FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Government, is one of the most valuable products of the Census. Th · DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District Administration. The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and ward-wise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The District Census Handbook series was initiated during the 1951 census. It contained important census tables and PCA for each village and town of the district. During 1961 census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the villages have been brought together in the village directory with the instruction that in case an amenity is not available in the referent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub centres and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, 'total population and number of households' has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled castes and scheduled tribes population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series, it has been so designed that Part-A of the volume contains village and town directory and Part-B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town levels. At the beginning of the DCH, a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The district and Tahsil/Police Station/CD Block etc., level maps, depicting the boundaries and other important features have been inserted at appropriate places to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri D.N. Dhir, I.A.S., the Director of Census Operations, Punjab, on behalf of the State Government which has borne the cost of printing. The task of planning, designing and coordination of this publication was carried out by Shri N.G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B.K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M.M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

New Delhi,

The 26th April, 1982.

P. PADMANABHA,

Registrar General, India.

PREFACE

As being regularly presented hithertofore, since 1951 census, we have now the privilege of presenting the District Census Handbooks consequent upon 1981 census.

To shorten the time lag to minimum after the compilation of census 1981 data and issuance of this handbook as a sort of self-contained reference book, predominantly based on census data for the district, action was initiated upon the project as early as in July, 1979. The Registrar General, India indicated the revised formats and statements designed for this series of books. The improvements were with a view to making the data more useful for administrators, planners, scholars and other categories of users.

There are 134 towns categorised as urban area and 12,899 villages (45 tahsils) as the rural component in the state. The formidable task of collecting and compiling of this voluminous data for such a large number of units had its own problems and difficulties, both in the matters of chase up and in obtaining correct data which could be test-checked in terms of consistency with what was obtained and published consequent upon 1971 census data. Several gruelling cross-checks had to be adopted to tally such items as area figures and the land use pattern for each unit.

The statements and schedules for collecting information from the rural areas were translated into Punjabi d also test-checked to assess their acceptability and responsiveness by those who were to make their use. (I had also unsuccessfully toyed with the idea of collecting information on some other items that could indicate comparative affluence of rural Punjab but had to give it up in the light of keeping to uniformity in presentation of data on all India pattern).

The statements/schedules for town directory were transmitted to the Chief Executives of the local bodies and those for rural areas were transmitted to the SDOs (C) (since all tahsils in Punjab have been converted into sub-divisions) for necessary supply of data by the revenue staff under them. The officers and senior staff of the directorate that had been made directly responsible for houselisting operations and had reported to the field in October, 1979 were also charged with getting these through on personal contacts. This resulted in our getting the feed back by May, 1980, on the conclusion of houselisting operations, though some small instalments of these schedules continued till September/October, 1980.

A cell had been created at the directorate to scrutinise the data as received and make preliminary compilation. The data, obtained from the field were supplemented with the data collected from the various heads of the departments at the State level, particularly in matters of amenities and facilities in the fields of education, medical, communications and the like. The staff working in the cell was once again out in the field for assisting in the second field operation, namely enumeration and it was only on its conclusion that the work of compilation started in May-June, 1981. The three Deputy Directors (at the regional tabulation offices) were in position about the same time in the field and the gaps in data, needing reconciliation in figures were got through these field officers on personal contacts with the concerned quarters.

On the compilation of the Primary Census Abstract (PCA) in March, 1982 when the figures were available for projection in this volume, the whole exercise was consolidated to give birth to the instant manuscript.

The data in the book is being presented in two parts—Part-A comprises Village and Town Directory and Part-B Primary Census Abstract village wise and town/wardwise separately. In addition, Primary Census Abstract for scheduled castes upto tahsil/town level is also presented. (There are no scheduled tribes in the state).

An analytical note based on a number of inset tables compiled out of the data from village and town directory and PCA has also been added for the benefit of the users, but the greater aim has been to present the data as compiled and leave further deeper study to those for whom the publicaton is meant.

We are grateful to the large number of personnel of the State Revenue Department at the village, tahsil, sub-division and district levels and the municipal staff in all the local bodies in the state for their cooperation in filling up the statements/schedules for providing the data.

The production of this book (and for that matter all the 12 District Census Handbooks) has been the handiwork of consistent and constant efforts put in jointly by almost all the staff of the directorate, though only at one point of time or the other in certain cases. The collection of data for Village and Town Directory, as mentioned earlier, was a major work in the pre-census period and after the census most of the staff was busy in tabulation and compilation of the census data both at the regional tabulation offices and at the directorate. The DCHB Cell (specially created) thereafter commenced work on inset tables while the senior staff and the officers took to developing the fly-leaves and explanatory notes. Simultaneously the map section was deep in work for producing the maps that had to accompany these books.

I would resist the temptation of mentioning any single incumbent at any level of the hierarchy individually for apparent reasons, and would rest content with acknowledging any debt to all of them as appended hereto.

I had acted only as a coordinator and at times as an editor and was very ably supported by a set of dedicated officers who spared no pains to push iff the manuscripts to the press in a record time, unknown in the annals of this directorate so far.

As in the case of other aspects of census work connected with this gigantic decadal exercise, I always looked up to Shri P. Padmanabha, Registrar General and Census Commissioner, India, for guidance, inspiration and encouragement and I feel indebted to him. Shri N.G. Nag., Deputy Registrar General (Social Studies) was forthcoming in his unassuming and profound style for advice.

CHANDIGARH :
September, 1982.

D. N. DHIR,
Director Census, Punjab.

ACKNOWLEDGEMENTS

Preliminary work—collection, compilation and scrutiny of data relating to Village and Town Directory :

A cell was created in July, 1979 under J.C. Kalra, Deputy Director (Now Joint Director) who out of his earlier experience and the instructions as received from Registrar General, India, directed the collection of data and allied work. He was ably assisted by D. P. Jain, Charan Singh and Vishwa Mittar, Investigators on one occasion or the other. The Statistical Assistants, who laid down the work at the foundation level at that time consisted of Malkiat Singh, Munishwar Dutt, Joginder Singh and Pawan Kumar with cooperative efforts of number of Computors, namely Mohinder Pal, R. P. Pathak, Parkash Chand, Varinder Singh, Hardeep Kaur, Satya Arora, Harbeer Kaur and Asha Vasisht.

Primary Census Abstract included in this book—Manual preparation at the Regional Tabulation Offices at Jalandhar, Patiala and Bathinda :

R. P. Tomar, R. K. Singh and S. P. Grover, Deputy Directors, were incharge of these tabulation offices respectively, and put in their best to conclude the work fairly ahead of the scheduled target. They were assisted by the Investigators, namely N. S. Bhadauria, Charan Singh and Ajit Singh Dhillon, respectively. The Statistical Assistants and Computors who worked in these RTOs were S. C. Bassi, Balbir Singh, Jai Dev and R. P. Singh at Jalandhar, Tarsem Lal Garg, S. K. Joshi, S. P. Goel and Varinder Singh at Patiala and Balwant Rai, Bhagirath Singh (Now Investigator), Raghbir Singh, J. S. Negi and H. P. Sharma at Bathinda.

Preparation of Inset Tables, framework of Handbooks and their drafting :

Inset tables, appendices and allied tables were prepared in the specially created cell of 'District Census Handbooks' headed by S. P. Grover, earlier and later by Ajit Singh, Deputy Directors. They have had experience of such publications earlier and imparted suitable directions to the staff in the cell for presentation of the data and its analysis as per the instructions received from the office of Registrar General, India, from time to time. Charan Singh, Investigator, Balwant Rai (Now Investigator), Raghbir Singh, Tarsem Lal, Statistical Assistants and Satya Arora, Santosh Kumari, Harbeer Kaur and H. P. Sharma, Computors worked in this cell.

The cell provided the framework of the Handbooks and the first drafts were attempted by Deputy/Assistant Directors who were entrusted with particular volume(s). This first draft was then finalised during discussions in officers' meetings held almost daily with the Director. Thus the final draft emerged.

Maps :

The work for preparation of maps to be included in District Census Handbooks commenced under the supervision of Madhav Shyam, the then Senior Geographer, but mid-way was taken over by G. S. Gill, Assistant Director, who headed the map section during the vital period. He was ably assisted by Jiwan Singh Gill, Artist (now Senior Artist), Usha Kalra, Artist and Kulbir Singh, Draftsman. Because of his Knowledge of geography and map work, he delivered the goods despite the absence of Geographer and Senior Geographer in the directorate.

Manuscript finalisation :

The final draft (s) as emerging out of the deliberations of the officers were entrusted to a cell called 'Press Manuscript Cell' headed by M. L. Sharma, Assistant Director who was actively assisted by Balwant Rai Investigator, Azad Kumar and Sat Paul Goel. They raced against time frequently to give final shape to the volume (s) for onward transmission to the press.

Typing :

K. C. Pardesi. Confidential Assistant (formerly Senior Stenographer) headed this cell. His knowledge of such publications earlier was an asset. He was assisted by Ajmer Singh, Stenographer and some of the other typists from the various seats in the directorate.

Printing :

This cell was headed by M. L. Sharma, Assistant Director, actively assisted by Shri H. S. Sudan, and S. P. Goel ensured neat and clean printing in the press. They drew upon the services of others in the directorate, wherever necessary.

Shri Mahadeokar, Assistant Controller of the U. T. Printing Press cooperated in ensuring that the publication saw the light of the day at the earliest.

To each one of them I acknowledge my thanks.

CHANDIGARH :
September, 1982

D. N. DHIR,
Director, Census, Punjab.

HOSHIARPUR—A SHORT PROFILE

Location :

Hoshiarpur is a submountane district located in the north-east of the State bordering Himachal Pradesh on the east. It ranks 7th in area and 10th in population in the State. On the map it is oblong in shape and extends from river Satluj in the east (near Rupnagar) to river Beas in the north along the Shivalik foothills encompassing the watershed of the Katar Dhar or Solasinghi range on the plains side. The district lies between north latitude 30°—57′ and 32°—05′ and east longitude 75°—32′ and 76°—31′. The district is surrounded in the west by Gurdaspur district (separated by river Beas) ; in the south by Kapurthala and Jalandhar districts ; in the east by Rupnagar district (separated by river Satluj) ; and in the north by Kangra (separated partly by river Beas and partly by the watershed of Chintpurni range) and Una (separated by watershed of Katar Dhar) districts of Himachal Pradesh and Rupnagar district (separated by watershed of Katar Dhar). The district is known for choes, the rainy season streams rising from the Katar Dhar and numbering 108 alone from this range, besides some more in the part of Una valley falling in Dasua tahsil. These streams have rendered vast areas unfit for cultivation by depositing sand in the adjoining areas. The choe menace assumed alarming proportions since after the beginning of the present century due to the reckless felling of the trees in the Shivalik hills. The choes have made 30 per cent land unfit for cultivation and cause extensive damage to crops and property during the rainy season. Of late various schemes for the training and channelisation of the choes have been taken up which have shown good results. Also strict enforcement of forest laws and rules are yielding good results.

Origin :

The district takes its name from Hoshiarpur town which is the seat of the district administration. There are two versions connected with the naming of this town. According to the first version the town was founded by one Hoshiar Khan, who was a resident of village Bajwara located some 2 kms. from the town about 600 years ago. According to the other version the town was founded by Hargobind and Ram Chand, Diwans of Emperor Mohammed Tughlak and named it as such.

Area :

The district ranks seventh in area in the State. According to the Surveyor General, India, the district has an area of 3881.0 square kilometers; out of which 3805.1 sq. km. is rural and the remaining 75.9 sq. km. is urban. The rural area has been derived by subtracting urban area from the total area. The tahsilwise break up of area is as follows :—

Sr. No.	Tahsil	Area in sq. kms.		
		Total	Rural	Urban
1.	Dasua	1247·4	1200·9	46·5
2.	Hoshiarpur	1344·2	1320·6	23·6
3.	Garhshankar	811·3	806·3	5·0
4.	Balachaur	509·6	508·8	0·8
	Total	3912·5	3836·6	75·9

It would be noticed that on addition of tahsil figures the total do not tally with the district area supplied by the Surveyor General, India. The difference is due to the fact that tahsil-wise area figures for rural areas have been supplied by the Director of Land Records, Punjab, whereas the urban figures have been supplied by the local bodies.

Climate :

The district being submountane, having sizable forests and reserved area in the hill areas, has a moderate climate. The climate is generally healthy as rain water is drained out rapidly during the rainy season by

Hoshiarpur is a submountane district located in the north-east of the State bordering Himachal Pradesh on the east. It ranks 7th in area and 10th in population in the State. On the map it is oblong in shape and extends from river Satluj in the east (near Rupnagar) to river Beas in the north along the Shivalik foothills encompassing the watershed of the Katar Dhar or Solasinghi range on the plains side. The district lies between north latitude 30°—57′ and 32°—05′ and east longitude 75°—32′ and 76°—31′. The district is surrounded in the west by Gurdaspur district (separated by river Beas) ; in the south by Kapurthala and Jalandhar districts ; in the east by Rupnagar district (separated by river Satluj) ; and in the north by Kangra (separated partly by river Beas and partly by the watershed of Chintpurni range) and Una (separated by watershed of Katar Dhar) districts of Himachal Pradesh and Rupnagar district (separated by watershed of Katar Dhar). The district is known for choes, the rainy season streams rising from the Katar Dhar and numbering 108 alone from this range, besides some more in the part of Una valley falling in Dasua tahsil. These streams have rendered vast areas unfit for cultivation by depositing sand in the adjoining areas. The choe menace assumed alarming proportions since after the beginning of the present century due to the reckless felling of the trees in the Shivalik hills. The choes have made 30 per cent land unfit for cultivation and cause extensive damage to crops and property during the rainy season. Of late various schemes for the training and channelisation of the choes have been taken up which have shown good results. Also strict enforcement of forest laws and rules are yielding good results.

Origin :

The district takes its name from Hoshiarpur town which is the seat of the district administration. There are two versions connected with the naming of this town. According to the first version the town was founded by one Hoshiar Khan, who was a resident of village Bajwara located some 2 kms. from the town about 600 years ago. According to the other version the town was founded by Hargobind and Ram Chand, Diwans of Emperor Mohammed Tughlak and named it as such.

Area :

The district ranks seventh in area in the State. According to the Surveyor General, India, the district has an area of 3881.0 square kilometers; out of which 3805.1 sq. km. is rural and the remaining 75.9 sq. km. is urban. The rural area has been derived by subtracting urban area from the total area. The tahsilwise break up of area is as follows :—

Sr. No.	Tahsil	Area in sq. kms.		
		Total	Rural	Urban
1.	Dasua	1247·4	1200·9	46·5
2.	Hoshiarpur	1344·2	1320·6	23·6
3.	Garhshankar	811·3	806·3	5·0
4.	Balachaur	509·6	508·8	0·8
	Total	3912·5	3836·6	75·9

It would be noticed that on addition of tahsil figures the total do not tally with the district area supplied by the Surveyor General, India. The difference is due to the fact that tahsil-wise area figures for rural areas have been supplied by the Director of Land Records, Punjab, whereas the urban figures have been supplied by the local bodies.

Climate :

The district being submountane, having sizable forests and reserved area in the hill areas, has a moderate climate. The climate is generally healthy as rain water is drained out rapidly during the rainy season by

the choes, except in the Bet areas of Balachaur and Dasua tahsils. The summer season begins in April and lasts upto June when mercury crosses 45°C at times. The rainy season sets in the 1st week of July and lasts upto September. The weather remains sultry and humid during day time in the rainy season but nights are quite comfortable in the hill areas. The winter season starts in October and terminates as late as middle of March. Winter is at its severest from December to February but January is the coldest month when mercury touches as low as 4°C. Winter rains start from middle of December to February. On clear days winter precipitation is heavy and is considered beneficial for wheat crop. Lightening and hail storms are common in February and cause damage to wheat and gram crops in some areas. The following table gives monthly rainfall (average of 5 years 1976—80) for Hoshiarpur district :—

Month	Rainfall (cms)
January	4·40
February	7·44
March	4·02
April	1·69
May	2·81
June	7·09
July	33·64
August	18·64
September	7·35
October	0·85
November	1·03
December	3·36
Total	92·32

Rivers and drains :

There are two rivers of permanent flow in the district viz., the Beas and Satluj which flow along the northern and southern boundaries of the district. A brief description of the rivers is as follows :—

The Beas—It forms the northern boundary of the district and enters the district near Talwara. At Motla it runs south-west and thence forms the boundary between Hoshiarpur and Gurdaspur districts. It is said that it once flowed much nearer to the Shivaliks. It is very probable that Chhambs near Dasua formed its old course. The river rises in the Himalayas and originates from the Beas Kund near Rohtang Pass in Kulu district of Himachal Pradesh. The river has been dammed first at Pandoh (between Mandi-Kulu) to divert waters into the Satluj basin for use in the Bhakra system. Now another rock-fill dam has been built at Pong near Talwara for regulating the flow of water for irrigation and generation of electricity.

The Satluj—It rises in the Mansarowar lake in Tibet in the Himalayas and enters the district near Rupnagar after cutting through the Shivaliks. Thence it flows west. It drains the southern parts of the district. On this river a barrage has been constructed at Rupnagar to divert its waters in the Sirhind and Bist Doab canals.

Beins—There are two Beins viz., Black Bein and White Bein in the district. The Black Bein or Kali Bein takes off from the Terkiana Chhamb and flows for most of its part in Kapurthala district. It is a perennial stream. The White Bein or Safed Bein rises from hillocks near Garhshankar and after a very winding course it turns sharp to the north and runs parallel with the district at places in Hoshiarpur and at places in Jalandhar. Both streams have narrow width but are troublesome to cross on account of their depth and soft bed.

The Swan—This rises near Daulatpur Chowk in Una district in Himachal Pradesh and flows northward before its confluence with Beas down stream near Pong Dam. It remains dry most part of the year but assumes dangerous proportions in the rainy season when it is difficult to cross.

Canals—Shah Nahar in Dasua tashil and Bist Doab canal in Garhshankar tahsil are the imporant canals in the district. Another canal (Kandi canal), which will take off from Talwara Barrage, is under construction. It will irrigate submountane areas on large scale in the district :

(a) Shah Nahar takes off from river Beas near Mukerian in Hoshiarpur district. Uptill 1949 it was under the administrative control of the District Board Hoshiarur and irrigated about 15,000 acres. The canal was remodelled and now irrigates about 50,000 acres. Since 1949 the control of the canal is in the hands of Irrigation Department. To further improve the water taking capacity of the canal a modern barrage is under construction near Talwara which will supply water through out the year.

(b) Bist Doab canal takes off from the right bank of the river Satluj from the Ropar headworks near Rupnagar. It irrigates areas of Hoshiarpur and Jalandhar distr icts.

Choes :

The hill torrents or the choes flow down in the plains in the rainy season at short distances and have affected very badly the soil of the district by depositing sand when in spate. Steps are now in progress to train and channelise these to minimise losses.

Topography :

The district can be subdivided into three parts :—

(i) The valley of Swan between Katar Dhar and Chintpurni range which falls in Dasua tahsil.

(ii) The western slopes of Shivaliks forming back line of the district ; and

(iii) The alluvial plains comprising Hoshiarpur, Dasua, Garhshankar and Balachaur tahsils.

Somewhat to the east runs a continuation of the Shivalik range known as Katar Dhar or Solasinghi (Sixteen horned) which geologically belongs to the tertiary system of the outer Himalayas. The breadth of the Shivaliks is about 10 miles, and the elevation at Mehadwani, above Garhshankar is 2018 feet above sea level. The water shed on the plains side and also a portion on the eastern side near Talwara is situated in the district. A portion of western water shed of Chintpurni range which falls in the sub Himalayan hills, gradually sinking into Beas valley, also falls in the district. The district has a chain of chhambs (big water pools) around which rice is cultivated. Besides there are Bet areas along the Satluj river (in Balachaur tahsil) and Beas river (in Dasua tahsil).

Present jurisdiction :

The district was annexed by the British with the rest of the Jalandhar Doab at the close of the first Sikh War. The district as first constituted consisted of five tahsils : Mukerian including the northern end of Shivalik range, Hariana and Hoshiarpur from the Chintpurni range to the Jalandhar boundary :Una and Garhshankar in the southern portion of the district, the water sheds of the Shivaliks forming the boundary between them. Taluka jandbani (the present Anandpur Sahib tahsil of Rupnagar district) was transferred from the Ambala district in 1850. In 1861 the Hariana tahsil was abolished, and its western portion comprising the Tanda police jurisdiction, was made over to Mukerian tahsil, the headquarters of which were transferred to Dasua. The hill portion i.e. areas to the east of the Shivaliks of tahsils Hariana and Hoshiarpur were transferred to Una and the rest of the Hariana tahsil was merged into Hoshiarpur tahsil which on the other hand parted with the Mahilpur thana to Garhshankar and thus district was reduced to four tahsils of Dasua, Hoshiarpur, Una and Garhshankar. Later in 1950 after partition under the Province and States (Absorption of Enclaves) Order 1950, Bhunga sub tahsil of Kapurthala district including 24 villages was transferred to this district. Tahsil Una gained the village of Kosar from tahsil Hamirpur in 1957. On reorganisation of Punjab state on 1st November, 1966, Una tahsil was taken away, a portion thereof going to Himachal Pradesh while the remaining portion was merged in newly created Rupnagar district of Punjab state. Later in 1970 Balachaur tahsil was carved out as a separate tahsil out of Garhshankar tahsil.

At present the district is constituted into four tahsils viz., Dasua, Hoshiarpur, Garhshankar and Balachaur having 1629 villages out of which 1584 are inhabited and 33 un-inhabited. Besides there are 10 towns. The district has undergone some jurisdictional changes since 1971 census which are given in the annexure. It shows that district gained only one village (from Gurdaspur district) against a loss of 9 villages (to Gurdaspur, Rupnagar and Ludhiana districts). There was thus a net loss of eight villages to the district.

Land utilisation :

The district being partly hilly abounds in forests. A little less than two thirds of the area is under cultivation. The following statement shows the land use in the district during the year 1980-81 :—

	(in '000' hectares)
1. Reporting area for land use purposes	391
2. Under forests	94
3. Land not available for cultivation	38
4. Other uncultivated land excluding fallow land	6
5. Total fallow	2
6. Net area sown	251
7. Percentage of total area	64
8. Area sown more than once	128
9. Total cropped area	379

The district has witnessed a sharp increase in area under irrigation during the years. As against 38,700 hectares in 1966-67, the area increased to 103,100 hectares in the year 1980-81. The percentage of net area irrigated to net area sown was, however, 41.1 per cent in the year 1980-81. The following statement shows area irrigated by various sources :—

Source	Area irrigated (in '000' hectares)
1. Government canals	15·1
2. Tubewells and wells	87·6
3. Other sources	0·4
Total	103·1

It would be seen from the above statement that tubewells and wells are the principal source of irrigation in the district. A sizable area is also being irrigated by government canals such as Bist Doab and Shah Nahar. Another canal, Kandi canal, is under construction which will irrigate vast areas in Kandi tract in the near future. The increase in area under irrigation is attributed to increase in the number of tubewells, which increased from 776 in 1960-61 to 19,799 in 1979-80. However, the number of wells has decreased from 12,338 in 1960-61 to 9,271 in 1980. Of late government has undertaken a scheme to sink deep bore tubewells through the Punjab State Tubewell Corporation. The scheme is paying rich dividends in the Kandi area where water table is deep and percolation wells are few and far between.

The principal crops of the district are : wheat, rice and maize. Besides sugarcane, groundnut and cotton are also grown. Among fodder crops main are : Bajra and Jowar. In the pre-partition times poppy and tobacco cultivation was quite popular but now potato cultivation has replaced these crops and Hoshiarpur district has emerged as a leading producer of potatos in the state. Improved varieties of seeds are being used in the district. The following figures show the progress made in this field :—

Crop	Area in '000' hectares in		Percentage of area under improved seeds in	
	1966-67	1979-80	1966-67	1979-80
1	2	3	4	5
1. Wheat	2·2	150	2·2	95
2. Rice	0·6	38	2·6	84
3. Maize	0·7	3	1·2	4

The introduction of package programme in agriculture has popularised high yielding varieties of seeds, chemical fertilizers, pesticides, effective water management etc., which have helped the district in increasing agricultural production appreciably.

Animal husbandry :

The quality of local animals is quite poor due to lack of pastures, small holdings and scarcity of fodder. Among bullocks there are a substantial number brought from the southern districts of Haryana and Rajasthan state. Also under the programme of white revolution for increasing milk yield great efforts are being made to improve the exotic breed of cows. It is a matter of satisfaction that quite an improvement has taken place in this field. There were 543,400 cattle in the district in the year 1966. The number increased to 695,600 in the year 1972. But the increase must have been halted due to improvement in quality. Poultry farming also shows quite a popularity as number of birds have appreciably increased from 146,000 in 1966 to 409,400 in 1972. Now the cattle are receiving better deal as number of veterinary hospitals and dispensaries have appreciably increased from 14 in 1966-67 to 61 in 1979-80. The number of veterinary hospitals and dispensaries per hundred inhabited villages has increased from 1.94 in 1966-67 to 5.27 in 1980-81.

Communications, railways and roads :

The district is well served with postal and telegraph facilities. The number of post offices has increased from 353 in 1966-67 to 402 in 1979-80. The telegraph offices also increased from 27 in 1966-67 to 45 in 1979-80. Similarly, the telephone facilities have also improved during these years, the number of telephone exchanges increasing from 7 in 1966-67 to 13 in 1979-80. The notable feature of the increase in facilities is that now coverage is both intensive and extensive in rural and urban areas.

The villages are now easily accessible due to development of efficient road net work. In the year 1966-67 there were hardly 435 kms. of metalled roads, which increased to 2,880 kms in 1979-80. This increase is partly due to the implementation of crash programme of link roads. The kilometrage of metalled roads per 100 sq. kms. of area increased from 11·19 in 1966-67 to 74 in 1979-80. Similarly the kilometrage of roads per lakh population increased from 45.0 in 1966-67 to 229·48 in 1979-80. A number of important highways pass through this district such as National Highway No. 1A. (Jalandhar-Tanda-Dasua-Mukerian-Pathankot, SH 23 (Jalandhar Cantt.-Hoshiarpur-Dharamsala), SH 24 (Dasua-Hoshiarpur-Garhshankar-Balachaur-Rupnagar) and SH 60 (Phagwara-Hoshiarpur).

These have made travelling easier and faster. Three railway lines serve this district. Hoshiarpur is a rail terminus on the Jalandhar-Hoshiarpur branch line, connecting Hoshiarpur with Nasrala and Shamchaurasi in Hoshiarpur district. This line was constructed in 1913-14 and has a length of 15 kms falling in the district. This line serves Hoshiarpur tahsil. The Jalandhar-Pathankot section of railway line serves Dasua tahsil. The important railway stations falling on this section in this district are:Tanda, Dasua, Uchi Bassi, Mukerian etc. The railway line upto Mukerian was constructed after the second world war whereas Pathankot railway line ahead of Mukerian is a post-independence development This railway line has a length of 35 kms. from Chulong to Mukerian in the district. The Jalandhar Jaijon section is in the Garhshankar tahsil. This line was constructed after the second world war and has a length of 26 kms. in the district on the Phagwara-Jaijon track. The stations on this line are Garhshankar, Satnaur,Saila Khurd, Mehengarwal and Jaijon. The communications suffer during the rainy season as connecting roads are cut off during the rains. To mitigate this difficulty number of bridges have been constructed in the district. The important ones are : Ropar bridge on Satluj connecting Hoshiarpur with Rupnagar; Beas bridge connecting Mukerian with Pathankot.Nasrala Choe (connecting Hoshiarpur with Jalandhar and Bhangi Choe connecting Hoshiarpur with Dharamsala. Under a crash programme large number of bridges have been constructed on choes on the Garhshankar-Hoshiarpur road, Hoshiarpur-Dasua road,Hoshiarpur-Tanda road and Hoshiarpur-Phagwara road. Now only a few bridges remain which too are awaiting completion. With their completion all roads will become fully fair weather roads. A major bridge on Beas river linking Gurdaspur with Tanda at Srihargobindpur is still in the planning stage. On completion it will shorten appreciably the distance between Gurdaspur and Chandigarh via Hoshiarpur.

Amenities :

The district is quite advanced in the matter of educational facilities in the State. The credit for this goes to the Arya Samaj which runs large number of educational institutions quite efficiently. The educational facilities have undergone further expansion during the years. There were 7 Arts and Science Colleges in the district in the year 1967, the number has, however, increased to 11 in the year 1979. The number of high and higher secondary schools also increased from 107 in 1967 to 189 in 1979. The Middle and Primary schools have undergone still higher increase, the middle schools increasing from 74 in 1967 to 145 in 1979 and primary schools from 592 in 1967 to 1,434 in 1979. The corresponding figures in respect of students are High and Higher secondary schools 64,000 in 1967 and 32,000 in 1979; Middle schools 27,000 in 1967 and 73,000 in 1979; and Primary Schools 1,18,000 in 1967 and 161,000 in 1979. Besides one Polytechnic (JR Government Polytechnic, Hoshiarpur) is functioning at Hoshiar pur with an intake capacity of 253 students in 1980-81. Three industrial training institutes are also functioning in the district with actual intake of 1,058 students in 1980-81.

The medical facilities have also fast developed in the district as revealed by the figures. In 1962 there were only 2 hospitals in the district but in 1979-80, this number increased to 20, a ten fold increase. The number of primary health centres increased from 8 in 1962 to12 in 1979-80. Likewise civil dispensaries have increased from 14 in 1962 to 104 in 1979-80. Thus the total number of medical institutions increased from 24 in 1962 to 136 in 1979-80. Besides there are 13 family planning centres working in the district. In the year 1979-80 there were 1,204 beds available in the hospitals, where 390 doctors were serving the public. The district is well served with drinking water facilities as all towns and 482 villages are served with tapped water facilities. Among these the scarcity villages are covered cent per cent. No village in the district has has any problem regarding drinking water. The main source of drinking water being wells and hand pumps. Some people also get supplies from the tubewells and canals.

All the 10 towns and 1,584 villages in the district have been electrified. Thus there is cent per cent electrification in the district which is due to crash electrification programme undertaken some years back.

All towns and 1,431 villages are connected by metalled roads with the important and nearby towns. About 90·34 per cent villages of the district are linked and enjoy the transport facilities. Some villages are without road facilities due to the hilly terrain of the areas. Not much improvement is expected either due to thin population of certain villages.

The banking facilities are also on the increase as against 29 bank branches in 1966-67, there were 149 branches in 1979-80. The number of cinemas have increased from 6 in 1966-67 to 9 in 1979-80. The number of employment exchanges has, however, shown no increase, as no new exchange has been opened since 1966-67. The existing employment exchanges are at Hoshiarpur and Talwara.

Demographic Characteristics :

On the sunrise of 1st March 1981 the population of the district stood at 1,243,807 persons, out of which 649,565 were males and 594,242 were females. Thus sex ratio for this district was 915 females per thousand males against 879 of the state. The district ranks 10th in the State in population, the districts following Hoshiarpur are : Rupnagar and Kapurthala occupying 11th and 12th positions respectively in the State. In the district 1,064,187 persons lived in the rural areas (553,558 males and 510,629 females) and 179,620 persons (96,007 males and 83,613 females) lived in the urban areas. Thus only 14.44 per cent population lived in urban areas against 27.68 per cent of the State. The district reported 1,243,807 population in 1981 against 1,051,074 in 1971, recording a decennial growth of 18.34 per cent in 1971—81 decade against 23·89 per cent of the state. The district has reported a density of 320 persons per sq. km. against 333 of the State, the figure being lower than the State. The district has reported a literacy rate of 50·09 per cent (58·24 per cent for males and 41.19 per cent for females) against 40·86 per cent of the State. Thus in the field of literacy it is ahead of many districts of the State.

Occupations :

In the district 26.39 per cent population comprised main workers (males 48·42 and females 2·31) during 1981 census. The percentage of marginal workers in the district was 2·94 per cent (males 1·41 per cent and females 4·61 per cent). The percentage of non-workers is, however, 70.67 per cent (males 50·17 per cent and female 93·08 per cent). The percentages by broad industrial categories of main workers is as follows :—

1. Cultivators	Persons	35·99
	Males	37·23
	Females	7·78
2. Agricultural labourers	Persons	21·39
	Males	21·06
	Females	28·99
3. Household industry	Persons	3·70
	Males	3·58
	Females	6·37
4. Other workers	Persons	38·92
	Males	38·13
	Females	56·86

It would be noticed from the above description that work participation rates of females are much lower than males inspite of an increasing trend to seek work by females to supplement family income. But still there is a long way to go to strike parity in sexes in the work participation rates.

The district is witnessing a rapid transformation in the field of industry as large number of big industrial units are coming up in the district. In case of some units the civil works are in progress. These give employment to large number of persons. The main concentrations are at Chohal, Asron and Hoshiarpur. Also large number of industrial units are under construction in Balachaur near Band Ali Sher on the right bank of Satluj. Also construction activity is going on in the district in connection with the expansion and widening of roads and construction of bridges. Also large number of workers are employed at Talwara on the Pong Dam where hectic activity is going on for the construction of Talwara Barrage, power houses and canal projects. But these engagements are temporary in nature and may not last long. Besides private workers there were 20,762 government employees in the district in the year 1979-80, against 8,909 government employees in the year 1966-67. A large number of tehnical hands have migrated to foreign countries especially to Arab countries to earn their livelihood.

Trade and Commerce :

Towns usually serve as main centres of trade and commerce. Hoshiarpur town stands head and shoulders higher than other towns in trade and commerce in the district. Hoshiarpur used to serve as the main centre of supplies to the adjoining hill areas now merged in Himachal Pradesh. But this trade is now on the wane because of development of alternate centres in Himachal Pradesh due to sales tax constraints. At present there are six principal agricultural markets in the district viz., Garhshankar, Hoshiarpur, Mukerian, Urmar Tanda, Balachaur and Dasua in the year 1980-81 against 4 in 1966-67. In the year 1980-81 these markets handled the following quantity of principal crops :—

1.	Wheat	120,000	M. Tonnes
2.	Paddy	94,000	,, ,,
3.	Maize	3,800	,, ,,

The market arrivals in the year 1973-74 were 2,065,000 quintals which increased to 2,505,000 qtls. in the district in 1980-81. All the markets are linked by road and rail connection. The district exports Ivory inlay wooden goods to Rosin and Turpentine to other countries. The exports of these comodities were 4·45 lakh rupees in 1973-74 which increased to 6.68 lakh in 1979-80. In terms of value the exports to other states are much more.

Industry :

Hoshiarpur which was once famous for small scale and cottage industries such as: Rosin and turpentine, pine oil, ivory inlay and wood carving, Ban making, brass utensils, bamboo making, handloom weaving etc. is now fast coming up on the industrial map of the state. Number of big industrial units have come up in the district since its declaration as industrially backward district which entitles industrial units located in this district for 10 per cent subsidy and other facilities. The important units newly set up are : Vardhman spinning mills, Universal Appliances (manufacturers of Hawkins Pressure Cooker) Milk plant (owned by Punjab State Milk Producers Cooperative Federation) located at Hoshiarpur ;Mukerian papers located at Mukerian ; Star papers, DCM Engineering Products (manufacturing tractor parts) is located at Asron in Balachaur tahsil. In the field of electricity generation also Hoshiarpur has made a debut with the installation of 4 hydel generators each of 55 Mega Watt capacity at Talwara. Two more generators are at the testing stage and will become operative in 1983. Of late decline is noticeable in some industries such as handloom weaving, bamboo making, brass utensil and Rosin and turpentine. In the year 1980, there were 260 registered factories in the district which employed 12,502 workers on the average. Out of these 8 registrered factories employing 618 workers were in the public sector and the remaining 214 factories employing 7,884 workers were in the private sector. As regards unregistered manufacturing industrial units, there were 2,998 industrial units employing 5,557 workers with total investment of rupees 375.2 lakh and total production of Rs. 615.2 lakh in the district.

Places of Historical and other interest :

1. Dasua :—It is a historical town located about 40 kms. from Hoshiarpur on the Jalandhar-Pathankot railway section. At present, it is a tahsil headquarters of Dasua tahsil and is a prosperous town. The town has a history dating back to Mahabharata times. According to a legend the place was the capial of Raja Virata of Mahabharata fame. There is an ancient tank where lotus flowers grow which belonged to Pandvas time. There is an old fort which though demolished in 1884 still has one tower. The fort finds a mention in the Ain-i-Akbari. The fort later became a stronghold of Ramgarhia Sirdars but was annexed to his territories by Raja Ranjit Singh. The surrounding area of this town is known for cultivation of quality rice.

2. Bajwara :—Bajwara once a thriving town is now in a poor shape. It is located some 3 kms from Hoshiarpur town on the Hoshairpur-Una road. According to a legend it was founded by three immigrants from Ghazni, one of whom Baiju Bavra, the renowned singer, gave his name to the town. The place finds a mention in the Ain-

i-Akbari as a place famous for horses. Todar Mal, the witty minister of Emperor Akbar, is said to have broken up the town into small divisions as punishment to the residents who did not show due respect to him. During the sikh period it was held by Sardar Bhup Singh Faizullpuria, who was later ousted by Raja Sansar Chand. He built a fort which was taken over by Raja Ranjit Singh in 1825. The fort was utilised as a military prison in the earlier years of British administration, but afterwards was dismantled and its material was used as road mettal. Its ruins could still be seen. According to another version Baji Rao Peshwa founded this town and built this fort. The town took his name which corrupted to present Bajwara.

3. *Shah Nur Jamal* :—It is located some 13 kms. from Hoshiarpur on the Hoshiarpur-Dharamsala road in village Salern H.B. No. 495 of Hoshiarpur tahsil. A tomb dedicated to saint Jamal dating back to 1250 AD has been built here. According to a legend the saint preached Islam on a whirlwind tour. It is said that while he was on such a mission at Bajwara the local Hindus stoned him to death. He was regarded as a martyr and burried at this place. According to another version the saint disappeared into the earth at this place. An annual fair (Urs) is held on Chet Chaudesh in March-April. The fair lasts for four days. Muslims from far and wide come to attend this Urs. Even Muslim participants from Pakistan visit this place. Due to migration of Muslims to Pakistan the place now bears a deserted look in absence of regular visitors throughout the year.

4. *Hariana*:—It is a town situated 14 kms from Hoshiarpur on Hoshiarpur-Dasua road. In the earlier British times (1846—1860) it was a tahsil headquarters. There are two old mosques. The Mufti mosque was built by Haji Sambal Khan in the reign of Akbar in the year 1597-98 A.D. The kazi mosque which is larger than Mufti mosque is of some what later date. The Town is an exporter of vegetables.

5. *Dholbaha*:—It is situated about 27 kms. from Hoshiarpur, 13 kms. farther from Hariana on the Shivalik Hillocks. In the recent archaeologial excavations some fine pieces of sculptures of Gandhara period dating back to 1000 AD and after have been discovered here.

6. *Pong Dam* :—The Beas Dam phase II is located at Pong 6 kms. upstream from Talwara. At this place a rock fill gravel dam has been constructed to impound the waters of Beas for irrigation in areas in Punjab and Rajasthan. A power house has also been constructed for generation of electricity. Down stream a barrage is nearing completion to regulate flow for irrigation. Large number of visitors come from far and wide to witness this engineering marvel. Nehru described dams as modern temples and places of pilgrimage.

ANNEXURE

JURISDICTIONAL CHANGES

Hoshiarpur District

(Inter-district changes) :—

(i) Dasua tahsil gained village Miani Malahan H.B.No. 430 Code No. 501 from Gurdaspur tahsil of Gurdaspur district.	Vide notification No. 2202-RGI-73/2953 dated 24-8-1973
(ii) Dasua tahsil lost village Kathana H.B.No. 455 Code No. 242 to Gurdaspur tahsil of Gurdaspur district.	Vide notification No. 2/2-RGI-8847-79/7399 dated 26-12-1979
(iii) Balachaur tahsil lost six villages to Samrala tahsil of Ludhiana district.	-Do-
(iv) Balachaur tahsil lost villages Chakli Kasab H.B.No. 180 and Nanowal H.B.No. 453 to Rupnagar tahsil of Rupnagar district.	-Do-

INTRODUCTION TO DISTRICT CENSUS HANDBOOK

Keeping in view the needs of planners, for exhaustive infrastructural and amenity data upto village level, required for micro-level planning, the formats of the village and town directory of 1981 DCH series have been re-designed and some new features useful for planning have been added while maintaining the comparability with 1971 data. A few new items of information such as adult literacy centres, primary health sub-centres, community health workers in villages, etc. have been introduced to meet some of the requirements of revised minimum needs programme. A new item 'approach to village' has been introduced to give an idea about the villages in the district which are inaccessible. A new column 'Total population and number of households' has been introduced to examine the correlation of amenities with the population and number of households they serve. Two more appendices namely (i) listing the villages where no amenities are available and (ii) list of villages indicating ranges according to the proportion of scheduled castes to total population have been added with the same object in view. A significant addition is class of the town in all the six statements of the town directory which alongwith population and decadal variation during 1901 to 1981 will prove quite useful for analysing the infrastructure of amenities in the urban area of State.

Contents:—The 1981 DCH series have been divided into two parts. Part A contains village and town directory and Part B, PCA of villages and towns and PCA for scheduled castes upto tahsil/town levels. Both parts are being published in this volume.

The village directory contains information about total area of each village in hectares, total population and number of households, amenities/conveniences available in the village, staple food of the people and the land use pattern. There is also information about the nearest town and its distance from the village and approach to the village.

The town directory presents data on each town with the aid of six statements giving the status and class of the town, the decadal population and growth rate during 1901—1981, physical and locational aspects, municipal finance and availability of amenities/facilities like medical, educational, banking etc., trade, commerce and industry.

PCA incorporates tahsilwise data for each village and each town/ward under the following heads :—

(i) Area in hectares/sq. kms.

(ii) Number of occupied census houses.

(iii) Number of households.

(iv) Total population.

(v) Scheduled castes population (there is no scheduled tribe in Punjab state)

(vi) Literates

(vii) Main workers classified into four categories of cultivators, agricultural labourers, household industry and other workers.

(viii) Marginal workers.

(ix) Non-workers.

Maps :—The map of the district and a map for each tahsil of the district have been included.

The district map shows the district boundary and location of its headquarter, tahsil boundaries and location of its headquarters, national highway, state highway, important metalled roads, railway lines, river and streams, towns and census villages according to population size, post and telegraph offices, degree colleges and technical institutions, rest houses etc.

The tahsil map contains boundary of tahsil and location of tahsil headquarter, villages with location code numbers, villages with population size, uninhabited villages with location codes, urban areas with location codes, roads, railways and service facilities such as post and telegraph offices, higher secondary schools, hospitals etc.

Besides both the district and tahsil maps have an inset map wherein addition or loss of territory which has taken place during the decade, has been shown.

Sources :—Whereas PCA contains census data, for compilation of village and town directory, the relevant schedules alongwith comprehensive instructions were sent to the revenue officers (for rural areas) and executive officers of municipal bodies (for urban areas) to be filled in at their end. The completed schedules were collected from the relevant quarters during the houselisting operations in April, 1980 by the staff of this directorate. The schedules were scrutinised at the directorate and the directories were compiled therefrom.

Census concepts and definitions :

Village and town directory

Rural-urban classification :—The 1981 census data are being presented by rural and urban areas, as was done in the previous censuses.

As far as rural area is concerned 'Village' has been adopted as the lowest census unit.

Rural area : 'Village'

The definition of the village adopted in census is identical with that of 'Mauza' given under section 3(i) of the Punjab Land Revenue Act, 1887. It is the 'revenue estate' determined as such for the purpose of levy and collection of land revenue. The revenue estate is defined in the Act *ibid* as an area :—

(a) for which a separate record of rights is maintained;

(b) which has been separetly assessed to land revenue, or would have been so assessed if the land revenue had not been realised, compounded or redeemed; or

(c) which the State Government may by general rule or specific orders declare to be an estate.

The village is thus not merely the *abadi deh* (red lined area) for census taking but the entire land coming within the fixed boundaries of each village in terms of the Act *ibid*.

Urban Area: 'Town'.

The following definition of an 'urban area' has been adopted at the 1981 census which is analogous to the criterion adopted in 1961 and 1971 censuses with some minor variation (as indicated below):

(a) All places with a corporation, municipality or cantonment board or notified town area.

(b) All other places which satisfied the following criteria :

(i) a minimum population of 5,000 ;

(ii) at least 75 per cent of the male working population engaged in non-agricultural (and allied) activity ; and

(iii) a population of at least 400 per sq km (1,000 per square mile).

The urban criterion of 1981 census varies slightly from that of 1961 and 1971 censuses in that the males working in activities such as forestry, logging etc., were then treated as engaged in non-agricultural activity. It , therefore, contributed to the 75 per cent criterion in 1961 and 1971 censuses whereas in the 1981 census these activities have been treated as on par with cultivation and agricultural labour for the purpose of this criterion.

Prior to the 1961 census, the definition of 'urban area' was somewhat liberal and a lot was left to the discretion of the local authorities. At the 1971 census, the state directors of census operations were also given discretion in marginal cases to include, in consultation with the State Government, a place that had other distinct urban characteristics, or to exclude an undeserving place from being treated as 'urban'.

Urban Agglomeration (U.A.) :—Apart from town/city (a town with a population of one lakh and above), the 1971 concept of urban agglomeration is also adsopted for the 1981 census. Very often large railway colonies, university campuses, port areas, military camp etc., come up outside the statutory limits of the city or town but adjoining it. Such areas may not by themselves qualify to be treated as towns but if they

form a continuous spread with the town, they are outgrowths of the town, and deserve to be treated as urban. Such towns together with their outgrowths have been treated as one urban unit and called 'urban agglomeration'.

An urban agglomeration may constitute:

(a) a city with continuous outgrowth (the part of outgrowth being outside the statutory limits but falling within the boundaries of the adjoining village or villages) ;

(b) one town with similar outgrowth or two or more adjoining towns with their outgrowths as in (a); or

(c) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Standard Urban Area (S.U.A.) :

A new concept of standard urban area (SUA) as introduced in 1971 census was also followed for the 1981 census. The essential requirements for the constitution of a standard urban area are :

(i) it should have a core town of a minimum population of 50,000 ;

(ii) the 'contiguous area' made up of other urban as well as rural administrative units should have mutual socio-economic links with the core town ; and

(iii) in all probability this entire area should get fully urbanised in a period of two or three decades.

Certain SUAs were determined on this basis in 1971 and some basic data were presented for 1951, 1961 and 1971 for such areas and their components. Similar data are being presented for the SUAs in 1981 also. The idea is to present basic data for these areas for four to five decades so that the urbanisation process in those areas can be studied.

DEMOGRAPHIC CHARACTERISTICS BASED ON ANALYSIS OF INSET TABLES

(PRIMARY CENSUS ABSTRACT)

TABLE 1

Population, Number of Villages and Towns, 1981

Sl. No.	Name of tahsil	Population									No. of villages		No. of towns
		Total			Rural			Urban			Total	inhabited	
		P	M	F	P	M	F	P	M	F			
1	2	3	4	5	6	7	8	9	10	11	12	13	14

*Includes 33 uninhabited villages and 12 villages merged in towns.

Population :

Table 1 gives distribution of population tahsilwise by rural and urban areas. A further break down by persons, males and females has been given. Break up of villages by total and inhabited

villages has been attempted. In the last column number of towns tahsilwise has been given. At the bottom of the table district totals columnwise have been given. The table shows that in Hoshiarpur district out of 1629 villages as many as 1584 villages are inhabited. The maximum number of villages (620) and inhabited villages (596) is in Dasua Tahsil, followed by Hoshiarpur tahsil (521 and 506 respectively), while Balachaur has the smallest number (186 and 183 respectively). The number of towns is 10, out of which 4 each are in Dasua and Hoshiarpur tahsils while 1 each is in Garhshankar and Balachaur tahsils. Both villages and towns have a population of 12,43,807 persons (6,49,565 males and 5,94,242 females). In the district 10,64,187 persons (5,53,558 males and 5,10,629 females) live in rural areas i.e in villages whereas 1,79,620 persons (96,007 males and 83,613 females) live in urban areas i.e. in towns. Dasua tahsil with a population of 4,47,703 persons is the most populous tahsil in the district, followed by Hoshiapur tahsil. Balachaur tahsil with 1,27,765 persons is the least populous tahsil. Out of 1,79,620 persons who live in urban areas maximum number 98,802 persons live in Hoshiarpur tahsil which has Hoshiarpur the largest in the district. Balachaur tahsil with 6,630 urbanites is the least.

TABLE 2

Decadal Change in Distribution of Population

Sl. No.	Tahsil	Population						Percentage Decadal (1971—81) Variation		
		1971			1981					
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10	11
1.	Dasua	373,345	321,918	51,427	447,703	383,030	64,673	+19·92	+18·98	+25·76
2.	Hoshiarpur	355,258	285,344	63,914	419,838	321,085	98,802	+18·19	+12·13	+43·37
3.	Garhshankar	219,902	213,020	6,832	248,451	238,936	9,515	+12·98	+12·17	+38·26
4.	Balachaur	102,569	102,569	—	127,765	121,135	6,630	+24·56	+18·10	—
District Total		1,051,074	923,851	127,223	1,243,807	1,064,187	179,620	+18·34	+15·19	+41·19

Growth Rate :

Table 2 gives population tahsilwise by total, rural and urban areas for 1971 and 1981 censuses separately, It also gives percentage decadal variation tahsilwise by total, rural and urban areas for the decade 1971—81.

The column totals for the district have also been given. The table shows that in 1971 District population was 10,51,074 which increased to 12,43,807 persons in 1981. Thus percentage decadal variation recorded for the district during 1971—81 was +18.34 which is lower than the state percentage. Balachaur tahsil with a figure of +24.56 per cent is at the top in growth, whereas Garhshankar tahsil with a figure of +12.98 is at the bottom, this is mainly due to outmigration of sizable working force to foreign countries for jobs. This factor has also made impact on population in other tahsils. The rural population increased from 9,23,851 in 1971 to 10,64,187 in 1981, the growth rate being +15.19 which shows that rural areas suffered loss by losing population both to foreign countries due to emigration and urban areas due to quickening of pace of urbanisation. Hoshiarpur and Garhshankar tahsils are the worst affected as these record +12.13 and +12.17 per cent respectively. The urban popualtion which was 1,27,223 in 1971 increased to 1,79,620 in 1981, thus recording an increase of +41.19 per cent during the decade 1971—81. Hoshiarpur tahsil with a figure of +43.37 per cent tops due to development of Hoshiarpur town, whereas Dasua tahsil with a growth rate of +25.76 is at the bottom due to abrupt fall in the population of Talwara town on account of completion of work of the dam. The urban gains in Balachaur tahsil are sizable as from nil population it has jumped to 6,630 persons.

TABLE 3

Distribution of Villages by Population Ranges

Range of population	No. of villages in each range	Percentage of villages in each range
1	2	3
Less than 200	272	17·17
200—499	515	32·51
500—1,999	728	45·96
2,000—4,999	67	4·23
5,000—9,999	2	0·13
10,000+	—	—
Total	1,584	100·00

Villages :

Table 3 gives distribution of villages by population size in six ranges varying from less than 200 to 10,000 and above. It shows that out of 1584 inhabited villages the maximum number 728 (45.96 per cent) is in the range 500—1999, followed by 515 (32.51 per cent) in the range 200—499. Also sizable number 272 villages (17.17 per cent) is in the range less than 200.

There are only 2 villages (0.13 per cent) in the population range 5000—9999. In the population range 10,000 + there is no village. It would be seen from the table that smaller villages preponderate in the district, this being due to sparse population in the hilly areas of the district.

TABLE 4

Distribution of Villages by Density

Range of density (per sq. km.)	Total number of villages in each density range	Percentage of villages in each density range
1	2	3
0—10	16	1.01
11—20	16	1·01
21—50	53	3·35
51—100	113	7·13
101—200	243	15·34
201—300	308	19·45
301—500	499	31·50
501+	336	21·21
Not Known	—	—
Total	1,584	100·00

Density (per sq. km):

The density of population for Hoshiarpur district works out to 320 persons per sq. km as against 333 of the state. Table 4 gives the distribution of villages by density ranges. It shows that the maximum number

of villages 499 (31.50 per cent) fall in the density range 301—500, whereas minimum number of villages 16 (1.01 per cent) are in the density ranges 0—10 and 11—20 separately. The table reveals that more than 72 per cent of the villages 1143 (72.16 per cent) fall in the density range 201 and above.

TABLE 5

Proportion of Scheduled Castes Population to Total Population in the Villages

Percentage range of scheduled castes population to total population	No. of villages in each range	Percentage of villages in each range
1	2	3
Nil	160	10·10
Less than 5	65	4·10
6—10	94	5·93
11—15	98	6·19
16—20	110	6·95
21—30	260	16·41
31 and above	797	50·32
Total	1,584	100·00

Scheduled Castes/Tribes population.

Table 5 gives number of villages and percentages by range of Scheduled Castes/Tribes population to total population, ranges varying from nil to 31 and above per cent scheduled castes population. It shows that maximum number of villages 797 (50.32 per cent) have 31 and above per cent of scheduled castes population. There are 160 villages (10.10 per cent) which report no scheduled castes population at all, whereas 65 villages (4.10 per cent) have 5 or less per cent scheduled castes population. The second highest number of villages 260 (16.41 per cent) fall in the range 21—30, followed by 110 (6.95 per cent) in the range 16—20.

TABLE 6

Proportion of Scheduled Castes Population in Towns

Name of the town	Total population	Total scheduled castes population	Percentage of scheduled castes population to total population
1	2	3	4
1. Balachaur	6,630	1,752	26·43
2. Dasua	14,657	2,696	18·39
3. Garhdiwala	4,459	1,069	23·97
4. Garhshankar	9,515	3,228	33·93
5. Hariana	5,633	1,518	26·95
6. Hoshiarpur	85,648	17,241	20·13
7. Mukerian	14,454	2,874	19·88
8. Shamchaurasi	3,062	1,752	57·22
9. Talwara	17,907	3,289	18·37
10. Urmar Tanda	17,655	4,470	25·32
All Towns	1,79,620	39,889	22·21

Table 6 gives scheduled castes population and percentage of scheduled castes population to total population by towns for all the 10 towns of the district. It would be seen that out of 1,79,620 urban population 39,889 belong

to scheduled castes, the percentage being 22.21 for the district. Among towns the maximum number of scheduled castes is in Hoshiarpur town (17,241 persons) followed, at a considerable distance, by Urmar Tanda Town (4,470 persons). In respect of percentage of scheduled castes population Shamchaurasi town with a figure of 57.22 per cent leads other towns, followed, way behind, by Garhshankar Town with a figure of 33.93 per cent. Talwara with 18.37 and Dasua with 18.39 per cent trail behind.

It may be noted, however, that there is no scheduled tribes population in the district as no scheduled tribe has been notified in Punjab State.

TABLE 7

Literacy Rates by Population Ranges of Villages

Range of population	No. of villages in each range	Literacy rate
1	2	3
Less than 200	272	46·15
200—499	515	46·08
500—1,999	728	47·93
2,000—4,999	67	43·58
5,000—9,999	2	52·86
10,000+	—	—
Total	1,584	48·29

Literacy

Table 7 shows literacy rates of villages by population ranges. It shows that literacy rate in the rural areas is 48.29 per cent. The highest rate 52.86 per cent is reported in the population range 5000—9999 which has 2 villages only. It is followed by population range 500—1999 with 47.93 per cent literacy in 728 villages. The lowest literacy rate (43.58 per cent) is reported in the range 2000—4999 having 67 villages. It would thus be seen that no clear cut pattern is discernible between literacy rate and population size of the villages.

TABLE 8

Literacy Rates for Towns

Name of the town	Literacy rate
1	2
1. Balachaur	56·21
2. Dasua	56·80
3. Garhdiwala	63·27
4. Garhshankar	55·85
5. Hariana	63·29
6. Hoshiarpur	62·45
7. Mukerian	54·86
8. Shamchaurasi	50·00
9. Talwara	69·83
10. Urmar Tanda	56·39
All Towns	60·77

Table 8 also gives literacy rates by towns. It shows that literacy rate for urban areas is 60.77 per cent for this district. Among the towns highest literacy rate (69.83 per cent) is reported by Talwara, which is a town of skilled

workers and engineers. Talwara is followed by Hariana (63.29 per cent) and Garhdiwala (63.27 per cent) respectively. Shamchaurasi (50.00 per cent) stands at the bottom. This being a town with predominant rural characteristics.

The district is quite advanced in the matter of literacy, as against 40.86 per cent of the state it has 50.09 per cent literacy rate.

Working population :

Table 9 gives tahsilwise break up into rural and urban areas, details of total population, percentages of scheduled castes, literates, main workers, marginal workers, total workers and non-workers with further breakup by sex. It shows that 30.83 per cent of the population of the district, (32.29 per cent) in rural and (22.21 per cent) in urban areas is scheduled castes. The highest percentage (37.69) is in Hoshiarpur tahsil, followed by Garhshankar tahsil (35.35 pet cent), the lowest, however, is in Dasua tahsil (22.96 per cent). In the district 50.09 per cent population is literate, the percentages in rural areas and urban areas being 48.29 per cent and 60.77 per cent respectively. Hoshiarpur tahsil with 54.38 per cent tops all other tahsils, while Balachaur tahsil (38.43 per cent) trails behind at the bottom. On scrutiny it is found that there are wide disparities in the literacy rates of the two sexes, the female literacy rates being much lower than male.

The percentage of main workers for the district is 26.39 (26.06 rural and 28.29 urban), the highest being 28.93 per cent (29.11 rural and 25.73 urban) for Balachaur and the lowest 24.43 per cent for Dasua (23.91 rural and 27.48 urban). As regards sex differentials there is a wide disparity, the district figures varying as much as 48.42 per cent for males and 2.31 per cent for females. The percentages of marginal workers for the district is 2.94 (3.38 for rural and 0.35 for urban). Balachaur tahsil with 4.86 per cent (5.11 rural and 0.15 urban) leads other tahsils, whereas Garhshankar tahsil with 2.10 (2.17 rural and 0.56 urban) is at the bottom. The note worthy feature for marginal workers is that female percentages are higher than male, the respective figures for district being 1.41 and 4.61 per cent. The work participation rate (obtained by clubbing together main workers and marginal workers) for the district is 29.33 (rural 29.44 and urban 28.64). The top position is once again claimed by Balachaur tahsil with a figure of 33.79 (rural 34.22 and urban 25.88). The sex differentials for the district are 49.83 for males and 6.92 for females. The table reveals that almost two third population of the district is non-working the percentage being 70.67 per cent (rural 70.56 and urban 71.36). The top position in this category is occupied by Dasua tahsil. The note worthy aspect is that females outnumber males by wide margin in this category which is at variance with work participation rates.

TABLE NO. 9

BRIEF ANALYSIS OF VILLAGE AND TOWN DIRECTORY

VILLAGE DIRECTORY

Amenities available in the villages :

In the annexures immediately following this note, distribution of villages according to the availability of different amenities has been given in table 10. Table 11 shows proportion of rural population served by various amenities. Table 12 shows the number of villages where amenities are not available within the villages but are available outside. Table 13 gives distribution of villages by distance range from the nearest town and availability of amenities. Table 14 gives distribution of villages by population range and amenities available.

Amenitywise analysis is given below:—

(*i*) *Educational facilities*—Out of 1,584 inhabited villages in the district 1,355 (85.54 per cent) with 95.41 per cent of rural population of the district, have at least a primary school. As many as 229 villages do not enjoy this facility within the village but can avail from the nearby villages. Out of these, 212 villages can avail this facility within less than 5 kms; whereas the remaining 17 villages do so at a distance of 5-10 kms. Tahsilwise percentage of villages enjoying educational facilities are Dasua 84.90; Hoshiarpur 85.37; Garhshankar 90.63 and Balachaur 79.78.

(*ii*) *Medical facilities*—Out of 1.584 inhabited villages 302 (19.07 per cent) have a medical facility such as hospital, maternity and child welfare centre etc. The percentage of villages enjoying medical facility is the highest (22.74 per cent) in Garhshankar tahsil, followed by Hoshiarpur tahsil (21.74 per cent) and Balachaur tahsil (20.76 per cent). The percentage of rural population served by this amenity is the highest in Garhshankar tahsil (40.68 per cent), followed by Hoshiarpur tahsil (39.24 per cent) and Balachaur tahsil (39.02 per cent). Out of 1,282 villages wherein medical facility is not available locally, the amenity is available in 913 villages within less than 5 kms; in 340 villages within 5-10 kms. and in 29 villages at a distance 10-+-kms. Percentage of villages having medical facility but located within 5 kms from an urban centre is the lowest (16.01 per cent) but the percentage is the highest (20.34 per cent) in the villages lying in the distance range 6-15 kms. from an urban area. Still there are 59 villages (19.54 per cent) which enjoy medical facility but fall in the distance range 16-50 kms. from an urban centre.

(*iii*) *Drinking water facility*—All the 1,584 villages of the district enjoy the drinking water facility. The main source of drinking water is hand pumps. Wells are also quite popular. Tapped water facility is available in 482 villages in 1979-80.

(*iv*) *Post and telegraph facilities*—Out of 1,584 villages of the district inhabitants of 307 villages (19.38 per cent) enjoy the post and telegraph facility within the village. The availability is the highest (26.76 per cent) in Garhshankar tahsil; out of 299 inhabited villages of the tahsil, 80 villages enjoy post and telegraph facility, followed by Hoshiarpur tahsil with 123 villages (24.31 per cent) and Balachaur tahsil with 35 villages (19.12 per cent) and Dasua tahsil with 69 villages (11.58 per cent). The tahsil-wise population of villages enjoying this facility is; Dasua 27.89 per cent; Hoshiarpur 47.92 per cent; Garhshankar 48.45 per cent and Balachaur 38.61 per cent against 39.77 per cent of the district. In 1,277 villages P & T facility is not available. Out of these 1,063 villages enjoy these facilities within less than 5 kms., 196 villages within 5-10 kms. Out of 307 villages where post and telegraph facility is available within the village, 74 villages (17.96 per cent) are located less than 5 kms. from the nearest town, 195 villages (22.41 per cent) are located within 6-15 kms. and the remaining 38 villages (12.58 per cent) within 16-50 kms from the nearby town. Further out of 307 villages having this facility 215 villages (29.53 per cent) fall in the population range 500-1999, 55 villages (82.09 per cent) in the population range 2000-4999 and 35 villages (4.45 per cent) fall in the population range 1-499 persons.

(*v*) *Communications*—37.17 per cent of ruralites residing in 389 villages of this district are being served by public transport system. This facility is not available in 1,195 villages within their jurisdiction. Out of these, inhabitants of 1,019 villages have to commute a distance of less than 5 kms. to avail this facility, 154 villages avail within 5-10 kms. and the remaining 22 villages have to travel more than 10 kms to avail this facility. Again in case of 105 villages (25.48 per cent), the nearest town is located within less than 5 kms. In case of 205 villages (23.56 per cent) the nearest town is within 6-15 kms. and in the remaining 79 villages (26.15 per cent) have nearest town within 16-50kms. There are 215 villages in the population range 500-1999 having communication facility, 124 villages in the population range 1-499 and 48 villages in the population range 2000-4999. Percentage of rural population enjoying communication facility is 32.89 per cent in Dasua tahsil 48.12 per cent in Hoshiarpur tahsil, 46.37 per cent in Garhshankar tahsil and 3.53 per cent in Balachaur tahsil. It would thus be seen that percentage is the highest in Hoshiarpur tahsil and the lowest in Balachaur tahsil.

(*vi*) *Approach by pucca road*—Out of 1,584 inhabited villages 1,431 villages (90.34 per cent) are approachable by pucca roads and are, therefore, accessible throughout the year. Dasua tahsil has the maximum number (539 villages)

followed by Hoshiarpur tahsil (465 villages) and Garhshankar tahsil (281 villages). Out of 1,584 villages (90.34 per cent) are approachable by pucca road, 379 villages (91.99 per cent) are within a distance of 5 kms. from the nearest town, 827 villages (95.05 per cent) are within 6-15 kms. and 225 villages (74.50 per cent) are within 16-50 kms. Again out of 1,431 villages 686 villages (87.17 per cent) fall in the population range 1—499, 682, villages (93.68 per cent) fall in the population range 500-1999, 61 villages (91.04 per cent) fall in the population range 2000-4999 and the remaining 2 villages (100.00 per cent) fall in the population range 5000+.

(*vii*) *Power Supply*—All the villages in the district have been electrified. Therefore, cent per cent of inhabited villages of the district have power supply.

(*viii*) *Market/Hat*—Hat is not a common feature in the district. Only temporary markets are held during the fairs and festivals. In fact such facility is needed in areas which are far from the urban areas. In the district urban centres are wide spread and evenly distributed which rule out the necessity of weekly market or Hat. Moreover, easy accessibility by road also enables villagers to go to nearby towns for necessary purchases.

Land use pattern in the district :

Table 15 gives distribution of villages according to land use. The table shows that 65.58 per cent area of the district is cultivable, out of which 44.72 per cent is irrigated. Dasua tahsil leads other tahsils in the percentages of cultivable and irrigated areas, figures being 70.94 per cent and 50.25 per cent respectively. Garhshankar occupies second place with respective figures 65.03 per cent and 46.74 per cent. Hoshiarpur tahsil reports the lowest percentage (61.79 per cent) in cultivable area whereas Balachaur tahsil is at the bottom in percentage of area irrigated which is 32.71 per cent. Hoshiarpur tahsil lags behind because there are plenty of choes in this tahsil.

Staple food :

In Dasua and Hoshiarpur tahsils wheat, maize and rice is consumed. However, in Garhshankar and Balachaur the staple foods are wheat and maize. Wheat is consumed throughout the year but maize is generally popular in winter months. In the hilly villages where maize grows in abundance it is consumed for almost 6 months in the year. In Dasua tahsil where rice is produced in plenty one of the two principal meals is of rice. Berar or Gochani (Wheat gram mixed) is no longer popular as gram is not cultivated so extensively as in the past Cash crops-such as potato, sugarcane and groundnuts are also grown. Cotton is grown for domestic needs. Agricultural markets, serving as the nucleus for sales and purchases, have sprung up all over the district The principal markets being at Dasua, Urmur Tanda, Mukerian, Garhdiwala, Hoshiarpur and Garhshankar.

TOWN DIRECTORY

Urban population:

Table 16 of the town directory shows decadal growth rate, density and sex ratio of urban population in the district and the state for 1951, 1961, 1971 and 1981 censuses. According to this table only 14.44 per cent of the total population of the district is urban as against 27.68 per cent of the state. The urban component of the population of the district has increased but marginally from 12.10 per cent in 1971 to 14.44 per cent in 1981. During the three decades 1951—81 the increase is +2.44 per cent hardly. Compared to this, the state has recorded increase from 23.73 per cent in 1971 to 27.68 per cent in 1981 and a net increase + 5.96 per cent during 1951-81. It would thus be seen that this district lags behind in the field of urbanisation. But things are likely to improve with the taking up of industrialisation in a big way in the district.

TABLE 16

Growth, Density and Sex-ratio of Urban Population in the District in relation to the State

Census Year	District						State					
	Total population	Urban population	%Urban population	Decadal percentage variation in urban population	Density (population per sq. km.) 1981	1,243,807	179,623	14·44	+41·19	2,367	871	16,783,915	4,647,757	27·68	+44·51	3,875	865

Growth rate :

Hoshiarpur district has recorded an urban growth rate of 41.19 per cent during 1971—81 as against 44.51 of the state. The notable feature is that urban growth rate in the district compares favourably with the state, which was more than the state in the previous decade 1961—71, but has lagged behind in 1971—81. The main reason for this being the development of Talwara township during 1961—71 and its decline during 1971—81 due to completion of Pong Dam phase II. The development of industrial complex at Asron has not benefited the district. However, Rupnagar is the main beneficiary.

Density :

The density or the persons per sq.km. in urban area has recorded a sizable decline during the decade as against 3,420 in 1971 it is 2,367 in 1981. Correspondingly the state figures too have shown a decline from 4,650 in 1971 to 3,875 in 1981. The decline is attributable to extension of municipal limits of the urban units thereby resulting in increase in area but decline in density. The notable feature, however, is that densities of urban areas in the district are lower than the state because no large industrial or urban centre is located in the district.

Sex-ratio :

Sex ratio or number of females per thousand males in urban areas has shown a gradual increase from 819 in 1951 to 871 in 1981, though it increased marginally during 1971—81 (871 in 1981 from 868 in 1971). The improvement in sex ratio is due to large scale migration of youngmen who sought fortunes abroad.

New Towns/Towns Declassified:

TABLE 17

New Towns/Towns Declassified in 1981 Census

Name of town	Population 1981 Census
1	2
(*a*) *Added*	
(*i*) Balachaur	6,630
(*b*) *Declassified*	
NIL	

Table 17 shows that during the last decade Balachaur with a population of 6,630 was classified as a new town. This was done as a follow up action when it was made headquarters of Balachaurs tahsil. No town was, however, declassified after 1971 census.

Budget of the Towns :

TABLE 18

Per Capita Receipt and Expenditure in Towns

Class, name and civic status of the town		PER CAPITA								
		RECEIPT			EXPENDITURE					
		Total	Receipt through taxes	Receipt from all other sources	Total expenditure	General administration	Expenditure on public health and conveniences	Public works	Expenditure on public institutions	Other aspects
1		2	3	4	5	6	7	8	9	10
V Balachaur	NAC	20·18	0·42	19·76	0·36	0·15	..	..	..	0·21
IV Dasua	MC	0·65	0·40	0·25	0·58	0·12	0·08	0·19	..	0·19
VI Garhdiwala	MC	4·96	3·61	1·35	5·58	3·54	0·58	..	..	1·46
V Garhshankar	MC	72·30	54·10	18·20	65·16	22·80	18·35	9·51	..	14·50
V Hariana	MC	22·13	20·75	1·38	20·42	9·69	4·46	..	0·27	6·00
II Hoshiarpur	MC	82·29	67·05	15·24	75·17	11·95	36·27	14·94	0·34	11·67
IV Mukerian	MC	71·58	48·60	22·98	72·04	30·61	8·98	10·92	21·05	0·48
VI Shamchaurasi	MC	9·80	8·07	1·73	7·38	4·05	1·40	0·82	..	1·11
IV Talwara	CT	..	..	..	..	..	..	..	..	..
IV Urmar Tanda	MC	57·84	41·63	16·21	57·52	16·27	16·06	20·54	..	4·65

Table 18 appended to this note shows per capita receipt and expenditure for 1978-79 for 10 towns of the district. Coloumn 1 of the table lists out class, name and civic status of the towns arranged alphabetically. There is only one

Class II (Hoshiarpur) town in the district. Besides there are 4 Class IV, 3 Class V and 2 Class VI towns in the district. Out of 10 towns 8 have municipal committees, 1 has notified area committee and the remaining 1 town is a census town. Columns 2 to 4 of the table deal with receipts and give per capita total receipts, receipts through taxes and receipts from all other sources respectively. However, columns 5 to 10 deal with expenditure and give per capita total expenditure, expenditure on general administration, public health and conveniences, public works, public institutions and expenditure on other items on the expenditure side. On a close scrutiny of the table it will be noticed that in case of Talwara nil figures have been shown because it was treated as a town for census purposes only. The town was administered by Bhakra Beas Management Board. The town had no other civic status. Also it would be found that in case of 7 towns per capita receipt is more than expenditure. Only in the case of two towns viz. Garhdiwala and Mukerian per capita expenditure is more than income. On the receipt side, receipts through taxes are more than receipts from all other sources in 8 towns. Only in one case viz. Balachaur town, which has a notified area committee, receipts from other sources exceed receipts through taxes with a big margin. On the other hand in the expenditure side it is found that maximum expenditure is incurred on general administration in 5 towns, in one town (Hoshiarpur) on public health and conveniences, in two towns (Urmar Tanda and Dasua) in public works and in the remaining one town (Balachaur) on other aspects. It would also be noted that in Balachaur no expenditure was incurred on either public health and conveniences or public health or public institutions. Likewise in Garhdiwala town no expenditure was incurred on either public works or public institutions and in Hariana on public works. In 7 towns excepting Hariana, Hoshiarpur and Mukerian no expenditure was incurred on public institutions.

Social studies :

TABLE 19

Schools Per Ten Thousand Population in Towns

Class, name and civic status of the town		No. per ten thousand population			
		Higher Secondary/ Inter/PUC/Junior College	Secondary/ Matriculation	Junior Secondary/ Middle	Primary
1		2	3	4	6
V	Balachaur NAC	1·51	1·51	..	1·51
IV	Dasua MC	1·36	0·68	0·68	4·09
VI	Garhdiwala MC	2·24	6·73	..	6·73
V	Garhshankar MC	1·05	2·10	1·05	2·10
V	Hariana MC	1·77	5·33	..	3·55
II	Hoshiarpur MC	0·47	0·35	0·23	2·10
IV	Mukerian MC	0·69	2·07	--	2·07
VI	Shamchaurasi MC	6·53	—	..	6·53
IV	Talwara CT	1·12	0·56	0·56	0·56
IV	Urmar Tanda MC	0·57	1·70	0·57	2·83
	Total	**0·82**	**1·11**	**0·33**	**2·39**

Table 19 shows details of various types of schools per 10,000 population town-wise by class, name and civic status of towns alphabetically arranged in the district. The table shows that proportion of Higher Secondary/Inter/PUC/Junior College per 10,000 is maximum (6.53) in Shamchaurasi and the lowest (0.57) in Urmar Tanda town. The proportion of Secondary/Matriculation is maximum (6.73) in Garhdiwala town and minimum (0.56) in Talwara town. The proportion of Junior Secondary/Middle schools is maximum (1.05) in Garhshankar town and minimum (0.23) in Hoshiarpur town. It should, however, be noted that in 5 towns there is no middle school. In respect of Primary schools Gardhiwala occupies top position with a return of 6.73 per 10,000 population, whereas minimum (0.56) per 10,000 is in Talwara town. A point worth noting is that the number of schools in each category are inter-dependent as higher secondary schools usually have secondary and primary sections and consequently middle or primary schools may become conspicuous by their absence.

Medical facilities :

TABLE 20

No. of Beds in Medical Institutions in Towns

Class, name and civic status of the town		No of beds in medical institutions per 1,000 population
1		2
V	Balachaur NAC	4·52
IV	Dasua MC	3·41
VI	Garhdiwala MC	0·45
V	Garhshankar MC	5·25
V	Hariana MC	0·71
II	Hoshiarpur MC	2·16
IV	Mukerian MC	3·46
VI	Shamchaurasi MC	1·31
IV	Talwara CT	6·92
IV	Urmar Tanda MC	1·70
	Total	2·95

Table 20 shows number of beds in medical institutions in various towns of the district. It shows that maximum number of beds per thousand population is in Talwara (6.92) followed by Garhshankar (5.25). However, Garhdiwala reports the lowest figure (0.45) and Hariana (0.71) is slightly better off in this field.

Slum clearance :

In Punjab no slum areas have been notified, although certain pockets have been separately identified here and there.

PART XIII-A

Village and Town Directory

SECTION I—VILLAGE DIRECTORY

NOTE EXPLAINING THE CODES USED IN THE VILLAGE DIRECTORY

The village directory containing information about each village has been prepared for each tahsil in the ascending order of the census location code numbers, e.g., location code No. 17/11/3/22 means village No. 22 in tahsil No. 3 of district No. 11 of the state No. 17 . It contains information relating to total area of the villages in hectares, total population, No. of households, amenities available in the village i. e., educational, medical, drinking water, posts and telegraphs, communication, approach to village, nearest town and distance (in kms), and power supply. Besides it gives information regarding staple food, land-use i.e. area under different types of land use like forest, irrigated and unirrigated, cultivable and uncultivable land. This is further supplemented by the information on places of religious, historical and archaeological interest as also information on copies of newspapers coming in the village and number of motor cycles/ scooters, cars/jeeps and tractors available in the village.

Information about the amenities available has been given in columns 5 to 10 of the directory.

(i) *Educational Facilities*: Educational facilities have been shown by the following abbreviations:

P=Primary School

M=Junior Secondary or Middle School

H=Matriculation or Secondary School

PUC=Higher Secondary/Intermediate/Pre-university/Junior College.

C=College (graduate level and above) like Arts, Science, Commerce etc.

I=Industrial School.

Tr=Training School.

AC=Adult Literacy Class/Centre.

O=Other Educational Institutions. These may include Sanskrit Pathshalas, Senior Basic School, Maktab, etc.

Where figures like P(3), M(2), H(1) etc. occur, these denote that the village has three primary, two middle and one matriculation or secondary school.

(ii) *Medical Facilities*: Medical facilities have been shown by the following abbreviations:

H=Hospital.

MCW=Maternity and Child Welfare Centre

MH=Maternity Home

CWC=Child Welfare Centre

HC=Health Centre

PHC=Primary Health Centre

PHS=Primary Health Sub-Centre

D=Dispensary

FPC=Family Planning Centre

TB=TB Clinic

NH=Nursing Home

RP=Registered Private Practitioner

SMP=Subsidised Medical Practitioner

CHW=Community Health Worker

O=Others.

Number of institutions, if more than one in any village, have been given in brackets against each.

(iii) *Potable/Drinking Water Supply* : The types of the potable/drinking water supply and the sources available in the village have been indicated by the following codes;

T=Tap Water

W=Well Water

TK=Tank Water

TW=Tubewell Water

HP=Hand Pump

R=River Water

F=Fountain

C=Canal

L=Lake

S=Spring

N=Nullah

O=Others

NA=Information not available.

(iv) *Post & Telegraph Facilities* : Post & telegraph facilities have been shown by the following abbreviations:

PO=Post Office

TO=Telegraph Office

PTO=Post and Telegraph Office

Phone=Telephone connection.

(v) *Communication Facilities*: Communication facilities have been indicated by the following abbreviations:

BS=Bus Stop

RS=Railway Station.

NW=Navigable Waterway (including river, canal, backwaters, etc.)

Only public transport like bus, railway and waterway have been considered for this purpose.

(vi) *Approach to Village* : This refers to the state of road etc. leading to the village. This has been indicated by the following codes.

PR=Pucca Road

KR=Kachha Road

NR=Navigable River

NC=Navigable Canal

NW=Navigable Waterway (other than river or canal).

(vii) *Nearest Town and Distance* : The distance in kms of the nearest town (whether located in the state or in another state) has been given in brackets under column 12.

(viii) *Power Supply* : For this the following abbreviations have been used under column 13

ED=Electricity for Domestic Purpose

EAG=Electricity for Agriculture

EO=Electricity for Other purpose like industrial, commercial, etc.

EA=Electricity for all purposes listed above.

Information relating to places of religious, historical or archaeological interest is given under column 20(a). Information on copies of newspapers coming in the village (N), motor cycles/scooters available in the village (M), cars/jeeps available in the village(C), and for tractors available in the village (T) is also furnished under column 20. The numeral following the alphabet indicates the number of newspapers, motor cycles, etc. Uninhabited villages and the villages that got merged in towns have been shown under column 20(a).

(ix) *Land use* : Break-up of area under different types of land use viz. forest, irrigated area, unirrigated area, culturable waste and areas not available for cultivation has been furnished under columns 15-19.

(a) *Forest* : This includes all lands classed as forests under any legal enactment dealing with forests or administered as forests, whether state owned or private, and whether wooded or maintained as potential forest land. The area of crops raised in the forest and grazing lands or areas open for grazing within the forest should remain included under the forest area. If any portion of such land is not actually wooded but put to some agricultural use, that portion is included under the appropriate heading of cultivated or uncultivated land. In some cases there are instances where patches of land put to agricultural use within statutarily notified forests, are considered as forests by the revenue agency. These are treated as forests.

(b) *Irrigated by Source and unirrigated (land use)* : The two columns (cols. 16 and 17) cover all agricultural land and include net area sown with crops and orchards or net cropped area and current and other fallows. The latter implies all lands which were taken up for cultivation, but are temporarily out of cultivation for a period not less than a year and not more than five years. The columns do not include gross area sown or gross cropped area. Net area sown thus represents the area sown with crops and orchards, counting areas sown more than once in the same year only once.

(c) *Culturable waste* : This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once, but not cultivated during the five years or more in succession. Such lands are either fallow or covered with shrubs and jungles which are not put to any use. These have been assessed or unassessed and are in isolated blocks or within cultivated holdings. Lands under thatching grasses, bamboo bushes and other groves for fuel, etc., not included under orchards or forests, also come under this head. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest are, have been included in this column.

(d) *Area not available for cultivation*: This column (col. 19) includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use.

Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water e.g., rivers and canals and other lands put to uses other than agricultural.

Barren and unculturable lands cover all barren and unculturable lands, like mountains, deserts, etc. Land which cannot be brought under cultivation, except at a very high cost, has been classified as unculturable, whether such area is in isolated blocks or within cultivated holdings.

*Excludes villages with nil scheduled castes population.

SECTION II

Town Directory

It gives civic and other amenities. The abbreviations used are indicated below :—

(*I*) *Road Length*

PR	..	Pucca road
KR	..	Kuccha road

(*II*) *System of sewerage* :

S	..	Sewer
OSD	..	Open surface drains
BSD	..	Box surface drains
SD	..	Sylk drains
CD	..	Cesspool method
PT	..	Pit system

(*III*) *Method of disposal of night soil*

HL	..	Head loads
B	..	Baskets
WB	..	Wheel barrows
ST	..	Septic tank latrines
S	..	Sewerage

(*IV*) *Protected water supply*—Source and capacity of strorage system.

(a) Source of water supply :

TW	..	Tubewell/hand pump
T	..	Tap water
W	...	Well water
TK	...	Tank water

(b) System of storage of water—

OHT	..	Overhead Tank
SR	...	Service Reservoir
RIG	...	River Infiltration Gallery
BWP	...	Borewell Pumping System
PT	...	Pressure Tank

Statement V :

This gives medical, educational, recreational, and cultural facilities. The abbreviations used are indicated below :—

Medical amenities :

H	..	Hospital
D	..	Dispensary
HC	..	Health Centre

FC	..	Family Planning Centre
TB	..	TB Clinic
NH	..	Nursing Home
O	..	Others
A	..	Ayurvedic
U	..	Unani
Hom.	..	Homoeopathic

In case of allopathic, no separate code has been given. The information in col. 4 on medical facilities has been presented horizontally in the same line as illustrated below :

H (A—1, 2), D (Hom-2, U-1)

Here H (A—1, 2) reopresents one Ayurvedic and 2 Allopathic Hospitals and D (Hom-2, U-1) represents 2 Homoepathic, one Allopathic and one Unani Dispensary. If the medical facility is not available in a town, name of the nearest place (if in the same district) or nearest district (if in the same state) or other state and its distance from the town where the facility is available has been mentioned in column 4.

Educational amenities :

The codes that have been used are as follows :—

A	..	Arts only
S	..	Science only
AS	..	Arts and Science only
C	..	Commerce only
AC	..	Arts and Commerce only
ASC	..	Combined for all categories, Arts Science and Commerce
L	..	Law
SH	..	Shorthand
Type	..	Typewriting
Sh. Type	..	Shorthand and Typewriting
O	..	Others
P	..	Primary Schools
M	..	Junior Secondary or Middle School
H	..	Matricultion or Secondary
PUC	..	Higher Secondary/Intermediate/Pre-Univercity/ Junior College/'10+2' system whether held in school or college

If there are more institutions of a type in the town, their number has been given against each in brackets.

If any educational facility is not available in the town the name of nearest place (if in the same district) or the name of nearest district (if in the same state) or other state and its distance from the town where this facility is available has been given in brackets.

Recreational and cultural facilities.

The following codes have been used :

PL	..	Public Library
RR	..	Reading Room

Statement VI :

This gives information on trade, commerce, industry and banking for each town of the district.

Appendix to the town directory schows towns of the district which have outgrowths and population of outgrowths.

PART B

PRIMARY CENSUS ABSTRACT (GENERAL)

Primary Census Abstract (Scheduled Castes)

PART B

PRIMARY CENSUS ABSTRACT (GENERAL)

Primary Census Abstract (Scheduled Castes)

EXPLANATORY NOTE ON PRIMARY CENSUS ABSTRACT

The Primary Census Abstract (PCA) General and Scheduled Castes provides the basic information relating to popluation data pertaining to 1981 Census. It contains the data in respect of area, number of occupied residential houses and households, total population (including institutional and houseless population), population break up by sex, scheduled castes, literates, main workers classified into four categories of cultivators, agricultural labourers and other workers, marginal workers and non-workers for each village and for each town/ wardwise.

The district totals given at the beginning of the PCA are followed by break up of rural and urban areas of the district. The data are presented tahsilwise.

The rural PCA presents the data for the villages arranged in ascending order of location code numbers (assigned to the villages within the tahsil). The urban PCA, presents wardwise data for each town. In rural PCA, the uninhabited villages and the villages which have got merged in towns have also been indicated. It may be mentioned here that the PCA data provided here have been compiled on the basis of the basic schedules i.e., household schedule and the universal individual slip canvassed during 1981 Census Operations. The concepts and terms occuring in the PCA are briefly explained here :

Census House :

A census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

Occupied Residential House :

Occupied residential house is dwelling house and includes a house used partly as a dwelling and partly for some other purpose like shop, workshop, factory, etc., but does not include a 'vacant house' where no person was found to be residing at the time of census.

Household :

A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. Examples of unrelated households are boarding houses, messes, hostels, residential hotels, rescue homes, Jails, *ashrams*, etc. These are called 'institutional households'. There may be one member household, two member household or multi member household. For census purposes, each one of these types is regarded as a 'household'.

Another type of household for census purpose is houseless household which is a household comprising 'houseless person/persons'. A houseless person in census terminology has been defined as :

(i) a person who might be doing domestic service or other work with one or more households but who does not reside in any house and sleeps in the corridors, verandahs or passages in buildings or in the streets ;

(ii) wandering or nomadic tribes found to be staying in temporary huts etc. ; and

(iii) beggar, vagrant, tramp, sadhu, fakir, etc., who is found on the footpaths, streets, in places like parks, gardens, railway yards, etc.

Scheduled Castes :

Scheduled Castes are such castes, races or tribes or parts of groups within such castes, races or tribes as are declared to be scheduled castes by the President of India's Orders issued under Article 314 of the Constitution of India.

Literate :

A person who can both read and write with understanding in any language has been taken as literate. A person who can merely read but cannot write, has not been considered as literate. It is not necessary that

a person who is literate should have received any formal education or should have passed any minimum educational standard.

All children of the age of 4 years or less have been treated as illiterate even if the child has been going to a school and might have picked up reading and writing a few odd words.

Workers and Categories of Workers :

Work may be defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work.

In the economic questions, canvassed in 1981 census, there has been some difference. The 'work' concept in 1961 and 1971 censuses, as opposed to the 'income' or 'economic indepenednce' concept of the earlier censusses was adopted for 1981 census, but the criterion for classification of persons as workers was changed. While in 1961 and 1971 censuses different approaches, namely, usual status and current status, were adopted with reference period of one year and one week for seasonal and for regular work respectivcly, at the 1981 census the usual status approach was adopted uniformly for all work.

In 1961, a person qualified as a worker if he had worked regularly during the last season or if he had worked at least for a day in regular (non-seasonal) work during the preceding fortnight. At the 1971 census a person was treated as a worker only if he spent his time mainly in work or if he worked at least for a day in regular (non-seasonal) work during the preceding week. The dichotomy of workers/non-workers of 1961 and 1971 censuses was discarded at the 1981 census and instead a trichotomy of main workers, marginal workers and non-workers was adopted. For main workers the time criterion of engagement in work for the major part of the year, i.e., at least 183 days was adopted. Those who worked for some time during the last year but not for the major part were treated as marginal workers. Those who had never worked during the last year were non-workers. This trichotomy partially permits a comparability of 1981 census economic data with that of 1971 as well as 1961. The main worker of 1981 census can be expected to correspond to the workers of 1971 and the main workers and marginal workers of 1981 together to correspond to the workers of 1961.

Classifications of Main Activity :

The main activity of workers has been classified into four categories, viz., cultivator, agricultural labourer, household industry and other worker. These terms are explained below :

Cultivator :

For purposes of the census, a person has been considered working as cultivator if he or she has been engaged either as employer, single worker or family workers in cultivation of land owned or held from government or private persons or institutions for payment in money, kind or share. Cultivation included supervision or direction of cultivation. It has been indicated by abbreviation 'C'.

Agricultural Labourer :

A person who worked in another person's land for wages in money, kind or share has been regarded as an agricultural labourer. He/she had no risk in the cultivation but he/she merely worked in another person's land for wages. An agricultural labourer had no right of lease or contract on land on which he/she worked. It has been indicated by abbreviation 'AL'.

Household Indsutry :

Household industry has been defined as an industry conducted by the head of the household himself/herself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lived in urban areas. The larger proportion of workers in a household industry constituted of members of the hoseholds including the head. The industry should not be run on the scale of a registered factory which whould qualify or has to be registered under the Indian Factories Act.

For a person who has returned his/her main activity as engaged in some production, processing, servicing or repair of articles or goods such as handloom weaving, dyeing, carpentary, *bidi* rolling, pottery manufacture, bicycle repairing, blacksmithy, tailoring, etc., it has been ascretained if it is a household industry and if so, it has been indicated by the abbreviation 'HHI' in the space provided for.

Other Workers :

All workers, i.e., those who have been engaged in some economic activity during the last one year have not been categorised as cultivators, or agricultural labourers or in household industry, are 'other workers' 'OW'. The type of workers that come the under the category of 'OW' include factory workers, plantation workers, those in trade, commerce, business, transport, mining, construction, political or social work, all government servants, municipal employees, teachers, priests entertainment artists etc.

3.	**Ward No. 3:**—Residence of Nand Singh to house of Joginder Singh, H. No. 1 to 50, Residence of Gurdyal to house of Kartar Singh, H. No. 51 to 120.
4.	**Ward No. 4:**—Residence of Lal Kumar to Mandir, H. No. 1 to 70, House of Puran Dass to house of Chanan Dass , H. No. 71 to 212.
5.	**Ward No. 5:**—Residence of Satnam Singh to house of Atma Singh H. No. 1 to 81, House of Kartar Chand to residence of Balbir Singh H. No. 82 to 105.
6.	**Ward No. 6:**—Residence of Jaswant Singh to house of Mahavir Singh, H. No. 1 to 33, House of Waryam Singh to Punjab Electric Store, H. No. 34 to 75.
7.	**Ward No. 7:**—House No. 1 i.e. vacant to house of Sarwan in H. No. 62, residence of Dayal to vacant house, H. No. 63 to 82.
8.	**Ward No. 8:**—House of Kartara Ram to residence of Ram Kishan, H. No. 1 to 58, House of Husan Lal to house of Ram Lal, H. No. 59 to 86.
9.	**Ward No.9:**From Bethak to house of Krishna, H. No. 1 to 46 , House of Jagdish to residence of Lachhman Ram, H. No. 47 to 58.

ANNEXURE TO APPENDIX

Description of Enumeration Blocks of Garhshankar M. C.

Block No.	*Description*
1.	**Ward No. 1:**—Residence of Swarn Singh to School, H. No. 1111 to 1191, House of Balwant Singh to residence of Bansi Lal, H.No. 1192 to 1268.
2.	**Ward No. 1:**—Residence of Harbans Lal to house of Kartari, H. No. 534 t0 597, House of Jagat Ram to residence of Dharam Ram, H. No. 598 to 674.
3.	**Ward No. 2:**—Residence of Singara Ram to Gurdwara, H. No. 341 to 513, House of Tarsem Singh to School, H. No. 514 to 636.
4.	Ward No. 3:—Residence of Nath Singh to house of Jagdish Verma, H. No. 329 to 460, House of Ajit Singh to vacant house, H. No. 461 to 508.
5.	**Ward No. 4:**—House No. 637 i.e. vacant to house of Harbans in H. No. 722, House of Kartar Singh to house of Roshan Lal. H. No. 723 to 737.
6.	**Ward No. 4:**—Residence of Surinder Mohan to house of Sant Ram H. No. 739 to 800, House of Gurcharan Dass to residence of Mohan Sudan. H. No. 801 to 818.
7.	**Ward No. 5:**—House of Tarlochan Singh to house of Jaswant Singh, H. No. 1722 to 1790, residence of Ram Lubhaya to house of Gurmej Kaur, H. No. 1791 to 1857.
8.	**Ward No. 6:**—Cattle-Shed to Dharamsala, H. No. 828 to 888, House of Nanu Ram to residence of Nauna Devi, H. No. 889 to 1037.
9.	**Ward No. 6:**—Flour Mill to house of Chaman Lal, H. No. 894 to 955, House of Piara Lal to residence of Parmeshvari Devi, H. No. 956 to 1544.
10.	**Ward No. 7:**—S.D.M. office to Bank, H. No 1203 to 1320,—House of Vasudevi Sharma to Shop, H. No. 1321 to 1357.
11.	**Ward No. 7:**—Residence of Surinder Singh to Barbar's Shop H. No. 1358 to 1433, House of Gurdeep Singh to Cattle-Shed, H. No. 1 to 67.
12.	**Ward No. 7:**—Cattle-Shed to Shop, H. No. 68 to 157, House of Hukam to house of Jai Ram, H. No. 158 to 218, House of Darsh Ram to Petrol pump, H. No. 219 to 271.
13.	**Ward No. 8:**—Residence No. 1576 i.e. vacant to house of Satya Devi in H. No. 1667, House of Ram Saran, H. No. 1668 to 1721.
14.	**Ward No.9I**—House No. 1630 i.e. vacant to house of Kartar Singh, H. No. 1630 to 1654, House of Kishori Lal to house of Tarlochan Dutt, H. No. 1467 to 1556.
15.	**Ward No. 9:**—House No. 192 i.e. vacant to house of Nanak Chand in H. No. 256, House of Harbans Singh to house of Janak Singh, H. No. 257 to 263.
16.	**Ward No. 10:**—Residence of Swarn Singh to house of Sucha Singh, H. No. 127 to 276, House of Harbans Singh to house of Partap Singh, H. No. 277 to 400.
17.	**Ward No. 11:**—Lakkar Tall to house of Ram ji Dass, H. No. 36 to 129, House of Khushi Ram to Cattle-Shed, H. No. 130 to 141.
18.	**Ward No. 11:**—Residence of Karam Chand to house of Ram Chand, H. No. 1 to 54, House of Bakshish Singh to residence of Amar Chand, H. No. 55 to 77.

ANNEXURE TO APPENDIX

Description of Enumeration Blocks of Balachaur N.A.C.

Block No.	*Description*
1.	**Ward No. 1**:—Residence of Bakhtawar Singh to house of Om Parkash H. No. 1 to 67, House of Sukhdev Singh to Bearing Shop, H. No. 68 to 234.
2.	**Ward No. 2**:—House No. 1 i.e. vacant to residence of Khushi Ram in H. No. 90, House of Parma Nand to house of Kanail Singh H. No. 91 to 194.
3.	**Ward No. 3**:—Octroi Post to residence of Surat Ram, H. No. 1 to 89, House of Karam Singh to residence of Mela Ram, H. No. 90 to 201.
4.	**Ward No. 4**: —Residence of Svitri Devi to house of Rajinder Singh, H. No. 1 to 61, House of Puran Singh to vacant house, H. No. 62 to 100.
5.	**Ward No. 5**:—Residence of Karam Chand to house of Jeewan Dass H. No. 1 to 86, House of Dinkar Sharma to vacant house H. No. 87 to 127.
6.	**Ward No. 6**:—Residence of Ram Bilas to house of Sant Ram, H. No. 1 to 53, House of Ram Lubhaya to residence of kuldip Singh H. No. 54 to 108.
7.	**Ward No. 7**:—residence Cum-Mandir of Nand Giri to house of Nek Chand H.No. 1 to 63 House of Tarlok Chand to residence of ved Sahai, H. No. 64 to 149.
8.	**Ward No. 8**: —Residence of Sant Tara Singh to house of Peshori Lal, H. No. 1 to 73,House of Sardari Lal to Shop, H. No. 74 to 165.
9.	**Ward No. 9**:—Residence of Nand Singh to house of Mathura Dass, H. No. 1 to 58 house of Kashmiri Lal to residence of Madan Gopal, H. No. 59 to 68.
10.	**Ward No. 10**: —Residence of Raj Kumar to house of Sudesh Kumari H. No. 1 to 71, House of Kewal Singh to residence of Kaushalya Devi, H. No. 72 to 183.
