PREFACE

THIS and the companion volumes in the District Census Handbook series, take the place of what used to be published at the previous Censuses in Mysore as "Part IV—Taluk Tables" and "Part V—Village Tables."

2. Unlike the Taluk Tables of the past which used to present only abridged versions of the more important tables of the All-India series, the tables included in these Handbooks cover the entire range with the exception of the C series, and offer taluk or tractwise details for the prescribed series of tables published in Part II of the 1951 Census Report. The age-wise tables of the C series are omitted in these Handbooks because the samples from which these tables have been constructed are too small to be of any statistical significance at the tract or taluk level.

3. Of the tables of the 1951 vintage presented here, the A series consist of General Population Tables, the B series of all the Economic Tables, the D series of all the Social and Cultural Tables produced this time and the solitary table of the E series exhibits summary figures for taluks.

4. Of the four series of tables presented in these Handbooks, talukwise data are offered in the first and the last namely the A and E series. The intervening series exhibit figures only for tracts. Tracts are units constituted purely for tabulation convenience, by combining one or more areas, without reference either to their geographical contiguity or to administrative linkage. The rural areas of one or more taluks have been combined to constitute a rural tract, while all the urban areas of a district have been welded together to form a single DISTRICT URBAN tract. The three principal cities, namely, Bangalore Corporation, Mysore and K. G. F. have, however, been constituted into separate tracts, Bangalore Corporation being split up into two tracts, one comprising the Civil area and the other embracing the whole of the City area.

5. The village statistics which used to be published separately in the past as Part V of the Mysore series, now appear in the Handbooks immediately after Table E, in considerably more amplified form than in the past. In addition to furnishing the usual population and literacy figures for each village or town, details are offered now for the first time, regarding occupied houses, households, inmates of institutions, houseless population and distribution of population by livelihood classes and sex.

6. The 1951 crop of Tables show many departures from established practice. Easily the most notable of them is the shift in the basis of classification this time from religion to economic. In the past the population was divided on the basis of religion at the very outset of sorting and this separation was maintained throughout the sorting operations in order that as many characteristics as possible might be cross-tabulated by religion. But this time, the basic religious categories have been substituted by

livelihood classes and these consequently pervade all the cross-tabulations carried out in 1951. According to this new scheme, the entire population has been divided, in the first instance, into two broad livelihood categories, namely, agricultural and non-agricultural, and each category has been sub-divided into four livelihood classes. These eight classes are as follows:—

CATEGORY A—*Agricultural Classes*

I Cultivation of land, wholly or mainly owned and their dependants

II Cultivation of land, wholly or mainly unowned and their dependants

III Cultivating labourers and their dependants

IV Non-cultivating owners of land; agricultural rent receivers and their dependants

CATEGORY B—*Non-Agricultural Classes*

Persons (including dependants) who derive their principal means of livelihood from :—

V Production (other than cultivation)

VI Commerce

VII Transport

VIII Other services and miscellaneous sources

7. It would be a good plan to study the fly-leaves before dipping into the tables as they draw attention to special features and offer details of minor categories which might happen to have been omitted in the tables.

8. While the Taluk and Village Tables of the past were gifts of provincial discretion, these District Census Handbooks are being published for the first time in their present form in accordance with Central direction.

G. NANJUNDIAH,
Census Commissioner for Mysore.

A—General Population Tables

A. I—Area, houses and population

1 The taluks in this Table are the same as in 1941, except that Pandavapura was formerly called French-Rocks.

2. The area figures of taluks were furnished by Amildars of Taluks and differences in the area figures between 1941 and 1951 are to be attributed partly to transfer of villages and partly to improvement in the method of computation of area.

3. By definition "towns" consist exclusively of Municipalities

A. III—Towns and villages classified by population

Only inhabited villages have been taken into account in this Table. The number of uninhabited villages in the several taluks is as under:—

Taluk	*Number*
MANDYA DISTRICT	152
Mandya	10
Srirangapatna	18
Nagamangala	30
Krishnarajpet	35
Malvalli	19
Maddur	8
Pandavapura	31

The "Village" of the Census is by definition the same as the Revenue Village: it includes the main settlement as well as all its hamlets.

A. IV—Towns classified by population with variations since 1901

1. By definition towns consist exclusively of Municipalities. Bellur having become a Municipality subsequent to the last Census now figures in this Table as a Town.

2. As in the 1941 Census, population figures of villages having the same name as the towns to which they are adjacent but comprising area lying outside the municipal limits, have been included in the rural area and excluded from the respective towns listed in this table.

3. Towns have been divided into six classes according to their population as follows :—

(i) Class I—100,000 and over
(ii) Class II— 50,000—100,000
(iii) Class III— 20,000— 50,000
(iv) Class IV— 10,000— 20,000
(v) Class V— 5,000— 10,000
(vi) Class VI— Under 5,000

The class to which each town belongs is indicated in the Table. In addition, totals of all the towns coming under each class are also furnished. All the towns in the District have been listed in one sequence in order of size.

4. There are no Class I and II towns in this District.

A. V.—Towns arranged territorially with population by livelihood classes

1. This table is different from its counterparts of the past in that it shows the population of towns according to livelihood classes rather than by religion (1931) or by communities (1941). The entire population has been divided into two livelihood categories (agricultural and non-agricultural) and eight livelihood classes, four agricultural and four non-agricultural, while each of the non-agricultural livelihoods is shown separately, the four agricultural livelihoods have been fused into two groups one showing the actual farming population (Livelihood Class I—Cultivating Owners, Livelihood Class II—Cultivating Tenants and Livelihood Class III—Agricultural Labourers) and the other shown figures for Non-cultivating Owners of Land and Agricultural Rent-receivers (Livelihood Class IV).

2. *Vide* also Note 1 to Table A. IV.

3. The abbreviation (M) added within brackets after the name of each town stands for Municipality.

B—Economic Tables

B. I—Livelihood classes and sub-classes

1. The abbreviation S.C. used in the Table heading stands for sub-class.

2. By definition, self-supporting persons (S.C. i) are economically active, earning dependants (S.C. iii) are economically semi-active ; and non-earning dependants (S.C. ii) are economically passive.

B. III—Employers, employees and independent workers in industries and services by divisions and sub-divisions

1. This Table exhibits figures for the economically active self-supporting persons belonging to the four non-agricultural livelihood classes.

2. The divisions and sub-divisions of the Indian Census Economic Classification Scheme that go into each of the non-agricultural livelihood classes are as follows :—

Class V—Production (other than cultivation)

Division 0—Primary industries not elsewhere specified :

1—Mining and quarrying ;

2—Processing and manufacture—foodstuffs, textiles, leather and products thereof ;

3—Processing and manufacture—metals, chemicals and products thereof ;

4—Processing and manufacture—not elsewhere specified.

Class VI—Commerce

Division 6—Commerce

Class VII—Transport

Division 7—Transport, storage and communications (only sub-divisions 7.1 to 7.4)

Class VIII—Other services and miscellaneous sources

Division 5—Construction and utilities ;

7—Transport, storage and communications (except sub-divisions 7.1 to 7.4) :

8—Health, education and public administration :

9—Services not elsewhere specified.

3. Livelihood class VIII also includes persons drawing sustenance from the following unproductive means of livelihood :—

(i) Non-working owners of non-agricultural property ;

(ii) Pensioners and remittance holders ;

(iii) Persons living on charity and other persons with unproductive occupations (*e.g.*, beggars, prostitutes) ; and

(iv) inmates of penal institutions and asylums.

Since these persons are regarded as economically inactive they do not find a place in this table ; consequently the figures for total self-supporting persons in Table B. I will not tally with those in Table B. III unless their numbers are taken into account. The reconciliation between the two tables is shown in the following statement.

D—Social and Cultural Tables

Table D. I—Languages

(i) Mother-Tongue

1. Mother-tongue is defined as the language spoken from the cradle. In the case of infants it is the mother-tongue of the mother.

2. Dialects of the principal languages of the district that could be clearly recognised as such have been merged with their respective parent languages. All other tongues are shown in the table as returned.

3. The figures under "Hindustani" include also persons who have returned "Urdu" and "Western Hindi" as their mother-tongue.

4. The table proper is preceded by an abstract in which the figures for the District are shown for each mother-tongue.

5. Both in the table and in the abstract, languages are given in the order of the total number of speakers.

6. Under each language only such taluks have been listed as have at least one person with that language as mother-tongue.

Table D. I—Languages—*contd.*

(ii) BILINGUALISM

1. The instructions at this Census introduced two changes from past practice. First, only Indian languages were taken into account. Secondly, where a person spoke two or more languages in addition to the mother-tongue the enumerator was required to record only one of them. This was the language which was used most commonly by the speaker, next to the mother-tongue.

2. Against each mother-tongue only such subsidiary languages are listed as had at least 100 persons speaking some subsidiary language or the other. For mother-tongues which returned at least one but fewer than 100 bilinguists details are furnished in the statement given below:—

D. VII—Livelihood Classes by Educational Standards

1. This table shows the incidence of literacy and education in each of the eight livelihood classes.

2. The test for literacy was ability to read and write a simple message in some language or other. In the table, "Literates" refers to persons who could read and write but who had not passed any examination ; and " Illiterates " includes partly literates who could read but not write.

3. The enumeration of educational attainments was based on the highest examination passed. Where a person held academic qualifications in more than one field, all of them were enumerated ; but at the time of tabulation the professional or technical qualification was preferred to the general, *e.g.*—a B.A., B.L., was classified under " Legal " ; a B.Sc., M.B.B.S., was classified under " Medical."

E—Summary figures by taluks

1. This table exhibits figures for taluks with break-up by livelihood classes for rural and urban areas against each taluk.

2. Since the Surveyor-General, India, was not in a position to furnish area figures for administrative units smaller than the District, the area figures of taluks were computed from village and town-wise data furnished by the Amildars of taluks and Municipal Presidents of towns.

3. The area figures in col. 2 of the table have been rounded off to the nearest integers, while the density figures for 1951 and 1941 have been calculated on actual area figures furnished by the Amildars of taluks and Presidents of Municipalities. The urban areas which were less than 0.5 have been omitted from the table.

Primary Census Abstract

1. The Village Statistics appearing in the following pages take the place of the Village Table which used to be published separately in the past. In addition to the usual population and literacy figures, the Abstract furnishes for each village and town in the district for the first time information regarding area in acres, number of houses, number of households as well as the houseless population. Also for the first time distribution of population is shown by Livelihood Classes with, of course, the inevitable sex separation.

2. Bechirak or uninhabited villages are also included in the Village Statistics presented in the following pages. Consequently the number of villages given here differ from the number given in Tables A-I and A-III which take into account only inhabited villages. The number of uninhabited villages in each Circle and Taluk is furnished in the abstract given at the beginning.

3. Only the names of " Asli " or main villages are given in these statistics, the population of hamlets being included in that of the corresponding " Asli " villages.

4. Alienated or *Inam* Villages are distinguished by the suffixes Jodi, Kayamgutta, Sarvamanya (or their initial letters) enclosed within brackets.

5. The Circle and Taluk totals include figures relating to the towns included in them.

6. Figures for ' Houseless ' population also include persons residing in jails, asylums, hostels and similar other institutions.
