FOREWORD

The district census handbook (DCH), compiled by the Census organisation on behalf of the State Governments is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District Administration. The district census handbook is the only publication which provides primary census abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The district census handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges form the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulation of the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Progamme. Such new items of information as adult literacy centres, primary health sub-centres, and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of Scheduled Caste and Scheduled Tribe population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduld Tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition in class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serve this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part-A of the volume contains village and town directory and Part-B, the PCA of villages and towns including the scheduled castes and scheduled tribes PCA up to Tahsil/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The district and Tahsil level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri **D.N. DHIR, IAS** the Director of Census Operations **PUNJAB** on behalf of the State Government which has borne the cost of printing. The task of planning, designing and coordination of this publication was carried out by Shri N.G. Nag, Deputy Registrar General (of social studies) of my office. Dr. B.K. Roy, Deputy Registrar General (Map) provided the technical

guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M.H. Dua, Senior Research Officer, I am thankful to all who have contributed in this project.

NEW DELHI
Dated, the 26th April, 1982.

P. PADMANABHA.
Registrar General, India.

PREFACE

As being regularly presented hithertofore, since 1951 census, we have now the privilege of presenting the District Census Handbooks consequent upon 1981 census.

To shorten the time lag to minimum after the compilation of census 1981 data and issuance of this Handbook as a sort of self-contained reference book, predominantly based on census data for the district, action was initiated upon the project as early as July, 1979. The Registrar General, India indicated the revised formats and statements designed for this series. The improvements were with a view to making the data more useful for administrators, planners, scholars and other users.

There are 134 towns categorised as urban area and 12,899 villages (45 tahsils) as the rural area in the State. The formidable task of collecting and compiling of this voluminous data for such a large number of units had its own problems and difficulties, both in the matters of chase up and in obtaining correct data which could be test-checked in terms of consistency with what was obtained and published consequent upon 1971 census data. Several gruelling cross-checks had to be adopted to tally items such as area figures and the land use pattern for each unit.

The statements and schedules for collecting information from the rural areas were translated into Punjabi and also test-checked to assess their acceptability and responsiveness by those who were to make their use. (I had also unsuccessfully toyed with the idea of collecting information on some other items that could indicate comparative affluence of rural Punjab but had to give it up in light of keeping to uniformity in presentation of data on all India pattern).

The statements/schedules for town directory were transmitted to the Chief Executives of the local bodies and those for rural areas were transmitted to the SDOs (C) (since all tahsils in Punjab have been converted into sub-divisions) for necessary supply of data by the revenue staff under them. The officers and senior staff of the dircetorate who had been made directly responsible for houselisting operations and had reported to the field in October, 1979 were also charged with getting these through on personal contacts. This resulted in our getting the feed back by May, 1980, on the conclusion of houselisting operations, though some small instalments of these schedules continued till September/October, 1980.

A cell had been created at the directorate to scrutinise the data as received and make preliminary compilation. The data as obtained from the field was supplemented with the data collected from the various heads of the departments at the state level, particularly in matters of amenities and facilities in the fields of education, medical, communications and the like. The staff working in the cell was once again out in the field for assisting in the second field operation, namely, enumeration and it was only on its conclusion that the work of compilation started in May-June, 1981. The three Deputy Directors (at the Regional Tabulation Offices) were in position about the same time in the field and the gaps in data, needing reconcilation in figures were got through these field officers on personal contacts with the concerned quarters.

On the compilation of the Primary Census Abstract (PCA) in March 1982 when the figures were available for projection in this volume, the whole exercise was consolidated to give birth to the instant manuscript.

The data in the book is being presented in two parts—Part A comprises Village and Town Directory and Part B Primary Census Abstract village-wise and town/wardwise separately. In addition, Primary Census Abstract for Scheduled Castes upto tahsil/town level is also presented. (There are no Scheduled Tribes in the State).

An analytical note based on a number of inset tables compiled from village and town directory and PCA has also been added for the benefit of the users, but the greater aim has been to present the data as compiled and leave further deeper study for those for whom the publication is meant. We are grateful to the large number of personnel of the State Revenue Department at the village, tahsil, sub-division and district levels and the municipal staff in all the local bodies in the state for their co-operation in filling up the statements/ schedules for providing the data.

The production of this book (and for that matter all the 12 District Census Handbooks), has been the handiwork of consistent and constant efforts put in jointly by almost all the staff of the directorate, though only at one point of time or the other in ceratin cases. The collection of data for Village and Town Directory, as mentioned earlier, was a major work in the pre-census period and after the census most of the staff was busy in tabulation and compilation of the census data both at the regional tabulation offices and at the directorate. The DCHB Cell (specially created) thereafter commenced work on inset tables, while the senior staff and the officers took to developing the fly-leaves and explanatory notes. Simultaneously the map section was deep in work for producing the maps that had to accompany these books.

I would resist the temptation of mentioning any single incumbent at any level of the hierarchy individually for apparent reasons, and would rest content with acknowledging any debt to all of them as appended hereto.

I had acted only as a co-ordinator and at times an editor and was very ably supported by a set of dedicated officers who spared no pains to push in the manuscripts to the press in a record time, unknown in the annals of this directorate so far.

As in the case of other aspects of census work connected with this gigantic decadal exercise, I always looked up to Shri P. Padmanabha, Registrar General & Census Commissioner, India, for guidance, inspiration and encouragement and I feel indebted to him. Shri N.G. Nag, Deputy Registrar General (Social Studies) was forthcoming in his unassuming and profound style for advice.

CHANDIGARH

September, 1982.

D.N. DHIR.
Director Census Punjab.

ACKNOWLEDGEMENTS

Preliminary work-collection, compilation and scrutiny of data relating to Village and Town Directory :

A cell was created in July, 1979 under J. C. Kalra, Deputy Director, who out of his earlier experience and the instructions as received from Registrar General, India, directed the collection of data and allied work. He was ably assisted by D. P. Jain, Charan Singh and Vishwa Mittar, Investigators on one occasion or the other. The Statistical Assistants, who laid down the work at the foundation level at that time consisted of Malkiat Singh, Munishwar Dutt, Joginder Singh and Pawan Kumar with co-operative efforts of number of Computors, namely Mohinder Pal, R. P. Pathak, Parkash Chand, Varinder Singh, Hardeep Kaur, Satya Arora, Harbeer Kaur and Asha Vashisht.

Primary Census Abstract included in this book-manual preparation at the Regional Tabulation Offices at Jalandhar, Patiala and Bathinda :

R. P. Tomar, R. K. Singh and S. P. Grover, Deputy Directors, were incharge of these tabulation offices respectively, and put in their best to conclude the work fairly ahead of the scheduled target. They were assisted by the Investigators, namely N. S. Bhadauria, Charan Singh and Ajit Singh Dhillon, respectively. The Statistical Assistants and Computors who worked in these RTOs were S.C. Bassi, Balbir Singh, Jai Dev and R. P. Singh at Jalandhar ; Tarsem Lal Garg, S. K. Joshi, H. S. Sudan, S. P. Goel and Varinder Singh at Patiala and Balwant Rai, Bhagirath Singh, Raghbir Singh, J. S. Negi and H. P. Sharma at Bathinda.

Preparation of Inset Tables, framework of Handbooks and their drafting :

Inset tables, appendices and allied tables were prepared in the specially created cell of 'District Census Handbooks' headed by S. P. Grover, earlier and later by Ajit Singh, Deputy Directors. They have had experience of such publications earlier and imparted suitable directions to the staff in the cell for presentation of the data and its analysis as per the instructions received from the office of Registrar General, India, from time to time. Charan Singh, Investigator, Balwant Rai, Raghbir Singh, Tarsem Lal, Statistical Assistants and Satya Arora, Santosh Kumari, Harbeer Kaur, M.K. Nagpal, and H.P. Sharma, Computors worked in this cell.

The cell provided the framework of the Handbooks and the first drafts were attempted by Deputy/ Assistant Dirctors who were entrusted with particular volume (s). This first draft was then finalised during discussions in officers meetings held almost daily with the Director. Thus the final draft emerged.

Maps :

The work for preparation of maps to be included in District Census Handbooks commenced under the supervision of Madhav Shyam, the then Senior Geographer, but mid-way was taken over by G. S. Gill, Assistant Director, who headed the map section during the vital period. He was ably assisted by Jiwan Singh Gill, Artist (now Senior Artist), Usha Kalra, Artist and Kulbir Singh, Draftsman. Because of his knowledge of geography and map work, he delivered the goods despite the absence of Geographer and Senior Geographer in the directorate.

Manuscript finalization :

The final draft (s) as emerging out of the deliberations of the officers were entrusted to a cell called as 'Press Manuscript Cell' headed by M. L. Sharma, Assistant Director who was actively assisted by K. P. Sharma Investigator & Sh. S. K. Joshi Statistical Assistant. They raced against time frequently to give final shape to the volume (s) for onward transmission to the press.

Typing :

K. C. Pardesi, Confidential Assistant (formerly Senior Stenographer) headed this cell. His knowledge of such publications earlier was an asset. He was assisted by Ajmer Singh, Stenographer and some of the other typists from the various seats in the directorate.

Printing :

This cell was headed by M. L. Sharma, Assistant Director, actively assisted by H. S. Sudan and S. K. Joshi. They drew upon the services of others in the directorate, whenever necessary.

To each one of them I acknowledge my thanks.

CHANDIGARH :
September, 1982

D. N. DHIR.
Director Census Punjab.

PS.

Shri M. S. Mahadeokar, Assistant Controller of the U. T. Printing Press co-operated in ensuring that the publication saw the light of the day at the earliest.

D. N. DHIR.
Director Census Punjab.

KAPURTHALA DISTRICT – A SHORT PROFILE

Formerly a princely state—the Kapurthala district, now one of the twelve districts of the Punjab State, lies in the Bist Doab, a tract between the rivers Beas and Sutlej. It is the only district which is split up into two with one of its three tahsils, viz Phagwara situated some 20 miles away, with Jalandhar district falling in between.

The district has 602 inhabited villages and 8 towns, namely Kapurthala, Phagwara, Sultanpur, (MCs.) Begowal, Bhulath, Dhillwan, Nadala and Talwandi Chaudhrian. (NACs.).

Location :

The district is located between 31°—08′ and 31°—37′ north latitude, and 74°—58′ and 75°—54′ east longitude. It is the smallest district of the State. Its main part, comprising the Kapurthala and Sultanpur Lodhi Tahsils, is 45 miles long and its breadth vary from 7 to 20 miles at different places. In the north it is bounded by the Districts of Hoshiarpur, Gurdaspur and Amritsar, in the west by the river Beas and District Amritsar, in the south by the river Sutlej and Jalandhar and Firozpur districts, and in the east by Jalandhar and Hoshiarpur Districts. The Phawgara Tahsil is surrounded on all sides by Jalandhar District except in the north-east where it has common boundaries with Hoshiarpur district.

Origin of the name :

The District takes its name from Kapurthala town which is its headquarters and was formerly the capital of the princely State. The town is said to have been founded in the early part of the 11th century in the time of Sultan Mahmood of Ghazni by Rana Kapur, a scion of the ruling Rajput House of Jessalmir.

Area :

According to the Surveyor General of India, the area of the district is 1,633 sq. kms. with the tahsil wise area indicated as per information from Director, Land Records, Punjab is given below:—

Tahsil	Area (sq. kms.) Total	Rural	Urban
1. Kapurthala	909·9	896·3	13·6
2. Sultanpur Lodhi	451·0	445·1	5·9
3. Phagwara	304·5	288·5	16·0

Climate :

The climate of the district is more or less typical of the Punjab plains, i.e., quite hot in summer and sufficiently cold in winter. The temperature begins to rise in March and goes on rising till the mercury touches or crosses 45.5C° in June. Hot winds blow over the land and become more and more dusty as the summer advances. The rainy season sets in by the first week of July and continues till about the end of September or sometime middle of October. During this period the temperature comes down considerably while it rains but shoots up again when the rain stops and the close, sultry and humid atmosphere becomes quite troublesome and unbearable. Floods and swamps are common in Kapurthala and Sultanpur Lodhi Tahsils particularly in the *bet* area. Towards the middle of Septemer or early October, the weather turns fine and by the end of October mild cold season sets in. November and December months are pleasant, generally free from rains. January and February are cold months and one may also experience mild rains then. Light frost may be experienced from about middle of December till about end of January. Towards the beginning of March the spring season sets in with the return of the pleasant weather.

Annul average rainfall varies from 55·49 cms. in 1970 to 68·30 cms. in 1980, as per the data from Director, Land Records, Punjab.

River and Drains :

The Beas river marks off the western boundry of the district. The two *Beins* pass through the district. *The White Bein*, which is the eastern one, runs for about 13 kms. in Phagwara tahsil till it touches the Uncha

village in Jalandhar district. It is joined by a number of small water courses, and taking south-westerly direction it empties itself into the Sutlej. *The Black Bein* which is the western one, enters the district from Dasuya tahsil of Hoshiarpur district and after draining the areas of Bhulath, Dhillwan, Kapurthala and Sultanpur joins the Beas river near Jaimnwala in Sultanpur Lodhi tahsil.

Topography :

The entire district is an alluvial plain. The major portion of Kapurthala and Sultanpur Lodhi tahsils lies in the riverain tract between the Beas and the Black Bein and is called *Bet*. It is visited by floods every year. A flood protection bund, named the Dhusi Bund, has been constructed along the left bank of the Beas river. It has greatly saved the area from the ravages of floods. Sugarcane, paddy and wheat the principal crops of this area are effected by water-logging and alkaline salts (*Kallar*). To the south of the Black Bein lies the tract known as *Dona* meaning the soil formed of two constituents, the sand and clay, though the sand predominates. Maize, wheat, cotton and groundnut are the other agricultural products. Well irrigation is common. The only mineral to be found in this district is *kankar* (calcarious nodules) which is used for road-making or is burnt for lime. Extensive cultivation in the district leaves no cover for wild life and they are practically non-existent. Pigeons, doves, crows, parrots, mainas, vultures, kite etc. are generally found.

Present jurisdiction :

Unlike the other districts of the state, Kapurthala district sparaingly underwent any territorial change in regard to its inter-district territory. It is to be noted that intra-district changes in respect of area did occur in Kapurthala district as in case of seven other districts of the state viz. Amritsar, Firozpur, Ludhiana, Hoshiarpur, Patiala, Sangrur and Bathinda.,—*vide* Punjab Government Notification No. 2891-RG-I-69/3323, dated 14th November, 1963 Kapurthala tahsil lost 215 villages and Sultanpur town (area 451·0 km.) to newly carved out Sultanpur tahsil.

Land utilisation Agriculture :

The economy of the district is still predominantly agricultural. The percentage of area under cultivation is 52.69. There has been a decrease in the uncultivated area and cultivable waste as compared to 1971 figures, indicating necessary catching up with the green revolution activities in the state. There has been depletion of the limited private forests but the Government's efforts for afforestation on the land available along the roads, canals, drains and railway lines has more than set off this small depletion ; recently there has been reversal in the outlook of the progressive farmers in so far as they are providing necessary chunks for grovelands in their own fields. The sale of timber has also become a more profitable proposition

The state canals and deep tube-wells systematically dug up under expert advice by the State Tubewell Corporation and other agencies provide the main sources of irrigation. The principal crops of the district are wheat, paddy and rice.

Animal Husbandry :

The district has a rich cattle wealth which includes bullocks and bulls, buffaloes, horses and ponies, donkeys and mules, sheeps and goats, etc.

Communications—Railways and Roads :

Kapurthala, Phagwara and Sultanpur are the three important railway stations of the district. Kapurthala is connected to Phagwara(via Jalandhar) and to Sultanpur by broad gauge railways. Again, Phagwara is connected with Jalandhar, Nawashahr, Ludhiana (via Phillaur) and Sultanpur (via Phillaur and Nakodar). Sultanpur is connected by broad gauge railway with Nakodar, Jogewala (via Lohian) and Kapurthala. The district is also being served by a good network of national and state highways in addition to district roads.

Amenities : Educational, Medical, Postal, Water Supply and Electricity :

96·34 per cent of the rural population in 478 (out of 602 inhabited villages in the district) villages are served with a primary school. There are 8 towns in the district, 5 out of which are being served by notified area committees (N.A.C.s). Begowal, Bhulath, Nadala and Talwandi Chaudhrian (N.A.Cs.) have no higher secondary/matriculation schools. All the five N.A.Cs. plus Sultanpur M.C. have no junior secondary/middle school but all the eight towns in the district have the facility of primary, secondary/matriculation schools. In addition, Kapurthala M.C. & Phagwara M.C. have also got junior secondary/middle schools. Similarly, Dhillwan N.A.C., Kapurthala M.C, Phagwara M.C. & Sultanpur M.C. are being served by higher secondary/inter/P.U.C./junior college alongwith secondary/matriculation & primary schools.

In matters of medical facilities, the district has 7 hospitals, 63 dispensaries and 6 primary health centres as on 1st April, 1981. There are 593 beds installed in all the institutions of the district out of which 330 beds are in hospitals, 40 beds in primary health centres and 223 beds in dispensaries. The beds in medical institutions per 1000 persons are relatively small i.e. only 2. Kapurthala M.C has one hospital with 125 beds, Phagwara has one hospital with 50 beds, and likewise, Sultanpur M.C. has one hospital with 50 beds. In 1979-80, there were 125 post offices and 6 telephone exchanges in the district.

All the inhabited villages and towns in the district are served by a chain of water-works to cater potable water to the inhabitants.

There is 100 per cent electrification in the district both in rural and urban areas.

Population and density :

With the density of population at 334 persons per sq. km. at 1981 Census, the increase in population during the decade 1971—81 was 26·95 per cent as against the state peeentage of 23·89. As on 1st March, 1981, the district had a population of 545,249 persons (287,286 males and 257,963 females).

In matters of sex-ratio i.e. number of females per 1000 males, it has recorded a slight improvement of 9 females raising the number from 889 in 1971 to 898 in 1981 as against the state sex-ratio of 879 for 1981 Census.

Rural and urban percentages of increase in population tahsilwise during the last decade i.e. 1971—81 are as below :—

Tahsil	Total	Rural	Urban
1. Kapurthala	26·62	12·64	102·63
2. Sultanpur Lodhi	28·39	21·86	69·56
3. Phagwara	26·78	18·91	38·08

Literacy :

The district enjoys good educational facilities. Out of 100 persons 44·85 are literates (the test being simple reading and writing only) as against 40.86 for the state as a whole. Literacy rate, i.e. literates per 100 persons among the males is 50·77 as against 47·16 for the state, and among the females it is 38·27 as against 33·69 for the state.

Occupations:

The number of workers per 100 persons has more or less continued to be the same over the decade, 28·57 per cent in 1981 as against 27·80 per cent in 1971. Some females have joined services in the district which had earlier not seen women at work either in the field or in an office. Their limited hold had then been on the girls' schools and female hospitals. Percentage of main workers to total population for 1981 is more than the State percentage in respect of females only, 2.39 per cent for the district as against 2.27 per cent for the State. Percentage of non-workers to total population is more for the district than the state as a whole, it being 70·34 per cent, 47·61 per cent and 95·66 per cent for persons, males and females respectively for the district as against 68·50 per cent, 46·24 per cent and 93·84 per cent for persons, males and females respectively for the state as a whole.

Trade & Commerce :

Situated in the heart of Punjab, the district is studded with flourishing mandis. Kapurthala, Phagwara and Sultanpur have good *Mandis*. Nakodar, Nurmahal, Phillaur, Jalandhar etc. of Jalandhar district are also the important nearby mandis.

The principal items of importance for import are: sugar, salt, kerosene oil, motor spares, metals, gunny bags. textiles, cotton, iron material, oil engine machinery, Kapurthala. Phagwara and Sultanpur serve as

the nucleus. Kapurthala imports iron material, sugar and vanaspati ghee etc. and exports electric goods, rice, leather goods and nylon belts etc. Motor springs, electric goods and rubber goods etc. are generally manufactured therein. Eleven banks, one agricultural credit and one non-agricultural society are serving the town. Phagwara town mostly manufactures cloth, sugar, starch and oil engine parts. Hence cotton, oil engine machine parts, steam coal and pig iron are mostly imported whereas cloth, starch and sugar & oil engine parts are exported. Nineteen banks and ten non-agricultural credit societies help the trade and commerce. Sultanpur town has factories mostly manufacturing generating sets, electric motors and agricultural equipment. Four banks, 6 agricultural credit and 2 non-agricultural credit societies are serving Sultanpur town Moreover, Begowal, Bhulath, Dhillwan, Nadala, Talwandi Chaudhrian (all N.A.Cs.) are *mandis* trading mostly in sugar, ghee, food grains, wheat, rice, paddy, cloth, oil and toria (rape-seed).

Industry :

Kapurthala district had 270 factories in1980 registered under various sections of the Factories Act,, 1948 out of which 260 were found working and provided employment on an average to 12,502 persons.

According to the Economic Census, 1980, there are 14,556 enterprises in the district which employ 51,590 persons, 5,298 of the enterprises employing 12,363 workers were located in the rural areas while 9,258 enterprises employing 39,227 workers are located in the urban areas.

Among the traditional crafts of the district are handloom weaving, leather tanning, calico printing-oil crushing by wooden *ghanis* and making of *gur* and shakkar, phulkaries, Jutis (desi-shoe), *ban*, *dari*, agri cultural implements and brass utensils . Out of them *phulkari* making and oil crushing by wooden ghanis have almost disappeared. The former because the work involves lot of labour, and the latter because of the urbanisation accompanied by mechanisation. For the manufacture of brass utensils, Phagwara was once famous but it has not been able to withstand to the competition from Jagadhari and Muradabad.

Maharaja Jagatjit Singh, last ruler of the Kapurthala state did a lot before independence, for the development of industries. It was during his reign that Kapurthala was connected by a railway line and a metalled road with Jalandhar, an important industrial centre. Electricity and land at cheap rates were made available near the railway station to the industrialists in addition to various other facilities such as relaxation in Income Tax in the initial stages. All this resulted in establishment of industries like the re-rolling mills and ice factories at Kapurthala and Phagwara, a tannery at Kapurthala, a distillery at Hamira, textile and sugar factories at Phagwara, a starch mill at Phagwara and a glass factory at Kapurthala. The tempo of industrial development got a fresh boost after the independence of India. Quite a large number of units came into existence in the line of steel re-rolling, electric and engineering goods, automobile spare parts, agricultural implements and tools and rubber products. About 95 per cent of the total industrial output of the district is confined to the Phagwara and Kapurthala towns.

It has 297 agricultural and 14,259 non-agricultural enterprises in which 538 and 51,052 persons respectively are usually working. As against this, 15,106 and 446,132 agricultural and non-agricultural enterprises with 27,489 and 1,259,358 workers respectively are reported for the state as a whole.

It was found that 972 enterprises were working without premises, 14,198 were running on perennial basis, 10,926 enterprises were running without power. 30,801 enterprises were owned privately and out of them 9,175 were owned by members of the scheduled castes. So far as the state is concerned, 43,020 enterprises were without premises, 439,452 on perennial basis, 361,714 without power, 401,143 privately owned and 58,162 were with the scheduled caste owners.

237 agricultural and 9,570 non-agricultural enterprises run on own account, 60 agricultural and 4,689 non-agricultural enterprises were such establishments as were seen with one or more hired workers, in all employing usually 123 in agricultural, 35,145 in non-agricultural establishments in the district. So far as the state is concerned, 10,480 hired persons were found usually working in agricultural establishments, 3,403 agricultural establishments were with one or more hired workers. 11,703 agricultural establishments were run on own account. Similalrly, 709,949 hired persons were usually working in non-agricultural establishments, 720,429 non agricultural establishments were having one or more hired workers, 327,917 non-agricultural establishments were being run on own account.

Historical/Important Towns :

Strictly from the historical point of view the only other important places apart from Kapurthala in the district are Phagwara and Sultanpur.

Phagwara Town :

Phagwara town is situated at a distance of 24 kms. towards south-east of Jalandhar on the main railway line from Amritsar to Delhi and the Grand Trunk Road.

It was founded in the reign of Shah Jahan and was held by a Hindu Jat until Maharaja Ranjit Singh captured it in 1804 and bestowed it upon Raja Fateh Singh of Kapurthala. It is the headquarters of the tahsil. It is one of the chief grain markets of the Doab; wheat, maize, paddy, *gur* and *Shakkar*, cotton seed and potatoes being the principal arrivals. It is also important for its Jagatjit Sugar Mills, Jagatjit Cotton & Textile Mills, Sukhjit Starch and Chemical Mills and several small units producing auto-parts, electrical goods, *tokas* (chaff cutting machines) and other foundary articles. In the sphere of education the Ramgarhia Educational Council is running a Polytechnic, a B.T. College, an Arts College, J.B.T. School, Higher Secondary School, a Middle School and a Primary School. The Phagwara College for Women has also been started. The Arya Samaj runs Higher Secondary School for Boys and the Sanatan Dharam Sabha maintains a Higher Secondary School for Girls. Besides there are Government Higher Secondary Schools, one for boys and the other for girls, associated with the name of the late Maharaja Jagatjit Singh.

Sultanpur :

It is situated at a distance of 26 kms. to the south-west of Kapurthala town. Its population which stood at 10,618 in 1941 came down to 7,733 in 1951 and 7,661 in 1961, while it went up to 9,176 in 1971 and 12,143 in 1981. On partition the Muslims of the place migrated to Pakistan. It is now the headquarters of Sultanpur *Lodhi* tahsil. Its market is noted for chillies, wheat and rice. Some rice shellers are working in the town. The town and its out-skirts are known for good variety of dates. Government has set up a centre here for the manufacture of *gur* and a cold drink called *neera*, from the juice of date trees. There are four secondary/matriculation schools, one stadium, one cinema and one public library in the town.

The places of historical interest in the town are the *Sarai* (perhaps of Sher Shah Suri's time) housing the police station, tahsil and courts, Baradari across the Bein. There are also tombs of two Muslim saints named Pir Gaib Gazi and Shah Sultan. The Bhiwani temple is also held in high esteem.

There are as many as 6 *Gurdwaras* at Sultanpur. Gurdwara Ber Sahib is having a Ber tree planted by Guru Nanak Dev. The Gurdwara was re-constructed by Maharaja Jagatjit Singh of Kapurthala Maharaja Yadvindra Singh of Patiala and Bhai Arjun Singh of Bagrian. Gurdwara Hat Sahib is associated with the place where Guru Nanak Dev worked as an employee of the Modi-Khana of the rulers of those days. Gurdwara Guru Ka Bag is the place where the Guru lived after his marriage. Gurdwara Antar Jatma is a small mosque where the Guru once accompanied the Sultan and Maulvi to their Namaz. Guru Sant Ghat is the place where the Guru appeared remaining under water in the Bein for three days. Other important gurdwaras are Kothari Sahib, Sehra Sahib, where the *Sehra Bandi* ceremony of Guru Hargobind was performed.

ANNEXURE

Jurisdictional changes—Kapurthala District

It remained unaffected

INTRODUCTION TO DISTRICT CENSUS HANDBOOK

Keeping in view the needs of planners, for exhaustive infra-structural and amenity data up to village level, required for micro-level planning, the formats of the village and town directory of 1981 DCH series have been redesigned and some new features useful for planning have been added while maintaining the comparability with 1971 data. A few new items of information such as adult literacy centres, primary health sub-centres, community health workers in villages, etc. have been introduced to meet some of the requirements of revised minimum needs programme. A new item 'approach to village' has been introduced to give an idea about the village in the district which are inaccessible. A new column 'Total population and number of households' has been introduced to examine the correlation of amenities with the population and number of housholds they serve. Two more appendices namely (i) listing the villages where no amenities are available and (ii) list of villages indicating ranges according to the proportion of scheduled castes to total population have been added with the same object in view. A significant addition in class of the town in all the six statements of the town directory which alongwith population and decadal variation since 1901 to 1981 will prove quite useful for analysing the infra-structure of amenities in the urban area of state.

Contents :

The 1981 DCH series have been divided into two parts. Part A contains village and town directory and Part B PCAs of villages and towns and PCA for scheduled castes upto tahsil/town levels. Both parts are being published in this volume.

The village directory contains information about total area of each village in hectares, total population and number of households, amenities/conveniences available in the village, staple food of the people and the land-use pattern. There is also information about the nearest town and its distance from the village and approach to the village.

The town directory presents data on each town with the aid of 6 statements giving the status and class of the town, the decadal population and growth rate since 1901—1981, physical and locational aspects, municipal finance and availability of amenities/facilities like medical, educational, banking etc. trade, commerce and industry.

. incorporates tahsilwise data for each village and each town/ward under the following heads:

Area in hectares/sq. kms,

) Number of occupied census houses,

(iii) Number of households,

(iv) Total population,

(v) Scheduled caste population (there is no scheduled tribe in Punjab State),

(vi) Literates

(vii) Main workers classified into four categories of cultivators, agricultural labourers, household industry and other workers,

(viii) Marginal workers,

(ix) Non-workers.

Maps :

The map of the district and a map for each tahsil of the district have been included.

The district map shows the district boundary and location of its headquarter, tahsil boundaries and location of its headquarters, national highway, state highway, important metalled roads, railway lines, river and streams, towns and census villages according to population size, post and telegraph offices, degree colleges and technical institutions, rest houses etc.

The tahsil map contains boundary of tahsil and location of tahsil headquarter, villages with location code numbers, villages with population size, uninhabited villages with location codes, urban areas, with location codes, roads, railways and service facilities such as post and telegraph offices,/higher secondary schools, hospitals etc.

Besides both the district and tahsil maps have an inset map where additions or loss of territory that has taken place during the decade, has been shown.

Sources

Whereas PCA contains census data, for compilation of villages and town directory the relevant schedules alongwith comprehensive instructions were sent to the revenue officers (for rural areas) and executive officers of municipal bodies (for urban areas) to be filled in at their end. The completed schedules were collected from the relevant quarters during the house-listing operations in April, 1980 by the staff of this directorate. The schedules were scrutinised at the directorate and the directories were compiled therefrom.

CENSUS CONCEPTS AND DEFINITIONS

Village and Town Directory

Rural-urban classification: The 1981 census data are being presented by rural and urban areas, as in the previous censuses.

As far as rural area is concerned 'village' has been adopted as the lowest census unit.

Rural Area: 'Village'

The definition of the village adopted in census is identical with that of 'mauza' given under section 3(1) of the Punjab Land Revenue Act, 1887. It is the 'revenue estate' determined as such for the purpose of levy and collection of the land revenue. The revenue estate is defined in the Act *ibid* as an area:

(a) of which a separate record of rights is maintained, or

(b) which has been separately assessed to land revenue, or would have been so assessed if the land revenue had not been realised, or compounded or redeemed; or

(c) which the State Government has otherwise declared as an estate.

The village is thus not merely the *abadi deh* (red lined area) for census taking but the entire land coming within the fixed boundaries of each village in terms of the Act *ibid.* There are 693 villages (including 91 uninhabited) in Kapurthala district.

Urban Area: 'Town'

The following definition of an 'urban' area has been adopted at the 1981 census which is analogous to the criterion adopted in 1961 and 1971 censuses with some minor variation (as indicated below):—

(a) All places with a corporation, minicipality or cantonment board or notified town area;

(b) All other places which satisfied the following criteria:

(i) a minimum population of 5,000;
(ii) at least 75 per cent of the male working population engaged in non-agricultural (and allied) activity; and
(iii) a population of at least 400 per Km^2 of (or 1,000 per square mile).

The urban criterion of 1981 census varies slightly from that of 1961and 1971censuses in that the males working in activities such as forestry, logging etc., were then treated as engaged in non-agricultural activity. It, therefore, contributed to the 75 per cent criterion in 1961 and 1971 censuses whereas in the 1981 census these activities have been treated as on par with cultivation and agricultural labour for the purpose of this criterion.

Prior to the 1961 census the definition of 'urban' area was somewhat liberal and a lot was left to the discretion of the local authorities. At the 1971 census, the state directors of census operations were also given discretion in marginal cases to include, in consultation with the state Government, a place that had other distinct urban characteristics, or to exclude an undeserving place from being treated as 'urban'.

Urban Area in Kapurthala District:

Five new towns namely Begowal, Bhulath, Dhillwan, Nadala and Talwandi Chaudhrian, all with N.A.C. status, were added to the district at 1981 census. Although State Government abolished NAC status of Bhulath and Nadala w.e.f. October, 1980, alongwith 14 other N.A. Cs these have been treated as urban area for the purpose of 1981 census, since it was decided to freeze the urban frame as on 30th September, 1980.

Urban Agglomeration (U.A.):

Apart from town/city (a town with a population of one lakh and above), in the 1981 census very often large railway colonies, university campuses, port areas, military camps etc., came up outside the statutory limits of the city or town but adjoining it. Such areas may not by themselves qualify to be treated as towns but if they form a continuous spread with the town they are outgrowths of the town and deserve to be treated as urban . Such towns together with their outgrowths have been treated as one urban unit and called 'urban agglomeration'.

An urban agglomeration may constitute:

(a) a city with continuous outgrowth (the part of outgrowth being outside the statutory limits but falling within the boundaries of the adjoining village or villages);

(b) one town with similar outgrowth or two or more adjoining towns with their outgrowth as in (a); or

(c) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Urban Agglomeration in Kapurthala District:

Kapurthala district has got only one Urban Agglomeration (U.A.) consisting of Phagwara MC, Mohalla Gobindpura and Kot Rani (both O.Gs).

Standard Urban Area (S.U.A.):

A new concept of standard urban area (SUA) as introduced in 1971 census was also followed for the 1981 census. The essential requirements for the constitution of a standard urban area are:

(i) it should have a core town of a minimum population of 50,000;

(ii) the contiguous 'area' made up of other urban as well as rural administrative units should have mutual socio-economic links with the core town; and

(iii) in all probability this entire area should get fully urbanised in a period of two or three decades.

Certain SUAs were determined on this basis in 1971 and some basic data were presented for 1951, 1961 and 1971 for such areas and their components. Similar data are being presented for the SUAs in 1981 also. The idea is to present basic data for these areas for four to five decades so that the urbanisation process in those areas can be studied.

Standard Urban Area in Kapurthala District:

In Kapurthala district, Phagwara was the only urban area having a population above 50,000 as at 1971 census and SUA was delineated around Phagwara Municipal Committee. This SUA continued for 1981 census also with urban component of (a) Phagwara Municipal Committee (b) Mohalla Gobindpura and Kot Rani (both out growths—OGS) and the rural component comprising the following villages:—

Name of SUA	Rural Component with Hadbast Numbers	
Phagwara	Khangura	(76)
	Chak Hakim	(75)
	Hajipur	(62)
	Mehat	(89)
	Narang Shahpur	(90)
	Dhak Man	(96)
	Thakarki	(99)
	Sadarpur	(100)
	Khera	(101)
	Nangal	(102)
	Chachoki	(103)
	Phagwara Sharki	(73)

DEMOGRAPHIC CHARACTERISTICS BASED ON ANALYSIS OF INSET TABLES (PRIMARY CENSUS ABSTRACT)

Population:

Table 1 gives sexwise population for total, rural and urban areas, number of total and inhabited villages and towns at 1981 Census. The district has a populaion of 545, 249 persons (287,286 males and 257,983 females). Nearby 29.97 per cent of the population of the district lives in its urban areas compared to 27.68 per cent of the state as a whole. Tahsilwise Kapurthala has urban component of 24.85 per cent which is lower than the proportion of the state urban population. The other two tahsils of Sultanpur and Phagwara have the urban component of 18.07 and 44.73 per cent, respectively.

Sex Ratio :

The sex-ratio for the district is 898 females per 1000 males as against the corresponding state figure of 879.

Growth Rate :

Table 2 shows change in population during the last decade 1971—81 for the district and its tahsils. The district has shown a growth rate of 26.95 per cent as against the state growth rate of 23.89 per cent. rural growth rate is 15.76 per cent and the urban growth rate is 63.96 per cent. The highest urban growth rate (102.63 per cent) has been recorded by Kapurthala tahsil and the lowest (38.08 per cent) by Phagwara.

Villages :

Table 3 gives the distribution of villages according to population ranges.

The district has 602 inhabited villages and 8 towns. There is preponderance of villages with population less than 200, their number being 169 and the proportion of such villages being 28.07 per cent of the total inhabited villages of the district. There are 28 (4.65 per cent) villages with population ranging from 2,000—4,999 whereas villages with population 5,000 or more are conspicuous by their absence.

Density :

Density of the population in the district works out to 334 persons per sq. km. which is higher than that for the state (333 per sq. km.). Density of population of the district was 263 persons per sq. km. in 1971. Table 4 indicates the distribution of villages by density. It shows that 129 (21.43 per cent), villages have a density ranging between 301 to 500, this being the highest, whereas there are only 20 (3.32 per cent) villages in the density range 11—20 which happens to be the lowest number.

Scheduled Caste Population :

The district has relatively a high percentage of scheduled caste population i.e. 26.99 per cent compared to 26.87 per cent for the state as a whole.

Table 5 gives proportion of scheduled caste population in inhabited villages.

Majority of villages i.e. 244 (40.53 per cent) have scheduled caste population above 30 per cent, 120 (19.93 per cent) have a scheduled caste population ranging between 21 to 30 per cent, the remaining villages of the district have, however, scheduled caste population below 21 per cent.

Table 6 gives proportion of scheduled caste population in urban centres. As compared to rural areas, the urban areas have substantially lower proportion of scheduled caste population which constitutes 18.24 per cent of the total urban population. In absolute numbers, Phagwara M.C. has the largest number of scheduled caste population (16749) and Begowal NAC has the lowest number (525). As proportion of scheduled caste population to total population, Talwandi Chaudhrian N.A.C. has the highest (28.40 per cent) and Begowal NAC the lowest (7.78 per cent). There is no scheduled tribe population in Punjab state. A tahsilwise study of scheduled caste population can also be made from table 9.

Literacy :

Only 44.85 per cent population of the district is literate (a person is defined as literate if he/she can at least read and write a letter with understanding) as against the state percentage of 40.86. The male literacy rate is 50.77 per cent and the female literacy rate is 38.27 per cent. Phagwara tahsil has the highest literacy rate (51.27 per cent) and Sultanpur has the lowest (38.54 per cent) literacy rate. The literacy rates for the

rural and urban areas of the district respectively are 40.25 and and 55.61 respectively. Tahsilwise literacy rates for total, rural and urban and for persons, males and females can be examined from Table 9. Table 7 gives literacy rate by population ranges of the villages.

Table 8 gives literacy rates for towns. It shows that the highest literacy rate of 58.31 per cent has been recorded for Kapurthala M.C. followed by Phagwara M.C. (58.09 per cent) and Sultanpur M.C. (54.84 per cent). The lowest literacy rate of 39.02 per cent has been returned from Talwandi Chaudhrian NAC.

Working Population :

Table 9 shows that the main workers constitute 28.57 per cent of the total population of the district. There are 52.07 per cent male workers and only 2.39 per cent female workers. Of the total working force, 35.32 per cent of workers are engaged in agriculture as cultivators and 18.14 per cent as agricultural labourers.

BRIEF ANALYSIS OF THE VILLAGE AND TOWN DIRECTORY

VILLAGE DIRECTORY

Amenities available in the village :

In the annexures immediately following this note, distribution of villages according to availability of different amenities/facilities has been indicated in table 10 while table 11 indicates the proportion of rural population served by these amenities and table 14 indicates the distribution of villages according to population range and amenities available. Table 13 indicates the distribution of these villages according to the distance from the nearest town and availability of different amenities.

Table 12 sums up the number of villages where particular amenities are not available within the jurisdiction of the villages and the distance ranges where the inhabitants of these villages avail them.

Amenity-wise analysis reads below :

(i) **Educational facilities :**

Of the total 602 inhabited villages in the district, 478 (79.40 per cent) with a population of 96.34 per cent of the rural population of the district are equipped with the facility of at least having a primary shcool. 51 villages; 55 villages; and 18 villages are devoid of this facility in Kapurthala, Sultanpur and Phagwara tahsils of the district respectively.

(ii) **Medical facilities :**

130 out of 602 inhabited villages, i.e., 21.60 per cent of total villages have at least one of the medical institutions,viz,. hospital, maternity and child welfare centre, health centre, primary health centre, dispensary, family planning centre and the like. The proportion of villages enjoying one or more of the medical facilities are highest in Phagwara tahsil 29.52 per cent and lowest (14.94 per cent) in Sultanpur tahsil. Of the 472 villages of the district which do not have any medical facility available for their population, for 271 the amenity is available within a radius of 5 kms, for 135 within the range of 5-10 kms but the inhabitants of the remaining villages have to cover a distance of more than 10kms. to avail of the medical facility. The percentage of villages 66 enjoying the medical facilities is the highest (25.47%) among the villages situated within a radius of 5 kms. For villages lying in the distance range of 6-15 kms. the percentage is 21.12. Thus it becomes apparent that lesser the distance from the nearest town, the more is the availability of medical facility for the population of the component villages.

(iii) **Drinking water facility :**

All the 602 inhabited villages of the district invariably enjoy the drinking water supply. The main source of drinking water is hand pump supplemented by well tube well. In villages where drinking water was scarce, tapped water supply was made available.

(iv) **Communications :**

The rural population of 199 (33.06%) villages with 48.28 per cent population is served by public transport system. 403 villages do not have any facility of communication within the territorial jurisdiction of the village. Out of these 403 villages, 270 can avail of this facility after commuting a distance within a 5 km. 110 between 5—10 kms and 23 more than 10 kms. According to population range of villages, 20.60 per cent of the villages fall in population range of less than 500; 47.28 per cent fall in population range of 500—1999 ; and 60.71 per cent fall in the population range 2000—4999 which have the communication facility.

(v) **Approach by pucca road :**

Of all the 602 inhabited villages in the district, 60.30 per cent, covering a population of 68.73 per cent, have been connected by a pucca metalled road and are, therefore, accessible both in fair and foul weather. Tahsilwise the villages connected by metalled road are Kapurthala (53.42%), Sultanpur (87.67%) and Phagwara (89.94%). The percentage of villages connected by pucca road which have an urban centre within a radius of 5 kms. comes to 63.98 per cent and those of within a distance range of 6—15 kms. 59.09 per cent. This shows that proportion of villages having pucca road has inverse correlation with distance range from the nearest town, i.e. higher the distance from the nearest urban centre, lower is the proportion of villages connected by pucca road. The proportion of villages connected by pucca road

in population range 2000—4999 is 82.14 per cent. This proportion is 69.04 per cent for villages in the population range of 500—1999 and 52.24 per cent for population range less than 500.

(iv) **Post and Telegraphs facilities** :

Out of the total 602 inhabited villages 99 (16.45%) have the facility of post and telegraph. Tahsilwise the percentages of villages enjoying the facility are 15.79 in Kapurthala, 8.05 in Sultanpur and 32.38 in Phagwara are enjoying the facility of Post and Telegraph. The Proportion of population to whom post and telegraph facilities are available in the district is40.44% the proportion being highest in Phagwara tahsil i.e. 54.71 per cent followed by Kapurthala (39.66 per cent) and Sultanpur (23.86%). Of the 503 villages, not enjoying this facility the people of 365 village have to commute a distance less than 5 kms, 117 villages between 5—10 kms and 21 villages more than 10 kms. Again out of 99 villages which are availing the benefit of post and telegraph facilities, the maximum (57) number of these villages, i.e., 15.24 per cent have an urban centre at a distance of 6—15 kms, 31 (19.26 per cent) at a radius of 5 kms and 11 (16.42 per cent) with a distance range of 16.50 kms. Further67 (28.03 per cent) villages in the population range of 500—1999 and the 22 villages in the population range 2000—4999 enjoy this facility, whereas only 10 (2.99 per cent) villages in the population range below 500 enjoy the facility.

Power supply :

All the villages of the district have invariably got the facility of power supply. The State has since been hundred per cent electrified.

Land use pattern in the district :

The land use pattern is depicted in Table 15. The table reveals that 78.46 per cent of the total area of the district is under cultivation. Tahsilwise Kapurthala has the highest percentage of cultivated area, i.e., 81.38 per cent, closely followed by Phagwara (80.91 per cent) and Sultanpur (71.15 per cent). The proportion of irrigated area to total cultivable area in the district is 81.37 per cent. Tahsilwise Phagwara has the highest percentage of irrigated area, i.e., 84.87 per cent closely followed by Kapurthala (83.69 per cent) and Sultanpur (73.54 per cent). The State canals and tubewells are the main sources of irrigation in the district.

Miscellaneous : cropping pattern and markets :

Apart from harvesting wheat, maize, rice which constitute the staple food of the people in the whole of the district, some areas are also cultivated under the cash crops such as cotton, sugarcane, etc. There are mandis at about 20 kms distance from each other which serve as the nucleus for purchases and sales by the local inhabitants. Their expansion is a testimony to the fruits of the green revolution being enjoyed by the farmers.

TOWN DIRECTORY

Urban population :

Table 16 to 20 appended to this note deal with this section.

Table 17 shows growth, density and sex-ratio of Urban population in the disrtict in relation to the state for 1981 Census and the preceding three censuses i.e. 1971, 1961, and 1951. The 1981 census reveals that 29.97 per cent of the population of the district lives in the urban areas as compared to 27.68 per cent of the state as a whole. The urban componant of the population in the district increased by 6.76 per cent from 23.21 per cent in 1971 to 29.97 per cent in 1981. The corresponding figures for the district and the state at 1971, 1961 and 1951 are 23.21 , 23.04 and 21.83 for the district as against 23.73, 23.06 and 21.72 for the state respectively.

Growth rate :

The district shows a decennial population growth rate of 63.96 per cent in the urban areas for 1981 as compared to 44.51 per cent for the state. During the previous decade, the district recorded an urban growth rate of 25.82 per cent as against 25.27 per cent for the state and during the decade 1951—61, the district recorded a growth rate of 23.04 per cent as compared to 29.06 per cent for the state. During 1971—81 there was tremendous growth rate of 63.96 per cent which is mainly attributed to fast economic development of Phagwara, Sultanpur and Kapurthala towns.

Density :

The district has recorded at 1981 Census an urban density of 4603 persons per sq. km as against 3875 for the state. The corresponding urban densities for the district during 1971, 1961 and 1951 were 2,402, 1594 and 1056 as against 4648 & 4090 respectively for the state. The density of the district has shown an increase of 2201 persons per sq. km. in 1981 compared to 1971 although there was an increase in density by 808 persons per sq. km. during the previous decade 1961—71.

Sex-ratio :

The urban population of district has recorded a sex-ratio of 850 in 1981, 840 in 1971, 853 in 1961 and 856 in 1951 as compared to 865, 856, 817 and 807 at the corresponding census years for the state. There is a consistent decrease in the urban sex ratio during 1961, 1971 but there was an increase of 10 females for 1000 males at 1981.

New towns :

This relates to imformation of new town(s) and declassified town(s) during the decade. In Kapurthala district, no town from those existing at 1971 census has been declassified. Five new towns of Begowal, Bhulath, Dhillwan, Nadala and Talwandi Chaudhrian with 1981 Census population of 6744, 4926, 5320, 4608 and 3416 respectively at 1981 census were added to the district during the decade for 1971—81 Census.

Budget of the Towns :

Table 18 relates to the budget of towns. Kapurthala district has 8 towns, two with class II status viz. Kapurthala MC and Phagwara MC; one with class IV status viz. Sultanpur, two with class V status viz. Begowal and Dhillwan (NAC) ; and three with class VI status viz. Bhulath, Nadala and Talwandi Chaudharian NAC. Information regarding the budget has not been reported from all the five N.A.Cs. of Begowal, Bhulath, Dhillwan, Nadala, and Talwandi Chaudhrian. Out of the remining 3 towns of Kapurthala, Phagwara and Sultanpur, which happen to be MCs and for which relevant information has been received, total receipts are more than the total expenditure. The highest per capita receipt of Rs 79.57 is recorded for Sultanpur M.C. and the lowest Rs. 64.74 for Phagwara M.C., whereas for Kapurthala M.C. total per capita receipt is reported as Rs. 67.43. The receipt through taxes forms the main source of revenue in respect of Kapurthala and Phagwara, whereas the position in Sultanpur is quite reverse. On expenditure side, the highest per capita expenditure (Rs. 78.21) has been recorded in respect of Sultanpur M.C. and the lowest Rs. 60.14 for Phagwara M.C. However in between these two limits lies the Kapurthala M.C. for which Rs. 63.44 has been reported as per capita expenditure. The main heads of expenditure are the public work, Public health and conveniences, General administration etc.

Social amenities—Educational :

Table 19 depicts higher secondary, secondary/matriculation, Junior secondary/midddle and primary schools per 10,000 population. The table reveals that only Dhillwan NAC Kapurthala MC, Phagwara MC, and Sultanpur MC, have got higher secondary or an equivalent school(s), and of these four towns, proportion of

such schools per 10,000 population is highest (1.88) fo- Dhillwan (NAC). Higher secondary or an equivalent school(s) are not reported for Begowal, Bhulath, Nadala and Talwandi Chaudhrian (all these towns happen to be N.A.Cs). Secondary/matriculation schools are reported in all 8 towns of the district, the proportion of such schools per 10,000 population being highest for Sultanpur (3.29%) colsely followed by Begowal NAC (2.97%), and Talwandi Chaudhrian NAC (2.93%). Tne Phagwara M.C. has the lowest figure (0.79). with Kapurthala M.C. (0. 80%) and slightly better figure Proportion of Junior secondary/middle schools per 10,000 population has been reported only for Kapurthala MC (2.98%) and Phagwara MC (0.39%) whereas existence of such schools in the remaining 6 towns has not been reported. Proportion of primary schools per 10,000 population has been reported as the highest for Nadala NAC (4.34%) closely followed by Kapurthala MC (3.98%) and the lowest for Begowal NAC 1.48%).

Medical facilities :

Table 20 gives the distribution of total number of beds per 1,000 population in medical institutions available for each town of the district. The number of beds per 1,000 population has been taken as the criterion for determining the extent of medical facilities. The table reveals that number of beds in medical institutions per 1,000 population is the highest in case of Sultanpur M.C. (4·12 beds) and lowest in case of Phagwara M.C. (one bed at the most) whereas the number of beds in medical institutions per 1,000 population for the district is reported as 1.69.

Slum population in towns :

In Punjab state, no slum area has been notified, although certain pockets have separately been identified.

TABLE 16

PART XIII-A

VILLAGE AND TOWN DIRECTORY

SECTION-I
VILLAGE DIRECTORY

6(iii) : NOTE EXPLAINING THE CODES USED IN THE VILLAGE DIRECTORY

The village directory containing information about each village had been prepared for each tahsil in the ascending order of the census location code numbers, e.g., location Code No. 17/11/3/22 means village No. 22 in tahsil No. 3 of district No. 11 of the state No. 17. It contains information relating to total area of the villages in hectares, total populatoin, No. of households, amenities available in the village i.e., educational, medical, drinking water, posts and telegraphs, communcation, approach to village, nearest town and distance (in kms.), and power supply. Besides it gives information regarding staple food, land-use i.e. area under different types of land use like forest, irrigated and unirrigated, cultivable and uncultivable land. This is further supplemented by the information on places of religious, historical and archaeological interest as also information on copies of newspaper coming in the village and number of motor cycles/scooters, cars/jeeps and tractors available in the village.

Information about the amenities available have been given in the columns 5 to 10 of the directory.

(i) Educational facilities have been shown by adopting the following abbreviations :

P	=	Primary school
M	=	Junior Secondary or middle school
H	=	Matriculation or secondary school
PUC	=	Higher secondary/intermediate/pre-university/Junior college.
C	=	College (Graduate level and above) like Arts, Science, Commerce etc.
I	=	Industrial school
Tr	=	Training school
AC	=	Adult literacy class/centre
O	=	Other educational institutions. These may include Sanskrit Pathshalas, Senior Basic School, Maktab etc.

Where figures like P (3), M (2) H etc., occur these denote that the village has three primary, two middle and one matriculation or secondary school.

(ii) Medical facilities have been shown by the use of the following abbreviations :—

H	=	Hospital
MCW	=	Maternity and child welfare centre
MH	=	Maternity home
CWC	=	Child welfare centre
HC	=	Health centre
PHC	=	Primary health centre
PHS	=	Primary health sub-centre
D	=	Dispensary
FPC	=	Family planning centre
TB	=	TB clinic
NH	=	Nursing home
RP	=	Registered private practitioner
SMP	=	Subsidised medical practitioner
CHW	=	Community health worker
O	=	Others

Number of institutions, if more than one in any village, have been given in brackets against each.

(iii) The types of the potable drinking water supply and the sources available in the village have been indicated by the following codes :

T	=	Tap water
W	=	Well water
TK	=	Tank water
TW	=	Tubewell water
HP	=	Hand pump
R	=	River water
F	=	Fountain
C	=	Canal
L	=	Lake
S	=	Spring
N	=	Nullah
O	=	Others
NA	=	Information not available

(iv) Post & telegraph facilities have been shown by adopting the followng abbreviations :

PO = Post office
TO = Telegraph office
PTO = Post and Telegraph office
Phone = Telephone connection

(v) Communication facilites have been indicated by the following codes :

BS = Bus stop
RS = Railway station
NW = Navigable waterway (including river, canal, backwaters, etc.)

Only public transport like, bus, rail and water way have been considered for this purpose.

(vi) Approach to Village

This refers to the state of road etc. leading to the village.

This has been indicated by the use of following codes :

PR = Pucca road
KR = Kaccha road
NR = Navigable river
NC = Navigable canal
NW = Navigable waterway (other than river or canal.)

(vii) Nearest town and distance

The distance in kms of the nearest town (whether located in the state or in another state) has been given in brackets uhder colunm 12.

(viii) Power Supply

For this purpose, the following codes have been used under column 13 :

ED = Electricity for domestic purpose
EAg = Electricity for agriculture
EO = Electricity for other purpose like industrial, commercial, etc.
EA = Electricity for all purposes listed above.

Information relating to places of religion, historical or archaeological interest is given under column 20 (a). Informatiom on copies of newspaper coming in the village (N) motor cycles/scooters available in the village (M), cars/jeeps available in the village (C), and for tracrors available in the village (T) is also furnished under column 20. The numeral following the alphabet indicates the number of newspapers, motor cycles etc. Uninhabited villages and the villages that have got merged in towns have also been shown under column 20(a).

(ix) **Land use**

Break-up of area under different type of land use viz. forest, irrigated area, unirrigated area, culturable waste and areas not available for cultivation has been furnished under columns 15-19.

(a) Forest:

This includes all lands classed as forests under any legal enactment dealing with forests or administe - red as forests, whether state-owned or private, and whether wooded or maintained as potential forest land, The area of crops raised in the forest and grazing lands or areas open for grazing within the forest should remain included under the forest area. If any portion of such land is not actually wooded but put to some agricultural use, that portion is inclueded under the appropriate heading of cultivated or uncultivated land. In some cases there are instances where patches of land put to agricultural use within statutory notified forests are considered as forests by the revenue agency. These are treated as forests.

(b) Irrigated and unirrigated (land use) :

These two columns (cols. 16 and 17) cover all agricultural land and include net area sown with crops and orchards or net cropped area and also current and other fallows. The latter implied all lands which were taken up for cultivation, but are temporary out of cultivation for a period of not less than a year and more than five years. The column do not include gross area sown or gross cropped area. Net area sown thus represents the area sown with crops and orchards, counting areas sown more than once in the same year only once.

(c) Culturable waste :

This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once, but not cultivated during the five years or more in succession. Such lands are either fallows or covered with shrubs and jungles. which are not put to any use. These have been assessed or unassessed and are in isloated blocks or within cultivated holdings. Lands under thatching grasses, bamboo, bushes and other groves for fuels, etc., which are not included under orchards or forests also come under this head. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area have been included in this column.

(d) Area not available for cultivation :

This column (Col. 19) includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use.

Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water, e.g., rivers and canals and other lands put to uses other than agricultural.

Barren and unculturable lands cover all barren and unculturable lands, like mountains, deserts, etc. land which cannot be brought under cultivation, except at a very high cost, has been classified as unculturable whether such land is in isolated blocks or within cultivated holidings.

	65	115	Phagwara Sharki (73)

SECTION II

TOWN DIRECTORY

NOTE EXPLAINING THE CODES USED IN THE TOWN DIRECTORY

The town directory has been compiled in six different statements for all the urban areas of the district. The data on amenities and other aspects have been presented in codes which are explained below:—

STATEMENT I

Statement I gives status and growth history of each town in the district.

Class has been introduced in all the statements of town directory to facilitate analysis for purposes of demographic and socio-economic characteristics of towns at the state and all India levels. It has been presented according to 1981 census population of the core town in the following manner :

Population	Class
100,000 and above	I
50,000—99,999	II
20,000—49,999	III
10,000—19,999	IV
5,000—9,999	V
Below 5,000	VI

The civic administration status as in 1980 has been indicated by the following abbreviations. Census towns are regarded as having no civic status. Code (C.T.) has been used for census town :

Municipal Corporation	= M. Corp.
Municipal Committee	= M.C.
Cantonment Board	= C.B.
Notified Area Committee	= N.A.C.
Census Town (S.A.S. Nagar-Mohali and Talwara)	= C.T.

STATEMENT II

Statement II gives for each town, physical aspects and location of towns.

STATEMENT III

This statement gives municipal finance for each town of the district.

STATEMENT IV

It gives civic and other amenities. The abbreviations used are indicated below:—

(i) Road length

PR = Pucca Road
KR = Kuccha road

(ii) System of sewerage

S = Sewer
OSD = Open surface drains
BSD = Box surface drains
SD = Sylik drains
CD = Cesspool method
PT = Pit system

(iii) Method of disposal of night soil

HL = Head loads
B = Baskets
WB = Wheel barrows
ST = Septic tank latrines
S = Sewerage

(iv) Protected water-supply source and capacity of storage systems

(a) Source of water supply:—

TW	=	Tubewell water/ hand pump
T	=	Tap water
W	=	Well water
TK	=	Tank water

(b) System of storage of water :—

OHT	=	Overhead tank
Sr	=	Service reservoir
RIG	=	River infiltration gallery
BWP	=	Borewell pumping system
PT	=	Pressure tank

STATEMENT V

This gives medical, educational, recreational and cultural facilities. The abbreviations used are indicated below :

Medical amenities

H	=	Hospital
D	=	Dispensary
HC	=	Health Centre
FC	=	Family Planning Centre
TB	=	TB clinic
NH	=	Nursing home
O	=	Others
A	=	Ayurvedic
U	=	Unani
Hom	=	Homoeopathic

In case of allopathic, no separate code has been given. The information in col. 4 on medical facilities has been presented horizontally in the same line as illustrated below:—

H(A-1, 2) D(Hom-2, 1, U-1)

Here H(A-1,2) represents one ayurvedic and 2 allopathic hospitals and D(Hom-2, 1, U-1) represents 2 homoeopathic, one allopathic and one unani dispensaries. If the medical facility is not available in a town, name of the nearest place (if in the same district) or nearest district (if in the same state) or other state and its distance from the town where the facility is available has been mentioned in column 4.

Educational amenities:

The codes that have been used are as follows :—

A	=	Arts only
S	=	Science only
AS	=	Arts and Science only
C	=	Commerce only
AC	=	Arts and Commerce only
ASC	=	Combined for all categories, Arts, Science and Commerce.
L	=	Law
SH	=	Shorthand
Type	=	Typewriting
Sh. Type	=	Shorthand and Typewriting
O	=	Others
P	=	Primary schools
M	=	Junior secondary or middle
H	=	Matriculation or secondary
PUC	=	Higher secondary/intermediate/pre-university/junior college '10+2' system whether held in school or college

If there are more institutions of a type in the town, their number has been given against each in brackets.

If any educational facility is not available in the town the name of nearest place (if in the same district) or the name of nearest district (if in the same state) or other state and its distance from the town where this facility is available has been given in brackets.

Recreational and cultural facilities

The following codes have been used ;—

PL = Public library

RR = Reading room

STATEMENT VI

This gives information on trade, commerce, industry and banking for each town of the district.

APPENDIX

Appendix to the town directory shows towns of the district which have outgrowths and population of outgrowths.

PART B

Primary Census Abstract (General)

Primary Census Abstract (Scheduled Caste)

PART B
EXPLANATORY NOTE ON PRIMARY CENSUS ABSTRACT

The Primary Census Abstract (PCA) General and Scheduled Caste provides the basic information relating to population data pertaining to 1981 census. It contains the data in respect of area, number of occupied residential houses and households, total population (including institutional and houseless population), population break up by sex, scheduled castes, literates, main workers classified into four categories of cultivators, agricultural labourers and other workers, marginal workers and non-workers for each village and for each town ward-wise.

The district totals given at the beginning of the PCA are followed by break up of rural and urban areas of the district. The data are presented tahsilwise.

The rural PCA presents the data for the villages arranged in ascending order of location code numbers (assigned to the villages within the tahsil). The urban PCA presents wardwise data for each town. In rural PCA, the uninhabited villages and the villages which have got merged in towns have also been indicated. It may be mentioned here that the PCA data provided here has been compiled on the basis of the basic schedules i.e., household schedule and the universal individual slip canvassed during 1981 census operations. The concepts and terms occurring in the PCA are briefly explained here.

Census House :

A census house is a building or a part of a building having a separate main entrance from the road or common courtyard or staircase etc., used or recognised as a separare unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

Occupied Residential House :

Occupied residential house is a dwelling house and include a house used partly as a dwelling and partly for some other purpose like shop, workshop, factory, etc., but does not include a 'vacant house' where no person was found to be residing at the time of census.

Household :

A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. Examples of unrelated households are boarding houses, messes, hostels, residential hotels, rescue homes, Jails, *ashrams* etc. These are called 'institutional households'. There may be one member households, two member households or multi member households. For census purposes, each one of these types is regarded as a 'household'.

Another type of household for census purpose is houseless household which is a household comprising of 'houseless person/persons'. A houseless person in census terminology has been defined as :

(i) a person who might be doing domestic service or other work with one or more households but who does not reside in any house and sleeps in the corridors, verandahs or passages in buildings or in the streets;

(ii) wandering or nomadic tribes found to be staying in temporary huts etc. ; and

(iii) beggar, vagrant, tramp, sadhu, fakir, etc., who is found on the footpaths, streets, in places like parks, gardens, railway yards, etc.,

Scheduled Castes are such castes, races or tribes or parts of groups within such castes, races or tribes as are declared to be scheduled castes by the President of India's orders issued under Article 314 of the Constitution of India.

Literate :

A person who can both read and write with understanding in any language has been taken as literate. A person who can merely read but cannot write, has not been considered as literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

All children of the age of 4 years or less have been treated as illiterate even if the child has been going to a school and might have picked up reading and writing a few odd words.

Workers and Categories of Workers :

Work may be defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work.

In the economic questions, canvassed in 1981 census, there has been some difference. The 'work' concept in 1961 and 1971 censuses, as opposed to the 'income' or 'economic independence' concept of the earlier censuses was adopted for 1981 census, but the criterion for classification of persons as workers was changed. While in 1961 and 1971 censuses different approcahes, namely, usual status and current status, were adopted with reference period of one year and one week for seasonal and regular work respectively, at the 1981 census the usual status approach was adopted uniformly for all work.

In 1961, a person qualified as worker if he had worked regularly during the last season or if he had worked at least for a day in regular (non-seasonal) work during the preceding fortnight. At the 1971 census a person was treated as a worker only if he spent his time mainly in work or if he worked at least for a day in regular (non-seasonal) work during the preceding week. The dichotomy of worker/non-worker of 1961 and 1971 censuses was discarded at the 1981 census and instead a trichotomy of main workers, marginal workers and non-workers was adopted. For main worker the time criterion of engagement in work for the major part of the year, i.e., at least 183 days was adopted. Those who worked for some time during the last year but not for the major part were treated as marginal workers. Those who had never worked during the last year were non-workers. This trichotomy partially permits a comparability of 1981 census economic data with that of 1971 as well as 1961. The main workers of 1981 census can be expected to correspond to the workers of 1971 and the main workers and marginal workers of 1981 together correspond to the workers of 1961.

Classification of Main Activity :

The main activity of workers has been classified into four categories, viz., cultivator, agricultural labourer, household industry and other worker. These terms are explained below :

Cultivator :

For purposes of the census, a person has been considered working as cultivator if he or she has been engaged either as employer, single worker or family workers in cultivation of land owned or held from private persons or institutions for payment in money, kind or share. Cultivation included supervision or direction of cultivation. It has been indicated by abbreviation 'C'

Agricultural Labourer :

A person who worked in another person's land for wages in money, kind or share has been regarded as an agricultural labourer. He/she had no risk in the cultivation but he/she merely worked in another person's land for wages. An agricultural labourer had no right of lease or contract on land on which he/she worked. It has been indicated by abbreviation 'AL'.

Household Industry :

Household industry has been defined as an industry conducted by the head of the household himself/herself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lived in urban areas. The larger proportion of workers in a household industry constituted of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act.

For a person who has returned his/her main activity as engaged in some production, processing, servicing or repair of articles or goods such as handloom weaving, dyeing, carpentry, *bidi* rolling, pottery manufacture, bicycle repairing, blacksmithy, tailoring, etc., it has been ascertained if it is a household industry, and if so, it has been indicated by the abbreviation 'HHI' in the space provided for.

Other Workers :

All workers, i.e., those who have been engaged in some economic activity during the last one year have not been categorised as cultivators or agricultural labourers or in household industry, are 'other workers' 'OW'. The type of workers that come under the category 'OW' include factory workers, plantation workers, those in trade, commerce, business, transport, mining, construction, political or social work, all government servants municipal employees, teachers, priests, entertainment artists, etc.
