DISTRICT CENSUS HANDBOOK
1951

KANPUR DISTRICT

FOREWORD

Several States, including Uttar Pradesh, have been publishing village statistics by districts at each census. In 1941 they were published in U. P. under the title "District Census Statistics" with a separate volume for each district. In the 1951 census, when the tabulation has been more elaborate than ever in view of the requirements of the country, the district-wise volume has been expanded into a "District Census Handbook", which now contains the District Census Tables (furnishing data with break-up for census tracts within the district), the District Index of Non-agricultural Occupations, agricultural statistics from 1901-02 to 1950-51 and other miscellaneous statistics in addition to the usual village population statistics. The village population statistics also are given in an elaborate form giving the division of the population among eight livelihood classes and other details.

2. It may be added here that a separate set of district-wise volumes giving only population figures of rural areas by villages and of urban areas by wards and mohallas and entitled "District Population Statistics" has already been published. This separate series was necessitated by the urgent requirements of the U. P. Government for elections to local bodies.

3. The number of District Census Handbooks printed so far is fourteen. Special arrangements for speeding up the printing have now been made and it is hoped that the remaining Handbooks will be printed before the end of 1955.

RAJESHWARI PRASAD, I.A.S.,
Superintendent, Census Operations,
Uttar Pradesh.

RAMPUR:
March 31, 1955.

INTRODUCTION

A—The District

1. The district of Kanpur is situated in the lower section of the Ganga and Yamuna *doab*. On its south-east is the district of Fatehpur. To the north-east beyond the Ganga, of which the deep stream forms the boundary, lie the districts of Hardoi and Unnao, while to the south across the Yamuna are Hamirpur and Jalaun. On the west and north-west the boundary marches with Etawah and Farrukhabad. The total area of the district is 2,372 square miles and its population in 1951 was 19·4 lakhs. It has 6 tehsils, 6 parganas and 29 thanas.

Topography

2. In its general aspect the district resembles the rest of the *doab*, constituting an alluvial plain which slopes gently from north-west to south-east, the gradient following the line of the principal rivers. The interior surface is rendered slightly undulating by reason of the numerous minor watersheds that separate the subsidiary drainage lines, and which have the same general trend towards the south-east. The rivers divide the district into a series of more or less parallel *doabs*, each possessing distinguishing characteristics of its own. In the north there is the narrow strip of fairly level tract between the Ganga and the Isan with a light but not unfertile loam soil. Next comes the long and narrow strip between the Isan and the Ganga on the east and the Pandu on the west extending for the whole length of the district. In the north it is a level expanse of good loam, sandy towards the Isan, but stiffening into clay, interspersed with numerous patches of *usar*, in the swampy depression that forms the sources of the Non. On either side of this Ganga-Pandu tract the transition from the hard and gritty soil of the Ganga cliff on the one hand to the undulating banks of the Pandu on the other is very gradual. The next tract, between the Pandu and the Rind, similarly stretches throughout the entire district. The fertile loam of the east bank of the Pandu soon gives place to a broad expanse of level country in which the dominant feature is the immense amount of *usar*, chequered by blocks of cultivation and dotted with shallow *jhils*. South of the Rind lies a broader strip of country extending as far as the Sengar in the west, but further east reaching to the banks of the Yamuna. This Rind-Sengar *doab* is a level tract of loam in the western portion comprising of bulk of Derapur tehsil and about half of Akbarpur. It is less marred by *usar*. In places it is covered with *dhak* jungle. In Derapur there is some lack of natural drainage and swamps are fairly common. Towards the Sengar the soil is of pinkish colour. In the centre and south of Akbarpur the rich loam changes into a stiff, ill-drained and swampy soil, subject to waterlogging, full of *usar* and from time to time infested by *kans*. This extends into the north of Ghatampur and parts of Bhognipur to the east of Sengar. To the east of the Non there are stretches of *usar* and occasional sandy ridges. Another tract in the district comprises the country between the Sengar and the Yamuna. For the most part it is a level upland with a loan soil that merges gradually into the riverain belts on either side. There is a marked absence of depression. The soil deteriorates towards the Yamuna. The whole tract suffers from defective natural means of irrigation by reason of the great depth of water level, although canals have improved the agricultural conditions of the country.

Soils

3. The diversity of soils in the district is due mainly to the influence of the rivers. Along the district's south-western edge touching the course of the Yamuna are to be found some of the Bundelkhand soils, *parwa, rakar, bhurwa,* and *kabar*. But elsewhere the soil is of the average *doab* district, i.e., an ordinary gray, pinky or yellow loam in which the proportions of clay and sand vary according to the drainage influences. In the neighbourhood of rivers sand predominates whereas in depressions clay gains the upperhand.

Classification of area

4. The figures of the classification of area during the last fifty years are given in Table 2 of Part III of this volume. The proportion of area under the various categories works out as follows for 1950-51 :

Particulars	Actual figures (in acres)	Percentage
Cultivated area	971,311	64·0
Culturable waste (excluding current fallow)	171,346	11·3
Current fallow	37,750	2·5
Forest	432	0·0
Area not available for cultivation of which—	336,400	22·2
(*a*) *Covered with water*	*43,450*	*2·9*
(*b*) *Under sites, roads and buildings*	*57,483*	*3·8*
(*c*) *Barren*	*235,467*	*15·5*

The figure in the above table regarding culturable waste taken from the Season and Crop Report is, however, misleading. The State Agriculture Department conducted in 1949-50 a detailed enquiry through the District Officers regarding the nature of this area in each district. The following analysis of the area resulted from this enquiry :

Particulars	Area (in acres)	Percentage
Total culturable waste (A+B+C)	**179,774**	**100**
A—Area under culturable waste land not available for immediate cultivation	87,657	48·76
(i) Forest under any legal enactment	30	0·02
(ii) Groves	43,072	23·96
(iii) Forests of timber trees	2,872	1·60
(iv) Thatching grasses, shrubs and bushes	35,437	19·71
(v) Land kept for grazing	6,246	3·47
B—Area under culturable waste land available for immediate cultivation but could not be cultivated	54,703	30·43
Of which due to—		
(i) *Kans* growth	842	0·47
(ii) Threshing floors	1,295	0·72
(iii) Malaria	..	..
(iv) Floods	80	0·04
(v) Lack of drains	1,469	0·82
(vi) Lack of water	22,156	12·32
(vii) Distance from *abadi*	1,437	0·80
(viii) Damage from wild animals	4,581	2·55
(ix) Other causes	22,843	12·71
C—Area under culturable waste land that can be brought under immediate cultivation after some improvements besides the area given against 'B'	37,414	20·81

From the above it will appear that of the total area recorded as cultivable waste, only 20·8 per cent. was really capable of being brought under immediate cultivation after some improvements.

Thus the land area cultivated and cultivable including current fallow *per capita* works out to 60·9 cents of which 52·0* cents have already been brought under cultivation and only about 1·9 cents can be further brought under the plough after some improvements. It is obvious that the saturation point for cultivation has already been reached in the district.

Climate and rainfall

5. The average rainfall for the last quinquennium was about 32·87 inches. During the last fifty years, the rainfall has been less than 14 inches in only one year (1918-19) and has been usually over 28 inches. The climate of the district is much the same as that of the entire *doab* from Agra to Allahabad. From March to the beginning of the rains, it is characterised by extreme heat and dryness intensified by strong westerly winds and occasionally interrupted by violent dust storms. With the approach of monsoon the wind veers to the east and, till the rains actually break, the weather is most oppressive. The cold weather may be said to commence at the end of October, and the temperature falls gradually till it reaches its minimum in January.

Irrigation

6. Irrigation is derived from canals, rivers, wells, tanks, lakes and other natural reservoirs. The canals cover 88·7 per cent. of the irrigated area, wells cover 8·4 per cent. and other sources cover 2·9 per cent.

Crops

7. More acreage is sown under *rabi* crops than under *kharif* crops. The area under *kharif* in 1950-51 was 520,167 acres, under *rabi* 597,946 acres, and that under *zaid* crops 6,039 acres. The principal *kharif* crop is juar while the principal *rabi* crop is gram followed by wheat.

*The figure also includes the area classed as current fallow.

B—Analysis of the Statistics

1. The table below shows the two basic figures—land area and population—and the derived figures of land area *per capita* :

Population: General distribution and density

Tehsil	Population (in lakhs)	Density (number per square mile)	Land area (in lakhs of acres)	Land area *per capita*
Akbarpur	1·89	513	2·35	1·24
Bhognipur	1·87	493	2·43	1·30
Bilhaur	2·11	544	2·48	1·18
Derapur	2·09	517	2·58	1·23
Ghatampur	2·12	502	2·71	1·28
Kanpur	9·32	2,230	2·68	0·29
Kanpur district	*19·40*	*815**	*15·23*	*0·79*

This district though sixteenth in order of area stands eighth in respect of population. The district density is well above the average of the State (557). It has been to a very great extent affected by the presence of the large city of Kanpur. The rural density of the district per square mile is only 521, the density of the rural parts of the tehsils being : Akbarpur 513, Bhognipur 486, Bilhaur 537, Derapur 511, Ghatampur 502 and Kanpur 575. (*Vide* Tables A-I and E)

2. The population of the district in 1951 was 54·1 per cent. higher than what it was fifty years ago. Compared to this the increase in the population of the State during the corresponding period has been only 30 per cent. The table below exhibits the variation in the total, rural and urban population for the last five decades.

Growth of population

Census year	Population			Variation		
	Total	Rural	Urban	Total	Rural	Urban
1901	1,258,868	1,040,859	218,009			
1911	1,142,286	951,833	190,453	—116,582 (—9·3)	—89,026 (—8·6)	—27,556 (—12·6)
1921	1,148,664	923,352	225,312	+6,378 (+0·6)	—28,481 (—3·0)	+34,859 (+18·3)
1931	1,212,253	959,532	252,721	+63,589 (+5·5)	+36,180 (+3·9)	+27,409 (+12·2)
1941	1,556,247	1,058,672	497,575	+343,994 (+28·4)	+99,140 (+10·3)	+244,854 (+96·9)
1951	1,939,867	1,220,482	719,385	+383,620 (+24·7)	+161,810 (+15·3)	+221,810 (+44·6)

A noteworthy feature is that between 1901 and 1921 the population of the district recorded a decrease of about 8·8 per cent. when that of the State decreased by 4·0 per cent. It suffered severely from plague during 1901—11; every tehsil shared the loss. In spite of heavy mortality from the influenza epidemic in 1918-19—thanks to the City—a small increase was recorded for the decade 1911—21. Abnormal deaths did not occur or were prevented from occurring in the post 1921 period and the population of the district recorded an increase of 68·9 per cent. since 1921 against an increase of 35·5 per cent. in the population of the State during the same period.

*According to the area given by the Surveyor General, it is 818.

The variation in the population of the tehsils during 1941—51 are shown in the marginal table. The industrial and commercial development of Kanpur city accounts for the relatively large increase in Kanpur tehsil. The increases in tehsils Bilhaur and Bhognipur are relatively small, due apparently to emigration to Kanpur city and its immediate neighbourhood.

Tehsil	Percentage variation 1941—51
Kanpur district	+24·7
Akbarpur	+14·3
Bhognipur	+11·7
Bilhaur	+10·6
Derapur	+13·7
Ghatampur	+13·9
Kanpur	+40·6

Vital Statistics

3. Births and deaths mainly account for the trends in population growth, though in case of this district migration has also been an important factor. The following table gives the mean decennial registered birth and death-rates and the calculated natural increase rates and population growth-rates of the last three decades for the district as a whole and for its rural and urban areas :

	Total	Rural	Urban
Mean decennial birth-rate			
1941—50	**20·9**	17·6	27·1
1931—40	**29·2**	27·0	35·1
1921—30	**29·3**	28·8	31·1
Mean decennial death-rate			
1941—50	**15·2**	11·0	23·1
1931—40	**18·9**	14·9	29·5
1921—30	**25·2**	21·8	38·5
Mean decennial rate of natural increase			
1941—50	**5·7**	6·6	4·0
1931—40	**10·3**	12·1	5·6
1921—30	**4·1**	7·0	7·4
Mean decennial growth-rate			
1941—50	**21·9**	14·2	36·5
1931—40	**24·9**	9·8	65·3
1921—30	**5·4**	3·8	11·5

There are large omissions in the registration of births as well as deaths and so the above rates do not represent the true picture at all. They may, however, be taken roughly as indicative of trends. Both birth and death rates have fallen during the last decade.

The figures of natural increase and growth-rate suggest a small gain on the balance of migration during 1921—30, and a considerable gain during 1931—40 and 1941—50.

The average yearly mortality from various causes during 1941—50 was as follows :

Causes	Number of deaths	Percentage of total deaths
Fever	16,595	62·4
Dysentery and diarrhoea	987	3·7
Respiratory diseases	2,520	9·5
Plague, cholera and small-pox	1,204	4·5
Others	5,303	19·9

As in the rest of the State 'fever' is responsible for a majority of deaths, but fever covers a number of ailments which the reporters are unable to identify. Deaths from plague, cholera and small-pox and for respiratory diseases have been quite high. (*Vide* Table I, Part III of this Volume)

Migration

4. About 76 per cent. of the people enumerated in the district at the time of the last census were born there, 19·7 per cent. were born in other parts of the State, 2·2 per cent. were born in other parts of India, and 2·6 per cent. came from other countries. Of the immigrants from the district of the State as many as 199,083 (males 113,040, females 86,043) are from other districts of the same natural division and 182,754 (males 100,463, females 82,291) are from other parts of the State. Most of the migration from the neighbouring districts is marriage migration but quite a large part of it is semi-permanent labour-migration with or without families. Of immigrants from the adjacent States, 7,988 (males 4,843, females 3,145) are from Punjab and 6,497 (males 4,190, females 2,307) are from Bihar. Most of this movement is to the city of Kanpur and is semi-permanent labour migration and nearly in half the number of cases men are accompanied by their families.

Of the immigrants who have come from territories beyond India, 47,923 (males 26,059, females 21,864) were born in Pakistan and 3,476 (males 2,143, females 1,333) had their birth place in other territories. The Pakistan-born are the displaced persons who numbered 45,251 (males 24,058, females 21,193). Of the immigrants born in other territories 2,384 (males 1,472, females 912) were Nepal-born.

Of 404 non-Indian nationals, 215 were British, 117 Nepalese, 32 Chinese, 12 Germans and 6 Americans.

Unfortunately the figures of emigration are not available. According to Vital Statistics, however, the district gained about 14,000 persons in the decade 1921—30 on the balance of migration, while during 1931—40 and 1941—50 it gained about 201,000 and 285,000 persons respectively. But it should be borne in mind that the figures contain an element of registration error and are only indicative of trends. (*Vide* Tables D-IV and D-VI)

Decline of cultivation *per capita*

5. We may now analyse the growth of population in the district during the last thirty years in relation to the growth of cultivation during the same period. The figures are exhibited in the marginal table. (Figures of area shown under census years are quinquennial averages for the five years ending with the crop year immediately preceding the census year). It is obvious that cultivation has failed to keep pace with population. The cultivated area *per capita* has gone down to 47·3 cents in 1951 from 70·3 cents in 1921. The magnitude of the drop is about one-third of the 1921 level. It means that (other things being equal) every man, woman and child must expect to get less food and other agricultural produce from the land in 1951 than in 1921.

Census year	Population	Net area sown (in acres)	Area of cultivation *per capita* (in cents)
1921 ..	1,148,664	806,629	70·3
1931 ..	1,212,253	817,722	67·4
1941 ..	1,556,247	852,741	54·9
1951 ..	1,939,867	916,230	47·3

Double cropped area *per capita*

6. It may be examined whether this shortage has been compensated by an increase in the yield per acre. Increase in yield can be brought about by more double cropping, more irrigation, better fertilisation and better culture. The average (quinquennial) area sown more than once was 154,942 acres in 1921. It slightly decreased to 125,367 acres in 1931. There was a substantial increase to 151,792 acres in 1941 and in 1951 there was a further rise to 156,524 acres. The figures of double crop cultivation when calculated *per capita* in cents, are as below :

Particulars	Quinquennial averages for the year preceding			
	1951	1941	1931	1921
Double crop cultivation *per capita* in cents	8·1	9·8	10·3	13·5
Unirrigated double crop cultivation *per capita* in cents ..	6·5	7·5	8·1	10·1
Irrigated double crop cultivation *per capita* in cents	1·6	2·3	2·2	3·4

It is evident that the double cropped area has not kept pace with population.

Irrigated area *per capita*

7. The average area irrigated in the district was 291,007 acres in 1921. The figures were 230,579 acres for 1931, 287,642 acres for 1941 and 298,458 acres for 1951. The average area irrigated more than once was 38,603 acres in 1921, 26,821 acres in 1931, 35,682 acres in 1941 and 31,271 acres in 1951.

The figures for irrigation *per capita* are shown in the table below :

Particulars	Years			
	1951	1941	1931	1921
Irrigated single crop cultivation *per capita* in cents	13·8	16·2	16·8	22·0
Irrigated double crop cultivation *per capita* in cents	1·6	2·3	2·2	3·4

The trend is distinctly towards a decline.

Cropped area

8. It is also significant that in spite of the rapid growth of population there has not been a very great change in the cropping pattern of the district. During the quinquennium 1916—21, 90·3 per cent. of the cropped area was under food crops and only 9·7 per cent. of it was under non-food crops. Thirty years after during 1946—51 the cropped area under food crops was 93·6 per cent. and that under non-food crops was 6·4 per cent.

The proportionate area under different crops in the district between 1911 and 1951 was as below :

Quinquennial average of	Total cropped area	Percentage of cropped area under							
		Rice	Wheat	Barley	Juar	Bajra	Maize	Gram	Others
1911—16	**945,367**	3·6	12·2	14.9	16·0	5·9	6·6	17·3	23·5
1916—21	**930,884**	4·5	13·4	13·5	15·5	6·2	6·5	17·9	22·5
1921—26	**937,776**	3·9	14·6	13·1	17·7	5·0	4·3	22·9	18·5
1926—31	**958,932**	4·7	16·7	14·2	18·0	4·3	5·3	18·1	18·7
1931—36	**954,327**	4·0	15·3	13·2	17·3	4·9	5·3	19·2	20·8
1936—41	**1,011,640**	5·4	15·6	12·2	14·8	5·3	6·0	19·3	21·4
1941—46	**1,030,296**	6·4	13·6	12·5	15·4	6·6	5·3	22·3	17·9
1946—51	**1,088,715**	8·4	13·9	14·0	15·2	5·6	4·1	20·0	18·8

In 1901-02, the area under cotton crop was 75,570 acres ; in 1950-51, it was only 547 acres. In 1901-02, the area under indigo was 10,310 acres, while in 1950-51 it was only 3 acres. Sugarcane has gradually gained an important place in the crops of the district. Its area was 15,970 acres in 1950-51 against 12,605 acres in 1901-02.

Live-stock, ploughs and carts

9. Live-stock in this country live for a large part of the year on the by-products of agriculture supplemented by green fodder crops. They have, therefore, to be correlated not only with the grazing available but also with the total area under cultivation which carries a major portion of the burden of supporting the cattle population.

As will appear from Table 3 of Part III the total number of cattle and buffaloes, which had been increasing since 1930 except in the year 1944, has increased during 1944—51 from 7·6 lakhs to 8·4 lakhs in the district.

The number of working cattle and buffaloes in the district was 2·05 lakhs in 1935 and 2·25 lakhs in 1944. In 1951, the figure was 2·63 lakhs. This number of working cattle appears to be governed by the number of ploughs and carts. The number of ploughs has gone up from 1·15 lakhs in 1944 to a little over 1·20 lakhs in 1951 due apparently to progressive fractionalisation of holdings. The number of carts started rising since 1935. The number was 52,768 in 1951 against 37,361 in 1935. The average net cultivated area per plough works out to 8·05 acres in 1951 as against 7·99 acres in 1920, and the average net cultivated area per pair of working cattle works out to 7·38 acres in 1951 as against 8·24 in 1935.

Breeding cows and she-buffaloes have increased from 2·63 lakhs to 2·73 lakhs during 1935—44, have further gone up to 3·04 lakhs in 1951. The cows and female buffaloes in milk per 1,000 of human population were 41 and 32 respectively. Owing to the poor milk yield the share of milk per head is only a few ounces per day.

The number of sheep has been falling since 1930 when it stood at about 48 thousands. In 1951 it has gone down to 28 thousands due apparently to shortage of pasture. Goats have been going down since 1935 when their number stood at about 3 lakhs and in 1951 it has gone down to 1·8 lakhs, the reduction during 1944—51 being 10·2 per cent.

Horses and ponies are also declining since 1935. There was a steep fall during 1944—51 from about 13 thousands to 8 thousands. Donkeys have also declined during the same period.

Poultry has increased since 1944 from about 23 thousands to 28 thousands.

Distributed on 1,000 of human population the figures of the main categories of live-stock in 1951 are as follows :

Cattle	Buffaloes	Sheep	Goats	Poultry	Others
271	163	14	95	14	18

10. To sum up, the population of the district is growing up at a rapid rate since 1921, while on the other hand the land area *per capita* is steadily declining. The district, no doubt, is the industrial 'Manchester' of the State, but the threat for the rural areas is the magnitude of the absolute numerical increase in relation to the practically stationary acreage under cultivation. This threat is enhanced by the decline in the area under double crops and irrigation and the consequent insufficiency in foodstuffs.

Villages and towns

11. The district has 1,950 villages and 6 towns. Out of about 19 lakhs of people who were counted at the census of 1951 about 12 lakhs were found in villages and 7 lakhs in towns, i.e., as many as 629 people per 1,000 of population live in rural areas and only 371 in urban areas. The corresponding figures for the State as a whole are : rural 864 and urban 136.

The rural population per inhabited village works out to 626. But the villages do not necessarily comprise of a single compact size. There are 4,290 hamlets in the district. The population per hamlet is only 284. The medium-sized village with inhabitants numbering between 500—2,000 is the dominant type in the district. Of the rural population 58·4 per cent. live in such villages ; 24·3 per cent. in small villages of population under 500 ; and 17·3 per cent. in large villages of a population between 2,000—5,000.

Towns vary in number of inhabitants even more widely than villages. Kanpur city (including railway colonies, Armapur and Cantonment) has a population of 705,383 or 98·1 per cent. of the urban population of the district. The remaining 1·9 per cent. of the urban population lives in towns of population under 5,000 (viz., Bilhaur, Pukhrayan, Jhinjhak and Bithur).

Kanpur city with 705,383 inhabitants heads the list of towns in this State. Lucknow maintained its lead till 1931. In 1941 it changed place with Kanpur which had the highest increase of 99·9 per cent. during 1931—41. During 1941—51 it had an increase of 44·7 per cent. The increase in its population since 1921 is of 225·9 per cent. The commercial and industrial development of the city is responsible for its rapid growth. Now its rank in the cities of India is eighth. Bilhaur and Bithur appear to be declining towns. Since 1941 the population of Bilhaur decreased by 10·3 per cent. while there was a nominal increase of 1·3 per cent. in the population of Bithur. (*Vide* Tables A-III and A-IV)

Occupations: Livelihood pattern

12. Out of the total population of 1,939,867 (rural 1,220,482, urban 719,385) 996,753 persons (rural 982,771, urban 13,982) or 51·3 per cent. depend on agriculture for their means of livelihood and 943,114 persons (rural 237,711, urban 705,403) or 48·7 per cent. live on non-agricultural sources. The following table gives the distribution of 100 persons of the total, rural and urban population of the district and also of Kanpur city under different livelihood classes :

Description	Agricultural classes					Non-agricultural classes				
	Total	I	II	III	IV	Total	V	VI	VII	VIII
Total	51·3	42·9	4·5	2·2	1·7	48·7	19·0	10·0	2·5	17·2
Rural	80·5	67·6	7·0	3·4	2·5	19·5	5·5	2·5	0·6	10·9
Urban	2·0	1·2	0·3	0·1	0·4	98·0	42·0	22·6	5·7	27·7
Kanpur city	1·3	0·7	0·2	0·1	0·3	98·7	42·6	22·7	5·7	27·7

It is obvious that the district is one of the less agricultural districts of the State. Here only as many as 51·3 per cent. of the people depend on agriculture as against the average of 74·2 per cent. in the State.

Of the total population of the district 1,157,206 persons (males 431,717, females 725,489) or 59·7 per cent. have been classified as non-earning dependants. The percentage of non-earning dependants in the agricultural population works out to 58·6 and that among the non-agricultural classes to 60·8. It will be observed that in the main they consist of women. The male non-earning dependants are mostly children. 165,620 persons (60,309 males, 105,311 females) or 8·5 per cent. of the population are earning dependants. Among the agriculturists their proportion is 12·6 per cent. and among non-agriculturists 4·2 per cent. Agriculture is a family occupation and it provides work to the women and grown-up children in the family. The remaining 617,041 persons (males 588,171, females 28,870) or 31·8 per cent. of the population consists of self-supporting persons. Their proportion among agriculturists is 28·8 per cent. and among the non-agriculturists 35·0 per cent. Of the self-supporting 287,107 (275,944 males, 11,163 females) belong to the agricultural classes and 329,934 (males 312,227, females 17,707) to the non-agricultural classes. On an average a self-supporting person maintains two non-earning dependants.

Of the 329,934 self-supporting persons belonging to the non-agricultural classes 6,532 persons (rural 1,798, urban 4,734) earn their livelihood from non-productive sources. Of the remaining 323,402 self-supporting persons (rural 79,309, urban 244,093) 12,363 (rural 514, urban 11,849) or 3·8 per cent. are employers ; 168,583 (rural 15,488, urban 153,095) or 52·1 per cent. are employees and 142,456 (rural 63,307, urban 79,149) or 44·1 per cent. are independent workers.

The distribution of 10,000 self-supporting persons of non-agricultural occupations, classified according to the Economic Divisions is as follows :

Name of division	Self-supporting persons by divisions
All Industries and Services	**10,000**
0—Primary industries not elsewhere specified	100
1—Mining and quarrying	3
2—Processing and manufacture—foodstuffs, textiles, leather and products thereof	2,902
3—Processing and manufacture—metals, chemicals and products thereof ..	709
4—Processing and manufacture not elsewhere specified	442
5—Construction and utilities	317
6—Commerce	1,802
7—Transport, storage and communications	616
8—Health, education and public administration	770
9—Services not elsewhere specified	2,339

Kanpur is the Manchester of this State. Among the large scale industries of the district the principal are cotton spinning and weaving, cotton ginning and pressing, manufacture of jute and woollen goods, leather tanning and leather working, manufacture of vegetable oils and soaps, flour grinding, rice hulling, engineering, plastics, biscuits, confectionery, chemicals and distilleries. Among cottage and small scale industries, the principal are *durries*, hosiery, calico printing, tape net and *niwar*, leather tanning and leather working, brass and copper wares, scissors and razors, electric goods, geometrical drawing and survey instruments, agricultural implements, steel trunks and iron safes, cycle parts, furniture making, basket making, *chik* making, brush making, tobacco (chewing) and printing ink.

Variation in the livelihood pattern

13. In the district, the proportion of population depending on agriculture for their livelihood was 51·4* per cent. in 1951. It was 66·2 per cent. in 1921. The proportion has gone down but the actual number of persons who depend on agriculture has increased to 996,753 in 1951 from 760,756 in 1921 or by 31·0 per cent., while the cultivated area has remained almost unchanged. This has resulted in the progressive fragmentation and sub-division of holdings and pressure on impoverished soil. There appears to have been a gradual decline in village arts and handicrafts. The cumulative

*The figure includes earning dependants according to their secondary means of livelihood, while the figure 51·3 in paragraph 12 includes earning dependants according to their principal means of livelihood and hence the difference.

result is a fall in the proportion of workers and a corresponding rise in the dependency. The proportion of workers in the total population in 1951 was only 40·4 per cent. (agricultural 21·3 per cent., non-agricultural 19·1 per cent.) against 52·9 per cent. (agricultural 35·2 per cent., non-agricultural 17·7 per cent.) in 1921. The proportion of non-earning dependants has consequently increased from 47·1 per cent. (agricultural 31·0 per cent., non-agricultural 16·1 per cent.) in 1921 to 59·6 per cent. (agricultural 30·1 per cent., non-agricultural 29·5 per cent.) in 1951. All this is an index of the increasing unemployment and under-employment. It is only by the diversion of the rural population to cottage industries that the present economy of the district can be improved. (*Vide* Tables B-I, B-II and B-III)

Houses and households

14. There were 362,686 occupied houses in the district—201,497 in villages and 161,189 in towns. That gives an average of 6,057 persons per 1,000 houses or 6·1 persons per house in the rural areas and 4,463 persons per 1,000 houses or 4·5 persons per house in the urban areas.

There were 421,807 households in the district—240,992 in rural areas and 180,815 in urban areas. That gives an average of 5,062 persons per 1,000 households or 5·1 persons per household in rural areas and 3,929 persons per 1,000 households or 3·9 persons per household in urban areas. The marginal table shows the developments in the size of household since 1921. The rural household has increased from 1941 whereas the urban household has decreased.

Census year	Persons per 1,000 households of Rural Population	Urban Population
1921 ..	4,096	3,525
1931 ..	5,660	2,230
1941 ..	4,408	5,094
1951 ..	4,062	3,929

Out of 5,062 persons in every 1,000 rural households, 2,725 are males and 2,337 are females. There is a male excess of 388 in every 1,000 households. Out of 3,929 persons in every 1,000 urban households, 2,296 are males and 1,633 are females. There is male excess of 663 in every 1,000 households. The type of migration will account for the difference.

Information regarding types of households and household relationships was collected at this census with the help of a sample of about 4 per cent. According to this, in every 1,000 sample households there are 4,495 persons (males 2,512, females 1,983) in the district. The corresponding figure for the total count is 4,576.

The table below shows the distribution by size of 1,000 sample households :

Description	Small with 3 members or less	Medium with 4—6 members	Large with 7—9 members	Very large with 10 members or more
Total	**442**	**369**	**139**	**50**
Rural	333	419	179	69
Urban	570	310	92	28

Small households with 3 members or less are the dominant type in urban areas while medium households are the dominant type in the urban areas. Quite a large number of migrants live in the towns without families.

Family composition of 1,000 sample households is as follows :

			Number in 1,000 households
A	Heads of households	Males (married)	590
		Males (widowers)	369
		Females	41
	Wives of heads of households		590
			1,590
B	Sons of heads of households		909
	Daughters of heads of households		611
			1,520
C	Male relations of heads of households (other than sons)		524
	Female relations of heads of households (other than daughters)		635
			1,159
D	Persons unrelated to the heads of the households	Males	120
		Females	106
			226
		Grand total ..	*4,495*

Sons outnumber the daughters of heads of households. The latter leave the homes of their parents after marriage. Female relations (other than daughters) outnumber the male relations (other than sons). Such females are generally those who become members of these households by marriage. (*Vide* Tables A-I and C-I)

Sex-ratio

15. In the district as a whole the sex-ratio was 796, i.e., there were 796 females to every 1,000 males. It varied among the tehsils. The lowest value was 729 in Kanpur tehsil. The highest value was 884 in Ghatampur tehsil. The wide difference in the former is caused by Kanpur city where the males largely exceed the females. The ratio was 857 in Akbarpur, 873 in Bhognipur; 855 in Bilhaur and 845 in Derapur.

The sex-ratio is smaller in towns than in villages. For the district as a whole, the sex-ratio in villages was as high as 857 while that in towns was only 701. The sex-ratio for Kanpur city was only 699.

The corresponding figures of sex-ratio for the district was 802 in 1921, 810 in 1931, 777 in 1941 and 796 in 1951.

Age-structure

16. The number in each age-group in the district is shown below as a percentage of the total number of all ages in the total, rural and urban population separately :

Age-group		Total population			Rural population		Urban population	
		Persons	Males	Females	Males	Females	Males	Females
Infants and young children	0—4	13·3	6·8	6·5	6·9	6·7	6·6	6·3
Boys and girls ..	5—14	24·4	13·1	11·3	13·9	12·2	11·7	9·7
Young men and women ..	15—34	35·7	20·3	15·4	18·1	15·2	24·4	15·5
Middle-aged men and women	35—54	20·3	12·4	7·9	11·4	8·6	14·2	6·6
Elderly persons	55 and over	6·3	3·6	2·7	4·1	2·9	2·8	2·2

It will be seen that the population is progressive. 37·7 per cent. of the population is of age under 15 and only 6·3 per cent. of it consists of elderly persons. Again it may be noted that proportionately larger numbers in the working ages (15—54) are found in urban areas. This is the effect of migration of workers to the towns from the villages often are unaccompanied by their families. (*Vide* Table C-II)

Marital status

17. Out of every 10,000 persons in the district, there are 5,622 males and 4,378 females.* Among them 2,691 males and 1,866 females are unmarried. If we reckon males and females together, the unmarried people are 45·6 per cent. of the population.

Of the males 47·9 per cent. were unmarried, 45·8 per cent. were married, and 6·3 per cent. were widowed or divorced. Among the females 42·6 per cent. were unmarried, 47·5 per cent. were married and 9·9 per cent. were widowed or divorced.

Of the married males 1·6 per cent. were of ages below 15, 52·2 per cent. were of ages 15—34, 38·1 per cent. were of ages 35—54 and 8·1 per cent. were of ages 55 and over. Among the married females 4·7 per cent. were below 15, 63·5 per cent. were of ages 15—34 and 28·3 per cent. were of ages 35—54 and 3·5 per cent. were of ages 55 and over i.e. elderly women.

Marriage is universal. Among males and females aged 35 years and over only 7·7 per cent. of the males and 1·1 per cent. of the females were found unmarried. Most of the females are married before they attain the age of 25. Child marriage is not very common. Only 2·0 per cent. of the males of ages 0—14 and 5·5 per cent. of the females of ages 0—14 were returned as married. (*Vide* Table C-III)

Languages

18. Over 97·3 per cent. of the people of the district returned Hindi, Hindustani or Urdu as their mother-tongue. Among the other mother-tongues spoken, the main are Punjabi (1·3 per cent.), Sindhi (0·48 per cent.), Bengali (0·42 per cent.), Gujarati (0·09 per cent.) and Marathi (0·07 per cent.). Of the 19 lakhs of people in the district only 36,371 or 1·9 per cent. were bilingual (in any Indian language). Those whose mother-tongue is other than Hindi, Hindustani or Urdu are generally the migrants who are able to speak any of these as subsidiary language. Persons returning Hindi, Hindustani or Urdu as secondary language were 27,421 or 75·4 per cent. of those who were bilingual in some Indian language. (*Vide* Table D-I)

Religion and special groups

19. Out of 10,000 population of the district, the number of people belonging to the different religions is : Hindus 8,719, Muslims 1,152, Sikhs 91 and Christians 37 ; of 10,000 population in villages the numbers are : Hindus 9,418, Muslims 555, Sikhs 22 and Christians 4 ; and of 10,000 population in towns the numbers are : Hindus 7,509, Muslims 2,164, Sikhs 209, Christians 92 and others 26. Muslims, Sikhs and Christians are generally concentrated in the urban areas of the district as is the case in the other parts of the State.

*The corresponding figures for the total count are 5,568 and 4,432.

There are 258 thousand Scheduled Castes in the district. Their number per 10,000 of population works out to 1,328. In villages they are 1,817 for every 10,000 and in the towns their number per 10,000 is only 499. In the district, there are 675 Anglo-Indians the majority of whom are concentrated in the urban areas, specially the city of Kanpur. (*Vide* Tables D-II and D-III)

Displaced persons

20. The number of displaced persons in the district at the census was 45,251 (males 24,058; females 21,193), a large majority of whom are concentrated in Kanpur city. Of the displaced persons 95·9 per cent. have come from West Pakistan, 2·1 per cent. from East Pakistan and 2·0 per cent. from districts that could not be traced. (*Vide* Table D-V)

Literacy

21. The percentage of male literacy in 1951 was 30·1 in the district while that of female's literacy was 11·5 only. In 1931, the male literacy was 12·1 and female literacy was 1·8.* On January 1, 1951, there were 777 primary schools in the district with enrolment of 82,470. (*Vide* Table D-VII)

C—Explanatory Note on the Statistics

The statistics in this volume have been presented in three parts :

I—District Census Tables

II—Village, Town, Pargana and Thana Statistics

III—Miscellaneous Statistics

Parts I and II contain census data. A brief account of the system of sorting of census slips and preparation of tables and abstract therefrom is given below.

Part III contains statistics throwing light on special aspects of population and its growth. These have been derived from miscellaneous sources. Table 1, "Vital Statistics", has been prepared from the published and unpublished records of the Director of Medical and Health Services, Table 2, "Agricultural Statistics", from the Annual Season and Crop Reports, Table 3, "Live-Stock, Agricultural Machinery and Implements", from the published figures of Live-Stock Census and Table 4, "List of Primary Schools", from information specially supplied by District Inspector of Schools.

Processing of census data

2. The census data presented here has been derived from the census slips by a process of sorting, compilation and tabulation. In previous censuses the slips were first sorted by religion and this division was maintained throughout so that all data was cross-tabulated by religion. This procedure has been abandoned at this census and substituted by a division based on economic characteristics of the population. The whole population has been divided into eight livelihood classes, four of which are of the agricultural category and four of non-agricultural category as follows :

Agricultural Classes—

I—Cultivators of land wholly or mainly owned ; and their dependants

II—Cultivators of land wholly or mainly unowned ; and their dependants

III—Cultivating labourers ; and their dependants

IV—Non-cultivating owners of land ; agricultural rent receivers ; and their dependants

Non-agricultural Classes—

V—Production (other than cultivation)

VI—Commerce

VII—Transport

VIII—Other services and miscellaneous sources.

Another special feature of the sorting of this census was the separation, from the very start, of slips of displaced persons and of a 10 per cent. random sample from the remainder. This has enabled the data of displaced persons to be presented separately while the 10 per cent. sample has been utilized for the preparation of Age Tables.

The slips of this census have been copied by Households into a National Register of Citizens, which has been prepared village-wise for rural areas and mohalla/ward-wise for urban areas. Table C-I is based on a 4 per cent. sample extracted from this Register.

*The numbers per mille (of the 10 per cent. sample population) of each sex aged 5 years and over who were returned as literates are as below:

Males		Females	
1951	1931	1951	1931
344	139	119	21

Tracts

3. The slips were first sorted by villages for the preparation of the Primary Census Abstract. For the purpose of further sorting the State was divided into tracts consisting of (*a*) *rural tracts*, comprising the rural population of each tehsil, (*b*) *urban city tracts*, comprising the population of areas which had been declared as cities, (*c*) *urban non-city tracts*, comprising the population of urban areas of a district excluding areas declared as cities. Each tract was treated as a unit for sorting of slips. All data were compiled first by tracts and then by districts. This volume presents the tract-wise data for one district (with the exception of A and E Tables, which have been presented tehsil-wise), while the district-wise data for the whole State is contained in the following State volumes :

Part I-B—Subsidiary Tables

Part II-A—General Population Tables

Part II-B—Economic Tables

Part II-C—Age and Social Tables

Explanatory notes

4. Detailed explanatory notes are appended to each State table in the printed volumes of State tables. They apply to the tables in this volume also and should be referred to when necessary. A few notes of some of the tables are reproduced below :

Table A-I—Column 5 relating to "hamlets" has been introduced for the first time. Any distinctive cluster or agglomeration of houses has been treated as a "hamlet".

A clear distinction has been made in this census between a "House" and a "Household". A house is any human dwelling having a separate main entrance while a household is any commensal unit living in a census house. In previous censuses the figures under "Occupied Houses" used to be that of households, while the figures under columns 7—9 of the present tables refer to occupied census houses as distinct from households.

The Economic Tables—The Indian Census Economic Classification Scheme, 1951 together with the occupational division and sub-division adopted for this census are given in Part II-B of the Report.

Table B-I—Each of the eight livelihood classes mentioned above has been divided into three sub-classes, with reference to the economic status, as follows :

(*i*) Self-supporting persons ;

(*ii*) Non-earning dependants ; and

(*iii*) Earning dependants.

These were defined in the Instructions to Enumerators as follows :

> "A 'self-supporting person' is one who is in receipt of an income and that income is sufficient at least for his own maintenance. To be 'self-supporting' a person need not be able to support his family. All that is necessary is that he should be earning sufficient for his personal needs. For purposes of this question the person enumerated is the unit and not the family or household. Any one who is not a 'self-supporting' person in this sense is a 'dependant'. A 'dependant' may be either an 'earning dependant' or a 'non-earning dependant'. The test is whether he secures a regular (and not casual) income, even though it may be small. Such income may be in cash or kind ; it may be continuous or seasonal employment. When the income which he secures is not sufficient to support him that person is an 'earning dependant'. A person who does not earn any income either in cash or kind is a 'non-earning dependant'. Where two or more members of a family household jointly cultivate land and secure an income therefrom, each of them should be regarded as earning part of the income. None of them is, therefore, a non-earning dependant. Each of them should be classed either a 'self-supporting person' or 'an earning dependant' according to the share of income attributable to each. The same applies to any other business carried on jointly. The share of the income is what the head of household deems it to be. This does not mean that every one who works is necessarily a self-supporting person or an earning dependant. Thus, for instance, a housewife who cooks for the family, brings up the children or manages the household is doing very valuable work. Nevertheless, her Economic Status is that of a non-earning dependant, if she does not also earn an income, and should be recorded as such."

Economically active, Semi-active and Passive persons—All non-earning dependants are economically passive. They include persons performing house-work or other domestic or personal services for other members of the same family household. But they do not include "unpaid family workers" or persons who take part along with the members of the family household in carrying on cultivation or a home industry as a family enterprise.

All earning dependants are economically semi-active only. Though they contribute to the carrying of economic activities, the magnitude of their individual contribution is deemed to be too small to justify their description as economically active. (Their contribution to economic activity is, however, taken into account in the tabulation of data based on secondary means of livelihood.)

All self-supporting persons are ordinarily economically active with the exception of the following classes and groups :

(*a*) All self-supporting persons of Agricultural Class IV.

(*b*) The following groups of self-supporting persons who are included in Non-agricultural Class VIII and derive their principal means of livelihood from miscellaneous sources (otherwise than through economic activity) :

(i) Persons living principally on income from non-agricultural property ;

(ii) Persons living principally on pensions, remittances, scholarships and funds ;

(iii) Inmates of alms-houses and recipients of doles ;

(iv) Beggars and vagrants ; and

(v) All other persons living principally on income derived from non-productive activities.

Table B-II—For a self-supporting person who has more than one means of livelihood the *secondary means* of livelihood is the livelihood next in importance to his principal means of livelihood. For an earning dependant it is the source from which he secures his own income, where there are more than one subsidiary occupations only the one providing the largest income has been taken into account.

Table B-III—"Employers", "Employees" and "Independent Workers" have been defined as follows in the Instructions to Enumerators :

An "employer" is only that person who has necessarily to employ other person in order to carry on the business from which he secures his livelihood. Thus if a person employs a cook or any other person for domestic services, he should not be recorded as an "employer" merely for that reason.

An "employee" is a person who ordinarily works under some other person for a salary or a wage in cash or kind as the means of earning his livelihood. There may be persons who are employed as managers, superintendents, agents etc., and in that capacity control other workers. Such persons are also employees only and should not be regarded as employers.

An "independent worker" means a person who is not employed by any one else and who also does not employ anybody else in order to earn his livelihood. (Sweepers, *dhobies*, *kahars* etc., who work for several masters are independent workers. If, however, any of them accepts whole-time employment under one master he becomes "employee". Daily wage-earners who work for different masters are likewise independent workers. But if they accept employment under one master, e.g., under a factory, they become "employees".)

Tables C-II, C-III, C-IV and C-V—The figures presented in these tables are based on single year age returns and have not been smoothed.

Tables D-V (i) *and* (ii)—For the purpose of these tables a "displaced person" has been defined as follows :

"A displaced person means any person who has entered India having left or being compelled to leave his home in Western Pakistan on or after the 1st March, 1947, or his home in Eastern Pakistan on or after the 15th October, 1946, on account of civil disturbances or on account of the setting up of the two Dominions of India and Pakistan."
