FOREWORD

The District Census Handbook (DCH), complied by the census organisation on behalf of the State Governments, is one of the most valuable products of the census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District Administration. The district census handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The district census handbook series was initiated during the 1951 census. It contained important census tables and PCA for each village and town of the district. During 1961 census the scope of the DCH was enlarged and it contained a descriptive account of the district administrative statistics, census tables and village and town directory, including PCA . The 1971 DCH series was planned in three Parts: Part-A related to village and town directory, Part -B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and and use pattern is expected to further meet the need of micro-level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well as to minimise the regional imbalance in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres, and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, 'total population and number of households' has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices: listing the villages where no amenities are available and listing according to the proportion of scheduled castes and scheduled tribes population to the total population, has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums The columns on scheduled castes and scheduled tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part-A of the volume contains village and town directory and Part-B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH as a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has

been introduced to enhance its value. The District and Tahsil /Police Station /CD Block etc. level maps depicting the boundaries and other important features have been inserted at appropriate places to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri D. N. Dhir, I.A.S. the Director of Census Operations, Punjab on behalf of the State Government which has borne the cost of printing. The task of planning, designing and coordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (of Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M.M.Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

New Delhi :

The 26th April, 1982.

P. PADMANABHA
Registrar General, India.

PREFACE

As being regularly presented hithertofore, since 1951 census, we have now the privilege of presenting the District Census Handbooks consequent upon 1981 census.

To shorten the time lag to minimum after the compilation of census 1981 data and issuance of this Handbook as a sort of self-contained reference book, predominantly based on census data for the district, action was initiated upon the project as early as in July, 1979. The Registrar General, India, indicated the revised formats and statements designed for this series of books. The improvements were with a view to making the data more useful for administrators, planners, scholars and other categories of users.

There are 134 towns categorised as urban area and 12,899 villages (45 tahsils) as the rural component in the state. The formidable task of collecting and compiling of this voluminous data for such a large number of unit had its own problems and difficulties, both in the matters of chase up and in obtaining correct data which could be test-checked in terms of consistency with what was obtained and published consequent upon 1971 census data. Several gruelling cross-checks had to be adopted totally such items as area figures and the land use pattern for each unit.

The statements and schedules for collecting information from the rural areas were translated into Punjabi and also test-checked to assess their acceptability and responsiveness by those who were to make their use. (I had also unsuccessfully toyed with the idea of collecting information on some other items that could indicate comparative affluence of rural Punjab but had to give it up in light of keeping to uniformity in presentation of data on all India pattern).

The statements/schedules for town directory were transmitted to the Chief Executives of the local bodies and those for rural areas were transmitted to the SDOs(C) (since all tehsils in Punjab have been converted into sub-divisions) for necessary supply of data by the revenue staff under them. The officers and senior staff of the directorate that had been made directly responsible for houselisting operations and had reported to the field in October, 1979 were also charged with getting these through on personal contacts. This resulted in our getting the feed back by May, 1980, on the conclusion of houselisting operations though some small instalments of these schedules continued till September/October, 1980.

A cell had been created at the directorate to scrutinise the data as received and make preliminary compilation. The data as obtained from the field were supplemented with the data collected from the various heads of the departments at the state level, particularly in matters of amenities and facilities in the fields of education, medical, communications and the like. The staff working in the cell was once again out in the field for assisting in a second field operations, namely enumeration and it was only on its conclusion that the work of compilation started in May-June 1981. The three Deputy Directors (at the regional tabulation offices) were in position about the same time in the field and the gaps in data, needing reconciliation in figures were got through these field officers on personal contacts with the concerned quarters.

On the compilation of the Primary Census Abstract (PCA) in March, 1982 when the figures were available for projection in this volume, the whole exercise was consolidated to give birth to the instant manuscript.

The data in the book are being presented in two parts—Part A comprises Village and Town Directory and Part B Primary Census Abstract villagewise and town/wardwise separately. In addition Primary Census Abstract for Scheduled Castes upto tahsil/town level is also presented. (There are no Scheduled Tribes in the State).

An analytical note based on a number of inset tables compiled from out of the data from village and town directory and PCA has also been added for the benefit of the users, but the greater aim has been to present the data as compiled and leave further deeper study for those for whom the publication is meant.

We are grateful to the large number of personnel of the State revenue department at the village, tahsil, sub-division and district levels and the municipal staff in all the local bodies in the State for their co-operation in filling up the statements/schedules for providing the data.

The production of this book (and for that matter all the 12 District Census Handbooks) has been the handiwork of consistent and constant efforts put in jointly by almost all the staff of the directorate, though only at one point of time or the other in certain cases. The collection of data for Village and Town Directory, as mentioned earlier,was a major work in the pre-census period and after the census most of the staff was busy in tabulation and compilation of the census data both at the regional tabulation offices and at the directorate. The DCHB Cell (especially created) thereafter commenced work on inset tables, while the senior staff and the officers took to developing the fly-leaves and explanatory notes. Simultaneously the map section was deep in work for producing the maps that had to accompany these books.

I would resist the temptation of mentioning any single incumbent at any level of the hierarchy individually for apparent reasons, and would rest content with acknowledging my debt to all of them as appended hereto.

I had acted only as a co-ordinator and at times an editor and was very ably supported by a set of dedicated officers who spared no pains to pushing the manuscripts to the press in a record time, unknown in the annals of this directorate so far.

As in the case of other aspects of census work connected with this gigantic decadal exercise, I always looked up to Shri P. Padmanabha, Registrar General & Census Commissioner, India, for guidance, inspiration and encouragement and I feel indebted to him. Shri N.G. Nag, Deputy Registrar General (Social Studies) was forthcoming in his unassuming and profound style for advice.

D.N. DHIR

Chandigarh :
September, 1982.

Director, Census, Punjab.

ACKNOWLEDGEMENTS

Preliminary work—collection, compilation and scrutiny of data relating to Village and Town Directory :

A cell was created in July, 1979 under J.C. Kalra, Deputy Director, who out of his earlier experience and the instructions as received from Registrar General India, directed the collection of data and allied work. He was ably assisted by D.P. Jain, Charan Singh and Vishwa Mittar, Investigators on one occasion or the other. The Statistical Assistants, who laid down the work at the foundation level at that time consisted of Malkiat Singh, Munishwar Dutt, Joginder Singh and Pawan Kumar with cooperative efforts of number of Computors, namely Mohinder Pal, R.P. Pathak, Parkash Chand, Varinder Singh, Hardeep Kaur, Satya Arora, Harbeer Kaur and Asha Vasisht.

Primary Census Abstract included in this book—manual preparation at the Regional Tabulation Offices at Jalandhar' Paitala and Bathinda :

R.P. Tomar, R.K. Singh and S.P. Grover, Deputy Directors, were incharge of these tabulation offices respectively, and put in their best to conclude the work fairly ahead of the scheduled target. They were assisted by the Investigators, namely N.S. Bhadauria, Charan Singh and Ajit Singh Dhilon, respectively. The Statistical Assistants and Computors who worked in these RTOs were S.C. Bassi, Balbir Singh, Jai Dev and R.P. Singh at Jalandhar, Tarsem Lal Garg, S.K. Joshi, S.P. Goel and Varinder Singh at Patiala and Balwant Rai, Bhagirath Singh, Raghbir Singh, J.S. Negi and H.P. Sharma at Bathinda.

Preparation of Inset Tables, framework of Handbooks and their drafting :

Inset tables, appendices and allied tables were prepared in the specially created cell of 'District Census Handbooks' headed by S.P. Grover, earlier and later by Ajit Singh, Deputy Directors. They have had experience of such publications earlier and imparted suitable directions to the staff in the cell for presentation of the data and its analysis as per the instructions received from the office of Registrar General, India, from time to time. Charan Singh, Investigator, Balwant Rai, Raghbir Singh, Tarsem Lal, Statistical Assisants and Satya Arora, Santosh Kumari, Harbeer Kaur and H.P. Sharma, Computors worked in this cell.

The cell provided the framework of the Handbooks and the first drafts were attempted by Deputy/Assistant Directors who were entrusted with particular volume(s). This first draft was then finalised during discussion in officers' meetings held almost daily with the Director. Thus the final draft emerged.

Maps ;

The work for preparation of maps to be included in District Census Handbooks commenced under the supervision of Madhav Shyam, the then Senior Geographer, but mid-way was taken over by G.S. Gill, Assistant Director, who headed the map section during the vital period. He was ably assisted by Jiwan Singh Gill, Artist (now Senior Artist), Usha Kalra, Artist and Kulbir Singh, Draftsman. Because of his knowledge of geography and map work, he delivered the goods desptie the absence of Geogropher and Senior Geographer in the directorate.

Manuscript finalisation :

The final draft(s) as emerging out of the deliberations of the officers were entrusted to a cell called as 'Press Manuscript Cell" headed by M.L. Sharma, Assistant Director who was actively assisted by Jai Dev. They raced against time frequently to give final shape to the volume(s) for onward transmission to the press.

Typing :

K.C. Pardeshi, Senior Stenographer) headed this cell. His knowledge of such publications earlier was an asset. He was assisted by Ajmer Singh, Stenographer and some of the other typists from the various seats in the diretorate.

Printing :

This cell was headed by M.L. Sharma, Assistant Director and actively assisted by H. S. Sudan and Jai Dev. They drew upon the services of others in the directorate, wherever necessary.

Shri M.S. Mahadeokar, Assistant Controller of the U.T. Printing Press co-operated in ensuring that the publication saw the light of the day at the earliest.

To each one of them I acknowledge my thanks.

D. N. DHIR,

Chandigarh :
September, 1982.

Director, Census, Punjab.

PATIALA DISTRICT—A SHORT PROFILE

Location:

Patiala district is one of the famous princely states of erstwhile Punjab. Forming the south-eastern part of the state, it lies between 29°—49'and 30°—47' north latitude and 75°—58' and 76°—54' east longitude. It is surrounded by Ludhiana, Rupnagar districts and Union Territory of Chandigarh in the north, Sangrur district (which stretches parallel to it) in the west, Ambala and Kurukshetra districts of neighbouring state of Haryana in the east and Jind district of Haryana in the south.

Origin:

The district derives its name from the city of Patiala which consists of two words 'Pati' and 'ala'. 'Pati' means territory and 'ala' is the name of its founder. It was Baba Ala Singh of Malwa region who laid its foundation in 40s of the 18th century. He ruled the area with headquarter at Nabha. Sodhi-di-Garhi was built by him in 1757 at Patiala, which was lateron made capital of Patiala State, and continued to be so.

The city remained in possession of Maharaja of Patiala till the dawn of independence when it formed part of PEPSU (Patiala and East Punjab States Union) which in 1956 was merged in the then state of East Punjab.

By and large the present district comprises territories of formerly princely states of Patiala and Nabha.

It comprises 1,470 villages (out of which 1,426 are inhabited, 35 uninhabited, and 9 have been merged in towns) and 13 towns—the total jurisdiction of the district is distributed in 5 tahsils viz. Fatehgarh Sahib, Rajpura, Patiala, Samana and Nabha which are also sub-divisional headquarters.

Area:

As per the information received from Surveyor General of India, the district covers an area of 4,584 sq. kms ranking sixth in terms of area in the state. The area figures of the tahsils as supplied by the Director of Land Records, Punjab, are as follow:—

Tahsil	*Area in sq. kms.*		
	Total	Rural	Urban
Fatehgarh Sahib	701·5	686·1	15·4
Rajpura	1,138·0	1,116·4	21·6
Patiala	1,112·4	1,076·0	36·4
Samana	813·3	803·6	9·7
Nabha	862·8	835·6	27·2

Climate:

The district has extreme climate like other districts in the plains of the state. It is quite hot in summer and sufficiently cold in winter. From March onwards the temperature starts rising and reaches around 45° C in June. Summer is followed by a rainy season for the next three months i.e. July to September when the humidity rises in the atmosphere and weather becomes sultry. During this season Ghaggar River and its tributaries render the countryside swampy at places. From early October the weather turns fair and by the end of the month mild cold season sets in. November-December are fairly pleasant though chilly and generally free from rains. The coldest months are January and February when the temperature could go down to the level of 0.6°C. Mild winter rains add to the fall of temperature. From March onwards the spring sets in making the countryside green and pleasant.

Rivers, Streams and Drains:

There is no perennial river flowing through the district. The main seasonal stream which traverses this district is Ghaggar.

After receiving the waters of some hill torrents like Sukhna, Jhajjara and Sirsala, Ghaggar, enters the plains near Mubarakpur and after skirting the border of Kharar tahsil of neighbouring Rupnagar district, it

enters Patiala district from north-east. During its course in the district, Bangar, Tangri and Patiala *nadis* merge into it. Its bed is narrow and ill-defined in Banur and Rajpura but near Ghanaur its banks are low and the stream floods easily. During the rainy season considerable water flows in it, and with other numerous torrents joining , it causes extensive floods and damage in the region. However, some times back bunds have been constructed and number of drains built to control the floods.

Patiala *nadi* rising from near Chandigarh and carrying with it the water of several other torrents flows past Patiala and falls into the Ghaggar near village Ghanaura in Samana.

Sirhind *Choa* commencing from near Rupnagar flows through the areas of Fatehgarh Sahib, Bhawanigarh and Sunam.

Canals :

The Banur canal has been taken off from the Ghaggar near Banur. It is a seasonal canal and besides being a source of irrigation is an anti-flood measure. The Sirhind canal and Bhakra Main Line are the main sources of irrigation. The Sirhind canal enters the district near Doraha, and after traversing it over a considerable length, irrigates the areas of Sirhind, Patiala and Nabha tahsils. The Bhakra Main line enters the district at village Fatehpur in Sirhind tahsil and flowing south-west covers the whole district through its various branches.

The construction of a vast network of canals and roads has disturbed the natural drainage. With a view to controlling the floods due to untimely and heavy rains and minimising water-logging arising due to the new canals, spurs and stuts have been built into the beds of Ghaggar at some points, additional syphon has been provided in the branch of Bhakra Main Line and bunds and embankments have been provided at various ends.

The well known drains are the Patiala Model Town Drain, the Rohti Drain the Nabha Drain and the Mohalgowara Drain.

Topography:

The district is situated for a major part in the west Indo-Gangetic alluvium. It is a house of vast fertile lands, well irrigated with bumper yield in crops particularly rice and wheat. The soil owes its main characteristics to the action of the Ghaggar and other small hill torrents which form its tributaries. There are at some places patches of hard and unyielding soil which requires strenuous efforts at reclamation. Similar efforts are afoot in certain pockets of water-logged areas.

Land utilisation-Predominantly agriculture :

The economy of Patiala district is agriculture-oriented, since more than 70 per cent of its population live in rural areas and of the total workers in the district, 57.55 per cent are engaged as cultivators and agricultural labourers.

In the year 1979-80, the total land under cultivation was 462,800 hectares which is 9.2 per cent of the total cultivated land in Punjab. Forest area in the district is 11,868 hectares which is 5.21 per cent of the total area under forests in the state. The area under crops was 390,340 hectares, out of which two crops were grown in 277,417 hectares. Main crops of the district are wheat, paddy, barley, maize and sugarcane. The area under three main crops during 1978-79 and 1979-80 in the district is as follows :

Name of main crop	Area under each crop (in 000 hectares) 1978-79	1979-80
Wheat	288	295
Maize	31	27
Paddy	183	199
Sugarcane	12	8

The above statement shows that area under paddy and wheat has increased whereas area under sugarcane and maize has decreased. It will be noticed that more than half of the cropped area is under wheat.

Tubewells, wells and canals are the main source of irrigation in the district. Well irrigation is no longer popular and is giving way to tubewell irrigation. In 1979-80 there were 51,075 tubewells and 6,479 wells in the district. The total irrigated area was 79.8 per cent of the total cultivated area. Nabha tahsil with 92.1 per cent irrigated area topped amongst the tahsils.

Under various schemes small farmers are being provided necessary financial assistance for the installation of tubewells, and purchase of buffaloes and sheep.

For marketing of agricultural produce there were 10 regulated mandis in 1979-80 in the district. Many purchasing centres have been opened for the convenience of farmers.

Fruit research station located at Bahadurgarh near Patiala city is a well known institution in the district working under the control of Punjab Agricultural University Ludhiana.

Animal Husbandry :

With the passage of time there has been proportionate increase in the cattle wealth particularly of milch cattle, even thoug the increase in mechanised farming has meant apparent holding back of any progress in the number of bullocks earlier used in ploughing.

Present jurisdiction :

Princely state of Patiala, upto the independence of the country, had its own administrative units, some of which have since merged into the neighbouring states of Haryana and Himachal Pradesh. From out of the present jurisdication Rajpura towards north and Samana towards south were parts of the parent state. After the creation of PEPSU (Patiala and East Punjab States Union), the administrative unit of Patiala district was evolved with the merger of neighbluring princely state of Nabha. The other parts of the present Patiala district, namelyFatehgarh Sahib formed a separate district with Sirhind, Payal and Amloh as other tahsils of them Payal now lies in Ludhiana district) and Dera Bassi formed a part of erstwhile Kohistan district alongwith Naraingarh and Kandaghat tahsils (the later two have since merged in Himachal Pradesh). Since 1971 by and large Patiala district has remained intact but for a few inter-district marginal alterations as follows :—

(i) Fatehgarh Sahib tahsil lost 23 villages to Kharar tahsil of Rupnagar district.

(ii) Rajpura tahsil gained 9 villages from Kharar tahsil of Rupnagar district.

(iii) Fatehgarh Sahib tahsil lost 4 villages to Kharar tahsil of Rupnagar district.

The status of tahsils, however, had altered and now the district comprises 5 tahsils—each tahsil having been upgraded to a sub-division.

Communications :

For the social and economic development of any area, a well knit transportation system is a pre-requisite. As the economy of the district is agriculture based, the linking of villages with the towns/cities by roads is very essential to provide good transport system. In 1978-79, the total length of roads in the district was 3,469 kms. which increased to 3,569 kms in 1979-80. Patiala district is on the top among all the districts in Punjab so far as length of roads is concerned. It has a well knit transprt system. Buses of PEPSU, Punjab and Haryana Roadways are mostly plying on the these roads. Some routes linking villages with the city have been given to private transporters also and private buses are plying on link roads.

The National Highway No. 1, namely Grand Trunk Road (from Haryana border to Amritsar and on to Indo-Pakistan boarder near Wagha) passes through Rajpura, Sirhind and Gobindgarh towns of the district. Yet another National Highway No. 22 (Ambala-Kalka Simla Tibet Road) passes through Lalru and Dera Bassi Towns situated in Rajpura tahsil.

The following 5 State Highways, also pass through the district :—

State Highway No.8	.. Pehowa-Bhunderheri-Patiala
State Highway No. 9	.. Bassi-Naraingarh
State Highway No. 10	.. Chandigarh (Dakauli)-Rajpura-Patiala-Patran-Tohana-Hissar
State Highway No. 11	.. Ludhiana-Sangrur-Patran-Jind
State Highway No. 12	.. Patiala-Sangrur-Barnala-Bathinda.

The State Highways connect through the district other district of neighbouring Hatyana state and Punjab.

Four railway lines pass through the district, namely Ambala-Kalka, Delhi-Amritsar, Rajpura-Bathinda and Sirhind-Rupnagar. The important railway stations falling on these lines running through the district are Patiala, Patiala Cantt., Rajpura, Gobindgarh, Sirhind, Fatehgarh Sahib, Bassi Pathana, Nabha, Kakrala and Chhintawala.

Amenities Educational, Medical, Postal, Water-Supply and Electricity :

The district has made great strides in the field of various amenities in the last 15 years. The picture in respect of schools and colleges is as follows :—

	1967	1981
Primary schools	674	1,270
Middle schools	72	143
High/Higher secondary schools	74	171
Colleges	6	12

The Punjabi University came into existence in June, 1962 for promoting Punjabi language, consequently the medium of instruction in the university is Punjabi. All the 12 colleges located in the district are affiliated to Punjabi University. These include Medical, Engineering, Commerce, Law and Physical Education colleges. The university has a full-fledged department of Religious Studies as a distinctive feature.

In the matter of health services the district is equally well placed as compared to other districts of the state The coverage of population may be seen from the following table :—

Area	*Population covered by*		
	Per doctor	Per bed	Per medical institution
Patiala	914	659	10,395
Punjab	1,976	848	10,077

There are 149 medical institutions in the district of which 102 are in rural areas comprising 7 hospitals, 10 primary health centres and 85 dispensaries. The family welfare services provided through the authorised medical attendants and nurses is equally impressive compared to some other parts of the state. The following table may be seen in this connection :-

Area	*No. of patients attended by*		
	Per doctor	Per mid wife	Per nurse
Patiala	896	4,460	2,802
Punjab	1,960	4,134	3,735

In addition Ayurvedic and Unani institutions for dispensing medical treatment are also found in good number in the district.

As in other parts of the state potable water-supply in this district is also comparatively in a better measure All the inhabited villages have water-supply sources in the village itself or near the village habitations.

All villages are electrified.

The postal facilities have also recorded appreciable increase as would be apparent from the following statement :-

	1966-67	1979-80
Post offices	166	270
Telegraph offices	24	45
Telephone exchanges	3	20

Present Demographic Picture :

The population of the district as revealed by the 1981 census was, 1,568,898 persons (841,916 males and 726,982 females), which is 9.34 per cent of the state's total population. Of the total district population 29.59 per cent lives in urban areas as against 26.03 per cent at the 1971 census. The sex ratio of the district was 863 which is lower than the state figure of 879.

The growth of population during the decade 1971 -81 was 29.55 per cent as against 23.89 per cent for the State. The urban growth rate (46.79 per cent) was double than the rural growth rate (22.40 per cent) during the last decade i.e. 1971 . Tahsilwise percentage variation during the decade 1971—81 is given in the following statement : —

Serial No.	Tahsil	Total	Rural	Urban
1	Fatehgarh Sahib	27·01	22·71	45·16
2	Rajpura	26·45	23·22	42·81
3	Patiala	31·80	28·62	35·52
4	Samana	33·43	21·96	108·77
5	Nabha	29·48	19·89	62·58

The density of population is 342 persons per sq. km which is slightly higher than the state density (333). It may, however, be noted that density of population of the district at the 1971 census was lower than that of the state.

Literacy:

The literacy rate of the district as revealed at 1981 census is 40.45 per cent which is lower than the literacy rate worked out for the state (40.86 per cent) but when compared to literacy rate (31.51 %) at the 1971 census it shows an advancement to an appreciable extent.

Scheduled Caste Population :

The percentage of scheduled caste population to total population was 22.12 per cent which is significantly lower than the state figuer (26.87 %).

Occupations·

Out of total population of 1,568,898 persons (841,916 males and 726,982 females) in the district, 469,151 (451,312 males and 17,839 females) are main workers i.e. those who have reported to have worked for six months or more prior to the date of enumeration. The work participation rate for the district thus works out to 29.90 per cent of the total population (53.61 per cent for males and only 2.46 per cent for females). The corresponding rates for the Punjab State are 29.35 per cent for total population (53.15 per cent) for males and only 2.27 per cent for females). Thus, the work participation rate of the district is marginally higher than the rate worked out for Punjab state. Similarly there is a marginal increase in work participation rate when compared with rates observed during 1971 census (work participation rate during 1971 census was 29.36 per cent for persons).

The major chunk of main workers are engaged as 'other workers' (41.17%) followed by cultivators (35.10%), agricultural labourers (22.45 %) and household industry workers (1.28 %). The female participation as 'other workers (75.44%) is a remarkable feature since it is significantly higher than the rate observed for the Punjab state (63.95%). The same pattern is noticed for males also resulting into higher work participation rate as 'other workers' in the district when compared with Punjab state.

Trade and Commerce :

The district is surplus in agricultural produce and has good markets at Patiala, Nabha, Samana, Rajpura, Dera Bassi, Sirhind, Bassi Pathana, and Gobindgarh where the surplus commodities are brought for sale.

Iron and steel products, rolling stocks, diesel engines, cycles/cycle parts, spare parts of sewing machines, enamelled copper, agricultural implements, piston rings, PVC cables, electric wires, staple yarn, groundnut oil, seeds, foodgrains (wheat, rice and maize), pulses, chillies, desi ghee, biscuits and world famous beverage marketed under the trade name Horlics are the most important commodities exported from the district.

Pig iron, aluminium, medicines, cotton, spices, sugar, vegetables are some important commodities imported into the district

Industrial Development :

Patiala is predominantly an agricultural district but it is catching up with other districts in industrial expansion now.

The prominent industrial town of the district is Gobindgarh, which is known as 'steel town' of India. In 1902 Maharaja Hira Singh got started some industrial units. It was declared a free trade zone for steel by Maharaja Partap Singh in 1928. There are now 205 steel rolling mills in Gobindgarh. The first rerolling mill was established in 1940. These mills are exporting rerolled steel to various parts of the country and also to some foreign countries. It is due to vast industrial activity that Gobindgarh town has almost touched Khanna town (in Ludhiana district) and both towns look like as one town. Since now expansion towards Khanna town is not possible, a number of steel rerolling mills are being established on Gobindgarh-Amloh road. It is expected that in the near future Amloh town will also become prominent in the field of steel rerolling

Rajpura town is the second biggest town of the district after Patiala city. Most of its inhabitant had migrated from Pakistan on partition of the country. The Dalima Biscuit Factory Ltd., Amrit Banspati Co. Ltd. Road Master Industries (Pvt).) Ltd., Industrial Cables Ltd. (ICL), and Bharat Commercial and Industrial Ltd., are some of the major industrial units of the town.

Patiala and Nabha towns are known for household industries of fancy and colourful waiste-cords and hair-tying cords (Nalas and *Parandas*) and *jutis* (type of casual footwear). Patiala city has quite a distinction in 'Zari and 'Gota' works.

Sirhind town has recently developed as a centre for building truck and bus bodies.

The survey for unregistered factories conducted by Economic and Statistical Organisation, Punjab, during October, 1975 to May, 1977 revealed that Patiala district had 5,782 unregistered factories employing 11,811 persons with an investment of Rs. 831 8 lakhs. The value of production by these industries during the above said period was to the tune of Rs. 1,661.3 lakhs. The number of small scale factories in Patiala registered with Industry Department, Punjab were 1,337 in 1978-79 which have gone up to 1,652 in 1979-80. The investment in these small units during 1979-80 was Rs. 1,401.5 lakhs employing 13,029 persons. Among these, units manufacturing agricultural implements had predominance.

For the development of industrial sector, industrial focal points have been declared in Nabha and Rajpura where Government provides economic assistance to industries.

A prominent industry in the private sector is Milkfood Ltd., which is situated in Bahadurgarh about 11 kms from Patiala City. This unit produces desi ghee, milk powder, sterilized flavoured milk The Goetze India Ltd. another important factory in this sector manufactures auto pistons and rings. Hindustan Milkfood Manufacture Ltd. (HMM) situated at Nabha manufactures desi ghee and "Horlicks", the well known beverage.

The Government of India in collaboration with the Punjab Government is establishing a diesel component workshop at the northern fringe of Patiala city. The project will be completed with a total investment of about Rs. 100 crores. It is another big step forward in the field of industrialisation of the district as also of the state.

1. *Historical Towns Patiala* . -Patiala is a town of gardens, palaces and magnificent buildings. The fort with a burj of Baba Ala Singh is the principal place of historical interest. The main old town and its bazars had sprung up around it.

Another place of historical interest is Gurdwara Dukh Niwaran, which is associated with the 9th Guru Teg Bahadur. It is stated that when the Guru was on his way to Delhi to offer the supreme sacrifice, he stayed at the site of the present Gurdwara, then situated in Lehal village. At that time the village was in the grip of an epidemic which was claiming a heavy toll of life. The Guru took out some water from a small pond where the present tank of the Gurdwara is now situated and sprinkled it towards the village with his blessings. It is said that the affected villagers got rid of the epidemic. Since then the water of the tank is regarded as ameliorative of diseases.

The spacious Baradari Garden is another attraction of the town. The Baradari Palace, the Rajendra Gymkhana Club, the Mahendra Maharani Club and a Circuit House are important buildings of the princely days situated within the Baradari Garden. An important building of princely days, Moti Bagh Palace, now houses the National Institute of Sports.

The magnificent building of the new Rajendra Hospital, the Government Medical College, the Government College for Women, the State College of Education, Thapar Institute of Engineering and Techology, and the Central Public Library are products of the post-Independence period.

The temple of Kali Devi is an mportant place of worship.

2. *Nabha* :- Nabha, seat of an erstwhile princely state of the same name, is situated 25 kms west of Paiala. The town derives its name from *nabh-ka-phul*, because at the time of its founding it was a village surrourded by ponds with lotus.

The old town developed around a pucca fort. There was a big mud wall surrounding the town with six gates, which still exists. The fort now houses some Government offices, and a Library. Shyam Bagh, Pukhta Bagh, Mubarik Bagh and Kothi Bagh are among the old gardens of the town. In the Shyam Bagh are located the marble tombs of the former rulers of the State. The Pukhta Bagh has the places and other residential buildings belonging to the ruling family. Hira Mahal constructed by the late Maharaja Hira Singh is an imposing structure and contains the relics of Guru Gobind Singh in the form of some hair in a comb and some of his orders (farmans) which are exhibited only during the Dussehra festival. In the Mubarik Bagh is located a spacious building called Elgin House which once was a guest house, but has now been converted into a Public School.

3. *Rajpura* :-It is situated 28 kms to the north-east of Patiala city on the Delhi-Amritsar Grand Trunk Road. It is also a railway junction on the Delhi-Amritsar-railway line and is connected with Bathinda through the Rajpura-Bathinda railway line.

The town is said to have been founded by Raja Todar Mal, Akbar's famous minister and was once headquarters of Pinjaur Nizamat in Patiala State. It continued as the headquarters of the Tahsil of that name, which is now a Sub-Division. The Tahsil, and other offices and courts are located in a sarai which is of archaelogical interest and said to have been built by Sher Shah Suri. Its outer dimensions are 450′×450′ with small towers on each corner and two big towers each in front and on the back gate. The present importance of the town, is, however, due to the newly developed Rajpura Township. There are two markets in the township, one for foodgrains and the other for chillies. Rajpura is fast developing into an important industrial centre.

4. *Sirhind* :-It is situated at about 28 kms north-west of Rajpura on the G.T Road. It is a railway Junction on the Delhi-Amritsar railway line. The Rupnager-Nangal railway line branches off from here.

Sirhind is a town of considerable antiquity and was the seat of suba of Sirhind. In 1704 A.D. Wazid Khan the Governor of the place, bricked alive here the two younger sons of Guru Gobind Singh -Baba Zorawar Singh and Baba Fateh Singh. In 1760 Banda Bairagi avenged this heinous crime and sacked Sirhind and killed Wazid Khan. After his invasion Ahmad Shah Durrani appointed Zain Khan as the Subedar of Sirhind in 1761.

There are a number of places of historical and archaelogical interest at Sirhind which are 'protected monuments'. The Aam Khas Bagh was the residence of the local Governors during the Moghul period and was connected by a tunnel with the fort where the two young sons of Guru Gobind Singh were imprisoned and bricked alive. Here now the Gurdwara Fatehgarh Sahib stands. It was an extensive garden walled from all sides and contained fine buildings, some of which stand to this day. One of these buildings is now used as a rest-house. The garden was originally planted by Sultan Hafiz whose tomb is situated closeby. The State Horticulture Department now maintins a fruit garden and nursery here, and the State Tourism Development Corporation made it into a tourist resort.

An annual fair is held at the tomb of Roza Sharif in which large number of pilgrims come from far and wide such as Pakistan, Afghanistan to pay their homage.

5. *Fatehgarh Sahib* :—Though almost a part of Sirhind, Fatehgarh Sahib lies on the Sirhind-Bassi road at a distance of about five kms. from Sirhind.

The place derives its name from Baba Fateh Singh the younger of the two martyred sons of Guru Gobind Singh and also on account of the *Fateh* (victory) which Bindi Bairagi later scored over Sirhind. A memorial at Fetehgarh Sahib was raised in 1710 by Banda Bairagi over the remains of the fort where the two martyrs were bricked alive. Maharaja Karam Singh of Patiala later renamed the town as Fatehgarh Sahib.

Fatehgarh Sahib is an important place of pilgrimage for the Sikhs. A big fair is held here annually from 11th to 14th Poh of Bikrami calendar (Christmas week) to commemorate the martyrdom. The main centre of attraction is the magnificent Gurdwara Sri Fatehgarh Sahib. It can be entered by two gates, one of which is named after Banda Bahadur and the other, the more majestically built, after Maharaja Yadvindra Singh of Patiala. An underground cell within the Gurdwara shows the wall built of small bricks in which the two martyrs are believed to have been bricked alive. On the right side of the Gurdwara is a memorial in the shape of a platform which is called Chhe Hazar Shahidan Da Katalgarh Angitha (the sacrificial furnance of 6,000 martyrs) where Banda Bahadur cremated dead bodies of 6,000 Sikh warriors who laid down their lives during the attack on Sirhind. The minaret where Mata Gujri and her grandsons had been kept in detention before the martyrdom is now called burj of Mata Gujri and enshrines a Gurdwara. At the rear of Gurdwara a very spacious hall has been built, some yeors ago.

6. *Banur*:—The town is 14 kms north-east of Rajpura on the metalled road connecting Rajpura with Chandigarh. It is an ancient town. Its original name was Popa Nagri or Pushpa Wati, the city of flowers. It was once famous for the scent distilled from its chambeli (by a cinth) gardens. Madhva nala and Kama Kandla, hero and heroine of the drama of the same name, lived here during the reign of Vikrama Ditya. The earliest monument existing in the town is a dilapidated tomb of Malik Suleman, father of Khizar Khan who occupied the throne of India from 1414 to 1461. Banur became a mahal or the sarkar of Sirhind under Akbar Banda Bairagi sacked the town in 1708. It was wrested from the Moghuls by the Singhpuria Sikhs and Amar Singh, Maharaja of Patiala after the fall of Sirhind in 1763, eventually came into the exclusive possession of Patiala. In addition to the tomb of Malik Suleman, the suburbs of Banur contain the ruins of an old fort, popularly known as Zulamgarh (the citadel of tyranny) and of another fort of Banda Ali Beg of a more recent date.

This town is now receiving attention as a developing mandi and establishment of rural industrial estate. The State Zoo (Mahendra Mohan Chaudhary Zoological Garden at Chhatbir) which is closely situated has been drawing visitors from all over the State particularly from Patiala and Chandigarh.

ANNEXURE

Jurisdictional Changes Patiala District

(Inter-district Changes):—

I. Fatehgarh Sahib Tahsil lost 23 villages to Kharar Tahsil of Rupnagar district	..	No. 677-Rg.1-72/1911, dated 22nd June, 1972
II. Rajpura Tahsil gained 9 villages from Kharar Tahsil of Rupnagar district	..	No. 765-Rg.I—74/1571, dated the 10th June 1974
III. Fatehgarh Sahib Tahsil lost 4 villages to Kharar Tahsil of Rupnagar district	..	No. 765-Rg-I-74/1571, dated the 10th June, 1974

INTRODUCTION TO DISTRICT CENSUS HANDBOOK

Keeping in view the needs of planners, for exhaustive infra-structural and amenity data up to village level, required for micro-level planning, the formats of the village and town directory of 1981 DCH series have been redesigned and some new features useful for planning have been added while maintaining the comparability with 1971 data. A few new items of information such as adult literacy centres, primary health sub-centres, community health workers in villages, etc. have been introduced to meet some of the requirements of revised minimum needs programme. A new item 'approach to village' has been introduced to give an idea about the villages in the district which are inaccessible. A new column 'Total population and number of households' has been introduced to examine the correlation of amenities with the population and number of households they serve. Two more appendices namely (i) listing the villages where no amenities are available and (ii) list of villages indicating ranges according to the proportion of scheduled castes to total population have been added with the same object in view. A significant addition in class of the town in all the six statements of the town directory which alongwith population and decadal variation since 1901 to 1981 will prove quite useful for analysing the infra-structure of amenities in the urban area of state.

Contents :

The 1981 DCH series have been divided into two parts: Part A contains village and town directory and Part B PCAs of villages and towns and PCA for scheduled castes up to tahsil/town levels. Both parts are being published in this volume.

The village directory contains information about total area of each village in hectares, total population and number of housholds, amenities/conveniences available in the village, staple food of the people and the land-use pattern. There is also information about the nearest town and its distance from the village and approach to the village

The town directory presents data on each town with the aid of six statements giving the status and class of the town, the decadal population and growth rate since 1901—1981, physical and locational aspects, municipal finance and availability of amenities/facilities like medical, educational, banking etc., trade, commerce and industry.

PCA incorporates tahsilwise data for each village and each town/ward under the following heads :—

(i) Area in hectares/sq. kms.
(ii) Number of occupied census houses.
(iii) Number of households
(iv) Total population
(v) Scheduled caste population (there is no scheduled tribe in Punjab State)
(vi) Literates
(vii) Main workers classified into four categories of cultivators, agricultural labourers, household industry and other workers.
(viii) Marginal workers.
(ix) Non-workers.

Maps :

The map of the district and a map for each tahsil of the district have been included.

The district map shows the district boundary and location of its headquarters, tahsil boundaries and location of its headquarters, national highway, state highway, important metalled roads, railway lines, river and streams, towns and census villages according to population size, post and telegraph offices, degree colleges and technical institutions, rest houses, etc.

The tahsil map cotains boundary of tahsil and location of tahsil headquarters, villages with location code numbers, villages with population, size, uninhabited villages with location codes ,urban areas with location codes, roads, railways and service facilities such as post and telegraph offices, higher secondary schools, hospitals, etc.

Besides both the district and tahsil maps have an inset map where additions or loss of territory that has taken place during the decade, have been shown.

Sources :

Whereas PCA contains census data, for compilation of village and town directory, the relevant schedules alongwith comprehensive instructions, were sent to the revenue officers (for rural areas) and executive officers of municipal bodies (for urban areas) to be filled in at their end. The completed schedules were collected from the quartes concerned during the house-listing operations in April, 1980 by the staff of this directorate. The schedules were scrutinised at the directoate and the directories were compiled therefrom.

Census Concepts and Definitions :

Village and Town Directory :

Rural-Urban Classification :—The 1981 census data are being presented by rural and urban areas, as in the previous census.

As far as rural area is concerned, 'village' has been adopted as the lowest census unit.

Rural areas : 'Village'

The definition of the village adopted in census is identical with that of 'mauza' given under section 3(i) of the Punjab Land Revenue Act, 1887. It is the 'revenue estate' determined as such for the purpose of levy and collection of the land revenue. The revenue estate is defined in the Act *ibid* as an area :

(a) for which a separate record of rights exists ; or

(b) which has been separately assessed to land revenue, or would have been so assessed if the land revenue had not been realised, compounded or redeemed; or

(c) which the State Government has otherwise declared an estate.

The village is thus not merely the *abadi deh* (red lined area) for census taking but the entire land coming within the fixed boundaries of each village in terms of the Act *ibid.*

There are 1,470 villages (including 35 uninhabited and 9 since merged in urban areas in Patiala District.)

Urban areas : 'Town' :

The following definition of an 'Urban' area has been adopted at the 1981 Census which is analogous to the criterion adopted in 1961 and 1971 censuses with some minor variation (as indicated below) :

(a) All places with a corporation, municipality or cantonment board or notified town area.

(b) All other places which satisfied the following criteria :—

(i) a minimum population of 5,000 ;

(ii) at least 75 per cent of the male working population engaged in non-agricultural (and allied) activity ; and

(iii) a population of at least 400 per sq. km (or 1,000 per square mile).

The urban criterion of 1981 census varies slightly from that of 1961 and 1971 censuses. In that the males working in activities such as forestry, logging etc. were then treated as engaged in non-agricultural activiity. It, therefore, contributed to the 75 per cent criterion in 1961 and 1971 censuses whereas in the 1981 census these activities have been treated as at par with cultivation and agricultural labour for the purpose of this criterion.

Prior to the 1961 census, the definition of 'urban' area was somewhat liberal and a lot was left to the discretion of the local authorities. At the 1971 census, the state directors of census operations were also given discretion in marginal cases to include, in consultation with the State Government, as place that had other distinct urban characteristics, or to exlude an undeserving place from being treated as "urban".

Urban agglomeration (U.A.) :

Apart from town/city (a town with a population of one lakh and above), the 1971 concept of urban agglomeration is also adopted for the 1981 census. Very often large railway colonies, university campuses, port areas, military camps etc., came up outside the statutory limits of the city or town but adjoining it. Such areas may not by themselves qualify to be treated as towns but if they form a continuous spread with the town they are outgrowths of the town and deserve to be treated as urban. Such towns together with their outgrowths have been treated as one urban unit and called "urban" agglomeration.

(a) A city with continuous outgrowth (the part of outgrowth being outside the statutory limits but falling within the boundaries of the adjoining village or villages) ;

(b) one town with similar outgrowth or two or more adjoining towns with their outgrowths as in (a) ; or

(c) a city and one or more adjoining towns with their outgrowths all of which from a continuous spread.

Standard Urban Areas (S.U.A.) :

A new concept of standard urban area (SUA) as introduced in 1971 census was also followed for the 1981 census. The essential requirements for the constitution of a standard urban area are :

(i) it should have a core town of a minimum population of 50,000 ;

(ii) the contiguous "areas" made up of other urban as well as rural administrative units should have mutual socio-economic links with the core town ; and

(iii) in all probability this entire area should get fully urbanised in a period of two or three decades.

Certain SUAs' were determined on this basis in 1971 and some basic data were presented for 1951, 1961 and 1971 for such areas and their components. Similar data are being presented for the SUAs' in 1981 also. The idea is to present basic data for these areas for four to five decades so that the urbanisation process in those areas can be studied.

DEMOGRAPHIC CHARACTERISTICS BASED ON ANALYSIS OF INSET TABLE (PRIMARY CENSUS ABSTRACT)

TABLE I

Population—number of villages and towns, 1981

Sl. No.	Name of tahsil	Population									No of villages*		No. of towns
		Total			Rural			Urban			Total	Inhabited	
		P	M	F	P	M	F	P	M	F			
1	2	3	4	5	6	7	8	9	10	11	12	13	14
1	Fatehgarh Sahib	214,745	115,699	99.046	167,693	90,234	77,459	47,052	25,465	21,587	269	266	2
2	Rajpura	394,604	211,573	183,031	321,085	171,794	149,291	73,519	39,779	33,740	429	408	3
3	Patiala	463,635	247,517	216,118	243,747	130,643	113,104	219,888	116,874	103,014	358	348	2

*Excluding 9 villages merged in towns of the district

Population :

Table 1 shows sexwise population, number of villages and towns tahsilwise. It shows that the district had 1,426 inhabited villages and 13 towns wherein 1,568,898 persons (841,916 males and 726,982 females) as at 1981 Census were living. Out of these 1,104,603 persons (592,497 males and 512,106 females) live in the rural areas whereas 464,295 (249,419 males and 214,876 females) are in the urban areas. Urban population of district constituted 29.59 per cent of the total population compared to 27.68 per cent of the state as a whole. The district has five tahsils out of which Patiala is most populous, its population being 463,635 followed by Rajpura with 394,604 persons ; Nabha with 282,272 persons ; Fatehgarh Sahib with 214,745 persons and last of all Samana tahsil with 213,642 persons. Largest number of persons are found in urban areas of Patiala tahsil (219,888), next in the number of urbanites is Nabha tahsil (79,656 persons), Rajpura with 73,519, Fatehgarh Sahib with 47,052 person and Samana Tahsil with 44,180 follow.

Sex Ratio :

Sex ratio of the district is comparatively low (863 females for every 1000 males) as compared to 879 for the state.

TABLE 2

Decadal change in distribution of population

Sl. No.	Name of tahsil	Population						Percentage decadal (1971—81) variation		
		1971			1981					
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10	11
1	Fatehgarh Sahib	169,074	136,661	32,413	214,745	167,693	47,052	27·01	22·71	45·16
2	Rajpura	312,059	260,579	51,480	394.604	321,085	73,519	26·45	23·22	42·81
3	Patiala	351,763	189,505	I62,258	463,635	243,747	219,888	31·80	28·62	35·52
4	Samana	160,110	138,948	21,162	213,642	169,462	44,180	33·43	21·96	108·77
5	Nabha	217,997	169,001	48,996	282,272	202,616	79,656	29·48	19·89	62·58
	District Total	**1,211,003**	**894,694**	**316,309**	**1,568,898**	**1,104,603**	**464,295**	**29·55**	**23·46**	**46·79**

Growth rate :

Table 2 gives decadal growth in distribution of population. It shows that the population of the district has increased 29.55% during 1971—81 decade, respective percentages for rural and urban areas being 23.46 whereas the percentage decadal (1971—81) population growth rate of the state is as 23.89 per cent. Considering tahsilwise it is found that percentage growth rate is maximum (33.43per cent) for Samana tahsil and minimum for Rajpura (26.45 per cent). It may also be observed that Samana tahsil has gained most so far as urban component is concerned (108.77 per cent) followed by Nabha tahsil (62.58 per cent), Fatehgarh Sahib tahsil (45.16 per cent), Rajpura tahsil (42.81 per cent) and the last in this respect being Patiala (35.52 per cent). The addition of two towns Patran and Ghagga both NACs has attributed to highest urban growth in Samana tahsil. Thus the district which has lower pace of urbanisation from 1951 to 1971 compared to the state, has caught up the state during 1971—81 decade.

Villages :

Table 3 given below gives distribution of villages by population ranges—

TABLE 3

Distribution of villages by population ranges

Range of population		No. of inhabited villages in each range	Percentage of inhabited villages in each range
1		2	3
Less than200	..	129	9.05
200—499	..	395	27.70
500—1999	..	836	58.63
2000—4999	..	64	4.48
5000—9999	..	2	0.14
10000+	..	—	—
Total	..	**1,426**	**100.00**

Out of 1,426 inhabited villages in the district 58.63 per cent are in the population range 500—1999 (836 villages), followed by 27.70 per cent (395 villages) in the population range 200—499, 9.05 per cent (129 villages) having population less than 200, 4.48 per cent (64 villages) are found in the population range of 2000—4999 where as 0.14 per cent (only 2 villages) are in the poulation range 5000 to 9999. There is no village in the district with a population more than 10,000.

Density :

The density of population in the district works out to 342 persons per sq. km. as against the state density of 333. Table 4 below indicates the distribution of villages by density.

TABLE 4

Distribution of inhabited villages by density

Range of density (per sq. km.)		Total number of inhabited villages in each density range	Percentage of villages in each density range
1		2	3
Less than 10	..	9	0.63
11—20	..	10	0.70
21—50	..	29	2.03
51—100	..	54	3.79
101—200	..	377	26.44
201—300	..	546	38.29
301—500	..	330	23.14
501+	..	71	4.98
Not known	..	..	..
Total	..	**1,426**	**100.00**

The above table shows that most of the inhabited villages (546 or 38.29%) have density of population varying between 201—300 whereas least number of villages (9 or 0.63%) is found in the density range of less than 10 (87·87%) villages (1,253 in number) are in the density ranges of 101 to 500.

Scheduled Castes population :

The district has relatively lower percentage (22.12) of scheduled caste population in comparision to 26.87 per cent for the state as a whole. The following table gives proportion of scheduled caste population in inhabited villages.

TABLE 5

Proportion of scheduled caste population to total population in the village

Percentage range of scheduled caste population to total population		No. of inhabited villages in each range	Percentage of inhabited villages in each range
1		2	3
Nil	..	94	6·59
Less than 5	..	61	4·28
6—10	..	96	6·73
11—15	..	130	9·12
16—20	..	161	11·29
21—30	..	357	25·03
31 and above	..	527	36·96
Total	..	**1,426**	**100·00**

Table 5 shows that in this district out of 1426 inhabited villages, as many as 94 (06.59%) villages have no scheduled caste population, maximum number 527 (36.96%) villages have scheduled caste po pulation 31 percent and above, and minimum 61 (4.28%) villages are found in scheduled caste percent range of less than 5. Second largest number of 357 villages (25.03%) have reported as having scheduled caste percentage of population range between 21 to 30.

Table 6 gives proportion of scheduled castes population in each town of the district.

TABLE 6

Proportion of Scheduled Castes/ population in towns

Name of the town	Total population	Total Scheduled Caste population	Percentage of Scheduled Caste population to total population
1	2	3	4
Amloh (M.C.)	7,098	1,497	21·09
Banur (M.C.)	7,453	1,698	22·78
Bassi Pathana (M.C.)	16,672	3,577	21·45
Dera Bassi (M.C.)	7,421	1,130	15.23
Ghagga (N.A.C.)	4,900	1,396	28·49

Patiala U.A.	2,06,254	16,716	8·10
Patiala (M.C.)	2,05,141	16,637	8·11
Patran (N.A.C.)	7,998	921	11·51
Rajpura (M.C.)	58,645	2,866	4·89
Samana (M.C.)	16,488	5,637	18·02
Sanaur U.A.	13,634	1,819	13·34
Sanaur (M.C.)	13,031	1,216	9·33
Sirhind (M.C.)	30,380	4,437	14.60
All Towns	**4,64,295**	**4,9444**	**10·65**

Note : There is no Scheduled Tribe in Punjab State.

Table 6 shows scheduled caste population in urban areas i.e. towns of the district. In all the 13 towns of the district, only 10.65 per cent (49,444 persons) belong to the scheduled castes out of the total urban population of 464,295 persons. Ghagga (N.A.C.) shows the highest percentage of scheduled caste population to total population (28·49), followed by Banur (M.C.) where the percentage is 22.78. The lowest percentage (4.89) has been reported in Rajpura town. It may, however be noted that there is no scheduled tribe population in the Punjab state as no tribe has been notified as such in this state.

Literacy :

The district reports a literacy rate of 40·45 in 1981 census against 40·86 for the state as a whole. The male literacy rate (47·27) is much higher than the female literacy rate (33·70) as in the case of state also. Table 7 shows literacy rate by population range of villages. It reveals that maximum number of villages (836) in population range 500—1999 have literacy rate of 32·05 wheras the minmum number of villages (2 only) in population range of 5000—9999 have literacy rate of 39·19.

TABLE 7

Literacy rate by population ranges of villages

Range of population	No. of villages in each range	Literacy rate
1	2	3
Less than 200	129	39·21
200—499	395	34·38
500—1999	836	32·05
2000—4999	64	31·01
5000—9999	2	39·19
10000+	..	..
Total	**1,426**	**32·40**

Table 8 gives literacy rate for each town of the district.

TABLE 8

Literacy rates for towns

Sl. No.	Name of the town	Literacy rate
1	2	3
1	Amloh (M.C.)	55·55
2	Banur (M.C.)	43·97
3	Bassi Pathana (M.C.)	57·23
4	Dera Bassi (M.C.)	61·03
5	Ghagga (N.A.C.)	26·08
6	Gobindgarh (M.C.)	48·89
7	Nabha (M.C.)	55·33
8	Patiala U.A.	65·09
	Patiala (M.C.)	65·04
9	Patran (N.A.C.)	50·21
10	Rajpura (M.C.)	71.15
11	Samana (M.C.)	48·13

	Sanaur (M.C.)	37·78
13	Sirhind (M.C.)	51·75
	All Towns	**59·60**

Table 8 gives literacy rates for towns. It shows that Rajpura (M.C.) has the highest literacy rate (71·15) and Ghagga (N.A.C.) has the lowest literacy rate (26·08). Next highest literacy rate is reported by Patiala M.C. (65.04) followed by Dera Bassi (M.C.) (61·03)

Working population

Table 9 gives literates, workers, non-workers, scheduled caste population and total population (Tansil-wise & total, rural and urban) for the district. It reveals that main workers constitute 29·90% (53·61% males & 2·46% females). Of the total working population of the district, 31·66 per cent is in rural areas where the per centage in urban areas comes to 29·89. This table also shows that 68·87 per cent of the total population of the district is constituted of non-workers (46·02% males & 95·32% females).

TABLE NO. 9

BRIEF ANALYSIS OF THE VILLAGE AND TOWN DIRECTORY

VILLAGE DIRECTORY

Amenities available in the village :

In the annexures immediately following this note, distribution of villages according to availability of different amenities has been indicated in table 10, while table 11 indicates the proportion of rural population served by these amenities and table 14 indicates the distribution of villages according to population range and amenities available. Table 13 indicates the distribution of these villages according to the distance from the nearest town and availability of different amenities and according to it out of 1426 inhabited villages, 468 (32.82%) have a town at a distance of upto 5 kms. 796 (55.82%) villages have an urban centre in distance slab of 6—15 kms. and the remaining 162 (11.36%) have an urban centre in a distance slab of 16—50 kms. which indicates that a fair number of villages are located near the urban centres and that inhabitants of only 162 villages have to cover a distance of more than 16 kms. to reach an urban centre.

Amenitywise analysis reads below :—

(*i*) *Educational facilities*: Of the total 1426 inhabited villages in the district, 1361 (95.44%) with a population of 98.79 per cent of the rural population of the district are equipped with the facility of a primary school. 65 villages of the district are, however, devoid of this basic facility, out of which 12 are in Fatehgarh Sahib tahsil; 18 in Rajpura tahsil ; 24 in Patiala tahsil ; 2 in Samana tahsil and 9 in Nabha tahsil. But all these villages are located in the vicinity of areas where educational facilities are available and villagers can avail the facility by commuting a distance of less than 5 kms.

(*ii*) *Medical facilities*: 254 villages (17.81%) out of 1426 inhabited villages have at least one of the medical institutions viz ; hospital, maternity & child welfare centre, health centre, primary health centre, dispensary, family Planning Centre etc. The proportion of villages enjoying one or more medical facilities are the highest (21.17%) in Samana tahsil and the lowest (12.07%) in Patiala tahsil. The proportion of rural population enjoying medical facilities is the highest in Rajpura tahsil (36.81%) and the lowest in Patiala tahsil (22.95%). 1172 villages in the district are deviod of any medical facility for their population within the village. However, out of these villages the inhabitants of 864 villages could avail the facility within a radius of 5 kms., for 252 villages within the range of 5—10 kms. and the inhabitants of remaining 56 villages have to traverse a distance of more than 10 kms. to avail the medical facility. The percentage of villages enjoying medical facilities is the highest (19.02%) among the villages within a radius of 5 kms. of an urban centre, whereas it is the lowest (12.96%) in a distance range of 16—50 kms. For villages lying in the distance range of 6—15 kms., 18.09 per cent posses medical facility. Thus it can be inferred that lesser the distance from an urban areas the more is the availablity of medical facility for the population of the component villages. Apparently the villages in the neighbourhood of urban centres tend to have more medical facilities.

(*iii*) *Drinking water facilities* : All the inhabited villages of the district invariably enjoy the drinking water facility. The main source of drinking water is hand pump supplemented by well/tubewell.

(*iv*) *Post and Telegraph facilities* : Out of a total of 1426 inhabited villages, 254 villages (17.81%) have the facility of post and telegraph. Tahsilwise percentages of villages enjoying the facility of post and telgraph in the desending order are 25.55 in Samana; 20.22 in Nabha ; 19.55 in Fatehgarh Sahib ; 15.23 for Patiala and 14.71 for Rajpura. Proportion of rural population covered by post and telegraph facility in the district is 31.03 per cent, the highest (42.59%) proporation being in Samana tahsil followed by 32.22 per cent in Fatehgarh Sahib tahsil, 29.53 per cent in Nabha tahsil, 29.20 per cent in Rajpura tahsil and 25.82 per cent in respect of Patiala tahsil. Out of 1172 villages which do not enjoy the post and telegraph facility within their own jurisdiction, the people of 975 villages have to commute a disance less than 5 kms ; of 165 villages only a distance of 5—10 kms and in the remaining 32 villages, a distance of 10 kms and above to avail the post and telegraph facility. Again, out of 254 villages having post and telegraph facility 141 have an urban centre at a distance of 6—15 kms ; 87 within a radius of 5 kms and the remaining 26 villages are within a distbnce range of 16—50 kms. Further, post and telegraph facility has been reported in 175 (20.91%) villages which fall in the population range 500 to 1999; 45 (70.31%) villages in the population range 2000 to 4999 ; 32 villages in the population range less than 500 whereas the remaining wo villages have population 5000 and above.

(*v*) *Communications* : More than half of the rural population living in 587 (41.16%) villages is being served by the public transport system. This facility is however, not available within the territorial jurisdiction of 839 villages, out of which 705 villages can avail this facility wihin a radius of 5 kms ; 129 villages within a distance

of 5 to 10 kms and inabitants of the ramaining 5 villages can avail this facility by commuting a distance of 10 kms and above. Of the 587 (41 .16%) villages having the facility of public transport system, 154 villages fall in the population size class of less than 500; 388 villages are in the population range of 500—1,999; 43 villages have their population ranging between 2000 to 4999 persons and the remaining two villages are in the population range of 5000 and above.

(*vi*) *Approach by pucca road* : Of all the 1426 inhabited villages 1379 (96 .70%) villages having 97 .29% of total rural population are linked by pucca roads and are, therefore, accessible round the year. Patiala tahsil has the highest percentage of such villages (98 .56%) followed by Rajpura tahsil with (98 .53%), Fatehgarh Sahib tahsil with (97 .74%), Nabha tahsil (93 .63%) villages and Samana tahsil with (90 .51%) villages. Six villages each in Fatehgarh Sahib tahsil and Rajpura tahsil, 5 villages in Patiala tahsil, 13 villages in Samana tahsil and 17 villages in Nabha tahsil are not approchable by a pucca road. The percentage of villages connected by pucca road having urban centre within a radius of 5 kms. comes to 97 .65% and of those within a distance range of 6—15 kms comes to 96 .11% of those within a distance of 16—50 kms to 96 .91%. The proportion of villages connected by pucca roads and falling in the size class of upto 499 is 95 .98%, those falling in the size class of 500 to 1999 is 97 .01%, of those falling in the size class of 2000 to 4999 is 98 .44% and only two villages are in the population range of 5000 and above.

(*vii*) *Power Supply* : All the villages of the district enjoy invariably the facility of power supply, as the state has since been hundred per cent electrified.

(*viii*) *Maqket/Hat* : Hat is not a common feature in the Punjab State. Only temporary markets are held in the state occasionally on fair and festivals.

Staple Food :

Wheat, Maize and rice constitute the staple food of the people of the district. Rice is consumed mainly on special occasions as Punjabis are not habitual rice eaters.

Land-use pattern in the district :

The land use pattern is shown in Table 15, which reveals that 87 .36% of the total district area is cultivable. The highest percentage of cultivable are to total area is in Fatehgarh Sahib tahsil (88 .83%) ; followed by Patiala tahsil (88 .00%) ; Samana tahsil (87 .86%) ; Nabha tahsil (87 .20%) and Rajpura tahsil (85 .61%) ; 78 .98 per cent of the cultivable area is irrigated, Nabha tehsil has the highest percentage of irrigated area to total cultivable area (94 .70%) followed by Patiala tahsil (87 .03%) Fatehgarh Sahib tahsil (85 .20%), Samana tahsil (85 .05%) and Rajpura tahsil have the lowest percentage viz. 50 .84.%

Misc. cropping patterns, staple food and markets :

Apart from harvesting wheat, maize etc. which constitute the staple food of the people of the district, some area is also under cash crops of cotton and sugarcane. Mandis serving as the nucleus for purchase and sales of agricultural commodities by local inhabitants, have also sprung up. Their expansion is a testimony to the fruits of the green revolution, ushered in the district, being enjoyed by the farmers.

Urban Population :

Table 16 to 20 appended to this note deal with the section.

TABLE 16

Growth, density and sex-ratio of urban population in the district in relation to the state

Census Year	District						State					
	Total population	Urban population	Percentage urban population	Decadal percentage variation in urban population	Density (population per (sq. km.)	Sex ratio (No. of females per 1,000 males)	Total population	Urban population	Percentage urban population	Decadal percentage variation in urban population	Density (population per sq. km)	Sex ratio (No. of females per 1,000 males)
1	2	3	4	5	6	7	8	9	10	11	12	13
1951	697,860	204,493	29·30	..	N·A	788	9,160,500	1,989,267	21·72	+20·02	N·A	807
1961	955,385	250,519	26·22	22·51	3,316	822	11,135,069	2,567,306	23·05	+29·06	4,090	817
1971	1,211,003	316,309	26·12	26·26	4,321	855	13,551,060	3,216,179	23·73	+25·27	4,650	856
1981	1,568,898	464,295	29·59	46·79	4,209	862	16,788,915	4,647,757	27·68	+44·51	3,875	865

Table 16 shows growth, density and sex ratio of urban population in the district vis-a-vis the state. In the table comparative picture of the district and state for the above demographic charateristics has been given for 1981, 1971, 1961 and 1951 censuses. It reveals that 29.59 per cent population of the district as compared to 27.68 per cent of the state as a whole live in urban areas of the district. Urban component of the population in the district has increased to 29.59 per cent in 1981 from 26.12 per cent in 1971 census i.e. an increase of 3.47 points whereas the previous censuses do not show any appreciable change. However, for the state as a whole urban component of the population has shown a steady increase from 1951 to 1981 which is contrary to the trend noticed for the district. Thus the district which has been slower in process of urbanisation from 1961 to 1971 compared to the state, has caught up with the state in tempo of urbanisation.

Growth Rate :

Against the decadal growth rate of 44.51 per cent in 1981 for the state, the district shows a decadal growth rate of 46.79 per cent in 1981. The decadal growth rates in 1971 for district and the state are 26.26 per cent and 25.27 per cent respectively, whereas in 1961 the respective percentages are 34.24 and 29.06. As compared to previous decades 1971—81 decade is quite important for urban growth.

Density :

Density means the number of persons per sq. km. The district has a density of 4,209 persons per sq. km. in urban areas in 1981 as against 3,875 persons per sq. km. for urban areas for the state Urban density of population per sq. km. for the district at 1971 and 1961 were 4,321 and 3,316 respectively, whereas state density has increased from 4,090 in 1961 to 4,650 in 1971. The urban density of the district had shown an increase of 1,005 in 1971 and decrease of 112 in 1981.

The decline in urban density in 1981 as compared to 1971 is due to increase in urban area from 73.2. sq. km. in 1971 to 110.3 sq. km. in 1981.

Sex Ratio :

Sex ratio means number of females per 1,000 males. The table reveals that sex ratio of the district has constantly been on the increase from census to census as in the case of the state sex ratio. During censuses 1951, 1961 1971 and 1981 district sex ratios were 788, 822, 855 & 862 respectively whereas the corresponding state sex ratios were 807, 817, 856 and 865.

The following table gives the list of towns classified as towns for the first time and towns declassified during 1971—1981.

TABLE 17

New Towns/Towns declassified in 1981 census.

Name of Town	Population in 1981 census
(a) Added	
(i) Ghagga N.A.C.	4,900
(ii) Partran N.A.C.	7,998
(b) Declassified	Nil

The preceding table shows that no town of 1971 census has been declassified in 1981 census, whereas two new towns of Ghagga N.A.C. having a population of 4,900 and Patran N.A.C. with 7,998 population have been classified as new towns for the first time in 1981 census in this district.

Both Ghagga and Patran N.A.C.'s were denotified by state government in Oct. 1980 along with 14 N.A.Cs' but these were treated as towns for 1981 census because urban frame was freezed as on 30th September, 1980. Also during the decade 1971—1981, Rajpura township was merged with Rajpura M.C.

TABLE 18

Budget of Towns :

There is one class I town namely Patiala M.C., one class II town—Rajpura M.C, four class III towns—Gobindgarh, Nabha, Samana and Sirhind (all M.C.s), two class IV towns—Bassi Pathana, and Sanaur, four class V towns—Amloh, Banur, Dera Bassi (all M.Cs) and Patran (N.A.C.) and one class VI town Ghagga (N.A.C.)

It is found that per capita receipt in respect of 7 towns is more than the per capita expenditure. However, in 6 towns the position is quite reverse. The per capita receipt is highest Rs 232.83 for Gobindgarh town (Class III) and lowest Rs. 81.53 in Sanaur town (Class IV). Patiala city the only class I town in the district had per capita receipt of Rs. 23.97 and per capita expenditure of Rs. 82.05. Receipt through taxes form the major single source of revenue in 7 out of 13 towns of the district. In the remaining 6 towns, the revenue derived through other sources such as municipal property, loans. etc., is also substantial. On expenditure side per capita expenditure is highest Rs. 141.19 in Gobindgarh town (Class III) and the lowest Rs. 9.58 in Sanaur town (Class IV). Sizeable amount is also spent in public works in most of the towns.

Next major expenditure is incurred on general administration. Expenditure on public health and conveniences is also quite substantial.

TABLE 19

Schools per ten thousand population in towns

Social Amenities :

Table 19 depicts number of schools Hr. Sec./Sec./Middle/Primary per ten thousand population by class, name and civic status of alphabetically arranged towns of the district.

It emerges from the table that Dera Bassi (Class IV) town has the highest number of higher secondary schools (4.04) per 10,000 population.

There is no higher secondary school in any of the towns—Samana (Class III), Sanaur (Class IV), Amloh (Class V), Patran (Class V) and Ghagga (Class VI).

Patiala City which has the highest number of higher secondary schools ranks fairly low (0.63) in terms of schools per 10,000 population. All towns have secondary/matriculation schools except Banur. Middle schools are reported in all towns of the district, the highest proportion (6.12) being in Ghagga and the lowest (1.13) in Gobindgarh. Proportion of primary schools per 10,000 population in towns comes out to 2.86 for the urban component of the district, whereas maximum proportion (10.85) has been reported in Ghagga (N.A.C.) and minimum proportion (1.25) in Patran (N.A.C.)

Medical Facilities :

The following table gives the number of beds in medical institutions in towns of the district per 1,000 population by class, name and civic status of the town.

TABLE 20

No. of beds in medical institutions in towns

5. VI Ghagga N. A. C.	0.87
6. III Gobindgarh M. C.	1.88
7. III Nabha M. C.	3·53
8. I Patiala M.C.	7.19
9. V Patran N. A. C.	0.50
10. II Rajpura M.C.	0.92
11. III Samana M. C.	0.80
12. IV Sanaur M. C.	0.31
13. III Sirhind M.C.	0.13

Above table shows that the maximum number of beds in medical institutions per 1,000 population are in Patiala M.C.(7.19) followed by Nabha M.C. (3.53), whereas the minimum number has been reported in Sirhind M. C. (0.13).

Slum Population in Towns. :

In Punjab State no slum area has been notified although certain pockets have separately been identified here and there.

PART XIII A

VILLAGE AND TOWN DIRECTORY

SECTION I—VILLAGE DIRECTORY

NOTE EXPLAINING THE CODES USED IN THE VILLAGE DIRECTORY

The village directory containing information about each village has been prepared for each tahsil in the ascending order of the census location code numbers, e. g., Location Code No. 17/11/3/22 means village No. 22 in tahsil No. 3 of district No. 11 of the state No. 17. It contains information relating to total area of the villages in hectares, total population, Number of households, amenities available in the village i.e., educational, medical, drinking water, posts and telegraphs, communication, approach to village, nearest town and distance (in kms.), and power supply. Besides it gives information regarding staple food, land-use i.e. area under different types of land use like forest, irrigated and unirrigated, cultivable and uncultivable land. This is further supplemented by the information on places of religious, historical and archaeological interest as also information on copies of newspaper coming in the village and number of motor cycles/ scooters, cars/jeeps and tractors available in the village.

Information about the amenities available have been given in the columns 5 to 10 of the directory.

(i) Educational facilities have been shown by adopting the following abbreviations :

P	=	Primary school
M	=	Junior secondary or middle school
H	=	Matriculation or secondary school
PUC	=	Higher secondary/intermidiate/pre-university/junior college.
C	=	College (Graduate level and above) like Arts, Science, Commerce, etc.
I	=	Industrial school
Tr.	=	Training school
AC	=	Adult literacy class/centre
O	=	Other educational institutions. These may include Sanskrit Pathshalas, Senior basic school, Maktab etc.

Where figiures like P(3), M(2), H(I) etc., occur these denote that the village has three primary, two middle and one matriculation or secondary school.

(ii) Medical facilities have been shown by the use of the following abbreviations :

H	=	Hospital
MCW	=	Maternity and child welfare centre
MH	=	Maternity home
CWC	=	Child welfare centre
HC	=	Health centre
PHC	=	Primary health centre
PHS	=	Primary health sub-centre
D	=	Dispensary
FPC	=	Family planning centre
TB	=	TB clinic
NH	=	Nursing home
RP	=	Registered private practioner
SMP	=	Subsidised medical practitioner
CHW	=	Community health worker
O	=	Others

Number of institutions, if more than one in any village, have been given in brackets against each.

(iii) The types of the potable/drinking water supply and the sources available in the village have been indicated by the following codes :

T	=	Tap water
W	=	Well water
TK	=	Tank water
TW	=	Tubewell water
HP	=	Hand pump
R	=	River water
F	=	Fountain
C	=	Canal
L	=	Lake
S	=	Spring
N	=	Nullah
O	=	Others
NA	=	Information not available

(iv) Post & telegraph facilities have been shown by adopting the following abbreviations :

PO	=	Post office
TO	=	Telegraph office
PTO	=	Post and Telegraph office
Phone	=	Telephone connection

(v) Communication facilities have been indicated by the following codes :

BS	=	Bus stop
RS	=	Railway station
NW	=	Navigable waterway (including river, canal, backwaters, etc.)

Only public transport like, bus, rail and waterway have been considered for this purpose.

(vi) *Approach to village* : This refers to the state of road, etc. leading to the village.

This has been indicated by the use of the following codes :

PR	=	Pucca road
KR	=	Kaccha road
NR	=	Navigable river
NC	=	Navigable canal
NW	=	Navigable waterway (other than river or canal).

(*vii*) *Nearest town and distance* : The distance in kms of the nearst town (whether located in the state or in another state) has been given in brackets under column 12.

(*viii*) *Power Supply* : For this purpose, the following codes have been used under column 13 :

ED	=	Electricity for domestic purpose
EAg	=	Electricity for agriculture
EO	=	Electricity for other purpose like industrial, commercial, etc.
EA	=	Electricity for all purposes listed above.

Information relating to places of religion, historical or archaeological interest is given under cloumn 20(a). Information on copies of newspaper coming in the village (N), motor cycles/scooters available in the village (M), cars/jeeps available in the village (C), and for tractors available in the village (T) is also furnished under column 20. The numeral following the alphabet indicates the number of newspapers, motor cycles etc. Uninhabited villages and the villages those have got merged in towns have also been shown under column 20(a).

(*ix*) *Land use* : Break-up of Area under different type of land use viz. forest, irrigated area, unirrigated area, culturable waste and areas not available for cultivation has been furnished under columns 15—19.

(*a*) *Forest*: This includes all lands classed as forests under any legal enactment dealing with forests or administered as forests, whether state-owned or private, and whether wooded or maintained as potential forest land. The area of crops raised in the forest and grazing lands or areas open for grazing within the forest should remain included under the forest area. If any portion of such land is not actually wooded but put to some agricultural use, that portion is included under the appropriate heading of cultivated or uncultivated land. In some cases there are instances where patches of land put to agricultural use within statutarily notified forests are considered as forests by the revenue agency. These are treated as forests.

(*b*) *Irrigated and unirrigated (land use)* : These two columns (cols. 16 and 17) cover all agricultural land and include net area sown with crops and orchards or net cropped area and also current and other fallows. The latter implied all lands which were taken up for cultivation, but are temporarily out of cultivation for a period of not less than a year and more than five years. The columns do not include gross area sown or gross cropped area. Net area sown thus represents the area sown with crops and orchards, counting areas sown more than once in the same year only once.

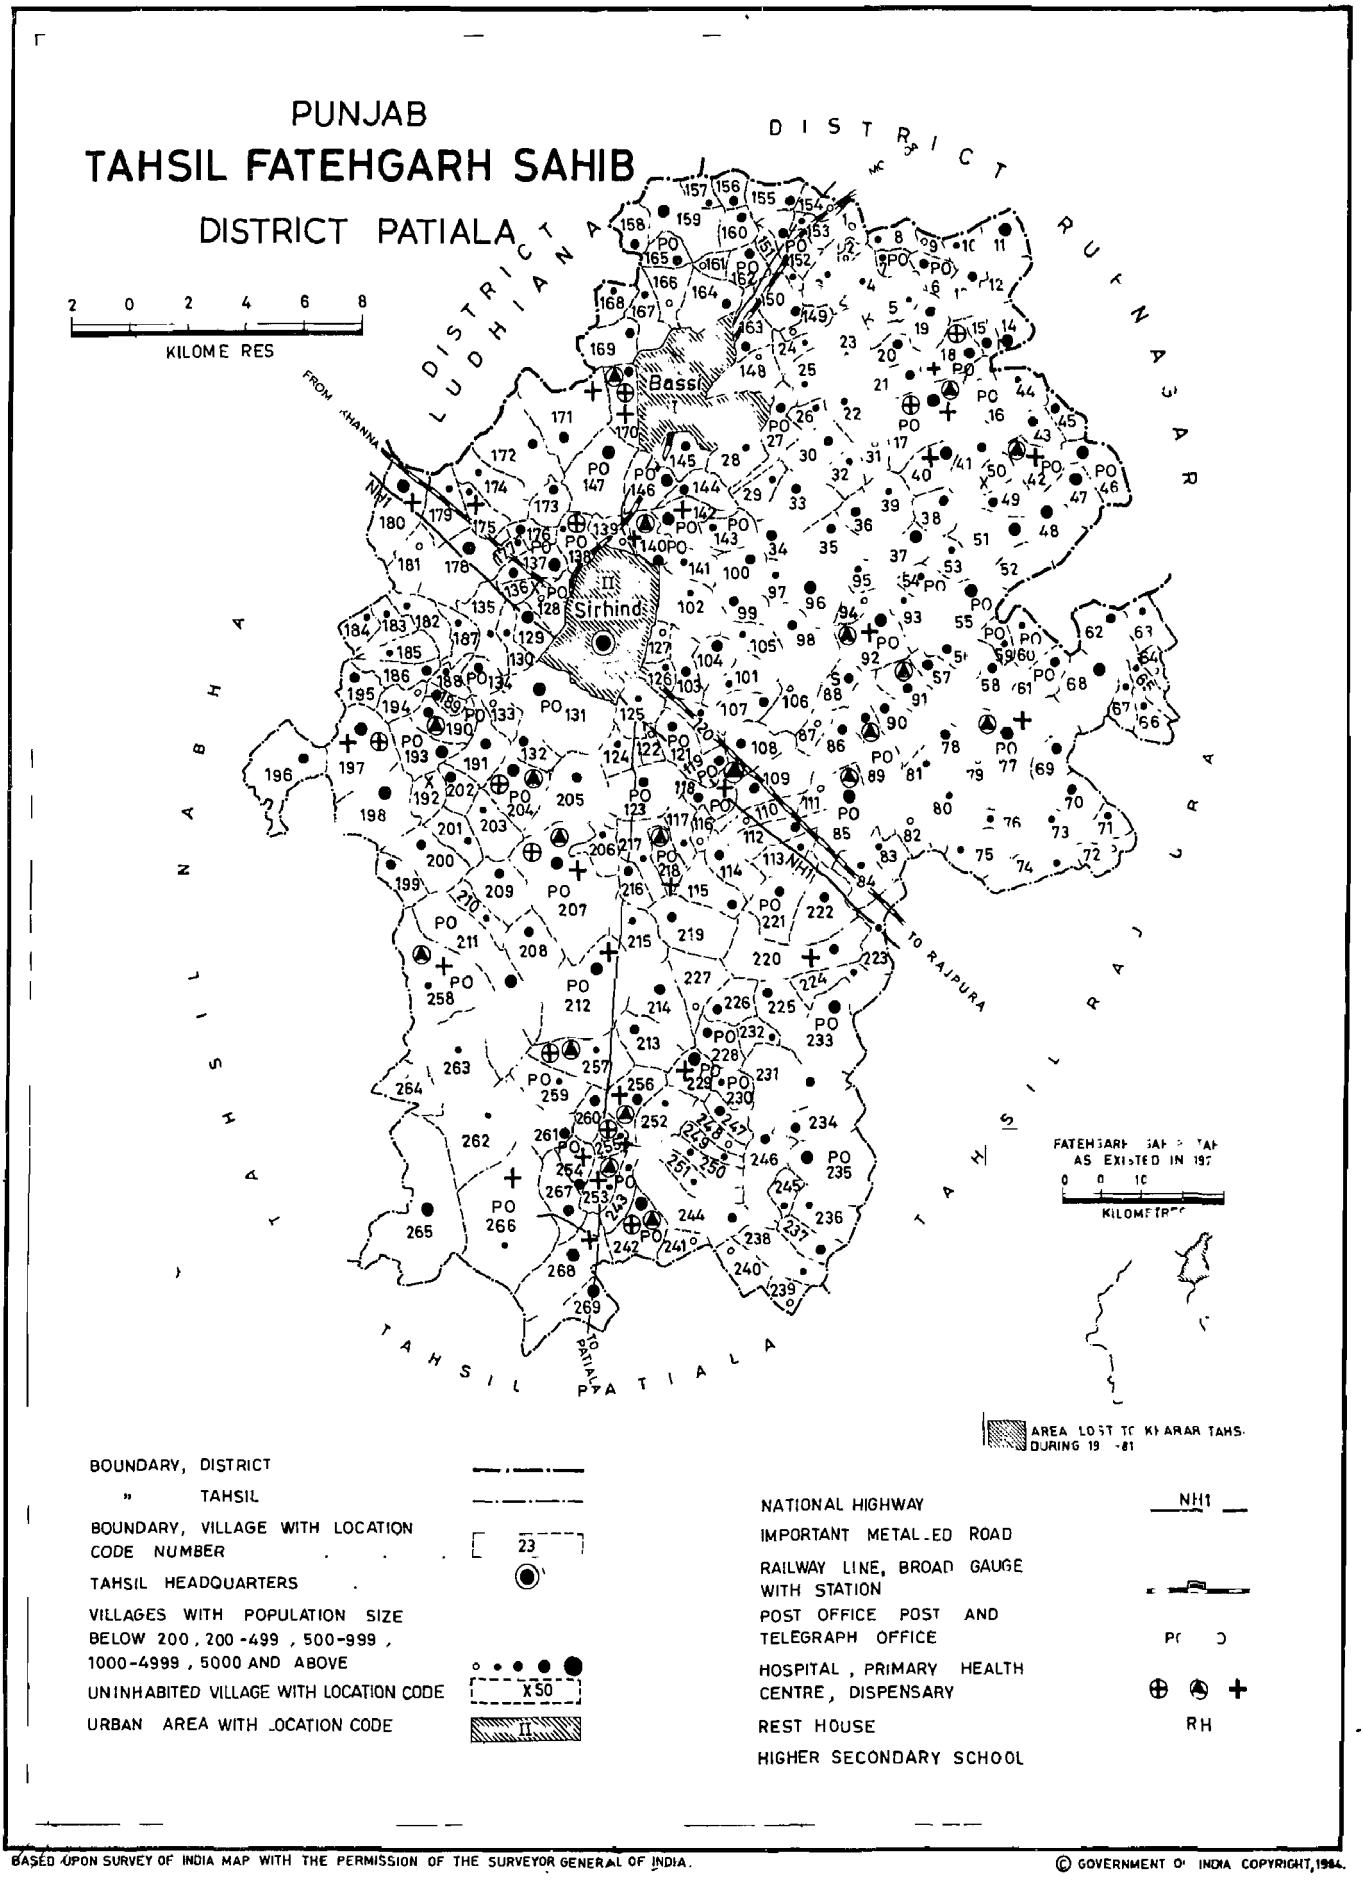

(*c*) *Culturable waste* : This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once, but not cultivated during the five years or more in succession. Such lands are either fallow or covered with shrubs and jungles, which are not put to any use. These have been assessed or unassessed and are in isolated blocks or within cultivated holdings. Lands under thatching grasses, bamboo bushes and other groves for fuel, etc. Which are not included under orchards or forests also come under this head. All grazing lands, whether they are permanent pastures and meadows or not, village comon and grazing lands within forest area have been included in this column.

(*d*) *Area not available for cultivation* : This column (Col 19) includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use.

Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water . e.g., rivers and canals and other lands put to uses other than agricultural.

Barren and unculturable lands cover all barren and unculturable lands, like mountains, deserts, etc. Land which cannot be brought under cultivation, except at a very high cost, has been classified as unculturable, whether such land is in isolated blocks or within cultivated holdings.

SECTION II

Town Directory

NOTE EXPLAINING THE CODES USED IN THE TOWN DIRECTORY

The town directory has been compiled in six different statements for all the urban areas of the district. The data on amentities and other aspects have been presented in codes which are explained below.

Statement I: It gives the status and growth history of each town in the district.

Class has been introduced in all the statements of town directory to facilitates analysis for purpose of demographic and socio-economic characteristics of towns at the state and all India levels. It has been presented accordig to 1981 census population of the core town in the following manner :

Population	*Class*
100,000 and above	I
50,000—99,999	II
20,000—49,999	III
10,000—19,999	IV
5,000—9,999	V
Below 5,000	VI

The civic administration status as in 1980 has been indicated by the following abbreviations. Census towns are regarded as having no civic status. Code (C.T.) has been used for ceusus town.

Municipal Corporation	=	M. Corp.
Municipal Committee	=	M.C.
Cantonment Board	=	C.B.
Notified Area Committee	=	N.A.C.
Census Town (S.A.S. Nagar-Mohali and Talwara)	=	C.T.

Statement II: Statement II gives for each town, physical aspects and location of towns.

Statement III: This statement gives municipal finance for each town of the district.

Statement IV: It gives civic and other amenities. The abbreviations used are indicated below :—

(*I*) *Road Length*

PR	=	Pucca road
KR	=	Kuccha road

(*II*) *System of Sewerage*

S	=	Sewer
OSD	=	Open surface drains
BSD	=	Box surface drains
SD		Sylk drains
CD	=	Cesspool method
PT	=	Pit system

(III) Method of disposal of night soil

HL	=	Head loads
B	=	Baskets
WB	=	Wheel barrows
ST	=	Septic tank latrines
S	=	Sewerage

(IV) Protected water supply source and capacity of storage systems

(a) Sources of water supply :

TW	=	Tubewell water/Handpump
T	=	Tap water
W	=	Well water
TK	=	Tank water

(b) System of storage of water :

OHT	=	Overhead tank
SR	=	Service reservoir
RIG	=	River infiltration gallery
BWP	=	Borewell pumping system
PT	=	Pressure tank

Statement V : This gives medical, educational, recreational and cultural facilities. The abbreviations used are indicated below :

Medical amenities:

H	=	Hospital
D	=	Dispensary
HC	=	Health centre
FC	=	Family planning centre
TB	=	T.B. clinic
NH	=	Nursing home
O	=	Others
A	=	Ayurvedic
U	=	Unani
Hom.	=	Homoeopathic

In case of allopathic, no separate code has been given. The information in col. 4 on medical facilities has been presented horizontally in the same line as illustrated below :

H(A—1, 2) D(Hom—2, 1, U—1)

Here H(A—1, 2) represents one ayurvedic and 2 alloptahic hospitals and D(Hom-2, 1, U-1) represents 2 Homoeopathic, one allopathic and one unani dispensaries. If the medical facility is not available in a town, name

of the nearest place (if in the same district) or nearest district (if in the same state) or other state and its distance from the town where the facility is available has been mentioned in column 4.

Educational amenities :

The codes that have been used are as follows :

A	=	Arts only
S	=	Science only
AS	=	Arts and science only
C	=	Commerce only
AC	=	Arts and commerce only
ASC	=	Combined for all categories, Arts, Science and Commerce.
L	=	Law
SH	=	Shorthand
Type	=	Typewriting
Sh. Type	=	Shorthand and typerwriting
O	=	Others
P	=	Primary schools
M	=	Junior Secondary or Middle School
H	=	Matriculation or Secondary
PUC	=	Higher Secondary/Intermediate/Pre-University/Junior College/ '10+2' system whether held in school or college.

If there are more institutions of a type in the town, their number has been given against each in brackets.

If any educational facility is not available in the town the name of nearest place (if in the same district) or the name of nearest district (if in the same state) or other state and its distance from the town where this facility is available has been given in brackets.

Recreational and cultural facilities :

The following codes have been used :

PL	=	Public library
RR	=	Reading room.

Statement VI : It gives information on trade, commerce, industry and banking for each town of the district.

Appendix to the town directory shows towns of the district which have outgrowths and population of outgrowths.

1981 CENSUS—

PART B

Primary Census Abstract (General)

Primary Census Abstract (Scheduled Castes)

PART B

PRIMARY CENSUS ABSTRACT (GENERAL)

PRIM ARY CENSUS ABSTRACT (SCHEDULED CASTES)

Explanatory note on Primary Census Abstract

The Primary Census Abstract (PCA) General and Scheduled Castes provides the basic information relating to population data pertaining to 1981 census. It contains the data in respect of area, number of occupied residential houses and households, total population (including institutional and houseless population), population break up by sex, scheduled castes, literates, main workers classified into four categories of cultivators, agricultural labourers and other workers, marginal workers and non-workers for each village and for each town wardwise.

The district totals given at the beginning of the PCA are followed by break up of rural and urban areas of the district. The data are presented tahsilwise.

The rural PCA presents the data for the villages arranged in ascending order of location code numbers (assigned to the villages within the tahsil). The urban PCA, presents wardwise data for each town. In rural PCA, the uninhabited villges and the villages which have got merged in towns have also been indicated. It may be mentioned here that the PCA data provided here has been compiled on the basis of the basic schedules i.e., houehold schedule and the universal individual slip convassed during 1981 census operations. The concepts and terms occuring in the PCA are briefly explained here.

Census House :

A census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc., used or recongised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

Occupied Residential House :

Occupied residential house is a dwelling house and includes a house used partly as a dwelling and partly for some other purpose like shop, workshop, factory, etc., but does not include a 'vacant house' where no person was found to be residing at the time of census.

Household :

A household is a group of persons who commonly live togehter and would take their meals from a common kitchen unless the exignecies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. Examples of unrelated households are boarding houses, messes, hostels, residential hotels, rescue homes, Jails, *ashrams*, etc., These are called 'institutional households'. There may be one member household, two members households or multi-member household. For census purposes, each one of these types is regarded as a 'household'.

Another type of household for census purpose is houseless household which is a household comprising of 'houseless person/persons'. A houseless person in census terminology has been defined as :-

(i) a person who might be doing domestic service or other work with one or more households but who does not reside in any house and sleeps in the corridors, verandahs or passages in buildings or in the streets;

(ii) wandering or nomadic tribes found to be staying in temporary huts etc., and

(iii) beggar, vagrant, tramp, sadhu, fakir, etc., who is found on the footpaths, streets, in places like parks, gardens, railway yards, etc.

Scheduled Castes are such castes, races or tribes or parts of groups within such castes, races or tribes as are declared to be scheduled castes by the President of India's Orders issued under Article 314 of the constitution of India.

Literate:

A person who can both read and wirte with understanding in any language has been taken as literate. A person who can merely read but cannot write, has not been considered as literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educatio nal standard.

All children of the age of 4 years or less have been treated as illiterate even if the child has been going to a school and might have picked up reading and writing a few odd words.

Workers and Categories of Workers :

Work may be defined as participation in any economically productive activity. Such participation may be physical or, mental in nature. Work involves not only actual work but also effective supervision and direction of work.

In the economic questions, canvassed in 1981 census, there has been some difference. The 'work' concept in 1961 and 1971 censuses, as opposed to the 'income'or 'economic independence' concept of the earlier censuses was adopted for 1981 census, but the criterion for classification of persons as workers was changed. While in 1961 and 1971 censuses different approaches, namely, usual status and current status, were adopted with reference period of one year and one week for seasonal and for regular work respectively, at 1981 census the usual status approach was adopted uniformly for all work.

In 1961, a person qualified as a worker if he had worked regularly during the last season or if he had worked at least for a day in regular (non-seasonal) work during the preceding fortnight. At the 1971 census a person was treated as a worker only if he spent his time mainly in work or if he worked at least for a day in regular (non seasonal) work during the preceding week. The dichotomy of worker/non-worker of 1961 and 1971 censuses was discarded at the 1981 census and instead a trichotomy of main workers, marginal workers and non-workers was adopted. For main worker the time criterion of engagement in work for the major part of the year, i.e , at least 183 days was adopted. Those who worked for some time during the last year but not for the major part were treated as marginal workers. Those who had never worked during the last year were non-workers. This trichotomy partially permits a comparability of 1981 census economic data with that of 1971 as well as 1961 The main workers of 1981 census can be expected to correspond to the workers of 1971 and the main workers and marginal workers of 1981 together to correspond to the workers of 1961.

Classification of Main Activity :

The main activity of workers has been classified into four categories, viz., cultivator, agricultural labourer household industry and other worker. These terms are explained below :

Cultivator:

For purposes of the census. a person has been considred working as cultivator if he or she has been engaged either as employer single worker or family workers in cultivation of land owned from Government or held from private persons or institutions for payment in money, kind or share. Cultivation included supervision or direction of cultivation. It has been indicated by abbreviation 'C'.

Agricultural Labourer

A person who worked in another person's land for wages in money, kind or share has been regarded as an agricultural labourer. He/she had no risk in the cultivation but he/she merely worked in anoher person's land for wages. An agricultural labourer had no right of lease or contract on land on which he/she worked. It has been indicated by abbreviation 'AL'.

Household Industry

Household industry has been defined as an industry conducted by the head of the household himself/herself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lived in urban areas. The larger proportion of workers in a household industry constituted of members of the household including the head. The industry should not be run on the scale of a registered factory which would quality or has to be registered under the Indian Factories Act.

For a person who has returned his/her main activity as engaged in some production, processing, servicing or repair of articles or goods such as handloom weaving, dyeing, carpentary, *bidi* rolling, pottery manufacture, bicycle reparing, blacksmithy, tailoring, etc., it has been ascertained if it is a household industry, and if so, it has been indicated by the abbreviation 'HHI' in the space provided for.

Other Workers :

All workers, i.e., those who have been engaged in some economic activity during the last one year., have not been categorised as cultivators or agricultural labourers or in household industry, are 'other workers' 'OW'. The type of workers that come under the category of 'OW' included factory workers, plantation workers, those in trade, commerce, business, transport, mining, construction, political or social work, all government servants, muncipal employees, teachers, priests, entertainment artists, etc.
