Combine Harvester

Combine Harvester has become the symbol of Punjab's Green Revolution. Its use far from resulting in the large-scale displacement of labour, has in fact led only to the displacement of the barriers, that have been holding up further progress. High-yielding varieties of wheat have a phenomenal success in the Punjab. There is acute shortage in the ranks of erstwhile agricultural labour force, particularly during the harvest season. Increased production of paddy has also added to the labour shortages. All this in turn has created the need for swifter operations and larger labour force. The stage has been reached at which additional labour can be imported from high-density areas only at prices that are no longer economic. In this context, Combine Harvester appears to be the inevitable answer ! This also helps to save 12% of the grain that would otherwise be lost through shattering, if harvested manually. Ludhiana district is the pioneer in making extensive use of Combine Harvesters.

A—CENTRAL GOVERNMENT PUBLICATIONS

The 1971 Census Reports on Punjab will bear uniformly Series No. 17 and will be published in the following Parts :—

PART I-A	General Report.
PART I-B	General Report (*Detailed analysis of the Demographic, Social, Cultural and Migration Patterns*).
PART I-C	Subsidiary Tables.
PART II-A	General Population Tables.
PART II-B	Economic Tables.
PART II-C (i)	Mothertongue, Religion and Scheduled Castes and Scheduled Tribes Tables.
PART II-C(ii)	Social and Cultural Tables and Fertility Tables.
PART III	Establishment Report and Tables.
PART IV	Housing Report and Tables.
PART V	Special Tables and Ethnographic Notes on Scheduled Castes and Scheduled Tribes.
PART VI-A	Town Directory.
PART VI-B	Special Survey Reports on selected Towns.
PART VI-C	Survey Reports on selected Villages.
PART VII	Special Report on Graduates and Technical Personnel.
PART VIII-A	Administration Report—Enumeration (for official use only).
PART VIII-B	Administration Report—Tabulation (for official use only).
PART IX	Census Atlas.
PART IX-A	Administrative Atlas.

PREFACE

In the publication of the District Census Handbooks we have the privilege of taking one of the important census traditions to the 1971 Census. Their publication was first taken up at the 1951 Census for making census statistics available for the smaller territorial units. In the 1961 Census, attempts were made to make this publication more informative with the addition of data about level of develoment and amenities available in villages. There was, however, great delay in the publication of this valuable reference compendium. The delay occurred on account of the fact that the compilation of the Handbook had to wait till the complete tabulation programme of census data was got through. The compilation of administrative statistics for inclusion in the Handbook also took a long time. As a result, the town and village-wise primary census data could not be released pending their formal publication even though there was constant demand for it. In view of these considerations, it was decided at the 1971 Census that the District Census Handbook would be divided into three convenient parts so that at least Parts A and B, which contain essential data down to the village and town levels, could be released quickly. Accordingly Parts A & B of the District Census Handbook of Ludhiana are presented in this Handbook. Part (A) Contains the Village and Town Directory and Part (B) Village and Town-wise Primary Census Abstract. It is for the first time that data about urban areas is being presented in a separate part, "Town Directory", at the 1971 Census. The Village Directory presents comprehensive information on various facets of each village Alphabetical list of villages has also been inserted in the Handbook.

2. There are 108 towns and 12,188 inhabited villages in the Punjab State. It was, indeed, a formidable task to collect and compile voluminous data for such a large number of units. The collection of area figures and land use data, in particular, presented serious difficulties especially when these figures somewhat differed from those given at the tahsil and district level by the Director of Land Records. We had to make several gruelling cross-checks to adopt the area figures finally for each village.

3. It was not considered necessary to have a penetrating analysis of any particular item of the data in Parts (A) and (B) of this Handbook, this could be taken up by the Census Organisation itself or some other agency later during the inter-censal period. The census data users and scholars would perhaps feel satisfied with statistical data being presented in this Handbook quickly on the heels of the census count in the country.

4. This Report, as at the last Census, continues to be a State Government publication as it is financed by them. Its compilation and write-up have been done by the Census Directorate at Chandigarh on behalf of the State Government. The views expressed in this are that of the State Census Organisation, which is under the direct control of the Government of India in the Ministry of Home Affairs.

5. In the collection of data, we had to take help from large number of personnel of the State Revenue Department at the village, tahsil and district level and of the municipal staff in towns. But for their generous co-operation in filling up of the lengthy schedules regarding availability of amenities and level of development, it would not have been possible to achieve the desired objectives in time. It is certainly difficult to thank separately each individual functionary engaged on this project. Nevertheless we are keen to convey our profound gratitude to all those who have worked directly or indirectly on this project. At the Census Directorate, Shri S. K. Agarwal, Assistant Director Census Operations, assisted by a team of zealous workers (Shri R. L. Kalsia, Tabulation Officer, Shri N. S. Bhadauria,

Statistical Assistant, S/Shri Malkit Singh, Parkash Sharma, Computors, and S/Shri Baldev Singh, Parkash Singh Saini and Harjit Singh, Assistant Compilers) has compiled the census and administrative statistics in the form of Village and Town Directories and a bunch of statements incorporating primary census data on occupied residential houses, number of houses, households, total population, Scheduled Castes/ Tribes, literate and educated persons, workers and non-workers for each village and town (ward/block-wise). We owe a debt of gratitude to him and his team for the effort and labour they have put-in for the timely production of this Handbook. Shri H. S. Sudan, Computor has done the proof reading with the help of Shri Hari Bhushan Assistant compiler. In the Map section Shri G. S. Gill, Tabulation Officer, assisted by Sarvshri Surinderjit Singh, Madhav Shyam and Kulbir Singh, has done a neat job in the preparation of the maps. Dr. B. K. Roy, Map Officer, in the office of the Registrar General, New Delhi, provided valuable guidance in the preparation of the maps. Shri Madan Lal, Stenographer, has worked hard for the production of the final draft on the machine. We wish to acknowledge our gratitude to all of them.

6. We are grateful to Dr. Roy Burman, Deputy Registrar General (Social Studies) for piloting this project in our state and for evincing continued zeal and interest in its execution. Above all, we are specially indebted to Shri A. Chandra Sekhar, Ex-Registrar General, India and his worthy successor Shri R. B. Chari, for the inspiration and guidance that we received from them in the production of this Handbook and to reaffirm our claim that "Census continues to be the most fruitful source of information about the country". We trust the demographers, sociologists, economists and other scholars working in various humanities will find sufficient data in this compendium for taking up analytical studies.

7. We are grateful to Shri P. S. Walia, Controller, Printing and Stationery Department, Punjab for ensuring speedy publication of this Handbook.

H. S. KWATRA
Deputy Director of Census Operations
PUNJAB

PART X-A

VILLAGE AND TOWN DIRECTORY

A GLIMPSE INTO THE DISTRICT

Ludhiana is one of the central districts of the Punjab State. It lies between North latitute 30°-34' and 31°-01' and East longitude 75°-18' and 76°-20'. It is bounded by Jullundur district in the North, by Ropar district in the East, by Firozpur district in the West and by Patiala and Sangrur districts in the South. The Sutlej river forms its northern boundary, separating it from Jullundur district.

The district experiences extremes of climate—intensely hot and cold. The temperature starts rising in the month of March and on a number of days touches 118°F in May and June. In winter the temperature remains at a low level around 33°F in the months of December and January. Rains are generally received during June to September in Summer and during December to February in winter. Summer rains are more important.

The district is constituted of three tahsils, having six towns and 1,004 villages (including 35 uninhabited villages). It has a population of 1,419,421 persons as per the 1971 Census and an area of 3,857 sq. kms. according to the records of the Surveyor General of India. The density of population works out to 368 persons per sq. km.—very high compared to other districts. The proportion of rural population to total population of the district is 65.19 per cent against the corresponding proportion of 76 per cent for the State. Higher proportion of urban population accounts for higher incidence of literacy in the district : about 43 per cent of the total population is 'literate', which incidentally is highest for any district in the State. Among females also, though the rate of literacy is 35 per cent only, yet it is the highest in the State. The sex-ratio of the district is 846 females per 1000 males, which is lower than the State figure (865). The 'workers' constitute about 30 per cent of the total population of the district.

The economy of the district continues to be agro-based despite the rapid shift towards the setting up of small industries after the Independence in 1947. About 85 per cent of the total area of the district is under cultivation of which 66 per cent is irrigated. About 51 per cent of the total working force constitutes of cultivators and agricultural labourers. Because of the 'package programme' for increased production the area under high yielding varieties of various crops is continuously increasing from year to year. The Punjab Agricultural University at Ludhiana has played a magnificent role in the development of modern techniques to raise agricultural production and the growers of this district have taken full advantage of the various programmes initiated in the district. Wheat, maize, groundnut, cotton and sugarcane are the major crops of the district The district has the distinction of having the highest yield per hectare in wheat in India. Nor is this all. This district leads major wheat growing countries of the world in yield per hectare. Wheat occupies about 77 per cent of the total cultivated area in this district. Remarkable achievements have been made in increasing the production of wheat both by increasing the area and per hectare production. The high yielding varieties of wheat were first introduced in this district during the Rabi season of 1965-66 in an area of 70 hectares covering about 100 farming families. Due to intensive follow-up the area under the high yielding varieties of wheat increased by 97 per cent during 1969-70 and in 1971-72 the whole area under

wheat was covered by the high yielding varieties against 70 per cent coverage in Punjab. Ludhiana district's contribution to the central wheat pool from one hectare of wheat is 8-times of India and about double of Punjab according to the information released by the Punjab Agricultural University, Ludhiana.

In the field of industry the district is reputed for its small industries not only in Punjab but also in India. Ludhiana city has been rightly termed as "Small Scale Industrial Capital" of India owing to its premier position in hosiery manufactures, engineering goods and cycle industry. It is estimated that 80 per cent demand of the entire country in woollen hosiery is met by Ludhiana. Woollen hosiery goods are exported to a large number of countries, including Russia, East Europeon countries, Africa, Middle East and Far East Asian countries. Engineering goods, cycle and cycle parts are also exported to a number of countries in competition with the traditional exporters of these goods.

Industrial activity has also permeated other smaller towns of the district, like Khanna, Jagraon and Samrala. Khanna, in particular, has become a fast growing centre of small industries, like manufacture of small machines, cycles and cycle parts and woollen hosiery. Samrala and Jagraon towns are also catching up in industry with the establishment of iron re-rolling plants etc. The Punjab Government has set up a Focal Growth Point at Dhandari (near Ludhiana city) for development of small industries in the rural areas.

In short, Ludhiana district has shown an overwhelming edge over all the districts in the State both in the field of agriculture and small industries in the quarter of a century. In fact it now occupies a place of pride in certain economic fields in the world itself-wheat production and hosiery manufactures in particular.

INTRODUCTORY NOTE ON DISTRICT CENSUS HANDBOOK

History of District Census Handbook :—Census has assumed an increasingly important role in the nation's life from one census count to the other in India. Undoubtedly, it is now an indispensable instrument of policy and development planning in the States and at the Centre. To repeat the oft-quoted words :*

"Census is no longer a mere counting of heads for purposes of taxation and recruitment. It is a kind of stock taking as it were of the nation's human wealth. Census aims at presenting as complete a picture of man as may be possible in his social, cultural and economic setting."

Keeping in view the ever-increasing demand of the layman, administrators, planners, scholars, etc., for publication of census data for smaller administrative units, it was decided at the 1951 Census to present data by villages and towns in the form of District Census Handbooks. It was not altogether a new idea because even at the earlier decenial censuses, data for smaller administrative units were published in one form or the other. A districtwise list of villages, showing population, was published as early as 1891 from the data collected at the census. A regular Village Directory was also introduced at the 1911 Census and such Directories were compiled in the shape of 'District Census Statistics' at the 1921 Census. In the end result, the District Census Handbook emerged as a regular decennial publication of the State Government at the 1951 Census. The District Census Handbooks of 1951 Census contained an introductory essay, giving brief history of physio-geographic conditions, life styles and other socio-economic conditions of the inhabitants, extracts from important census tables, besides Village and Town Directories. Administrative statistics on items like railway stations, post offices, schools, co-operatives, village panchayats were also given. The size and contents of the District Census Handbook series of the 1951 Census varied from State to State depending on the availability of financial resources and requirements of data. So varied were the uses and so great the value of these Handbooks that their publication was continued at the 1961 Census and vigorous efforts were made to enlarge the scope and enrich their contents. The 1961 Census Handbooks were certainly far more elaborate than their precursors at the 1951 Census. At the 1961 Census the introductory chapter of the District Census Handbook was almost a gazetteer as it contained information on physical, historical, geological and administrative aspects of the district. Besides, information relating to the demographic, economic, social and cultural aspects was also given, which was further supplemented by a list of events of the preceding decade and a statement of fairs and festivals of the district.

2. The publication of the District Census Handbooks, in which the Village and Town 'Primary Census Abstracts' were incorporated, invariably got delayed even though the compilation of townwise and villagewise primary census data was completed within a year or two after the completion of census enumeration. The delay occured on account of the fact that the compilation of the Handbook had to wait till the complete tabulation programme was got through. The townwise and village wise primary census data could not be released pending their formal publication even though there was constant demand for it. The compilation of administrative statistics for inclusion in the District Census Handbook also took sufficiently long time. Very often the publication of the District Census Handbooks got delayed as some of the State Governments would not take a decision quickly enough to publish them. In fact some of the District Census Handbooks of 1961 Census were published in a few States as late as 1971. Delayed publication undoubtedly detracts from their value.

3. *Scope of District Census Handbook* 1971 :—It is always our endeavour to make available these data to the users as quickly as possible after the census count. With this end in view, the District Census Handbooks at the 1971 Census have been divided into three convenient parts so that at least parts A and B, which contain the essential data down to the village and town, can be released quickly. The State Governments have also accorded their approval to their publication in three convenient parts.

Part A—Village and Town Directory.

Part B—Village and Townwise Primary Census Abstract.

Part C—Analytical Report, Administration Statistics and District Census Tables.

4. Part A of the Handbook contains Village and Town Directory for each village and town by tahsils. The Village Directory contains information about total area of each village in acres, amenities/

* An extract from the Inaugural speech of Sh. K. S. Ramaswamy, Deputy Home Minister, delivered at the State level Training Conference of Census Officers of Haryana at Chandigarh on September 24, 1970.

conveniences available in the village, the staple food of the people and the land use pattern. It also provides information about the nearest town and its distance from the village. The Town Directory presents data for each town with the aid of seven statements, giving, the status of the town, the decadal population, and its functional category, physical and location aspects, municipal finance, civic and other amenities, medical, educational, recreational and cultural facilities, trade commerce, industry and banking, and population by religion.

5. The prescribed schedules for Village and Town Directory were sent to the Tahsildars and Presidents of Municipal Committees to be filled in by their staff and to be returned to the Census Directorate. Comprehensive instructions, which were got printed, were given to the staff for filling up of these schedules. Notwithstanding all the care taken at various levels for the correct filling up of these schedules, there were a few cases where the quality of the work was sub-standard and in these cases the field job had to be done for the second time. There were considerable delays in the submission of filled in schedules and a series of reminders had to be sent to the Tehsildars for their early submission. Some of the revenue officials hardly evinced adequate interest in this assignment which culminated in serious delays in the completion of the task. Similarly there were delays in some of the Municipal Committees where the Secretaries sparingly took adequate interest in this work. But since we had taken up this job well in advance we could give sufficient time margin to the field agency for filling up these schedules. In spite of all the difficulties the job was accomplished well in time.

6. Part B contains the Primary Census Abstract (PCA) figures, the basic census data for each town and each village, tahsilwise, of the district. The town PCA contains figures wardwise and down to the Census Enumerator's Block. Villagewise Primary Census Abstracts have been arranged in the ascending order of location code number allotted to villages at the Census. A map of the district, showing the tahsil boundaries, location of the towns and large size villages of population 5000+, has been given in the beginning of this Part. Important roads, railway lines, etc., have been depicted in this map. An inset map showing the position of Ludhiana district in the State has also been incorporated. Preceding PCA for each tahsil, a map, showing the tahsil boundary and location code number of each village and town in the tahsil, has been given alongwith an inset map showing the position of the tahsil in the district. In order to facilitate location of any village, a list giving villages in each tahsil, arranged in alphabetical order and indicating the code number of the village, has also been incorporated.

PCA incorporates tahsilwise data for each village and each town/ward/block under the following column heads :

(i) Area in sq. kms./acres ;

(ii) Number of occupied census houses and the households ;

(iii) Total population (including the institutional and houseless population) ;

(iv) Population of Scheduled Castes and Scheduled Tribes ;

(v) Literate and educated persons ;

(vi) Workers classified into 9 industrial categories and the Non-workers.

7. Part C of the District Census Handbook will contain the analytical report, embodying administrative statistics and abstracts from all the important census tables generated at the district and tahsil level. In its introductory portion an assessment about the relative position of the district among other districts with regard to area, population size, density and growth rate, changes in demographic, economic and social characteristics of the district will be made. A brief write-up will also be presented to indicate the broad features of changes in respect of the break-up of population in rural and urban areas, distribution of population by industrial categories; activities of non-workers; composition of households by relationship to head ; distribution of population by age and sex ; education and literacy ; scheduled castes ; migrants ; mother-tongue and religion. A record of the major events of the decade in the district will be presented in this part. Information about amenities like transport and communication, irrigation and power, housing and institutional facilities like finance and credit, medical and public health, educational, cultural and recreational will also be presented. Comprehensive data about the economic resources and activities like agriculture, animal husbandry, fisheries, forestry, mining and plantations, trade and commerce, industries, etc., will, in addition, be given in this Part.

8. *The 'Census Village'* :—'The definition of the village adopted in Census is identical with that of 'Mauza' given under section 3(i) of the Punjab Land Revenue Act, 1887. It is the 'Revenue Estate' determined as such for the purpose of levy and collection of the land revenue. The Revenue Estate is defined in the Act *ibid* :

"as an area of which a separate record of rights is maintained or which has been separately assessed to land revenue or would have been so assessed if the land revenue had not been realized or compounded or redeemed or which the State Government has otherwise declared as an Estate".

The Village is thus not merely the *abadi deh* (red lined area) for Census taking but the entire land coming within the fixed boundaries of each village in terms of the Act *ibid.*

9. *'The Censns Town'* :—Each country decides for itself which areas are 'urban' and which are 'rural' because it is difficult to have an internationally acceptable definition of each such 'area'. National differences in the characteristics which distinguish urban or rural areas do not admit of a uniform definition at the international level. In India we have adopted the following definition of an 'urban' area at the 1971 Census, which is incidentally analogous to the one adopted at the 1961 Census:

(a) All places with a Municipality, Corporation or Cantonment or a Notified Town Area ;

(b) All other places which satisfy the following criteria :—

(i) a minimum population of 5,000 ;

(ii) at least 75% of the male working population is non-agricultural ;

(iii) a density of population of at least 400 per sq. km.

(Prior to the 1961 Census, the definition of 'Urban' area was somewhat liberal and a lot was left to the discretion of the local authorities.) The State Directors of Census Operations were, however given some discretion in marginal cases to include, in consultation with the State Government, a place that had other distinct urban characteristics, or to exclude an undeserving place from being treated as 'Urban'. Payal, treated as a Town at the 1961 Census, was de-notified at the 1971 Census as it ceased to be administered by any Municipal Committee.

Ludhiana district has 6 urban areas and Statements I to VII in the Town Directory give information on various aspects of these towns.

10. *Urban Agglomeration* :—In addition to the presentation of data for each town separately the data for urban agglomerations is also presented in this Directory at the 1971 Census. With the adoption of the concept of 'Urban Agglomeration', the old concepts of 'town group' and 'sub-urban areas' or 'non-municipal areas' have been abandoned at the 1971 Census. 'Urban agglomeration' forms a contiguous urban spread constituting of a town and its adjoining urban outgrowths or two or more physically contiguous towns together with continuous well recognised urban outgrowths, if any, of such towns. In the 'town group' concept of the 1961 Census, it was not always the continuous urban units that formed such a group. Sometimes, urban units quite cut off from one another were taken together ignoring the intervening regions. As this evoked criticism, the concept of 'town group' has been abandoned at the 1971 Census. Data in respect of the following urban agglomerations in Ludhiana district are being presented in the Town Directory :

List of Urban Agglomerations in Ludhiana District—1971 Census

Sl. No.	*Name of urban agglomeration*	*Units of agglomeration*	*Whether town in its own right or outgrowth*
1	*2*	*3*	*4*
1.	**Ludhiana**	(a) Ludhiana M.C.	City
		(i) Industrial Area A & C	Outgrowths
		(ii) Basti Jodhewal	
		(iii) Janta Colony	
		(iv) Railway Huts	
2.	Khanna	(a) Khanna M.C.	Town
		(i) Out Skirts of Model Town	Outgrowth

11. *Standard Urban Areas.*—The area constituting an 'urban agglomeration' may keep on changing from census to census depending upon the changing boundaries of the statutory core unit as well as the extent of other continuous urban outgrowths. The concept of 'Standard Urban Areas' adopted at the 1971 Census will take care of these changes covering areas beyond the extending urban limits and intermingling both rural and urban areas in the vicinity of large towns to a limit upto which contiguous urbanization is reasonably expected to take place in the next two decades. In brief, the Standard Urban Area may be defined as the projected growth area of a city or town as it would be in 1991, taking into account not only the towns and villages which will get merged into it but also the intervening areas which are officially urban. Provision of Census data for such 'Standard Urban Areas' will have the advantage of providing comparable data for a definite area for a period of two decades greatly facilitating study of socio-economic and demographic trends in such a fixed area and thus help in urban planning. All towns with a population of 50,000. have been delineated as Standard Urban Areas.

Only one Standard Urban Area has been delineated around Ludhiana city in Ludhiana district at the 1971 Census. The basic particulars of this Standard Urban Area are furnished below :-

List of Standard Urban Areas in Ludhiana District—1971 Census

Name of Urban Units in S.U.A. 1971	*Rural Components (with Hadbast No.)*			
1	*2*			
Ludhiana City	Bhoura	(88)	Tarf Karabara	(161)
	Tarf Jodhewal	(77)	Jamalpur Awana	(177)
	Kulliawal	(178)	Mundian Kalan	(179)
	Mundian Khurd	(240)	Tarf Saidan	(172)
	Sherpur Kalan	(176)	Sherpur Khurd	(175)
	Dhandari Kalan	(241)	Dhandari Khurd	(242)
	Jogiana	(244)	Ghiaspura	(261)
	Lohara	(260)	Daba	(262)
	Brahman Majra	(264)	Bulara	(265)
	Gill	(263)	Dugri	(277)
	Juwaddi	(160)	Phulanwal	(278)
	Sunet	(159)	Tharike	(156)
	Jhanda	(293)	Baddowal	(294)
	Bains	(145)	Ayali Kalan	(155)
	Barewal Awanan	(157)	Fatehpur	(152)
	Haibowal Kalan	(102)	Jassian	(101)
	Salem Tabri	(87)	Taraf Piru Badre	(167)
	Taraf-Gehlewal	(166)	Ladian Kalan	(105)
	Barewal Dogran	(107)	Manj	(97)
	Fatehgarh Gujran	(93)	Quadian	(91)
	Bhattian	(89)	Phamra	(79)
	Bahadurke	(86)	Nurwala	(81)
	Kanija	(82)	Kakowal	(80)
	Bajra	(76)	Jahangirpur	(70)

NOTE ON VILLAGE DIRECTORY

12. The Village Directory containing information about each village has been prepared separately for each tahsil. Villages have been arranged within the tahsil in the ascending order of the census location code numbers, e.g., location code No. 4/2/25 means village No. 25 in tahsil No. 2 of District No. 4 of the State. It contains an account of the location and area of the village, amenities available in the village, for example, educational, medical, power supply, communications, posts and telegraphs staple food, land use, i.e. area under different types of land use like forests, irrigated and unirrigated, cultivable and uncultivable lands. This is further supplemented by information about the nearest town

and distance in kilometers from the referrent village, days of markets or hats, if any, held in the village and an account of places of religious, historical and archaeological interest in the village. An appendix showing amenities in each tahsil, like educational, medical, power supply, etc. has also been added towards the end of the Village Directory.

13. Information about the amenities available in the villages has been given under columns 4 to 9 of the Directory.

(i) Educational facilities have been shown by adopting the following abbreviations under column 4 :

Pr.S	=	Primary or Elementary School.
Mid.S	=	Middle School.
Sec.S	=	Secondary or Higher Secondary School.
C	=	College.

Where figures like Mid.S (1), Pr. S (2), etc., occur these denote that the village has one Middle School, two Primary Schools, etc.

(ii) Medical facilities have been shown by use of the following abbreviations under column 5 :

H	=	Hospital.
MCW	=	Maternity and Child Welfare Centre.
HC	=	Health Centre.
D	=	Dispensary.
FPC	=	Family Planning Centre.
VH	=	Veterinary Hospital.

Number of institutions has been given in brackets against each.

(iii) Electrification has been shown by use of the following abbreviation under column 6 :

E	=	Electrified.

(iv) Types of drinking water supply sources in the vilage have been shown by use of the following abbreviations under column 7 :

T	=	Tap Water.
W	=	Well water.
TW	=	Tubewell water.
HP	=	Handpump water.
TK	=	Tank Water.
R	=	River water.
F	=	Fountain water.
C	=	Canal water.
O	=	Others.

(v) Communication and transport facilities have been shown by use of the following abbreviations under column 8 :

PR	=	Pucca Road.
KR	=	Katcha Road.

T = Train (if the railway station is within the range of one mile from the village)

C = Canal.

R = River.

(vi) Post and Telegraph facilities have been shown by adoption of the following abbreviations under column 9 :

PO = Post Office.

TO = Telegraph Office

P TO = Post and Telegraph Office.

Phone = Telephone connection.

14. Break-up of area under different types of land use has been furnished under columns 11 to 15 of the Directory. Particulars in respect of the nearest town and the distance in kilometers of the same from the referrent village have been given under column 16. Information regarding day (s) of markets/hats, If any, held in the village has been furnished under column 17. Regular weekly, fortnightly or monthly markets/hats are hardly a common feature in the Punjab State. Temporary markets/hats are held in the State only on a few festive occasions. Information relating to places of religious, historical or archaeological interest has been given under column 18.

Uninhabited villages and villages that have got merged into towns have been specifically shown in the Directory.

15. (a) Distribution of Villages by Area :

The following table shows the distribution of villages in Ludhiana district in terms of area (in acres) :—

TABLE No. 1

Distribution of Villages by Area

Area in acres	*Number of villages**
1	*2*
50 acres or less	2 (0.20)
51—100 acres	5 (0.50)
101—200 ,,	39 (3.88)
201—500 ,,	283 (28.19)
501—1000 ,,	380 (37.85)
1001—2000 ,,	216 (21.51)
2001—5000 ,,	76 (7.57)
5001 acres and above	3 (0.30)
Total	1,004 (100.00)

* Inclusive of 35 uninhabited villages.

(Figures in brackets indicate percentage to total number of villages in each distance group.)

This table brings out that more than 87 per cent villages have an area between 201 to 2000 acres. The number of villages having area below 50 acres or above 5000 acres is very small which shows that the villages in the district are of medium size. The average area of a village in the district works out to 923 acres.

(b) Amenities available in the villages :

(i) Educational Facilities—Educational facilities available in the villages have been set out in the following table with reference to the distance from the nearest town :

TABLE No. 2

Distribution of villages having educational amenities by distance from the nearest town

Distance from the nearest town	*Total number of villages**	*Number of villages having*				
		Primary school	*Middle school*	*High or Higher Secondary school*	*College*	*Others*
1	*2*	*3*	*4*	*5*	*6*	*7*
5 kms. or less	152	115 (75.66)	10 (6.58)	8 (5.26)	4 (2.63)	...
6—10 kms.	314	224 (71.34)	35 (11.15)	39 (12.42)	1 (0.32)	...
11—15 "	311	193 (62.06)	27 (8.68)	27 (8.68)	2 (0.64)	...
16—25 "	191	96 (50.26)	13 (6.81)	7 (3.66)	1 (0.52)	...
26—50 "	1	...	...	...	...	...
51—100 "	...	...	...	...	...	...
101—200 "	...	...	...	...	...	...
201 kms. and above	...	...	...	...	...	...
Total	969	628 (64.81)	85 (8.77)	81 (8.36)	8 (0.83)	...

*Excluding 35 uninhabited villages.

(Figures in brackets indicate percentage to total number of villages in each distance group.)

The table reveals that the percentage of villages having Primary schools is highest (76%) among the villages located within 5 kms. of an urban area. The location of Middle and High/Higher Secondary school is, however, more pronounced among the villages located within 6-10 kms of an urban area.

Out of the 969 inhabited villages in the district, 628 villages (65%) have Primary schools, 85 villages (9%) have Middle Schools and 81 villages (8%) have High or Higher Secondary Schools. Degree colleges are located in 8 villages which is an achievement of the State Education Department in Ludhiana district. No other district in the State has so many Degree colleges in its rural areas.

(ii) *Medical facilities.*—Medical facilities have been quantified in terms of number of medical institutions of any kind per 100 sq. kms. of rural area and are given in the following table :—

TABLE No. 3

Medical Facility per 100 sq. kms.

Sl. No.	*Name of tahsil*	*Total area in sq. kms.*	*Number of medical institutions of any kind per 100 sq. kms.*
1	*2*	*3*	*4*
1	Jagraon	1111.0	3.78
2	Ludhiana	1717.2	4.89
3	Samrala	876.5	4.22

There are 4.32 medical institutions per 100 sq. kms. in rural areas of the district which is quite high in comparison to the State figure of 2.69. Ludhiana tahsil has the highest number of medical institutions of any kind per 100 sq. kms. whereas Jagraon tahsil has the lowest number. The difference is, however, not marked and medical facilities seem to be uniformly available in all the tahsils of the district.

(iii) *Power Supply*:—The distribution of power supply in the villages in terms of distance from the nearest town has been shown in the following table :

TABLE No. 4

Distribution of electrified villages with reference to distance from the nearest town

Dtstance from the nearest town	*Total number of villages**	*Number of villages with electric power supply*
1	*2*	*3*
5 kms. or less	152	131 (86.18)
6—10 kms	314	231 (73.57)
11—15 ,,	311	168 (54.02)
16—25 ,,	191	70 (36.65)
26—50 ,,	1	...
51—100 ,,	...	...
101—200 ,,	...	...
200 kms. and above	...	...
Total	**969**	**600 (61.92)**

* Excluding 35 uninhabited villages.

(Figures in brackets indicate percentage to total number of villages in each distance group.)

Out of 969 villages in the district only 600 villages (62%) had been electrified upto March, 1969. 56% of the electrified villages are those which lie within a distance of 5 kms. or less from the nearest town. The percentage of the electrified villages drops as the distance increases. However, efforts are underway to electrify all the villages by the end of the Fourth Five Year Plan.

(iv) *Communications*:—The following table gives an account of the different types of communication facilities available in rural areas with reference to distance from the nearest town:

TABLE No. 5

Distribution of villages with different communication facilities by distance from the nearest town

Distance from the nearest town	*Total number of villages**	*Number of villages connected by*							
		Pucca road	*Katcha road*	*Pucca and katcha road*	*Pucca road and river*	*Pucca road and rail*	*Pucca road, katcha road and rail*	*Katcha road and rail*	*Others*
1	*2*	*3*	*4*	*5*	*6*	*7*	*8*	*9*	*10*
5 kms. or less	152	76(50.00)	12(7.89)	...	...	8(5.26)	...	2(1.32)	...
6—10 kms.	314	161(51.27)	23(7.32)	1(0.32)	...	12(3.82)	...	3(0.96)	...
11—15 kms.	311	84(27.01)	37(11.90)	2(0.64)	...	8(2.57)	2(0.64)	1(0.32)	...
16—25 kms.	191	45(23.56)	18(9.42)	...	...	...	...	...	...
26—50 kms.	1	...	1(100.00)	...	...	...	...	...	...
51—100 kms.	...	...	...	...	...	...	...	...	...
101—200 kms.	...	...	...	...	...	...	...	...	...
201 kms. and above	...	...	...	...	...	...	...	...	...
Total	969	366(37.77)	91(9.39)	3(0.31)	...	28(2.89)	2(0.21)	6(0.62)	...

* Excluding 35 uninhabitated villages.

(Figures in brackets indicate percentage to total number of villages in each distance group.)

The table shows that 366 villages (37.17%) are connected by *pucca* (metalled) road, 91 villages (9.39%) by *katcha* (unmetalled) road, 3 villages by *pucca* and *katcha* roads, 28 villages by *pucca* road and rail, 2 villages by *pucca*, *katcha* roads and rail and 6 villages by *katcha* road and rail. However, the facility of *pucca* roads to the villages, lying within a small radius of the town, are admittedly better than those lying at a distance. More than 50% of the villages lying in the distance group of 6-10 kms. from the nearest town have *pucca* road facility. The proportion of villages having this facility decline with the increase in the distance from the town. Efforts are, however, being made to connect all the villages with *pucca* roads within a short span of time.

(*v*) *Posts and Telegraphs*:—The information relating to number of post offices per 100 sq. kms. at the tahsil level is given in the following table :

TABLE No. 6

Number of post offices per 100 sq. kms.

Sl. No.	*Name of tahsil*	*Total area in sq kms.*	*Number of post offices per 100 sq kms.*
1	*2*	*3*	*4*
1	Jagraon	1111.0	7.92
2	Ludhiana	1717.2	7.69
3	Samrala	876.5	8.44

It brings out that Samrala tahsil has the highest number of post offices per 100 sq kms. whereas Ludhiana tahsil has the lowest number. There are, however, 7.78 post offices per 100 sq.kms. in this district compared to the corresponding figure of 5.96 for the Punjab State. The total number of villages having post offices is 294 while telegraph offices are located in only 12 villages. In addition, five villages have the telephone facility.

(c) Staple Food :

Wheat and maize constitute the staple food of the people.

(d) Land use pattern :

(*i*) *Forests* :—The area under forests, as shown in the Village Directory, includes forested areas classed or administered as forest under any legal enactment dealing with forests whether State owned or private. This figure may be slightly different from the one furnished by the Forest Department for the reason that certain lands though not wooded are treated as forests by the Forest Department.

(*ii*) *Irrigated Area* :—It is the area that receives the soil blood for crops—the water—through channels containing water procured from wells, tubewells, tanks, canals, etc. Cultivated land served by watering through such artificial means is termed as 'irrigated area'.

(*iii*) *Unirrigated Area* :—It is the cultivated land which depends entirely upon nature (rains) for irrigation purposes. Inspite of irrigation facilities, the monsoons continue to play an important role in the agricultural economy of the district. Dependence on rains in certain years tends to expose the dry pockets of the district to drought conditions.

(*iv*) *Cultivable Waste* :—This category includes land available for cultivation whether actually cultivated or not, for one reason or the other, or once taken up for cultivation but not cultivated again for more than 5 years in succession. Such land may be fallow or covered with bushes or jungle which may not be put to any use. Lands under thatching grass, bamboo, bushes, miscellaneous tree crops, etc., which are not included under forests have been considered as cultivable waste. All grazing lands which are permanent pastures, meadows, village common lands and grazing lands within the forest areas have also been covered under this class.

(*v*) *Area not available for cultivation* :—This refers to absolutely barren uncultivable land and such lands which are put only to non-agricultural uses. Absolutely barren uncultivated land covers lands under mountains, deserts etc., and which cannot be brought under cultivation except at an exorbitant cost. All lands occupied by buildings, roads, railways, waterways, rivers, canals, etc., are classified as not available for cultivation.

The percentage of area under different land uses in the district is given below :—

Land use	*Percentage*
(*i*) Forests	0.16
(*ii*) Irrigated	56.07
(*iii*) Unirrigated	29.18
(*iv*) Cultivable waste	3.33
(*v*) Area not available for cultivation	11.26

It emerges from these figures that about 85% of the total area is under cultivation, out of which 56% is irrigated and 29% unirrigated. The area under forests is almost negligible and one-ninth of the total area is not available for cultivation. Cultivable waste land, mainly due to water logging, is also not substantial being only 3.33% of the total area. The State Soil Conservation Department is making all-out efforts to reclaim all cultivable waste land in the district.

The Government canals, tubewells and traditional wells are the main sources of irrigation in the district. The following table shows the distribution of the net irrigated area for each tahsil in the district :

TABLE No. 7

Tahsilwise net irrigated area in 1970-71 ('00' hectares)

Name of Tahsil	*Different sources of irrigation*					
	Govt. canals	*Private canals*	*Tanks*	*Wells including (Tube Wells)*	*Other sources*	*Total*
1	*2*	*3*	*4*	*5*	*6*	*7*
Jagraon	185	...	...	664	...	849
Ludhiana	101	...	...	870	...	971
Samrala	44	...	...	716	...	760
Total for the district	330	...	...	2,250	...	2,580

Source : Economic and Statistical Organisation, Punjab.

The following table gives the percentage of average cultivable waste per village to average cultivated land per village classified by distance from the nearest town :

TABLE No. 8

Percentage of average cultivable waste per village to average cultivated land per village by distance from the nearest town

Distance from the nearest town	*No. of villages**	*Total cultivated land (in acres)*	*Average cultivated land per village (in acres)*	*Total cultivable waste (in acres)*	*Average cultivable waste per village (in acres)*	*% of average cultivable waste per village to average cultivated land per village*
1	*2*	*3*	*4*	*5*	*6*	*7*
5 kms. or less	158	130,265	824.46	2,822	17.86	2.17
6—10 kms.	324	275,923	851.61	5,621	17.35	2.04
11—15 ,,	321	254,130	791.68	11,740	36.57	4.62
16—25 ,,	200	129,464	647.32	10,637	53.19	8.22
26—50 ,,	1	111	111.00	23	23.00	20.72
51—100 ,,	...	...	...	...	...	...
101—200 ,,	...	...	...	...	...	...
201 kms. and above	...	...	...	...	...	...
Total	1,004	789,893	786.75	30,843	30.72	3 90

*Inclusive of 35 uninhabited villages.

Average cultivated land per village in the district is 786.75 acres against average cultivable waste per village of 30 72 acres. Average cultivable waste per village to average cultivated land per village is about 3.90 %. It is noteworthy that average cultivable waste land per village increases being spectacular in some groups-with every increase in the distance from the nearest town : it varies from 2.17 % to 20.72 % for different distant groups. Waste land is thus a marked feature of the villages which are farthest from the towns.

NOTE ON TOWN DIRECTORY

16. The Town Directory has been compiled in seven different statements for the urban areas of the district. Brief explanatory notes on each statement are given below :—

Note on Statement I :—Statement I renders an account of identification particulars, status, growth history and functional category of towns.

(M Stands for Municipal Committee in this statement.)

At the 1961 Census an attempt was made to classify the towns on the basis of the "functional category". The entire working population was divided into 9 industrial categories. These 9 categories were further clubbed into the following five broad functional categories :—

Industrial Category-1961		*Functional Classification*
I	Cultivator	Primary activities
II	Agricultural Labourer	
III	Mining, Quarrying, Livestock, Forestry Fishing., Hunting and Plantations, Orchards and Allied Activities.	
IV	Household Industry	Industry
V	Manufacturing other than Household industry	
VI	Construction	
VII	Trade and Commerce	Trade and commerce
VIII	Transport, Storage and Communication	Transport
IX	Other Services	Services

The towns have been classified on the basis of the percentage of total workers engaged in each of the five classes of economic activity. A town where 40 percent or more of the total workers are engaged in one occupation, has been classified as a mono-functional town, *e.g.*, industrial town, services town, etc. If this condition is not satisfied then the next predominant occupation is taken into account and if the total of the two comes to 60 % or above the town has been classified as bi-functional town, *e.g.*, industrial-cum-services town. If the total of the workers engaged in the two major occupations does not come upto 60 % the third predominant occupation is taken into consideration and the town is categorised as multifunctionl *e.g.* industrial-cum-services-cum-commercial town.

The functional distribution of towns of Ludhiana district, worked on the above pattern, is shown in the following table. It is based on the 1971 Census results.

TABLE No. 9

Distribution of towns by functional categories

Serial No.	*Functional category*	*Number of towns*
1	*2*	*3*
1.	Industry	1
2.	Trade and Commerce-*cum*-Industry	2
3.	Primary activities-*cum*-Trade and Commerce	1
4.	Trade and Commerce-*cum*-Industry *cum* Services	1
5.	Services *cum* Trade and Commerce-*cum*-Primary Activities	1

Out of six towns of the district, Ludhiana is the only mono-functional, i.e., industrial town. Three towns, namely, Doraha, Khanna, and Raikot are bi-functional. Doraha and Khanna are trade and commerce-cum-industrial towns whereas Raikot is a primary activities-cum-trade and commerce town.

The other two towns are multi-functional. Jagraon is a trade and commerce-cum-industry-cum services town while Samrala is a services-cum-trade and commerce-cum-primary activities town.

Note on Statement II:—This statement deals with the physical aspects and location particulars of the towns of Ludhiana district. Under physical aspects the details of annual rainfall and minimum and maximum temperature of the towns have been recorded. Doraha, Ludhiana and Raikot towns account for the maximum annual rainfall (704.5 mm.) in the district while Jagraon accounts for the minimum rainfall (582.4 mm). The maximum temperature in these towns touches 46.4° centigrades and the minimum temperature goes down to 1.4° centigrades.

This statement also shows (i) distance of the town from the nearest city (with population of one lakh and above), (ii) from State headquarters (iii) district headquarters, (iv) railway station (v) bus route, etc. The statement shows that Ludhiana with a population of more than 4 lakhs is the nearest city to all the towns in the district. It lies at a distance of about 62 kms. from Jullundur and about 93 kms. from Chandigarh. Doraha is the nearest town while Khanna is the farthest town from the district headquarters. Passenger and goods transport facilities are adequate in all the towns which are on the bus routes. All towns, except Raikot and Samrala, have their own railway station. There is no problem of overcrowding or of traffic jam in the small towns of the district. However, this problem has emerged in Ludhiana city.

The Sirhind Canal, the gift of the Sutlej river, passes through this district. Navigation is not possible in the canal as the supply of water is erratic and its banks are generally lower than the adjoining plateau. It is primarily used for irrigation and has proved to be a great boon to the district. Doraha, Jagraon and Samrala towns are situated within a distance of 9 kms. from this canal.

Note on Statement III:—This statement furnishes data on the municipal budgeting for the year 1968-69. It shows receipt and expenditure under different heads for each local body.

The per capita receipt and per capita expenditure of all the towns, classified by population size, have been worked out in the following table :

TABLE No. 10

Per Capita receipt and expenditure by size class of towns

		PER CAPITA						
		Receipt (Rs.)			*Expenditure (Rs.)*			
Class of town	*Number of towns*	*Total receipts*	*Receipts through taxes*	*Receipts from all other sources*	*Total expenditure*	*Expenditure on public health and conveniences*	*Expenditure on public institutions*	*Expenditure on all other aspects*
1	*2*	*3*	*4*	*5*	*6*	*7*	*8*	*9*
Class I 1,00,000 and above	1	23.44	18.51	4.93	23.15	14.01	1.35	7.79
Class II 50,000-99,999	...	...	...	...	...	....	...	...
Class III 20,000,-49,999	2	35.90	23.95	11.95	36.05	20.13	2.76	13.16
Class IV 10,000-19,999	1	16.00	12.15	3.85	14.86	5.49	1.48	7.89
Class V 5,0 0-9,999	2	27.75	23.23	4.52	21.17	7.89	2.92	10.36
Class VI Below 5,000	...	...	...	...	...	...	...	...

The towns covered under various classes are shown below :

Class I	—	Ludhiana
Class II	—	...
Class III	—	Jagraon and Khanna
Class IV	—	Raikot
Class V	—	Doraha and Samrala
Class VI	—	...

The table given above shows that per capita receipts exceed per capita expenditure in all classes of towns except in respect of class III towns. It reflects a healthy state of finances of local bodies. The per capita receipts and expenditure are the highest in class III towns and lowest in class IV town.

Local taxes are the major source of revenue of all the Municipal Committees. Income derived from Municipal properties, Government grants, loans, advances, etc., are the other sources of revenue.

On the expenditure side, the per capita expenditure of class III towns is the highest and the lowest in case of class IV town. Almost all the Municipal Committees of the district spend proportionately higher amounts on Public Health and Conveniences.

Note on Statement IV:—Information relating to civic and other amenities in the towns, as in 1969, has been embodied in this statement. It includes information on type of roads with length, system of sewerage/drainage, number of latrines by types, method of disposal of night soil, capacity of protected water supply, and availability of fire fighting service. The number of electric connections in the towns by types of use has also been shown in the statement.

Under column 4, "System of Sewerage", various types of sewerage/drainage system have been indicated in order of importance by adopting the following abbreviations :— .

OSD	=	Open Surface Drains.
S	=	Sewer.
ST	=	Septic Tanks.

Under column 8, "Method of disposal of night soil", different prevalent methods of disposal of night soil have been shown in order of their importance by use of the following abbreviations :

HL	=	Head Loads.
WB	=	Wheel Barrows.

Under column 9 "Source of protected water supply", various sources of protected water supply have been indicated in order of their importance by use of the following abbreviations :—

TW	=	Tubewell water.
T	=	Tap water.
HP	=	Handpump water.
W	=	Well water.

Provision of civic and other amenities in the towns is assuming increasing importance with the economic development of the district. In this respect, *Ludhiana* city leads all other towns in the district. It lies on the National Highway No. 1 which connects it with Ambala, Karnal, Panipat and Delhi in the South and with Jullundur and Amritsar in the North. Another metalled road connects it with Chandigarh, Kalka and Simla. It is also an important Railway junction having connections with Jullundur, Firozpur, Hissar and Ambala-Delhi.

Sanitation in Ludhiana city is largely unsatisfactory. Due to establishment of small industries, slum and belighted areas, littered with heaps of rubbish and effluents, have lately come up in the city. Open surface drains in most of the old localities have further aggravated the sanitation problem. The Municipal Committee of Ludhiana has taken in hand the construction of under-ground sewerage but only 35 to 40% areas have been covered so far. Drinking water supply is largely met by a network of tubewells. The traditional hand pump water also continues to serve the residents. It is significant that in many parts of the city running tap water is now being supplied to the consumers. The city is well electrified and has the highest number of street lighting points compared to any other town in the district. However, there is an intermittent power shortage in this city because new industrial units are constantly increasing their demand for power. A well organised fire-fighting service exists in the city.

Khanna town is located 43 kms. South-east of Ludhiana city. Roads are good in this town and link it with other towns in the district. The more important among them are Khanna-Samrala, Khanna-Machhiwara and Khanna-Bhari-Kheri roads. The town is well electrified and has a good arrangement of protected drinking water supply through tubewells etc. The town suffers from intermittent power shortage. Sanitation is not a formidable problem in the town except in some old localities. Construction of underground drainage is in progress which will further help to improve sanitation in the town.

Jagraon is another important town known for its foodgrains market all over the North. The town is well served by a network of roads and in this it is rated second only to Ludhiana. The town is well electrified and industrial units engaged mostly in cotton ginning alone account for 1660 connections. Supply of drinking water is largely met by tubewells and handpumps.

Samrala, a very small town, is situated 34 kms. East of Ludhiana city. The Chandigarh-Ludhiana road, recently constructed, passes through this town. It is also connected by metalled roads with Khanna and Machhiwara. The town is electrified but its industrial development has been rather slow. Sanitation is poor mainly because of open surface drains.

Raikot and Doraha towns have also gained importance in the wake of green revolution. Both are electrified. Handpump is the major source of supply of drinking water. These towns have open surface drains and night soil is generally disposed of on head loads.

Note on Statement V :—This statement furnishes information relating to medical, educational, recreational and other cultural facilities in the towns. Under Col. 3, medical facilities in terms of number of hospitals, dispensaries, T. B. clinics, health centres, etc., have been shown by use of the following abbreviations :—

H	=	Hospital.
D	=	Dispensary.
HC	=	Health Centre.
FPC	=	Family Planing Centre.
TBC	=	T. B. Clinic.
O	=	Others.

Where figures D (1), H (2), etc. occur, these denote that the town has one dispensary, two hospitals, etc.

Under Column 5, provision of higher educational facilities has been indicated by use of the following abbreviations :—

A	=	Arts College only.
AS	=	Arts and Science College only.

Where figures like A (1), AS (2), etc. occur, these denote that the town has one Arts College, two Arts and Science colleges, etc.

Under Colmn 9, the number of recognised shorthand, typewriting and other vocational institutions have been shown by use of the following abbreviations :—

ITI	=	Industrial Training Institute.
O	=	Others.

Under column 17, the existence of public library or reading room has been shown by use of the following abbreviations :—

PL = Public Library.
RR = Reading Room.

The number thereof has been indicated in brackets.

The number of medical institutions and the number of beds therein have been taken as the criteria to determine the extent of medical facilities available in the towns. The following table shows the extent of medical facilities available in each town of the district :

TABLE No. 11

Medical Facilities

Sl. No.	*Name of Town*	*Total Number of beds in medical institutions*	*Number of beds per 1,000 population*
1	*2*	*3*	*4*
1	Doraha	...	...
2	Jagraon	23	0.70
3	Khanna	82	2.35
4	Ludhiana	984	2.45
5	Raikot	4	0.34
6	Samrala	23	3.04

Ludhiana district occupies a prominent place in the provision of medical facilities. In 1970, there was a bed for every 1068 persons in the district. Ludhiana city has the maximum number of medical institutions. There are 10 hospitals with 984 beds, 8 family planning centres, 3 dispensaries and one T.B. clinic. However, the number of beds per thousand population has not exceeded 2.45 in this city because of the rapidly growing population. On the other hand, Samrala, a small town of the district, has the maximum number of beds per 1,000 population i.e. 3.04. Raikot town has only 0.34 beds per thousand population while Doraha town does not have even a single bed in its medical institutions.

The district has a good number of educational institutions, most of which are located in Ludhiana city : nine Arts and Science Colleges, two Arts colleges, two Medical colleges, one Engineering college, five Shorthand and Typewriting and one Polytechnic institution. The Punjab Agricultural University in this city has its unique place in the State. Arts and Science Colleges are also located in Jagraon, Khanna and Samrala towns.

The number of Higher Secondary/High Schools, Middle Schools and Primary Schools per 1,000 population in each of the to \n of Ludhiana district has been shown in the following table :

TABLE No. 12

Number of High/Higher Secondary, Middle and Primary schools per 1,000 population

Sl. No.	*Name of town*	*Number per 1,000 population*		
		Higher Secondary or High Schools	*Middle Schools*	*Primary Schools*
1	*2*	*3*	*4*	*5*
1	Doraha	0.34	...	...
2	Jagraon	0.21	...	0.09
3	Khanna	0.14	...	0.23
4	Ludhiana	0.07	0.02	0.11
5	Raikot	0.34	...	0.09
6	Samrala	0.26	...	0.13

Ludhiana city has the highest number of Higher Secondary/High Schools, Middle Schools and Primary schools. But considering its population the number is not very high. The table given above

shows that the number of Higher Secondary or High School per 1,000 population is highest (0.34) in Doraha and Raikot towns, and lowest (0.07) in Ludhiana city. Ludhiana city has 0.02 Middle schools per 1,000 population in the district while in other towns the incidence of Middle Schools per 1,000 population is negligible. Khanna town with 0.23 Primary Schools per 1,000 population leads all other towns.

Cultural and recreational facilities are also largely concentrated in Ludhiana city, which has one stadium, 9 cinemas, 2 public libraries and 18 reading rooms. These facilities in other towns of the district are not adequately available.

Note on Statement VI.—This statement contains information on trade, commerce, industry and banking of the towns of the district as in 1969. In addition, the names of the three most important commodities imported, exported and manufactured in each town have been given in the statement, which have been determined on the basis of the estimated volume of the commodities transacted.

The statement reveals that all the towns in the district have banking facilities. There were 8 branches of State Bank of India, 11 of Punjab National Bank, 16 of Cooperative Bank, 6 of State Bank of Patiala and 53 of other Commercial Banks in the district in 1970. Out of 94 branches, 37 branches were located in urban areas of the district, Agricultural cooperative credit societies were also functioning in all the towns of the district except in Ludhiana city and Doraha town.

The district is known for the manufacture of engineering and hosiery goods which are exported in large quantities to other parts of the country and to a number of other countries. Most of the units manufacturing hosiery and engineering goods are located in Ludhiana city. However, a few units are also located in Samrala, Khanna and Jagraon towns.

Note on Statement VII.—This statement shows the distribution of population by religion in towns. The population has been classified into six main religions, namely, Budhism, Christianity, Hinduism, Islam, Jainism and Sikhism. The persons returned as professing other religious sects or beliefs, which could not be classified under any of the main religions, have been clubbed together under the head "Other religions and persuations". The persons whose religion could not be ascertained have been classified under the category "Religion not stated". According to the 1971 Census, the Sikh population accounted for 65.71% of the total population of the district while the Hindu population was 33.22%.

PART X—B

PRIMARY CENSUS ABSTRACT

EXPLANATORY NOTE

PRIMARY CENSUS ABSTRACT

The Primary Census Abstract provides an abstract of the primary information relating to the 1971 Census. It contains the data in respect of area, number of occupied residential houses and households, total population (including institutional and houseless population) and its break-up by sex, Scheduled Castes and Scheduled Tribes, literate and educated persons, workers and non-workers for each village and for each town, wardwise/blockwise. The workers have been classified into the following nine industrial categories of economic activity :—

(I) Cultivators.

(II) Agricultural labourers.

(III) Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied Activities.

(IV) Mining and Quarrying.

(V) Manufacturing, Processing, Servicing and Repairs :—

(a) Household Industry.

(b) Other than Household Industry.

(VI) Construction.

(VII) Trade and Commerce.

(VIII) Transport, Storage and Communications.

(IX) Other Services.

2. The district totals given at the beginning of the Primary Census Abstract are followed by the break-up for rural and urban areas of the district. The data are presented tahsilwise (i) for the rural sector and (ii) for the urban sector. The rural Primary Census Abstract presents the data for the villages arranged in the ascending order of location code numbers (assigned to the villages) within the tahsil. The urban Primary Census Abstract, presented town-wise for each tahsil, furnishes data for the municipal wards down to the Enumerator's blocks.

3. In the rural Primary Census Abstract the uninhabited villages have also been shown. The villages, which have got completely merged in towns, have been excluded from the list of the rural Abstract. However, an indication of such villages has been given in a separate footnote.

4. The district map given at the beginning of the Handbook shows the tahsil boundaries, location of the towns and large villages of population size 5000+ and the important roads and railway lines, rivers, etc. An inset map therein shows the location of the district in the State. At the beginning of Primary Census Abstract for each tahsil, a map, showing the boundaries of each village and town, has been given. An inset map therein shows the location of tahsil in the district.

5. *Under Column* 1, the location code number indicating the district number, the tahsil or town number and the village or ward number has been given. Thus a code number running as 4/2/25 means village No. 25, Tahsil No, 2 of District No. 4 or code number running as 4/II/5 means ward No. 5 in Town No. II of District No. 4. Town number has been given in roman figures to distinguish it from the rural code numbers.

6. *Under Column* 2, the name of village/town/ward No./Enumerator's block No. (Urban) has been given. The Hadbast number of the village has been given in brackets. A 'village' has been defined

as the area included within the jurisdiction of a revenue village and as such is inclusive of even scattered hamlets and isolated homesteads coming within the boundaries of a revenue village. A revenue mauza whether inhabited or uninhabited has been treated as a village.

A town is a place having either a Municipality, Cantonment or Notified Area or satisfying the following criteria :

(i) having a minimum population of 5,000 ;

(ii) three-fourth of its male working population engaged in the non-agricultural pursuits ; and

(iii) having a density of population of at least 400 per sq. km. (i.e. 1,000 per square mile).

7. The area figures (in acres) given under Column (3) have been collected from the revenue authorities, whereas for the urban Primary Census Abstract the column shows the total area of the town in sq. kms. as supplied by the Municipal authorities and for wards the column has been left blank as the ward-wise area figures are not available with the Municipal Committees. The district area figures (total) have been supplied by the Surveyor General of India and these represent 'geographical area' figures. The total urban area of the district has been arrived at by adding together the area of each urban area in the district as given by each Municipal Committee. District rural area figures have been derived by substracting urban area figures out of the figures supplied by the Surveyor General of India for the entire district. Total of tahsil area figures does not tally with the total area of the district as the former are 'land use' figures as supplied by the State Director of Land Records and the latter are 'geographical area' figures as supplied by the Surveyor-General of India.

8. *Columns* 4 *and* 5 of the Abstract, relate to the occupied residential houses and give the number of the houses and the households therein.

Occupied residential house is a dwelling house and includes a house used partly as a dwelling and partly for some other purpose, like shop, workshop, factory, etc., but does not include a 'vacant house' where no person was found to be residing at the time of census.

'Census house' is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc., used or recognised as a separate unit. It may be inhabited or vacant. It may be used for a residential or non-residential purpose or both.

Household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. It may be made up of related or unrelated persons. A servant, friend or a guest residing and eating with the household during the census period has been treated as a member of the household. On the other hand a son or a daughter residing in a hostel has not been treated as a member of the household. Their enumeration was done at the place of their usual residence i.e. hostel. A hotel or hostel where a number of persons live together is recognised as an institutional household. So is a jail.

9. *Columns* 6 *to* 8 of the Abstract show the total population (including institutional and houseless population) and its sex-wise break-up. A 'houseless person' in Census terminology has been defined as :

(i) a person who might be doing domestic service or other work with one or more households but who does not reside in any house and sleeps in the corridors, verandahs or passages in buildings or on the streets :—

(ii) wandering or nomadic tribes found to be staying in temporary huts, etc. ; and

(iii) beggar, vagrant. tramp, sadhu, *fakir*, etc. who is found on the footpaths, streets, in places like parks, gardens, railway yards etc.

The following symbols have been used here :—

P for persons indicating the total of males and females.

M for males.

F for females.

10. *Columns* 9 *to* 12 present the sex-wise break-up of the persons belonging to Scheduled Castes and Scheduled Tribes as notified in Government of India, Ministry of Home Affairs Communication No. S.R.O. 2477-A, dated the 29th October, 1956 and published as the Scheduled Castes and Scheduled Tribes lists (Modification) Order, 1956,

Scheduled Castes are such castes, races or tribes or parts of groups within such castes, races or tribes as are declared to be Scheduled Castes by the President of India's Orders issued under Article 341 of the Constitution of India.

Scheduled Tribes are such tribes or tribal communities as are declared to be Scheduled Tribes under Article 342 of the Constitution of India. There are no Scheduled Tribes in the Punjab State.

11. *Colums* 13 *and* 14 give the number of literate and educated persons. A *literate* is defined as a person who can both read and write with understanding in any language. A person who can merely read but cannot write, has not been considered as literate. This column also includes figures in respect of persons having higher education.

12. *Under Columns* 15 *and* 16, the total number of male and female workers has been given. *A worker*, as defined at the 1971 Census, is one whose main activity is participation in any economically productive work by his/her physical or mental activity. And for that matter work involves not only actual work but also effective supervision and direction of work.

In the case of regular work in trade, profession, service or business, the basis for work is satisfied if the person was employed one week prior to the date of enumeration. Persons temporarily incapacitated from work at the time of census enumeration due to illness, travel, holiday, temporary break-down, strike etc. have been treated as workers. However, a person who had been offered work but had not actually joined has been treated as 'non-worker'.

In the case of seasonal work like cultivation, livestock keeping, plantation work, some types of household industry, etc., a person's main activity has been ascertained with reference to such work in the last one year even if he was not active in the week prior to enumeration.

A man or woman who is engaged primarily in household duties such as cooking for own household or performing one's own household duties or a boy or a girl who is primarily a student attending institution, even if such a person helps in the family economic activity but not as a full time worker has not been treated as a 'worker' for the main activity. On the other hand if a person is primarily engaged in some economic activity but at the same time also attends to some household chores or attends a night school, etc., he or she has been treated basically as a worker.

A person who merely receives an income, such as a rent receiver or a pensioner, who does not have to work for receiving the income, has not been treated as 'worker' unless the person is engaged in some economic activity and if that activity is returned as the main activity of the individual.

The population classified as 'workers' is the economically active population.

13. *Columns* 17 *to* 36 furnish sex-wise distribution of workers into nine industrial categories. Brief explanatory notes for each of these categories are recorded below :—

Category I :

This category includes both the owner and tenant cultivators. Cultivator, according to the definition adopted at the 1971 Census, is a person who is engaged in cultivation by oneself or by supervision or direction in one's capacity as the owner or lessee of land held from Government or as a tenant of land from private persons or institutions for payment of money, kind or share. The term 'cultivation' involves ploughing, sowing and harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and pulses, raw jute and kindered fibre crops, cotton, etc. and other crops such as sugarcane, groundnuts, tapioca etc. and does not include fruit growing or keeping orchards or groves or working on plantations like tea, coffee, rubber, cinchona and other medicinal plantations.

Category II :

This category includes agricultural labourers. An agricultural labourer has been recognized in

census as a person who works in another person's land for wages in money, kind or share of produce. He has no risk in the cultivation. He has further no right of lease or contract on land on which he works.

Category III :

Workers engaged in livestock, forestry, fishing, hunting and plantations, orchards and allied activities, are included in this category.

Category IV :

This category includes workers engaged in mining and quarrying.

Category V :

This category includes workers engaged in manufacturing, processing, servicing and repairs in the :

(a) Household Industry.

(b) Other than Household Industry.

The household industry has been defined in Census as an industry conducted by the head of the household himself/herself and/or mainly by the members of the household at home or within the village in rural areas and only within the premises of house where the household lives in any urban area. The industry should not be run on the scale of a registered factoy but may use machinery and employ power like steam engine or oil engine or electricity to drive the machinery. The main criterion of a household industry is the participation of one or more members of a household. A household industry relates to production, processing, servicing or repairs and includes making and selling (but not merely selling) of goods. It does not include professions such as pleader or doctor or barber, musician, dancer, waterman, dhobi, astrologer, etc. or merely trade or business, even if such profession, trade or services are run at home by members of the household. Persons working in other person's household industry as paid employees are also treated as workers in household industry.

Workers engaged in manufacturing, including all types of production, processing, servicing or repairing of goods and not considered to be working in the household industry, have been treated as engaged in other than household industry.

Category VI :

This category includes workers engaged in construction and maintenance of buildings, roads, railways, bridges, telegraphs, telephones, waterways, reservoirs, etc.

Category VII :

This category includes workers engaged in any capacity in wholesale or retail trading activity and commercial transactions relating to exports and imports, real estates and properties, stock and shares, insurance, money lending, banking, etc.

Category VIII :

This category includes workers engaged in transport activity by air, rail, road or water and in services incidental to transport, such as packing, carting, loading, unloading, etc. Workers engaged in storage, warehousing and communication services such as post & telegraph, telephones, wireless, signalling, information and broadcasting are also included in this category.

Category IX :

This category includes other services such as public utility services, like, electricity, gas or water supply, sanitary services, Central, State Municipal employees, professional services, etc.

14. *Columns 37 and 38* give the total number of male and female non-workers. Non-workers have been classified under seven broad heads :

(i) *Household duties.*—This covers all those persons basically engaged in unpaid home duties doing no other work, or even if such a person may also be participating in some other work, it is not to the same extent as a whole-time worker and if the person had returned his or her main activity as attending to household duties.

(ii) *Student.*—This refers to those whose main activity is returned as a student and covers all full-time students or children attending school. Even if such persons participated in some work but not to the same extent as a full time worker by merely helping casually as an unpaid family worker in family cultivation, household industry, trade or business, they are treated primarily as students.

(iii) *Retired person or a rentier.*— A person who has retired from service and is doing no other work i.e. not employed again in some full time work or does not engage himself in some other work as cultivation, in business, trade, etc., or a person, who is a rentier or living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work, is classified under this head.

(iv) *Dependent.*—This category includes all dependents such as infants or children not attending school or a person permanently disabled from work because of illness or old age. It includes all non-workers, even if able bodied, who have no other activity coming under any of the categories of non-workers and who are not seeking any work either but are purely dependent.

(v) *Beggars, etc.*—This covers beggars, vagrants or such cases as independent women without indication of source of income and those of unspecified source of subsistence who are not engaged in economically productive work.

(vi) *Institutions.*—This covers convicts in jails or inmates of a penal, mental or charitable institution even if such persons are compelled to do some work such as carpentry, carpet weaving, vegetable growing, etc. in such institutions. An under trial prisoner in jail, however, is not included in this category and has been indicated according to the main activity he was engaged in before he was apprehended.

(vii) *Other non-workers.*—This includes all non-workers who have not come under any of the six categories above but are seeking work. A boy or a girl who has completed education or has stopped studying and Is seeking work has been included in this category. A person, irresepective of age and whether educated or not, if he reports that he is not engaged in any other activity but is seeking work, has been included under this category.

The following abbreviations have been used in the Primary Census Abstract :—

M.C.=Municipal Committee
OG=Outgrowth
N.A=Not Available
