DISTRICT CENSUS HANDBOOK
1951

ETAWAH DISTRICT

FOREWORD

Several States, including Uttar Pradesh, have been publishing village statistics by districts at each census. In 1941 they were published in U. P. under the title "District Census Statistics" with a separate volume for each district. In the 1951 census, when the tabulation has been more elaborate than ever in view of the requirements of the country, the district-wise volume has been expanded into a "District Census Handbook", which now contains the District Census Tables (furnishing data with break-up for census tracts within the district), the District Index of Non-agricultural Occupations, agricultural statistics from 1901-02 to 1950-51 and other miscellaneous statistics in addition to the usual village population statistics. The village population statistics also are given in an elaborate form giving the division of the population among eight livelihood classes and other details.

2. It may be added here that a separate set of district-wise volumes giving only population figures of rural areas by villages and of urban areas by wards and mohallas and entitled "District Population Statistics" has already been published. This separate series was necessitated by the urgent requirements of the U. P. Government for elections to local bodies.

3. The number of District Census Handbooks printed so far is thirty one. Special arrangements for speeding up the printing have now been made and it is hoped that the remaining Handbooks will be printed before the end of 1955.

RAJESHWARI PRASAD, I.A.S.,
Superintendent, Census Operations,
Uttar Pradesh.

RAMPUR:
August 27, 1955.

INTRODUCTION

A—The District

1. The district of Etawah lies in the south-western portion of Uttar Pradesh. It is bounded on the north by the districts of Farrukhabad and Mainpuri while the small extent of western border adjoins tehsil Bah of Agra district. The eastern frontier marches with the district of Kanpur and along the south lie Jalaun district and the State of Madhya Bharat, the dividing line being, except for a short distance, the Chambal and Yamuna rivers. It has a total area of 1,670 square miles which is less than the average district area of the State. Its population in 1951 was 9·7 lakhs. It has 4 tehsils. Tehsil Bidhuna lies in the north-east with tehsil Auraiya to its south. Bharthana occupies the centre of the district while Etawah covers its western part. The district has 4 perganas and 18 thanas.

Topography

2. Etawah district is one of the southern *Doab* districts of the Plain, but its physical features vary considerably and are determined by the rivers which cross it. It is divisible into four belts of distinct natural characteristics which run from the west to the south-east. Its two tehsils Etawah and Bharthana which cover slices of the district from north to south cut right across the four natural divisions ; Auraiya tehsil in the south-east also cuts right across the topographical divisions but Bidhuna tehsil in the north-east is homogeneous. The northern belt is the broadest covering half the district, and it consists of the country lying north-east of Sengar river which wends its way south-eastwards down the district and serves a most important role in the drainage system of the district. It includes the northern portions of tehsils Etawah, Bharthana and Auraiya and whole of Bidhuna. This whole belt locally known as *Pachar* presents a level expanse of upland. The surface is only broken by occasional sandy ridges or by one or two inconsiderable streams such as the Pandu and Arind and the latter's tributaries. The second belt, the *Ghar* running the whole length of the district, lies between the Sengar and the Yamuna. It comprises a slightly undulating stretch of country covering portions of Etawah and Bharthana and the bulk of the Auraiya tehsil. Much of the land in the west along the Sirsa and near its junction with Sengar is inferior ; and sand-dunes of considerable extent are to be found. Eastward from Etawah the *Ghar* has very gentle undulations with a tendency of the lower levels to settle towards the centre, while the land rises towards the ridges overlooking the two rivers Sengar in the north and Yamuna in the south. Hillocks of sand and *bhur* are found in tehsil Bharthana. In Auraiya there is a fairly clearly defined backbone of depressions down the centre of the tract. South of the *Ghar* lies the third belt which includes the parts of the same tehsils that adjoin the river Yamuna and is locally known as *Kharka*. This tract depends for its formation and character on the river itself ; ravines which have been carved out by erosion, lowlying land in the old river beds which the Yamuna has successively abandoned; and alluvial lands within the influence of the river at the present time. The fourth belt is the Chambal-Yamuna *doab*. It has two central level plateaus of good light soil : one in Etawah tehsil and the other in Bharthana tehsil. The two plateaus are separated from each other and surrounded on all sides by ravines of considerable areas. Most of the country is wide and desolate, incapable of irrigation and perhaps more suited for pastoral uses than agricultural. Wilder and more inaccessible still is a strip of villages south of the Chambal.

The Kuwari, Chambal, Yamuna and Sindh drain and over-drain the southern part of the district ; the rain water running off at a pace which does considerable damage by erosion. Above the Yamuna ravines a high ridge forms a watershed. In the *Ghar* the drainage is everywhere good and easy. The Canal Department has done a good deal of work for improving the drainage in other parts of the district and it seems to be master of the situation.

Soils

3. In the *Pachar* and *Ghar* tracts the soils are broadly distinguishable into *dumat* or loam, *matiyar* or clay and *bhur* or sand. Besides these are found everywhere lowlying beds of clay in which water collects during the rains and rice alone can be grown : these clay beds are known as *Jhabar*. In the *Kharka* and Trans-Yamuna tract several other classes of soil are met with. In the ravines of the river and the land immediately adjacent to them are found fields full of *kankar* and gravel the soil of which is called *pakar*. Below the ravines and in the wider valleys between them the soil that is flooded by the Yamuna is called *kachhar* and along the edges of the streams there is a rich strip of alluvial deposit which is known as *Tir*. Both *kachhar* and *Tir* vary greatly in quality : some patches of these soils consist of a rich reddish clay ; other portions are composed of a dark coloured loam ; and others again are white and sandy in appearance and less fertile. By far the most prevalent soil is *dumat* followed by *bhur*.

Classification of area

4. The figures of the classification of area during the last fifty years are given in Table 2 of Part III of this volume. The portion of area under the various categories works out as follows for 1950-51 :

Particulars	Actual figures (in acres)	Percentage
Cultivated area	653,007	60·3
Culturable waste (excluding current fallow)	88,718	8·2
Current fallow	32,861	3·0
Forest	42,142	3·9
Area not available for cultivation of which—	265,853	24·6
(a) *Covered with water*	*37,486*	*3·5*
(b) *Under sites, roads and buildings*	*28,558*	*2·6*
(c) *Barren*	*199,809*	*18·5*

The figure in the above table regarding culturable waste taken from the Season and Crop Report is, however, misleading. The State Agriculture Department conducted in 1949-50 a detailed enquiry through the District Officers regarding the nature of this area in each district. The following analysis of the area resulted from this enquiry :

Particulars	Area (in acres)	Percentage
Total Culturable waste (A+B+C)	**121,453**	**100**
A—Area under culturable waste land not available for immediate cultivation ..	57,551	47·38
(i) Forest under any legal enactment	32,787	27·00
(ii) Groves	16,037	13·20
(iii) Forests of timber trees	5	..
(iv) Thatching grasses, shrubs and bushes	4,960	4·08
(v) Land kept for grazing	3,762	3·10
B—Area under culturable waste land available for immediate cultivation but which could not be cultivated.	22,646	18·65
Of which due to—		
(i) *Kans* growth	6	..
(ii) Threshing floors	187	0·15
(iii) Malaria	11	0·01
(iv) Floods	419	0·35
(v) Lack of drains	490	0·40
(vi) Lack of water	15,431	12·71
(vii) Distance from *abadi*	616	0·51
(viii) Damage from wild animals	154	0·13
(ix) Other causes	5,332	4·39
C—Area under culturable waste land that can be brought under immediate cultivation after some improvements besides the area given against B.	41,256	33·97

From the above it will appear that of the total area recorded as cultivable waste, only 34·0 per cent. was really capable of being brought under immediate cultivation after some improvements.

Thus the land area cultivated and cultivable including current fallow *per capita* works out to 79·8 cents of which 70·7* cents have already been brought under cultivation and only about 4·3 cents can be further brought under the plough after some improvements. It is obvious that the saturation point for cultivation has already been reached in the district.

Climate and rainfall

5. The rainfall is normally ample. The average for the last quinquennium was about 34·15 inches. During the last fifty years the rainfall has been less than 12 inches in only one year and has been usually over 29 inches. Generally speaking the rainfall is equally well distributed over all portions of the district. Situated as it is on high and well drained land the climate of the district is reputed to be healthy.

*The figure also includes the area classed as current fallow.

6. Irrigation is derived from wells, rivers, tanks, lakes and other natural reservoirs. In 1950-51 the irrigated area from canals was 85·3 per cent., by wells 13·1 per cent. and by other sources 1·6 per cent. **Irrigation**

7. More acreage is sown under *kharif* crops than in *rabi* crops. The area under *kharif* in 1950-51 was 409,642 acres, that under *rabi* 352,000 acres and that under *zaid* crops 2,687 acres. The principal *kharif* crop is *bajra* while the principal *rabi* crop is gram followed by wheat. **Crops**

B—Analysis of the Statistics

1. The table below shows the two basic figures—land, area and population—and the derived figures of land area *per capita*. **Population General distribution and density**

Tehsil	Population (in lakhs)	Density (number per square mile)	Land area (in lakhs of acres)	Land area *per capita*
Auraiya	2·41	581	2·66	1·10
Bharthana	2·34	561	2·67	1·14
Bidhuna	2·17	506	2·74	1·27
Etawah	2·79	653	2·73	0·98
Etawah district	*9·71*	*575**	*10·80*	*1·11*

This district though 39th in order of area stands 38th in respect of population. Its density works out to 575 as against 557 persons per square mile for the State as a whole. The density of the district has not been to a very great extent inflated by the presence of towns except for the Etawah tehsil ; that of Etawah tehsil is relatively higher due to the presence of Etawah city. The rural density of the district is 519 per square mile, the density of the rural parts of the tehsils being ; Auraiya 538, Bharthana 541, Bidhuna 506 and Etawah 493. (*Vide* Tables A-I and E)

2. The population of the district in 1951 was 20·3 per cent. higher than what it was fifty years ago. Compared to this the increase in population of the State during the corresponding period has been 30 per cent. The table below exhibits the variation in total, rural and urban population for the last five decades : **Growth of population**

Census year	Population			Variation		
	Total	Rural	Urban	Total	Rural	Urban
1901	806,798	736,910	69,888			
1911	760,121	695,740	64,381	—46,677 (—5·8)	—41,170 (—5·6)	—5,507 (—7·9)
1921	733,532	666,098	67,434	—26,589 (—3·5)	—29,642 (—4·3)	+3,053 (+4·7)
1931	746,005	673,299	72,706	+12,473 (+1·7)	+7,201 (+1·1)	+5,272 (+7·8)
1941	883,264	795,854	87,410	+137,259 (+18·4)	+122,555 (+18·2)	+14,704 (+20·2)
1951	970,695	869,594	101,101	+87,431 (+9·9)	+73,740 (+9·3)	+13,691 (+15·7

A noteworthy feature is that between 1901 and 1921 the population of the district recorded a decrease of 9·1 per cent. when that of the State decreased by 4·0 per cent. The havoc caused by plague and malaria accounts for the decrease between 1901—11. Due to the heavy mortality from influenza epidemic in 1918-19 a decrease has been recorded for the decade 1911—21. Abnormal deaths did not occur or were prevented from occurring in the post 1921 period and the population of the district recorded an increase of 32·3 per cent. since 1921. As compared to this the increase in the population of the State during the corresponding period has been of 35·5 per cent. The relatively smaller increase in

*According to the area given by the Surveyor General, it is 581.

the population of the district is due to the loss on balance of migration during 1921—31. The variations in the population of the tehsils during 1941—51 are shown below :

Tehsil	Percentage variation 1941—51
Etawah district	+9·9
Auraiya	+11·0
Bharthana	+9·9
Bidhuna	+10·4
Etawah	+8·6

Vital Statistics

3. Births and deaths mainly account for the trends in population growth. Migration also is a factor though of lesser importance. The following table gives the mean decennial registered birth and death-rates and the calculated natural increase rates and populaton growth-rates of the last three decades for the district as a whole and for its rural and urban areas :

	Total	Rural	Urban
Mean decennial birth-rate			
1941—50	28·0	26·6	40·4
1931—40	38·7	38·2	42·8
1921—30	35·2	35·4	32·9
Mean decennial death-rate			
1941—50	19·4	18·1	31·2
1931—40	22·7	21·5	33·2
1921—30	26·5	26·1	29·8
Mean decennial rate of natural increase			
1941—50	8·6	8·5	9·2
1931—40	16·0	16·7	9·6
1921—30	8·7	9·3	3·1
Mean decennial growth-rate			
1941—50	9·4	8·9	14·5
1931—40	16·8	16·7	18·4
1921—30	1·7	1·1	7·5

There are large omissions in the registration of births as well as deaths and so the above rates do not represent the true picture at all. They may, however, be taken roughly as indicative of trends. Both birth and death-rates have fallen during the last decade. It is also obvious that during 1931—40 the district had a very high rate of natural increase. This accounts for the large increase in population during that decade. Furthermore the figures of natural increase and growth-rate suggest considerable loss of population by migration during 1921—30 and small gains during 1931—40 and 1941—50.

The average yearly mortality from various causes in the district during 1941—50 was as follows :

Causes	Number of deaths	Percentage of total deaths
Fever	14,134	78·6
Dysentery or diarrhoea	306	1·7
Respiratory diseases	673	3·7
Plague, cholera and small-pox	435	2·4
Others	2,444	13·6

As in the rest of State 'fever' is responsible for a majority of deaths. But fever covers a number of ailments which the reporters are unable to identify. Deaths from plague, cholora and small-pox are negligible in the district. (*Vide* Table I, Part III of this volume.)

Migration

4. About 89·1 per cent. of the population enumerated in the district at the census of 1951 were born there, 9·2 per cent. were born in other districts of the State. 1·4 per cent. were born in other parts of India and only 0·3 per cent. came from other territories. Of the immigrants from the districts of the State as many as 44,243 (males 10,899, females

33,344) are from other districts of the same natural division and 45,451 (males 9,663, females 35,788) are from other parts of the State mostly from the adjacent districts. Most of the migration from the neighbouring districts is marriage migration. Of 12,758 immigrants from the adjacent States 9,322 (males 1,535, females 7,787) are from Madhya Bharat and 1,107 (males 633, females 474) are from Rajasthan. Most of the migration from Madhya Bharat is also marriage migration.

Of the immigrants who have come from territories beyond India 2,467 (males 1,399, females 1,068) were born in Pakistan and 44 (males 37, females 7) had their birth-place in other territories. The Pakistan-born are generally the displaced persons who number 2,427. Of the immigrants born in other territories 29 (males 27, females 2) are Nepal-born.

Of 12 non-Indian nationals 5 are Nepalies and the rest are Americans.

Unfortunately the figures of emigration are not available. However, according to the Vital Statistics the district appears to have lost about 52,000 persons during 1921—30 on balance of migration. Emigration had increased due to the movement of labour out of the district especially from tehsils Bharthana and Bidhuna. The cultivation of cotton had declined by half and the ginning factories employed far less labour. Bangle makers had migrated in considerable numbers from tehsil Bidhuna to Mainpuri and Agra districts and surplus agricultural labour had also moved out of the district. Emigration does not appear to be a strong force during 1931—40 and 1941—50. There appears to have been a gain of about 6,600 persons during 1931—40 and of 7,500 persons during 1941—50. It should, however, be borne in mind that the figures are affected by an element of registration error.

Decline of cultivation *per capita*

5. We may now analyse the growth of population in the district during the last thirty years in relation to the growth of cultivation during the same period. The figures for the district are exhibited in the marginal table. (Figures of area shown under census years are quinquennial averages for the five years ending with the crop year immediately preceding the census year). It is obvious that the cultivation has failed to keep pace with population. The cultivated area *per capita* has gone down to 63·7 cents in 1951 from 73·7 cents in 1921. The magnitude of this drop is about one-sixth of 1921 level. It means that (other things being equal) every man, woman and child must except to get less food and other agricultural produce from land in 1951 than in 1921.

Census year	Populaton	Net area sown (in acres)	Area of cultivation *per capita* (in cents)
1921	733,532	540,544	73·7
1931	746,005	550,014	73·7
1941	883,264	571,808	64·7
1951	970,695	618,135	63·7

Double cropped area *per capita*

6. It may be examined whether this shortage has been compensated by an increase in the yield per acre. Increase in yield per acre can be brought about by more double cropping, more irrigation, better fertilization and better culture. The average (quinquennial) area sown more than once was 132,176 acres in 1921 for the district. It slightly decreased to 105,838 acres in 1931. There was a substantial increase to 110,933 acres in 1941 and further increase to 126,129 acres in 1951 though the 1921 level had not been reached. The figures of area of double crop cultivation *per capita* in cents are as below :

Particulars	Quinquennial averages for the year preceding			
	1951	1941	1931	1921
Double crop cultivation *per capita* in cents ..	13·0	12·6	14·22	18·0
Unirrigated double crop cultivation *per capita* in cents	10·8	8·6	10·3	11·7
Irrigated double crop cultivation *per capita* in cents	2·2	4·0	3·9	6·3

The double crop cultivation has slightly increased since 1941 but the figure has not touched the 1931 or 1921 level. It is thus evident that the double cropped area has not kept pace with the rate of growth of population.

Irrigated area *per capita.*

7. The average area irrigated in the district was 240,285 acres in 1921. The figures were 197,139 acres in 1931, 227,057 acres in 1941 and 224,164 acres in 1951. The average area irrigated more than once was 46,258 acres in 1921, 29,226 acres in 1931, 35,000 acres in 1941 and 21,692 acres in 1951.

The figures for irrigation *per capita* are shown below :

Particulars	Years			
	1951	1941	1931	1921
Irrigated single crop cultivation *per capita* in cents ..	20·9	21·7	22·5	26·5
Irrigated double crop cultivation *per capita* in cents ..	2·2	4·0	3·9	6·3

The trend is distinctly towards a decline.

Cropped area

8. It is also significant that in spite of the rapid growth of population there has been a small change in the cropping pattern of the district. During the quinquennium 1916—21 86·7 per cent. of the cropped area was under food crops and only 13·3 per cent. of it was under non-food crops. Thirty years after during 1946—51 the cropped area under food crops was 90·8 per cent. and that under non-food crops was 9·2 per cent. The proportionate area under different crops in the district between 1911 and 1951 was as below.

Quinquennial average of	Total cropped area	Percentage of cropped area under							
		Rice	Wheat	Barley	Jaur	Bajra	Maize	Gram	Others
1911—16 ..	639,292	2·6	12·0	12·7	7·6	16·6	6·3	14·5	27·7
1916—21 ..	657,288	4·1	12·8	11·4	6·6	17·3	7·4	13·0	27·4
1921—26 ..	645,255	4·2	13·6	11·1	8·2	16·5	5·6	18·7	22·1
1926—31 ..	664,963	4·2	15·5	12·0	8·8	15·6	7·2	18·8	17·9
1931—36 ..	655,810	3·6	14·6	10·9	8·4	16·1	7·4	16·8	22·2
1936—41 ..	685,154	4·4	14·7	9·9	6·8	15·8	8·2	16·6	23·6
1941—46 ..	716,606	5·2	13·2	9·1	5·9	19·8	8·1	17·5	21·2
1946—51 ..	749,619	8·6	13·3	10·1	6·7	16·6	5·6	15·8	23·3

There has been a significant increase in the cultivation of rice in the district. In 1911—16 the area under rice was only 2·6 per cent. of the total cultivated area while the figure in 1946—51 was 8 6 per cent. Cotton and indigo are two non-food crops which have declined much in cultivation. In 1901-02 the area under cotton crop was 53,530 acres. In 1950-51 it was only 174 acres. In 1901-02 the area under indigo was 11,652 acres, while in 1950-51 it was only 1,123 acres. Sugarcane cultivation has been gradually increasing. The area under it was 12,129 acres in 1901-02. It increased to 23,315 acres in 1950-51.

Live-Stock, ploughs and carts

9. Live-stock in this country live for a large part of the year on bye-products of agriculture supplemented by green fodder crops. They have, therefore, to be correlated not only with the grazing available, but also with the total area under cultivation which carries a major portion of the burden of supporting the cattle population.

As will appear from Table 3 of Part III the total number of cattle and buffaloes which had been decreasing from 1930 to 1944 has during 1944—51 increased from about 4·96 lakhs to 5·44 lakhs.

The number of working cattle and buffaloes in the district had been increasing since 1935. It has increased to about 1·8 lakhs between 1944—51. This number of working cattle appears to be governed by the number of ploughs and carts. The number of ploughs has gone up from 0·92 lakhs in 1944 to a little over 1·15 lakhs in 1951 due apparently to progressive fractionalisation of holdings. The number of carts started rising since 1920 and now stands at about 24,000. The average net cultivated area per plough works out to 5·6 acres in 1951 as against 7·6 acres in 1920 and the average net cultivated area per pair of working cattle works out to 7·3 acres in 1951 as compared with 7·7 in 1935.

Breeding cows and she-buffaloes which fell from 1·75 lakhs to 1·72 lakhs during 1935—44 have gone up to 1·92 lakhs in 1951. The cows and female-buffaloes in milk per 1,000 of human population were 36 and 49 respectively. Owing to the poor milk yield, the share of milk per head is only a few ounces per day.

The number of sheep has been declining since 1930 and has gone down to about 13,000 due apparently to shortage of pasture. Goats have been going down in number since 1935 when they were about 2 lakhs. Their number in 1951 was about 1·1 lakhs, the reduction during 1935—44 being greater than during 1944—51.

Horses and ponies are declining in number. There was a fall during 1944—51 from about 10,000 to 9,896. Donkeys during the same period were reduced slightly.

Poultry has increased from about 11,000 to 13,000 during 1944--51.

Distributed on 1,000 of human population the figures of the main categories of live-stock in 1951 were as follows :

Cattle	Buffaloes	Sheep	Goats	Poultry	Others
273	287	13	115	14	26

10. To sum up, the population of the district is growing up at the biological natural rate since 1921. But on the other hand the land area *per capita*, the double crop area *per capita* and the irrigated area *per capita* are steadily declining. There is at the same time no evidence that crop yield per acre has increased nor has there been a very significant change in the cropping pattern. For such reasons, it is doubtful that the district will be able to produce its own food requirements for the rapidly increasing population unless substantial increase in the yield fills up the gap.

Villages and towns

11. The district has 1,477 villages and 7 towns. Out of about 9·71 lakhs of people who were counted at the census of 1951, 8·70 lakhs were found in the villages and 1·01 lakhs in the towns, i.e., there were as many as 896 people per 1,000 of population who live in the rural areas and only 104 of them live in urban areas. The corresponding figures for the State as a whole are : rural 864, urban 136.

The rural population per inhabited village works out to 589. But the villages do not necessarily comprise of a single compact site. There are 4,467 hamlets in the district and the population per hamlet is only 195. The medium-sized village with inhabitants numbering between 500—2,000 is the most dominant type in the district. Of the rural population 61·4 per cent. of the people live in such villages ; 25·5 per cent. live in small villages of population under 500 ; 11·9 per cent. live in large villages of population between 2,000 to 5,000 ; and only 1·2 per cent. live in very large villages of population over 5,000.

Towns vary in number of inhabitants even more widely than villages. Etawah city has a population of 59,986 persons or 59·3 per cent. of the urban population of the district. Only 7·3 per cent. of the urban population lives in towns of population under 5,000 (*viz.*, Ekdil and Lakhna) and 33·4 per cent. in towns of 5,000 to 20,000 population (*viz.*, Auraiya, Jaswantnagar, Bharthana, Phaphund). Etawah city has, recorded an increase in population of only 12·9 per cent. since 1941. The increase in its population since 1921 is of 44·3 per cent. Phaphund appears to be a declining town. Since 1941 the population has decreased by 9·2 per cent. There is nothing very significant about the growth of the towns in the district. (*Vide* Tables A-III and A-IV)

Occupations ; Livelihood pattern

12. Out of the total population of 970,695 (rural 869,594, urban 101,101) 754,364 (rural 742.632, urban 11,732) or 77·7 per cent. depend on agriculture for their means of livelihood and 216,331 (rural 126,962, urban 891,369) or 22·3 per cent. depend on non-agricultural sources. The following table gives the distribution of 100 persons of total, rural and urban population of the district and also of Etawah city under different livelihood classes :

Description	Agricultural classes					Non-agricultural classes				
	Total	I	II	III	IV	Total	V	VI	VII	VIII
Total	**77·7**	**69·7**	**4·5**	**1·7**	**1·8**	**22·3**	**6·2**	**4·7**	**0·9**	**10·5**
Rural	**85·4**	76·9	4·9	1·8	1·8	**14·6**	4·1	2·3	0·4	7·8
Urban	**11·7**	8·3	1·0	0·2	2·2	**88·3**	24·6	25·2	5·7	32·8
Etawah city	**7·6**	4·7	0·4	0·1	2·4	**92·4**	25·4	23·4	6·5	37·1

It is obvious that this district is one of the predominantly agricultural districts of the State. Here as many as 77·7 per cent. of the people depend on agriculture as against 74·2 per cent. in the State as a whole.

Of the total population of the district 627,856 persons (males 212,833, females 415,023) or 64·7 per cent. have been classified as non-earning dependants. The percentage of non-earning dependants in the agricultural population works out to 65·1 and that among non-agricultural classes as 63 0. It will be observed that in the main they consist of women. The male non-earning dependants are mostly children. 31,400 persons (males 14,837, females 16,563) or 3·2 per cent. of the population are earning dependants. Among the agriculturists their proportion is 3·4 per cent. and among non-agriculturists they form 2·7 per cent. Agriculture is a family occupation and it provides work to the women and grown up children in the family. The remaining 311,439 persons(males 299,848, females 11,591)or 32·1 per cent. of the population are self-supporting persons. Their proportion among agriculturists is 31·5 per cent. and among the non-agriculturists 34·2 per cent. Of the self-supporting persons 237,361 (males 231,767, females 5,594) belong to the agricultural classes and 74,079 persons (males 68,081, females 5,997) to the non-agricultural classes. On an average, a self-supporting person maintains two non-earning dependants.

Of the 74,078 self-supporting persons belonging to non-agricultural classes, 1,731 persons (rural 1,268, urban 463) earn their livelihood from non-productive sources. Of the remaining 72,347 self-supporting persons (rural 43,891, urban 28,456) 743 persons (rural 85, urban 658) or 1·0 per cent. are employers, 15,490 persons (rural 9,050, urban 6,440) or 21·4 per cent. are employees and 56,114 persons (rural 34,756, urban 21,358) or 77·6 per cent. are independent workers.

The distribution of 10,000 self-supporting persons of non-agricultural occupations classified according to economic divisions is as follows :

Name of division	Self-supporting persons by divisions
All Industries and Services	**10,000**
0 —Primary industries not elsewhere specified	279
1—Mining and quarrying	8
2 —Processing and manufacture—foodstuffs, textiles, leather and products thereof ..	1,613
3—Processing and manufacture—metals, chemicals and products thereof	146
4—Processing and manufacture—not elsewhere specified	806
5—Construction and utilities	408
6—Commerce	1,910
7—Transport, storage and communications	420
8—Health, education and public administration	771
9—Services not elsewhere specified	3,639

Among the large scale industries, the principal are cotton ginning and pressing and flour mills. Among the cottage industries the principal are handloom cloth weaving (cotton), silk, woollen blankets, leather tanning, iron utensils, *moondhas*, horn combs and handles.

Variation in the livelihood pattern.

13. In the district, the proportion of population depending on agriculture for their livilihood was 77 3* per cent. in 1951. The unfortunate fact is that the agricultural proportion had been increasing since 1901 when the figure stood at 69·9 per cent. excepting the year 1911 when it slightly declined. It was 64·7 per cent. in 1911 and 75 0 per cent. in 1921. The actual number of persons who depend on agriculture has increased to 750,828 in 1951 from 550,052 in 1921 or by 36 5 per cent. while the increase in the area of cultivation has been relatively very small. This has resulted in the progressive fragmentation and subdivision of holdings and pressure on impoverished soil. There appears to have been gradual decline in village arts and crafts. The cumulative result is a fall in the proportion of workers and a corresponding rise in dependency. The proportion of workers in the total population in 1951 was 34·3 per cent. (agricultural 25·7, non-agricultural 8·6 per cent.) against 50·5 per cent. (agricultural 36 4 per cent., non-agricultural 14 1 per cent.) in 1921. The proportion of non-earning dependants has consequently increased from 49·5 per cent. (agricultural 38·6 per cent. non-agricultural 10·9 per cent) in 1921 to 65·7 per cent. (agricultural 50·6 per cent., non-agricultural 15 1 per cent.) in 1951. All this is an index of increasing unemployment and under-employment. It is only by the diversion of population to cottage industries and other industries that the present severe disequilibrium in the economy of the district can be redressed. (*Vide* Tables **B-I, B-II** and **B-III**)

Houses and households

14. There were 141,585 occupied houses in the district—125,279 in villages and 16,306 in towns. That gives an average of 6,941 persons per 1,000 houses or 6·9 persons per house in the rural areas and 6,200 persons per 1,000 houses or 6·2 persons per house in the urban areas.

There were 187,412 households in the district—165,773 in rural areas, 21,369 in urban areas. That gives an average of 5,237 persons per 1,000 households or 5·2 persons per household in rural areas and 4,683 persons per 1,000 households or 4·7 persons per household in the urban areas. The marginal table shows the developments in the size of the household since 1921. The rural households have slightly increased in size in 1951 and are considerably bigger than the average State rural household (5·07). The urban household has registered a marked decrease since 1941.

	Persons per 1,000 households of	
Census year	Rural Population	Urban Population
1921	4,401	4,625
1931	4 699	4,497
1941	5,188	4,941
1951	5,237	4.683

*This figure includes earning dependantsaccording to their secondary means of livelihood, while the figure 77·7 in paragraph 12 includes earning dependants according to their principal means of livelihood and hence the difference.

Out of 5,237 persons in every 1,000 rural households 2,842 are males and 2,395 females. There is a male excess of 447 in every 1,000 households. Out of 4,683 persons in 1,000 urban households 2,552 are males and 2,131 are females. There is again a male excess numbering 421 in every one thousand households.

Information regarding types of household and household relationships was also collected at this census with the help of a sample of about 4 per cent. According to this in every 1,000 sample households there are 4,919 persons (males 2,699, females 2,220) in the district. The corresponding figure of the total count is 5,173.

The table below shows the distribution by size of 1,000 sample households :

Description	Small with 3 members or less	Medium with 4—6 members	Large with 7—9 members	Very large with 10 members or more
Total	332	428	179	61
Rural	318	433	186	63
Urban	452	380	123	45

Medium-sized households are the dominant type in the villages, while small households are more numerous in the towns. Quite a large number of migrants live in towns without their families.

Family composition of 1,000 sample households is as follows :

			Number in 1,000 households
A	Heads of households	Males (married)	670
		Males (widowers)	308
		Females	22
	Wives of heads of households		670
			1,670
B	Sons of heads of households		*1,040*
	Daughters of heads of households		*612*
			1,652
C	Male relations of heads of households (other than sons)		618
	Female relations of heads of households (other than daughters)		846
			1,464
D	Persons unrelated to the heads of the households	Males	63
		Females	70
			133
	Grand Total		*4,919*

Sons outnumber the daughters of the heads of households. The latter leave the homes of their parents after marriage. Female relations (other than daughters) outnumber the male relations (other than sons). Such females are generally those who become members of these households by marriage. (*Vide* Tables A-I and C-I)

15. In the district as a whole the sex-ratio was 840 i.e., there were 840 females to every 1,000 males. It varies among the tahsils. The lowest value was 816 in Bidhuna tehsil. The highest value was 852 in Auraiya tehsil. The differences are not very significant. The ratio was 846 in Bharthana and 844 in Etawah. **Sex-ratio**

The sex-ratio is smaller in towns than in villages. For the district as a whole the sex-ratio in villages was 842 while in the towns it was 822. The sex-ratio for the city was 820.

The corresponding figure of sex-ratio for the district was 814 in 1921, 806 in 1931, the 833 in 1941, and 840 in 1951. The sex-ratio has been rising since 1931.

Age-structure

16. The number in each age-group in the district is shown below as a percentage of the total number of all ages in the total, rural and urban population separately :

Age-group			Total population			Rural population		Urban population	
			Persons	Males	Females	Males	Females	Males	Females
Infants and young children	0—4	..	13·6	6·8	6·8	6·8	6·8	7·3	6·6
Boys and girls	5—14	..	25·3	13·6	11·7	13·7	11·8	12·9	10·8
Young men and women	15—34	..	34·4	18·7	15·7	18·6	15·8	19·4	14·7
Middle-aged men and women	35—54	..	20·1	11·7	8·4	11·7	8·4	11·4	8·9
Elderly persons	55 and over	..	6·6	3·9	2·7	3·8	2·6	4·6	3·4

It will be seen that the population is progressive. 38·9 per cent. of the population is of ages under 15 and only 6·6 per cent. of it consists of elderly persons. Again, it may be noted that proportionately larger numbers in the working ages (15—54) are found in the urban areas. This is due to the migration of workers to the towns from the villages, many of whom are unaccompanied by their families. (*Vide* Table C-II)

Marital status

17. Out of every 10,000 persons in the district there are 5,466 males and 4,534 females* Among them 3,165 males and 1,762 females are unmarried. If we reckon males and females together, the unmarried people are 49·3 per cent. of the population.

Of the males 57·9 per cent. were unmarried, 35·7 per cent. were married and 6·4 per cent. were widowed or divorced. Among the females 38·9 per cent. were unmarried, 49·0 per cent. were married and 12·1 per cent. were widowed or divorced.

Of the married males, 2·3 per cent. were of ages below 15, 53·7 per cent. were of ages 15—34, 35·2 per cent. were of ages 35—54 and 8·8 per cent. were of ages 55 and over. Among the married females 8·2 per cent. were of ages below 15, 63·7 per cent. were of ages 15—34, 26·1 per cent. were of ages 35—54 and 2·0 per cent. were of ages 55 and over or elderly women.

Marriage is universal. Among males and females aged 35 years and over only 25·4 per cent. of the males and 1·3 per cent. of the females were found unmarried. Most of the females are married before they attain the age of 25. Child marriage is still prevalent though it is not very common. 2·1 per cent. of the males of ages 0—14 and 9·8 per cent. of the females of ages 0—14 were returned as married. (*Vide* Table C-III)

Languages

18. Over 99·7 per cent. of the people of the district returned Hindi, Hindustani or Urdu as their mother-tongue. Among the other mother-tongues spoken, the main are Punjabi (0·16 per cent.), Sindhi (0·06 per cent.), Rajsthani-*cum*-Marwari (0 03 per cent.) and Bengali (0·02 per cent.). Of the 9·7 lakhs of people only 1,757 or 0 2 per cent. were bilingual (in any Indian language). Those whose mother-tongue is other than Hindi, Hindustani or Urdu are generally the migrants who are able to speak any of these as subsidiary language. Persons returning Hindi, Hindustani or Urdu as secondary language were 1,615 or 91·9 per cent. of those who were bilingual in some Indian language. (*Vide* Table D-I)

Religion and special groups

19. Out of 10,000 population of the district, the number of people belonging to different religions is : Hindus 9,381, Muslims 583, Sikhs 10 and Christians 7 ; of 10,000 population in villages the numbers are : Hindus 9,627, Muslims 359, Sikhs 3 and Christians 6 ; and of 10,000 population in towns the numbers are : Hindus 7,269, Muslims 2,510, Sikhs 65, Christians 13 and others 143. Muslims, Sikhs and Christians are generally concentrated in urban areas of the district as is the case with the other parts of the State.

There are 207 thousands Scheduled Castes in the district. Their number per 10,000 of population works out to 2,132. In villages they are 2,263 for every 10,000 and in the towns their number per 10,000 is only 1,006. No Anglo-Indian was returned at the census of 1951 in this district. (*Vide* Tables D-II and D-III)

Displaced persons

20. The number of displaced persons in the district at this census was 2,427 (males 1347, females 1,080), a large majority of whom are concentrated in the towns and are engaged in commerce. Of the displaced persons in the district 93·7 per cent. have come from West Pakistan, 0·5 per cent. have come from East Pakistan and 5·8 per cent. from districts which could not be traced. (*Vide* Table D-V)

Literacy

21. The percentage of male literacy was 20·1 in the district while that of female literacy was 4·7 only. The percentage of literacy in 1931 was for males 9·2, and for females 1·1† per cent. On January 1, 1951, there were 539 primary schools in the district with enrolment of 54,038. (*Vide* Table D-VII)

*The corresponding figures for the total count are 5,434 and 4,566.

†The number per mille (of the 10 per cent. sample population) of each sex aged 5 years and over who were returned as literates are as below :

Males		Females	
1951	1931	1951	1931
225	107	49	13

C—Explanatory Note on the Statistics

The statistics in this volume have been presented in three parts :

I—District Census Tables

II—Village, Town, Pargana and Thana Statistics

III—Miscellaneous Statistics

Parts I and II contain census data. A brief account of the system of sorting of census slips and preparation of tables and abstract therefrom is given below :

Part III contains statistics throwing light on special aspects of population and its growth. These have been derived from miscellaneous sources. Table 1, "Vital Statistics ", has been prepared from the published and unpublished records of the Director of Medical and Health Services, Table 2, " Agricultural Statistics ", from the Annual Season and Crop Reports, Table 3, " Live-Stock, Agricultural Machinery and Implements", from the published figures of Live-Stock Census and Table 4, " List of Primary Schools ", from information specially supplied by District Inspector of Schools.

Processing of Census data

2. The census data presented here has been derived from the census slips by a process of sorting compilation and tabulation. In previous censuses the slips were first sorted by religion and this division was maintained throughout so that all data was cross-tabulated by religion. This procedure has been abandoned at this census and substituted by a division based on economic characteristics of the population. The whole population has been divided into eight livelihood classes, four of which are of the agricultural category and four of non-agricultural category as follows :

Agricultural Classes—

I—Cultivators of land wholy or mainly owned, and their dependants

II—Cultivators of land wholly or mainly unowned ; and their dependants

III—Cultivating labourers ; and their dependants

IV—Non-cultivating owners of land ; agricultural rent receivers, and their dependants

Non-agricultural Classes—

V—Production (other than cultivation)

VI—Commerce

VII—Transport

VIII—Other services and miscellaneous sources

Another special feature of the sorting of this census was the separation, from the very start, of slips of displaced persons and of 10 per cent. random sample from the remainder. This has enabled the data of displaced persons to be presented separately while the 10 per cent. sample has been utilized for the preparation of Age Tables.

The slips of this census have been copied by Households into a National Register of Citizens, which has been prepared village-wise for rural areas and mohalla/ward-wise for urban areas. Table C-I is based on a 4 per cent. sample extracted from this Register.

Tracts

3. The slips were first sorted by villages for the preparation of the Primary Census Abstract. For the purpose of further sorting the State was divided into tracts consisting of (*a*) *rural tracts*, comprising the rural popualtion of each tehsil, (*b*) *urban city tracts*, comprising the population of areas which had been declared as cities, (*c*) *urban non-city tracts*, comprising the popualtion of urban areas of a district cexcluding areas declared as cities. Each tract was treated as a unit for sorting of slips. All data were compiled first by the tracts and then by districts. This volume presents this tract-wise data for one district (with the exception of A and E Tables, which have been presented tehsil-wise) while the district-wise data for the whole State is contained in the following State volumes :

Part I-B—Subsidiary Tables

Part II-A—General Population Tables

Part II-B—Economic Tables

Part II-C—Age and Social Tables

Explanatory notes

4. Detailed explanatory notes are appended to each State table in the printed volumes of State tables. They apply to the tables in this volume also and should be referred to when necessary. A few notes of some of the tables are reproduced below :

Table A-I—Column 5 realting to "hamlets" has been introduced for the first time. Any distinctive cluster or agglomeration of houses has been treated as a "hamlet".

A clear distinction has been made in this census between a "House" and a "Household". A house is any human dwelling having a separate main entrance while a household is any commensal unit living in a census house. In previous censuses the figures under "Occupied Houses" used to be that of households, while the figures under columns 7—9 of the present tables refer to occupied census houses as distinct from households.

The Economic Table—The Indian Census Economic Classification Scheme, 1951, together with the occupational division and sub-division adopted for this census are given in Part II-B of the Report.

Table B-I—Each of the eight livelihood classes mentioned above has been divided into three sub-classes, with reference to the economic status, as follows :

(i) Self-supporting persons ;

(ii) Non-earning dependants ; and

(iii) Earning dependants

These were defined in the *Instrictions to Enumerators* as follows :

> "A 'self-supporting person' is one who is in receipt of an income and that income is sufficient at least for his own maintenance. To be 'self-supporting' a person need not be able to support his family. All that is necessary is that he should be earning sufficient for his personal needs. For purposes of this question the person enumerated is the unit and not the family or household. Any one who is not a self-supporting person in this sense is a 'dependant'. A 'dependant' may be either an 'earning dependant' or a 'non-earning dependant'. The test is whether he secures a regular (and not casual) income, even though it may be small. Such income may be in cash or kind ; it may be continuous or seasonal employment. When the income which he secures is not sufficient to support him that person is an ' earning dependant '. A person who does not earn any income either in cash or kind is a ' non-earning dependant '. Where two or more members of a family household jointly cultivate land and secure an income therefrom, each of them should be regarded as earning part of the income. None of them is, therefore, a non-earning dependant. Each of them should be classed either a 'self-supporting person' or ' an earning dependant ' according to the share of income attributable to each. The same applies to any other business carried on jointly. The share of the income is what the head of household deems it to be. This does not mean that every one who works is necessarily a self-supporting person or an earning dependant. Thus, for instance, a housewife who cooks for the family, brings up the children or manages the household is doing very valuable work. Nevertheless, her Economic Status is that of a non-earning dependant, if she does not also earn an income, and should be recorded as such ."

Economically active, Semi-active and Passive persons—All non-earning dependants are economically passive. They include persons performing house-work or other domestic or personal services for other members of the same family household. But they do not include " unpaid family workers " or persons who take part along with the members of the family household in carrying on cultivation or a home industry as a family enterprise.

All earning dependants are economically semi-active only. Though they contribute to the carrying of economic activities, the magnitude of their individual contribution is deemed to be too small to justify their description as economically active. (Their contribution to economic activity is, however, taken into account in the tabulation of data based on secondary means of livelihood.)

All self-supporting persons are ordinarily economically active with the exception of the following classes and groups :

(*a*) All self-supporting persons of Agricultural Class IV.

(*b*) The following groups of self-supporting persons who are included in Non-agricultural Class VIII and derive their principal means of livelihood from miscellaneous sources (otherwise than through economic activity) :

(i) Persons living principally on income from non-agricultural property ;

(ii) Persons living principally on pensions, remittances, scholarships and funds ;

(iii) Inmates of alms-houses and recipients of doles ;

(iv) Beggars and vagrants ; and

(v) All other persons living principally on income derived from non-productive activities.

Table B-II—For a self-supporting person who has more than one means of livelihood the *secondary means* of livelihood is the livelihood next in importance to his principal means of livelihood. For an earning dependant it is the source from which he secures his own income, where there are more than one subsidiary occupations only the one providing the largest income has been taken into account.

Table B-III—"Employers", "Employees" and "Independent Workers" have been defined as follows in the Instructions to Enumerators :

> An "employer" is only that person who has necessarily to employ other person in order to carry on the business from which he secures his livelihood. Thus if a person employs a cook or any other person for domestic services, he should not be recorded as an "employer" merely for that reason.
>
> An "employee" is a person who ordinarily works under some other person for a salary or a wage in cash or kind as the means of earning his livelihood. There may be persons who are employed as managers, superintendents, agents, etc., and in that capacity control other workers. Such persons are also employees only and should not be regarded as 'employers.'
>
> An "independent worker" means a person who is not employed by any one else and who also does not employ anybody else in order to earn his livelihood (Sweepers, *dhobies*, *kahars*, etc., who work for several masters are independent workers. If, however, any of them accepts whole-time employment under one master he becomes "employee". Daily wage-earners who work for different masters are likewise independent workers. But if they accept employment under one master, e.g., under a factory, they become "employees.")

Tables C-II, C-III, C-IV and C-V—The figures presented in these tables are based on single year age returns and have not been smoothed.

Tables D-V (i) *and* (ii)—For the purpose of these tables a "displaced person" has been defined as follows :

> "A displaced person means any person who has entered India having left or being compelled to leave his home in Western Pakistan on or after the 1st March, 1947, or his home in Eastern Pakistan on or after the 15th October, 1946, or account of civil disturbances or on account of the setting up of the two Dominions of India and Pakistan."
