FOREWORD

The District Census Handbook (DCH), compiled by the census organisation on behalf of the state Governments, is one of the most valuable products of the census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The District Census Handbook is the only publication which provides primary census abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in village and towns, etc.

The District Census Handbook series was initiated during the 1951 census. It contained important census tables and PCA for each village and town of the district. During 1961 census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three Parts—Part A related to village and town directory, Part-B to village and town PCA and Part -C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few census altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the format of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the corrolation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled caste and scheduled tribe population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class I and Class II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of Slums. The columns on Scheduled Castes and Scheduled Tribes population in statemnt IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administartion status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 census.

In order to avoid delay in publication of 1981 DCH series, it has been so designed that Part-A of the volume contains village and town directory and Part-B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH, a detailed analytical note supported by a number of inset tables based on PCA and non census data in relation to the infrastructure has been introduced to enhance its value. The district and Tahsil/Police Station/CD Block etc. level maps depicting the boundaries and other important features have been inserted at appropriate places to further enhance the value of the Publication.

This publication is a joint venture of the State Government and the Census organisation. The data have been collected and compiled in the State under the direction of Shri D. N. Dhir, the Director of Census operations, Punjab, on behalf of the State Government which has borne the cost of printing. The task of planning, designing and coordination of this publication was carried out by Shri N.G. Nag, Deputy Registrar General (of Social Studies) of my office. Dr. B.K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M.H. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

New Delhi

The 26th April, 1982.

P. PADMANABHA,

Registrar General, India.

PREFACE

As being regularly presented hithertofore since 1951 census,we have now the privilege of presenting the District Census Handbooks consequent upon 1981 census.

To shorten the time lag to minimum after the compilation of census 1981 data and issuance of this Handbook as a sort of self-contained reference book, predominantly based on census data for the district, action was initiated upon the project as early as in July 1979. The Registrar General, India indicated the revised formats and statements designed for this series of books. The improvements were with a view to making the data more useful for administrators, planners, scholars and other categories of users.

There are 134 towns categorised as urban area and 12,899 villages (45 tahsils) as the rural component in the state. The formidable task of collecting and compiling of this voluminous data for such a large number of units had its own problems and difficulties, both in the matters of chase up and in obtaining correct data which could be test-checked in terms of consistency with what was obtained and published consequent upon 1971 census data. Several gruelling cross checks had to be adopted to tally such items as area figures and the land use pattern for each unit.

The statements and schedules for collecting information from the rural areas were translated into Punjabi and also test-checked to assess their acceptability and responsiveness by those who were to make their use. (I had also unsuccessfully toyed with the idea of collecting information on some other items that could indicate comparative affluence of rural Punjab but had to give it up in light of keeping to uniformity in presentation of data on all India pattern).

The statements/schedules for town directory were transmitted to the Chief Executives of the local bodies and those for rural areas were transmitted to the SDOs (C) (since all tahsils in Punjab have been converted into sub-divisions) for necessary supply of data by the revenue staff under them. The officers and senior staff of the directorate that had been made directly responsible for houselisting operations and had reported to the field in October, 1979 were also charged with getting these through on personal contacts. This resulted in our getting the feed back by May 1980, on the conclusion of houselisting operations, though some small instalments of these schedules continued till September/October, 1980.

A cell had been created at the directorate to scrutinise the data as received and make preliminary compilation. The data as obtained from the field was supplemented with the data collected from the various heads of the departments at the state level, particularly in matters of amenities and facilities in the fields of education, medical, communications and the like. The staff working in the cell was once again out in the field for assisting in the second field operation, namely enumeration and it was only on its conclusion that the work of compilation started in May-June, 1981. The three Deputy Directors (at the regional tabulation offices) were in position about the same time in the field and the gaps in data, needing reconciliation in figures were got through these field officers on personal contacts with the concerned quarters.

On the compilation of the Primary Census Abstract (PCA) in March, 1982 when the figures were available for projection in this volume, the whole exercise was consolidated to give birth to the instant manuscript.

The data in the book is being presented in two parts—Part A comprises Village and Town Directory and Part B Primary Census Abstract villagewise and town/wardwise separately. In addition Primary Census Abstract for scheduled castes upto tahsil/town level is also presented. (There are no scheduled tribes in the state).

An analytical note based on a number of inset tables compiled out of the data from village and town directory and PCA has also been added for the benefit of the users, but the greater aim has been to present the data as compiled and leave further deeper study for those for whom the publication is meant.

We are grateful to the large number of personnel of the State Revenue Department at the village, tahsil, sub-division and district levels and the municipal staff in all the local bodies in the state for their co-operation in filling up the statements/schedules for providing the data.

The production of this book (and for that matter all the 12 District Census Handbooks) has been the handiwork of consistent and constant efforts put in jointly by almost all the staff of the directorate, though only at one point of time or the other in certain cases. The collection of data for Village and Town Directory, as mentioned earlier, was a major work in the pre-census period and after the census most of the staff was busy in tabulation and compilation of the census data both at the regional tabulation offices and at the directorate. The DCHB Cell (specially created) thereafter commenced work on inset tables, while the senior staff and the officers took to developing the fly-leaves and explanatory notes. Simultaneously the map section was deep in work for producing the maps that had to accompany these books.

I would resist the temptation of mentioning any single incumbent at any level of the hierarchy individually for apparent reasons, and would rest content with acknowledging my debt to all of them as appended hereto.

I had acted only as a co-ordinator and at times as editor and was very ably supported by a set of dedicated officers who spared no pains to push in the manuscripts to the press in a record time, unknown in the annals of this directorate so far.

As in the case of other aspects of census work connected with this gigantic decadal exercise, I always looked up to Shri P. Padmanabha, Registrar General and Census Commissioner, India, for guidance, inspiration and encouragement and I feel indebted to him. Shri N. G. Nag, Deputy Registrar General (Social Studies) was forthcoming in his unassuming and profound style for advice.

Chandigarh : D. N. DHIR,

September, 1982. Director, Census Punjab.

ACKNOWLEDGEMENTS

Preliminary work—collection, compilation and scrutiny of data relating to Village and Town Directory ;

A cell was created in July, 1979 under J.C. Kalra, Deputy Director, who out of his earlier experience and the instructions as received from Registrar General, India, directed the collection of data and allied work. He was ably assisted by D.P. Jain, Charan Singh and Vishwa Mittar, Investigators on one occasion or the other. The Statistical Assistants, who laid down the work at the foundation level at that time consisted of Malkiat Singh, Munishwar Dutt, Joginder Singh and Pawan Kumar with co-operative efforts of number of Computors, namely Mohinder Pal, R.P. Pathak, Parkash Chand, Varinder Singh, Hardeep Kaur, Satya Arora , Harbeer Kaur and Asha Vasisht.

Primary Census Abstract included in this book—manual preparation at the Regional Tabulation Offices at Jalandhar, Patiala and Bathinda :

R.P. Tomar, R.K. Singh and S.P. Grover, Deputy Directors, were incharge of those tabulation offices respectively, and put in their best to conclude the work fairly ahead of the scheduled target. They were assisted by the Investigators, namely N.S. Bhadauria, Charan Singh and Ajit Singh Dhillon, respectively. The Statistical Assistants and Computors who worked in these R.T.Os. were S.C. Bassi, Balbir Singh, Jai Dev and R.P. Singh at Jalandhar, Tarsem Lal Garg, S.K. Joshi, S.P. Goel and Varinder Singh at Patiala and Balwant Rai Bhagirath Singh (Now Investigators), Raghbir Singh, J.S. Negi and H.P. Sharma at Bathinda.

Preparation of Inset Tables, framework of Handbooks and their drafting :

Inset tables, appendices and allied tables were prepared in the specially created cell of 'District Census Handbooks' headed by S.P. Grover, earlier and later by Ajit Singh, Deputy Directors. They have had experience of such publications earlier and imparted suitable directions to the staff in the cell for presentation of the data and its analysis as per the instructions received from the office of Registrar General, India, from time to time. Charan Singh, Investigator, Balwant Rai, (Now Investigator) Raghbir Singh, Tarsem Lal, Statistical Assistants and Satya Arora, Santosh Kumari, Harbeer Kaur and H.P. Sharma, Computors worked in this cell.

The cell provided the framework of the Handbooks and the first drafts were attempted by Deputy/ Assistant Directors who were entrusted with particular volume(s). This first draft was then finalised during discussions in officers' meetings held almost daily with the Director. Thus the final draft emerged.

Maps :

The work for preparation of maps to be included in District Census Handbooks commenced under the supervision of Madhav Shyam, the then Senior Geographer, but mid-way was taken over by G.S. Gill, Assistant Director, who headed the map section during the vital period. He was ably assisted by Jiwan Singh Gill, Artist (now Senior Artist), Usha Kalra, Artist and Kulbir Singh, Draftsman. Because of his knowledge of geography and map work, he delivered the goods despite the absence of Geographer and Senior Geographer in the directorate.

Manuscript finalisation :

The final draft(s) as emerging out of the deliberations of the officers were entrusted to a cell called as 'Press Manuscript Cell' headed by M.L. Sharma, Assistant Director who was actively assisted by Balwant Rai Investigator and Santosh Kumari Computor. They raced against time frequently to give final shape to the volume(s) for onward transmission to the press.

Typing :

K.C. Pardesi, Confidential Assistant (formerly Senior Stenographer) headed this cell. His knowledge of such publications earlier was an asset. He was assisted by Ajmer Singh, Stenographer and some of the other typists from the various seats in the directorate.

JALANDHAR DISTRICT—A SHORT PROFILE

Location :

Jalandhar, is an ancient town which in the social and economic spheres can be considered as one of the toppers in the state. It is a sort of political capital of the state being home of vernacular press—as many as nine newspapers are published daily, with lacs of copies, from this place.

The district which is centrally located in the present physical layout of the reorganised state, shows visible strides in development which the state has made in the fields of agriculture, trade, transport and communication, health and education and in the transformation of better standard of living through modern and luxurious housing. Geographically, it forms an irregular triangle, bounded by Hoshiarpur District in the North East, Kapurthala District in the West and Firozpur and Ludhiana districts in the South. The Sutlej river forms its natural southern boundary, separating it from Ludhiana and Firozpur districts. It lies between 30°—58′ and 31°—37′ north latitude and between 75°—03′ and 76°—15′ east longitude in the apex of the Bist Doab, the territory lying between Sutlej and Beas rivers. Alongwith Hoshiarpur and Kapurthala districts, it forms Doaba region in the state.

Origin of Name :

The district is named aftar Jalandhara, a demon king, who finds a mention in the Puranas and Mahabharta. According to another legend Jalandhar was the capital of the kingdom of Lava son of Rama. According to yet another version Jalandhar is said to have derived its name from the vernacular term (Jalandhar) i.e. the tract lying between the two rivers Sutlej and Beas ; still another name of Jalandhar had been Trigartta, as it was watered by three rivers Sutlej, Beas and Ravi.

Short History :

(i) *Hindu Period.*—The earliest historical mention of Jalandhar occurs in the reign of Kanishka, the Kushan king of northern India in whose time a council of Buddhist teachers was held near Jalandhar about 100 A.D. to collect and arrange the sacred writings of Buddhism and to bring about reconciliation between its various sects. In the 7th century when the famous Chinese traveller and pilgrim Huen Tsiang visited India in the reign of Harsha Vardhana, the kingdom of Jalandhara or Trigartta was under Raja Utito (whom Counningham identifies with the Rapjut Raja Attar Chandra). It was said to extend 167 miles from east to west and 133 miles from north to south, thus including the hill states of Chamba, Mandi and Suket and Satadru or Sirhind in the plains. Raja Utito was a tributary of Harsha Vardhana. The Rajput Rajas appear to have continued to rule over the country right upto the 12th century, interrupted sometime or the other, but their capital was Jalandhar and Kangra formed an important stronghold.

(ii) *Muslim Period*—Jalandhar was taken by Ibrahim Shah of Ghor, 1179-88 A.D., and was a place of considerable importance in the struggle between Jasrat Khokhar and the Muhammadan Governors in 1422-42. Under the Mughal Emperors Jalandhar was always the capital of the northern and most important portion of the Jalandhar Doab which then extended to the neighbourhood of Multan (Pakistan), in fact to the whole of the Doab, as it is now constituted. During Akbar's reign, copper coins were minted at Jalandhar and his capable minister, Todar Mal, made a settlement of land revenue in Jalandhar Doab. During Jehangir's reign (1605-27), Jalandhar Doab received special attention because of Nur Jehan's attachment with Nurmahal. She had been brought up there and among other things, she got a big sarai built there in which, it is said, she halted whenever she passed between Delhi and Lahore. Guru Arjan Dev founded Kartarpur in 1588 on the site given by Jehangir to Guru Arjan Dev's father, Guru Ramdas. In Shah Jehan's reign (1627-58), the highway between Delhi and Lahore was laid out and one of the sites, where a sarai on the road was constructed, developed as Phillaur. The sarai at Dakhni, some of the bastis of Jalandhar and Phagwara, which was originally called Shah Jehanpur, came into existence during those days. During the rest of the 17th century, Jalandhar remained firmly attached to the Delhi empire. With the death of Aurangzeb in 1707, the Mughal empire began to totter, but Nadar Shah's invasion in 1739 gave it the greatest jolt. Enemies of the empire rose from all sides and among them were the sikhs from the Punjab.

(iii) *Sikh Period.*—In A.D. 1766 Jalandhar fell into the hands of Sikh misl (confedraines) of Faizullapuria, then under Khushal Singh. His son Budh Singh, who succeeded him as head of the misl, built a masonry fort in the city, the site of which is now occupied by the Killa muhalla, while several of the other leaders built forts of unburnt bricks. In 1811 Diwan Mohkam Chand was sent by Ranjit Singh to annex the

Faizullapuria possessions in the Jalandhar Doab, and Sardar Budh Singh fled to his protected possessions across the Sutlej. His troops made some resistance, but gave up Jalandhar in October, 1811 From this time it was the capital of the possessions of the Lahore state in the Jalandhar Doab, until annexation to the British dominion after the Sikh war of 1845-46. It then became the headquarter of the Commissionership of the trans Sutlej states, now known as Commissionership of Jalandhar.

(iv) *British Period.*—After the Mutiny, nothing of importance has occurred in the district. In 1858-59, the portion of the Grand Trunk Road between Sutlej and Beas, passing through Phillaur, Phagwara and Jalandhar was realigned and metalled. A decade later, the railway line between Beas, Jalandhar and Phillaur was opened. The Doab was linked with the rest of the Punjab by great railway bridges over the Beas and the Sutlej as also over the Bein. Except for minor adjustments here and there the boundaries of the district continued to remain the same as they were when it was first constituted. The district shared with the rest of the country the benefits of settled regime and administration. Jalandhar was one of the nine districts forming Revenue Commissioner's Division of Jalandhar before partition of the country. After independence, its Divisional Commissionership comprising six districts namely Gurdaspur, Amritsar, Jalandhar, Hoshiarpur, Kapurthala and Firozpur was re-constituted. During 70's Firozpur district of Jalandhar division was transferred to a newly created Firozpur division.

Area :

According to the Surveyor General, India, the district covers an area of 3,401 sq. kms. and occupies 10th position in the ranking order from the top among the 12 districts of the state, the largest district with an area of 5,874 sq. kms. is Firozpur and the smallest occupying an area of 1,633 sq. kms., is Kapurthala. In this handbook unless otherwise stated, the area figures supplied by the Director of Land Records, Punjab, have been taken for the tahsils and villages. Tahsilwise area is indicated below :—

		(*Area in sq. kms.*)		
Tahsil		*Total*	*Rural*	*Urban*
Nawashahr	..	774·7	758·6	16·1
Phillaur	..	748·5	739·3	9·2
Nakodar	..	881·9	874·2	7·7
Jalandhar	..	1008·5	900·8	107·7

Climate :

The district lying mainly in the Punjab plains is extremely hot in summer and severely cold during winter. The maximum temperature during May-June shoots upto 46°C but in winter tumbles down to 2°C in the months of December and January. Monsoon rains which are comparatively more important for crops are normally received during June-September and winter rains during December-January. The average rain-fall during the five years 1970—74 is 638 mm.

Rivers and Drains :

A major part of the district belongs to the basin of the Sutlej and only a small portion, in the north, to that of the Beas. The Sutlej enters this district near Rahon and flowing close to Phillaur and Talwan, joins the Beas at Hari Ke Pattan. The Jalandhar Doab receives the drainage of the Shiwalik hills, the drainage channels of which eventually unite in two streams known as the East or White Bein and the West or Black Bein. Besides, there are a number of *chos* or hill torrents and small water courses.

The Sutlej.—The Sutlej enters the district at village Malikpur about 26 kms. west of Ropar. It runs nearly west forming the southern boundary of Nawashahr, Phillaur and Nakodar tahsils, then turns a little north-west along the common boundary of Nakodar and Zira tahsils and then turning again west and south-west, it receives the waters of the Beas about 6 kms. away from the boundary of Jalandhar district. When in spate, the river is notorious for changing its course, it overflows its banks and fills its old branches and depressions. But its damming upstream at Ropar and Bhakra and the opening of the Sirhind canal system and Bhakra canal system have greatly reduced the flooding capacity of the river. In winter, the river contains small streaks of water and it is only during the rains that it assumes its full form.

The Eastern Bein.—The drainage of the Shivalik hills passes through the Jalandhar Doab in two streams the Eastern or White Bein and the Western or Black Bein.

The Eastern Bein is first formed by a couple of drainage channels bringing rain water from villages of the Garhshankar tahsil. It enters Nawashahr tahsil about 8 kms. from the Sutlej and is known as Jadla Bein there. Thence it runs north-west for about 26 kms. till it is joined by the Garhshankar Bein in village Bhaura. From Bhaura it continues its north-westerly direction for about 22 kms. in Nawashahr tahsil and 13 Kms. in Phagwara tahsil of Kapurthala district till it touches Ucha village in Jalandhar tahsil. From Ucha, the stream takes south-westerly direction and is joined by Kail Nadi from the western part of Nawashahr tahsil. It then reaches the Nakodar bet 6 kms. to the south-west of Malsian and runs amongst west through the bet joining the Sutlej about 6 kms. above its confluence with the Beas. The stream is mostly knee-deep in winter but after heavy rains, it rises rapidly and overflows its banks flooding the lands on either side. Even the bridge on Grand Trunk Road between Jalandhar and Phagwara used to get submerged during rainy season but had been raised appreciably.

The Western Bein.—The north-west of Jalandhar tahsil drains into the Western Bein. This stream touches the district at only two villages of Kudowal and Dhirpur, 6 kms. north-west of Kartarpur. There are three main drainage channels in the area which run westward to join the Western Bein. The most northerly channel is on the Hoshiarpur border. The middle one lies 4 to 6 kms. southward. The most southerly channel is known as the *Kingra Cho.* During the rainy season this cho causes considerable soil erosion and when in fury it leads to loss to human life and property.

Topography :

The land of the district is alluvial and its soil at different places consists of varying degrees of clay loam and sand. The only mineral found here and there is Kankar (Calcarious nodules) which is used for road making or is burnt into lime.

The district has three natural sub-divisions namely the Sutlej low land comprising Bet area of Nawashahr, Nakodar and Phillaur tahsils, the uplands east of the main stream and uplands west of the Bein stream. The uplands of the three tahsils give the appearance of a continuous plain, except for parts west of Nakodar, where low sand ridges are found.

Present Jurisdiction :

As in 1961 and 1971, the district comprises four tahsils namely Nawashahr, Phillaur, Nakodar and Jalandhar. There has been no jurisdictional change during the last decade. The number of villages as at the time of 1971 and 1981 Census remains the same i.e. 1273 (1,226 inhabited villages and 32 uninhabited villages, 15 villages have since been merged in towns). The district has 16 towns. Four towns namely Malsian, Lohian, Shahkot and Bhogpur were added to the list of towns in Jalandhar district during the decade. Tahsilwise distribution of villages is Nawashahr 291, Phillar 240, Nakodar 326 and Jalandhar 416.

Land Utilisation-Agriculture:

The economy of the district has recorded a trend of shift towards secondary and tertiary occupations. As compared to 50·70% workers who were engaged in agricultural occupations as per 1971 Census, 46·70% have been recorded to be engaged in agricultural sector at 1981 Census. The total area of the district under cultivation is 85·73%, and 80·76% of the cultivated area is irrigated. The main sources of irrigation are canals and tubewells. Wheat, maize, rice and sugarcane are the principal crops of the district. More than half of the cultivated area is accounted for by wheat. There are two sugar mills in the co-operative sector at Bhogpur and Nawashahr in the District.

The percentage of areas under different landuse is as follows:—

Land Use	*Percentage 1981*	*Percentage 1971*
(i) Forest	0·03	0·03
(ii) Irrigated area	69·24	54·36
(iii) Unirrigated area	16·49	28·68
(iv) Cultivable waste	2·05	3·66
(v) Area not available for cultivation	12·19	13·27

The above data reveal that the irrigated area in the district increased by 14·88% during the decade. The cultivated area has increased by 2·69%. The area under forest is almost negligible. The percentage of area lying as cultivable waste has also declined by 1·61% which may be due to the adequate measures taken by state government to reclaim the land for agricultural purposes, by providing effective drainage system and by constructing high embankments along the river in order to eliminate water logging during the rainy season.

Communications:

All the towns in the district are very well connected both by rail and road.

The district is served by various lines of the northern railway, all of which are broad gauge. The Jalandhar-Firozpur line serves the eastern part of Jalandhar tahsil on its way to Kapurthala and further south-west is the eastern portion of Nakodar tahsil. The northern portion of Jalandhar tahsil is served by the line leaving for Pathankot in Gurdaspur district. Hoshiarpur is served by a direct railway line. Nawashahr is connected by rail with Rahon in the south and Garhshankar in the north. Another railway line connects Phillaur with Nurmahal, Nakodar and joins the Jalandhar-Firozpur line.

National highway No. 1 i.e. grand Trunk Road from Delhi through Haryana to Amritsar and on to border with Pakistan near Wagha and NH 1(A) (Jalandhar-Tanda-Dasuya-Mukerian-Pathankot upto border with Jammu and Kashmir state) pass through the territory of the district. Upon the former are situated Phillaur, Goraya, Jalandhar and Kartarpur towns of the district. State highways passing through the district are SH 16, which connects Jalandhar with Nakodar, Moga, Kot Kapura, Muktsar and Malout and SH 23, which connects Jalandhar Cantt. with Hoshiarpur and Dharamshala. The major district roads are:—

(i) Kartarpur, Kapurthala, Nakodar and Phillaur.

(ii) Kartarpur, Kapurthala, Lohian, Giddar-Pindi and Malsian.

Besides there are many other minor district roads confined within the boundaries of the district which serve as important links between different regions. There has been a tremendous progress over the decade in the network of metalled roads. The metalled road length in the district increased from 1,058 kms. in 1970-71 to 2,691 in 1979-80.

Almost all the villages (88 ·81%) are connected with main roads through link roads.

Amenities:

Educational, Medical, Postal, Water Supply and Electricity.—The district has made a tremendous progress in the provision of educational facilities. As against 12 Arts and Science colleges in 1967, now there are 22 colleges (affiliated to Shri Guru Nanak Dev University) including three training colleges. Besides, Jalandhar city has got a sports college and a law college. There are 263 high/higher Secondary Schools, 417 Middle Schools and 1,291 Primary Schools in the district.

In the matter of medical facilities the district had 27 hospitals, 126 dispensaries and 12 primary health centres as per records in 1979-80. The district had 1998 beds in 1979-80 as against 875 in 1962 and 865 doctors in 1979-80 against only 55 doctors in 1962. The medical facilities have increased to a substantial extent in terms of number of persons per medical institution and beds and doctors as indicated below:—

	Number of persons	
	1962	1979-80
Per institution	23,970	10,631
Per bed	1,466	878
Per doctor	22,662	1,991

On an average there are 13 ·44 post offices per 100 kms. in rural area of the district. There were 31 telephone exchanges in 1979-80 as against only 10 in 1966-67.

All the inhabited villages and towns in the district are served by a chain of water works to cater to drinking water supply to the inhabitants.

Almost all the villages and the towns of the district are electrified.

Present Demographic Picture:

Population and Density.—The district has a total population of 1,734,574 persons (916,379 males and 818,195 females) as per 1981 census. The density of population as recorded at 1981 census works out to 510 persons per sq. km. which is substantially higher than the state density of 333 persons per sq. km. There is an improvement in sex ratio of the district, it being 893 at 1981 census compared to 883 at 1971. As compared to state the district has a higher sex ratio, the state ratio being 879 females per 1,000 males. The district has recorded a little higher growth rate of 19 ·26% as compared to 18 ·62 % at 1971

but significantly lower than the state growth rate of 23·89%. Rural and urban percentages of increase in population tahsilwise are furnished below.

Tahsil	*Total*	*Rural*	*Urban*
Nawashahr	+17·60	+14·93	+ 35·73
Phillaur	+12·45	+ 9·46	+ 40·69
Nakodar	+22·63	+11·82	+144·84
Jalandhar	+21·50	+ 6·44	+ 35·21
District	+19·26	+10·28	+ 40·13

The district has revealed 35·32% of the population residing in urban areas against the corresponding state percentage of 27·68% as at 1981 census.

Scheduled Caste Population.—The district has relatively much higher percenatge 36·28% as compared to 26·87% for the state. The percentage of scheduled caste population in urban area of the district is 26·39 which is significantly lower than the proportion of 41·68% in rural area. Ad-Dharmi, Balmiki, Chamar and Megh are the important scheduled castes in the district.

Literacy.—The district has recorded substantially higher literacy rate of 49·18% as against the corresponding state literacy of 40·86%. The literacy rates for males and females are 55·18% and 42·46% respectively. It ranks second in terms of literacy, the first being Ludhiana district with literacy rate of 50·60%.

Occupations.—The percentage of main workers has shown some improvement over that of 1971, the percentage increasing to 27·99 at 1981 from 27·10 at 1971 Census. The percentage of female workers has also recorded a significant increase over the 1971. Their percentages increased by 1·11 from 1·41 in 1971 to 2·52 in 1981.

Trade and Commerce.—The trade and commerce activities of the district are mainly dependant on its agro-based economy. Agriculture is increasingly getting commercialised instead of being a way of life as hithertofore. New innovations in terms of improved seed and chemical fertilizers have given an impetus to the agricultural produce. Farmers plan cash crops in such a way that they get maximum return in money value. Main crops are wheat, gram, potatoes during Rabi season and maize, paddy, groundnut and sugarcane during Kharif season. A number of important grain markets exist in the district for sale and purchase of foodgrains. Vegetable growing and marketing has picked up tremendously in the recent years.

As per 1980 economic census, out of a total of 461,238 enterprises, in the State 63, 367 (13·7%), enterprises were recorded in Amritsar district followed by Ludhiana 60,785 (13·2%) and Jalandhar 53,677 (11·6%). In case of urban areas too Jalandhar maintained its third position pertaining to the number of enterprises within and without premises. In case of rural areas, first place was acquired by Hoshiarpur district followed by Amritsar, Gurdaspur and Jalandhar in that order. In respect of agricultural enterprises Jalandhar again occupies third position with 1,745 while Ludhiana returned the highest 3,223 and Gurdaspur the second with 1,909 such enterprises.

Industry:—Jalandhar occupies a place of pride on industrial map of the state alongwith Ludhiana. These two districts are the homes of manufacturing, servicing and repairing units. The two are a sort of traditional homes of small industries and are well known all over the world. As Ludhiana is the home of of hosiery industry, so is Jalandhar for sports and leather goods. There were about 3,000 small scale and 15 medium and large scale industrial units in the district in 1980.

The large and medium sized factories are engaged in multifarious industrial activities such as fabricated products, metal furniture and fixtures, hand tools, general hardware, utensils, cutlery, agricultural machinery parts, fans, sewing machines, sports goods, rubber and plastic goods, leather products, brass and chromium fittings, surgical instruments, motor body building, electrical machinery apparatus, appliances, chemical and chemical products, auto parts, paper and paper products.

As per 1980 economic census, out of a total of 446,132 (96·7%) non-agricultural enterprises, maximum number 62,079 (13·9%) of enteprises were returned from Amritsar followed by Ludhiana 57,562 (12·96%) and Jalandhar 51,932 (11·7%).

Out of total 1,259,358 persons usually working in the non-agricultural enterprises, the maximum 210,054 (16·7%) were recorded in Ludhiana district followed by Amritsar 172,589 (13·7%) and Jalandhar 158,899 (12·6%). There has been a decline of 4·0% in working population of primary sector during the decade 1971—81 and corresponding gain in secondary and tertiary sectors which is an indication of shift in the over all economy of the district from agriculture to industries.

Among the export table manufactured articles are sports goods, furniture , cycle and cycle parts, sewing machines and improved agricultural implements, Khadi cloth, sugar, hand tools, furniture, auto parts. The important imports to the district are tea, salt, kerosene oil, chemicals, rubber goods, motor spirits, tractors and agricultural implements, metals, gunny bags, cotton piece goods, cotton yarn, warm cloth, cement, machinery and vanaspati ghee.

Historical Towns : There is no city or town in the state, known pre-eminantly as a historical place in the district. There are very few monuments of the early Hindu period.

At Jalandhar, there is a tank in Gupha Temple which is said to be the bathing place of the demon king Jalandhara. There is another tank of Bhikham Sar at Mohammadpur near Alawalpur which is said to have been dug by Bhisham Pitama, the grand uncle of the Kaurvas and Pandvas.

There are mounds at Malsian and Nakodar which are supposed to be the ruins of ancient towns. The earliest buildings of the Muslim period are the shrine of Imam Nasar-ud-din and the Jama Masjid and Hafiz Alamgir Masjid, in Jalandhar town. The Basti Sheikh Darvesh in Jalandhar, the mosque and tomb of Sheikh Darvesh, are good specimens of architecture of Pattan time. The royal sarais at Nurmahal and Dakhini are the relies of Mughal period. The sikh buildings of religious importance exist at Kartarpur. The fort at Phillaur was built by Maharaja Ranjit Singh. Tara Singh Ghaiba's fort at Nakodar and Diwan Mohkam Chand's samadhi at Phillaur are worth noticed, as also the Naugajah graves at Rahon, Jalandhar and in between Alwalpur and Kartarpur.

The name of Nurmahal is associated with Nurjahan the consort of Jehangir. She is said to have been brought up here. She got a Sarai built here which is to this day a place of interest, This monument is being looked after by the Archaeological Department.

The town of Rahon has a long history from Raja Raghaba Rajput Chieftain. Later it fell into the hands of Gujjars whose Chief Raho changed its name Rahon from its earlier name Raghupur. According to another version the town was named after a certain lady named Raho by the leader of Rajputs, Rana Rajpal. It was once a flourising trade centre enroute to Tibet and Central Asia. It has many places of historical interest. Samadhi of Rana Udho, Panch Tirthian tank, Ramsar tank, Suraj Kund are some of the important historical remains in the town.

ANNEXURE

Jurisdictional Changes Jalandhar District

No jurisdictional change took place in the district after 1971 census

INTRODUCTION TO DISTRICT CENSUS HANDBOOK

Keeping in view the needs of planners, for exhaustive infra-structural and amenity data up to village level, required for micro-level planning, the formats of the village and town directory of 1981 DCH series have been redesigned and some new features useful for planning have been added while maintaining the comparability with 1971 data. A few new items of information such as adult literacy centres, primary health sub-centres, community health workers in villages, etc. have been introduced to meet some of the requirements of revised minimum needs programme. A new item 'approach to village' has been introduced to give an idea about the villages in the district which are inaccessible. A new column 'Total population and number of households' has been introduced to examine the correlation of amenities with the population and number of households they serve. Two more appendices namely (i) listing the villages where no amenities are available and (ii) list of villages indicating ranges according to the proportion of scheduled castes to total population have been added with the same object in view. A significant addition is class of the town in all the six statements of the town directory, which alongwith population and decadal variation since 1901 to 1981, will prove quite useful for analysing the infrastructure of amenities in the urban area of state.

Contents: The 1981 DCH series have been divided into two parts. Part A contains village and town directory and Part B, PCA of villages and towns and PCA for scheduled castes up to tahsil/town levels. Both parts are being published in this volume.

The village directory contains information about total area of each village in hectares, total population and number of households, amenities/conveniences available in the village, staple food of the people and the land -use pattern. There is also information about the nearest town and its distance from the village and approach to the village.

The town directory presents data on each town with the aid of six statements giving the status and class of the town, the decadal population and growth rate since 1901 to 1981, physical and locational aspects, municipal finance and availability of amenities/ facilities like medical, educational, banking etc., trade commerce and industry.

PCA incorporates tahsilwise data for each village and each town/ward under the following heads:

(i) Area in hectares & sq. kms.

(ii) Number of occupied census houses.

(iii) Number of households.

(iv) Total population.

(v) Scheduled caste population (there is no scheduled tribe in Punjab State).

(vi) Literates.

(vii) Main workers classified into four categories of cultivators, agricultural labourers, household industry and other workers.

(viii) Marginal workers.

(ix) Non-workers.

Maps: A map of the district and a map for each tahsil of the district have been included.

The district map shows the district boundary and location of its headquarter, tahsil boundaries and location of its headquarters, national highway, state highway, important metalled roads, railway lines, river and streams, towns and census villages according to population size, post and telegraph offices, degree colleges and technical institutions, rest houses etc.

The tahsil map contains boundary of tahsil and location of tahsil headquarter, villages with location code numbers, villages with population size, uninhabited villages with location codes, urban areas with location codes, roads, railways and service facilities such as post and telegraph offices, higher secondary schools, hospitals etc.

Besides both the district and tahsil maps have an inset map where additions or loss of territory has taken place during the decade, has been shown.

Sources: Whereas PCA contains census data, for compilation of village and town directory, the relevant schedules alongwith comprehensive instructions were sent to the revenue officers (for rural areas) and executive officers of municipal bodies (for urban areas) to be filled in at their end. The completed schedules were collected from the relevant quarters during the houselistin operations in April, 1980 by the staff of this directorate. The schedules were scrutinised at the directorate and the directories were compiled therefrom.

Census Concepts and Definitions—

Village and town directory

Rural-urban classifications.—The 1981 census data are being presented by rural and urban areas as in the previous censuses.

As far as rural area is concerned 'village' has been adopted as the lowest census unit.

Rural areas 'Village':

The definition of the village adopted in census is identical with that of 'mauza' given under section 3(i) of the Punjab Land Revenue Act, 1887. It is the 'revenue estate' determined as such for the purpose of levy and collection of the land revenue. The revenue estate is defined in the Act *ibid* as an area:

(a) of which a separate record of rights is maintained or

(b) which has been separately assessed to land revenue or would have been so assessed if the land revenue had not been realised or compounded or redeemed or

(c) which the State Government has otherwise declared as an Estate.

The village is thus not merely the *abadi deh* (red lined area) for census taking but the entire land coming within the fixed boundaries of each village in terms of the Act *ibid*.

There are 1,273 villages (including 34 uninhabited and 13 since covered in urban area in Jalandhar district).

Urban areas 'Town':

The following definition of an 'urban' area has been adopted at the 1981 census which is analogous to the criterion adopted in 1961 and 1971 censuses with some minor variation (as indicated below):

(a) All places with a corporation, municipality or cantonment board or notified town area.

(b) All other places which satisfied the following criteria :

(i) a minimum population of 5,000 ;

(ii) at least 75 percent of the male working population engaged in non-agricultural (and allied) activity and

(iii) a population of at least 400 per km^2 or (1,000 per square mile).

The urban criterion of 1981 census varies slightly from that of 1961 and 1971 censuses, in that the males working in activities such as forestry, logging etc. were then treated as engaged in non-agricultural activity. It, therefore, contributed to the 75 percent criterion in 1961 and 1971 censuses whereas in the 1981 census these activities have been treated as on par with cultivation and agricultural labour for the purpose of this criterion.

Prior to the 1961 census, the definition of 'urban' area was somewhat liberal and a lot was left to the discretion of the local authorities. At the 1971 census, the state directors of census operations were also given discretion in marginal cases to include, in consultation with the State Government, a place that had other distinct urban characteristics or to exclude a deserving place from being treated as 'urban'.

Urban area in Jalandhar district :—Four new towns namely; Shahkot, Bhogpur, Malsian and Lohian all with N.A.C. status were added to the district at 1981 census. Although State Government abolished their N.A.C. status from October 1980, along with 12 other N.A.Cs, these have been treated as urban area for the purpose of 1981 census since it was decided to freeze the urban frame as on 30th September, 1981.

Urban Agglomeration (UA) : Apart from town/city (a town with a population of one lakh and above), the 1971 concept of urban agglomeration is also adopted for the 1981 census. Very often large railway

colonies, university campuses, port areas, military camps etc., came up outside the statutory limits of the city or town but adjoining it. Such areas may not by themselves qualify to be treated as towns but if they form a continuous spread with the town, they are outgrowths of the town and deserve to be treated as urban. Such towns together with their outgrowths have been treated as one urban unit and called 'urban agglomeration'.

An urban agglomeration may constitute :—

(a) A city with continuous outgrowth (the part of outgrowth being outside the statutory limits but falling within the boundaries of the adjoining village or villages) ;

(b) One town with similar outgrowth or two or more adjoining towns with their outgrowths as in (a) or

(c) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Urban Agglomeration in Jalandhar District : No urban unit of Jalandhar District could be treated as an urban agglomeration and the district is therefore an exception to this effect.

Standard Urban Area (SUA) : A new concept of standard urban area (SUA) as introduced in 1971 census was also followed for the 1981 census. The essential reqnirements for the constitution of a standard urban area are :

(i) it should have a core town of a minimum population of 50,000 ;

(ii) the contiguous 'areas' made up of other urban as well as rural administrative units should have mutual socio-economic links with the core town and

(iii) in all probabilities this entire area should get fully urbanised in a period of two or three decades.

Certain SUAs were determined on this basis in 1971 and some basic data were presented for 1951, 1961 and 1971 for such areas and their components. Similar data are being presented for the SUAs in 1981 also. The idea is to present basic data for these areas for four to five decades so that the urbanisation process in those areas can be studied.

Standard Urban Area in Jalandhar District : In Jalandhar district, Jalandhar was the only urban area having a population above 50,000 as at 1971 census and SUA was delineated around Jalandhar Municipal Committee. This SUA continued for 1981 also with urban component of (a) Jalandhar Municipal Corporation and (b) Jalandhar Cantt. while the rural component comprised the villages listed below:

Name of SUA	*Rural Component with Hadbast Numbers*	
Jalandhar	Reru	(207)
	Sherpur	(212)
	Suchipind	(215)
	Ladhewali	(220)
	Dakoha	(223)
	Dhanowali	(189)
	Nangal Shame	(219)
	Chohak	(218)
	Dhaliwal	(278)
	Paragpur	(225)
	Baring	(224)
	Sufipind	(231)
	Alladipur	(232)
	Khusropur	(246)
	Sansarpur	(247)
	Dhin	(248)
	Halotali	(250)
	Luhar Nangal	(251)
	Subhana	(249)
	Mithepur	(302)
	Sangowal	(115)
	Kingra	(301)
	Khurla	(299)
	Nagra	(158)
	Garhwahudan	(304)

DEMOGRAPHIC CHARACTERISTICS BASED ON ANALYSIS OF INSET TABLES (PRIMARY CENSUS ABSTRACT)

TABLE 1

Population, Number of Villages and Towns, 1981

Sl. No.	Name of Tahsil	Population									No. of Villages		No. of Towns
		Total			Rural			Urban			Total	Inhabited	
		P	M	F	P	M	F	P	M	F			
1	2	3	4	5	6	7	8	9	10	11	12	13	14
1	Nawashahr	329,582	173,054	156,528	280,695	147,152	133,543	48,887	25,902	22,985	291	282	3
2	Phillaur	301,702	159,835	141,867	265,574	140,356	125,218	36,128	19,479	16,649	240	232	3
3	Nakodar	273,882	143,973	129,909	229,429	120,518	108,911	44,453	23,455	20,998	326	318	4

Population :

Table 1 gives tahsilwise break up of population in the district for total, rural and urban areas by sex, number of total and inhabited villages and number of towns as recorded in 1981 census. The district has recorded a population of 1,734,574 persons ; 916,379 males and 818, 195 females and ranks third in population size amongst the districts of the state. Amongst tahsils, Jalandhar is the most populous one, returning a total population of 829,403 persons while Nakodar is the least populous with a population of 273,882 persons. Thus, Jalandhar tahsil in population size is three times larger than Nakodar.

The proportion of urban population works out to 35.32 per cent for the district as against 27.68 per cent for the state as a whole. Jalandhar tahsil is the most urbanized returning 58.25 per cent of the population for urban areas. In other three tahsils, the corresponding figure ranges between 16.23 per cent for Nakodar to 11.97 per cent for Phillaur. There are 16 towns in the district ; 6, including a Class I town, are located in Jalandhar tahsil while 3 each are in Nawashahr and Phillaur tahsils and 4 in Nakodar tahsil.

There are 1,226 inhabited villages in the district in which, all told, 1,121,983 persons have been recorded in 1981 census.

Sex Ratio :

The district has a ratio of 893 females per thousand males which is higher than state sex ratio of 879 for 1981 census.

TABLE 2

Decadal Change in Distribution of Population

Sl. No.	Tahsil	Population						Percentage Decadal Variation (1971—81)		
		1971			1981					
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10	11
1	Nawashahr ..	280,249	244,230	36,019	329,582	280,695	48,887	+17.60	+14.93	+35·73
2	Phillaur ..	268,290	242,612	25,678	301,702	265,574	36,128	+12·45	+9·46	+40·69
3	Nakodar ..	223,326	205,170	18,156	273,882	229,429	44,453	+22·63	+11·82	+144·84
4	Jalandhar ..	682,636	325,325	357,311	829,408	346,285	483,123	+21·50	+6·44	+35·21
	District Total ..	**1,454,501**	**1,017,337**	**437,164**	**1,734,574**	**1,121,983**	**612,591**	**+19·26**	**+10·28**	**+40·13**

Growth Rate :

Table 2 gives the distribution of population for two censuses i.e. 1971 and 1981 for each tahsil. Jalandhar district has shown comparatively low growth rate of 19.26% during the last decade as against 23.89% for the state as a whole. Interestingly, rural growth rate of the district was 10.28% during 1971—81 against corresponding growth of 17.27% for the state. However, there has been a substantial growth in the urban population which works out to 40.13% for the district during the last decade as against 44.51% for the state as a whole. The spectacular high urban growth rate of the district can be atributed to accelerated expansion in trade and commerce and in industry in Jalandhar city, as also to some extent to out-migration of rural population to foreign countries, other urban centres within the state or outside, resulting in low rural growth rate.

Tahsil Nakodar has recorded the highest growth rate of 22.63% and Phillaur the lowest growth rate at 12.45%. Nawashahr tahsil leads other tahsils in rural growth rate at 14.93% and Jalandhar tahsil has shown the lowest growth rate of 6.44%. Urban growth rate amongst tahsils varies between 35.21% for Jalandhar to 144.84% for Nakodar, which is apparently due to the addition of the population of three new towns namely Malsian, Shahkot and Lohian with a total urban population. By excluding the population of these three towns, the urban growth rate for Nakodar works out at 44.52% which is more or less in consonance with the urban growth rate of other tahsils and for the urban district.

Villages :

Table 3 shows the distribution of inhabited villages according to population ranges.

TABLE 3

Distribution of villages by population ranges

Ranges of Population	No. of villages in each range	Percentage of villages in each range
1	2	3
Less than 200	171	13·95
200—499	260	21·21
500—1,999	693	56·52
2,000—4,999	95	7·75
5,000—9,999	7	0·57
10,000 and above	..	..
District Total	**1,226**	**100·00**

There are 1,226 inhabited villages in the district. The average size of an inhabited village works out to 915 persons. Small sized villages with less than 200 population number 171 in the diistrict and comprise 13.95% of the total inhabited villages. Villages in the population range 200—499 persons constitute 21.21%. Thus, the villages recording population below 500 persons form more than 35% of the total villages. Medium sized villages in the population range of 500—1,999 persons form the highest proportion (56.52%). Villages in the population range of 2,000—4,999 persons, 95 in number, comprise a paltry 7.75%. There are only seven villages in the population range 5,000 to 9,999 and none at all with a population of 10,000 and above.

Density :

The density of population in the district works out to 510 persons per sq. km. which is significantly higher than the State's density of 333. The district has recorded a substantial increase in density during, 1971—81 which shot up from 428 persons per sq. km. in 1971 to 510 persons per sq. km. in 1981. Table 4 gives the distribution of villages by density ranges.

TABLE 4

Distribution of Villages by Density

Range of density (Per sq. km.)	Total number of villages in each density range	Percentage of villages in each density range
1	2	3
—10	12	0·98
11—20	14	1·14
21—50	51	4·16
51—100	61	4·98
101—200	169	13·78
201—300	234	19·09
301—500	401	32·71
501+	284	23·16
District Total	**1,226**	**100·00**

Of the total 1,226 inhabited villages, 32.71% of the villages are in density range of 301—500 persons per sq. km. and 23.16% in density range of 501 persons and more per sq. km.. The villages with density upto 300 comprise 44.13%. The density in the rural part of Jalandhar district works out to 343 persons per sq. km.

Scheduled Caste Population :

The district has a relatively higher percentage of scheduled caste population at 36.28% as compared to 26.87% for the State.

Table 5 gives villages according to percentage range of scheduled caste population to total population.

TABLE 5

Proportion of Scheduled Caste Population to Total Population in the villages

Percentage range of scheduled caste population to total population	No. of villages in each range	Percentage of villages in each range
1	2	3
Nil	67	5·47
Less than 5	26	2·12
6—10	28	2·28

21—30	173	14·11
31 and above	833	67·94
District Total	**1,226**	**100·00**

Majority of villages, 833 (67.94%) have scheduled caste population above 31%. Villages which have scheduled castes populations between 21 to 30 per cent comprise 14.11% and the remaining 17.95% villages have reported scheduled caste population below 20%.

Table 6 gives proportion of scheduled caste population in each town of the district.

TABLE 6

Proportion of Scheduled Caste Population in Towns

Name of the town	Total population	Total Scheduled Caste population	Percentage of Scheduled Caste population to total population
1	2	3	4
1. Adampur M.C.	10,960	2,447	22·33
2. Alawalpur M.C.	5,851	2,953	50·47
3. Banga M.C.	13,490	3,713	27·52
4. Bhogpur M.C.	6,882	1,763	25·62
5. Goraya N.A.C.	8,802	1,953	22·19
6. Jalandhar Municipal Corporation	408,196	100,831	24·70
7. Jalandhar Cantt. C.B.	33,356	5,893	17·67
8. Kartarpur M.C.	17,878	7,639	42·73
9. Lohian N.A.C.	5,496	1,406	25·58
10. Malsian N.A.C.	5,700	2,214	38·84
11. Nakodar M.C.	26,239	8,632	32·90
12. Nawashahr M.C.	26,726	7,827	29·29
13. Nurmahal M.C.	9,676	3,140	32·45
14. Phillaur M.C.	17,650	6,096	34·54
15. Rahon M.C.	8,671	3,685	42·50
16. Shahkot N.A.C.	7,018	1,446	20·60
All Towns	**612,591**	**161,638**	**26·39**

The proportion of scheduled caste population in urban areas of the district is 26.39 per cent which is substantially lower than 41.68 per cent obtained in the rural areas. Alawalpur has the highest (50.47 per cent) and Jalandhar Cantt. the lowest proportion (17.67 per cent) of scheduled caste population. There is no scheduled tribe in Punjab State.

Literacy:

The district has recorded a literacy rate of 49.18 per cent as against 40.86 per cent for the State. The male literacy rate is 55.18 per cent and female literacy rate 42.46 per cent. The literacy rates for rural and urban areas of the district are 44.10 per cent and 58.48 per cent respectively. Tahsilwise comparison of literacy rates can be made from table 9 (reproduced later). Jalandhar tahsil returned the highest literacy rate of 54.52 per cent and Nakodar the lowest literacy rate of 41.31 per cent. Table 7 gives the literacy rate by range of population size of the villages.

TABLE 7

Literacy Rates by Population Ranges of Villages

Range of Population	No. of villages in each range	Literacy rate
1	2	3
Less than 200	171	37·68
200—499	260	40·34
500—1,999	693	43·26
2,000—4,999	95	47·56
5,000—9,999	7	47·34
10,000+	—	—
Total	**1,226**	**44·10**

It will be seen that literacy rates keep on improving as we move from villages of smaller size to the bigger ones. Starting from a literacy rate of about 38 per cent for smallest sized villages it is recorded at around 47.5 per cent for villages with a population of 2,000 and above.

Table 8 gives literacy rate for each town of the district.

TABLE 8

Literacy Rates For Towns

Name of the Town	Literacy Rate
1	2
1. Adampur M.C.	67·42
2. Alawalpur M.C.	56·95
3. Banga M.C.	62·55
4. Bhogpur M.C.	55·00
5. Goraya N.A.C.	55·95
6. Jalandhar Municipal Corporation	59·43
7. Jalandhar Cantt. C.B.	59·61
8. Kartarpur M.C.	53.05
9. Lohian N.A.C.	48·14
10. Malsian N.A.C.	41·89
11. Nakodar M.C.	56·32
12. Nawashahr M.C.	56·21
13. Nurmahal M.C.	57·19
14. Phillaur M.C.	58·95
15. Rahon M.C.	44·02
16. Shahkot N.A.C.	54·53
All Towns	**58·48**

As against the urban literary rate of the district prevailing at the level of 58.48 per cent, Adampur town has returned 67.42 per cent. Banga town ranks second with corresponding proportion of 62.55 per cent. The town is inhabited by affluent section of society with a repute of high incidence of travelling abroad. Jalandhar Corporation and Jalandhar Cantt both have recorded literacy rates of about 60 per cent which is attributed to net work of educational institutions which has sprung up in these urban areas. Malsian town is at the bottom amongst towns reporting literacy rate of 41.89 per cent which is more or less of an urbanised village.

Working Population :

Table 9 gives the proportion of literates, workers, non-workers and scheduled castes population in the district. The main workers constitute 27.99 per cent as against 29.35 per cent for the State. There are 50.73 per cent male workers and 2.52 per cent female workers. Female workers have recorded an improvement over 1971 when these comprised only 1.41 per cent of the total working force. 46.70 per cent are engaged in agricultural pursuits either as cultivators or agricultural labourers as compared to 50.70% in 1971. Thus there has been a decline of 4% in the primary sector, indicating a shift from primary sector of economy to secondary and tertiary sector. This is an indicator of socio-economic development leading to an acceleration of the process of urbanisation in this important district of the state.

BRIEF ANALYSIS OF VILLAGE AND TOWN DIRECTORY

VILLAGE DIRECTORY

Amenities available in the villages:

In the annexures immediately following this note, distribution of villages according to availability of different amenities/facilities has been indicated in table 10 while table 11 indicates the proportion of rural population served by these amenities and table 14 indicates the distribution of villages according to population range and amenities available. Table 13 indicates the distribution of these villages according to the distance from the nearest town and availability of different amenities and according to it, out of 1,226 inhabited villages, 520 (42.41%) have a town at a radius of 5 kms., 682 (55.63%) villages have an urban centre in a distance slab of 6-15 kms., and the remaining 24 (1.96%) have an urban centre in a slab of 16—50 kms. This indicates that by and large the district is knitted around urban centres and as many as 98.04% of the villages are within a range of 15 kms. of an urban centres.

Table 12 sums up the number of villages where certain amenities are not available within the jurisdiction of the villages and the distance ranges where the inhabitants of these villages avail them.

Amenity-wise analysis reads below :

Educational facilities.—Of the total 1,226 inhabited villages in the district, 1,082 with a rural population of 98.07% of the district are equipped with the facility of at least a primary school. Of the 144 villages which lack this basic facility of education, 142 can avail of this amenity within a distance of 5 kms and only 2 villages are in the distance range of 5—10 kms for the minimal educational facility.

Further , out of 1,226 inhabited villages, 520 villages, have one or the other urban centre within distance range of 0-5 kms and of these 520 villages 88.84% enjoy the facility of primary education. Out of 682 inhabited villages having a town within distance range of 6—15 kms, 602 (88.26%) possess the facility of at least a primary school. Out of 24 inhabited villages, which lie within a distance range of 16—50 kms from an urban centre, 18 (75%) have such a facility within the village. Further 291 (67.52%) out of the 431 villages of population size less than 500; 689 (99.42%) out 693 villages with a population range 500-1,999 and all the villages of population 2,000 plus possess the facility of at least a primary school. Thus, 32.48% of small villages with population less than 500 still lack the minimum educational facility of a primary school.

Tahsilwise percentages of villages having educational facility are 87.94% for Nawashahr, 89.65% for Phillaur, 88.67% for Nakodar and 87.31% for Jalandhar.

Medical facilities :—Out of 1,226 inhabited villages, 308 (25.12%) possess the facility of at least one of the medical institutions viz hospital, maternity and child welfare centre, health centre, dispensary and the like. The proportion of villages enjoying any of these medical facilities is the highest in Nawashahr tahsil (31.20%) and the lowest (18.23%) in Nakodar tahsil. 46.37% of the rural population of the district can avail the medical facility within the village of residence. Proportion of rural population possessing any of the medical facilities is highest (52.41%) in Phillaur tahsil and lowest (33.40%) in Nakodar tahsil. Of the 918 villages where the medical facility is not available within the villages, residents of 756 villages can avail the facility by covering a distance of less than 5 kms, of 153 villages by Commuting a distance of 5—10 kms. and of the remaining 9 villages by covering more than 10 kms. Out of 308 villages which are benefited with the medical facility, 145 (27.88%), 158 (23.17%) and 5 (20.83%) have an urban centre respectively within a distance range of 0—5, 6—15 and 16—50 kms. Out of 431 villages of population size less than 500, only 18 (4.17%) have the benefit of medical facility. Of the 693 villages of population range 500-1,999, 210 (30.30%) have this facility. Of the 95 villages in the population range of 2,000-4,999, 73(76.84%) villages possess the facility. And all the seven villages of population range over 5,000 have one or the other medical facility.

Drinking water :—All the villages invariably enjoy the facility of drinking water.

Post and Telegraph.—The post and telegraph facility is enjoyed by 440 villages constituting 35.89% of 1,226 inhabited villages. Tahsilwise highest proportion (40.07%) of villages are possessing the facility in Nawashahr tahsil and the lowest 32.74% in Jalandhar tahsil. The proportion of rural population enjoying post and telegraph facility in the district is 61.34% the highest proportion being in Phillaur tahsil (64.54%) and the lowest (58.35%) in Jalandhar tahsil. Of the 786 villages which do not have post and telegraph facility within the village, residents of 716 villages can avail by covering a distance of less than 5 kms. and the remaining 70 by commuting a distance of 5-10 kms. Further, according to distance range from the nearest town, 37.88% villages which have an urban unit with a radius of less than 5 kms., 34.46% villages which are within the distance range of 6-15 kms and 33.33% of villages

which have an urban unit within a distance range of 16—50 kms possess the post and telegraph facility within the village.

Communications:—Population of 491 villages constituting 53.03% of the total rural population of the district is served by the public transport system like bus or train, 735 villages do not have any facility of communication within the jurisdiction of the village. Of these 735 villages, residents of 645 villages can avail of the communication facility by travelling a distance of less than 5 kms and those of 90 villages by commuting a distance between 5-10 kms. According to distance range from the nearest town this facility is available to 41.34% of the villages having an urban centre within 5 kms., to 38. 42% of the villages which have a town within a distance range of 6-15 kms. and to 58.33% of the villages which have an urban unit in the distance range of 16-50 kms. The highest proportion, 75.79% of villages with this facility are in the population range 2,000—4,999. This facility is more wanting in villages of smaller size.

Approach by Pucca Road :—Of the inhabited villages, 88.74% covering a rural population of 94.26% have been recorded to be connected by a pucca road. Nawashahr Tahsil has the highest proportion 93.32% of villages served by this facility. The proportion of villages which are connected by a pucca road is the highest 92.30% in respect of villages which are in a distance range of less than 5 kms. from an urban centre and the lowest 85.92% in respect of villages falling in distance range of 6-15 kms. According to population range 100% of the villages of population size more than 5,000,97.89 %of the villages with population size 2,000-4,999 94.37% of the villages comprising the range 500—1,999 and 77.49% villages of less than 500 population are accessible by a pucca road. Thus, accessibility of villages by a pucca road has direct bearing on the size of the villages.

Power Supply :—The power supply is available in 1,209 (98.61%) villages out of the total of 1,226 villages of the district which cover 99.96% of the rural population of the district. All the villages of Nawashahr and Phillaur Tahsils, 98.42% of the villages covering a population of 99.94% of Nakodar, and 96.95% villages of Jalandhar with a population of 99.93% enjoy the facility of power supply, 99.23%of the villages facility which have a town within a distance range of less than 5 kms. 98.09% having an urban centre between 6-15 kms. and 100% which have an urban unit between 16-50 kms. have the facility of power supply.

Market/Hat :—Regular weekly, fortnightly or monthly markets/hats are not common in the district and this state. Temporary markets/hats are held in the state only during fairs and festivals, and these generally relate to eatables and refreshments only.

Land use Pattern :—The land use pattern is depicted in table No. 15. The table reveals that 85.73% of the total area of the district is under cultivation. Tahsil Phillaur has the highest percentage of cultivated area (87.46%), followed by Nakodar (86.97%), Jalandhar (86.75%) and Nawashahr (81.40%). The Proportion of irrigated area to the total cultivated area in the district is 80.76%. The canals and tubewells are the main sources of irrigation in the district.

TOWN DIRECTORY

Urban Population :

Table 16 shows growth rate, density and sex ratio of urban population in the district during 1981 census and in the previous three censuses in relation to state.

TABLE 16

Growth, Density and Sex Ratio of Urban Population in the District in Relation to the State

Census Year	District						State					
	Total population	Urban population	% Urban population	Decadal percentage variation in urban population	Density (population per sq. km)	Sex ratio (No. of females per 1,000 males)	Total population	Urban population	% urban population	Decadal percentage variation in urban population	Density (population per sq. km.)	Sex ratio (No. of females per 1,000 males)
1	2	3	4	5	6	7	8	9	10	11	12	13
1951 ..	1,054,136	2,747,71	26·06	+35·22	N.A.	806	9,160,500	1,989,267	21·72	+20·02	N.A.	807
1961 ..	1,226,182	3,499,88	28·54	+27·37	4,147	813	11,135,069	2,567,306	23·06	+29·06	4,090	817
1971 ..	1,454,501	4,371,64	30·05	+24·91	4,067	878	13,551,060	3,216,179	23·73	+25·27	4,648	856
1981 ..	1,734,574	6,125,91	35·32	+40·13	4,354	871	16,788,915	4,647,757	27·68	+44·51	3,875	865

The data reveal that there is consistent increase in the percentage of urban population from 26.06% in 1951 to 35.32% in 1981. During all the censuses from 1951 to 1981 the proportion of urban population is higher for the district as compared to the state as a whole.

Growth Rate :

Decadal growth rate for urban areas of the district works out to 40.13% for the period 1971—81 as against the state's urban growth rate of 44.51% for the said period. As will appear from col. 5 of table 16, the growth rate for the district has been declining upto 1961—71, through the period 1951—61. The inordinarily high growth rate during 1941—51 (35.22%) was apparently on account of the partition of the country and the state in 1947. Thus the period 1971—81 saw the reversal of the declining trend when the growth rate of 40.13% was recorded.

Density :

The district has recorded a decline in density by 80 persons per sq. km., during the decade 1961—71, from 4,147 in 1961 to 4,067 at 1971. During the decade 1971—81 the density has appreciably increased by 287 persons per sq. km., which can be attributed to the spectacular growth of trade, commerce and industry, besides addition of four new towns to the district. As compared to state, the district has shown a considerably higher urban density as of 1981 ;it being 4,354 persons per sq. km. as against the state's 3,875 persons per sq. km.

Sex Ratio :

The district has shown a consistently increasing trend in the urban sex ratio from 806 in 1951 to 878 in 1971. However, in 1981 census urban sex ratio was 871 showing a decline from 1971 though it is still higher than state's sex ratio of 865.

New Towns :

This information is furnished in table 17.

TABLE 17

New Towns/Towns Declassified in 1981 Census

Name of Towns			Population 1981 Census
1			2
(a) *Added* :			
(i)	Malsian	N.A.C.	5,700
(ii)	Shahkot	N.A.C.	7,018
(iii)	Lohian	N.A.C.	5,496
(iv)	Bhogpur	N.A.C.	6,882
(b) *Declassified* :			
Nil			

Four towns namely Malsian, Shahkot, Lohian and Bhogpur were added to the list of towns during the last decade. Although the state government had abolished all these four N.A.Cs in October, 1980 along with other 12 N.A.Cs, these were treated as urban areas for 1981 census as it was decided to freeze the urban frame as on 30th September, 1980. Consequently for the 1981 census the urban status of Malsian, Shahkot, Lohian and Bhogpur was retained.

Budget of the Town :

Jalandhar district has 16 towns one with class I status i.e. Jalandhar municipal corporation ; 3 class III towns namely Jalandhar Cantt. Nakodar and Nawashahr ; 4 class IV towns viz., Adampur, Banga, Kartarpur and Phillaur and 8 class V towns, i.e., Alawalpur, Bhogpur Goraya, Lohian, Malsian, Nurmahal, Rahon and Shahkot. Table 18 gives the per capital receipt and expenditure of each town in the district.

TABLE 18

Per capita receipt and expenditure in towns

V	Shahkot	(N.A.C.)	..	..	..	..	..	..	..	..	..

In respect of 9 towns the receipt per capita is comparatively higher than per capita expenditure and in case of 4 towns the receipt is lower than the per capita expenditure. In respect of remaining 3 towns namey Lohian, Malsian and Shahkot the data were not available. The highest per capita receipt of Rs. 140.79, has been recorded for Jalandhar Cantt. and the lowest per capita receipt of Rs. 11.04 for Bhogpur N.A.C. Income from municipal properties and grants from Government are appreciably higher in respect of Jalandhar Cantt. and this has resulted in highest per capita inome. Receipt through taxes forms the major source of revenue in most of the towns of the district. Government grants, loans advances etc., the other supplementary sources of revenue of municipalities. On expenditure side, the highest per capita expenditure of Rs. 152.95 has been observed in respect of Jalandhar Cantt. and the lowest per capita expenditure of Rs. 0.15 for Bhogpur N.A.C. In respect of Jalandhar Municipal Corporation, per capita expenditure is Rs. 89.84 against per capita receipt of Rs. 85.05. The main heads of expenditure are general administration, public health and conveniences and public works etc.

Educational Amenities :

Table 19 reflects the level of educational facilities available in various towns of the district per thousand population in respect of Higher Secondary, Middle and Primary Schools.

TABLE 19

Schools per ten thousand population in towns

	Total		**0·46**	**0·96**	**0·64**	**2·73**

Number of Higher Secondary Schools per ten thousand population are the highest in Nurmahal (3.10) and Banga (2.97). Availability of Higher Secondary Schools in Jalandhar corporation is deplorably low (0.32 schools per ten thousand population). It seems that students schools ratio would be very high in the corporation while as converse Nurmahal and Banga would be having fewer students per school. This may be regarded as a pointer that remoteness of a place need not only be considered as desirable criterion for opening new schools; instead, places of high human density which are starved of schools on account of congestion and over crowding may be given due priority.

Alawalpur and Jalandhar Cantt, are quite better off with regard to availability of schools at all levels per ten thousand population.

Medical Facilities :

Table 20 furnishes information on number of beds in medical institutions per 1,000 of population, in towns of the district.

TABLE 20

No of Beds in Medical Institutions in Towns

	District Total		**2·07**

The District has 2.07 beds per 1,000 of population. Towns in which the proportion of beds is higher than that of the district are Jalandhar M. Corporation (2.02), Jalandhar Cantt. (5.94), Lohian (4.55), Nakodar (2.13) and Nawashahr (1.91). The medical facilities to urban area of the district as measured by the number of beds for 1,000 of population had improved from 1.78 beds in 1971 to 2.07 beds in 1981.

PART XIII A
Village and Town Directory

SECTION I—VILLAGE DIRECTORY

NOTE EXPLAINING THE CODES USED IN THE VILLAGE DIRECTORY

The village directory containing information about each village has been prepared for each tahsil in the ascending order of the census location code numbers, e.g., location code No. 17/11/3/22 means village No. 22 in tahsil No. 3 of district No. 11 of the State No. 17. It contains information relating to total area of the village in hectares, total population, No. of households, amenities available in the village i.e., educational, medical, drinking water, posts and telegraphs, communication, approach to village, nearest town and distance (in kms), and power supply. Besides it gives information regarding staple food, land-use i.e., area under different types of land use like forest, irrigated and unirrigated, cultivable and uncultivable-land. This is further supplemented by the information on places of religious, historical and archaeological interest as also information on copies of newspaper coming in the village and number of motor cycles/scooters, cars/jeeps and tractors available in the village.

Information about the amenities available have been given in the columns 5 to 10 of the directory.

(i) Educational facilities have been shown by adopting the following abbreviations :

P	=Primary School
M	=Junior Secondary or Middle School
H	=Matriculation or Secondary School
PUC	=Higher Secondary/Intermediate/Pre-University/Junior College
C	=College (graduate level and above) like Arts, Science, Commerce etc.
I	=Industrial School
Tr.	=Training School
AC	=Adult literacy class/centre
O	=Other Educational Institutions. These may include Sanskrit Pathshalas, Senior Basic School, Maktab, etc.

Where figures like P(3), M(2), H(1) etc. occur these denote that the village has three primary, o middle and one matriculation or secondary school.

(ii) Medical facilities have been shown by the use of the following abbreviations :

H	=Hospital
MCW	=Maternity and Child Welfare Centre
MH	=Maternity Home
CWC	=Child Welfare Centre
HC	=Health Centre
PHC	=Primary Health Centre
PHS	=Primary Health Sub-Centre
D	=Dispensary
FPC	=Family Planning Centre
TB	=TB Clinic
NH	=Nursing Home
RP	=Registered Private Practitioner
SMP	=Subsidised Medical Practitioner
CHW	=Community Health Worker

O | =Others

Number of institutions, if more than one in any village, have been given in brackets against each.

(iii) The types of the potable drinking water supply and the sources available in the village have been indicated by the following codes :

T =Tap Water

W =Well Water

TK =Tank Water

TW =Tubewell Water

HP =Hand Pump

R =River Water

F =Fountain

C =Canal

L =Lake

S =Spring

N =Nullah

O =Others

NA =Information not available.

(iv) Post and telegraph facilities have been shown by adopting the following abbreviations :

PO =Post Office

TO =Telegraph Office

PTO =Post and Telegraph Office

Phone =Telephone connection

(v) Communication facilities have been indicated by the following codes :

BS =Bus Stop

RS =Railway Station

NW =Navigable Waterway (including river, canal, backwaters, etc.).

Only public transport like bus, rail and waterway have been considered for this purpose

(vi) *Approach to village.*—This refers to the state of road etc. leading to the village.

This has been indicated by the use of following codes :

PR =Pucca Road

KR =Kaccha Road

NR =Navigable River

NC =Navigable Canal

NW =Navigable Waterway (other than river or canal)

(vii) *Nearest town and distance.*—The distance in kms of the nearest town (whether located in the state or in another state) has been given in brackets under column 12.

(viii) *Power supply.*—For this purpose, the following codes have been used under column 13 :

ED = Electricity for Domestic Purpose

EAg = Electricity for Agriculture

EO = Electricity for Other Purposes like industrial, commercial, etc.

EA = Electricity for all purposes listed above.

Information relating to places of religion, historical or archaeological interest is given under column 20(a). Information on copies of newspaper coming in the village (N) motor cycles/scooters available in the village, (M) cars/jeeps available in the village(C) and for tractors available in the village(T) is also furnished under column 20. The numeral following the alphabet indicates the number of newspapers, motor cycles etc.. Uninhabited villages and the villages that have got merged in towns have also been shown under column 20(a).

(ix) *Land use*:—Break-up of area under different type of land use viz., forest, irrigated area, unirrigated area, culturable waste and areas not available for cultivation has been furnished under columns 15—19.

(a) *Forest.*—This includes all lands classed as forests under any legal enactment dealing with forests or administered as forests, whether state owned or private, and whether wooded or maintained as potential forest land. The area of crops raised in the forest and grazing lands or areas open for grazing within the forest should remain included under the forest area. If any portion of such land is not actually wooded but put to some agricultural use, that portion is included under the appropriate heading of cultivated or uncultivated land. In some cases there are instances where patches of land put to agricultural use within statutory notified forests are considered as forests by the revenue agency. These are treated as forests.

(b) *Irrigated and unirrigated (land use).*—The two columns (cols. 16 and 17) cover all agricultural land and include net area sown with crops and orchards or net cropped area and also current and other fallows. The latter implied all lands which were taken up for cultivation, but are temporarily out of cultivation for a period of not less than a year and more than five years. The columns do not include gross area sown or gross cropped area. Net area sown thus represents the area sown with crops and orchards, counting areas sown more than once in the same year only once.

(c) *Culturable waste.*—This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once, but not cultivated during the five years or more in succession. Such lands are either fallow or covered with shrubs and jungles which are not put to any use. These have been assessed or unassessed and are in isolated blocks or within cultivated holdings. Lands under thatching grasses, bamboo bushes and other groves for fuel, etc. which are not included under orchards or forests also come under this head. All grazing lands whether they are permanent pastures and meadows or not, village common and grazing lands within forest area have been included in this column.

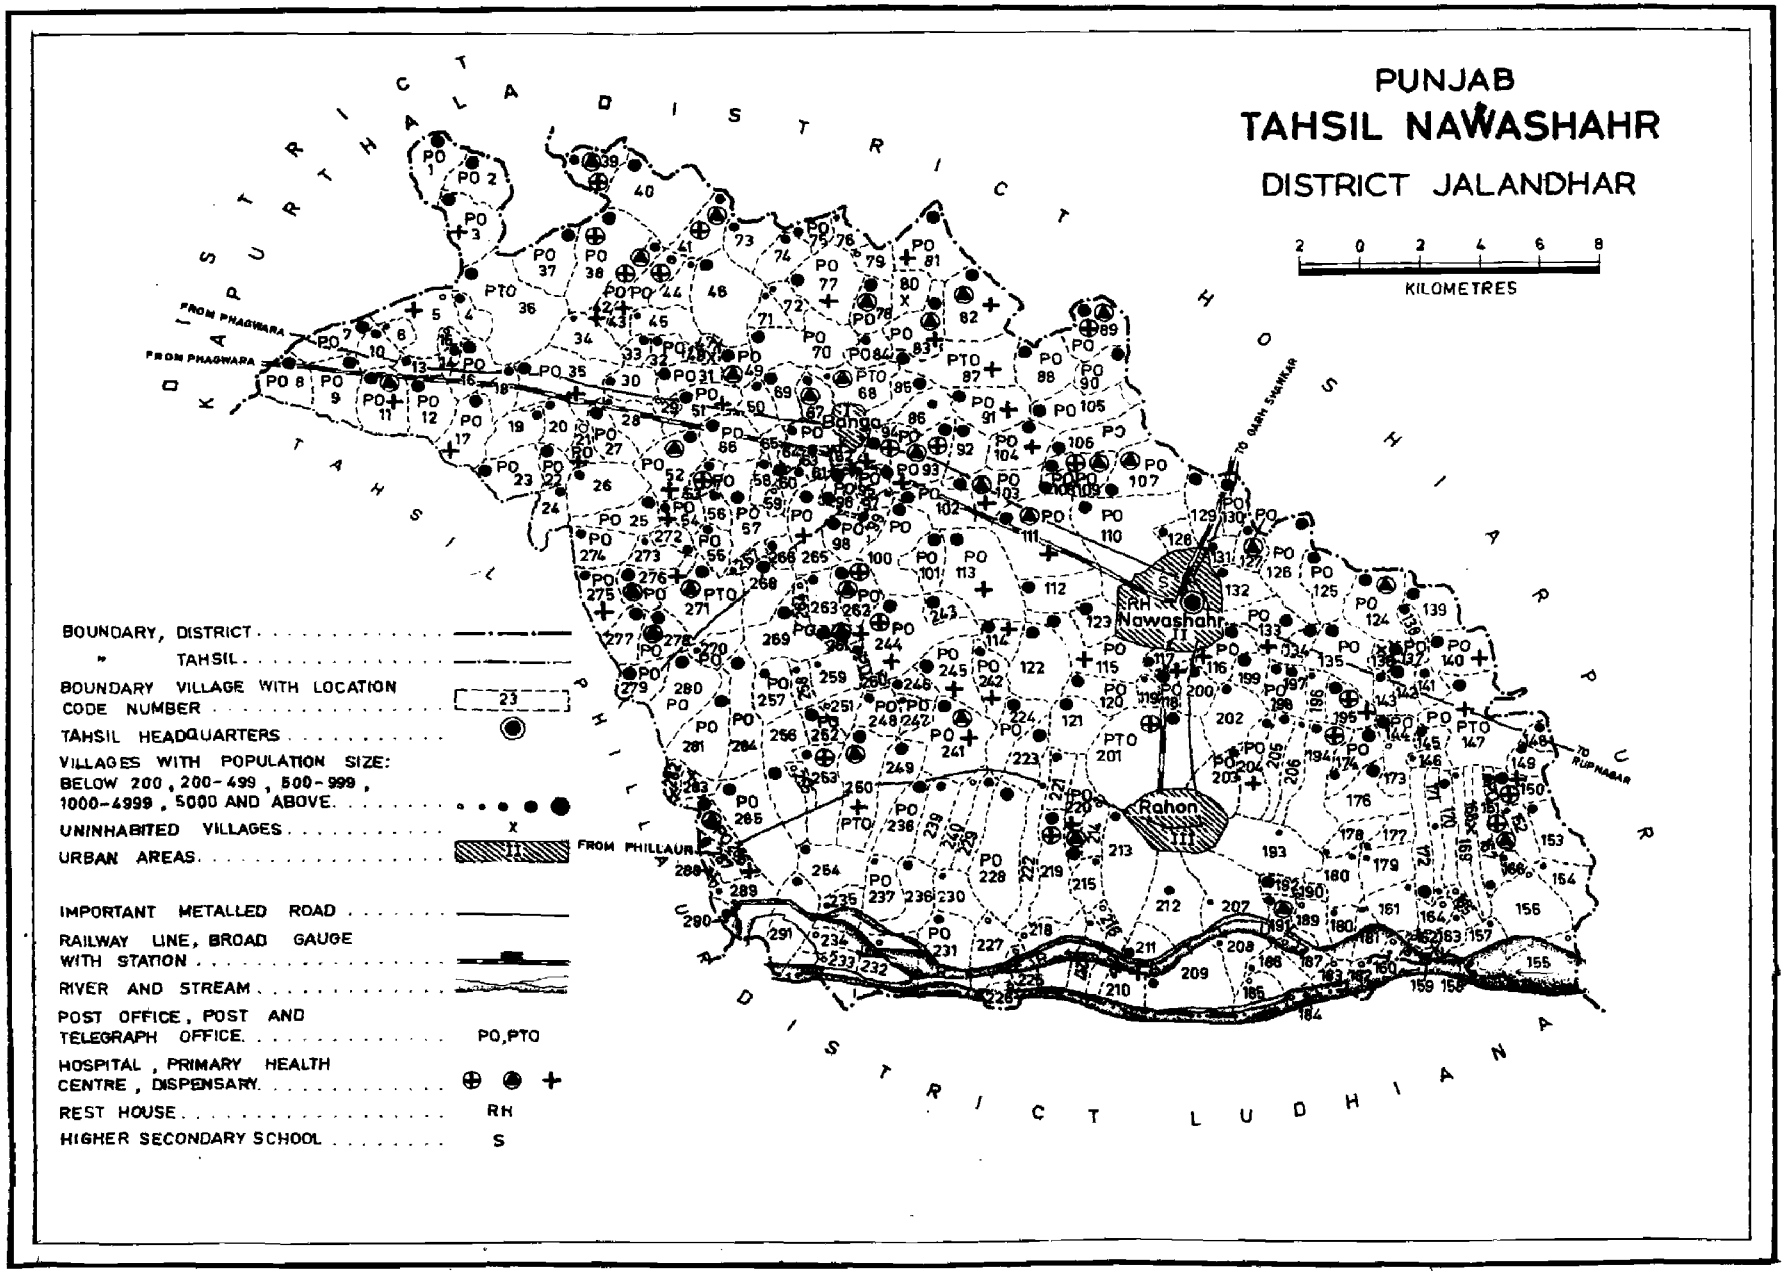

(*d*) *Area not available for cultivation.*—This column (Col. 19) includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use.

Land put to non-agricultural use stands for all lands occupied by buildings, roads, and railways or under water, e. g., rivers and canals and other lands put to uses other than agricultural.

Barren and unculturable lands cover all barren and unculturable lands like mountains, deserts etc. Land which cannot be brought under cultivation, except at a very high cost, has been classified as unculturable, whether such land is in isolated block or within cultivated holdings.

*Excludes villages with nil Scheduled Castes population.

SECTION II

Town Directory

NOTE EXPLAINING THE CODES USED IN THE TOWN DIRECTORY

The town directory has been compiled in six different statements for all the urban areas of the district. The data on amenities and other aspects have been presented in codes which are explained below.

Statement I : gives status and growth history of each town in the district.

Class has been introduced in all the statements of town directory to facilitate analysis for purposes of demographic and socio-economic characteristics of towns at the state and all India levels. It has been presented according to 1981 census population of the core town in the following manner :

Population	*Class*
100,000 and above	I
50,000 — 99,999	II
20,000 — 49,999	III
10,000 — 19,999	IV
5,000 — 9,999	V
Below 5,000	VI

The civic administration status as in 1980 has been indicated by the following abbreviations. Census towns are regarded as having no civic status. Code (C.T.) has been used for census town.

Municipal Corporation	= M. Corpn.
Municipal Committee	= M.C.
Cantonment Board	= C.B.
Notified Area Committee	= N.A.C.
Census Town (S.A.S. Nagar—Mohali and Talwara)	= C.T.

Statement II :

Statement II gives for each town, physical aspects and location of towns.

Statement III :

This statement gives municipal finance for each town of the district.

Statement IV :

It gives civic and other amenities. The abbreviations used are indicated below :

(I) Road length

PR	=	Pucca Road
KR	=	Kuccha road

(II) System of sewerage

S	=	Sewer
OSD	=	Open surface drains
BSD	=	Box surface drains
SD	=	Sylk drains
CD	=	Cesspool method

Pt = Pit system

(III) Method of disposal of nightsoil

HL = Head loads

B = Baskets

WB = Wheel barrows

ST = Septic tank latrines

S = Sewerage

(IV) Protected water supply-source and capacity of storage systems

(a) Sources of water supply :

TW = Tubewell water/Handpump

T = Tap water

W = Well water

TK = Tank water

(b) System of storage of water :

OHT = Overhead tank

SR = Service reservoir

IG = River infiltration gallery

BWP = Borewell pumping system

PT = Pressure tank

Statement V :

This gives medical, educational, recreational and cultural facilities. The abbreviations used are indicated below :

Medical amenities :

H = Hospital

D = Dispensary

HC = Health centre

FC = Family planning centre

T.B. = TB clinic

NH = Nursing home

O = Others

A = Ayurvedic

U = Unani

Hom = Homoeopathic

In case of allopathic, no separate code has been given. The information in col. 4 on medical facilities has been presented horizontally in the same line as illustrated below :

H (A-1,2) D (Hom-2, 1, U-1)

Here H (A-1, 2) represents one ayurvedic and 2 allopathic hospitals and D (Hom-2, 1, U-1) represents 2 homoeopathic, 1 allopathic and 1 unani dispensaries. If the medical facility is not available in a town, name of the nearest place (if in the same district) or nearest district (if in the same state) or other state and its distance from the town where the facility is available has been mentioned in column 4.

Educational amenities :

The codes that have been used are as follows :

A	=	Arts only
S	=	Science only
AS	=	Arts and Science only
C	=	Commerce only
AC	=	Arts and Commerce only
ASC	=	Combined for all categories—Arts, Science and Commerce
L	=	Law
SH	=	Shorthand
Type	=	Typewriting
Sh. Type	=	Shorthand and Typewriting
O	=	Others
P	=	Primary school
M	=	Junior secondary or middle School
H	=	Matriculation or secondary
PUC	=	Higher secondary/intermediate/pre-university/junior college/'10+2' system whether held in school or college

If there are more institutions of a type in the town, their number has been given against each in brackets—g. P (3), M (2), H (2), PUC (4) etc.

If any educational facility is not available in the town, the name of nearest place (if in the same district) or the name of nearest district (if in the same state) or other State and its distance from the town where this facility is available has been given in brackets.

Recreational and cultural facilities :

The following codes have been used :

PL	=	Public library
RR	=	Reading room

Statement VI:

Gives information on trade, commerce, industry and banking for each town of the district.

Appendix to the town directory shows towns of the district which have outgrowths and population of outgrowths.

1981 CENSUS

STATEMENT

Primary Census Abstract (Scheduled Castes)

PART B

PRIMARY CENSUS ABSTRACT (GENERAL)

Primary Census Abstract (Scheduled Castes)

EXPLANATORY NOTE ON PRIMARY CENSUS ABSTRACT

The Primary Census Abstract (PCA), General and Scheduled Castes, provides the basic information relating to population data pertaining to 1981 census. It contains the data in respect of area, number of occupied residential houses and households, total population (including institutional and houseless population), population break-up by sex, scheduled castes, literates, main workers classified into four categories of cultivators, agricultural labourers and other workers, marginal workers and non-workers for each village and for each town (ward-wise.)

The district totals given at the beginning of the PCA are followed by break-up of rural and urban areas of the district. The data are presented tahsilwise.

The rural PCA presents the data for the villages arranged in ascending order of location code numbers (assigned to the villages within the tahsil). The urban PCA, presents ward-wise data for each town. In rural PCA, the uninhabited villages and the villages which have got merged in towns have also been indicated. It may be mentioned here that the PCA data provided here has been compiled on the basis of the basic schedules i.e., household schedule and the universal individual slip convassed during 1981 census operations. The concepts and terms occurring in the PCA are briefly explained here.

Census House :

A census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

Occupied Residential House :

Occupied residential house is a dwelling house and includes a house used partly as a dwelling and partly for some other purpose like shop, workshop, factory, etc., but does not include a 'vacant house' where no person was found to be residing at the time of census.

Household :

A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. Examples of unrelated households are boarding houses, messes, hostels, residential hotels, rescue homes, Jails, *ashrams*, etc. These are called 'institutional households'. There may be one member household, two member household or multy-member household. For census purposes. each one of these types is regarded as a 'household'.

Another type of household for census purpose is houseless household which is a household comrising of 'houseless person/persons'. A houseless person in census terminology has been defined as :

(i) a person who might be doing domestic service or other work with one or more households but who does not reside in any house and sleeps in the corridors, verandahs or passages in buildings or in the streets ;

(ii) wandering or nomadic tribes found to be staying in temporary huts, etc., and

(iii) beggar, vagrant, tramp, sadhu, fakir, etc., who is found on the footpaths, streets, in places like parks, gardens, railway yards, etc.

Scheduled Castes are such castes, races or tribes or parts of groups within such castes, races or tribes as are declared to be scheduled castes by the President of India's Orders issued under Article 314 of the Constitution of India.

Literate :

A person who can both read and write with understanding in any language has been taken as literate. A person who can merely read but cannot write, has not been considered as literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

All children of the age of 4 years or less have been treated as illiterate even if the child has been going to a school and might have picked up reading and writing a few odd words.

Workers and Categories of Workers:

Work may be defined a s participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work.

In the economic questions, canvassed in 1981 census, there has been some difference. The 'work' concept in 1961 and 1971 censuses, as oppposed to the 'income' or 'economic independence' concept of the earlier censuses was adopted for 1981 census, but the criterion for classification of persons as workers was changed. While in 1961 and 1971 censuses different approaches, namely, usual status and current status, were adopted with reference period of one year and one week for seasonal and for regular work respectively, at the 1981 census the usual status approach was adopted uniformly for all work.

In 1961, a person qualified as a worker if he had worked regularly during the last season or if he had worked at least for a day in regular (non-seasonal) work during the preceding fortnight. At the 1971 census a person was treated as a worker only if he spent his time mainly in work or if he worked at least for a day in regular (non-seasonal) work during the preceding week. The dichotomy of worker/ non-worker of 1961 and 1971 censuses was discarded at the 1981 census and instead a trichotomy of main workers, marginal workers and non-workers was adopted For main worker the time criterion of engagement in work for the major part of the year, i.e , at least 183 days was adopted. Those who worked for some time during the last year but not for the major part were treated as marginal workers. Those who had never worked during the last year were non-workers. This trichotomy partially permits a comparability of 1981 census economic data with that of 1971 as well as 1961. The main workers of 1981 census can be expected to correspond to the workers of 1971 and the main workers and marginal workers of 1981 together to correspond to the workers of 1961.

Classification of Main Activity :

The main activity of workers has been classified into four categories, viz , cultivator, agricultural labourer, household industry and other worker. These terms are explained below :

Cultivator :

For purposes of the census, a person has been considered working as cultivator if he or she has been engaged either as employer, single worker or family workers in cultivation of land owned from Government or held from private persons or institutions for payment in money, kind or share. Cultivation included supervision or direction of cultivation. It has been indicated by abbreviation 'c'.

Agricultural Labourer :

A person who worked in another person's land for wages in money, kind or share has been regarded as an agricultural labourer. He/she had no risk in the cultivation but he/she merely worked in another persons' land for wages. An agricultural labourer had no right of lease or contract on land on which he/she worked. It has been indicated by abbreviation 'AL'.

Household Industry :

Household industry has been defined as an industry conducted by the head of the household himself/herself and or by th e members of the household at home or within the village in rural areas and only within the precincts of the house where the household lived in urban areas The larger proportion of workers in a household industry constituted of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act.

For a person who has returned his/ her main activity as engaged in some production, processing, servicing or repair of articles or goods such as handloom weaving, dyeing, carpentry, *bidi* rolling, pottery manufacture, bicycle repairing, blacksmithy, tailoring, etc., it has been ascertained if it is a household industry, and if so, it has been indicated by the abbreviation 'HHI' in the space provided for.

Other Workers:

All workers, i.e., those who have been engaged in some economic activity during the last one year, have not been categorised as cultivators or agricultural labourers or in household industry, are 'other workers' 'OW'. The type of workers that came under the category of 'OW' included factory workers, plantation workers, those in trade, commerce, business, transport, mining, construction, political or social work, all government servants, municipal employees, teachers, priests, entertainment artists, etc.
