PREFACE

The District Census Handbooks were started for the first time in the history of the decennial censuses in India in 1951. The Handbooks of the Travancore-Cochin and Madras States in the 1951 Census contained, besides a short account of the district and the people, important Census tables for the district and a village directory consisting of the area, houses, population, number of literates, the distribution of population by livelihood classes, the number of institutions and general information on amenities etc., in respect of every village. In the 1961 Census it was decided with the concurrence of the State Government to continue the publication of the District Census Handbooks. The contents of the District Census Handbooks of the 1961 Census are, however, a little more ambitious than those of the 1951 Census Handbooks in that besides the items of information mentioned above a large number of tables giving general information about the districts have been added. The number of such tables comes to 43 besides 59 inset tables excluding those given in respect of Census data. As far as possible, an attempt has been made through these tables to give an epitome of the progress made by the district in various fields during the inter-censal period 1951-61. The book is divided into three parts. Part A gives a general description of the district, the progress made during the last decade, a review of the population, literacy, employment and unemployment, household economic data etc., of the district based on Census data and a gazetteer. The appendices to this part contain the various tables of general information on which the review of progress has been based. Part B contains the Census data of 1961 comprising the general population tables, economic tables including household economic tables, social and cultural tables, and special tables for Scheduled Castes and Scheduled Tribes. Part C is the Village Directory. It is hoped that this handbook will serve as a useful reference book on the Kozhikode district.

A book of this kind could not have been compiled but for the hearty co-operation and goodwill extended by the various departments of the State and Central Governments to whose kindness I am deeply indebted. The District Census Handbook Section of my office consisting of a Statistical Assistant and a couple of Compilers has been in charge of the entire work of collection and compilation of the data for this handbook. At the time of addressing the various departments for collection of information for the District Census Handbook Shri H. Padmanabha Iyer of the Bureau of Economics and Statistics

was the Statistical Assistant in charge of the Section. After a short period of work in this section he was transferred to the Tabulation Office, Kozhikode, as the Tabulation Officer. He was succeeded by Shri S. Jayashanker of the Bureau of Economics and Statistics as Statistical Assistant in charge of this handbook. While Shri Padmanabha Iyer has rendered excellent service in piloting the work of the collection of data for the handbooks, Shri Jayashanker who succeeded him has borne the brunt of the work in the preparation of this handbook which involved a good deal of careful analysis and laborious compilation. I feel happy in acknowledging the valuable contribution made by them and particularly Shri Jayashanker in the compilation of this important book. I should also acknowledge the good work of the Compilers of the District Census Handbook Section, Sarvashri K. N. Raman and E. V. Unnikrishnan Nair and of Draftsman Shri S. Krishna Pillai who has prepared the entire set of maps given in the book.

I should express my deep sense of gratitude to Shri P. K. Abdulla I. A. S., Secretary to Government and Shri K. Swaminathan, Superintendent of Government Presses for the warm Co-operation extended by them for the timely printing of this handbook.

Above all I am grateful to Shri Asok Mitra, I.C.S., Registrar General, for the valuable guidance and help extended to me in this work.

Trivandrum,
15th September 1965.

PART A

GENERAL

PART A—GENERAL

History of the District

1. With the enactment of the States Reorganisation Act, 1956 (Central Act 37 of 1956) on 1st November 1956 the former Malabar district (except Laccadive and Minicoy Islands) and the old Kasaragod taluk of South Kanara district of the Madras State formed part of the Kerala State. These areas constituted the Malabar district of Kerala. But this district continued as such only till 1st January 1957 when it was trifurcated into the three new revenue districts of Cannanore, Kozhikode and Palghat. The Kozhikode district thus formed on 1st January 1957 consisted of Badagara and Quilandy taluks formed out of the old Kurumbranad taluk on this date, the Kozhikode taluk, the Ernad taluk (i.e., the residuary portion of the old Ernad taluk left after taking a portion to the Tirur taluk) and the Tirur taluk newly formed on this date taking in a portion of the old Ernad taluk and the old Ponnani taluk. On 15th March 1957 the South Wynad taluk was transferred from the Cannanore district to this district.

Situation

2. Bounded on the north by Cannanore district, on the east by the natural barrier of Western Ghats, by the Mysore district of the Mysore State and the Nilgiris district of the Madras State, on the south by Palghat district and on the west by the Arabian sea, the Kozhikode district lies between north latitudes 10° 47′ and 11° 52′ and east longitudes 75° 32′ and 76° 33′.

Administrative Units

3. Kozhikode district is divided into six taluks Badagara, Ernad, Kozhikode, Quilandy, South Wynad and Tirur, with 332 *amsoms* or revenue villages. The distribution of these villages among the various taluks

Statement 1

Tirur	278·44	73	5	..

4. Badagara and Calicut are the two municipal towns of this District. There are 85† panchayats and 16‡ community development blocks. Out of sixteen blocks 12 are Stage I and the rest are Pre-extension.

Area, Physical Features and Natural Divisions

5. With an area of 2,570·26 sq. miles (*) the Kozhikode district stands foremost among the districts of Kerala in point of area. The district, like all other districts, shows the division of the State into the three natural regions, the lowland, the midland and the highland. "The western coast of India has been historically the most active, partly for reasons inherent in its own nature—a coast with numerous havens, creek or roadstead, a narrow immediate hinterland with a few well-defined routes into the interior—and partly by virtue of its location facing the intercontinental nodes of South-West Asia. Maritime activity goes back to the beginnings of history, and this was the first part of India to receive the attention of Renaissance Europe ; indeed some fragments of the Portuguese empire here have survived the British "(**). This deltaic or western littoral region, the land of lagoons, marshes and canals fed by innumerable streams and rivers that scour the country down the table land and bring rich alluvial deposits to fertilise and enrich the lowlands is conspicuous for its extensive cultivation of cocoanut palm and paddy. For purposes of demarcation this narrow strip of region having a coastal line of seventy miles and lying below 25 feet above mean sea level constitutes the lowland. All the taluks except Ernad and South Wynad have coastal areas. The industrial development of the district is mainly confined to this region of high cultivation and old civilization. The midland lying between 25 feet and 250 feet above the mean sea level has fertile soil with luxuriant vegetation the main culivation being rice, pepper, cocoanut, arecanut, tapioca and rubber. To the east of the midland, 250 feet above the mean sea level, lies the highland region overrun by mountains, hills and woods and undulating ridges in all directions intersected by extensive valleys of wet cultivation. Some of the mountains in this region rise above 5,000 feet in height. Tea, coffee, cardamom and rubber are the main cash crops here. The maximum breadth of the district is 55 miles while the minimum is 13 miles.

6. Badagara, the northernmost taluk of the district has low laterite hills and extensive cultivation of cocoanuts and rice. The terrain and type of land of Quilandy

† During the period 1960-61

‡ As in October 1961

(*) 6,656·95 sq. km.

taluk is similar to that of Badagara taluk except for its north-eastern portion of 87·05 sq. miles of unsurveyed hills. Cocoanut, rice, arecanut, pepper, tapioca and rubber are the important crops of Quilandy taluk. The physical features of Kozhikode taluk have striking resemblances with the other taluks mentioned above. Rice and cocoanuts are the principal crops of this taluk. Rubber, being an important cash crop, is cultivated in the eastern and north-eastern villages of the taluk. Besides, this taluk has 75·97 sq. miles of unsurveyed hilly areas. Mountain peaks like Camel's Hump, Velleri mala and Elambileri are situated in this taluk. The deltaic region of Kallayi river is an important industrial centre. Tirur taluk lies in the lowland and midland regions, its chief crop being cocoanuts. A major portion of Ernad taluk is covered by mountains, wood and unsurveyed hills. The unsurveyed region comes to 327·84 sq. miles in 1961. The forests of this taluk have valuable teak plantations. South Wynad taluk is situated entirely in the highland region and consists of several detached hills of considerable elevations. An important feature of South Wynad is the extensive cultivation of tea, coffee and cardamom.

7. The subjoined statement gives the area of the district by natural divisions :—

Statement 2

The entire area given against Quilandy taluk for highland pertains to unsurveyed hills. Ernad and Kozhikode taluks also have unsurveyed hills.

The River System

9. Out of the 44 rivers in Kerala there are eight west-flowing and one east-flowing rivers in this district. Chaliyar or Beypore river is not a big river by Indian standards, even though it has a length of 105 miles and ranks fourth in the State. It has a drainage area of 1,085 sq. miles of which 145 sq. miles lie in the Madras State and an annual run-off of 185,000 million cubic feet. The Beypore river rises from the Elambileri hills and draining the Wynad Ghats and Nilagiri Plateau flows through Cholamala estate, Kanthapara, Kurumbanmala, Mannathiamblam, Mambad, Edavanna, Ariyakod, Vazhakkad and Feroke and discharges itself into the sea at Beypore six miles south of Calicut. Karimpuzha, Chaliyar, Punnapuzha, Cherupuzha, Iringapuzha, Kurumbapuzha, Kanhirapuzha and Vadapurampuzha are its important tributaries. The river is navigable for country boats all the year round up to a length of 44 miles from Beypore. Motor-boats can only ply upto a distance of 13·5 miles at all seasons even though the river can be used for motor-boat traffic to a distance of 33·5 miles during monsoon periods. Next to Beypore river in length comes Kadalundi river with a length of 81 miles. This river is known by different names in different parts. At Malappuram it is known as "Anakkayam river" while at Tirurangadi it bears the name as "Tirurangadi river". This river has a catchment area of 430 sq. miles and a total run-off of 77,300 million cubic feet. It has its origin in the southern slopes of Kunda mountain at an elevation 4,000 feet above mean sea level. This river traverses through Karuvarankundu, Melathur, Pandikad, Malappuram and Tirurangadi and empties itself into the sea at Kadalundi. It allows motor-boat traffic to a distance of 14 miles, while the country boats can get upstream upto 27 miles. Another important river of this district is Murat otherwise known as Kuttiyadi or Kotta river. It originates from the Wynad Hills and traverses through Tiruvallur, Muyipott, Maniyur and Karavancheri before it drains its water into the Arabian sea at Kottakkal port two miles south of Badagara. It has a length of 46 miles with a catchment area of 166 sq. miles and an annual run-off of 46,980 million cubic feet. Country boats usually ply to a distance of 6 miles. The following statement gives the names, places of origin and length of rivers :—

Kabani, the east-flowing inter-state river rises in the Wynad forests and flows through South Wynad and North Wynad taluks and joins as a tributary of Cauvery. The important tributaries of Kabani are Panamaram and Mananthody rivers. Kabani enters the Mysore State at Kalvalli. The rivers originating as they do from the copious mountainous catchments help in no small measure the fields and gardens to produce excellent harvests besides providing excellent inland navigational facilities.

Mountains

10. The eastern region of this district is covered by thick forests, low ridges and innumerable valleys. The important nine hills with their heights are given below :—

Hill or Peak	Height
Vavul or Wayutmala	7,673 feet
Vellaramala	7,362 ,,
Elembilerimala	6,032 ,,
Kurichipandimala	5,271 ,,
Nattavaram hill	4,553 ,,
Mottumala or Manikunnu	4,509 ,,
Pandalur hill	2,002 ,,
Chekkumalai hill	1,970 ,,
Urot mala	1,567 ,,

In addition to the above there are small outlying hills.

Backwaters

11. Kuttiyadi Thura of Badagara taluk and Pookkot lake of South Wynad taluk are the two important lakes of this district.

Soils

12. The soils of this district can be classified into three viz, sandy, laterite and hilly and forest. The sandy soil occurs all along the western side of Badagara, Quilandy, Kozhikode and Tirur taluks. The soil in the midland region of the district is laterite and in the eastern part hilly and forest. The sandy soil varies in texture from sandy loams to pure sand and is highly porous having very little retentive capacity. Paddy and cocoanut are mostly grown in this soil. This soil is extremely deficient in all the major plant foods and lime. Its primary requirement is organic matter. It is highly acidic in reaction. The laterite soil is formed by weathering mainly of acidic rocks under alternate wet and dry tropical conditions. The typical laterite soil is characterised by a versicular structure and the accumulation of hydrated oxides of iron and aluminium. Most of the bases and silica have been removed by drastic leaching. At or near water table the soil material is soft and can be cut into blocks which harden on exposure. This material makes excellent bricks for building purposes. This soil is porous and well drained and has poor retentive capacity and fertility. Where the rainfall is only 70″ to 80″ the soil has not developed into true laterites. There is accumulation of iron and aluminium in such type of soil and it shows many of the properties of laterites. It does not have the versicular structure peculiar to true laterites and cannot be used as building stones. This soil is more fertile than pure laterite soils. All garden-land crops like cocoanut, arecanut and fruit palms etc. are grown in this soil. The hilly and forest soil is characterised by a surface layer of organic matter derived from forest growth. This soil is rich in nitrogen but extremely poor in bases due to heavy leaching. The phosphate content is also very low. When the forests are cleared this soil gradually undergoes laterisation. The soil is particularly suited for plantation crops such as tea, coffee, cardamom and rubber. It is strongly acidic in reaction.

Geology

13. The geological formations met with in the district are four in number viz, (*i*) a belt of crystalline rocks of the Archean group, (*ii*) a belt of residual laterite, (*iii*) a belt of warkalli beds of Tertiary group and (*iv*) a western-most coastal belt of recent deposits. The most extensive rocks are the gneisses. Mica Schists probably of the Dharwar age are exposed at a few places. The Dharwars are represented by garnetiferrous ferruginous quartzite, mica and talc schists and are found exposed in the south-eastern Wynad and north-west of Gudallur. The gneisses of the district probably belong to the peninsular suite. Large exposures of Charnockite of the intermediate type are found near Meppadi and neighbourhood and south and south-east of Kalpatta of South Wynad Taluk. The

biotite granite intrusions at Kalpatta and Sultan's Battery are considered by Dr. H. H. Hayden to be equivalents of the clospet granite. Residual laterite belt is situated to the west of the Archean crystallines. It has been formed as a result of the *in situ* alteration of Crystalline rocks. Warkalli beds (Tertiary formation) consist of a succession of coarse sandstones and variegated clays at times carrying lignitic material. They range in age from upper Miocene to Pliocene. Coastal belt of recent deposits include all marine, lacustrine and alluvial deposits of recent origin.

Economic Minerals

14. Five kinds of economic minerals are seen in this district, viz, clays, limeshell, magnetic iron ores, gold and building stones. Tile clays are worked extensively at Feroke for the manufacture of tile and bricks for which there are several factories functioning on this area. Fairly good varieties of China clay are reported to occur in the South Wynad taluk at Tavinhal, Vythiri, and Chundale. Limeshell is exploited from the Kadalundi river and Korapuzha for lime burning. Magnetic iron ores occur at a number of places such as Nanminda, Cheekilode and Kanniparamba of Kozhikode taluk. Some of these occurrences appear to be commercially workable on a moderate scale. Gold occurs sporadically in a number of places in the Wynad taluk, where some active mining for gold was carried on for a couple of decades in the latter part of the 19th century and early part of the present century. These deposits cannot be economically exploited. Crystalline rocks as well as laterites are extensively used for building purposes. The former is also widely used as road metal.

Climate

15. The climate of this district more or less represents the equatorial conditions. Like other parts of the State this district has also four seasons, the dry weather from December to February, hot weather from March to May, south-west monsoon from June to September and the retreating or north-east monsoon from October to November.

(a) Temperature

16. The average monthly temperature of this district varies approximately between 18°C (64·4°F) and 36°C (96·8°F). The highest temperature recorded during the decade 1951–61 at the Kozhikode Observatory was 36·1°C in the month of May 1952, while the lowest was 18·3°C in the months of December 1953 and December 1956. Three factors contribute to the prevalence of a uniform temperature, viz, (*i*) the superheated condition of the surface soil, (*ii*) the cool seabreezes and the abundance of rain throughout more than half of the year and (*iii*) the process of evaporation.

The highest percentage of mean relative humidity at 8.30 hours was 95 in the month of August 1958 while that for 17.30 hours was 90 in the months of July and August 1961. The lowest percentage of mean relative humidity at 8.30 hours was recorded as 70 in the months of March and April of 1957 and January and March of 1959. At 17.30 hours the lowest percentage of humidity was 60 during the months of December 1953 and January 1958.

(c) Rainfall

18. As stated above the year may be broadly divided into four seasons. The following statement shows the rainfall in millimetres during the above seasons :—

* Data for December relates to the previous year

** Based on available figures relating to the period 1901 to 1950

19. The dry weather season commences by the later half of December and prevails upto February. On an average the rainfall recorded is for 1.9 days in December, 0.7 day in January and 0.4 day in February. The Kozhikode coast receives 33.4 mm, 9.0 mm. and 6.8. mm. of rainfall during the months of December, January and February respectively. During the decade the driest dry weather season was in 1957.

20. The hot weather season begins by the first week of March and lasts up to the second or third week of May. During this season temperature rises rapidly and pressure decreases. The rainfall condition is slightly better during this period when compared to dry weather season. The driest hot weather season was in 1953 during the decade 1951–61.

21. Hot weather season is succeeded by the south-west monsoon period. Monsoon begins by the end of May or by the early days of June and it lasts upto September. " In view of the steady march of temperature and pressure in the earlier months of the year, the sudden 'burst' and its delay until June call for explanation; pressure in June is much the same as in May, and the lower June temperature is itself due to cooling by the rains. The explanation lies, apparently, in pressure conditions over the Indian Ocean as a whole. The SW monsoon when fully deployed is of course fed by the moist SE trades, and their normal goal is the equatorial low; in April, and even into May, a tract of *relatively* high pressure, or at least of slight gradients, persists over the Arabian Sea. This is shown, *inter alia* by the 29·70 May isobar, which runs from Oman to Cutch and then bends S and SE over the Peninsula to the Cauvery Delta. The Arabian Sea in fact lies between two great lows, one over the Punjab and the other over the En Sudan, and winds round the Indian low trend mostly from the NW. Air currents do indeed cross the west coast in May but their relative humidity is much less than that of similar currents in July ".* Clouded skies and about 25 days rainfall in a month are the peculiarities of south-west monsoon. During the decade the wettest south-west monsoon was in 1959 and the mildest in 1952.

22. This season is taken over by the north-east or retreating monsoon. Temperature will slightly go high during this season followed by afternoon thunder showers and storms. This monsoon is locally known as *Thula Varsham*. During the intercensal period *Thula Varsham* was heaviest in 1955 and mildest in 1959.

23. Normal rainfall and rainfall data for the period 1951–61 for Badagara, Kozhikode, Kuttiyadi, Manjeri, Nilambur, Quilandy, Tirurangadi and Vythiri centres are furnished in Appendices 1 and 2. Temperature data recorded at the Kozhikode Observatory is furnished in Appendix 3.

Forests

24. The eastern side of Kozhikode district is covered by thick forests. For administrative purposes they are divided into divisions and ranges. Parts of Kozhikode, Nilambur and Palghat forest divisions fall under the revenue jurisdiction of this district. This is distributed (fully or partly) among nine forest ranges viz, Sultan's Battery, Chethalath, Kuttiyadi, Tamarasseri, Chaliyam, Nilambur North, Nilambur South, Karuvali and Mannarghat East. The forests of this district can be classified into plains deciduous, plateau deciduous, tropical ever-green and semi ever-green. Of these, plains deciduous are confined to the foot of the hills to the west of the Western Ghats, occurring at elevations between 150 and 1,000 feet above the mean sea level. The plateau deciduous is found on the Wynad plateau at elevations between 2,300 feet and 3,500 feet above the mean sea level. The tropical ever-green forests are found at elevations above 1,000 feet and semi ever-green in areas between the ever-green and deciduous forests both in the plains and plateau. During the financial year 1960–61 Kozhikode and Nilambur divisions have produced major and minor products to the tune of Rs. 169·08 lakhs. The table showing the production and value of major and

*India and Pakistan by O.H.K. Spate, Pages 48–49

minor forest produces for the decade 1950–51 to 1960–61 for these divisions are given in Appendix 4.

Land Tenures

25. The Kerala Agrarian Relations Act, 1960, dealing with the tenancies in Kerala as a whole came into force in part on 15th February 1961. But consequent on the decisions of courts on certain questions arising out of this Act, the operation of the Act was suspended by a Proclamation dated 18th December 1962 and the Act was repealed when the Kerala Land Reforms Act, 1963 was enacted. Thus the position with regard to land tenures as on 1st March 1961, the reference date for 1961 Census, is as if the Kerala Agrarian Relations Act, 1960 had not been in force. Subsequently, the Kerala Land Reforms Act, 1963 was passed which vitally affects the tenancies in Kerala. It is, therefore, necessary to give an account of the land tenures as they stood on 1st March 1961 without taking into account the Kerala Agrarian Relations Act, 1960 and as after the enactment of the Kerala Land Reforms Act, 1963.

As on 1st March 1961

Jenmom

26. There are various theories about the origin of *jenmom* right. The traditional account that Sree Parasurama made an entire gift of the land in Kerala to Brahmans has not found acceptance with most of the authorities on the subject. It is, however, evident from the trend of authorities that a considerable portion of the land in Kerala was owned by certain individuals or families among whom were a large number of Namboothiries and Nairs. The Jenmies recognised by the early British administrators of the former Malabar include Brahmans, Nairs, Thiyas and Mukkuvans. The right possessed by the Jenmi over the *jenmom* land is one of ownership in the soil as complete as ever was enjoyed by a free-holder in England. The title of the Jenmi is inherent and the Jenmi is a little territorial sovereign over his land by virtue of this ownership. Barring a few cases, the Jenmies used to let out the *jenmom* land for cultivation to others enjoying only the benefit of rent derived therefrom, the manner of so letting the land varying according to the tenure created.

Inams

27. There are two kinds of *inams*, viz, personal and service *inams*. The former are granted for the support of individuals or families either as reward for the service rendered or as a mark of favour as distinguished from service *inams* granted for future performance or services. The latter are conditional on the performance of future services and as such do not carry with them absolute proprietorship. In respect of most of the personal *inams* the grant carries absolute proprietorship with the right of alienation while in the case of the rest conditions like prohibition of alienation or resumption after the lifetime of the *inam* holder are seen incorporated in the grant. Wherever such conditions are incorporated the *inam* does not confer absolute proprietorship. An *inam* may be granted either by *Sirkar* or by private individuals. In either case there is no difference in the features of the tenure. The following are some of the personal *inams* :—

(a) Anubhogam : This means land given as a *kudiyiruppu* or otherwise to persons belonging to the same caste as that of the grantor bearing a small rent or tax for their maintenance for no service of any description like, for instance, gifts made by a goodwill of the sovereign.

(b) Adima : *Adima* is a grant of land by Rajas or petty chieftains generally made to their domestics for cultivation for personal services, past or future. The *adima* grant for past services is not resumable and the grantee enjoys absolute powers of disposal of the same. There are several kinds of *inams* each distinguished from the other according to the terms of the *inam*. *Gurudakshina*, *rakshabhogam*, *danapramanam*, etc., are some of them.

Kanom

28. *Kanom* means a transfer for consideration in money or in kind or in both by landlord of an interest in specific immovable property to another (called *kanomdar*) for the latter's enjoyment, the incidents of which transfer include

(*a*) a right in the transferee to hold the said property liable for a consideration paid by him or due to him which consideration is called *kanartham*,

(*b*) the liability of the transferor to pay the transferee interest on the *kanartham* and

(*c*) the payment of *michavaram* by the transferee.

The *kanom* tenant enjoys fixity of tenure unless the *kanom* relates to commercial sites or the *kanom* is one, the consideration for which exceeded 40 per cent of the value of the Jenmi's right in the holdings. But, in the case of *kanoms* pertaining to commercial sites the tenant enjoys fixity of tenure if immediately before the commencement of the Malabar Tenancy Act, 1929, the tenant had fixity of tenure in such sites or a right to obtain renewal of his tenancy in respect of it. The landlord enjoys the right of resumption on the termination of the term of the *kanom* for self cultivation and irrespective of the expiry of such term on grounds like denial of the landlord's title, intentional and wilful act of waste and collusively permitting a stranger to encroach upon the land. On the termination of the

term of the *kanom* the landlord can evict the tenant for self cultivation by the landlord's *tarwad, thavazhi,* etc., for *bona fide* purpose of constructing a building for landlord's *tarwad, thavazhi,* etc., and for the extension of a Temple, Mosque, Church or other places certified by the Collector of the district where the landlord is the trustee thereof. The eviction in these cases shall not apply to the holding or that portion of a holding which consists of *kudiyiruppu* or protected *ulkudi.* The tenant has a right to sue for restoration of the holding if the land is not used for the purpose for which the eviction was sought within a specified period.

Kanom-Kuzhikanom

29. This means and includes a transfer by a landlord to another (called *kanom-kuzhikanomdar*) of garden lands or other lands or of both with fruit-bearing trees, if any, standing thereon at the time of transfer for the enjoyment of those trees and for the purpose of planting such fruit-bearing trees thereon. The incidents of such transfer include

(*a*) a right in the transferee to hold the said land liable for the consideration paid by him or due to him which consideration is called *kanartham* and

(*b*) the liability of the transferor to pay the transferee interest on the *kanartham* unless otherwise agreed to by the parties. The incidents of this tenure are the same as in the case of *kanom.*

Kuzhikanom

30. *Kuzhikanom* means and includes a transfer by the landlord to another called *kuzhikanomdar* of garden lands or other lands or both with the fruit-bearing trees, if any, standing thereon at the time of transfer for the enjoyment of those trees and for the purpose of planting such fruit-bearing trees thereon. The incidents of this tenure are the same as in the case of *kanom-kuzhikanom.*

Customary Verumpattom

31. Customary *verumpattomdar* means any *verumpattomdar,* who, before the commencement of the Malabar Tenancy (Amendment) Act, 1951 (Madras Act XXXIII of 1951), was entitled by the custom of the locality in which the land was situated to possession of the land for definite period of years and for whose continuance thereon, after termination of that period, for a further period a renewal fee had to be paid to the landlord as an incident of the tenure and customary *verumpattom* is the holding of the customary *verumpattomdar.* The incidents of this tenure are the same as in the case of *kanom.*

Kudiyiruppu

32. *Kudiyiruppu* means and includes the site of any residential building, the site or sites of other buildings appurtenant thereto, such other lands as are necessary for the convenient enjoyment of such residential building and the easements attached thereto, but does not include an *ulkudi.* The tenant enjoys fixity of tenure. The tenancy right is heritable and transferable if the tenant is actually cultivating the land. The tenant is evictable on the grounds mentioned for *kanom* and in addition, on the non-payment of rent within 3 months of the due date. He enjoys a right of purchase from the landlord if the *kudiyiruppu* has been occupied for not less than 10 consecutive years.

Separate Kudiyiruppu

33. A separate *kudiyiruppu* means a *kudiyiruppu* which is the sole property comprised in a holding. The rights of the tenant are the same as in the case of a tenant in *kudiyiruppu.*

Separable Kudiyiruppu

34. This means a *Kudiyiruppu* which is included with other property in a holding and which is not necessary for the convenient enjoyment as usual of any other part of the holding. The rights of the tenant are the same as that of a tenant in the case of a separate *kudiyiruppu.*

Cultivating Verumpattom

35. *Verumpattomdar* means a tenant other than a *kanomdar, kanom-kuzhikanomdar* or *kuzhikanomdar* of a holding for agricultural purposes. Cultivating *verumpattomdar* in respect of a holding means any *verumpattomdar* who not being a *jenmi,* intermediary or customary *verumpattomdar* of that holding has, expressly or impliedly, contracted to cultivate the lands in that holding and is actually cultivating the same. Cultivating *verumpattom* means a holding of a cultivating *verumpattomdar.* The tenant enjoys the same rights as the holder of a *kudiyiruppu* except the right of purchase.

Ulkudi

36. This means a hut in any portion of a land in the occupation of a person who has been permitted by the person entitled to possession of such land to occupy the hut and who otherwise has no interest in such land. He has no fixity of tenure.

Protected Ulkudi

37. This is an *ulkudi* which has been in the continuous occupation of the holder or any member of his *tarwad, thavazhi, illom, kudumbakavaru* or family for not less than one year. The tenant enjoys fixity of tenure.

After the enactment of the Kerala Land Reforms Act, 1963

38. The Kerala Land Reforms Act, 1963, repealed the Kerala Agrarian Relations Act, 1960, the Malabar

Tenancy Act, 1929, the Cochin Verumpattomdars Act, VIII of 1118, the Madras Cultivating Tenants (Payment of Fair Rent) Act, 1956 and the Travancore-Cochin Prevention of Eviction of *kudikidappukars* Act, 1955 and enacted a single statute governing the relationship between landlord and tenant throughout the State.

Exemptions from the provisions regarding tenancies.

39. Subject to certain provisos, the provisions regarding tenancies in this Act are not applicable to (i) leases of lands or buildings or both belonging to or vested in the Government of Kerala or the Government of any other State in India or the Government of India or a local authority or a Corporation owned or controlled by any of the above Governments, (ii) leases only of buildings and the site thereof with the land, if any, appurtenant thereto, (iii) leases of land or of buildings or of both specifically granted for industrial or commercial purposes, (iv) tenancies of land or buildings or of both created by the Administrator-General or the Official Trustee or an Official Receiver or officer appointed by a Court of Wards, or by any person holding under or deriving titles from any of the officers or the court, (v) tenancies in respect of land or buildings or of both created by mortgagees in possession or by persons deriving title from such mortgagees except a cultivating tenant holding land in the taluks of Hosdrug or Kasaragod to which the Malabar Tenancy Act, 1929, did not extend under a lease granted before 15th February 1961 by a usufructuary mortgage as defined in the Transfer of Property Act, 1882, (vi) tenancies in respect of land or of buildings or of both created by persons having only life interest or other limited interest in it, (vii) leases of private forests except where a person was entitled to fixity of tenure immediately before 21st January 1961 under any law then in force, (viii) tenancies in respect of plantations exceeding thirty acres in extent, (ix) tenancies in respect of *kayal patasekharams* of Kuttanad area specified in Schedule IV of the Act so long as such *patasekharams* are used for the cultivation of paddy or such other crops as may be notified by Government, (x) tenancies in respect of sites, tanks and premises of any temple, mosque or church including sites on which religious ceremonies are conducted and sites of office buildings and other buildings attached to such temple, mosque or church created by the owner, trustee or manager of such temple, mosque or church, (xi) lands transferred for felling trees and (xii) any transaction relating only to the usufruct of trees or to the tapping of cocoanut or other palm-trees or to the tapping of rubber trees. The exemption mentioned above in respect of Government leases is subject to the proviso that in the case of *kandukrishi* lands sub-leased by a tenant holding such lands under Government, the provisions of sections 13 to 26 of the Act shall, so long as the lease granted by the Government subsists, apply to the tenants holding under the sub-lease as they apply to tenants holding lands other than Government lands. In respect of the exemption relating to tenancies created by the Administrator-General etc. mentioned above, the exemption shall cease to apply to any tenancy created by the Court of Wards, where the landlord on whose behalf the tenancy was created does not terminate the tenancy by a registered notice within a period of six months from the date on which the property was released from the superintendence of the Court of Wards. Provisions of sections 13 to 26 of the Act, relating to fixity of tenure will apply to exemptions granted to tenancies created by mortgagees in possession or by persons deriving title from such mortgagees or by persons having only life interest or other limited interest in the land or buildings or both so long as the mortgage or the life interest or other limited interest subsists. Where a tenancy is created by a *nissanthathikavaru* as defined in the Madras *aliyasanthana* Act, 1949, in respect of lands or buildings or both over which the *nissanthathikavaru* has only a life interest the exemption will apply only regarding Sections 53 to 72 and not others governing tenancies. In the case of tenancies in respect of agricultural lands which are treated as plantations under sub-clause (*c*) of Section 44 of Section 2 of the Act the exemption referred to supra shall apply only to Sections 53 to 72 of the Act. Provisions of Sections 4 to 52, 73 and 74 of the Act will apply to tenancies in respect of *kayal patasekharams* of the Kuttanad area in spite of the exemption mentioned about them supra. The Government are also given limited powers of exemption under the Act.

The Scope and Objects of the Act

40. The main objects of the Kerala Land Reforms Act, 1963 are :—

(1) To confer fixity of tenure on tenants ;
(2) To fix the fair rent in respect of a holding ;
(3) To confer the right of purchase of the landlords' rights, title and interest on the cultivating tenants ;
(4) To define the rights and liabilities of *kudikidappukars* ; and
(5) To place a ceiling on the ownership and possession of land and provide for the disposal of excess land

There are also some provisions of secondary importance in addition to the above.

Fixity of Tenure—Tenants and tenancies

41. For a proper appreciation of the provisions relating to tenancies as a whole the definitions of tenants and tenancies are of supreme importance. A tenant means any person who has paid or has agreed to pay rent or other consideration, for his being allowed by another to possess and enjoy the land of the latter, and includes an intermediary, a *kanomdar*, a *kanom-kuzhikanomdar*, a *kuzhikanomdar*, a *mulgenidar*, a *verumpattomdar* of any description (including a customary *verumpattomdar*), the holder of a *chalgeni* lease, the holder of a *kudiyiruppu*, the holder of a *vaidageni* lease, an *odacharthudar* or a person claiming under an *odacharthudar* who was actually cultivating on the 11th day of April 1957 and was continuing to cultivate at the commencement of this Act the land or any portion of the land to which the *odacharthu* relates, a mortgagee with possession of immovable property situate in Cochin if the property comprised in the mortgage consists of agricultural land other than planted with rubber, coffee, tea or cashew and the interest on the mortgage amount is less than forty per cent of the total rent fixed in the mortgage document, a mortgagee with possession of immovable property situate in Cochin if the property comprised in the mortgage consists of agricultural land, he was by himself or through any member of his family or *tarwad* holding the property comprised in the mortgage as a *verumpattomdar* on or after 1st *Chingom* 1111 and the *verumpattom* was terminated after 1st *Chingom* 1111 and before the commencement of this Act but he continued in possession of the property without interruption by himself or through any member of his family or *tarwad*, as a mortgagee with possession from the date of such termination till the commencement of this Act, any person who, on 11th April 1957 was continuously in occupation of the land of another situate in Malabar for not less than two years, honestly believing himself to be tenant and continued to be in occupation of such land at the commencement of this Act, any person who, by virtue of the provisions of Section 6 of the Kerala Stay of Eviction Proceedings Act, 1957, was entitled to cultivate any *nilam* after 11th April 1957 and was cultivating the *nilam* at the commencement of this Act, a tenant who, on or after 11th April 1957, was holding land less in extent than the ceiling area and had executed a deed surrendering his leasehold right to the landlord but had not actually transferred possession of the land to the landlord before the commencement of this Act, a *punam* or *kumri* cultivator, a licensee in Kuttanad area, a *varamdar*, a *vechupa-kuthidar* and a person holding land situate in any part of the Hosdrug or Kasaragod taluks to which the Malabar Tenancy Act, 1929, did not extend under a transaction described in the document evidencing it as *bhogya*, *otti*, *nattotti*, *arwar*, *illidarwar* or *krithasartha illidarwar* but not being a usufructuary mortgage as defined in the Transfer of Property Act, 1882. Where, in a document, a person is described as a *sambalapat-tomdar*, *sambalachittudar* or *coolipattomdar* in respect of any *nilam* situate in the Palghat district, he shall be presumed to be a tenant unless it is proved that he has not undertaken any risk of cultivation. A 'Cultivating tenant' means a tenant who is in actual possession of, and is entitled to cultivate, the land comprised in the holding. *Kanom* means the transfer for consideration, in money or in kind or both, by a landlord of an interest in specific immovable property to another person for the latter's enjoyment, whether described in the document evidencing the transaction as *kanom* or *kanapattom* the incidents of which transfer include :—

(*a*) a right in the transferee to hold the said property liable for the consideration paid by him or due to him ;

(*b*) the liability of the transferor to pay to the transferee interest on such consideration unless otherwise agreed to by the parties ; and

(*c*) payment of *michavaram* or customary dues or renewal on the expiry of any specified period,

and in areas other than Malabar, includes such transfer of interest in specific immovable property which is described in the document evidencing the transaction as *otti*, *karipanayam*, *panayam*, *nerpanayam* or by any other name and which has the incidents specified in sub-clauses (*a*) and (*b*) above and also the following incidents :—

(*i*) renewal on the expiry of any specified period and

(*ii*) payment of customary dues. *Kanapattom* or any other demise governed by the Travancore Jenmi and Kudiyan Act of 1071 or the Kanom Tenancy Act, 1955, is not a *kanom* for the purposes of this Act. Where there has been no stipulation in the document evidencing the transaction for renewal on the expiry of any specified period, but there has been a renewal or payment of renewal fees, it shall be deemed that there had been a provision for such renewal in the document. *Kanom kuzhika-nom* means and includes a transfer by a landlord to another person of garden lands or of other lands or of both, with the fruit-bearing trees, if any, standing thereon at the time of the transfer, for the enjoyment of

those trees and for the purpose of planting such fruit-bearing trees thereon, the incidents of which transfer include:—

(*a*) a right in the transferee to hold the said lands liable for the consideration paid by him or due to him, which consideration is called *kanartham*, and

(*b*) the liability of the transferor to pay to the transferee interest on the *kanartham* unless otherwise agreed to by the parties. A usufructuary mortgage as defined in the Transfer of Property Act, 1882 (Central Act 4 of 1882) is not a *kanom kuzhikanom*. *Kudiyiruppu* means a holding or part of a holding consisting of the site of any residential building, the site or sites of other buildings appurtenant thereto, such other lands as are necessary for the convenient enjoyment of such residential building and easements attached thereto but does not include a *kudikidappu*. *Kuzhikanom* means and includes a transfer by a landlord to another person of garden lands or other lands or of both with the fruit-bearing trees, if any, standing thereon, at the time of the transfer, for the enjoyment of those trees and for the purpose of planting such fruit-bearing trees thereon but shall not include a usufructuary mortgage as defined in the Transfer of Property Act, 1882. "*Punam* or *kumri* cultivation" means fugitive or intermittent cultivation of paddy on dry lands in Malabar and "*punam* or *kumri* cultivator" means a person who has raised crops by *punam* or *kumri* cultivation in any year between 1953 and 1959 and where there are successive cultivators in respect of the same land the cultivator who raised crops last by such cultivation during the said period. "Holder of a *chalgeni* lease" means a lessee or sub-lessee of specific immovable property situate in the taluk of Hosdrug or Kasaragod in the district of Cannanore who has contracted either expressly or impliedly to hold the same under a lease, whether for a specified period or not. "*Mulgeni*" means a tenancy in perpetuity at a fixed invariable rent created in favour of a person called *mulgenidar*. *Vaidageni* means a lease for a term of years. *Varam* means an agreement for the cultivation of *nilam* with paddy and sharing the produce made between the owner and the person who undertakes cultivation under such arrangement and includes the arrangements known as *pathivaram*, *pankuvaram* and *bankupattom*; and *varamdar* means the person who undertakes cultivation under a *varam* agreement. *Vechupakuthy* means a transaction whereunder a landowner permits another person to be in joint possession with him of any land with the following stipulations:—

(*i*) *Vechupakuthidar* shall improve the land within a specified period;

(*ii*) at the end of the period so specified

(*a*) the land shall be partitioned between the land owner and the *vechupakuthidar*;

(*b*) upon such partition all the rights of either party over the portion of the land set apart for the other shall stand transferred to and vest in the other; and

(*iii*) during the period between the date of the transaction aforesaid and the partition of the land the *vechupakuthidar* shall pay to the land owner such rent as may be specified. *Verumpattomdar* means a lessee or sub-lessee of immovable property, whether called *verumpattomdar* or *venpattomdar* who has expressly or impliedly contracted to hold the same under a lease with or without security for rent and includes a *tharikuthukaran* in the Palghat district but does not include a *kanomdar*, a *kanom-kuzhikanomdar* or *kuzhikanomdar*. "Customary *verumpattomdar*" means any *verumpattomdar* of immovable property situate in any area to which the Malabar Tenancy Act, 1929, extended, who before the commencement of the Malabar Tenancy (Amendment) Act, 1951, was entitled by the customs of the locality in which the land was situated to possession of the said land for a definite period of years, and for whose continuance thereon, after the termination of that period, for a further period, a renewal fee had to be paid to the landlord as incident of the tenure.

Fixity of Tenure

42. The Act confers fixity of tenure on every tenant in respect of his holding except where the tenant holds under a landlord who is a member of the armed forces or is a seaman if the tenancy was created by such landlord within a period of three months before he became a member of the armed forces or seaman or where the tenant holds under the legal representative of the landlord. Resumption is allowed in the following cases:—

(*a*) For the purpose of extending a place of public religious worship provided the Collector of the district certifies that the same is so needed;

(*b*) For the *bona fide* purpose of constructing a building for the residence of a landlord (other than a *sthani* or the trustee or owner of a place of public religious worship) or any member of his family;

(*c*) For the *bona fide* purpose of cultivation by the landlord (other than a *sthani* or the trustee or the owner of a place of public religious worship) or any member of his family;

(*d*) In respect of agricultural lands interspersed within the boundaries of the area cultivated with plantation crops, where such holding or part thereof is necessary for the purposes of plantation ; and

(*e*) If the tenant of the agricultural lands mentioned under (*d*) above wilfully commits any act of material waste in the plantation.

In the case of (*b*) above resumption is allowed only up to 20 cents where resumption is sought on behalf of one person and up to 50 cents where it is sought on behalf of two or more persons. The total extent of land in the possession of the landlord shall not be raised above five standard acres and the total extent of land in the possession of the tenant shall not be reduced below 20 cents in the case of such resumptions. Any land held by a member of a Scheduled Caste or Scheduled Tribe as tenant is exempted from such resumption. In the case of resumption under (*c*) above the total extent of land in the possession of the landlord shall not be raised above the ceiling area and the total extent of land in the possession of the cultivating tenant shall not be reduced below the ceiling area by such resumption. The resumption is allowed only from a tenant who is in possession of land above the ceiling area. A small holder (other than a *sthani* or the trustee or owner of a place of public religious worship) is however, allowed to resume from his tenant a portion of the holding not exceeding one half provided that by such resumption the total extent of land in the possession of the small holder shall not be raised above four standard acres or four acres in extent whichever is greater and that except as provided in sub-sections (2) and (3) of section 53 of the Act no land shall be resumed from a tenant who was entitled to fixity of tenure in respect of his holding immediately before 21st January 1961 under any law there in force. A " Small holder " means a landlord who does not have interest in land exceeding eight standard acres or 24 acres in extent, whichever is less, as owner, intermediary or cultivating tenant or in two or more of the above capacities so however that the extent of non-resumable land in his possession as owner or as cultivating tenant, or partly as owner and partly as cultivating tenant does not exceed four standard acres or four acres in extent whichever is greater. A person who was in possession of, or had interest in land exceeding the limits mentioned above before 1st December 1957 but such extent of land was reduced to the said limits or below by partition or transfer effected after the above date shall not be deemed to be a small holder nor shall such partition or transfer entitle the allottee or transferee to exercise the rights of a small holder in respect of the land allotted or transferred to him. No resumption of a *kudiyiruppu* is allowed whether it is sought by smallholder or not. Subject to certain exemptions a time limit of one year from the commencement of the Act has been fixed for preferring applications for resumption. The Act also contains provisions for the grant of compensation for improvements and solatium to the tenant from whom any land is resumed.

43. An application for restoration by a cultivating tenant from whom land was resumed for construction of a residential building or for personal cultivation or on the ground of the land being necessary for purposes of plantation will lie if within three years of such resumption the person who resumed the land fails without reasonable excuse to use the land for the purpose for which it was resumed. The restoration is allowed only subject to certain limitations enjoined by the Act.

Fair Rent

44. The fair rent in respect of a holding is the rent payable by the cultivating tenant to his landlord and it shall be the rent calculated at the rates specified in Schedule III applicable to the class of lands comprised in the holding, or the contract rent, whichever is less. When the fair rent in respect of a holding has been determined under any law in force immediately before 21st January 1961, the fair rent so determined shall be deemed to be the contract rent. Where a cultivating tenant or an intermediary is holding under a small holder, the fair rent shall, at the option of the small holder, be the rent calculated at the rates specified in Schedule III applicable to the class of lands comprised in the holding ; or where the fair rent in respect of the holding has been determined under any law in force immediately before 21st January 1961 such fair rent, or, where the fair rent has not been so determined 75 per cent of the contract rent. The fair rent payable by a cultivating *kanomdar* or a cultivating customary *verumpattomdar* shall not exceed the *michavaram* payable by such *kanomdar* or the rent payable by such customary *verumpattomdar* as the case may be. Where any land included in a holding is set apart for communal purposes and is used for such purposes, the extent of the land so set apart shall not be taken into account in fixing the fair rent of such holding. The cultivating tenant or any landlord may apply in the prescribed form to the Land Tribunal for determining the fair rent in respect of a holding. Where in respect of a holding there is an intermediary at the commencement of this Act and as a result of the determination of the fair rent there has been a reduction or increase in

the rent payable by the cultivating tenant, the rent payable by the intermediary to his landlord shall be reduced or increased in the same proportion as the rent to which he was entitled was reduced or increased. The landlord and the tenant are competent to agree as to what shall be the fair rent payable and where such an agreement is filed with the Land Tribunal, the latter shall pass orders determining such agreed rent as the fair rent. Where the rent payable has not been determined by the Land Tribunal, the landlord shall be entitled to receive and the tenant shall be bound to pay the rent that was payable immediately before the commencement of this Act. In the case of a *varomdar* such rent shall mean the average of the share of the landlord in the produce for the three years immediately preceding such commencement, or, where the *varomdar* was not cultivating the land continuously for the said period of three years, the share of the landlord for the year in which the *varomdar* cultivated the said land immediately before such commencement. Where there has been a damage to, or failure of crops, owing to causes beyond the control of the tenant in any holding, the tenant shall be entitled to a remission of the rent payable by him in proportion to the extent of such damage or failure. The remission is to be ordered by the District Collector or any other officer authorised by Government by notification in the Gazette.

Purchase of Landlords' rights by cultivating tenants.

45. The Act enables the cultivating tenants entitled to fixity of tenure to purchase the landlords' rights in the holding. The provisions in this respect have, however, not yet been enforced. A summary of the salient provisions in this respect is given below.

A cultivating tenant (including the tenant of a *kudiyirippu*) who is entitled to fixity of tenure under section 13 is also entitled to purchase the right, title and interest of the land owner and the intermediaries, if any, in respect of the land comprised in the holding provided he or the family of which the cultivating tenant is a member does not own an extent of land not less than the ceiling area. Where he or the family of which he is a member owns land less than the ceiling area the right of purchase is allowed only to the extent of land as will, together with the land already owned, make up the ceiling area. If the landlord is entitled to resume any portion of the holding and he applies for such resumption the right of purchase will extend only to the remaining area. Where the land owner or an intermediary is a small holder and the cultivating tenant was entitled to fixity of tenure immediately before 21st January 1961 under any law then in force the cultivating tenant shall not be entitled to purchase the right, title and interest of the land owner and the intermediaries unless the cultivating tenant agrees in writing that the small holder may exercise the right of resumption in respect of the holding under section 17. In the event of such agreement the small holder shall, notwithstanding any thing contained in the second proviso to section 17 and notwithstanding the expiry of the period fixed under clause (1) of section 18 for making application for resumption, be entitled to exercise the right of resumption and the cultivating tenant shall be entitled to purchase the right, title and interest of the landowner and the intermediaries in respect of the remaining part of the holding left after resumption. An application for the purchase of landlord's right shall be made by the cultivating tenant to the Land Tribunal. The purchase price payable by the cultivating tenant shall be the aggregate of:—

(*i*) sixteen times the fair rent in respect of the holding or part thereof to which the purchase relates;

(*ii*) the value of structures, wells and embankments of a permanent nature belonging to the land owner or the intermediaries if any, and

(*iii*) one half of the value of the timber trees belonging to the land owner or intermediaries, if any. The Act provides for the apportionment of such price between the landlord and intermediaries, if any. The Land Tribunal shall pass orders, where the purchase is to be allowed, allowing the application for purchase and specify details relating to the purchase price, the value of encumbrances etc., and the amount payable to the land owner and each of the intermediaries after deducting the value of the encumbrances or the claim for maintenance or alimony. The purchase price shall be payable in sixteen equal instalments. But where the purchase price is less than Rs. 160 the number of instalments shall be so fixed by the Land Tribunal that the amount payable in each instalment shall not be less than Rs. 10. It shall be open to the cultivating tenant to pay the entire price in a lump in which case the amount payable shall be only 75 per cent of the purchase price. The purchase price payable will bear interest at 4½ per cent per annum from the date on which the right, title and interest from the land owner and intermediaries vested in the cultivating tenants. Where the purchase price is paid in instalments the second and subsequent instalments shall be deposited together with interest on the amount outstanding on the date of deposit. A cultivating tenant shall be liable to pay rent to his landlord until he makes the deposit.

46. Where in respect of a holding the land owner

or the intermediary is a religious, charitable or educational institution of a public nature such institution is given the option to choose as to whether the right, title and interest of the institution in respect of the holding may be permitted to be purchased from the institution by the cultivating tenant on payment of the purchase price or such right, title and interest should be vested in the Government in consideration of the payment of an annuity in perpetuity by the Government. The annuity payable to the institution in the latter case shall be a sum equal to the annual rent which the institution was entitled to receive immediately before 21st January 1961 after deducting 2½ per cent thereof by way of collection charges. Where in respect of a holding held by a tenant referred to in sections 4, 5, 6, 7, 8, 9, 10 or 11 there was no stipulation for payment of any rent immediately before 21st January 1961 the annuity shall be an amount equal to 4½ per cent of 16 times the fair rent in respect of the holding. The Government shall pay the annuity payable to the institution every year in perpetuity. Where, however, the right, title and interest of the institution are subject to any encumbrance the value of the encumbrance shall be paid to the holder of the encumbrance and 5 per cent of the value of the encumbrance shall be reduced from the annuity and the balance, if any, alone shall be paid to the institution.

47. Where the value of the encumbrance is more than 20 times the annuity if there is only one encumbrance 20 times the annuity shall be paid to the holder of the encumbrance and if there are more than one encumbrance 20 times the value of encumbrances shall be paid to the holders thereof in their order of priority and no amount by way of annuity shall be payable to the institution. The filing of an application by a religious, charitable or educational institution of a public nature under sub-section (*i*) of section 66 or the vesting of the right, title and interest of the institution in the Government under sub-section (5) of section 66 of the Act, shall not affect the right of the cultivating tenant to purchase such right, title and interest in accordance with the provisions 53–64 of the Act already referred to. Where a cultivating tenant does not apply for a purchase of the right, title and interest vested in the Government under section 66 the tenant holding directly under the religious, charitable or educational institution of a public nature shall continue as tenant under the Government. The Act contains provisions for scaling down the arrears of rent in accordance with the schedule given under Section 73. After the commencement of this Act no tenancy shall be created in respect of any land. But where any land owner is a minor or a widow or an unmarried woman or a divorced woman or a person incapable of cultivating the land by reason of any physical or mental disability or a serving member of the armed forces or seaman such person may create a tenancy, but the tenant shall not be entitled to a right to purchase. Any tenancy created in contravention of the above provision shall be invalid.

Rights and liabilities of Kudikidappukars

48. A *kudikidappukaran* means a person who has neither a homestead nor any land as owner or as tenant in possession, on which he could erect a homestead and—

(*i*) who has been permitted with or without an obligation to pay rent by a person in lawful possession of any land to have the use and occupation of a portion of such land for the purpose of erecting a homestead; or

(*ii*) who has been permitted by a person in lawful possession of any land to occupy, with or without the obligation to pay rent, a hut belonging to such person and situate in the said land but otherwise has no interest in the land; and

kudikidappu means the land or the homestead or hut so permitted to be erected or occupied together with the easements attached thereto. A person shall not be deemed to be a *kudikidappukaran* if the aforesaid permission was granted after the 11th of April 1957 by a mortgagee in possession or by a tenant from whom the land in which the *kudikidappu* is situate is liable to be resumed. A person shall not also be deemed to be a *kudikidappukaran* if the permission was granted in respect of any hut not belonging to him and situate in a plantation or in any area of land which is appurtenant to a mill, factory or workshop and in connection with the employment of such person in the plantation, mill, factory or workshop unless he was, immediately before the commencement of the Act, entitled to the rights of a *kudikidappukaran* or the holder of a protected *ulkudi* or *kudikidappu* under any law then in force. A hut means any dwelling house which was constructed at a cost not exceeding Rs. 400 or could have at the time of construction yielded a monthly rent not exceeding Rs. 4. Any person who was in occupation of a *kudikidappu* on the 11th day of April 1957 and who continues to be in such occupation at the commencement of the Act shall be deemed to be in occupation of such *kudikidappu* with permission as required above. Also, where any *kudikidappukaran* secures any mortgage with permission over the land in which the *kudikidappu* is situated his *kudikidappu*

right shall revive on the redemption of the mortgage, provided that he has at the time of the redemption neither a homestead nor any land, either as owner or as tenant in possession, on which he could erect a homestead. No *kudikidappukaran* shall be evicted from his *kudikidappu* except on the ground that he has alienated his right of *kudikidappu* to another person or he has rented or leased out his *kudikidappu* to another person or he has ceased to reside in the *kudikidappu* continuously for a period of two years or he has another *kudikidappu* or has obtained ownership and possession of land for erecting a homestead. A *kudikidappukaran* shall not be deemed to have ceased to reside in a *kudikidappu* notwithstanding the fact that he was not actually residing therein if any of his near relatives viz, husband or wife, children, grantchildren, father, mother, brother or sister who was residing with him in the *kudikidappu* for a continuous period of not less than one year continues to reside in the *kudikidappu*. A person in possession of the land on which there is a homestead or hut in the occupation of a *kudikidappukaran* may, if he *bona fide* requires the land for building purpose for himself or any member of his family including major sons and daughters or for purposes in connection with a town planning scheme approved by the competent authority or for any industrial purpose require the *kudikidappukaran* to shift to a new site belonging to him subject to the following conditions:—

(*i*) The land owner shall pay to the *kudikidappukaran* the price of the homestead if any erected by the *kudikidappukaran*;

(*ii*) the new site shall be fit for erecting a homestead and shall be within a distance of one mile from the existing *kudikidappu*;

(*iii*) the extent of the new site shall be the extent of the *kudikidappu* subject to a minimum of 3 cents and a maximum of 10 cents; and

(*iv*) the land holder shall transfer ownership and possession of the new site to the *kudikidappukaran* and shall pay him the reasonable cost of shifting the *kudikidappu* to the new site.

Where the above conditions are complied with the *kudikidappukaran* shall be bound to shift to the new site.

49. Where a person does not hold more than 25 cents of land and there is a hut in the occupation of a *kudikidappukaran* on such land, he may, if he requires the land occupied by such hut for constructing a building for his own residence apply to the Government for acquisition of land to which the *kudikidappu* may be shifted whereupon Government after collecting the cost of acquisition from the applicant may acquire the land and give possession of the land to the *kudikidappukaran* and require him to shift to the said land. The *kudikidappukaran* shall then be bound to shift to the new site. But he will be entitled to the expenses as determined by an officer authorised by Government to be reasonably required to shift to the new site. The site acquired for the purpose shall be subject to a minimum of 3 cents and a maximum of 10 cents. Again, where the owner of the land in which there is a *kudikidappu* considers that the *kudikidappu* is so located as to cause inconvenience to him he may require the *kudikidappukaran* to shift to another part of his land provided that the site to which the *kudikidappu* is required to be shifted is fit for the location of the *kudikidappu* and the owner of the land transfers to the *kudikidappukaran* ownership and possession of land equal to the extent of the existing *kudikidappu* subject to a minimum of 3 cents and a maximum of 10 cents and pay the price of the homestead if any erected by the *kudikidappukaran* and the cost of shifting the *kudikidappu*. The Act scales down the arrears of rent payable by a *kudikidappukaran* to one year's rent or the actual amount in arrears whichever is less and fixes the maximum of the future rent.

Restriction on ownership and possession of land in excess of ceiling area and disposal of excess lands.

50. The next salient provisions of the Act relate to the ceiling of ownership and possession of land and the disposal of excess lands. These provisions have not been enforced so far. Subject to the exemptions given under section 81 of the Act the ceiling area of land has been fixed to be 12 standard acres in the case of an adult unmarried person or a family consisting of not more than 5 members; and 12 standard acres increased by one standard acre for each member in excess of five, so, however that the total extent of ceiling area shall not exceed 20 standard acres in the case of a family consisting of more than five members. The ceiling area shall in no case be less than 15 acres in extent or more than 36 acres in extent. All the lands owned or held individually by the members of a family or jointly by some or all of the members of such family shall be deemed to be owned or held by the family. In calculating the extent of land owned or held by a family or an adult unmarried person the shares of the members of the family or the adult unmarried person, as the case may be, in the lands owned or held by a co-operative society or by an institution or by a joint family shall be taken into account. Where a person has two or more legally wedded wives living, the husband, one of the

wives named by him for the purpose and their unmarried minor children shall be deemed to be one family; and the other wife or each of the other wives and their unmarried minor children shall be deemed to be a separate family. An adult unmarried person shall include a divorced husband or divorced wife who has not remarried, provided that if such divorced husband or divorced wife is the guardian of any unmarried minor child, he or she together with such unmarried minor child shall be deemed to be a family. It shall be lawful for any adult member in a family to own or hold land in excess of the ceiling area to the extent necessary to make up the ceiling area of his lineal descendants other than his minor unmarried children who are alive on the date notified under sub-section (*i*) of section 83 and who would inherit his lands on his death provided that the aforesaid adult member shall take into account all acquisitions of lands or interests in land made by such lineal descendants or the members of their families for fixing the total extent that such adult member shall be entitled to own or hold from time to time and shall be bound to surrender the excess. In the case of lineal descendants who are members of other families the ceiling area shall be that applicable to their families. Where a family or an adult unmarried person owns or holds land in excess of the ceiling area on the notified date such excess land shall be surrendered by the person who is competent to do so within such time and to such authority as may be prescribed. Where, however, any person who *bona fide* believes that the ownership or possession of any land owned or held by him or by the members of his family is liable to be purchased by the cultivating tenant or to be resumed by the land owner or the intermediary under provisions of this Act, the extent of the land so liable to be purchased or to be resumed shall not be taken into account in calculating the extent of land to be surrendered. The Land Board is to finally determine the extent of land liable to be surrendered. Where ownership or possession or both of any land is surrendered by or assumed from a person or is vested in the Government under section 86 or 87 such person shall be entitled to compensation. Where the rights of an intermediary are extinguished, such intermediary shall also be entitled to compensation. The compensation payable to an owner for the surrender or assumption of ownership and possession of land shall be 55 per cent of the market value of the land and improvements, if any, thereon. The compensation payable to the land owner, the intermediary or cultivating tenant for the surrender, assumption, vesting in the Government or extinguishment of their rights shall be the portion of 55 per cent of the market value of the land and improvements, if any, thereon that will fall to his share if such values are apportioned among the land owner, cultivating tenant and intermediary, if any, in respect of the land according to the following provisions :—

(1) the portion of the compensation for any building or other improvements shall be set apart to the person to whom such building or other improvement belongs ;

(2) ninety per cent of the portion of the compensation for the site of any homestead or hut in the occupation of a *kudikidappukaran* shall be deducted from the total amount of compensation ;

(3) the balance remaining after deducting the amounts referred to in clauses (*i*) and (*ii*) shall be apportioned among the land owner, the intermediaries and the cultivating tenant in proportion to the profits derivable by them from the land immediately before the surrender, assumption or vesting in the Government, as the case may be. " Profits derivable from the land " shall be deemed to be equal to (*i*) in the case of a land owner, the rent which he was entitled to get from the tenant holding immediately under him ; (*ii*) in the case of an intermediary, the difference between the rent which he was entitled to get from his tenant and the rent for which he was liable to his landlord ; and (*iii*) in the case of a cultivating tenant, the difference between the net income and the rent payable by him. The rent payable by the cultivating tenant and the intermediary for this purpose shall be as calculated under the provisions of this Act.

(4) Where a mortgagee in possession surrenders possession of the land mortgaged to him,—

(*i*) where the ownership of the land mortgaged has been surrendered by the owner of the land, the mortgagee shall be treated as a holder of an encumbrance in respect of the land, and the encumbrance shall be discharged as provided in sections 91 and 92 ;

(*ii*) in other cases, the Government shall pay to the mortgagee the amount to which he would have been entitled under clause (*i*) if the ownership of the land mortgaged had been surrendered to the Government, and hold the land as mortgagee with possession with all the rights and liabilities of the mortgagee.

51. The compensation or the amount of encumbrance, as the case may be, shall be paid either in cash or negotiable bond redeemable in 16 years and carrying interest at the rate of 4½ per cent per annum with effect from the date on which the ownership or possession or both of the land has or have vested in the

Government under section 86 or section 87 or partly in cash and partly in such bonds in such manner as may be prescribed. The Act also makes provision for payment of advance towards compensation. Where the land owner whose ownership of land is vested in the Government or the intermediary whose rights are extinguished under sub-section 4 of section 86 was a small holder and the cultivating tenant of the holding was entitled to fixity of tenure immediately before 21st January 1961 under any law then in force the ownership or possession or both of such land vested in the Government shall be assigned to such small holder. Where there are more than one such small holder in respect of such land the small holder nearest to the cultivating tenant shall have priority for such assignment. The purchase price payable by the small holder for assignment of the ownership or possession or both of the land shall be 55 per cent of the market value of such rights. The purchase price shall be payable either in a lump or 16 equal annual instalments. Any person who does not possess any land or possesses only less than 5 acres of land in extent may apply to the Land Board for assignment on registry of lands to him. The Land Board shall, after reserving in each village the lands necessary for public purposes, assign on registry the remaining lands vested in the Government as specified below :—

(1) The holdings in which there are *kudikidappukars* shall, as far as possible, be assigned to such *kudikidappukars* ;

(2) Out of the remaining area available for assignment,

(*a*) fifty per cent shall be assigned to the landless agricultural labourers of which one-half shall be assigned to the landless agricultural labourers belonging to Scheduled Castes or Scheduled Tribes residing in the same village or adjacent villages ;

(*b*) twenty-five per cent shall be assigned to small holders and other landlords who are not entitled to resume any land ;

(*c*) the remaining twenty-five per cent shall be assigned to the cultivators who do not possess more than 5 acres of land in extent. In assigning lands under this sub-section to the persons specified in sub-clauses (*a*), (*b*) and (*c*) above, first preference shall be given to ex-servicemen belonging to the respective classes, and, subject as above, preference shall be given to co-operative societies formed by persons specified in the respective sub-clauses. Where the excess land that is available for assignment is either *kayal* or *kole nilam*, such land shall be assigned only to co-operative societies formed by landless agricultural labourers. For the above purpose a *kudikidappukaran* or a tenant of a *kudiyiruppu* shall be deemed to be a landless agricultural labourer if he does not possess any other land.

(3) The Land Board shall not assign to any person more than 5 acres in extent of land. Where a person possesses any land, only so much land as will make the extent of land in his possession five acres shall be assigned to him.

52. The purchase price of land assigned on registry shall be an amount equal to 55 per cent of the market value of the land and improvements if any thereof and shall be payable either in lump or in 16 equal annual instalments. The assignment shall be made on payment of the purchase price either in lump or in the first instalment thereof. Where the purchase price is payable in instalments, the amount outstanding after payment of each instalment shall bear interest at the rate of 4½ per cent per annum. The Land Board shall, subject to such rules as may be made by Government in this behalf manage the lands vested in them until they are assigned under sections 94 and 96 by making arrangement for their cultivation and protection. The Act has invalidated certain voluntary transfers effected after the date of publication of the Kerala Land Reforms Bill, 1963 in the Gazette.

53. From the nature of the provisions of the Kerala Land Reforms Act, 1963, it would be seen that this statute does not affect land tenures not specifically mentioned in it. Such tenures are not, therefore, affected by the Kerala Land Reforms Act, 1963.

Agriculture

54. Kozhikode district has 15·22 per cent of the cropped area of Kerala State. The following statement gives the classification of land in the Kozhikode district from 1955-56 to 1960-61.

(a) Rice

58. Paddy is cultivated in three seasons of the year. The one associated with the autumn season is known as '*Kanni* crop', with the winter is called the '*Mundakan* crop' and with the summer the '*Puncha* crop'. The crop-cutting surveys conducted by the State Statistics Department gave the following results in respect of area and yield per acre of paddy and production of rice in tons for the agricultural year ending with June 1961.—

Kozhikode district accounts for 13·88 per cent of area under paddy and 10·93 per cent of the production of paddy in the State. The percentage distribution of area and production of paddy is furnished below:—

The above figures show that the summer (or *Puncha*) crop is cultivated only in Tirur taluk.

59. The agricultural Research Station at Ambalavayal (South Wynad taluk) started functioning from 1945. Here they are doing agronomic research on paddy, sugarcane, tapioca, ginger, yam, banana, mandarin, oranges, pineapple, lemon, pepper, cardamom, coffee, cocoa, kolanut, camphor, vannitta, eucaliytus and cinnamon. The Agricultural Research Station at Koothali also conducts experiments on paddy, pepper, pulses and vegetables. The results of the agronomic research on paddy conducted during the period 1956–57 to 1960–61 at the Ambalavayal Research Station are furnished below:—

(i) Experimental trials of 'Jeerakasala' variety of paddy

60. Trial for evolving high yielding strain of *Jeerakasala* by selection was started during 1952–53. Three promising high yielding *Jeerakasala* cultures 179,190 and 534 were selected for trial for the period 1956–57 to 1958–59. The following are the results of the experiments:—

Year of trial	Percentage of increase in yield		
	Jeerakasala culture		
	179	190	534
1956-57	7·6	5·5	3·7
1957-58	10·4	2·4	1·7
1958-59	20·8	14·8	13·0

The above results confirm that *Jeerakasala* culture 179 has the maximum yield.

(ii) Ratooning trial of paddy

61. Ratooning trial of paddy was conducted in 1956–57 for the third year in succession. The varieties were *Kothandan, Maranellur, Chennellu Ceylon* and *Ninidhan*. The treatments consisted of leaving stubbles (9″) to ratoon after the main crop harvest giving a weeding and an application of ammonium sulphate as top dressing at 50 pounds per acre and irrigating when necessary. *Ninidhan* has recorded the maximum yield and appears to be more promising as a ratoon.

(iii) Trial of first crop season paddy seeds during second season

62. An observational trial of growing high yielding first crop season paddy varieties during the second season was carried out to study their performance in respect of duration and yield during the second crop season. The varieties used were TKM 5, TKM 6, WND 2, *Kothandan*, *Maranellu*, *Ninidhan*, MTU 19, *Maranellur Ceylon*, *Chennellu Ceylon* and *Jeerakasala*. The result indicated that it is not advisable to grow first crop varieties in general during second crop season as their performance in respect of yield gets considerably affected probably due to the influence of the season.

(iv) Yield trials of different second season paddy varieties

63. Comparative yield trials of different second season paddy varieties were conducted during 1959–60.

The trial was laid out with six replications and four treatments viz,*China* 62, *Punja*, TKM 5 and *Kalladi Aryan*. TKM 5 gave the maximum yield and Kalladi Aryan the least. Next to TKM 5 *Punja* has rendered better yield.

(v) Blast resistant trials of paddy varieties

64. Experiments were conducted in 1958–59 and 1959–60 to isolate some of the blast resistant strains suitable to Wynad conditions. The trial was started with some blast resistant strain obtained from Central Rice Research Institute, Cuttack, Orissa State and also from the Paddy Breeding Station, Coimbatore. Twelve blast resistant varieties viz; SM 6, SM 8, SM 9, BJ 2, CP 6, MTU 5, AKP 8, AKP 9, S 67, S 624, TKM 1 and 6538 were included for the trial. The experiment was laid out in randomized blocks with six replications. The incidence of disease was observed at monthly intervals for leaf, node and neck infections. The attack of disease was negligible. The strains MTU 5, AKP 9, S 67 and 6538 gave comparatively higher yields. An experiment was conducted in 1960–61 to study the reaction of a number of blast resistant strains under Wynad conditions with particular emphasis on their resistance to blast when grown among susceptible varieties. The local susceptible varieties were grown around the plots as the source of infection. Sixteen cultures, viz, SM 6, SM 8, SM 9, BJ 1, CP 6, CP 9, MTU 5, MTU 19, AKP 8, AKP 9, S 67, S 624, TKM 1, SLO 17, 6522 and 6538, were selected for trial. The incidence of disease was recorded from time to time and yield data was recorded separately. A statistical analysis of the yield data showed significant difference in the yields between the treatments. The treatments SLO 17, and MTU 19 gave the maximum yields.

(vi) Manurial trials of paddy

65. The phosphatic manurial trial was conducted in the above station to test the efficacy of different phosphatic fertilizers. The fertilizers are super, hyper and bonemeal with lime and green leaves. The results of the sixteen different treatments of phosphatic manurial trials conducted during 1958–59 and 1959–60 are furnished below:—

While in 1958–59 the bonemeal combinations have recorded the maximum yields in, 1959–60 lime at 3000 lb. per acre fetched the best yield. The experi-

ments conducted in 1960–61 did not yield any remarkable results even when the treatments of lime and bonemeal combination gave good yield.

(b) Cocoanuts

67. Kozhikode district has an area of 245,472 acres under cocoanut cultivation which is 19·84 per cent of State area under cocoanuts. The following statement gives the estimated taluk-wise area under cocoanuts for the year 1960–61:—

Statement 16

AREA AND PRODUCTION OF COCOANUTS, 1960-61

68. A sample survey (2nd round) sponsored by the Indian Central Cocoanut Committee was conducted by the State Statistics Department during 1960–61. According to the preliminary report of this survey Kozhikode district has an area of 298,425 acres under cocoanut cultivation. This acreage differs from the figures furnished in the above statement. This district stands foremost in regard to area and production in the State, the percentages being 22·79 and 30·85 respectively. Kozhikode district has only 15 barren nuts, per 1,000 bearing palms.

69. The Survey gave the following results on the average annual yield and income from an acre of pure cocoanut plot in the Kozhikode district:—

Average No. of bearing palms per acre	68
Average yield from a bearing palm	40
Total yield from an acre	2,720
Price of 100 cocoanuts	Rs. 18·25
Total income from an acre of pure cocoanut plot	,, 496·40

70. The month-wise production of cocoanuts reduced to percentages for Kozhikode district for 1960–61 are as follows:—

Statement 17

The survey indicates that Kozhikode district is free from the attack of cocoanut diseases.

71. Of the total cocoanut palms 71·21 per cent are of bearing status, while the rest belong to non-bearing. The subjoined statement gives the distribution of cocoanut palms with respect to age and bearing status reduced to percentages. The number of palms under study was 14,000.

Majority of nuts in the last item viz, other purposes, are used as seeds.

(c) Tapioca

73. Tapioca is the subsidiary food of the majority of people of this district. Both area and production of tapioca in this district come to 8 per cent of the State area and production. The subjoined statement gives estimated taluk-wise area and production of tapioca for 1960–61:—

(d) Areca-nut

74. Kozhikode district has the largest area under areca-nuts in the State coming to 44,553 acres which is 33 per cent of the total area of areca-nuts in the State. The areca palms of this district had produced 2,571 million nuts in 1960–61, against the State figure of 7,737 million nuts. The statement given hereunder shows the taluk-wise area and production of areca-nuts.

75. A sample survey was conducted by the State Statistics Department under the technical guidance of the Indian Council of Agricultural Research. The preliminary results obtained from the second round of this survey are dealt with in detail here. According to the survey this district has an area of 29,065 acres. These figures are not comparable with the official figures furnished in the above statement. This district has an estimated number of 26·7 million palms. It is estimated that in a bearing palm there are on an average 105 ripe and 59 tender nuts.

76. The survey gave the following results on the average annual yield and income from an acre of areca-nut plot in this district:—

Average number of areca-nut palms per acre	563
Total number of areca-nuts per acre	92,332
Number of ripe nuts per acre	59,115
Number of tender nuts per acre	33,217
Price for 100 ripe nuts	Rs. 2·25
Price for 100 tender nuts	Rs. 1·75
Total value of areca-nuts produced in an acre	Rs. 1,911·39

The average yield of areca-nuts under different age-groups is furnished below. 964 palms in this district were taken into consideration for this detailed study.

Statement 22

Education

(a) General education

81. The Madras Local Boards Act of 1834 was mainly responsible for the rapid expansion of educational institutions in the district. The momentum for establishing new elementary schools was accelerated by the promulgation of the Elementary Education Act. The educational system has undergone remarkable changes during the last decade especially after the formation of Kerala State. The duration of school course was raised from 11 to 12 years in 1956–57. Thus the primary grade covered the first eight standards, the initial five being lower primary while the rest upper primary. Standards IX to XII constituted the secondary grade. The admission to schools was restricted to pupils who attained the age of 5½ or over in 1958–59. During this year the number of years of primary education was once again reduced from 8 to 7 thus re-introducing the 11 years duration of course again. In 1959–60 ten year course of study was introduced by admitting pupils who had passed the new IV and V standards of primary schools to the VI standard. The upper primary sections of High Schools were permitted to conduct standard V even though standard V was allowed to continue in certain primary schools. At present standards I to IV constitute the lower primary section while standards V to VII the upper primary section. The secondary school has standards VIII to X. During the academic year 1957–58 the schools in Malabar were brought under the control of a Deputy Director whose office is situated at Kozhikode. For effective and proper control over the development of primary education an Assistant Educational officer was appointed in each educational sub-district. The Government Fishery schools in the Malabar region which were under the administrative control of the Fisheries Department were transferred to the Department of Public

Instruction during the same year. All educational institutions managed by the Malabar District Board and Municipal Councils were handed over to the Department of Public Instruction with effect from 1st October 1957.

82. Out of 2·6 million persons who constitute the 1961 population of the district more than 1·05 million persons are ' literates and educated persons '. Of these 665,386 are males and 397,909 are females. This gives a literacy percentage of 40·6 for the total population, 51·1 for males and 30·2 for females. In respect of total literacy this district has the eighth rank among the nine districts of the State.

83. The following statement gives the number of school-going children by age-groups for Kozhikode district during the academic years 1950–51, 1955–56 and 1960–61 :—

(b) Higher education

86. Under the University of Kerala there are six Arts and Science Colleges in this district besides one Training College, one Medical College and three Oriental Title colleges. The present Guruvayurappan College was first started as a school in 1877. In 1878 this was named *Kerala Vidyasala* and was affiliated to the University of Madras as a Second Grade College. In 1900 it was named Zamorin's College, and again in July 1952 Guruvayurappan College. The Malabar Christian College was founded in 1848 as a primary school by the Basel Evangelical Mission. It was converted into a Second Grade College in 1907. The Faroke College, Feroke, was established on 12th August 1948. During the decade 1951-61 three colleges were founded viz., Providence Women's College in 1952, St. Joseph's College, Devagiri in 1956 and Government College at Madappally in 1958. Besides the above Arts and Science Colleges there are one Government Training College started in 1950 and a Medical College established in 1957. Rouzathul Uloom Arabic College was first established at Anakkayam in 1942 and was shifted to Manjery in 1944 and two years later it was again shifted to Feroke. The Madeenathul Uloom Arabic College, Pulikkal was started in July 1947. The Sulla Mussalam Arabic Collage, Ariyakkode was founded as an Arabic *Madrassa* in 1944 and was upgraded into a college in 1955. The subjoined statement gives the number of colleges, students and teachers for the period 1950-51 to 1960-61:—

87. On 30th January 1961 a University centre was opened to give adequate facilities for post-graduate training and research in science and humanities. This is a landmark in the history of development of university education in the district. The details of colleges for the academic year 1960-61 are furnished in Appendix 10.

(c) Professional and technical schools

88. Kerala Polytechnic, Calicut; Government Industrial School, Calicut; Junior Technical School, Manjeri; Coir School, Beypore; Fisheries Technical High School, Madappally and the Fishermen Training Centre, Beypore are the important professional and technical schools of this district. The table showing the number of polytechnics with their strength and pupils is furnished in Appendix 11.

Public Health

89. The first Government hospital was opened at Calicut in October 1845. This was taken over by the Municipality when it was created in 1865 and it continued under the control of the Municipality till 1920. In 1920 Government again took over the management of this hospital for providing better medical facilities and it was treated as the Headquarters Hospital. This hospital was upgraded into a Medical College Hospital

106/1—4a

in August 1955. Three clinics, viz, for dental, tuberculosis, and venereal diseases were attached to this hospital in 1957, 1958 and 1959 respectively. The Women's and Children's Hospital at Calicut was started in October 1901. Hospitals at Badagara, Vythiri, Manjery, Nilambur and Malappuram were also old institutions. The Lunatic Asylum at Kuthiravattam about two and half miles east of Calicut was established on 20th May 1872 at a cost of Rs. 39,250. As on 1st April 1961 this district has the following Government Allopathic institutions :—

Electric Power

95. The power for distribution in this district is at present purchased from the Pykara Hydro Electric system of the Madras State. Kuthumunda, the main receiving sub-station of Pykara systems in Kerala is connected with Upatti sub-station by 66 KV double circuit line. From Kuthumunda the transmission line branches into two 66 KV single circuit lines, one serving the sub-stations at Mananthody and Cannanore and the other energising the sub-station at Kozhikode. The sub-stations at Kozhikode and Tirur are linked with 11/33 KV single circuit line.

The construction work of Chalakudy-Shoranur-Kozhikode 110 KV double circuit line is in progress. The civil works of 110 KV transforming stations at Kozhikode and Malappuram are progressing rapidly. There is also provision to construct an additional 110 KV single circuit line connecting Kozhikode and Cannanore during the Third Five Year Plan.

Communications

(a) Roads

96. Ibn Batuta who visited Malabar during 1342–47 wrote about the miserable condition of roads as "No one travels in these parts, upon beasts of burden ; nor is their any horse found except with the King. When, however, any merchant has to buy or sell goods, they are carried upon backs of men who are always ready to do so (for hire)." Even in the later periods of the eighteenth century there were practically no roads except certain paths set apart for the use of bullock-carts. A change came by the Mysorean invasions of Haidar Ali and Tippu Sultan during the period 1766 to 1793. Colonel Alexander Dow in his minutes on the state of roads in 1796 clearly describes that "Tippu projected and in a great part finished the extensive chain of roads that connected all principal places of Malabar and pervaded the wildest parts of the country.....His routes are in general well chosen and lead through almost every part of the province". Shamnauth, Zamorin's minister, has left the following account of Tippu's Gun-roads :—

"1. From Calicut to the present cantonment Polwye by Purrinalettu, Cheakur, Tamracheri.
2. From Malapuram to Tamracheri.
3. From Malapuram to Pudupani and from thence to the ghat.
4. From Calicut to Ferokia, Carate Hobli, Elamaruthoo, Chatamungul, Purrinalettu, Tamracheri.
5. From Ferokia through Shernad taluk by Chalapoora Hobli, Pooloor, Tirurangadi, Venkatakotta, Poolanalettu, Erakerlu, Kemaro, Waleakoomuttu, Tiruchera-paramba, Cowlpara, Mungarey river, Pattambi, Walayar river, Coimbatore.
6. From Palghat to Dindigul, Tallamangala, Wundelarrullatiel, Nellimootiel, Wellikumbil, Margienaympalim, Peelachi, Worunmalakatu, Kannenerukuvaturu, Palni, Virupakshu, Dindigul.
7. From Venkatakotta, Purumbil, Wallunatakuny (Velateru), Palaketeri, Angadipuram, Muleakurchi, Karialutu, Vellatur, Rapela-llawuloora, Peynat, Koondepulla river, Mannar, Attaparu, Tengraumttooroo, Wellimamutu, Coimbatore."

97. During the next thirty years great strides have been made towards the development of roads. The later half of the nineteenth century was conspicuous for the development of roads. The establishment of Malabar District Board had largely contributed to the development of village and District Board roads. The Town Improvement Act of 1865 authorised the Municipalities to spend a portion of their expenditure on the construction of drains and roads. The Road Cess Act of 1866 enabled the District Board to spend more on the construction and maintenance of roads. There was rapid increase in road mileages during the first half of the twentieth century. The following statement gives the classification and length of roads by taluks in 1960–61.

(b) Railways

99. The construction work of railway line in this district was undertaken by the Madras Railway Company and to their credit they opened for traffic the railway line connecting Chaliam (present Kadalundi) and Tirur on 12th March 1861. On 1st May 1861 it was extended up to Kuttipuram and on 23rd September 1861 it reached Pattambi railway station situated in the present Palghat District. The railway line connecting Chaliam with Calicut was available for traffic on 2nd January 1888. It was further extended to Badagara on 1st October 1901 and the line reached Mangalore in 1907. The Nilambur–Shoranur broadgauge railway line was opened for traffic in October 1927. The southern-most railway station of this line falling within the revenue jurisdiction of this district is Tuvur. No addition of railway line was made thereafter. Thus the present Kozhikode district has 78 miles of broadgauge line. The railway line traverses through four taluks of the district, viz, Badagara, Quilandy, Kozhikode and Tirur. Mahe and Pallipuram are the two extreme stations of this district. From Mahe to Tirur it runs parallel to the sea-shore and from there it turns on a south-eastern direction upto Shoranur railway junction. Facilities provided at the various railway stations of this district are furnished in Appendix 17.

100. This district has a continuous inland water route connecting Badagara and Ponnani. Details of this route are given below:—

Kadalundi to Tirur	29·00	29·00

The above water route is part of the west-coast canal connecting Trivandrum and Badagara. Most of the rivers of this district are used for inland water transport.

(c) Ports

101. Badagara and Calicut are the two important ports of this district.

(i) Port of Badagara

102. The Port of Badagara is open to foreign vessels. The port limits take in a backwater portion also. Coasting steamers and sailing vessels call at the port regularly. Cargo is transported by lighters from the anchorage to the beach. The construction of a pier at an estimated cost of Rs. 6 lakhs was included in the Second Five Year Plan. Cocoanuts and pepper are the main exports from this port.

(ii) Port of Calicut

103. Calicut has been an important port from very ancient time. It probably rose to importance about the eleventh or twelfth century A. D. In the first half of the fourteenth century, when Shaik Ibn Batuta visited it, it was certainly a place of great trade, and so it continued till the arrival of the Portuguese in the end of the fifteenth century. After that its decline was rapid due to the interference of the Portuguese with the Muhammaden trade, and it has never since recovered its position and Cochin, its rival, under Portuguese and Dutch influence, has, with its greater natural facilities always hitherto had an advantage. Both Calicut and Beypore are open to foreign trade. Calicut is not completely close to the steamer traffic during the south-west monsoon period but whenever there is heavy rain steamers do not call on the port as it is an open roadstead. Hence, no sailing vessel traffic takes place during the south-west monsoon period. Beypore wharf is also closed during the south-west monsoon period as the Bar is dangerous to cross due to monsoon swell and sea which breaks heavily and enter the river. The following development works are in progress at the port.

(*a*) Construction of a slip way at Beypore at an estimated cost of Rs. 80,000 to have up the Port tug and also to cater to the need of small sized sailing vessels;

(*b*) Purchase of a grab dredger at Beypore at an estimated cost of Rs. 2 lakhs to dredge the approach channel and wharf area at the tile factory jetties ;

(*c*) Provision of electric cranes at Calicut at an estimated cost of Rs. 1·6 lakhs in replacement of the existing hand cranes ; and

(*d*) Extension of the truck lines and provision for trolly at Calicut Port at an estimated cost of Rs. 9,700.

(d) Postal

104. Most of the villages have post offices. The number of post offices rose to 467 in 1961 from 205 in 1950. The maximum number of post offices (131) opened in a single year during the decade was in 1950–51. An alphabetical list of places having post offices is given separately in Appendix 18.

(e) Telegraphs

105. There are altogether 48 telegraph offices in this district. The names of places where they are located along with the year of opening are given below :—

Hydrogenation Factory, Shark Liver Oil Factory and Soap Institute are three important commercial concerns of the Government of Kerala in this district.

Government Hydrogenation Factory

115. The Madras Government approved a scheme for installing a State owned Hydrogenation Factory in Calicut in October 1945. Even though the construction of the factory was completed in 1953 it went into commercial production only in 1958–59. This factory produces the following articles :—

Name of product	Production in tons (Average for 3 years ending 31-3-1961)
Vanaspati	458
Refined oil	763
Vegetable tallon	13
Soap stock	126

During 1960–61 this factory employed 66 persons. The total value of the output is estimated to Rs. 35·50 lakhs during 1960–61 showing an increase of about Rs. 24·51 lakhs since 1958–59.

Shark Liver Oil Factory, Calicut

116. With the outbreak of the Second World War the supply of cod liver oil to India was cut off and it became difficult to treat the Vitamin A and D

deficiency in India. In order to tide over this difficulty, the Director General, Medical Services, New Delhi visited Madras and stressed the necessity for the commercial manufacture of shark liver oil Vitamin A and D products, especially to meet the requirements of defence forces in India. With this object in view, the shark liver oil manufacture was commenced in Calicut in 1940 under the guidance of the Superintendent, Kerala Soap Institute, Calicut. The present factory was commenced in 1942 and commercialised in 1943. After the cessation of war the production of shark liver oil was switched over to meet the needs of the civilian population. Originally the factory was manufacturing only one brand of shark liver oil namely MGB Shark Liver Oil. When the importance of the factory increased high potency shark liver oil under the name of "Adamin" was introduced to the market in 1944–45. In 1948–49 stay-fit brand shark liver oil and veterinary brand shark liver oil were introduced. During 1950–51 Adamin oil was marketed in the capsule form. In 1956–57 stay-fit capsules to meet the requirements of all classes of people were made available at a cheaper rate. At present the factory is marketing the following products throughout India:—

Name of product	Vitamin contents		
	A	D	
Stay-fit brand shark liver oil	1,000	100	i.u.g.
Sea gold brand shark liver oil	1,500	100	,,

Veterinary brand			
Univax	1,500	150 D_2	i.u.g.
Trivax	6,000	600 D_2	,,

Kerala Soap Institute

117. The Kerala Soap Institute formerly known as Government Soap Factory was started in 1914 as an experimental unit at Tanur and it was later shifted to Calicut. It was converted as a commercial concern in 1917. It is now under the control of the Department of Industries and Commerce. The capital invested in the concern is now about Rs. 11 lakhs including the cost of land, building, machinery, raw materials, stock in trade, etc. It yields a net return of 12 to 15% to Government by way of interest and profit. The chief raw materials used in the manufacture are vegetable oils like cocoanut oil, mowhora oil, vep oil, etc., and rosin tallow, caustic soda, perfumery articles and chemicals. Nearly 85 to 90% of these are indigenous and the rest are imported. The institute is making all kinds of soaps viz, washing, toilet, medicated, shaving, soft and insecticidal, by the usual processes of cold, semi-boiled, boiled and milled. The labour strength of this factory is about 75 workers.

Strikes and lock-outs

118. Two tables, one showing the number of industrial disputes resulting in work stoppages for the period 1957 to 1960 and another showing the number of industrial disputes by causes for the period 1957 to 1960 are given in Appendices 22 and 23 respectively.

Fisheries

120. The important marine fishes obtained in the coastline of Kozhikode District are Mackerel seer, Oil sardines, Clupea fimbriatus, Engraulis mystex, Salmon, Ribbon fish, Silver bellies, Pomfret, Prawns and Sharks. There are seventeen fish curing yards in this district viz, the yards at Madakkara, Madappally, Melady, Badagara, Quilandy, Elathur, Pudiappa, Calicut, Naduvattom, Beypore (North), Beypore (South), Kadalundi, Parappanangadi, Tanur, Puthirkadapuram, Paravanna and Kottayi. The important fishing centres are Tanur, Parappanangadi, Kozhikode, Paravanna, Kottayi, Pudiappa, Quilandy and Badagara. Development of marine fisheries is aimed at by the supply of mechanised boats to fishermen at subsidised rates. Inland fishing is also developed by bringing exotic varieties of fish from other places and

stocking them in the inland waters. The Government Ice and Cold Storage Factory at Calicut is the largest of the existing ice-making, freezing and storage plants in Kerala. The two main activities of this plant are ice making and freezing of fish, prawns, lobsters and frog legs. The ice manufactured here is used for icing the fish for storage at the plant and for sale to fishermen.

121. A survey conducted by the Fisheries Department on fishermen's assets and liabilities in 1957–58 reveals the following :—

The achievements under all the blocks together for the period 1956–57 to 1960–61 are given in Appendix 27.

Revenue

123. Statements of the following items of revenue have been given in Appendices 28 to 32.

1 Receipts under excise revenue for the period 1950–51 to 1960–61.

2 Sales tax revenue for the period 1950–51 to 1960–61.

3 Agricultural income tax and supertax for the period 1957–58 to 1960–61.

4 Incidence of land revenue assessment for the period 1950–51 to 1959–60.

5 Receipts under entertainment tax for the period 1950–51 to 1959–60.

The excise revenue collected from the Kozhikode District has decreased from Rs. 24,372 in 1950–51 to Rs. 16,467 in 1960–61. While sales tax revenue has increased from Rs. 4,956·45 to Rs. 9,592·55, the agricultural income tax and supertax has increased considerably from Rs. 1,048,787·77 in 1957–58 to Rs. 1,550,119·98 in 1959–60. The land revenue assessed on fully assessed area has slightly reduced from Rs. 2,415,299 in 1950–51 to Rs. 2,284,153 in 1959–60. Land revenue assessed on cultivated area has fallen from Rs. 2,382,726 in 1950–51 to Rs. 1,659,602 in 1959–60. Land Revenue assessed per head by population has risen from 0·91 in 1950–51 to 1·12 in 1959–60. The entertainment tax has increased from Rs. 18 lakhs in 1950–51 to Rs. 172 lakhs in 1959–60.

Local self Government

124. Local Self Government consists of three important institutions viz, Municipalities, District Board and Panchayats.

(a) Municipalities

125. The Town Improvement Act X of 1865 enacted by the Madras Government was the first statute establishing municipalities. Prior to the enactment of this statute the municipalities were nothing but voluntary organisations. Calicut Municipality was formed on 3rd July 1866 by extending the above Act. This Act was in force till 1871 and it was repealed by Act III of 1871. This was again amended by the Act IV of 1884. For a long time the District Collector was the President of the Calicut Municipality. In 1884 the District Municipalities Act was passed by the Madras Government which provided for an elected Vice-President and the election of 75 per cent of the members of the council by tax payers. "In 1886–87 the full complement of elected councillors viz, 18 out of 24, was secured and the privilege of electing its chairman was conferred upon the council. The experiment, however, was not a success and the administration of the Municipality, never good, went from bad to worse till in 1890, in view of the discreditable and unsatisfactory administration of the previous year, both privileges were withdrawn. A paid chairman held office for two years, and subsequently the Revenue Divisional Officer was the ex-officio Chairman till 1901. The privilege of electing one half of the councillors was restored in 1896–97, and since 1901 the council has once more been permitted to elect its own chairman. Subsequently, the council became entitled to elect three-fourth of its members, the remaining one-fourth being appointed by Government. The official element in the strength of the council was gradually withdrawn and with the coming into force of Act V of 1920, the nomination of Government officials was completely stopped and the strength of the council rose from 24 to 32, composed entirely of non-officials. The council continues to elect its own chairman and vice-chairman."[1] The Amendment Act of 1930 abolished the system of nominations and provision was made for the reservation of seats for minority communities by a system of election by all the voters in each ward. Amendment Act XV of 1933 made it obligatory on the part of Government to appoint Municipal Commissioners. In pursuance of of this Act the Madras Government appointed Commissioners to all Municipalities in 1934. The Adult Franchise which was introduced in 1938 made the Municipalities full-fledged democratic institutions. The Badagara Municipality was constituted with effect from 1st October 1958. The Kerala Municipalities Act 1960 which was brought into force on 1st September 1961 now governs the Municipalities of this district also. The income and expenditure of Badagara and Calicut Municipalities are given separately in Appendices 33 and 34 respectively.

(b) District Board

126. The Malabar District Board was established in 1859 with the main object of promoting primary education in the rural areas. In 1863 it was empowered to collect an Education Cess. By the Road Cess Act of 1866 it was entrusted with the maintenance of bad roads etc. In 1871 the constitution of the board was placed on a par with that of the municipalities with the Collector as the president and three nominated members, the Collector being the supreme authority. Various legislations were passed gradually improving the status of the District Boards and clothing them with more powers. The Acts of 1884, 1920 and 1930 deserve mention in this connection. The second of these series provided for the election of two-thirds of the members by adult franchise who have attained the age of 25 and also by those who are assessed to land revenue or annual rental value or profession tax of Rs. 10. The franchise was further extended in 1930 and the reservation of seats was provided for minority communities. In 1957 all the educational institutions, hospitals, and dispensaries as also major roads under the District Board were taken over by Government. The District Board was abolished by the Kerala Panchayats Act 1960.

(c) Panchayats

127. The Madras Local Boards Act 1884 was responsible for the creation of District Boards and Union Boards. The Union Boards had the jurisdiction of semi-urban areas. The idea of creation of Village Panchayats for the administration of certain local affairs was stressed by Charles Hobhouse, Chairman of the Royal Commission appointed in December 1907. The Government of India resolutions of 1915 and 1918 authorised the Local Government to implement the scheme of development of Panchayats based on some general principles. By the resolution of 1915 Village Panchayats were formed in revenue villages. The Madras Village Panchayats Act of 1920 enabled any village however small to have its own Panchayat. The District Gazetteer for Kozhikode district published in 1962 gives the following information on the further development of Panchayats. "Even after the enactment of this measure (Panchayats Acts 1920) the Panchayats and Unions continued to function in the rural areas discharging more or less similar functions under different Acts. Consequently the Madras Village Panchayats Act 1920 was repealed and all the Panchayats were brought under the scope of the Madras Local Boards Act 1920 which governed the constitution and working of the Village Unions. The difference between the Panchayats and Unions, however, continued till 1937 when Panchayats were brought under the same system of administration for all purposes and simply classified as "major" and "minor" for audit purposes. With a view to improving further the efficiency of Panchayat administration the Madras Local Boards Act 1920 was amended by the Government in 1943 to provide for the appointment of Executive Officers for such Panchayats as were notified by the Government. It may also be noted in this connection that under the Madras Local Boards Act 1920 the Panchayats in the District were under the control of the Malabar District Board on the one hand, and the Inspector of Municipal Councils and Local Boards on the other. The budgets of the Panchayats were passed by the District Board and whatever taxes they levied were done only with the approval of the District Board. Even for the supersession of Panchayats the remarks of the District Board were duly considered by the Government. This dual control militated against the effective functioning of the Panchayats. The Madras Village Panchayats Act of 1946 was, therefore, enacted during the Adviser's regime releasing Village Panchayats from this dual control and placing them in charge of the District Collectors and a Registrar-General of Panchayats. This Act was allowed to lapse in April 1948 and in its place was enacted the Madras Village Panchayats Act 1950 which conferred very large powers on Panchayats and limited the control of the District Collectors to certain emergency powers. This Act was brought into force on 1st April 1951 and it governed the constitution of Panchayats in the District till the passing of the Kerala Panchayats Act (1960) and the progressive enforcement of its provisions with effect from June 20, 1960." The income and expenditure of Panchayats of this district are furnished in Appendices 35 and 36.

The number of convicts under sixteen years is very small. 1952–53, 1958–59 and 1959–60 have more convicts than other years. In respect of literate convicts 1959–60 is the peak year with 1,715 convicts. Illiterate convicts are maximum in the year 1952–53 with 1,885 convicts of whom 1,869 are males. A table showing the nature and the length of sentence of convicts is given as Appendix 37. Another table showing the number of Police Stations, strength of Police, etc., is furnished as Appendix 38.

Registration

134. The number of registered documents and the value of property transferred from 1950–51 to 1960–61 is given separately in Appendix 39.

Small Savings Scheme

135. The following statement gives the Small Savings collection in the district for the period 1958–59 to 1960–61 under the various heads.

Printing Presses and Periodicals

136. The number of Printing Presses has increased from 47 to 81 during the period 1950–51 to 1960–61. There are 6 dailies, 6 weeklies, one fortnightly, 13 monthly and 2 annual Malayalam publications in the district besides one monthly and one quarterly English magazines. A detailed table in respect of these items are furnished in Appendix 40.

Entertainments

137. The details regarding cinema theatres, films exhibited, the number of shows and the number of tickets issued during 1959-60 and 1960-61 for the municipalities of Badagara and Calicut are furnished in Appendix 41.

Employment Exchange Activities

138. The Employment Exchange activities for the period 1958–59 to 1960–61 are furnished in Appendix 42.

Important Events

139. A table showing the list of important events by taluks is furnished as Appendix 43.

Occupied Houses and Households

140. Occupied residential houses of this district have increased by 75·2 per cent during the period 1921–61 against the Kerala State growth of 93·1 per cent houses. The following statement presents the number of occupied houses by rural-urban distribution for the last five censuses with their decade variations:—

Statement 60

OCCUPIED CENSUS HOUSES

	Number	Percentage decade variation	Number	Percentage decade variation	Number	Percentage decade variation
1921	243,525	..	224,814	..	18,711	..
1931	268,753	10·36	248,510	10·54	20,243	8·19
1941	302,330	12·49	271,014	9·06	31,316	54·70
1951	327,485	8·32	292,578	7·96	34,907	11·47
1961	426,653	30·28	368,114	25·82	58,539	67·70

There is abnormal increase of occupied census houses during the decade 1951–61 compared to earlier decades. This is true both of rural and urban areas. The conversion of more rural areas into urban areas according to the new definition of towns in 1961 Census accounts for the high percentage decade variation (67·7 per cent) of houses in the urban areas for 1951–61. The number of towns increased from 7 in 1951 to 17 in 1961. South Wynad, Kozhikode and Ernad taluks have higher rates of increase of occupied houses during the period 1951–61 when compared to

other taluks of the district. South Wynad taluk tops the list with 75·57 percentage of decade variation.

141. The density of occupied census houses in the rural areas showed an increase from 11,547 in 1951 to 14,669 in 1961 per 100 sq. miles. In the urban areas the density of houses per sq. mile has risen from 955 in 1951 to 964 in 1961.

142. The following statement gives the number of persons per 1,000 occupied census houses in the district by rural-urban distribution for the five censuses:—

Statement 61

Tirur	6·18	6·10	6·71

South Wynad taluk has the lowest number of persons per occupied census house, while the largest number pertains to Kozhikode taluk.

143. For every 100 occupied residential houses in the district there are 103 households. The following statement gives the proportion of households to occupied houses for both rural areas and for towns:—

Growth of Population

150. According to the census of 1961 this district has a population of 2,617,189. The population of the district has increased by 127·19 per cent during the past sixty years against the State increase of 164·27 per cent. The following statement gives the population and percentage decade variation for seven censuses :—

Statement 70

VARIATION IN POPULATION

Census Year	Population	Percentage decade variation
1901	1,151,981	..
1911	1,251,737	+ 8·66
1921	1,285,622	+ 2·71
1931	1,490,770	+ 15·96
1941	1,671,990	+ 12·16
1951	2,065,284	+ 23·52
1961	2,617,189	+ 26·72

The district's growth rates have been lower than the State rates till the 1941 Census. This position had changed in the censuses of 1951 and 1961. This district ranks first among the districts of Kerala in respect of area and population, while it stands fifth in regard to rate of growth of population for the decade 1951–61. The following statement shows the rate of population growth compared to the adjacent districts:—

Statement 71

RATE OF POPULATION GROWTH COMPARED WITH ADJACENT DISTRICTS

District	Rate of growth		Average annual growth rate
	1901–61	1951–61	1901–61
Cannanore	126·11	29·47	2·1

Mysore	80·76	17·32	1·3
Nilgiris	262·60	31·30	4·4
Palghat	81·80	13·51	1·4

151. All the taluks of the district except Badagara and Tirur have higher population growth rates than that of the State increase of 24·76 per cent during the last decade. The 1951–61 decade variation and percentage increase of population since 1921 census for each of the taluks are as follows :—

Statement 72

TALUK-WISE GROWTH RATE OF POPULATION

Taluk	Decennial growth rate 1951–61	Percentage increase 1921–61
Badagara	22·01	89·41
Ernad	29·59	98·47
Kozhikode	27·89	127·14
Quilandy	25·51	94·85
South Wynad	68·69	236·86
Tirur	16·79	76·00

South Wynad taluk has significant population growth rate during the decade 1951–61 with 68·69 as against 59·17 in 1941–51 and 15·89 in 1931–41. This rapid increase of population since 1941 Census was due to the immigration of a large number of agriculturists from North Travancore to this taluk for the cultivation of extensive areas of private forests.

152. The following statement gives the rural-urban population and their decade growth rates during 1901–61 in this district :—

Statement 73

1961	2,184,682	+ 21·57	432,507	+ 61·25

The increase in population in urban areas during the decades 1931–41 and 1951–61 were due to the addition of four towns in 1941 and ten towns in 1961.

Population by Taluks

153. The 2·6 million population of the district is distributed among six taluks. The following statement gives the taluk-wise distribution of population as per the 1961 Census.—

Statement 74

POPULATION BY TALUKS, 1961

Tirur taluk	561,212	271,435	289,777	21·44	20·86	22·02

Among the taluks of this district Kozhikode taluk stands foremost in regard to size of population closely followed by Tirur and Ernad taluks. Even though South Wynad taluk ranks second in respect of area, it is the least populous one. The irregular terrain, large areas of thick forests and plantations contribute to the low population of this taluk.

Rural-urban distribution of Population

154. As per the 1961 Census 83 per cent of the total population of the district live in the rural areas. The following statement sets out the distribution of the number of persons per 10,000 population of the district and of the State for the last seven censuses for rural and urban areas separately :—

Statement 75

Kozhikode district ranks second in respect of the population in urban areas of the State in 1961, the first place being taken by Trivandrum district with 17·56 per cent.

Population by Natural Regions

156. 74 per cent of the total population of the district live in the midland region while 17 per cent live in the lowland and the rest in the highland. The following statement gives the actual population and their percentages in the different regions of the district by taluks.

Statement 77

Ernad and South Wynad taluks do not have sea-coasts. Even though Kozhikode taluk has sea-coast the villages of this taluk fall either in the midland or highland regions as the major portion of these villages are above 25 feet above the mean sea level.

157. There is no town in the highland region. The South Wynad taluk has no urban area. The rural-urban distribution of the remaining five taluks by natural regions is furnished below :—

N—denotes negligible figure which is less than one. The actual value is 0·3

The above statement shows the degree of congestion in the respective regions. The highland region of Quilandy taluk consists of unsurveyed areas of forests which lie outside the village boundaries and hence have very low density. South Wynad is an entirely rural taluk. Lowland regions have higher population density compared to midland and highland regions. Lowland region of Tirur taluk tops the list with 3,080 persons per square mile. The following paragraphs point out the classification of villages by natural regions under different population density ranges.

A. Rural Areas

(i) Highland region

160. The highland region of this district consists of 24 revenue villages. None of these villages has a population density of above 1,000. The following statement sets out the number of revenue villages coming under different density ranges :—

Statement 81

CLASSIFICATION OF RURAL HIGHLAND VILLAGES BY DENSITY RANGES

Population density per sq. mile	Number of rural revenue villages
Less than 250	4
250—499	10
500—749	7
750—999	3
1,000 and above	..

Four villages have a population density of less than 250. They are Kidanganad, Noolpuzha, Pulpalli and Thaviyode villages of South Wynad taluk. Of these Kidanganad is the least densely populated village in the whole district with 51 persons per sq. mile. It is followed by Noolpuzha with 123 persons per sq. mile, Pulpalli with 198 and Thaviyode with 232. Major portions of the first three villages are covered with thick inaccessible forests, while Thaviyode village has low hills and plantations. These factors account for the low density of population. The most densely populated village of the highland region in the whole district is Karuvarakundu village of Ernad taluk with a population density of 958 persons per sq. mile. Even though the northern and eastern portions of this village are bounded by the unsurveyed areas it has comparatively more communicational and educational facilities. Karuvarakundu is connected with Manjeri and Nilambur by good motorable roads. This village having an area of 15·30 sq. miles has tea estates and rubber plantations.

(ii) Midland region

161. The midland villages have comparatively higher population densities. The following statement gives the distribution of 230 midland villages classified by different density ranges .—

Statement 82

CLASSIFICATION OF RURAL MIDLAND VILLAGES BY DENSITY RANGES

Population density per sq. mile	Number of rural revenue villages
Less than 500	4
500—999	40
1,000—1,499	67
1,500—1,999	68
2,000—2,499	32
2,500—2,999	9
3,000—3,499	4
3,500—3,999	3
4,000 and above	3

Nallalam, Kottuli and Nedungottur are the more densely populated villages in the midland region. They exceed the population density limit of 4,000 persons per sq. mile and they form part of Kozhikode taluk. Nallalam village with 5,739 persons per sq. mile is circumscribed by the Calicut (Municipal), Olavanna and Beypore towns. The western boundaries of the Kottuli village (4,898 persons per sq. mile) and the Nedungottur village (4,137 persons per sq. mile) touch the Calicut municipal limits and these two villages lie on either side of the Calicut-Mysore road.

(iii) Lowland region

162. All the 56 lowland villages in this district have population densities of above 1,000. Nine villages exceed the density of 3,000. Villages classified by different density ranges are given hereunder :—

Statement 83

CLASSIFICATION OF RURAL LOWLAND VILLAGES BY DENSITY RANGES

Population density per sq. mile	Number of rural revenue villages
Less than 1,000	..
1,000–1,999	22
2,000–2,999	25
3,000 and above	9

Of the nine villages coming under the population density range of 3,000 and above persons per sq. mile, six, viz, Uralangal with 4,832, Chorode with 4,272, Muttingal with 3,999, Azhiyur with 3,695, Onchiyur with 3,600 and Kunnamkara with 3,152 persons per sq. mile are in the Badagara taluk, two, viz, Viyyur with 3,163 and Edakkulam with 3,017 persons per sq. mile are in the Quilandy taluk and one village Mangalam with 4,090 persons per sq. mile is in Tirur taluk. All the above villages in the Badagara taluk lie north to Badagara Municipal Town. These villages are situated within three miles from the West Coast Road. The Calicut-Mangalore Railway line traverses through almost all these villages and runs parallel to the West

Coast road. Proximity to Badagara municipal town and potentiality of communication facilities are contributory factors for the population density of these villages. The Viyyur and Edakkulam villages are north and south of Pantalayini town respectively. The southernmost tip of Mangalam village of Tirur taluk touches the mouth of the Ponnani river. The navigational facilities and nearness to Ponnani Port are the main causes for the high density of population of this village.

B. Urban Areas

163. There is no town in the highland region of the district. Out of 17 towns 5 are located in the lowland region. All the lowland towns have a density of population exceeding 5,000 persons per sq. mile while the majority of midland towns have less than 5,000 persons per sq. mile. Calicut, Parayancherry and Puthiyangadi towns exceed the population density limit of 10,000. The following statement gives the population density of each town of the district in the ascending order of densities :

Statement 84

POPULATION DENSITY OF TOWNS BY NATURAL REGIONS

Sex-ratio

164. The sex-ratios (number of females per 1,000 males) of this district shows fluctuations between 1901 and 1961. The 1901 Census had showed a sex-ratio of 1,001 which was very near equality. But during the Censuses of 1911 to 1941 the sex-ratios of this district were not only much higher but even greater than the State sex-ratios. After reaching 1,038 in 1941 it declined steadily thereafter.

The following statement gives the sex-ratios for the last seven censuses for the total, rural and urban areas.

Statement 85

SEX-RATIO 1901—1961

Census year	Total	Rural	Urban
1901	1,001	1,008	925
1911	1,009	1,016	937
1921	1,023	1,029	946

1941	1,038	1,043	995
1951	1,016	1,019	1,001
1961	1,012	1,016	989

165. The following statement compares the taluk-wise sex-ratios for both rural and urban areas:—

Statement 86

TALUK-WISE SEX-RATIO FOR 1951 AND 1961 BY RURAL-URBAN CLASSIFICATION

Tirur	1,055	1,059	1,015	1,068	1,074	1,031

During the decade sex-ratio had decreased in Badagara, Ernad and Kozhikode taluks while the other taluks of the district showed an increase.

166. Sex-ratio can be further analysed by natural regions. The highland regions have exceptionally low sex-ratios when compared to other natural regions except for Ernad taluk. The following statement establishes this:—

A further analysis of the rural areas at the village level and the urban areas at the town level is given below:—

(a) Rural Areas

(i) Highland region

167. 22 villages out of 24 have recorded preponderance of males over females. Oorangattiri and Karuvarakundu villages however, show a departure from this and their sex-ratios work out to 1,040 and 1,014 respectively.

(ii) Midland region

168. Only 74 villages out of 230 midland villages follow the general phenomenon of highland villages in regard to sex-ratio. They are Kayakody (968) Velliyode (978) and Naripatta (986) villages of Badagara taluk; Perambra (922), Kalpattur (946), Velam (954), Paleri (955), Kayana (955), Cherapuram (961), Kavumthara (964), Balusseri (968), Menhaniam (970), Unnikulam (971), Changroth (980), Kottur (981), Muyipoth (984), Avitanallur (984), Cheruvannur (987), Iyyad (987), Nochad (988), Trikuttisseri (989), Kozhikallur (990), Chenoli (991), Naduvannur (991), Meppayur (994), Sivapuram (996) and Muthuvannacha (998) of Quilandy taluk; Kovoor (894), Thiruvambadi (918), Thazhakode (929), Chevayur (932), Vellayicode (936), Mayanad (946), Poolacode (946), Iringallur (955), Patinhattumuri (956), Nediyanad (959), Kottuli (967), Peruvayal (967), Kodal (968), Mavoor (970), Kodiyattur (973), Elettil (974) Chelavoor (975), Punnasseri (976), Nallalam (979), Karoth (980), Kedavoor (981), Kumaranellur (981), Koodathayi (982), Perumana (984), Makkada (988), Kizhakkoth (990), Cheruppa (997) and Puthoor (999) villages of Kozhikode taluk; Veliprom (946) and Cheriamundam (975) villages of Tirur taluk; and Kondotty (964), Azhinhalam (970), Kizhuparamba (970), Pandikkad (970), Nilambur (972), Puliacode (980), Vazhayur (982), Olavathur (984), Cheacode (986), Payyanad (991), Vaniambalam (992), Kurumarakkad (995), Kavanur (995), Andiyurkunnu (995), Chelembra (996), Indianur (996), and Muthuvattur (998), villages of Ernad taluk. Twenty-three villages exceed the sex-ratio limit of 1,100. The highest number of females per 1,000 males in the midland region of the district is in the Thalakkad village of Tirur taluk with 1,225. This village has the unique distinction of having the maximum number of females per 1,000 males among the villages of the district.

(iii) Lowland region

169. Only in 5 out of 56 villages in this region men out-number women. All these five villages are located in the Badagara taluk. They are Aroor (970), Ayencheri (976), Thiruvallor (990), Kuttiyadi (992), and Mokeri (993). Thuneri village has the maximum number of females per 1,000 males, the ratio being 1,197.

(b) Urban Areas

170. Only seven towns have greater number of males than females. They are Beypore, Calicut, Olavanna, Puthiyangadi, Feroke, Parayancherri and Badagara. Majority of the towns in the lowland have a preponderance of females over males. The following statement gives the number of females per 1,000 males for each town of the district classified by natural regions in the descending order of sex-ratios :—

Statement 88

171. The single year sex-ratio upto 10 years shows that the number of boys are higher than girls of all ages except for the age 3. The sex-ratios show a steady increase from the age-group 15-19 to 25-29 and then slowly comes down to 940 at the age-group 45–49. The sex-ratios of elderly persons (60+) show a favourable trend to females. The following statement gives the sex-ratios under different age-groups :—

Statement 89

Tirur taluk	279	161	927	48	1,710	196	9	24	8	266	1,737

Quilandy taluk has an abnormal figure of 2,386 females per 1,000 males in the category of Household Industry. Workers engaged in manufacturing other than household industry, in construction and in trade and commerce have lesser number of females than males in all the taluks. Sex-ratio of non-workers is highest in Tirur taluk.

173. Sex-ratios by major religions are furnished below :—

Age

174. A study of the age-structure is always helpful to assess the future trends of population. The population of the district may be broadly divided into five categories, viz, 'infants and young children', 'boys and girls', 'young men and women', 'middle aged men and women' and 'elderly persons'. The following statement gives the percentage under each category to the total population of the district :—

Statement 92

PERCENTAGE DISTRIBUTION OF POPULATION BY BROAD CATEGORIES

Infants and young children	0– 4	15·1
Boys and girls	5–14	27·8
Young men and women	15–34	30·9
Middle aged men and women	35–54	18·2
Elderly persons	55 and above	8·0

Among the elderly persons there are 186 centenarians of whom 81 are males. There are two men and one woman at the age of 120.

175. The following statement gives the percentage of males to total males and percentage of females to total females for total, rural and urban areas :—

Marital Status

176. The distribution of population by marital status is given hereunder :—

Statement 94

DISTRIBUTION OF 1,000 PERSONS OF EACH SEX BY MARITAL STATUS

Marital status	Total	Rural	Urban
1. Males	1,000	1,000	1,000

(*iii*) Widowed	111	108	128
(*iv*) Divorced or separated	28	29	22
(v) Unspecified	1	1	N

'N'—Negligible.

The above statement reveals that there are only 364 married men and 382 married women per thousand of each sex. The proportion of men who have lost their partners in life to total males is comparatively less than the proportion of widows to total females in the district.

Religion

177. Till the census of 1941 all important tabulations were based on religion. This was changed by adopting economic classification for all purposes in 1951 and subsequently shifting economic classification in favour of industrial classification in 1961. The numerically important religions of this district are Hinduism, Islam and Christianity. This district has a larger number of Hindus and Muslims than any other district in the State, the percentages to the total population of these religions of the State being 13·48 and 36·95 respectively. The following statement gives the distribution of population in the district by religions as per the 1961 Census:—

The literacy ratios in urban areas of this district are higher than that of rural areas. In regard to female literacy the Tirur taluk has low ratios for both rural and urban areas. The following paragraphs give a more detailed analysis of general literacy by rural and urban areas.

A. Rural Areas

182. The general literacy of the rural areas of this district has increased at an average rate of 6·9 per cent per year during the decade 1951–61. The 310 revenue villages which constitute the rural areas of the district fall under the three natural regions. The subjoined statement gives the number of villages classified under six literacy ranges and by natural regions in each taluk:—

Literacy by Age, Sex and Education

(a) Illiterates

186. There are 1,553,894 illiterates in this District of whom 635,588 are males. The number of illiterates in age-group 0-4 is 394,332 and this comprises the total population in the same age-group.

(b) Literates

187. The population in the age-group 0-4 has to be excluded from the total population for calculating the 'effective rate of literacy'. The effective literacy percentage of this district comes to 47·83 in 1961. The following statement furnishes the number of literates by educational levels and effective rates of literacy.

Statement 110

LITERATES BY EDUCATIONAL LEVEL AND EFFECTIVE RATE OF LITERACY

Educational level	Persons	Percentage of total literates	Effective rate of literacy (Percentage)
Total literates	**1,063,295**	**100·00**	**47·83**

Primary or Junior Basic	280,271	26·36	12·61
Matriculation and above	43,209	4·06	1·94

Only 4 per cent of the total literates have passed the Matriculation and above. The following statement furnishes the effective rates of literacy for males and females:—

Statement 111

EFFECTIVE RATE OF LITERACY BY SEX

Educational level	Effective rate of male literacy (Percentage)	Effective rate of female literacy (Percentage)

Literates (without educational level)	41·66	25·06
Primary or Junior Basic	15·74	9·53
Matriculation and above	3·01	0·90

It is significant to note that only 9 out of every 1,000 females have passed the Matriculation Examination or above.

Languages

188. More than 98 per cent of the total inhabitants of this district have their mother tongue as Malayalam. This is followed by Tamil, another language of the Dravidian Family. Here are the figures for the first ten languages in the district:—

Statement 112

Birth Place

189. 99 per cent of the total population of the district were born within the State of enumeration. Persons belonging to all the States of India except Dadra and Nager Haveli, Himachal Pradesh, Manipur, Nagaland, North-East Frontier Agency and Tripura and territory of Sikhim numbering more than sixteen thousand have been present in this district at the time of enumeration. The foreign nationals who have been enumerated in this district were born in Aden, Burma, Canada, Ceylon, France, Germany, Indonesia, Iran, Italy, Nepal, Netherlands, Pakistan, Portugal, Saudi Arabia, Singapore, Malaya and British Borneo, Union of South Africa, Spain, Switzerland, Thailand, United Arab Republic, United Kingdom and United States of America. The following statement gives the

Workers and Non-workers

190. In the earlier Indian Censuses, or atleast, at the last few Censuses, income or economic independence was recognised as the criterion for measuring the economy of the country. Account was made of all persons who were economically independent and of all those who were economically dependent. An intermediate category of economic semi-dependents was also introduced from the 1931 Census onwards. This category was called 'working dependent' in the 1931 Census, 'partly dependent' in 1941 and 'earning dependent' in 1951 and even here an element of income was introduced. It was felt that the strict application of the criterion of income or economic independence suppressed those who worked in family economic activities but did not actually earn an income like men other than the head of the household and women of the family or children working at cultivation or cottage industries of the household. In the 1961 Census, therefore, stress has been laid on work so that all people who work including family workers who are not in receipt of any income or working children who cannot earn enough for their maintenance are also reckoned as workers. Work includes not only actual work but also effective supervision and direction of work. In the 1951 Census population was divided into eight livelihood classes. In this Census instead of the eight livelihood classes of 1951 workers are grouped under nine industrial categories as follows:—

I Working as Cultivator;

II Working as Agricultural Labourer;

III Working in Mining, Quarrying, Live-stock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities;

IV Working at Household Industry;

V Working in Manufacturing other than Household Industry;

VI Working in Construction;

VII Working in Trade and Commerce;

VIII Working in Transport, Storage and Communications; and

IX Working in Other Services.

191. 30·63 per cent of the total population of the district constitute workers. Of these 4·88 per cent of the total population of the district are engaged in cultivation, 4·32 per cent in agricultural labour, 3·49 per cent in mining, quarrying, live-stock, forestry, fishing, hunting and plantations, orchards and allied activities, 1·99 per cent in household industry, 2·56 per cent in manufacturing other than household industry, 0·28 per cent in construction, 2·03 per cent in trade and commerce, 1·06 per cent in transport, storage and communications and 10·02 per cent in other services. The percentage of workers of this district is higher than that of the State in regard to mining, quarrying etc., in trade and commerce, in transport, storage and communications and in other services. The following statement gives the distribution of every thousand persons in a taluk into workers and non-workers by sex:—

193. The industrial category of workers may be broadly classified into three sectors. They are—

(*i*) Primary sector—Industrial categories I, II and III

(*ii*) Secondary sector—Industrial categories IV, V and VI

(*iii*) Tertiary sector—Industrial categories VII, VIII and IX

The distribution of 1,000 workers by sex in primary, secondary and tertiary sectors for the district and for taluks are as follows :—

Statement 116

Tirur taluk	408	401	435	173	150	255	419	449	310

The high percentage of workers in the primary sector of South Wynad taluk deserves special notice. Kozhikode taluk leads in the secondary and tertiary sectors with 21·9 and 53·8 per cent of workers respectively. In regard to female workers in these sectors South Wynad leads in the primary sector, while Quilandy in the secondary and Badagara in the tertiary sectors.

194. About half of the workers are in the age-group 15–34. Workers in this age-group are comparatively higher in all industrial categories except in the industrial category of cultivators in which the proportion of workers is highest in the age-group 35–59. The number of workers in the age-group 0–14 are less than those coming under the age-group 60 and over in all the industrial categories. The following statement gives the distribution of workers in each industrial category by broad age-groups.

Statement 117

The workers are mostly engaged in the industrial category of other services under each age-group except in the age-group 60 and over. Cultivators account for 31·5 per cent of the total workers under the age-group 60 and over.

196. The position of male workers is almost similar to total workers mentioned in the foregoing paragraph. The following statement sets out the distribution of 1,000 male workers in each age-group by industrial categories :—

Statement 119

197. In all the age-groups the proportion of female workers is highest in the category of 'Other Services'. Female workers engaged as agricultural labourers come second in all age-groups except in the age-groups 0–14 and 60 and over. The following statement presents the distribution of 1,000 female workers in each age-group by industrial categories :—

DISTRIBUTION OF WORKERS BY INDUSTRIAL CLASSIFICATION

198. 84·78 per cent of workers live in the rural areas of the district. The following statement gives the distribution of 1,000 workers in the rural areas of the district and each taluk by industrial categories :—

Statement 121

DISTRIBUTION OF 1,000 WORKERS IN THE RURAL AREAS OF THE DISTRICT AND EACH TALUK BY INDUSTRIAL CATEGORY OF WORKERS

In this district 18·4 per cent of total rural workers are engaged as cultivators. Among the taluks the percentage of cultivators is highest in the Ernad taluk. Highest proportion of workers in South Wynad taluk is engaged in mining, quarrying, live-stock, forestry, fishing, hunting and plantations, orchards and allied activities, while in all other taluks workers under 'other services' claim the highest proportion.

199. In the urban areas of the district the highest proportion of workers in Parappanangadi, Puthiyangadi and Tanur towns is engaged in fishing and other allied activities. More than 35 per cent workers in Beypore, Feroke and Olavanna towns are engaged in manufacturing other than household industry. Maximum workers in all other towns fall in the industrial category of 'other services'. The following statement gives the distribution of 1,000 workers in towns under each industrial category :—

More than half of the male cultivators are literates without any educational qualification. The proportion of literate male workers without educational level to total male workers is highest in all industrial categories except those engaged as agricultural labourers, in mining and quarrying etc., and in other services, where the illiterate male workers claim the highest proportion. In regard to female workers majority of them are illiterates.

201. The following statement sets out the distribution of 1,000 male and 1,000 female workers by educational levels in the urban areas of the district:—

202. 54 per cent of the total workers excluding cultivators and agricultural labourers are returned as craftsmen, production process workers and labourers not elsewhere classified. A detailed classification of workers excluding cultivators and agricultural labourers into occupational divisions along with their total number and sex-wise distribution is given below :—

Non-workers

203. The non-working population of this district comes to 16·1 per cent of the total non-workers of the State. Of the 18 lakhs non-workers of this district 11 lakhs are females. The following statement shows the distribution of non-workers by age-group :—

204. Among the non-working population 44 per cent are dependants, infants and disabled persons. Their proportion is much higher in rural areas when compared to urban areas. Better educational facilities in towns contribute to the higher percentage of full-time students in these regions. Among women, those engaged in household duties, claim the highest proportion while dependent infant, and disabled females come second. It is significant to note that 24 out of every 1,000 persons in urban areas are either seeking employment for the first time or employed before but now out of employment and seeking work. The following statement shows the distribution of 1,000 non-workers by type of activity in rural and urban areas:—

205. In the rural areas of the district there are 16,974 unemployed persons. Of these 28 per cent are confined to Kozhikode taluk closely followed by Quilandy and Tirur taluks. More than 80 per cent of the unemployed persons in the rural areas belong to the age group 15–34.

The following statement presents the taluk-wise figures of unemployed persons by age-groups for rural areas :—

206. Only about 15 per cent of the unemployed males under the age-group 15 years and above are illiterate. Educated unemployment is largest among females. More than 469 out of 1,000 unemployed females have passed the educational mark of Matriculation and above. The following statement gives the unemployed persons in the rural areas of the district under the age-group 15 years and above seeking employment (whether for the first time or not) and their distribution by sex and educational levels :—

Household Economic Data

208. Upto and inclusive of the Census in 1951 the economic tables were confined to the population as such and did not extend to household units. But in the 1961 Census certain items of economic data relating to the households as such were collected in addition to the economic data pertaining to each individual of the household. The data thus collected in respect of households related to household cultivation and household industry. The household cultivation for this purpose was defined to cover plots or parcels of land which are cultivated by the household itself, i.e., lands which lie within the village or in an adjacent village or within such a distance as to enable the household to work on the land or actively supervise its cultivation. If, however, the head of the household insisted that he was cultivating the land situated at a distance from his household, his statement was accepted and such land also was treated as coming within the scope of household cultivation. Cultivation for purposes of the above definition was taken to involve ploughing, sowing and harvesting and consists of the production of cereal crops (including Bengal gram) such as rice, wheat, jower, bajra, maize; roots and tubers like potato, yam, beet, sugarcane, etc., production of pulses, such as arhar, moong, mazur, urd, khesari, other grams, production of raw jute, raw cotton and kindred fibre crops. It does not include the following :—

A. Other Field Produces :—
   1 Production of other crops including vegetables not covered by the above items.
   2 Production of fruits and nuts in plantations, vines and orchards (like cocoanut, areca-nut, cashewnut, etc.)
   3 Production of wood, bamboo, cane, reeds, thatching grass, etc.
   4 Production of juice by tapping palms.
   5 Production of other agricultural produces (including fruits and nuts not covered by Sl. No. 2 and *flowers*) not covered above.

B. Plantation crops :—
   1 Production of tea in plantation.
   2 Production of coffee in plantation.
   3 Production of rubber in plantation.
   4 Production of tobacco in plantation (does not include tobacco which is cultivated in rotation with other cereal crops, in which case it would go under cultivation).
   5 Production of ganja, cinchona, opium, poppy, saffron, etc.
   6 Production of other plantation crops not covered above (under this category cardamom has been included as a plantation crop).

209. Household industry was defined as an industry not on the scale of registered factory conducted by the head of the household himself and or mainly by the members of the household at home or within the village in rural areas and only at home in urban areas. The particulars given in the following paragraphs are based on the data tabulated from a 20 per cent sample of household schedules.

210. Households engaged neither in household cultivation nor in household industry come to 73 per cent of the total sample households taken for detailed study. The proportion of households engaged exclusively in household cultivation is higher in rural areas when compared to urban areas. The percentage of " households engaged in household industry only " is more or less the same in rural as well as in urban areas. The following statement illustrates the above analysis :—

Statement 131

DISTRIBUTION OF 1,000 SAMPLE HOUSEHOLDS AMONG (i) ENGAGED NEITHER IN HOUSEHOLD CULTIVATION NOR IN HOUSEHOLD INDUSTRY; (ii) ENGAGED EITHER IN HOUSEHOLD CULTIVATION OR IN HOUSEHOLD INDUSTRY BUT NOT IN BOTH; AND (iii) ENGAGED BOTH IN HOUSEHOLD CULTIVATION AND HOUSEHOLD INDUSTRY IN THE DISTRICT

211. The proportion of households engaged neither in cultivation nor in household industry is minimum in South Wynad taluk when compared to other taluks of the district. South Wynad taluk is still conspicuous in regard to number of households engaged in household cultivation only. This proportion of households is far above the district rural percentage. The following statement shows the distribution of sample houses in each taluk by their broad classification :—

212. An analysis of the distribution of households by the type of interest in the land cultivated shows that in the district the largest percentage of households engaged in household cultivation are only tenants of private persons or institutions. The next largest percentage of households are those cultivating land either owned or held from Government only. The position is true in respect of rural and urban areas. The following statement gives the percentage distribution of sample households engaged in household cultivation in the district by interest in land cultivated by them.—

Statement 133

PERCENTAGE DISTRIBUTION OF SAMPLE HOUSEHOLDS ENGAGED IN HOUSEHOLD CULTIVATION IN THE DISTRICT CLASSIFIED BY THE INTEREST IN LAND

3 Partly held from Government and partly from private persons for payment in money, kind or share	9·56	9·59	8·49

213. Among the households in the district cultivating land owned or held from Government 33·15 per cent cultivate less than one acre of land only. The percentage of households shows a declining trend with the increasing slabs of size of land cultivated except in slabs 1·0 to 2·4 acres, 15·0 to 29·9 acres and 30·0 to 49·9 acres. In regard to households held from private persons or institutions for payment in money, kind or share the percentage of households progressively declines with the increasing slabs of size of land with the exceptions of the slabs 1·0 to 2·4 acres and 15·0 to 29·9 acres. Given below is a statement showing the percentage of sample households cultivating land under each type of interest by size of land cultivated in the district.

214. Among the total workers engaged in households with household cultivation only 62·84 per cent are family workers against the remaining 37·16 per cent of hired workers. 97·64 per cent of the total family workers and 93·08 per cent of hired workers in the above households live in rural areas. Taking the workers engaged in both households cultivation and household industry 73·99 per cent workers are returned as family workers while the rest are hired workers. In the rural areas of the district the percentages of family workers and hired workers in the category of households both engaged in household cultivation and household industry are 96·50 and 87·43 respectively.

215. The percentage of hired workers to total workers employed by the households engaged in household cultivation only shows an increasing trend with the increase in size of land cultivated except in respect of the slab 10·0 to 12·4 acres and 12·5 to 14·9 acres. The average number of workers in households engaged in household cultivation only is 2·66 persons against 3·49 in the households engaged in both household cultivation and household industry. The following statement presents the average number of family workers and hired workers engaged in the types of households mentioned above :—

Badagara Taluk (Area : 212·3 sq. miles ; Population : 319,913)

218. Badagara taluk is bounded on the north by the Tellicherry taluk, on the east by the North Wynad and South Wynad taluks, on the south by the Quilandy taluk and on the west by the Arabian Sea. This new taluk was formed on 1st January 1957. Consisting of 47 revenue villages this taluk is divided into two firkas, viz, Badagara and Nadapuram. The chief crops of this taluk are rice, cocoanut and pepper.

Badagara

219. Badagara, the northern-most town of this district lies just north of Kotta or Kuttiyadi river. This municipal town, formed on 1st October 1958 with an area of 8.24 sq. miles and comprising three revenue villages viz, Badagara, Nadukkuthazha and Puthuppanam, is situated on the sea-coast at the northern extremity of the Elathur-Badagara back-water. The town is linked with Calicut by west-coast road and by a broadgauge railway line, the distances being 29 miles and 28 miles respectively. The railway line runs parallel to the west-coast road and the Arabian sea. The historical ruined fort situated here originally belonged to the Kolattiri Rajas. In 1564 it was acquired by the Kadattanad Raja but was taken over by the Mysoreans at a later period. In 1790 it was taken from Tippu Sultan by the British who handed over the fort to the Kadattanad Raja. He converted this historical monument into a Brahman feeding house, which was afterwards transferred to the Paravantala temple in Badagara village which is dedicated to Subramanyan. This historical temple was reconstructed by the Kadattanad Raja probably in the year 1864. Near this temple there is an important well. " The well is a fine masonry-built structure, still in excellent preservation and at the spot where Tacholi Othenan is said to have cleared it, it is twenty feet six inches between perpendiculars. There is a massive conical-shaped block of laterite some three feet in height planted erect in the ground about fifteen paces from the well, and one mythical tradition says he jumped the well with this and a jack tree in his arms....." Tacholi Othenan, the hero of the Ballads of North Malabar was born at Tacholi Manikkoth near Meppayil, a mile from Badagara town. The Lokanâr kavu, the historical temple, which is mentioned very frequently in the *Vatakkan Pattukal* is situated in Memunda village, 3 miles south-east of Badagara town. The *Jamayath* Mosque situated on the beach is 114 by 42 feet. There is also a Catholic church here. Badagara Port is open to foreign trade and usually coasting steamers and sailing vessels call at the port. The Government Arts and Science College is located at Madappally about 3 miles from Badagara. There is a Secondary Health Centre and an Ayurvedic Hospital besides many public institutions.

Chombala

220. Chombala, situated five miles north of Badagara, is a Basel Evangelical station. The mission was started there in 1849. Chombala Mission has its branches at Mahe, Badagara, Mavarattu, Perambra and Karakkad.

Kuttipuram

221. In Kuttipuram village, 10 miles north-east of Badagara is situated the ancient palace of Kadattanad Valiya Raja. The general orders issued by Tippu Sultan to all the different detachments of his troops are available from the records found in the Palghat Fort after its capture in 1790. In pursuance of this direction

2,000 Nairs and their families living in this old fort at Kadattanad were attacked by the Mysorean detachments in March 1789 and they were subjected to submission to Tippu's terms which were "a voluntary profession of the Muhammadan faith, or a forcible conversion with deportation from their native land. The unhappy captives gave a forced assent, and on the next day the rite of circumcision was performed on all the males, every individual of both sexes being compelled to close the ceremony by eating beef". There is a Siva temple at Kuttipuram.

Kuttiyadi

222. Kuttiyadi is situated about eighteen miles from Badagara. There is an old redoubt which belonged to the Kottayam Raja and on a later date was seized by the Mysoreans. This fort mounting 4 guns was taken over by the Kottayam Raja in May 1790. Kuttiyadi Pass was strategically important at the time of Pazhassi's freedom struggle. 'In the course of excavations conducted in 1957 the shafts of the two golden swords supposed to have been used by the Pazhassi Raja were unearthed'. There is an old *Jamayath* mosque here.

Nadapuram

223. About eleven miles north-east of Badagara is situated Nadapuram. There is an old *Jamayath* Mosque at Nadapuram. Two miles from Nadapuram is located the Orakatari Ganapathi temple. The *Thalapoli* festival conducted here in January–February attracts thousands of devotees.

Ernad Taluk (Area: 873·3 sq. miles; Population 524,294).

224. Ernad is the largest taluk in the State. It is bounded on the north by Kozhikode and South Wynad taluks on the east, by the Nilgiri district of Madras State, on the south by Perintalmanna and Tirur taluks. and on the west by Tirur taluk. The eastern portions of this district have unsurveyed areas to the extent of 327·84 sq. miles. Portions of this taluk were transferred to the newly formed Tirur taluk on Ist January 1957. The present Ernad taluk consists of four firkhas viz, Kondotti, Malappuram, Manjeri and Wandur. There are 64 villages in the taluk including one town. The chief crops are pepper, arecanuts, cocoanuts and rice. This taluk has the world's oldest teak plantation.

Areacode

225. Nine miles of Kondotti, Areacode is situated on the south bank of Beypore river. Areacode and the neighbourhood were the scenes of many murders and forcible conversions during the Malabar Rebellion which broke out during 15th October 1921. Small boats can ply at all seasons of the year as far up the Beypore river as Areacode. Areacode has a considerable timber trade from very early times. Pottery is the main industry here. 'There are several undeciphered *Vattezhuthu* pillar inscriptions here. In the course of the construction of a local school some caves were excavated. The caves six feet deep lead to two rooms and a kitchen underground where shreds of pottery and household utensils were found". The Sullamuslam Arabic College is situated here besides one Government Dispensary and an Oriental Secondary School.

Kalikavu

226. Kalikavu is situated about twenty-one miles north-east of Manjeri. There are a number of rubber plantations here. Kalikavu was also a centre of 1921 Muslim out-breaks. Kalikavu is linked with Edavanna and Nilambur by motorable roads.

Karuvarakundu

227. Karuvarakundu is about 27 miles away from Nilambur. At Karuvarakundu there are some good tea estates and rubber plantations, besides thick forests. The waterfall, a few caves, temples, churches and mosques are some of the items of importance.

Kondotti

228. About 16½ miles from Calicut, Kondotti is an important place on the Calicut-Madras Road. Kondotti, which was the stronghold of the Muslims, was ablaze with rebellion in 1921. Some fanatics even raided the Sub-Registrar's Office on 28th October 1921 and burnt the records. Here is a famous mosque called *Kondotti thakkiya* which is believed to have been built in 948 M.E. (A.D. 1773) by the then Tangal named *Muhammed Shaha* and in which lie his mortal remains. The *Valia Nercha* is celebrated here for five days annually from 13 to 17 Arabic month (*Kumbhom —Meenom*). The Pazhayangadi mosque is about five centuries old. There are many public institutions here.

Kottakkal

229. A place well known for the Ayurvedic system of treatment Kottakkal is situated seven miles from Malappuram. Kottakkal has a fortified palace of the *Kizakke Kovilakam Rajas*, one of the three branches of the Zamorin's family. The Ayurvedic College (Patasala) is attached to the Kottakkal Arya Vaidyasala established as early as 1902.

Malappuram

230. Malappuram is an important place on the Calicut-Madras Road, the distance from Calicut being only about 32 miles. Seven miles south of Manjeri, Malappuram is one of the Revenue Divisional

Headquarters of Kozhikode District. The ruined fort of Tippu Sultan stands here as a historical monument. Malappuram was the centre of Muslim risings of 1841, 1843, 1849, 1851 and 1921. The Malabar Special Police which was formed to suppress the Muslim fanatical outbreaks of 1921 still has their headquarters here. There are two churches at Malappuram one of which is an old Roman Catholic Church. The Malappuram *Jamayath* Mosque is of some importance. The annual *Nercha* is held here usually for four days in the month of April. The sacred places of Muslims in addition to the above mosque are Hajyar Palli and Sayyid's Jarum. Besides the above religious institutions there are three temples dedicated to Siva viz, Tripuranthakan temple, Mannar temple and Channath temple. There are a number of public institutions here.

Manjeri

231. Manjeri, the headquarters of Ernad Taluk, is situated 27 miles from Calicut. There are a number of pre-historic sites here. For a short period in 1766 Manjeri was Hyder Ali's headquarters. With Manjeri as headquarters Hyder Ali's troops spread over the face of the country and they set fire to houses, cut down fruit trees and destroyed cattle and many unhappy inhabitants were brought as prisoners. According to Wilk's *Historical Sketches* these prisoners were at first either beheaded or hanged 'but as their numbers increased, Hyder conceived the plan of sparing them for the use of his former territories. This cure for rebellion in one province and for defective population in another, of which such numerous examples occur in the jewish history, was not successfully practised by Hyder. The captives were uncared for, and owing to privations and a violent change of climate, of 15,000 who were removed, it is supposed that 200 did not survive the experiment'. The historically important Manjeri Political Conference was held here on 28th April 1920 to discuss the Montague-Chelmsford Reforms of 1919. This Conference rejected the Chelmsford Reforms against the strong opposition of Dr. Annie Beasant who was present at the Conference. Manjeri was also a centre of the Malabar Rebellion of 1921. There is a pagoda known as Srimuttra Kunnu or *Kunnath temple* dedicated to Durga. The inscription in the east wall of the temple shows that it was built by Manavikrama in 827 M.E. or (1651 A.D.). Another inscription on the north wall states that it was built by the same gentleman on 833 M.E. (1657 A.D.). This temple was attacked by the Muslim fanatics under the leadership of Attan Kurikkal in 1849. The annual *Pooram* festival is held during the month of March-April. There are three mosques and two churches, Protestant and Catholic at Manjeri. Besides the above there are many public institutions including taluk office, munsiff's court, etc. Manjeri continued as a census town in 1961.

Nilambur

232. Situated 45 miles from Calicut on the Calicut-Gudalur Road, Nilambur is an important centre for timber trade. Nilambur is connected with Shoranur junction with a broadgauge railway line. Nilambur is conspicuous for its large Teak plantations. The Nilambur Teak Plantations were first suggested by Mr. Conolly, Collector of Malabar in 1840. The bamboos obtained from the forests of Nilambur are largely used by the Birla's Paper Pulp Factory at Calicut. There are two temples here one dedicated to Siva and the other to Vettakkorumakan. The latter temple belongs to the Nilambur Kovilakom. There are large dolmens, menhirs and rock-cut caves here.

Kozhikode Taluk (Area: 379·1 sq. miles; Population: 660,372).

233. Kozhikode taluk is bounded, on the north by the Quilandy taluk, on the east by South Wynad and Ernad taluks, on the south by Ernad and Tirur taluks and on the west by the Arabian Sea. Consisting of 71 villages this taluk is divided into four firkas viz, Chevayur, Koduvalli Kozhikode town and Kunnamangalam. Rice, cocoanuts, pepper and betelnuts are the important crops.

Beypore

234. Beypore lies at the mouth of Beypore river six miles south of Calicut. In 1961 Beypore is treated as a Census town. It consists of the area falling within Beypore and Cheruvannur villages and portion of Naduvattom village. *Vaypura* or *Vada Parappanad* are the former names of Beypore. Tippu Sultan visited Beypore twice during April 1788. The Calicut Resident in his letter dated 14th April 1788 says that 'the Nabob has been twice to Beypore, where on the 12th he began the construction of a strong fort, and it is supposed he intends to transfer the trade of Calicut thither', and next day he reported that 'the Nabob was to proceed that day to Beypore to select a site to build his new city'. Even now Beypore flourishes as an important trade centre. Beypore Port is now part of Calicut Port. The Siva temple at Beypore is conspicuous for its beautiful carvings. The boat-building yard here is under construction. Cheruvannur village is famous for its tile works and other by-products of clay. The tiles produced here are transported to Burma, Ceylon and Singapore.

Calicut

235. The early history of Malabar centred round Calicut. This important town is believed to have been founded by the Zamorin. The Zamorins were

originally Eradis of Nediyirippu in Ernad taluk. The Zamorin in his attempts to establish his supremacy in Malabar had to fight Porlattiri for almost 48 years. After that he had to adopt strategical methods and he attacked Porlattiri's fort and compelled the latter to take refuge in the Kolathiri Kingdom. Ibn Batuta who visited Calicut during the period 1342-47 records that Calicut is 'one of the great ports of the District of Malabar and in which merchants from all parts are found'. The Chinese Muslim Ma Huan who came to Calicut in the earlier periods of the 15th century also gives interesting accounts of the people, their customs and manners. Abdur Razzak, the Persian ambassador, visited Calicut as early as 1442. He described Calicut as 'a perfectly secured harbour, which, like that of Ormuz, brings together merchants from every city and every country'. Two years later Nicolo Conti the first Christian traveller described Calicut as a maritime city of 8 miles in circumference, a notable emporium for all India abounding in pepper, lac, ginger, a larger kind of cinnamon, myrobalans and Zedari'. Other important foreign travellers are Athanaseus Niketen (Russian traveller) Hie roinimo Di Santa Stefana (Genovese traveller) and Pero De Covilham (a Portuguese diplomat). On 27th May 1498 Vasco Da Gama landed at Kappad a few miles north of Calicut for trade contacts with the Malabar coast. His visit to Calicut is an epoch making event in the history of Kerala. Portuguese established a fort in Calicut in 1513. The English, the French and the Danes were allowed by Zamorin to construct forts at Calicut. The old palace of Zamorin is situated at Kottaparambu very near Mananchira. Calicut Municipality was established on July 3rd 1866. Measures are being taken to convert this Municipality into a Corporation. The major Government factories situated here are the Kerala Soap Factory, the Government Hydrogenation Factory and the Government Oil Factory. The timber yard at Kallai is the second largest in the world. Calicut is still an important port on the west-coast. The lighthouse at Calicut was constructed in February 1847. The important temples are Sreekanteshwar temple, the Tali temple, Tiruvannur temple, Varakkal temple, Bilathikulam temple, Arikkodi Kavu temple and Kokkolikottu temple. The important mosques are the Kuttichira mosque, the *Pazhaya Palli* and Sheik kinde *Palli*. The construction of the ancient Roman Catholic Church dedicated to 'Mater de Deos' was completed in 1725. "Though from the architectural point of view, it is lacking in merit, the building is picturesque still. The great bell is dated 1750; the smaller and older bell cracked and was recast in 1853. The images of the virgin Mary and the crucifixion and a painting of the Madonna and Child were brought out by the Portuguese for their Chapel at Tanur, and thence moved to Calicut. They are reputed to be the work of the best artists of the age and are still in a state of good preservation". The then Zamorin granted a garden in perpetuity for the support of the church. In December 1878 the Malabar and Canara Portuguese Missions were, by the Bull of Pope Pius IX, placed under the jurisdiction of Jesuits under whom it remains. The Anglican and Basel Mission churches at Calicut were built during the middle of the nineteenth century. There are a good number of schools and colleges both within and in the neighbourhood of Calicut. In 1950 the All India Radio Station was started here. Besides the above institutions there are a number of hospitals, dispensaries, public offices, etc., including one Medical College.

Mavoor

236. Mavoor village with its pulp factory is growing as an industrial centre. The factory will be commissioned shortly.

Tamarasseri

237. Tamarasseri is an important place on the Calicut-Wynad route. This is one of Tippu Sultan's Gun-roads. Tamarasseri Ghat is used for the export of coffee and other articles from Wynad.

Quilandy Taluk (Area: 294·5 sq. miles; Population: 366,343)

238. The present Quilandy taluk was part of former Kurumbranad taluk of Malabar District. The new taluk was formed on 1st January 195-. The Kotta or Kuttiyadi river separates Quilandy taluk from Badagara. This taluk is bounded on the north by the Badagara taluk, on the east by South Wynad taluk, on the south by Kozhikode taluk and on the west by the Arabian Sea. It consists of three firkas, viz, Balussery, Perambra and Quilandy. There are 57 revenue villages in the taluk. One of them is a census town, Pantalayini. The chief crops of this district are rice, cocoanut and pepper.

Balusseri

239. Balusseri is an important place of this taluk. Here is a famous temple dedicated to *Vettakorumakan* which is now in ruins. There is a Government High School and a National Extension Block here.

Kappad

240. Vasco Da Gama dropped his first anchor here in the year 1498. Gaspar Correa describes his first landing as follows:—"The ships," after sighting Mount Deli and passing Cannanore, "continued running

along the coast close to land, for the coast was clear, without banks against which to take precautions; and the pilots gave orders to cast anchor in a place which made a sort of bay, because there commenced the city of Calicut. This town is named Capocate" (Kappad). It is about a mile west of the Tiruvangoor Bazaar which is at the 10th mile of Calicut-Cannanore road. A monument has been erected here.

Kottakkal

241. Kottakkal is situated on the mouth of Kuttiyadi river, three miles south of Badagara and one mile west of Moorad Bridge. Here one can see the remnants of the historic fort of Kunhali Marakkar who fought heroically against the Portuguese. This place is in Payyoli village. In olden days there were 40 mosques for each of the 40 muslim families here. They belonged to the Royal family of Kunhali Marakkar. In 1600 Kottakkal was captured by the Portuguese with the help of Zamorin. At present there is an important mosque, known as Kottakkal *Palli*. A big sword said to have been used by the famous warrier Kunhali Marakkar is kept in this mosque. The Sacrifice Rock is located opposite to the Kottakkal Port. Hamilton observes that the Sacrifice Rock lying off Kottakkal about 8 miles in the sea is so called because 'when the Portuguese first settled at Calicut, the Cottica (Kottakkal) cruizers surprised a Portuguese vessel and sacrificed all their prisoners on that Rock'.

Pantalayini-Kollam

242. Pantalayini-Kollam, the historical place, is the 'Patale' of Pliny, the 'Pandarani' of the Portuguese chronicles, the 'Flandarina' of Friar Odoric, the 'Fundreeah of *Tahafat-ul-Mujahidin* and the 'Fandaraina' of Ibn Batuta. Malik Ibn Dinar founded the mosque at Pantalayini-Kollam in the seventh century and he appointed one of his ten sons as its Kazi. Logan in his 'Malabar' observes that "an inscription on the Muhammadan granite tombstone still standing at Pantalayini-Kollam, recites, after the usual prayer, that Ali-Ibn-Udthorman was obliged to leave this world, for ever to the one which is everlasting, and which receives the spirits of all in the year 166 of Hejira, so called after Muhammed the Prophet left Mecca for Medina". This ancient mosque resembles the mosque at Mecca. The dome is covered with sheets of copper. The Visharikavu temple dedicated to Bhagavathi is situated two miles from Quilandy town. The annual festival is conducted for a period of 8 days in March-April while the festival on the final day is known as *Kaliyattam*. Besides the above mentioned religious institutions there are a good number of mosques and temples. Pantalayini is treated as a census town in 1961.

Quilandy

243. Quilandy is the headquarters of the Quilandy taluk. It is about 24 miles away from Calicut. Sayed Abdulla Bin Sayed Abdulla Hajee founded an old mosque here in 1779. There is an old temple at Saktankulangara amsom. The inscription on a slab in front of this temple depicts that *Kalasam* (purification) ceremony of the temple was performed in 1730 A.D. "According to this inscription the temple was built during the reign of Udayavarma, the scion of Khatolkacha, the son of Bhima". There are many public offices here including Government dispensary, taluk office, schools, etc.

Urakuzhi Waterfall

244. This is situated in the hilly tract of Kayanna village of this taluk. The site is a picturesque one surrounded by lofty hills and virgin forests. The nearest approach to the site by road is from Tamarasseri or Balusseri. The Urakuzhi Scheme is the only Hydro Electric Project under investigation in this district. This scheme envisages the construction of a reservoir above the Urakuzhi waterfalls in the head reaches of the Kuttiadi (Murat) river.

South Wynad Taluk (Area: 532·6 sq. miles; Population 185,055)

245. South Wynad, the least populous taluk in the district was part of old Wynad taluk. This taluk is bounded on the north by the North Wynad taluk and the Mysore district, on the east by Mysore and Nilagiri districts, on the south by Ernad and Kozhikode taluks and on the west by Kozhikode and Badagara taluks. The whole taluk lies in the rural areas. Consisting of 20 villages this taluk is divided into 3 firkas Kalpetta, Kaniyanbetta, and Sultan's Battery. The chief crops are hill produces like coffee, tea, etc.

Ambalavayal

246. Situated 23 miles from Vythiri, Ambalavayal is an important centre of Wynad colonisation. The Chingeri colony near Ambalavayal was started in 1957-58 to settle 100 families of Scheduled Tribes. Megalithic burial sites have been discovered from Chingeri in Ambalavayal amsom.

Kalpetta

247. Kalpetta is six miles north of Vythiri on the way to Mysore. This place is stated to be one of the abodes of Kuruchiyas, Kurumbars, Paniyars, the aborginal tribes of Wynad. The munsiff court is situated here. It contains in addition to public office, a hospital, a high school, a middle school and some primary

schools. It is the most important centre of trade in the taluk and is thickly populated.

Lakkidi

248. Lakkidi with a panoramic background is situated 36 miles from Calicut on the Calicut-Mysore frontier road. This place rose to importance from the time of the Mysorean invasion. The old Mysorean stockade (Lakkidikotta) stood here. *Lakkidikotta* means literally stick or timber fort, and this is how the place at the head of Tamarasseri Ghat obtained its name. The deep valleys of the green hills can be seen from here. It is also a tourist centre.

Pukkot lake

249. This lies about two miles north of Lakkidi. It is a natural sheet of water among hills, the only thing of the kind of which the district can boast. On the picturesque bank of the lake the European planters had built houses and a club. These establishments are now in a dilapidated condition. There is an old European cemetery close to the lake, where there are some graves and tombs.

Sultan's Battery

250. Sultan's Battery, otherwise known as Ganapativattam (literally the circle or range of the God Ganapathi), is situated twenty-one miles from Vythiri and sixty miles from Calicut on the Calicut-Mysore frontier road. It is called Sultan's Battery from the fact that Tippu Sultan had a fort here. There was a British regiment stationed here in the early part of the 19th century to suppress the freedom struggle of Pazhassi Raja. To the south-west of Sultan's Battery lies the Edakkal Mala, one of the principal hills of the taluk. "On its western slope, near the crest, is to be found the Edakkal cave which has excited the curiosity of many an archaeologist and anthropologist. The cave contains interesting carvings on its walls. In addition there are some inscriptions and a few small figures and symbols. The Edakkal carvings clearly represent human and animal figures and objects for human use and symbols. The most interesting features of the sculptures are the frequent human figures with a peculiar head-dress. The figures of animals are indistinct. The symbols that are of frequent occurrence in the engravings are the *Swasthika* in various forms and specimens of the familiar circular "Sun-symbols". There is evidence also of some magic squares". The Ganapathi temple which belongs to the Kottayam Raja is the most important one. Tippu Sultan attacked and destroyed the temple leaving behind the idol and a few monolitic stones. There is an inscription on the *Dipastambha* of this temple. In the north court of the Mariamman temple there is an old stone inscription. The *Vasti temple* which belongs to Jains is preserved as an ancient monument by the Archaeological Department of the Government of India. The deciduous forests of the neighbouring village produce valuable timber trees and articles like wax, honey and resin.

Vythiri

251. Vythiri, the headquarters of the South Wynad taluk, is situated 39 miles away from Calicut on the Calicut Mysore Frontier Road. All the important public offices are situated here. There is a Roman Catholic Chapel here. The Kunnath temple is now in ruins.

Tirur Taluk (Area : 278·4 sq. miles ; Population 561,212).

252. This taluk was carved out by taking 30 villages of old Ernad taluk and 43 villages of old Ponnani taluk, on 1st January 1957. It is bounded on the north by the Kozhikode taluk, on the east by Ernad and Perintalmanna and Ottapalam taluks, on the south by the Ponnani taluk and on the west by the Arabian Sea. Consisting of 73 villages and 5 towns this taluk is divided into five firkas, viz, Kuttipuram, Tanur, Tirur, Tirurangadi, and Vengara. Rice and cocoanut are the important crops.

Feroke

253. Feroke of Ferokabad, the place proposed by Tippu Sultan for his capital of Malabar, is situated seven miles south of Calicut on the Calicut-Madras Road. The remnants of the fortress built by the Tippu Sultan in 1788 are seen half a mile south-west of the present town. Tiles and ceramic industries are concentrated here. The Farook College and the Rouzathul Uloom Arabic College are the important institutions.

Kadalundi

254. Kadalundi is situated nine miles south of Calicut. This is an island formed by the Kadalundi and Beypore rivers on three sides and by the Arabian Sea on the west. This small island is connected with Calicut by rail. Tundi was one of the glamorous sea ports of ancient Kerala. Periplus Maris Erythraeai describes it as five hundred *stadia* from the mouth of the Mouziris river which has been pretty satisfactorily identified with *Muyiri-Kodu* or Crangannore. William Logan identifies Tundi with Kadalundi and rejects the other versions pertaining to Ponnani. For that he argues that the mouth of the river Ponnani is a long way short of 500 *stadia* from the mouth of Cranganore river. This account relates to the first century A.D. *Nirum Kayicha Kotta* temple is dedicated to Lord Ayyappan.

106/1—10a

Mambram

255. Mambram is situated on the north bank of Tirur Angadi river. Logan's Manual gives the following account of Mambram. " In the early part of the 18th century a *Tangal* named Sayyid Hussain Ibn Alabi Jiffiri Tangal, who is supposed to have come from Arabia, settled at the place called Mambram or Mampuram which was then an extensive waste. It was reclaimed and planted with cocoanut trees for the growth of which the soil appears to be admirably adapted. He lived in a house called Taramal, and died in the month of Shaban in the Hijira 1169..... ..... The Mukham or Shrine intended and used primarily as a receptacle for the dead bodies of the principal Tangals is a rectangular building constructed on very solid foundations, and divided into large hall like rooms. The building has upper storeys; in one portion there are three and in the other two storeys. The second floor of one of the rooms stands on a higher elevation than that of the other ; and over it an upper floor stands, the circular wall of which is capped by the dome. On the foundation floor of the domed hall are laid 9 coffins, including in them those of Sayyid Alabi who died in 1019 M.E. (Hejira 1260), and his uncle and those of their nearest deceased relatives. The other hall is the place where verses from the Koran are read for the salvation of the soles of the deceased ". The Mambram mosque is now situated in the place of a Hindu temple which was converted into a mosque in 1921. During the Malabar Rebellion of 1921 the false report of the destruction of this mosque led to large scale atrocities by some fanatics.

Mangalam

256. Situated about six miles south-west of the Tirur railway station and on the bank of Bharathapuzha, Mangalam is the birth place of Poet Laureate Vallathol Narayana Menon.

Parappanangadi

257. Parappanangadi railway station is situated 16 miles south of Calicut railway station. It is an important business centre. The Palace of the Kshatriya family of Parappanad Rajas is located at a short distance from the railway station. It was from this family that the consorts of the Rani's Travancore family were usually selected. Parappanangadi is treated as a census town in 1961.

Tanur

258. Situated, south of Calicut, Tanur is treated as a census town in 1961. The origin of the word Tanur is from 'Tanniyur', meaning the village of *Tanni* trees. St. Francis Xavier visited this place in 1546, and converted the local chieftain. The Jamat mosque is the most important mosque here. Keraladhiswaram temple is one of the ancient temples of Kerala. The Trikkoyikad temple believed to have been founded by Parasurama is famous for the mural paintings of Brahma, Vishnu, Siva and Narasimhamurthi. Tanur has a fisheries demonstration factory and a fish curing yard.

Tirunavayi

259. The Tirunavayi railway station is situated on the banks of Bharathapuzha 31 miles south of Calicut. Tirunavayi Siva temple is so called on account of its having been, it is believed, founded by the famous nine saints. This historical place witnessed several feasts and coronations. These festivals and coronations were known as the great *Magha* or *Mahamagha* which was afterwards spelt as *Mamangom*. This historical and colourful ceremony was described by William Logan in his *Malabar Manual* as follows :—

" The tradition is that this festival was instituted in the days of the emperors (Perumals), that is, prior to the Kollam Era, and that when the last emperor set out for Mecca and left the country without a head, the duty of celebrating it devolved on the Raja of the locality where the festival used to take place that is, on the *Valluvanad* alias *Vellatri* alias *Arangott* Raja. And this arrangement seems to have been continued up to the twelfth or thirteenth century A.D., when the power of the Zamorins (chiefly through Muhammadan influence and arms and trade) became supreme in all Keralam. From that time down to the last celebration of the festival in 1743 the Zamorins were present at this festival as Suzerains of all Keralam, including Travancore, which as a Malayali State only attained to the first rank shortly after the date of the last *Mahamakham* festival in 1743. Those who acknowledged the Zamorin's suzerainty sent flags in token of fealty, and the places where these flags used to be hoisted at festival time are still pointed out. The Valluvanad Raja who is still represented in the management of the Tirunavayi temple by one out of the four Brahman Karalars, instead of sending a flag used to send men called *Chavers* (men who have elected to die) whose office it was to endeavour to cut their way through the Zamorin's guards to his throne.... The festival used to continue for twenty-eight days every twelfth year when the planet Jupiter was in retrograde motion in the sign of *Karkadagam* or Cancer or the Crab, and at the time of the eighth Lunar asterism in the month of *Makaram* the festival used to culminate". Another memorable event that had happened here in the recent period was the immersing of the ashes of Mahatma Gandhi, the Father of our Nation,

in the Bharathapuzha. In memory of this a statue of Gandhiji was constructed here. The *Sarvodaya Mela* is conducted here annually in the month of January or February.

Tirur

260. Situated 26 miles south of Calicut is the headquarters of Tirur taluk. It is connected with Calicut by road and railway. Tirur is an important trading centre in fish and betel leaves. Fresh and dried fish are exported everyday through the Tirur railway station to all neighbouring and distant places. There are many public institutions here.

Trikandiyur

261. This place is associated with the *Tunchath Ramanujan Ehzuthachan*, who played a significant role in the cultural revival of the Malayalam language. He made valuable contributions to the Malayalam literature through his *Kilipattus* based on the cardinal principle of *Bhakti*. *Thunchan Parambu* is situated about one mile west of Tirur railway station. Logan observes that "It was no less than a revolution when in the seventeenth century one Tunchath Ezhuthachan, a man of the Sudra (Nayar) caste, boldly made an alphabet—the existing Malayalam one—derived chiefly from the Grantha—the sanskrit alphabet of the Tamils, which permitted of the free use of the Sanskrit in writing—and boldly set to work to render the chief Sanskrit poems into Malayalam. Regarding the obstacles which he had to meet and the opposition which was offered to him Mr. F. W. Ellis has the following remarks in a dissertation on the Malayalam language: 'The difficulties with which he had in consequence to struggle gave him an energy of character which it is probable he would not have possessed had his caste been without blemish. The Brahmans envied his genius and learning, and are said to have seduced him by the arts of sorcary into the habit of ebriety†, wishing to overshadow the mental powers which they feared. The poet, however, triumphed on his habits, though he could not abandon them, and, in revenge against those whom he considered the cause of his debasement, he opposed himself openly to the prejudices and the intolerance of the Brahmans. The mode of vengeance he chose was the exaltation of the Malayalam tongue, declaring it his intention to raise this inferior dialect of the Tamil to an equality of the sacred language of the gods and *rishis*. In the prosecution of this purpose he enriched the Malayalam with the translations all of which, it is said, he composed while under the immediate influence of intoxication. No original compositions are attributed to him'. Tunchath Ezhuthachan's success even in his own lifetime seems to have been great, and it was in consequence of his influence and success that Malayalam as a written language, obtained its most recent development.....Tunchath Ezhuthachan's memory, however, is not likely to die down, for relics thus lost are easily replaced and the sacred honours paid to them are easily shifted to the substitutes". Even today the sacred sand at *Tunchan Parambu*, is taken away by the people from far and near to be used on the occasion of the *Vidyarambham*. It is believed that this sand possesses extraordinary powers of inspiration in the field of education. Steps are being taken to construct a memorial to *Tunchat Acharyan*. Thuchan's birthday is celebrated here annually as *Tunjan Dinam*. The Trikandiyur Siva temple situated here is associated with Thunchath Ezhuthachan. Trikandiyur is treated as a census town since 1941.

Vettathputhiyangadi

262. Situated at a distance of 3 miles from Tirur railway station this place was formerly the seat of the Raja of Vettathnad. The Triprangod temple dedicated to Siva lies about two miles south of Vettathputhiyangadi. The ceremony of *Sanghabhishekam* (pouring of water on the head of the idol by means of a conch shell), is supposed to be the most acceptable offering to Siva and this is performed largely by the people under the honest belief that their life will be prolonged. The Garudankavu temple is dedicated to the Vishnu's bird, Garuda. Such dedications being rare the temple is regarded with considerable reverence and is also largely resorted to by the Hindu population for protection from any '*Sarpa pida*'. There is an important and old mosque here.

†Another version is that his parents used to administer a little toddy to him to get over stammering.

** This table includes area, houses and population of unsurveyed forest areas also.

Note.—1 Under columns 3 (*a*) and 3 (*b*), (*a*) represents the area figures furnished by Surveyor General of India, and (*b*) represents the area figures furnished by the State Survey Department. The urban areas are based on the area of individual towns furnished by the local authorities. The rural area for a district is obtained by subtracting the urban area from the State survey area.

2 The sq. km. and density figures of urban areas of District/State are worked out using the area figures corrected up to two places of decimals obtained by adding the areas of towns in the respective units and not using the area figures given in the table. In addition to this the figures relating to sq. km. are further adjusted to make the District/State totals agree.

3 Population per sq. mile has been calculated on area figures supplied by State Survey Office.

† These two are only portions of two villages consisting of paddy field and uncultivated land lying in the rural areas. The urban portions of these villages lying in two municipal towns are inhabited.

Effect of States Reorganisation in 1956

1. Sub-section 1 (b) of section 5 of the States Reorganisation Act, 1956 (Central Act 37 of 1956) gives the constitution of the Malabar district. The whole of section 5 is reproduced below :—

"5. (1) As from the appointed day, there shall be formed a new Part A State to be known as the State of Kerala comprising the following territoriess, namely :—

(a) the territories of the existing State of Travancore-Cochin, excluding the territories transferred to the State of Madras by section 4; and

(b) the territories comprised in—

(i) Malabar district, excluding the island of Laccadive and Minicoy, and

(ii) Kasargod taluk of South Kanara district;

and thereupon the said territories shall cease to form part of the States of Travancore-Cochin and Madras respectively.

(2) The territories specified in clause (b) of sub-section (1) shall form a separate district to be known as Malabar district in the State of Kerala".

Territorial Redistributions since 1956

2. In exercise of the powers conferred by the Madras District Limits Act 1865 the Government of Kerala with effect from 1st January 1957 altered the jurisdiction of Malabar district and trifurcated the same into the new districts of Cannanore, Kozhikode and Palghat as per Notification No. SRN3-29174/56, dated 19th December 1956. The district of Kozhikode thus formed comprised the following :—

Names of divisions comprised in the district	Names of taluks comprised in the division	Names of firkas comprised in the taluk
1 Kozhikode	1 Badagara	1 Badagara
		2 Nadapuram
	2 Quilandy	1 Perambra
		2 Quilandy
		3 Balussery
	3 Kozhikode	1 Kozhikode Town
		2 Chevayur
		3 Kunnamangalam
		4 Koduvalli
2 Malappuram	1 Ernad	1 Manjeri
		2 Wandur
		3 Malappuram
		4 Kondotty
	2 Tirur	1 Tirurangady
		2 Tirur
		3 Vengara
		4 Tanur
		5 Kuttipuram

With effect from 15th March 1957 the following change of jurisdiction was made as per Notification dated 11th March 1957 given below :—

"In modification of Notification No. SRN3-29174/56, dated 19-12-1956 it is hereby notified that South Wynad taluk, which from 15-3-1957 shall cease to form part of Cannanore district, shall with effect from the said date, be added to the Kozhikode district and included in the Kozhikode division". The other reported changes in the jurisdiction of villages between 1951-61 are furnished below:—

(i) formation of seven new villages in South Wynad taluk, viz., Padinharethara, Kuppadithara, Thaviyode, Vengappally, Kottathara, Kunnathidavaga, Achoornum by re-grouping desoms comprised in the villages Kumbla, Thaviyode, Vythiri and Kottathara villages.

(ii) formation of two revenue villages, viz, Sultan's Battery and Ambalavayal by adding portions of Kidanganad, Noolpuzha, Muppainad, Nenmeni and Chingeri desoms.

Area Figures

3. The area of the district given by the Surveyor General, India, is 2,042 sq. miles. The figure does not tally with the area given by the Director of Survey and Land Records, Kerala which is 2,570·26 sq. miles. The area figures given in this hand book are those furnished by the State Director of Survey and Land Records. In regard to Municipal towns the figures for area have been furnished by the respective Municipal Commissioners in consultation with Director of Survey, District Collector and Tahsildars. The area figures of non-municipal towns are supplied by the concerned Tahsildars.

Definition of urban area—A historical survey

4. It has not been possible to adopt a uniform definition of urban area throughout the world. It differs

from country to country, even in the highly industrialised West. According to the census report of 1881 of the Madras State which applies to this district 'size, compactness and certain architectural and commercial or other industrial features were of the consideration which went to make up the definition of a town'. In the Census of 1901 of Madras a census town was taken to comprise a municipality of whatever population and every other continuous collection of houses permanently inhabited by not less than 5,000 persons which, the Superintendent of Census Operations, having regard to the character and relative density of its population, its importance as a centre of trade and its historical associations, might decide to treat as a town. Calicut and Badagara were the only towns in this district in the Census of 1901. A town as defined for the purpose of the Census of 1911 in Madras, included all municipalities and Cantonments and every other continuous collection of houses inhabited by not less than 5,000 persons which the Superintendent of Census Operations considered fit to treat as a town. Tanur was thus added to the list of towns in this district in the Census of 1911. From this period up to 1941 there has been no change in the number of towns. In the Census of 1941 Pantalayani, Feroke, Trikandiyur and Manjeri were also treated as towns. No addition of towns was made in 1951. Thus, on the eve of the Census of 1961 there were only seven towns in this district. Owing to the growing importance of urbanisation the 1961 Census laid down a three-fold criterion for classification of area as a town besides corporations/municipalities, civil lines and Cantonments which were automatically recognised as towns. According to this criterion only places with a minimum population of 5,000 persons and a density of not less than 1,000 persons per sq. mile with at least 75 per cent of the male population engaged in non-agricultural pursuits that could be recognised as a town. The population, density and extent of male population engaged in non-agricultural pursuits were to be determined with reference to the Census figures of 1951. Exception were however, allowed where an area may have a population of less than 5,000 but has definite urban characteristics and amenities. Similarly, where a place was treated as a town in 1951 but is not eligible to be treated as a town in 1961 if the State Government desired that it should be treated as a town in 1961, it was considered as an exceptional case. On an application of the above principles the list of towns in this district has been considerably extended bringing the number of towns to 17. Of these Pantalayani and Manjeri are the towns of 1951 which do not satisfy the criterion laid down in 1961 but were treated as towns in 1961 based on the recommendations of the State Government. Edakkad and Kommeri towns do not satisfy the criterion except for their minimum population according to the 1951 Census figures. They have been recognised as towns in the Census of 1961 in view of the fact that as per the 1961 Census their population are above 5,000 and they fulfil the criteria of density and employment in non-agricultural pursuits and further have definite urban characteristics and amenities. The State Government when consulted was also in favour of treating them as towns.

5. The following statement gives the number of towns in the various Censuses :—

Progress of census towns since 1901

1901	1911	1921	1931	1941	1951	1961
2	3	3	3	7	7	17

Census Village

6. For the purposes of 1961 Census a village means a revenue village. These villages have 'desoms' as the constituent units in most cases. Some, however, have no subdivisions as 'desoms'. Unlike in the previous Censuses the 'desoms' have not been treated as census villages in 1961. Tables A–I and A–III are given on the basis of revenue villages. However, in view of the different definitions of a Census village adopted in the previous censuses a Special Table (A-III) is given furnishing the number of census villages according to the definition of Census village in 1951 Census also i.e. according to the number of desoms. The Kozhikode district has 332 revenue villages out of which 22 lie wholly in towns and 4 partly in towns. The particulars of this are given in Statement No. 1 of Part A supra.

Census House

7. A Census house is a structure or part of a structure inhabited or vacant, giving on the road or a common staircase or a common courtyard leading to a main gate or enjoying a separate entrance. It may be a dwelling, a shop, a shop-cum-dwelling, a workshop-cum-dwelling, or a place of business, workshop, school, etc.

Occupied Residential House

8. An occupied residential house is a census house occupied by one or more census households and includes a shop-cum-dwelling, workshop-cum-dwelling and a dwelling with other uses. Even where more than one household occupy one census house, it is considered as only one occupied residential house.

Natural Divisions

9. Since 1901 the territories comprising Malabar district and Kasaragod taluk of the South Kanara

district came under the sixth natural division of Madras designated as West Coast Division. There was no further subdivision on the basis of meteorological or geographical features. In the present Census, natural divisions are formed on the basis of contour lines, whole State being divided into three natural divisions based on the following criterion:—

(*i*) Highland consisting of areas lying 250 feet and over above the mean sea level.

(*ii*) Midland comprising areas lying between 25 feet and 250 feet above the mean sea level.

(*iii*) Lowland consisting of the areas falling below 25 feet above the mean sea level.

Since the contour maps of the Survey of India for Kerala shows the contours only upto 50 feet above the mean sea level, it was inevitable that the determination of the areas falling in the classification of lowland had to be done with reference to the reports of the Municipal Commissioners and Tahsildars who had necessarily to depend upon a certain amount of approximation for the purpose. There are, indeed, some revenue villages lying partly in one classification and partly in another. In all such cases the village was classified according to the category in which its major portion fell. In the case of towns also the same principle was followed. It could be said with some amount of gratification, but not without some reservation due to the non-availability of contour maps below 50 feet above the mean sea level, that for the first time in Kerala, the classification by natural divisions has been done on the basis of contour lines.

Appendices

Appendix I

10. This Appendix gives the 1951 territorial units constituting the present set up of Kozhikode District down to taluk level. All notified changes that have taken place since 1951 Census are incorporated in this Appendix.

11. The revised area figures, based on the latest village-wise figures furnished by the Director of Survey and Land Records, were adopted for preparing this Appendix.

12. The symbol numbers viz, 1, 2, 3 and 4 for the above changes of jurisdiction are given in column 3 of the Appendix I. The annexure to Appendix I gives the details involved in these transfers with reference to the 1951 District Census Handbooks.

13. The sub-appendix to Table A-I shows the area of the only municipal town in the district which had undergone change in area since 1951.

Appendix II

14. Appendix II to Table A-I shows the number of villages with a population of 5,000 and over and towns with a population under 5,000 for each taluk.

Appendix III

15. Appendix III to Table A-I furnishes figures of the houseless and institutional population. An institution is a place where unrelated persons are living together.

** This table includes area, houses and population of unsurveyed forest areas also.

The sq. Km. and density figures of urban areas of taluk/district are worked out using the area figures corrected upto two places of decimals obtained by adding the areas of the towns in the respective units and not using the area figures given in the table. In addition to this the figures relating to sq. km. are further adjusted to make the taluk/district/State totals agree. The sum of areas given separately for Highland, Midland and Lowland areas for each taluk in each of the two categories—Total and Rural—Will differ slightly from the consolidated figure given for the taluk as a whole. This is due to the differences in computation at the level of decimal for the natural divisions of each taluk.

New towns in 1961 are printed in *italics*.

M.—Municipal N.M.—Non-Municipal N.—Denotes negligible figure which is less than one. The actual value is 0.3

APPENDIX I

Statement showing 1951 *territorial units constituting the present set up of Kozhikode district*

Only those territorial units which have undergone changes since 1951 have been shown in this Appendix. The area figures of several taluks given in the A-I table of 1951 Census do not tally with the total area of the ultimate units given in the rural and urban statistics of 1951 District Census Handbooks. These discrepancies are not also seen explained anywhere. Hence these area figures have not been accepted for purposes of this Appendix. Instead, the area figures arrived at in consultation with the Director of Survey and Land Records, Kerala, District Collector, Municipal Commissioners and Tahsildars have been adopted.

A-II VARIATION IN POPULATION DURING FORTY YEARS

Fly-leaf

Adjustments of Population

1. Table A-II furnishes the variation in population for the last five Censuses from 1921 to 1961 adjusted according to the present jurisdiction of the district. A full account of the territorial changes between 1951 and 1961 affecting the jurisdiction of the district and taluks are given in the fly-leaf to Table A-I supra. The districts were brought up-to-date as in 1961 on the basis of these changes. Where the territorial changes affected the units within the district the population figures were available in the District Census Handbooks for 1951 Census if such changes related to the entire tracts or units adopted for that Census. Except in the case of urban areas such units went down to the level of villages and desoms. Where, however, the changes affected either an entire urban tract or the ultimate rural unit which may be a village or desom, as the case may be, the population of the affected portion had to be estimated. For purposes of this estimation in the case of the 1951 population it was assumed that the proportion of the population of the affected portion to the total population of that particular unit is the same as the proportion of the area of that affected portion bore to the total unit. Hence, the formula adopted for estimating the 1951 population in the case of areas affected by changes was,

$$\frac{\text{Area of the affected portion}}{\text{The area of the entire unit}} \times \text{Population of the entire unit.}$$

In estimating the male and female population of such affected portions the same sex-ratio which existed in the case of the entire unit was applied to the affected portions also.

2. In estimating the population of this district for 1941 wherever the population figures were not available as such for any portion of a unit affected by the territorial changes it was assumed that the proportion of the population of that affected portion to the population of the whole unit as per the 1951 Census was applicable to the previous census also. Thus the formula applied was,

$$\frac{\text{The population of the entire unit in the 1941 Census}}{\text{The Population of the entire unit in the 1951 Census}} \times \text{The population of the affected portion in the 1951 Census.}$$

The same formula was applicable to the previous censuses *mutatis mutandis*, *i.e.* for the year 1951 the Census year prior to the one for which the population had to be fixed was substituted and for the year 1941 the year of the particular Census for which the population had to be estimated was given. For purposes of sex distribution the proportion applicable for the entire unit in the previous census was made applicable for the affected portion in the concerned census also.

Appendix

3. The Appendix to Table A-II furnishes the area and population affected by each territorial change of jurisdiction since 1951. The foot-notes of this Appendix give the dates of transfers.

**In 1951 there was no Kozhikode district. The taluks or portion of taluks which now form part of Kozhikode district were part of Madras State. At the time of reorganisation of States a new Malabar district was formed consisting of Malabar district excluding Laccadive and Minicoy Islands and Kasaragod taluk of South Kanara district. In exercise of the powers conferred by the Madras District Limits Act, 1865 the Government of Kerala with effect from 1st January 1957 had altered the jurisdiction of Malabar district and formed three new districts, viz., Cannanore, Kozhikode and Palghat, comprising the Malabar district of States Reorganisation Act 1956 excluding Cochin and newly formed Chowghat taluks and inclusive of Chittur taluk of Trichur district. On 1st January 1957 South Wynad taluk was part of Cannanore district. With effect from 15th March 1957 South Wynad taluk was transferred to Kozhikode district.

A-III VILLAGES CLASSIFIED BY POPULATION

SPECIAL TABLE A-III DESOMS CLASSIFIED BY POPULATION

Fly-leaf

The 1961 Census village (i.e. revenue village) has desoms as its constituent units. These constituent units have been treated as census villages in the previous censuses. This necessitated the preparation of a Special Table A-III. This table gives the figures for the number and population of desoms in the following population groups :

1	Population of less than	200	persons

A-IV TOWNS (AND TOWN-GROUPS) CLASSIFIED BY POPULATION IN 1961 WITH VARIATION SINCE 1901

Fly-leaf

Definition of Town

1. This has been given in fly-leaf to table A-I supra.

Classification of Cities and Towns

2. The cities and towns are classified according to their population as given below :—

Class I Towns with a population of 100,000 and above

Class II Towns with a population of 50,000—99,999

Class III Towns with a population of 20,000—49,999

Class IV Towns with a population of 10,000—19,999

Class V Towns with a population of 5,000—9,999

Class VI Towns with a population of less than 5,000

Town-Group

3. Calicut town-group is the only town-group in this district. It consists of Calicut municipal town, Parayancheri, Kommeri, Beypore and Olavanna towns. In Table A-IV the constituent parts of a town-group, though they come under different classes, are shown under the class of the town-group itself. The same method was adopted in striking the class totals in the previous censuses also.

Changes in Classification of Towns and their Status

Appendices

Appendix I

5. Appendix I to Table A-IV gives the area and population of the new towns added in 1961 and the 1951 towns which have been declassified in 1961. In this district 10 towns were added in 1961 while all the 7 towns of the last census continued as such. Note A to this appendix furnished the names, areas and population of the 1951 villages which constitute the newly added towns of 1961.

Appendix II

6. Appendix II to Table A-IV furnishes the Jurisdiction of all the 17 towns based on the 1961 set up.

B—ECONOMIC TABLES

NOTE

The 17 Economic Tables of 1961 Census are divided into two parts, viz, (i) General Economic Tables (B–I to B–IX) prepared from individual slips and (*ii*) Household Economic Tables (B–X to B–XVII) prepared from 20 per cent sample Household Schedules. All the above tables pertaining to this district are presented in this volume except Table B–II which deals with ' workers and non-workers in cities, town-groups and towns arranged territorially classified by sex and broad age-groups'. This table is furnished as Table B–II in ' Volume VII—Kerala State—Part–II-B—General Economic Tables'. The concepts and definitions of workers, non–workers, etc. are also explained in that volume.

106/1—22

B-I WORKERS AND NON-WORKERS CLASSIFIED BY SEX AND BROAD AGE-GROUPS

Fly-leaf

1. Table B-1 given for the total, rural and urban areas for the district is the basic economic table showing the total population, the total number of workers, the classification of workers into nine industrial categories and non-workers by sex and broad age-groups. The age-groups adopted for the tables are 0-14, 15-34, 35-59, 60+ and 'age not stated'. The age-groups correspond to the different stages of life which have special significance with reference to capacity to work, viz, children, young persons, middle-aged persons and elderly persons. The corresponding table in the 1951 Census gives the distribution of population by eight livelihood classes and their further sub divisions into self-supporting persons, earning dependants and non-earning dependants. There was no classification by age-groups in that table. The livelihood classes under which the population was grouped in 1951 were the following :—

I Cultivators of land wholly or mainly owned and their dependants

II Cultivators of land wholly or mainly unowned and their dependants

III Cultivating labourers and their dependants

IV Non-cultivating owners of land ; agricultural rent receivers and their dependants

V Persons engaged in production other than cultivation and their dependants

VI Persons engaged in commerce and their dependants

VII Persons engaged in transport and their dependants

VIII Persons engaged in other services and miscellaneous sources and their dependants

2. As it was felt that the strict application of the criterion of income or economic independence suppressed those who worked in family economic activity but did not actually earn an income like men other than the head of the household and women of the family or children working in cultivation or cottage industries of the household, the classification of the population into self-supporting persons and earning and non-earning dependants has been given up in the table for 1961. All persons who work including family workers who are not in receipt of any income or working children who cannot earn enough for their maintenance are treated as workers and grouped under the following industrial categories instead of the eight livelihood classes in 1951 referred to above :—

I Working as Cultivator

II Working as Agricultural Labourer

III Working in Mining, Quarrying, Live-stock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities

IV Working at Household Industry

V Working in manufacturing other than Household Industry

VI Working in Construction

VII Working in Trade and Commerce

VIII Working in Transport, Storage, and Communications

IX Working in Other Services

The non-workers have been classified under the following categories and dealt with in Table B-IX :—

1 Full-time students or children attending school who do no other work

2 Persons engaged in unpaid home duties who do no other work such as make articles at home for sale, or wages, nor help regularly even part-time in family cultivation, industry, trade or business

3 Dependants including infants and children not attending schools and persons permanently disabled from work because of illness or old age

4 Retired persons not employed again, rentiers, persons living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work and who does no other work

5 Beggars, vagrants, independent women without indication of source of income or others of unspecified sources of existence

6 Convicts in jails and inmates of penal, mental and charitable institutions

7 Persons seeking employment for the first time

8 Persons employed before, but were out of employment and were seeking work during the reference period

B-III INDUSTRIAL CLASSIFICATION OF WORKERS AND NON-WORKERS BY EDUCATIONAL LEVELS

Fly-leaf

1. This table presents the data relating to literacy and educational levels of the working population under the nine industrial categories and of the non-working population. It enables to assess the literacy and educational levels of the workers as well as the non-workers. The table is divided into two parts, Part A dealing with urban areas and Part B dealing with rural areas of the district.

2. Besides giving the number of illiterates and literates (without educational level) in both urban and rural areas, the remaining literates of these areas are classified as follows :—

Urban

1 Primary or Junior Basic
2 Matriculation or Higher Secondary
3 Technical diploma not equal to degree
4 Non-technical diploma not equal to degree
5 University degree or Post-graduate degree other than technical degree
6 Technical degree or diploma equal to degree or Post-graduate degree
  (*i*) Engineering
  (*ii*) Medicine
  (*iii*) Agriculture
  (*iv*) Veterinary and Dairying
  (*v*) Technology
  (*vi*) Teaching and
  (*vii*) Others

Rural

1 Primary or Junior Basic
2 Matriculation and above

3. All persons who have ability to read and write with understanding, *i.e.*, to read any simple letter with felicity and write any simple letter with understanding are considered literates. Those who have passed Lower Primary or Junior Basic but have not passed Matriculation, Higher Secondary, S.S.L.C. or E.S.L.C. come under the category of Primary or Junior Basic and all those who have passed Matriculation, Higher Secondary, S.S.L.C. or E.S.L.C. come under the category of Matriculation or Higher Secondary.

4. In connection with the enumeration of technical personnel, degrees in science subjects like Physics, Mathematics, Chemistry, Geology, Geo-Physics, Geography, etc., have been recognised as technical degrees. These do not come under the specific items (*i.e.* *i* to *vi*) covered by 'technical degree or diploma equal to degree or post-graduate degree'. Hence wherever the subject of graduation or post-graduation has been given these have been included under 'Others' (*i.e.* *vii*) in the urban areas. This accounts for the high percentage of 'others' coming under 'technical degree or diploma equal to degree or post-graduate degree'.

B-IV INDUSTRIAL CLASSIFICATION BY SEX AND CLASS OF WORKER OF PERSONS AT WORK OTHER THAN AT CULTIVATION

Fly-leaf

1. This table contains the sex-wise distribution of non-agricultural workers according to their principal work by divisions, major groups and minor groups of Indian Standard Industrial Classification (I. S. I. C.) issued by the Ministry of Labour and Employment, Government of India, following the International Standard Industrial Classification recommended by the U.N.O. The minor groups 000 to 004 and 999 of the I.S.I.C. do not appear in this table because of the exclusion of cultivators, agricultural labourers and non-workers in this table. Industrial minor groups 000 to 004 relate to agriculture and the minor group 999 to fresh entrants to the labour market who are treated as non-workers. The table is prepared in three parts, Parts A and B containing figures up to divisions and major groups only and Part C giving figures for minor groups also.

2. In table B-IV Part-A which is prepared for the total, rural and urban areas of the district, the workers principally engaged in household industry are divided into 'Employees' and 'Others' for each of the divisions 0, 1 and 2 and 3 and their major groups. For the rural areas the figures by divisions are furnished down to taluk level. The study of household industry is a special feature of the 1961 Census.

3. Table B-IV Part-B is prepared for total and urban areas of the district. For the rural areas the figures by divisions are furnished down to taluk level. Here the non-agricultural workers engaged in non-household industries are classified into 'Employer', 'Employee', 'Single worker' and 'Family worker' according to their participation in work. This distribution is available for each of the divisions and major groups of the I.S.I.C.

4. Table B-IV Part-C presents the combined as well as separate sex-wise figures of persons working in household industry and non-household industry by divisions, major groups and minor groups of I.S.I.C. for the total and urban areas of the district. For the rural areas the figures by divisions are furnished down to taluk level. In this table those minor groups the figures of which are less than 1 per cent of the respective divisions (less than 0·5 per cent in the case of divisions 2 and 3) have been omitted. The figures of such minor groups are shown in the appendix at the end of the table.

5. The corresponding table of 1951 Census viz, table B-III, gives the number of self-supporting persons in non-agricultural livelihood classes by 10 divisions and 88 sub divisions according to the Indian Census Economic Classification (I.C.E.C.) classified into 'Employers', 'Employees' and 'Independent workers' according to the economic status. Under the I.C.E.C. scheme the unit of classification was in every case the individual. This scheme bears more resemblance to the occupational classification given in the table B-V of 1961 than to the I.S.I.C. scheme followed in table B-IV of 1961. Under the I.S.I.C. scheme the unit of classification is the organised establishment, the classification of every member of the establishment being according to the classification of the establishment based on the commodity produced or the service performed as a result of the work of the establishment.

6. It may be seen from the table that the figures under Minor group 900—'Activities unspecified and not adequately described including activities of such individuals who fail to provide sufficient information about their industrial affiliation to enable them to be classified'—are considerably large in both rural and urban areas of all districts. Most of these entries relate to these returning their nature of work as 'general coolies' or 'general labourers' and the nature of industry as 'no fixed place of work'.

7. The list of Indian Standard Industrial Classification by divisions, major groups and minor groups is reproduced below: —

Indian Standard Industrial Classification

This classification groups the industries into—

9 Divisions,
45 Major Groups and
343 Minor Groups.

The divisions and major groups with their Code numbers are listed below :—

Division 0 Agriculture, Live-stock, Forestry, Fishing and Hunting

Major Group (Code)	Description	Minor Group (Code)
00	FIELD PRODUCES AND PLANTATION CROPS—	
	Production of cereal crops (including Bengal gram) such as rice, wheat, jowar, bajra, maize	000
	Production of pulses, such as arhar, moong, masur, urd, khesari, other gram	001
	Production of raw jute and kindred fibre crops	002
	Production of raw cotton and kindred fibre crops	003
	Production of oilseeds, sugarcane and other cash crops	004
	Production of other crops (including vegetables) not covered above	005
	Production of fruits and nuts in plantation, vines and orchards	006
	Production of wood, bamboo, cane reeds, thatching grass, etc.	007
	Production of juice by tapping palms	008
	Production of other agricultural produce (including fruits and nuts not covered by code number 006 and flowers) not covered above	009
01	PLANTATION CROPS—	
	Production of tea in plantation	010
	Production of coffee in plantation	011
	Production of rubber in plantation	012
	Production of tobacco in plantation	013
	Production of ganja, cinchona, opium	014
	Production of other plantation crops not covered above	015
02	FORESTRY AND LOGGING—	
	Planting, replanting and conservation of forests	020

106/1—23a

Major Group (Code)	Description	Minor Group (Code)
02	FORESTRY AND LOGGING—*concld.*	
	Felling and cutting of trees and transportation of logs	021
	Preparation of timber	022
	Production of fuel including charcoal by exploitation of forest	023
	Production of fodder by exploitation of forests	024
	Production of gums, resins, lac, barks, herbs, wild fruits and leaves by the exploitation of forests	025
	Production and gathering of other forest products not covered above	026
03	FISHING—	
	Production of fish by fishing in sea	030
	Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries	031
	Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, pond	032
04	LIVE-STOCK AND HUNTING—	
	Production and rearing of live-stock (large heads only) mainly for milk and animal power such as cow, buffalo, goat	040
	Rearing of sheep and production of wool	041
	Rearing and production of other animals (mainly for slaughter) such as pig	042
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming	043
	Rearing of bees for the production of honey, wax and collection of honey	044
	Rearing of silk worms and production of cocoons and raw silk	045
	Rearing of other small animals and insects	046
	Trapping of animals or games propagation	047
	Production of other animal husbandry products such as skin, bone, ivory and teeth	048
	Division 1 Mining and Quarrying	
19	MINING AND QUARRYING—	
	Mining of coal	100
	Mining of iron ores	101
	Mining of gold and silver ores	102
	Mining of manganese	103
	Mining of mica	104
	Mining of other non-ferrous metallic ores	105
	Mining of crude petroleum and natural gas	106
	Quarrying of stone (including slate), clay, sand, gravel, limestone	107
	Mining of chemical earth such as soda ash	108
	Mining and quarrying of non-metallic products not classified above such as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt	109
	Division 2 and 3 Manufacturing	
20	FOODSTUFFS—	
	Production of rice, atta, flour, etc., by milling, dehusking and processing of crops and foodgrains	200
	Production of sugar and syrup from sugarcane in mills	201
	Production of indigenous sugar, gur from sugarcane or palm juice and production of candy	202
	Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits	203
	Slaughtering, preservation of meat and fish and canning of fish	204
	Production of bread, biscuits, cake and other bakery products	205
	Production of butter, ghee, cheese and other dairy products	206
	Production of edible fats and oils (other than hydrogenated oil)	207
	Production of hydrogenated oils (vanaspati)	208
	Production of other food products such as sweetmeat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge	209
21	BEVERAGES—	
	Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery	210
	Production of country liquor	211
	Production of indigenous liquor such as toddy, liquor from mahua, palm juice	212
	Production of other liquors not covered above	213

Major Group (Code)	Description	Minor Group (Code)
21	BEVERAGES—*concld.*	
	Production of aerated and mineral water	214
	Production of ice	215
	Production of ice cream	216
	Processing of tea in factories	217
	Processing of coffee in curing works	218
	Production of other beverages	219
22	TOBACCO PRODUCTS—	
	Manufacture of bidi	220
	Manufacture of cigars and cheroots	221
	Manufacture of cigarette and cigarette tobacco	222
	Manufacture of hookah tobacco	223
	Manufacture of snuff	224
	Manufacture of jerda and other chewing tobacco	225
	Manufacture of other tobacco products	226
23	TEXTILE—COTTON—	
	Cotton ginning, cleaning, pressing and baling	230
	Cotton spinning (other than in mills)	231
	Cotton spinning and weaving in mills	232
	Cotton dyeing, bleaching	233
	Cotton weaving in power looms	234
	Cotton weaving in handlooms	235
	Manufacturing of khadi textile in handlooms	236
	Printing of cotton textile	237
	Manufacturing of cotton nets	238
	Manufacturing of cotton, cordage, rope and twine	239
24	TEXTILE—JUTE—	
	Jute pressing and baling	240
	Jute spinning and weaving	241
	Dyeing and bleaching of jute	242
	Printing of jute textile	243
	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta	244
25	TEXTILE—WOOL—	
	Wool baling and pressing	250
	Wool cleaning and processing (scouring)	251
	Wool spinning and weaving in mill	252
	Wool spinning other than in mills	253
	Wool weaving in power loom	254
	Wool weaving in handloom	255
	Embroidery and art work in woollen textile	256
26	TEXTILE—SILK—	
	Spinning and weaving of silk textile in mill	260
	Dyeing and bleaching of silk	261
	Spinning of silk other than in mills	262
	Weaving of silk textile by power loom	263
	Weaving of silk textile by handloom	264
	Printing of silk textile	265
	Manufacture of silk cordage, rope and twine	266
27	TEXTILE—MISCELLANEOUS—	
	Manufacture of carpet and all other similar type of textile products	270
	Manufacture of hosiery and other knitted fabrics and garments	271
	Embroidery and making of crepe, lace and fringes	272
	Making of textile garments including raincoats and headgear	273
	Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags	274
	Manufacture of waterproof textile products such as oil cloth, tarpaulin	275
	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling	276
	Manufacture of coir and coir products	277
	Manufacture of umbrellas	278
	Processing and manufacture of textile products not covered above	279
28	MANUFACTURE OF WOOD AND WOODEN PRODUCTS—	
	Sawing and planing of wood	280
	Manufacture of wooden furniture and fixtures	281
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows	282
	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures	283
	Manufacture of other wooden products such as utensils, toys, artwares	284
	Manufacture of veneer and plywood	285

Major Group (Code)	Description	Minor Group (Code)
28	MANUFACTURE OF WOOD AND WOODEN PRODUCTS—*concld.*	
	Manufacture of plywood products such as tea chest	286
	Manufacture of boxes and packing cases other than plywood	287
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products	288
	Manufacture of other wood and allied products not covered above	289
29	PAPER AND PAPER PRODUCTS—	
	Manufacture of pulp from wood, rags, waste paper and other fibres and the conversion of such pulp into any kind of paper and paper board in mill	290
	Manufacture of pulp from wood, rags, waste paper and other fibres and the conversion of such pulp into any kind of paper and paper board handmade	291
	Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp	292
30	PRINTING AND PUBLISHING—	
	Printing and publishing of newspapers and periodicals	300
	Printing and publishing of books	301
	All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry	302
	All types of binding, stitching, sizing and other allied work connected with binding industry	303
31	LEATHER AND LEATHER PRODUCTS—	
	Curing, tanning and finishing of hides and skins and preparation of finished leather	310
	Manufacture of shoes and other leather footwear	311
	Manufacture of clothing and wearing apparel (except footwear) made of leather and fur	312
	Manufacture of leather products (except those covered by Code Nos.311, 312), such as leather upholstery, suit cases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles	313
	Repair of shoes and other leather footwear	314
	Repair of all other leather products except footwear	315
32	RUBBER, PETROLEUM AND COAL PRODUCTS—	
	Manufacture of tyres and tubes	320
	Manufacture of rubber footwear	321
	Manufacture of rubber goods used *for industrial purpose*	322
	Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat	323
	Production of petroleum, kerosene and other petroleum products in petroleum refineries	324
	Production of coaltar and coke in coke oven	325
	Manufacture of other coal and coaltar products not covered elsewhere	326
33	CHEMICALS AND CHEMICAL PRODUCTS	
	Manufacture of basic industrial chemicals such as acids, alkalis and their salts not elsewhere specified	330
	Manufacture of dyes, paints, colours and varnishes	331
	Manufacture of fertilizers	332
	Manufacture of ammunition, explosives and fireworks	333
	Manufacture of matches	334
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap	335
	Manufacture of soap and other washing and cleaning compounds	336
	Manufacture of turpentine, synthetic resin, and plastic products and materials (including synthetic rubber)	337
	Manufacture of common salt	338
	Manufacture of other chemicals and chemical products not covered above (including inedible oils and fats)	339

Major Group (Code)	Description	Minor Group (Code)
34–35	NON-METALLIC MINERAL PRODUCTS OTHER THAN PETROLEUM AND COAL—	
	Manufacture of structural clay products such as bricks, tiles	340
	Manufacture of cement and cement products	341
	Manufacture of lime	342
	Manufacture of structural stone goods, stone dressing and stone crushing	343
	Manufacture of stonewares, other than images	344
	Manufacture of stone images	345
	Manufacture of plaster of Paris and its products	346
	Manufacture of asbestos products	347
	Manufacture of mica products	348
	Manufacture of earthenware and earthen pottery	350
	Manufacture of chinaware and crockery	351
	Manufacture of porcelain and its products	352
	Manufacture of glass bangles and beads	353
	Manufacture of glass apparatus	354
	Manufacture of earthen image, busts and statues	355
	Manufacture of earthen toys and artwares except those covered by code No. 355	356
	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above	357
	Manufacture of other non-metallic mineral products not elsewhere specified	359
36	BASIC METALS AND THEIR PRODUCTS EXCEPT MACHINERY AND TRANSPORT EQUIPMENT—	
	Manufacture of iron and steel including, smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods	360
	Manufacture including smelting, refining of non-ferrous metals and alloys in basic forms	361
	Manufacture of armaments	362
	Manufacture of structural steel products such as joist, rail, sheet, plate	363
	Manufacture of iron and steel furniture	364
	Manufacture of brass and bell-metal products	365
	Manufacture of aluminium products	366
	Manufacture of metal products (other than of iron, brass, bell-metal and aluminium) such as tin can	367
	Enamelling, galvanising, plating (including electroplating), polishing and welding of metal products	368
	Manufacture of sundry hardwares such as G.I. pipe, wire net, bolt, screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38 and 39)	369
37	MACHINERY (ALL KINDS OTHER THAN TRANSPORT) AND ELECTRICAL EQUIPMENT—	
	Manufacture and assembling of machinery (other than electrical) except textile machinery	370
	Manufacture and assembling of prime mover and boilers, other than electrical equipment, such as diesel engines, road rollers, tractors	371
	Manufacture of machine tools	372
	Manufacture of textile machinery and accessories	373
	Manufacture of heavy electrical machinery and equipment such as motors, generators, transformers	374
	Manufacture of electric lamps & fans	375
	Manufacture of insulated wires and cables	376
	Manufacture of all kinds of battery	377
	Manufacture of electronic equipment such as radio, microphone	378
	Manufacture of electric machinery and apparatus, appliances not specified above	379
38	TRANSPORT EQUIPMENT—	
	Manufacture, assembling and repairing of locomotives	380
	Manufacture of wagons, coaches, tramways and other rail road equipment other than that covered by code No. 363	381

Major Group (Code)	Description	Minor Group (Code)
38	TRANSPORT EQUIPMENT—*concld.*	
	Manufacture and assembling of motor vehicles of all types (excepting motor engines)	382
	Manufacture of motor vehicles, engine parts and accessories	383
	Repairing and servicing of motor vehicles	384
	Manufacture of bicycles and tricycles and accessories such as saddle, seat frame, gear	385
	Building and repairing of water transport equipment such as ships, boats and manufacture of marine engines	386
	Manufacture and repair of air transport equipment including aeroplanes, aeroengines	387
	Repairing of bicycles and tricycles	388
	Manufacture of other transport equipment not covered above such as animal-drawn and hand-drawn vehicles	389
39	MISCELLANEOUS MANUFACTURING INDUSTRIES—	
	Manufacture of optical instruments and lenses, ophthalmic goods and photographic equipment and supplies	390
	Manufacture of scientific, medical and surgical instruments and equipment and supplies	391
	Assembling and repairing of watches and clocks	392
	Manufacture of jewellery, silverware and wares using gold and other precious metals	393
	Manufacture and tuning of musical instruments	394
	Manufacture of stationery articles not covered elsewhere such as pencil, penholder, fountain pen	395
	Manufacture of sports goods	396
	Manufacture and repair work of goods not assignable to any other group	399
	Division 4 Construction	
40	CONSTRUCTION—	
	Construction and maintenance of buildings including erection, flooring, decorative constructions, electrical and sanitary installations	400
	Construction and maintenance of roads, railways, bridges, tunnels	401
	Construction and maintenance of telegraph and telephone lines	402
	Construction and maintenance of water ways and water reservoirs, such as bund, embankments, dam, canal, tank, tubewells, wells	403
	Division 5 Electricity, Gas, Water and Sanitary Services	
50	ELECTRICITY AND GAS—	
	Generation and transmission of electric energy	500
	Distribution of electric energy	501
	Manufacture of gas in gas works and distribution to domestic and industrial consumers	502
51	WATER SUPPLY AND SANITARY SERVICES—	
	Collection, purification and distribution of water to domestic and industrial consumers	510
	Garbage and sewage disposal, operation of drainage system and all other types of work connected with public health and sanitation	511
	Division 6 Trade and Commerce

B-IV PART-C INDUSTRIAL CLASSIFICATION BY SEX AND DIVISIONS, MAJOR GROUPS AND MINOR GROUPS OF PERSONS AT WORK OTHER THAN CULTIVATION

APPENDIX

Minor groups having less than 1 per cent of workers of the respective Division, (less than 0·5 per cent in case of minor groups of Division 2 and 3), have been shown in this Appendix. The following abbreviations have been used :—

HI = Household Industry
NHI = Non-household Industry
M = Males
F = Females

B-V OCCUPATIONAL CLASSIFICATION BY SEX OF PERSONS AT WORK OTHER THAN CULTIVATION

Fly-leaf

1. This table gives the distribution of non-agricultural workers by sex according to the 'National Classification of Occupations' issued by the Ministry of Labour and Employment, Government of India, which classifies occupations into 331 families, 75 groups and 11 divisions. A few modifications as mentioned below have been made in the National Classification of Occupations, while classifying the economic data in this table.

(i) The family OX4 relating to Geographers has been deleted and code 073 assigned to them. Actuaries coming under the family 073 according to the National Classification of Occupations have been brought under 072 Statisticians.

(ii) The families 400—Owner cultivators, 401—Cultivating tenants, 414—Agricultural labourers and the major group XO—Workers without occupations of the National Classification of Occupations have been omitted because of the exclusion of cultivators, agricultural labourers and non-workers for the purpose of classification in this table.

(iii) The code number 063 given to Jurists and Legal Technicians n. e. c. (including petition writers) in the National Classification of Occupations has been changed to 069.

(iv) The family 673—Teleprinter operators has been newly added.

Under this scheme each individual is classified on the basis of the nature of his (or her) work irrespective of the nature of establishment where he (or she) works. Each of these divisions, groups and families is cross-classified with the 7 non-agricultural industrial categories (categories III to IX)

2. The cross-classification of occupation with industry is a peculiarity of the 1961 Census and this being the first time that such an attempt is made there are some occupational families which appear incongrous *vis-a-vis* the industrial category in which they have placed. Such instances are given below suggesting the more appropriate categories to which they should belong:—

B-VI OCCUPATIONAL DIVISIONS OF PERSONS AT WORK OTHER THAN CULTIVATION CLASSIFIED BY SEX, BROAD AGE-GROUPS AND EDUCATIONAL LEVELS *IN URBAN AREAS ONLY*

Fly-leaf

This table is prepared only for the urban areas of the district. This gives the distribution of non-agricultural workers in the 11 occupational divisions of National Classification of Occupations by educational levels and broad age-groups. The changes made in the N.C.O. for the purpose of B-V table are applicable in the case of this table also. The educational levels given in the table are the same as those given in table B-III Part-A and the age-groups are those followed in table B-I. The age-groups correspond to different stages of life which have special significance with reference to the capacity to work, viz., children, young persons, middle-aged persons and elderly persons. This table gives very valuable data in assessing the underemployment among educated persons and also provides useful information about those occupations which attract educated personnel. In this table the figures for age-groups of total workers under each occupational division have not been given.

PART-B INDUSTRIAL CLASSIFICATION BY SEX OF PERSONS WORKING IN NON-HOUSEHOLD INDUSTRY, TRADE, BUSINESS, PROFESSION OR SERVICE WHO ARE ALSO ENGAGED IN HOUSEHOLD INDUSTRY

Fly-leaf

1. This table which is prepared in two parts, viz., Part-A and Part-B, gives information on secondary work. Tables B-VII Part-A and Part-B are tabulated for total, rural and urban areas of the district. For rural areas it is presented by divisions down to taluk level. Workers who have no secondary work are excluded from this table.

2. Part-A of the table is prepared in the case of workers who are principally engaged.

(*i*) as cultivator

(*ii*) as agricultural labourer or

(*iii*) at household industry

and who are also additionally engaged in any one of the above three categories of work. Workers who are principally engaged at household industry are also given by divisions and major groups of I.S I.C. This table is important as it shows the extent to which cultivation is supplemented by household industry or *vice versa*.

3. Part-B of the table presents data on the basis of cross-tabulation of principal and secondary work in the case of persons who are principally engaged in non-household industry, trade, business, profession or service and also additionally working at household industry. The household industries and non-household industries are further classified according to divisions and major groups of I.S.I.C. From this table the extent of influence of principal work on the nature of secondary work can be studied.

4. In table B VII Part-A the major groups of those industries where the persons engaged in auxiliary work are less than 10 per cent of the persons having that particular major group as principal work in Table B-IV Part-A have been omitted on the basis of the figures of total area. These major groups are shown in the appendix.

B-VII PART-A PERSONS WORKING PRINCIPALLY (i) AS CULTIVATORS (ii) AS AGRICULTURAL LABOURERS (iii) AT HOUSEHOLD INDUSTRY CLASSIFIED BY SEX AND BY SECONDARY WORK (i) AT HOUSEHOLD INDUSTRY (ii) AS CULTIVATOR OR (iii) AS AGRICULTURAL LABOURERS

Note.—Major groups of household industry, where persons having secondary work as cultivation or agricultural labour, are less than 5 per cent of the persons having the major group as principal work, have not been shown in this table, but are given in the appendix to this table. Divisions thus affected are marked with an asterisk (*)

B-VIII PERSONS UNEMPLOYED AGED 15 AND ABOVE BY SEX, BROAD AGE-GROUPS AND EDUCATIONAL LEVELS

Fly-leaf

1. This is a very important table which provides information on persons aged 15 and above who are unemployed by sex and educational levels in rural and urban areas of the district. The table will be useful for purposes of planning for employment and also for assessing the available man-power. It is divided into two parts. Part-A relates to urban areas and is presented for the district. Part-B relates to rural areas and is presented down to taluk level.

2. Part-A of the table gives the distribution of persons seeking employment for the first time in the age-groups 15–19, 20–24, 25–29, 30–34 and 35+ and also the distribution of persons who were employed before but now out of employment and seeking work in the age-groups 15–19, 20–24, 25–34, 35–44, 45–59 and 60+ by educational levels, as given in Table B-III Part-A.

3. Part-B of the table presents the distribution of unemployed persons aged 15 and above by the same educational levels as given in Table B-III Part-B.

B-IX PERSONS NOT AT WORK CLASSIFIED BY SEX, BROAD AGE-GROUPS AND TYPE OF ACTIVITY

Fly-leaf

1. This table gives the type of activities of non-workers. Non-workers are classified into 8 categories which are given in fly-leaf to table B-I. It is the first time in the history of Indian Census that information on the activities of non-workers are collected and tabulated. Any study of workers and non-workers is likely to be incomplete without getting detailed data on the type of activities of non-workers, especially when the figures of non-workers are more than 50 per cent of the total population.

2. The excess of student population in the age-group 0–14 of this table over the literates in the age-group 5–14 of Table C–III of this volume is due to the student population in the lower standards of the primary schools, nursery schools and kintergarten schools who do not know how to read and write with understanding.

B-XI SAMPLE HOUSEHOLDS ENGAGED IN CULTIVATION CLASSIFIED BY INTEREST IN LAND AND SIZE OF LAND CULTIVATED IN RURAL AND URBAN AREAS SEPARATELY

Fly-leaf

This table gives a cross classification of the cultivating households consisting of households engaged in cultivation only and households engaged in both cultivation and household industry by the interest in land and the size of land cultivated. The interest in land is classified into (*a*) owned or held from Government (*b*) held from private persons or institutions for payment in money, kind or share or (*c*) partly held from Government and partly from private persons for payment in money, kind or share. The size of holdings is grouped under less than 1 acre, 1·0—2·4 acres, 2·5—4·9 acres, 5·0—7·4 acres, 7·5—9·9 acres, 10·0—12·4 acres, 12·5—14·9 acres, 15·0—29·9 acres, 30·0—49·9 acres, 50 + acres and size unspecified. The table is prepared for the rural and urban areas of the district and for the rural areas of taluks.

B-XII SAMPLE HOUSEHOLDS ENGAGED IN CULTIVATION ONLY CLASSIFIED BY SIZE OF LAND CULTIVATED AND NUMBER OF FAMILY WORKERS AND HIRED WORKERS IN RURAL AND URBAN AREAS SEPARATELY

Fly-leaf

This table shows the classification of households engaged in cultivation only according to the number of persons engaged in cultivation by the size of holding groups in acres. The number of persons engaged in cultivation are grouped under 1 person, 2 persons, 3-5 persons, 6-10 persons, more than 10 persons and unspecified. In the case of households where more than 1 person is working, the number of family workers and hired workers have been shown separately. The table is prepared for the rural and urban areas of the district and for the rural areas of taluks.

B-XIII SAMPLE HOUSEHOLDS ENGAGED BOTH IN CULTIVATION AND HOUSEHOLD INDUSTRY SHOWING SIZE OF LAND CULTIVATED CLASSIFIED BY PRINCIPAL HOUSEHOLD INDUSTRY IN RURAL AND URBAN AREAS SEPARATELY

Fly-leaf

1. This table shows the distribution of households engaged in both cultivation and household industry by the size of land cultivated. The household industries are classified according to divisions and major groups of Indian Standard Industrial Classification (I.S.I.C.). The table is prepared for rural and urban areas of the district.

2. The major groups of household industry having less than 10 per cent of the figures of the respective divisions are not given in this table. A mark of asterisk (*) is given on such divisions and the figures of those major groups are shown in the appendix to this table.

APPENDIX

Major groups of Household Industry which are less than 10 per cent of the respective division have not been shown in the main table which shows such divisions by an asterisk. Major groups thus dropped from the main table are given run on in this Appendix. The figure preceding the bracket represents the code number of the major group dropped from the table. Alphabets given in brackets are abbreviations meant for different ranges of holdings in acres as explained below. The numerical figures given after the alphabet denotes the number of households in that particular range indicated by that alphabet.

B-XIV SAMPLE HOUSEHOLDS ENGAGED ONLY IN HOUSEHOLD INDUSTRY CLASSIFIED BY PRINCIPAL HOUSEHOLD INDUSTRY IN ALL AREAS

Fly-leaf

1. This table prepared in two parts gives the classification of households engaged only in household industry by divisions, major groups and minor groups of I.S.I.C. for total, rural and urban areas of the district. Part A of the table shows for each division and major group of I.S.I.C. the number of households according to the number of persons engaged in household industry. The number of persons engaged in household industry are grouped under 1 person, 2 persons, 3–5 persons, 6–10 persons and more than 10 persons.

2. In Table B-XIV, Part A major groups of household industry having less than 10 per cent of the figures of the respective divisions are not given in the table. A mark of asterisk (*) is given on such divisions and the figures of those major groups are shown in the appendix to this table.

3. Part B of the table gives the number of households engaged only in household industry by each minor group of I.S.I.C.

B-XV SAMPLE HOUSEHOLDS ENGAGED BOTH IN CULTIVATION AND HOUSEHOLD INDUSTRY CLASSIFIED BY SIZE OF LAND IN RURAL AND URBAN AREAS SEPARATELY

Fly-leaf

1. This table shows the classification of households engaged in both cultivation and household industry by the size of land cultivated and the number of persons engaged in household industry. In the case of households where more than 1 person is engaged in household industry the number of family workers and hired workers have been given separately. The table is prepared for the rural areas of the district and taluks and the urban areas of the district.

2. This table shows the relationship between the scale of household industry and the scale of cultivation.

B-XVI SAMPLE PRINCIPAL HOUSEHOLD INDUSTRY CLASSIFIED BY PERIOD OF WORKING AND TOTAL NUMBER OF WORKERS ENGAGED IN HOUSEHOLD INDUSTRY IN ALL AREAS

Fly-leaf

1. This table shows the classification of households engaged in household industry by the period of working grouped under 1—3 months, 4—6 months, 7—9 months and 10 months to 1 year. Under each of these groups the number of households, the number of family workers by sex and the number of hired workers are given. The information is available for each of the divisions and major groups of principal household industry. Households engaged in household industry have been divided into those "with cultivation" and "without cultivation". The table is prepared for total, rural and urban areas of the district.

2. Major groups of household industry having less than 10% of the figures of the respective divisions have been omitted in this table. Such divisions are marked with an asterisk (*) and the figures of those major groups are shown in the appendix to this table.

3. This table furnishes valuable data on the seasonality of various household industries.

B-XVI SAMPLE PRINCIPAL HOUSEHOLD INDUSTRY CLASSIFIED BY PERIOD OF WORKING AND TOTAL NUMBER OF WORKERS ENGAGED IN HOUSEHOLD INDUSTRY IN *ALL AREAS*

APPENDIX

Major groups of Household Industry which are less than 10 per cent of the respective divisions have not been shown in the main table which shows such division by an asterisk (*). Major groups thus dropped from the main table are given run on in the Appendix. The figure preceding the bracket represents the Code number of the major group dropped from the table. Alphabets given in brackets are abbreviations meant for different ranges of period of working in the Household Industries "with" or "without" Cultivation as explained below. The numerical figure given after alphabet denotes the number of households in that particular range indicated by that alphabet.

Abbreviation			Class range of period of working
A means	With	cultivation	1 to 3 months
B	,,	,,	4 to 6 ,,
C	,,	,,	7 to 9 ,,
D	,,	,,	10 months to 1 year
X	,,	,,	Unspecified
E means	Without	cultivation	1 to 3 months
F	,,	,,	4 to 6 ,,
G	,,	,,	7 to 9 ,,
H	,,	,,	10 months to 1 year
Y	,,	,,	Unspecified

The list of major groups dropped from the main table is given below :—

B-XVII SAMPLE HOUSEHOLDS CLASSIFIED BY SIZE AND PARTICIPATION IN HOUSEHOLD CULTIVATION OR INDUSTRY

Fly-leaf

1. This table shows the classification of households in the 3 groups viz. (*i*) Households engaged neither in cultivation nor in household industry (*ii*) Households engaged in household industry only and (*iii*) Households engaged in cultivation, by the size of households such as households having single member 2–3 members, 4–6 members, 7–9 members and 10 or more members. The number of male and female members of the households in each of these groups also are given. The households engaged in cultivation are further classified by the size of land cultivated. The table is prepared for the total, rural and urban areas of the district.

2. The total number of households and the total household population in the total, rural and urban areas of the district are given below. The total number of households is the same as that given in the Primary Census Abstract and the total household population is the total population as per P. C. A. excluding houseless and institutional population;

All the tables of this series are presented in this volume except C-IV and C-VI. These tables are published in " Volume VII Kerala State—Part II C—Cultural and Migration Tables ".

2. In addition to the above eight tables there are eight tables relating to technical personnel. They are furnished as appendices to Table C-III in ' Volume VII—Kerala State—Part II C—Cultural and Migration Tables '.

C-I COMPOSITION OF SAMPLE HOUSEHOLDS BY RELATIONSHIP TO HEAD OF FAMILY CLASSIFIED BY SIZE OF LAND CULTIVATED

Fly-leaf

1. This table gives the family composition of households which has been prepared on a 20 per cent sample basis from the household schedules separately for the total, rural and urban areas of the district. The members in the household have been divided into two groups viz. family members and non-family members. Among the family members, heads of households and their spouses have been given by sex. Married relations have been classified into married sons, other married males and other married females. Never married, widowed and divorced or separated relations also have been given by sex. Similarly sex-wise figures of non-family members or unrelated members are given. This table will be of sociological interest indicating the strength of the joint family system.

2. Though the above table gives only the composition of households, the corresponding table C-I of 1951 Census gives both the size and composition of households which was based on a 0·1 per cent sample households prepared from the National Register of Citizens. But in the case of Travancore-Cochin State, this table was prepared from a 4 per cent sample households.

3. In this Census the size of the households (based on 20 per cent sample) has been given separately as Table B-XVII.

C–II AGE AND MARITAL STATUS

Fly-leaf

1. This table gives the sex-wise distribution of population by age-groups and marital status for the total, rural and urban areas of the district. For rural areas, it is presented down to taluk level. The age-groups followed in this table are 0–9, 10–14, 15–19, 20–24, 25–29, 30–34, 35–39, 40–44, 45–49, 50–54, 55–59, 60–64, 65–69, 70+ and ' age not stated ' which conform to international standards.

2. The corresponding table at the 1951 Census (Table C III—Age and Civil Condition) was prepared on a 10 per cent sample unlike the present one done on full count.

3. The marital status groupings in 1961 Census and the civil condition groupings in the 1951 Census are given below:–

Marital Status (1961)	*Civil Condition* (1951)
1 Never married	1 Unmarried
2 Married	2 Married
3 Widowed	3 Widowed or Divorced
4 Divorced or Separated	
5 Unspecified Status

C-III AGE, SEX AND EDUCATION

Fly-leaf

1. This table gives the sex-wise distribution of population by age-groups and educational levels for the district. It is divided into three parts, Part A dealing with all areas, Part B dealing with urban areas and Part C dealing with rural areas. The age-groups followed in all the three parts are 0–4, 5–9, 10–14 15–19, 20–24, 25–29, 30–34, 35–44, 45–59, 60+ and 'age not stated'.

2. The classification of educational levels are different for rural and urban areas. Besides giving the number of illiterates and literates (without educational level), the remaining literates are classified as follows :

Urban

1 Primary or Junior Basic
2 Matriculation or Higher Secondary
3 Technical diploma not equal to degree
4 Non-technical diploma not equal to degree
5 University degree or post-graduate degree other than technical degree
6 Technical degree or diploma equal to degree or post-graduate degree
  (*i*) Engineering
  (*ii*) Medicine
  (*iii*) Agriculture
  (*iv*) Veterinary and Dairying
  (*v*) Technology
  (*vi*) Teaching
  (*vii*) Others

Rural

1 Primary or Junior Basic
2 Matriculation or Higher Secondary

3. All persons who have ability to read and write with understanding, *i.e.*, to read any simple letter with felicity and write a simple letter with understanding, are considered literates. Those who have passed Lower Primary or Junior Basic but have not passed Matriculation, Higher Secondary, S.S.L.C. or E.S.L.C., come under the category of Primary or Junior Basic and all who have passed Matriculation, Higher Secondary, S.S.L.C. or E.S.L.C., come under the category of Matriculation or Higher Secondary.

4. In connection with the enumeration of technical personnel, degrees in science subjects like Physics, Mathematics, Chemistry, Geology, Geo-Physics, Geography, etc., have been recognised as technical degrees. These do not come under the specific items covered by 'technical degree or diploma equal to degree or post-graduate degree'. Hence wherever the subject of graduation has been given these have been included under 'others' in the urban areas. This accounts for the higher percentage of 'others' coming under 'technical degree or diploma equal to degree or post-graduate degree'.

C-V MOTHER TONGUE

Fly-leaf

This table which corresponds to Table D-I Language (i) Mother tongue of 1951 Census gives the sex-wise distribution of the population under different mother tongues for the total, rural and urban areas of the district and up to taluk level for rural areas. This is finalised in consultation with the Linguist of Registrar General's Office. The following notes have also been prepared by the Linguist :—

NOTE I

1. The following mother tongues arranged in alphabetical order in column I of the statement given below as per Table C-V have been classified in the Linguistic Survey of India. The Linguistic Survey of India classification number is mentioned against each mother tongue in column 3.

2. If in column 3 no classification number is given against any mother tongue of column I, then it would mean that the name refers to either old or middle Indo-Aryan language or a language group or branch or family name from the Linguistic Survey of India.

3. Wherever a tongue is mentioned in column 3 it is to be understood that the mother tongue is either a dialect or another name or form of the tongue mentioned against it in column I which in its turn has been classified by the Linguistic Survey of India in the appropriate place for that tongue.

4. If in column 1, there is a tongue which bears no classification number in the Linguistic Survey of India then in column 2 the name of the classified language or group will be given of which the mother tongue of column 1 is either a dialect or another name or form. In such a case the number of classified language of column 2 has been given in column 3.

5. In column 2 standardized spellings according to Linguistic Survey of India has been given against each mother tongue of column 1.

C-VII RELIGION

Fly-leaf

The distribution of population by sex under different religions is given in this table. In the table the figures of only six major religions in India have been shown. The remaining beliefs have been clubbed into 'other religions and persuasions' the details of which are presented in the supplement to the table. This table corresponds to Table D-II Religion of 1951 Census.

C-VIII SCHEDULED CASTES AND SCHEDULED TRIBES

Fly-leaf

1. This table is prepared in two parts, Part A dealing with Scheduled Caste population and Part B dealing with Scheduled Tribe population. These give the sex-wise distribution of Scheduled Castes and Scheduled Tribes into literates and illiterates and also into workers in the nine industrial categories and non-workers for total, rural and urban areas of the district and for rural areas by taluks.

2. The corresponding Table of 1951 (Table D–III Scheduled Castes and Scheduled Tribes) shows only the population of Scheduled Castes and Scheduled Tribes without their livelihood pattern.

D-MIGRATION TABLE

NOTE

Seven tables in this series present the migration trends analysed on the reports of the 1961 Census. They are—

D-I	Non-Indian Nationals
D-II	Place of birth
D-III	Migrants classified by place of birth and duration of residence in place of enumeration
D-III A	Migrants from other States and outside India (less than 5 years of duration) classified by age-groups
D-IV	Migrants in cities classified by sex, broad age-groups, educational levels and in case of workers also by occupational divisions and groups
D-V	Cities showing population born locally, migrants from rural areas and migrants from other towns and cities
D-VI	Distribution of industrial categories of workers and non-workers by place of birth

All the above tables are published in " Volume VII—Kerala State—Part II C—Cultural and Migration Tables".

E-HOUSING AND ESTABLISHMENT TABLES

NOTE

The data for these tables have been compiled from the Houselists prepared for the 1961 Census. The Housing and Establishment Tables are presented in the following five tables:—

E-I	Census houses and the uses to which they are put
E-II	Tenure status of sample census households living in census houses used wholly or partly as dwelling (based on 20 per cent sample)
E-III	Census houses used as factories and workshops classified by industry, power and no power used and size of employment
E-IV	Distribution of sample households living in census houses used wholly or partly as dwelling by pre-dominant material of wall and pre-dominant material of roof (based on 20 per cent sample)
E-V	Sample households classified by number of members and number of rooms occupied (based on 20 per cent sample)

All the above tables are published in " Volume VII—Kerala State—Part IV A and B—Report on Housing and Establishment Tables ".

SCT-I INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK AND NON-WORKERS BY SEX FOR SCHEDULED CASTES AND SCHEDULED TRIBES

Fly-leaf

1. This table prepared in two parts, Part A dealing with Scheduled Castes and Part B dealing with Scheduled Tribes, gives for each caste and tribe separately for rural and urban areas of the district and for rural areas down to taluk level the sex-wise distribution of population into workers in the nine industrial categories and non-workers.

2. Part A also gives the sex-wise number of workers in each Scheduled Caste engaged in special occupations like 'Tanning and currying of hides and skins' and 'Scavenging'.

3. The following statement presents the taluk-wise distribution of Scheduled Castes and Scheduled Tribes by rural-urban distribution and by sex.

PRIMARY CENSUS ABSTRACT

Fly-leaf

1. The Primary Census Abstract is presented down to block level for urban areas and desom level for rural areas.

Occupied Census House

2. A census house is a structure or part of a structure, inhabited or vacant, giving on the road or a common staircase or a common courtyard leading to a main gate or enjoying a separate entrance. It may be a dwelling, a shop, a shop-cum-dwelling, a workshop-cum-dwelling, or a place of business, workshop, school etc. A census house that is inhabited is an occupied census house.

Dwelling

3. A dwelling is a census house used exclusively for residential purposes.

Shop-cum-dwelling

4. A shop-cum-dwelling is a census house used both as a shop and as a residence.

Workshop-cum-dwelling

5. A census house used both as a workshop and as a residence is a workshop-cum-dwelling.

Household

6. A household is a group of persons who commonly live together in the same census house and take their meals from a common mess unless the exigencies of work prevent them from doing so.

Literacy and Education

7. For purposes of enumeration the ability to read and write was recognised as the test of literacy. The test applied for reading was the ability to read any simple letter either in print or in manuscript and that for writing was ability to write a simple letter. Persons who could both read and write and have also passed a written examination or examinations as a proof of the educational standard attained were taken as educated persons.

Workers and non-workers

8. A worker was defined for the purposes of this census as a person working as a cultivator, or an agricultural labourer, or working at household industry, or doing any other productive work, or working in any possible combination of the above four categories of work. The basis of work was deemed to be satisfied in the case of seasonal work like cultivation, live-stock, dairying, household industry etc., if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce, the basis of work was deemed to be satisfied if the person was employed during any of the fifteen days preceding the day of enumeration. A person who was working but absent from his work during the fifteen days preceding the day on which enumerated, or even exceeding the period of fifteen days due to illness or other causes was treated as worker. Work includes not only actual work but also effective supervision and direction of work. Persons under training as apprentices with or without stipend or wages were also regarded as workers. An adult woman who was engaged in household duties but was doing no other productive work to augment the family's resources was not considered as a worker. If, however, in addition to her household work she engaged herself in work such as rice pounding for sale or wages or in domestic services for wages for others or minding cattle or selling firewood etc., or any such work, she was treated as a worker. Persons like beggars, pensioners, agricultural or non-agricultural royalty, rent or dividend receivers, who might have been earning an income but were not participating in any productive work, were not treated as workers unless they also worked in cultivation, industry, trade, profession, business or commerce. A public or social service worker who was actively engaged in public service activity or a political worker who was also actually engaged in furthering the political activity of his party was regarded as a worker. A person was considered to be working as cultivator, if, he or she, was engaged either as employer, single worker or family worker in cultivation of land or supervision or direction of cultivation of land owned or held from Government, institutions or private persons. A person was considered agricultural labourer if he was working in another person's land only as labourer without exercising any supervision or direction in cultivation for wages in cash, kind or share such as a share of produce. He should have no right or lease or contract on land on which he works, nor should he be responsible for taking decisions as to which crop to sow and when, or taking the risks of cultivation. A person was considered as working in household industry if the industry comes within the definition of the household industry. A worker may be an employer, i.e., a person who hires one or more persons in his work, or an employee, i.e., who does

his work under others for wages or salary in cash or kind, or a single worker, i.e., who is doing his work without employing others except casually and without the help of other members of the family except casually, or a family worker, i.e., a member who works without receiving wages in cash or kind, in an industry, business or trade, conducted mainly by members of the family and ordinarily does at least one hour of work every day during the working season. The following explanations of these categories of workers were accepted for census enumeration:—

(*i*) An employer is not only responsible for his own personal work but also for giving work to others in the business run by him. But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others, is not an employer, even if he has the power to employ another person in his office on behalf of his own employer or employers.

(*ii*) There may be persons who are employed as managers, superintendents, agents, etc. and in that capacity employ or control other workers on behalf of their own employers. Such persons are only employees as explained above, and should not be regarded as employers.

(*iii*) A single worker is not employed by any one else and in his turn, does not employ anybody else, not even members of his household except casually. The definition of a single worker will include a person who works in joint partnership with one or several persons hiring no employees, and also a member of a producers co-operative. Each one of the partners or members of such producers' co-operatives is a 'single worker'.

(*iv*) An industry in which a family worker is engaged should be on a scale larger than what is earned in household industry in Question 10, whether run at home or away from home, in town or village and even away from village in rural areas, and should ordinarily be in the nature of a recognised partnership, joint stock company or registered factory. For the purpose of this definition members of a family may be drawn from beyond the limits of the household by ties of blood or marriage. The family worker may not be entitled to a share of the profits in the work of the business carried on either by the person or head of the household or other relatives. For purposes of enumeration, non-workers were persons who were not engaged in any productive work. Thus a person who had been offered work but had not actually joined, or an adult woman who was engaged in household duties but was doing no other productive work to augment the family's resources, or persons like beggars, pensioners, agricultural or non-agricultural royalty, rent or dividend receivers, who were earning an income but were non participating in any productive work were all treated as non-workers. The non-workers are sub-grouped into eight categories according to the nature of their activity as given below.—

1 Full-time students or children attending school who do no other work.

2 Persons engaged in unpaid home duties who do no other work such as make articles at home for sale, or wages, nor help regularly even part-time in family cultivation, industry, trade or business.

3 Dependents including infants and children not attending schools and persons permanently disabled from work because of illness or old age.

4 Retired persons not employed again, rentiers, persons living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work and who does no other work.

5 Beggars, vagrants, independent women without indication of source of income or others of unspecified sources of existence.

6 Convicts in jails, inmates of penal, mental and charitable institutions.

7 Persons seeking employment for the first time.

8 Persons employed before, but were out of employment and were seeking work during the reference period.

The following industrial classification has been adopted for the primary economic classification of population.—

I Working as Cultivator
II Working as Agricultural Labourer
III Working in Mining, Quarrying, Live-stock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities
IV Working at Household Industry
V Working in Manufacturing other than Household Industry
VI Working in Construction
VII Working in Trade and Commerce
VIII Working in Transport, Storage and Communications
IX Working in Other Services
X Non-workers

Household Industry

9. For purposes of enumeration an industry was considered to be a household industry if it was below the scale of a registered factory conducted by the head of the

household himself and/or mainly by members of the household at home or within a village in rural areas and only at home in urban areas. The industry should have embraced production, processing, servicing or repairing and included making and selling of goods. The following three tests were laid down to determine whether an industry is a household industry or not:—

(*a*) Household industry should embrace, manufacturing, processing, servicing or repairing and may include sale but should not be confined simply to buying and selling. At least part of the goods offered for sale from the household should be manufactured or processed by members of the household.

(*b*) Household industry should be on a household scale where the workers mainly will be the head of the household himself and members of the household, the role of hired workers from outside being of secondary importance. Thus, in any household industry, members of the household should be in a position to lend a hand in the industry whenever they find time in the course of their daily chores. Household industry cannot, therefore, be on the scale of a registered factory but can use machinery and employ power like steam engine or oil engine or electricity to drive the machinery.

(c) Location is also important, for proximity decides participation by members of the household. In a village this participation is possible if the household industry is located at home or within the village, because village organisation is such as makes it possible for members of the household to move about freely in the village to look after their work. In urban areas such a free movement is not possible and, therefore, in urban areas, only those industries which are located at home can be considered for purposes of household industry. Where, however, part of the work is done outside the house e.g., preparing and dyeing the yarn for weaving or winding into warp and woof or cleaning metal surfaces before electroplating in baths, it should still be considered a household industry, even in urban areas, as the main operation of weaving or of electroplating is conducted within the house and only one or two operations are conducted outside.
