PREFACE

The Government used to compile and publish District Manuals for each district prior to 1905. The manuals became obsolete with'n a few years of their publication, containing as they did not only matter of a more or less permanent character such as physical characteristics, history, religion and ethnography, as also statistical matters which soon became out of date. The Government decided to replace the District Manuals by another publication known as the District Gazetteer, consisting of two volumes, A and B. The A volume contained descriptive matter and such general figures, as might be necessary to explain the text, and the B volume contained detailed statistics. They also decided that the B volume should be brought out periodically, especially after each decennial census. Between 1905 and 1927 A volumes for thirteen districts were published. In 1927 they were discontinued. B volumes for all the districts were published between 1906 and 1915. They were continued to be published even after the 1931 census. They were not published after the 1941 census.

Village Statistics, containing the results of the census for every village in the State, were first compiled and published in 1872, at the instance of Mr. C. E. Gover, who was then the Census Officer in Madras. His successor, in 1882, considered that this publication led to needless expenditure and trouble in printing the tables villagewar, but the Government decided that the Village Statistics should continue to be published. The practice of issuing Village Statistics at every census was followed subsequently. The Village Statistics merely showed the number of occupied houses and population of each village and town by religions.

The idea of preparing the present volume, viz., the District Census Handbook for each district was put forward by Sri R. A. Gopalaswami, I.C.S., Registrar-General, India, and ex-officio Census Commissioner of India, as part of a plan intended to secure an effective method of preserving the census records prepared for areas below the District level. He proposed that all the district census tables and census abstracts prepared during the process of sorting and compilation should be bound together in a single manuscript volume, called the District Census Handbook, and suggested to the State Governments that the handbook (with or without the addition of other useful information relating to the district) should be printed and published, at their own cost, in the same manner as the Village Statistics in the past. In accepting this suggestion, the Government of Madras decided to print and publish the more important portion of statistical data relating to the district and to preserve the rest of the records in a manuscript volume for any future use, to which they may be put.

2. The statistical data embodied in the District Census Handbook have to be understood from the background of the changes introduced in the 1951 census. The most important and fundamental change introduced in the 1951 census consists in the substitution of an economic classification of the people for the classification based on Religion and Communities

adopted in the past. The people were divided into two broad livelihood categories, the Agricultural and the Non-Agricultural. Four agricultural classes and four non-agricultural classes were prescribed as shown below :—

Agricultura Classes—

I. Cultivators of land, wholly or mainly owned, and their dependants.

II Cultivators of land, wholly or mainly unowned, and their dependants:

III. Cultivating labourers and their dependants,

IV. Non-cultivating owners of land, agricultural rent receivers and their dependants.

Non-Agricultural Classes—

Persons (including their dependants) who derive their principal means of livelihood from—

V. Production other than cultivation,

VI. Commerce,

VII. Transport, and

VIII. Other services and miscellaneous sources.

Each of the above eight livelihood classes were divided into three sub-classes with reference to their economic status as below :—

(i) Self-supporting persons,

(ii) Non-earning dependants, and

(iii) Earning dependants.

These livelihood sub-classes have been defined in detail in the fly-leaf notes attached to Economic Table B-I included in this Handbook.

All non-earning dependants are economically passive, all earning dependants are economically semi-active. All self-supporting persons are ordinarily economically active but the classes and groups specified below constitute an exception to this rule—

(1) Self-supporting persons of Agricultural Class IV,

(2) Self-supporting persons of Livelihood Class VIII, who derive their principal means of livelihood from any source other than through economic activity, viz.—

(*a*) Non-working owners of non-agricultural property ;

(*b*) Pensioners and remittance holders ;

(*c*) Persons living on charity and other persons with unproductive occupations ; and

(*d*) Inmates of penal institutions and asylums.

Economically active persons engaged in cultivation are either cultivators or cultivating labourers. Economic Table B-I gives particulars of the population classified according to the eight livelihood classes and the three sub-classes mentioned above.

Economically active persons engaged in industries and services have been classified, with reference to the nature of the commodity produced or service performed. They are further divided into three sections, **viz.**, Employers, Employees and Independent Workers.

Economic Table B-III gives particulars of the economically active persons classified under the divisions and subdivisions of industries and services of the Indian Census Economic Classification Scheme.

Table C-I, included in this Handbook covers the population of sample households and Tables C-II and C-IV cover a 10 per cent sample population. The method adopted for extracting these samples has been described in detail in the fly-leaf notes attached to the relevant tables.

3. *Scheme of the Census Handbook.*—The Handbook has been divided into two parts: Part I consists of three sections, namely, Section (i) containing the General Population Tables (A-series), the Economic Tables (B-series), Summary figures for Taluks (Table E), Tables I, II and III relating to Small-scale Industrial Establishments and Table L showing the Incidence of Leprosy, Section (ii) containing the Rural Statistics, and Section (iii) containing the Urban Statistics, and Part II containing the Household (size) Table C-I, and Tables showing Livelihood Classes and Literacy by Age-groups (C-II and C-IV), the Socia' and Cultural Tables (D-series) and an abstract of non-agricu tural occupations in the district. Among the tables included in the Handbook, Table A-IV—Towns classified by population with variations since 1901, Economic Table B-II—Secondary means of Livelihood under each livelihood class and Table C-II—Livelihood classes by age-groups furnish information at the district levol. The other population tables in the A-series, the summary figures for taluks (Table E) and the infirmity (Table L) showing the incidence of leprosy furnish information for each taluk in the district with a district total. The rural statistics in Part I—Section (ii) furnish basic information in respect of every village and town arranged according to census tracts. In addition to the total population of the villages, and its distribution among the eight livelihood classes, information regarding the number of literates, the cultivated area, the number of small-scale industrial establishments under categories, textile and non-textile and the number of leprosy cases and doubtful cases has been included.

The urban statistics in Part I—Section (iii) furnish simi'ar information except that relating to cultivated area in respect of every unit classified as city or census town in the district with ward wise data. All other tables included in the Handbook provide information for units called census tracts with totals for the district.

4. *Census Tracts.*—A distinctive feature of the census statistics is its rura'/urban break-up designed with a view to compare the conditions and characteristics of the rural and urban population. The rural areas of each district were therefore kept distinct from the urban areas. For facilitating tabulation these areas were divided into a number of rural and urban tracts. As far as possible, the rural area in each taluk was constituted into a single rural tract. In a few cases however where the taluks were smal in size with reference to their population, the rural areas of more than one taluk were taken together as a single rural tract. The urban tracts have been formed out of areas declared as cities and census towns in each district. Every city was treated as a separate tract. Towns other than cities were grouped together to form non-city urban tracts. Wherever possible, the towns in each taluk were constituted into a single non-city urban tract. In cases where the towns in a taluk had a population of less than 50,000 the towns in more than one taluk were grouped

together to form a non-city urban tract. All the rural tracts in the State have been assigned numbers in one series, the non-city urban tracts in another series and the city tracts in a third series. In all the tables where the data have been furnished for tracts, the tracts have been denoted by numbers that have been assigned to them. A list of tracts into which the district has been divided and the areas comprised in each is furnished in the fly-leaf note to Economic Table B-I relating to the district.

The districts, taluks and villages mentioned in the Tables and Abstracts have been shown along with the census location code numbers assigned to them for purposes of census operations.

The numbers given to the Tables in this publication correspond to those given in the State Census Report.

Elaborate notes explaining the scheme of each Table have been introduced in the fly leaf attached to each with a view to enable the reader to get a precise idea of the data furnished in the Table.

5. *Tables relating to Small-scale Industries.*—In the year 1950 a census of Small-scale Industries was instituted under the orders of the Government. The object was to get some idea about small industries such as cottage and home industries, small establishments, workshops, etc., where articles were produced, repaired or otherwise treated for sale, use or disposal and small mines. The enquiry was confined to establishments to which the Factories Act was not applicable. Individuals who worked on their own and did not employ other people were left out of account. From the data collected three Tables were prepared and they have been included in the Handbook. Information giving villagewise and wardwise information for Small scale Industries have been incorporated in the rural and urban statistics. The details collected and embodied in the Tables are not to be considered accurate or exhaustive, as the enumeration staff employed had not been trained for the purpose and some cases of under-enumeration were noticed. However, the figures given in the Tables may be sufficient to give an insight into the nature of the industries prevalent in the different parts of the district.

6. Opportunity has been taken to put in a short introductory note detailing the salient points connected with the district, such as the physical features, climate, rainfall, irrigation and drainage facilities, roads and other communications, crop statistics, education, industries and other matters of general interest. The information contained in the introductory note is based on the materials furnished by Collectors of districts and Departments of Government. The District Gazetteer was also freely referred to. The relevant paragraph of the 1951 Census Report discussing the growth of population in the district has also been incorporated in the proper place.

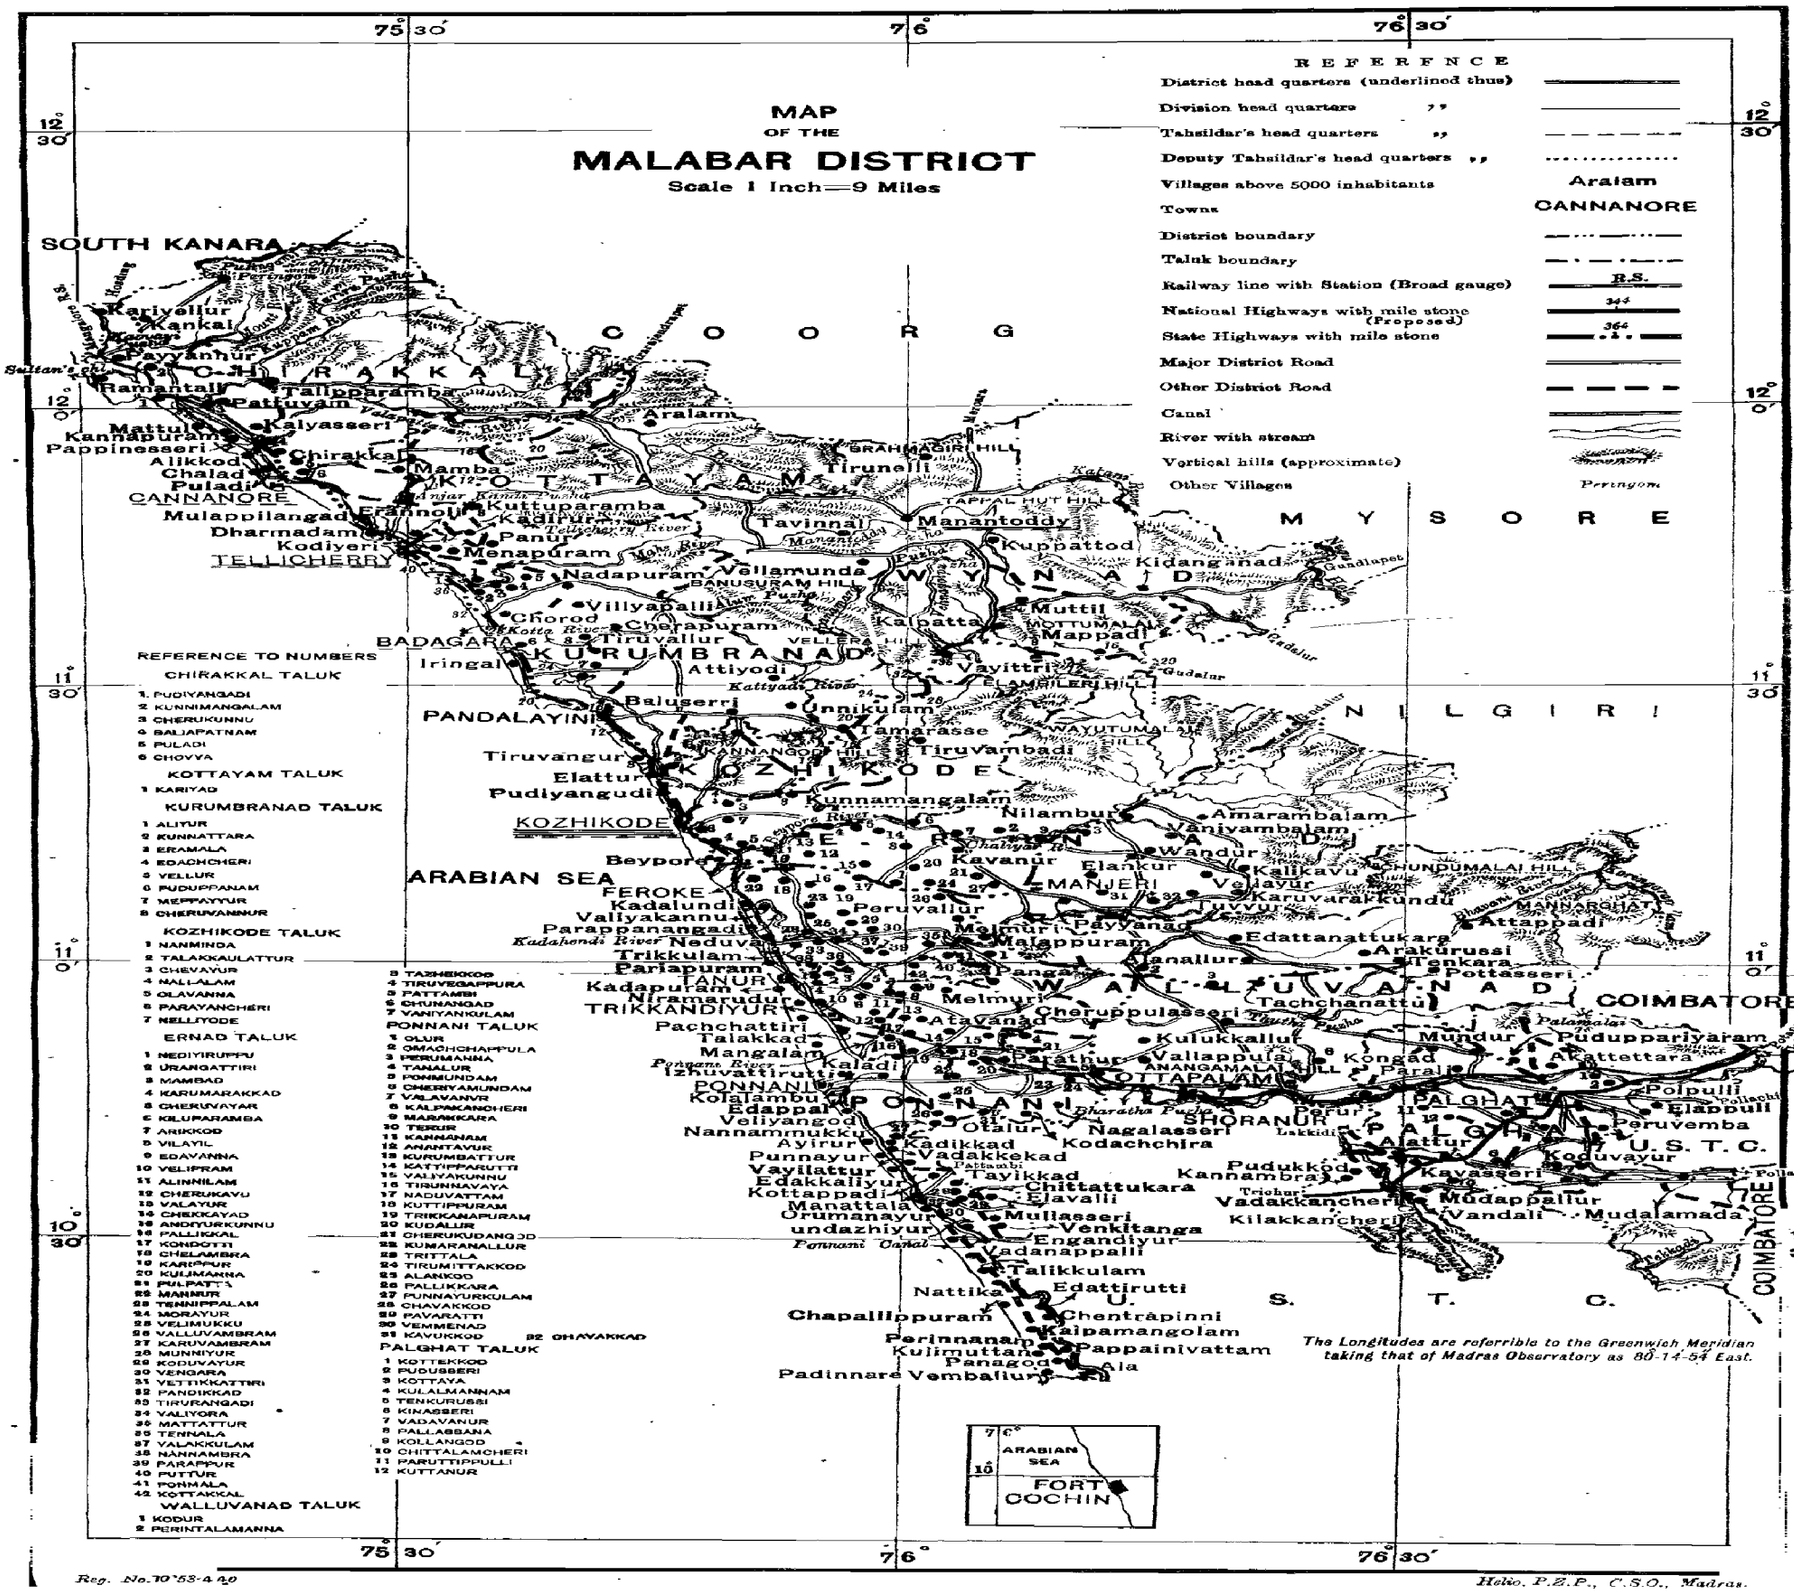

A district map showing taluk boundaries, physical features, important roads and places with a population exceeding 5,000 is also attached.

It is hoped that this Handbook will serve as a book of reference on matters relating to the district and that it will be found useful both by Departments of Government and the public.

INTRODUCTION

TO

MALABAR DISTRICT

I. (*a*) (i) *Situation and physical characteristics.*— Malabar is one of the two districts situated on the west coast of the Madras State. It lies etween 10°15′ and 12°20′ of the northern latitude and 75°10′ and 76°50′ of the eastern longitude. The district stretches along the shores of the Arabian Sea for a distance of about 150 miles, with the South Kanara district in the north, the Coorg and Mysore States, the Nilgiris and Coimbatore districts on the east and the United State of Travancore and Cochin on the south. The villages of Peruvemba, Palathulu, Panyur, Koodalur, Elavancherri, Elapully and Theneri and a portion of Vadavannur amsam which were originally in this district were recently transferred to the United State of Tranvancore and Cochin. Portions of Chittoor village and Nallipulli, Tatamangalam and Vallangi villages which were attached to the United State of Travancore and Cochin were transferred to this district. The district consists of the following ten taluks comprised in five Revenue Divisions :—

Name of Revenue Division.	Headquarters of Revenue Division.	Taluks comprised in the Revenue Division.	Area in square miles.	Headquarters of the taluk.
Tellicherry	Tellicherry	Chirakkal	688	Cannanore.
		Kottayam	484	Tellicherry.
		Wynaad	821	Mannantoddy.
Kozhikode	Kozhikode	Kurumbranad	506	Badagara.
		Kozhikode	373	Kozhikode.
		Laccadive and Minicoy Islands.	7	....
Malappuram	Malappuram	Ernad	978	Manjeri

Palghat	Palghat	Ponnani	427	Ponnani.
		Palghat	643	Palghat.
Fort Cochin	Fort Cochin	Fort Cochin	2	Fort Cochin.
		Total	5,802	

Wynaad, Walluvanad and Palghat taluks are in the interior. The other taluks are on the sea coast. The breadth of the district varies from less than 5 miles in the extreme south to upwards of 70 miles in the middle where Palghat taluk penetrates the line of the ghats. The Laccadive islands attached to Malabar lie at distances varying from 139 to 218 miles off the coast and consist of a group of four inhabited and ten uninhabited islands. The Minicoy island, also attached to this district, lies south of Laccadives at a distance of 243 miles from Kozhikode.

Malabar or Malayalam district is as the name implies a land of mountains. The great western ghats form an almost continuous mountain wall on the eastern side broken only by the Palghat gap. The coast contains a narrow strip of sand from the extreme south up to Kozhikode. North of Kozhikode the coast line is fringed with low cliffs alternating with stretches of sand. A mile or two inland the scene changes and the country swells towards the barrier of the ghats at first, in range after range of low red laterite hills with paddy flats and cocoanut gardens

and later in the long spurs, deep ravines and thick jungles that mark the beginning of the main Western Ghats. The ghats maintain an average elevation of 5,000 feet, occasionally soaring up into peaks about 8,000 feet and run parallel to the coast at a distance of some 20 miles from it. In Kozhikode taluk they turn sharply eastward and after curving round the Nilambur valley in Ernad taluk they run south along the eastern portions of Ernad and Walluvanad taluks and the northern portion of Palghat taluk. Here there is the break known as the Palghat gap. South of the Palghat gap they rise again in the Tenmalais (4,000 feet to 5,000 feet high) and swell further into the Anamalais of Coimbatore district.

Detached from the main range there are several outlying hills which break the monotony of the undulating laterite downs of the low country.

The Palghat gap is 25 miles broad and opens out into Coimbatore district. Besides this gap there are some other passes piercing the ghatsand giving access to Coorg, the Wynaad and Mysore States and to the Nilgiris district.

The Laccadives and the Minicoy islands are coral formations not more than 30 feet above sea level with shallow lagoons enclosed by reefs on the western and north-western sides.

(*b*) *Rivers.*—Three rivers flow east from this district. All of them are tributaries of the Cauvery. They are the Rampur river, the Kabani draining the whole of Wynaad taluk, and the Bhavani draining the high hills on the eastern part of Walluvanad taluk. All the other rivers flow down to the Arabian Sea. Many of these rivers flow into the coastal backwaters which are linked up by artificial canals forming important means of communications. The important rivers flowing into the Arabian Sea from north to south are the Valarpattanam, the Anjarakkandi, the Mahe, the Kotah, the Chaliar or Beypore river, the Kadalundi and the Ponnani.

The Valarpattanam rises in the extreme north-west of Wynaad and flows north-west across Kottayam and Chirakkal taluks and reaches the sea at the port of Baliapatam. The other rivers in Chirakkal taluk are the Kottoor river, the Irikkur, the Vannathi, the Pazhayangadi, the Perumba, the Kuppam, the Kuttikkol and the Kavvayi.

The Anjarakkandi flows through Kottayam taluk. The other rivers in Kottayam taluk are the Bavali and the Iriti.

The Mahe river drains the northern part of Kurumbranad taluk and flows for some distance as the boundary between Kurumbranad and the Kottayam taluks.

The Kotah river flows in the centre of Kurumbranad taluk and is navigable for a long distance and is also connected with the waterways.

The Korapuzha is another river flowing in the southern portion of Krumbranad taluk.

The important rivers in Wynaad taluk are the Panamarampuzha, the Manantoddy river and the Bavali.

The rivers in Kozhikode taluk are the Kallai, the Elathur river (Korapuzha) the Irittulipuzha, the Irungipuzha, the Mukkam river and the Beypore river. The Beypore river consists of three branches, namely, the Karunpuzha rising in the valley between Gulkal and Mukarti hills of the ghats in the east of Ernad taluk, the Ponpuzha river north of it and the Chalayar further north in the Ernad taluk. It flows into the sea at Beypore in the north-western corner of Ernad taluk six miles south of Kozhikode. The river is navigable for light boats as far as Mambad village in the interior of Ernad taluk. Timber from the forests is also floated down this river. The other important river in Ernad taluk is the Kadalundi. This river is navigable for a considerable distance during the rainy season.

The Ponnani river also known as the Bharathipuzha, rises in the Anamalais in Coimbatore district, traverses the taluks of Palghat and Ponnani touching the southern boundary of Walluvanad taluk. It is fed by the Tuthapuzha river in Ponnani taluk and finally joins the sea at Ponnani. This river is connected with water ways. The other rivers in Walluvanad taluk are the Bhavani, the Siruvani, the Kadalundi, the Olipuzha, and the Tuthapuzha.

The other rivers in Palghat taluk are the Kalpathipuzha, the Yakkarapuzha and the Gayatripuzha.

(*c*) *Forests.*—The private and the reserved forests in the district including waste or communal lands containing trees or shrubs cover an area of 2,958 square miles consisting of 535 square miles of Reserved forest and 1,750 square miles of private forests. The area of private forests actually wooded is 418·5 square miles. The Reserved forests consist of deciduous subtropical ever green, ever green tropical rain forests, and deciduous monsoon forests. The private forests at the foot hills contain scrub jungle, a few trees and bamboos. In the interior of the ghats there are some luxuriant sholas.

(d) Climate and rainfall.—Great extremes of heat and cold are unknown. Though the average maximum temperature is only around 91° it is oppressive in the moisture-laden atmosphere. Humidity is exceptionally high rising to 90 per cent during the south-west monsoon. The south-west monsoon begins early in June and gets weakened from September. In summer months Palghat taluk suffers from the hot blast coming from Coimbatore district, through the gap. Thunder showers occur from April till the onset of the south-west monsoon. The north-east monsoon is not strong in the district. By the end of December, dry weather sets in.

A statement showing the monthly mean of daily maximum, daily minimum, highest recorded and lowest recorded temperatures and the mean of rainfall for the years 1881—1940 and similar particulars and actual rainfall for 1951 as recorded at Kozhikode is given below :—

Except in Ponnani and Cochin taluks red loam is the prevailing soil and represents about 85 per cent of the total area of the plains. Clay is found only in the areas inundated in monsoon and in beds of shallow lakes and lagoons of Ponnani. The light sandy soils of the coast are alluvial deposits of sand slightly impregnated with silt found in shores of backwaters and near mouths of the rivers. In Wynaad the soils are of red ferruginous series with regar soils in the north of the taluk. The black and blackish soils derived from the forest washes are highly fertile.

(*f*) *Irrigation and drainage facilities and liability to famine.*—The south-west monsoon gives an abundant rainfall to the district. The rains are sufficient to mature the crops. There are some minor irrigation tanks and some major works recently completed, which provide irrigation facilities for some additional areas. The Malampuzha Project in Palghat taluk is expected to be completed by 1953. There are also some wells dug for the irrigation of second crop, hot weather paddy crops and arecanut gardens.

Though the crop on the arable area in the district may generally be regarded as safe, the district does not grow sufficient foodgrains for the requirements of its population and depends largely on imports for its sustenance. There are large extents of unoccupied land, most of which consists of uncultivable blocks of rock, lantana jungle and hills.

The taluks of Chirakkal, Kottayam, Kurumbranad, Kozhikode, Ernad and Ponnani are deficit in foodgrains while Palghat and Wynaad are surplus areas.

The number of minor and major irrigation sources in each taluk and the area irrigated by them are furnished in the statement given below :—

(*g*) *Area cultivated with food and commercial crops.*—Coconut thrives in the alluvial soils of the coast and is found in profusion in Ponnani, Kurumbranad and Cochin taluks. It is also grown in the lower slopes of lateritic ground in the interior. The finest lands for cultivation of ginger are found in Ernad taluk. The peppervine flourishes best in the interior of Kottayam and Chirakkal taluks. The nendra plantain tree is a frequent sight all over the district. Jack trees and arecanut gardens are found in plenty. Tapioca is also widely cultivated in Kurumbranad, Kozhikode and Ernad taluks. Tea, coffee, rubber and a little cinchona are the plantation crops of the district raised mainly in the taluks of Wynaad, Ernad and Kozhikode. In the Laccadives, coconut and some jack and lime trees are grown.

The chief food crop is paddy. Cholam, ragi, samai and maize are cultivated in small extents. The particulars of area cultivated with food crops, pulses and commercial crops, and plantation crops for 1949–50 which is the latest normal year for the district are furnished in *Annexure I*.

(*h*) *Communications*—(i) *Roads.*—There are roads leading to the South Kanara district, the Coorg State, the Mysore State, the United State of Travancore and Cochin and the districts of the Nilgiris and Coimbatore. The district has 2,224 miles of roads consisting of 42 miles of National Highways, 330 miles of Provincial Highways, 811 miles of major district roads, 389 miles of other district roads, 448 miles of village roads, eight miles of Public Works Department roads and 196 miles of municipal roads.

Many of the rivers in the district flow into backwaters along the coast which are linked up by artificial canals forming important means of communications. There is one uninterrupted waterway from Kozhikode via Tirur in Ponnani taluk to places in the United State of Travancore and Cochin.

The talukwise distribution of the roads is given below :—

Name of taluk.	National Highways.	Provincial Highways.	Major District roads.	Other District roads.	Village roads.	P.W.D. roads.	Municipal roads.	Total.

Total ..	42	330	811	389	448	8	196	2,224

The condition of the roads in all taluks is generally satisfactory. The communications in the district are not quite adequate except in Palghat taluk. In Chirakkal taluk, several new roads are under formation.

(ii) *Railways.*—The district has 178 miles of broad gauge and 22-3/4 miles of metre gauge railway of the Southern Railway. The broad gauge main line from Madras to Mangalore traverses the taluks of Palghat, the southern portion of Walluvanad taluk and the northern portion of Ponnani taluk and proceeds along the coast in the taluks of Ernad, Kozhikode, Kurumbranad, Kottayam and Chirakkal. Another broad gauge line connects Cochin with Shoranur in Walluvanad taluk on the main line. A metre gauge line connects Olavakote on the main line with Pollachi in Coimbatore district.

The Cochin harbour terminus station serves the out agencies at Alleppey, Chenganacheri, Kayangulam, Kottayam (Travancore and Cochin) for parcels and goods ; Pattambi, Tirur and Ferok stations serve the out agencies at Perintalamanna, Ponnani and Ernad respectively.

(iii) *Posts and Telegraphs.*—There is a departmental telegraph office at Kozhikode. There are 60 post and telegraph sub-offices, 43 non-combined sub-post offices and 770 branch post offices in the district. Their talukwise distribution is given below :—

Taluk.	Branch post offices.	Non-combined sub-post offices.	Post and telegraph sub-offices.

II. (*a*) (i) *Growth of population.*—The particulars of population in the district and in each taluk in 1941 and 1951 and the percentage of variation are furnished below :—

Name of district and taluk.	Population. 1941.	Population. 1951.	Percentage of variation.

Ponnani	686,929	793,805	15·6
Palghat	495,634	585,651	18·2
Cochin	28,896	32,941	14·0

"*District increase*—21·1 *per cent.*"—The Laccadive and Minicoy Islands have registered an increase of 14·9 per cent though these are backward and unattractive islands. In the main land, leaving out Wynaad taluk and the small taluk of Fort Cochin, which consists practically only of Fort Cochin Municipality, the increase in the population of the taluks has ranged from 15·6 per cent in Ponnani to 26·9 per cent in Kozhikode. The hilly interior areas in Kozhikode, Kurumbranad, Kottayam, Chirakkal, Ernad and Walluvanad taluks, where there is considerable virgin land, have attracted a large emigrant population fr m Travancore-Cochin. In Wynaad taluk, there has been an increase of 59·2 per cent. There is a colonization scheme here and a large number of immigrants have settled down. The marked increase in Palghat taluk (18·2 per cent) is partly attributable to the large influx of labourers to the major irrigation works such as the Malampuzha Project, Cheramangalam Project, etc. The increase in the northern taluks is larger than in the southern taluks, mainly due to the fact that the immigration into the northern taluks, especially to the Wynaad taluk, has been on a larger scale than into the southern taluks as the former has vast areas of undeveloped lands and the better communications and medical facilities have had a greater attraction for immigrants.

Another relevant fact is that since 1946, birth rates in Malabar have been much higher than for the State as a whole while the death-rates have been distinctly lower than for the State as a whole, as will be seen from the figures given below :—

Average for	Madras State. Birth rate.	Madras State. Death rate.	Malabar district. Birth rate.	Malabar district. Death rate.
1941–45	32·8	24·6	29·67	23·99
1946	34·0	20·3	34·57	16·07
1947	34·0	20·9	36·69	15·95
1948	32·3	18·7	35·96	15·51
1949	32·3	17·4	35·04	14·21

The general conditions affecting the growth of population are similar in the Travancore-Cochin State which is similarly situated on the west coast. It is not, therefore, surprising that that State should have shown a similar high increase, viz., nearly 24·0 per cent for the 1941–51 decade. During the previous decades both Cochin and Travancore States registered quite a large increase as may be seen from the figures below :—

State.	1921–30.	1931–40.
Cochin	23·1	18·1
Travancore ..	27·2	17·1

The large increase in Malabar district is also partly attributable to the fall in emigration and to the return of emigrants on a large scale from Burma, Ceylon and Malaya."

(Extracted from the Census Report, Part I.)

(ii) *Vital statistics.*—The particulars of births and deaths due to various causes in the district for the decennium 1941–50 is furnished in *Annexure II.*

The average birth rate was 32·0 per mille which is about the average for the State during the decade. The birth rates were low during the war years 1942–44 and have gradually increased thereafter. The average death rate of 19·3 was less than that for the State (21·2) during the decade. Excepting for 1943, a decline in the death rates is shown. In 1943 there was an unprecedented epidemic of cholera claiming 28,432 deaths out of 28,874 deaths from cholera recorded during the decade. The mortality from smallpox and fevers was less than the average for the State, while mortality from respiratory diseases, dysentery and diarrhoea was about the normal for the State. The maternal mortality rate showed a fall from a rate of 6·2 in 1941 to 4·8 per 1,000 births in 1950. The infant mortality rate also showed a steady downward trend from 141·1 per 1,000 live births in 1941 to 92·9 in 1951.

(*b*) *Medical relief—Arrangements.*—A list of the medical institutions in the various taluks of the district and their bed strength is furnished below :—

Leprosy clinics are attached to the Government and Local Fund Hospitals and Local Fund Dispensaries. There is a leprosy hospital at Cherayar, 3 miles to the north-east of Kozhikode with 256 beds. The Poor Home Society's Leprosy Home at Cherayar provides another 66 beds.

There is a major and a minor X-ray set at the Government Headquarters Hospital at Kozhikode. The Government Hospital at Fort Cochin has an X-ray department and a blood bank.

(*c*) *Water-supply and drainage arrangements.*—There are no drainage arrangements in the district except in Kozhikode and Fort Cochin Municipalities where there is open drainage.

Rivers and wells are the chief sources of drinking water-supply in the district. There is protected water-supply in the municipalities of Kozhikode and Fort Cochin.

The number of drinking-water wells provided by Government in each taluk is specified below:—

Chirakkal (40), Kottayam (25), Wynaad (24), Kurumbranad (36), Kozhikode (49), Ernad (40). Walluvanad (35), Ponnani (36) and Palghat (180).

(*d*) *Fairs and Festivals.*—The fairs and festivals in the various taluks of the district are given below:—

7 Uthiram and Hastham festival.	December.

(NOTE.—Every year there will be slight changes in the dates on which the festivals take place. In cases in which dates are specified above, they are the dates on which the festivals were conducted in 1951.)

III. *Educational institutions.*—This district leads in point of general literacy, 31 per cent of the population (41 per cent of males and 21 per cent of females) being literates. The particulars of the number of each class of educational institutions in the various taluks of the district and the strength in them as on 31st March 1951 are furnished in *Annexure III.*

IV. *Industry*—(i) *Cottage and small-scale.*—A statement showing the particulars of the number of establishments of the important cottage and small scales industries and the approximate number of persons employed in them in each taluk is furnished in *Annexure IV.*

(ii) *Large-scale industries.*—There are no large-scale industries in the taluks of Kottayam, Ernad, Ponnani and Cochin. The particulars of the number and kind of large-scale industries in the other taluks and the number of persons employed in them are given below:—

Items of general importance.—Kozhikode, Palghat, Cannanore, Tellichery and Fort Cochin are the municipalities in the district. There is a Government Agricultural Research Station in pepper farming at Taliparamba in Chirakkal taluk and another at Panniyur. Cochin is the most important port on the west coast of India, south of Bombay. Most of the trade of the west coast and the adjoining districts of Madras State and the United State of Travancore and Cochin pass through it. There is a harbour at Cochin and ships of medium draught could be berthed there. There is also a naval establishment at Cochin.

Wynaad Colonization Scheme.—The area of the colony is roughly 53 square miles comprising 33,802 acres of land, lying in the four villages of Kindanganad, Noolpuzha, Nenmeni and Moopainad amsams of Wynaad taluk. The Government have sanctioned the extension of the scheme to Chingeri village, where 3,238 acres of land are available for allotment to colonists. The different categories of persons that are being admitted to the colony are ex-tappers, landless civilians of Malabar, members of the Ex-I. N.A. Sixty-two per cent of the colonists are ex-servicemen. Particulars of colonists so far settled are :—

Ex-servicemen	1,834
Ex-tappers	5
Political sufferer	1
Landless civilians	6
Ex-Indian National Army men.	3
Aboriginals	251
Local residents	750
Total ..	**2,850**

It will be possible to settle 2,521 servicemen and 1,513 other categories of colonists, including those already settled. The colony has to be conducted on a co-operative basis. Each colonist is given an amount of Rs. 1,900 as financial assistance, ex-servicemen from the P.W.S.R. Fund and other categories of colonists from the State Government Fund. The contribution from the P.W.S.R. Fund is a grant to the ex-servicemen colonists. There is an agricultural farm and a hospital attached to the colony at Ambalavayal.

PART I

Section (i)

A—GENERAL POPULATION TABLES.

A-I—Area, Houses and Population.

This table shows for the rural and urban areas of each taluk and for the district, the area, the number of inhabited villages and towns, occupied houses and the total population with distribution by sex.

2. The district area shown in column (2) of this table is that supplied by the Surveyor-General of India. Area figures furnished by the Central Survey Office, Madras, have been adopted for the taluks. The total area of the taluks as furnished by the Central Survey Office, Madras, shown within brackets in column (2) differs from the area of the district furnished by the Surveyor-General.

3. "*Village*" is the revenue administrative unit within defined boundaries. This table gives particulars in respect of all villages containing one or more groups of habitations. Villages with no habitations are not included in this table.

4. "*Town*" is a place of usually not less than 5,000 inhabitants, possessing distinct urban characteristics. Cantonments have been treated as forming part of the towns in which they are situated.

5. "*House*".—Every dwelling with a separate main entrance has been treated as a house for census purposes.

24. MALABAR DISTRICT.

A-II—Variation in Population during fifty years.

This table compares the population of the district and of each taluk in the district as ascertained at the Census of 1951 with the corresponding figures of the five previous censuses. The figures recorded at the previous censuses have been adjusted for subsequent territorial changes, if any, in order to afford a correct basis for comparison. The adjusted figures show the population of taluks and the district as constituted at present.

2. The main territorial changes that occurred during the decade are—

The villages of Peruvemba, Palathulu, Panyar, Koodalur, Elavancherri, Elapully and Theneri and a portion of Vadavannur amsam were transferred to the United State of Travancore and Cochin. Portions of Chittoor village and Nallipulli, Tatamangalam and Vallangi villages which were attached to the United State of Travancore and Cochin were transferred to this district.

24. MALABAR DISTRICT.

A-IV—Cities and Towns classified by Population with variations since 1901.

This table shows the population and distribution of sex of cities and towns of the district at each of the last six enumerations.

2. The following towns have been treated as cities for the 1951 Census :—

(1) Kozhikode.

(2) Palghat.

3. The cities and towns have been arranged in this table according to their population in 1951 under the following six classes :—

Class.	Limits of population.
I	100,000 and over.
II	50,000 to 100,000.
III	20,000 to 50,000.
IV	10,000 to 20,000.
V	5,000 to 10,000.
VI	Under 5,000.

4. Where possible, the former population of places treated for the first time as towns in 1941 and at this census, has been extracted from Village Statistics. Where this could not be done, the columns have been left blank.

5. The population of towns for previous censuses are those then recorded. No adjustments have been made for intervening changes in area.

6. Municipality, Panchayat and Cantonment are indicated by the use of the letters (M), (P), (C), respectively within brackets.

24. MALABAR DISTRICT.

A-V—Towns arranged talukwise with Population by Livelihood Classes.

This table shows the analysis of the Urban population in towns by Livelihood Classes, instead of by communities as in the previous Censuses.

2. Under the Indian Census Economic Classification Scheme, the people have been divided into two broad livelihood categories, viz., the Agricultural Classes and the Non-agricultural Classes. There are four Agricultural classes and four Non-Agricultural Classes as shown below:—

(i) *Agricultural Classes.*

I. Cultivators of land wholly or mainly owned and their dependants.

II. Cultivators of land wholly or mainly unowned and their dependants.

III. Cultivating labourers and their dependants.

IV. Non-cultivating owners of land, agricultural rent-receivers, and their dependants.

(ii) *Non-Agricultural Classes.*

Persons (including dependants) who derive their principal means of livelihood from—

V. Production (other than cultivation).

VI. Commerce.

VII. Transport.

VIII. Other services and miscellaneous sources.

3. In this table the figures for the Agricultural Livelihood classes I to III are not given separately but have been clubbed together.

4. The towns in each taluk of the district are arranged in the order of their population as in Table A-IV.

5. Municipality, Panchayat and Cantonment are indicated by the use of the letters (M), (P), (C), respectively, within brackets.

6. For the definition of a "Town" *see* fly-leaf to Table A-I.

E—Summary figures by taluks.

The data contained in this table have been given for each taluk in the district.

2. The areas shown in column (2) of the table for the district and the taluk "total" are the latest figures furnished by the Central Survey Office, Madras. The areas given for "urban" are those furnished by the District Officers. The areas for "rural" have been obtained by deducting the figures for "urban" from those for district and taluk "total".

3. The district area furnished by the Surveyor-General, India, which has been shown in Table A-I, could not be adopted in this table as taluk wise figures have not been furnished by him. The district areas given by the Surveyor-General differ in varying degrees from those furnished by the Central Survey Office, Madras.

4. Previous Census figures of population have been adjusted with reference to the transfer of enclaves. The rural and urban population figures have been taken as they were at the 1941 and 1931 Censuses and as they are at the present Census, regardless of the changes of rural areas into urban areas and *vice versa* from Census to Census, for the purpose of calculating percentage variation between 1931 and 1941 and between 1941 and 1951. For calculating density for "rural" and "urban" for 1941, the areas of the towns newly formed at the present Census rounded to the nearest square mile have been deducted from the areas given for urban in column (2) for 1951 and added to the areas given for 'rural,' in the districts and taluks where new towns have been recognized.

5. In respect of Wynaad and Laccadive Islands taluks which have no urban areas, the figures represent the total alone.

3. The livelihood classification is based on the principal means of livelihood of the self-supporting persons, the principal means of livelihood for earning and non-earning dependants being the same as that of the self-supporting persons on whom they are dependant.

4. " The principal means of livelihood " is the means of livelihood which provides the largest or the major part of the income in the case of self-supporting persons who have more than one means of livelihood. In the case of other self-supporting persons, it is the only means of livelihood.

5. A person has been regarded as " self-supporting ", if the income secured by the person is sufficient at least for his (or her) own maintenance at the level of living adopted by him (or her) at the time of the Census. The income secured may be in cash or kind. Anyone who is not a " self-supporting " person in this sense has been regarded as a dependant. An ' earning ' dependant is a person who secures an income which is not sufficient to support him (or her). A person who does not secure any income either in cash or kind, is a ' non-earning dependant.'

6. The non-earning dependants include persons performing housework or other domestic or personal services for other members of the same family household, but do not include " unpaid family workers " or persons who take part along with the members of the family household in carrying on cultivation or a home industry as a family enterprise. These latter persons have been classed as either self-supporting or earning dependants according to the share of income attributable to them.

7. The self-supporting persons shown in Livelihood Class VIII include also persons who derive their income otherwise than through productive activity, i.e., persons coming under the following groups, details for which are given in the fly-leaf to Economic Table B-III :—

(1) Persons living principally on income from non agricultural property ;

(2) Persons living principally on pensions, remittances, scholarships and funds ;

(3) Inmates of jails, asylums, alms houses and recipients of doles ;

(4) Beggars and vagrants ; and

(5) All other persons living principally on income derived from non-productive activity.

B-II—Secondary means of Livelihood.

This table gives for the district the number of persons, in each of the eight livelihood classes mentioned in Economic Table B-I, who possess a secondary means of livelihood ; and cross classifies them (according to the nature of such means of livelihood) under the same eight livelihood classes.

2. The secondary means of livelihood shown for self-supporting persons is the means of livelihood next in importance to their principal means of livelihood. In respect of earning dependants, it is the means of livelihood which provides the earning, or the largest part of their income, if they have more than one source of income.

3. Non-earning dependants and self-supporting persons who have no secondary means of livelihood are excluded from this table.

24. MALABAR DISTRICT.

B-III—Employers, Employees and Independent Workers in Industries and Services by Divisions and Subdivisions.

This table gives figures for each Census tract in the district. The areas comprised in each census tract denoted by its number in column (1) have been specified in the fly-leaf to Table B-I. In this table the self-supporting persons in the four Non-agricultural classes given in Economic Table B-I are distributed in the various divisions and subdivisions of Industries and Services under the Indian Census Economic Classification Scheme, according to their secondary Economic Status, namely, Employer, Employee and Independent worker.

2. (An) Employer (is) a person who employs other persons in order to carry on the business from which he secures his livelihood and pays them a salary or wage in cash or kind.

3. (An) Employee (is) a person who ordinarily works for some other person for a salary or a wage, whether in cash or in kind in order to earn his livelihood.

4. (An) Independent worker (is) a person who works on his own without being employed by anyone for a salary or wage and who does not also employ anyone else in order to earn his livelihood.

5. Under the New Indian Census Economic Classification Scheme all employers and independent workers have been classified with reference to the Commodity produced or services performed by them individually. As regards employees, all persons engaged in Production, Commerce, or Transport (and not being domestic servants) have been classified with reference to their own activity and without reference to that of their employer. Domestic servants have been classified in one subdivision without reference to the nature of their work. All other employees (including all managerial and supervisory employees, clerical services, messengers, watchmen and unskilled labour of every description) have been classified with reference to the commodity produced or services rendered by their employers.

6. The Non-agricultural classes classified in Economic Table B-I, correspond to the divisions and subdivisions into which they are distributed in this table as follows :—

Livelihood class.	Division and subdivisions of the I.C.E.C. Scheme.
Class V—Production other than cultivation.	Division 0—Primary Industries not elsewhere specified.
	Division 1—Mining and quarrying.
	Division 2—Processing and Manufacture of Foodstuffs, Textiles, Leather and Products thereof.
	Division 3—Processing and Manufacture—Metals, Chemicals and Products thereof.
	Division 4—Processing and Manufacture—Not elsewhere specified.
Class VI—Commerce	Division 6—Commerce.
Class VII—Transport	Subdivisions 7·0 to 7·4 of Division 7—Transport, Storage and Communications.
Class VIII—Other services and miscellaneous sources.	Division 5—Construction and Utilities.
	Division 7—Transport, Storage and Communications with the exception of subdivisions 7·0 to 7·4.
	Division 8—Health, Education and Public Administration.
	Division 9—Services not elsewhere specified.

Class VIII also includes persons who derive their principal means of livelihood from miscellaneous sources (otherwise than through economic activity), e.g., income from investments, pensions and family remittances, proceeds of begging and other unproductive activities. These are not, however, included in this table as it is limited to Industries and Services. Hence there will be a difference to this extent between the total self-supporting persons of the Non-agricultural class in Economic Table B-I and the total of this table. The reconcilation will be effected by adding the figures given in the next paragraph.

SMALL-SCALE INDUSTRIES.

I—Distribution of Small-scale Industrial Establishments by Tracts.

This table gives for each Census tract, the number of small-scale industrial establishments under categories, non-textile and textile, with details for perennial and seasonal establishments.

2. The table covers only those establishments to which the Factories Act does not apply. It relates, therefore, to all associate activities, where articles are produced, repaired or otherwise treated for sale, use or for disposal. Small mines not covered by the Indian Mines Act have also been included. The table does not include plantation industries of any kind.

3. The areas covered by each Census tract in the district denoted by its number in column (1) have been given in the fly-leaf to Table B-I.

Tract No.	Total number of establishments.			Number of non-textile establishments.				Number of textile establishments.			
	Total.	Non-Textile.	Textile.	Perennial (9 months and over).	6 months and over but less than 9 months.	3 months and over but less than 6 months.	Less than 3 months.	Perennial (9 months and over).	6 months and over but less than 9 months.	3 months and over but less than 6 months.	Less than 3 months.

Section (ii)

Rural Statistics.

This is an abstract giving a complete list of villages and towns in each taluk in the district with sexwise distribution of population in each livelihood class in the villages alone. Among the other items of statistical information furnished, those relating to occupied houses, households, inmates of institutions and houseless persons and literates, were obtained from the National Register of Citizens prepared for each village from the information recorded in the enumeration slips. Village-wise statistics of textile and non-textile establishments collected in the course of the Census of Small-scale Industries and the number of leprosy cases and doubtful cases are also given in the abstract.

2. For detailed explanation of the livelihood classes I to VIII, see fly-leaf of general population Table A-V.

3. The areas included in each Census tract in the district have been furnished in the fly-leaf to Table B-I.

4. A list of villages with a population exceeding 5,000 but treated as rural is given as appendix :—

24. MALABAR DISTRICT.

C-IV—Age and Literacy.

This is yet another table prepared in respect of the ten per cent samples of the general population (vide fly-leaf to Table C-II).

2. Age-groups 0 and 1 to 4 given in Table C-II have been combined into one age-group, and the age-group 5 to 14 has been split into two sub-groups 5 to 9 and 10 to 14. Persons of age-group 0 to 4 are treated as illiterate.

3. The figures are given for each Census tract denoted by its number in cloumn (1). The areas as covered by each Census tract have been specified in the fly-leaf to table B-I.

4. 'Literates' are those who are able to read and write any simple letter in any language.

5. Persons who are partly literate, i.e., persons who are able to read only, have been included among the illiterates. Details for such persons are given below :—
