Motif:—

GURDWARA BER SAHIB, SULTANPUR LODHI

Gurdwara Ber Sahib is a renowned place of pilgrimage of the Sikhs. It is situated at Sultanpur Lodhi, 16 miles South of Kapurthala, around a constellation of other Gurdwaras (Sikh Temples) associated with the early life of Guru Nanak Dev. It is named after the 'Ber', tree under which Guru Nanak Dev used to meditate. Legend has it that sterile women beget children after taking leaves of this tree. The old Gurdwara was re-constructed by the joint efforts of Maharaja Jagatjit Singh of Kapurthala, Maharaja Yadvindra Singh of Patiala and Bhai Arjan Singh of Bagrian. A big fair is held at this Gurdwara on Guru Nanak Dev's birthday.

A—CENTRAL GOVERNMENT PUBLICATIONS

The 1971 Census Reports on Punjab will bear uniformly Series No. 17 and will be published in the following Parts :—

PART I-A	General Report.
PART I-B	General Report (Detailed analysis of the Demographic, Social, Cultural and Migration Patterns)
PART I-C	Subsidiary Tables.
PART II-A	General Population Tables.
PART II-B	Economic Tables.
PART II-C(i)	Mothertongue, Religion and Scheduled Castes and Scheduled Tribes Tables.
PART II-C(ii)	Social and Cultural Tables and Fertility Tables.
PART III	Establishment Report and Tables.
PART IV	Housing Report and Tables.
PART V	Special Tables and Ethnographic Notes on Scheduled Castes and Scheduled Tribes.
PART VI-A	Town Directory.
PART VI-B	Special Survey Reports on selected Towns.
PART VI-C	Survey Reports on selected Villages.
PART VII	Special Report on Graduates and Technical Personnel.
PART VIII-A	Administration Report— Enumeration (for official use only).
PART VIII-B	Administration Report— Tabulation (for official use only).
PART IX	Census Atlas.
PART IX-A	Administrative Atlas.

B—STATE GOVERNMENT PUBLICATIONS

PART X District Census Handbooks for each district in three Parts—

PART A—Village and Town Directory

PART B—Village and Town-wise Primary Census Abstract

PART C—Analytical Report, Administration, Statistics and District Census Tables.

Note.—Parts A and B of the District Census Handbooks have been printed in one volume.

PREFACE

In the publication of the District Census Handbooks we have the privilege of carrying one of the important census traditions to the 1971 Census. Their publication was first taken up at the 1951 Census for making census statistics available for the smaller territorial units. In the 1961 Census, attempts were made to make this publication more informative with the addition of data about level of development and amenities available in villages. There was, however, great delay in the publication of this valuable reference compendium. The delay occurred on account of the fact that the compilation of the Handbook had to wait till the complete tabulation programme was got through. The compilation of administrative statistics for inclusion in the Handbook also took a long time. As a result, the town and village-wise primary census data could not be released pending their formal publication even though there was constant demand for it. In view of these considerations, it was decided at the 1971 Census that the District Census Handbook would be divided into three convenient parts so that at least Parts A and B, which contain essential data down to the village and town levels, could be released quickly. Accordingly Parts A & B of the District Census Handbook of Kapurthala are presented in this Handbook. Part (A) contains the Village and Town Directory and Part (B) Village and Town-wise Primary Census Abstract. It is for the first time that data about urban areas is being presented in a separate part "Town Directory" at the 1971 Census. The Village Directory presents comprehensive information on various facets of each village. Alphabetical List of villages has also been inserted in the Handbook.

2. There are 108 towns and 12,188 inhabited villages in the Punjab State. It was, indeed, a formidable task to collect and compile voluminous data for such a large number of units. The collection of area figures and land use data, in particular, presented serious difficulties especially when these figures somewhat differed from those given at the tahsil and district level by the Director of Land Records. We had to make several gruelling cross-checks to adopt the area figures finally for each village.

3. It was not considered necessary to have a penetrating analysis of any particular item of the data in Parts (A) and (B) of this Handbook ; this could be taken up by the Census Organisation itself or some other agency later during the inter-censal period. The census data users and scholars would perhaps feel satisfied with the statistical data being presented in this Handbook quickly on the heels of the census count in the country.

4. This Report, as at the last Census, continues to be a State Government publication as it is financed by them. Its compilation and write-up have been done by the Census Directorate at Chandigarh on behalf of the State Government. The views expressed in this are that of the State Census Organisation, which is under the direct control of the Government of India in the Ministry of Home Affairs.

5. In the collection of data, we had to take help from a large number of personnel of the State Revenue Department at the village, tahsil and district level and of the municipal staff in towns. But for their generous co-operation in filling up of the lengthy schedules regarding availability of amenities and level of development it would not have been possible to achieve the desired objectives in time. It is certainly difficult to thank separately each individual functionary engaged on this project. Nevertheless we are keen to convey our profound gratitude to all those who have worked directly or indirectly on this project. At the Census Directorate, Shri S. K. Agarwal, Assistant Director, Census Operations, assisted by a team of zealous workers (Shri R.L Kalsia, Tabulation Officer, Shri N. S. Bhadauria, Statistical Assistant S/Shri Malkit Singh, and Parkash Sharma, Computors) has compiled the census and administrative statistics in the form of Village and Town Directories. The initial compilation of the Village Directory was done by Shri Vishwa Mittar, S. A. under the able guidance of Shri D. P Jain, Tabulation Officer. We owe a debt of gratitude to all these officials for the effort and labour they have put in for the timely production of this Handbook

In the Map Section, S/Shri Madho Shyam, Surinderjit Singh and Kulbir Singh have done a neat job in the preparation of the maps under the stewardship of Shri G.S. Gill, Tabulation Officer. Dr. B.K. Roy, Map Officer, in the office of the Registrar, General, New Delhi, provided valuable guidance in the preparation of the maps. S/Shri Madan Lal, and K. C. Pardesi, Stenographers, have worked hard for the production of the final draft on their machines. We wish to acknowledge our gratitude to all of them.

6. We are grateful to Dr. Roy Burman, Deputy Registrar General (Social Studies) for piloting this project in our State and for evincing continued zeal and interest in its implementation. Above all, we are specially indebted to our Census Commissioner, Shri A. Chandra Sekhar and his successor Shri R. B. Chari for the inspiration and guidance that we continued to receive from them in the production of this Handbook and to reaffirm our claim that "Census continues to be the most fruitful source of information about the country". We trust the demographers, sociologists, economists and other scholars working in various humanities will find sufficient data in this compendium for taking up analytical studies.

7. We must also pay our tributes to the Tech. Staff of the Union Territory Press. Chandigarh and particularly to Shri Gurpartap Singh Srao, Deputy Controller, for the excellent job done in the printing of this Handbook. Our thanks are also due to Shri H. S. Sudan, Computor and Shri Hari Bhushan Assistant Compiler, for proof reading and for seeing this publication in the Press. We are equally beholden to Shri P. S. Walia, Controller, Printing and Stationery Department, Punjab for ensuring speedy publication of this Handbook.

H. S. KWATRA.
Deputy Director of
Census Operations, Punjab.

PART X-A

VILLAGE AND TOWN

DIRECTORY

A GLIMPSE INTO THE DISTRICT

Kapurthala, formerly a princely State, is the smallest district in the Punjab State. The district has, according to the information supplied by the Surveyor General of India, an area of just 1633 sq. kms. and a population of 4 29,514 as per the returns of the 1971 Census. Thus the density of population per sq. km. works out to 263 as against the State figure of 269. The Sex Ratio for the district has been returned at 889 which is slightly higher than the corresponding State figure standing at 865. Almost every 4th person in the district lives in its urban areas.

Kapurthala District lies between North latitude 31°-08′ and 31°-37′ and East longitude 74°-58′ and 75°-54′. It is bounded by Jullundur and Hoshiarpur Districts in the East, Hoshiarpur and Gurdaspur Districts in the North, Amritsar District in the West and by Firozpur and Jullundur Districts in the South. Phagwara Tahsil of this district has no geographical contiguity with the rest of the district. Like Jullundur District, Kapurthala District lies between the Sutlej and the Beas rivers and is known as Bist Doab.

The climate of the district is more or less typical of the Punjab plains i.e. extremely hot summers and severe cold winters. Phagwara Tahsil receives the highest rain-fall because of its proximity to the hills of Hoshiarpur District.

The district has three tahsils constituted of 3 towns and 700 villages, of which only 556 villages are inhabited. Workers constitute about 28 per cent of the total population according to the data collected at the 1971 Census. The economic data relating to 1971 Census further reveal that 61.47 per cent of the population is dependent on agriculture. The agricultural scene is dominated by small peasant proprietors who are taking keen interest in the application of modern techniques for increasing the food production. About 72 per cent of the area of the district is under cultivation and more than 60 per cent of the cultivated area is provided with irrigation facilities. The main sources of irrigation are pumping sets, tube-wells, canals and persian wells. Mention may particularly be made of the Bist Doab canal which is an important source of irrigation.

Wheat is the principal crop in the district so much so that about 50 per cent of the total cultivated area is under its cultivation. Phagwara Tahsil claims maximum yield per acre in wheat in the district. Maize, rice, sugarcane, oil seeds and pulses are the other important crops. Both Desi and American varieties of cotton are grown in the district. The area under this crop has registered a decline during the last decade mainly due to the relatively better profitability of the high-yielding varieties of wheat. Food production in this district suffers from intermittent floods and large swamps which are in quite a sizable number in Kapurthala Tahsil.

The district has to its credit a number of small and medium sized industries. These are mostly agro-based and concentrated in the towns of Phagwara and Kapurthala. Prominent among these are a cotton textile mill, electrical and engineering works, steel re-rolling mills, a sugar mill and agricultural implements manufacturing units.

The literacy rate for the district has been returned at 35.70 per cent against the State figure of 33.67 per cent. The male and female literacy rates have been returned at 42.56 per cent and 27.99 per cent, respectively.

INTRODUCTORY NOTE ON DISTRICT CENSUS HANDBOOK

History of District Census Handbook:—Census has assumed an increasingly important role from decade to decade in India. Undoubtedly it is now an indispensable instrument of policy and development planning in the State and at the Centre. To repeat the oft-quoted words :*

> "Census is no longer a mere counting of heads for purposes of taxation and recruitment. It is a kind of stock taking as it were of the nation's human wealth. Census aims at presenting as complete a picture of man as may be possible, in his social, cultural and economic setting. . . . . "

Keeping in view the ever-increasing demand of layman, adminstrators, planners, scholars, etc. for publication of census data for smaller administrative units, it was decided at the 1951 Census to present data by villages and towns in the form of District Census Handbooks. It was not altogether a new idea because even at the earlier decennial censuses, data for smaller administrative units were published in one form or the other. A district wise list of villages, showing population, was published as early as 1891 from the data collected at the census. A regular Village Directory was also introduced at the 1911 Census and such 'Directories' were compiled in the shape of 'District Census Statistics' at the 1921 Census. In the end result, the District Census Handbook emerged as a regular decennial publication of the State Government at the 1951 Census. The District Census Handbooks of 1951 contained an introductory essay, giving brief history of physio-geographic conditions, life styles and other socio-economic conditions of the inhabitants, extracts from important census tables, besides Village and Town Directories. Administrative Statistics on items like railway stations, post offices, schools, co-operatives, village panchayats were also given. The size and contents of the District Census Handbook series of the 1951 Census varied from State to State depending on the availability of financial resources and requirements of data. So varied were the uses and so great the value of these Handbooks that their publication was continued at the 1961 Census and vigorous efforts were made toenlarge the scope and enrich their contents. The 1961 Census Handbooks were certainly far more elaborate than their precursors at the 1951 Census. At the 1961 Census the introductory chapter of the District Census Handbook was almost a gazetteer as it contained information on physical, historical, geological and administrative aspects of the district. Besides, information relating to the demographic, economic, social and cultural aspects was also given, which was further supplemented by a list of events of the preceding decade and a statement of fairs and festivals of the district.

2. The publication of the District Census Handbooks, in which the Village and Town 'Primary Census Abstracts' were incorporated, invariably got delayed even though the compilation of townwise and villagewise primary census data were completed within a year or two after the completion of census enumeration. The delay occurred on account of the fact that the compilation of the Handbook had to wait till the complete tabulation programme was got through. The townwise and villagewise primary census data could not be released pending their formal publication even though there was constant demand for it. The compilation of administrative statistics for inclusion in the District Census Handbook also took sufficiently long time. Very often the publication of the District Census Handbook got delayed as some of the States Government would not take a decision quickly enough to publish them. In fact some of the District Census Handbooks of 1961 Census were published in a few States as late as 1971. Delayed publication undoubtedly detracts from their value.

3. *Scope of District Census Handbook* 1971:—It is always our endeavour to make available these data to the users as quickly as possible after the census count. With this end in view, District Census Handbooks at the 1971 Census have been divided into three convenient parts so that atleast Part A and B, which contain the essential data down to the village and town, can be released quickly, State Governments have also accorded their approval to their publication in three convenient parts:—

PART A—Village and Town Directory.

PART B—Village and Townwise Primary Census Abstracts.

PART C.—Analytical Report, Administrative Statistics and District Census Tables.

4. Part A of the Handbook contains Village and Town Directory for each village and town by tahsils. The Village Directory contains information about total area of each village in acres, amenities/conveniences available in the village, the staple food of the people and the land use pattern. There is also information about the nearest town and its distance from the village. The Town Directory presents data on each town with the aid of seven statements, giving the status of the town, the decadal population, its functional category, physical and locational aspects, municipal finance and availability of amenities/facilities like medical, education, banking, trade & commerce, industry and population by religion.

*Extract of the speech of Shri K. S. Ramaswamy, Deputy Home Minister delivered on the 24th September, 1970, at the State Level Training Conference of Census Officers, Haryana at Chandigarh.

5. The prescribed schedules for Village and Town Directory were sent to the Tahsildars and Presidents of Municipal Committees to be filled in by their staff and to be returned to the Census Directorate. Comprehensive instructions, which were got printed, were given to the staff for the filling up of these schedules. Notwithstanding all the care taken at various levels for the correct filling up of these schedules, there were a few cases where the quality of work was substandard and in these cases the field job had to be done for the second time. There were considerable delays in the submission of filled in schedules and a series of reminders had to be sent to the Tahsildars for early submission. Some of the revenue officials hardly evinced adequate interest in this assignment which culminated in serious delays in the completion of the task. Similarly there were delays in some of the Municipal Committees where the Secretaries sparingly took adequate interest in this work. But since we had taken up this job well in advance we could give sufficient time margin to the field agency for filling up these schedules. Inspite of all the difficulties the job was accomplished well in time.

6. Part B contains the Primary Census Abstract, (PCA) figures— the basic census data— — for each town and each village, tahsilwise, for the district. The town PCA contains figures wardwise and down to the census Enumerator's block. Villagewise Primary Census Abstracts have been arranged in the ascending order of location code numbers allotted to villages at the Census. A map of the district, showing the tahsil boundaries, location of the towns and large sized villages of population 5000 +, has been given at the beginning of this part. Important roads, railway lines, rivers, etc. have been depicted in this map. An inset map showing the position of Kapurthala District in the State has also been incorporated. Preceding PCA for each tahsil, a map, showing the tahsil boundary and location code number of each village and town in the tahsil, has been given alongwith an inset map showing the position of the tahsil in the district. In order to facilitate location of any village a list giving villages in each tahsil, arranged in alphabetical order and indicating the code number of the village, has also been incorporated.

PCA incorporates tahsilwise data for each village and each town/ward / block under the following column heads:—

(i) Area in sq. kms/acres;

(ii) Number of occupied census houses and the households;

(iii) Total population (including the institutional and houseless population);

(iv) Population of Scheduled Castes and Scheduled Tribes;

(v) Literate and educated persons;

(vi) Workers classified into 9 industrial categories and the non-workers.

7. Part C of the District Census Handbook will contain the analytical report, embodying administrative statistics and abstracts from all the important census tables generated at the district and tahsil level. In its introductory portion an assessment about the relative position of the district among other districts with regard to area, population size, density and growth rate & changes in demographic, economic and social characteristics of the district will be made. A brief write-up will also be presented to indicate the broad features of changes in respect of the break-up of population in rural and urban areas; distribution of population by industrial categories; activities of non-workers; composition of households by relationship to head; distribution of population by age and sex; education and literacy; scheduled castes; migrants; mother-tongue and religion. A record of the major events of the decade in the district will be presented in this part. Information about amenities like transport and communication, irrigation and power, housing and institutional facilities like finance, credit, medical and public health, educational, cultural and recreational facilities will also be presented. Comprehensive data about the economic resources and activities like agriculture, animal husbandry, fisheries, forestry, mining and plantations, trade and commerce, industries etc. will, in addition, be given in this part.

8. *The 'Census Village'*.—The definition of the village in Census is identical with thatof 'Mauza' given under section 3 (1) of the Punjab Land Revenue Act, 1887. It is the 'Revenue Estate' determined as such for the purpose of levy and collection of the land revenue. The Revenue Estate is defined in the Act *ibid.*

"as an area of which a separate record of rights is maintained or which has been separately assessed to land revenue or would have been so assessed if the land revenue had not been realized or compounded or redeemed or which the State Government has otherwise declared as an Estate."

The village is thus not merely the *abadi deh* (red lined area) for Census taking but the entire land coming within the fixed boundaries of each village in terms of the Act *ibid.*

9. *The 'Census Town'*.—Each country decides for itself which areas are 'urban' and which are 'rural' because it is difficult to have an internationlly acceptable definition of each such 'area.' National

differences in the characteristics, which distinguish urban or rural areas, do not admit of a uniform definition at the international level. In India we have adopted the following definition of an 'urban' area at the 1971 Census, which is incidentally analogous to the one adopted at the 1961 Census. (Prior to the 1961 Census, the definition of 'urban' area was somewhat liberal and a lot was left to the discretion of the local authorities) :—

(a) All places with a Municipality, Corporation or Cantonment or a Notified Town Area ;

(b) All other places which satisfy the following criteria :—

(i) a minimum population of 5,000 ;
(ii) at least 75% of the male working population is non-agricultural ;
(iii) a density of population of at least 400 per sq. kilometer.

The State Directors of Census Operations were, however, given some discretion in marginal cases to include, in consultation with the State Government, a place that had other distinct urban characteristics or to exclude an underserving place from being treated as 'urban'. Dhilwan treated as town at the 1961 Census was denotified at the present census as it ceased to be administered as Municipal Committee. Kapurthala District has only three urban areas and statements I to VII of the Town Directory give information on various aspects of these towns.

10. *Urban Agglomerations.*—In addition to the presentation of data for each town separately the data for 'Urban agglomerations' is also presented in this Directory at the 1971 Census. With the adoption of the concept of 'Urban agglomeration', the old concepts of 'town group' and 'sub-urban areas' or 'non-municipal areas' have been abandoned at the 1971 Census. 'Urban agglomeration' forms a contiguous urban spread constituting of a town and its adjoining urban outgrowths or two or more physically contiguous towns together with continuous well recognised urban outgrowths, if any, of such towns. In the 'town group' concept of 1961 Census, it was not always the continuous urban units that formed such a group. Sometimes, urban units quite cut off from one another were taken together ignoring the intervening regions. As this evoked criticism, the concept of 'town group' has been abandoned at the 1971 Census. Data in respect of the following urban agglomeration in the Kapurthala District is being presented in the Town Directory:—

Name of urban agglomeration	Units of agglomeration	Whether town in its own right or outgrowth
1	2	3
Phagwara	(a) Phagwara Municipal Committee	Town
	(i) Jagatjit Cotton Textile Mill	Outgrowths
	(ii) Mohalla Gobindpura	Outgrowths
	(iii) Kotrani	Outgrowths

11. *Standard Urban Area.*—The area constituting an 'Urban agglomeration' may keep on changing from Census to Census depending upon the changing boundaries of the statutory core urban unit as well as the extent of other continuous urban outgrowths. The concept of 'Standard Urban Area', adopted at the 1971 Census, will take care of these changes covering areas beyond the extending urban limits and intermingling both rural and urban areas in the vicinity of large towns to a limit upto which contiguous urbanization is reasonably expected to take place in the next two decades. In brief, the Standard Urban Area may be defined as the projected growth area of a city or town as it would be in 1991, taking into account not only the towns and villages which will get merged into it but also the intervening areas which are officially urban. Provision of census data for such 'Standard Urban Areas' will have the advantage of providing comparable data for a definite area for a period of two decades greatly facilitating study of socio-economic and demographic trends in such a fixed area and thus help in urban planning. All towns with a population of 50,000† have been delineated as Standard Urban Areas.

The Standard Urban Area has been delineated around Phagwara Municipal Committee of this district at the 1971 Census. The basic particulars of this standard urban area are given below :—

List of Standard Urban Area in Kapurthala District—1971 Census

Name of Urban Unit in S.U.A. 1971	*Rural components (with Hadbast No.)*
1	2
Phagwara	**Phagwara Garbi (74)**

	Thakarki (99)
	Dhakman (96)
	Narang Shahpur (90)

NOTE ON VILLAGE DIRECTORY

12. The Village Directory containing information about each village, separately for each tahsil, has been prepared. Villages have been arranged within the tahsil in the ascending order of the census location code numbers, e.g., location code No. 6/2/25 means village No. 25 in tahsil No. 2 of District No. 6 of the State. It contains an account of the location and area of the village, amenities available in the village, for example, educational, medical, power supply, communications, post and telegraph, staple food, land use, i.e., area under different types of land use like forest, irrigated and unirrigated,cultivable and uncultivable land. This is further supplemented by information about the nearest town and distance in kilometers from the referrent village, days of markets or hats, if any, held in the village and an account of places of religious, historical and archaeological interests in the village. An appendix showing tahsilwise, amenities, like educational, medical, power supply , etc., has been added towards the end of the Village Directory.

13. Information about the amenities available in the villages has been given under columns 4 to 9 of the Directory.

(i) Educational facilities have been shown by adopting the following abbreviations under column 4 :

Pr. S	=	Primary School.
Mid. S	=	Middle School.
Sec. S	=	High or Higher Secondary School.
C	=	College.

Where figures like Mid. S (1), Pr. S (2) etc., occur these denote that the village has one Middle School, two Primary Schools, etc.

(ii) Medical facilities have been shown by use of the following abbreviations under column 5 :

H	=	Hospital.
MCW	=	Maternity and Child Welfare Centre.
HC	=	Health Centre.
D	=	Dispensary.
FPC	=	Family Planning Centre.
VH	=	Veterinary Hospital.

Number of institutions has been given in brackets against each.

(iii) Electrification has been shown by use of the following abbreviation under column 6 :—

E	=	Electrified.

(iv) Types of drinking water supply sources in the village have been shown by use of the following abbreviations under column 7 :—

T	=	Tap water.
W	=	Well water.
TW	=	Tubewell water.
H P	=	Hand pump water.
TK	=	Tank water.
R	=	River water.
F	=	Fountain water.
C	=	Canal water.
O	=	Others.

(v) Communication and transport facilities have been shown by use of the following abbreviations under column 8 :—

PR	=	Pucca Road.
KR	=	Katcha Road.
T	=	Train (if the railway station is within the range of one mile from the village)
C	=	Canal.
R	=	River.

(vi) Post and Telegraph facilities have been shown by adoption of the following abbreviations under column 9:—

PO	=	Post Office.
TO	=	Telegraph Office.
PTO	=	Post and Telegraph Office.
Phone	=	Telephone connection.

14. Break-up of area under different types of land use has been furnished under columns 11 to 15 of the Directory. Particulars in respect of the nearest town and the distance in kilometers of the same

from the referrent village have been given under column 16. Information regarding day (s) of markets/hats, if any, held in the village has been furnished under column 17. Regular weekly, fortnightly or monthly markets/hats are hardly a common feature in the Punjab State. Temporary markets/hats are held in the State only on a few festive occasions. Information relating to places of religious, historical or archaeological interest has been given under column 18.

Uninhabited villages and villages that have got merged into towns have been specifically shown in the Directory.

15. (a) **Distribution of villages by area :**

The following table shows the distribution of villages of Kapurthala district in terms of area in acres :

TABLE No. 1

Distribution of villages by area (in acres)

Area in acres	*Number of villages**
1	2
50 acres or less	9 (1.28)
51—100 acres	21 (3.00)
101—200 ,,	81 (11.57)
201—500 ,,	297 (42.43)
501—1000 ,,	200 (28.57)
1001—2000 ,,	72 (10.29)
2001—5000 ,,	17 (2.43)
5001 acres and above	3 (0.43)
Total	700 (100.00)

*Inclusive of 144 un-inhabited villages

(Figures in brackets indicate percentage to total number of villages in each distance group).

The average area of a village in Kapurthala District works out to 585 acres. Largest number of villages (42.43 percent) fall in the bracket 201 to 500 acres. Only 9 villages in the district have an area of 50 acres or less each. The number of villages having more than 5,000 acres each is only three. It emerges from this table that a large majority of villages in this district are medium sized, i. e., in the bracket 200 to 1000 acres.

(b) **Amenities available in the villages**

(i) *Educational facilities.*—Educational facilities available in the villages of Kapurthala district have been listed below in the following table in terms of the distance from the nearest referrent town :—

TABLE No. 2

Distribution of villages having educational amenities by distance from the nearest town

Distance from the nearest town	Total Number of villages*	*Nubmer of villages having*				
		Primary School	Middle School	High or Higher Secondary School	College	Others
1	2	3	4	5	6	7
5 kms. or less	105	53(50·48)	12(11·43)	5(4·76)	..	..
6—10 kms.	204	91(44·61)	16(7·84)	8(3·92)	..	..
11—15 ,,	159	63(39·62)	5(3·14)	11(6·92)	..	..
16—25 ,,	88	32(36·36)	5(5·68)	5(5·68)	..	..
26—50 ,,	..	..	..	..	..	..
51—100 ,,	..	..	..	..	..	..
101—200 ,,	..	..	..	..	..	..
201 kms. and above	..	..	..	..	..	..
Total	556	239(42·99)	38(6·83)	29(5·22)	..	..

*Excluding 144 uninhabited villages
(Figures in brackets indicate percentage to total number of villages in each distance group).

This table shows that maximum educational facilities are available in those villages which lie within a distance of 5 kms. from the nearest town. Such villages have maximum number of primary and middle schools. However, the number of High/Higher Secondary Schools is maximum in those villages which are at a distance of 11 to 15 kms. Out of a total number of 556 inhabited villages in the district only 239 villages have Primary Schools (43 per cent), 38 villages have Middle Schools (7 per cent) and 29 villages have High or Higher Secondary Schools (5 per cent). It is quite interesting to note that none of the villages hosts a college of any type. However, the State Education Department has established the schools in such a way that students of primary classes have not to traverse more than 2-3 miles to attend a school.

(ii) *Medical facilities.*—Medical facilities have been quantified in terms of number of medical institutions of any type per 100 sq. kms. The following table gives the distribution of medical facilities per 100 sq. kms. in rural areas :—

TABLE No. 3

Medical facility per 100 sq. kms.

Sl. No.	*Name of Tahsil*	*Total area in sq. kms.*	*Number of medical institutions of any kind per 100 sq. kms*
1	2	3	4
1	Kapurthala	888.8	4.28
2	Sultanpur Lodhi	440.6	2.27
3	Phagwara	294.1	8.16

It is evident that Phagwara Tahsil with 8.16 medical institutions per 100 sq. kms. has an edge over other tahsils and over the district average of 4.52 medical institutions per 100 sq. kms. in rural areas. The corresponding figure for the State is only 2.69.

(iii) *Power supply.*—Electrification in rural areas has assumed great importance with the increased tempo for agricultural production. The following table gives distribution of electrified villages in Kapurthala district in terms of distance from the nearest town :—

TABLE No. 4

Distribution of electrified villages with reference to distance from the nearest town

Distance from the nearest town	*Total number of villages**	*Number of villages with electric power supply*
1	2	3
5 kms or less	105	83(79·04)
6—10 kms.	204	100(49·02)
11—15 ,,	159	70(44·03)
16—25 ,,	88	35(39·77)
26—50 ,,	..	..
51—100 ,,	..	..
101—200 ,,	..	..
201 kms. and above	..	..
Total	556	288(51·80)

*Excluding 144 un-inhabited villages.

(Figures in brackets indicate percentage to total number of villages in each distance group).

Out of 556 inhabited villages in the district only 288 villages (51.80 per cent) were electrified upto March, 1969. 79 per cent of electrified villages were within a radius of 5 kms. from the nearest town indicating a positive correlation between distance to the nearest town and the power supply to the villages. Phagwara Tahsil leads in the rural electrification programme in as much as 80 per cent of its villages have been electrified. Efforts are, however, under way to electrify 100 per cent villages of the district by the end of the Fourth Five-Year Plan.

(iv) *Communications*:—Communication facilities in rural areas have increased steadily in the past decade. All out efforts are underway to link all villages by pucca road by the end of Fourth Five-Year Plan. The communication facilities available in the villages of the district in terms of the distance from the nearest town have been shown in the following table :—

TABLE No. 5

Distribution of villages with different communication facilities and distance from the nearest town

Distance from the nearest town	Total number of villages*	*Number of villages connected by*							
		Pucca road	Katcha road	Pucca & Katcha road	Pucca road & river	Pucca road & rail	Pucca, Katcha road & rail	Katcha road & rail	Others
1	2	3	4	5	6	7	8	9	10
5 Kms. or less	105	39(37·14)	18(17·14)	3(2·86)	..	3(2·86)	..	..	..
6—10 kms.	204	75(36·76)	15(7·35)	7(3·43)	..	4(1·96)	..	..	..
11—15 ,,	159	54(33·96)	17(10·69)	1(0·63)	..	2(1·26)	..	..	..
16—25 ,,	88	35(39·77)	9 (10·23)	4(4·55)	..	..	..	..	..
26—50 ,,	..	..	..	..	..	..	..	..	..
51—100 ,,	..	..	..	..	..	..	..	..	..
101—200 ,,	..	..	..	..	..	..	..	..	..
201 Kms. and above	..	..	..	..	..	..	..	..	..
Total	556	203(36·51)	59(10·61)	15(2·70)	..	9(1·62)	..	..	..

*Excluding 144 uninhabited villages.

(Figures in brackets indicate percentage of the total number of villages in each distance group.)

It emerges from the above table that out of 556 villages only 203 villages (36.51 per cent) are linked by pucca roads. Another 59 villages (10.61 per cent) are linked by katcha roads, 15 villages (2.70 percent) by pucca and katcha roads, and 9 villages (1.62 percent) by pucca roads and rail. The proportion of villages linked by pucca road is highest in the distance group 16 to 25 kms. On the otherhand the proportion of villages connected by katcha road is highest in the distance group of 5 kms. or less.

(v) *Post and telegraph*:—The following table gives the number of post offices per 100 sq. kms., tahsilwise :—

TABLE No. 6

Number of Post Offices per 100 sq. kms.

Serial No.	*Name of Tahsil*	*Total area in sq. kms.*	*No. of post offices per 100 sq. kms.*
1	2	3	4
1	Kapurthala	888·8	5·51
2	Sultanpur Lodhi	440·6	2·95
3	Phagwara	294·1	8·84

The above table reveals that Phagwara Tahsil has the highest number of post offices i.e. 8.84 per 100 sq. kms. The corresponding figure for the district and the State is only 5.52 and 5.96, respectively. Only 88 villages have the facility of post offices. The telegraph offices are located in only 3 villages and another 4 villages have telephone connections.

(c) Staple food :

Wheat, maize and rice are the staple food in the district in different parts of the year. In some parts of Kapurthala District consumption of wheat and rice is more pronounced while in other parts it is of maize and rice. However, in some pockets barley, bajra and gram are also consumed in smaller quantities.

(d) Land use pattern :

(i) *Forests.*—The area under forests, as shown in the Village Directory, includes forested areas classed or administered as forests under any legal enactment dealing with forests whether, State owned or private. This figure may be slightly different from the one furnished by the Forest Department owing to the reason that certain lands though not wooded are taken as forests by the Forest Department.

(ii) *Irrigated Area.*—It is the area that receives the soil blood for crops—the water, through channels containing water procured from wells, tubewells, tanks, canals, etc. Cultivated land served by watering through artificial means is termed as 'irrigated area'.

(iii) *Unirrigated Area.*—It includes the cultivated land which depends entirely upon nature for irrigation purposes. Monsoons are the principal source of irrigation in the dry pocket areas of Kapurthala District. Too much dependence on rains at times exposes the district to drought situation.

(iv) *Cultivable waste.*—This category includes land available for cultivation whether actually cultivated or not, for one reason or the other, or once taken up for cultivation but not cultivated again for more than 5 years in succession. Such land may be fallow or covered with bushes or jungle which may not be put to any use. Lands under thatching grass, bamboo, bushes, miscellaneous tree crops, etc. which are not included under forests have been considered as cultivable waste. All grazing lands which are permanent pastures, meadows, village common lands and grazing lands within the forest areas have also been covered under this classification.

(v) *Area not available for cultivation.*—This refers to absolutely barren uncultivable land and such lands which are put only to non-agricultural uses. Absolutely barren uncultivated land covers lands under mountains, deserts, etc. and which cannot be brought under cultivation except at an exorbitant cost. All lands occupied by buildings, roads, railways, waterways, rivers, canals, etc. are classified as not available for cultivation.

The percentage of area under different land uses in this district is as under :—

Different land uses	*Percentage*
(i) Forests	0·04%
(ii) Irrigated	46·56%
(iii) Unirrigated	25·35%
(iv) Cultivable waste	10·38%
(v) Land not available for cultivation	17·67%

It is thus clear that about 72% of the total area of the district is under cultivation and about 47 percent of the area is irrigated. The area under forests is almost negligible and more than one-sixth of the total area is not available for cultivation.

The Government canals and well/tubewells are the main sources of irrigation in the district. The following table gives the distribution of net irrigated area of each tahsil of the district:

TABLE No. 7

Tahsilwise net irrigated area during 1970-71 (00' hectares)

Name of Tahsil	*Differene sources of irrigation*					
	Government Canals	Private Canals	Tanks	Wells (including tubewells)	Other sources	Total
1	2	3	4	5	6	7
Kapurthala	2	..	..	551	..	553
Sultanpur Lodhi	1	..	..	273	..	274
Phagwara	51	..	..	165	..	216
Total for the district	54	..	..	989	..	1,043

Source:—Economic and Statistical Organisation, Punjab.

It is a common observation that cultivable waste is less in the villages nearer to urban areas. But the picture is somewhat different in this district. Cultivable waste is about 10 per cent of the total area of the district. It is maximum in those villages which are located within 6—15 kms. radius of the nearest town as revealed in the following table:—

TABLE No. 8

Percentage of average cultivable waste per village to average cultivated land per village by distance group from the nearest town

Distance from the nearest town	No. of villages*	Total cultivated land (in acres)	Average cultivated land per village (in acres)	Total cultivable waste (in acres)	Average cultivable waste per village (in acres)	Percentage of average cultivable waste per village to average cultivated land per village
1	2	3	4	5	6	7
5 kms. or less	117	61,893	529·00	8,438	72·12	13·63
6—10 ,, kms.	234	97,359	416·06	14,858	63·50	15·26
11—15 ,,	203	86,462	425·92	13,322	65·63	15·41
16—25 ,,	144	48,846	339·21	5,886	40·88	12·05
26—50 ,,	2	45	22·50	..	..	..
51—100 ,,	..	..	..	..	..	..
101—200 ,,	..	..	..	..	..	..
201 kms. and above	..	..	..	..	..	..
Total	700	294,605	420·86	42,504	60·72	14.42

*Inclusive of 144 uninhabited villages.

The average cultivated land per village in the district is 420.86 acres whereas the average cultivable waste per village is 60.72 acres. The villages located within a distance of 16—25 kms. have the lowest percentage of average cultivable waste to average cultivated land per village.

NOTE ON TOWN DIRECTORY

16. The Town Directory has been compiled in seven different statements for all the urban areas of the district. Brief explanatory notes on each statement are given below :—

Note on Statement I.—Statement I renders an account of identification particulars, status, growth history and functional category of towns.

(M stands for Municipal Committee in this statement).

At the 1961 Census an attempt was made to classify the towns on the basis of the "functional category". The entire working population was categorised into 9 industrial categories. These 9 categories were further clubbed into the following five broad functional categories:—

Industrial Category—1961	*Functional Classification*
I. Cultivator	Primary activities.
II. Agricultural Labourer	
III. Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied Activities	
IV. Household Industry	Industry
V. Manufacturing other than Household Industry	
VI. Construction	
VII. Trade and Commerce	Trade and Commerce
VIII. Transport, Storage and Communications	Transport
IX. Other Services	Services

The towns have been classified on the basis of the percentage of total workers engaged in each of the five classes of economic activity. A town where 40 per cent or more of the total workers are engaged in one occupation, the town has been classified as a mono-functional town, e.g., industrial town, services town, etc. If this condition is not satisfied then the next predominant occupation is taken into account and if the total of the two comes to 60 per cent or above, the town has been classified as bi-functional town, e.g. industrial-cum-services town. If the total of the workers engaged in the two major occupations does not come upto 60 per cent, the third predominant occupation is taken into consideration and the town is categorised as multi-functional, e.g., industrial-cum-services-cum-commercial town.

The functional distribution of towns of Kapurthala district as per the 1971 Census is given in the following table :—

TABLE No. 9

Distribution of towns by functional categories

Serial No.	*Functional Category*	*Number of towns*
1	2	3
1	Industry	1
2	Industry-cum-Services	1
3	Services-cum-Trade and Commerce	1

There are only 3 towns in this district i.e. Phagwara, Sultanpur and Kapurthala.Phagwara is an industrial town while Kapurthala is industry-cum-services town. Sultanpur comes under the category of services-cum-trade and commerce town.

Note on Statement II.—The physical and location aspects of the towns of the district, as in 1969, have been shown in this statement of the Town Directory. It shows that there is not much variation in rainfall and temperature of the district.Kapurthala and Sultanpur towns recorded an annual rainfall of 627.9 mm. while Phagwara town recorded an annual rainfall of 610.6 mm. The maximum temperature in all the three towns was 44.8° centigrade while the minimum temperature was 0.6° centigrade.

Kapurthala is the district head quarter/town. This town is 18 kms. west of Jullundur City and about 168 kms. from Chandigarh. It is a well planned town and has beautiful laidout gardens. Jullundur City is nearest to all the towns of Kapurthala District.Transport and communications are well developed in all the towns of the district and there is not even a single town in the district which does not have its railway station or a bus route. However, there is no navigable river/canal within 10 kms. of any town in the district.

Note on Statement III.—This statement shows the receipts and expenditure of the Municipal Committees of the district. The following table gives per capita receipts and expenditure of each town classified by population size:—

TABLE No. 10

Per Capita receipt and expenditure by size class of towns

Class of Town	No. of towns	*Per Capita* Receipt (Rs.)			Expenditure (Rs.)			
		Total Receipt	Receipt through taxes, etc.	Receipt from all other sources	Total Expenditure	Expenditure on Public Health and Conveniences	Expenditure on Public Institutions	Expenditure on all other aspects
1	2	3	4	5	6	7	8	9
Class I 100,000 and above	..	..	..	..	..	..	..	..
Class II 50,000 to 99,999	1	22·53	12·94	9·59	21·39	5·39	0·07	15·93
Class III 20,000 to 49,999	1	24·02	17·51	6·51	18·83	9·58	0·10	9·15
Class IV 10,000 to 19,999	..	..	..	..	..	..	..	..
Class V 5,000 to 9,999	1	10·48	0·21	10·27	2·62	..	..	2·62
Class VI below 5,000	..	..	..	..	..	..	..	..

The classification of towns in the above table has been shown as follows:—

Class II—Phagwara

Class III—Kapurthala

Class V—Sultanpur

It is quite evident from this table that per capita receipts exceed per capita expenditure in all classes of towns. This is a very healthy picture of the finances of the Municipal Committees of the district, However, per capita receipts are maximum in Class III town and minimum in Class V town.

Local taxes are the principal source of revenue of all the Municipal Committees. Revenue derived from municipal properties, Government grants, loans, advances, etc. are the other sources of revenue of the Municipal Committees.

On the expenditure side, public health and conveniences and public institutions account for maximum expenditure of the Municipal Committees.

Note on Statement IV.—This Statement relates to provision of civic and other amenities in the towns of the district as in 1969. Under column 4, "System of sewerage", various types of sewerage/drainage systems have been indicated in order of importance by adopting the following abbreviations : —

S	=	Sewers
OSD	=	Open Surface Drains
ST	=	Septic Tanks

Under column 8, "Method of disposal of night soil", different prevalent methods of disposal of night soil in order of their importance have been shown by use of the following abbreviations :—

HL	=	Head Loads
WB	=	Wheel Barrows

Under column 9, "Source of protected water supply," various sources of protected water supply have been indicated in order of their importance by use of the following abbreviations :—

TW	=	Tubewell water
T	=	Tap water
W	=	Well water
HP	=	Handpump water

Provision of civic and other amenities in the towns is assuming increasing importance with the economic development of the district. In this field Kapurthala town has the maximum amenities in the district. It is well connected by major and minor metalled roads with the important towns and markets. It has open surface drains in the old localities of the town. New localities are having underground drainage system. It has the largest number of service latrines. Night soil is generally disposed of on head loads and wheel barrows. Tubewells and handpumps are the major sources of protected water supply. Tap water supply has also been ensured in most of the localities of the town. The town is electrified and has the maximum number of road lighting points compared to other towns. It has two units of fire brigade.

Phagwara is another important town of the district. It lies on G. T. Road and is situated about 23 kms. towards south-east of Jullundur City. This town is well served by metalled roads and has the maximum road routes in the district. Phagwara-Jullundur, Phagwara-Hoshiarpur, Phagwara-Ludhiana and Phagwara-Nawashahr are the important bus routes of this town. This town has open surface drains and the night soil is disposed of by the conventional method. Municipal tubewells and handpumps are the principal sources of protected water supply. The scheme of supplying piped water is also under implementation in the town. About 90 per cent of the houses of the town are electrified. However, there is acute shortage of power for the industrial units. The town also has a well organized fire-fighing service.

Sultanpur town does not have any standard civic amenities. It has mostly service latrines. Handpumps are the major source of protected water supply in the town. The town is electrified.

Note on Statement V.—This statement furnishes details relating to medical, educational, recreational and other cultural facilities in the towns. Under col. 3, medical facilities in terms of number of

Hospitals, Dispensaries, T.B. Clinics, Health Centres, etc. have been shown by use of the following abbreviations :—

H = Hospital.
D = Dispensary.
HC = Health Centre.
FPC = Family Planning Centre.
TBC = T. B. Clinic.
O = Others.

Where figures D (1), H (2), etc. occur, these denote that the town has one Dispensary, two Hospitals, etc.

Under column 5, educational facilities in terms of number of colleges of various types have been indicated by use of the following abbreviations :—

A = Arts College only.
AS = Arts and Science college only.

Where figures like A (1), AS (2), etc. occur, these denote that town has one Arts College and two Arts and Science Colleges, etc.

Under column 9, relating to recognised shorthand, typewriting and other vocational institutions, the following abbreviations have been used :—

ITI = Industrial Training Institute.
O = Others.

Under column 17, the existence of public library or reading room has been shown by the following abbreviations :—

PL = Public Library.
RR = Reading Room.

The number thereof has been indicated in brackets.

The number of medical institutions and the number of beds therein have been taken as the criteria to determine the extent of medical facilities available in the towns. The following table shows the overall position of medical facilities in these towns :—

TABLE No. 11

Medical Facilities

Serial No.	*Name of Town*	*Total No. of beds in medical institutions*	*No. of beds per 1,000 population*
1	2	3	4
1	Kapurthala	108	3·04
2	Phagwara	50	0.91
3	Sultanpur	14	1·53

Kapurthala town enjoys the maximum medical facilities in the district. There are 3.4 beds per 1,000 population in this town. It has one Hospital with 100 beds, one T. B. Clinic with 3 beds, one Dispensary with 5 beds and one Family Planning Centre without any bed facility. On an average there are 1.73 beds per 1,000 population in urban areas of the district.

Phagwara, another important town of the district, has one Hospital with 50 beds, one Dispensary and two other Hospitals without any facility of a bed. It has only 0.91 beds per 1,000 population.

Edcuational facilities are not adequately available in Kapurthala District. The following table gives the number of Higher Secondary/High, Middle and Primary Schools per 1,000 population:—

TABLE No. 12

Higher Secondary or High, Middle and Primary Schools per 1,000 population

Serial No.	*Name of Town*	*Number per 1,000 population*		
		Higher Secondary/ High Schools	Middle Schools	Primary Schools
1	2	3	4	5
1	Kapurthala	0·17	3·03	0·17
2	Phagwara	0·15	0·05	0·02
3	Sultanpur	0·22	..	0·44

It is clear that Sultanpur town has the maximum number of Higher Secondary/High Schools and Primary Schools per 1,000 population. It has one Arts College, 2 Higher Secondary/High Schools and 4 Primary Schools. Phagwara town has two Arts and Science Colleges, one Polytechnic, one Industrial Training Institute, 8 High or Higher Secondary Schools, 3 Middle Schools and one Primary School. On the other hand, Kapurthala town has one Arts and Science College, one Polytechnic, 6 Higher Secondary/ High Schools, one Middle School, 6 Primary Schools and one Teacher's Training Institute. However, there is no medical or engineering college in the district.

Kapurthala and Phagwara towns have adequate recreational and cultural facilities. Kapurthala has one cinema-house while Phagwara has two. Both these towns also have public libraries and reading room facilites. Sultanpur town, however, lacks recreational or cultural facilities.

Note on Statement VI.—This statement provides information relating to trade, commerce, industry and banking as in 1969. It also lists three most important commodities imported, exported or manufactured in these towns. This list has been worked out on the basis of the estimated volume of the commodities handled.

Kapurthala and Phagwara towns are the two important industrial centres of the district. The most important commodities which are imported in these towns are raw rubber, iron materials, cotton, vanaspati ghee, groundnut and rice. Important commodities which are exported from these towns are electric goods, cotton textiles, sugar, foodgrains and automobile spare parts.

Kapurthala town is known for its manufacture of electrical articles like motors, fans, cables and electrical fittings like switches, shoes. Screws, rivets, bolts, motor spare parts are also manufactured in this town. Kapurthala town has also earned a name for manufacture of rubber and leather products.

Phagwara town is well known for its cotton textile. A sugar mill is also located at Phagwara. There is also a net work of units manufacturing engineering goods, automobile parts and machine tools and parts. It has also a name for brass utensils, sewing machines, and agricultural implements in the Punjab State.

In 1970, there were three branches of the State Bank of Patiala, 4 of the Punjab National Bank, 6 of the Co-operative Bank, one of the State Bank of India and 9 of other Commercial Banks. Out of these 23 branches of various banks, 11 were located in the urban areas of the district. Availability of adequate banking facilities has helped the growth of industrial activity in this district.

Note on Statement VII.—This statement presents the distribution of population by religion. The population has been classified into six main religions, namely, Budhism, Christianity, Hinduism, Islam, Jainism and Sikhism. The persons returned as professing other religious sects or beliefs, which could not be classified under any of the religions, have been clubbed together under the head "other religions and persuasions." The persons whose religion could not be ascertained have been classified as "religion not stated."

According to 1971 Census the Sikh population accounts for 61.26 per cent of the total population of the district, The Hindu population is 38.02 per cent only. However, in all the urban areas, the Hindu population is more than the Sikh population.

EXPLANATORY NOTE

PRIMARY CENSUS ABSTRACT

The Primary Census Abstract provides an abstract of the primary information relating to the 1971 Census. It contains the data in respect of area, number of occupied residential houses and households, total population (including institutional and houseless population) and its break-up by sex, scheduled castes and scheduled tribes, literate and educated persons, workers and non-workers for each village and for each town ward-wise/block-wise. The workers have been classified into the following nine industrial categories of economic activity :—

(I) Cultivators.

(II) Agricultural labourers.

(III) Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied Activities.

(IV) Mining and Quarrying.

(V) Manufacturing, Processing, Servicing and Repairs:—

(a) Household Industry.

(b) Other than Household Industry.

(VI) Construction.

(VII) Trade and Commerce.

(VIII) Transport, Storage and Communications.

(IX) Other Services.

2. The district totals given at the beginning of the Primary Census Abstract are followed by the break-up for rural and urban areas of the district. The data are presented tahsilwise (i) for the rural sector and (ii) for the urban sector. The rural Primary Census Abstract presents the data for the villages arranged in the ascending order of location code numbers (assigned to the villages) within the tahsil. The urban Primary Census Abstract presented town-wise for each tahsil, furnishes data for the municipal wards and down to the enumerators blocks .

3. In the rural Primary Census Abstract the uninhabited villages have also been shown. The villages, which have got completely merged in towns, have been excluded from the list of the rural abstract. However, an indication of such villages has been given in a separate footnote.

4. The district map given at the beginning of the Handbook shows the tahsil boundaries, location of the town and large villages of population size 5000 + and the important roads and railway lines, rivers, etc. An inset map therein shows the location of the district in the State. A map showing the boundaries of each village and town within the tahsil and location code number of each village and town, has been given at the beginning of Primary Census Abstract for each tahsil. An inset map therein shows the location of tahsil in the district.

5. *Under Column 1,* the location code number indicating the district number, the tahsil or town number and the village or ward number has been given. Thus a code number running as 6/2/25 means village No. 25, Tahsil No. 2 of District No. 6 or code number running as 6/II/5 means ward No. 5 in Town No. II of District No. 6. Town number has been given in roman figures to distinguish it from the rural code numbers.

6. *Under Column 2,* the name of village/town/ward No./enumerator's block No. (Urban) has been given. The hadbast number of the village has been given in brackets. A 'village' has been defined as the area included within the jurisdiction of a revenue village and as such is inclusive of even scattered hamlets and isolated homesteads coming within the boundaries of a revenue village. A revenue mauza whether inhabited or uninhabited has been treated as a village.

A town is a place having either a Municipality, Cantonment or Notified Area or satisfying the following criteria :

(i) having a minimum population of 5,000 ;

(ii) three-fourth of its male working population engaged in the non-agricultural pursuits ; and

(iii) having density of population of at least 400 per sq. km. (i.e. 1,000 per square mile).

7. The area figures (in acres) given under column (3) have been collected from the revenue authorities, whereas for the Urban Primary Census Abstract the column shows the total area of the town in sq. kms. as supplied by the Municipal authorities and for wards the column has been left blank as the ward-wise figures are not available with the Municipal Committees. The district area figures (total) have been supplied by the Surveyor-General of India and these represent 'geographical area' figures. The total urban area of the district has been arrived at by adding together the area of each urban area in the district as given by each Municipal Committee. District rural area figures have been derived by substracting urban area figures out of the figures supplied by the Surveyor-General of India for the entire district. The total area of all tahsils does not tally with the total area of the district as the former are 'land use' figures as supplied by the State Director of Land Records and the latter are 'geographical area' figures as supplied by the Surveyor-General of India.

8. *Columns 4 and 5* of the abstract, relate to the occupied residential houses and the number of households therein.

Occupied residential house is a dwelling house and includes a house used partly as a dwelling and partly for some other purpose, like shop, workshop, factory, etc., but does not include a 'vacant house' where no person was found to be residing at the time of census.

'*Census house*' is a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc., used or recognised as a separate unit. It may be inhabited or vacant. It may be used for a residential or non-residential purpose or both.

Household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. It may be made up of related or unrelated persons. A servant, friend or a guest residing and eating with the household during the census period has been treated as a member of the household. On the other hand a son or a daughter residing in a hostel has not been treated as a member of the household. Their enumeration was done at the place of their usual residence, i.e. hostel. A hotel or hostel where a number of persons live together is recognised as an institutional household. So is a jail.

9. *Columns 6 to 8* of the Abstract show the total population (including institutional and houseless population) and its sex-wise break-up. A 'houseless person' in Census terminology has been defined as :

(i) a person who might be doing domestic service or other work with one or more house holds but who does not reside in any house and sleeps in the corridors, verandahs, or passages in buildings or on the streets ;

(ii) wandering or nomadic tribes found to be staying in temporary huts, etc. ; and

(iii) beggar, vagrant, tramp, sadhu, *Fakir*, etc., who is found on the footpaths, streets, in places like parks, gardens, railway yards, etc.

The following symbols have been used here:—

P for persons indicating the total of males and females.

M for males.

F for females.

10. *Columns 9 to 12* present the sex-wise break-up of the persons belonging to scheduled castes dan scheduled tribes as notified in Government of India, Ministry of Home Affairs Communication No. S.R.O.-2477-A, dated the 29th October, 1956 and published as the Scheduled Castes and Scheduled Tribes Lists (Modification) Order, 1956.

Scheduled Castes are such castes, races or tribes or parts of groups within such castes, races or tribes as are declared to be Scheduled Castes by the President of India's Orders issued under Article 341 of the Constitution of India.

Scheduled Tribes are such tribes or tribal communities as are declared to be Scheduled Tribes under Article 342 of the Constitution of India. There is no Scheduled Tribe in the Punjab State.

11. *Columns 13 and 14* give the number of literate and educated persons. A *literate* is defined as a person who can both read and write with understanding in any language. A person who can merely read but cannot write has not been considered as literate. This column also includes figures in respect of persons having higher education.

12. *Under columns 15 and 16* the total number of male and female workers has been given. *A worker*, as defined at the 1971 Census, is one whose main activity is participation in any economically productive work by his/her physical or mental activity. And for that matter work involves not only actual work but also effective supervision and direction of work.

In the case of regular work in trade, profession, service or business, the basis for work is satisfied if the person was employed one week prior to the date of enumeration. Persons temporarily incapacitated from work at the time of census enumeration due to illness, travel, holiday, temporary break-down, strike, etc. have been treated as workers. However, a person who had been offered work but had not actually joined has been treated as 'non-worker'.

In the case of seasonal work like cultivation, livestock keeping, plantation work, some types of household industry, etc., a person's main activity has been ascertained with reference to such work in the last one year even if he was not active in the week prior to enumeration.

A man or woman who is engaged primarily in household duties, such as, cooking for own household or performing ones own household duties or a boy or a girl who is primarily a student attending institution, even if such a person helps in the family economic activity but not as a full time worker, has not been treated as a 'worker' for the main activity. On the other hand if a person is primarily engaged in some economic activity but at the same time also attends to some household chores or attends a night school, etc., he or she has been treated basically as a worker.

A person who merely receives an income, such as, a rent receiver or a pensioner, who does not have to work for receiving the income, has not been treated as "worker" unless the person is engaged in some economic activity and if that activity is returned as the main activity of the individual.

The population classified as 'workers' is the economically active population.

13. *Columns 17 to 36* furnish sex-wise distribution of workers into nine industrial categories. Brief explanatory notes for each of these categories are recorded below :—

Category I :

This category includes both the owner and tenant cultivators. Cultivator, according to the definition adopted at the 1971 Census, is a person who is eng ged in cultivation by oneself or by supervision or direction in one's capacity as the owner or lessee of land held from Government or as a tenant of land from private persons or institutions for payment of money, kind or share. The term 'cultivation' involves ploughing, sowing and harvesting and production of cereals and millet crops, such as, wheat, paddy, jowar, bajra, ragi, etc. and pulses, raw jute and kindered fibre crops, cotton, etc., and other crops, such as, sugarcane, ground nuts, tapioca, etc. and does not include fruit growing or keeping orchards or groves or working of plantations like tea, coffee, rubber, cinchona and other medicinal plantations.

Category II :

This category includes agricultural labourers. An agricultural labourer has been recognised in Census as a person who works in another person's land for wages in money, kind or share of produce. He has no risk in the cultivation. He has further no right of lease or contract on land on which he works.

Category III :

Workers engaged in livestock, forestry, fishing, hunting and plantations, orchards and allied activities are included in this category.

Category IV :

This category includes workers engaged in mining and quarrying.

Category V :

This category includes workers engaged in manufacturing, processing, servicing and repairs in the—

(a) Household Industry.

(b) Other than Household Industry.

The household industry has been defined in Census as an industry conducted by the head of the household himself/herself and/or mainly by the members of the household at home or within the village in rural areas and only within the premises of house where the household lives in any urban area. The industry should not be run on the scale of a registered factory but may use machinery and employ power, like steam engine or oil engine or electricity to drive the machinery. The main criterion of a household industry is the participation of one or more members of a household. A household industry relates to production, processing, servicing or repairs and includes making and selling (but not merely selling) of goods. It does not include professions, such as pleader or doctor or barber, musician, dancer, waterman, dhobi, astrologer, etc. or merely trade or business, even if such professions, trade or services, are run at home by members of the household. Persons working in other person's household industry as paid employees are also treated as worker in household industry.

Workers engaged in manufacturing including all types of production, processing, servicing or repairing of goods and not considered to be working in the household industry have been treated as engaged in other than household industry.

Category VI :

This category includes workers engaged in construction and maintenance of buildings, roads, railways, bridges, telegraphs, telephones, waterways, reservoirs, etc.

Category VII :

This category includes workers engaged in any capacity in wholesale or retail trading activity and commercial transactions relating to exports and imports, real estates and properties, stock and shares, insurance, money lending, banking, etc.

Category VIII :

This category includes workers engaged in transport activity by air, rail, road or water and in service incidental to transport, such as, packing, carting, loading, unloading, etc. Workers engaged in storage, warehousing and communication services, such as, post and telegraph, telephones, wireless, signalling, information and broadcasting are also included in this category.

Category IX :

This category includes other services such as, public utility services, like, electricity, gas or water supply, sanitary services, Central, State or Municipal employees, professional services, etc.

14. *Columns 37 and 38* give the total number of male and female non-workers. Non-workers have been classified under the following seven broad heads :

(i) *Household duties.*—This covers all those persons basically engaged in unpaid home duties doing no other work, or even if such a person may also be participating in some other work, it is not to the same extent as a whole-time worker and if the person had returned his or her main activity as attending to household duties.

(ii) *Student.*—This refers to those whose main activity is returned as a student and covers all full time students or children attending school. Even if such persons participated in some work but not to the same extent as a full time worker by merely helping casually as an unpaid family worker in family cultivation, household industry, trade or business, they are treated primarily as students.

(iii) *Retired person or a rentier.*—A person who has retired from service and is doing no other work i.e. not employed again in some full-time work or does not engage himself in some other work as cultivation, in business, trade, etc., or a person who is a rentier or living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work is classified under this head.

(iv) *Dependent.*—This category includes all dependents such as infants or children not attending school or a person permanently disabled from work because of illness or old age. It includes all non-workers, even if able bodied, who have no other activity coming under any of the categories of non-workers and who are not seeking any work either but are purely dependent.

(v) *Beggars, etc.*—This covers beggars, vagrants or such cases as independent women without indication of source of income and those of unspecified source of subsistence who are not engaged in economically productive work.

(vi) *Institutions.*—This covers convicts in jails or inmates of a penal, mental or charitable institution even if such persons are compelled to do some work such as, carpentry, carpet weaving, vegetable gro wing, etc. in such institutions. An under trial prisoner in jail, however, is not included in this category and has been indicated according to the main activity he was engaged in before he was apprehended.

(vii) *Other non-workers.*—This includes all non-workers who have not come under any of the six categories above but are seeking work. A boy or a girl who has completed education or has stopped studying and is seeking work has been included in this category. A person, irrespective of age and whether educated or not, if he reports that he is not engaged in any other activity but is seeking work, has been included under this category.

The following abbreviations have been used in the Primary Census Abstract:—

M. C.	Municipal Committee
O G	Outgrowth
N. A.	Not Available
