PREFACE

The Government used to compile and publish District Manuals for each district prior to 1905. The manuals became obsolete within a few years of their publication, containing as they did not only matter of a more or less permanent character such as physical characteristics, history, religion and ethnography, as also statistical matters which soon became out of date. The Government decided to replace the District Manuals by another publication known as the District Gazetteer, consisting of two volumes, A and B. The A volume contained descriptive matter and such general figures, as might be necessary to explain the text, and the B volume contained detailed statistics. They also decided that the B volume should be brought out periodically, especially after each decennial census. Between 1905 and 1927 A volumes for thirteen districts were published. In 1927 they were discontinued. B volumes for all the districts were published between 1906 and 1915. They were continued to be published even after the 1931 census. They were not published after the 1941 census.

Village Statistics, containing the results of the census for every village in the State, were first compiled and published in 1872, at the instance of Mr. C. E. Gover, who was then the Census Officer in Madras. His successor, in 1882, considered that this publication led to needless expenditure and trouble in printing the tables villagewar, but the Government decided that the Village Statistics should continue to be published. The practice of issuing Village Statistics at every census was followed subsequently. The Village Statistics merely showed the number of occupied houses and population of each village and town by religions.

The idea of preparing the present volume, viz., the District Census Handbook for each district was put forward by Sri R. A. Gopalaswami, I.C.S., Registrar-General, India, and ex-officio Census Commissioner of India, as part of a plan intended to secure an effective method of preserving the census records prepared for areas below the district level. He proposed that all the district census tables and census abstracts prepared during the process of sorting and compilation should be bound together in a single manuscript volume, called the District Census Handbook, and suggested to the State Governments that the handbook (with or without the addition of other useful information relating to the district) should be printed and published, at their own cost, in the same manner as the Village Statistics in the past. In accepting this suggestion, the Government of Madras decided to print and publish the more important portion of statistical data relating to the district and to preserve the rest of the records in a manuscript volume for any future use, to which they may be put.

2. The statistical data embodied in the District Census Handbook have to be understood from the background of the changes introduced in the 1951 census. The most important and fundamental change introduced in the 1951 census consists in the substitution of an economic classification of the people for the classification based on Religion and Communities

adopted in the past. The people were divided into two broad livelihood categories, the Agricultural and the Non-Agricultural. Four agricultural classes and four non-agricultural classes were prescribed as shown below :—

Agricultura Classes—

I. Cultivators of land, wholly or mainly owned, and their dependants.

II Cultivators of land, wholly or mainly unowned, and their dependants:

III. Cultivating labourers and their dependants,

IV. Non-cultivating owners of land, agricultural rent receivers and their dependants.

Non-Agricultural Classes—

Persons (including their dependants) who derive their principal means of livelihood from—

V. Production other than cultivation,

VI. Commerce,

VII. Transport, and

VIII. Other services and miscellaneous sources.

Each of the above eight livelihood classes were divided into three sub-classes with reference to their economic status as below :—

(i) Self-supporting persons,

(ii) Non-earning dependants, and

(iii) Earning dependants.

These livelihood sub-classes have been defined in detail in the fly-leaf notes attached to Economic Table B-I included in this Handbook.

All non-earning dependants are economically passive, all earning dependants are economically semi-active. All self-supporting persons are ordinarily economically active but the classes and groups specified below constitute an exception to this rule—

(1) Self-supporting persons of Agricultural Class IV,

(2) Self-supporting persons of Livelihood Class VIII, who derive their principal means of livelihood from any source other than through economic activity, viz.—

(*a*) Non-working owners of non-agricultural property ;

(*b*) Pensioners and remittance holders ;

(*c*) Persons living on charity and other persons with unproductive occupations ; and

(*d*) Inmates of penal institutions and asylums.

Economically active persons engaged in cultivation are either cultivators or cultivating labourers. Economic Table B-I gives particulars of the population classified according to the eight livelihood classes and the three sub-classes mentioned above.

Economically active persons engaged in industries and services have been classified with reference to the nature of the commodity produced or service performed. They are further divided into three sections, viz., Employers, Employees and Independent Workers.

Economic Table B-III gives particulars of the economically active persons classified under the divisions and subdivisions of industries and services of the Indian Census Economic Classification Scheme.

Table C-I, included in this Handbook covers the population of sample households and Tables C-II and C-IV cover a 10 per cent sample population. The method adopted for extracting these samples has been described in detail in the fly-leaf notes attached to the relevant tables.

3. *Scheme of the Census Handbook.*—The Handbook has been divided into two parts: Part I consists of three sections, namely, Section (i) containing the General Population Tables (A-series), the Economic Tables (B-series), Summary figures for Taluks (Table E), Tables I, II and III relating to Small-scale Industrial Establishments and Table L showing the Incidence of Leprosy, Section (ii) containing the Rural Statistics, and Section (iii) containing the Urban Statistics, and Part II containing the Household (size) Table C-I, and Tables showing Livelihood Classes and Literacy by Age-groups (C-II and C-IV), the Social and Cultural Tables (D-series) and an abstract of non-agricultural occupations in the district. Among the tables included in the Handbook, Table A-IV—Towns classified by population with variations since 1901, Economic Table B-II—Secondary means of Livelihood under each livelihood class and Table C-II—Livelihood classes by age-groups furnish information at the district level. The other population tables in the A-series, the summary figures for taluks (Table E) and the infirmity (Table L) showing the incidence of leprosy furnish information for each taluk in the district with a district total. The rural statistics in Part I—Section (ii) furnish basic information in respect of every village and town arranged according to census tracts. In addition to the total population of the villages, and its distribution among the eight livelihood classes, information regarding the number of literates, the cultivated area, the number of small-scale industrial establishments under categories, textile and non-textile and the number of leprosy cases and doubtful cases has been included.

The urban statistics in Part I—Section (iii) furnish similar information except that relating to cultivated area in respect of every unit classified as city or census town in the district with ward-wise data. All other tables included in the Handbook provide information for units called census tracts with totals for the district

4. *Census Tracts.*—A distinctive feature of the census statistics is its rural/urban break-up designed with a view to compare the conditions and characteristics of the rural and urban population. The rural areas of each district were therefore kept distinct from the urban areas. For facilitating tabulation these areas were divided into a number of rural and urban tracts. As far as possible, the rural area in each taluk was constituted into a single rural tract. In a few cases however where the taluks were small in size with reference to their population, the rural areas of more than one taluk were taken together as a single rural tract. The urban tracts have been formed out of areas declared as cities and census towns in each district. Every city was treated as a separate tract. Towns other than cities were grouped together to form non-city urban tracts. Wherever possible, the towns in each taluk were constituted into a single non-city urban tract. In cases where the towns in a taluk had a population of less than 50,000 the towns in more than one taluk were grouped

together to form a non-city urban tract. All the rural tracts in the State have been assigned numbers in one series, the non-city urban tracts in another series and the city tracts in a third series. In all the tables where the data have been furnished for tracts, the tracts have been denoted by numbers that have been assigned to them. A list of tracts into which the district has been divided and the areas comprised in each is furnished in the fly-leaf note to Economic Table B-I relating to the district.

The districts, taluks and villages mentioned in the Tables and Abstracts have been shown along with the census location code numbers assigned to them for purposes of census operations.

The numbers given to the Tables in this publication correspond to those given in the State Census Report.

Elaborate notes explaining the scheme of each Table have been introduced in the fly-leaf attached to each with a view to enable the reader to get a precise idea of the data furnished in the Table.

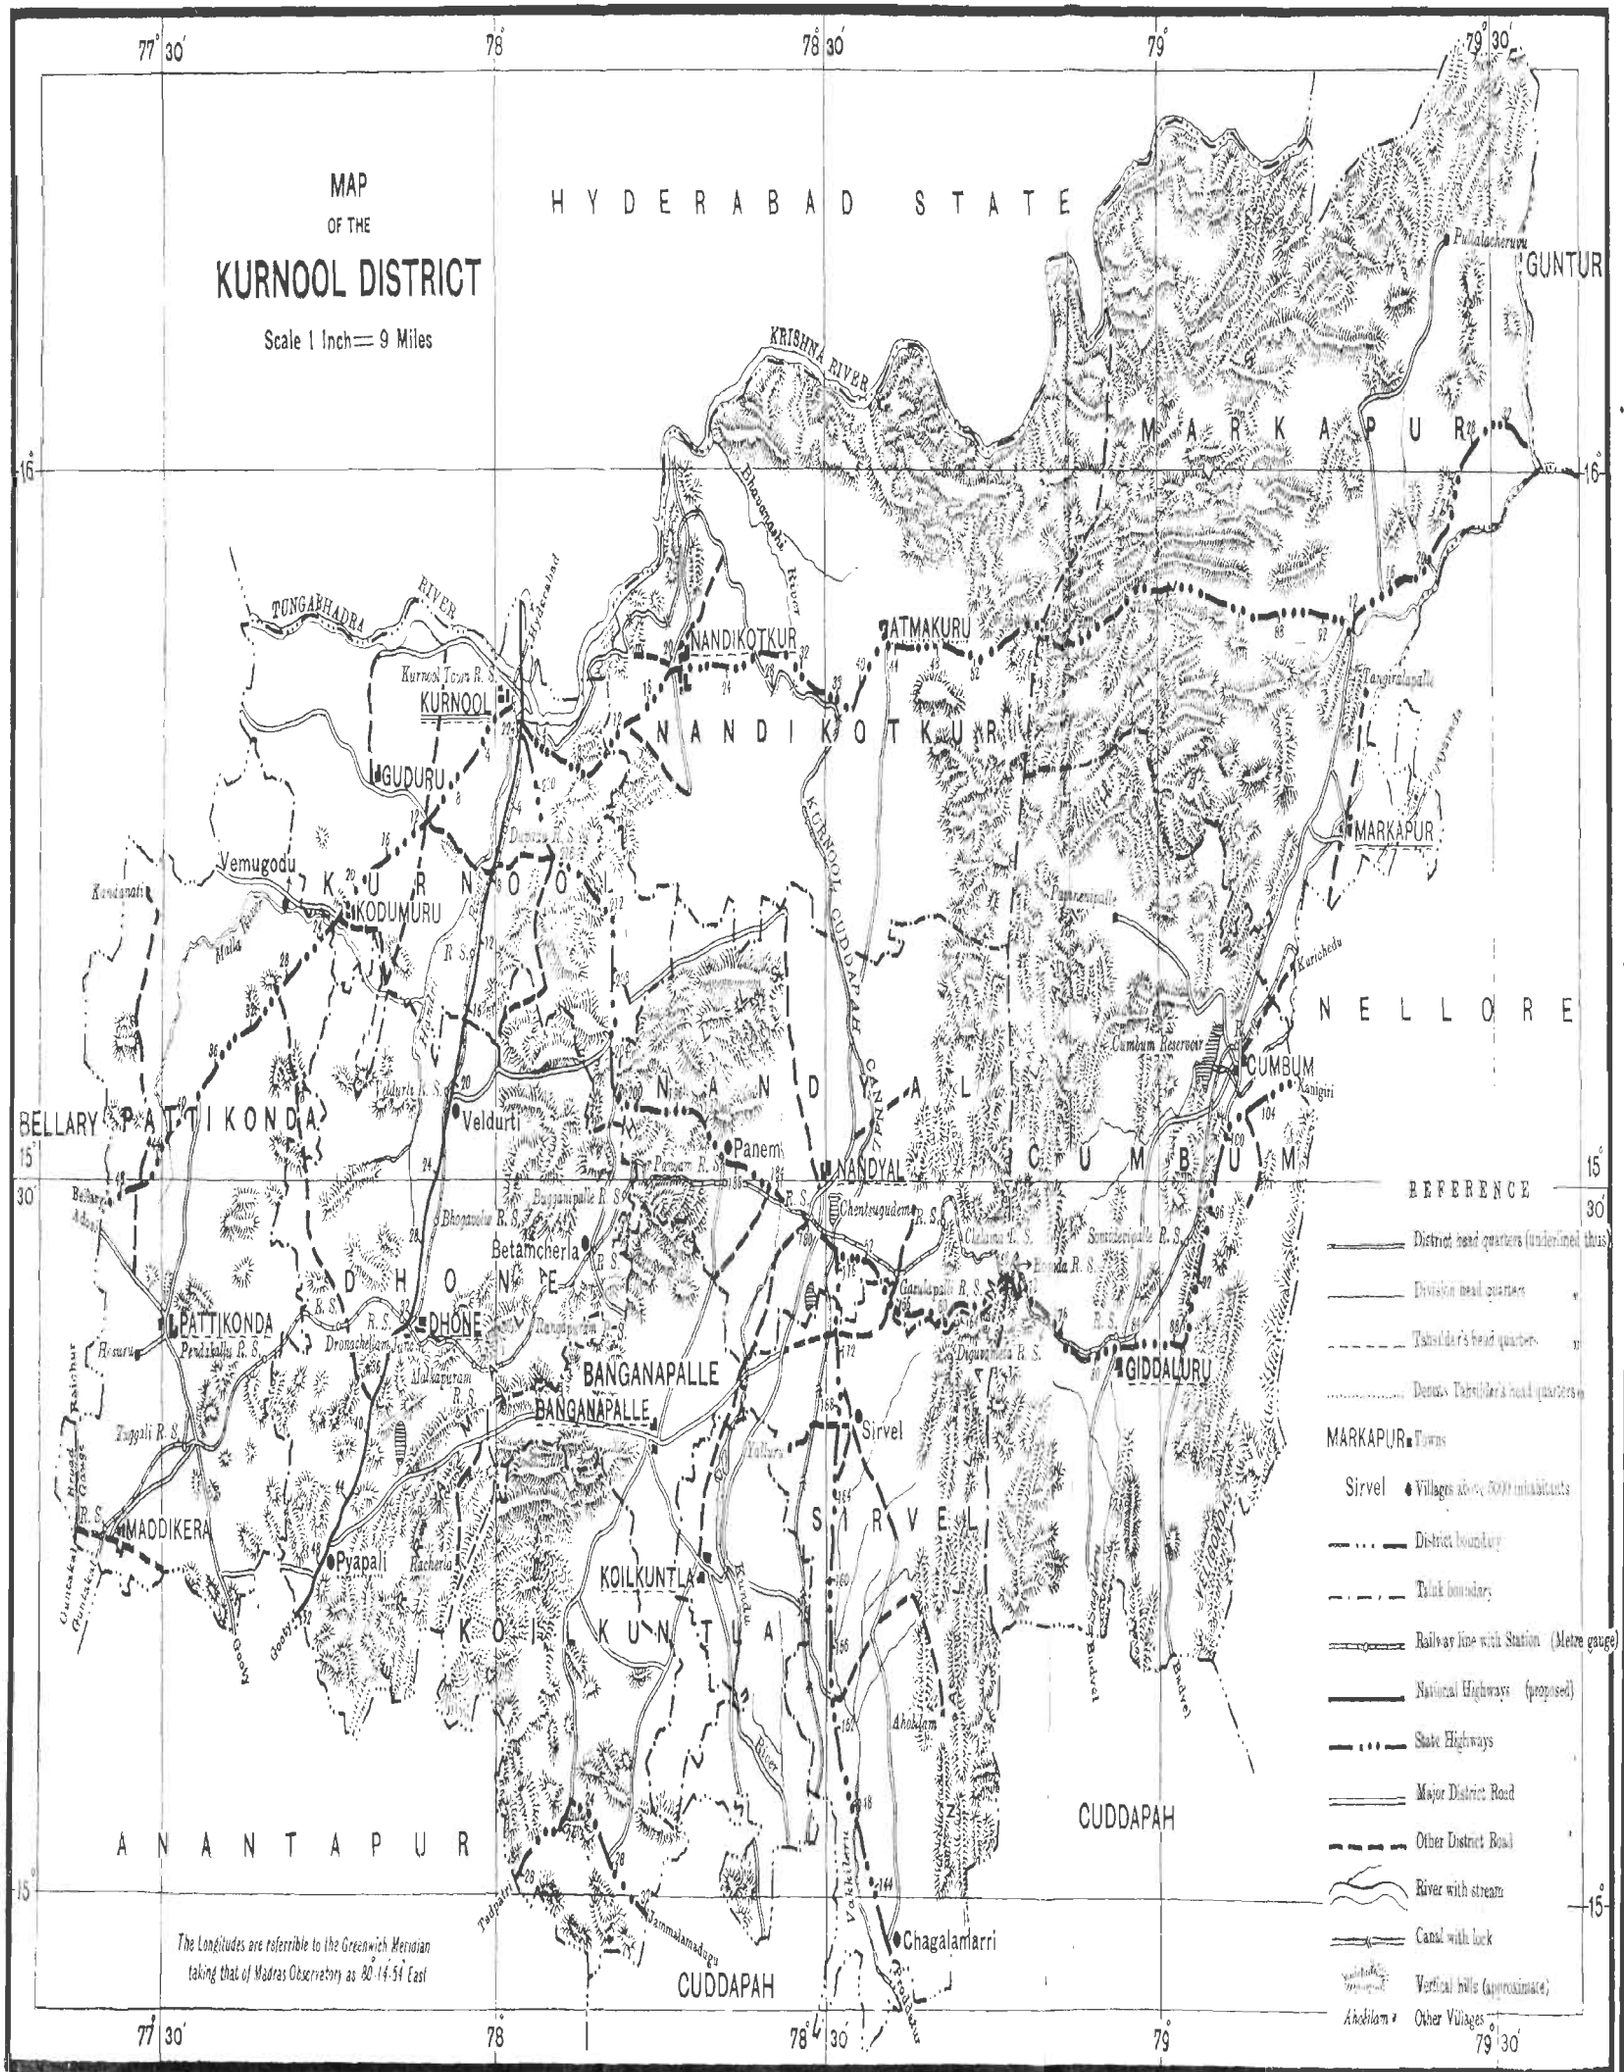

5. *Tables relating to Small-scale Industries.*—In the year 1950 a census of Small-scale Industries was instituted under the orders of the Government. The object was to get some idea about small industries such as cottage and home industries, small establishments, workshops, etc., where articles were produced, repaired or otherwise treated for sale, use or disposal and small mines. The enquiry was confined to establishments to which the Factories Act was not applicable. Individuals who worked on their own and did not employ other people were left out of account. From the data collected three Tables were prepared and they have been included in the Handbook. Information giving village-wise and ward-wise information for Small-scale Industries have been incorporated in the rural and urban statistics. The details collected and embodied in the Tables are not to be considered accurate or exhaustive, as the enumeration staff employed had not been trained for the purpose and some cases of under-enumeration were noticed. However, the figures given in the Tables may be sufficient to give an insight into the nature of the industries prevalent in the different parts of the district.

6. Opportunity has been taken to put in a short introductory note detailing the salient points connected with the district, such as the physical features, climate, rainfall, irrigation and drainage facilities, roads and other communications, crop statistics, education, industries and other matters of general interest. The information contained in the introductory note is based on the materials furnished by Collectors of districts and Departments of Government. The District Gazetteer was also freely referred to. The relevant paragraph of the 1951 Census Report discussing the growth of population in the district has also been incorporated in the proper place.

A district map showing taluk boundaries, physical features, important roads and places with a population exceeding 5,000 is also attached.

It is hoped that this Handbook will serve as a book of reference on matters relating to the district and that it will be found useful both by Departments of Government and the public.

INTRODUCTION TO KURNOOL DISTRICT

1. (*a*) (1) *Situation and physical characteristics.*— Kurnool district lies between 14° 55′ and 16° 20′ of the northern latitude and 77° 20′ and 79° 35′ of the eastern longitude. It is one of the four districts called the "Ceded Districts" It is bounded by the Hyderabad State and Guntur district on the north, Guntur and Nellore districts on the east, Anantapur and Cuddapah districts on the south and Bellary district on the west. It is irregular in shape and is elongated roughly from north-east to south-west. Its extreme length is 120 miles and it is 70 miles broad at the widest part. The district consists of the following ten taluks comprised in three Revenue Divisions as noted below :—

Name of Revenue Division.	Headquarters of Revenue Division.	Taluks comprised in the Revenue Division.	Area of taluk (sq. miles).	Headquarters of taluk.
Kurnool	Kurnool	Kurnool	641	Kurnool.
		Pattikonda	747	Pattikonda.
		Nandikotkur	1,092	Nandikotkur.
		Dhone	836	Dhone.
Nandyal	Nandyal	Nandyal	664	Nandyal.
		Koilkuntla	573	Koilkuntla.
		Banganapalle	256	Banganapalle.
		Sirvel	613	Allagadda.
Markapuram	Markapuram	Cumbum	1,048	Giddalore.
		Markapuram	1,366	Markapuram.
		Total	7,836	

The district may be divided into three natural divisions, the western, the central and the eastern. The western division comprises the taluks of Pattikonda, Kurnool and Dhone situated to the west of the Erramalai hills and dotted over with numerous bare rocky hills and occasional long ridges. It slopes down from south to north. The central division lies between the Erramalai hills and the Nallamalai hills and comprises the taluks of Nandikotkur, Nandyal, Banganapalle, Koilkuntla and Sirvel. It is 600′—800′ in elevation and is called the Kundu valley after the name of the river flowing in it. Except in the northern part of Nandikotkur taluk which slopes down from south to north, the country slopes down southwards to the Kundu river and the Pennar. This division about 25 miles broad is an extensive flat open country with a few solitary hills here and there. The third and the eastern division lies between the Nallamalais and the Veligonda hills and is roughly called the Cumbum valley. It comprises the taluks of Cumbum and Markapuram and is about 25 miles broad and 85 miles long. South of Cumbum, the ground slopes southwards towards the Sagileru and Pennar rivers. North of Cumbum it slopes down to the east.

The principal mountains of the district are the Nallamalais, the Yerramalais and the Veligondas. The Nallamalais run from south to north for about 70 miles across the district on the eastern parts of Sirvel, Nandyal and Nandikotkur taluks and the western parts of Cumbum and Markapuram taluks. The average height of the hills is 2,000 feet with several peaks above 3,000 feet. There are several passes in the hills the chief of which are the Nandikanama pass in the south, on the northern boundary of Sirvel taluk and the Mantrala Kanam pass in the north in Nandikotkur taluk. The Nallamalais extend southward into the Cuddapah district as far as the Pennar and northward into the Hyderabad State.

The Erramalai range begins in Jammalamadugu taluk of Cuddapah district and runs northwards up to a spot 8 miles from Kurnool. It is situated in the eastern parts of Dhone and Kurnool taluks and the western parts of Koilkuntla, Banganapalle and Nandyal taluks. The range is crossed by two passes, the Tammarazupalli ghat in the north and the Rampur ghat in the south.

The Veligonda range is a continuation of the range of the same name running on the borders of the Cuddapah and Nellore districts and runs on the eastern edge of Cumbum taluk and ends 10 miles to the east of Markapuram. It however proceeds northwards again in the form of a low lying range under the name of Yerrakonda on the eastern part of Markapuram taluk.

8. KURNOOL DISTRICT.

There are several other hills which are outliers of these hills, though the scattered hills in Pattikonda taluk cannot be said to be the outliers of any of these hills.

(*b*) *Rivers.*—The chief rivers in the district are the Tungabhadra, the Krishna, the Hundri, the Kundu, the Gundlakamma and the Sagileru.

The Tungabhadra river rises in the Western ghats and enters the district at the northwestern corner of Kurnool taluk and flows on the northern boundary of that taluk. Seventeen miles above Kurnool the river has been dammed for drawing supply into the Kurnool-Cuddapah Canal. East of Kurnool taluk the Tungabhadra joins the Krishna on the northern border of Nandikotkur taluk.

The Krishna river rises in the Mahabaleswaram hills and flowing through Hyderabad State and flows along the northern boundary of Nandikotkur and Markapuram taluks before entering the Guntur district.

The Bhavanasi is a tributary of the Krishna flowing in Nandikotkur taluk.

The Hundri river rises in Pattikonda taluk and flows across Pattikonda and Kurnool taluks. It receives a considerable tributary from the Erramalais flowing north across Dhone taluk and finally joins the Tungabhadra below Kurnool Town.

The Kundu river rises on the western side of the Erramalais and flowing north-east across Nandyal taluk, turns south and flows across Nandyal and Koilkuntla taluks and the northwestern corner of Sirvel taluk entering Cuddapah district eventually to join the Pennar.

The Galeru river flowing south from Nandikotkur taluk joins the Kundu in Nandyal taluk.

The Vakkileru river flowing south in Sirvel taluk also flows into Cuddapah district.

The Gundlakamma river rises in the Nallamalais and flows east across Cumbum taluk and thence north-east on the eastern part of Markapuram taluk and enters the Guntur district near Mummidivaram in Markapuram taluk. The Kandleru and the Duvvaleru are the tributaries of the Gundlakamma river in Markapuram taluk.

There are several thermal springs in the Nallamalais and Erramalais and in the other parts of the district some of which are warm and contain chemical properties.

(*c*) *Forests.*—The forests cover nearly a third of the area of the district. Their talukwise particulars are furnished below:—

Name of taluk.	Reserved forests. SQUARE MILES.	Estate forests taken over. SQUARE MILES.	Total. SQUARE MILES.
Kurnool	18·59	..	18·59
Nandikotkur	473·81	..	473·81

Sirvel	210·58	..	210·58
Total ..	2,565·62	37·26	2,602·88

The reserved forests at the foot of the hills consist of thorny scrub. The forests on the outer slopes contain deciduous and soft wood species. The plateau forests contain superior deciduous type. The higher forests contain good timber, fuel and bamboos. Sandal occurs in Markapuram forests. Grass grows in the higher regions. The estate forests taken over are of the thorny scrub type.

(*d*) *Climate and rainfall.*—April and May are the hottest months. The district is subject to the influence of both the monsoons. The area west of the Nallamalais gets more rain in the south-west monsoon and the area east of the Nallamalais gets more rain during the north-east monsoon. The south-west monsoon breaks out in June and lasts till September. It is thereafter followed by the north-east monsoon. In general, more rain is had in the south-west monsoon than in the north-east monsoon. The climate is cooler in the higher elevations in the southern part of Dhone taluk and near Srisailam in the north-eastern corner of Nandikotkur taluk.

It is also cooler in the higher regions of the Nallamalais.

The particulars of the average annual rainfall and the average number of rainy days in a year in the taluks are given below:—

Name of taluk.	Average annual rainfall (in inches).	Average number of rainy days in a year.
Kurnool	22·83	40·1

(*e*) *Soils.*—The varieties of soils met with in the district are clayey, loamy, and sandy under regar and red types. The distribution of soils in the taluks of the district in thousands of acres is as follows :—

	Area in thousands of acres.					
	Regar.			Red.		
	Clayey.	Loamy.	Sandy.	Clayey.	Loamy.	Sandy.

Total ..	946·9	474·4	137·4	29·4	489·2	529·9

In the eastern section the poor red soil predominates. The Central Section is rich in regar and in Pattikonda and Dhone taluks of the western section the poor soil is again found in excess, while Kurnool taluk of the western section and portions of Pattikonda taluk are rich in regar soils. The extent of alluvial soil is very small and is confined to a few villages near the confluence of the Bhavanasi and the Krishna. The alluvial area is generally used for the cultivation of mustard, wheat and blackgram and is valuable. The pure regar soil is very fertile and is highly retentive of moisture. The mosah (mixed regar) requires manuring and when irrigated gives a better outturn than regar. The crops grown on regar soil are cholam, cotton, indigo, korra and Bengalgram.

8. KURNOOL DISTRICT.

(*f*) *Irrigation and drainage facilities and liability to famine.*—The Kurnool-Cuddapah Canal is the largest irrigation work in this district. It takes off from the Tungabhadra river at Sunkesula 17 miles west of Kurnool and passes through the taluks of Kurnool, Nandikotkur, Nandyal, Sirvel and Koilkuntla irrigating large extents in the Nandikotkur, Nandyal and Sirvel taluks. The ryots have not taken full advantage of this work. The canal was designed to irrigate a lakh and a half acres. But the water is used for only about 30,000 acres in normal years and about 70,000 acres in years of scanty rainfall.

Kurnool taluk.—The Kurnool-Cuddapah Canal irrigates portions of this taluk. There are many wells and spring channels in the taluk. If the rains fail, the area outside the Kurnool-Cuddapah canal will be subject to famine.

Nandikotkur taluk.—A large part of the taluk is irrigated by the Kurnool-Cuddapah Canal. There is much irrigation under spring channels, minor irrigation tanks and wells. The taluk is not subject to famine.

Markapuram taluk.—There are a few major irrigation sources in the taluk. There is also irrigation under spring channels, wells and minor irrigation tanks. An irrigation project called 'Tigaleru Project' is under construction in the taluk.

Pattikonda and Dhone taluks.—These taluks consist mostly of dry areas with very little irrigation from tanks, channels or wells, and are subject to famine in the event of failure of the monsoon.

Nandyal taluk.—A large extent is irrigated by the Kurnool-Cuddapah Canal. There are also spring channels, wells and minor irrigation tanks. The taluk is self sufficient in food grains and is not usually subject to famine.

Cumbum taluk.—The Cumbum tank is the only major irrigation source. There are also spring channels, wells, and minor irrigation tanks. The taluk is not liable to famine unless there is failure of the monsoon in successive years.

Banganapalle taluk.—Irrigation is had from springs, wells and tanks. The taluk is subject to famine.

Koilkuntla taluk.—Only 11 villages of the taluk are fed by the Kurnool-Cuddapah canal. The other irrigation sources consisting of spring channels, tanks and wells depend on the monsoon.

Sirvel taluk.—The Kurnool-Cuddapah Canal irrigates a fairly large area in this taluk. A considerable area is also irrigated by spring channels, wells and tanks. The taluk is not ordinarily liable to famine.

A statement showing the number of minor irrigation sources, the ayacut under them and the ayacut of major irrigation sources in the various taluks of the district is given below :—

(*g*) *Area cultivated with food and commercial crops.*—The chief food crops are cholam and korra, varagu, cumbu and paddy are also raised on an appreciable scale and ragi and samai on a limited scale. Bengalgram and horsegram are also cultivated on a fairly large scale. The chief commercial crops are chillies, groundnut and cotton.

A statement showing the particulars of the area cultivated with food crops, pulses and commercial crops in the taluks in 1945–46 which is the most recent normal year for the district is furnished in *Annexure I.*

(*h*) *Communications*—(*i*) *Roads.*—Roads from the district lead to Bellary, Gooty, Tadpatri, Proddatur and Badvel in the adjoining districts. The district has 1,312 miles of roads consisting of 54 miles of National Highways, 327 miles of Provincial Highways, 537 miles of Major district roads, 306 miles of Other district roads, 33 miles of Village roads and 55 miles of Municipal roads. Their talukwise distribution except in the case of municipal roads is given below :—

8. KURNOOL DISTRICT.

The roads in the district often fall into disrepair on account of the poor quality of metal and gravel. Maintenance is rendered difficult on account of non-availability of water in the vicinity. The road communications are not adequate in the taluks of Nandikotkur, Koilkuntla and Sirvel and the sub-taluk of Banganapalle. The Government have approved of a five-year programme for laying out new roads and for improving the existing ones. When the programme is completed the district will have adequate road communications.

(*ii*) *Railways.*—The district has 5½ miles of broad gauge and 160 miles of metre gauge railway. The broad gauge line is the one from Madras to Bombay which passes over the south-western corner of Pattikonda taluk in the district for a distance of 5½ miles. The main metre gauge line is the one running from Bandar (Masulipatnam) to Hubli and traverses the taluks of Markapuram, Cumbum, Nandyal, Dhone and Pattikonda. A branch metre gauge line connects Dhone with Secunderabad via Kurnool. There are no railways in the taluks of Nandikotkur Koilkuntla and Sirvel and the sub-taluk of Banganapalle.

(*iii*) *Posts and Telegraphs.*—There are 17 sub-post and telegraph offices, five non-combined sub-post offices and 203 branch post offices in the district. Their talukwise distribution is given below :—

Name of taluk.	Branch Post Office.	Non-combined Sub-Post Office.	Sub-Post and Telegraph Office.

Sirvel	96,791	104,724	8·2

"The variations in the taluk populations range from — 2·6 in Banganapalle to and 12·0 in Nandyal. There was actual decrease or only a slight increase of population in the following taluks as shown below and this accounts for the small increase of population in this district.

Name of taluk.	*Percentage decrease/ increase.*
Pattikonda	+ 0·03
Dhone	+ 3·6
Banganapalle	— 2·6
Koilkuntla	— 0·4

The district is malarial and is in the famine zone and the figures for these taluks reflect the cumulative effect of malaria and adverse seasonal conditions."

(Extracted from the Census Report—Part I.)

(ii) *Vital Statistics.*—The particulars of the births and deaths and deaths due to various causes for the decennium 1941–50 are given in ***Annexure II.***

The average recorded birth-rate during the decade was 32·7 per mille, a little over the average of 31·7 for the State. The average death rate of 25·6 per mille was very high when compared to that of 21·2 for the State. The recorded death-rates however show a downward trend during the decade, the rate decreasing from 28·6 in 1941 to 21·3 in 1950. The average mortality rate from fevers (11·9) was very high and represented on the average 45 per cent of total deaths, the district being malarious. In 1952, 1953 and 1945 the district experienced severe epidemics of cholera. The incidence of small-pox was high in 1944, 1949 and 1950. The district has been practically free from plague since 1943. During the latter half of the decade the infant mortality rate has decreased as compared with the first half, the average rates being 153·29 and 179·0 per thousand births respectively.

VI. Items of general interest.—Kurnool and Nandyal are the municipalties in the district.

The district is profuse in ores containing minerals like gold, copper, iron, manganese, varytes, red oxide of iron, steatite, yellow ochre, white shale and lead. There are possibilities of improving the economic condition of the district if the minerals are properly exploited.

The Sri Sailam Temple in Nandikotkur taluk, on the banks of the Krishna river situated in the midst of hills and jungles is one of the most ancient in South India sacred to the Hindus. It attracts numerous pilgrims from all over India, especially for the Sivaratri Festival in February, March.

The Ahobilam Temple near Rudravaram in Sirvel Taluk is sacred to the Vadagalai sect of Vaishnava Hindus. It consists of (1) a shrine at the foot of the hills, (2) another four miles higher up on the hills, (3) a small pagoda on the top of the hills and (4) six other pagodas situated about the hill forming a group known as Narasimha. They represent the nine different forms in which Lord Vishnu exhibited himself. Adi Satagopa Jiyyangar was the first priest.

There is a mutt at Ahobilam under the control of the Jeer of the Vadagalai Sect of the Vishnavites.

The tomb of Abdul Wahab, the first Bijapur Governor on the banks of the Handri consisting of two domes built in 1618 and the remains of the Palace of Gopalaraja, the last Hindu ruler of Kurnool from whom Abdul Wahab took the town, are the relics of antiquity in Kurnool town.

A. GENERAL POPULATION TABLES.

A-I—Area, Houses and Population.

This table shows for the rural and urban areas of each taluk and for the district, the area, the number of inhabited villages and towns, occupied houses and the total population with distribution by sex.

2. The district area shown in column (2) of this table is that supplied by the Surveyor-General of India. Area figures furnished by the Central Survey Office, Madras, have been adopted for the taluks. The total area of the taluks as furnished by the Central Survey Office, Madras, shown within brackets in column (2), differs from the area of the district furnished by the Surveyor-General.

3. "Village" is the revenue administrative unit within defined boundaries. This table gives particulars in respect of all villages containing one or more groups of habitations. Villages with no habitations are not included in this table.

4. "Town" is a place of usually not less than 5,000 inhabitants, possessing distinct urban characteristics. Cantonments have been treated as forming part of the towns in which they are situated.

5. "House".—Every dwelling with a separate main entrance has been treated as a house for census purposes.

8. KURNOOL DISTRICT.

A-II—Variation in Population during fifty years.

This table compares the population of the district and of each taluk in the district as ascertained at the Census of 1951 with the corresponding figures of the five previous Censuses. The figures recorded at the previous Censuses have been adjusted for subsequent territorial changes, if any, in order to afford a correct basis for comparison. The adjusted figures show the population of taluks and the district as constituted at present.

2. The main territorial change that occurred during the decade is the merger of the State of Banganapalle with the district of Kurnool.

8. KURNOOL DISTRICT.

A-IV—Cities and Towns classified by Population with variations since 1901.

This table shows the population and distribution of sex of cities and towns of the district at each of the last six enumerations.

2. Kurnool is the only town which has been treated as City for the 1951 Census.

3. The cities and towns have been arranged in this table according to their population in 1951 under the following six classes :—

Class.	*Limits of population.*
I	100,000 and over.
II	50,000 to 100,000.
III	20,000 to 50,000.
IV	10,000 to 20,000.
V	5,000 to 10,000.
VI	Under 5,000.

4. Where possible, the former population of places treated for the first time as town in 1941 and at this Census, has been extracted from Village Statistics. Where this could not be done, the columns have been left blank.

5. The population of towns for previous Censuses are those then recorded. No adjustments have been made for intervening changes in area.

6. Municipality, Panchayat and Cantonment are indicated by the use of the letters M.P.C., respectively within brackets.

7. Kondapet which was treated as a separate town at the previous Census has been included in the Banganapalle Panchayat.

8. KURNOOL DISTRICT.

A-V—Towns arranged talukwise with Population by Livelihood Classes.

This table shows the analysis of the Urban population in towns by livelihood classes instead of by communities as in the previous Censuses.

2. Under the Indian Census Economic Classification Scheme, the people have been divided into two broad livelihood categories, viz., the agricultural classes and the non-agricultural classes. There are four agricultural classes and four non-agricultural classes as shown below :—

(i) *Agricultural Classes.*

I. Cultivators of land wholly or mainly owned and their dependants.

II. Cultivators of land wholly or mainly unowned and their dependants.

III. Cultivating labourers and their dependants.

IV. Non-cultivating owners of land, agricultural rent-receivers and their dependants.

(ii) *Non-agricultural Classes.*

Persons (including dependants) who derive their principal means of livelihood from—

V. Production (other than cultivation).

VI. Commerce.

VII. Transport.

VIII. Other services and miscellaneous sources.

3. In this table the figures for the agricultural livelihood classes I to III are not given but have been clubbed together.

4. The towns in each taluk of the district are arranged in the order of their population as in Table A-IV.

5. Municipality, Panchayat and Cantonment are indicated by the use of the letters M.P.C., respectively within brackets.

6. For the definition of a "Town" see fly-leaf to Table A-I.

7. For towns which were treated as towns at the previous Censuses but have been removed at this Census, please see fly-leaf to Table A-IV.

E.—Summary figures by Taluks.

The data contained in this table have been given for each taluk in the district.

2. The areas shown in column (2) of the table for the district and the taluk "total" are the latest figures furnished by the Central Survey Office, Madras. The areas given for "urban" are those furnished by the District Officers. The areas for "rural" have been obtained by deducting the figures for "urban" from those for district and taluk "total".

3. The district area furnished by the Surveyor-General, India, which has been shown in Table A-I could not be adopted in this table as talukwise figures have not been furnished by him. The district areas given by the Surveyor-General differ in varying degrees from those furnished by the Central Survey Office, Madras.

4. Previous Census figures of population have been adjusted with reference to the merger of States, transfer of enclaves and inter-district transfers, if any. The rural and urban population figures have been taken as they were at the 1941 and 1931 Censuses and as they are at the present Census, regardless of the changes of rural areas into urban areas and *vice versa* from Census to Census, for the purpose of calculating percentage variation between 1931 and 1941 and between 1941 and 1951. For calculating density for "rural" and "urban" for 1941, the areas of the towns newly formed at the present Census rounded to the nearest square mile have been deducted from the areas given for urban in column (2) for 1951 and added to the areas given for "rural" in the districts and taluks where new towns have been recognized.

5. In respect of Sirvel taluk which has no urban areas, the figures represent the total alone.

B.—ECONOMIC TABLES.

B-I.—Livelihood Classes and Sub-classes.

This table shows by rural/urban break-up for each Census tract in the district the distribution of population, sex-wise, among the eight livelihood classes and the three sub-classes, viz., self-supporting persons, non-earning dependants and earning dependants under each livelihood class into which the economic characteristics of the people have been classified under the I.C.E.C. Scheme—vide fly-leaf to Table A-V.

2. The areas comprising each of the Census tracts into which this district has been delimited for the purposes of Census tabulation are given below :—

City Tract s.

No. 11	Kurnool City in Kurnool taluk.

3. The livelihood classification is based on the principal means of livelihood of the self-supporting persons, the principal means of livelihood for earning and non-earning dependants being the same as that of the self-supporting persons on whom they are dependent.

4. "The principal means of livelihood" is the means of livelihood which provides the largest or the major part of the income in the case of self-supporting persons who have more than one means of livelihood. In the case of other self-supporting persons, it is the only means of livelihood.

5. A person has been regarded as "Self-supporting" if the income secured by the person is sufficient at least for his (or her) own maintenance at the level of living and adopted by him (or her) at the time of the Census. The income secured may be in cash or kind. Anyone who is not a "Self-supporting" person in this sense has been regarded as a dependant. An 'earning' dependant is a person who secures an income which is not sufficient to support him (or her). A person who does not secure any income either in cash or kind, is a 'non-earning dependant'.

6. The non-earning dependants include persons performing house work or other domestic or personal services for other members of the same family household, but do not include "unpaid family workers" or persons who take part along with the members of the family household in carrying on cultivation or a home industry as a family enterprise. These latter persons have been classed as either self-supporting or earning dependants according to the share of income attributable to them.

7. The self-supporting persons shown in Livelihood Class VIII include also persons who derive their income otherwise than through productive activity, i.e., persons coming under the following groups, details for which are given in the fly-leaf to Economic Table B-III :—

(1) Persons living principally on income from non-agricultural property ;

(2) persons living principally on pensions, remittances, scholarships and funds ;

(3) inmates of jails, asylums, alms houses and recipients of doles ;

(4) beggars and Vagrants ; and

(5) all other persons living principally on income derived from non-productive activity.

8. KURNOOL DISTRICT.

B-II—Secondary means of Livelihood.

This table gives for the district the number of persons in each of the eight livelihood classes mentioned in Economic Table B-I. who possess a secondary means of livelihood; and cross classifies them (according to the nature of such means of livelihood) under the same eight livelihood classes.

2. The secondary means of livelihood shown for self-supporting persons is the means of livelihood next in importance to their principal means of livelihood. In respect of earning dependants, it is the means of livelihood which provides the earning, or the largest part of their income if they have more than one source of income.

3. Non-earning dependants and self-supporting persons who have no secondary means of livelihood are excluded from this table.

B-III—Employers, Employees and Independent Workers in Industries and Services by Divisions and Subdivisions.

This table gives figures for each Census tract in the district. The areas comprised in each Census tract have been specified in the fly-leaf to Table B-I. In this table the self-supporting persons in the four Non-agricultural classes given in Economic table B-I are distributed in the various divisions and subdivisions of Industries and Services under the Indian Census Economic Classification Scheme, according to their secondary Economic Status, namely, Employer, Employee, and Independent worker.

2. (An) Employer (is) a person who employs other persons in order to carry on the business from which he secures his livelihood and pays them a salary or wage in cash or kind.

3. (An) employee (is) a person who ordinarily works for some other person for a salary or a wage, whether in cash or in kind in order to earn his livelihood.

4. (An) Independent worker (is) a person who works on his own without being employed by anyone for a salary or wage and who does not also employ anyone else in order to earn his livelihood.

5. Under the New Indian Census Economic Classification Scheme all Employers and Independent workers have been classified with reference to the commodity produced or services performed by them individually. As regards Employees, all persons engaged in Production, Commerce or Transport (and not being Domestic servants) have been classified with reference to their own activity and without reference to that of their employer. Domestic servants have been classified in one subdivision without reference to the nature of their work. All other Employees (including all managerial and supervisory employees, clerical services, messengers, watchmen and unskilled labour of every description) have been classified with reference to the commodity produced or services rendered by their Employers.

6. The Non-agricultural classes classified in Economic Table B-I correspond to the divisions and subdivisions into which they are distributed in this table as follows :—

Livelihood classes.	*Division and Subdivisions of the I.C.E.C.Scheme.*
Class V—Production, other than cultivation.	Division 0—Primary Industries not elsewhere specified. Division 1.—Mining and Quarrying. Division 2.—Processing and Manufacture of Foodstuffs, Textiles, Leather and products thereof. Division 3.—Processing and Manufacture—Metals, Chemicals and Products thereof. Division 4.—Processing and Manufacture—Not elsewhere specified.
Class VI—Commerce	Division 6.—Commerce.
Class VII—Transport	Subdivisions 7·0 to 7·4 of Division 7.—Transport, Storage and Communications.
Class VIII—Other Services and Miscellaneous sources.	Division 5.—Construction and Utilities. Division 7—Transport, Storage and Communications with the exception of subdivision 7·0 to 7·4. Division 8.—Health, Education and Public Administration. Division 9.—Services not elsewhere specified.

Class VIII also includes persons who derive their principal means of livelihood from miscellaneous sources (otherwise than through economic activity), e.g., income from investments, pensions and family remittances, proceeds of begging and other unproductive activities. These are not, however, included in this table as it is limited to economically active persons engaged in Industries and Services. Hence there will be a difference to this extent between the total self supporting persons of the Non-Agricultural class in Economic Table B-I and the total of this table. The reconciliation will be effected by adding the figures given in the next paragraph.

7. Details of persons who derive their principal means of livelihood otherwise than through productive activity and who are included under livelihood Class VIII mentioned in the Fly-leaf to Economic Table B-I are given below :—

SMALL-SCALE INDUSTRIES.

I—Distribution of Small-scale Industries by Tracts.

This table gives for each Census tract, the number of small-scale industrial establishments under categories, non-textile and textile, with details for perennial and seasonal establishments.

2. The table covers only those establishments, to which the Factories Act does not apply. It relates, therefore, to all associate activities, where articles are produced, repaired or otherwise treated for sale, use or for disposal. Small mines not covered by the Indian Mines Act have also been included. The table does not include plantation industries of any kind.

3. The areas covered by each Census tract in the district denoted by its number in column (1) have been given in the fly-leaf to Table B-I.

Tract No.	Total number of establishments.			Total number of non-textile establishments.				Total number of textile establishments.			
	Total.	Non-Textile.	Textile.	Perennial (nine months and over.)	Six months and over but less than nine months.	Three months and over but less than six months.	Less than three months. SMALL SCALE INDUSTRIES.

II—Employment in Textile Establishments.

This table gives for each Census tract the number of persons employed in the textile establishments shown in Table I. The occupations have been grouped with reference to the scheme of grouping adopted in the Indian Census Economic Classification Scheme.

2. 'Boys' and 'Girls' referred to in the table, refer to persons below 15 years of age.

3. The areas covered by each Census tract in the district have been given in the fly-leaf to Table B-I.

NOTE.—The symbols 'W.T.' and 'P.T.' adopted in this table stand for 'Whole Time' and 'Part Time.'

PART II

C—HOUSEHOLD AND AGE (SAMPLE) TABLES

C-I—Household (size).

This table has been prepared in respect of a population covering the members of sample households selected from the entries in the National Register of Citizens on the basis of one household for every one thousand households. The sample households selected include roughly every tenth household in every hundredth house-numbering block in the Rural areas and every fiftieth household in every twentieth house-numbering block or locality in Urban areas.

2. The Agricultural and the Non-Agricultural classes refer to the four agricultural and the four non-agricultural classes given in Table A-V. The Backward Classes include the Scheduled Castes, the Scheduled Tribes and other classes not treated as non-backward by the State Government for the purpose of 1951 Census. Anglo-Indians are included among the non-backward classes.

3. Columns (2) to (5) of the table relate to all the households and household population in the entire tract while columns (6) to (17) relate to the sample households selected.

4. The figures have been given for each Census Tract denoted by its number in column (1). The areas covered by each Census tract have been given in the fly-leaf to Table B-I.

C-II—Livelihood Classes

This table shows the livelihood distribution by age-groups for rural, urban and district totals in respect of a sample population based on a ten per cent sample taken out when the enumeration slips were initially sorted. The ten per cent sample was taken out as follows :—

Each enumeration pad which consisted generally of 100 enumeration slips was broken and the slips relating to displaced persons which had been noticed during the process of the preliminary scrutiny were removed from the pack of slips for peing dealt with separately. The pack was then "cut" as in a card-game. The lower portion was blaced above the upper portion and the slips were dealt into two pigeon-holes one marked "G" and the other marked "S" as follows :—

Age-group.	Sample population.			Livelihood — Agricultural classes. I. Cultivators of land wholly or mainly owned and their dependants.		II. Cultivators of land wholly or mainly unowned and their dependants.		III. Cultivating labourers and their dependants.

by age-Groups.

The first five slips were placed in the pigeon-hole "G," then one slip was placed in the pigeon-hole "S." Thereafter for every nine slips placed in the pigeon-hole "G," one slip was placed in the pigeon-hole "S" until the total number of slips left was less than 9 and these residuary slips were all put into hole "G." All the slips contained in the pigeon-hole marked "S" were taken out, counted and marked as 'Sample' slips.

No smoothing formula has been adopted in preparing the table as in previous Censuses and the figures have been tabulated as actually returned in suitable age-groups.

The figures under age '0' represent infants below one year.

C-IV—Age and Literacy.

This is yet another table prepared in respect of the ten per cent samples of the general population (Vide fly-leaf to Table C-II).

2. Age-groups 0 and 1 to 4 given in Table C-II have been combined into one age-group, and the age-group 5 to 14 has been split into two sub-groups 5 to 9 and 10 to 14. Persons of age-group 0 to 4 are treated as illiterate.

3. The figures are given for each Census tract (Rural and Urban) denoted by its number in column (1) in the district. The areas covered by each Census tract have been specified in the fly-leaf to Table B-I.

4. 'Literates' are those who are able to read and write any simple letter in any language.

5. Persons who are partly literate, i.e., persons who are able to read only, have been included among the illiterates. Details for such persons are given below:—
