## FOREWORD

The District Census Handbook (DCH), compiled by the census organisation on behalf of the state government, is one of the most valuable products of the census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to district administration. The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The District Census Handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series, some new features alongwith the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referent village, the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect, particularly in relation to amenities and land use pattern, is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column 'total population and number of households' has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled caste and scheduled tribe population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement-IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in Statement-IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in Statement-V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serve this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series, it has been so designed that Part-A of the volume contains village and town directory and Part-B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto tahsil/town levels. At the beginning of the DCH, a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The District and Tahsil/Police Station/CD Block, etc. level maps, depicting the boundaries and other important features, have been inserted at appropriate places to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the state under the direction of Shri D.N. Dhir, I.A.S., Director of Census Operations, Punjab, on behalf of the State Government which has borne the cost of printing. The task of planning, designing and coordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (of Social Studies) of my office,. Dr. B.K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M.M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

New Delhi :

The 26th April, 1982.

P. PADMANABHA,

Registrar General, India.

## PREFACE

As being regularly presented hithertofore, since 1951 census, we have now the privilege of presenting the District Census Handbooks consequent upon 1981 census.

To shorten the time lag to minimum after the compilation of census 1981 data and issuance of this Handbook as a sort of self-contained reference book, predominantly based on census data for the district, action was initiated upon the project as early as in July, 1979. The Registrar General, India indicated the revised formats and statements designed for this series of books. The improvements were with a view to making the data more useful for administrators, planners, scholars and other categories of users.

There are 134 towns categorised as urban area and 12,899 villages (45 tahsils) as the rural component in the state. The formidable task of collecting and compiling of this voluminous data for such a large number of units had its own problems and difficulties, both in the matters of chase up and in obtaining correct data which could be test-checked in terms of consistency with what was obtained and published consequent upon 1971 census data. Several gruelling cross checks had to be adopted to tally such items as area figures and the land use pattern for each unit.

The statements and schedules for collecting information from the rural areas were translated into Punjabi and also test-checked to assess their acceptability and responsiveness by those who were to make their use. (I had also unsuccessfully toyed with the idea of collecting informations on some other items that could indicate comparative affluence of rural Punjab but had to give it up in the light of keeping to uniformity in presentation of data on all India pattern).

The statements/schedules for town directory were transmitted to the Chief Executives of the local bodies and those for rural areas were transmitted to the SDOs (C) (since all tahsils in Punjab have been converted into sub-divisions) for necessary supply of data by the revenue staff under them. The officers and senior staff of the directorate that had been made directly responsible for houselisting operations and had reported to the field in October, 1979, were also charged with getting these through on personal contacts. This resulted in our getting the feed back by May, 1980, on the conclusion of houselisting operations, though some small instalments of these schedules continued till September/October, 1980.

A cell had been created at the directorate to scrutinise the data as received and make preliminary compilation. The data as obtained from the field was supplemented with the data collected from the various heads of the departments at the state level, particularly in matters of amenities and facilities in the fields of education, medical, communications and the like. The staff working in the cell was once again out in the field for assisting in the second field operation, namely enumeration, and it was only on its conclusion that the work of compilation started in May-June, 1981. The three Deputy Directors (at the regional tabulation offices) were in position about the same time in the field and the gaps in data, needing reconciliation in figures were got through these field officers on personal contacts with the concerned quarters.

On the compilation of the Primary Census Abstract (PCA) in March, 1982, when the figures were available for projection in this volume, the whole exercise was consolidated to give birth to the instant manuscript.

The data in the book is being presented in two parts-Part-A comprises Village and Town Directory and Part-B Primary Census Abstract villagewise and town/wardwise, separately. In addition, Primary Census Abstract for scheduled castes upto tahsil/town level is also presented. (There are no scheduled tribes in the state)

An analytical note based on a number of inset tables compiled out of the data from village and town directory and PCA has also been added for the benefit of the users, but the greater aim has been to present the data as compiled and leave further deeper study for those for whom the publication is meant.

We are grateful to the large number of personnel of the State Revenue Department at the village, tahsil, sub-division and district levels and the municipal staff in all the local bodies in the state for their cooperation in filling up the statements/schedules for providing the data.

The production of this book (and for that matter all the 12 District Census Handbooks) has been the handiwork of consistent and constant efforts put in jointly by almost all the staff of the directorate, though only at one point of time or the other in certain cases. The collection of data for Village and Town Directory, as mentioned earlier, was a major work in the pre-census period and after the census most of the staff was busy in tabulation and compilation of the census data both at the regional tabulation offices and at the directorate. The DCHB Cell (specially created) thereafter commenced work on inset tables while the senior staff and the officers took to developing the fly-leaves and explanatory notes. Simultaneously the map section was deep in work for producing the maps that had to accompany these books.

I would resist the temptation of mentioning any single incumbent at any level of the hierarchy individually for apparent reasons, and would rest content with acknowledging my debt to all of them as appended hereto.

I had acted only as coordinator and at times as editor and was very ably supported by a set of dedicated officers who spared no pains to push in the manuscripts to the press in a record time, unknown in the annals of this directorate so far.

As in the case of other aspects of census work connected with this gigantic decadal exercise, I always looked up to Shri P. Padmanabha, Registrar General & Census Commissioner, India, for guidance, inspiration and encouragement and I feel indebted to him. Shri N.G. Nag, Deputy Registrar General (Social Studies) was forthcoming in his unassuming and profound style for advice.

D.N.DHIR,

Director Census, Punjab.

Chandigarh,
September, 1982.

## ACKNOWLEDGEMENTS

**Preliminary work—collection, compilation and scrutiny of data relating to Village and Town Directory :**

A cell was created in July, 1979, under J.C. Kalra, Deputy Director, who out of his earlier experience and the instructions received from Registrar General, India, directed the collection of data and allied work. He was ably assisted by D.P. Jain, Charan Singh and Vishwa Mittar, Investigators, at one occasion or the other. The Statistical Assistants, who laid down the work at the foundation level at that time, consisted of Malkiat Singh, Munishwar Dutt, Joginder Singh and Pawan Kumar with cooperative efforts of number of Computors, namely Mohinder Pal, R.P. Pathak, Parkash Chand, Varinder Singh, Hardeep Kaur, Satya Arora, Harbeer Kaur and Asha Vasisht.

**Primary Census Abstract included in this book—manual preparation at the Regional Tabulation Offices at Jalandhar, Patiala and Bathinda :**

R.P. Tomar, R.K. Singh and S.P. Grover, Deputy Directors, were incharge of these tabulation offices respectively and put in their best to conclude the work fairly ahead of the scheduled target. They were assisted by the Investigators, namely, N.S. Bhadauria, Charan Singh and Ajit Singh Dhillon, respectively. The Statistical Assistants and Computors who worked in these RTOs were S.C. Bassi, Balbir Singh, Jai Dev and R.P. Singh at Jalandhar, Tarsem Lal Garg, S.K. Joshi, .S.P. Goel and Varinder Singh at Patiala and Balwant Rai, (Now Investigator), Bhagirath Singh (Now Investigator), Raghbir Singh, J.S. Negi and H.P. Sharma at Bathinda.

**Preparation of Inset Tables, framework of Handbooks and their drafting:**

Inset tables, appendices and allied tables were prepared in the specially created cell of 'District Census Handbooks' headed by S.P. Grover earlier and later by Ajit Singh, Deputy Directors. They have had experience of such publications earlier and imparted suitable directions to the staff in the cell for presentation of the data and its analysis as per the instructions received from the office of Registrar General, India, from time to time. Charan Singh, Investigator, Balwant Rai (now Investigator), Raghbir Singh, Tarsem Lal, Statistical Assistants and Satya Arora Santosh Kumari, Harbeer Kaur and H. P. Sharma, Computors worked in this cell.

The cell provided the framework of the Handbooks and the first drafts were attempted by Deputy/Assistant Directors who were entrusted with particular volume(s). This first draft was then finalised during discussions in officers' meetings held almost daily with the Director. Thus the final draft emerged.

**Maps :**

The work for preparation of maps to be included in District Census Handbooks commenced under the supervision of Madhav Shyam, the then Senior Geographer, but mid-way was taken over by G.S. Gill, Assistant Director, who headed the map section during the vital period. He was ably assisted by Jiwan Singh Gill, Artist (now Senior Artist), Usha Kalra, Artist and Kulbir Singh, Draftsman. Because of his knowledge of geography and map work, he delivered the goods despite the absence of Geographer and Senior Geographer in the directorate.

**Manuscript finalisation :**

The final draft(s) as emerging out of the deliberations of the officers were entrusted to a cell called 'Press Manuscript Cell' headed by M.L. Sharma, Assistant Director who was actively assisted by Balwant Rai Investigator and P.S. Jangu Statistical Assistant, They raced against time frequently to give final shape to the volume(s) for onward transmission to the press.

**Typing :**

K.C. Pardesi, Confidential Assistant (formerly Senior Stenogrpher), headed this cell. His knowledge of such publications earlier was an asset. He was assisted by Ajmer Singh, Stenographer and some of the other typists from the various seats in the directorate.

**Printing :**

This cell was headed by M.L. Sharma, Assistant Director. and actively assisted by H. S. Sudan and S.P. Goel. They drew upon the services of others in the directorate, wherever necessary.

To each one of them I acknowledge my thanks.

Shri M. S, Mahadeokar Assistant Controller of the U.T. Printing Press cooperated in ensuring that the publication gets the light of the day at the earliest.

D.N. DHIR,

Director Census, Punjab.

Chandigarh,
September, 1982.

# RUPNAGAR DISTRICT—A SHORT PROFILE

**Location :**

District Rupnagar, formerly known as Ropar, lies North latitude 30°—32′ and 31°—24′ and East longitude 76°-18′ and 76°-55′. It is a sub-montane district which is situated in the eastern part of the state. It extends from north-west to south-east along the lower Shivalik hills, encompassing watershed of the hills towards plains. It shares boundaries with Himachal Pradesh and Haryana states and Union Territory of Chandigarh. It is bounded on the north by Solan and Bilaspur districts of Himachal Pradesh, on the east by Ambala district of Haryana state, on the south by Patiala and Ludhiana districts and on the west by Hoshiarpur district and partly Una district of Himachal Pradesh.

**Origin of Name :**

The district takes its name from the district headquarters of the same name, formerly known as Ropar but rechristened as Rupnagar by the State Government on 16th November, 1976 to restore its ancient name. The legend goes that the town was founded by Raja Rokeshar who named it Rupnagar after his son Rup Sen, which later corrupted to Ropar and remained in vogue all along, till the above change. Incidentally, the name Rupnagar also fits into the beautiful landscape in the northern part of the district which is formed by Shivalik foothills with lush green forests.

**Area :**

According to the Surveyor General India, the district has an area of 2085 ·0 sq. kms. Out of this area 77 ·3 sq. kms. is urban, which is shared by 9 towns of the district. The remainig 2007 ·7 sq. kms. is, however, rural. The tahsilwise break-up of areas as supplied by the Director, Land Records, Punjab, is : Anandpur Sahib (636 ·6 sq. kms.), Rupnagar (704 ·6 sq. kms.) and Kharar (707 ·7 sq. kms.). It would be seen that when tahsil totals are added up, these give a total area of 2048 ·9 sq. kms. which do not tally with the rural area of the district obtained by subtracting urban area from the district area supplied by the Surveyor General India. In fact the urban areas figures have been supplied by the local bodies whereas the rural area figures have been supplied by the Director Land Records, Punjab. Hence the difference in the area figures.

**Climate:**

The district, being located in the sub-montane region, has a fairly moderate climate during summer and winter months. The summer season sets in April and lasts upto September. The hottest months are May and June when mercury shoots up to 45°C. The rainy season sets in the 1st week of July and lasts upto September. The weather remains sultry and humid during the rainy season. The winter season starts in October and lasts upto middle of March. January and February are the coldest months when mercury touches down to as low as 4°C. Winter rains usually set in the middle of February. However, winter precipitation is quite heavy and is beneficial to the winter crops, especially wheat. Hailstorms are common in February and March and cause extensive damage to wheat and gram crops at times.

**Rivers and drains :**

The district is sub-montane and is situated in the Shivalik foothills. It is criss crossed by number of streams and rivers. However, the important ones are: Satluj, Sawan and Sirsa.

**The Satluj:**

This rises from lake Mansarover in the Tibet Plateau. After flowing through Anandpur Sahib tahsil, it forms a boundary between Hoshiarpur and Rupnagar districts in Rupnagar tahsil. The river has been dammed at Bhakra forming a large lake called Gobind Sagar for supplying water for power and irrigation throughout the year. Two headworks have also been built up each at Rupnagar and Nangal for diverting waters into Sirhind Bist Doab and Bhakra Canals. It is a snow fed river and has plenty of water throughout the year.

**The Sawan :**

This rises in Una Valley near Daulatpur Chowk in Himachal Pradesh. It flows most of its course in Una district before entering Anandpur Sahib tahsil. It merges into Satluj near village Bhallan. This is mainly a rainy season stream and is notorious for its wide expanses of sandy bed and flash floods which take a heavy toll of human and cattle during the rainy season.

**The Sirsa :**

This rises in the hills above Kalka and flows in the Nalagarh Valley before entering Rupnagar tahsil and ultimately joins Satluj at Arankot in Rupnagar tahsil. In the past it was a dreaded stream for it used to take a heavy tol

of human life from amongst pilgrims who visited Naina Devi and Anandpur Sahib shrines. The stream has since been bridged on the Rupnagar-Nangal road and human losses have been minimised.

Besides the above rivers and streams there are many seasonal streams which recede as fast as they rise on rains and do extensive damage to the standing crops and property. Efforts are afoot to channelise these to minimise losses.

**Topography:**

A large area of the district is covered by forests and hillocks. The northern portion of Anandpur Sahib and Rupnagar tahsils fall in the sub-montane belt while the whole of Kharar tahsil and lower parts of Rupnagar and Anandpur Sahib tahsil fall in the alluvial plains. A sizable area in the district is riverain and is either under rivers or rainy season streams. A large part of this area, especially along river Satluj, has been reclaimed as a result of various land reclamation measures and construction of embankments.

**Present Jurisdiction:**

It is the 11th district of the state in the chronological order, followed in 1972 by creation of the last and the twelfth district of the state viz. Faridkot. It was carved out by merging Kharar tahsil (minus Chandigarh Union-Territory) and Rupnagar tahsil of erstwhile Ambala district and Anandpur, Naya Nangal and Nangal Towns alongwith 237 villages of Una tahsil of Hoshiarpur district on 1st November, 1966, viz. on reorganisation of the State when Haryana was carved out and green hill areas merged into neighbouring Himachal Pradesh. The district is sub-divided into three tahsils: Anandpur Sahib, Rupnagar and Kharar. Besides there are 9 towns. The district has undergone some jurisdictional changes since 1971 census which have been given in Annexure. It shows that Rupnagar has made a net gain of 20 villages, as against a gain of 29 villages, it lost 9 villages only.

**Land utilisation:**

About two third of the total area of the district is under cultivation and most of it is unirrigated. The percentage of irrigated area to total cultivable area is 38·6. Canals, wells and tubewells are the main sources of irrigation. The Sirhind and Bhakra canals which flow through the district account for irrigation of sizeable area. Of late tubewells have also become popular in areas where eit her there are no canals or water table is too deep to permit well irrigation. Tubewell irrigation has become possible due to easy availability of electricity.

**Agriculture :**

The principal crops of the district are wheat, maize, rice and sugarcane. More than half of the cultivated area is under wheat. Sugarcane cultivation received an impetus with the setting up of a co-operative sugar mill at Morinda. The introduction of package programme entailing use of high yielding varieties of seeds, chemical fertilizers, pesticides, effective water management etc. has helped the district in increasing its agricultural production significantly.

**Animal Husbandry:**

With the decrease in the grazing lands and pastures, the cattle population is on the decline. From 362,000 cattle population in 1966, the number has come down to 317,100 in 1972 (Figures for which year are available). The decline is further accentuated due to people's preference for high breed cattle. The exotic breeds have become popular, especially the jersy cow. Further due to various schemes such as loans for purchase of fine breed cattle, uneconomical cattle are being dispensed with. Due to ready saleability of milk in the ever expanding urban areas and to Punjab Dairy Development Corporation, farmers are taking to modern dairy farming practices. Poultry have also become popular as large number of poultry farms have come up in the district, especially in the Kharar tahsil. There were 36 dispensaries and 19 cattle extension centres in the district in 1979-80 as against 11 dispensaries on 11 extension centres in 1966-67 which rendered services for the cattle. There were 6·31 such institutions per hundred inhabited villages in1979-80 as compared to 2·57 in 1966-67.

**Communications, Railways and Roads :**

In this district there are 6 telephone exchanges, 22 telegraph offices and 138 post offices which provide efficient services both in urban and rural areas in 1966-67.

In the year 1979-80 there were 1,767 kms. of pucca roads showing phenomenal increase upon the figure of 626 kms in 1970-71. For every 100sq. kms of area there are 85 kms. of pucca roads and for every one lakh persons there are 264.5 kms. of pucca roads. It is heartening to note that all the inhabited villages of the district are connected by metalled roads. The following national and state Highways pass through the district :

NH 21 : from junction of NH 22 :Chandigarh-Rupnagar-Bilaspur-Mandi-Manali

SH. 16 : Kharar-Ludhiana-Firozpur

SH 22 : Kiratpur-Nangal-Hoshiarpur-Tanda-Amritsar

The district is also well-served by an efficient public and private transport system as all the major centres of trade and industry are well connected with other such centres in the state and the country. Important places of historic and public interest are also well served by road transport.

The district is also well served by railways. Morinda, Kurali, Ropar, Kiratpur Sahib, Anandpur Sahib and Nangal township are on the rail map of the country. These stations are served by a railway line which branches off from the main Ambala-Ludhiana line at Sirhind. Through trains are available from Delhi (Himachal Express). The line is mainly used for freight carriage to and from Nangal Fertilizer plant since after the completion of Bhakra project for which it was originally constructed. The proposal for another rail link between Ludhiana and Chandigarh passing through this district is yet to be implemented. On completion, this line will serve Sahibzada Ajit Singh Nagar (Mohali) and Kharar towns. There is also a proposal to extend railway line from Nangal to Mukerian which will shorten rail distance between Pathankot and Nangal and other places in the district. This will also serve as alternate rail route between Ambala and Pathankot.

At present there are two road bridges one at Nangal and other at Rupnagar headworks which are meeting the needs of residents of Anandpur Sahib. These are being supplemented with an additional road bridge near Nurpur Bedi at the site of the ferry bridge to link up the different parts of Anandpur Sahib tahsil. The turbulent Sirsa has already been bridged near its crossing of Bhakra Main Canal.

**Amenities :**

The educational facilities witnessed a sizable expansion during the decade. In the year 1979 there were 7 Arts and Science Colleges, 109 High and Higher Secondary Schools, 79 Middle and 864 Primary Schools in the district. The number of students attending these Schools was :17,000, 37,000 and 92,000 respectively in 1979.

The medical facilities have also been improved appreciably in the district during the last decade. In 1979-80 there were: 10 hospitals, 7 primary health centres and 60 medical dispensaries, located in the length and breadth of the district. In these medical institutions, a total of 665 beds were available and a staff of 83 qualified doctors attended the patients round the clock.

The district is well served with drinking water facilities. All towns and 371 villages were provided with tapped water supply from various schemes. No village in the district is, however, facing any problem in respect of potable water.

All towns and villages of the district are electrified.

There are a total of 90 branches of various banks. These cater to the banking and financial needs of the inhabitants of both rural and urban areas.

The number of pucca cinema halls has increased to 5 in 1979 from 2 in 1966-67, besides, a few touring talkies. These cater to the recreational and entertainment needs of the population

**Demographic characteristics :**

On the sunrise of 1st March, 1981, 716,662 persons (males 385,087 and 331,575 females) were found living in the district. In population it is second from bottom as only Kapurthala district has lesser population than this district. 562,024 persons (301,230 males and 260,794 females) lived in rural areas and 154,638 persons (83,857 males and 70,781 females) lived in urban areas. The percentage of urban population to total population works out to 21·58 against 27·68 per cent of the state which shows that compared to other districts, it is less urbanised. The sex ratio i.e. number of females per thousand males is 861 against 879 for the state. It would, therefore, be seen that sex-ratio is adverse to females. The density of population is 344 against 333 for the state.

The growth rate of population during the decade 1971-81 was 30·46 per cent against 23·89 per cent of the state. The population increased from 545,005 in 1971 to 716,662 in 1981. The growth rate during 1961-71 decade was 15·57 per cent which was half of the present decade.

**Literacy :**

The district records a literacy rate of 48·08 per cent in 1981 census as against 41·28 per cent for the state. The male literacy rate is 55·94 whereas female literacy rate is only 38·94 which shows that female literacy rate lags behind male literacy rate by considerable margin inspite of sizable jump in the number of female literates. The literacy rate during 1971 was 37·17 per cent (45·84 per cent for males and 27·01 per cent for females)

**Occupations :**

In the district in 1981 census, 28·82 per cent population comprised main workers (males 51·33 per cent and females 2·68 per cent), whereas only 1·67 per cent are marginal workers (males 0·56 percent and females 2·96

per cent). The percentage of non-workers is, however, 69·50 per cent (48·11 per cent males and 94·35 percent females). The percentage by broad industrial categoreis of main workers is as follows :—

| | | |
|---|---|---|
| 1. Cultivators | Persons | 35·16 |
| | Males | 36·27 |
| | Females | 10·46 |
| 2. Agricultural labourers | Persons | 16·38 |
| | Males | 16·56 |
| | Females | 12·30 |
| 3. Household Industry | Persons | 3·36 |
| | Males | 3·35 |
| | Females | 3·61 |
| 4. Other Workers | Persons | 45·10 |
| | Males | 43·82 |
| | Females | 73·63 |

It would be seen from the above statement that work participation rates of females are much lower than males in spite of a trend among women to seek work to supplement family income. But still there is a long way to go to strike parity in sexes.

At present large number of civil and industrial projects are under construction which engage a large number of working force. Also large number of industrial projects have already gone into production at Mohali and near Rupnagar which have given employment to large number of people in this district. Thus it could be safely concluded that occupational pattern in the district is undergoing a change which is bound to be reflected in the next census.

**Trade and Commerce :**

Generally speaking, towns serve as main centres of trade and commerce. There is no single town which could stand head and shoulders higher than other towns in this respect. However, many towns/places have come to occupy a special position in the trade or production of certain selected items such as Morinda in sugar, Kurali in groundnut, Rupnagar in potatoes and wheat, Kiratpur in timber. Trade and commerce on the whole is quite flourishing as almost all the towns are well connected by both rail and road. Moreover, increase in affluence in the country side has also given a fillip to this.

**Industry** :

The district is fast rising on the industrial map of the country. It has two textile mills (one cotton and one woolen textiles) at Kharar. Morinda has a co-operative sugar mill. Anandpur Sahib has a chemical fertilizer plant managed by Punjab Co-operative Marketing Federation. Another chemical fertilizer plant known as Nangal Fertilizer plant managed by National Fertilizer Ltd. (NFL) is working at Naya Nangal which is one of the first and leading fertilizer plants in the country. A heavy water plant is also working at Naya Nangal. This plant is producing much needed heavy water required for atomic power plants and atomic reactors

A modern milk plant with a capacity of 1 lakh litres of milk has been set up at Mohali. Moreover, large number of industries have come up at Mohali since it has been declared an industrial focal point. The chief products of Mohali are : Dry cells batteries, tractors and parts, medicines and life saving drugs, cigarette manufacturing machinery, watches and parts, spun pipes, television sets, surgical instruments, electronic equipment etc.

Near Rupnagar (in Hoshiarpur district) some large sized industrial units such as D.C.M. Engineering Product engaged in manufacturing of tractor parts and Star Paper Mills etc. have come up. These have opened up vistas of employment opportunities for the residents of Rupnagar town and the nearby areas.

In the field of power generation this district has made fast strides. Hydel power generation stations are working at Kotla and Ganguwal. These are located on the Bhakra main canal. Another Hydel power station is fast nearing completion at Anandpur Sahib. A thermal power station is presently under construction near Rupnagar town. Bhakra power generation station though located in the Bilaspur district of Himachal Pradesh is for all intents and purposes belongs to this district. Undoubtedly the completion of the power stations under construction will make this a leading district in power generations in the state.

**Places of historical interest :**

Rupnagar district is full of historical and holy places connected with Sikhism. Some of these are :—

*Bhatha Sahib*:

It is situated just near the outer boundary of Rupnagar town on the Rupnagar-Chandigarh road. There is a historic Gurdwara called Bhatha Sahib. The place is also known as Kotla Nihang. According to the legend connected with this place, the 10th Sikh Guru, Gobind Singh, came to this place during his flight from Anandpur Sahib, hotly pursued by Mughal forces. On being requested to provide a shelter to him, the local Pathans jokingly pointed out towards a live kiln for night stop over. However, the kiln became dead as soon as Guru's horse entered the kiln. The Pathans repented their folly and provided the Guru much needed refuge in their houses. A Gurdwara was constructed at the site of kiln in 1914. Large number of pilgrims from far and wide visit this place and make offerings on the fulfilment of their wishes.

*Anandpur Sahib*:

It is situated at a distance of 35 kms. from Rupnagar on the Rupnagar-Nangal road. This has a Municipal Committee and is a sub-divisional headquarters. The place is famous for its long associations with the 9th and the10th Gurus. It was here that birth of Khalsa took place. Gurdwara Kesgarh Sahib is the main attraction for the Sikhs who come from all parts ot the country. It is also one of the five Takhats of the Sikhs. Here Guru Gobind Singh waved many a battle against the Mughals. Guru Gobind Singh selected this place to search his gospel of sikhism among pilgrims visiting Naina Devi shrine.

The town has undergone many improvements in civic amenities. A chemical fertilizer plant is in operation and a Hydel power Station is under construction. Both projects will give employment to the local residents. Recently Guru Gobind Singh foundation has set up Dashmesh Academy on the lines of Rashtriya Academy, Dehra Dun, for the education of children. Holla Mohalla fair is also held here every year during Holi. A colourful procession is taken out during this fair. It is participated by large number of armed Nihangs and other people. Religious and political conferences are also held during this fair.

*Chamkaur Sahib*:

It is situated on the left bank of Sirhind canal at a distance of 9 kms. from Rupnagar. It has a NAC and is a historic place. Large number of Sikhs visit this place. It is also called Chamkaur di Garhi. The legend goes that a small fortress was situated here when Guru Gobind Singh came here being pursued by Mughal forces. His two sons and 40 followers were with him. He left this fortress next day leaving behind his two sons viz.: Baba Ajit Singh and Baba Jhujhar Singh and 37 followers. A pitched battle took place next day between Mughal forces and the defenders who laid down their lives to the last man. A Gurdwara was built at the site of the fortress in memory of the martyrs. The Gurdwara is also known as Katalgarh or Shaheedgarh. A fair is held every year in the Bikrami month of poush to commemorate the memory of the sons and followers of Guru Gobind Singh who were killed here.

*Kiratpur Sahib*:

It is situated at a distance of 25 kms. from Rupnagar on Rupnagar-Nangal road. It is fast developing as a market of timber, which arrives from the nearby Himachal Pradesh areas. It is here that Mandi-Kulu road meets Nangal-Chandigarh road. On the banks of river Satluj, a ghat has been built where Sikhs immerse ashes of their dead., This place is called Patalpuri. It is gateway to Central Himachal Pradesh. The road takes off from here for Bilaspur, Sunder Nagar, Mandi, Kulu and Naina Devi. It has developed as a transport centre.

## ANNEXURE

### RUPNAGAR DISTRICT

(Inter-district changes)

| | | |
|---|---|---|
| (i) | Kharar Tahsil gained 23 villages from Fatehgarh Sahib Tahsil of Patiala District. | No. 677-RGI-72/7911, dated 22nd June, 1972. |
| (ii) | Kharar Tahsil lost 9 villages to Rajpura Tahsil of Patiala District | No. 765-RGI-74/1571, dated 10th June, 1974. |
| (iii) | Kharar Tahsil gained 4 villages from Fategarh Sahib Tahsil of Patiala District. | No. 765-RGI-74/1571, dated 10th June, 1974. |
| (iv) | Rupnagar Tahsil gained villages Chakli Kasab, H.B. No. 450 and Nanowal, H.B. No. 453 from Balachaur Tahsil of Hoshiarpur District | No. 2/2(RGI)-8847-79/ 7399, dated 26th December, 1979. |
| (v) | The name of Ropar Tahsil and Ropar District has been changed to Rupnagar Tahsil and Rupnagar District respectively. | No. 6667-RGI-76/18985, dated 16th November, 1976. |

# INTRODUCTION TO DISTRICT CENSUS HANDBOOK

Keeping in view the needs of planners, for exhaustive infrastructural and amenity data upto village level, required for micro-level planning, the formats of the village and town directory of 1981 DCH series have been redesigned and some new features useful for planning have been added while maintaining the comparability with 1971 data. A few new items of information such as adult literacy centres, primary health sub-centres, community health workers in villages, etc. have been introduced to meet some of the requirements of revised minimum needs programme. A new item 'approach to village' has been introduced to give an idea about the villages in the district which are inaccessible. A new column 'Total population and number of households' has been introduced to examine the correlation of amenities with the population and number of households they serve. Two more appendices namely (i) listing the villages where no amenities are available and (ii) list of villages indicating ranges according to the proportion of scheduled castes to total population have been added with the same objective in view. A significant addition is class of the town in all the six statements of the town directory which along with population and decadal variation since 1901 to 1981 will prove quite useful for analysing the infrastructure of amenities in the urban area of the state.

**Contents :**

The 1981 DCH series have been divided into two parts. Part-A contains village and town directory and Part-B, PCAs of villages and towns and PCA for scheduled castes upto tahsil/town levels. Both parts are being published in this volume.

The village directory contains information about total area of each village in hectares, total population and number of households, amenities/conveniences available in the village, staple food of the people and the land-use pattern. There is also information about the nearest town and its distance from the village and approach to the village.

The town directory presents data on each town with the aid of six statements giving the status and class of the town, the decadal population and growth rate since 1901-1981, physical and locational aspects, municipal finance and availability of amenities/facilities like medical, educational, banking etc., trade, commerce and industry.

PCA incorporates tahsilwise data for each village and each town/ward under the following heads:

(i) Area in hectares/sq. kms.
(ii) Number of occupied census houses
(iii) Number of households.
(iv) Total population
(v) Scheduled castes population (there is no scheduled tribe in Punjab State).
(vi) Literates.
(vii) Main workers classified into four categories of cultivators, agricultural labourers, household industry and other workers.
(viii) Marginal workers.
(ix) Non-workers.

**Maps :**

The map of the district and a map for each tahsil of the district have been included.

The district map shows the district boundary and location of its headquarter, tahsil boundaries and location of its headquarters, national highway, state highway, important metalled roads, railway lines, river and streams, towns and census villages according to population size, post and telegraph offices, degree colleges and technical institutions, rest houses etc.

The tahsil map contains boundary of tahsil and location of tahsil headquarter, villages with location code numbers, villages with population size, uninhabited villages with location codes, urban areas with location codes, roads, railways and service facilities such as post and telegraph offices, higher secondary schools, hospitals etc. Besides both the district and tahsil maps have an inset map where additions or loss of territory has taken palce during the decade, has been shown.

**Sources:**

Whereas PCA contains census data for compilation of village and town directory, the relevant schedules alongwith comprehensive instructions were sent to the revenue officers (for rural areas) and executive officers of municipal bodies (for Urban areas) to be filled in at their end. The completed schedules were collected from the relevant quarters during the houselisting operations in April, 1980 by the staff of this directorate. The Schedules were scrutinised at the directorates and the directories were compiled therefrom.

**Census Concepts and Definitions—**

*Village and Town Directory*

*Rural-urban classification*—The 1981 census data are being presented by rural and urban areas as in the previous censuses.

As far as rural area is concerned 'village' has been adopted as the lowest census unit.

*Rural area : 'Village'*

The definition of the village adopted in census is identical with that of 'mauza' given under section 3(i) of the Punjab Land Revenue Act, 1887. It is the 'revenue estate' determined as such for the purpose of levy and collection of the land revenue. The revenue estate is defined in the Act *ibid* as an area :—

(a) for which a separate record of rights exists; or

(b) which has been separately assessed to land revenue, or would have been so assessed if the land revenue had not been realised, compounded or redeemed; or

(c) which the State Government may by general rule or specific orders declare to be an Estate.

The village is thus not merely the *abadi deh* (red lined area) for census taking but the entire land coming within the fixed boundaries of each village in terms of the Act *ibid*.

There are 919 villages (including 26 uninhabited) in Rupnagar district.

*Urban area : 'Town'*

The following definition of an 'urban' area has been adopted at the 1981 census which is analogous to the criterion adopted in 1961 and 1971 censuses with some minor variations (as indicated below): :

(a) All places with a corporation, municipality or cantonment board or notified town area.

(b) All other places which satisfied the following criteria:—

(i) a minimum population of 5,000 ;

(ii) at least 75 per cent of the male working population engaged in non-agricultural (and allied) activity ; and

(iii) a population of at least 400 per sq. km. (or 1,000 per sq. mile).

The urban criterion of 1981 census varies slightly from that of 1961 and 1971 censuses in that the males working in activities such as forestry, logging etc. were then treated as engaged in non-agricultural activity. It, therefore, contributed to the 75 per cent criterion in 1961 and 1971 censuses whereas in the 1981 census these activities have been treated as on par with cultivation and agricultural labour for the purpose of this criterion.

Prior to the 1961 census, the definition of 'urban' area was somewhat liberal and a lot was left to the discretion of the local authorities. At the 1971 census, the state directors of census operations were also given discretion in marginal cases to include, in consultation with the State Government, a place that had other distinct urban characteristics, or to exclude a deserving place from being treated as 'urban'.

*Urban agglomeration (UA)*—Apart from town/city (a town with a population of one lac and above), the 1971 concept of urban agglomeration is also adopted for the 1981 census. Very often large railway colonies, university campuses, port areas, military camps etc., come up outside the statutory limits of the city or town but adjoining it. Such areas may not by themselves qualify to be treated as towns but if they form a continuous spread with the town, they are outgrowths of the town and deserve to be treated as urban. Such towns together with their outgrowths have been treated as one urban unit and called 'urban agglomeration'.

An urban agglomeration may constitute:—

(a) A city with continuous outgrowth (the part of outgrowth being outside the statutory limits but falling within the boundaries of the adjoining village or villages)

(b) One town with similar outgrowth or two or more adjoining towns with their outgrowths as in (a).

or

(c) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

**Urban Agglomeration in Rupnagar District :**

The only urban agglomeration in Rupnagar district is Kharar urban Agglomeration with Nawa Shahr as its outgrowth.

**Standard Urban Area (SUA) :**

A new concept of standard urban area (SUA) as introduced in 1971 census was also followed for the 1981 census. The essential requirements for the constitution of a standard urban areas are:—

(i) it should have a core town of a minimum population of 50,000 ;

(ii) the contiguous 'areas' made up of other urban as well as rural administrative units should have mutual socio-economic links with the core town; and

(iii) in all probabilities this entire area should get fully urbanised in a period of two or three decades.

Certain SUAs were determined on this basis in 1971 and some basic data were presented for 1951, 1961 and 1971 for such areas and their components. Similar data is being presented for the SUAs in 1981 also. The idea is to present basic data for these areas for four to five decades so that the urbanisation process in those areas can be studied.

## DEMOGRAPHIC CHARACTERISTICS BASED ON ANALYSIS OF INSET TABLES

### PRIMARY CENSUS ABSTRACT

**TABLE 1**

**Population, Number of Villages and Towns, 1981**

| Serial No. | Name of Tahsil | Population | | | | | | | | | No. of Villages | | No. of Towns |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | Total | | | Rural | | | Urban | | | Total | Inhabited | |
| | | P | M | F | P | M | F | P | M | F | | | |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 |
| 1 | Anandpur Sahib | 214,644 | 113,481 | 101,163 | 170,160 | 89,172 | 80,988 | 44,484 | 24,309 | 20,175 | 238 | 235 | 3 |
| 2 | Rupnagar | 230,612 | 123,192 | 107,420 | 187,253 | 100,059 | 87,194 | 43,359 | 23,133 | 20,226 | 387 | 373 | 3 |
| 3 | Kharar | 271,406 | 148,414 | 122,992 | 204,611 | 111,999 | 92,612 | 66,795 | 36,415 | 30,380 | 294 | 285 | 3 |
| | **Total District** | **716,662** | **385,087** | **331,575** | **562,024** | **301,230** | **260,794** | **154,638** | **83,857** | **70,781** | **919** | **893** | **9** |

**Population :**

Table 1 gives tahsilwise distribution of population by total, rural and urban areas. A further break up by persons, males and females has been given. This table also gives number of villages with break up into total and inhabited villages and number of towns. The table shows that Rupnagar district has 919 villages out of which 893 are inhabited. Besides, there are nine towns. Both villages and towns together have a population of 716, 662 persons (385,087 males and 331, 575 females). Out of these 562, 024 persons (301,230 males and 260,794, females) live in villages and 154,638 persons (83,857 males and 70,781 females) live in towns. Percentage of urban to total population of the district works out to 21.58 against 27.68 per cent of the state. Kharar tahsil with 271,406 persons is the most populous tahsil in the district whereas Anandpur Sahib tahsil with 214,644 persons is the least populous. Out of 154,638 persons who live in urban areas maximum number (66,795 persons ) live in Kharar tahsil and the minimum number (43,359 persons) live in Rupnagar Tahsil. The sex ratio for the district works out to 861 females for every 1,000 males.

TABLE 2

**Decadal Change in Distribution of population**

| Namd of Tahsil | Population | | | | | | Percentage Decadal variation (1971—81) | | |
|---|---|---|---|---|---|---|---|---|---|
| | 1971 | | | 1981 | | | | | |
| | Total | Rural | Urban | Total | Rural | Urban | Total | Rural | Urban |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| 1. Anandpur Sahib | 172,364 | 136,011 | 36,353 | 214,644 | 170,160 | 44,484 | 24·53 | 25·11 | 22·37 |
| 2. Rupnagar | 188,056 | 162,276 | 25,780 | 230,612 | 187,253 | 43,359 | 22·63 | 15·39 | 68·19 |
| 3. Kharar | 188,912 | 168,450 | 20,462 | 271,406 | 204,611 | 66,795 | 43·67 | 21·47 | 226·43 |
| **District** | **549,332** | **466,737** | **82,595** | **716,662** | **562,024** | **154,638** | **30·46** | **20·42** | **87·22** |

**Growth Rate :**

Table 2 gives tahsilwise population by total, rural and urban areas for 1971 and 1981 censuses and percentage decadal variation for 1971-81. The table shows that the population of the district increased by 30.46 per cent from 1971 to 1981 census. The respective growth rate for rural and urban areas being 20.42 and 87.22 against 23.89 of the state. Considering tahsilwise, maximum growth rate has been recorded in Kharar tahsil which reports 43.67 per cent. The growth rate is almost double as compared to Anandpur Sahib and Rupnagar tahsils which report 24.53 and 22.63 per cent growth rates. The high growth rate in Kharar tahsil is mainly attributable to the high urban growth which is 226.43 per cent. The second highest urban growth rate (68.19 per cent) has been reported by Rupnagar tahsil . However, Anandpur Sahib tahsil records the lowest urban growth the figures being 22.37 per cent.

TABLE 3

**Distribution of Villages by Population Ranges**

| Range of Population | No. of villages in each range | Percentage of villages in each range |
|---|---|---|
| 1 | 2 | 3 |
| Less than 200 | 169 | 18·93 |
| 200—499 | 294 | 32·92 |
| 500—1,999 | 404 | 45·24 |
| 2,000—4,999 | 25 | 2·80 |
| 5,000—9,999 | 1 | 0·11 |
| 10,000+ | .. | .. |
| **Total** | **893** | **100·00** |

**Villages :**

Table 3 gives the distribution of villages by population size. Out of 893 inhabited villages, 169 (18.93 per cent) fall in the population range less than 200, 294 (32.92 per cent) in population range 200-499, 404 (45.24 per cent) in population range 500—1,999 ; 25 (2.80 per cent) in population range 2,000—4,999 and the remaining one village (0.11 per cent) falls in population range 5,000—9,999. There is, however, no village in the population range 10,000+.

TABLE 4

Distribution of Villages by Density

| Range of Density (per sq. Km.) | Total No. of villages in each density range | Percentage of villages in each density range |
|---|---|---|
| 1 | 2 | 3 |
| 0—10 | 10 | 1·12 |
| 11—20 | 11 | 1·23 |
| 21—50 | 45 | 5·04 |
| 51—100 | 54 | 6·05 |
| 101—200 | 147 | 16·46 |
| 201—300 | 203 | 22·73 |
| 301—500 | 298 | 33·37 |
| 501+ | 125 | 14·00 |
| Not known | .. | .. |
| **Total** | **893** | **100·00** |

**Density (per sq. km.) :**

The density of population for Rupnagar district works out to 344 persons per sq. km. as against 333 of the state. Table 4 gives distribution of villages by density ranges. It shows that maximum number of villages 298 (33.37 per cent) fall in the density range 301—500 whereas minimum number of villages 11 (1.23 per cent) are in the 11—20 density range. The table reveals that more than half the number of villages 501 (56.00 per cent) fall in the population range 201—500. It could thus be seen that the villages with medium density are a common feature of the district.

TABLE 5

Proportion of Scheduled Castes Population to Total Population in the Villages

| Percentage range of Scheduled Castes population to total population | No. of villages in each range | Percentage of villages in each range |
|---|---|---|
| 1 | 2 | 3 |
| Nil | 105 | 11·76 |
| Less than 5 | 42 | 4·70 |
| 6—10 | 63 | 7·05 |
| 11—15 | 91 | 10·19 |
| 16—20 | 70 | 7·84 |
| 21—30 | 167 | 18·71 |
| 31 and above | 355 | 39·75 |
| **Total** | **893** | **100·00** |

**Scheduled Caste/Tribe Population :**

The district has relatively lower percentage (24.38) of scheduled caste population compared to (26.87 per cent) of the state as a whole. Table 5 gives the percentage of scheduled caste population to total population in villages by percentage ranges. The table shows that maximum number of villages 355 (39.75 per cent) have the percentage of scheduled caste population to total population 31 and more ; and minimum number of villages 42 (4.70 per cent) have the percentage of scheduled caste population to total population ranging less than 5 per cent. It would be seen that as many as 522 villages (58.46 per cent) have 21+ percentage. Also 105 villages (11.76 per cent) have no scheduled caste population at all.

TABLE 6

**Proportion of Scheduled Castes Population in Towns**

| Name of the town | Total Population | Total Scheduled Caste Population | Percentage of Scheduled Caste Population to total population |
|---|---|---|---|
| 1 | 2 | 3 | 4 |
| 1. Anandpur Sahib | 8,571 | 2,304 | 26·88 |
| 2. Chamkaur Sahib | 4,692 | 1,340 | 28·56 |
| 3. Kharar | 21,807 | 5,328 | 24·43 |
| 4. Kurali | 12,637 | 2,385 | 18·87 |
| 5. Morinda | 13,502 | 3,194 | 23·66 |
| 6. Nangal Township | 25,523 | 4,793 | 18·78 |
| 7. Naya Nangal | 10,390 | 1,518 | 14·61 |
| 8. Rupnagar | 25,165 | 4,246 | 16·87 |
| 9. S. A. S. Nagar | 32,351 | 1,694 | 5·24 |
| **All Towns** | **1,54,638** | **26,802** | **17·33** |

Table 6 gives scheduled caste population in urban areas of the district. There are 9 towns in the district. Total population of these towns is 154,638 persons, of which 26,802 persons (17.33 per cent) belong to the scheduled caste. It would thus be seen that percentage of scheduled caste population in urban areas of the district is lower than the rural areas. Maximum concentration of scheduled caste population is in Kharar town (5,328) and minimum in Chamkaur Sahib town (1,340). In terms of percentages maximum percentage 28.56 per cent is in Chamkaur Sahib and minimum 5.24 per cent is in S.A.S. Nagar.

There is no scheduled tribe population in the district as no scheduled tribe as such has been notified in the Punjab State.

TABLE 7

**Literacy Rates by Population Ranges of Villages**

| Range of Popluation | No. of villages in each range | Literacy rate |
|---|---|---|
| 1 | 2 | 3 |
| Less than—200 | 169 | 44.14 |
| 200—499 | 294 | 45·07 |
| 500—1,999 | 404 | 43·94 |
| 2,000—4,999 | 25 | 40·78 |
| 5,000—9,999 | 1 | 49·81 |
| 10,000+ | .. | .. |
| **Total** | **893** | **43·78** |

**Literacy :**

Literacy rate for the district is 48.08 against 40.86 for the state as a whole. The male literacy rate (55.94) is higher than the female literacy rate (38.94). The same applies to state also. Table 7 shows literacy rate of villages by population ranges. It reveals that highest literacy rate (49.81 per cent) is reported in the range 5,000—9,999, The population range 200—499 occupies second position with (45.07 per cent). This is followed by the ranges less than 200 (44.14 per cent) and 500—1,999 (43.94 per cent). The size range 2,000—4,999 (40.78 per cent) is at the bottom and is even lower than the district average.

Table 8 gives literacy rate for towns. All towns taken together have a literacy rate of 63.67 per cent. The table shows that the literacy rate in Naya Nangal is the highest (76.67) which is mainly due to the fact that in Naya Nangal, predominantly, F.C.I. staff and their families reside. On the other hand, literacy rate in Chamkaur Sahib is the lowest (51.36 per cent) which is due to the rural background of the town.

**TABLE 8**

**Literacy Rates for Towns**

| Name of the Town | | Literacy Rate |
|---|---|---|
| 1 | | 2 |
| 1. Anandpur Sahib | M.C. | 60·27 |
| 2. Chamkaur Sahib | M.C. | 51·36 |
| 3. Kharar | M.C.(U.A.) | 57·60 |
| 4. Kurali | M.C. | 57·77 |
| 5. Morinda | M.C. | 52·42 |
| 6. Nangal Township | N.A.C. | 66·34 |
| 7. Naya Nangal | N.A.C. | 76·67 |
| 8. Rupnagar | M.C. | 60·60 |
| 9. S.A.S. Nagar | C.T. | 73·56 |
| **All Towns** | | **63·67** |

**Working Population :**

Table 9 gives details of literates, workers, non-workers, scheduled caste population and total population tahsil-wise and by rural and urban areas. It reveals that the percentage of main workers to total population is 28.82 (51.34 per cent males and 2.69 per cent females), of the total workers to total population is 30.50 (51.90 per cent for males and 5.65 per cent for females) for the district as a whole whereas the respective percentages for rural and urban areas are 30.41 (52.15 per cent for males and 5.30 per cent for females) and 30.80 (50.95 per cent for males and 6.91 per cent for females) respectively. It also shows that 69.50 per cent of the total population of the district consists of non-workers (48.10 per cent for males and 94.35 per cent for females), Tahsilwise comparison reveals that Kharar tahsil with 30.27 per cent leads other tahsils in percentge of main workers to total population. Kharar tahsil is followed by Rupnagar and Anandpur Sahib tahsils with 28.52 per cent and 27.32 per cent respectively. Anandpur Sahib tahsil with 3.81 per cent marginal workers leads other tahils by considerable margins. This gives overall lead to Anandpur Sahib tahsil (31.13 per cent) in the percentage of total workers to total population. Another noticeable feature of the working force is that female working force percentages are much lower than male percentages. What is true for the district is true for the state also.

**TABLE**

**Literates, Workers, Non-workers, Scheduled**

| Name of Tahsil | Total Rural Urban | Total Population | | | S.C. Population to total population | Percentage Literates to total population | | |

# BRIEF ANALYSIS OF THE VILLAGE AND TOWN DIRECTORY

## VILLAGE DIRECTORY

**Amenities available in the villages:**

In the annexures immediately following this note, distribution of villages according to the availability of different amenities has been given in table 10. Table 11 shows proportion of rural population served by various amenities. Table 12 shows the number of villages where amenities are not available within the villages but are available outside. Table 13 gives distribution of villages by distance range from the nearest town and availability of amenities. Table 14 gives distribution of villages by population range and amenities available.

**Amenitywise analysis is given below:**

(i) *Educational facilities*: Out of 893 inhabited villages in the district, 816 (91.38 per cent), with 98.39 per cent of rural population of the district, have at least a primary school. As many as 77 villages of the district are devoid of this basic educational facility but these are so located that 74 villages can avail this facility within less than 5 kms. and the remaining 3 villages within 5—10 Kms. Tahsilwise percentages of villages enjoying educational facility are 94.04, 87.67 and 94.04 for Anandpur Sahib, Rupnagar and Kharar tahsils respectively.

(ii) *Medical facilities*: Out of 893 inhabited villages 192 (21.50 per cent) have a medical facility such as : hospital, maternity and child welfare centre, dispensary, family planning centre etc. The percentage of villages equipped with medical facility is the highest (30.64 per cent) in Anandpur Sahib tahsil, followed by Kharar tahsil (21.75) and Rupnagar tahsil (15.55). Percentage of rural population served by this amenity is the highest in Anandpur Sahib tahsil (45.44 per cent), followed by Kharar tahsil (43.18 per cent) and Rupnagar tahsil (28.24 per cent). Out of 701 villages wherein medical facility is not available within the villages, the amenity is available in 611 villages within a radius of 5 Kms., within 5—10 Kms. in 87 villages and in 3 villages at a distance of more than 10 Kms. Percentage of villages having medical facility but located within 5 Kms. from the nearest town is lowest (16.28 per cent) but the percentage is the highest in the distance range 16—50 Kms. This phenomenon is obvious mainly because medical facilities existing in the town can be availed by the surrounding villages quite easily. In case of villages with medical facility but located at a distance of 6—15 Kms. from the nearby town, the percentage is 24.24.

(iii) *Drinking water facility*: All the 893 inhabited villages of the district enjoy the drinking water facility. The main source of drinking water is hand pump. It is supplemented by well, tubewell and tapped water.

(iv) *Post and Telegraph facilities*: Out of 893 villages of the district, inhabitants of 173 villages (19.37 per cent) enjoy the post and telegraph facility within the village. The availability of this facility is the highest in Anandpur Sahib tahsil which has a percentage of 20.43. Out of 235 inhabited villages of the tahsil 48 villages enjoy post and telegraph facility. This is followed by Rupnagar tahsil with 72 villages (19.30 per cent) out of 373 inhabited villages, Kharar tahsil with 53 villages (18.60 per cent) of 285 inhabited villages. Thus population of villages enjoying post and telegraph facility works out to 44.62 per cent in Anandpur Sahib tahsil, 34.30 per cent in Rupnagar tahsil and 35.80 per cent in Kharar tahsil against 37.97 per cent of the district. In 720 villages post and telegraph facility is not available within the village. However, in 688 villages this facility can be availed within less than 5 Kms, in 29 villages within 5—10 Kms. but in 3 villages inhabitants have to travel more than 10 Kms. to avail this facility.

Out of 173 villages where post and telegraph facility is available within the village, 60 villages (17.44 per cent) are located within a distance of 5 Kms. from the nearest town, 103 (19.51 per cent) at a distance of 6—15 Kms. and 10 villages (47.62 per cent) at a distance of 16—50 Kms. Further out of 173 villages having post and telegraph facility 44 villages fall in the population range 1—499, 109 villages in the population range 500—1,999, 19 villages in the population range 2,000—4,999 and there is only one village in the population range 5,000 and above.

(v) *Communications*: 48.13 per cent of ruralites residing in 332 villages of this district are being served by the public transport system. This facility is, however, not available in 561 villages within their territorial jurisdiction. Out of these, inhabitants of 545 villages have to commute a distance of less than 5 Kms. to avail the facility, whereas in the remaining 16 villages this facility could be availed at a distance of 5—10 Kms. Again, in case of 104 villages, the nearest town is located within a distance of 5 Kms. in case of 213 villages, the nearest town is at a distance of 6—15 Kms. and in the remaining 15 villages at a distance of 16—50 Kms. There are 151 villages in the population range 1—499 having communication facility, 159 villages in the population range of 500—1,999, and 22 villages in the population range 2,000—4,999. Percentage of rural population enjoying communication facility is 42·95 in Anandpur Sahib tahsil, 48·79 in Kharar tahsil and 52.12 in Rupnagar tahsil against 48.13 of the district. It would thus be seen that percentage is the highest in Rupnagar tahsil.

(vi) *Approach by Pucca Road* : Out of 893 inhabited villages in the district having 95.08 per cent rural population, 830 (92.95 per cent) are approachable by pucca roads and are, therefore, accessible throughout the year. Rupnagar tahsil has the maximum number (367 villages) followed by Kharar tahsil (252 villages) and Anandpur Sahib tahsil (211 villages). Out of 830 villages approachable by pucca road, 295 villages are within a distance of 5 Kms. from the nearest town, 515 villages are within 6—15 Kms. and only 20 villages are within a distance of 16—50 Kms. Again, out of 830 villages, 440 fall in the population range 1—499, 364 villages in the population range 500—1,99925 villages in the population range 2,000—4,999, whereas there is only one village in the population range 5,000 and above.

(vii) *Power supply* : All the villages in the district have since been electrified and have power supply. The state has been electrified cent per cent.

(viii) *Market/Hat* : Hat is not a common feature in the state. Only temporary markets are held in the state on fairs and festivals, and that too occasionally. In fact this facility is generally needed in areas where urban centres are distantly located. In Punjab, however, urban towns are wide-spread and evenly distributed thereby ruling out the necessity of the hat or market.

**Land use pattern in the district:**

Table 15 gives distribution of villages according to land use. This table reveals that 62.18 per cent of the total area of the district is cultivable , out of which 49.10 per cent is irrigated. 72.41 per cent of the total area of Rupnagar tahsil is cultivable followed by Kharar and Anandpur Sahib tahsils with 64.58 and 48.05 per cent cultivable areas respectively, against 62.18 per cent of the district. Percentage of irrigated area to total cultivable area is the highest (72.39 per cent) in Rupnagar tahsil followed by Kharar (37.24 per cent) and Anandpur Sahib (26.68 per cent) the corresponding percentage for the district is 49.10.

**Miscellaneous cropping pattern, staple food and markets:**

Wheat followed by maize and rice constitute the main staple food of the inhabitants of the district. Wheat is consumed throughout the year. But maize and rice are also consumed mostly during winter and summer seasons respectively. In Anandpur Sahib tahsil, maize is even consumed for longer spells than in the other tahsils. Cash crops such as cotton, groundnut, potato and sugarcane are also grown. Agricultural markets, serving as the nucleus for purchase and sale by the local inhabitants, have also sprung up. The principal markets being Rupnagar, Kurali, Kiratpur and Morinda. Rupnagar is famous for potatoes, Kurali for groundnut, Kiratpur for timber and Morinda for sugar and fur.

**TABLE 10**

**Distribution of villages according to the availability of different amenities**

| Serial No. | Name of Tahsil | No. of inhabited villages | No. (with percentage) of villages having one or more of the following amenities | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | | | Educational | Medical | Drinking Water | Post & Telegraph | Market/ Hat | Communi-cations | Approach by Pucca Road | Power Supply |

## TOWN DIRECTORY

**Urban Population :**

Table 16 to 21 appended to this note deal with this section.

Table 16 of the town directory shows decadal growth rate, density and sex-ratio of urban population in the district and the state for 1951, 1961, 1971 and 1981 censuses. According to this table, 21.58 per cent of the total population of the district is urban as against 27.68 per cent of the state as a whole. The urban component of the population of the district has increased from 15.04 per cent in 1971 to 21.58 per cent in 1981, recording an increase of 6.54. As against this the percentage of urban population of state has gone up from 23.73 in 1971 to 27.68 in 1981. Percentage of urban population to total population for the district was 9.40 and 17.39 in 1951 and 1961 respectively, whereas the corresponding percentages for the state were 21.72 and 23.06 respectively.

TABLE 16

Growth, Density and Sex-ratio of Urban Population in the District in Relation to the State

| Census Year | DISTRICT | | | | | | STATE | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | Total population | Urban population | % Urban population | Decadal percentage variation in urban population | Density (population per sq.km) | Sex ratio (No. of females per 1,000 males) | Total population | Urban population | % Urban Population | Decadal percentage variation in urban Population | Density (population per sq. km) | Sex ratio (No. of females per 1,000 males) |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 |
| 1951 | 328,267 | 30,864 | 9·40 | N.A. | N.A. | 802 | 9,160,500 | 1,989,267 | 21·72 | +20·02 | N.A. | 807 |
| 1961 | 476,359 | 82,830 | 17·39 | +168·37 | 2,620 | 700 | 11,135,069 | 2,567,306 | 23·06 | +29·06 | 4,090 | 817 |
| 1971 | 549,332 | 82,595 | 15·04 | —0·28 | 2,525 | 848 | 13,551,060 | 3,216,179 | 23·73 | +25·27 | 4,630 | 836 |
| 1981 | 716,662 | 154,638 | 21·58 | +87·22 | 2,000 | 844 | 16,788,915 | 4,647,757 | 27·68 | +44·51 | 3,835 | 868 |

**Growth rate :**

In 1981 census Rupnagar district has shown a decadal growth rate of 87.22 per cent in urban population against the state percentage of 44.51. It may also be noted that the decadal growth rate in urban population for the district for 1961—1971 decade was— 0.28 per cent. The main reason of decline is fall in population in Nangal Township on completion of Bhakra Project. However, the main reason for the phenomenal increase in the decadal urban growth rate of the district in 71—81 is the rapid development of S.A.S. Nagar, generally known as Mohali.

**Density :**

The density of population has recorded a decline during the decade 1971—81, as against 2525 for the 1971 it is only 2,000 for the 1981 census. The decline is attributed to extension of municipal limits of the urban units, thereby resulting in increase in area and corresponding decline in density. It would be seen that the density of the district is appreciably lower compared to the state for 1961, 1971 and 1981 censuses.

**Sex-ratio :**

Sex ratio of urban population in the district had shown a decline from 802 in 1951 to 700 in 1961, whereas this trend has been reversed, as from700 in 1961 it has increased to 848 in 1971. However it again shows a marginal decline from 848 in 1971 to 844 in 1981. As against this, sex-ratio of urban population in the state shows a consistently upward trend, the state figures for 1951, 1961, 1971 and 1981 being 807, 817, 856 and 865 respectively.

TABLE 17

**New Towns/Towns Declassified in 1981 Census**

| Name of Towns | Population 1981 Census |
|---|---|
| 1 | 2 |
| (a) Added— | |
| (i) Chamkaur Sahib | 4,692 |
| (ii) S.A.S. Nagar (Mohali) | 32,351 |
| (b) Declassified | —nil— |

**New Towns or Towns declassified :**

Table 17 lists out towns classified for the first time/towns declassified in 1981 census. It shows that no town of 1971 has been declassified during 1981 census. Instead it shows two towns viz. Chamkaur Sahib and S.A.S. Nagar (Mohali) with 4692 and 32,351 inhabitants respectively, which have been classified as towns for the first time in 1981 census.

TABLE 18

**Per capita receipt and expenditure in Towns**

**Per Capita**

| *Class, name and civic status of the towns* | *RECEIPT* | | | *EXPENDITURE* | | | | | |
|---|---|---|---|---|---|---|---|---|---|

**Budget of the Towns :**

Table 18 appended to this note shows per capita receipts and expenditure for 1978-79 for 9 towns of the district. First column of this table lists the class, name and civic status of the towns, arranged alphabetically. There are 4 Class III Towns, 3 Class IV towns and one each Class V and Class VI Town. Out of 9 towns 5 have municipal committees, 3 have notified area committees and one town is administered by an Estate Officer and has been treated as town for census purposes only. Columns 2 to 4 deal with receipts and give the per-capita total receipt, receipt through taxes, and receipt from all other sources respectively. However, columns 5 to 10 deal with expenditure and give per capita total expenditure, expenditure on general administration, public health and conveniences, public works, public institutions and expenditure on other aspects on the expenditure side.

It would be observed that per capita receipts of 6 towns are more than the per capita expenditure In respect of 2 towns the position is vice versa. For census town S.A.S. Nagar Mohali figures are not available. On the receipt side, receipts through taxes are more than the receipts from all other sources in 7 towns. However the position is reverse in one town viz., Chamkaur Sahib, a notified area committee. For S.A.S. Nagar (census town) this information is not available. It is found that on the expenditure side, maximum per capita expenditure is done in 6 towns on general administration, in one town of Nangal Township (N.A.C.) on public works, and in Naya Nangal (NAC) on other aspects. Again in 2 towns viz. Naya Nangal (N.A.C.) & Rupnagar (M.C) per capita expenditure on public health and conveniences is low. Likewise in other two towns viz. Anandpur Sahib (M.C.) and Kurali (M.C.) per capita expenditure on public institutions is low.

**TABLE 19**

**Schools per ten thousand population in towns**

| Class, name and civic status of towns | | | No. per ten thousand population | | | |
|---|---|---|---|---|---|---|
| | | | Higher Secondary/ Inter/PUC/ Junior College | Secondary/ Matri-culation | Junior Secondary/ Middle | Primary |
| 1 | | | 2 | 3 | 4 | 5 |
| 1. | V | Anandpur Sahib M.C. | 1·17 | 2·33 | .. | 8·17 |
| 2. | VI | Chamkaur Sahib N.A.C. | 2·13 | 6·39 | 12·79 | 17·05 |
| 3. | III | Kharar M.C. | 0·46 | 1·83 | .. | 2·29 |
| 4. | IV | Kurali M.C. | 1·58 | 0·79 | .. | 1·58 |

| 6. | III | Nangal Township N.A.C. | .. | 0·78 | 0·78 | 1·96 |
| 7. | IV | Naya Nangal N.A.C. | 1·92 | .. | .. | 2·89 |
| 8. | III | Rupnagar M.C. | 0·79 | 1·19 | 1·59 | 5·56 |
| 9. | III | S.A.S. Nagar C.T. | .. | 0·62 | 0·62 | 3·09 |
| | | **Total District** | **0·65** | **1·23** | **0·91** | **3·62** |

**Social Amenities :**

Table 19 depicts various types of schools per ten thousand population townwise by class, name and civic status of towns arranged alphabetically in the district. This table shows that number of higher secondary, Inter/Puc/Junior college is maximum (2.13) in Chamkaur Sahib and lowest (0.46) in Kharar. However, nil information has been reported both from Nangal township and SAS Nagar. Again the number of Secondary/ Matriculation Schools per 10,000 population in towns has been reported the highest (6.39) in Chamkaur Sahib. It is lowest (0.62) in S A S Nagar. Naya Nangal, however, reports nil information. In three towns viz. Nangal township, Rupnagar and S A S Nagar , number of junior secondary/middle Schools per 10,000 population have been reported as 0.78, 1.59 and 0.62 respectively, whereas it is the highest (12.79) in Chamkaur Sahib. For the rest 5 towns, nil reports have been received. As regards primary Schools per 10,000 population in towns, maximum figures has been reported from Chamkauur Sahib (17.5) but minimum from Morinda (1.48 Hence, Chamkaur Sahib has the maximum number of schools per ten thousand population in the district.

TABLE 20

**No. of Beds in Medical Institutions in Towns**

| Class, name and civic status of the towns | | | No. of beds in medical institutions per 1,000 population |
|---|---|---|---|
| 1 | | | 2 |
| 1. | V | Anandpur Sahib M.C. | 2·92 |
| 2. | VI | Chamkaur Sahib N.A.C. | 6·39 |
| 3. | III | Kharar M.C. | 1·15 |
| 4. | IV | Kurali M.C. | 2·29 |
| 5. | IV | Morinda M.C. | 1·85 |
| 6. | III | Nangal Township N.A.C. | 4·07 |
| 7. | IV | Naya Nangal N.A.C. | 7·70 |
| 8. | III | Rupnagar M.C. | 4·37 |
| 9. | III | S.A.S. Nagar C.T. | 0·62 |
| | | **Total District** | **2·90** |

**Medical Facilities :**

Table 20 gives the number of beds in medical institutions in towns of the the district. It shows the maximum number of beds per thousand population in Naya Nangal (7.70) and minimum in S.A.S. Nagar (0.62) against (2.90) beds per thousand population in the district as a whole.

**Slum Clearance :**

In Punjab state no slum areas have been notified, although certain pockets have been identified separately here and there.

**Important Towns :**

*Rupnagar.*—It is locally called Ropar. This has a Municipal Committee and is situated on the left bank of river Satluj. It is the seat of the district administration. It has a railway station and is well connected with places such as Manali, Hoshiarpur, Chandigarh, Jalandhar etc. A headworks has been constructed to divert waters of the Satluj river into Sirhind and Bist Doab canals. The headworks was constructed during the post independence period. The town was a witness to a historical meeting between Maharaja Ranjit Singh and British Governor General, Lord William Bentinck in 1831. Also some years ago in the excavations of a mound at Rupnagar some coins and pieces of pottery belonging to Harrappan and Mohanjodaro civilisations were recovered. The town is also famous for locks called Ropari locks. But of late this industry is on the decline due to stiff competition from manufacturers from Aligarh and Calcutta. A thermal power station is presently under construction on the Rupnagar-Nangal road at a distance of 10 kms. towards Nangal on the banks of Sirsa Nadi. Also across the river in the Hoshiarpur district number of factories have come up. These give employment to large number of locals. A cattle fair is also held here annually.

*Nangal Township.*—It is situated 55 kms. from Rupnagar town on the left bank of river Satluj. Bhakra dam is situated some 14 kms. upstream from Nangal. The town has a notified area committee. It has a headworks for diverting water into the main Bhakra canal. A small reservoir to feed the canal has also been built. It traces its origin to the year 1943-44 when construction of residential accomodation was taken up for the Bhakra staff. Thousands of visitors from far and wide visit this place to see the second highest gravity dam in the world. The town has seen some decline since the completion of Bhakra dam.

*Naya Nangal.*—It is situated on the right bank of river Satluj opposite to Nangal township. It has a N.A.C and is principally an industrial town. Its existence is attributed to the Nangal fertilizer factory and the heavy water plant.

*Sahibzada Ajit Singh Nagar (Mohali).*—Abbreviated as S.A.S. Nagar, it is a new town created as a Census Town during the 1981 census. It is situated at a distance of 8 kms. from Chandigarh on the Chandigarh-Ludhiana road, if measured from Chandigarh General Post Office but in fact it is on the immediate periphery of Chandigarh Union Territory. On the creation of new Punjab, consequent upon reorganisation on linguistic basis in November, 1966, the State Government developed this area, with Mohali as the focus, as an Industrial Focal Point for estal lishment of

medium and large sized industry. A residential complex was added to it to make self-contained township. The pattern adopted was that of neighbouring Chandigarh. The town has registered a fast growth and has attained a population size of 32,351 in 1981 census. Many a large and small industrial units such as PunjabTractors, Anand Batteries, Ranbaxy Laboratories, Mollins India, Punj Television, Punjab Semi-conductors, Mohali Milk Plant, employing thousands of persons have been set up here. The residential area after mainly the baby town is of the Punjab Housing Development Board, which has built up large number of residential units for middle and low income group people. The town is still without a civic body and is managed by the Estate Officer who is responsible for its development and maintenance. The town has yet to attain its independent status as it is still without a College, Hospital, Cinema etc. For all practical purposes, it is a satellite town of Chandigarh.

# SECTION I—VILLAGE DIRECTORY

# PART XIII-A
# Village and Town Directory

## NOTE EXPLAINING THE CODES USED IN THE VILLAGE DIRECTORY

The village directory containing information about each village has been prepared for each tahsil in the ascending order of the census location code number, e.g., location code No. 17/11/3/22 means village No. 22 in tahsil No. 3 of district No. 11 of the state No. 17. It contains information relating to total area of the villages in hectares total population, No. of households, amenities available in the village i.e. educational, medical, drinking water, posts and telegraphs, communication, approach to village, nearest town and distance (in kms) and power supply. Besides it gives information regarding staple food, land-use i.e., area under different types of land use like forest, irrigated and unirrigated, cultivable and uncultivable land. This is further supplemented by the information on places of religious, historical and archaeological interest as also information on copies of newspaper coming in the village and number of motor cycles/scooters, cars/jeeps and tractors available in the village.

Information about the amenities available has been given in columns 5 to 10 of the directory.

(i) Educational facilities have been shown by adopting the following abbreviations :

P — Primary School

M — Junior Secondary or Middle School

H — Matriculation or Secondary School

PUC — Higher Secondary/Intermediate/Pre-university/Junior College

C — College (graduate level and above) like Arts, Science, Commerce etc.

I — Industrial School.

Tr. — Training School

AC — Adult Literacy Class/Centre

O — Other Educational Institutions. These may include Sanskrit Pathshalas, Senior basic school, Makhtab, etc.

Where figures like P(3), M(2), H(1), etc. occur, these denote that the village has three primary, two middle and one matriculation or secondary school.

(ii) Medical facilities have been shown by the use of the following abbreviations :

H — Hospital

MCW — Maternity and Child Welfare Centre

MH — Maternity Home

CWC — Child Welfare Centre

HC — Health Centre

PHC — Primary Health Centre

PHS — Primary Health Sub-Centre

D — Dispensary

FPC — Family Planning Centre

TB — TB Clinic

NH — Nursing Home

RP — Registered Private Practitioner

SMP — Subsidised Medical Practitioner

CHW — Community Health Worker

O — Others

Number of institutions, if more than one in any village, have been given in brackets against each.

(iii) The types of the potable drinking water supply and the sources available in the village have been indicated by the following codes :—

T — Tap Water

W — Well Water

TK — Tank Water

TW — Tubewell Water

HP — Hand Pump

R — River Water

F — Fountain

C — Canal

L — Lake

S — Spring

N — Nullah

O — Others

NA — Information not available.

(iv) Post & telegraph facilities have been shown by adopting the following abbreviations :—

PO — Post Office

TO — Telegraph Office

PTO — Post and Telegraph Office

Phone— Telephone Connection

(v) Communication facilities have been indicated by the following codes :

BS — Bus Stop

RS — Railway Station

NW — Navigable Waterway (including river, canal, backwaters, etc.).

Only public transport like bus, rail and waterway have been considered for this purpose.

(vi) *Approach to village* : This refers to the state of road etc. leading to the village.

This has been indicated by the following codes :—

PR — Pucca Road

KR — Kaccha Road

NR — Navigable River

NC — Navigable Canal

NW — Navigable Waterway (other than river or canal).

(*vii*) *Nearest town and distance* :—The distance in kms of the nearest town (whether located in the state or in another state) has been given in brackets under column 12.

(*viii*) *Power Supply.*—For this purpose, the following codes have been used under column 13 :—

ED — Electricity for Domestic Purpose.

EAg — Electricity for Agriculture.

EO — Electricity for other purpose like Industrial, Commercial, etc.

EA — Electricity for all purposes listed above.

Information relating to places of religious, historical or archaeological interest is given under column 20 (a). Information on copies of newspaper coming in the village (N), motor-cycles/scooters available in the village (M) cars/jeeps available in the village (C) and for tractors available in the village (T) is also furnished under column 20. The numeral following the alphabet indicates the number of newspapers, motor-cycles etc. Uninhabited villages and the villages that have got merged in towns, have also been shown under column 20(a).

(*ix*) *Land use :* Break-up of area under different type of land use viz. forest, irrigated area, unirrigated area, culturable waste and areas not available for cultivation has been furnished under columns 15-19.

(*a*) *Forest :* This includes all lands classed as forests under any legal enactment dealing with forests or administered as forests, whether state-owned or private, and whether wooded or maintained as potential forest land. The area of crops raised in the forest and grazing lands or areas open for grazing within the forest should remain included under the forest area. If any portion of such land is not actually wooded but put to some agricultural use, that portion is included under the appropriate heading of cultivated or uncultivated land. In some cases there are instances where patches of land put to agricultural use within statutorily notified forests are considered as forests by the revenue agency. These are treated as forests.

(*b*) *Irrigated by source and unirrigated (land use) :* These two columns (cols. 16 and 17) cover all agricultural land and include net area sown with crops and orchards or net cropped area and also current and other fallows. The latter implied all lands which were taken up for cultivation, but are temporarily out of cultivation for a period of not less than a year and more than five years. The columns do not include gross area sown or gross cropped area. Net area sown thus represents the area sown with crops and orchards, counting areas sown more than once in the same year only once.

(*c*) *Culturable waste* : This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once, but not cultivated during the five years or more in succession. Such lands are either fallow or covered with shrubs and jungles which are not put to any use. These have been assessed or unassessed and are in isolated blocks or within cultivated holdings. Lands under thatching grasses, bamboo bushes and other groves for fuel, etc. which are not included under orchards or forests also come under this head. All grazing lands, whether these are permanent pastures and meadows or not, village common and grazing lands within forest area have been included in this column.

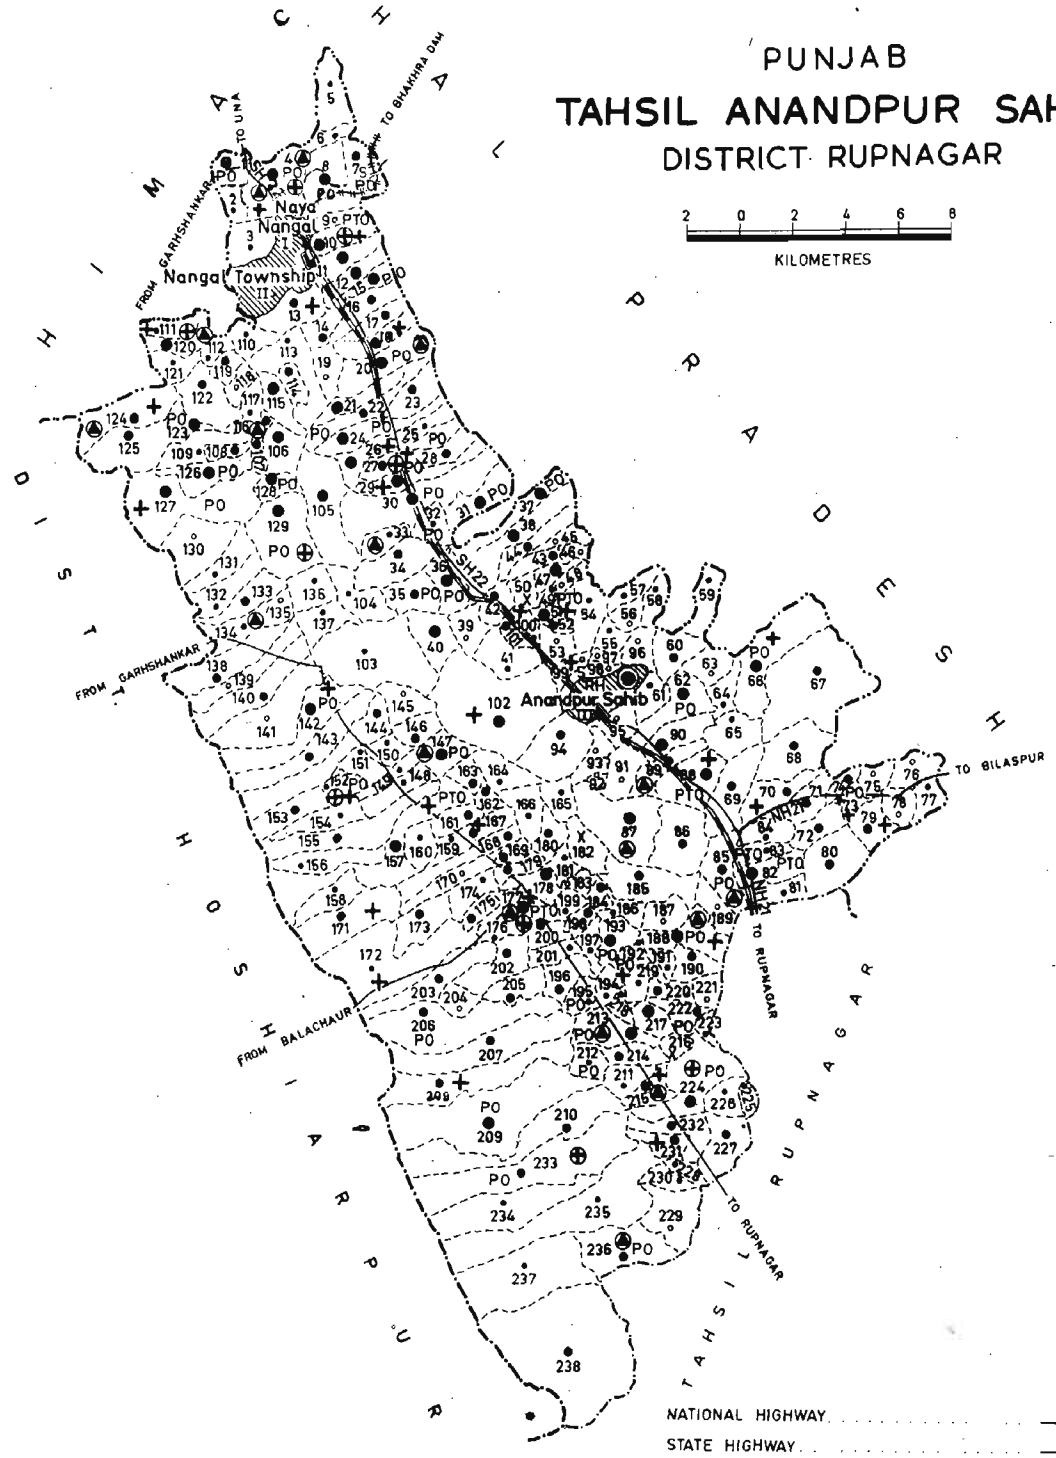

(*d*) *Area not available for cultivation* : This column (Col. 19 ) includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use.

Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water, e.g., rivers and canals and other lands put to uses other than agricultural.

Barren and unculturable lands cover all barren and unculturable lands, like mountains, deserts, etc. Land which cannot be brought under cultivation, except at a very high cost, has been classified as unculturable whether such land is in isolated blocks or within cultivated holdings.

# SECTION II
## Town Directory

## NOTE EXPLAINING THE CODES USED IN THE TOWN DIRECTORY

The town directory has been compiled in six different statements for all the urban areas of the district. The data on amenities and other aspects have been presented in codes which are explained below :

**Statement I :**

This gives status and growth history of each town in the district.

Class has been introduced in all the statements of town directory to facilitate analysis for purposes of demographic and socio-economic characteristics of towns at the state and all India levels. It has been presented according to 1981 census population of the core town in the following manner :

| *Population* | *Class* |
|---|---|
| 100,000 and above | I |
| 50,000 — 99,999 | II |
| 20,000 — 49,999 | III |
| 10,000 — 19,999 | IV |
| 5,000 — 9,999 | V |
| Below 5,000 | VI |

The civic administration status as in 1980 has been indicated by the following abbreviations. Census town is regarded as having no civic status. Code (C.T.) has been used for census town.

| | |
|---|---|
| Municipal Corporation | = M. Corpn. |
| Municipal Committee | = M.C. |
| Cantonment Board | = C.B. |
| Notified Area Committee | = N.A.C. |
| Census Town (S.A.S. Nagar—Mohali and Talwara) | = C.T. |

**Statement II :**

This gives for each town, physical aspects and location of towns.

**Statement III :**

This gives municipal finance for each town of the district.

**Statement IV :**

This gives civic and other amenities. The abbreviations used are indicated below :

(I) *Road length*

PR = Pucca Road

KR = Kuccha road

(II) *System of sewerage*

S = Sewer

OSD = Open surface drains

BSD = Box surface drains

SD = Sylk drains

CD = Cesspool method

Pt = Pit system

(III) *Method of disposal of night soil*

HL = Head loads

B = Baskets

WB = Wheel barrows

ST = Septic tank latrines

S = Sewerage

(IV) *Protected water supply-source and capacity of storage systems*

(a) Sources of water supply :

TW = Tubewell water/Hand pump

T = Tap water

W = Well water

TK = Tank water

(b) System of storage of water

OHT = Overhead tank

SR = Service reservoir

RG = River infiltration gallery

BWP = Borewell pumping system

PT = Pressure tank

**Statement V** :

This gives medical, educational, recreational and cultural facilities. The abbreviations used are indicated below :

| | | | |
|---|---|---|---|
| **Medical amenities** : | H | = | Hospital |
| | D | = | Dispensary |
| | HC | = | Health centre |
| | FC | = | Family planning centre |
| | TB | = | TB clinic |
| | NH | = | Nursing Home |
| | O | = | Others |
| | A | = | Ayurvedic |
| | U | = | Unani |
| | Hom | = | Homoeopathic |

In case of allopathic, no separate code has been given. The information in col. 4 on medical facilities has been presented horizontally in the same line as illustrated below :

H (A-1, 2) D (Hom-2, 1, U=1)

Here H (A-1, 2 represents one ayurvedic and 2 allopathic hospitals and D (Hom-2, 1, U-1) represents 2 homoeopathic, one allopathic and one unani dispensaries. If the medical facility is not available in a town, name of the nearest place (if in the same district) or nearest district (if in the same state) or other state and its distance from the town where the facility is available has been mentioned in column 4.

*Educational amenities* :

The codes that have been used are as follows :

| | | |
|---|---|---|
| A | = | Arts only |
| S | = | Science only |
| AS | = | Arts and Science only |
| C | = | Commerce only |
| AC | = | Arts and Commerce only |
| ASC | = | Combined for all categories,—Arts, Science and Commerce. |
| L | = | Law |
| SH | = | Shorthand |
| Type | = | Typewriting |
| Sh. Type | = | Shorthand and Typewriting |
| O | = | Others |
| P | = | Primary school |
| M | = | Junior secondary or Middle Schools |
| H | = | Matriculation or Secondary |
| PUC | = | Higher secondary/intermediate/ pre-university/junior college/ '10 +2' system whether held in schools or colleges |

If there are more than one institution of a type in the town, their number has been given against each in brackets.

If any educational facility is not available in the town the name of nearest place (if in the same district) or the name of nearest district (if in the same state) or other state and its distance from the town where this facility is available has been given in brackets.

*Recreational and cultural facilities* :

The following codes have been used :

PL = Public library

RR = Reading room

**Statement VI** :

This gives information on trade, commerce, industry and banking for each town of the district.

Appendix to the town directory shows towns of the district which have outgrowths and population of outgrowths.

STATEMENT

# PART B

## Primary Census Abstract (General)

## Primary Census Abstract (Scheduled Castes)

# PART B

## PRIMARY CENSUS ABSTRACT (GENERAL)

## PRIMARY CENSUS ABSTRACT (SCHEDULED CASTES)

### Explanatory note on Primary Census Abstract

The Primary Census Abstract (PCA) General and Scheduled Castes provides the basic information relating to population data pertaining to 1981 census. It contains the data in respect of area, number of occupied residential houses and households, total population (including institutional and houseless population), population break up by sex, scheduled castes, literates, main workers classified into four categories of cultivators, agricultural labourers and other workers, marginal workers and non-workers for each village and for each town/wardwise.

The district totals given at the beginning of the PCA are followed by break up of rural and urban areas of the district. The data are presented tahsilwise.

The rural PCA presents the data for the villages arranged in ascending order of location code numbers (assigned to the villages within the tahsil). The urban PCA presents wardwise data for each town. In rural PCA, the uninhabited villages and the villages which have got merged in towns have also been indicated. It may be mentioned here that the PCA data provided here has been compiled on the basis of the basic schedules i.e., household schedule and the universal individual slip canvassed during 1981 census operations. The concepts and terms occurring in the PCA are briefly explained here.

**Census House :**

A census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

**Occupied Residential House :**

Occupied residential house is a dwelling house and includes a house used partly as a dwelling and partly for some other purpose like shop, workshop, factory, etc., but does not include a 'vacant house' where no person was found to be residing at the time of census.

**Household :**

A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. Examples of unrelated households are boarding houses, messes, hostels, residential hotels, rescue homes, jails, *ashrams*, etc. These are called 'institutional households'. There may be one member household, two members household or multi members household. For census purposes, each one of these types is regarded as a 'household'.

Another type of household for census purpose is houseless household which is a household comprising of 'houseless person/persons'. A houseless person in census terminology has been defined as :

(i) a person who might be doing domestic service or other work with one or more households but who does not reside in any house and sleeps in the corridors, varandahs or passages in buildings or in the streets,

(ii) wandering or nomadic tribes found to be staying in temporary huts etc. ; and

(iii) beggar, vagrant, tramp, sadhu, fakir, etc., who is found on the footpaths, streets, in places like parks, gardens, railway yards, etc.

**Scheduled Castes** are such castes, races or tribes or parts of groups within such castes, races or tribes as are declared to be scheduled castes by the President of India's Orders issued under Article 314 or the Constitution of India.

**Literate :**

A person who can both read and write with understanding in any language has been taken as literate. A person who can merely read but cannot write, has not been considered as literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

All children of the age of 4 years or less have been treated as illiterate even if the child has been going to a school and might have picked up reading and writing a few odd words.

**Workers and Categories of Workers :**

Work may be defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work.

In the economic questions, canvassed in 1981 census, there has been some difference. The 'work' concept in 1961 and 1971 censuses, as opposed to the 'income' or 'economic independence.' concept of the earlier censuses was adopted for 1981 census, but the criterion for classification of persons as workers was changed. While in 1961 and 1971 censuses different approaches, namely, usual status and current status, were adopted with reference period of one year and one week for seasonal and for regular work respectively, at the 1981 census the usual status approach was adopted uniformly for all work.

In 1961, a person qualified as a worker if he had worked regularly during the last season or if he had worked at least for a day in regular (non-seasonal) work during the preceding fortnight. At the 1971 census a person was treated as a worker only if he spent his time mainly in work or if he worked at least for a day in regular (Non-seasonal) work during the preceding week. The dichotomy of worker/non-worker of 1961 and 1971 censuses was discarded at the 1981 census and instead a trichotomy of main workers, marginal workers and non-workers was adopted. For main worker the time criterion of engagement in work for the major part of the year, i.e., at least 183 days was adopted. Those who worked for some time during the last year but not for the major part were treated as marginal workers. Those who had never worked during the last year were non-workers. This trichotomy partially permits a comparability of 1981 census economic data with that of 1971 as well as 1961. The main workers of 1981 census can be expected to correspond to the workers of 1971 and the main workers and marginal workers of 1981 together to correspond to the workers of 1961.

**Classification of Main Activity :**

The main activity of workers has been classified into four categories, viz., cultivator, agricultural labourer, household industry and other worker. These terms are explained below:

*Cultivator :*

For purposes of the census, a person has been considered working as cultivator if he or she has been engaged either as employer, single worker or family workers in cultivation of land owned or held from Govt., private persons or institutions for payment in money, kind or share. Cultivation included supervision or direction of cultivation. It has been indicated by abbreviation '**C**'.

*Agricultural Labourer .*

A person who worked in another person's land for wages in money, kind or share has been regarded as an agricultural labourer. He/she had no risk in the cultivation but he/she merely worked in another person's land for wages. An agricultural labourer had no right of lease or contract on land on which he/she worked. It has been indicated by abbreviation 'AL'.

*Household Industry :*

Household industry has been defined as an industry conducted by the head of the household himself/herself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lived in urban areas. The larger proportion of workers in a household industry constituted of members of the household including the head. The industry should not be run on the scale of a registered factory which would. qualify or has to be registered under the Indian Factories Act.

For a person who has returned his/her main activity as engaged in some production, processing, servicing or repair of articles or goods such as handloom weaving, dyeing, carpentry, *bidi* rolling, pottery manufacturing, bicycle repairing, blacksmithy, tailoring, etc., it has been ascertained if it is a household industry, and if so, it has been indicated by the abbreviation 'HHI' in the space provided for.

*Other Workers :*

All workers, i.e., those who have been engaged in some economic activity during the last one year, have not been categorised as cultivators or agricultural labourers or in household industry, are 'other workers' 'OW'. The type of workers that came under the category of 'OW' included factory workers, plantation workers, those in trade, commerce, business, transport, Mining, construction, political or social work, all government servants, municipal employees, teachers, priests, entertainment artists, etc.
