Motif :—

Jullundur - made Sports Goods For Olympics—1976

Hockey at the Montreal Olympics, 1976, will be played with balls manufactured in at Jullundur.

Jullundur has nearly 350 sports goods manufacturing units of various sizes. These small units export tennis and badminton rackets, shuttlecocks and several types of balls including cricket balls.

The nucleus of this industry was formed by skilled and semi-skilled workers who came to India after Partition. Since they could not afford to go far away and were lodged in the two refugee camps located on the outskirts of Jullundur city in an underdeveloped area, the availability of the skilled workers attracted the sports goods manufacturers especially from Sialkot which was the centre of sports industry before Partition.

Over 2,000 people are at present employed in this industry. Started from scratch after Partition, the industry now exports goods worth nearly Rs. 5 crore per year to the Asian and European Commonwealth countries, the last being our biggest importers.

PREFACE

In the publication of the District Census Handbooks we have the privilege of taking one of the important census traditions to the 1971 Census. Their publication was first taken up at the 1951 Census for making census statistics available for the smaller territorial units. In the 1961 Census, attempts were made to make this publication more informative with the addition of data about level of development and amenities available in villages. There was, however, great delay in the publication of this valuable reference compendium. The delay occured on account of the fact that the compilation of the Handbook had to wait till the complete tabulation programme of census data was got through. The compilation of administrative statistics for inclusion in the Handbook also took a long time. As a result, the town and village-wise primary census data could not be released pending their formal publication even though there was constant demand for it. In view of these considerations, it was decided at the 1971 Census that the District Census Handbooks would be divided into three convenient parts so that at least Parts A and B, which contain essential data down to the village and town level, could be released quickly. Accordingly Parts (A) & (B) of the District Census Handbook of Jullundur are presented in this Handbook. Part (A) contains the Village and Town Directory and Part (B) Village and Town-wise Primary Census Abstract. It is for the first time that data about urban areas is being presented in a separate part, "Town Directory", at the 1971 Census. The Village Directory presents comprehensive information on various facets of each village. Alphabetical list of villages has also been inserted in the Handbook.

2. There are 108 towns and 12,188 inhabited villages in the Punjab State. It was, indeed, a formidable task to collect and compile voluminous data for such a large number of units. The collection of area figures and land use data, in particular, presented serious difficulties especially when these figures somewhat differed from those given at the tahsil and district level by the Director of Land Records. We had to make several gruelling cross-checks to adopt the area figures finally for each village.

3. It was not considered necessary to have a penetrating analysis of any particular item of the data in Parts (A) and (B) of this Handbook, this could be taken up by the Census Organisation itself or by some other agency later during the inter-censal-period. The census data users and scholars would perhaps feel satisfied with statistical data being presented in this Handbook quickly on the heels of the census count in the country.

4. This Report, as at the last Census, continues to be a State Government publication as it is financed by them. Its compilation and write-up have been done by the Census Directorate at Chandigarh on behalf of the State Government. The views expressed in this are that of the State Census Organisation, which is under the direct control of the Government of India in the Ministry of Home Affairs.

5. In the collection of data, we had to take help from large number of personnel of the State Revenue Department at the village, tahsil and district level and of the municipal staff in towns But for their generous cooperation in filling up of the lengthy schedules regarding availability of amenities and level of development it would not have been possible to achieve the desired objectives in time. It is certainly difficult to thank separately each individual functionary engaged in this project. Nevertheless we are keen to convey our profound gratitude to all those who have worked directly or indirectly on this project. At the Census Directorate, Shri S. K. Agarwal, Assistant Director Census Operations, assisted by Shri R. L. Kalsia, Tabulation Officer and Shri N. S. Bhadauria, Statistical Assistant.

has compiled the census and administrative statistics in the form of Village and Town Directories and a bunch of statements incorporating primary census data. The initial compilation of the Village Directory was done by Shri Vishwa Mittar, Statistical Assistant under the able guidance of Shri D. P. Jain, Tabulation officer. We owe a debt of gratitude to all these officials for the effort and labour they have put in for the timely production of this Handbook. Shri H. S. Sudan, Computor has done the proof reading with the help of Shri Balbir Singh Computor. In the Map section Shri G. S. Gill, Tabulation Officer, assisted by Sarvshri Surinderjit Singh, Madhav Shyam and Kulbir Singh, has done a neat job in the preparation of the maps. Dr. B. K. Roy, Map Officer, in the office of the Registrar General, New Delhi, provided valuable guidance in the preparation of the maps. We wish to acknowledge our gratitude to all of them.

6. We are grateful to Dr. B. K. Roy Burman, Deputy Registrar General (Social Studies) for piloting this project in our State and for evincing continued zeal and interest in its execution. Above all, we are specially indebted to Shri A. Chandra Sekhar, Ex-Registrar General, India and his worthy successor Shri R. B. Chari, for the inspiration and guidance that we received from them in the production of this Handbook and to reaffirm our claim that "Census continues to be the most fruitful source of information about the country". We trust the demographers, sociologists, economists and other scholars working in various humanities will find sufficient data in this compendium for taking up analytical studies.

7. We are grateful to Shri P. S. Walia, Controller, Printing and Stationery Department, Punjab for ensuring speedy publication of this Handbook.

H. S. KWATRA
Deputy Director of Census Operations
PUNJAB

ACKNOWLEDGEMENTS

The staff deployed on the preparation of the District Census Handbook :

1. Shri R. L. Kalsia, Tabulation Officer
2. Shri N. S. Bhadauria, Statistical Assistant
3. Shri Malkit Singh, Computor
4. Shri Parkash Sharma, Computor
5. Shri Harbans Singh, Assistant Compiler
6. Shri Harjit Singh, Assistant Compiler
7. Shri Himmat Rai, Assistant Compiler

Typing of Manuscript : -

PART X-A

VILLAGE AND TOWN DIRECTORY

A GLIMPSE INTO THE DISTRICT

Jullundur, a prestigious central district in the re-organised Punjab, lies between North latitude 30°-58' and 31°-37' and East longitude 75°-03' and 76°-15'. Geographically, it takes shape of a triangle, bounded by Hoshiarpur district in the North, by Kapurthala district in the West and by Firozpur and Ludhiana districts in the South. The Sutlej river forms its southern boundary-natural - separating it from Ludhiana and Firozpur districts. The district is constituted of four tahsils, namely, Jullundur, Nakodar, Nawashahr and Phillaur, having 1,273 villages (including 64 uninhabited villages) and 12 towns. With 3,399 sq. kms. area, the district is third in the ranking order of size of districts from the bottom in the State - Kapurthala and Ropar districts only rank below Jullundur district. Nevertheless this district accommodates a population of 1,454,501 persons as per the 1971 Census count and occupies the third place in ranking order of population of districts - Firozpur and Amritsar districts only have an edge over this district. Precisely for this reason, this district claims the highest density of 428 persons per sq. km. against 269 persons per sq. km. for the State. In the matter of sex ratio also this district occupies a significant place among the districts-its ratio works out to 883 females per 1,000 males against the State figure of 865. The national sex ratio worked out to 930 at the 1971 Census. Our State is reputed for its lowest sex ratio in the country from census to census. Incidentally, Adampur town of Jullundur district has the highest sex ratio of 1,042 for any town in the State. The district has the distinction of having 30% of its population in the urban sector against the corresponding State percentage of 23 7 and 34.8 of Ludhiana district. It ranks second in urbanization in the State. Rural population is only 70% of the total populatian against 76% in the State. In the matter of literacy also, the district is second only to Ludhiana district-it claims 41.3% literacy rate against 42.63% of Ludhiana district and 33.7% of the State. In urban areas of the district, therefore, for every five persons two are literate or educated. Female literacy rate is also second highest in this district; Ludhiana district is at the top in the State. Work participation rate in the district comes to 27 10 per cent of the total population (according to the new definition for 'work' evolved at the 1971 Census), 49.8 per cent for males and 1.4 per cent for females. There is preponderance of workers in categories other than cultivators and agricultural labourers in this district because of its relative importance as an industrialised/urbanized district.

The maximum temperature in May-June shoots upto 114.4°F and in winter it tumbles to 28.4°F in the months of December and January. Summer rains - relatively more important for crops - are normally received during June-September and winter rains during December-January.

Nearly 51 per cent of the total working population of the district continues to be engaged as 'cultivators' and 'agricultural labourers' despite the increasingly important role played by urbanization. The soil in the district is mostly alluvial and highly fertile under the myriad blessings of rivers Sutlej and Beas, which control the agrarian economy of Bist Doab. Gross area of crops irrigated as percentage to total cropped area was as high as 83 per cent in the district in 1971-72 against the State

figure of 76.5 per cent - Amritsar is the only district having an overwhelming edge with a percentage point of 94.6. Canals, tubewells and ordinary wells are the main sources of irrigation. The district is not prone to drought conditions, with assured irrigation facilities, even if rains are below normal in certain years. The principal crops of the district are wheat, maize, rice and sugarcane. More than half of the cultivated area is accounted for by wheat. One-fourth of the cultivated area is accounted for by maize and 7.27 per cent by sugarcane. The district has the privilege of having two sugar mills in the co-operative sector at Bhogpur and Nawashahr. The introduction of 'package programme', entailing use of high-yielding varieties of seeds, chemical fertilizers, pesticides, effective water management, etc. has helped the district in an abundant measure to enjoy the fruits of the 'green revolution' since the middle of the 1960's. Jullundur is one of the few districts which has shown remarkable results in both the agriculture and industry sectors in the last decade.

In fact, the district has done remarkably well in the industrial sector since the dawn of Independence and particularly in the 1960's The sports goods industries flourished only after partition when many industrialists engaged in these at Sialkot (now in Pakistan) shifted to Jullundur city. Manufacture of surgical instruments, rubber goods, engineering goods, brass and chromium sanitary fittings, steel furniture also gained importance in the 1950's. All these industries have taken deep roots in Jullundur city. Notwithstanding the outbreak of hostilities with Pakistan (on more than one occasion) the rising tempo is being maintained in the industrial sector except when there are occasional energy and raw material crisis. The district claims the third highest number of registered working factories, 764, in the State against 968 in Amritsar district. In short, Jullundur is the third important district in small and medium-size industries in the State.

Total road length maintained by P.W.D. and local bodies in the district was 1,058 kms. metalled and 170 kms. un-metalled in 1970-71. The district is served by various lines of the Northern Railway. Out of 1,209 inhabited villages, 417 villages (34.50%) are linked by metalled roads. Another 144 villages are linked by un-metalled roads, 12 villages by metalled and unmetalled roads, 82 villages by metalled road and rail, 4 villages by metalled, unmetalled roads and rail and 25 villages by un-metalled road and rail.

On an average there are 4.74 medical institutions per 100 sq. kms. in the rural areas of the district against the State figure of 2.69 only. Corresponding position is still better in urban areas.

Significantly, this district claims the highest percentage of Scheduled Caste population to total population (32.85%) among all the districts against the State figure of 24.71% - which again is the highest for any State in India.

Jullundur is the second important district in the State where the incidence of the Hindus in terms of total district population is overwhelming - Hoshiarpur district at No. 1 accounts for 59.25% and Jullundur district for 53.90% Hindus. It is significant that in Jullundur district the percentage growth rates of the Hindus and the Sikhs were almost identical in the decade 1961-71, Hindus 18.41% and Sikhs 18.83% although for the State as a whole the percentage points were 8.13 for the Hindus and 32.08 for the Sikhs.

The population by religions in Jullundur district as per the 1971 Census is shown below :—

	Males	Females	Total
Hindus	*418,759*	*365,289*	*784,048*
Muslims	*1,841*	*1,521*	*3,362*

Jains	*1,354*	*1,306*	*2,660*
Other religions & persuasions	...	...	...
Religions not stated	*305*	*165*	*470*
Total	*772,416*	*682,085*	*1,454,501*

INTRODUCTORY NOTE ON DISTRICT CENSUS HANDBOOK

History of District Census Handbook :—Census has assumed an increasingly important role from decade to decade in India. Undoubtedly it is now an indispensable instrument of policy and development planning in the States and at the Centre. To repeat the oft-quoted words :*

"Census is no longer a mere counting of heads for purposes of taxation and recruitment. It is a kind of stock taking as it were of the nation's human wealth. Census aims at presenting as complete a picture of man as may be possible in his social, cultural and economic setting....."

Keeping in view the ever-increasing demand of the layman, administrators, planners, scholars, etc. for the census data of smaller administrative units, it was decided at the 1951 Census to present data by villages and towns in the form of District Census Handbooks. It was not altogether a new idea because even at the earlier decennial censuses, data for smaller administrative units were published in one form or the other. A districtwise list of villages, showing population, was published as early as 1891 from the data collected at the census. A regular Village Directory was also introduced at the 1911 Census and such 'Directories' were compiled in the shape of 'District Census Statistics' at the 1921 Census. In the end result, the District Census Handbook emerged as a regular decennial publication of the State Government at the 1951 Census. The District Census Handbooks of 1951 Census contained an introductory essay, giving brief history of physio-geographic conditions, life styles and other socio-economic conditions of the inhabitants, extracts from important census tables, besides Village and Town Directories. Administrative statistics on items like railway stations, post offices, schools, co-operatives, village panchayats were also given. The size and contents of the District Census Handbook series of the 1951 Census varied from State to State depending on the availability of financial resources and requirements of data. So varied were the uses and so great the value of these Handbooks that their publication was continued at the 1961 Census and vigorous efforts were made to enlarge the scope and enrich their contents. The 1961 Census Handbooks were certainly far more elaborate than their precursors at the 1951 Census. At the 1961 Census the introductory chapter of the District Census Handbook was almost a gazetteer as it contained information on physical, historical, geological and administrative aspects of the district. Besides, information relating to the demographic, economic, social and cultural aspects was also given which was further supplemented by a list of events of the preceding decade and a statement of fairs and festivals of the district.

2. The publication of the District Census Handbooks, in which the Village and Town 'Primary Census Abstracts' were incorporated, invariably got delayed even though the compilation of townwise and villagewise primary census data were completed within a year or two after the completion of census enumeration. The delay occured on account of the fact that the compilation of the Handbook had to wait till the complete tabulation programme was got through. The townwise and villagewise primary census data could not be released pending their formal publication even though there was constant demand for it. The compilation of administrative statistics for inclusion in the District Census Handbook also took sufficiently long time. Very often the publication of the District Census Handbooks got delayed as some of the State Governments would not take a decision quickly enough to publish them. In fact some of the District Census Handbooks of 1961 Census were published in a few States as late as 1971. Delayed publication undoubtedly detracts from their value.

3. *Scope of District Census Handbook* 1971 :—It is always our endeavour to make available these data to the users as quickly as possible after the census count. With this end in view, the District Census Handbooks at the 1971 Census have been divided into three convenient parts so that at least parts A and B, which contain the essential data down to the village and town, can be released quickly. The State Governments have also accorded their approval to their publication in three convenient parts :

Part A—Village and Town Directory.

Part B—Village and Townwise Primary Census Abstract.

Part C—Analytical Report, Administrative Statistics and District Census Tables.

4. Part A of the Handbook contains Village and Town Directory for each village and town by tahsils. The Village Directory contains information about total area of each village in acres, amenities/

---

* An extract from the inaugural speech of Sh. K. S. Ramaswamy, Deputy Home Minister, delivered at the State level Training Conference of Census Officers, Haryana at Chandigarh on September 24, 1970.

conveniences available in the village, the staple food of the people and the land use pattern. There is also information about the nearest town and its distance from the village. The Town Directory presents data on each town with the aid of seven statements, giving the status of the town, the decadal population, its functional category, physical and location aspects, municipal finance, availability of amenities/facilities like medical, educational, banking etc., trade, commerce, industry and population by sex and religion.

5. The prescribed schedules for Village and Town Directory were sent to the Tahsildars and Presidents of Municipal Committees to be filled in by their staff and to be returned to the Census Directorate. Comprehensive instructions, which were got printed, were given to the staff for filling up of these schedules. Notwithstanding all the care taken at various levels for the correct filling up of these schedules, there were a few cases where the quality of work was sub-standard and in these cases the field job had to be done for the second time. There were considerable delays in the submission of filled-in schedules and a series of reminders had to be sent to the Tahsildars for early submission. Some of the revenue officials hardly evinced adequate interest in this assignment which culminated in serious delays in the completion of the task. Similarly there were delays in some of the Municipal Committees where the Secretaries sparingly took adequate interest in this work. But since we had taken up this job well in advance we could give sufficient time margin to the field agency for filling up these schedules. In spite of all the difficulties, the job was accomplished well in time.

6. Part B contains the Primary Census Abstract (PCA figures)—the basic census data—for each village and each town, tahsilwise, for the district. The town PCA contains figures wardwise and down to the Census Enumerator's Block. Villagewise Primary Census Abstracts have been arranged in the ascending order of location code numbers allotted to villages at the Census. A map of the district, showing the tahsil boundaries, location of the towns and large size villages of population 5000+, has been given at the beginning of this Part. Important roads, railway lines, rivers, etc. have been depicted in this map. An inset map showing the position of Jullundur district in the State has also been incorporated. Preceding PCA for each tahsil, a map, showing the tahsil boundary and location code number of each village and town in the tahsil, has been given alongwith an inset map showing the position of the tahsil in the district. In order to facilitate location of any village, a list of villages in each tahsil, arranged in alphabetical order and indicating the code numbers of the villages, has also been incorporated.

PCA incorporates tahsilwise data for each village and town/ward/block under the following column heads :

(i) Area in sq. kms./acres ;

(ii) Number of occupied census houses and the households ;

(iii) Total population (including the institutional and houseless population) ;

(iv) Population of Scheduled Castes and Scheduled Tribes ;

(v) Literate and educated persons ;

(vi) Workers classified into 9 industrial categories and the Non-workers.

7. Part C of the District Census Handbook will contain the analytical report, embodying administrative statistics and abstracts from all the important Census Tables generated at the district and tahsil level. In its introductory portion an assessment about the relative position of the district among other districts with regard to area, population size, density and growth rate; changes in demographic, economic and social characteristics of the district will be made. A brief write-up will analyse the changes in rural and urban population; distribution of population by industrial categories; activities of non-workers ; composition of households by relationship to head ; distribution of population by age and sex ; education and literacy ; scheduled castes ; migrants ; mother-tongue and religion. A record of the major events of the last decade in the district and the information on amenities like transport and communications, irrigation and power, housing and institutional facilities like finance and credit, medical and public health, educational, cultural and recreational will also be presented in this volume. Comprehensive data about the economic resources and activities like agriculture, animal husbandry, fisheries, forestry, mining and plantations, trade and commerce, industries etc., will, in addition, be given in this Part.

8. *The 'Census Village'* :—The definition of the village adopted in Census is identical with that of 'Mauza' given under section 3 (i) of the Punjab Land Revenue Act, 1887. It is the 'Revenue Estate' determined as such for the purpose of levy and collection of the land revenue. The Revenue Estate is defined in the Act ibid :

"as an area of which a separate record of rights is maintained or which has been so assessed if the land revenue had not been realized or compounded or redeemed or which the State Government has otherwise declared as an Estate".

The Village is thus not merely the *abadi deh* area (habitation in red lined area) for census taking but the entire land coming within the fixed boundaries of each village in terms of the Act *ibid*.

9. *The 'Census Town'* :—Each country decides for itself which areas are 'urban' and which are 'rural' because it is difficult to have an internationally acceptable definition of each such 'area'. National differences in the characteristics which distinguish urban and rural areas do not admit of a uniform definition at the international level. In India we have adopted the following definition of an 'urban' area at the 1971 Census, which is incidentally analogous to the one adopted at the 1961 Census (Prior to the 1961 census, the definition of 'Urban' area was somewhat liberal and a lot was left to the discretion of the local authorities).

(a) All places with a Municipality, Corporation or Cantonment or a Notified Town Area ;

(b) All other places which satisfy the following criteria :—

(i) a minimum population of 5,000 ;

(ii) at least 75% of the male working population is non-agricultural ;

(iii) a density of population of at least 400 per sq. km.

The State Directors of Census Operations were however given some discretion in marginal cases to include, in consultation with the State Government, a place that had other distinct urban characteristics, or to exclude an undeserving place from being treated as 'Urban'. On the basis of this criteria Goraya of Phillaur tahsil was treated as a town at the 1971 Census even though it was not administered by a Municipal Committee. Jullundur district has 12 urban areas and statements I to VII of the Town Directory give information on various aspects of these towns.

10. *Urban Agglomeration*:—With the adoption of the concept of 'Urban Agglomeration' the old concepts of 'town group' and 'sub-urban areas' or 'non-municipal areas' have been abandoned at the 1971 Census. 'Urban Agglomeration' forms a contiguous urban spread constituting of a town and its adjoining urban outgrowths or two or more physically contiguous towns together with continuous well recognised urban outgrowths, if any, of such towns. In the 'town group' concept of 1961 Census, it was not always the continuous urban units that formed such a group. Sometimes, urban units quite cut off from one another, were taken together ignoring the intervening regions. As this evoked criticism, the concept of 'town group' was abandoned at the 1971 Census. However, no urban unit of Jullundur district could be treated as urban agglomeration and the district is, therefore, an exception to this effect in the State.

11. *Standard Urban Area*:—The area constituting an 'urban agglomeration' may keep on changing from census to census depending upon the changing boundaries of the statutory core urban unit as well as the extent of other continuous urban outgrowths. The concept of 'Standard Urban Area', adopted at the 1971 Census, will take care of these changes, covering areas beyond the extending urban limits and intermingling both rural and urban areas in the vicinity of large towns to a limit upto which contiguous urbanization is reasonably expected to take place in the next two decades. In brief, the Standard Urban Area may be defined as the projected growth area of a city or town as it would be in 1991, taking into account not only the towns and villages which will get merged into it but also the intervening areas which are officially urban. Provision of Census data for such 'Standard Urban Areas' will have the advantage of providing comparable data for a definite area for a period of two decades greatly facilitating study of socio-economic and demographic trends in such a fixed area and thus help in urban planning. All towns with a population of 50,000+ have been delineated as Standard Urban Areas. In this district only one Standard Urban Area has been delineated around Jullundur City since it is the only urban area

In the district having population above 50,000. The basic particulars of this Standard Urban Area are as follows :

List of Standard Urban Areas—1971 Census

Name of Urban Unit in S.U.A. 1971	*Rural Components of S.U.A. (with Hadbast No.)*	
1	*2*	
Jullundur City		
(a) Jullundur Municipal Committee	Reru	(207)
	Sherpur	(212)

NOTE ON VILLAGE DIRECTORY

12. The Village Directory, containing information on each village, has been prepared separately for each tahsil. It contains an account of the location and area of the village, amenities available in the village, for example, educational, medical, power supply, communications, posts and telegraphs, staple food, land use, i.e. area under different types of land use like forests, irrigated and un-irrigated cultivable and uncultivable lands. This is further supplemented by information about the nearest town and distance in kilometers from the referrent village, days of markets or hats, if any, held in the village and an account of the places of religious, historical and archaeological interest in the village. Villages have been arranged within the tahsil in the ascending order of the census location code numbers, which have been given in Col. 2 of the Village Directory. For example location code No. 5/2/25 means village No. 25 in tahsil No. 2 of district No. 5 of the State. An abstract showing amenities, like educational, medical, power supply, etc., tahsilwise, has been added towards the end of the Village Directory.

13. Information about the amenities available in the villages has been given under columns 4 to 9 of the Directory.

(i) Educational facilities have been shown by adopting the following abbreviations under column 4 :

Pr.S = Primary School.

Mid.S = Middle School.

Sec.S = High or Higher Secondary School.

C = College.

Where figures like Mid.S (1), Pr. S (2), etc., occur these denote that the village has one Middle School, two Primary Schools, etc.

(ii) Medical facilities have been shown by use of the following abbreviations under column 5 :

H = Hospital.

MCW = Maternity and Child Welfare Centre.

HC = Health Centre.

D = Dispensary.

FPC = Family Planning Centre.

VH = Veterinary Hospital.

Number of institutions have been given in brackets against each.

(iii) Electrification has been shown by use of the following abbreviation under column 6 :

E = Electrified.

(iv) Types of drinking water supply sources in the villages have been shown by use of the following abbreviations under column 7 :

T = Tap water.

W = Well water.

TW = Tubewell water.

HP = Handpump water

TK = Tank water.

R = River water.

F = Fountain water

C = Canal water.

O = Others.

(v) Communication and transport facilities have been shown by use of the following abbreviations under column 8 :

PR = Pucca Road.

KR = Katcha Road.

T = Train (if the railway station is within the range of one mile from the village).

C = Canal.

R = River.

(vi) Post and Telegraph facilities have been shown by adoption of the following abbreviations under column 9 :

PO = Post Office.

TO = Telegraph Office.

PTO = Post and Telegraph Office.

Phone = Telephone connection.

14. Break-up of area under different types of land use has been furnished under columns 11 to 15 of the Directory. Particulars in respect of the nearest town and the distance in kilometers of the same from the referrent village have been given under column 16. Information regarding day (s) of market/ hat, If any, held in the village has been furnished under column 17. Regular weekly, fortnightly or monthly market/hat are hardly a common feature in the Punjab State. Temporary markets/hats are held in the State only on a few festive occasions. Information relating to places of religious, historical or archaeological interest has been given under column 18.

Uninhabited villages and villages that have got merged into towns have been specifically shown in the Directory.

15. (a) Distribution of Villages by Area :

The following table gives the distribution of villages in Jullundur district in terms of area in acres :—

TABLE No. 1

Distribution of Villages by Area

Area (in acres)	*Number of villages**
1	*2*
50 acres or less	6 (0.47)
51—100 acres	17 (1.34)
101—200 ,,	78 (6.13)
201—500 ,,	557 (43.75)
501—1,000 ,,	423 (33.23)
1,001—2,000 ,,	160 (12.57)
2,001—5,000 ,,	28 (2.20)
5,001 acres and abov	4 (0.31)
Total	1,273 (100.00)

* Inclusive of 64 uninhabited villages.

(Figures in brackets indicate percentage to total number of villages in each distance group)

It reveals that most of the villages (43.75%) in Jullundur district are of medium size. About 77 per cent of the villages fall in the range of 201 to 1,000 acres. The number of villages having area less than 50 acres or more than 5,000 acres is only 6 and 4, respectively. The average area of a village in the district is 641.50 acres.

(b) Amenities available in the villages :

(*i*) *Educational facilities*:—The educational facilities available in the villages of the district have been set out in the following table with reference to the distance from the nearest town :

TABLE No. 2

Distribution of villages having educational amenities by distance from the nearest town

Distance from the nearest town	*Total number of villages**	*Number of villages having*				
		Primary School	*Middle School*	*High or Higher Secondary School*	*College*	*Others*
1	*2*	*3*	*4*	*5*	*6*	*7*
5 kms. or less	379	236 (62.27)	24 (6.33)	15 (3.96)	1 (0.26)	...
6—10 kms.	526	303 (57.60)	48 (9.13)	38 (7.22)	1 (0.19)	...
11—15 "	272	124 (45.59)	24 (8.82)	11 (4.04)	...	...
16—25 "	32	12 (37.50)	2 (6.25)	1 (3.13)	...	...
26—50 "	...	...	...	...	...	...
51—100 "	...	...	...	...	...	...
101—200 "	...	...	...	...	...	...
201 kms. and above	...	...	...	...	...	...
Total	1,209	675 (55.83)	98 (8.11)	65 (5.38)	2 (0.17)	...

*Excluding 64 uninhabited villages.

(Figures in brackets indicate percentage to total number of villages in each distance group.)

The table shows that educational facilities are concentrated largely in villages which are within 10 kms. of an urban area. The proportion of villages having Primary Schools is highest among the villages which lie within 5 kms of an urban area Middle and High/Higher Secondary Schools are highest in number in villages in the bracket 6-10 kms. from the nearest town. About 56 per cent of the villages have Primary Schools while the percentage of villages having Middle and High or Higher Secondary Schools is only 8 and 5. respectively Only two villages in the district enjoy the distinction of having a degree college each. However, the State Education Department and its predecessor Department have opened Primary Schools in such a way that the students have generally not to traverse more than two miles to attend a school.

(ii) *Medical facilities*:—Medical facilities available in the district have been quantified in terms of the number of medical institutions of any kind per 100 sq. kms. of the rural areas in the following table :—

TABLE No. 3

Medical facility per 100 sq. kms.

Sl. No.	*Name of Tahsil*	*Total area in sq. kms.*	*Number of medical institutions of any kind per 100 sq. kms.*
1	*2*	*3*	*4*
1	Nawashahr	764.4	6.28
2	Phillaur	740.1	4.59
3	Nakodar	878.7	3.98
4	Jullundur	922.9	4.23

It is significant that the medical facilities are adequately available in all the tahsils of the district. On an average there are 4.74 medical institutions per 100 sq. kms. in the rural areas of the district when the corresponding figure for the State is only 2.69. Nawashahr tahsil leads in this respect with 6.28 medical institutions per 100 sq. kms and Nakodar tahsil is the tailender.

(*iii*) *Power supply* :—Jullundur district is next to Amritsar in the rural electrification programme in the State The following table shows the number of electrified villages in terms of the distance from the nearest town :

TABLE No. 4

Distribution of electrified villages with reference to distance from the nearest town

Distance from the nearest town	*Total number of villages**	*Number of villages with electric power supply*
1	*2*	*3*
5 kms. or less	379	300 (79.16)
6—10 kms.	526	326 (61.98)
11—15 ,,	272	119 (43.75)
16—25 ,,	32	5 (15.63)
26—50 ,,	...	...
51—100 ,,	...	...
101—200 ,,	...	...
201 kms. and above	...	...
Total	**1,209**	**750 (62.03)**

* Excluding 64 uninhabited villages.

(Figures in brackets indicate percentage to total number of villages in each distance group.)

Out of 1,209 inhabited villages in the district, 750 villages (62%) were electrified till 1969. The table given above reveals that as high as 79.16% of villages, lying within 5 kms. of an urban area, have been electrified. The percentage of electrified villages declines pari-passu with the increase in distance from the nearest urban centre. Efforts are, however, underway to electrify all the villages in the district It is, however, a different matter if we will be able to maintain the supply line owing to the global energy crisis.

(iv) *Communications* :—The following table shows different types of communication facilities available in the rural areas with reference to the distance from the nearest town :

TABLE No. 5

Distribution of villages with different communication facilities by distance from the nearest town

Distance from the nearest town	*Total number of villages**	*Number of villages connected by*							
		Pucca road	*Katcha road*	*Pucca and katcha road*	*Pucca road and river*	*Pucca road and rail*	*Katcha road and rail*	*Katcha road and rail*	*Others*
1	*2*	*3*	*4*	*5*	*6*	*7*	*8*	*9*	*10*
5 kms. or less	379	158(41.69)	41(10.82)	7(1.85)	...	48(12.66)	5(1.32)	2(0.53)	...
6—10 kms.	526	186(35.36)	61(11.60)	4(0.76)	...	29(5.51)	3(0.57)	2(0.38)	...
11—15 ,,	272	70(25.74)	34(12.50)	1(0.37)	...	5(1.84)	14(5.15)	...	...
16—25 ,,	32	3(9.38)	8(25.00)	...	...	...	3(9.38)	...	...
26—50 ,,	...	...	...	...	...	...	...	...	...
51—100 ,,	...	...	...	...	...	...	...	...	...
101—200 ,,	...	...	...		...	...	...	...	...
201 kms. and above	...	...	...	...	...	...	...	...	...
Total	1,209	417(34.49)	144(11.91)	12(0.99)	...	82(6.78)	25(2.07)	4(0.33)	...

* Excluding 64 uninhabited villages.

(Figures in brackets indicate percentage to total number of villages in each distance group.)

The percentage of villages connected by pucca road is highest (41.69%) among the villages lying within 5 kms. of an urban area and it declines with the increase in the distance. On the contrary the percentage of villages connected by katcha road is lowest in the distance group 5 kms or less and it increases with the increase in the distance.

Out of 1,209 inhabited villages in the district, 417 villages (34.49%) are linked by pucca (metalled) roads. Again, 144 villages (11.91%) are linked by katcha (un-metalled) road, 12 villages by pucca and katcha roads, 82 villages by pucca road and rail, 4 villages by pucca and katcha roads and rail and 25 villages by katcha road and rail.

(*v*) *Posts and Telegraphs*:—The following table shows the number of Post Offices per 100 sq. kms. in each tahsil of the district :

TABLE No. 6

Number of post offices per 100 sq. kms.

Sl. No.	*Name of Tahsil*	*Total area in sq.kms.*	*Number of post offices per 100 sq.kms.*
1	*2*	*3*	*4*
1	Nawashahr	764.4	12.95
2	Phillaur	740.1	10.27
3	Nakodar	878.7	11.84
4	Jullundur	922.9	12.68

There are twelve post offices per 100 sq. kms. in the rural areas of the district as compared to 5.96 in the State as a whole. Nawashahr tahsil has a small edge over the other tahsils in this respect by having 12.95 post offices per 100 sq. kms. The number of post offices in other tahsils is equally significant.

Out of 1,209 inhabited villages, 396 villages have post offices and 26 villages have telegraph offices. Telephone connections are available in 23 villages only.

(c) Staple Food :

Wheat and maize are the staple food of the district. Rice is consumed on special occasions only since Punjabis are not habitual rice eaters.

(d) Land use pattern :

(*i*) *Forests* :—The area under forests, as shown in the Village Directory, includes forested areas classed or administered as forest under any legal enactment dealing with forests whether State owned or private. This figure may be slightly different from the one furnished by the Forest Department owing to the reason that certain lands though not wooded are treated as forests by the Forest Department.

(ii) Irrigated Area :—It is the area that receives the soil blood for crops—the water—through channels containing water procured from wells, tubewells, tanks, canals, etc. Cultivated land served by watering through these man-made devices is termed as 'irrigated area'.

(*iii*) *Unirrigated Area* :—It includes the cultivated land which depends entirely upon the freaks of nature i. e. monsoon rains for irrigation purposes. Despite the assured irrigation facilities, the monsoons continue to play an important role in the agricultural economy of the district.

(*iv*) *Cultivable Waste* :—This category includes land available for cultivation whether actually cultivated or not, for one reason or the other, or once taken up for cultivation but not cultivated again for more than 5 years in succession. Such land may be fallow or covered with bushes or jungle which may not be put to any use. Lands under thatching grass, bamboo, bushes, miscellaneous tree crops, etc., which are not included under forests, have been considered as 'cultivable waste'. All grazing lands which are permanent pastures, meadows, village common lands and grazing lands within the forest areas have also been covered under this classification.

(*v*) *Area not available for cultivation* :—This refers to absolutely barren uncultivable land and such lands which are put only to non-agricultural uses. Absolutely barren uncultivated land covers lands under mountains, deserts, etc., which cannot be brought under cultivation except at an exorbitant cost. All lands occupied by buildings, roads, railways, waterways, rivers, canals, etc., are classified as not available for cultivation.

The land use pattern differs from district to district. In Jullundur district the percentage of area under different land uses is as follows :—

Land use	*Percentage*
(*i*) Forests	0.03%
(*ii*) Irrigated area	54.36%
(*iii*) Unirrigated area	28.68%
(*iv*) Cultivable waste	3 66%
(*v*) Area not available for cultivation	13.27%

It is clear that about 83 per cent of the total area is under cultivation out of which more than 54 per cent was irrigated in 1969. The area under forests is almost negligible. About 1/8th of the total area is not available for cultivation. The percentage of area lying as cultivable waste is about 4 per cent which is mainly due to water logging. River Sutlej forms the Southern boundary of Nawashahr, Phillaur and Nakodar tahsils and generates water logging during the rainy season. The State Government are taking necessary steps to reclaim the area lying as cultivable waste by providing effective drainage system and by constructing high embankments along the river bed.

The State canals and tubewells/wells are the main sources of irrigation in the district. The following table gives the distribution of the net irrigated area for each tahsil of the district :

TABLE No. 7

Tahsilwise net irrigated area during 1970-71 ('oo' hectares)

Name of Tahsil	*Different sources of irrigation*					
	Govt. canals	*Private canals*	*Tanks*	*Wells/ Tubewells*	*Other sources*	*Total*
	2	*3*	*4*	*5*	*6*	*7*
Nawashahr	21	...	...	511	...	532
Phillaur	24	...	...	488	...	512
Nakodar	69	...	...	540	...	609
Jullundur	34	...	...	581	2	617
Total for the district	148	...	...	2,120	2	2,270

Source : Economic and Statistical Organisation, Punjab.

It has been observed that the percentage of cultivable waste land to cultivated land is generally lower in the villages which are closer to the urban area. The following table, however, reveals a different picture in this district :

TABLE No. 8

Percentage of average cultivable waste per village to average cultivated land per village by distance group from the nearest town

Distance from the nearest town	*Number of villages**	*Total cultivated land (in acres)*	*Average cultivated land per village (in acres)*	*Total cultivable waste (in acres)*	*Average cultivable waste per village (in acres)*	*Percentage of cultivable waste per village to average cultivated land per village*
1	*2*	*3*	*4*	*5*	*6*	*7*
5 kms. or less	401	215,333	536.99	9,473	23.62	4.40
6 – 10 kms.	552	299,451	542.48	12,800	23.19	4.27
11 – 15 ,,	288	145,341	504.66	7,206	25.02	4.96
16 – 25 ,,	32	17,974	561.69	425	13.28	2.36
26—50 ,,	...	...	...	...	...	...
51—100 ,,	...	...	...	...	...	...
101 – 200 ,,	...	...	...	...	...	...
201 kms. and above	...	...	...	...	...	...
Total	1,273	678,099	532.68	29,904	23.49	4.41

*Inclusive of 64 uninhabited villages.

It will be seen from this table that the average cultivable waste and the percentage of cultivable waste per village to cultivated land per village is highest in those villages which lie between 11-15 kms. of an urban area. The average cultivable waste per village is, however, low in the villages which are at a distance of more than 15 kms. from an urban area. It would further be seen from column 4 of the table that the average area of cultivated land per village is highest (561.69 acres) in the distance group of 16 to 25 kms. followed by the distance group of 6 to 10 kms. (542.48 acres). It is lowest (504.66 acres) in the distance group 11 to 15 kms. These figures aver that in this district there is rational distribution of land in different categories of villages. The total cultivated area per village is about 533 acres in the district and the average cultivable waste per village is about 23 acres.

NOTE ON TOWN DIRECTORY

16. The Town Directory has been compiled in seven different statements for all the urban areas of the district. Brief explanatory notes on each statement are given below :—

Note on Statement I :—Statement I renders an account of identification particulars, status, growth history and functional category of towns.

(M stands for Municipal Committee, C. B. for Cantonment Board and P for Panchayat in this statement.)

At the 1961 Census an attempt was made to classify the towns on the basis of the "functional category". The entire working population was categorised into 9 industrial categories. These 9 categories were further clubbed into the following five broad categories :—

Industrial Category-1961		*Functional Classification*
I	Cultivator	Primary activities
II	Agricultural Labourer	
III	Mining, Quarrying, Livestock, Forestry Fishing, Hunting and Plantations, Orchards and Allied Activities.	
IV	Household Industry	Industry
V	Manufacturing other than Household Industry	
VI	Construction	
VII	Trade and Commerce	Trade and Commerce
VIII	Transport, Storage and Communications	Transport
IX	Other Services	Services

In statement I of the Town Directory, all the towns of the district have been classified on the basis of the percentage of total workers engaged in each of the five classes of economic activity. A town where 40 per cent or more of the total workers are engaged in one occupation, the town has been classified as a mono-functional town, *e.g.*, industrial town, services town, etc. If this condition is not satisfied then the next predominant occupation is taken into account and if the total of the two comes to 60 % or above, the town has been classified as bi-functional town, *e.g.*, industrial-cum-services town. If the total of the workers engaged in the two major occupations does not come upto 60 % the third predominant occupation is taken into consideration and the town is categorised as multi-functional *e.g.*, industrial-cum-services-cum-commercial town.

The following table gives the functional distribution of towns of Jullundur district as per the 1971 census :

TABLE No. 9

Distribution of towns by functional categories

Sl. No.	*Functional category*	*Number of towns*
1	*2*	*3*
1.	Industry	2
2.	Services	1
3.	Primary activities	1
4.	Industry-*cum*-Trade and Commerce	1
5.	Services-*cum*-Trade and Commerce-*cum*-Industry	1
6.	Primary activities-*cum*-Services-*cum*-Industry	1
7.	Trade and Commerce-*cum*-Services-*cum*-Industry	2
8.	Industry-*cum*-Trade and Commerce-*cum*-Services	1
9.	Trade and Commerce-*cum*-Industry-*cum*-Services	1
10.	Services-*cum*-Industry-*cum*-Trade and Commerce	1

The table given above shows that only four towns have been categorized as 'mono-functional'; Goraya and Kartarpur towns have been classified as industrial towns where as Jullundur Cantt. and Rahon have been classified as services and primary activities towns, respectively. Jullundur city is the only bi-functional unit in the district as industrial-cum-trade and commerce. The remaining seven towns i.e. Adampur, Alawalpur, Banga, Nakodar, Nawashahr, Nur Mahal and Phillaur have all been classified as 'multi-functional'.

Note on Statement II—This statment furnishes the details about the physical aspects and location particulars of the towns of the district as in 1969. Under physical aspects, the details of annual rainfall and the temperature have been given for each town. Banga, Nawashahr and Rahon towns accounted for the maximum annual rainfall (796.6 mm.) while Nakodar and Nur Mahal towns recorded the minimum annual rainfall (563.9 mm.) The cause of abnormal variation in the rainfall is due to the fact that Banga, Nawashahr and Rahon towns are nearer to the hills of Hoshiarpur district while Nakodar and Nur Mahal towns are situated at respectable distance from these hills. The maximum temperature varies between 46.4° C at Banga, Goraya, Nawashahr, Phillaur and Rahon and 44.8° C in the remaining towns of the district. The minimum temperature varies between 1.4° C and 0.6° C at these towns, respectively.

This statement also gives the details about the distance of the towns (i) from the nearest city (with population of 1 lac and above), (ii) from the State headquarters, district headquarters, (iii) railway station, (iv) bus route, etc. Information regarding navigable river/canal within 10 kms. has also been incorporated in this statement. Jullundur city, with a population of about 3 lacs, is the nearest city to Adampur, Alawalpur, Banga, Jullundur Cantt., Kartarpur, Nakodar and Nur Mahal towns of the district. It is situated on the National Highway No. 1 at a distance of about 157 kms. from Chandigarh, the State capital. The remaining towns of the district are comparatively nearer to Ludhiana city. Jullundur Cantt. is the nearest town from the district headquarters (3 kms.) while Rahon is the farthest. Passenger and goods transport facilities are available adequately in all the towns of the district and

there is not even a single town which does not have its own railway station or bus service station. The river Sutlej, which forms the southern boundary of the district, is only 4-9 kms. from Nur Mahal, Rahon and Phillaur towns of the district. However, navigation is not possible in the river because of its erratic water flow.

Note on Statement III:—This statement relates to the municipal finance for the year 1968-69. It covers the 'receipts' and 'expenditure' of the Municipal Budgets of all the towns in the district.

The following table shows the per capita receipt and expenditure of all the towns of the district classifed by population size :

TABLE No. 10

Per Capita receipt and expenditure by size class of towns

		Per Capita						
		Receipt (Rs.)			*Expenditure (Rs.)*			
Class of Town	*Number of Towns*	*Total Receipt*	*Receipt through taxes*	*Receipt from all other sources*	*Total Ex-penditure*	*Expenditure on public health and conveniences*	*Expenditure on public institutions*	*Expenditure on all other aspects*
1	*2*	*3*	*4*	*5*	*6*	*7*	*8*	*9*
Class I								
1,00,000 and above	1	28.67	17.31	11.36	15.27	8.79	0.05	6.43
Class II								
50,000-99,999	...	...	...	...	—	...	...	...
Class III								
20,000,-49,999	1	69.95	20.19	49.76	65.70	30.23	11.12	24.35
Class IV								
10,000-19,999	5	25.29	11.87	13.42	24.18	5.97	0.37	17.84
Class V								
5,000-9,999	4	7.06	5.06	2.00	7.26	1.26	...	6.00
Class VI								
Below 5,000	1	3.13	1.84	1.29	2.18	0.72	...	1.46

The towns covered under various classes are shown below :

Class I	=	Jullundur City.
Class III	=	Jullundur Cantt.
Class IV	=	Banga, Kartarpur, Nakodar, Nawashahr and Phillaur.
Class V	=	Adampur, Goraya, Nur Mahal and Rahon.
Class VI	=	Alawalpur.

The table given above reveals that per capita receipts exceed per capita expenditure in all classes of towns except class V towns. It reveals a healthy picture of municipal finances. The per capita total receipt is highest (Rs. 69.95) in class III town. It is followed by class I town (Rs. 28.67). The per capita receipt of towns in population brackets 10,000-19,999 and 5,000-9,999 is Rs. 25.29 and Rs. 7.06, respectively. It is lowest at Rs. 3.13 in towns having population below 5,000. The pattern is similar in respect of per capita receipt through taxes and receipts from all other sources.

As regards per capita expenditure it is lowest at Rs. 2.18 in the town having population below 5,000 and highest at Rs. 65.70 in town having population 20,000 to 49,999. It is Rs. 24.18 in towns having population between 10,000 and 19,999 and Rs. 15.27 in city having population one lakh and above. The per capita expenditure is Rs. 7.26 in class V towns. Per capita expenditure on public health and conveniences, public institutions and expenditure on all other aspects shows almost similar trend among different size class of towns.

Receipts through taxes form the major part of the revenue of the Municipal Committees. On the expenditure side maximum amount is spent on public health and conveniences.

Note on Statement IV :—The information relating to civic and other amenities, as in 1969, in respect of each town of the district has been given in this statement. It includes the information on road length, system of sewerage/drainage, number of latrines, method of disposal of night soil, protected water supply, fire fighting service, electrification, etc.

Under column 4, "System of sewerage/drainage," various types of sewerage/drainage systems have been indicated by use of the following abbreviations in order of their importance :

S	=	Sewers.
OSD	=	Open Surface Drains.
ST	=	Septic Tanks.

Under column 8, "Method of disposal of night soil", different prevalent methods of disposal of night soil have been shown by use of the following abbreviations in order of their importance :—

HL	=	Head Loads.
WB	=	Wheel Barrows.

Under column 9, "Source of protected water supply", various sources of protected water supply have been indicated by use of the following abbreviations in order of their importance :—

TW	=	Tubewell water.
T	=	Tap water.
HP	=	Handpump water.
W	=	Well water.

Sanitation and ecology are far from satisfactory. Most of the towns have only open surface drains and service latrines. Night soil is generally disposed of by head loads or wheel barrows. The supply of drinking water is by tubewells and running water taps in two towns and by handpumps in the remaining towns. The fire fighting service is available only in Jullundur city. However, all the towns are well electrified.

Jullundur city has an edge over other towns of the district in the provision of civic and other amenities. It lies on the National Highway No 1 which connects it with Amritsar on the one side and Delhi on the other. The city has a net-work of metalled roads often in disrepair. It is connected by road with Pathankot, Jammu, Amritsar, Ludhiana, Kapurthala and Hoshiarpur. It is a big junction on the broad gauge railway line having connections with Firozpur, Pathankot, Amritsar, Ludhiana, and Hoshiarpur. Work relating to the underground drainage has been completed in most of the new localities. Inspite of vigorous efforts by Improvement Trust and Municipal Committee the environmental and hygienic condition of the city has not been improved, specially in the old localities. The supply of drinking water is largely met by tubewells and there is running water supply in a large part of the city. The proverbial handpump continues to make its contribution all the same. The city has a good number of water borne latrines but largely the night soil is still being disposed of by head loads and wheel barrows.

Jullundur city has been covered under the integrated 'City Development Programme'. Under this scheme the local body is expected to mobilise its own resources and help to create a better life for its citizens. This scheme aims at giving financial assistance to Municipal Committees in the shape of loans for financing their remunerative enterprises such as markets, bus stands, cinemas, restaurants, etc.

Jullundur Cantt. is another important town of the district. It is also situated on the National Highway No. 1 and is hardly three kilometers apart from Jullundur City. It has a net-work of beautiful roads, and is well electrified; majority of the electric connections are for domestic and commercial purposes. The Cantonment Board is maintaining a few overhead water storage tanks for effective supply of drinking water. However, the arrangement for drinking water supply is not adequate in some of the localities like Khatik Mandi, Rama Mandi and houses near police lines.

Nawashahr is located on the Phagwara—Ropar road and is about 60 kms. from Jullundur city. It is also connected with Jullundur, Ludhiana and Ropar by metalled roads. It is a reputed marketing centre for agricultural produce. The town is well electrified and expanding fast due to the development of small scale agro-based industries. Construction of under-ground drainage has been taken up in some parts of the town which will help to improve sanitary conditions in the town.

Phillaur town is situated on the right bank of river Sutlej and is only 47 kms. away from Jullundur city. It is connected by metalled roads with Nawashahr, Ludhiana and Nakodar towns. It is also a railway junction on the Ludhiana-Jullundur railway line. This town is well known for one of the best police training centres in the country. Handpumps are the major source of drinking water, catering to the need of about 80% of the population.

Nakodar town is located at a distance of about 24 kms. from Jullundur city, having road connections with Jullundur and Phillaur. It is reputed for the manufacture of 'durees' which are sent out to various parts of the State. The town is well electrified. Handpumps are the main source of drinking water supply in the town.

Adampur is a small town lying on the Jullundur—Hoshiarpur road. Sanitary conditions are rather unsatisfactory because of the open surface drains. Drinking water supply is managed by handpumps. However, the town is well electrified.

Note on Statement V :—This statement gives details regarding medical, educational, recreational and cultural amenities available in each of the town of the district. Under column 3, medical facilities in terms of number of hospitals, dispensaries, T.B. clinics, health centres, etc. have been shown by use of the following abbreviations :

H	=	Hospital.
D	=	Dispensary.
HC	=	Health Centre.
FPC	=	Family Planning Centre.
TBC	=	T. B. Clinic.
O	=	Others.

Where figures D (1). H (2), etc. occur, these denote that the town has one Dispensary, two Hospitals, etc.

Under column 5, educational facilities in terms of number of colleges of various types have been indicated by use of the following abbreviations :—

A	=	Arts College only.
AS	=	Arts and Science College only.

Where figures like A (1), AS (2), etc. occur, these denote that the town has one Arts College, two Arts and Science Colleges, etc.

Under column 9, relating to recognised shorthand, typewriting and other vocational institutions, the following abbreviations have been used :—

ITI = Industrial Training Institute.

O = Others.

Under column 17, the existence of public library or reading room has been shown by use of the following abbreviations :—

PL = Public Library.

RR = Reading Room.

The number thereof has been indicated in brackets.

The following table shows the extent of medical facilities available in each of the town of the district. The number of beds per 1,000 population has been taken as the criterion for determining the extent of medical facilities. :

TABLE No. 11

Medical Facilities

Sl. No.	*Name of Town*	*Total number of beds in medical institutions*	*Number of beds per 1,000 population*
1	*2*	*3*	*4*
1	Adampur	10	1.23
2	Alawalpur	...	...
3	Banga	150	12.62
4	Goraya	...	...
5	Jullundur Cantt.	26	0.77
6	Jullundur City	506	1.71
7	Kartarpur	10	0.68
8	Nakodar	20	1.10
9	Nawashahr	8	0.46
10	Nur Mahal	14	1.72
11	Phillaur	32	2.77
12	Rahon	4	0.61

There are in all 780 beds in the medical institutions in all the towns of the district. On an average there are 1.78 beds per 1,000 population. Jullundur city has the highest number of beds in its medical institutions. It has 4 Hospitals with 216 beds, one T.B. Clinic with 245 beds, 8 Dispensaries with 37 beds and 5 Family Planning Centres without any bed facility. However, when the medical facilities are considered in relation to population it is observed that Jullundur city has only 1.71 beds per thousand population. On the other hand Banga, a small town of the district, has 12.62 beds per 1,000 population.

Apart from medical institutions, Jullundur city leads in the number of educational institutions. It has seven Arts and Science colleges, one Medical college, one Polytechnic and one Industrial Training

Institute. It has also two colleges for Bachelor of Education and one Sports college. The number of High/Higher Secondary, Middle and Primary Schools per 1,000 population in each town has been given in the following table :

TABLE No. 12

Number of High/Higher Secondary, Middle and Primary Schools per 1,000 population

Sl. No.	*Name of Town*	*Number per 1,000 population*		
		High/Higher Secondary Schools	*Middle Schools*	*Primary Schools*
1	*2*	*3*	*4*	*5*
1	Adampur	0.49	...	0.12
2	Alawalpur	0.21	...	0.21
3	Banga	0.34	...	0.25
4	Goraya	0.33	0.33	0.50
5	Jullundur Cantt.	0.24	...	0.12
6	Jullundur City	0.11	0.01	0.24
7	Kartarpur	0.20	...	...
8	Nakodar	0.17	...	0.17
9	Nawashahr	0.46	...	0.11
10	Nur Mahal	0.37	...	0.12
11	Phillaur	0.17	0.17	0.26
12	Rahon	0.15	...	0.30

It emerges from this table that Jullundur city, which has the highest number of Higher Secondary/High Schools, is at the lowest ebb in terms of the number of High/Higher Secondary Schools per 1,000 population. On the other hand, Adampur town which has only four High/Higher Secondary Schools occupies the first place. Goraya town leads in respect of the number of Middle and Primary Schools per 1,000 population though the actual number of these schools in this town is only two and three, respectively.

In terms of recreational and cultural facilities, Jullundur city is ahead of all the towns in the district. It has 3 stadia, 8 cinema houses, 30 reading rooms and two public libraries. Jullundur Cantt. has two cinema houses, two reading rooms and one public library. Banga, Goraya, Nakodar and Nawashahr towns also have one cinema house each. Public library facilities are available in all the towns of the district barring Alawalpur, Goraya and Nur Mahal towns.

Note on Statement VI :—This statement relates to trade, commerce, industry and banking of each town of the district as in 1969. Information on the three most important commodities manufactured, imported and exported is also included in this statement. Selection of the three most important commodities has been done on the basis of the estimated volume of the commodities transacted.

The district is known for its manufactures of sports goods, which are exported to other countries also. Engineering goods like pumping sets, diesel engines, machine tools, agricultural implements, motor spare parts, etc. are also exported from the district. Among the imported items coal, iron, cement, wood and glass take the first few places.

Jullundur city is known for its small and medium size industries. Prominent among these are the units manufacturing sports goods, motor parts, radio receivers, scientific instruments, agricultural implements, brass and chromium sanitary fittings, nuts, bolts and screws. Steel re-rolling, enamelling and

surgical instrument plants have also made a good headway in the city during the last decade. Small industrial units are also located in Jullundur Cantt. Goraya, Banga and Kartarpur towns.

There has been fairly rapid expansion in the provision of banking facilities in the last decade. In 1970 Jullundur district had the largest number of branches of various banks. There were 16 branches of the State Bank of India, 4 of the State Bank of Patiala, 23 of the Punjab National Bank, 41 of other commercial banks and 17 of Cooperative banks. Out of the total number of 101 branches in the district only 58 branches were located in urban areas and the rest in rural areas. Agricultural and Non-Agricultural Cooperative Credit Societies were also functioning in all the towns of the district except at Adampur and Jullundur Cantt.

Note on Statement VII:—This statement gives the distribution of population by religion. The population of the district has been traditionally classified into six main religions, namely, Budhism, Christianity, Hinduism, Islam, Jainism and Sikhism. The persons returned as professing other religions, sects or beliefs, which could not be classified under any of the religions, have been clubbed together under the head "Other religions and persuasions". The persons whose religion could not be ascertained have been grouped under "Religion not stated".

Jullundur is the second important district in the State where incidence of the Hindus in terms of total district population is overwhelming-Hoshiarpur district at No. 1 accounts for 59.25% and Jullundur district 53.90% (Hindus) to the total district population. It is significant that in Jullundur district the percentage growth rates of the Hindus and the Sikhs were almost identical in the decade 1961-71—Hindus 18.41% and Sikhs 18.83%- although for the State as a whole the percentage points were 8.13 for the Hindus and 32.08 for the Sikhs.

PART X—B

PRIMARY CENSUS ABSTRACT

EXPLANATORY NOTE

PRIMARY CENSUS ABSTRACT

The Primary Census Abstract provides an abstract of the primary information relating to the 1971 Census. It contains the data in respect of area, number of occupied residential houses and households, total population (including institutional and houseless population) and its break-up by sex, Scheduled Castes and Scheduled Tribes, literate and educated persons, workers and non-workers for each village and for each town wardwise/blockwise. The workers have been classified into the following nine industrial categories of economic activity :—

(I) Cultivators.

(II) Agricultural labourers.

(III) Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied Activities.

(IV) Mining and Quarrying.

(V) Manufacturing, Processing, Servicing and Repairs :—

(a) Household Industry.

(b) Other than Household Industry.

(VI) Construction.

(VII) Trade and Commerce.

(VIII) Transport, Storage and Communications.

(IX) Other Services.

2. The district totals given at the beginning of the Primary Census Abstract are followed by the break-up for rural and urban areas of the district. The data are presented tahsilwise (i) for the rural area and (ii) for the urban area. The rural Primary Census Abstract presents the data for the villages arranged in the ascending order of location code numbers (assigned to the villages) within the tahsil. The urban Primary Census Abstract, presented town-wise for each tahsil, furnishes data for the municipal wards and down to the Enumerator's blocks.

3. In the rural Primary Census Abstract the uninhabited villages have also been shown. The villages, which have got completely merged in towns, have been excluded from the list of the rural Abstract. However, an indication of such villages has been given in a separate footnote.

4. The district map given at the beginning of the Handbook shows the tahsil boundaries, location of the towns and large villages of population size 5000+ and the important roads and railway lines, rivers, etc. An inset map therein shows the location of the district in the State. A map, showing the boundaries of each village and town within the tahsil and location code number of each village and town, has been given at the beginning of Primary Census Abstract for each tahsil. An inset map therein shows the location of tahsil in the district.

5. *In Column* 1 of the Primary Census Abstract the location code number has been given indicating the district number, the tahsil or town number and the village or ward number. Thus a code number running as 5/2/25 means village No. 25, Tahsil No. 2 of District No. 5 or code number running as 5/II/5 means ward No. 5 in Town No. II of District No. 5. Town number has been given in roman figures to distinguish it from the rural code numbers.

6. *Under Column* 2, the name of village/town/ward No./Enumerator's block No. (Urban) has been given. The Hadbast number of the village has been given in brackets. A 'village' has been defined

as the area included within the jurisdiction of a revenue village and as such is inclusive of even scattered hamlets and isolated homesteads coming within the boundaries of a revenue village. A revenue mauza whether inhabited or uninhabited has been treated as a village.

A town is a place having either a Municipality, Cantonment or Notified Area or satisfying the follo wing criteria :

(i) Having a minimum population of 5,000 ;

(ii) Three-fourth of its male working population engaged in the non-agricultural pursuits ; and

(iii) Having a density of population of at least 400 per sq. km. (i.e. 1,000 per square mile).

7. The area figures (in acres) given under column 3 of rural Primary Census Abstract have been collected from the revenue authorities, whereas for the urban Primary Census Abstract the column shows the total area of the town in sq. kms. as supplied by the Municipal authorities. For wards the column has been left blank as the ward-wise area figures are not available with the Municipal Committees. The district area figures (total) have been supplied by the Surveyor General of India and represent 'geographical area' figures. The total urban area of the district has been arrived at by adding together the area of each urban area in the district as given by each Municipal Committee. District rural area figures have been derived by substracting urban area figures out of the figures supplied by the Surveyor General of India for the entire district. Total area figures of all the tahsils does not tally with the total area of the district as the former are 'land use' figures as supplied by the State Director of Land Records and the latter are 'geographical area' figures as supplied by the Surveyor General of India.

8. *Columns* 4 *and* 5 of the Abstract, give the number of occupied residential houses and the households therein.

Occupied residential house is a dwelling house and includes a house used partly as a dwelling and partly for some other purpose like shop, workshop, factory, etc., but does not include a 'vacant house' where no person was found to be residing at the time of census.

'*Census house*' is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc., used or recognised as a separate unit. It may be inhabited or vacant. It may be used for a residential or non-residential purpose or both.

Household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. It may be made up of related or unrelated persons. A servant, friend or a guest residing and eating with the household during the census period has been treated as a member of the household. On the other hand a son or a daughter residing in a hostel has not been treated as a member of the household. Their enumeration was done at the place of their usual residence i.e. hostel. A hotel or hostel where a number of persons live together is recognised as an institutional household. So is a jail.

9. *Columns* 6 *to* 8 of the Abstract show the total population (including institutional and houseless population) and its sex-wise break-up. A 'houseless person' in Census terminology has been defined as :

(i) A person who might be doing domestic service or other work with one or more households but who does not reside in any house and sleeps in the corridors, verandahs or passages in buildings or on the streets :

(ii) Wandering or nomadic tribes found to be staying in temporary huts, etc. ; and

(iii) Beggar, vagrant, tramp, sadhu, *fakir*, etc., who is found on the footpaths, streets, in places like parks, gardens, railway yards, etc.

The following abbreviations have been used here :—

P for persons indicating the total of males and females.

M for males.

F for females.

10. *Columns* 9 *to* 12 present the sex-wise break-up of the persons belonging to Scheduled Castes and Scheduled Tribes as notified in Government of India, Ministry of Home Affairs Communication No. S.R.O. 2477-A, dated the 29th October, 1956 and published as the Scheduled Castes and Scheduled Tribes lists (Modification) Order, 1956.

Scheduled Castes are such castes, races or tribes or parts of groups within such castes, races or tribes as are declared to be Scheduled Castes by the President of India's Orders issued under Article 341 of the Constitution of India.

Scheduled Tribes are such tribes or tribal communities as are declared to be Scheduled Tribes under Article 342 of the Constitution of India. There is no Scheduled Tribe in present Punjab State.

11. *Columns* 13 *and* 14 give the number of literate and educated persons. A *literate* is defined as a person who can both read and write with understanding in any language. A person who can merely read but cannot write has not been considered as literate. This column also includes figures in respect of persons having higher education.

12. *Under Columns* 15 *and* 16 the total number of male and female workers has been given. *A worker*, as defined at the 1971 Census, is one whose main activity is participation in any economically productive work by his/her physical or mental activity. And for that matter work involves not only actual work but effective supervision and direction of work.

In the case of regular work in trade, profession, service or business, the basis for work is satisfied if the person was employed one week prior to the date of enumeration. Persons temporarily incapacitated from work at the time of census enumeration due to illness, travel, holiday, temporary break-down, strike etc. have been treated as workers. However, a person who had been offered work but had not actually joined has been treated as 'non-worker'.

In the case of seasonal work like cultivation, livestock keeping, plantation works some types of household industry etc., a person's main activity has been ascertained with reference to such work in the last one year even if he was not active in the week prior to enumeration.

A man or woman who is engaged primarily in household duties such as cooking for own household or performing one's own household duties or a boy or a girl who is primarily a student attending institution, even if such a person helps in the family economic activity but not as a full time worker, has not been treated as a 'worker' for the main activity On the other hand if a person is primarily engaged in some economic activity but at the same time also attends to some household chores or attends a night school etc., he or she has been treated basically as a worker.

A person who merely receives an income such as a rent receiver or a pensioner, who does not have to work for receiving the income, has not been treated as 'worker' unless the person is engaged in some economic activity and if that activity is returned by him as the main activity of the individual.

The population classified as 'workers' is the economically active population.

13. *Columns* 17 *to* 36 furnish sex-wise distribution of workers into nine industrial categories. Brief explanatory notes for each of these categories are recorded below :—

Category I :

This category includes both the owner cultivators and tenant. Cultivator, according to the definition adopted at the 1971 Census, is a person who is engaged in cultivation by oneself or by supervision or direction in one's capacity as the owner or lessee of land held from Government or as a tenant of land from private persons or institutions for payment of money, kind or share. The term 'cultivation' involves ploughing, sowing and harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and pulses, raw jute and kindered fibre crops, cotton, etc. and other crops such as sugarcane, groundnuts, tapioca etc. and does not include fruit growing or keeping orchards or groves or working in plantations like tea, coffee, rubber, cinchona and other medicinal plantations.

Category II :

This category includes agricultural labourers. An agricultural labourer has been recognized in

census as a person who works in another person's land for wages in money, kind or share of produce. He has no risk in the cultivation. He has further no right of lease or contract on land on which he works.

Category III :

Workers engaged in livestock, forestry, fishing, hunting and plantations, orchards and allied activities, are included in this category.

Category IV :

This category includes workers engaged in mining and quarrying.

Category V :

This category includes workers engaged in manufacturing, processing, servicing and repairs in the :

(a) Household Industry.

(b) Other than Household Industry.

The household industry has been defined in Census as an industry conducted by the head of the household himself/herself and/or mainly by the members of the household at home or within the village in rural areas and only within the premises of house where the household lives in any urban area. The industry should not be run on the scale of a registered factory but may use machinery and employ power like steam engine or oil engine or electricity to drive the machinery. The main criterion of a household industry is the participation of one or more members of a household. A household industry relates to production, processing, servicing or repairs and includes making and selling (but not merely selling) of goods. It does not include professions such as pleader or doctor or barber, musician, dancer, waterman, dhobi, astrologer, etc. or merely trade or business, even if such professions, trades or services are run at home by members of the household. Persons working in other person's household industry as paid employees are also treated as workers in household industry.

Workers engaged in manufacturing including all types of production, processing, servicing or repairing of goods and not considered to be working in the household industry have been treated as engaged in other than household industry.

Category VI :

This category includes workers engaged in construction and maintenance of buildings, roads, railways, bridges, telegraph, telephones, waterways, reservoirs, etc.

Category VII :

This category includes workers engaged in any capacity in wholesale or retail trading activity and commercial transactions relating to exports and imports, real estates and properties, stock and shares, insurance, money lending, banking, etc.

Category VIII :

This category includes workers engaged in transport activity by air, rail, road or water and in services incidental to transport, such as packing, carting, loading, unloading, etc. Workers engaged in storage, warehousing and communication services such as post & telegraph, telephones, wireless, signalling, information and broadcasting are also included in this category.

Category IX :

This category includes other services such as public utility services, like electricity, gas or water supply, sanitary services, Central, State or Municipal employees, professional services, etc.

14. *Columns 37 and 38* give the total number of male and female non-workers. Non-workers have been classified under seven broad heads :

(i) *Household duties.*—This covers all those persons basically engaged in unpaid home duties doing no other work, or even if such a person may also be participating in some other work, it is not to the same extent as a whole-time worker and if the person had returned his or her main activity as attending to household duties.

(ii) *Student.*—This refers to those whose main activity is returned as a student and covers all full-time students or children attending school. Even if such person participated in some work but not to the same extent as a full time worker by merely helping casually as an unpaid family worker in family cultivation, household industry, trade or business, they are treated primarily as students.

(iii) *Retired person or a rentier.*—A person who has retired from service and is doing no other work i.e. not employed again in some full time work or does not engage himself in some other work as cultivation, in business, trade, etc., or a person who is a rentier or living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work, is classified under this head.

(iv) *Dependent.*—This category includes all dependents such as infants or children not attending school or a person permanently disabled from work because of illness or old age. It includes all non-workers, even if able bodied who have no other activity coming under any of the categories of non-workers and who are not seeking any work either but are purely dependent.

(v) *Beggars, etc.*—This covers beggars, vagrants or such cases as independent women without indication of source of income and those of unspecified source of subsistence who are not engaged in economically productive work.

(vi) *Institutions.*—This covers convicts in jails or inmates of penal, mental or charitable institution even if such persons are compelled to do some work such as carpentry, carpet weaving, vegetable growing, etc. in such institutions. An under trial prisoner in jail, however, is not included in this category and has been indicated according to the main activity he was engaged in before he was apprehended.

(vii) *Other non-workers.*—This includes all non-workers who have not come under any of the six categories above but are seeking work. A boy or a girl who has completed education or has stopped studying and is seeking work, has been included in this category. A person, irresepective of age and whether educated or not, if he reports that he is not engaged in any other activity but is seeking work, has also been included under this category.

The following abbreviations have been used in the Primary Census Abstract :—

M.C. = Municipal Committee

P. = Panchayat

C.B. = Cantonment Board

N. A. = Not Available
