FOREWORD

The district census handbook (DCH), compiled by the Census Organisation on behalf of the State Governments isone of the most valuable products of the census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to district administration. The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The District Census Handbook series was initiated during the 1951 census. It contained important census tables and PCA for each village and town of the district. During 1961 census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series, some new features, alongwith the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only local area planning but regulating the provision of goods and services as well as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres, and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled castes and scheduled tribes population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Need Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 census.

In order to avoid delay in publication of 1981 DCH series, it has been so designed that Part-A of the volume contains village and town directory and Part-B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH a detailed analytical note supported by number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The District and Tahsil level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri D. N. Dhir, I. A. S., the Director of Census Operations, Punjab on behalf of the State Government which has borne the cost of printing The task of planning, designing and coordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (of Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA,
Registrar General, India.

New Delhi:

The 26th April, 1982

PREFACE

As being regularly presented hithertofore, since 1951 census, we have now the privilege of presenting the District Census Handbooks consequent upon 1981 census.

To shorten the time lag to minimum after the compilation of census 1981 data and issuance of this Handbook as a sort of self-contained reference book, predominantly based on census data for the district, action was initiated upon the project as early as in July, 1979. The Registrar General, India indicated the revised formats and statements designed for this series of books. The improvements were with a view to making the data more useful for administrators, planners, scholars and other categories of users.

There are 134 towns categorised as urban area and 12,899 villages (45 tahsils) as the rural component in the state. The formidable task of collecting and compiling of this voluminous data for such a large number of units had its own problems and difficulties, both in the matters of chase up and in obtaining correct data which could be test-checked in terms of consistency with what was obtained and published consequent upon 1971 census data. Several gruelling cross checks had to be adopted to tally such items as area figures and the land use pattern for each unit.

The statements and schedules for collecting information from the rural areas were translated into Punjabi and also test-checked to assess their acceptability and responsiveness by those who were to make their use. (I had also unscuccessfully toyed with the idea of collecting information on some other itmes that could indicate comparative affluence of rural Punjab but had to give it up in the light of keeping to uniformity in presentation of data on all India pattern).

The statements/schedules for town directory were transmitted to the Chief Executives of the local bodies and those for rural areas were transmitted to the SDOs (C) (since all tahsils in Punjab have been converted into subdivisions) for necessary supply of data by the revenue staff under them. The officers and senior staff of the directorate that had been made directly responsible for houselisting operations and had reported to the field in October, 1979, were also charged with getting these through on personal contacts. This resulted in our getting the feed back by May, 1980, on the conclusion of houselisting operations, though some small instalments of these schedules continued till September/October 1980.

A cell had been created at the directorate to scrutinise the data as received and make preliminary compilation. The data as obtained from the field was supplemented with the data collected from the various heads of the departments at the state level, particularly in matters of amenities and facilities in the fields of education. medical, communications and the like. The staff working in the cell was once again out in the field for assisting in the second field operation, namely enumeration and it was only on its conclusion that the work of compilation started in May-June, 1981. The three Deputy Directors (at the regional tabulation offices) were in position about the same time in the field and the gaps in data, needing reconciliation in figures were got through these field officers on personal contacts with the concerned quarters.

On the compilation of the Primary Census Abstract (PCA) in March, 1982, when the figures were available for projection in this volume, the whole exercise was consolidated to give birth to the instant manuscript.

The data in the book is being presented in two parts—Part-A comprises Village and Town Directory and Part-B Primary Census Abstract villagewise and town/wardwise separately. In addition, Primary Census Abstract for scheduled castes upto tahsil/town level is also presented (There are no scheduled tribes in the state).

An analytical note based on a number of inset tables compiled out of the data from village and town directory and PCA has also been added for the benefit of the users, but the greater aim has been to present the data as compiled and leave further deeper study for those for whom the publication is meant.

We are grateful to the large number of personnel of the State Revenue Department at the village, tahsil, sub division and district levels and the municipal staff in all the local bodies in the state for their co-operation in filling-up the statements/schedules for providing the data.

The production of this book (and for that matter all the 12 District Census Handbooks) has been the handi work of consistent and constant efforts put in jointly by almost all the staff of the directorate, though only at one point of time or the other in certain cases. The collection of data for Village and Town Directory, as mentioned earlier, was a major work in the pre-census period and after the census most of the staff was busy in tabulation and compilation of the census data both at the regional tabulation offices and at the directorate. The DCHB Cell (Specially created) thereafter commenced work on inset tables, while the senior staff and the officers took to developing the fly-leaves and explanatory notes. Simultaneously the map section was deep in work for producing the maps that had to accompany these books.

To each one of them I acknowledge my thanks.

Shri M.S. Mahadeokar, Assistant Controller of the U.T. Printing Press cooperated in ensuring that the publication saw the light of the day at the earliest.

D.N. DHIR,

Director, Census, Punjab.

Chandigarh :
September, 1982.

FIROZPUR DISTRICT—A SHORT PROFILE

Location:

Firozpur, one of the three border districts, occupies the south-west corner of the State along the Indo-Pakistan frontier. It is surrounded by Amritsar, Kapurthala and Jalandhar districts in the north, Ludhinana and Faridkot districts in the east, Ganganagar district of Rajasthan in the south and south-west and Pakistan in the north-west. In the north-east the river Satluj separates it from Kapurthala and Jalandhar districts. The united stream of the Satluj and Beas separates it from Amritsar district in the north and further down for a length of about 130 kms. from Pakistan.

Origin:

The district derives its name from the town of its headquarters 'Firozpur'. The Firozpur town is reported to have been founded by Ferozeshah Tughlak, emperor of Delhi, who ruled from 1351 to 1387. The Manj Rajputs, however, claim that the town was founded by their chief, Feroze Khan, in the middle of the 16th century.

It comprises 1,167 villages (out of which 1,119 are inhabited) and 9 towns—the total jurisdiction of the district is distributed in three tahsils viz. Zira, Firozpur and Fazilka which are sub-divisional headquarters also.

Area:

According to the Surveyor General, India, the area of the district is 5,874 sq. kms. In terms of area it is the largest district of the State. The area figures of the tahsils supplied by the Director of Land Records, Punjab, are as follows :

Tahsil		Area in Sq. kms.		
		Total	Rural	Urban
Zira	..	1,312·7	1,292·2	20·5
Firozpur	..	1,813·4	1,778·5	34·9
Fazilka	..	2,738·3	2,715·8	22·5

It would be seen from the above table that tahsil totals, when added up, do not tally with the district area supplied by Surveyor General, India. The difference is due to the fact that tahsilwise area figures for rural areas have been supplied by the Director, Land Records, Punjab, whereas the urban figures have been supplied by the urban local bodies.

Climate:

The district has a hot summer, mild rainy season and bracing winter which are similar to the drier tracts of the state. It begins to warm up in the middle of March, though the nights are cool. It goes on getting hotter till early July when the mercury, on many days, crosses 46°C. Dust storms are frequent during the summer particularly in the south-western region. The monsoonic rains commence in the mid-July with eccentric breaks, lasting up to the middle of September. Sometimes heavy rains occur in late September or early October, bringing floods in their wake causing extensive damage. The days are hot until mid-October, but the nights are cool. The cold weather for the next four months is severe and dry but healthy. Some rains occur from mid-December to mid-February. Amount of rainfall goes on decreasing from north-east to south-west in the district. Firozpur is the driest district because of its extreme south-west location in the state and is far off from the Himalayas.

Rivers and Drains :

The only river of consequence belonging to the district is Satluj. The main seasonal streams which traverse the district are : Sukhar *Nala*, Danda *Nala* and Satar *Nala*.

The Satluj runs for about 185 kms. along the northern and western boundaries of the district. At Hari-ke-Pattan the Satluj flows into the Beas. For most part of the year the Satluj remains calm but when in flood it overflows its banks in undating the area flanking it and destroys the *kharif* harvest quite often With the construction of the Bhakra Dam and Bhakra canal, and the barrages at Rupnagar, Hari-ke-Pattan and Hussainiwala, the floods in the river have now been greatly controlled.

The two barrages at Hari-ke-Pattan and Hussainiwala fall within the district. The barrage at Hussainiwala was constructed in 1926, giving rise to the Bikaner and the Eastern canals. Some 40 kms. up-stream from Hussainiwala another barrage was completed at Hari-ke-Pattan, from where the Firozpur Feeder, the Makhu canal, and the Rajasthan canal take off.

The Sukhar *Nala* meaning 'dry channel' originates in the Ludhiana district and runs in the serpentine course along the whole length of the district almost up to Mamdot. The Danda *Nala* serves as a natural drainage in Zira tahsil. Satar *Nala* runs in Muktsar tahsil of Faridkot district and carries drainage water to a lake near Fazilka.

Topography:

The land lacks in marked physical features, such as hills and sand dunes. It is a plain of alluvial formation, sloping gently at a rate of 28 cms per km from north east to south-west. The river Satluj was notorious for shifting its course, and is stated to have flowed as far as east of Faridkot and Muktsar within historical times. The topography of the district has resulted from the action and interaction of river Satluj.

Soils are fertile and are suitable for cotton cultivation. The only mineral found in the district is *kankar* (Small Stone) which is used for road build.

Present Jurisdiction:

As a result of 1845 treaty of Lahore, the British annexed, all the territory east of the Satluj. This territory was divided among the districts of Firozpur, Badhni and Ludhinana: the Firozpur district getting the areas of Zira, Mudki, Khai and portions of Kot Kapura, Guru Harsahai, Jhuma, Kot Bhai, Bhucho and Maharaj. The district underwent many changes in its Jurisdiction between 1845 and 1884. Since 1884 the jurisdiction of the district remained more or less the same till August, 1972. In August, 1972, Firozpur district lost two sub-divisions of Moga and Muktsar to the newly created district of Faridkot. At present the district has three sub-divisions, Zira, Firozpur and Fazilka.

Land Utilization :

The economy of the district is agriculture oriented. As per 1981 census, 77.21 per cent of population lives in rural areas and of the total workers in the district, 69.52 per cent are engaged as cultivators and agricultural labourers. In the year 1979-80, the total area under cultivation was 486,000 hectares which is 11.62 per cent of the total cultivated area in Punjab. Forest area is 6,000 hectares which is 2.76 per cent of the total area under forests in the State. In the district more than one crop is grown in 284,000 hectares. Main crops of the district are: wheat, paddy and bajra. The area under main crops during 1979-80 and 1980-81 in the district was as follows:—

Name of the main crop	Area under each crop (in '000 hectares)	
	1979-80	1980-81
Wheat ..	332	331
Paddy ..	156	162
Bajra ..	2	6

The above statement shows that area under paddy and bajra is increasing whereas area under wheat is decreasing. However, more than two-third area of the district is under wheat cultivation.

Agriculture:

Cotton is the major cash crop. Firozpur is the fourth largest cotton producing district in the state. The district also produces fresh fruits. Abohar area is famous for Malta (citrus) production.

Canals, tubewells and wells are the main sources of irrigation in the district. However, well irrigation is no more popular and is giving way to tubewell irrigation which is clear from the figures given below :—

	1960-61	1979-80
No. of tubewells ..	1,788	9,042
No. of wells used for irrigation ..	12,861	4,132

The total irrigated area was 70.79 per cent of the total cultivated area. Fazilka tahsil having 73.63 per cent of irrigated area tops amongst all the tahsils.

For the help of small farmers certain agencies are providing necessary financial assistance for the installation of tubewells and purchase of buffaloes, sheep and poultry.

For marketing of agricultural produce, there were 10 regular mandis in 1979-80 in the district. Some more purchasing centres have been opened for the banefit of farmers.

Animal Husbandry:

There has been proportionate increase with the passage of time in the cattle wealth, particularly, milch cattle. However, the increase in mechanised farming has meant apparent holding back of progress in the number of bullocks and camels earlier used in ploughing. Cattle wealth of the district includes bullocks, cows, buffaloes, camels, horses and ponies, donkeys and mules, sheep and goats. Of late, there has been a spurt in the number of poultry birds.

The district is provided with 65 veterinary hospitals and 30 permanent dispensaries for looking after the health of the livestock.

Communications, Railways and Roads:

For the social and economic development of an area well knit transportation system is a pre-requisite. As the economy of the district has an agriculture base, the linking of villages with the towns/main roads by roads/link roads is very essential to provide satisfactory transport system. The total length of roads in Firozpur district was 3,372 kms in 1980-81. It stands second in the State as far as the length of roads is concerned, Patiala being the first. However, the district is on the top among all the districts in Punjab in length of roads per lakh of population. Most of the routes have been nationalised. Some routes especially those linking villages with the important towns have, however, been given to private transporters.

Though situated on the south-western corner of the state, the National Highway No. 15 (from Rajasthan border to Amritsar) passes through Abohar and Zira towns of the district. Another National Higway No. 10 connects Abohar town with the Pakistan border near Fazilka.

The following four State Highways serve the district:

State Highway No. 14 .. Abohar-Suratgarh (Rajasthan)

State Highway No. 15 .. Firozpur-Faridkot

State Highway No. 19 .. Moga-Harike-Khalra

State Highway No. 20 .. Zira-Firozpur-Fazilka.

In addition important district roads of Abohar-Sitogane-Dabwali and Malout-Fazilka connect various places of this district with other districts of Punjab as well as neighbouring Rajasthan state.

The district lies within the Firozpur Division of the Northern Railway. Firozpur Cantt. is the head-quarters of the Divisional Superintendent and is an important junction.

There are four sections of railway lines. The Firozpur-Ludhiana line passes through the Firozpur tahsil. The Firozpur-Jalandhar line runs along the north-east of Firozpur and Zira tahsils, crossing the Satluj by a bridge at Hari-ke-Pattan. The Firozpur-Fazilka line runs south-westernly direction serving Firozpur and Fazilka tahsils. The Firozpur-Bathinda line has only a small strip in this district. Yet another line from Bathinda to Hindumalkot crosses the southern region of Fazilka tahsil. All these lines are of broad gauge. A meter-gauge line connects Fazilka with Bathinda and the meter-gauge Bathinda-Hanumangarh line, also touches the southern corner of Fazilka tahsil.

Amenities:

Firozpur was formerly considered a backward district educationally but it has since made a good deal of progress. Number of educational institutions in the district has increased to 1,405 in 1979 from 752 in 1967. In the last two decades many new schools have been opened and quite a few have been upgraded. The following figures show the pace of progress :—

	1967	1979
Primary schools	594	1,128
Middle schools	82	147
High/Higher Secondary schools	70	121
Colleges	6	9

In the matter of health the district is well placed in comparision with other districts in the state. The coverage of population may be glanced from the following :—

Area	Population covered by		
	per doctor	per bed	per medical institution
Firozpur	4,106	3,245	2,431
Punjab	1,894	3,807	3,662

In addition Ayurvedic and Unani institutions for dispensing medical treatment also exist in appreciable number in the district.

As in other parts of the state potable water supply in this district is also comparatively in a better measure. Almost all the inhabited villages are being served with water supply facilities either in the village itself or near the village.

All villages are electrified.

The postal facilities have also recorded appreciable increase in the last two decades. The number of post offices is 295 and telegraph offices is 10 in the district. Number of telephone exchanges is 8.

Demographic Characteristics:

The population of the district as recorded in 1981 census was 1,307,804 persons (694,280 males and 613,524 females). This is 7.79 per cent of the state's total population. Of the total district population, 22.79 per cent lives in urban areas as against 22.16 per cent observed at the 1971 census. The sex ratio of the district has been worked out at 884 which is higher than the state figure of 879. In spite of being the border district the growth of population during the decade (1971—81) was 25.16 per cent as against 23.89 per cent for the state. Urban growth rate was higher than the rural growth rate, this being 28.73 for urban areas and 24.14 for rural areas. Tahsil-wise percentage increase during the previous decade 1971—81 is indicated below :

Tahsil	Total	Rural	Urban
Zira	29·04	25·86	70·21
Firozpur	20·23	23·22	13·21
Fazilka	27·08	23·76	37·92

The density of population is 223 persons per sq. km. which is lower than the state density (333).

Literacy:

The literacy rate of the district as revealed at 1981 census was 32.29 which is lower than the literacy rate (40.86%) worked out for the state. Further efforts are required in the matter of both male and female literacy which is 39.46 and 24.17 per cent against 47.16 and 33.67 per cent in the state respectively. Among the districts Ludhiana tops in the literacy rate (50.60%) in the state.

Occupations:

Out of total population of 1,307,804 persons (694,280 males and 613,524 females) in the district 398,842 persons (383,757 males and 15,085 females) are main workers i.e. those who have reported to have worked for six months or more prior to the date of enumeration. The work participation rate for the district thus works out to 30.50 per cent of the total population (55.27 per cent for males population and only 2.46 per cent for females). The corresponding rates for the Punjab state are 29.35 per cent for total population 53.15% for males and only 2.27% for females). Thus, the work participation rate of the district is marginally higher than the rate worked out for Punjab state.

The major chunk of main workers are engaged as cultivators (45.03%) followed by 'other workers' (28.67%, agricultural labourers (24.49%) and household industry workers (1.81%) The female participation as 'other worker (45.67%) is the highest followed by agriculture labourers (36.24%). Cotton plucking and paddy transplatation and harvesting are the main agricultural operations in which females participate.

Trade and Commerce:

Firozpur district has been traditionally the agricultural stronghold. Apart from the staple varieties of food-grains like wheat, gram and bajra, it is known for rice and cotton.

Situated in the south-west of Punjab, away from the main heartland of the state, the district is studded with flourishing mandis. There are 10 marketing committees in the district providing important centres to the sellers from within the district and the purchasers from outside the district. Firozpur is surplus in nearly all types of agricultural produce which are mostly exported. The important regulated markets are listed below :

Market	*Important Commodities sent out*
Firozpur	Wheat, paddy, gram and barley
Guru Harsahai	Paddy, wheat and chillies
Jalalabad	Paddy and wheat
Fazilka	Wheat, cotton, paddy, barley, potatoes and onions
Abohar	Cotton, wheat, gram, barley, potatoes and onions
Talwandi Bhai	Wheat, gram, sarson and bajra
Zira	Paddy and wheat
Dharamkot	Paddy and wheat.

Cotton, cotton-seed, cotton-yarn, wheat, wheat-flour, barley, gram, sarson, bones, hides, skins and wool are the principal exports of the district.

The main imports into the district are salt, coal, gunny bags, kerosene oil, cloth, iron, fertilizers, agricultural implements and insecticides.

Industry:

Firozpur is predominantly an agricultural district but is catching up in industrial development due to pressure on land. Some progress has been made in the last two decades which can be judged from the fact that in 1960 there were only 77 registered factories in the district which increased to 209 in 1979.

After Independence it became a border district with the usual handicaps. With the passage of time, the people have, however, begun to take to industry.

The district abounds in cotton, wheat, rice, pulses, and oil seeds, therefore most of the industries in the district are agro-based e.g., cotton ginning and pressing, cotton spinning, cotton weaving, flour milling, rice husking, *dal* making, oil seed crushing, tanning and shoe making. The *sarkanda* which grows along the river banks is made into *ban moorah* and *sirki*. Wool is cleaned and pressed at Fazilka and saltpetre is refined at a few places. Manufacture of agricultural implements is common in the towns.

In recent times, Abohar has become a centre for establishment of cotton spinning mills, in addition to scores of cotton ginning factories. It is coming up as a major industrial centre, in addition to being an important agricultural base for cotton ginning and citrus fruits.

Historical Towns:

Firozpur

It is an old town and was surrounded by a *kacha* wall with ten gates. A metalled road girdles around the site of this wall. Towards the south of the town, practically touching its boundaries, is another town of Firozpur Cantt. which has always been an important army centre, the more so since partition due to its proximity to the Pakistan border. The Saragarhi memorial which is in the shape of a *Gurdwara* and a park, reminds of the 36 brave Sikh soldiers who laid down their lives defending the fort of Saragarhi in north-west frontier province.

Guru Harsahai

It is another historical town located on the Firozpur-Fazilka section of the northern railway. Here are located two temples dedicated to two virgins known as Mata Jalol and Mata Hansewali, where fairs are held twice a year. In the original village of Guru Harsahai, there is the Pothi Mala Temple which contains a *Pothi* (book) and a *mala* (rosary) of Guru Nanak Dev, as also a stone in which the image of Guru Nanak Dev, is visible to those who have faith in supernaturalism

Abohar

It is an ancient town. Ibn-Batuta, the famous historian of the fourteenth century, mentions Abohar as the first town in Hindustan, on way from Multan to Delhi. There are ruins of a large fort, reported to have been built up by a Rajput Raja Abram Chand several centuries ago. The town is well planned, and is expanding fast. It is a prosperous home of some of the best cotton grown in country. Abohar is described as California of India, with some 10,000 acres of area under citrus plantations, within a radius of 16 kms. from the town.

Besides towns of historical importance mentioned earlier, there are some other places of historical importance.

Bhagat Singh Memorial

It is about 10 kms. from Firozpur Cantt. adjoining to the Hussainiwala headworks. It reminds one of the great sacrifices of three great revolutionaries, Bhagat Singh, Raj Guru and Sukh Dev. The three revolutionaries were executed in the central jail Lahore on the 23rd March, 1931, and in order to avoid public fury, their bodies were stealthily removed and cremated at this spot the then British authorities. Since then a fair is held at this place on that day every year to honour the martyrs.

Ferozeshah

It is about 16 kms. from Firozpur towards Moga. It has a memorial which was erected in 1869 to commemorate the First Sikh War. The memorial is in the nature of cenotaph, a triangular pillar of masonry some 24 metres high.

ANNEXURE

Jurisdictional Changes

FIROZPUR DISTRICT

(Inter-district changes)

This district lost two complete tahsils of Muktsar and Moga to the newly created Faridkot district.

(Intra district changes)

Zira tahsil lost following 9 villages to Firozpur tahsil.

Serial No.	*Name of village*	*Hadbast No.*

7	Tali Gulam	(327)
8	Bandala	(328)
9	Kal-Ke-Hethar	(343)

INTRODUCTION TO DISTRICT CENSUS HANDBOOK

Keeping in view the needs of planners, for exhaustive infrastructural and amenity data up to village level, required for micro level planning, the formats of the village and town directory of 1981 DCH series have been re-designed and some new features useful for planning have been added while maintaining the comparability with 1971 data. A few new items of information such as adult literacy centres, primary health sub-centres, community health workers in villages, etc. have been introduced to meet some of the requirements of revised minimum needs programme. A new item 'approach to village' has been introduced to give an idea about the villages in the district which are inaccessible. A new column 'Total population and number of households' has been introduced to examine the correlation of amenities with the population and number of households they serve. Two more appendices namely (i) list of villages where no amenities are available and (ii) list of villages indicating ranges according to the proportion of scheduled castes to total population have been added with the same objectve in view. A significant addition in class of the town in all the six statements of the town directory which alongwith population and decadal variation since 1901 to 1981 will prove quite useful for analysing the infrastructure of amenities in the urban area of state.

Contents :

The 1981 DCH series have been divided into two parts. Part—A contains village and town directory and Part-B, PCAs of villages and towns and PCA for scheduled castes upto tahsil/town levels. Both parts are being published in this volume.

The village directory contains information about total area of each village in hectares, total population and number of households, amenities/conveniences available in village, staple food of the people and the land-use pattern. There is also information about the nearest town and its distance from the village and approach to the village.

The town directory presents data on each town with the aid of six statements giving the status and class of the town, the decadal populaltion and growth rate since 1901—1981, physical and locational aspects, municipal finance and availability of amenities/facilities like medical, educational, banking etc., trade, commerce and industry.

PCA incorporates tahsilwise data for each village and each town/ward under the following heads:

(i) Area in hectares/sq. kms.
(ii) Number of occupied census houses.
(iii) Number of households.
(iv) Total population
(v) Scheduled castes population (there is no scheduled tribe in Punjab State).
(vi) Literates.
(vii) Main workers classified into four categories of cultivators, agricultural labourers, household industry and other workers
(ix) Non-workers.

Maps:

The map of the district and a map for each tahsil of the district have been included.

The district map shows the district boundary and location of its headquarter, tahsil boundaries and location of its headquarter, national highway, state highway, important metalled roads, railway lines, river and streams, towns and census villages according to population size, post and telegraph offices, degree colleges and technical institutions, rest houses etc.

The tahsil map contains boundary of tahsil and location of tahsil headquarter, villages with location code numbers, villages with population size, uninhabited villages with location codes, urban areas with location codes, roads, railways and service facilities such as post and telegraph offices, higher secondary schools, hospitals etc.

Besides both the district and tahsil maps have an inset map where addition or loss of territory that has taken place during the decade, has been shown.

Sources:

Whereas PCA contains census data for compilation of village and town directory, the relevant schedules alongwith comprehensive instructions, were sent to the revenue officers (for rural areas) and executive officers of muncipal bodies (for urban areas) to be filled in at their end. The completed schedules were collected from the relevant quarters during the houselisting operations in April, 1980 by the staff of this directorate. The schedules were scrutinised at the directorate and the directories were compiled therefrom.

Census Concepts and Definitions:

Village and town directory:

Rural-Urban Classification : The 1981 census data are being presented by rural and urban areas, as in the previous censuses.

As far as rural area is cocerned 'village' has been adopted as the lowest census unit.

Rural areas : *'Village'*

The definition of the village adopted in census is identical with that of 'mauza' given under section 3(i) of the Punjab Land Revenue Act, 1887. It is the 'revenue estate' determined as such for the purpose of levy and collection of the land revenue. The revenue estate is defined in the Act *ibid* as an area :

(a) for which a separate record of rights exits or

(b) which has been separately assessed to land revenue, or would have been so assessed if the land revenue had not been realised, compounded or redeemed; or

(c) which the State Government may by general rule or specific orders declare to be an estate.

The village is thus not merely the *abadi deh* (red lined area) for census taking but the entire land coming within the fixed boundaries of each village in terms of the Act *ibid.*

There are 1,166 villages (including 47 uninhabited) in Firozpur district and one village since merged in town/village in Fazilka tahsil.

Urban area 'Town'

The following definition of an 'urban area' has been adopted at the 1981 census which is analogous to the criterion adopted in 1961 and 1971 censuses with some minor variation (as indicated below) :

(a) All places with a corporation, municipality or cantonment board or notified town area.

(b) All other places which satisfied the following criteria:

(i) a minimum population of 5,000;

(ii) at least 75 per cent of the male working population engaged in non-agricultural (and allied) activity; and

(iii) a population of at least 400 per sq. km (1,000 per sq. mile),

The urban criterion of 1981 census varies slightly from that of 1961 and 1971 censuses, in that the males working in activities such as forestry, logging etc., were then treated as engaged in non-agricultural activity. It, therefore, contributed to the 75 per cent criterion in 1961 and 1971 censuses whereas in the 1981 census these activities have been treated at par with cultivation and agricultural labour for the purpose of this criterion.

Prior to the 1961 census, the definition of 'urban area' was somewhat liberal and a lot was left to the discretion of the local authorities. At the 1971 census, the state directors of census operations were also given discretion in marginal cases to include, in consultation with the State Government, a place that had other distinct urban characteristics, or to exclude an undeserving place from being treated as 'urban'. There are 9 towns in Firozpur district as at 1981 Census.

Urban Agglomeration (U.A.):

Apart from town/city (a town with population of one lakh and above), the 1971 concept of urban agglomeration is also adopted for the 1981 census. Very often large railway colonies, university campuses, port areas, military camps etc., come up outside the statutory limits of the city or town but adjoining it. Such areas may not by themselves qualify to be treated as towns but if they form a continuous spread with the town, they are outgrowths of the town and deserve to be treated as urban. Such towns together with their outgrowths have been treated as one urban unit and called 'urban agglomeration.'

An urban agglomeration may constitute:

(a) a city with continuous outgrowth (the part of outgrowth being outside the statutory limits but falling within the boundaries of the adjoining village or villages);

(b) one town with similar outgrowth or two or more adjoining towns with their outgrowths as in (a); or

(c) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Urban Agglomerations in Firozpur District :

The following urban agglomerations in Firozpur District are being presented in the TownDirectory:—

Serial No.	Name of urban agglomeration	Units of agglomeration	Whether town in its own right or outgrowth
1	2	3	4
1	Firozpur Cantt.	(a) Firozpur Cantt.	Town
		(i) Railway Station Cantt.	Outgrowth
		(ii) Railway Colony	Outgrowth
2	Jalalabad	(a) Jalalabad Municipal Committee	Town
		(i) Extended Area Block No. 22	Outgrowth
3	Dharamkot	(a) Dharamkot Municipal Committee	Town
		(i) 80 Houses outside Municipal Committee Limit	Outgrowth

Standard Urban Areas (S.U.A.):

A new concept of standard urban area (SUA) as introduced in 1971 census was also followed for the 1981 census. The essential requirements for the constitution of a standard urban areas are:

(i) it should have a core town of a minimum population of 50,000;

(ii) the contiguous 'area' made up of other urban as well as rural administrative units should have mutual socio-economic links with the core town; and

(iii) in all probabilities this entire area should get fully urbanised in a period of two or three decades.

Certain SUAs were determined on this basis in 1971 and some basic data were presented for 1951, 1961 and 1971 for such areas and their components. Similar data is being presented for the SUAs in 1981 also. The idea is to present basic data for these areas for four to five decades so that the urbanisation process in those areas can be studied.

List of Standard Urban Areas in Firozpur District.

DEMOGRAPHIC CHARACTERISTICS BASED ON ANALYSIS OF INSET TABLES (PRIMARY CENSUS ABSTRACT)

Population:

TABLE I

Population, Number of Villages and Towns, 1981

Sr No.	Name of tahsil	POPULATION									No. of villages		No. of towns
		Total			Rural			Urban			Total	Inhabited	
		P	M	F	P	M	F	P	M	F			
1	2	3	4	5	6	7	8	9	10	11	12	13	14
1	Zira	295,958	157,705	138,253	267,049	142,221	124,828	28,909	15,484	13,425	377	366	2
2	Firozpur	436,655	231,582	205,073	314,014	166,614	147,400	122,641	64,968	57,673	477	459	4
3	Fazilka	575,191	304,993	270,198	428,670	226,774	201,896	146,521	78,219	68,302	312	294	3
	District total	**1,307,804**	**694,280**	**613 524**	**1,009,733**	**535,609**	**474,124**	**298,071**	**158,671**	**139,400**	**11,66**	**1,119**	**9**

Table 1 gives tahsilwise and sexwise population for total, rural and urban areas, number of total and inhabited villages, and towns as at 1981 census. The district has a population of 1,307,804 persons (694,280 males and 613,524 females) in 1981 census. 22.79% of the population of the district lives in its urban areas compared to 27.68% of the state as a whole. Firozpur tahsil has urban component of 28.09% which is higher than the propertion of the state urban population. The other two tahsils of the district, namely Fazilka and Zira have an urban component 25.47% and 9.77% respectively, both of which are lower than the state average.

Growth Rate:

TABLE 2

Decadal Change in Distribution of Population

Name of tahsil	POPULATION						Percentage decadal (1971—81) variation		
	1971			1981					
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10
Zira	229,156	212,172	16,984	295,958	267,049	28,909	+29·15	+25·86	+70·21
Firozpur	363,177	254,849	108,328	436,655	314,014	122,641	+20·23	+23·22	+13·21
Fazilka	452,603	346,365	106,238	575,191	428,670	146,521	+27·08	+23·76	+37·92
District total	**1,044,936**	**813,386**	**231,550**	**1,307,804**	**1,009,733**	**298,071**	**+25·16**	**+24·14**	**+28·73**

Table 2 shows change in distribution of population during the last decade 1971-81 for the district and its tahsils. The district has shown a growth rate of 25.16% as against the state growth rate of 23.89%. The rural growth rate is 24.14% as against the state rural growth rate of 17.48 % whereas the urban growth rate is 28.73% as against the state growth rate of 44.51 %.

The highest urban growth rate of 70.21 % has been recorded by Zira tahsil and the lowest 13.21 % by Firozpur tahsil.

Villages:

TABLE 3

Distribution of Villages by Population Ranges

Range of population	No. of villages in each range	Percentage of villages in each range
1	2	3
Less than—200	189	16·89
200—499	267	24·66
500—1,999	532	47·54
2,000—4,999	117	10·46
5,000—9,999	4	0·36
10,000 +	1	0·09
Total	**1,119**	**100·00**

Table 3 gives the distribution of villages according to population ranges. The district has 1,119 inhabited villages. The average number of persons per inhabited village in the district works out to 902. There is preponderance of middle sized villages (500—1,999), their number being 532, forming 47.54% of the total rural population in the district. There are 5 villages with population 5,000 and above.

Density:

TABLE 4

Distribution of Villages by Density

Range of density (per sq. km)	Total number of villages in each density range	Percentage of villages in each density range
	2	3
0—10	13	1.16
11—20	9	0·81
21—50	48	4·29
51—100	111	9·92
101—200	517	46·20
201—300	311	27·79
301—500	79	7·06
501+	31	2·77
Not known	..	..
Total	**1,119**	**100·00**

Table 4 shows distribution of villages by density. The density of population in the district works out to 223 persons per sq. km., which is the lowest amongst the districts of the state and significantly lower than the state average density of 333 persons per sq. km., The district has, however, recorded a substantial increase of 35 persons per sq. km., from 188 persons per sq. km., in 1971 to 223 persons per sq. km., in 1981.

517 villages (46.20%) out of the total 1,119 inhabited villages have density lying between 101—200 persons per sq. km., 311 villages (27.79%) are with density between 201—300 persons per sq. km., 79 villages (7.06%) are with density between 301—500 per Sq. km; 111 villages (9.92%) with density between 51—100; 9 villages (0.81%) with density between 11—20; 13 villages (1.16%) with density between 0—10 and there are 31 (2.77%) villages which have density of population exceeding 500.

Scheduled Castes Population:

TABLE 5

Proportion of Scheduled Castes Population to Total Population in the Villages

Percentage range of Scheduled Castes population to total population	No. of villages in each range	Percentage of villages in eace range
1	2	3
Nil	178	15.91
Less than 5	178	15.91
6—10	101	9.03
11—15	98	8.76
16—20	99	8.84
21—30	202	18.05
31+	263	23.50
Total	**1,119**	**100.00**

Table 5 and table 6 give information regarding the scheduled castes population, table 5 showing the proportion of scheduled castes population to total population in rural areas and table 6 indicating the proportion of scheduled castes population in urban areas of the district.

The district has relatively lower percentage of scheduled castes population i.e. 20.90% compared to 26.87% for the state as a whole.

Majority of villages i.e. 263 villages or 23.50 % have scheduled castes population of about 31% ; 202 villages (18.05%) have scheduled castes population ranging between 21 to 30%; remaining 654 villages have scheduled castes population below 21%.

TABLE 6

Proportion of Scheduled Castes Population in Towns

Name of the town		Total population	Total Scheduled Castes population	Percentage of Scheduled Castes population to total population
1		2	3	4
1. Abohar	M.C.	86,334	15,396	17·83
2. Dharamkot	U.A.	9,328	1,643	17·61
(i) Dharamkot	M.C.	9,125	1,643	18·31
3. Fazilka	M.C.	43,548	8,892	20·42
4. Firozpur	M.C.	61,162	9,770	15·97
5. Firozpur Cantt.	UA	44,678	8,188	18·33
(i) Firozpur	C.B.	38,582	6,273	16.26
6. Guruharsahai	M.C.	7,684	932	12·13
7. Jalalabad	UA	16,639	1,755	10·55
(i) Jalalabad	M.C.	14,734	1,495	10·15
8. Talwandi Bhai	M.C.	9,117	1,942	21·30
9. Zira	M.C.	19,581	4,449	22·72
All towns		**298,071**	**52,967**	**17·77**

As compared to rural areas, the urban areas have substantially lower population of scheduled castes, constituting 17.77% of the total population. Zira MC with 22.72 per cent of scheduled castes to total population ranks the highest amongst the towns of the district while the lowest (10.15%) has been reported by Jalalabad MC Guruharsahai has the second lowest proportion of 12.13%. A tahsilwise study can be made from table 9. There is no scheduled tribes population in Punjab state as no tribe has been notified as such for this state.

Literacy:

TABLE 7

Literacy Rates by Population Ranges of Villages

Range of population	Number of villages in each range	Literacy rate
1	2	3
Less than 200	189	23·71
200—499	276	25·14
500—1,999	532	25·49
2000—4,999	117	27·93
5000—9,999	4	32·66
10,000+	1	24·99
Total	**1,119**	**26·37**

Tables 7 and 8 give literacy by population ranges of villages and literacy for towns respectively. Only 32.29% of the population of the district is literate (which can at least read and write a letter with understanding as against the state percentage of 40.86. The male literacy rate is 39.46% and female literacy rate is 24.17%. However, the literacy rate has shown improvement over the literacy rate in 1971 by 4.51 per cent points which is commensurate with the improvement in the literacy rate of some of the other districts of Punjab. The literacy rates for rural and urban areas of the district respectively are 26.37% and 52.33%. Tahsilwise literacy rate for total, rural and urban and persons, males and females can be examined from table 9.

TABLE 8

Literacy Rates for Towns

Name of the town		Literacy rate
1		2
1. Abohar	M.C.	48·24
2. Dharamkot	U.A.	50·64
(i) Dharamkot	M.C.	50·87
3. Fazilka	M.C.	50·49
4. Firozpur	M.C.	56·23
5. Firozpur Cantt.	U.A.	57·30
(i) Firozpur	C.B.	56·76
6. Guruharsahai	M.C.	47·44

7.	Jalalabad	U.A.	59·26

8.	Talwandi Bhai	M.C.	50·15
9	Zira	M.C.	48·80
	All Towns		**52·33**

Table 8 shows the highest literacy rate of 63.57 % for Jalalabad MC followed by Firozpur Cantt; 56.76 % and Firozpur city 56.23%. The lowest literacy rate of 47.44% has been returned from Guruhar Sahai MC.

Working Population :

Table 9 gives the proportion of literates, workers, non-workers and scheduled castes population in the district. The main workers constituted 30.50% of the total population in 1981 as against 29.91% in 1971. There are 55.27% male main workers and 2.46% female main workers. Female workers have shown substantial improvement over 1971 wherein only 1.06% female workers were recorded. Of the total working force 69.52% of workers are engaged in agriculture as cultivators and agricultural labourers as against 74.18 % in 1971.

BRIEF ANALYSIS OF THE VILLAGE AND TOWN DIRECTORY

VILLAGE DIRECTORY

Amenities available in the village:

In the annexures immediately following this note, distribution of villages according to availability of different amenities/facilities has been indicated in table 10, while table 11 indicates the proportion of rural population served by these amenities and table 14 indicates the distribution of villages according to population range and amenities available. Table 13 indicates the distribution of villages according to the distance from the nearest town and availability of different amenities. According to this table out of 1,119 inhabited villages, 212 villages have a town at a radius of 5 km, 664 villages have an urban centre in a distance range of 6—15 kms whereas the remaining 243 villages have an urban centre in a distance range of 16—50 kms. This indicates that by and large the district is rural and a fair number of villages are away from the urban centres.

Table 12 sums up the number of villages where certain amenities are not available within the jurisdiction of the villages and the distance ranges where the inhabitants of these villages avail them.

Amenitywise analysis reads below:

Educational facilities:

Of the total 1,119 inhabited villages in the Firozpur district, 972 villages (86.86%) with a population of 98.36% of the rural population of the district are equipped with the facility of at least a primary school. 147 villages (60 in Zira tahsil, 76 in Firozpur tahsil, and 11 in Fazilka tahsil) in the district are however devoid of this basic facility. The percentage of villages having at least primary school increased from 61.97 % to 86.86% over the last decade, thus showing that Firozpur district has made a significant improvement in providing the minimum educational needs.

Medical facilities:

216 villages (19.30%) out of 1,119 inhabited villages have at least one of the medical institutions, viz., hospital, maternity and child welfare centre, health centre, primary health centre, dispensary, family planning centre and the like. The proportion of villages enjoying one or more of the medical facilities are the highest in Fazilka tahsil and the lowest for Zira tahsil. Of the 903 inhabited villages of the district which do not have any medical facility within the village for their population, for 486 villages the amenity is available within a radius of 5 kms; for 289 villages within the range of 5—10 kms but the inhabitants of the remaining 128 villages have to cover a distance of more than 10 kms to avail the medical facility. The number of villages enjoying medical facilities is the highest (121) among the villages situated within a radius of 6—15 kms of an urban centre, whreas it is the lowest (35) in a distance range of 0—5 kms. For villages lying in the distance range of 16—50 kms, 60 villages possess medical facilities within the village.

Drinking water facility:

All the 1,119 inhabited villages of the district invariably enjoy the drinking water facility. The main source of drinking water is handpump supplemented by well/tubewell.

Post and Telegraph facilities:

Out of the 1,119 inhabited villages 232 villages (20.73%) have the facility of post and telegraph. Tahsilwise 15.57% in Zira, 14.81% in Firozpur and 36.39% in Fazilka are enjoying the facility of post and telegraph. Proportion of population to whom post and telegraph facilities are available locally is 35.54%, the proportion being the highest in Fazilka tahsil i.e. 42.45% followed by Zira 39.05% and Firozpur 24.05%. Out of the 887 villages in which the post and telegraph facility is not available locally, the people of 611 villages have to commute a distance less than 5 kms; population of 202 villages between 5—10 kms and 74 villages more than 10 kms. Again out of the 232 villages which are availing the benefit of post and telgraph facilities, maximum number (129) of villages have an urban centre at a distance of 6—15 kms and 44 villages have at a radius of 5 kms. Further 118 (22.18%) villages falling in the population range of 500—1,999,99(84.62%) villages falling in the population range 2,000-4,999;12(2.58%) villages with population range of 0—499 and 3 (60.00%) villages exceeding the population of 5,000 are availing the facility of post and telegraph.

Communications:

The rural population of 390(34.85%) villages constituting 37.92% population is served by public transport system. 729 villages do not have any facility of communication within the territorial jurisdiction of the village or a little far away from the main habitation. Out of these 729 villages, 516 villages can avail of this facility after commuting a distance within a 5 kms radius, 149 villages between 5—10 kms and 64 villages more than 10 kms. According to the population ranges of the villages, 24.73% of the villages falling in population range of less than

500; 37.22% comprising population range of 500 to 1,999; 64.10% falling in the population range 2,000 to 4,999 and the remaining 40.00% villages of population range of 5,000 and above have the communication facility.

Approach by pucca road:

Of all the inhabited villages 89.54% covering thereby a population of 94.21% have been reported to be connected by metalled road and are, therefore, accessible both in fair and foul weather. Their tahsilwise distribution 89.07% in Zira, 93.25% in Firozpur and 84.35% in Fazilka are the respective proportion of villages which are approachable by pucca road. In Zira tahsil 326 villages, in Firozpur tahsil 428 villages and in Fazilka tahsil 248 villages covering a population of 96.86%, 98.21% and 89.22% of their respective total rural population have the facility of a pucca road. The number of villages connected by pucca road having an urban centre within a radius of 5 kms works out to 193 villages, those within a distance range of 6—15 km are 645 villages and those within a distance range of 16—50 kms are 164. The proportion of villages connected by pucca road, for those comprising population range 5,000 and above it is 80.00%, for villages with a population range 2,000 to 4,999 it is 91.45% and for population range 500 to 1,999 it is 95.58% and for population range less than 500 it is 82.15%.

Power supply :

All the villages of the district have invariably got the facility of power supply as the state has since been hundred per cent electrified.

Land use pattern :

The land use pattern is given in table 15 which reveals that 80.32% of the total area of the distric (in respect of inhabited villages) is under cultivation. Tahsilwise percentage of cultivable area to total are is the highest 86.28% in Zira tahsil followed by Firozpur tahsil 84.46% and Fazilka tahsil 73.43%. The proportion of irrigated area to total cultivable area in the district is 70.79%, Similarly tahsilwise proportion being 69.89% for Zira, 66.00% for Firozpur and 73.63% for Fazilka. The state canals and tubewells are the main sources of irrigation in the district.

Miscellaneous: cropping pattern; staple food and markets :

Apart from harvesting wheat and paddy which constitute the staple food of the people of the district, vast areas are under the cash crops of cotton, mustard. There are mandies at about 20 km., distance from each other which serve as the nucleus for purchase and sale of agricultural produce of inhabitants. Their expansion is a testimony to the fruits of the green revolution, being enjoyed by the farmers of the district.

TOWN DIRECTORY

Urban population:

Table 16 to 21 appended to this note deal with this section,

Table 16 shows growth rate, density and sex ratio of urban population in the district in relation to the state for 1981 census and the preceding three censuses 1971, 1961 and 1951. The 1981 census reveals that 22·79% of the population of the district live in the urban areas as compared to 27·68% of the state as a whole. The urban component of the population of the district increased by 0·63% points from 22·16% in 1971 to 22·79% in 1981 whereas the urbrn component of population in 1961 had decreased by 1·47% from 1951. The corresponding figures of urban population in the district and the state at 1971, 1961 and 1951 are 22·16% for the district as against 23·73% for the state; and 22·40% for the district as against 21·72% for the state respectively.

Growth rate:

TABLE 16

*For the district the density has been calculated after excluding the population of outgrowths.

Growth rate

The district shows a decad al growth rate of 28·73% in the urban areas for 1981 as compared to 44.51% for the state. During the previous decade i.e. 1961—1971 the district recorded a growth rate of 11·18% as compared to 25·27% for the state.

Density:

The district has recorded at 1981 census an urban density of 3721, persons (excluding outgrowths) per sq. km. as against 3,835 for the state. The corresponding urban density for the district during 1971, 1961 were 4,310 and 4,024 as against 4,650 and 4,090 for the state. The density of the district has shown a decline of 589 persons per sq. km. in 1981 compared to 1971 whereas there was an increase in density by 286 persons per sq. km., during the previous decade 1961—1971. The decline in density in 1981 is due to expansion of urban area.

Sex ratio:

The urban population of district has recorded a sex ratio of 879 in 1981, 871 in 1971, 783 in 1961 and 760 in 1951 as compared to 865, 856, 817 and 807 in the corresponding censuses for the state. There is a consistent increase in the sex ratio during 1951, 1961, 1971 and 1981.

New towns/towns declassified:

Table 18 relates to it. Firozpur district has nine towns; two class II towns (Abohar MC and Firozpur-MC), two class III towns (Fazilka MC and Firozpur (Cantt.), two Class IV towns (Jalalabad MC and Zira MC), three class V towns (Dharamkot MC, Guruhar sahai MC and Talwandi Bhai MC).

In respect of 4 towns viz; Abohar, Fazilka, Guruhar sahai and Talwandi Bhai, per capita receipts are lower than per capita expenditure and in case of remaining 5 tow ns the receipts exceed per capita expenditure. The highest. per capita receipt of Rs. 112.83 is recorded for Guruhar sahai MC and the lowest Rs. 32.99 for Dharamkot MC. The receipts through taxes form the major source of revenue in most of the towns of the district, government grants, loans, advances etc., are the other supplementary sources of revenue of municipalities. On expenditure side, the highest per capita expenditure of Rs. 114.91 has been recorded in Guruhar sahai MC and the lowest of Rs. 27.76 for Dharamkot MC. The main heads of expenditure are general administration, public health and conveniences, public institutions etc.,

Educational:

TABLE 19

Schools Per Ten Thousand Population in Towns

Class, name and civic status of town			No. per ten thousand population			
			Higher Secondary/ Inter/PUC/ Junior College	Secondary/ Matriculation	Junior Secondary/ Middle	Primary
	1		2	3	4	5
II	Abohar	(M.C.)	0·12	1·51	0·58	1·74
V	Dharamkot	(U.A.)	..	..		
(i)	Dharamkot	(M.C.)	1·10	1·10	..	3·29

V	Talwandi Bhai	(M.C.)	1·10	1·10	..	2·19
IV	Zira	(M.C.)	..	1·02	..	2·04

Table 19 depicts higher secondary, secondary/matriculation, junior secondary/middle and primary schools per ten thousand population. The table reveals that only Abohar MC, Dharamkot MC, Fazilka MC, Firozpur C.B., Firozpur MC and Talwandi Bhai MC have the highest number of higher secondary or equivalent schools. Firozpur MC has the highest number of higher secondary schools 1.31 per 10,000 population and Dharamkot MC and Talwandi Bhai MC come next with 1.10 schools per 10,000 population. Secondary/Matriculation schools are located in all (except Firozpur MC) the towns of the district. Junior secondary/middle schools are existing in all (except Dharamkot, Guruhar sahai, Talwandi Bhai and Zira) the towns of the district.The highest number of primary schools (3.37 per 10,000) are located in Firozpur Cantt., closely followed by Dharamkot (3.29).

Medical:

TABLE 20

Number of Beds in Medical Institutions in Towns

Class, name and civic status of the town			No. of beds in medical institutions per 1,000 population
1			2
II	Abohar	(M.C)	0.88
V	Dharamkot	(U.A.)	
(i)	Dharamkot	(M.C.)	1·32
III	Fazilka	(M.C.)	1·29
II	Firozpur Cantt.	(U.A.)	
(i)	Firozpur Cantt.	(C.B.)	10·16
III	Firozpur	(M.C.)	2·12
V	Guruharsahai	(M.C.)	3·12
V	Jalabad	(U.A.)	
(i)	Jalabad	(M.C.)	1·63
V	Talwandi Bhai	(M.C.)	0·44
IV	Zira	(M.C.)	2·55

Table 20 gives the distribution of total number of beds per 1,000 population in medical institutions, available in each town of the district. The number of beds per 1,000 population has been taken as the criteria for determining the extent of medical facilities. The table reveals that there are in all 3.70 or 4 beds per 1,000 urban population of the district. Firozpur Cantt. has the highest number of beds (10.16) and Talwandi Bhai has the loweast (0.44 per 1,000 population)

Slum population in towns:

In Punjab state no slum area has been notified although certain pockets have separately been identified.

PART XIII A

Village & Town Directory

SECTION I—VILLAGE DIRECTORY

NOTE EXPLAINING THE CODES USED IN THE VILLAGE DIRECTORY

The village directory containing information about each village has been prepared for each tahsil in the ascending order of the census location code numbers, e.g., location code No. 11/3/22 means village No. 22 in tahsil No. 3 of district No. 11 of the state. It contains information relating to total area of the villages in hectares, total population, No. of households, amenities available in the village i. e., educational, medical, drinking water, posts and telegraphs, communications, approach to village, nearest town and distance (in kms.), and power supply. Besides it gives information regarding staple food, land-use i. e., area under different types of land use like forest, irrigated and unirrigated, cultivable and uncultivable land. This is further supplemented by the information on places of religious, historical and archacological interest as also information on copies of newspaper coming in the village and number of motor cycles/scooters, cars/jeeps and tractors available in the village.

Information about the amenities available have been given in the columns 5 to 10 of the directory.

(i) Educational facilities have been shown by adopting the following abbreviations :

P = Primary school
M = Junior secondary or Middle School
H = Matriculation or Secondary School
PUC = Higher Secondary/Intermediate/Pre-university/Junior College
C = College (graduate level and above) like Arts, Science , Commerce etc.
I = Industrial School
Tr. = Training School
AC = Adult literacy class/Centre
O = Other educational institutions. These may include Sanskrit Pathshalas, Senior Basic School, Maktab etc.

Where figures like P(3) , M(2), H(1) etc. occur, these denote that the village has three primary, two middle and one matriculation or secondary school.

(ii) Medical facilities have been shown by the use of the following abbreviations :

H = Hospital
MCW = Maternity and Child Welfare Centre
MH = Maternity Home
CWC = Child Welfare Centre
HC = Health Centre
PHC = Primary Health Centre
PHS = Primary Health Sub-centre
D = Dispensary
FPC = Family Planning Centre
TB = TB Clinic
NH = Nursing Home
RP = Registered Private Practitioner
SMP = Subsidised Medical Practitioner
CHW = Community Health Worker
O = Others

Number of institutions, if more than one in any village, have been given in brackets against each.

(iii) The types of potable drinking water supply and the sources available in the village have been indicated by the following codes :

T = Tap Water
W = Well Water
TK = Tank Water
TW = Tubewell Water
HP = Hand Pump
R = River Water
F = Fountain
C = Canal
L = Lake
S = Spring
N = Nullah
O = Others
NA = Information not Available

(iv) Post and telegraph facilities have been shown by adopting the following abbreviations :

PO = Post Office
TO = Telegraph Office
PTO = Post and Telegraph Office
Phone = Telephone Connection.

(v) Communication facilities have been indicated by the following codes :

BS = Bus Stop
RS = Railway Station
NW = Navigable waterway (including river, canal, backwaters, etc.)

Only public transport like bus, rail and waterway have been considered for this purpose.

(vi) *Approach to village* —This refers to the state of road etc. leading to the village.

This has been indicated by the use of following codes :

PR = Pucca Road
KR = Kaccha Road
NR = Navigable River
NC = Navigable Canal
NW = Navigable Waterway (other than river or canal)

(vii) *Nearest town and distance*—The distance in kms. of the nearest town (whether located in the state or in another state) has been given in brackets under column 12.

(viii) *Power supply*.—For this purpose, the following codes have been used under column 13 :

ED = Electricity for Domestic purpose
EAg = Electricity for Agriculture
EO = Electricity for Other purpose like industrial, commercial, etc.
EA = Electricity for All purposes listed above.

Information relating to places of religion, historical or archaeological interest is given under column 20(a). Information on copies of newspaper coming in the village(N), motor cycles/scooters available in the village (M) cars/jeeps available in the village (C) and for tractors available in the village (T) is also furnished under column 20. The numeral following the alphabet indicates the number of newspapers, motor cycles etc. Uninhabited village and the villages that have got merged in towns villages have also been shown under column 20(a).

(ix) *Land use*—Breakup of area under different types of land use viz. forest, irrigated area, unirrigated area, culturable waste and areas not available for cultivation has been furnished under columns 15—19.

(a) *Forest*.—This includes all lands classed as forests under any legal enactment dealing with forests or administered as forests, whether state-owned or private, and whether wooded or maintained as potential forest land. The area of crops raised in the forest and grazing land or areas open for grazing within the forest should remain included under the forest area. If any portion of such land is not actually wooded but put to some agricultural use, that portion is included under the appropriate heading of cultivated or uncultivated land. In some cases there are instances where patches of land put to agricultural use within statutarily notified forests are considered as forests by the revenue agency. These are treated as forests.

(b) *Irrigated and unirrigated (land use)*.—These two columns (cols. 16 and 17) cover all agricultural land and include net area sown with crops and orchards or net cropped area and also current and other fallows. The latter implied all lands which were taken up for cultivation, but are temporarily out of cultivation for a period of not less than a year and more than five years. The columns do not include gross area sown or crops gross cropped areas. Net area sown thus represents the area sown with crops and orchards, counting areas sown more than once in the same year only once.

(c) *Culturable Waste*.—This includes all lands available for cultivation whether taken up or not taken up for cultivation once, but not cultivated during the five years or more in succession. Such lands are either fallow or covered with shrubs and jungles which are not put to any use. These have been assessed or unassessd and are in isolated blocks or within cultivated holdings. Lands under thatching grasses, bamboo bushes and other groves for fuel, etc. Which are not included under orchards or forests also come under this head. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area have been included in this column.

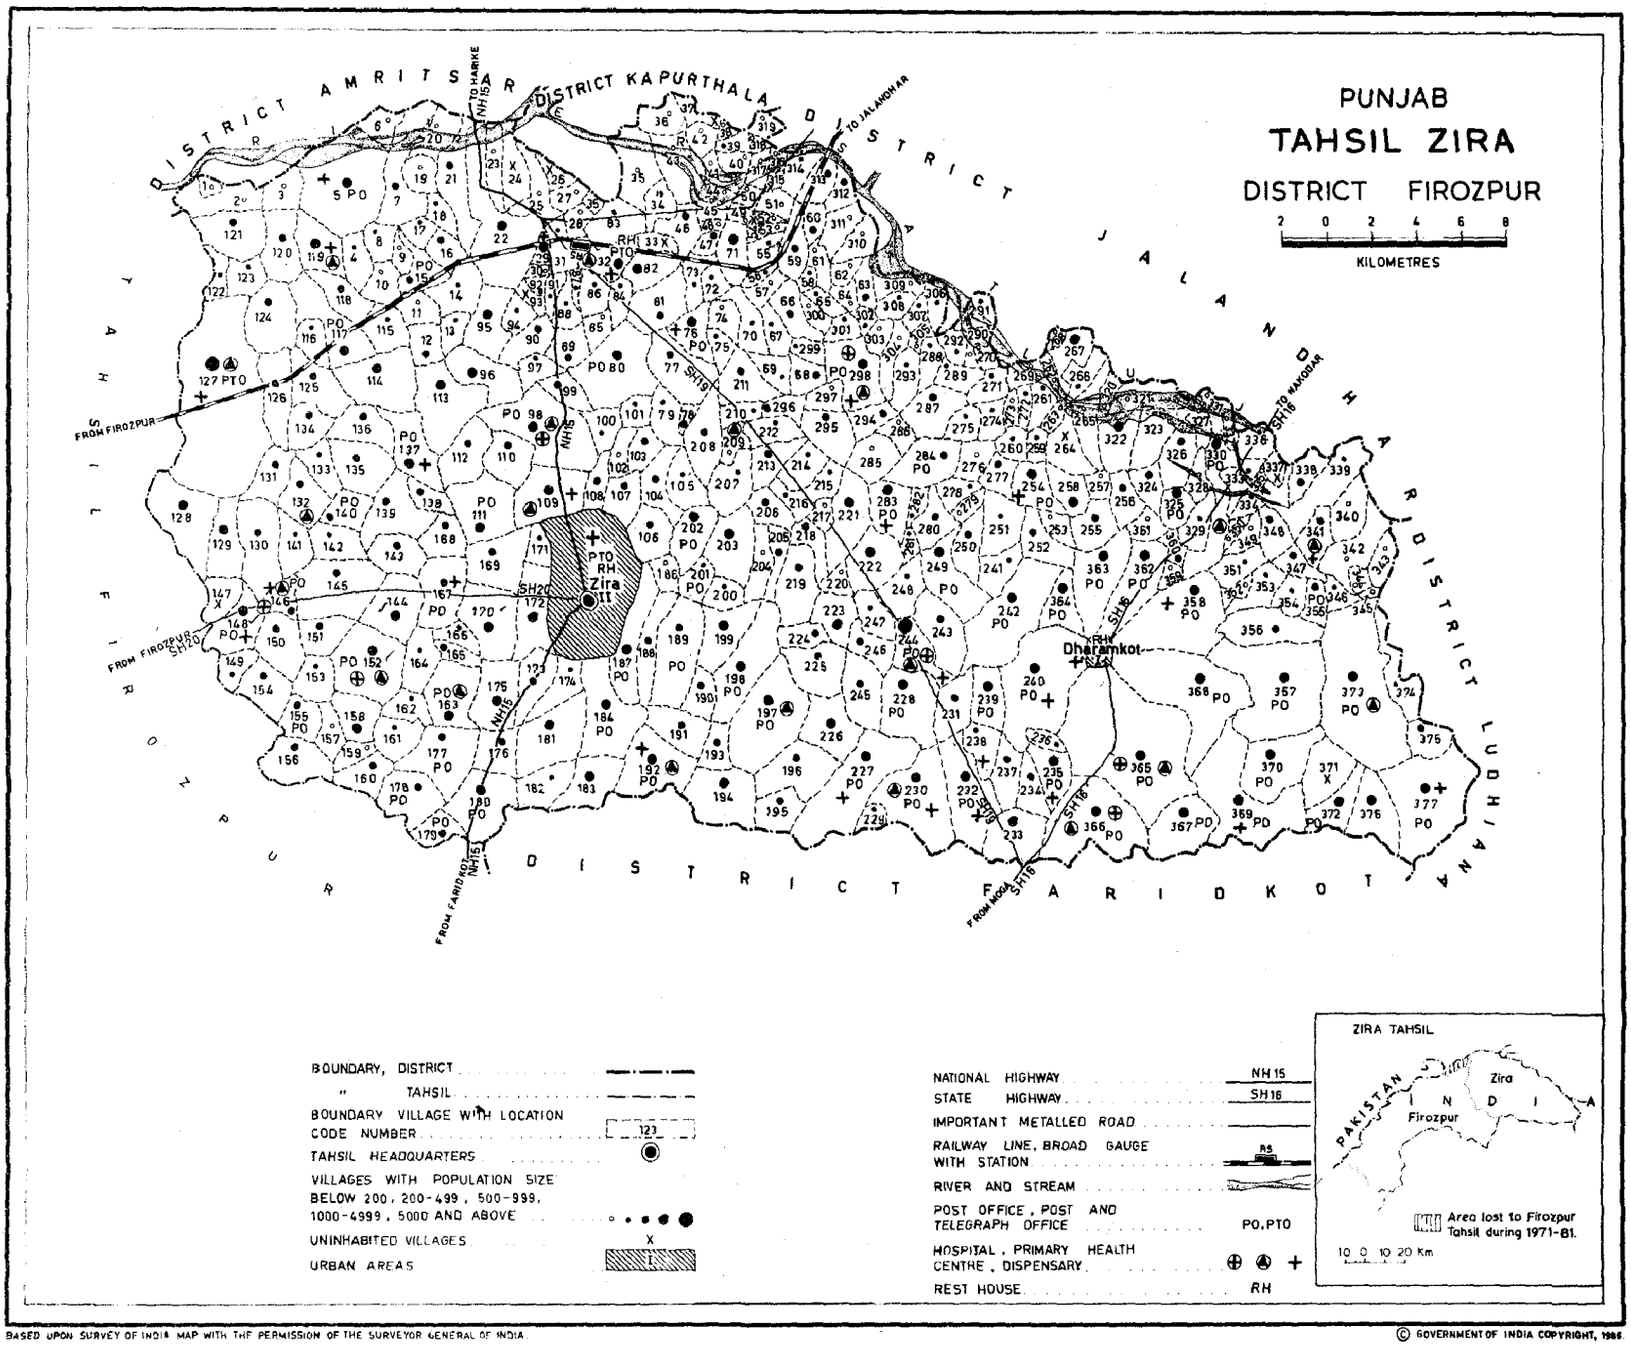

(d) *Area not available for cultivation.*—This column (col. 19) includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use.

Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water e.g., rivers and canals and other lands put to uses other than agricultural.

Barren and unculturable lands cover all barren and unculturable lands, like mountains, deserts, etc. Land which cannot be brought under cultivation, except at a very high cost, has been classified as unculturable, whether such land is in isolated blocks or within cultivated holdings.

SECTON—II
Town Directory

NOTE EXPLAINING THE CODES USED IN THE TOWN DIRECTORY

The town directory has been compiled in six different statements for all the urban areas of the district. The data on amenities and other aspects have been presented in codes which are explained below :—

Statement I :—

This Statement gives status and growth history of each town in the district.

Class has been introduced in all the statements of town directory to facilitate analysis for purposes demographic and socio-economic characteristics of towns at the state and all India levels. It has been present according to 1981 census population of the core town in the following manner :

Population	*Class*
100,000 and above	.. I
50,000—99,999	.. II
20,000—49,999	.. III
10,000—19,999	.. IV
5,000—9,999	.. V
Below 5,000	.. VI

The civic administration status as in 1980 has been indicated by the following abbreviations. Census town are regarded as having no civic status. Code (C.T.) has been used for census town.

Municipal Corporation	=	M. Corp.
Municipal Committee	=	M.C.
Cantonment Board	=	C.B.
Notified Area Committee	=	N.A.C.
Census Town (S.A.S. Nagar Mohali and Talwara)	=	C.T.

Statement II : It gives for each town, physical aspects and location of towns.

Statement III : This statement gives municipal finance for each town of the district.

Statement IV : It gives civic and other amenities. The abbreviations used are indicated below :

(I) Road length :

PR	=	Pucca Road
KR	=	Kaccha Road

(II) System of sewerage :

S	=	Sewer
OSD	=	Open Surface Drains
BSD	=	Box Surface Drains
SD	=	Sylk Drains
CD	=	Cesspool method
Pt	=	Pit system

(III) Method of disposal of night soil :

HL	=	Head Loads
B	=	Baskets
WB	=	Wheel Barrows
ST	=	Septic Tank latrines
S	=	Sewerage

(IV) Protected water supply—Source and capacity of storage systems :

(a) Sources of water-supply :

TW	=	Tubewell/hand pump
T	=	Tap water
W	=	Well water
TK	=	Tank water

(b) System of storage of water :

OHT	=	Overhead Tank
SR	=	Service Reservoir
RIG	=	River Infiltration Gallery
BWP	=	Borewell Pumping System
PT	=	Pressure Tank

Statement V : This gives medical, educational, recreational and cultural facilities. The abbreviations used are indicated below :

Medical amenities :

H	=	Hospital
D	=	Dispensary
HC	=	Health Centre
FC	=	Family Planning Centre
TB	=	TB clinic
NH	=	Nursing Home
O	=	Others
A	=	Ayurvedic
U	=	Unani
Hom.	=	Homoeopathic

In case of allopathic, no separate code has been given, The information in col. 4 on medical facilities has been presented horizontally in the same line as illustrated below :

H(A-1, 2), D(Hom-2, U-1)

Here H(A-1, 2) represents one ayurvedic and 2 allopathic hospitals and D(Hom-2, 1, U-1) represents 2 homoeopathic, one allopathic and one unani dispensaries. If the medical facility is not available in a town, name of the nearest place (if in the same district) or nearest district (if in the same state) or other state and its distance from the town where the facility is available has been mentioned in column 4.

Educational amenities :

The codes that have been used are as follows :

A	=	Arts only
S	=	Science only
AS	=	Arts and Science only
C	=	Commerce only
AC	=	Arts and Commerce only
ASC	=	Combined for all categories, Arts, Science and Commerce
L	=	Law
SH	=	Shorthand
Type	=	Typewriting
Sh. Type	=	Shorthand and Typewriting
O	=	Others
P	=	Primary schools
M	=	Junior secondary or Middle School
H	=	Matriculation or secondary
PUC	=	Higher secondary/intermediate/pre-university/Junior college/'10+2' system whether held in schools or colleges

If there are more institutions of a type in the town, their number has been given against each in brackets.

If any educational facility is not available in the town the name of nearest place (if in the same district) or the name of nearest district (if in the same state) or other state and its distance from the town where this facility is available has been given in brackets.

Recreational and cultural facilities :

The following codes have been used :

PL	=	Public Library
RR	=	Reading Room

Statement VI : This gives information on trade, commerce, industry and banking for each town of the district.

Appendix to the town directory shows towns of the district which have outgrowths and population of outgrowths.

PART—B

PRIMARY CENSUS ABSTRACT (GENERAL)

Primary Census Abstract (Scheduled Castes)

PART B

PRIMARY CENSUS ABSTRACT (GENERAL)

Primary Census Abstract (Scheduled Castes)

EXPLANATORY NOTE ON PRIMARY CENSUS ABSTRACT

The Primary Census Abstract (PCA) General and Scheduled Castes provides the basic information relating to population data pertaining to 1981 census. It contains the data in respect of area, number of occupied residential houses and house-holds, total population (including institutional and houseless population), population break up by sex, scheduled castes, literates, main workers classified into four categories of cultivators, agricultural labourers and other workers, marginal workers and non-workers for each village and for each town ward-wise.

The district totals given at the beginning of the PCA are followed by break up of rural and urban areas of the district. The data are presented tahsilwise.

The rural PCA presents the data for the villages arranged in ascending order of location code numbers (assigned to the villages within the tahsil). The urban PCA, presents wardwise data for each town. In rural PCA, the uninhabited villages and the villages which have got merged in towns have also been indicated. It may be mentioned here that the PCA data provided here has been compiled on the basis of the basic schedules i.e., household schedule and the universal individual slip convassed during 1981 census operations. The concepts and terms occurring in the PCA are briefly explained here.

Census House :

A census house is a building or a part of a building having a separate main entrance from the road or common courtyard or staircase etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

Occupied Residential House :

Occupied residential house is a dwelling house and includes a house used partly as a dwelling and partly for some other purpose like shop, workshop, factory, etc., but does not include a 'vacant house' where no person was found to be residing at the time of census.

Household :

A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. Examples of unrelated households are boarding houses, messes, hostels, residential hotels, rescue homes, Jails, *ashrams*, etc. These are called 'institutional households'. There may be one member household, two member household or multi-member household. For census purposes, each one of these types is regarded as a 'household.

Another type of household for census purpose is houseless household which is a household comprising of 'houseless person/ persons'. A houseless person in census terminology has been defined as ;

(i) a person who might be doing domestic service or other work with one or more households but who does not reside in any house and sleeps in the corridors, verandahs or passages in buildings or in the streets ;

(ii) wandering or nomadic tribes found to be staying in temporary huts etc., and

(iii) beggar, vegrant, tramp, sadhu, fakir, etc., who is found on the footpaths, streets, in places like parks, gardens, railwayyards, etc.

Scheduled Castes are such castes, races or tribes or parts of groups within such castes, races or tribes as are declared to be scheduled castes by the President of India's orders issued under Article 314 or the constitution of India.

Literate :

A person who can both read and write with understanding in any language has been taken as literate. A person who can merely read but cannot write, has not been considered as literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

All children of the age of 4 years or less have been treated as illiterate even if the child has been going to a school and might have picked up reading and writing a few odd words.

Workers and Categories of Workers :

Work may be defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work.

In the economic questions, canvassed in 1981 census, there has been some difference. The 'work' concept in 1961 and 1971 censuses, as opposed to the 'income' or 'economic independence' concept of the earlier censuses was adopted for 1981 census, but the criterion for classification of persons as workers was changed. While in 1961 and 1971 censuses different approaches, namely, usual status and current status, were adopted with reference period of one year and one week for seasonal and for regular work respectively, at the 1981 census the usual status approach was adopted uniformly for all work.

In 1961, a person qualified as a worker if he had worked regularly during the last season or if he had worked at least for a day in regular (non-seasonal) work during the preceding fortnight. At the 1971 census a person was treated as a worker only if he spent his time mainly in work or if he worked at least for a day in regular (non-seasonal) work during the preceding week. The dichotomy of worker/non-worker of 1961 and 1971 censuses was discarded at the 1981 census and instead a trichotomy of main workers, marginal workers and non-workers was adopted. For main worker the time criterion of engagement in work for the major part of the year, i.e., at least 183 days was adopted. Those who worked for some time during the last year but not for the major part were treated as marginal workers. Those who had never worked during the last year were non-workers. This trichotomy partially permits a comparability of 1981 census economic data with that of 1971 as well as 1961. The main workers of 1981 census can be expected to correspond to the workers of 1971 and the main workers and marginal workers of 1981 together to correspond to the workers of 1961.

Classification of Main Activity :

The main activity of workers has been classified into four categories, viz., cultivator, agricultural labourer, household industry and other worker. These terms are explained below :

Cultivator :

For purposes of the census, a person has been considered working as cultivator if he or she has been engaged either as employer, single worker of family workers in cultivation of land owned from Government or held from private persons or institutions for payment in money, kind or share. Cultivation included supervision or direction of cultivation. It has been indicated by abbreviation 'C'.

Agricultural Labourer :

A person who worked in another person's land for wages in money, kind or share has been regarded as an agricultural labourer. He/she had no risk in the cultivation but he/she merely worked in another person's land for wages. An agricultural labourer had no right of lease or contract on land on which he/she worked. It has been indicated by abbreviation 'AL'.

Household Industry :

Household industry has been defined as an industry conducted by the head of the household himself/herself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lived in urban areas. The larger proportion of workers in a house hold industry constituted of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the India Factories Act.

For a person who has returned his/her main activity as engaged in some production, processing, servicing or repair of articles or goods such as handloom weaving, dyeing, carpentary, *bidi* rolling, pottery manufacture, bicycle repairing, blacksmthy, tailoring, etc it has been ascertained if it is a household industry, and if so, it has been indicated by the abbreviation 'HHI' in the space provided for.

Other Workers :

All workers, i.e., those who have been engaged in some economic activity during the last one year, hav not been categorised as cultivators or agricultural labourers or in household industry, are 'other workers' 'OW', The type of workers that come under the category 'OW' included factory workers, plantation workers, those in trade commerce, business, transport, mining, construction, political or social work, all government servants, municipal employees, teachers, priests, entertainment artists, etc.
