DISTRICT CENSUS HANDBOOK
1951

BAREILLY DISTRICT

Studies & Research
Section.

FOREWORD

Several States, including Uttar Pradesh, have been publishing village statistics by districts at each census. In 1941 they were published in U. P. under the title "District Census Statistics" with a separate volume for each district. In the 1951 census, when the tabulation has been more elaborate than ever in view of the requirements of the country, the district-wise volume has been expanded into a "District Census Handbook", which now contains the District Census Tables (furnishing data with break-up for census tracts within the district), the District Index of Non-agricultural Occupations, agricultural statistics from 1901-02 to 1950-51 and other miscellaneous statistics in addition to the usual village population statistics. The village population statistics also are given in an elaborate form giving the division of the population among eight livelihood classes and other details.

2. It may be added here that a separate set of district-wise volumes giving only population figures of rural areas by villages and of urban areas by wards and mohallas and entitled "District Population Statistics" has already been published. This separate series was necessitated by the urgent requirements of the U. P. Government for elections to local bodies.

3. The number of District Census Handbooks printed so far is fourteen. Special arrangements for speeding up the printing have now been made and it is hoped that the remaining Handbooks will be printed before the end of 1955.

RAJESHWARI PRASAD, I.A.S.,
Superintendent, Census Operations,
Uttar Pradesh.

RAMPUR:
March 31, 1955.

INTRODUCTION

A—The District

1. The district of Bareilly is bounded on the north by the Naini Tal district, on the east by Pilibhit, on the south-east by Shahjahanpur, on the south and south-west by Budaun and on the west by Rampur. The district has a total area of 1,591 square miles which is less than the average district area of the State. Its population in 1951 was about 12·7 lakhs. It has 5 tehsils, 13 parganas and 20 thanas.

Topography

2. The district is an open plain, sloping gradually from north to south, its level surface being diversified by the valleys of the numerous rivers and by gentle undulations which become more pronounced in the south and especially in the south-east. The slope from north to south is remarkably uniforms. Even river valleys are shallow troughs of little width, so that their waters can readily be utilised for irrigating the rich level country on either bank. Further south the valleys become deeper and more clearly defined, while in the eastern portion they are separated by high watersheds on which the soil is light and sandy ; the level surface is varied by rolling undulations and in places there appear well marked ridges and low sand hills. On the whole the district is remarkably fertile, the country is well wooded and water lies almost everywhere within a short distance of the surface.

The north of the district is a geographical continuation of the *tarai*. It has a rich soil, a particularly high water-level and an unhealthy climate. There are no longer any forests in this district, but forest belt of the *tarai* in several places advances to within a few miles of the northern border in tehsil Baheri. This tract has an imperfect natural drainage and exceptionally bad character of the water.

South of the Sub-Himalayan belt is the open country comprising the upland *bangar* and the low *khadar* of the river valleys. The *bangar* which comprises the greater part of the district consists as a whole of a series of parallel strips between the various rivers, all of which take a more or less southerly course. The soil becomes lighter in texture towards the south and south-east, the clays of the north giving place to the loams of the west and centre, which in turn are succeeded by the light sandy soils of the south-east. The *khadar* is usually of small extent save in the case of the Ramganga. The valley of this river has an average width of four or five miles, and within these limits the river has wandered at pleasure in different ages enriching the land with alluvial deposists. The *khadars* of the other rivers are not very important.

Soils

3. In the Ramganga basin, which is typical of the *khadar* tract, the surface soil varies from the richest alluvial earth to mere sand. Successive deposits of alluvial silt, known as *kamp*, gradually raise the level till the land becomes almost or entirely free from inundation ; and in such places the *khadar* is extremely productive, the fertility of the soil remaining unimpaired till the river changes its course. The *bangar* soils consist of sand, of clay and of *dumat* or loam. Sandy soil is called *bhur* and is the poorest of all, being too porous to retain moisture. Clay varies greatly in its composition. In the hot weather the clay dries up and splits into deep cracks, the soil being so hard as to be quite impenetrable to the plough, until softened by rain. It is very retentive of mositure. A greasy, sticky clay is called *chiknot* and the heavy grey clay with traces of iron is called *khapat*. The latter is a very unproductive vareity. Loam occupies a position mid-way between the two and is by far the most important soil, occupying about 68 per cent. of the total area, as compared with 4·9 per cent. of *bhur*, 20·8 per cent. of clay and 6·3 per cent. of alluvial soil. It is a moderately firm but porous soil. Loam soils prevail over the larger part of the district and clay is confined mainly to portions of the Nawabganj, Baheri and Bareilly tehsils and to the south of Aonla.

Classification of area

4. The figures of classification of area during the last fifty years are given in Table 2 of Part III of this volume. The proportion of area under the various categories works out as follows for 1950-51 :

	Actual figures (in acres)	Percentage
Cultivated area	777,966	77·2
Cultivable waste (excluding current fallow)	81,065	8·0
Current fallow	42,431	4·2
Forest	..	..
Area not available for cultivation of which—	106,492	10·6
(*a*) *Covered with water*	*42,145*	*4·2*
(*b*) *Under sites, roads and buildings*	*43,155*	*4·3*
(*c*) *Barren*	*21,192*	*2·1*

The figure in the above table regarding culturable waste taken from the Season and Crop Report is, however, misleading. The State Agriculture Department conducted in 1949-50 a detailed enquiry through the District Officers regarding the nature of this area in each district. The following analysis of the area resulted from this enquiry :

Particulars	Area (in acres)	Percentage
Total culturable waste (A+B+C)	**81,569**	**100**
A—Area under culturable waste land not available for immediate cultivation ..	20,409	25·0
(i) Forest under any legal enactment	278	0·3
(ii) Groves	18,081	22·1
(iii) Forests of timber trees	47	0·1
(iv) Thatching of grasses, shrubs and bushes	1,293	1·6
(v) Land kept for grazing	710	0·9
B—Area under culturable waste land available for immediate cultivation but could not be cultivated	4,675	5·7
Of which due to—		
(i) *Kans* growth	11	..
(ii) Threshing floors	537	0·7
(iii) Malaria	..	..
(iv) Floods	187	0·2
(v) Lack of drains	5	..
(vi) Lack of water	634	0.8
(vii) Distance from *abadi*	440	0·5
(viii) Damage from wild animals	..	..
(ix) Other causes	2,861	3·5
C—Area under culturable waste land that can be brought under immediate cultivation after some improvements besides the area given against B ..	56,485	69·3

From the above it will appear that of the total area recorded as culturable waste, only 69·3 per cent. was really capable of being brought under immediate cultivation after some improvements.

Thus the land area cultivated and cultivable including current fallow *per capita* works out to 71·0 cents of which 64·6* cents have already been brought under cultivation and only about 4·5 cents can be further brought under the plough after some improvements. It is obvious that the saturation point for cultivation has already been reached in the district.

Climate and rainfall

5. The climate of the district is largely influenced by the proximity of the hills and the *tarai* to the north. The city of Bareilly and the northern parganas are directly affected by the heavier storms in the hills, with the result that the rainy season commences a few days earlier and terminates somewhat later than in the districts to the south, while the cold weather is of longer duration. The influence of *tarai* is illustrated by the relative dampness of the climate, and other characterisitics are moderate heat in summer and partial immunity from violent hot winds. Towards the end of rains the climate is decidedly unhealthy. During the winter frosts of considerable intensity occur.

The average rainfall for the last quinquennium was 42·6 inches. During the last 45 years the rainfall has been less than 30 inches in only four years. The wettest tehsil of the district is Baheri.

Irrigation

6. Irrigation is derived from canals, tube-wells, other wells and other sources. In 1950-51 the area irrigated by canals was 79.3 per cent., by tube-wells 6·8 per cent., by other wells 4·4 per cent. and by other sources 9·5 per cent.

Crops

7. More acreage is sown under *kharif* than under *rabi*. In 1950-51 the area under *kharif* crops was 552,675 acres and that under *rabi* crops 378,946 acres. The principal *rabi* crop is wheat and the principal *kharif* crop is rice. Sugarcane is one of the important crops of the district. The area under it has risen from 50,137 acres in 1901-02 to 84,259 acres in 1950-51.

*This figure also includes the area classed as current fallow.

B—Analysis of the Statistics

Population: General distribution and density

1. The table below shows the two basic figures-land area and population—and the derived figures of land area *per capita* :

Tehsil	Population (in lakhs)	Density (number per square mile)	Land area (in lakhs of acres)	Land area *per capita*
Aonla	2·40	756	2·03	0·85
Baheri	2·04	553	2·36	1·16
Bareilly	5·36	1,216	2·82	0·53
Faridpur	1·49	613	1·56	1·04
Nawabganj	1·40	633	1·42	1·01
Bareilly district	*12·69*	*797**	*10·19*	*0·80*

This district though forty-second in order of area stands twenty-first in the State in respect of population. Its density is 797 while that of the State is 557. The density of the district has been inflated by the presence of the large city of Bareilly. The rural density of the district is only 637 per square mile, the density of the rural parts of the tehsils being : Aonla 689, Baheri 508, Bareilly 774, Faridpur 568 and Nawabganj 590. Baheri tehsil which has a relatively low density, is very unhealthy, adjoining as it does the '*tarai*'. (*Vide* Tables A-I and E)

Growth of population

2. The population of the district in 1951 was only 16·4 per cent. higher than what it was fifty years ago. Compared to this the increase in the population of the State during the corresponding period has been 30 per cent. The table below exhibits the variation in the total, rural and urban population for the last five decades :

Census year	Population			Variation		
	Total	Rural	Urban	Total	Rural	Urban
1901 ..	1,090,117	907,354	182,763	..	..	..
1911 ..	1,094,663	914,059	180,604	+4,546 (+0·4)	+6,705 (+0·7)	—2,159 (—1·2)
1921 ..	1,013,875	835,070	178,805	—80,788 (—7·4)	—78,989 (—8·6)	—1,799 (—1·0)
1931 ..	1,072,379	872,940	199,439	+58,504 (+5·8)	+37,870 (+4·5)	+20,634 (+11·5)
1941 ..	1,175,197	917,233	258,964	+103,818 (+9·7)	+44,293 (+5·1)	+59,525 (+29·8)
1951 ..	1,269,233	988,986	280,247	+93,036 (+7·9)	+71,753 (+7·8)	+21,283 (+8·2)

A noteworthy feature is that between 1901 and 1921 the population of the district recorded a decrease of 7·0 per cent. when that of the State decreased by 4·0 per cent. only. It suffered from temporary migration caused by plague at the time of census of 1911 and during 1911—21 a heavy loss was caused by the influenza epidemic. The population of the district recorded an increase of 25·2 per cent. since 1921 against an increase of 35·5 per cent. in the population of the State during the same period. The reason for the small increase in population is that according to the vital statistics the district appears to have always been losing since 1921, on the balance of migration.

The population of the district increased by 7·9 per cent. in the last decade, which is well below the average of the State. The percentage increases in the population of the tehsils during 1941—51 have been Aonla 7·2, Baheri 6·1, Bareilly 9·6, Faridpur 7·6 and Nawabganj 6·1.

The Vital statistics

3. Births and deaths mainly account for the trends in population growth. Migration also is a factor though of lesser importance. The following table gives the mean decennial registered birth and death rates and the calculated natural increase and the population growth

*According to the area given by the Surveyor General, it is 798.

rates of the last three decades for the district as a whole and for its rural and urban areas :

	Total	Rural	Urban
Mean decennial birth-rate			
1941—50	**31·6**	30·7	34·8
1931—40	**41·6**	42·5	38·1
1921—30	**42·2**	45·6	26·7
Mean decennial death-rate			
1941—50	**21·1**	20·8	22·2
1931—40	**30·5**	32·4	23·1
1921—30 .. .	**32·5**	35·6	18·6
Mean decennial rate of natural increase			
1941—50	**10·5**	9·9	12·6
1931—40	**11·1**	10·1	15·0
1921—30	**9·7**	10·0	8·1
Mean decennial growth-rate			
1941—50	**7·6**	7·5	7·9
1931—40	**9·2**	4·9	26·0
1921—30	**5·6**	4·4	10·9

There are large ommissions in the registration of births as well as deaths and so the above rates do not represent the true picture at all. They may, however, be taken to be roughly indicative of trends. Both birth and death rates have fallen during the last decade.

The figures of natural increase and growth-rate suggest loss of population by migration during 1921—30, 1931—40 and 1941—50.

The average yearly mortality from various causes in the district during 1941—50 was as follows :

Causes	Number of deaths	Percentage of total deaths
Fever	21,217	82·1
Dysentry and diarrhoea	430	1·6
Respiratory diseases	1,620	6·3
Plague, cholera and small-pox	799	3·1
Others	1,776	6·9

As in the rest of the State ' fever ' is responsible for the majority of deaths. But fever covers a number of ailments which the reporters are unable to identify. (*Vide* Table I, Part III of this volume).

Migration

4. 90·75 per cent. of the people enumerated in the district at the census of 1951 were born there, 7·33 per cent. were born in other districts of the State, 0·42 per cent. were born in other parts of India and 1·50 per cent. came from other countries. Of the immigrants from the districts of the State as many as 81,597 (males 21,620, females 59,977) are from the other districts of the same natural division and 11,397 (males 6,102, females 5,295) are from the other parts of the State. Most of the migration from the neighbouring districts is marriage migration. Of 3,736 immigrants from the adjacent States 1,115 (males 646, females 469) are from Punjab, 1,072 (males 881, females 191) are from Bihar and 840 (males 569, females 271) are from Rajasthan.

Of the immigrants who have come from territories beyond India 18,360 (males 10,135, females 8,225) were born in Pakistan and 630 (males 440, females 190) had their birth place in other territories. The Pakistan—born are the displaced persons who numbered 16,259 in the district. Of the immigrants born in other territories 590 (males 425, females 165) were Nepal-born.

Of the 36 non-Indian nationals 18 (males 9, females 9) were British, 7 (males 5, females 2) Americans, 4 (males 2, females 2) Italians and the remaining belonged to other nationalities.

Unfortunately the figures of emigration are not available. According to the vital statistics, however, the district appears to have lost about 42,500 persons during 1921—30, 21,300 persons during 1931—40 and 35,400 persons during 1941—50. But it should be born in mind that the figures include an element of registration error and are only indicative of trends. (*Vide* Tables D-IV and D-VI)

Decline of cultivation *per capita*

5. We may now analyse the growth of population in the district during the last thirty years in relation to the growth of cultivation during the same period. (Figures of area shown under the census years are quinquennial averages for the five years ending with the crop year immediately preceding the census year.) It is obvious that cultivation has failed to keep pace with population. The cultivated area *per capita* has gone down to 60·5 cents in 1951 from 77·1 cents in 1921. The magnitude of this drop is about one-fifth of the 1921 level. It means that (other things being equal) every man, woman and child must expect to get less food and other agricultural produce from the land in 1951 than in 1921.

Census year	Population	Net area sown (in acres)	Area of cultivation *per capita* (in cents)
1921 ..	1,013,875	770,919	77·1
1931 ..	1,072,379	751,792	70·1
1941 ..	1,176,197	770,448	65·5
1951 ..	1,269,233	767,629	60·5

Double cropped area *per capita*

6. It may be examined whether this shortage has been compensated by an increase in yield per acre. Increase in yeild can be brought about by more double cropping, more irrigation, better fertilization and better culture. The average quinquennial area sown more than once was 212,508 acres in 1921. It decreased to 187,455 acres in 1931 ; it further decreased to 141,153 acres in 1941 ; but in 1951 it recorded an increase to 196,856 acres. The figures of double crop cultivation *per capita* in cents are as below :

Particulars	Quinquennial average for the year preceding			
	1951	1941	1931	1921
Double crop cultivation *per capita* in cents	15·5	12·0	17·5	22·0
Unirrigated double crop cultivation *per capita* in cents ..	14 9	11·3	16·6	21·2
Irrigated double crop cultivation *per capita* in cents ..	0·6	0 7	0·9	0·8

The double crop area *per capita* has shown an increase in 1951 but it is still well below the 1921 level.

Irrigated area *per capita*

7. The average area irrigated in the district was 190,477 acres in 1921, 133,051 acres in 1931, 160,810 acres in 1941 and 154,833 acres in 1951. The average area irrigated more than once was 7,973 acres in 1921, 9,584 acres in 1931, 8,251 acres in 1941 and 7,392 acres in 1951.

The figures of irrigation *per capita* are shown in the table below :

Particulars	Years			
	1951	1941	1931	1921
Irrigated single crop cultivation *per capita* in cents ..	11·6	13·0	11·5	18·0
Irrigated double crop cultivation *per capita* in cents ..	0·6	0·7	0·9	0·8

The irrigated area *per capita* in 1951 is also well below the 1921 level.

Cropped area

8. During the quinquennium 1916—21 the area under food crops was 86·6 per cent. and under non-food crops 13·4 per cent. while in the quinquennium 1946—51 the area under food crops was only 83·3 per cent. and under non-food crops 16·7 per cent.

The proportionate area under different crops between 1911 and 1951 was as below :

Quinquennial average of	Total cropped area	Percentage of cropped area under							
		Rice	Wheat	Barley	Juar	Bajra	Maize	Gram	Others
1911—16	1,003,535	15·4	20·8	6·0	2·7	9·8	8·2	13·0	24·1
1916—21	956,545	18·7	19·9	5·7	2·4	10·0	7·4	11·4	24·5
1921—26	980,762	19·1	19·7	5·3	2·6	7·8	5·1	16·8	23·6
1926—31	936,543	21·7	21·0	4·9	3·2	7·4	5·4	10·7	25·7
1931—36 .. .	923,112	17·7	22·6	2·7	3·7	7·7	4·7	12·7	28·2
1936—41	906,388	19·5	23·2	2·0	3·1	7·2	3·7	13·1	28·2
1941—46	927,200	16·6	23·3	1·9	4·0	8·3	3·6	14·6	27·7
1946—51	952,481	21·5	20·8	1·8	4·6	6·4	2·3	15·1	27·5

The area under linseed, cotton, indigo and opium has been declining. In 1901-02 the area under linseed was 10,246 acres ; in 1950-51 it was only 1,146 acres. In 1901-02 the area under cotton was 11,613 acres ; in 1950-51 it was only 594 acres. In 1901-02 the area under indigo was 1,109 acres ; in 1950-51 it was nil. In 1901-02 the area under opium was 10,953 acres while in 1950-51 it was only 5,401 acres.

Live-stock, ploughs and carts

9. Live-stock in this country live for a large part of the year on the by-products of agriculture supplemented by green fodder crops. They have, therefore, to be co-related not only with the grazing available but also with the total area under cultivation which carries a major portion of the burden of supporting the cattle population.

As will appear from Table 3 of Part III the total number of cattle and buffaloes which had decreased between 1935 and 1944 has recorded an increase during 1944—51 from 5·80 lakhs to about 5·84 lakhs.

The number of working cattle and buffaloes in the district was 2·50 lakhs in 1935, 2·51 lakhs in 1944 and 2·59 lakhs in 1951. The number of ploughs has gone up from 1·12 lakhs in 1944 to 1·31 lakhs in 1951. This apparently is due to the progressive fractionalization of holdings. The number of carts started rising since 1930 and now stands at 56·9 thousands. The average net cultivated area per plough works out to 5·9 acres in 1951 as against 7·0 acres in 1920, and the average net cultivated area per pair of working cattle works out to 6·0 acres in 1951 as compared with 6.1 acres in 1935.

Breeding cows and she-buffaloes which were 1·48 lakhs in 1935, increased to 1·51 lakhs in 1944 and their number stands at 1·56 lakhs in 1951. The cows and female buffaloes in milk per 1,000 of human population were about 28 and 34 respectively. Owing to the poor milk yield the share of milk per head is only a few ounces per day.

The number of sheep has been continuously decreasing since 1920 and now stands at 6·00 thousands due apparently to shortage of pasture. Goats have been going down in number since 1935 when they were 1·42 lakhs. Their number in 1951 was about 0·66 lakhs.

Horses and ponies are also declining in number since 1935. They were about 10 thousands in 1935, and 9 thousands in 1951. The donkeys are also decreasing since 1930 and now stands at 1,405.

Poultry has increased from 39 thousands in 1944 to 50 thousands in 1951.

Distributed on 1,000 of human population the figures of the main categories of live-stock in 1951 are as follows :

Cattle	Buffaloes	Sheep	Goats	Poultry	Others
304	156	5	52	39	17

10. To sum up, the population of the district is growing up at the biological natural rate since 1921. But on the other hand, the land area *per capita*, and the irrigated are *per capita* have decreased. There is no evidence that crop yield per acre has increased. In the circumstances the magnitude of the increase in absolute numbers in relation to an almost stationary average under cultivation is a great strain on the economy of the district.

Villages and towns

11. The district has 1,924 villages and 12 towns. Of the 12·7 lakhs of people who were counted at the census of 1951, 9·9 lakhs were found in villages and 2·8 lakhs in towns, *i.e.*, there are as many as 779 people per 1,000 of the population who live in the rural areas and only 221 of them live in towns. The corresponding figures for the State as a whole are : rural 864, urban 136.

The rural population per inhabited village works out to 514. Most of the villages comprise of a single compact site but some of them have got hamlets attached to the main site. There are 2,338 hamlets in the district. The population per hamlet is only 423. The middle-sized village with inhabitants numbering between 500—2,000—is dominant type in the district. Of the rural population 58·7 per cent. live in such villages ; 30·3 per cent. live in villages of population under 500 ; 9·6 per cent. live in villages of population between 2,000—5,000 ; and only 1·4 per cent. live in villages of population of 5,000 and over.

Towns vary in number of inhabitants even more widely than villages. Bareilly city including railway colony and cantonment has a population of 208,083, *i.e.*, 74·2 per cent. of the urban population of the district. Of the urban population only 5·6 per cent. live in towns of population under 5,000 (Shahi, Richha, Shishgarh and Fatehganj East) ; 6·3 per cent. live in towns of population between 5,000—10,000 (Sirauli, Nawabganj and Senthal) ; 18·6 per cent. live in towns of population between 10,000 and 20,000 (Baheri, Faridpur, Bareilly cantonment and Aonla) and 69·5 per cent. live in towns of population of 20,000 and over (Bareilly M. B.).

It is significant to note that Bareilly city has registered an increase of only 8·9 per cent. in population since 1941. Baheri recorded an increase of 9·0 per cent., Nawabganj of 23·7 per cent., Senthal of 15·5 per cent., Richha 229·7 per cent. and Shishgarh of 31·3 per cent. in the last decade. Aonla, Faridpur, Sirauli, Shahi and Fatehganj appear to be declining towns. The population of Shahi and Fatehganj has decreased by 29·9 per cent. and 7·5 per cent. respectively since 1941. (*Vide* Tables A-III and A-IV)

12. Out of the total population of 1,269,233 (rural 988,986, urban 280,247) 837,627 persons (rural 808,609, urban 29,018) or 66·0 per cent. depend on agriculture for their means of livelihood and 431,606 persons (rural 180,377, urban 251,229) or 34·0 per cent. depend on the non-agricultural sources. The following table shows the distribution of 100 persons of the total, rural and urban population of the district and also of Bareilly city under the different livelihood classes : **Occupations: Livelihood pattern**

Description	Agricultural classes					Non-agricultural classes				
	Total	I	II	III	IV	Total	V	VI	VII	VIII
Total	**66·0**	**61·0**	**2·2**	**0·9**	**1·9**	**34·0**	**9·6**	**6·3**	**2·8**	**15·3**
Rural	81·8	76 1	2·7	1·1	1·9	18·2	5·7	2·3	0·9	9·3
Urban	10·4	7·5	0·8	0·3	1·8	89·6	23·3	20·8	9·4	36·1
Bareilly city ..	3·9	1·6	0·5	0·1	1·7	96·1	25·4	21·2	11·6	37·9

It is obvious that this district is one of the less agricultural districts of the State. Here only 66·0 per cent. of the people depend on agricultural as against 74·2 per cent. in the whole State.

Of the total population of the district, 817,844 persons (males 272,632, females 545,212) or 64·4 per cent. have been classified as non-earning dependants. The percentage of non-earning dependants in the agricultural population works out to 63·8 and that among the non-agricultural classes to 65·6. It will be observed that in the main they consist of women. The male non-earning dependants are mostly children. 42,518 persons (males 24,656, females 17,862) or 3·4 per cent. of the population are earning dependants. Among the agriculturists their population is 3·6 per cent. and among non-agriculturists 2·9 per cent. The remaining 408,971 persons (males 391,167, females 17,804) or 32·2 per cent. of the population consist of self-supporting persons. Their proportion among agriculturists is 32·6 per cent. and among non-agriculturists 31·5 per cent. Of the self-supporting persons 273,112 (males 264,301, females 8,811) belong to agricultural classes and 135,859 (males 126,866, females 8,993) to the non-agricultural classes. On the average one self-supporting person maintains two non-earning dependants.

Of the 135,859 self-supporting persons belonging to the non-agricultural classes 1,897 persons (rural 1,076, urban 821) earn their livelihood from non-productive sources. Of the remaining 133,962 self-supporting persons (rural 63,714, urban 70,248) 4,817 (rural 429, urban 4,388) or 3·6 per cent. are employers ; 43,691 (rural 13,999, urban 29,692) or 32·6 per cent. are employees and 85,454 (rural 49,286, urban 36,168) or 63·8 per cent. are independent workers.

The distribution of 10,000 self-supporting persons of non-agricultural occupations classified according to the economic divisions is as follows :

Name of division	Self-supporting persons by divisions
All Industries and Services	**10,000**
0—Primary industries not elsewhere specified	158
1—Mining and quarrying	1
2—Processing and manufacture—foodstuffs, textiles, leather and products thereof . ..	1,567
3—Processing and manufacture—metals, chemicals and products thereof	502
4—Processing and manufacture—not elsewhere specified	781
5—Construction and utilities	384
6—Commerce	1,576
7—Transport, storage and communications	795
8—Health, education and public administration	825
9—Services not elsewhere specified	3.411

The principal large scale industries of the district are : oil mills, flour mills, paints and varnishes, confectionery, distilleries and sugar factories. The principal cottage industries of the district are : *durries*, leather working (boots, shoes, harness and saddlery, suit and attache cases), agricultural implements, iron castings, weights, balances and cane crushers, *gur*, furniture making unlacquered wooden articles, cane furniture, ropes and *ban* of *moonj*, gold thread, *lachka*, *gota* and embroidery and brush making.

Variation in the livelihood pattern

13. In this district the population dependent on agriculture was 65·7* per cent. in 1951. The agricultural proportion has increased since 1901 when the figure stood at 64·5 per cent. It was 61·7 per cent. in 1911 and 67·4 per cent. in 1921. The actual number of persons who depend on agriculture has increased to 834,223 in 1951 from 682,566 in 1921 or by 22·2 per cent. while the cultivated area has remained almost unchanged. This has resulted in progressive fragmentation and sub-divison of holdings and pressure on impoverished soil. There appears to have been some decline in village arts and handicrafts. The cumulative result is a fall in the proportion of workers and a corresponding rise in dependency. The proportion of workers in the total population in 1951 was only 35·6 per cent. (agricultural 23·6 per cent., non-agricultural 12·0 per cent.) against 43·9 per cent. (agricultural 28·2 per cent., non-agricultural 15·7 per cent.) in 1921. The proportion of non-earning dependants has consequently increased from 56·1 per cent. (agricultural 39·2 per cent., non-agricultural 16·9 per cent.) in 1921 to 64·4 per cent. (agricultural 42·1 per cent., non-agricultural 22·3 per cent.) in 1951. All this is an index of the increasing unemployment and under-employment. It is only by a greater diversion of population to cottage and other industries and by providing subsidiary occupations to the agriculturists that the present economy of the district can be improved. (*Vide* Tables B-I, B-II and B-III)

Houses and households

14. There were 177,294 occupied houses in the district—137,391 in villages and 39,903 in towns. That gives an average of 7,198 persons per 1,000 houses or 7·2 persons per house in the rural areas and 7,023 persons per 1,000 houses or 7·0 persons per house in the urban areas.

There were 262,823 households in the district—209,269 in villages and 53,554 in towns. That gives an average of 4,722 persons per 1,000 thouseholds or 4·7 persons per household in the rural areas and 5,081 persons per 1,000 households or 5·1 persons per household in the urban areas. The marginal table shows the developments in the size of the household since 1921. The rural household has been increasing since 1921. It is smaller than the average rural household (5·07) in the State. The urban household has registered a marked decrease since 1941.

Census year	Persons per 1,000 households of	
	Rural population	Urban population
1921	3,532	6,436
1931	4,508	5,196
1941	4,531	5,757
1951	4,722	5,081

Out of 4,722 persons in every 1,000 rural households, 2,561 are males and 2,161 females. There is a male excess numbering 400 in every 1,000 rural households. Out of 5,081 persons in every 1,000 urban households 2,718 are males and 2,363 females. There is a male excess numbering 355 in every 1,000 urban households.

Information regarding types of household and household relationships was also collected at this census with the help of a sample of about 4 per cent. According to this in every 1,000 sample households there are 4,557 persons (males 2,473, females 2,084) in the district. The corresponding figure for the total count is 4,795.

The table below shows the distribution by size of 1,000 sample households:

Description	Small with 3 members or less	Medium with 4—6 members	Large with 7—9 members	Very large with 10 members or more
Total	**379**	**426**	**153**	**42**
Rural	373	439	150	38
Urban	399	385	164	52

Medium households are the dominant type in the villages and the small households are relatively more common in the towns. Quite a large number of migrants live in the urban areas without families.

*The figure includes earning dependants according to their secondary means of livelihood while the figure of 66·0 in paragraph 12 includes earning dependants according to their principal means of livelihood and hence the difference.

Family composition of 1,000 sample households is as follows:

			Number in 1,000 households
A	Heads of households	Males (married)	662
		Males (widowers)	282
		Females	56
	Wives of heads of households		662
			1,662
B	Sons of heads of households		1,005
	Daughters of heads of households		666
			1,671
C	Male relations of heads of households (other than sons)		479
	Female relations of heads of households (other than daughters)		655
			1,134
D	Persons unrelated to the heads of the households	Males	45
		Females	45
			90
	Grand total		***4,557***

Sons out number the daughters of the heads of households. The latter leave the houses of the parents after marriage. Female relations (other than daughters) outnumber the male relations (other than sons). Such females are generally those who become members of these households by marriage. (*Vide* Tables A-I and C-I)

Sex-ratio

15. In the district as a whole the sex-ratio was 844, *i.e.*, there were 844 females to every 1,000 males. It varied among the tehsils. The highest value was 856 in Nawabganj tehsil, and the lowest 835 in Baheri tehsil. The ratio was 847 in Aonla, 844 in Bareilly and 838 in Faridpur.

Contrary to the general trend in the State the sex-ratio in this district is smaller in villages than in the towns. For the district as a whole the sex-ratio in the villages was 843 while that in towns was 847. The sex-ratio of Bareilly city was 844.

The corresponding figure of the sex-ratio for the district was 861 in 1921, 849 in 1931, 846 in 1941 against 844 in 1951.

Age structure

16. The number in each age-group in the district is shown below as a percentage of the total number of all ages in the total, rural and urban population separately:

Age-group		Total population			Rural population		Urban population	
		Persons	Males	Females	Males	Females	Males	Females
Infants and young children	0—4	13·5	6·7	6·8	6·6	6·9	6·9	6·5
Boys and girls	5—14	23·4	12·6	10·8	12·5	10·6	13·1	11·5
Young men and women	15—34	33·2	18·4	14·8	18·2	14·7	19·3	14·8
Middle-aged men and women	35—54	21·9	12·6	9·3	12·8	9·6	11·8	8·5
Elderly persons	55 and over	8·0	4·3	3·7	4·4	3·7	4·2	3·4

It will be seen that the population is progressive. 36·9 per cent. of the population is of age under 15 and only 8·0 of it consists of elderly persons. (*Vide* Table C-II)

Marital status

17. Out of every 10,000 persons in the district there were 5,464 males and 4,536 females.* Among them 2,719 males and 1,742 females were unmarried. If we reckon males and females together, the unmarried people were 44·6 per cent. of the population.

Of the males 49·7 per cent. were unmarried, 42·7 per cent. married and 7·6 per cent. widowed or divorced. Among the females 38·4 per cent. were unmarried, 49·4 per cent. married and 12·2 per cent. widowed or divorced.

Of the married males 1·3 per cent. were of ages below 15, 49·8 per cent. were of ages 15—34, 38·4 per cent. were of ages 35—54 and 10·5 per cent. were of ages 55 and over. Among the married females 4·8 per cent. were of ages below 15, 60·1 per cent. were of ages 15—34, 30·5 per cent. were of ages 35—54 and 4·6 per cent. were of ages 55 and over.

*The corresponding figures for the total count are 5,424 and 4,576.

Marriage is universal. Among the males and females aged 35 years and over only 11·7 per cent. of the males and 0·5 per cent. of the females were found unmarried. Most of the females are married before they attain the age of 25. Child marriage is still prevalent though it is not very common. 1·6 per cent. of the males of ages 0—14 and 6.1 per cent. of the females of ages 0—14 were returned as married. (*Vide* Table C-III)

Languages

18. Over 99·0 per cent. of the people of the district returned Hindi, Hindustani or Urdu as their mother-tongue. Among the other mother-tongues spoken the main are Punjabi (0·8 per cent.), Sindhi (0·12 per cent.), Bengali (0·06 per cent.) and Gujarati (0·03 per cent.). Of the 12·7 lakhs of people in the district only 10,324 or 0·8 per cent. were bilingual (in an Indian language). Those whose mother-tongue is other than Hindi, Hindustani or Urdu are generally the migrants who are able to speak any of these as subsidiary language. Persons returning Hindi, Hindustani or Urdu as secondary language were 7,956 or 77·06 per cent. of those who were bilingual in some Indian language. (*Vide* Table D-I)

Religion and special groups

19. Of the 10,000 population of the district the number of people belonging to different religions is: Hindus 7,176, Sikhs 38, Jain 1, Muslims 2,715 and Christians 70; of the 10,000 population in villages the numbers are: Hindus 7,633, Sikhs 20, Jain 1, Muslims 2,280 and Christians 66; and of 10,000 population in towns the numbers are: Hindus 5,561, Sikhs 101, Jains 3, Muslims 4,249, Christians 84 and others 2. Sikhs, Muslims and Christians are generally concentrated in the urban areas of the district as is the case in the other parts of the State

There were 144·9 thousand persons belonging to scheduled castes in the district. Their number per 10,000 of population works out to 1,141. In villages they were 1,342 for every 10,000 and in towns, their number per 10,000 was only 435. In the district there were 160 Anglo-Indians. (*Vide* Tables D-II and D-III)

Displaced persons

20. The number of displaced persons in the district at the census was 16,259 (males 8,725, females 7,534). Most of them were concentrated in Bareilly city. Of their total population in the district 87·3 per cent. came from West Pakistan, 1·3 per cent. from East Pakistan and 11·4 per cent. from districts which could not be traced. (*Vide* Table D-V)

Literacy

21. The percentage of male literacy was 10·7 in the district while that of female literacy was 4·4 only. As compared to this the percentage of male literacy in 1931 was 6·4 and that of female literacy was 1·3. On January 1, 1951 there were 487 primary schools in the district with an enrolment of 39,862. (*Vide* Table D-VII)

C—Explanatory Note on the Statistics

1. The statistics in this volume have been presented in three parts:

I—District Census Tables

II—Village, Town, Pargana and Thana Statistics

III—Miscellaneous Statistics

Parts I and II contain census data. A brief account of the system of sorting of census slips and preparation of tables and abstract therefrom is given below.

Part III contains statistics throwing light on special aspects of population and its growth. These have been derived from miscellaneous sources. Table 1, "Vital Statistics", has been prepared from the published and unpublished records of the Director of Medical and Health Services, Table 2, "Agricultural Statistics", from the Annual Season and Crop Reports, Table 3, "Live-Stock, Agricultural Machinery and Implements", from the published figures of Live-Stock Census and Table 4, "List of Primary Schools", from information specially supplied by District Inspector of school.

Processing of census data

2. The census data presented here has been derived from the census slips by a process of sorting, compilation and tabulation. In previous censuses the slips were first sorted by religion and this division was maintained throughout so that all data was cross-tabulated by religion. This procedure has been abandoned at this census and substituted by a division based on economic characteristics of the population. The whole population has been divided into eight livelihood classes, four of which are of the agricultural category and four of non-agricultural category as follows:

Agricultural Classes—

I—Cultivators of land wholly or mainly owned; and their dependants

II—Cultivators of land wholly or mainly unowned; and their dependants

III—Cultivating labourers; and their dependants

IV—Non-cultivating owners of land; agricultural rent receivers, and their dependants

---

*The numbers per mille (of the 10 per cent. sample population) of each sex aged 5 years and over who were returned as literates are as below:

Males		Females	
1951	1931	1951	1931
138	75	48	15

Non-agricultural Classes—

V—Production (other than cultivation)

VI—Commerce

VII—Transport

VIII—Other services and miscellaneous sources

Another special feature of the sorting of this census was the separation, from the very start, of slips of displaced persons and of a 10 per cent. random sample from the remainder. This has enabled the data of displaced persons to be presented separately, while the 10 per cent. sample has been utilized for the preparation of Age Tables.

The slips of this census have been copied by Households into a National Register of Citizens, which has been prepared village-wise for rural areas and mohalla/ward-wise for urban areas. Table C-I is based on a 4 per cent. sample extracted from this Register.

Tracts.

3. The slips were first sorted by villages for the preparation of the Primary Census Abstract. For the purpose of further sorting the State was divided into tracts consisting of (*a*) *rural tracts*, comprising the rural population of each tehsil, (*b*) *urban city tracts*, comprising the population of areas which had been declared as cities, (*c*) *urban non-city tracts*, comprising the population of urban areas of a district excluding areas declared as cities. Each tract was treated as a unit for sorting of slips. All data were compiled first by tracts and then by districts. This volume presents the tract-wise data for one district (with the exception of A and E Tables, which have been presented tehsil-wise), while the district-wise data for the whole State is contained in the following State volumes :

Part I-B—Subsidiary Tables

Part II-A—General Population Tables

Part II-B—Economic Tables

Part II-C—Age and Social Tables

Explanatory notes

4. Detailed explanatory notes are appended to each State table in the printed volumes of State tables. They apply to the tables in this volume also and should be referred to when necessary. A few notes of some of the tables are reproduced below :

Table A-I—Column 5 relating to "hamlets" has been introduced for the first time. Any distinctive cluster or agglomeration of houses has been treated as a "hamlet".

A clear distinction has been made in this census between a "House" and a "Household". A house is any human dwelling having a separate main entrance while a household is any commensal unit living in a census house. In previous censuses the figures under "Occupied Houses" used to be that of households, while the figures under columns 7—9 of the present table refer to occupied census houses as distinct from households.

The Economic Tables—The Indian Census Economic Classification Scheme, 1951, together with the occupational division and sub-division adopted for this census are given in Part II-B of the Report.

Table B-I—Each of the eight livelihood classes mentioned above has been divided into three sub-classes, with reference to the economic status, as follows :

(i) Self-supporting persons ;

(ii) Non-earning dependants ; and

(iii) Earning dependants

These were defined in the Instructions to Enumerators as follows :

"A 'self-supporting person' is one who is in receipt of an income and that income is sufficient at least for his own maintenance. To be 'self-supporting' a person need not be able to support his family. All that is necessary is that he should be earning sufficient for his personal needs. For purposes of this question the person enumerated is the unit and not the family or household. Any one who is not a 'self-supporting' person in this sense is a 'dependant'. A 'dependant' may be either an 'earning dependant' or a 'non-earning dependant'. The test is whether he secures a regular (and not casual) income, even though it may be small. Such income may be in cash or kind ; it may be continuous or seasonal employment. When the income which he secures is not sufficient to support him that person is an 'earning dependant'. A person who does not earn any income either in cash or kind is a 'non-earning dependant'. Where two or more members of a family household jointly cultivate land and secure an income therefrom, each of them should be regarded as earning part of the income. None of them is, therefore, a 'non-earning dependant'. Each of them should be classed either a 'self-supporting person' or an 'earning dependant' according to the share of income attributable to each. The same applies to any other business carried on jointly. The share of the income is what the head of household deems it to be. This does not mean that every one who works is necessarily a self-supporting person or an earning dependant. Thus, for instance, a housewife who cooks for the family, brings up the children or manages the household is doing very valuable work. Nevertheless, her economic status is that of a non-earning dependant, if she does not also earn an income, and should be recorded as such."

Economically active, Semi-active and Passive persons—All non-earning dependants are economically passive. They include persons performing house-work or other domestic or personal services for other members of the same family household. But they do not include "unpaid family workers" or persons who take part along with the members of the family household in carrying on cultivation or a home industry as a family enterprise.

All earning dependants are economically semi-active only. Though they contribute to the carrying on of economic activities, the magnitude of their individual contribution is deemed to be too small to justify their description as economically active. (Their contribution to economic activity is, however, taken into account in the tabulation of data based on secondary means of levihood.)

All self-supporting persons are, ordinarily economically active with the exception of the following classes and groups :

(*a*) All self-supporting persons of Agricultural Class IV.

(*b*) The following groups of self-supporting persons who are included in Non-agricultural Class VIII and derive their principal means of livelihood from miscellaneous sources (otherwise than through economic activity) :

(i) Persons living principally on income from non-agricultural property ;

(ii) Persons living principally on pensions, remittances, scholarships and funds ;

(iii) Inmates of alms-houses and recipients of doles;

(iv) Beggars and vagrants ; and

(v) All other persons living principally on income derived from non-productive activities.

Table B-II—For a self-supporting person who has more than one means of livelihood the *secondary means* of livelihood is the livelihood next in importance to his principal means of livelihood. For an earning dependant it is the source from which he secures his own income, where there are more than one subsidiary occupations only the one providing the largest income has been taken into account.

Table B-III—"Employers", "Employees" and "Independent Workers" have been defined as follows in the Instructions to Enumerators :

An "employer" is only that person who has necessarily to employ other person in order to carry on the business from which he secures his livelihood. Thus if a person employs a cook or any other person for domestic services, he should not be recorded as an "employer" merely for that reason.

An "employee" is a person who ordinarily works under some other person for a salary or a wage in cash or kind as the means of earning his livelihood. There may be persons who are employed as managers, superintendents, agents etc., and in that capacity control other workers. Such persons are also employees only and should not be regarded as 'employers'.

An "independent worker" means a person who is not employed by any one else and who also does not employ anybody else in order to earn his livelihood. (Sweepers, *dhobies*, *kahars* etc., who work for several masters are independent workers. If, however, any of them accepts whole-time employment under one master he becomes "employee". Daily wage-earners who work for different masters are likewise independent workers. But if they accept employment under one master, e.g., under a factory, they become "employees".)

Tables C-II, C-III, C-IV and C-V—The figures presented in these tables are based on single year age-return and have not been smoothed.

Tables D-V (i) *and* (ii)—For the purpose of these tables a "displaced person" has been defined as follows :

"A displaced person means any person who has entered India having left or being compelled to leave his home in Western Pakistan on or after the 1st March, 1947, or his home in Eastern Pakistan on or after the 15th October, 1946, on account of civil disturbances or on account of the setting up of the two Dominions of India and Pakistan."

PART I

DISTRICT CENSUS TABLES

A—GENERAL POPULATION TABLES
