PREFACE

The District Census Handbooks were started for the first time in the history of the decennial censuses in India in 1951. The Handbooks of the Travancore-Cochin and Madras States in the 1951 Census contained, besides a short account of the district and the people, important census tables for the district and a village directory consisting of the area, houses, population, number of literates, the distribution of population by livelihood classes, the number of institutions and general information on amenities etc., in respect of every village. In the 1961 Census it was decided with the concurrence of the State Government to continue the publication of the District Census Handbooks. The contents of the District Census Handbooks of the 1961 Census are, however, a little more ambitious than those of the 1951 Census Handbooks in that besides the items of information mentioned above a large number of tables giving general information about the districts have been added. The number of such tables comes to 42 besides 60 inset tables excluding those given in respect of Census data. As far as possible, an attempt has been made through these tables to give an epitome of the progress made by the district in various fields during the inter-censal period 1951-61. The book is divided into three parts. Part A gives a general description of the district, the progress made during the last decade, a review of the population, literacy, employment and unemployment, household economic data etc., of the district based on Census data and a gazetteer. The appendices to this part contain the various tables of general information on which the review of progress has been based. Part B contains the Census data of 1961 comprising the general population tables, economic tables including household economic tables, social and cultural tables, and special tables for Scheduled Castes and Scheduled Tribes. It is hoped that this handbook will serve as a useful reference book on the Cannanore district.

A book of this kind could not have been compiled but for the hearty co-operation and goodwill extended by the various departments of the State and Central Governments to whose kindness I am deeply indebted. The District Census Handbook Section of my office consisting of a Statistical Assistant and a couple of Compilers has been in charge of the entire work of collection and compilation of the data for this handbook. At the time of addressing the various departments for collection of information for the District Census Handbook Shri H. Padmanabha Iyer of the Bureau of Economics and Statistics was the Statistical Assistant in charge of the section. After a short period of work in this section he was transferred to the Tabulation Office, Kozhikode, as the Tabulation Officer. He was succeeded by Shri S. Jayashanker of the Bureau of Economics and Statistics as Statistical Assistant in charge of this handbook. While Shri Padmanabha Iyer has rendered excellent service in piloting the work of the

collection of data for the handbooks, Shri Jayashanker who succeeded him has borne the brunt of the work in the preparation of this handbook which involved a good deal of careful analysis and laborious compilation. I feel happy in acknowledging the valuable contribution made by them and particularly Shri Jayashanker in the compilation of this important book. I should also acknowledge the good work of the Compilers of the District Census Handbook Section, Sarvashri K. N. Raman and E. V. Unnikrishnan Nair and of draftsman Shri S. Krishna Pillai who has prepared the entire set of maps given in the book.

I should express my deep sense of gratitude to Shri P. K. Abdulla, I. A. S., Secretary to Government and Shri K. Swaminathan, Superintendent of Government Presses for the warm co-operation extended by them for the timely printing of this handbook.

Above all I am grateful to Shri Asok Mitra I.C.S., Registrar General, for the valuable guidance and help extended to me in this work.

GENERAL

PART A—GENERAL

History of the District

1. Consequent on the reorganisation of States and the formation of the Kerala State on 1st November 1956 the Malabar district except Laccadive & Minicoy Islands and the Kasaragod taluk of the South Kanara district of the Madras State were transferred to Kerala. On 1st January 1957 the Kasaragod taluk was split up into Kasaragod and Hosdrug taluks, Chirakkal taluk into Cannanore and Taliparamba taluks and the Wynad taluk into North Wynad and South Wynad taluks. The Malabar district was trifurcated into Cannanore, Kozhikode and Palghat districts on 1st January 1957. The Cannanore district was thus born on this date with Cannanore, Hosdrug, Kasaragod, Kottayam, North Wynad, South Wynad and Taliparamba taluks of which the Kottayam taluk was subsequently re-named as Tellicherry and South Wynad taluk was transferred to the Kozhikode district.

Situation

2. The Cannanore district is the northern most of the districts of Kerala. Bounded on the north by the districts of South Kanara and Coorg, on the east by the Mysore district, on the south by the Kozhikode district and on the west by the Arabian Sea, Cannanore district lies in a southerly direction between North latitudes 11° 40′ and 12° 48′ and East longitudes 74° 52′ and 76° 07′.

Administrative Units

3. The district is constituted of six taluks viz, Cannanore, Hosdrug, Kasaragod, North Wynad, Taliparamba and Tellicherry. There are altogether 250 revenue villages in the district which are distributed among the various taluks as shown below:—

Statement 1

DISTRIBUTION OF VILLAGES

Taluk	Area in Sq. miles	Total No. of revenue villages	No. of villages lying in towns	
			Wholly	Partly
Cannanore	164.69	30	3	3
Hosdrug	382.35	35	4	..
Kasaragod	376.34	79	7	..
North Wynad	288.29	11	..	..
Taliparamba	514.45	46	..	1
Tellicherry	465.20	49	1	2

4. There are two municipal towns and 197 panchayats in the district. The municipal towns are Cannanore and Tellicherry. There is also a cantonment in Cannanore. The district has 9 Development Blocks of which 3 are of Stage I, 4 are of Stage II, one is a Community Development Block and one Pre-extension Block.

Area, Physical Features and Natural Divisions

5. With an area of 2,191.32 sq.miles[1] the district ranks third in the State in point of area. The coast line trending as it does, from about north-north-west to south-south-east, bears evidence throughout its length of a slow but steady encroachment of the sea upon the land. With a length of 88 miles it is the longest sea-coast of all the districts in Kerala. The prevailing littoral current is from north to south. It is one branch of the mighty ocean current which sweeps across from Madagascar and the East African Coast and impinges on the Malabar Coast from the north where it divides into two branches, one going northwards and the other flowing southwards down the coast. A hill projecting into the sea known as Mount Deli (855 feet), a bold eminence of laterite and gneiss form the conspicuous and well known landmark to mariners which is said to have enabled the detection of Malabar by Vasco da Gama. The coastline is narrow throughout its length in the district. Beneath the shade of the green palm trees which abound this narrow strip of land, the houses, each one with its own compound, protected by fence and full of giant plantains and the many coloured flowers of *hibiscus* are nestled. The green lagoons fringed with feathery palms add to the beauty of the interior of this coastal area. The wet paddy fields dot the interior at irregular intervals. So far the area consits of what may be called the lowland of the district which for purposes of convenient demarcation may be put at below 25 feet above the mean sea level. A few portions of the coastal area are, however, above 25 feet above the mean sea level and hence are not included in the category of lowlands. To the east of the coastal land rise the western shoulders of the great Mysore Plateau and the Western Ghats interspersed by long spurs, extensive ravines, dense forests and tangled jungles which characterise the valleys of the great mountains which roll down and expand into gradually widening valleys closely cultivated wherever possible. The latter portion known as the midland consists of low laterite table lands ending abruptly in cliffs as they approach the seaboard and giving place to rice plains and cocoanut-fringed

1 5,675.50 sq. km.

backwaters. Pepper vine, paddy, cocoanut palm, cashewnut, rubber and tobacco thrive in this region. These midlands lying between 25 feet and 250 feet above the mean sea level are succeeded by highlands which form more or less the region of the mountains at varying levels. The majestic Western Ghats which form the chief glory of Kerala flank the east throwing its valleys over long distances and gently sloping to the west. If Western Ghats are gigantic, the outlying hills which lie detached from the main range breaking the monotony of the undulating laterite downs of the low country and running into the interior are in no way less conspicuous. Tea, coffee, rubber and cardamom are abundant in the highlands. The two important reserve forests viz, Kannoth Reserve and Peria Reserve also lie in this region.

6. The terraced character of the laterite formation is most conspicuous in the taluks of Taliparamba and Cannanore and more particularly in the portion lying to the north of Valapattanam river. These laterite terraces are, as a rule, unproductive except where they break off in abrupt cliffs where cocoanut, jack and pepper are cultivated. The outlined spurs of the ghat mountains were covered with heavy forests as well as scrub jungles most of which have disappeared before the axes and the fires of *punam* cultivators. *Punam* is the principal dry cultivation in these taluks. Thatching grass is extensively grown. The pepper grown in the north and north-eastern parts of the Taliparamba taluk which is commercially known as the 'Taliparamba pepper' is the finest product in Malabar. Cardamom is also grown on the hills. The North Wynad taluk is an elevated and extensively picturesque and mountainous plateau. It is generally rugged and broken and consists of ranges of low hills of easy slopes covered with grass and low bamboo jungle. The eastern parts are generally open and flat and merge insensibly into the table land of Mysore. Mananthody is the most attractive spot in the taluk. Coffee, tea, tapioca, lemongrass and pepper are the chief items of cultivation in this taluk. There is a river which separates North Wynad from South Wynad. Both in Kasaragod and Hosdrug taluks pepper, paddy, ragi, cocoanut, tapioca, tobacco, areca-nut and jack trees are extensively grown. The Chandragiri river which flows along the boundaries of Kasaragod and Hosdrug taluks not only serves as an important means of navigation but also contributes largely to the fertility of this area. While cocoanut palms form the chief cultivation on the coastal area, pepper is the characteristic product of the interior. Bananas and tapioca are extensively grown. Kannoth and Kottiyur Reserves form an almost unbroken line of forests. "Further west timber trees grow fewer, forest dies down into scrub jungle and beyond Kuthuparamba the hills are insignificant and covered with lantana and brushwood".[1]

7. The following statement gives the area of the district by natural divisions.

Statement 2

River System

9. Out of the 44 rivers in Kerala as many as 20 are in this district. The Valapattanam river originating from the Western Ghats and falling into the Arabian Sea near Valapattanam (Baliapatam) 6 miles north of Cannanore is 70 miles in length of which 28 miles form the navigable length allowing motor boat traffic up to 8 miles from the mouth of the sea. The main tributaries of the river are Srikantapuram river, Barapole or Valiapuzha and Aralampuzha. The river has a total drainage area of 460 sq. miles of which

1 Malabar District Gazetteer Vol. I (Reprint 1951), page 450

204 sq. miles lie in Mysore. Its run-off is estimated as 97,700 million cubic feet. "Timber is floated down the stream from the ghat forests, and small boats laden with salt and salt-fish ascend at all times of the year as far as the once important village of Irukkur to return with rich cargoes of pepper. The wide and deep estuary of the river, which forms the port of Valarpatanam or Baliapatam, opens out on the north into a backwater, into which falls the Taliparamba river with the drainage water of the north-east of the taluk". 1 The tradition goes that near the head of the navigable portion of one of the branches of the river "Surrukundapuram" of the Indian Atlas which was the chief emporium of trade with the fertile lands of the Coorg and the sandal wood forests of Mysore is located and this is the place to which Ibn Batuta travelled from Hili (*Elimala*). The river Chandragiri comes next in importance. It has its origin in the Patti forests in the Coorg district of Mysore with two tributaries, the Payaswani and the Chandragiri Hole. The river has a length of 65 miles and a catchment area of 482 sq. miles of which 248 sq. miles lie in Mysore. Its estimated run-off is 110,200 million cubic feet. The navigable distance of this river comes to 8 miles. Kuppam river, also called Mattul river, originates from Padinalkad ghat reserve forests of the Coorg district and flows over 44 miles of length with a drainage area of 207 sq. miles of which 27 sq. miles lie in Mysore. It has an estimated run-off of 44,700 million cubic feet. The river has a navigable length of 15 miles. The rivers Anjarakandy and Karingote have both 40 miles of length. The drainage area of Karingote river is estimated to be 230 sq. miles of which 46 sq. miles lie in Mysore. It has a run-off of 50,360 million cubic feet. Anjarakandy river has a catchment area of 43.5 sq. miles and a run-off of 8,700 million cubic feet. The Karingote river originates from Padinalkad reserve forest of Mysore and the Anjarakandy river from the Kannoth forests of the Tellicherry taluk. The navigable length of the Karingote river is 15 miles and the Anjarakandi river is 17 miles. The names, places of origin and length of the rivers are given in the sub-joined statement:—

Kabbani, the inter-state river, which originates in the South Wynad taluk flows through North Wynad taluk and Mysore State and joins as a tributary of Cauvery.

Mountains

10. The following are the important mountains in the district:—

The highest mountain in the district is Banasura or Balasur peak. It has an isolated cone shaped forest clad hill in the North Wynad taluk outlying high above the line of the ghats, its height being 6,762 feet. The next in importance is the Brahmagiri situated in the North Wynad taluk on the edge of an elevated miniature plateau of beautiful grass and shola land, the greater portion of which lies in Coorg. The height of the mountain is 5,276 feet. Veidalmala, a long, level, grassy mountain, of the Taliparamba taluk standing almost at right angles to the ghats and ending precipitously on its western face, is supposed to be haunted by a demon who displays a wonderful

ruby stone at night-time to lure men to their destruction. The height of this mountain is 4,500 feet. Mount Deli, locally known as *Eli Mala*, a conspicuous isolated cluster of hills forming a promontory 16 miles north of Cannanore is an important land mark for mariners. It is 855 feet high. A fort built on it by the Portuguese and subsequently passed into French and then into English hands is now ruined. Vasco da Gama's pilots had foretold that the first land to be sighted would be a great mountain on the coast of India in the Kingdom of Cannanore which the people of the country called 'Delielly'.

Backwaters

11. Kumbla, Kalnad, Bekal, Chittari and Kavvayi form the important backwaters of the district. These are connected with other backwaters of the State by canals, either natural or man made.

Soils

12. The soils of the district can be classified into sandy, laterite and hilly or forest soils. The sandy soil occurs as a narrow belt all along the coast on the western portions of Cannanore, Hosdrug, Taliparamba and Tellicherry taluks and also in a narrow strip on the south-western side of Kasaragod taluk. The soil in the midland region of the district is laterite and in the eastern part hilly or forest soil. The sandy soil varies in texture from sandy loams to pure sand and is highly porous having very little retentive capacity. Paddy and cocoanut are mostly grown in this soil. This soil is extremely deficient in all the major plant foods and lime. Its primary requirement is organic matter. It is highly acidic in reaction. The laterite soil is formed by the weathering mainly of acidic rocks under alternate wet and dry tropical conditions. The typical laterite soil is characterised by a versicular structure and the accumulation of hydrated oxides of iron and aluminium. Most of the bases and silica have been removed by drastic leaching. At or near the water table the soil material is soft and can be cut into blocks which harden on exposure. This material makes excellent bricks for building purposes. It is usually loams of some kind and the soil does not show typical clay properties. It is porous and well drained and has a poor retentive capacity and fertility. Where the rainfall is only 70" to 80" the soil has not developed into true laterites. There is accumulation of iron and aluminium in such type of soil and it shows many of the properties of laterites. It does not have the versicular structure peculiar to true laterites and cannot be used as building stones. Such type of soil is called the lateritic soil. It is this type of laterite soil that is found in this district. This soil is more fertile than pure laterite soil. All garden land crops like cocoanut, areca-nut and fruit palms etc., are grown in this soil. The hilly and forest soil is characterised by a surface layer of organic matter derived from forest growth. This soil is rich in nitrogen but extremely poor in bases due to heavy leaching. The phosphate content is also very low. When the forests are cleared this soil gradually undergoes laterization. The soil is particularly suited for plantation crops such as tea, cardamom and rubber. It is strongly acidic in reaction.

Geology

13. Cannanore district from east to west may be divided into four belts according to geological formations. The belts are orientated more or less north to south and consists of (1) a high mountain belt made up of crystalline rocks of the Archean group, (2) a broad belt of residual laterite, (3) a narrow belt of Warkalli beds of Tertiary group and (4) the western-most coastal belt of recent deposits. The most extensively occurring rock type is the Gneiss Quartz Magnetite. A few basic igneous intrussives are also seen in association with gneisses. Residual laterite occurs as a belt of west Archean crystallines and has been formed as a result of the 'in situ' alteration of crystalline rocks. The Warkalli beds consist of a succession of beds of different clays carrying lignite. These beds are typically exposed in the Cannanore beach, beneath a cover of laterite. The Warkalli beds are considered to range in age from upper Miocene to Pliocene. The coastal bed of recent deposits includes all the marine, lacustrine and alluvial deposits of recent origin.

Economic Minerals

14. Three kinds of economic minerals are seen in this district. These are lime shell, clays and building stones. Lime shell is found largely in Nileshwar village of Hosdrug taluk and Cheruvathur and Puthur villages of Kasaragod taluk. In all these places lime shell is exploited for lime-making. China clay occurs in a number of villages like Kanhangad, Ajanur, Madikai, Pudukai, Nileshwar, Kodakat and Cheruvathur of Hosdrug taluk, Karivellur, Trichambaram and Malappattam of Taliparamba taluk and Cheruthazhom, Madayi, Ezhome and Kannapuram of Cannanore taluk. At Nileshwar, Kannapuram and Palayangadi China clay is actively exploited. The statement given below will show the production and value of

china clay for the last five years in the Cannanore district.

Statement 5

PRODUCTION OF CHINA CLAY*

Year	Quantity in Metric tons	Value in Rupees
1956-57	2,473.07	38,510
1957-58	2,972.96	43,890
1958-59	2,647.01	39,078
1959-60	5,624.55	83,035
1960-61	7,129.83	1,05,258

The production and value has increased three times since 1956-57. Tile clay is exploited for the manufacture of tiles and bricks at Baliapatam and Palayangadi.

Climate

15. Like other parts of Kerala, this district has four seasons, the dry weather from December to February, the hot weather from March to May, south-west monsoon from June to September and the retreating or north-east monsoon from October to November. Free from the hot weather and extreme cold, the district has more or less a uniform temperature. The percentage of humidity is highest during south-west monsoon and lowest in the months of December, January and February.

(a) Temperature

16. The subjoined statement gives the highest temperature in the period under observation and the month in which they occur at Cannanore, Kasaragod and Tellicherry:—

The highest percentage of humidity at 7.30 hours was in the month of August 1955 and at 14.30 hours in the months of June 1957 and July 1959 recording 98 and 89 per cent respectively. The lowest at 7.30 hours was in the month of December 1956 and at 14.30 hours was in the month of February 1960 recording 78 and 51 per cent respectively.

(c) Rainfall

18. Like other parts of Kerala, this district has also the benefit of two outstanding monsoons—south-west monsoon and retreating or north-east monsoon. The south-west monsoon crosses the coastal line by the last week of May or first week of June and lasts upto the end of September. This seasonal wind blows from

the Arabian sea with heavily clouded skies and gives a high precipitation of rainfall. This is due to the peculiar configuration of the Western Ghats. The retreating or north-east monsoon establishes its supremacy during the months of October and November. By the end of December the dry weather season starts with hot days and chilly nights. The hot weather season begins by the first week of March and lasts upto the second or third week of May. The statement shown below gives the average rainfall in millimetres during the four seasons.

* Data for December relates to the previous year

** Based on available figures relating to the period 1901 to 1950

During the decade the wettest south-west monsoon was in 1959 and the mildest was in 1952. The wettest north-east monsoon was in 1955 and mildest in 1954. The driest dry weather season from December to February was in 1957 and 1959 and the driest hot weather season was in 1953. Tables showing normal and monthly rainfall of the eight centres along with temperature data for three centres of Cannanore district are furnished separately (Appendices 1 to 3).

Forests

19. The forests of this district can be classified into plains deciduous, plateau deciduous, tropical ever-green and semi ever-green. Of these, plains deciduous is confined to the foot of the hills to the west of the Western Ghats, occurring at elevations between 150 and 1,000 feet above the mean sea level. The plateau deciduous is found on the Wynad plateau at elevations between 2,300 and 3,500 feet above the mean sea level. This region is characterised by the presence of teak and *Terminalia tomentosa*. The tropical ever-green forests are found at elevations above 1,000 feet and semi ever-green in areas between the ever-green and deciduous forests, both in the plains and plateau. The Wynad forest division which is the only forest division in this district contains 11.07 sq. miles of teak, 5.63 sq. miles of soft wood, 2.9 sq. miles of cashew and 1.12 sq. miles of miscellaneous trees. During the financial year ending 1960-61 the total value of major and minor produces of the forests of the Cannanore district was Rs. 20.22 lakhs. A statement showing the quantity and value of the major and minor produces from 1950-51 to 1960-61 is given separately (Appendix 4).

Land Tenures

20. The Kerala Agrarian Relations Act, 1960, dealing with the tenancies in Kerala as a whole came into force in part on 15th February 1961. But consequent on the decisions of courts on certain questions arising out of this Act, the operation of the Act was suspended by a Proclamation dated 18th December 1962 and the Act was repealed when the Kerala Land Reforms Act, 1963 was enacted. Thus the position with regard to land tenures as on 1st March 1961, the reference date for 1961 Census, is as if the Kerala Agrarian Relations Act, 1960 had not been in force. Subsequently, the Kerala Land Reforms Act, 1963 was passed which vitally affects the tenancies in Kerala. It is, therefore, necessary to give an account of the land tenures as they stood on 1st March 1961 without taking into account the Kerala Agrarian Relations Act, 1960 and as after the enactment of the Kerala Land Reforms Act, 1963.

Jenmom

21. There are various theories about the origin of *jenmom* right. The traditional account that Sri Parasurama made an entire gift of the land in Kerala to Brahmans has not found acceptance with most of the authorities on the subject. It is, however, evident from the trend of authorities that a considerable portion of the land in Kerala was owned by certain individuals or families among whom were a large number of Namboothiries and Nayars. The Jenmies recognised by the early British administrators of the former Malabar included Brahmans, Nayars, Thiyas and Mukkuvans. The right possessed by the Jenmi over the *jenmom* land is one of ownership in the soil as complete as ever was enjoyed by a free-holder in England. The title of the Jenmi is inherent and the Jenmi is a little territorial sovereign over his land by virtue of this ownership.

Barring a few cases, the Jenmies used to let out the Jenmom land for cultivation to others enjoying only the benefit of rent derived therefrom, the manner of so letting the land varying according to the tenure created

Inams

22. There are two kinds of *inams*, viz, personal and service *inams*. The former are granted for the support of individuals or families either as reward for the service rendered or as a mark of favour as distinguished from service *inams* granted for future performance of services. The latter are conditional on the performance of future services and as such do not carry with them absolute proprietorship. In respect of most of the personal *inams* the grant carries absolute proprietorship with the right of alienation while in the case of the rest conditions like prohibition of alienation or resumption after the lifetime of the *inam* holder are seen incorporated in the grant. Wherever such conditions are incorporated the *inam* does not confer absolute proprietorship. An *inam* may be granted either by *Sirkar* or by private individuals. In either case there is no difference in the features of the tenure. The following are some of the personal *inams*:—

(a) Anubhogam

This means land given as a *kudiyiruppu* or otherwise to persons belonging to the same caste as that of the grantor bearing a small rent or tax for their maintenance for no service of any description like, for instance, gifts made by a goodwill of the sovereign.

(b) Adima

Adima is a grant of land by Rajas or petty chieftains generally made to their domestics for cultivation for personal services, past or future. The *adima* grant for past services is not resumable and the grantee enjoys absolute powers of disposal of the same. There are several kinds of *inams* each distinguished from the other according to the terms of the *inam*. *Gurudakshina*, *rakshabhogam*, *danapramanam* etc., are some of them.

Kanom

23. *Kanom* means a transfer for consideration in money or in kind or in both by landlord of an interest in specific immovable property to another (called *kanomdar*) for the latter's enjoyment, the incidents of which transfer include

(a) a right in the transferee to hold the said property liable for a consideration paid by him or due to him which consideration is called *kanartham*,

(b) the liability of the transferor to pay the transferee interest on the *kanartham* and

(c) the payment of *michavaram* by the transferee.

The *kanom* tenant enjoys fixity of tenure unless the *kanom* relates to commercial sites or the *kanom* is one the consideration for which exceeded 40% of the value of the Jenmi's right in the holding. But, in the case of *kanoms* pertaining to commercial sites the tenant enjoys fixity of tenure if immediately before the commencement of the Malabar Tenancy Act, 1929, the tenant had fixity of tenure in such sites or a right to obtain renewal of his tenancy in respect of it. The landlord enjoys the right of resumption on the termination of the term of the *kanom* for self cultivation and irrespective of the expiry of such term on grounds like denial of the landlord's title, intentional and wilful act of waste and collusively permitting a stranger to encroch upon the land. On the termination of the term of the *kanom* the landlord can evict the tenant for self cultivation by the landlord's *tarwad*, *thavazhi* etc., for *bona fide* purpose of constructing a building for landlord's *tarwad*, *thavazhi* etc., and for the extension of a Temple, Mosque, Church or other places certified by the Collector of the district where the landlord is the trustee thereof. The eviction in these cases shall not apply to the holding or that portion of a holding which consists of *kudiyiruppu* or protected *ulkudi*. The tenant has a right to sue for restoration of the holding if the land is not used for the purpose for which the eviction was sought within a specified period.

Kanom-Kuzhikanom

24. This means and includes a transfer by a landlord to another (called *kanom-kuzhikanomdar*) of garden lands or other lands or of both with fruit-bearing trees, if any, standing thereon at the time of transfer for the enjoyment of those trees and for the purpose of planting such fruit-bearing trees thereon. The incidents of such transfer include

(a) a right in the transferee to hold the said land liable for the consideration paid by him or due to him which consideration is called *kanartham* and

(b) the libility of the transferor to pay the transferee interest on the *kanartham* unless otherwise agreed to by the parties. The incidents of this tenure are the same as in the case of *kanom*.

Kuzhikanom

25. *Kuzhikanom* means and includes a transfer by the landlord to another called *kuzhikanomdar* of

garden lands or other lands or both with the fruit-bearing trees, if any, standing thereon at the time of transfer, for the enjoyment of those trees and for the purpose of planting such fruit-bearing trees thereon. The incidents of this tenure are the same as in the case of *kanom-kuzhikanom*.

Customary Verumpattom

26. Customary *verumpattomdar* means any *verumpattomdar*, who, before the commencement of the Malabar Tenancy(Amendment) Act, 1951, (Madras Act XXXIII of 1951) was entitled by the custom of the locality in which the land was situated to possession of the land for definite period of years and for whose continuance thereon, after termination of that period, for a further period, a renewal fee had to be paid to the landlord as an incident of the tenure and customary *verumpattom* is the holding of the customary *verumpattomdar*. The incidents of this tenure are the same as in the case of *kanom*.

Kudiyiruppu

27. *Kudiyiruppu* means and includes the site of any residential building, the site or sites of other buildings appurtenant thereto, such other lands as are necessary for the convenient enjoyment of such residential building and the easements attached thereto, but does not include an *ulkudi*. The tenant enjoys fixity of tenure. The tenancy right is heritable and transferable if the tenant is actually cultivating the land. The tenent is evictable on the grounds mentioned for *kanom* and in addition, on the non-payment of rent within 3 months of the due date. He enjoys a right of purchase from the landlord if the *kudiyiruppu* has been occupied for not less than 10 consecutive years.

Separate Kudiyiruppu

28. A separate *kudiyiruppu* means a *kudiyiruppu* which is the sole property comprised in a holding. The rights of the tenant are the same as in the case of a tenant in *kudiyiruppu*.

Separable Kudiyiruppu

29. This means a *kudiyiruppu* which included with other property in a holding and which is not necessary for the convenient enjoyment as usual of any other part of the holding. The rights of the tenant are the same as that of a tenant in the case of a separate *kudiyiruppu*.

Cultivating Verumpattom

30. *Verumpattomdar* means a tenant other than a *kanomdar*, *kanom-kuzhikanomdar* or *kuzhikanomdar* of a holding for agricultural purposes. Cultivating *verumpattomdar* in respect of a holding means any *verumpattomdar* who not being a Jenmi, intermediary or customary *verumpattomdar* of that holding has, expressly or impliedly, contracted to cultivate the lands in that holding and is actually cultivating the same. Cultivating *verumpattom* means a holding of a cultivating *verumpattomdar*. The tenant enjoys the same rights as the holder of a *kudiyiruppu* except the right of purchase.

Ulkudi

31. This means a hut in any portion of a land in the occupation of a person who has been permitted by the person entitled to possession of such land to occupy the hut and who otherwise has no interest in such land. He has no fixity of tenure.

Protected Ulkudi

32. This is an *ulkudi* which has been in the continuous occupation of the holder or any member of his *tarwad*, *thavazhi*, *illom*, *kudumbakavaru* or family for not less than one year. The tenant enjoys fixity of tenure.

Land Tenures in Kasaragod taluk and part of Hosdrug taluk as on 1st March 1961

Mulawarg

33. This is the same as Jenmom.

Mulgeni

34. *Mulgeni* is a tenancy in perpetuity at a fixed invariable rent created in favour of a person who is called *mulgenidar*. He cannot be ousted except for non-payment of rent and even in such cases only after he is fully compensated by the landlord. The *mulgenidar* is at liberty to sub-lease, mortgage or sell his interest in the land.

Chalgeni

35. This is a tenure in which the term of the lease is for a limited period usually one year. The landlord has a right to raise the rent or oust the tenant on the expiry of the term of the lease.

Arwar

36. *Arwar* is a kind of transfer of the land by the landlord of his right on the land for a specified period for consideration in money whereby the transferee who is called *arwardar* is entitled to collect the income from the land and enjoy it for the specified period. The income will be set off against the interest to be paid by the landlord on the *arwar* amount. If there

is any excess after setting off the interest it is paid as rent to the landlord.

Illidarwar

37. When the property is actually given possession to the *arwardar* with right to make improvements it is called *illidarwar*.

Vaidegeni

38. This is a lease by which the lessee enjoys the land for the stipulated rent with a right to effect improvements at the time of surrendering the property on the expiry of the term.

Kumki

39. *Kumki* lands are those which are allowed to be used by the ryot for procuring leaves for manure and fodder for cattle thereby assisting cultivation.

Netticut

40. This right means that those *wargdars* who have their *wargs* situated in the valleys alone between the slopes or ridges of hills forming *Sirkar* lands can utilise those areas for the better enjoyment of their *warg*-lands. Neither *kumki* nor *netticut* confers any exclusive proprietory rights against the Government. They are purely leases terminable at the pleasure of Government.

Kumri

41. This is cultivation of land lying outside a *warg* by felling and burning a patch of the forest, the ashes acting as the manure. *Kumris* are of two kinds, Government *kumris* and *warg kumris*. The former come into existence when the Government for purpose of clearing the undergrowth in a forest have allowed the Forest Tribes to make clearance and grow cereals. Warg *kumris* arise when Government allow neighbouring *wargdars* to take the leaf manure from forest and clear the undergrowth for desultory cultivation. These privileges depend upon Government's pleasure and are terminable whenever Government wants.

After the enactment of the Kerala Land Reforms Act, 1963

42. The Kerala Land Reforms Act, 1963 repealed the Kerala Agrarian Relations Act, 1960, the Malabar Tenancy Act, 1929, the Cochin Verumpattomdars Act, VIII of 1118, the Madras Cultivating Tenants (Payment of Fair Rent) Act, 1956 and the Travancore-Cochin Prevention of Eviction of Kudikidappukars Act, 1955 and enacted a single statute governing the relationship between landlord and tenant throughout the State.

Exemptions from the provisions regarding tenancies

43. Subject to certain provisos, the provisions regarding tenancies in this Act are not applicable to (i) leases of lands or buildings or both belonging to or vested in the Government of Kerala or the Government of any other State in India or the Government of India or a local authority or a Corporation owned or controlled by any of the above Governments, (ii) leases only of buildings and the site thereof with the land, if any, appurtenant thereto, (iii) leases of land or of buildings or of both specifically granted for industrial or commercial purposes, (iv) tenancies of land or buildings or of both created by the Administrator-General or the official Trustee or an official Receiver or officer appointed by a Court of Wards, or by any person holding under or deriving titles from any of the officers or the Court, (v) tenancies in respect of land or buildings or of both created by mortgagees in possession or by persons deriving title from such mortgagees except a cultivating tenant holding land in the taluks of Hosdrug or Kasaragod to which the Malabar Tenancy Act, 1929, did not extend under a lease granted before 15th February 1961 by a usufructuary mortgagee as defined in the Transfer of Property Act, 1882, (vi) tenancies in respect of land or of buildings or of both created by persons having only life interest or other limited interest in it, (vii) leases of private forests except where a person was entitled to fixity of tenure immediately before 21st January 1961 under any law then in force, (viii) tenancies in respect of plantations exceeding thirty acres in extent, (ix) tenancies in respect of *kayal patasekharams* of Kuttanad area specified in Schedule IV of the Act so long as such *patasekharams* are used for the cultivation of paddy or such other crops as may be notified by Government, (x) tenancies in respect of sites, tanks and premises of any temple, mosque or church including sites on which religious ceremonies are conducted and sites of office buildings and other buildings attached to such temple, mosque or church created by the owner, trustee or manager of such temple, mosque or church, (xi) lands transferred for felling trees and (xii) any transaction relating only to the usufruct of trees or to the tapping of cocoanut or other palm-trees or to the tapping of rubber trees. The exemption mentioned above in respect of Government leases is subject to the proviso that in the case of *kandukrishi* lands sub-leased by a tenant holding such lands under Government, the provisions of sections 13 to 26 of the Act shall, so long as the lease granted by the Government subsists apply to the tenants holding under the sub-lease as they apply to tenants holding

lands other than Government lands. In respect of the exemption relating to tenancies created by the Administrator-General etc., mentioned above, the exemption shall cease to apply to any tenancy created by the Court of Wards, where the landlord on whose behalf the tenancy was created does not terminate the tenancy by a registeted notice within a period of six months from the date on which the property was released from the Superintendence of the Court of Wards. Provisions of sections 13 to 26 of the Act, relating to fixity of tenure will apply to exemption granted to tenancies created by mortgagees in possession or by persons deriving title from such mortgagees or by persons having only life interest or other limited interest in the land or buildings or both so long as the mortgage or the life interest or other limited interest subsists. Where a tenancy is created by a *nissanthathikavaru* as defined in the Madras Aliyasanthana Act, 1949 in respect of lands or buildings or both over which the *nissanthathikavaru* has only a life interest the exemption will apply only regarding sections 53 to 72 and not others governing tenancies. In the case of tenancies in respect of agricultural lands which are treated as plantations under sub-clause C of section 44 of section 2 of the Act the exemption referred to supra shall apply only to sections 53 to 72 of the Act. Provisions of sections 4 to 52, 73 and 74 of the Act will apply to tenancies in respect of *kayal patasekharams* of the Kuttanad area in spite of the exemption mentioned about them supra. The Government are also given limited powers of exemption under the Act.

The Scope and Objects of the Act

44. The main objects of the Kerala Land Reforms Act, 1963 are:—

(1) To confer fixity of tenure on tenants;

(2) To fix the fair rent in respect of a holding;

(3) To confer the right of purchase of the landlords' rights, title and interest on the cultivating tenants;

(4) To define the rights and liabilities of *kudikidappukars*; and

(5) To place a ceiling on the ownership and possession of land and provide for the disposal of excess land.

There are also some provisions of secondary importance in addition to the above.

Fixity of Tenure—Tenants and tenancies

45. For a proper appreciation of the provisions relating to tenancies as a whole the definitions of tenants and tenancies are of supreme importance. A tenant means any person who has paid or has agreed to pay rent or other consideration, for his being allowed by another to possess and enjoy the land of the latter and includes an intermediary, a *kanomdar*, a *kanam-kuzhikanomdar*, a *kuzhikanomdar*, a *mulgenidar*, a *verumpattomdar* of any description (including a customary *verumpattomdar*), the holder of a *chalgeni* lease, the holder of a *kudiyiruppu*, the holder of a *vaidageni* lease, an *odacharthudar* or a person claiming under an *odacharthudar* who was actually cultivating on the 11th day of April 1957 and was continuing to cultivate at the commencement of this Act the land or any portion of the land to which the *odacharthu* relates, a mortgagee with possession of immovable property situate in Cochin if the property comprised in the mortgage consists of agricultural land other than planted with rubber, coffee, tea or cashew and the interest on the mortgage amount is less than forty per cent of the total rent fixed in the mortgage document, a mortgagee with possession of immovable property situate in Cochin if the property comprised in the mortgage consists of agricultural land, he was by himself or through any member of his family or *tarwad* holding the property comprised in the mortgage as a *verumpattomdar* on or after 1st Chingom 1111 and the *verumpattom* was terminated after 1st Chingom 1111 and before the commencement of this Act but he continued in possession of the property without interruption by himself or through any member of his family or *tarwad*, as a mortgagee with possession from the date of such termination till the commencement of this Act, any person who, on 11th April 1957 was continuously in occupation of the land of another situate in Malabar for not less than two years, honestly believing himself to be tenant and continued to be in occupation of such land at the commencement of this Act, any person who, by virtue of the provisions of section 6 of the Kerala Stay of Eviction Proceedings Act, 1957 was entitled to cultivate any *nilam* after 11th April 1957 and was cultivating the *nilam* at the commencement of this Act, a tenant who, on or after 11th April 1957, was holding land less in extent than the ceiling area and had executed a deed surrendering his leasehold right to the landlord but had not actually transferred possession of the land to the landlord before the commencement of this Act, a *punam* or *kumri* cultivator, a licensee in Kuttanad area, a *varamdar*, a *vechupakuthidar* and a person holding land situate in any part of the Hosdrug or Kasaragod taluks to which the Malabar Tenancy Act, 1929 did not extend under a transaction described in the document evidencing

it as *bhogya, otti, nattotti, arwar, illidarwar* or *krithasartha illidarwar*, but not being a usufructuary mortgage as defined in the Transfer of Property Act, 1882. Where, in a document a person is described as a *sambalapattomdar, sambalachittudar* or *coolipattomdar* in respect of any *nilam* situate in the Palghat district, he shall be presumed to be a tenant unless it is proved that he has not undertaken any risk of cultivation. A 'Cultivating tenant' means a tenant who is in actual possession of, and is entitled to cultivate the land comprised in the holding. *Kanom* means the transfer for consideration, in money or in kind or both, by a landlord of an interest in specific immovable property to another person for the latter's enjoyment, whether described in the document evidencing the transaction as *kanom* or *kanapattom* the incidents of which transfer include:—

(a) a right in the transferee to hold the said property liable for the consideration paid by him or due to him;

(b) the liability of the transferor to pay to the transferee interest on such consideration unless otherwise agreed to by the parties; and

(c) payment of *michavaram* or customary dues or renewal on the expiry of any specified period,

and in areas other than Malabar, includes such transfer of interest in specific immovable property which is described in the document evidencing the transaction as *otti, karipanayam, panayam, nerpanayam* or by other name and which has the incidents specified in sub-clauses (a) and (b) above and also the following incidents:—

(i) renewal on the expiry of any specified period and

(ii) payment of customary dues.

Kanapattom or any other demise governed by the Travancore Jenmi and Kudiyan Act of 1071 or the Kanom Tenancy Act, 1955 is not a *kanom* for the purpose of this Act. Where there has been no stipulation in the document evidencing the transaction for renewal on the expiry of any specified period, but there has been a renewal or payment of renewal fees, it shall be deemed that there had been a provision for such renewal in the document. *Kanom kuzhikanom* means and includes a transfer by a landlord to another person of garden lands or of other lands or of both, with the fruit bearing trees, if any, standing thereon at the time of the transfer, for the enjoyment of those trees and for the purpose of planting such fruit-bearing trees thereon, the incidents of which transfer include—

(a) a right in the transferee to hold the said lands liable for the consideration paid by him or due to him, which consideration is called *kanartham* and

(b) the liability of the transferor to pay to the transferee interest on the *kanartham* unless otherwise agreed to by the parties. A usufructuary mortgage as defined in the Transfer of Property Act, 1882 (Central Act 4 of 1882) is not a *kanom-kuzhikanom. Kudiyiruppu* means a holding or part of a holding consisting of the site of any residential building, the site or sites of other buildings appurtenant thereto, such other lands as are necessary for the convenient enjoyment of such residential building and easements attached thereto but does not include a *kudikidappu. Kuzhikanom* means and includes a transfer by a landlord to another person of garden lands or other lands or of both with the fruit-bearing trees, if any, standing thereon, at the time of the transfer, for the enjoyment of those trees and for the purpose of planting such fruit-bearing trees thereon but shall not include a usufructuary mortgage as defined in the Transfer of Property Act, 1882. *Punam* or *kumri* cultivation means fugitive or intermittent cultivation of paddy on dry lands in Malabar and *punam* or *kumri cultivator* means a person who has raised crops by *punam* or *kumri* cultivation in any year between 1953 and 1959 and where there are successive cultivators in respect of the same land the cultivator who raised crops last by such cultivation during the said period. "Holder of a *chalgani* lease" means a lessee or sub-lessee of specific immovable property situate in the taluk of Hosdrug or Kasaragod in the district of Cannanore who has contracted either expressly or impliedly to hold the same under a lease, whether for a specified period or not. *Mulgeni* means a tenancy in perpetuity at a fixed invariable rent created in favour of a person called *mulgenidar Vaidageni* means a lease for a term of years. *Varam* means an agreement for the cultivation of *nilam* with paddy and sharing the produce made between the owner and the person who undertakes cultivation under such arrangement and includes the arrangements known as *pathivaram, pankuvaram* and *pankupattom*; and *varamdar* means the person who undertakes cultivation under a *varam* agreement. *Vechupakuthy* means a transaction whereunder a landowner permits another person to be in joint

possession with him of any land with the following stipulations:—

(i) *Vechupakuthidar* shall improve the land within a specified period;

(ii) at the end of the period so specified—

(a) The land shall be partitioned between the land owner and the *vechupakuthidar*;

(b) upon such partition all the rights of either party over the portion of the land set apart for the other shall stand transferred to and vest in the other; and

(iii) during the period between the date of the transaction aforesaid and the partition of the land the *vechupakuthidar* shall pay to the land owner such rent as may be specified. *Verumpattomdar* means a lessee or sub-lessee of immovable property, whether called *verumpattomdar* or *verupattomdar* who has expressly or impliedly contracted to hold the same under a lease with or without security for rent and includes a *tharikuthukaran* in the Palghat district but does not include a *kanomdar*, a *kanom-kuzhikanomdar* or *kuzhikanomdar*. "Customary *verumpattomdar*" means any *verumpattomdar* of immovable property situate in any area to which the Malabar Tenancy Act, 1929, extended, who before the commencement of the Malabar Tenancy (Amendment) Act, 1951, was entitled by the customs of the locality in which the land was situated to possession of the said land for a definite period of years, and for whose continuance thereon, after the termination of that period, for a futher period, a renewal fee had to be paid to the landlord as incident of the tenure.

Fixity of Tenure

46. The Act confers fixity of tenure on every tenant in respect of his holding except where the tenant holds under a landlord who is a member of the Armed Forces or is a seaman if the tenancy was created by such landlord within a period of three months before he became a member of the Armed Forces or seaman or where the tenant holds under the legal representative of the landlord. Resumption is allowed in the following cases:—

(a) For the purpose of extending a place of public religious workship provided the Collector of the district certifies that the same is so needed;

(b) For the *bona fide* purpose of constructing a building for the residence of a landlord (other than *sthani* or the trustee or owner of a place of public religious workship) or any member of his family;

(c) For the *bona fide* purpose of cultivation by the landlord (other than a *sthani* or the trustee or the owner of a place of public religious workship) or any member of his family;

(d) In respect of agricultural lands interspersed within the boundaries of the area cultivated with plantation crops, where such holding or part thereof is necessary for the purposes of plantation; and

(e) if the tenant of the agricultural lands mentioned under (d) above wilfully commits any act of material waste in the plantation.

In the case of (b) above resumption is allowed only up to 20 cents where resumption is sought on behalf of one person and up to 50 cents where it is sought on behalf of two or more persons. The total extent of land in the possession of the landlord shall not be raised above five standard acres and the total extent of land in the possession of the tenant shall not be reduced below 20 cents in the case of such resumptions. Any land held by a member of a Scheduled Caste or Scheduled Tribe as tenant is exempted from such resumption. In the case of resumption under (c) above the total extent of land in the possession of the landlord shall not be raised above the ceiling area and the total extent of land in the possession of the cultivating tenant shall not be reduced below the ceiling area by such resumption. The resumption is allowed only from a tenant who is in possession of land above the ceiling area. A small holder (other than a *sthani* or the trustee or owner of a place of public religious worship) is however, allowed to resume from his tenant a portion of the holding not exceeding one half provided that by such resumption the total extent of land in the possession of the small holder shall not be raised above four standard acres or four acres in extent which ever is greater and that except as provided in sub-sections 2 and 3 of section 53 of the Act no land shall be resumed from a tenant who was entitled to fixity of tenure in respect of his holding immediately before 21st January 1961 under any law then in force. A "Small holder" means a landlord who does not have interest in land exceeding eight standard acres or 24 acres in extent, whichever is less, as owner, intermediary or cultivating tenant or in two or more of the above capacities so however that the extent of non-resumable land in his possession as owner or as cultivating tenant, or partly as owner and

partly as cultivating tenant does not exceed four standard acres or four acres in extent whichever is greater. A person who was in possession of, or had interest in land exceeding the limits mentioned above before 1st December 1957 but such extent of land was reduced to the said limits or below by partition or transfer effected after the above date shall not be deemed to be a small holder nor shall such partition or transfer entitle the allottee or transferee to exercise the rights of a small holder in respect of the land allotted or transferred to him. No resumption of a *kudiyiruppu* is allowed whether it is sought by small holder or not. Subject to certain exemptions a time limit of one year from the commencement of the Act has been fixed for preferring applications for resumption. The Act also contains provisions for the grant of compensation for improvements and solatium to the tenant from whom any land is resumed.

47. An application for restoration by a cultivating tenant from whom land was resumed for construction of a residential building or for personal cultivation or on the ground of the land being necessary for purposes of plantation will lie if within three years of such resumption the person who resumed the land fails without reasonable excuse to use the land for the purpose for which it was resumed. The restoration is allowed only subject to certain limitations enjoined by the Act.

Fair Rent

48. The fair rent in respect of a holding is the rent payable by the cultivating tenant to his landlord and it shall be the rent calculated at the rates specified in Schedule III applicable to the class of lands comprised in the holding, or the contract rent, whichever is less. When the fair rent in respect of a holding has been determined under any law in force immediately before 21st January 1961, the fair rent so dertermined shall be deemed to be the contract rent. Where a cultivating tenant or an intermediary is holding under a small holder, the fair rent shall, at the option of the small holder, be the rent calculated at the rates specified in Schedule III applicable to the class of lands comprised in the holding; or where the fair rent in respect of the holding has been determined under any law in force immediately before 21st January 1961 such fair rent, or, where the fair rent has not been so determined 75 per cent of the contract rent. The fair rent payable by a cultivating *kanomdar* or a cultivating customary *verumpattomdar* shall not exceed the *michavaram* payable by such *kanomdar* or the rent payable by such customary *verumpattomdar* as the case may be. Where any land included in a holding is set apart for communal purposes and is used for such purposes, the extent of the land so set apart shall not be taken into account in fixing the fair rent of such holding. The cultivating tenant or any landlord may apply in the prescribed form to the Land Tribunal for dertermining the fair rent in respect of a holding. Where in respect of a holding there is an intermediary at the commencement of this Act and as a result of the determination of the fair rent there has been a reduction or increase in the rent payable by the cultivating tenant, the rent payable by the intermediary to his landlord shall be reduced or increased in the same proportion as the rent to which he was entitled was reduced or increased. The landlord and the tenant are competent to agree as to what shall be the fair rent payable and where such an agreement is filed with the Land Tribunal, the latter shall pass orders determining such agreed rent as the fair rent. Where the rent payable has not been determined by the Land Tribunal the landlord shall be entitled to receive and the tenant shall be bound to pay the rent that was payable immediately before the commencement of this Act. In the case of a *varomdar* such rent shall mean the average of the share of the landlord in the produce for the three years immediately preceding such commencement, or, where the *varomdar* was not cultivating the land continuously for the said period of three years, the share of the landlord for the year in which the *varomdar* cultivated the said land immediately before such commencement. Where there has been a damage to, or failure of crops, owing to causes beyond the control of the tenant in any holding, the tenant shall be entitled to a remission of the rent payable by him in proportion to the extent of such damage or failure. The remission is to be ordered by the District Collector or any other officer authorised by Government by notification in the Gazette.

Purchase of Landlord's rights by cultivating tenants

49. The Act enables the cultivating tenants entitled to fixity of tenure to purchase the landlord's rights in the holding. The provisions in this respect have, however, not yet been enforced. A summary of the salient provisions in this respect is given below. A cultivating tenant (including the tenant of a *kudiyiruppu*) who is entitled to fixity of tenure under section 13 is also entitled to purchase the right, title and interest of the land owner and the intermediaries, if any, in respect of the land comprised in the holding provided he or the family of which the cultivating tenant is a member does not own an extent of land not less than the ceiling

area. Where he or the family of which he is a member owns land less than the ceiling area the right of purchase is allowed only to the extent of land as will, together with the land already owned, make up the ceiling area. If the landlord is entitled to resume any portion of the holding and he applies for such resumption the right of purchase will extend only to the remaining area. Where the land owner or an intermediary is a small holder and the cultivating tenant was entitled to fixity of tenure immediately before 21st January 1961 under any law then in force the cultivating tenant shall not be entitled to purchase the right, title and interest of the land owner and the intermediaries unless the cultivating tenant agrees in writing that the small holder may exercise the right of resumption in respect of the holding under section 17. In the event of such agreement the small holder shall, not withstanding anything contained in the second proviso to section 17 and not withstanding the expiry of the period fixed under clause (1) of section 18 for making application for resumption, be entitled to exercise the right of resumption and the cultivating tenant shall be entitled to purchase the right, title and interest of the landowner and the intermediaries in respect of the remaining part of the holding left after resumption. An application for the purchase of landlord's right shall be made by the cultivating tenant to the Land Tribunal. The purchase price payable by the cultivating tenant shall be the aggregate of:—

(i) sixteen times the fair rent in respect of the holding or part thereof to which the purchase relates;

(ii) the value of structures, wells and embankments of a permanent nature belonging to the land owner or the intermediaries if any and

(iii) one half of the value of the timber trees belonging to the land owner or intermediaries if any. The Act provides for the apportionment of such price between the landlord and intermediaries, if any. The Land Tribunal shall pass orders, where the purchase is to be allowed, allowing the application for purchase and specify details relating to the purchase price, the value of encumbrances etc. and the amount payable to the land owner and each of the intermediaries after deducting the value of the encumbrances or the claim for maintenance or alimony. The purchase price shall be payable in sixteen equal instalments. But where the purchase price is less than Rs. 160 the number of instalments shall be so fixed by the Land Tribunal that the amount payable in each instalment shall not be less than Rs. 10. It shall be open to the cultivating tenant to pay the entire price in a lump in which case the amount payable shall be only 75 per cent of the purchase price. The purchase price payable will bear interest at 4½ per cent per annum from the date on which the right, title and interest from the land owner and intermediaries vested in the cultivating tenants. Where the purchase price is paid in instalments the second and subsequent instalments shall be deposited together with interest on the amount outstanding on the date of deposit. A cultivating tenant shall be liable to pay rent to his landlord until he makes the deposit.

50. Where in respect of a holding the land owner or the intermediary is a religious, charitable or educational institution of a public nature such institution is given the option to choose as to whether the right, title and interest of the institution in respect of the holding may be permitted to be purchased from the institution by the cultivating tenant on payment of the purchase price or such right, title and interest should be vested in the Government in consideration of the payment of an annuity in perpetuity by the Government. The annuity payable to the institution in the latter case shall be a sum equal to the annual rent which the institution was entitled to receive immediately before 21st January 1961 after deducting 2½ per cent thereof by way of collection charges. Where in respect of a holding held by a tenant referred to in sections 4, 5, 6, 7, 8, 9, 10 or 11 there was no stipulation for payment of any rent immediately before 21st January 1961 the annuity shall be an amount equal to 4½ per cent of 16 times the fair rent in respect of the holding. The Government shall pay the annuity payable to the institution every year in perpetuity. Where, however, the right, title and interest of the institution are subject to any encumbrance the value of the encumbrance shall be paid to the holder of the encumbrance and 5 per cent of the value of the emcumbrance shall be reduced from the annuity and the balance, if any, alone shall be paid to the institution.

51. Where the value of the encumbrance is more than 20 times the annuity if there is only one encumbrance 20 times the annuity shall be paid to the holder of the encumbrance and if there are more than one encumbrance 20 times the value of encumbrances shall be paid to the holders thereof in their order of priority and no amount by way of annuity shall be payable to the institution. The filing of an application by a religious, charitable or educational institution of a public nature under sub-section (i) of section 66 or the vesting of the right, title and interest of the institution in the Government

under sub-section (5) of section 66 of the Act, shall not affect the right of the cultivating tenant to purchase such right, title and interest in accordance with the provisions 53-64 of the Act already referred to. Where a cultivating tenant does not apply for a purchase of the right, title and interest vested in the Government under section 66 the tenant holding directly under the religious, charitable or educational institution of a public nature shall continue as tenant under the Government. The Act contains provisions for scaling down the arrears of rent in accordance with the schedule given under section 73. After the commencement of this Act no tenancy shall be created in respect of any land. But where any land owner is a minor or a widow or an unmarried woman or a divorced woman or a person incapable of cultivating the land by reason of any physical or mental disability or a serving member of the armed forces or seaman such person may create a tenancy, but the tenant shall not be entitled to aright of purchase. Any tenancy created in contravention of the above provision shall be invalid.

Rights and Liabilities of Kudikidappukars

52. A *kudikidappukaran* means a person who has neither a homestead nor any land as owner or as tenant in possession, on which he could erect a homestead and—

(i) who has been permitted with or without an obligation to pay rent by a person in lawful possession of any land to have the use and occupation of a portion of such land for the purpose of erecting a homestead; or

(ii) who has been permitted by a person in lawful possession of any land to occupy, with or without the obligation to pay rent, a hut belonging to such person and situate in the said land but otherwise has no interest in the land; and

Kudikidappu means the land or the homestead or hut so permitted to be erected or occupied together with the easements attached thereto. A person shall not be deemed to be a *kudikidappukaran* if the aforesaid permission was granted after the 11th of April 1957 by a mortgagee in possession or by a tenant from whom the land in which the *kudikidappu* is situate is liable to be resumed. A person shall not also be deemed to be a *kudikidappukaran* if the permission was granted in respect of any hut not belonging to him and situate in a plantation or in any area of land which is appurtenant to a mill, factory or workshop and in connection with the employment of such person in the plantation, mill, factory or workshop unless he was, immediately before the commencement of the Act, entitled to the rights of a *kudikidappukaran* or the holder of a protected *ulkudi* or *kudikidappu* under any law then in force. A hut means any dwelling house which was constructed at a cost not exceeding Rs. 400 or could have at the time of construction yielded a monthly rent not exceeding Rs. 4. Any person who was in occupation of a *kudikidappu* on the 11th day of April 1957 and who continues to be in such occupation at the commencement of the Act shall be deemed to be in occupation of such *kudikidappu* with permission as required above. Also, where any *kudikidappukaran* secures any mortgage with permission over the land in which the *kudikidappu* is situated his *kudikidappu* right shall revive on the redemption of the mortgage, provided that he has at the time of the redemption neither a homestead nor any land, either as owner or as tenant in possession, on which he could erect a homestead. No *kudikidappukaran* shall be evicted from his *kudikidappu* except on the ground that he has alienated his right of *kudikidappu* to another person or he has rented or leased out his *kudikidappu* to another person or he has ceased to reside in the *kudikidappu* continuously for a period of two years or he has another *kudikidappu* or has obtained ownership and possession of land for erecting a homestead. A *kudikidappukaran* shall not be deemed to have ceased to reside in a *kudikidappu* notwithstanding the fact that he was not actually residing therein if any of his near relatives viz, husband or wife, children, grandchildren, father, mother, brother or sister who was residing with him in the *kudikidappu* for a continuous period of not less than one year continues to reside in the *kudikidappu*. A person in possession of the land on which there is a homestead or hut in the occupation of a *kudikidappukaran* may, if he *bona fide* requires the land for building purpose for himself or any member of his family including major sons and daughters or for purposes in connection with a town planning scheme approved by the competent authority or for any industrial purpose require the *kudikidappukaran* to shift to a new site belonging to him subject to the following conditions:—

(i) The land owner shall pay to the Kudikidappukaran the price of the homestead if any erected by the *kudikidappukaran*;

(ii) the new site shall be fit for erecting a homestead and shall be within a distance of one mile from the existing *kudikidappu*;

(iii) the extent of the new site shall be the extent of the *kudikidappu* subject to a minimum of 3 cents and a maximum of 10 cents and

(iv) the land holder shall transfer ownership and possession of the new site to the *kudikidappukaran* and shall pay him the reasonable cost of shifting the *kudikidappu* to the new site.

Where the above conditions are complied with the *kudikidappukaran* shall be bound to shift to the new site.

53. Where a person does not hold more than 25 cents of land and there is a hut in the occupation of a *kudikidappukaran* on such land, he may, if he requires the land occupied by such hut for constructing a building for his own residence apply to the Government for acquisition of land to which the *kudikidappu* may be shifted whereupon Government after collecting the cost of acquisition from the applicant may acquire the land and give possession of the land to the *kudikidappukaran* and require him to shift to the said land. The *kudikidappukaran* shall then be bound to shift to the new site. But he will be entitled to the expenses as determined by an officer authorised by Government to be reasonably required to shift to the new site. The site acquired for the purpose shall be subject to a minimum of 3 cents and a maximum of 10 cents. Again, where the owner of the land in which there is a *kudikidappu* considers that the *kudikidappu* is so located as to cause inconvenience to him he may require the *kudikidappukaran* to shift to another part of his land provided that the site to which the *kudikidappu* is required to be shifted is fit for the location of the *kudikidappu* and the owner of the land transfers to the *kudikidappukaran* ownership and possession of land equal to the extent of the existing *kudikidappu* subject to a minimum of 3 cents and a maximum of 10 cents and pay the price of the homestead if any erected by the *kudikidappukaran* and the cost of shifting the *kudikidappu*. The Act scales down the arrears of rent payable by a *kudikidappukaran* to one year's rent or the actual amount in arrears whichever is less and fixes the maximum of the future rent.

Restriction on ownership and possession of land in excess of ceiling area and disposal of excess lands

54. The next salient provisions of the Act relate to the ceiling of ownership and possession of land and the disposal of excess lands. These provisions have not been enforced so far. Subject to the exemptions given under section 81 of the Act the ceiling area of land has been fixed to be 12 standard acres in the case of an adult unmarried person or a family consisting of not more than 5 members; and 12 standard acres increased by one standard acre for each member in excess of five, so, however that the total extent of ceiling area shall not exceed 20 standard acres in the case of a family consisting of more than 5 members. The ceiling area shall in no case be less than 15 acres or more than 36 acres in extent. All the lands owned or held individually by the members of a family or jointly by some or all of the members of such family shall be deemed to be owned or held by the family In calculating the extent of land owned or held by a family or an adult unmarried person the shares of the members of the family or the adult unmarried person, as the case may be, in the lands owned or held by a co-operative society or by an institution or by a joint family shall be taken into account. Where a person has two or more legally wedded wives living, the husband, one of the wives named by him for the purpose and their unmarried minor children shall be deemed to be one family; and the other wife or each of the other wives and their unmarried minor children shall be deemed to be a separate family. An adult unmarried person shall include a divorced husband or divorced wife who has not remarried, provided that if such divorced husband or divorced wife is the guardian of any unmarried minor child, he or she together with such unmarried minor child shall be deemed to be a family . It shall be lawful for any adult member in a family to own or hold land in excess of the ceiling area to the extent necessary to make up the ceiling area of his lineal descendants other than his minor unmarried children who are alive on the date notified under sub-section (i) of section 83 and who would inherit his lands on his death provided that the aforesaid adult member shall take into account all acquisitions of lands or interests in land made by such lineal descendants or the members of their families for fixing the total extent that such adult member shall be entitled to own or hold from time to time and shall be bound to surrender the excess. In the case of lineal descendants who are members of other families the ceiling area shall be that applicable to their families. Where a family or an adult unmarried person owns or holds land in excess of the ceiling area on the notified date such excess land shall be surrendered by the person who is competent to do so within such time and to such authority as may be prescribed. Where, however, any person who *bona fide* believes that the ownership or possession of any land owned or held by him or by the members of his family is liable to be purchased by the cultivating tenant or to be resumed by the land owner or the intermediary under provisions of this Act

the extent of the land so liable to be purchased or to be resumed shall not be taken into account in calculating the extent of land to be surrendered. The Land Board is to finally determine the extent of land liable to be surrendered . Where ownership or possession or both of any land is surrendered by or assumed from a person or is vested in the Government under section 86 or 87 such person shall be entitled to compensation. Where the rights of an intermediary are extinguished, such intermediary shall also be entitled to compensation. The compensation payable to an owner for the surrender or assumption of ownership and possession of land shall be 55 per cent of the market value of the land and improvements, if any, thereon. The compensation payable to the land owner, the intermediary or cultivating tenant for the surrender, assumption, vesting in the Government or extinguishment of their rights shall be the portion of 55 per cent of the market value of the land and improvements, if any, thereon that will fall to his share if such values are apportioned among the land owner, cultivating tenant and intermediary, if any, in respect of the land according to the following provisions—

(1) the portion of the compensation for any building or other improvements shall be set apart to the person to whom such building or other improvement belongs;

(2) ninety per cent of the portion of the compensation for the site of any homestead or hut in the occupation of a *kudikidappukaran* shall be deducted from the total amount of compensation;

(3) the balance remaining after deducting the amounts referred to in clauses (i) and (ii) shall be apportioned among the land owner, the intermediaries and the cultivating tenant in proportion to the profits derivable by them from the land immediately before the surrender, assumption or vesting in the Government, as the case may be. "Profits derivable from the land" shall be deemed to be equal to (i) in the case of a land owner, the rent which he was entitled to get from the tenant holding immediately under him; (ii) in the case of an intermediary, the difference between the rent which he was entitled to get from his tenant and the rent for which he was liable to his landlord; and (iii) in the case of a cultivating tenant, the difference between the net income and the rent payable by him. The rent payable by the cultivating tenant and the intermediary for this purpose shall be as calculated under the provisions of this Act;

(4) where a mortgagee in possession surrenders possession of the land mortgaged to him,

(i) where the ownership of the land mortgaged has been surrendered by the owner of the land, the mortgagee shall be treated as a holder of an encumbrance in respect of the land, and the encumbrance shall be discharged as provided in sections 91 and 92;

(ii) in other cases, the Government shall pay to the mortgagee the amount to which he would have been entitled under clause (i) if the ownership of the land mortgaged had been surrendered to the Government, and hold the land as mortgagee with possession with all the rights and liabilities of the mortgagee.

The compensation or the amount of encumbrance, as the case may be, shall be paid either in cash or negotiable bond redeemable in 16 years and carrying interest at the rate of 4½ per cent per annum with effect from the date on which the ownership or possession or both of the land has or have vested in the Government under section 86 or section 87 or partly in cash and partly in such bonds in such manner as may be prescribed. The Act also makes provision for payment of advance towards compensation. Where the land owner whose ownership of land is vested in the Government or the intermediary whose rights are extinguished under sub-section 4 of section 86 was a small holder and the cultivating tenant of the holding was entitled to fixity of tenure immediately before 21st January 1961 under any law then in force the ownership or possession or both of such land vested in the Government shall be assigned to such small holder. Where there are more than one such small holder in respect of such land the small holder nearest to the cultivating tenant shall have priority for such assignment. The purchase price payable by the small holder for assignment of the ownership or possession or both of the land shall be 55 per cent of the market value of such rights. The purchase price shall be payable either in a lump or 16 equal annual instalments. Any person who does not possess any land or possesses only less than 5 acres of land in extent may apply to the Land Board for assignment on registry of lands to him. The Land Board shall, after reserving in each village the lands necessary for public purposes, assign on registry the remaining lands vested in the Government as specified below:—

(1) the holdings in which there are *kudikidappukars* shall, as far as possible, be assigned to such *kudikidappukars*;

(2) out of the remaining area available for assignment,

(a) fifty per cent shall be assigned to the landless agricultural labourers of which one-half shall be assigned to the landless agricultural labourers belonging to Scheduled Castes or Scheduled Tribes residing in the same village or adjacent villages;

(b) twenty-five per cent shall be assigned to small holders and other landlords who are not entitled to resume any land;

(c) the remaining twenty-five per cent shall be assigned to the cultivators who do not possess more than 5 acres of land in extent. In assigning lands under this sub-section to the persons specified in sub-clauses (a), (b) and (c) above, first preference shall be given to ex-servicemen belonging to the respective classes, and, subject as above, preference shall be given to co-operative societies formed by persons specified in the respective sub-clauses. Where the excess land that is available for assignment is either *kayal* or *kole* nilam, such land shall be assigned only to co-operative societies formed by landless agricultural labourers. For the above purpose a *kudikidappukaran* or a tenant of a *kudiyiruppu* shall be deemed to be a landless agricultural labourer if he does not possess any other land.

(3) The Land Board shall not assign to any person more than 5 acres in extent of land. Where a person possesses any land, only so much land as will make the extent of land in his possession five acres shall be assigned to him.

56. The purchase price of land assigned on registry shall be an amount equal to 55 per cent of the market value of the land and improvements if any, thereof and shall be payable either in lump or in 16½ equal annual instalments. The assignment shall be made on payment of the purchase price either in lump or the first instalment thereof. Where the purchase price is payable in instalments the amount outstanding after payment of each instalment shall bear interest at the rate of 4½ per cent per annum. The Land Board shall, subject to such rules as may be made by Government in this behalf manage the lands vested in them until they are assigned under sections 94 and 96 by making arrangement for their cultivation and protection. The Act has invalidated certain voluntary transfers effected after the date of publication of the Kerala Land Reforms Bill, 1963 in the Gazette.

57. From the nature of the provisions of the Kerala Land Reforms Act, 1963, it would be seen that this statute does not affect land tenures not specifically mentioned in it. Such tenures are not, therefore, affected by the Kerala Land Reforms Act, 1963.

Agriculture

58. As in other districts of Kerala , majority of the population depend on agriculture. The following statement gives the data regarding land utilization in the Cannanore district from 1955-56 to 1960-61:—

Total cropped area	49.47	46.57	43.59	44.88	44.51	46.39

There is a fall in the area sown more than once in 1960-61 from that of 1955-56. This is reflected in the total cropped area also which shows a corresponding decrease. The years 1955-56 and 1956-57 recorded a phenominal increase in the area sown more than once. Thereafter there has been a steady decline in the area up to 1959-60. Though 1960-61 records a slight increase from the previous year it is much below that of 1955-56. In the case of net area sown the decrease has been fluctuating more than in the case of area sown more than once.

59. The distribution of the cropped area under the major groups in the district is given in the subjoined statement:—

Of the above, rice, cocoanut, pepper, betelnuts, bananas including plantains, plantation crops consisting of tea, coffee and rubber, areca-nuts, cashewnuts and tapioca could be considered to be the principal crops. Tobacco deserves special mention in view of the fact that during 1960-61 the production of tobacco in the State is wholly confined to this district.

(a) Paddy

62. Paddy is cultivated in three seasons of the year. The one associated with the autumn season is called '*kanni* crop', with the Winter is called the '*mundakan* crop' and with the Summer the '*puncha* crop'. The area, cultivated with paddy in each of the seasons in the agricultural year 1960-61 along with yield per acre and production is given below:—

The average yield of dry paddy for 1960-61 in all the taluks of this district is less than the State average except in the case of autumn crop for the Hosdrug taluk. There is no *puncha* crop in Cannanore, Taliparamba and Tellicherry taluks and no Autumn crop in the North Wynad taluk.

63. The first Agricultural Research Station in this district was established at Taliparamba in 1905. Manurial and varietal trials on paddy, areca-nut, cocoanut, tapioca, sapota, pepper, chillies, pineapple, cashew and mangoes, are conducted here. The results of the experiments conducted on paddy in this station for 1957-58, 1958-59 and 1959-60 are given below:—

Further experiments conducted in this station to find out the best variety suitable for cultivation show that out of the seven different varieties tried Aruvakkari variety gave the best result. Its yield was 2,807 lb. per acre. The details of the results are given below:—

Statement 17

The important pests prevalent in this district are rice stem borer, rice bug, rice hispa, paddy grass hoppers, leaf roller and rice case worm. These pests are controlled whenever they occur. The common manures used are ash and farmyard manure or compost. Manuring with chemical fertilizers is also getting popular.

(b) Pepper

64. Cannanore district accounts for 43 per cent of the total area of pepper of the State which is 42 per cent of the Indian Union. Though the area is large, the yield per acre is less than that of the State and All India averages. The statement shown below gives the area, production and yield per unit for India, Kerala and Cannanore district.

Statement 18

AREA UNDER PEPPER, YIELD PER ACRE AND PRODUCTION IN 1959-60

	Area in 1,000 acres	Yield per acre in lb.	Production in 1,000 tons
India	232	247	26
Kerala	226	247	25
Cannanore District	98	162	7

Pepper grows in all the taluks of this district. The pepper cultivation mainly depends upon the rain. The rainfall should be about 80 inches with the temperature ranging between 50°F and 140°F. The harvesting season of pepper is from November to January. The area, production and yield of pepper for the last five years are furnished below:—

Statement 19

AREA, YIELD PER ACRE AND PRODUCTION OF PEPPER FROM 1956-57 to 1960-61

Year	Area in acres	Yield per acre in lb.	Production in tons
1956-57	88,330	190	7,510
1957-58	97,134	180	7,820
1958-59	96,666	167	7,194
1959-60	98,160	162	7,110
1960-61	106,755	163	7,780

Though there is an increase in the area of pepper since 1956-57 the production has decreased by 5.33 per cent. The yield per acre of pepper had gone down from 190 lb, to 163 lb, since 1956-57. The following statement gives the taluk-wise area and production of pepper for 1960-61.

65. There is a Pepper Research Station at Panniyur 542 vines of 66 varieties are reared here in the varietal collection block. "Most of the Travancore Types of pepper vines have flowered earlier than the local types but the yield is maximum in the Malabar types of vines, Taliparamba I and Vally. Some of the vines of the Travancore types flowered during the off-season also. The type *Chola* (2) gave the maximum spiking during the season. Spiking during off-season is a desirable character in pepper as it is likely to give a second crop in the same year under favourable conditions. Sexual composition of flowers in the spikes was also studied for all the varieties and types. The Travancore types *Vankodi* and *Karimunda* (Thodupuzha) and the Indonesian type *Palu Lanta* have produced spikes with bisexual flowers only. *Arimulaku*, Nilgiris, *Narayakodi*, *Arikottanadans*, *Kumali*, *Kalluvally I* and *II* and *Balankotta* types *I* and *II* are also types producing over 95 per cent of bisexual flowers. *Chengannur* and *Taliparamba IV* are pure female forms. Maximum number of male flowers are produced in the types *Taliparamba III* and *Kumali*. Setting percentage is maximum in *Arimulaku* and minimum in *Padappan*. The setting of berries in *Chengannur* which is a female form is less than in the female forms of Malabar such as *Uthiramkotta* and *Taliparamba IV*. It is also observed that there is no marked difference in the sexual composition of the flowers in the spikes produced during the normal season and off-season. The varieties *Karimunda I* and *III* produce only bisexual flowers in both the seasons. This is a desirable character in pepper for the proper setting of berries and consequent increase in the yield. Setting is usually low in the off-season, but it depends upon the rain in the season. The morphological characters of the spikes and berries of the different varieties are of great importance. The size of berries, in general, is small in most of the Travancore varieties than that of the popular Malabar

varieties. The *Uthirakotta* variety of Malabar is observed to produce the biggest sized berries followed by *Vally of the Malabar* type. The dry weight of berries is also maximum for these types. Spike shedding is observed to be widely varying between the vines of the same variety. *Arikottanadan, Perumkodi and Kumbakodi* (all Travancore types) have shown the least tendency for the shedding of spikes among the different varieties under study in the varietal collection block at the station. The observations made so far under this item of study have shown that selection of vines exhibiting the least tendency for shedding and multiplication of such vines is one of the possible methods to reduce spike shedding in pepper. The maximum yield is obtained from plots of pepper vines receiving "digging the entire area dug twice in a year" followed by the plots receiving digging round the vines twice a year. It is also observed that the yield is maximum for the vines situated on the 'northern slope' and the yield of the vines on the 'southern slope' is the lowest. For cultivation of pepper 'southern slope' is usually avoided by growers as far as possible. Mortality of the vines is maximum in blocks situated on the southern slope"[1]. The disease known as 'wilt' is seen in many parts of this district. The leaves become yellow and gradually wither away. This destroys the plant itself at a later stage.

(c) Cocoanuts

66. Cannanore district has 9.67 per cent of the total area under cocoanut trees in Kerala. A statement showing the distribution of the area under cocoanut by taluks and production for 1960-61 is given below:—

Statement 21

AREA AND PRODUCTION OF COCOANUTS BY TALUKS

District/Taluk	Area in acres	Production in million nuts
Cannanore District	**119,631**	**311.0**
Cannanore taluk	30,522	79.4
Hosdrug ,,	21,820	56.7
Kasaragod ,,	6,125	15.9
North Wynad ,,	134	0.3
Taliparamba ,,	14,790	38.5
Tellicherry ,,	46,240	120.2

67. A Research Station for cocoanut cultivation was established at Nileshwar in 1916 with the prime object of conducting research on cultural, manurial and other aspects of cocoanut cultivation. The result of the experiments conducted in cultural, manurial research during the period 1959 to 1961 are given below:—

1 Administration Report of the Agricultural Department 1957-58

Statement 22

RESULTS OF CULTURAL, MANURIAL AND OTHER RESEARCHES

	Manurial treatments	Yield per tree per year
1	Ploughing thrice in July, September and November and applying one pound of Potash as Muriate of Potash per tree per year	42.9
2	Ploughing as in (1) and applying two pounds of Muriate of Potash per tree per year	44.1
3	Ploughing five times in July, August, September October and November and applying one pound of Potash as Muriate of Potash per tree per year	43.3
4	Ploughing as in (3) and applying two pounds of Potash as Muriate of Potash per tree per year	45.1
5	Digging once in July-August and raking the soil in October-November and applying one pound of Potash as Muriate of Potash per tree per year	42.0
6	Digging and raking as in (5) and applying two pounds of Potash as Muriate of Potash per tree per year	43.6

The object of the experiments covered by the above table was to find out profitable combinations of manurial and cultural operations. The yield was not satisfactorily significant. However, there was general improvement in the yield indicating that all treatments are effective in increasing the yield, and also in improving the general condition of the trees. The trees receiving ploughing treatment as well as two pounds of potash gave better yield than the trees receiving digging treatment and one pound of potash. In the varietal trials conducted in the Research Station the following varieties were tried. Their yield is also given against them.

Statement 23

VARIETAL TRIALS

	Variety	Yield per tree per year
Exotic		
1	*Fiji*	48.28
2	*Laccadive Ordinary*	74.00
3	*Laccadive Small*	98.44
4	*Laccadive Dwarf*	23.00
5	*Strait Settlement*	29.87
6	*Andaman Ordinary*	41.20
7	*Andaman Giant*	56.00
8	*Andaman Dwarf*	45.25
9	*Philippines*	57.79
10	*New Guinea*	60.00
11	*Cochin China*	66.40
12	*Siam*	37.00
13	*Java*	54.00
14	*Ceylon*	40.25
Indigenous		
1	*Bombay*	55.55
2	*Bengal*	30.00
3	*Godavary*	50.40
4	*Tanjore*	93.00

From the observations recorded in these trials it is seen that out of the exotic varieties the Laccadive Small, Laccadive Ordinary, Cochin China, New Guinea and Philippines are superior to the rest in respect of yield. Among the various indigenous types Tanjore is the best. The important diseases are 'Mahali', leaf rot, yellow leaf and bud rot.

(d) Areca-nut

68. The area under areca-nut or betelnut in the Cannanore district comes to 15.66 per cent of the total area under areca-nut in Kerala. A statement giving the distribution of the area under areca-nuts by taluks is given below:—

Statement 24

North Wynad ,,	...	..
Taliparamba ,,	105	6
Tellicherry ,,	10,243	591

(e) Tobacco

69. The cultivation of tobacco in the district is confined to Kasaragod and Hosdrug taluks. The area under cultivation of tobacco, yield per acre and production in the Kasaragod and Hosdrug taluks are as follows:—

Statement 25

AREA AND PRODUCTION OF TOBACCO BY TALUKS

District/Taluk	Area in acres (Estimates)	Production in tons (Estimates)
Cannanore District	**1,865**	**990**
Hosdrug taluk	1,506	799
Kasaragod ,,	359	191

70. The Tobacco Research Station was established at Pallikara in Hosdrug taluk in November 1958 with the main object of conducting research as to how production of local varieties of tobacco can be enhanced and how far the introduction of Jaffna variety of tobacco will succeed. Allied researches were also conducted. The experiments conducted in the Research station show that the yield of paddy in the sandy regions can be doubled if rotated with tobacco cultivation. Out of the four important local varieties viz, *Pannan*, *Patchathayyar*, *Kuthapidiyan* and *Kunion*, *Pannan* gives the maximum yield.

(f) Bananas including Plantains

71. The distribution of the area under this crop by taluks, yield per acre and production are given in the subjoined statement:—

Statement 26

AREA AND PRODUCTION OF BANANA INCLUDING PLANTAINS FOR 1960-61

A detailed classification of the live-stock in the district as per the 1961 Live-stock Census is given as Appendix 7. Another table giving the taluk-wise figures of agricultural implements is furnished separately (Vide Appendix 8).

Educational Institutions

74. The percentage of literate and educated persons out of the total population of the district is 41.29 against the State average of 46.85. The total number of school-going population comes to 299,904 during the year 1960-61 as against 179,424 in 1950-51 recording an increase of 67.15 per cent. The number of pupils under the different age-groups is as follows:—

The total number of educational institutions other than colleges, both Government and Private has risen from 1,388 in 1950-51 to 1,554 in 1960-61 recording an increase of 166 or 12 per cent during the period. The number of Government institutions has risen from 42 to 445. This abnormal rise is due to the taking over of District Board schools by Government in 1-10-1957. The total number of teachers in 1961 comes to 11,967 against 6, 768 in 1950-51 registering an increase of 76.8? per cent. These include teachers of Government, aided and unaided institutions. There is one teacher for every 25 pupils in 1960-61. In 1950-51 this was 27. The table showing the number of technical schools and polytechnics with the strength of pupils and teachers are furnished separately (Appendix 9).

76. The colleges in the district consist of 3 Arts and Science Colleges, of which 2 are Government and one private college, one Government Training College and one private Sanskrit College. Taking all the colleges together the total number of college-going students has increased from 650 in 1950-51 to 1,578 in 1960-61. The subjoined statement gives number of colleges, students and teachers for the period 1950-51 to 1960-61.

The details of colleges in this district for the academic year 1960-61 are furnished separately (vide Appendix10).

Public Health

77. The inauguration of the first hospital in the district dates back to the 19th century. The total number of public health and medical institutions, hospitals, health centres, doctor's clinics, dispensaries etc. including private institutions of the kind comes to 493 as per the census of houses conducted by the Census Department during the period March to May 1960. According to the Village Directory the data for which was collected about 10 months later the total number of medical institutions comes to 559. This works out to 22 institutions per 100 sq. miles as against a state average of 47 and the highest number of 155 commanded by the Alleppey district. This district stands last compared to other districts. Taking the population at the time of the housing census into account there is one public health institution for every 3,504 persons in the district against the State average of one institution for 2,328 persons and the highest figure of one institution for 1,367 persons in the Kozhikode district. Taking Government institutions alone there are altogether 80 institutions out of which 62 are Allopathic and 18 Ayurvedic. The number of Government institutions per 100 sq. miles comes to about 4. There is a Government institution for every 22,253 persons according to the 1961 Census. The Government institutions mentioned above are classified as follows:—

Besides the above institutions Maternity and Child Welfare Centres have been established at Koothumugham, Uppala, Perdala, Bediyadka, Pallikkara, Pullur, Madikai, Kanhangad, Chayoth, Mattool, Pilicode, Kadannappalli, Mundayad, Aichur, Koodali, Muzhakkunnu, Korombazar, Thirunelli, Chokli, Kodiyeri, Kadachira, East Eleri, Cheruvancheri, Padna, Sankaranellur, West Eleri, Kannadiparamba, Udma and the Armed Reserve line. Each of these centres has at least one midwife. There are four Family Planning Centres attached to three hospitals (viz, Cannanore, Kasaragod and Mananthody) and Primary Health Centre, Payangadi. There are also six Range Health Inspectors who are provided with medicines. The number of institutions and number of persons treated for the period 1951-52 to 1960-61 are given in appendices 11 and 12. During this period while the number of civil hospitals has remained static except for the years 1959-60 and 1960-61 there has been a steady increase in the number of beds which has risen from 303 to 723. In the case of civil dispensaries the number has increased from 5 to 17 and the number of beds from 44 to 122. Details of rural sanitation and anti-adulteration activities are furnished separately (Appendices 13 and 14).

78. While there was no Ayurvedic hospital till 1957-58 two were established in 1958-59 and one in 1960-61. The number of Ayurvedic dispensaries has increased from 5 to 12 between the years 1957-58 and 1960-61. The following statement gives the details of Government Ayurvedic institutions for the year 1960-61:—

Electric Power

80. There is no hydro-electric project in the district. The supply of electricity is solely from Uppatti Generating Station of the Pykara Electricity System arranged as per the agreement with the Madras Government. Kuthumunda receiving station of Kozhikode district is linked with Cannanore sub-station through Mananthody by 66 kv. Single circuit line. There are two receiving sub-stations at Mananthody and Cannanore. The construction work of 110/66 kv. Single Circuit line connecting Cannanore and Kasaragod is in progress. There is also provision to construct an additional 110 kv. Single Circuit line connecting Kozhikode and Cannanore during the Third Five Year Plan.

Communications

(a) Roads

81. In 1801 Dr. Francis Buchanan observed about the condition of roads in Malabar as follows:—"The roads are very bad, as is usually in *Malabar*, and in general are narrow paths on the little banks which separate the rice plots. The State of *Malabar* has always been such, that travellers wished to be at a distance from inclosures, or strange houses, which afforded too many lurking places for the assasin..... The roads are execrable"[1]. The conditions have since changed much. The Pazhassi struggle for independance leading to the construction of the military roads in this district, the Town Improvement Act of 1865 by which municipalities were asked to spend a portion of their expenditure on the construction of drains and roads, the establishment of the Malabar District Board, and the enactment of the Cess Act of 1866, have all contributed to the development of roads in the district from the second half of the 19th century. The main coastal road connecting Beypore and Kanara frontier passing through Tellicherry, Cannanore and Taliparamba, the road connecting Cannanore Fort and Coorg, via. Mattanur,Ulleyil, Kannoth and Perambady Pass, the road to Mysore passing through Kuthuparamba, Kannoth, Peria, Mananthody and Periya Ghat are some of the more important roads. The subjoined statement gives a classification and the present length of roads.:—

A polymetric table of road distances is given in Appendix 15.

(b) Railways

82. The construction of the railway line from Badagara to Mangalore which was started in 1902 was completed in the course of five years. At present the railway line passes through all the taluks of the district except North Wynad and runs parallel to the sea shore, the maximum distance from the sea being hardly two miles. Passing through the green paddy fields, perennial streams, thick growing arecanut and cocoanut palms across and occasionally through the sea shore, the journey along this line is highly refreshing. A table showing the facilities available at the various railway stations are given in Appendix 16.

(c) Canals

83. Besides the navigation through the rivers already referred to in the previous portions. there is a canal system in the district which runs from Hosdrug to Nileshwar, from Nileshwar to Payyannur, from Payyannur to Palayangady and from Palayangadi to Athirangam covering a total distance of 34 miles. From Athirangam to Badagara there is no canal system. The West Coast canal which starts from Trivandrum ends at Badagara. But for the break between Athirangam and Badagara the West Coast canal would have continued upto Hosdrug.

(d) Ports

84. Tellicherry, Cannanore, Azhikkal and Kasaragod are the ports of Cannanore district.

(i) Port of Tellicherry

Tellicherry was East India Company's first regular settlement on the Malabar coast. The site was fixed as the most favourable one from which the company could command pepper from Kottayan and Kolathiri Raja's dominions. The Port of Tellicherry is located in north latitude 11° 45′ and east longitude 75° 29′. It is protected by natural backwater of rocks in consequence of which during the greater part of the year the Port is sheltered from prevailing winds and swells. The port is open to foreign trade. The Koduvally and Anjarakandy rivers form an estuary and enter the sea about 1¼ miles to the north of the Port and this entrance has the usual sand bar and is about 2 feet deep at low tide. Sailing vessels enter these places for shipment of timber and cocoanuts. The strengthening of the pier at the port and providing electric cranes on the pier are the schemes under the Second Five Year Plan for the port.

(ii) Port of Cannanore

Cannanore was described by the first European who saw it as the 'large town of the thatched houses inside a bay'. The port is located in north latitude 11° 51′ and east longitude 75° 24′. It offers good facilities for shipping and discharge of cargo as there is no bar and good shelter to sailing vessels. The port is open to foreign trade. There is no backwater communication. The landing and shipping operations are conducted by means of native boats.

(iii) Port of Azhikkal

The port is situated at the mouth of the Baliapatam river and is located in north latitude 11° 56 1/2′ and east longitude 75° 17½′. The port is connected by backwater reaching up to Nileshwar in the north. It is a tidal port with bar and channel, the bar maintaining a depth of 5½ to 6 feet at low tide. The Port is declared open for foreign traffic but at present is confined only to coastal trade in sailing vessels as steamers have not begun to call at the Port. Owing to the rough and dangerous condition of the bar the port is closed for traffic during the south-west monsoon. Azhikkal is the next biggest timber basin to Kallayi. The purchase of a sea-going tug for tonnage purpose and the construction of a jetty for landing and shipping operations and also formation of road and wharves are the schemes under the Second Five Year Plan.

(iv) Port of Kasaragod

The Port is situated between north latitude 12° 29′ and east longitude 75° 00′ on the eastern bank of the backwater formed by the Chandragiri river which is separated from the sea by a sand spit about 1 mile in length and about one furlong in breadth. It is a tidal one and is closed for shipping during the south-west monsoon period. Steamers do not call at the Port. The traffic is only in sailing vessels. Schooners and other big sailing vessels anchor outside the bar.

(e) Postal

85. Most of the villages have post offices. As on 31st March 1961 there are 357 post offices. An alphabetical list of places having post offices is given separately in Appendix 17.

(f) Telegraphs

86 There are altogether 38 telegraph offices in this district. The names of places where they are located along with the year of opening are given below:—

** Source:—Director of Posts and Telegraphs, Kerala

The long distance public call offices at Panamaram and Manjeshwar are attached to Kalpetta and Mangalore exchanges respectively. Action is being taken to start a Telephone Exchange at Mananthody. A table showing the number of direct and extension connections provided during the period 1950-51 to 1960-61 is given separately in Appendix 18.

Industries

88. According to the Housing Census conducted by the Census Department during March to May 1960 out of 58,365 industrial establishments in Kerala 7,262 are situated in the Cannanore district. This comes to 12.4 per cent of the total number of industrial establishments in the State. Taking the volume of employment, out of 394,787 workers employed in the industrial establishments of Kerala 46,559 are in the Cannanore district. The proportion works out to 11.79 per cent of the employment in the State. The distribution of industrial establishments among the various taluks of the district is given in the subjoined statement.

Cannanore taluk occupies the first rank in respect of the concentration of industries while Tellicherry comes second and North Wynad comes last. In the order of the number of industrial establishments, textiles, tobacco, food-stuffs and chemicals are the more important ones.

(a) Textiles

89. 38.76 per cent of the total number of industrial establishments fall in the textile industry. The following statement gives the classification of this industry by the number of industrial establishments under different types of work and the volume of employment in each for the Cannanore district:—

Statement 41

CLASSIFICATION OF TEXTILE INDUSTRY BY TYPE OF WORK AND VOLUME OF EMPLOYMENT

Classification	No. of Industrial establishments	Volume of employment
Cotton spinning by charka	14	279
Cotton spinning in mills	6	1,874
Cotton dyeing and bleaching	11	137

(b) Tobacco

90. The next important industry in the district is the manufacture of tobacco products viz, beedi, snuff and cigar. According to the Housing Census there are 1,166 industrial establishments in the district solely engaged in the production of beedi, cigar and snuff. More than 60 per cent of these are situated mostly in the urban areas of the Cannanore taluk. The total number of registered factories under this category is 18, the volume of their employment being 542 persons. The distribution of the industrial establishments dealing with tobacco products in the various taluks is given below:—

Statement 44

(c) Foodstuffs and Beverages

91. Under this category come rice mills, production of copra, processing of cashewnuts, bakery, oil mills and processing of coffee and tea. The rice mills are situated mostly in all the taluks except Hosdrug. There are six registered factories in this group. The production of copra and oil mills is concentrated in the Hosdrug, Taliparamba, Cannanore and Tellicherry taluks. The distribution of the industrial establishments in this category is given in the subjoined statement:—

(d) Chemicals

92. Extraction of lemongrass oil and production of Ayurvedic medicines constitute the two chief industries in this group. Lemongrass is luxuriant in North Wynad, Tellicherry, Hosdrug and Taliparamba taluks. This industry is an important dollar earning one employing more than 700 persons. The distribution of the industrial establishments under this category among the taluks of the district is given below:—

The Ayurvedic industry is scattered throughout the State mostly depending upon the Ayurvedic physicians. The other industries worth mentioning consist of manufacture of matches, tiles, China-ware crockery and automobile engineering. The manufacture of China-ware is greatly facilitated by the abundance of China-clay in the taluks of Taliparamba, Cannanore, and Hosdrug. Bell-metal utensils, tin-cans, coppes vessels and black smithy also deserve mention. Tables showing the taluk-wise distribution of industrial establishments according to the size of employment is given below:—

The particulars of the number of factories and workshops classified by industry, power and non-power and size of employment is given in the E-III table. The number of industrial establishments in each village of the district is given in the Village Directory. Separate tables giving the annual average earnings of workers in tile, timber, matches, plantations, engineering, press, cashew and motor transport industries are furnished in Appendix 19.

Registered Factories

93. Cannanore district has 367 registered factories during the year ending 30th June 1961. The classification of these registered factories showing the maximum capacity of employment is furnished below:—

Out of 15 factories in North Wynad taluk 14 are tea-factories. About 70 per cent of the registered factories are engaged in handloom-weaving of one type or another. A table showing the important centres of handicrafts with the materials used and particulars of products is furnished in Appendix 20.

Strikes and Lockouts

94. Two statements, one showing the number of industrial disputes resulting in work stoppages for the period 1957 to 1960 and another showing the number of industrial disputes resulting in work stoppages by causes for the period 1957 to 1960 are given in Appendices 21 and 22.

Trade

95. The total value of exports and imports in relation to the two important ports of Cannanore and Tellicherry for 1951-52 to 1959-60 is given below:—

Detailed tables relating to the period 1951-52 to 1960-61 in respect of the number and tonnage of vessels and for the period 1951-52 to 1959-60 in respect of the imports and exports are given separately in Appendices 23, 24 and 25.

Fisheries

96. The important fishing centres of the district are Madayi, Tellicherry, Hosdrug, Cannanore and Kumbla. There are Government fish curing yards at Manjeshwar, Kumbla, Adkathbail, Kizhur, Bekel, Hosdrug, Poonjavi, Thaikadapuram, Palacode, Madayi, Mattool, Azhikode, Cannanore, Edakkad, Tellicherry and Thalai. There is also a fish farm at Nileshwar. Several varieties of fish, both indigenous and exotic, are reared here. A survey conducted on fishermen's assets and liabilties in 1957-58 reveals the following:—

The achievements under all the blocks together as for the period 1956-57 to 1960-61 are given separately (vide Appendix 26).

Revenue

98. Statements of the following items of revenue have been given in Appendices 27 to 31.

1 Receipts under excise revenue for the period 1950-51 to 1960-61

2 Salestax revenue for 1950-51 to 1959-60

3 Agricultural incometax and supertax for the period 1958-59 to 1960-61

4 Incidence of land revenue assessment for the period 1950-51 to 1960-61

5 Receipts under entertainment tax for the period 1950-51 to 1960-61

The excise revenue for the district has increased from Rs. 36,142 in 1950-51 to Rs. 45,009 in 1960-61, while the salestax has fallen from Rs. 2,780,000 in 1950-51 to Rs. 2,455,000 in 1959-60. The entertainment tax has fallen from Rs. 83 lakhs in 1950-51 to approximately Rs. 54 lakhs in 1960-61. The agricultural income tax and super tax has risen from Rs. 417,807.77 in 1958-59 to Rs. 1,408,785.23 in 1960-61. The land revenue assessed on fully assessed area has risen from Rs. 1,601,438.15 in 1950-51 to Rs. 2,161,241.17 in 1960-61. The land revenue per head of population has risen from Rs. 1.1 in 1950-51 to Rs. 1.5 in 1960-61. The incidence of land revenue on fully assessed area has risen from Rs. 1.7 in 1950-51 to Rs. 2.1 in 1960-61 taking the total area into account but has fallen from Rs. 2.4 in 1950-51 to Rs. 2.3 in 1960-61 taking the cultivated area alone into account. The land revenue assessed on cultivated area has increased from Rs. 1,151,095.96 in 1950-51 to Rs. 1,536,135.73 in 1960-61.

Local Self Government

99. Local Self Government in Malabar consisted of Municipalities to look after the affairs of the Municipal towns, District Board, Taluk Boards and Panchayats to look after the affairs of the area outside the municipal towns.

(a) Municipalities

100. The Town Improvement Act of 1865 enacted by the Madras Government was the first statute establishing municipalities on a statutory basis. Prior to the enactment of this statute the municipalities were nothing but voluntary bodies having no statutory basis. In accordance with the Act of 1865 the Tellicherry Municipality was started on 1st November 1866 and the Cannanore Municipality on 24th June 1867. The Sultan Ali Raja of Cannanore who was enjoying the right to collect the rent on the 'Kirar' lands is seen to have objected to the declaration of the area covered by this right as a municipal area and this objection was over-ruled by the Madras Government on 21st June 1873. For a long time the District

Collector was the President of all the municipalities of the district. The Vice-President was expected to look after the routine affairs of the municipality. In 1884 the District Municipalities Act was passed by the Madras Government which provided for an elected Vice-President and the election of the three-fourths of the members of the council by tax-payers. But the Government still retained the powers of removing the President,Vice-President or a councillor at any time. In 1897 the Act was amended to enable the appointment of an executive officer to look after the affairs of the municipality. The Acts of 1920 and 1930 which followed contributed to the further democratisation of the municipal administration. The system of nomination was abolished and reservation of seats to minority communities was introduced. In 1933 the appointment of paid Municipal Commissioners was enabled by the Act XV of 1933. The Adult Franchise which was introduced in 1938 made the municipalities full-fledged democratic institutions. The Kerala Municipalities Act, 1960 which was brought into force on Ist September 1961 now governs the municipalities of this district also. The number of municipalities, however, in the district has not increased since 1867 and remains at two. The income and expenditure of Cannanore and Tellicherry Municipalities for the period 1955-56 to 1960-61 are furnished separately (Appendices 32 and 33).

(b) District Board

101. A District Board was established for the entire Malabar District in 1859 with the main object of promoting primary education in the rural areas. In 1863 it was empowered to collect an Education Cess. By the Road Cess Act of 1866 it was entrusted with the maintenance of bad roads etc. In 1871 the constitution of the Board was placed on a par with that of the municipalities with the Collector as the President and three nominated members, the Collector being the supreme executive authority. Various legislations were passed gradually improving the status of the District Boards and clothing them with more powers. The Acts of 1884, 1920, and 1930 deserve mention in this connection. The second of this series provided for the election of two-thirds of the members by adult franchise who have attained the age of 25 and also by those who were assessed to land revenue or annual rental value or professional tax of Rs. 10. The franchise was further extended in 1930 and the reservation of seats was provided for minority communities. In 1957 all the educational institutions, hospitals and dispensaries as also major roads under the District Board were taken over by Government. The term of the District Board was terminated on 27th October 1957. The Malabar District Board ceases to exist with the coming into force of the Kerala Panchayat Act of 1960.

(c) Panchayats

102. The Panchayat formed another important link in the Local Self Government. The origin of Panchayats in this district as in other parts of Malabar is comparatively recent dating back to the early decades of the 20th century. The number was extremely few at the time of the re-organisation of the States. Subsequent to the formation of Kerala State the number of Panchayats was increased considerably with the target of covering the entire district by panchayats. As on 1st March 1961 there were 197 panchayats in the district. These panchayats enjoyed the powers of local administration including the maintenance of village roads, sanitation, street lighting, construction of roads other than those under the P.W.D., construction of drains and disposal of drainage water, sinking and repairing of wells, provision of public latrines, prevention of epidemics, control of offensive and dangerous drugs, construction and maintenance of petty irrigation and control of cattle pounds. As on 1st March 1961 the position is that a new Panchayat Bill called the Kerala Panchayat Bill 1960 enhancing the powers of panchayat has been passed by the legislature and was pending enactment into law. Similarly, a fresh de-limitation of the panchayats was also in contemplation. The total income of all the panchayats in the district comes to Rs. 1,425,889.42 in 1960-61 as against Rs. 342,766.59 in 1955-56. The expenditure in all the Panchayats together has risen from Rs. 315,000 in 1955-56 to Rs. 804,000 in 1960-61. The detailed classification of income and expenditure for the period 1955-56 to 1960-61 is given separately. (Appendices 34 and 35).

In all the years from 1950-51 to 1957-58 there has been no convict under 16 years. But in the years 1958-59, 1959-60 and 1960-61 there were 221, 103, and 12 convicts respectively in this age-group. In the age-groups of 21 to 29, and 40 to 59 also the largest number of convicts were in 1959-60. In the age-group of 60 and above 1952-53 has the largest number. In respect of the literate convicts 1959-60 is the peak year with 4,997 male convicts and 94 female convicts. It is also the peak year in respect of the illiterate male convicts. A table showing the nature and the length of the sentences of convictions is given in Appendix 36. Another table showing the number of police stations, strength of police etc., is given in Appendix 37.

Printing Presses and Periodicals

107. The number of printing presses in the district has increased from 30 to 46 during the period 1950 to 61. There are two dailies and three weeklies in the district. A detailed statement in respect of these items is given in Appendix 39.

Entertainments

108. The particulars regarding the cinema theatres, films exhibited, the number of shows and the number of tickets issued from 1950-51 to 1960-61 for the Municipalities of Cannanore and Tellicherry are given in Appendix 40.

Employment Exchange Activities

109. The employment exchange activities for the period 1958-59 to 1960-61 are furnished in Appendix 41.

Important Events

110. A statement giving the list of important events by taluks is given in Appendix 42.

Occupied Houses and Households

111. Occupied residential houses of Cannanore district have recorded an increase of 83.59 per cent during 1921-61 against the Kerala State increase of 93.10 per cent. The following statement gives the growth of occupied houses from 1921-1961 for Cannanore district by rural urban distribution:—

Statement 61

VARIATION OF OCCUPIED CENSUS HOUSES

Census Year	Total		Rural		Urban	
	Number	Percentage decade variation	Number	Percentage decade variation	Number	Percentage decade variation
1921	151,724	..	142,931	..	8,793	..
1931	171,801	13.23	162,141	13.44	9,660	9.86
1941	192,959	12.32	181,449	11.91	11,510	19.15
1951	212,148	9.94	195,318	7.64	16,830	46.22
1961	278,556	31.30	237,691	21.69	40,865	142.81

The increase during the present decade (i.e. 1951-61) is more than three times the growth rate recorded in the previous decade. The conversion of more rural areas into urban areas according to the new definitions of towns in the 1961 Census accounts for the high percentage decade variation of houses in the urban areas for 1951-61. Taliparamba, North Wynad, Hosdrug and Tellicherry taluks record higher increases of occupied houses during 1951-61, when compared to other taluks of the district.

112. The density of occupied houses in the rural areas showed an increase from 9,023 in 1951 to 11,232 in 1961 per 100 sq. miles. In the urban areas the density of occupied Census houses per sq. mile has come down to 544 in 1961 against 632 in 1951.

113. The subjoined statement gives the number of persons per 1,000 occupied census houses in the Cannanore district by rural and urban areas for the five censuses.

Growth of Population

120. The population of Cannanore district according to the 1961 Census is 1,780,294. This records an increase of 126.11 per cent since 1901. The following statement sets out the population and percentage decade variation for seven Censuses:—

Statement 71

VARIATION IN POPULATION

Census Year	Population	Percentage decade variation
1901	787,352	..
1911	841,782	+ 6.91
1921	865,447	+ 2.81
1931	997,057	+ 15.21
1941	1,123,054	+ 12.64
1951	1,375,081	+ 22.44
1961	1,780,294	+ 29.47

Cannanore district ranks fourth in the State in respect of the rate of growth during the decade, the hi hest being Quilon district with 31.70 per cent and lowest being the Palghat district with only 13.51 per cent. The following statement shows the comparitive figures of the rate of growth of Cannanore district and the neighbouring districts of Kerala and Mysore States:—

Statement 72

RATE OF POPULATION GROWTH COMPARED WITH ADJACENT DISTRICTS

District	Rate of growth		Average annual growth rate
	1901-61	1951-61	1901-61
Cannanore	126.11	29.47	2.1
Coorg	78.75	40.72	1.3
Kozhikode	127.19	26.72	2.1
South Kanara	74.07	17.50	1.2

The above statement shows that the district of Cannanore has a comparatively higher average annual growth rate during the period 1901-61 than the neighbouring districts of the Mysore State.

121. Coming to the rate of growth in the six taluks of this district, North Wynad taluk has an abnormal increase in population since 1921, the percentage being 202.32. This taluk also leads the district in respect of decade variation for 1951-61 with 51.39 per cent. This increase of population should be partly attributed to the formation of a new taluk, 'North Wynad', with Mananthody as headquarters in 1957 and the immigration of a large number of agriculturists from North Travancore to this taluk for the cultivation of extensive areas of private forests. The subjoined statement gives the taluk-wise decennial growth rate during 1951-61 and percentage increase of population since 1921 Census:—

Statement 73

TALUK-WISE GROWTH RATE OF POPULATION

Taluk	Decennial growth rate 1951-61	Percentage increase since 1921
Cannanore	20.94	86.75
Hosdrug	28.94	106.27
Kasaragod	20.98	93.54
North Wynad	51.39	202.32
Taliparamba	47.22	127.33
Tellicherry	28.68	104.74

All the taluks of this district except Cannanore and Kasaragod show higher population growth rates than that of the State increase of 24.76 per cent during the last decade.

122. The following statement gives the rural-urban population and their decade growth rates during 1901-61 in the Cannanore district:—

1961	1,480,177	+ 18.36	300,117	+ 141.09

The high percentage decade variation in the urban areas during 1951-61 is mainly due to the increase in the number of towns from 4 in 1951 to 18 in 1961.

Population by Taluks

123. Cannanore district's population of 1.78 million is spread over six taluks which comes to 10.53 per cent of Kerala State. The statement below sets out the population of Cannanore district by taluks and by percentages for 1961:—

Statement 75

Tellicherry ,,	475,589	229,283	246,306	26.72	26.22	27.20

Tellicherry taluk is the most populous taluk in the district and North Wynad the least. Taliparamba, Cannanore and Tellicherry taluks have population above the average population of a taluk in the district. The Cannanore and Tellicherry taluks taken together take about half of the total population of the district. These two taluks, from very early times, have been more industrially advanced than the rest. Since a major portion of North Wynad taluk is covered by thick forests and plantations it has a population of only less than one lakh.

Population by Rural-Urban Distribution

124. 83.14 per cent of the total population of the district have been returned as rural. Thus for every person in the urban area there are about five persons in the rural area. The following statement shows the distribution of the number of persons per 10,000 population for rural and urban areas for Cannanore district for seven Censuses.

Statement 76

Tellicherry ,,	48	1	430,826	29.11	3.00	44,763	14.91	1.75

Cannanore district has the largest number of towns even though she ranks fifth in Kerala in respect of urban population. All the towns of the district are distributed among the classes III, IV, V and VI.

Population by Natural Regions

126. For purposes of this analysis the natural regions consist of lowland, midland and highland. The lowland takes in villages and towns the major portion of which lie approximately 25 feet or less above the mean sea level. The midland consists of villages and towns the major portion of which lie between 25 feet and 250 feet above the mean sea level. The rest of the area constitutes the highland region. 61 per cent of the total population of the district live in the midland region while 21 and 18 per cent live in the highland and lowland regions respectively. The following statement sets out the actual population and their percentages in the different regions of the district by taluks:—

Statement 78

Tellicherry ,,	62,308	16.67	413,281	37.98	..	..

All the villages of North Wynad taluk lie in the highland region. Even though Kasaragod and Tellicherry taluks have sea-coasts the villages of these taluks unlike most of the coastal villages in the State, fall either in the highland or midland division as the major portion of these villages are above 25 feet above th mean sea level.

127. There is no town in the highland region. The North Wynad taluk has no urban area. The taluk-wise distribution of the midland and lowland regions of the remaining five taluks is given below:—

All the towns of the Hosdrug taluk and majority of the towns of the Cannanore taluk are confined to the lowland region. The towns of Kasaragod, Taliparamba and Tellicherry taluks are situated in the midland region.

Population Density

128. The number of persons per sq. mile of Cannanore district has more than doubled in 1961, when compared to 1901, the figures being 359 in 1901 and 812 in 1961. The following statement gives the population density for the last five censuses. The most spectacular increase in population density during 1921-61 is that of North Wynad taluk which has gone up from 103 to 313 though the density in itself is very low.

* No urban area

The midland and lowland regions of Cannanore taluk stand unique in regard to the density of total and rural population among the different taluks of the district. The above figures show that the towns of the midland region have the highest number of persons per sq. mile. It is worthwhile to analyse the reasons for the high and low population densities in rural and urban areas of the district.

A. Rural Areas

(i) Highland region

130. In the highland region of the Cannanore district there are altogether 52 villages. These rural villages may be classified into five density ranges as shown below:—

Statement 82

CLASSIFICATION OF RURAL HIGHLAND VILLAGES BY DENSITY RANGES

Density range per sq. mile	Number of revenue villages (Rural)
Total	**52**
Less than 250 persons	5
250-499 persons	27
500-749 persons	16
750-999 persons	2
1000 and above persons	2

About 83 per cent of the villages in the highland region lie in the density range 250 to 749. Five villages (Panathady, Maloth, Tondernad, Periya and Tirunelly) have a density of less than 250. Of these five, the last four villages form a class by themselves. They have a density of less than 150 and possess some important characteristics. Periya (24.12 sq. miles), the least populous village in North Wynad taluk is bounded on the north and north-east by the unsurveyed forests of the Tellicherry taluk. A major portion of this village has dense forests and jungles known as Periya Reserve forest. These reasons account for the low density of 126 persons per sq. mile. Tirunelly, the second least populous village of the same taluk extends to an area of 77.44 sq. miles. The high and difficult terrain, proximity to thick forests and inadequate communication facilities contribute to the low density of 131 of this village. Similiar reasons are applicable to the remaining three villages also. The villages of Manathana and Aralam cross the population density of 1,000 persons per sq. mile. Manathana is an important place in Tellicherry taluk. Six miles from Manathana is the important pilgrim centre, Kottiyur-Tricharamanna Temple. Aralam on the other hand is a comparatively developed

area having one high school, five middle schools, seven primary schools, a post office and a maternity child welfare centre besides four temples, eight churches and three mosques. Manathana and Aralam villages record a remarkable increase in population during the decade 1951-61 by 220 and 104 percentages respectively.

(ii) Midland region

131. The villages of the midland region give a different picture. Majority of the villages have comparatively better population densities and these 166 villages are classified by the following density ranges.

Statement 83

CLASSIFICATION OF RURAL MIDLAND VILLAGES BY DENSITY RANGES

Density range per sq. mile	Number of revenue villages (Rural)
Total	**166**
Less than 500 persons	15
500—999 ,,	71
1,000—1,499 ,,	21
1,500—1,999 ,,	21
2,000—2,499 ,,	21
2,500—2,999 ,,	4
3,000—3,499 ,,	5
3,500—3,999 ,,	4
4,000 and above ,,	4

Four villages (Puzhathi, Kallayi, Eranholi and Kodiyeri) exceed population density range of 4,000 persons and above per sq. mile. A major portion of Puzhathi village lies within the Cannanore Municipal town. Similarly a portion of Kallayi village forms part of Tellicherry Municipal town. Eranholi and Kodiyeri are the sub-urban villages of Tellicherry Municipal town. This accounts for the high density of these villages.

(iii) Lowland region

132. Except Ramantali, Udanur and Muzhappilangad all the remaining 14 lowland villages of Cannanore district lie in the density range, 1,000 to 2,999. Villages classified by density ranges are given hereunder:—

Statement 84

CLASSIFICATION OF RURAL LOWLAND VILLAGES BY DENSITY RANGES

Density ranges per sq. mile	Number of revenue villages (Rural)
Total	**17**
Less than 1,000 persons	2
1,000—1,999 ,,	7
2,000—2,999 ,,	7
3,000—and above ,,	1

Ramantali village, which has the lowest population density of 897 is situated on the sea board about fifteen miles north of Cannanore. Udenur village with an area of 4.85 sq. miles has 925 persons per sq. mile. Muzhappilangad, the most populous village in the lowland region of the district, is situated in between the only two Municipal towns of the Cannanore district viz, Cannanore and Tellicherry. It is nearer to Tellicherry Municipal town, the distance being hardly five miles and it bears all the sub-urban characteristics. This accounts for the high density of population.

B. Urban Areas

133. There is no town in the highland region of the district. The towns along with their population densities classified by natural regions are given below in the ascending order of density.

Statement 85

POPULATION DENSITY OF TOWNS BY NATURAL REGIONS

Midland		Lowland	
Town	Number of persons per sq. mile	Town	Number of persons per sq. mile

Chalad	6,349	Baliapatam	7,273
Tellicherry (Municipal)	14,871	Cannanore (Municipal)	11,029

Except two towns all the towns of Cannanore district have a population density of above 2,000.

Sex-ratio

134. The sex-ratio (number of females per 1,000 males) for Cannanore district presents sharp contrasts. Starting with a ratio of 1,050 in 1901 it had increased by 36 females per 1,000 males in 1921. But, from 1931 onwards, it showed a declining trend with an exception in 1941. The present figure shows a marked drop of 15 females per 1,000 males since 1901. The following statement sets out the sex-ratios for the last seven Censuses:—

Statement 86

SEX-RATIO 1901-1961

Year	Total	Rural	Urban
1901	1,050	1,051	1,035
1911	1,061	1,063	1,036

1951	1,057	1,057	1,053
1961	1,035	1,041	1,010

135. A comparison of the proportion of females per 1,000 males for 1951 and 1961 in the various taluks of Cannanore district shows that during this decade Taliparamba taluk records a steep fall followed by Cannanore taluk, Tellicherry taluk registers a small decrease and North Wynad taluk a larger increase. The statement given below illustrates the above:—

The above statement speaks for itself. The rural areas may further be analysed at the village level. The highland villages have a smaller number of females than males. Seven villages out of fifty-two villages in the highland region had shown a deviation from this phenomenon. They are Mugu (1,004), Katukukke (1,001), and Ubrangala (1,007) villages of Kasaragod taluk, Alappadamba (1,094), Peringome (1,024), and Kuttur (1,009) villages of Taliparamba taluk and Muzhakkunnu (1,006) village of Tellicherry taluk. The smallest number of females is in the Anchukunnu village of North Wynad taluk, the sex-ratio being only 889. A glance at the figures relating to the midland villages disclose a different picture. Out of the 166 villages only 27 have less of females than males. They are Kaliyur (967), Koliyur (954), Talekala (941), Paivalike (959), Bayar (955), Badur (936), Ichlampadi (991), Patla (866), Shiribagil (947), Muttathody (964), Padi (998), Muliyur (944) and Chengala (941), villages of Kasaragod taluk; Periye (993), Kinanur (956) and Kayyur (975) villages of Hosdrug taluk; Kurumathur (979), Sreekantapuram (978), Kuttiattur (985), Irikkur (935), Kalliad (990) and Padiyur (919) villages of Taliparamba taluk; Narath village (999) of Cannanore taluk and Sivapuram (996), Keezhur (986), Payam (907) and Kolayad (998) villages of Tellicherry taluk; Uppala (1,225), Heroor (1,218), Ichilangode (1,217) and Shiriya (1,335) villages of Kasaragod taluk; Kallayi (1,250), Kodiyeri, (1,202), Olavilam (1,303), Menaprom (1,234) Panniyannur (1,219), Kariyad (1,340), Peringalam (1,285), Pannoor (1,231) and Trippangottur (1,218) villages of Tellicherry taluk have above, 1,200 females per 1,000 males. Females outnumber males in all the villages of the lowland region, the largest sex-ratio being in the South Trikaripur village which has 1,202 females per 1,000 males. The following statement shows the sex-ratio by natural regions in the urban areas:—

Statement 89

SEX-RATIO OF TOWNS BY NATURAL REGIONS

Midland		Lowland	
Town	Sex-ratio	Town	Sex-ratio
Taliparamba	966	Puzhathi (Chirakkal)	908
Puzhathi	988	Cannanore Cantonment	923
Kumbla	1,003	Baliapatam	966
Chalad	1,023	Azhikode	984

Chovva	1,062	Kanhangad	1,017
Manjeshwar	1,067	Nileshwar	1,060

While the majority of towns in the midland region have preponderance of females over males the majority of towns in the lowland region hold the just contrary position.

137. Sex-ratios by age-groups also require keen study. In the age-group below 15 there are less girls than boys. But in the reproductive age-group 15-44, females exceed males by 101 females for every 1,000 males. The females per 1,000 males in the age-group 45-59 comes to 1,039, while the number in age-group 60 and over slightly goes up to 1,060. The following statement illustrates the sex-ratio at different age-groups for Cannanore district:—

The above figures show the preponderance of females over males in the second category of workers i.e., agricultural labourers in all the taluks except that of North Wynad. All the taluks of Cannanore district have higher proportion of females in the category of Non-workers. Hosdrug taluk stands unique in the category of Household Industry. Low sex-ratios are recorded in the workers categories of Manufacturing other than Household Industry, in Construction, in Trade and Commerce and in Transport.

Cannanore taluk leads in the percentage of male literacy in 1961, followed by Tellicherry taluk while Kasaragod taluk comes last. In the percentage of female literacy Tellicherry taluk leads followed by Cannanore taluk while Hosdrug taluk comes last. The progress in the rate of male literacy during 1951-61 has been highest in Taliparamba taluk and lowest in Tellicherry taluk. In the case of female literacy the progress has been highest in North Wynad taluk and lowest in Cannanore taluk.

Literacy in Rural and Urban Areas

146. The rural percentage literacy for Cannanore district for 1961 stood at 39.47 against the urban percentage of 50.27. The following statement sets out the rural-urban literacy rates by taluks for 1961:—

Statement 100

RURAL-URBAN LITERACY BY SEX, 1961

Tellicherry ,,	47.24	60.19	57.69	67.58	37.53	53.11

The literacy rates in urban areas are much higher than in rural areas. Kasaragod and Hosdrug taluks are at the tail ends in regard to total as well as male and female literacy in rural areas. In the urban area also, the above two taluks stand last in respect of total and male literacy while the taluks of Taliparamba and Hosdrug have low female literacy rates.

A. Rural Areas

147. The rural villages may be further classified into highland, midland and lowland. The sub-joined statement gives the number of villages under six literacy ranges and by natural regions in each taluk.

More than 70 per cent of the villages cross the literacy rate of 30 per cent. Twenty-two villages have a literacy rate of 50 per cent and above and all of them lie in the midland region of Cannanore, Taliparamba and Tellicherry taluks. Three villages have literacy rates of above 60 per cent. They are Puzhathi village (66.55 per cent) of Cannanore taluk and Eranholi (65.74) and Thiruvangad (63.63) villages of Tellicherry taluk. Proximity to municipal towns and availability of educational facilties have contributed to the high literacy rate in these villages. There are 12 villages (4 in the highland and 8 in the midland) having low literacy rates of less than 20 per cent and distributed between Kasaragod and Hosdrug taluks. The following are the low literacy villages:—

Literacy by Age, Sex and Education

(a) Illiterates

151. There are 1,045,256 illiterates in this district of whom 420,178 are males. The number of illiterates under age-group 0-4 is 263,311 and this equals the total population under the same age-group.

(b) Literates

152. Literates by educational levels can be broadly classified as follows:—

Statement 110

LITERATES BY EDUCATIONAL LEVEL AND EFFECTIVE RATE OF LITERACY

Educational level	Persons	Percentage to total literates	Percentage to total population under age-group 5 and above
Total literates	**735,038**	**100.00**	**48.45**
Literates (without educational level)	494,780	67.31	32.61
Primary or Junior Basic	208,122	28.32	13.72
Matriculation and above	32,136	4.37	2.12

Only 4 per cent of the literates have passed the literacy mark of 'Matriculation and above'. Excluding the age-group 0-4 from the total population, the effective literacy rate for the total is 48.45 per cent. The corresponding rates for males and females are furnished below:—

Statement 111

EFFECTIVE RATES OF LITERACY BY SEX

Educational level	Percentage of male literates to male population under age group 5 and above	Percentage of female literates to female population under age group 5 and above
Total literates	**61.28**	**35.19**
Literates (without educational level)	41.09	24.51
Primary or Junior Basic	16.84	10.74
Matriculation and above	3.35	0.94

It is seen from the above statement that only 9 out of every 1,000 females have passed the matriculation or above in this district.

Languages

153. Malayalam is the dominant mother-tongue in Cannanore district. Kannada is spoken especially in the two northern taluks viz, Kasaragod and Hosdrug. The following are the figures for the first ten languages:—

Statement 112

Workers and Non-workers

155. In the earlier Indian Censuses, or atleast, at the last few Censuses, income or economic independence was recognised as the criterion for measuring the economy of the country. Account was made of all persons who were economically independent and of all those who were economically dependent. An intermediate category of economic semi-dependence was also introduced from the 1931 Census onwards. This category was called 'working dependent' in the 1931 Census, 'partly dependent' in 1941 and 'earning dependent' in 1951 and even here an element of income was introduced. It was felt that that the strict application of the criterion of income or economic independence suppressed those who worked in family economic activities but did not actually earn an income like men other than the head of the household and women of the family or children working at cultivation or cottage industries of the household. In the 1961 Census, therefore, stress has been laid on work so that all people who work including family workers who are not in receipt of any income or working children who cannot earn enough work for their maintenance are also reckoned as workers. Work includes not only actual work but also effective supervision and direction of work. In the 1951 Census population was divided into eight livelihood classes. In this Census instead of the eight livelihood classes of 1951 workers are grouped under nine industrial categories as follows:—

I Working as cultivator,
II Working as Agricultural Labourer,
III Working in Mining, Quarrying, Live-stock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities,
IV Working at Household Industry,
V Working in Manufacturing other than Household Industry,
VI Working in Construction,
VII Working in Trade and Commerce,
VIII Working in Transport, Storage and Communications, and
IX Working in other Services.

Only 35 per cent of the population in the district constitute workers. The following statement gives the distribution of every thousand persons in a taluk into workers and non-workers by sex:—

Statement 114

157. The Industrial categories may be broadly classified into the following sectors of industry:—

i Primary sector—Industrial categories I, II and III

ii Secondary sector—Industrial categories IV, V and VI

iii Tertiary sector—Industrial categories VII, VIII and IX

Based on the above classification Cannanore district has 48 per cent of workers under the Primary, 18 per cent under the Secondary and 34 per cent under the Tertiary sectors. The following statement gives the distribution of workers in the various taluks by industrial sectors and sex:—

Statement 116

DISTRIBUTION OF 1,000 WORKERS IN EACH TALUK BY SECTORS OF INDUSTRY AND SEX

Taluk	Primary			Secondary			Tertiary		
	Persons	Males	Females	Persons	Males	Females	Persons	Males	Females
Cannanore	302	206	537	385	432	269	313	362	194

Tellicherry	414	359	532	172	206	100	414	435	368

North Wynad taluk has the highest percentage of workers in the Primary sector with 70 per cent. All taluks except Cannanore and Tellicherry have more than 50 per cent of the total workers under Primary sector. Cannanore taluk leads the Secondary sector while Tellicherry taluk leads the Tertiary sector. More than 50 per cent female workers in each taluk are in the Primay sector the maximum being in the North Wynad taluk with 82 per cent.

158. The distribution of every thousand workers in each industrial category in the Cannanore district by age-group is given below:—

Statement 117

DISTRIBUTION OF 1,000 WORKERS IN EACH INDUSTRIAL CATEGORY BY BROAD AGE-GROUPS

Workers	Age-group

In Other Services	1,000	26	519	407	48	N

N—denotes 'Negligible'

In all the industrial categories the largest number of workers fall in the age-group 15-34. While workers in the age-groups 0-14 and 60 and above are seen in all industrial categories their number is comparatively small. Those in the age-group of 60 and above are more than those in the age-group of 0-14 in all industrial categories except in regard to Manufacturing other than Household Industry.

159. The following statement gives the distribution of 1,000 workers in each age-group by industrial categories.

Statement 118

DISTRIBUTION OF 1,000 WORKERS IN EACH AGE-GROUP BY INDUSTRIAL CATEGORIES

Industrial category of workers	Age-group

In Azhikode, Baliapatam, Chalad, Chirakkal, Chovva, Pappinisseri, Puzhathi and Puzhathi (Chirakkal) towns the largest per cent of workers are in Manufacturing other than Household Industry while in the remaining towns the largest per cent of workers are in other Services.

164. It is worthwhile to assess the educational levels of workers of different industrial categories by sex in rural and urban areas. The male and female workers in different industrial categories classified by educational levels per 1,000 male and female workers are furnished in the statement given below:—

Statement 123

DISTRIBUTION OF 1,000 MALE AND 1,000 FEMALE WORKERS IN EACH INDUSTRIAL CATEGORY IN RURAL AREAS BY EDUCATIONAL LEVELS

59 per cent of workers are included in the division of craftsmen, production process workers and labourers not elsewhere classified. Of these more than half the workers come under labourers not elsewhere classified.

Non-workers

167. 1,150,575 out of 1,780,294 persons who constitute the total population of the district are returned as non-workers. Of these 61 per cent are females. The following statement gives the distribution of non-workers by age groups and sex:—

The majority of non-workers are in the category of dependants, infants and disabled persons. Full-time students come to slightly above 24 per cent of the total non-working population. 13 persons out of 1,000 total non-workers are returned as persons seeking employment for the first time and unemployed but seeking work. The percentage of unemployed in the district is higher in the urban areas than the rural areas.

169. The following statement gives the taluk-wise figures of unemployed persons by age-groups for rural areas:—

About 92 per cent of the persons seeking employment for the first time and 99 per cent of persons once employed but now unemployed and seeking work come under the age-group of 15 years and above.

170. The following statement gives the unemployed persons in the rural areas of the district under the age-group 15 years and above seeking employment (whether for the first time or not) and their distribution by sex and educational levels:—

Household Economic Data

172. Upto and inclusive of the Census of 1951 the economic tables were confined to the population as such and did not extend to household units. But in the 1961 Census certain items of economic data relating to the households as such were collected in addition to the economic data pertaining to each individual of the households. The data thus collected in respect of households related to household cultivation and household industry. The household cultivation for this purpose was defined to cover plots or parcels of land which are cultivated by the household itself, i. e. lands which lie within the village or in an adjacent village or within such a distance as to enable the household to work on the land or actively supervise its cultivation. If however the head of the household insisted that he was cultivating the land situated at a distance from his household his statement was accepted and such land also was treated as coming within the scope of household cultivation. Cultivation for purposes of the above definition was taken to involve ploughing, sowing and harvesting and consisted of the production of cereal crops (including Bengal gram) such as rice, wheat, jowar, bajra, maize, roots and tubers like potato, yam, beet, sugarcane etc., production of pulses, such as arhar, moong, mazur, urd, khesari, other grams; production of raw jute, raw cotton and kindred fibre crops. It does not include the following:—

A. Other Field Produces

1 Production of other crops including vegetables not covered by the above items
2 Production of fruits and nuts in plantations, vines and orchards (like cocoanut arecanut, cashewnut etc.)
3 Production of wood, bamboo, cane reeds, thatching grass etc.
4 Production of juice by tapping palms
5 Production of other agricultural produces (including fruits and nuts not covered by Sl. No. 2 and *flowers*) not covered above.

B. Plantation Crops

1 Production of tea in plantation

2 Production of coffee in plantation

3 Production of rubber in plantation

4 Production of tobacco in plantation (does not include tobacco which is cultivated in rotation with other cereal crops in which case it would go under cultivation)

5 Production of ganja, cinchona, opium, poppy, saffron etc.

6 Production of other plantation crops not covered above (under this category cardamom has been included as a plantation crop).

173. Household industry was defined as an industry not on the scale of registered factory conducted by the head of the household himself and/or mainly by the members of the household at home or within the village in rural areas and only at home in urban areas. The particulars given in the following paragraphs are based on the data tabulated from a 20 per cent sample of household schedules.

174. Of the households in the Cannanore district the majority are not engaged either in household cultivation or in household industry. This is so in the case of rural as well as urban areas when taken separately. Out of the households which are engaged either in household cultivation only or household industry only or in both households engaged in household cultivation only are more than those engaged in household industry only or in both household cultivation and household industry. While households engaged in household industry only take the second rank those engaged both in household cultivation and household industry come last. The following statement gives the distribution of 1,000 sample households among the categories mentioned above:—

Statement 131

DISTRIBUTION OF 1,000 SAMPLE HOUSEHOLDS AMONG (i) ENGAGED NEITHER IN HOUSEHOLD CULTIVATION NOR IN HOUSEHOLD INDUSTRY; (ii) ENGAGED EITHER IN HOUSEHOLD CULTIVATION OR IN HOUSEHOLD INDUSTRY BUT NOT IN BOTH; AND (iii) ENGAGED BOTH IN HOUSEHOLD CULTIVATION AND HOUSEHOLD INDUSTRY IN THE DISTRICT

	Total	Rural	Urban

Households engaged in household cultivation only	290	324	100
Households engaged in household industry only	50	49	53
Households engaged both in household cultivation and household industry	21	23	6

175. Taking the rural areas of the district the above features of distribution mentioned in respect of the district as a whole holds good in all the taluks except the North Wynad taluk where the number of households engaged both in household cultivation and household industry is larger than the households engaged in household industry only. A statement giving the distribution of 1,000 sample households in the rural areas of each taluk among the different items mentioned above is given below:—

Statement 132

DISTRIBUTION OF 1,000 SAMPLE HOUSEHOLDS IN THE RURAL AREAS OF THE TALUKS OF THE DISTRICT (i) ENGAGED NEITHER IN HOUSEHOLD CULTIVATION NOR IN HOUSEHOLD INDUSTRY; (ii) ENGAGED EITHER IN HOUSEHOLD CULTIVATION OR IN HOUSEHOLD INDUSTRY BUT NOT IN BOTH, AND (iii) ENGAGED BOTH IN HOUSEHOLD CULTIVATION AND HOUSEHOLD INDUSTRY

Households engaged in household industry only	88	50	43	17	53	34
Households engaged both in household cultivation and household industry	31	19	14	36	40	12

176. An analysis of the distribution of households by the type of interest in the land cultivated shows that in the Cannanore district the largest per cent of households engaged in household cultivation are only tenants of private persons or institutions and the next largest per cent of households are those cultivating land either owned or held from Government only. The percentage of households which cultivate land partly held from Government and partly from private persons or institutions is smaller than the other two categories. The position remains the same in rural and urban areas also. The following statement gives the percentage distribution of sample households engaged in household cultivation in the Cannanore district by interest in land cultivated by them:—

Statement 133

PERCENTAGE DISTRIBUTION OF SAMPLE HOUSEHOLDS ENGAGED IN HOUSEHOLD CULTIVATION IN THE DISTRICT CLASSIFIED BY THE INTEREST IN LAND

Interest in land cultivated	Total	Rural	Urban
Total households	**100 00**	**100.00**	**100.00**
Owned or held from Government	14.08	13.84	18.57
Held from private persons or institutions for payment in money, kind of share	77.55	77.91	70.77
Partly held from Government and partly from private persons for payment in money, kind or share	8.37	8.25	10.66

177. Among the households in the district cultivating land owned or held from Government 41.01 per cent cultivate less than one acre of land only. Given below is a statement showing the percentage of sample households cultivating land under each type of interest by size of land cultivated in the district:—

Statement 134

PERCENTAGE OF SAMPLE HOUSEHOLDS CULTIVATING LAND UNDER EACH TYPE OF INTEREST BY SIZE OF LAND CULTIVATED IN THE DISTRICT

	Percentage of households cultivating land		
Size of land in acres	Owned or held from Government	Held from private persons or institutions for payment in money, kind or share	Partly held from Government and partly from private persons or institutions for payment in money, kind or share
All households	**100.00**	**100.00**	**100.00**
Less than 1 acre	41.01	39.29	14.03
1.0—2.4 acres	35.30	41.49	38.45
2.5—4.9 ,,	14.52	13.44	27.93
5.0—7.4 ,,	5.11	3.72	10.79
7.5—9.9 ,,	1.30	0.81	3.24
10.0—12.4 ,,	1.22	0.59	1.92
12.5—14.9 ,,	0.20	0.16	1.13
15.0—29.9 ,,	0.71	0.40	2.05
30.0—49.9 ,,	0.20	0.06	0.33
50.0+ ,,	0.12	..	0.13
Unspecified	0.31	0.04	..

There is a progressive decline in the percentage of households with the increasing slabs of size of land cultivated except in the sizes of 15.0 to 29.9 acres and 30.0 to 49.9 acres. Thus the percentage of households cultivating 50 acres or more land in this category is only 0.12. But coming to the percentages of households cultivating land held from private persons or institutions more households cultivate land from 1 acre to 2.4 acres than less than 1 acre, the percentages being 41.49 in the case of the former and 39.29 in the case of the latter. Similarly, the percentage of households cultivating land of the extent of 15.0 to 29.9 acres in this category is more than those cultivating 12.5 to 14.9 acres. But for these exceptions the percentages of households cultivating the land in each slab of size progressively declines with the ascending slabs. In the category of households cultivating land partly held from Government and partly from private persons or institutions the percentage of households cultivating 1.0 to 2.4 acres stands first and the percentage of households cultivating 2.5 to 4.9 acres stands second with 38.45 and 27.93 respectively against the percentage of households cultivating less than 1 acre of land which comes only to 14.03. Again the percentage of households cultivating 15.0 to 29.9 acres is more than the precentage of households cultivating 12.5 to 14.9 acres. In the case of the rest of the slabs the percentage of households progressively declines with increasing slabs of size. It has to be emphasised that the percentage of households cultivating 15.0 to 29.9 acres is larger than the percentage of households cultivating 12.5 to 14.9 acres in respect of all the three categories.

178. Taking the district as a whole, out of those working under the households engaged in household cultivation only 66.32 per cent are family workers and 33.68 per cent hired workers. The corresponding percentages of family workers and hired workers are 68.08 and 31.92 in the rural areas and 42.22 and 57.78 in the urban areas of the district. In the case of households engaged both in household cultivation and household industry in the district as a whole 74.82 per cent of their workers are family workers and 25.18 per cent hired workers. While the percentage of family workers under this category of households in the rural areas is 77.07 against 44.30 in the urban areas the percentage of hired workers is 22.93 per cent in rural areas and 55.70 percent in urban areas. It is significant to note than the percentage of family workers is more than the hired workers in the rural areas, while this is less than the hired workers in the urban areas both in respect of households engaged in

in household cultivation only and households engaged both in household cultivation and household industry. Out of the family workers engaged in household cultivation only 95.68 per cent are in rural areas and 4.32 per cent in urban areas. Out of the total hired workers under the households engaged in household cultivation only 88.35 per cent come from rural areas and 11.65 per cent from urban areas. Similarly out of the workers employed by the households engaged both in household cultivation and household industry 95.93 per cent of the family workers and 84.79 per cent of the hired workers come from rural areas against 4.07 and 15.21 respectively coming from urban areas.

179. The percentage of hired workers out of the total workers employed by the households engaged in household cultivation only shows an increasing trend with the increase in the size of land cultivated by the households. In the case of households engaged both in household cultivation and household industry also this trend is kept up except where the size of the land cultivated is 10 to 12.4 acres and 15 to 29.9 acres. The following statement gives the average number of family workers and hired workers and the percentage of hired workers out of the total workers under households engaged in household cultivation only and both in household cultivation and household industry:—

180. The number of households engaged in household industry classified by the principal household industry in the district has been given in table-B XIV Part B of this volume. The following statement shows the first ten ranks of household industries on the basis of this table:—

Statement 136

THE FIRST TEN RANKS OF HOUSEHOLD INDUSTRIES IN THE DISTRICT BASED ON 20 PER CENT SAMPLE HOUSEHOLDS

Rank	Household Industry
I	Cotton weaving in handlooms
II	Production of indigenous sugar, gur from sugarcane or palm Juice and production of candy
III	Manufacture of meterials from cork, bamboo, cane, leaves and other allied products
IV	Manufacture of coir and coir products
V	Manufacture of Jewellery, silver ware and wares using gold and other precious metals

VII	Manufacture of sundry hardwares such as G. I. pipe, wire net, bolt, screw, bucket, cutlery
VIII	Manufacture of earthenware and earthen pottery
IX	Cotton spinning (other than in mills)
X	Manufacture of bidi

181. The largest percent of households in the rural areas of the district which are engaged neither in household cultivation nor in household industry have four to six members and the smallest percentage one member. This holds good in respect of households engaged in household industry only and also households

engaged in household cultivation only. A statement giving the percentage of sample households in each of the above categories by number of members of the households is given below:—

Statement 137

PERCENTAGE OF SAMPLE HOUSEHOLDS CLASSIFIED BY SIZE AND PARTICIPATION IN HOUSEHOLD CULTIVATION OR HOUSEHOLD INDUSTRY IN RURAL AREAS OF THE DISTRICT

Cannanore Taluk (Area: 164.7 sq. miles; population: 391,636)

182. Cannanore, the smallest taluk in this district was formed on 1st January 1957. It is bounded on the north and a portion of the east by the Taliparamba taluk, on the remaining portion of the east and portion of the south by the Tellicherry taluk and on the remaining portion of the south and on the west by the Arabian sea. Consisting of 30 revenue villages this taluk is divided into two firkas, viz, Cannanore and Madayi. The chief crops are rice and cocoanut. The handloom weaving industries of this district are mainly located in this taluk.

Anjarakandy

183. This place is situated about eleven miles north-north-east of Tellicherry. The East India Company started cultivation of plantation crops like coffee, cinnamon, pepper, nutmeg, cassia, sugarcane and sandalwood in this *amsom* as early as 1797 'The cultivation of coffee was first introduced into Malabar by Mr. Murdock Brown in his plantation at Anjarakandy at the end of the 18th century, and thence appears to have found its way up to Mananthody, where, a few bushes were planted in the Mess compound by the Officers of the detachment then stationed there'.

Baliapatam

184. Baliapatam, known also as Valapattanam or Azhikkal, is located on the West Coast road six miles north of Cannanore and on the south bank of the Valapattanam river. A place of importance at the time of Cheraman Perumal, it was also one of the chosen seats of Kolattiri Rajas' whose dominions stretched in the south as far as the Kotta river (or Kuttiyadi river) and in the north as far as the Kasaragod taluk including a portion of it. Apart from its historical importance, it has the second largest plywood factory in Asia. A hard-board factory with modern equipments has been recently started here. Balipatam became a Census town for the first time in 1961.

Cannanore

185. Cannanore, the headquarters of the Cannanore taluk became also the headquarters of the Cannanore district on 1st January 1957 when the new district was formed. Cannanore was the capital of North Kolattiri Rajas for many centuries and it was a great emporium of trade between Arabia, the Persian Gulf and Southern India. Vasco da Gama passed through Cannanore in August 1498 when it was "a large town of thatched houses inside a bay". In 1501 Pedro Alvarez Cabral founded a factory at Cannanore. On 23rd October 1505 Don Francisco de Almeyde, the first Portuguese *Viceroy of all the Indies*, commenced with Kolattiri's permission the construction of the Cannanore Fort which he called St. Angelo. During the middle of the 17th century the factory and fort were captured by the Dutch. The East India Company took over these institutions from the Dutch in 1790. The Port, customs office and the shipping office are situated near the beautiful sea-coast. Adjacent to the sea-shore is the Cannanore Cantonment. The large military barracks, Government Headquarters hospital and Fort St.Angelo which has withstood the fury of south-west monsoon for the past 400 years are all situated in the Cantonment area. Military maidan which is also used as a play ground is situated on the sea-coast. Camp bazaar is the most important business centre. Almost all Government offices are situated in the eastern part of Cannanore town. There is an extensive maidan in this part of the town which gives wide scope for expansion. The Collectorate and public offices are situated at one end of the maidan. The central jail of Cannanore is one of the oldest jails in South India. The Payyambalam beach which is about two miles in length is known for the enchanting beauty and magnificent scenery. Cannanore Municipal town was

established on 24th June 1867. Both the Cantonment and the Cannanore Municipal town are Census towns.

Cherukunnu

186. There is an important Bhagavathi(Annapurneswari) temple here constructed by Parasu Rama and it is said that the deity came from the north, near Banares. A Church dedicated to Fathima built in 1956 is another beautiful monument in Goethic architechture. This edifice standing on twenty columns with a dome and two gigantic towers crowned by multiple crosses is a sight for all, especially travellers by train to Kasaragod.

Chirakkal

187. Chirakkal is situated about four miles north of Cannanore. The palace of Chirakkal Rajas' otherwise known as Kolattiri is situated here. Chirakkal became a Census town for the first time in 1961.

Madayi

188. Madayi or Pazhayangadi is located about fourteen miles north-north-west of Cannanore. In the middle of the village there is a handsome mosque built in Hijira 518 (A.D.1124) by Malik Ibn Dinar. The white marble seen in this mosque is said to be one among the three marble blocks brought from Arabia by the founder, the other two blocks being placed in the mosques at Quilon and Cranganore. In Pazhayangadi there is an old tank known as "Jewish tank" and it is said to have been constructed by the colony of Jews. There is an old fort here. "The fort was probably the Canarese redoubt captured by the British in 1736; but may be on or near the site of the old Eli fort of the Kolattiri family, built, according to the Keralotpathi, by Eli Perumal, the eighth of the line".

Hosdrug Taluk (Area: 382.3 sq. miles; population: 241,131)

189. The present Hosdrug taluk was part of the former Kasaragod taluk of South Kanara district. The new taluk was formed on 1st January 1957. In the north Chandragiri river separates Hosdrug taluk from Kasaragod. On the easternside the majestic Western Ghats stand as a natural barrier demarcating the boundary with South Kanara and Coorg districts of Mysore State. Kavvayi river forms the southern boundary and divides Hosdrug from Taliparamba taluk. Hosdrug is flanked by the Arabian sea on the west. This taluk consisting of 35 revenue villages is divided into two firkas, Hosdrug and Nileshwar. The important crops of this taluk are rice, cocoanut, pepper and tobacco.

Hosdrug

190. Hosdrug or Kanhangad, the headquarters of the Hosdrug taluk, is thirty-nine miles north of Cannanore by rail. Hosdrug was treated as a Census town for the first time in 1951. It continued to be a Census town in 1961 under the name Kanhangad. There is a well known temple which attracts large number of devotees throughout the year.

Nileshwar

191. Nileshwar is located thirty-three miles north of Cannanore if travelled by train while the road distance comes to about forty-one miles. The Agricultural Research Station for cocoanut farming at Nileshwar was established as early as 1916. Nileshwar is treated as a Census town in 1961.

Pallikere

192. In this small village there is an ancient fort known as "Bekal Fort". This historical monument situated on the sea-shore is believed to have been built by Ikkeri Kings.

Kasaragod Taluk (Area: 376.3 sq. miles; population: 271,015)

193. Kasaragod, the northernmost taluk of Kerala State, is bounded on the north and east by the South Kanara district of Mysore State, on the south by the Hosdrug taluk of Kerala State and on the west by the Arabian sea. Kasaragod taluk is divided into three firkas viz, Manjeshwar, Kumbla and Kasaragod. The taluk consists of 79 revenue villages. The chief crops of this taluk are rice, cocoanut, areca-nut and tobacco.

Kasaragod

194. Situated on the sea-coast, Kasaragod, the headquarters of the Kasaragod taluk, is a beautiful place with healthy climate, the distance from Cannanore being only fifty-three miles by rail. Besides various institutions there is a Government Arts and Science College started in 1957. Hundreds of people assemble here to celebrate the Mallikarjuna temple festival held in the month of March. Kasaragod continued to be a Census town from 1911 to 1961.

Kumbla

195. Seven miles north of Kasaragod is situated Kumbla. The important festival of this town is the

Sri Gopalakrishna temple festival celebrated in the month of January. It is also a Census town.

Manjeshwar

196. The northernmost Census town of Kerala, Manjeshwar, is about seventy-one miles from Cannanore if travelled by train. Along the West Coast road there are three unbridged rivers between Kumbla and Kasaragod. Avoiding this ferry route the distance between Cannanore and Manjeshwar will be about eighty-eight miles. 'Shashti' festival at Manjeshwar is celebrated in the month of December.

Perdala

197. The only sanskrit college of the district known as Mahajana Sanskrit College, established in 1920, is situated in this village.

North Wynad Taluk (Area: 288.3 sq. miles; population: 90,200)

198. North Wynad, the least populous taluk in the district, was carved outfrom the old Wynad taluk of Malabar district on 1st January 1957. The boundaries of North Wynad taluk are the Tellichery taluk of Cannanore district and Coorg district of Mysore, State on the north, the Mysore district on the east, Badagara and South Wynad taluks of Kozhikode district on the south and Tellicherry and Badagara taluks on the west. This is the only taluk in Cannanore district which does not have sea-coast. Moreover the whole taluk lies in the highland region and it is classified as 'entirely rural'. It consists of two firkas viz, Mananthody and Periya. The taluk has 11 revenue villages. This hilly taluk produces tea, coffee and rubber. Balasur or Banasura Mala is the highest peak of the taluk, the elevation being 6,762 feet above mean sea level. This ridge forms the common boundary between Badagara and South Wynad taluks and spreads over to Vellamunda village.

Mananthody

199. Mananthody (in Vemom village), the headquarters of North Wynad taluk, is situated at an elevation of 2,558 feet above mean sea level and at a distance of 50 miles 4 furlongs from Tellicherry. Kerala Varma Raja (or Pazhassi Raja) of the Padinjare Kovilagom of the Kottayam family, the most dignified and extraordinary personage who fought against the British supremacy in Malabar, was cremated with all customary honours at Mananthody on 30th November 1805. For the first half of the nineteenth century Mananthody had a Cantonment on a low flat hill consisting of a small redoubt, artillary sheds and place of arms. This cantonment was besieged by the Kurichiyars in their rebellion against the British in 1812. Two famous Roman Catholic churches are located at Mananthody. The famous Fish Pagoda lies closeby. With a newly built Mananthody Road Bridge the long felt problem of traffi towards Calicutside is solved.

Panamaram

200. Panamaram, situated in the Kuppathode village, is a growing marketing centre. There was a strongly built military post known as Panamarathu Kotta or literally "Palmyra tree fort". At this fort Kurichiyars numbering about 150 under the guidance or Edachenna Kunjan (Edachenna Kungan) and Talakal Chandu massacred the whole detachment of 70 men of 1st Battalion of the 4th Bombay Infantry stationed at the Panamarathukotta on 11th October 1802.

Thalapoya

201. Thalapoya is an important place in the Tavinhal village where major tea estates of North Wynad taluk are situated.

Tirunelly

202. Tirunelly is on an elevated and picturesque mountainous plateau. The Brahmagiri peak (5,276 feet) which separates North Wynad from Coorg is located in this village. The famous Tirunelli temple, which is also known as Amalaka temple and Sidha temple is situated here. It is believed to have been dedicated by Brahma to Vishnu known as Deva Devasan and Tirunelli Perumal. Very near the temple there are seven holy water fountains viz, (1) Papanasini, literally extinguisher of sins (2) Panchathirtham, (3) Hrinamochinithirtham (4) Gunnika thirtham, (5) Satavinnu (6) Sahasravinnu and (7) Varaham. 'There is a rock called Pinnapara where offerings to the spirits of the departed are made, and this rock is supposed to be the bone of an asuran (demon) named Pazhai abhedi who was killed by Vishnu and who at the time of his death prayed to that deity that his body might be converted into a rock extending from Tirunelly to Gaya and divided into three parts fit for the performance of offerings for the departed viz, at (1) Tirunelly representing his foot, (2) Godavari representing the middle part, and (3) Gaya representing the head. For the safeguarding of the temple four shrines have been created viz, the shrine of (1) Durga on the east, (2) of Siva on the south and (3) on the west and (4) of Subramanian on the north.

These four shrines are supposed to represent (1) Valliyurkavu temple, (2) Trichaleri temple, (3) Tiricharakunnu temple and (4) a temple said to exist in the Brahmagiri mountains'.

Taliparamba Taluk (Area: 514.5 sq. miles; population: 310,723)

203. Taliparamba, the biggest taluk in this district was formerly a sub-taluk of Chirakkal taluk of Malabar district. Taliparamba is bounded on the north by Hosdrug taluk, on the east by the Coorg district of Mysore State, on the south by Cannanore and Tellicherry taluks and on the west by the Arabian sea. The present taluk consists of three firkas viz, Payyanur Taliparamba and Irikkur. There are 46 villages in the taluk. The chief crops are pepper, lemongrass, tapioca, ginger, cashewnuts, areca-nuts, cocoa-nuts and rubber.

Ezhimala

204. Ezhimala of Kunnuru village (height 855 feet), the conspicuous landmark to mariners, is situated on the shores of the Arabian sea. Gasper Correa says that Vasco da Gama's pilots had foretold that the first land to be seen would be 'a great mountain, which is on the coast of India in the Kingdom of Cannanore, which the people of the country in their language call the mountain Delielly, and they call it of the rat, and they call it Mount Dely, because in this mountain there are so many rats that they never could make a village there'. Marco Polo's "Kingdom of Eli" and Ibn Batuta's "Hili" are identical places. Another version is that the hill is named after the "Eli Kovilagom", the second oldest of the palaces of Kolattiri Rajas which was situated at short distance from the northern slopes of Elimala. The west coast railway line passes through the Kunnuru village. Ezhimala is famous for its Ayurvedic herbs.

Irikkur

205. Situated on the bank of Valapattanam river Irikkur is about six miles from Sreekantapuram. Timber is floated down the stream to Baliapatam. Small boats can ply up to Irikkur.

Panniyur

206. Panniyur is very near to Taliparamba. The Pepper Research Station at Panniyur is an important centre of research.

Payyanur

207. Payyanur, the ancient seat of seventeen Nambuthiri Illams known as "Payyannur Gramakkars" whom Parasu Rama is said to have specially favoured, is an important place fourteen miles north of Taliparamba. This was one among the sixty four Gramas said to have been founded by Parasu Rama.

Sreekantapuram

208. Sreekantapuram is situated on the right bank of the northern branch of Valapattanam river at a distance of twelve miles from Taliparamba. It was in former days the chief emporium of trade for the fertile lands of Coorg and sandal forests of Mysore, the place to which Ibn Batuta travelled from Hili (Ezhimala). The old mosque at Sreekantapuram is believed to have been built by Malik Ibn Dinar. The first Kazi appointed was Ummer, one of his ten sons.

Taliparamba

209. Taliparamba, the headquarters of the Taliparamba taluk and the chief marketing centre of the hill produces is situated about fourteen miles north of Cannanore. An Agricultural Research Station was established here as early as 1905 with the main object of investigating the well known "Pollu" disease of pepper and also to carry out manurial and varietal trials on various crops. The Extension Training Centre at Taliparamba imparts training to Gramasevakas. There is a famous temple dedicated to Siva here, a magnificent structure covered with brass plates and surrounded by a high laterite wall. The fine towers were destroyed by Tippu Sultan during the Mysorean invasion. A granite slab on the bathing shed of the temple records that it was built in A. D. 1524. Taliparamba desom became a Census town for the first time in 1961.

Trichambaram

210. Trichambaram is about three miles south of Taliparamba. There is a famous temple here dedicated to Sree Krishna. "Trichambaram is supposed to be a corruption of Sri Sambaram so called after the great rishi of that name who did penance there, propitiated the god, and in his honour consecrated the image". Trichambaram became a town for the first time in 1961.

Tellicherry Taluk (Area: 465.2 sq. miles; population: 475,589).

211. Tellicherry taluk is bounded on the north by Taliparamba taluk, on the east by the Coorg district of Mysore State and North Wynad taluk, on the south by North Wynad and Badagara taluks and on the west by the Arabian sea. Consisting of 49 villages this taluk is divided into three firkas viz, Tellicherry, Kuthuparamba and Mattannur, Rice,

betelnuts, cardamom and pepper are the important crops.

Dharmadom

212. Dharmadom or Darma Pattanam, a small island formed by the confluence of Tellicherry and Anjarakandi rivers is about three miles from Tellicherry. It contains a redoubt and a rockcut cave. The island was ceded to the East India Company in 1734. It was captured by the Revi Varma Raja of Chirakkal in 1788 but was retaken by the East India Company in 1789. Small coastal vessels can embark at the small bay of the southern branch of the Anjarakandi river. Malik Ibn Dinar constructed a mosque here and appointed his son Hussain as the first Kazi of the mosque. Besides the mosque there are two old temples, viz, Malur and Andalur and a church.

Iritti

213. Iritti is located at the foot of the Perambadi Ghat, the distance from Tellicherry being twenty-five miles.

Kannavam

214. Kannavam is an important place eight miles east of Kuthuparamba on Tellicherry-Mysore road. In 1805 Kannoth Nambiyar, a chief follower of Pazhassi Raja and a great *jenmi*, was hanged here. Kannoth mosque and Totikulam temple are the chief religious institutions of this village. The Government of Kerala has recently constructed a colony for Kurichiars—a class of jungle tribes—at Kannavam. About 70 Kurichiya families have been accomodated in this colony. They usually use arrows to shoot animals and birds and crude implements to till the land.

Kottiyur

215. Kottiyur situated in Manathana village is about forty miles from Tellicherry. Manathana was an important centre of military activity during the Pazhassi struggle against British supremacy in Malabar. An ancient fort still exists here. At Kottiyur there is a famous temple of great celebrity called Tricharumana dedicated to Siva attracting lakhs of devotees during the festival month of *Edavom* (May-June). This temple which is surrounded on all sides by forests is as sacred and popular to the Hindus of North Kerala as Sabarimala to the Hindus of other parts of the State.

Pazhassi

216. Pazhassi village was once the seat of the powerful Kerala Varma Raja (or Pazhassi Raja) of the Padinjare Kovilagom of Kottayam family.

Tellicherry

217. Tellicherry the headquarters of the Tellicherry taluk was elevated as a Municipal town from 1st November 1866. Historically it is an important place. "*Let us be sole Masters of pepper trade*" was the motto of the East India Company and they established their first regular settlement on the Malabar coast at Tellicherry in 1683. The Tellicherry fort was built on 20th August 1708 on a small hill called Tiruvallapad Kunnu. Built "of laterite in the form of a square; and with its massive and lofty loopholed walls and strong flanking bastions, the cavalier bastion in the south-east corner and the great bastion to the north beyond the Divisional Officer's bungalow" this fort must have been a formidable stronghold in days gone by. The earliest Protestant Mission at work in Malabar was the Basel German Evangelical Missionary Society. The famous Malayalam scholar, Dr.Gundert established a church on Nittur hill at Tellicherry in 1839. The Anglican church (the foundation of which was laid by Lord Napier of Ettrick) was built beneath the walls of the Fort by the funds left by the Master Attendant Mr.Edward Brennen. A high school was also started by the funds set apart by Mr.Brennen to impart sound English Education to 'persons of all creeds and denominations'. Government took over this school from the Basel Mission in 1872 and it was converted as a Second Grade College in 1890. A large mosque known as Odathil (meaning garden in Portuguese) Palli was built by a very opulent Muslim, Chovakkaran Mussa. The Thiruvangad temple, otherwise known as Brass Pagoda, is dedicated to Sri Rama. Sri Jaganath temple is the next in importance. This temple dedicated to Siva was consecrated on 1st *Kumbhom* 1083 M. E. (February 1908 A.D.) by the great religious reformer Sri Narayana Guru. More than forty thousand devotees assemble here to celebrate the yearly festival held in the month of *Kumbhom* (February-March). Tellicherry continued to be a Census town in 1961.

**This table includes area, houses and population of unsurveyed forest areas also.

Note:—1 Under columns 3(a) and 3(b), (a) represents the area figures furnished by Surveyor General of India, and (b) represents the area figures furnished by the State Survey Department. The urban areas are based on the area of individual towns furnished by the local authorities. The rural area for a district is obtained by subtracting the urban area from the State Survey area.

2 The sq. km. and density figures of urban areas of District/State are worked out using the area figures corrected upto two places of decimals obtained by adding the areas of towns in the respective units and not using the area figures given in the table. In addition to this the figures relating to sq. km. are further adjusted to make the District/State totals agree.

3 Population per sq. mile has been calculated on area figures supplied by State Survey Office.

† These two are only portions of two villages consisting of paddy field and uncultivated land lying in the rural areas. The urban portions of these villages lying in two municipal towns are inhabited.

"5.(1) As from the appointed day, there shall be formed a new Part A State to be known as the State of Kerala comprising the following territories, namely:—

(a) the territories of the existing State of Travancore-Cochin, excluding the territories transferred to the State of Madras by section 4; and

(b) the territories comprised in—

(i) Malabar district, excluding the islands of Laccadive and Minicoy, and

(ii) Kasaragod taluk of South Kanara district;

and thereupon the said territories shall cease to form part of the States of Travancore-Cochin and Madras, respectively.

(2) The territories specified in clause (b) of sub-section (1) shall form a separate district to be known as Malabar district in the State of Kerala"

Territorial Distributions since 1956

2. In exercise of the powers conferred by the Madras District Limits Act 1865 the Government of Kerala with effect from 1st January 1957 altered the jurisdiction of Malabar district and trifurcated the same into the new districts of Cannanore, Kozhikode and Palghat as per Notification No. SRN3-29174/56 dated 19th December 1956. The district of Cannanore thus formed comprised the following:—

Names of divisions comprised in the district	Names of taluks comprised in the division	Names of firkas comprised in the taluk
1 Kasaragod	1 Kasaragod	1 Manjeshwar
		2 Kumbla
		3 Kasaragod
	2 Hosdrug	1 Hosdrug
		2 Nileshwar
	3 Taliparamba	1 Payyanur
		2 Taliparamba
		3 Irikkur
2 Tellicherry	1 Cannanore	1 Cannanore
		2 Madayi
	2 Kottayam	1 Tellicherry
		2 Kuthuparamba
		3 Mattannur
	3 North Wynad	1 Mananthody
		2 Peria
	4 South Wynad	1 Kalpetta
		2 Sultan's Battery
		3 Kaniyambatta

With effect from 15th March 1957 the following change of jurisdiction was made in the Cannanore district as per Notification dated 11th March 1957 given below:—

"In modification of Notification No. SRN3-29174/56 dated 19-12-1956 it is hereby notified that South Wynad taluk, which from 15-3-1957 shall cease to form part of Cannanore district, shall, with effect from the said date, be added to the Kozhikode district and included in the Kozhikode division".

In pursuance of Notification No. 559 dated 6-6-1958 the name of 'Kottayam' taluk in the Cannanore district was changed into 'Tellicherry' taluk with effect from 1st July 1958. There was no other change in jurisdiction so far as this district, its taluks and villages are concerned during the decade 1951-61.

Area Figures

3. The area of the district given by the Surveyor General, India, is 2,744 sq. miles. This figure does not tally with the area given by the Director of Survey and Land Records, Kerala which is 2,191.32 Sq. miles. The area figures given in this handbook are those furnished by the State Director of Survey and Land Records. In regard to municipal towns the figures for area have been furnished by the respective Municipal Commissioners in consultation with the Director of Survey, District Collector and Tahsildars. The area figures of non-municipal towns are supplied by the concerned Tahsildars.

Definition of urban area—A historical survey

4. It has not been possible to adopt a uniform definition of urban area throughout the world. It differs from country to country, even in the highly industrialised West. According to the Census Report of 1881 of the Madras State which applies to this district 'size, compactness and certain architectural and commercial or other industrial features were of the considerations which went to make up the definition of a town'. In the Census of 1901 of Madras a census town was taken to comprise a municipality of whatever population and every other continuous collection of houses permanently inhabited by not less than 5,000 persons which, the Superintendent of Census Operations, having regard to the character and relative density of its population, its importance as a centre of trade and its historical associations, might decide to treat as a town. Cannanore and Tellicherry were the only towns in this district in the Census of 1901. A town, as defined for the purpose of the Census of 1911 in Madras, included all municipalities and cantonments and every other continuous collection of houses inhabited by not less than 5,000 persons which the Superintendent of Census Operations considered fit to treat as a town. Kasaragod was thus added to the list of towns in this district in the Census of 1911. From this period up to 1951 there has been no change in the number of towns. In the Census of 1951 Hosdrug (Kanhangad) was also treated as a town. Thus, on the eve of the Census of 1961 there were only four towns in this district. Owing to the growing importance of urbanisation the 1961 Census laid down a three-fold criterion for classification of an area as a town besides corporations/municipalities, civil lines and cantonments which were automatically recognised as towns. According to this criterion only places with a minimum population of 5,000 persons and a density of not less than 1,000 persons per square mile with at least 75 per cent of the male population engaged in non-agricultural pursuits that could be recognised as a town. The population, density and extent of male population engaged in non-agricultural pursuits were to be determined with reference to the Census figures of 1951. Exceptions were, however, allowed where an area may have a population of less than 5,000 but has definite urban characteristics and amenities. Similarly, where a place was treated as a town in 1951 but is not eligible to be treated as a town in 1961 if the State Government desired that it should be treated as a town in 1961, it was considered as an exceptional case. On an application of the above principles the list of towns in this district has been considerably extended bringing the number of towns to 18. Kanhangad town of 1951 which does not satisfy the criterion of 1961 was treated as a town in 1961 based on the recommendation of the State Government. There is only one town 'Trichambaram', which had less than 5,000 persons as its population in 1951 and, therefore, comes within the exception. This has been recognised as a town in the Census of 1961 in view of the fact that as per the 1961 Census its population is above 5,000 and it fulfils the criteria of density and employment in non-agricultural pursuits and further, has definite urban characteristics and amenities. The State Government when consulted was also in favour of treating it as a town.

5. The following statement gives the number of towns for the various Censuses:—

Progress of Census towns since 1901

1901	1911	1921	1931	1941	1951	1961
2	3	3	3	3	4	18

Census Village

6. For the purposes of 1961 Census a village means a revenue village. These villages have 'desoms' as the constituent units in most cases. Some, however, have no subdivisions as 'desoms'. Unlike in the previous Censuses the 'desoms' have not been treated as census villages in 1961. Tables A-I and A-III are given on the basis of revenue villages. However, in view of the different definitions of a Census village adopted in the previous censuses a Special Table A-III is given furnishing the number of census villages according to the definition of Census village in 1951 Census also i.e. according to the number of desoms. The Cannanore district has 250 revenue villages out of which 15 lie wholly in towns and six partly in towns. The particulars of this are given in Statement No. 1 of Part A supra.

Census House

7. A Census house is a structure or part of a structure inhabited or vacant, giving on the road or a common stair case or a common courtyard leading to a main gate or enjoying a separate entrance. It may be a dwelling, a shop, a shop-cum-dwelling, a workshop-cum-dwelling, or a place of business, workshop, school etc.

Occupied Residential House

8. An occupied residential house is a census house occupied by one or more census households and includes a shop-cum-dwelling, workshop-cum-dwelling and a dwelling with other uses. Even where more than one household occupy one census house, it is considered as only one occupied residential house.

Natural Divisions

9. Since 1901 the territories comprising Malabar district and Kasaragod taluk of the South Kanara district came under the sixth natural division of Madras designated as West Coast Division. There was no further subdivision on the basis of meteorological or geographical features. In the present Census, natural divisions are formed on the basis of contour lines, the whole State being divided into three natural divisions based on the following criterion:—

(i) Highland consisting of areas lying 250 feet and over above the mean sea level

(ii) Midland comprising areas lying between 25 feet and 250 feet above the mean sea level

(iii) Lowland consisting of the areas falling below 25 feet above the mean sea level

Since the contour maps of the Survey of India for Kerala shows the contours only upto 50 feet above the mean sea level, it was inevitable that the determination of the areas falling in the classification of lowland had to be done with reference to the reports of the Municipal Commissioners and Tahsildars who had necessarily to depend upon a certain amount of approximation for the purpose. There are, indeed, some revenue villages lying partly in one classification and partly in another. In all such cases the village was classified according to the category in which its major portion fell. In the case of towns also the same principle was followed. It could be said with some amount of gratification, but not without some reservation due to the non-availability of contour maps below 50 feet above the mean sea level, that for the first time in Kerala, the classification by natural divisions has been done on the basis of contour lines.

Appendices

Appendix I

10. This Appendix gives the 1951 territorial units constituting the present set up of Cannanore district down to taluk level. All notified changes that have taken place since 1951 Census are incorporated in this Appendix.

11. The revised area figures, based on the latest village-wise figures furnished by the Director of Survey and Land Records, were adopted for preparing this Appendix.

12. The symbol numbers viz. 1, 2, 3 and 4 for the above changes of jurisdiction are given in col. 3 of the Appendix I. The annexure to Appendix I gives the details involved in these transfers with reference to the 1951 District Census Handbooks.

13. The sub-appendix to table A-I shows the area of the only municipal town in the district which had undergone change in area since 1951. Cannanore Cantonment was included as a part of Cannanore municipal town in the previous censuses even though it was separated from the municipal limits with effect from 1st January 1938. In 1961 Cannanore Cantonment is treated as a separate town.

Appendix II

14. Appendix II to table A-I shows the number of villages with a population of 5,000 and over and towns with a population under 5,000 for each taluk. Cannanore Cantonment is the only newly added town in 1961 with a population of less than 5,000.

Appendix III

15. Appendix III to table A-I furnishes figures of the houseless and institutional population. An Institution is a place where unrelated persons are living together.

† The sq. km. and density figures of urban areas of taluk/district are worked out using the area figures corrected upto two places of decimals obtained by adding the areas of the towns in the respective units and not using the area figures given in the table. In addition to this the figures relating to sq. km. are further adjusted to make the taluk/district/state totals agree. The sum of areas given separately for Highland, Midland and Lowland areas for each taluk in each of the two categories—Total and Rural—will differ slightly from the consolidated figure given for the taluk as a whole. This is due to differences in computation at thel evel of decimals for the natural divisions of each taluk.

APPENDIX I

Statement showing 1951 *territorial units constituting the present set up of Cannanore district*

Only those territorial units which have undergone changes since 1951 have been shown in this Appendix. The area figures of several in taluks given in the A I table of 1951 Census do not tally with the total area of the ultimate units given in the rural and urban statistics of 1951 District Census Handbooks. These discrepancies are not also seen explained anywhere. Hence these area figures have not been accepted for purposes of this Appendix. Instead, the area figures arrived at in consultation with the Director of Survey and Land Records, Kerala, District Collector, Municipal Commissioners and Tahsildars have been adopted. The area figures of portions transferred to this State exhibited in this Appendix will not, therefore, agree with those furnished by the Superintendents of Census Operations, Madras and Mysore.

A-II VARIATION IN POPULATION DURING FORTY YEARS

Fly-leaf

Adjustments of Population

1. Table A-II furnishes the variation in population for the last five Censuses from 1921 to 1961 adjusted according to the present jurisdiction of the district. A full account of the territorial changes between 1951 and 1961 affecting the jurisdiction of the district and taluks are given in the fly-leaf to table A-I supra. The districts were brought up-to-date as in 1961 on the basis of these changes. Where the territorial changes affected the units within the district the population figures were available in the District Census Handbooks for 1951 Census if such changes related to the entire tracts or units adopted for that Census. Except in the case of urban areas such units went down to the level of villages and desoms. Where, however, the changes affected either an entire urban tract or the ultimate rural unit which may be a village or desom, as the case may be, the population of the affected portion had to be estimated. For purposes of this estimation in the case of the 1951 population it was assumed that the proportion of the population of the affected portion to the total population of that particular unit is the same as the proportion of the area of that affected portion bore to the total unit. Hence, the formula adopted for estimating the 1951 population in the case of areas affected by changes was,

$$\frac{\text{Area of the affected portion}}{\text{The area of the entire unit}} \times \text{Population of the entire unit}$$

In estimating the male and female population of such affected portions the same sex-ratio which existed in the case of the entire unit was applied to the affected portions also.

2. In estimating the population of this district for 1941 wherever the population figures were not available as such for any portion of a unit affected by the territorial changes it was assumed that the proportion of the population of that affected portion to the population of the whole unit as per the 1951 Census was applicable to the previous census also. Thus the formula applied was,

$$\frac{\text{The population of the entire unit in the 1941 Census}}{\text{The population of the entire unit in the 1951 Census}} \times \text{The population of the affected portion in the 1951 Census}$$

The same formula was applicable to the previous Censuses *mutatis mutandis* i.e. for the year 1951 the Census year prior to the one for which the population had to be fixed was substituted and for the year 1941 the year of the particular Census for which the population had to be estimated was given. For purposes of sex distribution the proportion applicable for the entire unit in the previous census was made applicable for the affected portion in the concerned census also.

Appendix

3. The Appendix to table A-II furnishes the area and population affected by each territorial change of jurisdiction since 1951. The foot-notes of this Appendix give the dates of transfers.

* Area figures under columns 2, 3, 5 and 6 relate to the area figures supplied by the State Survey Department.

** In 1951 there was no Cannanore district. The taluks or portion of taluks which now form part of Cannanore district were part of Madras State. At the time of reorganisation of states a new Malabar district was formed consisting of Malabar district excluding Laccadive and Minicoy Islands and Kasaragod taluk of South Kanara district. In exercise of the powers conferred by the Madars District Limits Act 1865 the Government of Kerala with effect from 1st January 1957 had altered the jurisdiction of Malabar district and formed three new districts viz., Cannanore, Kozhikode and Palghat, comprising the Malabar district of States Reorganisation Act 1956 excluding Cochin and newly formed Chowghat taluks and inclusive of Chittur taluk of Trichur district. On 1st January 1957 South Wynad taluk was part of Cannanore district. With effect from 15-3-1957 South Wynad taluk was transferred to Kozhikode district. The 'Kottayam' taluk of 1951 was renamed as 'Tellicherry' taluk on 1st July 1958.

*** Kasaragod taluk was part of South Kanara district of Madras State till the formation of Kerala State. This taluk was bifurcated into Kasaragod and Hosdrug taluks on 1-1-1957.

SPECIAL TABLE A-III DESOMS CLASSIFIED BY POPULATION

Fly-leaf

The 1961 Census village (ie. revenue village) has desoms as its constituent units. These constituent units have been treated as census villages in the previous censuses. This necessitated the preparation of a Special Table A-III. This table gives the figures for the number and population of desoms in the following population groups:

A-IV TOWNS (AND TOWN-GROUPS) CLASSIFIED BY POPULATION IN 1961 WITH VARIATION SINCE 1901

Fly-leaf

Definition of town

1. This has been given in fly-leaf to table A-I supra.

Classification of cities and towns

2. The towns are classified according to their population as given below:—

Class I—Towns with a population of	100,000	and above		
Class II—Towns with a population of	50,000	—	99,999
Class III—Towns with a population of	20,000	—	49,999
Class IV—Towns with a population of	10,000	—	19,999
Class V—Towns with a population of	5,000	—	9,999
Class VI—Towns with a population of less than	5,000		

There are no towns coming under the first two classes in this district.

Town-group

3. Cannanore town-group is the only town-group in this district. It consists of two towns viz., Cannanore Municipal town and Cannanore Cantonment. Cannanore Cantonment was included in Cannanore municipal limits till 1st January 1938. For census purposes Cannanore Cantonment was part of Cannanore municipal town in all the previous censuses. In table A-IV the constituent parts of a town-group, though they come under different classes, are shown under the class of the town-group itself. The same method was adopted in striking out the class totals in the previous censuses also.

Changes in classification of towns with their status

4. The following statement gives the class and status of each town for the last seven censuses:—

Appendices

Appendix I

5. Appendix I to table A-IV gives the area and population of the new towns added in 1961 and the 1951 towns which have been declassified in 1961. In this district 14 towns were added in 1961 while all the 4 towns of the last census continued as such. Note A to this Appendix furnishes the names, areas and population of the 1951 villages which constitute the newly added towns of 1961.

Appendix II

6. Appendix II to table A-IV furnishes the jurisdiction of all the 18 towns based on the 1961 set up.

† It is only in 1961 that Cannanore Municipality and Cantonment have been treated as separate towns. In the previous censuses these formed one town only though the Cantonment was separated from the Municipal limits as early as 1st January 1938. Hence from 1901 to 1951 the figures have been shown against the Cannanore Municipal Town.

Towns treated as such for the first time in 1961 are printed in *italics*.

NOTE

The 17 Economic Tables of 1961 Census are divided into two parts viz, (i) General Economic Tables (B-I to B-IX) prepared from individual slips and (ii) Household Economic Tables (B-X to B-XVII) prepared from 20 per cent sample Household Schedules. All the above tables pertaining to this district are presented in this volume except Table B-II which deals with 'workers and non-workers in cities, town-groups and towns arranged territorially classified by sex and broad age-groups'. This table is furnished as Table B-II in 'Volume VII—Kerala State—Part II-B— General Economic Tables'. The concepts and definitions of workers, non-workers etc. are also explained in that volume.

B-I WORKERS AND NON-WORKERS CLASSIFIED BY SEX AND BROAD AGE-GROUPS

Fly-leaf

1. Table B-I given for the total, rural and urban areas for the district is the basic economic table showing the total population, the total number of workers, the classification of workers into nine industrial categories and non-workers by sex and broad age-groups. The age-groups adopted for the tables are 0-14, 15-34, 35-59, 60+ and 'age not stated'. The age-groups correspond to the different stages of life which have special significance with reference to capacity to work, viz, children, young persons, middle-aged persons and elderly persons. The corresponding table in the 1951 Census gives the distribution of population by eight livelihood classes and their further sub-divisions into self supporting persons, earning dependants and non-earning dependants. There was no classification by age-groups in that table. The Livelihood classes under which the population was grouped in 1951 were the following:—

I Cultivators of land wholly or mainly owned and their dependants

II Cultivators of land wholly or mainly unowned and their dependants

III Cultivating labourers and their dependants

IV Non-cultivating owners of land; agricultural rent receivers and their dependants

V Persons engaged in production other than cultivation and their dependants

VI Persons engaged in Commerce and their dependants'

VII Persons engaged in Transport and their dependants

VIII Persons engaged in other services and miscellaneous sources and their dependants

2. As it was felt that the strict application of the criterion of income or economic independence suppressed those who worked in family economic activity but did not actually earn an income like men other than the head of the household and women of the family or children working in cultivation or cottage industries of the household, the classification of the population into self-supporting persons and earning and non-earning dependants has been given up in the table for 1961. All persons who work including family workers who are not in receipt of any income or working children who cannot earn enough for their maintenance are treated as workers and grouped under the following industrial categories instead of the eight livelihood classes in 1951 referred to above:—

I Working as Cultivator

II Working as Agricultural Labourer

III Working in Mining, Quarrying, Live-stock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities

IV Working at Household Industry

V Working in Manufacturing other than Household Industry

VI Working in Construction

VII Working in Trade and Commerce

VIII Working in Transport, Storage and Communications

IX Working in Other Services

The non-workers have been classified under the following categories and dealt with in Table B-IX:—

1 Full-time students or children attending school who do no other work

2 Persons engaged in unpaid home duties who do no other work such as make articles at home for sale, or wages, nor help regularly even part-time in family cultivation, industry, trade or business

3 Dependants including infants and children not attending schools and persons permanently disabled from work because of illness or old age

4 Retired persons not employed again, rentiers, persons living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work and who does no other work

5 Beggars, vagrants, independent women without indication of source of income or others of unspecified sources of existence

6 Convicts in jails and inmates of penal, mental and charitable institutions

7 Persons seeking employment for the first time

8 Persons employed before, but were out of employment and were seeking work during the reference period

B-III INDUSTRIAL CLASSIFICATION OF WORKERS AND NON-WORKERS BY EDUCATIONAL LEVELS

Fly-leaf

1. This table presents the data relating to literacy and educational levels of the working population under the nine industrial categories and of the non-working population. It enables to assess the literacy and educational levels of the workers as well as the non-workers. The table is divided into two parts, Part A dealing with urban areas and Part B dealing with rural areas of the district.

2. Besides giving the number of illiterates and literates (without educational level) in both urban and rural areas, the remaining literates of these areas are classified as follows:—

Urban

1 Primary or Junior Basic
2 Matriculation or Higher Secondary
3 Technical diploma not equal to degree
4 Non-technical diploma not equal to degree
5 University degree or Post-graduate degree other than technical degree
6 Technical degree or diploma equal to degree or Post-graduate degree in
  (i) Engineering,
  (ii) Medicine,
  (iii) Agriculture,
  (iv) Veterinary and Dairying,
  (v) Technology,
  (vi) Teaching and
  (vii) Others

Rural

1 Primary or Junior Basic
2 Matriculation and above

3. All persons who have ability to read and write with understanding, i.e. to read any simple letter with felicity and write any simple letter with understanding are considered literates. Those who have passed Lower Primary or Junior Basic but have not passed Matriculation, Higher Secondary, S. S. L. C. or E. S. L. C. come under the category of Primary or Junior Basic and all those who have passed Matriculation, Higher Secondary, S.S.L.C. or E.S.L.C. come under the category of Matriculation or Higher Secondary.

4. In connection with the enumeration of technical personnel, degrees in science subjects like Physics, Mathematics, Chemistry, Geology, Geo-Physics, Geography etc., have been recognised as technical degrees. These do not come under the specific items (i.e. i to vi) covered by 'technical degree or diploma equal to degree or post-graduate degree'. Hence wherever the subject of graduation or post-graduation has been given, these have been included under 'Others' (i.e. vii) in the urban areas. This accounts for the high percentage of 'others' coming under 'technical degree or diploma equal to degree or post-graduate degree'.

B-IV INDUSTRIAL CLASSIFICATION BY SEX AND CLASS OF WORKER OF PERSONS AT WORK OTHER THAN AT CULTIVATION

Fly-leaf

1. This table contains the sex-wise distribution of non-agricultural workers according to their principal work by divisions, major groups and minor groups of Indian Standard Industrial Classification(I.S.I.C) issued by the Ministry of Labour and Employment, Government of India, following the International Standard Industrial Classification recommended by the U.N.O. The minor groups 000 to 004 and 999 of I.S.I.C. do not appear in this table because of the exclusion of cultivators, agricultural labourers and Non-Workers. Industrial minor groups 000 to 004 relate to agriculture and the minor groups 999 to fresh entrants to the labour market, who are treated as Non-Workers. The table is prepared in three parts, Parts A and B containing figures up to divisions and major groups only and Part C giving figures for minor groups also.

2. In table B-IV Part-A which is prepared for the total, rural and urban areas of the district, the workers principally engaged in household industry are divided into 'Employees' and 'Others' for each of the divisions 0, 1 and 2 & 3 and their major groups. For the rural areas the figures by divisions are furnished down to taluk level. The study of household industry is a special feature of the 1961 Census.

3. Table B-IV Part-B is prepared for total and urban areas of the district. For the rural areas the figures by divisions are furnished down to taluk level. Here the non-agricultural workers engaged in non-household industries are classified into 'Employer', 'Employee', 'Single worker' and 'Family worker' according to their participation in work. This distribution is available for each of the divisions and major groups of the I.S.I.C.

4. Table B-IV Part-C presents the combined as well as separate sex-wise figures of persons working in household industry and non-household industry by divisions, major groups and minor groups of I.S.I.C. for the total and urban areas of the district. For the rural areas the figures by divisions are furnished down to taluk level (B-IV Part C-1). In this table those minor groups the figures of which are less than 1 per cent of the respective divisions (less than 0.5 per cent in the case of division 2 & 3) have been omitted. The figures of such minor groups are shown in the appendix at the end of the table.

5. The corresponding table of 1951 Census viz, Table B-III, gives the number of self-supporting persons in non-agricultural livelihood classes by 10 divisions and 88 sub-divisions according to the Indian Census Economic Classification (I.C.E.C) classified into 'Employers', 'Employees' and 'Independent workers' according to the economic status. Under the I.C.E.C. scheme the unit of classification was in every case the individual. This scheme bears more resemblence to the occupational classification given in the table B-V of 1961 than to the I.S.I.C. scheme followed in table B-IV of 1961. Under the I.S.I.C. scheme the unit of classification is the organised establishment, the classification of every member of the establishment being according to the classification of the establishment based on the commodity produced or the service performed as a result of the work of the establishment.

6. It may be seen from the table that the figures under Minor group 900—'Activities unspecified and not adequately described including activities of such individuals who fail to provide sufficient information about their industrial affiliation to enable them to be classified'—are considerably large in both rural and urban areas of all districts. Most of these entries relate to those returning their nature of work as 'general coolies' or 'general labourers' and the nature of industry as 'no fixed place of work'.

7. The list of Indian Standard Industrial Classification by divisions, major groups and minor groups is reproduced below:—

89 Services (not elsewhere classified)

Division 9 Activities not adequately described

90 Activities unspecified and not adequately described. (This includes new entrants to the labour market)

(Classification and Code numbers at the 3 digit level in respect of minor groups are shown below)

Division 0 Agriculture, Live-stock, Forestry, Fishing and Hunting

Major Group (Code)	Description	Minor Group (Code)
00	FIELD PRODUCES AND PLANTATION CROPS—	
	Production of cereal crops (including Bengal gram) such as rice, wheat, jowar, bajra, maize	000
	Production of pulses, such as arhar, moong, masur, urd, khesari, other gram	001
	Production of raw jute and kindred fibre crops	002
	Production of raw cotton and kindred fibre crops	003
	Production of oilseeds, sugarcane and other cash crops	004
	Production of other crops (including vegetables) not covered above	005
	Production of fruits and nuts in plantation, vines and orchards	006
	Production of wood, bamboo, cane reeds, thatching grass, etc.	007
	Production of juice by tapping palms	008
	Production of other agricultural produce (including fruits and nuts not covered by code number 006 and flowers) not covered above	009
01	PLANTATION CROPS—	
	Production of tea in plantation	010
	Production of coffee in plantation	011
	Production of rubber in plantation	012
	Production of tobacco in plantation	013
	Production of ganja, cinchona, opium	014
	Production of other plantation crops not covered above	015
02	FORESTRY AND LOGGING—	
	Planting, replanting and conservation of forests	020
	Felling and cutting of trees and transportation of logs	021
	Preparation of timber	022

Major Group (Code)	Description	Minor Group (Code)
	Production of fuel including charcoal by exploitation of forest	023
	Production of fodder by exploitation of forests	024
	Production of gums, resins, lac, barks, herbs, wild fruits and leaves by the exploitation of forests	025
	Production and gathering of other forest products not covered above	026
03	FISHING—	
	Production of fish by fishing in sea	030
	Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries	031
	Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, pond	032
04	LIVE-STOCK AND HUNTING—	
	Production and rearing of live-stock (large heads only) mainly for milk and animal power such as cow, buffalo, goat	040
	Rearing of sheep and production of wool	041
	Rearing and production of other animals (mainly for slaughter) such as pig	042
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming	043
	Rearing of bees for the production of honey, wax and collection of honey	044
	Rearing of silk worms and production of cocoons and raw silk	045
	Rearing of other small animals and insects	046
	Trapping of animals or games propagation	047
	Production of other animal husbandry products such as skin, bone, ivory and teeth	048
	Division 1 Mining and Quarrying	
10	MINING AND QUARRYING—	
	Mining of coal	100
	Mining of iron ores	101
	Mining of gold and silver ores	102
	Mining of manganese	103
	Mining of mica	104
	Mining of other non-ferrous metallic ores	105
	Mining of crude petroleum and natural gas	106
	Quarrying of stone (includng slate), clay, sand, gravel, limestone	107
	Mining of chemical earth such as soda ash	108
	Mining and quarrying of non-metallic products not classified above such as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt	109

Major Group (Code)	Description	Minor Group (Code)
	Division 2 & 3 Manufacturing	
20	FOODSTUFFS—	
	Production of rice, atta, flour, etc., by milling dehusking and processing of crops and food-grains	200
	Production of sugar and syrup from sugarcane in mills	201
	Production of indigenous sugar, gur from sugarcane or palm juice and production of candy	202
	Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits	203
	Slaughtering, preservation of meat and fish and canning of fish	204
	Production of bread, biscuits, cake and other bakery products	205
	Production of butter, ghee, cheese and other dairy products	206
	Production of edible fats and oils (other than hydrogenated oil)	207
	Production of hydrogenated oils (vanaspati)	208
	Production of other food products such as sweet-meat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge	209
21	BEVERAGES—	
	Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery	210
	Production of country liquor	211
	Production of indigenous liquors such as toddy, liquor from mahua, palm juice	212
	Production of other liquors not covered above	213
	Production of aerated and mineral water	214
	Production of ice	215
	Production of ice-cream	216
	Processing of tea in factories	217
	Processing of coffee in curing works	218
	Production of other beverages	219
22	TOBACCO PRODUCTS—	
	Manufacture of bidi	220
	Manufacture of cigars and cheroots	221
	Manufacture of cigarette and cigarette tobacco	222
	Manufacture of hookah tobacco	223
	Manufacture of snuff	224

Major Group (Code)	Description	Minor Group (Code)
22	TOBACCO PRODUCTS—*concld.*	
	Manufacture of jerda and other chewing tobacco	225
	Manufacture of other tobacco products	226
23	TEXTILE—COTTON—	
	Cotton ginning, cleaning, pressing and baling	230
	Cotton spinning (other than in mills)	231
	Cotton spinning and weaving in mills	232
	Cotton dyeing, bleaching	233
	Cotton weaving in power looms	234
	Cotton weaving in handlooms	235
	Manufacturing of khadi textile in handlooms	236
	Printing of cotton textile	237
	Manufacturing of cotton nets	238
	Manufacturing of cotton, cordage, rope and twine	239
24	TEXTILE—JUTE—	
	Jute pressing and baling	240
	Jute spinning and weaving	241
	Dyeing and bleaching of jute	242
	Printing of jute textile	243
	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta	244
25	TEXTILE—WOOL—	
	Wool baling and pressing	250
	Wool cleaning and processing (scouring)	251
	Wool spinning and weaving in mill	252
	Wool spinning other than in mills	253
	Wool weaving in power loom	254
	Wool weaving in handloom	255
	Embroidery and art work in woollen textile	256
26	TEXTILE—SILK—	
	Spinning and weaving of silk textile in mill	260
	Dyeing and bleaching of silk	261
	Spinning of silk other than in mills	262
	Weaving of silk textile by power loom	263
	Weaving of silk textile by handloom	264
	Printing of silk textile	265
	Manufacture of silk cordage, rope and twine	266
27	TEXTILE—MISCELLANEOUS—	
	Manufacture of carpet and all other similar type of textile products	270
	Manufacture of hoisery and other knitted fabrics and garments	271
	Embroidery and making of crepe, lace and fringes	272
	Making of textile garments including raincoats and headgear	273
	Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags	274
	Manufacture of waterproof textile products such as oil cloth, tarpaulin	275
	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling	276
	Manufacture of coir and coir products	277
	Manufacture of umbrellas	278
	Processing and manufacture of textile products not covered above	279
28	MANUFACTURE OF WOOD AND WOODEN PRODUCTS—	
	Sawing and planing of wood	280
	Manufacture of wooden furniture and fixtures	281
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows	282
	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures	283
	Manufacture of other wooden products such as utensils, toys artwares	284
	Manufacture of veneer and plywood	285
	Manufacture of plywood products such as tea chest	286
	Manufacture of boxes and packing cases other than plywood	287
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products	288
	Manufacture of other wood and allied products not covered above	289
29	PAPER AND PAPER PRODUCTS—	
	Manufacture of pulp from wood, rags, waste-paper and other fibres and the conversion of such pulp into any kind of paper and paper board in mill	290
	Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper and paper board handmade	291
	Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp	292

Major Group (Code)	Description	Minor Group (Code)
30	PRINTING AND PUBLISHING—	
	Printing and publishing of newspapers and periodicals	300
	Printing and publishing of books	301
	All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry	302
	All types of binding, stitching, sizing and other allied work connected with binding industry	303
31	LEATHER AND LEATHER PRODUCTS—	
	Currying, tanning and finishing of hides and skins and preparation of finished leather	310
	Manufacture of shoes and other leather footwear	311
	Manufacture of clothing and wearing apparel (except footwear) made of leather and fur	312
	Manufacture of leather products (except those covered by code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles	313
	Repair of shoes and other leather footwear	314
	Repair of all other leather products except footwear	315
32	RUBBER, PETROLEUM AND COAL PRODUCTS—	
	Manufacture of tyres and tubes	320
	Manufacture of rubber footwear	321
	Manufacture of rubber goods used for industrial purpose	322
	Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat	323
	Productions of petroleum, kerosene and other petroleum products in petroleum refineries	324
	Production of coaltar and coke in coke oven	325
	Manufacture of other coal and coaltar products not covered elsewhere	326
33	CHEMICALS AND CHEMICAL PRODUCTS—	
	Manufacture of basic industrial chemicals such as acids, alkalis and their salts not elsewhere specified	330
	Manufacture of dyes, paints, colours and varnishes	331
	Manufacture of fertilizers	332
	Manufacture of ammunition, explosives and fireworks	333
	Manufacture of matches	334
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap	335
	Manufacture of soap and other washing and cleaning compounds	336
	Manufacture of turpentine, synthetic, resin and plastic products and materials (including synthetic rubber)	337
	Manufacture of common salt	338
	Manufacture of other chemicals and chemical products not covered above (including inedible oils and fats)	339
34-35	NON-METALLIC MINERAL PRODUCTS OTHER THAN PETROLEUM AND COAL—	
	Manufacture of structural clay products such as bricks, tiles	340
	Manufacture of cement and cement products	341
	Manufacture of lime	342
	Manufacture of structural stone goods, stone dressing and stone crushing	343
	Manufacture of stonewares, other than images	344
	Manufacture of stone images	345
	Manufacture of plaster of Paris and its products	346
	Manufacture of asbestos products	347
	Manufacture of mica products	348
	Manufacture of earthenware and earthen pottery	350
	Manufacture of chinaware and crockery	351
	Manufacture of porcelain and its products	352
	Manufacture of glass bangles and beads	353
	Manufacture of glass apparatus	354
	Manufacture of earthen image, busts and statues	355
	Manufacture of earthen toys and artwares except those covered by code No. 355	356
	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above	357
	Manufacture of other non-metallic mineral products not elsewhere specified	359
36	BASIC METALS AND THEIR PRODUCTS EXCEPT MACHINERY AND TRANSPORT EQUIPMENT—	
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods	360
	Manufacture including smelting, refining of non-ferrous metals and alloys in basic forms	361

Major Group (Code)	Description	Minor Group (Code)
36	BASIC METALS AND THEIR PRODUCTS EXCEPT MACHINERY AND TRANSPORT EQUIPMENT—*concld.*	
	Manufacture of armaments	362
	Manufacture of structural steel products such as joist, rail, sheet, plate	363
	Manufacture of iron and steel furniture	364
	Manufacture of brass and bell metal products	365
	Manufacture of aluminium products	366
	Manufacture of metal products (other than of iron, brass, bell metal and aluminium) such as tin can	367
	Enamelling, galvanising, plating (including electroplating), polishing and welding of metal products	368
	Manufacture of sundry hardwares such as G.I. pipe, wire net, bolt, screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38 and 39)	369
37	MACHINERY (ALL KINDS OTHER THAN TRANSPORT) AND ELECTRICAL EQUIPMENT—	
	Manufacture and assembling of machinery (other than electrical) except textile machinery	370

B-IV PART-C INDUSTRIAL CLASSIFICATION BY SEX AND DIVISIONS, MAJOR GROUPS AND MINOR GROUPS OF PERSONS AT WORK OTHER THAN CULTIVATION

APPENDIX

Minor groups having less than 1% of workers of the respective Division, (less than 0.5% in case of minor groups of Division 2 and 3), have been shown in this appendix. The following abbreviations have been used:—

HI—Household Industry

NHI—Non-Household Industry

M—Males

F—Females

CANNANORE DISTRICT

B-V OCCUPATIONAL CLASSIFICATION BY SEX OF PERSONS AT WORK OTHER THAN CULTIVATION

Fly-leaf

1. This table gives the distribution of non-agricultural workers by sex according to the 'National Classification of Occupations' issued by the Ministry of Labour and Employment, Government of India, which classfies occupations into 331 families, 75 groups and 11 divisions. A few modifications as mentioned below have been made in the National Classification of Occupations, while classifying the economic data in this table.

(i) The family OX4 relating to Geographers has been deleted and code 073 assigned to them. Actuaries coming under the family 073 according to the National Classification of Occupations have been brought under 072 Statisticians.

(ii) The families 400—Owner cultivators, 401—Cultivating tenants, 414—Agricultural labourers and the major group XO—Workers without occupations of the National Classification of Occupations have been omitted because of the exclusion of cultivators, agricultural labourers and non-workers for the purpose of classification in this table.

(iii) The code number 063 given to Jurists and Legal Technicians n. e. c. (including petition writers) in the National Classification of Occupations has been changed to 069.

(iv) The family 673—Teleprinter operators has been newly added.

Under this scheme each individual is classified on the basis of the nature of his (or her) work irrespective of the nature of establishment where he (or she) works. Each of these divisions, groups and families is cross-classified with the 7 non-agricultural industrial categories (categories III to IX).

2. The cross-classification of occupation with industry is a peculiarity of the 1961 Census and this being the first time that such an attempt is made there are some occupational families which appear incongruous *vis-a-vis* the industrial category in which they have been placed. Such instances are given below suggesting the more appropriate categories to which they should belong:—

APPROPRIATE INDUSTRIAL CATEGORIES OF OCCUPATIONAL FAMILIES

3. In spite of the limitations pointed out above, this table will be of much use in giving an idea about the variety of occupations and the employment opportunities under different industries.

4. In this table those occupational families the figures of which are less than 1 per cent of the respective Divisions (less than 0.5 per cent in the case of Division 7-8) have been omitted giving the figures of those families in the appendix at the end of the table.

B-V OCCUPATIONAL CLASSIFICATION BY SEX OF PERSONS AT WORK OTHER THAN CULTIVATION

Note:—Families having less than 1% of the workers of the respective division (less than 0.5% in case of families of Division 7-8) have not been shown in this table, but are given in the appendix to this table. Divisions thus affected are marked with an asterisk (*).

B-V OCCUPATIONAL CLASSIFICATION BY SEX OF PERSONS AT WORK OTHER THAN CULTIVATION

APPENDIX

Families having less than 1% of the workers of the respective Divisions and less than 0.5% in case of families of Division 7-8 only have been shown in this appendix. The following abbreviations have been used:—

III In Mining, Quarrying, Live-stock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities
IV At Household Industry
V In Manufacturing other than Household Industry
VI In Construction
VII In Trade and Commerce
VIII In Transport, Storage and Communications
IX In Other Services

B-VI OCCUPATIONAL DIVISIONS OF PERSONS AT WORK OTHER THAN CULTIVATION CLASSIFIED BY SEX, BROAD AGE-GROUPS AND EDUCATIONAL LEVELS IN URBAN AREAS ONLY

Fly-leaf

This table is prepared only for the urban areas of the district. This gives the distribution of non-agricultural workers in the 11 occupational divisions of National Classification of Occupations by educational levels and broad age-groups. The changes made in the National Classification of Occupations the purpose of B-V table are applicable in the case of this table also. The educational levels given in the table are the same as those given in table B-III Part-A and the age-groups are those followed in table B-I. The age-groups correspond to different stages of life which have special significance with reference to the capacity to work, viz, children, young persons, middle-aged persons and elderly persons. This table gives very valuable data in assessing the under employment among educated persons and also provides useful information about those occupations which attract educated personnel. In this table the figures of total workers under each occupational division have not been given by age-groups.

B-VII PART-A PERSONS WORKING PRINCIPALLY (i) AS CULTIVATORS (ii) AS AGRICULTURAL LABOURERS OR (iii) AT HOUSEHOLD INDUSTRY CLASSIFIED BY SEX AND BY SECONDARY WORK (i) AT HOUSEHOLD INDUSTRY (ii) AS CULTIVATOR OR (iii) AS AGRICULTURAL LABOURER PART-B INDUSTRIAL CLASSIFICATION BY SEX OF PERSONS WORKING IN NON-HOUSEHOLD INDUSTRY, TRADE, BUSINESS, PROFESSION OR SERVICE WHO ARE ALSO ENGAGED IN HOUSEHOLD INDUSTRY

Fly-leaf

1. This table which is prepared in two parts, viz, Part-A and Part-B, gives information on secondary work. Tables B-VII Part-A and Part-B are tabulated for total, rural and urban areas of the district. For rural areas it is presented by divisions down to taluk level. Workers who have no secondary work are excluded from this table.

2. Part-A of the table is prepared in the case of workers who are principally engaged

(i) as cultivator
(ii) as agricultural labourer or
(iii) at household industry

and who are also additionally engaged in any of the above three categories of work. Workers who are principally engaged at household industry are also given by divisions and major groups of I.S.I.C. This table is important as it shows the extent to which cultivation is supplemented by household industry or *vice versa*.

3. Part-B of the table presents data on the basis of cross-tabulation of principal and secondary work in the case of persons who are principally engaged in non-household industry, trade, business, profession or service and also additionally working at household industry. The household industries and non-household industries are further classified according to divisions and major groups of I.S.I.C. From this table the extent of influence of principal work on the nature of secondary work can be studied.

4. In Table B-VII Part-A the major groups of those industries where the persons engaged in auxiliary work are less than 5 per cent of the persons having that particular major group as principal work in Table B-IV Part-A have been omitted on the basis of the figures of total area. These major groups are shown in the appendix.

B-VII PART-A PERSONS WORKING PRINCIPALLY (i) AS CULTIVATORS (ii) AS AGRICULTURAL LABOURERS OR (iii) AT HOUSEHOLD INDUSTRY CLASSIFIED BY SEX AND BY SECONDARY WORK (i) AT HOUSEHOLD INDUSTRY (ii) AS CULTIVATOR OR (iii) AS AGRICULTURAL LABOURER—*contd.*

Note:—Major groups of household industry, where persons having secondary work as cultivation or agricultural labour, are less than 5% of the persons having the major group as principal work, have not been shown in this table, but are given in the appendix to this table Divisions thus affected are marked with an asterisk (*).

B-VIII PERSONS UNEMPLOYED AGED 15 AND ABOVE BY SEX, BROAD AGE-GROUPS AND EDUCATIONAL LEVELS

Fly-leaf

1. This is a very important table which provides information on persons aged 15 and above who are unemployed by sex and educational levels in rural and urban areas of the district. The table will be useful for purposes of planning for employment and also for assessing the available man power. It is divided into two parts. Part-A relates to urban areas and is presented for the district. Part-B relates to rural areas and is presented down to taluk level.

2. Part-A of the table gives the distribution of persons seeking employment for the first time in the age-groups 15-19, 20-24, 25-29, 30-34 and 35+ and also the distribution of persons who were employed before but now out of employment and seeking work in the age-groups 15-19 20-24, 25-34, 35-44, 45-59 and 60+ by educational levels, as given in Table B-III Part-A.

3. Part-B of the table presents the distribution of unemployed persons aged 15 and above by the same educational levels as given in Table B-III Part-B.

B-IX PERSONS NOT AT WORK CLASSIFIED BY SEX, BROAD AGE-GROUPS AND TYPE OF ACTIVITY

Fly-leaf

1. This table gives the type of activities of non-workers. Non-workers are classified into eight categories which are given in the fly-leaf to table B-I. It is the first time in the history of Indian Census that information on the activities of non-workers are collected and tabulated. Any study of workers and non-workers is likely to be incomplete without getting detailed data on the type of activities of non-workers, especially when the figures of non-workers are more than 50 per cent of the total population.

2. The excess of student population in the age-group 0-14 of this table over the literates in the age-group 5-14 of Table C-III of this volume is due to the student population in the lower standards of the primary schools, nursery schools and kintergarten schools who do not know how to read and write with understanding.

B-XII SAMPLE HOUSEHOLDS ENGAGED IN CULTIVATION ONLY CLASSIFIED BY SIZE OF LAND CULTIVATED AND NUMBER OF FAMILY WORKERS AND HIRED WORKERS IN RURAL AND URBAN AREAS SEPARATELY

Fly-leaf

This table shows the classification of households engaged in cultivation only according to the number of persons engaged in cultivation by the size of holding groups in acres. The number of persons engaged in cultivation are grouped under 1 person, 2 persons, 3-5 persons, 6-10 persons, more than 10 persons and unspecified. In the case of households where more than 1 person is working, the number of family workers and hired workers have been shown separately. The table is prepared for the rural and urban areas of the district and for the rural areas of taluks.

B-XIII SAMPLE HOUSEHOLDS ENGAGED BOTH IN CULTIVATION AND HOUSEHOLD INDUSTRY SHOWING SIZE OF LAND CULTIVATED CLASSIFIED BY PRINCIPAL HOUSEHOLD INDUSTRY IN RURAL AND URBAN AREAS SEPARATELY

Fly-leaf

1. This table shows the distribution of households engaged in both cultivation and household industry by the size of land cultivated. The household industries are classified according to divisions and major groups of Indian Standard Industrial Classification (I.S.I.C.) The table is prepared for rural and urban areas of the district.

2. The major groups of household industry having less than 10% of the figures of the respective divisions are not given in this table. A mark of asterisk (*) is given on such divisions and the figures of those major groups are shown in the appendix to this table.

APPENDIX

Major groups of Household Industry which are less than 10 per cent of the respective division have not been shown in the main table which shows such divisions by an asterisk. Major groups thus dropped from the main table are given run on in this Appendix. The figure preceeding the bracket represents the code number of the major group dropped from the table. Alphabets given in brackets are abbreviations meant for different ranges of holdings in acres as explained below. The numerical figures given after the alphabet denotes the number of households in that particular range indicated by that alphabet.

B-XIV SAMPLE HOUSEHOLDS ENGAGED ONLY IN HOUSEHOLD INDUSTRY CLASSIFIED BY PRINCIPAL HOUSEHOLD INDUSTRY IN ALL AREAS

Fly-leaf

1. This table prepared in two parts gives the classification of households engaged only in household industry by divisions, major groups and minor groups of I.S.I.C. for total, rural and urban areas of the district. Part A of the table shows for each division and major group of I.S.I.C. the number of households according to the number of persons engaged in household industry. The number of persons engaged in household industry are grouped under 1 person, 2 persons, 3-5 persons, 6-10 persons and more than 10 persons.

2. In table B-XIV Part A major groups of household industry having less than 10% of the figures of the respective division are not given in the table. A mark of asterisk (*) is given on such divisions and the figures of those major groups are shown in the appendix to this table.

3. Part B of the table gives the number of households engaged only in household industry by each minor group of I.S.I.C.

B-XV SAMPLE HOUSEHOLDS ENGAGED BOTH IN CULTIVATION AND HOUSEHOLD INDUSTRY CLASSIFIED BY SIZE OF LAND IN RURAL AND URBAN AREAS SEPARATELY

Fly-leaf

1. This table shows the classification of households engaged in both cultivation and household industry by the size of land cultivated and the number of persons engaged in household industry. In the case of households where more than 1 person is engaged in household industry the number of family workers and hired workers have been given separately. The table is prepared for the rural areas of the district and taluks and the urban areas of the district.

2. This table shows the relationship between the scale of household industry and the scale of cultivation.

B-XVI SAMPLE PRINCIPAL HOUSEHOLD INDUSTRY CLASSIFIED BY PERIOD OF WORKING AND TOTAL NUMBER OF WORKERS ENGAGED IN HOUSEHOLD INDUSTRY IN *ALL AREAS*

Fly-leaf

1. This table shows the classification of households engaged in household industry by the period of working grouped under 1-3 months, 4-6 months, 7-9 months and 10 months to 1 year. Under each of these groups the number of households, the number of family workers by sex and the number of hired workers are given. The information is available for each of the Divisions and major groups of principal household industry. Households engaged in household industry have been divided into those "with cultivation" and "without cultivation". The table is prepared for total, rural and urban areas of the district.

2. Major groups of household industry having less than 10% of the figures of the respective division have been omitted in this table. Such divisions are marked with an asterisk (*) and the figures of those major groups are shown in the appendix to this table.

3. This table furnishes valuable data on the seasonality of various household industries.

B-XVI SAMPLE |PRINCIPAL HOUSEHOLD INDUSTRY CLASSIFIED BY PERIOD OF WORKING AND TOTAL NUMBER OF WORKERS ENGAGED IN HOUSEHOLD INDUSTRY IN *ALL AREAS*

APPENDIX

Major groups of Household Industry which are less than 10 per cent of the respective divisions have not been shown in the main table which shows such division by an asterisk (*). Major groups thus dropped from the main table are given run on in this Appendix. The figure preceding the bracket represents the Code number of the major group dropped from the table. Alphabets given in brackets are abbreviations meant for different ranges of period of working in the Household Industries "with" or "without" Cultivation as explained below. The numerical figure given after alphabet denotes the number of households in that particular range indicated by that alphabet.

Abbreviation			Class range of period of working
A means	With	cultivation	1 to 3 months
B ,,	,,	,,	4 to 6 ,,
C ,,	,,	,,	7 to 9 ,,
D ,,	,,	,,	10 months to 1 year
X ,,	,,	,,	Unspecified
E means	Without	cultivation	1 to 3 months
F ,,	,,	,,	4 to 6 ,,
G ,,	,,	,,	7 to 9 ,,
H ,,	,,	,,	10 months to 1 year
Y ,,	,,	,,	Unspecified

The list of major groups dropped from the main table is given below:—

B-XVII SAMPLE HOUSEHOLDS CLASSIFIED BY SIZE AND PARTICIPATION IN HOUSEHOLD CULTIVATION OR INDUSTRY

Fly-leaf

1. This table shows the classification of households in the 3 groups viz, (i) Households engaged neither in cultivation nor in household industry (ii) Households engaged in household industry only and (iii) Households engaged in cultivation, by the size of households such as households having single member, 2-3 members, 4-6 members, 7-9 members and 10 or more members. The number of male and female members of the households in each of these groups also are given. The households engaged in cultivation are further classified by the size of land cultivated. The table is prepared for the total, rural and urban areas of the district.

2. The total number of households and the total household population in the total, rural and urban areas of the district are given below. The total number of households is the same as that given in Primary Census Abstract and the total household population is the total population as per P. C. A. excluding houseless and institutional population.

C—SOCIAL AND CULTURAL TABLES

NOTE

1. Eight tables constitute the Social and Cultural Tables of 1961 Census. Of these tables, Table C-I has been prepared from 20 per cent sample Household Schedules. All the other tables are based on full count. The eight tables are

C-I	Composition of sample households
C-II	Age and Marital Status
C-III	Age, Sex and Education
C-IV	Single year Age Returns
C-V	Mother tongue
C-VI	Bilingualism
C-VII	Religion
C-VIII	Classification of literacy and industrial category of workers and non-workers of Scheduled Castes/ Scheduled Tribes

2. In addition to the above eight tables there are eight tables relating to technical personnel. They are furnished as appendices to Table C-III in 'Volume VII—Kerala State—Part II C—Cultural and Migration Tables'.

All the tables of this series are presented in this volume except C-IV and C-VI. These tables are published in "Volume VII—Kerala State—Part II C—Cultural and Migration Tables".

C-I COMPOSITION OF SAMPLE HOUSEHOLDS BY RELATIONSHIP TO HEAD OF FAMILY CLASSIFIED BY SIZE OF LAND CULTIVATED

Fly-leaf

1. This table gives the family composition of households which has been prepared on a 20 per cent sample basis from the household schedules separately for the total, rural and urban areas of the district. The members in the household have been divided into two groups viz, family members and non-family members. Among the family members, heads of households and their spouses have been given by sex. Married relations have been classified into married sons, other married males and other married females. Never married, widowed and divorced or separated relations also have been given by sex. Similarly sex-wise figures of non-family members or unrelated members are given. This table will be of sociological interest indicating the strength of the joint family system.

2. Though the above table gives only the composition of households, the corresponding table C-I of 1951 Census gives both the size and composition of households which was based on a 0·1 per cent sample households prepared from the National Register of Citizens. But in the case of Travancore-Cochin State, this table was prepared from a 4 per cent sample households.

3. In this Census the size of the households (based on 20 per cent sample) has been given separately as Table B-XVII.

C-II AGE AND MARITAL STATUS

Fly-leaf

1. This table gives the sex-wise distribution of population by age-groups and marital status for the total, rural and urban areas of the district. For rural areas, it is presented down to taluk level. The age-groups followed in this table are 0-9, 10-14, 15-19, 20-24, 25-29, 30-34, 35-39, 40-44, 45-49, 50-54, 55-59, 60-64, 65-69, 70+ and 'age not stated' which conform to international standards.

2. The corresponding table at the 1951 Census (Table C-III Age and Civil Condition) was prepared on 10 per cent sample unlike the present one done on full count.

3. The marital status groupings in 1961 Census and the civil condition groupings in the 1951 Census are given below:—

Marital Status 1961		*Civil Condition* 1951	
1	Never Married	1	Unmarried
2	Married	2	Married
3	Widowed	3	Widowed or Divorced
4	Divorced or Separated

C-III AGE, SEX AND EDUCATION

Fly-leaf

1. This table gives the sex-wise distribution of population by age-groups and educational levels for the district. It is divided into three parts, Part-A dealing with all areas, Part-B dealing with urban areas and Part-C dealing with rural areas. The age-groups followed in all the three parts are 0-4, 5-9, 10-14, 15-19, 20-24, 25-29, 30-34, 35-44, 45-59, 60+ and 'age not stated'.

2. The classification of educational levels are different for rural and urban areas. Besides giving the number of illiterates and literates (without educational level), the remaining literates are classified as follows:—

Urban

1 Primary or Junior Basic
2 Matriculation or Higher Secondary
3 Technical diploma not equal to degree
4 Non-technical diploma not equal to degree
5 University degree or post-graduate degree other than technical degree
6 Technical degree or diploma equal to degree or post-graduate degree
  (i) Engineering
  (ii) Medicine
  (iii) Agriculture
  (iv) Veterinary and Dairying
  (v) Technology
  (vi) Teaching
  (vii) Others

Rural

1 Primary or Junior Basic
2 Matriculation or Higher Secondary

3. All persons who have ability to read and write with understanding, i.e., to read any simple letter with felicity and write a simple letter with understanding, are considered literates. Those who have passed Lower Primary or Junior Basic but have not passed Matriculation, Higher Secondary, S.S.L.C. or E.S.L.C., come under the category of Primary or Junior Basic and all who have passed Matriculation, Higher Secondary, S.S.L.C. or E.S.L.C. come under the category of Matriculation or Higher Secondary.

4. In connection with the enumeration of technical personnel, degrees in science subjects like Physics, Mathematics, Chemistry, Geology, Geo-Physics, Geography etc., have been recognised as technical degrees. These do not come under the specific items covered by 'technical degree or diploma equal to degree or post-graduate degree'. Hence wherever the subject of graduation has been given these have been included under 'others' in the urban areas. This accounts for the higher percentage of 'others' coming under 'technical degree or diploma equal to degree or post-graduate degree'.

C-V MOTHER TONGUE

Fly-leaf

This table which corresponds to table D-I Language (i) Mother tongue of 1951 Census gives the sex-wise distribution of the population under different mother tongues for the total, rural and ruban areas of the district and upto taluk level for rural areas. This is finalised in consultation with the Linguist of Registrar General's Office. The following notes have also been prepared by the Linguist.

NOTE 1

1. The following mother tongues arranged in alphabetical order in Col. 1 of the statement given below as per Table C-V have been classified in the Linguistic Survey of India. The Linguistic Survey of India Classification Number is mentioned against each mother tongue in column 3.

2. If in column 3 no classification Number is given against any mother tongue of Col. 1, then it would mean that the name refers to either old or middle Indo Aryan language or a language group or branch or family name from the Linguistic Survey of India.

3. Wherever a tongue is mentioned in Col. 3 it is to be understood that the mother tongue is either a dialect or another name or form of the tongue mentioned against it in column 1 which in its turn has been classified by the Linguistic Survey of India in the appropriate place for that tongue.

4. If in column 1, there is a tongue which bears no classification number in the Linguistic Survey of India then in column 2 the name of the classified language or group will be given of which the mother tongue of column 1 is either a dialect or another name or form. In such a case the number of classified language of column 2 has been given in column 3.

5. In column 2 standardized spellings according to Linguistic Survey of India has been given against each mother tongue of column 1.

Fly-leaf

The distribution of population by sex under different religions is given in this table. In the table the figures of only six major religions in India have been shown. The remaining beliefs have been clubbed into 'other religions and persuations' the details of which are presented in the supplement to the table. This table corresponds to table D-II Religion of 1951 Census.

C-VIII SCHEDULED CASTES AND SCHEDULED TRIBES

Fly-leaf

1. This table is prepared in two parts, Part A dealing with Scheduled Caste population and Part B dealing with Scheduled Tribe population. These give the sex-wise distribution of Scheduled Castes and Scheduled Tribes into literates and illiterates and also into workers in the nine industrial categories and non-workers for total, rural and urban areas of the district and for rural areas by taluks.

2. The corresponding Table of 1951 (Table D-III Scheduled Castes and Scheduled Tribes) shows only the population of Scheduled Castes and Scheduled Tribes without giving their livelihood pattern.

D MIGRATION TABLE

NOTE

Seven tables in this series present the migration trends analysed on the reports of the 1961 Census. They are—

D-I	Non-Indian Nationals
D-II	Place of birth
D-III	Migrants classified by place of birth and duration of residence in place of enumeration
D-III A	Migrants from other State and outside India (less than 5 years of duration) classified by age-groups
D-IV	Migrants in cities classified by sex, broad age-groups, educational levels and in case of workers also by occupational divisions and groups
D-V	Cities showing population born locally, migrants from rural areas and migrants from other towns and cities
D-VI	Distribution of industrial categories of workers and non-workers by place of birth

All the above tables are published in "Volume VII—Kerala State—Part II C-Cultural and Migration Tables".

E HOUSING AND ESTABLISHMENT TABLES

NOTE

The data for these tables have been compiled from the Houselists prepared for the 1961 Census. The Housing and Establishment Tables are presented in the following five tables:—

E-I	Census houses and the uses to which they are put
E-II	Tenure status of sample census households living in census houses used wholly or partly as dwelling (based on 20% sample)
E-III	Census houses used as factories and workshops classified by industry, power and no power used and size of employment
E-IV	Distribution of sample households living in census houses used wholly or partly as dwelling by pre-dominant material of wall and pre-dominant material of roof (based on 20% sample)
E-V	Sample households classified by number of members and number of rooms occupied (based on 20% sample)

All the above tables are published in "Volume VII—Kerala State—Part IV—Report on Housing and Establishment Tables".

SCT-I INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK AND NON-WORKERS BY SEX FOR SCHEDULED CASTES AND SCHEDULED TRIBES

Fly-leaf

1. This table prepared in two parts, Part A dealing with Scheduled Castes and Part B dealing with Scheduled Tribes, gives for each caste and tribe separately for rural and urban areas of the district and the sex-wise distribution of population into workers in the nine industrial categories and non-workers.

2. Part A also gives the sex-wise number of workers in each Scheduled Caste engaged in special occupations like 'Tanning and currying of hides and skins' and 'Scavenging'.

3. The following statement presents the taluk-wise distribution of Scheduled Castes and Scheduled Tribes by rural-urban distribution and by sex.

PRIMARY CENSUS ABSTRACT

Fly-leaf

1. The Primary Census Abstract is presented down to block level for urban areas and desom level for rural areas.

Occupied Census House

2. A census house is a structure or part of a structure, inhabited or vacant, giving on the road or a common staircase or a common courtyard leading to a main gate or enjoying a separate entrance. It may be a dwelling, a shop, a shop-cum-dwelling, a workshop-cum-dwelling, or a place of business, workshop, school etc. A census house that is inhabited is an occupied census house.

Dwelling

3. A dwelling is a census house used exclusively for residential purposes.

Shop-cum-dwelling

4. A shop-cum-dwelling is a census house used both as a shop and as a residence.

Workshop-cum-dwelling

5. A census house used both as a workshop and as a residence is a workshop-cum-dwelling.

Household

6. A household is a group of persons, who commonly live together in the same census house and take their meals from a common mess unless the exigencies of work prevent them from doing so.

Literacy and education

7. For purposes of enumeration the ability to read and write was recognised as the test of literacy. The test applied for reading was the ability to read any simple letter either in print or in manuscript and that for writing was the ability to write a simple letter. Persons who could both read and write and have also passed a written examination or examinations as a proof of the educational standard attained were taken as educated persons.

Workers and non-workers

8. A worker was defined for the purposes of this census as a person working as a cultivator, or an agricultural labourer, or working at household industry, or doing any other productive work, or working in any possible combination of the above four categories of work. The basis of work was deemed to be satisfied in the case of seasonal work like cultivation, live-stock, dairying, household industry etc., if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce, the basis of work was deemed to be satisfied if the person was employed during any of the fifteen days preceding the day of enumeration. A person who was working but absent from his work during the fifteen days preceding the day on which enumerated, or even exceeding the period of fifteen days due to illness or other causes was treated as worker. Work includes not only actual work but also effective supervision and direction of work. Persons under training as apprentices with or without stipend or wages were also regarded as workers. An adult woman who was engaged in household duties but was doing no other productive work to augment the family's resources was not considered as a worker. If, however, in addition to her household work she engaged herself in work such as rice pounding for sale or wages or in domestic services for wages for others or minding cattle or selling firewood etc., or any such work, she was treated as a worker. Persons like beggars, pensioners, agricultural or non-agricultural royalty, rent or dividend receivers, who might have been earning an income but were not participating in any productive work, were not treated as workers unless they also worked in cultivation, industry, trade, profession, business or commerce. A public or social service worker who was actively engaged in public service activity or a political worker who was also actually engaged in furthering the political activity of his party was regarded as a worker. A person was considered to be working as cultivator, if, he or she, was engaged either as employer, single worker or family worker in cultivation of land or supervision or direction of cultivation of land owned or held from Government, institutions or private persons. A person was considered agricultural labourer if he was working in another person's land only as labourer without exercising any supervision or direction in cultivation for wages in cash, ind or share such as a share of produce. He should have no right or lease or contract on land on which he works, nor should he be responsible for taking decisions as to which crop to sow and when, or taking the risks of cultivation. A person was considered as working in household industry if the industry comes within the definition of the household industry. A worker may be an employer, i.e., a person who hires one or more persons in his work, or an employee, i.e., who does his work under others for wages or salary in cash or kind, or a single worker, i.e., who is doing his work without employing others except casually and without the help of other members of the family except casually, or a family worker, i.e., a member who works without receiving wages in cash or kind, in an industry, business or trade, conducted mainly by members of the family and ordinarily does at least one hour of work every day during the working season. The following explanations of these categories of workers were accepted for census enumeration:—

(i) An employer is not only responsible for his own personal work but also for giving work to others in the business run by him. But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others, is not an employer, even if he has the power to employ another person in his office on behalf of his own employer or employers.

(ii) There may be persons who are employed as managers, superintendents, agents etc., and in that capacity employ or control other workers on behalf of their own employers. Such persons are only employees, as explained above, and should not be regarded as employers.

(iii) A single worker is not employed by any one else and in his turn does not employ anybody else not even members of his household except casually. The definition of a single worker will include a person who works in joint partnership with one or several persons hiring no employees, and also a member of a producers' co-operative. Each one of the partners or members of such producers' co-operatives is a 'single worker'.

(iv) An industry in which a family worker is engaged should be on a scale larger than what is earned in household industry in Question 10, whether run at home or away from home, in town or village, and even away from village in rural areas, and should ordinarily be in the nature of a recognised partnership, joint stock company or registered factory. For the purpose of this definition members of a family may be drawn from beyond the limits of the household by ties of blood or marriage. The family worker may not be entitled to a share of the profits in the work of the business carried on either by the person or head of the houeshold or other relatives.

For purposes of enumeration, non-workers were persons who were not engaged in any productive work. Thus a person who had been offered work but had not actually joined, or an adult woman who was engaged in household duties but was doing no other productive work to augment the family's resources, or persons like beggars, pensioners, agricultural or non-agricultural royalty, rent or dividend receivers, who were earning an income but were not participating in any productive work were all treated as non-workers. The non-workers are sub-grouped into eight categories according to the nature of their activity as given below:—

1 Full time students or children attending school who do no other work

2 Persons engaged in unpaid home duties who do no other work such as make articles at home for sale, or wages, nor help regularly even part-time in family cultivation, industry, trade or business

3 Dependents including infants and children not attending schools and persons permanently disabled from work because of illness or old age

4 Retired persons not employed again, rentiers, persons living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work and who does no other work

5 Beggars, vagrants, independent women without indication of source of income or others of unspecified sources of existence

6 Convicts in jails and inmates of penal, mental and charitable institutions

7 Persons seeking employment for the first time

8 Persons employed before, but were out of employment and were seeking work during the reference period

The following industrial classification has been adopted for the primary economic classification of population:—

I Working as Cultivator

II Working as Agricultural Labourer

III Working in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations. Orchards and allied activities

IV Working at Household Industry

V Working in Manufacturing other than Household Industry

VI Working in Construction

VII Working in Trade and Commerce

VIII Working in Transport, Storage and Communications

IX Working in Other Services

X Non-workers

Household Industry

9. For purposes of enumeration an industry was considered to be a household industry if it was below the scale of a registered factory conducted by the head of the household himself and/or mainly by members of the household at home or within a village in rural areas and only at home in urban areas. The industry should have embraced production, processing, servicing or repairing and included making and selling of goods. The following three tests were laid down to determine whether an industry is a household industry or not:—

(a) Household industry should embrace, manufacturing, processing, servicing or repairing and may include sale but should not be confined simply to buying and selling. At least part of the goods offered for sale from the household should be manufactured or processed by members of the household.

(b) Household industry should be on a household scale where the workers mainly will be the head of the household himself and members of the household, the role of hired workers from outside being of secondary importance. Thus, in any household industry, members of the household should be in a position to lend a hand in the industry whenever they find time in the course of their daily chores. Household industry cannot, therefore, be on the scale of a registered factory but can use machinery and employ power like steam engine or oil engine or electricity to drive the machinery.

(c) Location is also important, for proximity decides participation by members of the household. In a village this participation is possible if the household industry is located at home or within the village, because village organisation is such as makes it possible for members of the household to move about freely in the village to look after their work. In urban areas such a free movement is not possible and, therefore, in urban areas, only those industries which are located at home can be considered for purposes of household industry Where, however, part of the work is done outside the house e. g., preparing and dyeing the yarn for weaving or winding into warp and woof or cleaning metal surfaces before electroplating in baths, it should still be considered a household industry, even in urban areas, as the main operation of weaving or of electroplating is conducted within the house and only one or two operations are conducted outside.
