Udayagiri-drug in Udayagiri taluk is an isolated hill 3,079′ high. There are also other isolated hills and ridges in several parts of the district chiefly in Podili, Kanigiri, Darsi and Kandukur taluks.

(*b*) *Rivers and water ways.*—The chief rivers are the Pennar in the centre, the Kandaleru and the Swarnamukhi in the south and the Musi, the Paleru and the Manneru in the north. There are besides, numerous minor streams which are dry for the major part of the year.

*The Pennar* rises in the Nandidrug hills in Mysore State and enters the district through a fine gorge in the Veligondas at Somasila in Atmakur taluk, 285 miles from its source. It runs eastwards across Atmakur taluk and between Nellore and Kovur taluks and falls into the Bay at Utukur, 18 miles from Nellore town. The river has a course of 70 miles in the district. Its chief tributaries in the district are (i) the Boggeru which, rising in the Veligondas drains the southern half of Udayagiri and Atmakur taluks and joins the Penneru at Kolaguntla in the eastern part of Atmakur taluk and (2) the Biraperu flowing across Atmakur taluk and joining the Penneru at Sangam in the westernmost corner of Kovvur taluk.

*The Swarnamukhi* rises in the Chandragiri hills in Chittoor district and flows between Venkatagiri and Sulurpet taluks and across Gudur taluk entering the sea near Sidhavaram in Gudur taluk. The river has a course of 21 miles in Nellore district.

*The Kandaleru river* flows across Rapur taluk and between Gudur and Nellore taluks.

*The Manneru river* flows across Kanigiri and Kandukur taluks. The *Pillaperu river* flowing across Udayagiri taluk and the *Vupputeru river* flowing across Kavali and Kandukur taluks, are its tributaries.

*The Paleru river* flows across Kanigiri and Kandukur taluks.

*The Musi river* flows along the southern boundary of Darsi taluk and through Podili and Kandukur taluks.

*The Gundlakamma river* flows on the western boundary of Podili taluk and the northern boundary of Darsi taluk.

*The Ketamanneru*, a minor drain flowing through Atmakur taluk, forms the source of supply to the Anantasagaram tank.

*The Kolleru* is a rivulet flowing on the southern boundary of Rapur taluk. The Venkatagiri river is another minor stream in Venkatagiri taluk.

The estate forests not taken over in Darsi and Podili taluks, the private forests in the latter taluk and the estate forests in Kandukur taluk consist of scrub jungle of the open thorny species. There is also scattered growth of inferior deciduous species in them.

The reserved forests in Kanigiri, Udayagiri and Rapur taluks contain inferior deciduous species mostly fit for fuel. The estate forests in Kanigiri taluk contain better growth of fuel species and good grazing grounds. The forests in the coastal areas of Kavali and Kovvur taluks contain casuarina plantations. In Atmakur taluk the reserved forests contain deciduous and scrub types. The estate forests in Venkatagiri taluk are of scrub type and the better deciduous fuel type. Some timber species occur on the upper reaches of the Veligondas. In the reserved forests of Sulurpet taluk there is casuarina plantation and ever-green scrub. The estate forests in Sulurpet taluk are of intermediate nature between the open low thorny type and ever-green scrub. The private forest in Rapur taluk is of inferior deciduous type.

(d) *Climate and Rainfall.*—The climate of the district generally is dry and salubrious. The annual mean humidity is 75 per cent at Nellore but it becomes drier westwards. April to June are hot months. The district lies in a zone of precarious rainfall. The south-west monsoon starts about the middle of June but the rains are hardly appreciable though the western winds prevail at that period. The influence of this monsoon is felt more in the northern part of the district than in the south. The north-east monsoon sets in generally in October and brings in rains till December or January. Particulars of the average annual rainfall and the average number of rainy days in a year in the district are given below :—

(*e*) *Soils.*—The eastern portion of the district is fairly fertile and prosperous. The western portions comprise wide stretches of barren treeless country. There is a sandy coastal strip of 3 to 4 miles in width. Soils in this district are black, red and sandy. Black clay is confined to the northern portion of Kandukur taluk. Red loam occupies most of the rest of the country except for a belt of sand along the sea coast. The soil distribution for the district as a whole is as follows :—

| | PER CENT. |
|---|---|
| Black .. .. .. | 22·38 |
| Mixed .. .. .. | 32·76 |
| Red .. .. .. | 31·40 |
| Sandy .. .. .... | 13·27 |

The soil distribution for each taluk is given below —

|---|---|---|---|---|
| Kanigiri | 15·1 | 3·2 | 35·7 | 46·0 |

(*f*) *Irrigation and drainage facilities—Darsi taluk.*—The irrigation sources of the taluk consist of a few tanks which are precarious sources. The taluk was a Zamindari area till recently. The irrigation tanks were not maintained in good condition. Some of the tank bunds breached in the floods of 1949. The Government have taken up the question of improvements to the tanks in the taluk. There is irrigation of millet crops under wells in this taluk. The taluk is liable to famine conditions.

*Podili taluk.*—The irrigation sources are all rainfed tanks. This taluk too was a Zamindari area till recently and 19 out of the 42 major irrigation sources of the taluk have been in disrepair. Some of the tanks breached in the floods of 1949. The Government have taken up the question of improvements to the tanks in this taluk also. There is irrigation of millet crops under wells in this taluk. The taluk often experiences famine conditions.

*Kanigiri taluk.*—The Mopad Reservoir fed by the Manneru river commands an ayacut of 4,228 acres and the Jajipuram project which impounds the freshes of the Dommaleru river commands an ayacut of over 700 acres. There are also 2 major irrigation and 8 minor irrigation tanks. There is garden cultivation under private wells in all the villages. The taluk forms part of the driest area in the district and it has always been liable to famine conditions.

*Kandukur taluk.*—Machavaram and Mopadu tanks fed by the Thummaleru and Pandivagu streams the Ponnalur tank fed by the Gudisileru river and the Karedu tank fed by a channel from Manneru are the chief sources of irrigation.

*Udayagiri taluk.*—Irrigation by lift is carried on along the banks of the rivers. The Mopad project serves four villages at the tail end of the system.

An anicut has been built across the Boggeru river to safeguard the supply to the channel feeding the Nandavanam tank. The other irrigation sources are mainly rainfed tanks getting precarious supply. The Government have taken up 12 works consisting of the restoration of some abandoned tanks and the formation of some new tanks. The taluk is mostly dry and only 5 per cent of the cultivated area is under irrigated crop. Dry crops are raised with the aid of wells in most of the villages of the taluk.

The taluk is liable to constant famine conditions and drought.

*Kavali taluk.*—Four villages are served by the Mopad Project. Two villages are served by the Sangam Project. The other villages depend on rainfed tanks and wells. Doruvus along the coast are used in a minor scale for chillies and vegetable cultivation. The taluk is liable to famine conditions in the event of failure of the monsoon.

*Atmakur taluk.*—The Pennar affords large irrigation facilities for this taluk. Channels taken over the bed of the river serve a number of villages on both sides of the river. The Anantasagaram tank formed by bunding up the Ketamanneruvagu serves an ayacut of 3,250 acres in six villages. The Atmakur tank fed by a channel from the Boggeru commands an ayacut of 2,500 acres. The Kaluvai tank irrigates 2,000 acres. The Anumasamudram tank fed by a channel from the Beeraperu river serves an ayacut of 1,000 acres. The Mahimalur tank fed by a channel from the Boggeru serves an ayacut of 2,300 acres. The Vasili tank serves 2,200 acres. Irrigation by pumping from the Pennar and Beeraperu rivers is also resorted to. There are besides, a number of smaller tanks mostly rainfed. There are wells under which dry crops are raised. The upland portion of the taluk is liable to occasional drought and famine conditions.

*Kovvur taluk.*—The taluk is in the Pennar Delta area. The Kaligiri main canal and the Duvvur canal take off from the left flank of the anicut—across the Pennar at Sangam. The former canal feeds the Kaligiri reservoir which commands an ayacut of 83,400 acres. The eastern channel and the southern channel taking off from the reservoir are its two main distributaries. The surplus of the reservoir flows into the Maldevi and Pyderu canals. The latter is also a supply channel to the Alur tank besides being a direct sources of irrigation to several villages. The taluk is not liable to famine conditions.

*Rapur taluk.*—A few rainfed tanks provide irrigation for small extents under them. The taluk is liable to famine conditions if there is failure of rains.

*Nellore taluk.*—The taluk is fed by the Pennar river from the Sangam and Nellore anicuts. The Sangam anicut canal supplies the Nellore tank. It commands an ayacut of 12,000 acres. The Jaffar Sahib Channel and the Sarvepalli Channel taking off from the Nellore anicut irrigate 34,000 acres and 32,300 acres respectively. The latter supplies the Sarvepalli Reservoir which has an ayacut of 11,380 acres. There is a net work of canals on the eastern side of the taluk facilitating the cultivation of all the lands. There are rainfed tanks in the taluk. Irrigated dry crops are raised under wells. The taluk is not ordinarily liable to famine.

*Gudur taluk.*—The tanks in the taluk are mostly rainfed. There is an anicut across the Tsalla Kalva, a branch of the Swarnamukhi river. The anicut feeds the Penaki tank of the Kota Kothapalam and a few smaller tanks. The Chennur and Godur tanks are supplied by an anicut across the Venkatagiri-Rapur River. There are 13 spring channels irrigating 1,198 acres. The taluk is not liable to famine unless there is complete failure of the monsoon.

*Venkatagiri taluk.*—This is a very poor taluk with rainfed tanks. The taluk was a Zamindari area till recently. After the estate was taken over several tanks were repaired. There are wells irrigating dry crops. The taluk is generally liable to famine conditions.

*Sulurpet taluk.*—Almost all the tanks are rainfed. There are also wells. There are a number of Government and private spring doruvus in the Sriharikota island under which paddy crop is raised in two seasons in normal years. The taluk is generally liable to famine conditions.

The particulars of number of minor irrigation sources in each taluk and their ayacut and the ayacut of the major irrigation sources are furnished below :—

(*g*) *Area cultivated with food crops and commercial crops.*—Paddy Cholam, Cumbu, Ragi, Korra and Varagu are the chief food crops raised in the district. Samai and maize are grown in limited extents. A statement showing the particulars of the area cultivated

with food crops and commercial crops in the various taluks in the year 1942-43 which was the most recent normal year in the district is given in *Annexure I.*

There are 1,408 miles of roads in the district consisting of 136 miles of National Highways, 102 miles of Provincial Highways, 671 miles of major district roads, 321 miles of other district roads, 129 miles of village roads, 5 miles of Public Works Department roads and 44 miles of municipal roads. A large number of important villages lie in the interior of Atmakur taluk and access is difficult particularly in the rainy season. Communications to villages and forests in the Udayagiri taluk are inadequate and the transport of timber and fuel from the hills to the nearest main roads is done with considerable difficulty.

(*b*) *Waterways.*—The Buckingham canal extends along the coast throughout the entire length of the district. Transport boats ply along the canal carrying fuel and other commodities from the district to Madras City.

(ii) *Railways.*—The district has 132-3/4 miles of broad gauge and 59½ miles of metre gauge railway of the Southern Railway. The broad gauge line from Madras to Calcutta and Delhi traverses the taluks of Sulurpet, Gudur, Nellore, Kovur, Kavali and Kandukur. A branch line takes off from Gudur to Renigunta across Gudur and Venkatagiri taluks. The metre gauge line from Bezwada to Guntakal touches this district in the northern tip.

(iii) *Posts and Telegraphs.*—There are a head Post and Telegraph Office at Nellore. The district is served by 18 sub-post and telegraph offices, 21 non-combined sub-post office and 287 branch post offices. Their talukwise distribution is given below :—

| Kovur | 161,312 | 188,835 | 17·1 |
| Rapur | 82,400 | 88,512 | 7·4 |
| Nellore | 212,945 | 261,258 | 22·7 |
| Gudur | 101,219 | 112,337 | 11·0 |
| Venkatagiri | 81,120 | 81,980 | 1·1 |
| Sulurpet | 100,172 | 95,718 | 4·4 |

The district increase is 10·4 per cent. " The deltaic area constitutes only a small portion of the district, and it is mostly in the taluks of Kovur and Nellore. The rest of the district is of the poor upland type, very liable to periodical failure of rains, particularly in the western taluks of Venkatagiri, Rapur, Udayagiri, Kanigiri and Darsi. The prosperous portion of the district is the eastern portion which is served by the Madras-Calcutta Railway line and the Great Northern trunk road from Madras to Calcutta. The taluk figures of increase correctly reflect the conditions in the various taluks. It is no wonder that Kovur, which is the cream of the Pennar delta, shows the largest increase in rural population, viz., 20·6 per cent, Nellore taluk coming next with 14·6 per cent. But Nellore taluk has shown a larger increase of population than Kovvur taluk (22·7 per cent against 17·1 per cent) which is of course due to the growth of

the Headquarters town of Nellore. Owing to the failure of the monsoon in the years since 1947-48, there has been a large-scale migration of the labouring classes to the deltaic areas.

Sulurpet taluk has shown an actual decrease of population to the extent of 4·4 per cent, and the position would have been worse but for the growth of the two towns in this taluk, viz., Sulurpet and Nayudupet which are weaving and dyeing centres and are, conveniently situated on the Madras-Calcutta Railway line and road. The coastal villages are malarial and filarial and vast areas are unfit for cultivation. The main occupation of the people in the coastal area is cutting and export of firewood to Madras and other places outside the taluk. The major portion of the forest growth has been cut and removed, and most of the population in these areas has, in consequence, migrated to Madras City and other areas in Chingleput district. The rest of the taluk depends mainly on rain-fed dry crops, but on account of the failure of the north-east monsoon for a number of years as already mentioned, large numbers of the labouring classes have migrated to the mica mines in Gudur and Rapur taluks and the deltaic areas further north. In Venkatagiri taluk, conditions are exactly similar to those in the adjoining non-coastal areas of Sulurpet taluk and there has been a similar migration of labouring classes. Owing to acute shortage of yarn, about 2,000 weavers migrated to Nellore Town in January 1951 from Venkatagiri town. Rapur taluk has shown an increase of 7·4 per cent, and this is largely due to the mica mines; otherwise, it would have fared almost like Venkatagiri taluk which has registered an increase of only 1·1 per cent. Gudur taluk has achieved an increase of 11 per cent, due largely to the mica mines in the taluk and the growth of Gudur Town which is the headquarters of the mining interests and is conveniently situated on the Madras-Calcutta Road and is also the Railway Junction connecting the Madras-Calcutta line with the branch line to Katpadi in North Arcot district through Chittoor district. From both Udayagiri and Darsi taluks, which are poor and backward, there was considerable migration of labouring classes on account of the failures of the north-east monsoon. The low increases of 8·1 per cent and 5·1 per cent for these taluks cannot, therefore, cause any surprise."

(Extracted from the Census Report—Part I.)

(ii) *Vital statistics.*—A statement showing the particulars of births and deaths and deaths due to various causes in the district for the decennium 1941–1950 is given in *Annexure II.*

The annual average of birth and death rates of 29·7 and 19·7 per mile respectively for the decade are lower than those for the State (31·7 and 21·2 per mille respectively). The birth and death rates have both shown a tendency to fall during the second half of the decade. The death rates from fevers and respiratory diseases were less than the normal for the State during the decades. The district was entirely free from plague. The average maternal mortality rate of 7·4 per 1,000 births was less than 8·1 the rate for the State.

Area figures furnished by the Central Survey Office, Madras, have been adopted for the taluks. The total area of the taluks as furnished by the Central Survey Office, Madras, shown within brackets in column (2) differs from the area of the district furnished by the Surveyor-General.

3. " Village " is the revenue administrative unit within defined boundaries. This table gives particulars in respect of all villages containing one or more groups of habitations. Villages with no habitations are not included in this table.

4. " Town " is a place of usually not less than 5,000 inhabitants, possessing distinct urban characteristics. Cantonments have been treated as forming part of the towns in which they are situated. Udayagiri in Udayagiri taluk though not having the population minimum of 5,000 has been treated as a town for the reason that it possesses definitely urban characteristics.

5. " House ".—Every dwelling with a separate main entrance has been treated as a house for Census purposes.

## A-II—Variation in Population during Fifty Years

This table compares the population of the district and of each taluk in the district as ascertained at the Census of 1951 with the corresponding figures of the five previous Censuses. The figures recorded at the previous Censuses have been adjusted for subsequent territorial changes, if any, in order to afford a correct basis for comparison. The adjusted figures show the population of taluks and the district as constituted at present.

2. The main territorial changes that occurred during the decade is the transfer of the portions of the following villages from Ponneri taluk of Chingleput district to Sulurpet taluk of this district :—

(1) Elavur.
(2) Sunnambukulam.
(3) Obasamudram.
(4) Pungulam.
(5) Mangadu.
(6) Kallur.

## A-V—Towns arranged talukwise with Population by Livelihood Classes.

This table shows the analysis of the Urban population in towns by livelihood classes, instead of by communities as in the previous Censuses.

2. Under the Indian Census Economic Classification Scheme, the people have been divided into two broad livelihood categories, viz., the Agricultural Classes and the Non-Agricultural Classes. There are four Agricultural Classes and four Non-agricultural Classes as shown below :—

(i) *Agricultural Classes.*

I. Cultivators of land wholly or mainly owned and their dependants.

II. Cultivators of land wholly or mainly unowned and their dependants.

III. Cultivating labourers and their dependants.

IV. Non-cultivating owners of land ; agricultural rent-receivers and their dependants.

(ii) *Non-Agricultural Classes.*

Persons (including dependants) who derive their principal means of livelihood from—

V. Production other than cultivation.

VI. Commerce.

VII. Transport.

VIII. Other services and miscellaneous sources.

3. In this table the figures for the Agricultural Livelihood Classes I to III are not given separately but have been clubbed together.

4. The towns in each taluk of the district are arranged in the order of their population as in Table A-IV.

5. Municipality, Panchayat and Cantonment are indicated by the use of the letters (M), (P), (C) respectively within brackets.

6. For the definition of a "Town" *see* fly-leaf to Table A-I.

7. Towns newly appearing at this Census have been printed in *italics*.

## E—Summary figures by taluks.

The data contained in this table have been given for each taluk in the district.

2. The areas shown in column (2) of the table for the district and the taluk "total" are the latest figures furnished by the Central Survey Office, Madras. The areas given for "urban" are those furnished by the District Officers. The areas for "rural" have been obtained by deducting the figures for "urban" from those for district and taluk "total."

3. The district area furnished by the Surveyor-General, India, which has been shown in Table A-I, could not be adopted in this table as Talukwise figures have not been furnished by him. The district areas given by the Surveyor-General differ in varying degrees from those furnished by the Central Survey Office, Madras.

4. Previous Census figures population have been adjusted with reference to the inter-district transfers. The rural and urban population figures have been taken as they were at the 1941 and 1931 Censuses and as they are at the present Census, regardless of the changes of rural areas into urban areas and *vice versa* from Census to Census, for the purpose of calculating percentage variation between 1931 and 1941 and between 1941 and 1951. For calculating density for 'rural' and 'urban' for 1941, the areas of the town newly formed at the present Census rounded to the nearest square mile have been deducted from the areas given for urban in column (2) for 1951 and added to the areas given for 'rural', in the districts and taluks where new towns have been recognised.

5. In respect of Darsi, Podili, Atmakur and Rapur taluks which have no urban areas, the figures represent the total alone.

# B—ECONOMIC TABLES.

## B-I—Livelihood Classes and Sub-classes.

This table shows by rural/urban break-up for each Census tract in the district the distribution of population, sex-wise, among the eight Livelihood Classes and the three Sub-classes, viz., self-supporting persons, non-earning dependants and earning dependants under each livelihood class into which the economic characteristics of the people have been classified under the Indian Census Economic Classification Scheme—vide fly-leaf to Table A-V.

2. The areas comprised in each of the Census tracts into which this district has been delimited for the purposes of Census tabulation are given below :—

3. The livelihood classification is based on the principal means of livelihood of the self-supporting persons, the principal means of livelihood for earning and non-earning dependants being the same as that of the self-supporting persons on whom they are dependant.

4. " The principal means of livelihood " is the means of livelihood which provides the largest or the major part of the income in the case of self-supporting persons who have more than one means of livelihood. In the case of other self-supporting persons, it is the only means of livelihood.

5. A person has been regarded as " Self-supporting " if the income secured by the person is sufficient at least for his (or her) own maintenance at the level of living and adopted by him (or her) at the time of the Census. The income secured may be in cash or kind. Anyone who is not a " Self-supporting " person in this sense has been regarded as a dependant. An " earning " dependant is a person who secures an income which is not sufficient to support him (or her). A person who does not secure any income either in cash or kind, is a " non-earning dependant ".

6. The non-earning dependants include persons performing housework or other domestic or personal services for other members of the same family household, but do not include " unpaid family workers " or persons who take part along with the members of the family household in carrying on cultivation or a home industry as a family enterprise. These latter persons have been classed as either self-supporting or earning dependants according to the share of income attributable to them.

7. The self-supporting persons shown in Livelihood Class VIII include also persons who derive their income otherwise than through productive activity, i.e., persons coming under the following groups, details for which are given in the fly-leaf to Economic Table B-III :—

(1) Persons living principally on income from non-agricultural property ;

(2) persons living principally on pensions, remittances, scholarships and funds ;

(3) inmates of jails, asylums, alms houses and recipients of doles ;

(4) beggars and vagrants ; and

(5) all other persons living principally on income derived from non-productive activity.

## B-II—Secondary means of Livelihood.

This table gives for the district the number of persons, in each of the eight Livelihood Classes mentioned in Economic Table B-I, who possess a secondary means of livelihood; and cross-classifies them (according to the nature of such means of livelihood) under the same eight Livelihood Classes.

2. The secondary means of livelihood shown for self-supporting persons is the means of livelihood next in importance to their principal means of livelihood. In respect of earning dependants, it is the means of livelihood which provides the earning, or the largest part of their income if they have more than one source of income.

3. Non-earning dependants and self-supporting persons who have no secondary means of livelihood are excluded from this table.

## B-III—Employers, Employees and Independent Workers in Industries and Services by Divisions and Subdivisions.

This table gives figures for each Census tract in the district. The areas comprised in each Census tract denoted by its number in column (1) have been specified in the fly-leaf to Table B-I. In this table the self-supporting persons in the four Non-agricultural Classes given in Economic Table B-I are distributed in the various divisions and subdivisions of industries and services under the Indian Census Economic Classification Scheme, according to their Secondary Economic Status, namely, employer, employee and independent worker.

2. An employer is a person who employs other persons in order to carry on the business from which he secures his livelihood and pays them a salary or wage in cash or kind.

3. An employee is a person who ordinarily works for some other person for a salary or a wage, whether in cash or in kind in order to earn his livelihood.

4. An independent worker is a person who works on his own without being employed by anyone for a salary or wage and who does not also employ anyone else in order to earn his livelihood.

5. Under the New Indian Census Economic Classification Scheme all employers and independent workers have been classified with reference to the commodity produced or services performed by them individually. As regards employees, all persons engaged in production, commerce, or transport (and not being domestic servants) have been classified with reference to their own activity and without reference to that of their employer. Domestic servants have been classified in one subdivision without reference to the nature of their work. All other employees (including all managerial and supervisory employees, clerical services, messengers, watchmen and unskilled labour of every discription) have been classified with reference to the commodity produced or services rendered by their employers.

6. The Non-agricultural Classes, classified in Economic Table B-I, correspond to the divisions and subdivisions into which they are distributed in this table as follows :—

| Livelihood Class. | Division and subdivisions of the Indian Census Economic Classification Scheme. |
|---|---|
| Class V—Production other than cultivation. | Division 0.—Primary Industries not elsewhere specified.<br>Division 1.—Mining and Quarrying.<br>Division 2.—Processing and Manufacture of Foodstuffs, Textiles, Leather and Products thereof.<br>Division 3.—Processing and Manufacture—Metals, Chemicals and Products thereof.<br>Division 4.—Processing and Manufacture—Not elsewhere specified. |
| Class VI—Commerce. | Division 6.—Commerce. |
| Class VII—Transport. | Subdivisions 7·0 to 7·4 of Division 7.—Transport, Storage and Communications. |
| Class VIII—Other Services and Miscellaneous sources. | Division 5.—Construction and Utilities.<br>Division 7.—Transport, Storage and Communications with the exception of subdivisions 7·0 to 7·4.<br>Division 8.—Health, Education and Public Administration; and<br>Division 9.—Services not elsewhere specified. |

Class VIII also includes persons who derive their principal means of livelihood from miscellaneous sources (otherwise than through economic activity), e.g., income from investments, pensions and family remittances, proceeds of begging and other unproductive activities. These are not, however, included in this table as it is limited to Industries and Services. Hence there will be a difference to this extent between the total self-supporting persons of the Non-agricultural Class in Economic Table B-I and the total of this table. The reconciliation will be effected by adding the figures given in the next paragraph.

## C—HOUSEHOLD AND AGE (SAMPLE) TABLES.

### C-I—Household (size).

This table has been prepared in respect of a population covering the members of sample households selected from the entries in the National Register of Citizens on the basis of one household for every one thousand households. The sample households selected include roughly every tenth household in every hundredth house-numbering block in the rural areas and every fiftieth household in every twentieth house-numbering block or locality in urban areas.

2. The agricultural and the non-agricultural classes refer to the four agricultural and the four non-agricultural classes given in Table A-V. The Backward Classes include the Scheduled Castes, the Scheduled Tribes and other classes not treated as non-Backward by the State Government for the purpose of 1951 Census. Anglo-Indians are included among the non-Backward classes.

3. Columns (2) to (5) of the table relate to all the households and household population in the entire district while columns (6) to (17) relate to the sample households selected.

4. The figures have been given for each Census tract denoted by its number in column (1). The areas covered by each Census tract have been given in the fly-leaf to Table B-I.

## C-II—Livelihood Classes by Age-groups.

This table shows the livelihood distribution by age-groups for Rural, Urban and District totals in respect of a sample population based on a ten per cent sample taken out when the enumeration slips were initially sorted. The ten per cent sample was taken out as follows :—

Each enumeration pad which consisted generally of 100 enumeration slips was broken and the slips relating to displaced persons which had been noticed during the process of the preliminary scrutiny were removed from the pack of slips for being dealt with separately. The pack was then " cut " as in a card-game. The lower portion was placed above the upper portion and the slips were dealt into two pigeon-holes one marked " G " and the other marked " S " as follows.

The first five slips were placed in the pigeon-hole " G ", then one slip was placed in the pigeon-hole " S ". Thereafter for every nine slips placed in the pigeon-hole " G ", one slip was placed in the pigeon-hole " S " until the total number of slips left was less than nine and these residuary slips were all put into hole " G ". All the slips contained in the pigeon-hole marked " S " were taken out, counted and marked as " Sample " slips.

2. No smoothing formula has been adopted in preparing the table as in previous censuses and the figures have been tabulated as actually returned in suitable age-groups.

3. The figures under age " 0 " represent infants below one year.

## C-IV—Age and Literacy.

This is yet another table prepared in respect of the ten per cent samples of the general population (vide fly-leaf to Table C-II).

2. Age-groups 0 and 1 to 4 given in Table C-II have been combined into one age-group, and the age-group 5 to 14 has been split into two sub-groups 5 to 9 and 10 to 14. Persons of age-group 0 to 4 are treated as illiterate.

3. The figures are given for each Census tract (Rural and Urban) denoted by its number in column (1). The areas covered by each Census tract have been specified in the fly-leaf to Table B-I.

4. 'Literates' are those who are able to read and write any simple letter in any language.

5. Persons who are partly literate, i.e., persons who are able to read only, have been included among the illiterates. Details for such persons are given below :—
