SHAHEED BHAGAT SINGH MEMORIAL—FIROZPUR

This is the historic Smadhi on the banks of the river Sutlej, close to Firozpur city, on which were cremated, at dead of night, the crucified bodies of the heromartyrs Bhagat Singh and his two associates, Raj Guru and Sukhdev—they were surreptitiously crucified at night on March 23, 1931 at Lahore by the British Government for avenging the death of Lala Lajpat Rai (another national leader from Firozpur disirict) at the hands of Scott, a police officer. A memorial symbolic of their indomitable revolutionary spirit, has been built on this spot. Every year on March 23, a fair is held at this Smadhi where thousands of people gather together from different corners of the land to pay their loving and affectionate homage to the THREE IMMORTALS.

Their court statement in their trial in the historic Central Assembly Chamber Bomb Case will live for ever as a landmark in the fight for India's freedom :

"The bomb was necessary to awaken England from her dreams. We dropped the bomb on the floor of the Assembly Chamber to register our protest on behalf of those who had no other means left to give expression to their heart-rending agony. Our sole purpose was to make the deaf hear and give the heedless a timely warning. Others have as keenly felt as we have done, and from such seeming stillness of the sea of Indian humanity, a veritable storm is about to break out. We have only hoisted the "Danger Signal" to warn those who are speeding along without heeding the grave dangers ahead. We have only marked the end of an era of Utopian non-violence of whose futility the rising generation has been convinced beyond any shadow of doubt."

The great sacrifices made by these martyrs have borne fruit in different fields. Their ashes and spirits have brought glory to Firozpur district in myriad ways, importantly the Green Revolution. This land of martyrs has certainly helped the Punjabis to fill the 'bread basket' of India in the 1960s

And Martyr Bhagat Singh hails from one of the Jat Sikh families about whom that astute observer of the Punjab, Sir Malcolm Darling (One time Financial Commissioner, Punjab) had this much to say about 50 years ago :

"It may be said that in the whole of India there is no finer raw material than the Jat; and though he may be addicted to violence and crime, as in the Manjha, or to dissipation and drink as in Ferozepure,.....it would be difficult in any country to find a more remarkable combination of cultivator, colonist, emigrant and soldier. Educated and organized, and relieved of the handicaps imposed upon him by custom and debt, he might well become the foundation of a new rural civilization in the Punjab."

PREFACE

In the publication of the District Census Handbooks we have the privilege of carrying one of the important census traditions to the 1971 Census. Their publication was first taken up at the 1951 Census for making census statistics available for the smaller territorial units. In the 1961 Census, attempts were made to make this publication more informative with the addition of data about level of development and amenities available in villages. There was, however, great delay in the publication of this valuable reference compendium. The delay occured on account of the fact that the compilation of the Handbook had to wait till the complete tabulation programme was got through. The compilation of administrative statistics for inclusion in the Handbook also took a long time. As a result, the town and village-wise primary census data could not be released pending their formal publication even though there was constant demand for it. In view of these considerations, it was decided at the 1971 Census that the District Census Handbook would be divided into three convenient parts so that at least Parts A and B, which contain essential data down to the village and town levels, could be released quickly. Accordingly Parts (A) & (B) of the District Census Handbook of Firozpur are presented in this Handbook. Part (A) contains the Village and Town Directory and Part (B) Village and Town-wise Primary Census Abstract. It is for the first time that data about urban areas is being presented in a separate part, "Town Directory", at the 1971 Census. The Village Directory presents comprehensive information on various facets of each village. Alphabetical list of villages has also been inserted in the Handbook.

2. There are 108 towns and 12,188 inhabited villages in the Punjab State. It was, indeed, a formidable task to collect and compile voluminous data for such a large number of units. The collection of area figures and land use data, in particular, presented serious difficulties especially when these figures somewhat differed from those given at the tahsil and district level by the Director of Land Records. We had to make several gruelling cross-checks to adopt the area figures finally for each village.

3. It was not considered necessary to have a penetrating analysis of any particular item of the data in Parts (A) and (B) of this Handbook; this could be taken up by the Census Organisation itself or some other agency later during the inter-censal-period. The census data users and scholars would perhaps feel satisfied with statistical data being presented in this Handbook quickly on the heels of the census count in the country.

4. This Report, as at the last Census, continues to be a State Government publication as it is financed by them. Its compilation and write-up have been done by the Census Directorate at Chandigarh on behalf of the State Government. The views expressed in this are that of the State Census Organisation, which is under the direct control of the Government of India in the Ministry of Home Affairs.

5. In the collection of data, we had to take help from large number of personnel of the State Revenue Department at the village, tahsil and district level and of the municipal staff in towns. But for their generous cooperation in filling up of the lengthy schedules regarding availability of amenities and level of development, it would not have been possible to achieve the desired objectives in time. It is certainly difficult to thank separately each individual functionary engaged on this project. Nevertheless we are keen to convey our profound gratitude to all those who have worked directly or indirectly on this project. At the Census Directorate, Shri S. K. Agarwal, Assistant Director Census Operations, assisted by Shri R. L. Kalsia, Tabulation Officer and Shri N. S. Bhadauria, Statistical Assistant

has compiled the census and administrative statistics in the form of Village and Town Directories and a bunch of statements incorporating primary census data. Shri K. C. Suri Assistant Director Census operations made valuable suggestions at the printing stage. The initial compilation of the Village Directory was done by Shri Vishwa Mittar, Statistical Assistant under the able guidance of Shri D. P. Jain, Tabulation officer. We owe a debt of gratitude to all these officials for the effort and labour they have put in for the timely production of this Handbook. Shri H. S. Sudan, Computor has done the proof reading with the help of Shri B. S. Marwaha Computor. The Maps were prepared by Shri Madhav Shyam assisted by a team of dedicated workers. Dr. B. K. Roy, Map Officer, in the office of the Registrar General, New Delhi, provided valuable guidance in the preparation of the maps. We wish to acknowledge our gratitude to all of them.

6. We are grateful to Dr. B. K. Roy Burman, Deputy Registrar General (Social Studies) for piloting this project in our State and for evincing continued zeal and interest in its execution. Above all, we are specially indebted to Shri A. Chandra Sekhar, Ex-Registrar General, India and his worthy successor Shri R. B. Chari, for the inspiration and guidance that we received from them in the production of this Handbook and to reaffirm our claim that "Census continues to be the most fruitful source of information about the country". We trust the demographers, sociologists, economists and other scholars working in various humanities will find sufficient data in this compendium for taking up analytical studies.

7. We are grateful to Shri P. S. Walia, Controller, Printing and Stationery Department, Punjab for ensuring speedy publication of this Handbook.

H. S. KWATRA
Deputy Director of Census Operations
PUNJAB

ACKNOWLEDGEMENTS

The staff deployed on the preparation of the District Census Handbook :

1. Shri R. L. Kalsia, Tabulation Officer
2. Shri N. S. Bhadauria, Statistical Assistant
3. Shri Malkit Singh, Computor
4. Shri Parkash Sharma, Computor
5. Shri Harbans Singh, Assistant Compiler
6. Shri Harjit Singh, Assistant Compiler

PART X-A

VILLAGE AND TOWN DIRECTORY

A GLIMPSE INTO THE DISTRICT

Firozpur District occupies the South-west corner of the Punjab State along the Indo-Pakistan border. It is surrounded by Rajasthan and Haryana States in the South and Ludhiana, Sangrur and Bhatinda districts of Punjab State in the East. On the West, an international boundary defines its border with Pakistan. River Sutlej demarcates the district from Jullundur and Kapurthala districts in the North-East. The district lies between North latitude 29°-55' and 31°-09' and between East longitude 73°-53' and 75°-24'. It experiences extremes in climate-very-hot summers and severe cold in winter. The summer rains in the district are generally received from June to September while the winter rains are received from December to February.

The district constituted of 5 tahsils, has in all 1,576 villages (including 93 Be-chirag) and 14 urban centres. It has a geographical area of 10,145 sq. kms. as per information supplied by the Surveyor General of India. A population of 1,905,833 persons was returned in the district at the 1971 Census as against the 1961 population standing at 1,613,054 persons. The density of population works out to be 188 persons per sq. km. as against the corresponding figure of 269 for the entire State. The rural population constitutes 80 per cent of the total population of the district, the corresponding proportion for the State as a whole being 76 per cent The sex-ratio in the district has been returned at 870 females per 1000 males. Workers constitute about 30 per cent of the total population of the district, the corresponding State proportion standing at 29 per cent. It is also interesting to note that among all the towns in the State, Tankanwali town of Firozpur District has the highest population density of 63,100 per sq.km.

With 80 per cent of the population returned as rural, the inhabitants of the district continue to be dependent mainly on agriculture. The soil of the district is alluvial and of unvarying fertility. Area under cultivation constitutes 88 per cent of the total area in the district. Of this, 62 per cent is irrigated. Canals, tubewells, pumping sets and percolation wells are the main sources of irrigation. The agricultural production in the district is bound to get a big boost with the help of dry farming techniques which have been developed and introduced in the areas where irrigation facilities are not available.

The main crops grown in the district include wheat, paddy, cotton, sugarcane, barley, gram, jowar and maize. Wheat is the most important cereal crop. The area under its cultivation claims half the total cultivated area under all foodgrains. Next in order of importance are paddy, maize and gram. Among commercial crops, cotton is the most important. Mention may particularly be made of tahsil Fazilka which is well-known for the production of cotton. With the introduction of double cropping pattern, area under foodgrains, oilseeds, cotton and other miscellaneous crops has increased considerably in the district. With the agricultural prosperity in the district resulting from the green revolution, use of improved agricultural implements such as wheat thrashers, crushers, drills and tractors is becoming a common practice.

The district is an important stronghold of agro-based small and medium sized industrial units. Manufacturing activity in the district relates mainly to cotton ginning, processing and spinning of cotton, enemal wires, **dhoop** *making, handloom weaving and production of snuff, agricultural implements and small engineering industrial units. Flour mills are located in some of the important towns of the district.*

There has been a flight of capital and enterprise from the district on account of tensions on its border with Pakistan. However, Punjab Government is providing all facilities for the speedy development of the district.

A new district of Faridkot comprising Moga, Faridkot and Muktsar tahsils has been carved out vide Punjab Government's notification dated the 7th August, 1972. With this Firozpur district has shrunk in size.

INTRODUCTORY NOTE ON DISTRICT CENSUS HANDBOOK

History of District Census Handbook :—Census has been assuming an increasingly important role from decade to decade in India. Undoubtedly it is now an indispensable instrument of policy and development planning in the State and at the Centre. To repeat the oft-quoted words :*

"Census is no longer a mere counting of heads for purposes of taxation and recruitment. It is a kind of stock taking as it were of the nation's human wealth. Census aims at presenting as complete a picture of man as may be possible in his social, cultural and economic setting....."

Keeping in view the ever-increasing demand of the layman, administrators, planners, scholars, etc. for publication of census data for smaller administrative units, it was decided at the 1951 Census to present data by villages and towns in the form of District Census Handbooks. It was not altogether a new idea because even at the earlier decennial censuses, data for smaller administrative units were published in one form or the other. A districtwise list of villages, showing population, was published as early as 1891 from the data collected at the census. A regular Village Directory was also introduced at the 1911 Census and such 'Directories' were compiled in the shape of 'District Census Statistics' at the 1921 Census. In the end result, the District Census Handbook emerged as a regular decennial publication of the State Government at the 1951 Census. The District Census Handbooks of 1951 Census contained an introductory essay, giving brief history of physio-geographic conditions, life styles and other socio-economic conditions of the inhabitants, extracts from important census tables, and Village and Town Directories. Administrative statistics on items like railway stations, post offices, schools, co-operatives, village panchayats were also given. The size and contents of the District Census Handbook series of the 1951 Census varied from State to State depending on the availability of financial resources and requirements of data. So varied were the uses and so great the value of these Handbooks that their publication was continued at the 1961 Census and vigorous efforts were made to enlarge the scope and enrich their contents. The 1961 Census Handbooks were certainly far more elaborate than their precursors at the 1951 Census. At the 1961 Census the introductory chapter of the District Census Handbook was almost a gazetteer as it contained information on physical, historical, geological and administrative aspects of the district. Besides, information relating to the demographic, economic, social and cultural aspects was also given, which was further supplemented by a list of important events of the preceding decade and a statement of fairs and festivals of the district.

2. The publication of the District Census Handbooks, in which the Village and Town 'Primary Census Abstracts' were incorporated, invariably got delayed even though the compilation of townwise and villagewise primary census data were completed within a year or two of the completion of census enumeration. The delay occured on account of the fact that the compilation of the Handbook had to wait till the complete tabulation programme was got through. The townwise and villagewise primary census data could not be released before their formal publication even though there was constant demand for it. The compilation of administrative statistics for inclusion in the District Census Handbook also took sufficiently long time. Very often the publication of the District Census Handbook got delayed as some of the State Governments would not take a decision quickly enough to publish them. In fact some of the District Census Handbooks of 1961 Census were published in a few States as late as 1971. Delayed publication undoubtedly detracts from their value.

3. *Scope of District Census Handbook* 1971 :—It is always our endeavour to make available these data to the users as quickly as possible after the census count. With this end in view, the District Census Handbooks at the 1971 Census have been divided into three convenient parts so that at least parts A and B, which contain the essential data down to the village and town, can be released quickly. The State Governments have also accorded their approval to their publication in three convenient parts :

Part A—Village and Town Directory.

Part B—Village and Townwise Primary Census Abstract.

Part C—Analytical Report, Administrative Statistics and District Census Tables.

4. Part A of the Handbook contains Village and Town Directory for each village and town by tahsils. The Village Directory contains information about total area of each village in acres, amenities/

---

* An extract from the inaugural speech of Sh. K. S. Ramaswamy, Deputy Home Minister, delivered at the State evel Training Conference of Census Officers, Haryana at Chandigarh on September 24, 1970.

conveniences available in a village, the staple food of the people and the land use pattern. There is also information about the nearest town with its distance from the village. The Town Directory presents data on each town with the aid of seven statements, giving the status of the town, the decadal population, its functional category, physical and locational aspects, municipal finance, and availability of amenities/facilities like medical, educational, banking etc., trade, commerce, industry and population by sex and religion.

5. The prescribed schedules for Village and Town Directory were sent to the Tahsildars and Presidents of Municipal Committees to be filled in by their staff and to be returned to the Census Directorate. Comprehensive instructions, which were got printed, were given to the staff for filling up of these schedules. Notwithstanding all the care taken at various levels for the correct filling up of these schedules, there were a few cases where the quality of work was sub-standard In these cases, the field job had to be done for the second time. There were considerable delays in the submission of filled-in schedules and a series of reminders had to be sent to the Tahsildars for early submission. Some of the revenue officials hardly evinced adequate interest in this assignment which culminated in serious delays in the completion of the task. Similarly there were delays in some of the Municipal Committees where the Secretaries sparingly took adequate interest in this work. But since we had taken up this job well in advance, we could give sufficient time margin to the field agency for filling up these schedules. In spite of all the difficulties, the job was accomplished well in time.

6. Part B contains the Primary Census Abstract, (PCA figures)—the basic census data—for each village and each town, tahsilwise, for the district. The town PCA gives figures wardwise and down to the Enumerator's Block. Villagewise Primary Census Abstracts have been arranged in the ascending order of location code numbers allotted to villages at the Census. A map of the district, showing the tahsil boundaries, location of the towns and large sized villages of population 5000+, has been given at the beginning of this Part. Important roads, railway lines, rivers, etc. have been depicted in this map. An inset map showing the position of Firozpur district in the State has also been incorporated. Preceding PCA for each tahsil, a map, showing the tahsil boundary and location code number of each village and town in the tahsil, has been given alongwith an inset map showing the position of the tahsil in the district. In order to facilitate location of any village, a list giving villages in each tahsil, arranged in alphabetical order and indicating the code number of the village, has also been incorporated.

PCA incorporates tahsilwise data for each town/ward/block and village under the following column heads :

(i) Area in sq. kms./acres ;

(ii) Number of occupied census houses and the households ;

(iii) Total population (including the institutional and houseless population) ;

(iv) Population of Scheduled Castes and Scheduled Tribes ;

(v) Literate and educated persons ;

(vi) Workers classified into 9 industrial categories and the Non-workers.

7. Part C of the District Census Handbook contains the analytical report, embodying administrative statistics and abstracts from all the important Census Tables generated at the district and tahsil level. In its introductory portion, an assessment about the relative position of the district vis-a-vis other districts with regard to area, population size, density and growth rate; changes in demographic, economic and social characteristics of the district will be made. A brief write-up will also be presented to indicate the broad features of changes in respect of the break-up of population in rural and urban areas; distribution of population by industrial categories; activities of non-workers ; composition of households by relationship to head ; distribution of population by age and sex ; education and literacy ; scheduled castes ; migrants ; mother-tongue and religion. A record of the major events of the decade in the district will also be presented in this part. Information about amenities like transport and communication, irrigation and power, housing and institutional facilities like finance and credit, medical and public health, educational, cultural and recreational will also be presented. Comprehensive data about the economic resources and activities like agriculture, animal husbandry, fisheries, forestry, mining and plantations, trade and commerce, industries etc., is also given in this Part.

8. *The 'Census Village'* :—The definition of the village in Census is identical with that of 'Mauza' given under section 3 (i) of the Punjab Land Revenue Act, 1887. It is the 'Revenue Estate' determined as such for the purpose of levy and collection of the land revenue. The Revenue Estate is defined in the Act ibid :

"as an area of which a separate record of rights is maintained or which has been separately assessed to land revenue or would have been so assessed if the land revenue had not been realized or compounded or redeemed or which the State Government has otherwise declared as an Estate".

The Village is thus not merely the *abadi deh* (red lined area) for census taking but the entire land coming within the fixed boundaries of each village in terms of the Act *ibid.*

9. *The 'Census Town'* :—Each country decides for itself which areas are 'urban' and which are 'rural' because it is difficult to have internationally acceptable definition of each such 'area'. National differences in the characteristics which distinguish urban or rural areas do not admit of a uniform definition at the international level. In India, we have adopted the following definition of an 'urban' area at the 1971 Census, which is incidentally analogous to the one adopted at the 1961 Census. (Prior to the 1961 census, the definition of 'Urban' area was somewhat liberal and a lot was left to the discretion of the local authorities) :

(a) All places with a Municipality, Corporation or Cantonment or a Notified Town Area ;

(b) All other places which satisfy the following criteria :—

(i) a minimum population of 5,000 ;

(ii) at least 75% of the male working population is non-agricultural ;

(iii) a density of population of at least 400 per sq. km.

The State Directors of Census Operations were, however, given some discretion in marginal cases to include, in consultation with the State Government, a place that had other distinct urban characteristics, or to exclude an undeserving place from being treated as 'Urban'. Firozpur district has 14 urban areas including one cantonment Board and statements I to VII in the Town Directory give information on various aspects of these towns.

10. *Urban Agglomeration*:—In addition to the presentation of data for each town separately, the data for 'Urban agglomerations' is also presented in this Directory at the 1971 Census. With the adoption of the concept of 'Urban Agglomeration,' the old concepts of 'town group' and 'sub-urban areas' or 'non-municipal areas' have been abandoned at the 1971 Census. 'Urban Agglomeration' forms a contiguous urban spread constituting of a town and its adjoining urban outgrowths of two or more physically contiguous towns together with continuous well recognised urban outgrowths, if any, of such towns. In the 'town group' concept of 1961 Census, it was not always the continuous urban units that formed such a group. Sometimes, urban units quite cut off from one another were taken together ignoring the intervening regions. As this evoked criticism, the concept of 'town group' has been abandoned at the 1971 Census. Data in respect of the following urban agglomerations in Firozpur District are being presented in the Town Directory :

Sl. No.	*Name of Urban Agglomeration*	*Units of Agglomeration*	*Whether town in its own right or outgrowth*
1	*2*	*3*	*4*
1	Firozpur	(a) Firozpur Municipal Committee	Town
		(i) Basti Gobind Nagar	Outgrowth
		(ii) Chungi Mall Road to Mission Hospital	,,
2	Firozpur Cantt.	(a) Firozpur Cantt.	Town
		(i) Railway Station Cantt.	Outgrowth
		(ii) Railway Colony.	,,
3	Jalalabad	(a) Jalalabad Municipal Committee	Town
		(i) Extended Area Block No. 22	Outgrowth

Sl. No.	*Name of Urban Agglomeraiion*	*Units of Agglomeration*	*Whether town in its own right or outgrowth*
1	*2*	*3*	*4*
4	Muktsar	(a) Muktsar Municipal Committee	Town
		(i) Kishanpura	Outgrowth
		(ii) Bungalows at Kot-Kapura Road	,,
		(iii) Abadi outside Municipal Committee limits at Malout Road	,,
		(iv) Abadi at Tibbi Sahib Road	,,
5	Moga	(a) Moga Municipal Committee	Town
		(i) Nanak Nagri	Outgrowth
6	Zira	(a) Zira Municipal Committee	Town
		(i) Mohalla Ghor Ghar	Outgrowth
7	Dharamkot	(a) Dharamkot Municipal Committee	Town
		(i) 80 Houses outside Municipal Committee limit	Outgrowth

11. *Standard Urban Area*:—The area constituting an 'urban agglomeration' may keep on changing from census to census depending upon the changing boundaries of the statutory core urban outgrowths. The concept of 'Standard Urban Area', adopted at the 1971 Census, will take care of these changes, covering areas beyond the extending urban limits and intermingling both rural and urban areas in the vicinity of large towns to a limit upto which contiguous urbanization is reasonably expected to take place in the next two decades. In brief, the Standard Urban Area may be defined "as the projected growth area of a city or town as it would be in 1991, taking into account not only the towns and villages which will get merged into it but also the intervening areas which are officially urban." Provision of Census data for such 'Standard Urban Areas' will have the advantage of providing comparable data for a definite area for a period of two decades greatly facilitating study of socio-economic and demographic trends in such a fixed area and thus help in urban planning. All towns with a population of 50,000+ have been delineated as Standard Urban Areas.

These Standard urban Areas have been delineated around Firozpur, Abohar and Moga towns in the Firozpur District at the 1971 Census. The basic particulars of these Standard Urban Areas are furnished below :—

List of Standard Urban Areas in Firozpur District—1971 Census

Sl. No.	*Name of Urban Units in S.U.A. 1971*	*Rural Components of S.U.A. (with Hadbast No.)*	
1	*2*	*3*	
1	(a) Firozpur	Khushal Singhwala	(49)
	(b) Firozpur Cantt.	Pir Ahmad Khanwala	(113)
	(c) Tankanwali		
2	Abohar	Abohar (Rural)	(121)
		Alamgarh	(109)
		Koharianwali	(145)
		Bhanger Khera	(97)
		Burj Muharwala	(120)
3	Moga	Moga Ajit Singh	(53)
		Niwan Moga	(54)
		Duneke	(20)
		Bahona	(52)
		Boghipura	(24)
		Talwandi Bhangerian	(25)

NOTE ON VILLAGE DIRECTORY

12. The Village Directory, containing information about each village and separately for each tahsil has been prepared . Villages have been arranged within the tahsil in the ascending order of the Census location code numbers, e g., location code No. 3/2/25 means village No. 25 in tahsil No. 2 of District No. 3 of the State. It contains an account of the location and area of the villages, amenities available in the village, such as educational, medical, power supply, communications, posts and telegraphs, staple food, land use, i.e. area under different types of land use such as forests, irrigated and un-irrigated, cultivable and uncultivable lands. This is further supplemented by information about the nearest town and distance in kilometers from the referrent village, days of markets or hats, if any, held in the village and an account of places of religious, historical and archaeological interest in the village. An appendix showing tahsilwise, amenities, like educational, medical, power supply, etc. has been added towards the end of the Village Directory.

13. Information about the amenities available in the villages has been given under columns 4 to 9 of the Directory.

(i) Educational facilities have been shown by adopting the following abbreviations under column 4 :

Pr.S	=	Primary School.
Mid.S	=	Middle School.
Sec.S	=	High or Higher Secondary School.
C	=	College.

Where figures like Mid.S (1), Pr. S (2), etc. occur these denote that the village has one Middle School, two Primary Schools, etc.

(ii) Medical facilities have been shown by use of the following abbreviations under column 5 :

H	=	Hospital.
MCW	=	Maternity and Child Welfare Centre.
HC	=	Health Centre.
D	=	Dispensary.
FPC	=	Family Planning Centre.
VH	=	Veterinary Hospital.

Number of institutions have been given in brackets against each.

(iii) Electrification has been shown by use of the following abbreviation under column 6 :

E	=	Electrified.

(iv) Types of drinking water supply sources in the village have been shown by use of the following abbreviations under column 7 :

T	=	Tap water.
W	=	Well water.
TW	=	Tubewell water.
HP	=	Handpump water.
TK	=	Tank water.
R	=	River water.
F	=	Fountain water.
C	=	Canal water.
O	=	Others.

(v) Communication and transport facilities have been shown by use of the following abbreviations under column 8 :

PR = Pucca Road.

KR = Katcha Road.

T = Train (if the railway station is within the range of one mile from the village).

C = Canal.

R = River.

(vi) Post and Telegraph facilities have been shown by adopting the following abbreviations under column 9 :

PO = Post Office.

TO = Telegraph Office.

PTO = Post and Telegraph Office.

Phone = Telephone connection.

14. Break-up of area under different types of land use has been furnished under columns 11 to 15 of the Directory. Particulars in respect of the nearest town and the distance in kilometers of the same from the referrent village have been given under column 16. Information regarding day (s) of markets/ hats, if any, held in the village has been furnished under column 17. Regular weekly, fortnightly or monthly markets/hats are hardly a common feature in the Punjab State. Temporary markets/hats are held in the State only on a few festive occasions. Information relating to places of religious, historical or archaeological interest has been given under column 18.

Uninhabited villages and villages that have got merged into towns have been specifically shown in the Directory.

15. (a) Distribution of Villages by Area :

The following table gives the distribution of villages in Firozpur district in terms of area in acres :—

TABLE No. 1

Distribution of Villages by Area

Area (in acres)	*Number of villages**
1	*2*
50 acres or less	8 (0.51)
51—100 acres	24 (1.52)
101—200 ,,	65 (4.12)
201—500 ,,	278 (17.64)
501—1,000 ,,	387 (24.56)
1,001—2,000 ,,	395 (25.06)
2,001—5,000 ,,	367 (23.29)
5,001 acres and above	52 (3.30)
Total	1,576 (100.00)

*Inclusive of 93 uninhabited villages.

(Figures in brackets indicate percentage to total number of villages in each distance group)

The average area of a village in Firozpur District works out to be 1561 acres. About 76 per cent of the villages in the district have an area above 500 acres. Only 8 villages have an area of 50 acres or less. The number of villages having an area of more than 5,000 acres is 52 which is the second highest in the State.

(b) Amenities available in the villages :

(*i*) *Educational facilities* :—The following table quantifies the educational facilities available in the villages of the district with reference to distance of the village from the nearest town :—

TABLE No. 2

Distribution of villages having educational amenities by distance from the nearest town

Distance from the nearest town	*Total number of villages**	*Number of villages having*				
		Primary School	*Middle School*	*High or Higher Secondary School*	*College*	*Others*
1	*2*	*3*	*4*	*5*	*6*	*7*
5 kms. or less	201	130 (64.68)	17 (8.46)	4 (1.99)	...	...
6—10 kms.	411	264 (64.23)	33 (8.03)	23 (5.60)	1 (0.24)	...
11—15 "	455	285 (62.64)	31 (6.81)	20 (4.40)	...	...
16—25 "	388	218 (56.19)	50 (12.89)	36 (9.28)	1 (0.26)	...
26—50 "	28	22 (78.57)	5 (17.86)	3 (10.71)	...	...
51—100 "	...	...	...	...	...	...
101—200 "	...	...	...	...	...	...
201 kms. and above	...	...	...	...	...	...
Total	1,483	919 (61.97)	136 (9.17)	86 (5.80)	2 (0.13)	...

*Excluding 93 uninhabited villages.

(Figures in brackets indicate percentage to total number of villages in each distance group.)

The above table highlights the fact that out of 1,483 inhabited villages in the district, only 919 villages (62%) have primary schools, 136 villages have middle schools and 86 villages, have high or higher secondary schools. Only 2 villages in the district have the privilege of having a degree college.

(*ii*) *Medical facilities* :—Medical facilities have been quantified in terms of the number of medical institutions of any kind per 100 sq. kms. of rural area. Tahsil-wise distribution of these facilities has been shown in the following table.

TABLE No. 3

Medical facilities per 100 sq. kms.

Sl. No.	*Tahsil*	*Total areas in sq. kms.*	*Number of medical institutions of any kind per 100 sq. kms.*
1	*2*	*3*	*4*
1.	Firozpur	1,746.5	1.31
2.	Fazilka	2,717.5	1.25
3.	Muktsar	2,576.4	1.20
4.	Moga	1,678.3	2.26
5.	Zira	1,341.2	1.71

On an average, there are 1.47 medical institutions per 100 sq. kms. in rural areas of this district. However, Moga tahsil enjoys the maximum medical facilities with 2.26 medical institutions per 100 sq. kms. while Muktsar tahsil has the lowest number.

(iii) Power Supply :—The distribution of the electrified villages of the District by their distance from the nearest town has been shown in the following table :—

TABLE No. 4

Distribution of vill-ges with Electricity and distance from the nearest town

Distance from the nearest town	*Total Number of villages**	*Number of villages with electric power supply*
1	*2*	*3*
5 kms. or less	201	127 (63.18)
6—10 kms.	411	148 (36.01)
11—15 ,,	455	123 (27.03)
16—25 ,,	388	65 (16.75)
26—50 ,,	28	4 (14.29)
51—100 ,,	...	...
101—200 ,,	...	...
201 kms. and above	...	...
Total	**1,483**	**467 (31.49)**

*Excluding 93 uninhabited villages.

(The figures in brackets indicate percentage to total number of villages in each distance group).

Out of 1,483 villages in the district, only 467 (31.49 per cent) were electrified till 1969. More than 85% of the electrified villages are those which lie at a distance of less than 15 Kms. from the nearest town. It shows that there is a positive correlation between distance to the nearest town and power supply to the villages. Efforts are, however, underway to cover 100 per cent of villages in the near future.

(iv) Communications :—The following table gives an account of communication facilities available in villages of the district with reference to distance from the nearest town :—

TABLE No. 5

Distribution of villages with different communication facilities by distance from the nearest town

Distance from the nearest town	*Total number of villages**	*Number of villages connected by*							
		Pucca road	*Katcha road*	*Pucca and katcha road*	*Pucca road and river*	*Pucca road and rail*	*Pucca & Katcha road and rail*	*Katcha road and rail*	*Others*
1	*2*	*3*	*4*	*5*	*6*	*7*	*8*	*9*	*10*
5 kms. or less	201	95(47.26)	30(14.93)	3(1.49)	...	5(2.49)	...	2(1.00)	...
6—10 kms.	411	163(39.66)	44(10.71)	7(1.70)	...	10(2.43)	...	9(2.19)	...
11—15 ,,	455	158(34.73)	47(10.33)	4(0.88)	...	13(2.86)	...	21(4.62)	...
16—25 ,,	388	111(28.61)	29(7.47)	5(1.29)	...	5(1.29)	...	25(6.44)	...
26—50 ,,	28	15(53.57)	6(21.43)	...	...	...	...	...	...
51—100 ,,	...	...	...	...	...	...	...	...	...
101—200 ,,		...	...	...	...	...	...	...	...
201 kms. and above	...	...	...	...	...	...	...	...	...
Total	1,483	542(36.55)	156(10.52)	19(1.28)	...	33(2.23)	...	57(3.84)	...

* Excluding 93 uninhabited villages.

(Figures in brackets indicate percentage to total number of villages in each distance group.)

The communication in the rural areas of the district is not good. Only 542 villages (36.55%) are linked by Pucca (metalled) road. Another 156 villages are linked by katcha (unmetalled) roads, 19 villages by both pucca and katcha roads, 33 villages by pucca road and rail and 57 villages by katcha road and rail.

The percentage of villages connected by pucca road is highest (53.57) among the villages lying within 26-50 kms. of an urban area and lowest (28.61) in the villages falling within 16-25 kms. of an urban area. Similar trend has been observed in case of katcha road.

(*v*) *Post and Telegraph* :—403 villages in this district have the facility of post offices. The number of post offices per 100 sq. kms. in each of the tahsil of this district has been shown in the following table :—

TABLE No. 6

Number of post offices per 100 sq. kms.

Sl. No.	*Name of Tahsil*	*Total area in sq. kms.*	*Number of post offices per 100 sq. kms.*
1	*2*	3	*4*
1.	Firozpur	1,746.5	2.46
2.	Fazilka	2,717.5	3.38
3.	Muktsar	2,576.4	3.77
4.	Moga	1,678.3	7.45
5.	Zira	1,341.2	3.43

Moga tahsil with 7.45 post offices per 100 sq. kms. enjoys the maximum postal facilities in the district whereas Firozpur Tahsil has the minimum facilities in this respect. On an average, there are 4 post offices per 100 sq kms. in the district. Only 17 villages have the telephone facility while the number of villages having telegraph offices is 18.

(c) Staple food :

Wheat, maize and rice are the staple food in the district in different parts of the year.

(d) Land use pattern :

(*i*) *Forests*—The area under forests as shown in the Village Directory, includes forested area classed or administered as forests under any legal enactment dealing with forests, whether State owned or private. This figure may be slightly different from the one furnished by the Forest Department owing to the reason that certain lands though not wooded are taken as forests by the Forest Department.

(*ii*) *Irrigated Area* :—Cultivated land served by watering through artificial means like wells, tubewells, tanks, canals, etc is termed as 'irrigated area'.

(*iii*) *Unirrigated Area* :—It includes the cultivated land which depends entirely upon nature i.e. monsoons for irrigation purposes. Firozpur District has a high percentage of unirrigated area (26.48). Too much dependence on rains, at times, exposes the district to serious difficulties.

(*iv*) *Cultivable Waste* :—This category includes land available for cultivation whether actually cultivated or not, for one reason or the other, or once taken up for cultivation but not cultivated again for more than 5 years in succession. Such land may be fallow or covered with bushes or jungle which may not be put to any use. Land under thatching grass, bamboo, bushes, miscellaneous tree crops, etc. which are not included under forests, have been considered as cultivable waste. All grazing lands which are permanent pastures, meadows, village common lands and grazing lands within the forest area have also been covered under this classification.

(*v*) *Area not available for cultivation* :—This refers to absolutely barren uncultivable land and such lands which are put only to non-agricultural uses. Absolutely barren uncultivated land covers lands under mountains, deserts etc. and lands which cannot be brought under cultivation except at an exorbitant cost. All lands occupied by buildings, roads, railways, water ways, rivers, canals, etc. are classified as not available for cultivation.

The percentage of area under different land use patterns in Firozpur District is as follows :

Forests	=	0.04%
Irrigated	=	61.94%
Unirrigated	=	26.48%
Cultivable waste	=	2.16%
Area not available for cultivation	=	9.38%

It is observed that 88 per cent of total area is under cultivation, out of which 62 per cent is irrigated and 26 per cent is unirrigated.

The area under forests is almost negligible and one tenth of the area is not available for cultivation. The area under cultivable waste, standing at 2.16 per cent in the district, is the result of water-logging. Efforts are underway to utilize this area by providing effective drainage system in the district.

Govt. canals and wells are the main source of irrigation in the district. The following table shows the area served by different sources of irrigation in each tahsil of the district :

TABLE No. 7

Tahsilwise net irrigated area during 1970-71 ('oo' hectares)

Name of Tahsil	*Different sources of irrigation*					
	Govt. canals	*Private canals*	*Tanks*	*Wells/ Tubewells*	*Other sources*	*Total*
1	*2*	*3*	*4*	*5*	*6*	*7*
Firozpur	283	...	...	590	...	873
Fazilka	1,681	...	...	237	...	1,918
Muktsar	1,694	...	...	26	...	1,720
Moga	724	...	...	619	...	1,343
Zira	212	...	...	313	...	525
Total for the district	4,594	...	...	1,785	...	6,379

Source : Economic and Statistical Organisation, Punjab.

It has been observed that percentage of cultivable waste land to cultivated land is generally lower in villages nearer to urban areas. However, a different picture emerges in this district as shown in the following table :

TABLE No. 8

Percentage of average cultivable waste per village to average cultivated land per village by distance group from the nearest town

Distance from the nearest town	*Number of villages**	*Total cultivated land (in acres)*	*Average cultivated land per village (in acres)*	*Total cultivable waste (in acres)*	*Average cultivable waste per village (in acres)*	*Percentage of average cultivable waste per village to average cultivated land per village*
1	*2*	*3*	*4*	*5*	*6*	*7*
5 kms. or less	210	269,240	1282.10	72,55	34.55	2.69
6 – 10 kms.	432	541,615	1253.74	19,763	45.75	3.65
11 – 15 ,,	488	588,849	1206.66	13,884	28.45	2.36
16 – 25 ,,	418	686,713	1642.85	12,121	29.00	1.77
26 – 50 ,,	28	88,810	3171.79	79	2.82	0.09
51 – 100 ,,	...	...	...	...	...	...
101 – 200 ,,	...	...	...	...	...	...
201 kms. and above	...	...	...	...	...	...
Total	1,576	2,175,227	1,380.22	53,102	33.69	2.44

* Inclusive of 93 uninhabited villages.

(Figures in brackets indicate percentage to total number of villages in each distance group.)

The average cultivated land per village in Firozpur District is 1,380.22 acres whereas average cultivable waste per village is 33.69 acres. Moreover, the percentage of average cultivable waste to average cultivated land per village goes on decreasing with the increase in the distance from the town.

NOTE ON TOWN DIRECTORY

16. The Town Directory has been compiled in seven different statements for all the urban areas of the district. Brief explanatory notes on each statement are given below :—

Note on Statement I :—Statement I gives an account of identification particulars, status, growth history and functional category of towns.

(M stands for Municipal Committee and C. B. for Cantonment Board in this statement.)

At the 1961 Census an attempt was made to classify the towns on the basis of the "functional category". The entire working population was categorised into 9 industrial categories. These 9 categories were further clubbed into the following five broad functional classifications :—

Industrial Category-1961		*Functional Classification*
I	Cultivator	Primary activities
II	Agricultural Labourer	
III	Mining, Quarrying, Livestock, Forestry Fishing, Hunting and Plantations, Orchards and Allied Activities.	
IV	Household Industry	Industry
V	Manufacturing other than Household Industry	
VI	Construction	
VII	Trade and Commerce	Trade and Commerce
VIII	Transport, Storage and Communications	Transport
IX	Other Services	Services

The towns have been classified on the basis of the percentage of total workers engaged in each of the five classes of economic activity. A town where 40 per cent or more of the total workers fall under one industrial category, the town has been classified as a mono-functional town, e.g., industrial town, services town, etc. If this condition is not satisfied, then the next predominant occupation is taken into account and if the total of the two industrial catergories comes to 60 per cent or above, the town has been classified as bi-functional town, e.g. industrial-cum-services town. If the total of the workers falling under the two major industrial categories does not come upto 60 per cent, the third predominant occupation is taken into consideration and the town is categorised as multifunctional, e.g. trade and commerce-cum-industry-cum services town.

The following table gives the functional distribution of the towns based on the 1971 Census :—

TABLE No. 9

Distribution of towns by functional categories

Sl. No.	*Functional category*	*Total Number of towns*
1	*2*	*3*
1.	Services	4
2.	Primary activities	1
3.	Trade and Commerce	1
4.	Industry-*cum*-Trade and Commerce	1
5.	Trade and Commerce-*cum*-Industry	1
6.	Primary activities-*cum*-Trade and Commerce-*cum*-Industry	1
7.	Trade and Commerce-*cum*-Primary activities-*cum*-Services	3
8.	Trade and Commerce-*cum*-Services-*cum*-Industry	1
9.	Services-*cum*-Trade and Commerce-*cum*-Industry	1

Out of fourteen towns in the district, six towns have been categorised as mono-functional towns. Firozpur, Firozpur Cantt., Jalalabad and Tankanwali have been classified as services towns whereas Dharamkot and Guruharsahai have been characterised as primary activities and trade and commerce towns, respectively.

There are only two bi-functional towns, namely, Abohar and Malout. Remaining six towns i.e. Giddarbaha, Muktsar, Zira, Fazilka, Moga and Talwandi Bhai towns are multi-functional towns.

Note on Statement II :—The physical and location aspects of the towns of the district have been reviewed in this statement of the Town Directory. Physical aspects play a significant role in determining the quantum of rain-fall in different areas. This statement shows that there is considerable variation in rainfall from town to town. The maximum annual rainfall (500.8 mm.) has been recorded at Zira and Talwandi Bhai towns whereas the minimum annual rainfall, 268.5 mm., has been recorded at Abohar, Giddarbaha and Malout towns.

The greater part of the rainy season is from June to September. The rains in winter generally occur from December to February. Because of the absence of sub-montane region in the district, the rains are not adequate. The maximum temperature* varies between 45.5° centigrade at Dharmkot, Fazilka, Firozpur, Firozpur Cantt., Guruharsahai, Jalalabad, Moga, Muktsar, Talwandi Bhai, Tankanwali and Zira and 45.3° centigrade at Abohar, Giddarbaha and Malout. Similarly, minimum temperature varies between 0.8° centigrade and 0.2° centigrade at above mentioned towns, respectively.

Ludhiana is the nearest city to Abohar, Dharmkot, Giddarbaha, Malout, Moga, Muktsar and Talwandi Bhai towns of the district. The distance of Chandigarh, headquarter of the State Government, from the towns of the district varies from a minimum of 159 Kms. in the case of Moga to a maximum of 299 Kms. in the case of Fazilka town.

Road communications are generally satisfactory as there is not even a single town which does not have bus route. All the towns, except, Dharmkot, Tankanwali and Zira towns, have their own railway stations. Firozpur and Firozpur Cantt., are situated at a distance of 6 and 7 kms. from Sutlaj river, respectively. Navigation is not possible in the river as the flow of water is erratic. Only a few ferries ply in the river.

Note on Statement III :—This statement contains townwise details of municipal finances for the year 1968–69.

The following table shows the total per capita receipt and expenditure of all Municipal Committees of the district classified by population size :

TABLE No. 10

Per Capita receipt and expenditure by size class of towns

Class of Town	*Number of Towns*	Per Capita						
		Receipt (Rs.)			*Expenditure (Rs.)*			
		Total Receipt	*Receipt through taxes etc.*	*Receipt from all other sources*	*Total Ex-penditure*	*Expenditure on public health and conveniences*	*Expenditure on public institutions*	*Expenditure on all other aspects*
1	*2*	*3*	*4*	*5*	*6*	*7*	*8*	*9*
Class I 1,00,000 and above	...	...	...	...	—	...	...	...
Class II 50,000-99,999	3	32.29	17.74	14.55	32.34	15.58	1.18	15.58
Class III 20,000,-49,999	4	27.59	14.90	12.70	27.23	11.59	1.24	14.41
Class IV 10,000-19,999	2	34.77	15.21	19.56	32.31	7.25	1.06	23.99
Class V 5,000-9,999	4	12.05	9.78	2.27	12.29	4.92	0.06	7.31

* *Source ;* Meteorological Department.

Towns of the district have been classified as follows :—

Class II	=	Abohar, Firozpur and Moga.
Class III	=	Fazilka, Firozpur Cantt., Malout and Muktsar.
Class IV	=	Giddarbaha and Jalalabad.
Class V	=	Dharmkot, Talwandi Bhai, Tankanwali and Zira.
Class VI	=	Guruharsahai.

The above table reveals that per capita receipts are maximum in class VI town and minimum in class V towns. Per capita receipts exceed per capita expenditure in all categories of towns except class II and V towns.

Major source of revenue for all the municipalities is local taxes. Per capita receipts through taxes are highest in class VI town and lowest in class V towns.

Besides income from taxes, the revenue derived from municipal properties, Govt. grants, loans, advances, etc. are the other sources of income for municipal committees.

On expenditure side, provision of public health, conveniences and public institutions take away the major portion of revenue in most of the Municipal Committees. However, the highest per capita expenditure has been observed in Class II towns and the lowest in class V towns.

Note on Statement IV—The information relating to civic and other amenities in the towns of the district, as in 1969, has been furnished in this statement. It gives data on road length, system of sewerage/drainage, number of latrines, method of disposal of night soil, protected water supply, fire-fighting service, number of electricity connections, etc. for each of the town.

Under Column 4, "System of Sewerage", various types of sewerage/drainage systems have been indicated in order of importance by adopting the following abbreviations :—

OSD	=	Open Surface Drains.
S	=	Sewers.
ST	=	Septic Tanks.

Under column 8, "Method of disposal of night soil", different prevalent methods of disposal of night soil in order of their importance have been shown by use of the following abbreviations :—

HL	=	Head Loads.
WB	=	Wheel Barrows.

Under column 9, "Source of protected water supply", various sources of protected water supply have been indicated in order of their importance by use of the following abbreviations :—

TW	=	Tubewell water.
T	=	Tap water.
HP	=	Handpump water.
W	=	Well water.

Firozpur town :—In the field of "Civic and other amenities" Firozpur town occupies an important position in the district. It is a border town and is well served with metalled roads. It has open surface drains and the construction of undergound sewerage system has been taken up by the municipal committee of the town. It has the largest number of water borne latrines in the district. Still night soil is generally disposed of on head loads and wheel barrows. Municipal tubewells and taps are the major sources of protected water supply in this town. Nevertheless, handpumps and wells are also catering to the needs

of a large population. A network of fire-fighting service is available in the town. The town is well electrified and a large number of connections have been provided for domestic and commercial uses. This town has maximum road lighting points in the district. It is a big junction of broad guage railway lines. Firozpur-Ludhiana, Firozpur-Jullundur, Firozpur-Fazilka and Firozpur-Bhatinda are some of the important broad guage railway links.

Moga town – is another important town of the district. It is an important centre of road transport and has a number of pucca roads connecting this town with Ludhiana, Amritsar, Dharmkot, Firozpur and Kot Kapura. The system of sewerage and drainage in the town is generally open surface drains which has posed sanitation problem in some of the localities. However, authorities have taken up the construction of underground drainage system in the town. Water borne latrines are almost negligible. The disposal of night soil is commonly made on head load and wheel barrows. Water is supplied through Municipal tubewells and taps. But these sources do not cater to the needs of the whole population in the town. About half of the population depends on handpumps and wells. Fire-fighting service is also available in the town. It is also the supplying grid station of electric power to the entire Firozpur District and a part of Bhatinda District. The town is well electrified and majority of electric connections have been given for domestric and commercial purposes. It has the maximum industrial connections (700) in the district. There is a constant demand for more industrial connections because of the new industrial units in the town. As Moga town is away from the border, many families from the western portion of the district have settled in the town.

Abohar town—is also well served with road transport facilities. It is connected by road with Malout and Fazilka towns in the district. It has open surface drains and sanitation conditions in the town are not good. The town is served by service and water-borne latrines. Night soil is commonly disposed of on head loads and wheel barrows The major sources of protected water supplyare municpal tubewells, taps, handpumps and wells. About 85 per cent of the houses have been electrified. It sha a well established cotton market and is expanding fast However, the increasing population is belighting the efforts of the authorities in providing civic and other amenities.

Muktsar town—is connected by rail and metalled road with Malout, Jalalab d, Fazilka, Kot Kapura and Bhatinda towns. It has open surface drainage system and underground seweraeg is also under construction. This town is also served by service latrines and thenight soil is disposed of on head loads and wheel barrows. About 85 to 90 per cent of the houses have been electrified in the town. Road lighting points are not adequate in the town.

Fazilka is another border town of the district. The civic and other amenities are not adequately available in this town. Sanitary conditions are also not good. However, the town is well electrified and has 536 road lightingpo ints. It is a railway tereminus on the Bhatinda-Fazilka section. Being a border town, the border tensions have hard hit the trade activities in the town.

The remaining towns of the district do not have adequate civic and other amenities. These have open surface drains and night soil is usually cleared on head load or by wheel barrows. All these towns are, however, well electrified.

Note on Statement V:—This statement furnishes details relating to medical, educational, recreational and other cultural facilities in the towns. Under column 3, medical facilities in terms of number of hospitals, dispensaries, T.B. clinics, health centres, etc. have been shown by use of the following abbreviations :—

H	=	Hospital.
D	=	Dispensary.
HC	=	Health Centre.
FPC	=	Family Planning Centre.
TBC	=	T. B. Clinic.
O	=	Others.

Where figures D (1), H (2), etc. occur, these denote that the town has one Dispensary, two Hospitals, etc.

Under column 5, educational facilities in terms of num ber of educational institutions of various kinds have been indicated by use of the following abbreviations :—

A = Arts College only.

AS = Arts and Science College only.

Where figures like A (1), AS (2), etc. occur, these denote that the town has one Arts College, or two Arts and Science Colleges, etc.

Under column 9, relating to recognised shorthand, typewriting and other vocational institutions, the following abbreviations have been used :—

ITI = Industrial Training Institute.

O = Others.

Under column 17, the existence of public library or reading room has been shown by use of the following abbreviations :—

PL = Public Library.

RR = Reading Room.

The number thereof has been indicated in brackets.

The number of medical institutions and the number of beds have been taken as the criteria to determine extent the of medical facilities available in the towns. The following table shows the over all position of medical facilities in these towns :—

TABLE No. 11

Medical Facilities

Sl. No.	*Name of Town*	*Total number of beds in medical institutions*	*Number of beds per 1,000 population*
1	*2*	*3*	*4*
1	Abohar	54	0.92
2	Dharmkot	12	1.55
3	Fazilka	50	1.38
4	Firozpur	395	7.73
5	Firozpur Cantt.	...	...
6	Giddarbaha	50	2.66
7	Guruharsahai	18	3.91
8	Jalalabad	24	2.18
9	Malout	38	1.42
10	Moga	100	1.62
11	Muktsar	55	1.40
12	Talwandi Bhai	...	...
13	Tankanwali	...	...
14	Zira	20	2.16

There are in all 816 beds in the medical institutions of all the towns in the district, the average being 2.45 beds per thousand population. However, Firozpur town, having five hospitals with 375 beds, has the maximum medical facilities. There is also one T.B. Clinic with 20 beds and two family planning centres in this town. It has 7.73 beds per 1,000 population whereas Abohar town has only 0.92 bed per 1,000 population. Every town in the district has at least one medical institution in one form or the other. However, the medical institutions in Firozpur Cantt., Talwandi Bhai and Tankanwali towns do not have any bed.

Educational facilities are not adequate in this district. Only Firozpur and Moga towns have two Arts and Science colleges each, while Abohar, Fazilka, Firozpur Cantt., Giddarbaha, Malout and Muktsar towns have only one Art and Science college each. There is no Medical or Engineering college in any of the towns of the district. However, Dharmkot, Fazilka, Firozpur, Giddarbaha, Moga and Muktsar towns have one Industrial Training Centre each.

The following table furnishes data relating to number of Higher Secondary/High, Middle and Primary Schools per 1,000 population :—

TABLE No. 12.

Higher Secondary or High Middle and Primary Schools per 1,000 population

Sl. No.	*Name of Town*	*Number per 1,000 population*		
		Higher Secondary/ High Schools	*Middle Schools*	*Primary Schools*
1	*2*	*3*	*4*	*5*
1.	Abohar	0.14	0.05	0.12
2.	Dharmkot	0.26	...	...
3.	Fazilka	0.11	0.06	0.22
4.	Firozpur	0.16	0.02	0.14
5.	Firozpur Cantt.	0.12	0.05	0.24
6.	Giddarbaha	0.11	0.05	0.11
7.	Guruharsahai	0.43	...	0.22
8.	Jalalabad	0.18	0.18	0.09
9.	Malout	0.07	...	0.11
10.	Moga	0.16	...	0.13
11.	Muktsar	0.13	...	0.08
12.	Talwandi Bhai	0.33	...	0.17
13.	Tankanwali	...	0.20	0.59
14.	Zira	0.22	...	0.22

It is evident from the above table that Guruharsahai town has the highest number of higher secondary/high schools per 1,000 population, while Tankanwali town has the maximum number of middle and primary schools per 1,000 population.

Adequate recreational and cultural facilities are available in the towns. Nine of the fourteen towns of the district have cinema houses. All towns, with the exception of Jalalabad town have their own library. Reading room facilities are also available in all towns. Two towns viz., Dharmkot and Firozpur Cantt., have the facility of auditorium.

Note on Statement VI:—This statement gives information on trade, commerce, industry and banking facilities in the town of the district as in 1969. It also gives an account of three most important commodities manufactured. The number of three most important commodities imported and exported in each town has also been given in the statement which has been determined on the basis of its estimated volume. The statement reveals that products like wheat, barley, cotton, paddy, maize, sugarcane and snuff are the most important commodities usually imported and exported in the district. Among the manufactures, agricultural implements, cotton cloth, milk products, furnitures and leather products need a special mention.

Abohar town—is famous for the manufacture of cotton cloth. It also has a famous market where citrus fruit like lemons, maltas, oranges, grapes etc. are sold. The Regional Fruit Research Station at Abohar is helping growers in citrus plantations. Sugarcane, chillies and gram are the chief products of *Dharmkot* town. *Fazilka* is known for the export of raw wool, cotton and small agricultural implements. Cotton cloth is also manufactured in this town. *Firozpur* town accounts for one of the biggest grain markets of the district. The "Wheato Laboratory", the factory of its own kind in the State for the manufacture of wheatine (dalia) and corn flakes, is located here. Firozpur is also known for dhoop making and other incenses. The products are exported to other parts of the country and even abroad. *Giddarbaha* town is a famous centre for the manufacture of good quality snuff while *Malout* town has a flourishing market for the export of cotton. Thread yarn is also produced in this town. *Moga* is well known for the export of milk products, nuts, bolts and oil engines. It is also the biggest market for various foodgrains in the State.

Improved banking facilities have given a spurt to developmental activities in the towns. In 1970, 10 branches of the State Bank of India, 13 of the Punjab National Bank, 14 of Cooperative banks, 1 of the State Bank of Patiala and 24 of other banks were functioning in the district. Out of 62 branches of various banks, only 45 are located in urban area. All towns except Tankanwali town have the facility of a bank. The maxium branches of banks are located in Abohar town. Agricultural and non-agricultural societies are found in all the towns of the district except Firozpur Cantt. and Tankanwali town.

Note on Statement VII:—This statement gives the distribution of population by religion. The population of town has been classified into six main religions, namely, Budhism, Christianity, Hinduism, Islam, Jainism and Sikhism. The persons returned as professing other religions, sects or beliefs, which could not be classified under any one of these religions, have been clubbed together under the head "Other religions and persuations". The persons whose religion could not be ascertained have been classified as "Religion not stated."

According to the 1971 Census, the Sikhs form 65.07 per cent of the total population in the district The Hindus constitute about 33.58 per cent of the total population. However, in urban areas, the proportion of the Hindu population is higher than that of the Sikhs.

PART X—B

PRIMARY CENSUS ABSTRACT

(115-116)

EXPLANATORY NOTE

PRIMARY CENSUS ABSTRACT

The Primary Census Abstract provides an abstract of the primary information relating to the 1971 Census. It contains the data in respect of area, number of occupied residential houses and households, total population (including institutional and houseless population) and its break-up by sex, Scheduled Castes and Scheduled Tribes, literate and educated persons, workers and non-workers for each village and for each town, wardwise/blockwise. The workers have been classified into the following nine industrial categories of economic activity :—

(I) Cultivators.

(II) Agricultural Labourers.

(III) Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied Activities.

(IV) Mining and Quarrying.

(V) Manufacturing, Processing, Servicing and Repairs :—

(a) Household Industry.

(b) Other than Household Industry.

(VI) Construction.

(VII) Trade and Commerce.

(VIII) Transport, Storage and Communications.

(IX) Other Services.

2. The district totals given at the beginning of the Primary Census Abstract are followed by the break-up for rural and urban areas of the district. The data are presented tahsilwise (i) for the rural area and (ii) for the urban sector. The rural Primary Census Abstract presents the data for the villages arranged in the ascending order of location code numbers (assigned to the villages) within the tahsil. The urban Primary Census Abstract, presented town-wise for each tahsil, furnishes data for the municipal wards and down to the Enumerator's blocks.

3. In the rural Primary Census Abstract the uninhabited villages have also been shown. The villages, which have got completely merged in towns, have been excluded from the list of the rural Abstract. However, an indication of such villages has been given in a separate footnote.

4. The district map given at the beginning of the Handbook shows the tahsil boundaries, location of the towns and large villages of population size 5000+ and the important roads and railway lines, rivers, etc. An inset map therein shows the location of the district in the State. A map, showing the boundaries of each village and town within the tahsil and location code number of each village and town, has been given at the beginning of Primary Census Abstract for each tahsil. An inset map therein shows the location of tahsil in the district.

5. *Under Column* 1, the location code number indicating the district number, the tahsil or town number and the village or ward number has been given. Thus a code number running as 3/2/25 means village No. 25, Tahsil No. 2 of District No. 3 or code number running as 3/II/5 means ward No. 5 in Town No. II of District No. 3. Town number has been given in roman figures to distinguish it from the rural code numbers.

6. *Under Column* 2, the name of village/town/ward No./Enumerator's block No. (Urban) has been given. The Hadbast number of the village has been given in brackets. A 'village' has been defined

as the area included within the jurisdiction of a revenue village and as such is inclusive of even scattered hamlets and isolated homesteads coming within the boundaries of a revenue village. A revenue mauza whether inhabited or uninhabited has been treated as a village.

A town is a place having either a Municipality, Cantonment or Notified Area or satisfying the following criteria :

(i) Having a minimum population of 5,000 ;

(ii) Three-fourth of its male working population engaged in the non-agricultural pursuits ; and

(iii) Having a density of population of at least 400 per sq. km. (i.e. 1,000 per square mile).

7. The area figures (in acres) given under column 3 of rural Primary Census Abstract have been collected from the revenue authorities, whereas for the urban Primary Census Abstract the column shows the total area of the town in sq. kms. as supplied by the Municipal authorities. For wards the column has been left blank as the ward-wise area figures are not available with the Municipal Committees. The district area figures (total) have been supplied by the Surveyor General of India and these represent 'geographical area' figures. The total urban area of the district has been arrived at by adding together the area of each urban area in the district as given by each Municipal Committee. District rural area figures have been derived by substracting urban area figures out of the figures supplied by the Surveyor General of India for the entire district. Total area figures of all the tahsils do not tally with the total area of the district as the former are 'land use' figures as supplied by the State Director of Land Records and the later are 'geographical area' figures as supplied by the Surveyor General of India.

8. *Columns* 4 *and* 5 of the Abstract ralate to the occupied residential houses and give the number of the houses and the households therein.

Occupied residential house is a dwelling house and includes a house used partly as a dwelling and partly for some other purpose like shop, workshop, factory, etc., but does not include a 'vacant house' where no person was found to be residing at the time of census.

'*Census house*' is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc., used or recognised as a separate unit. It may be inhabited or vacant. It may be used for a residential or non-residential purpose or both.

Household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. It may be made up of related or unrelated persons. A servant, friend or a guest residing and eating with the household during the census period has been treated as a member of the household. On the other hand a son or a daughter residing in a hostel has not been treated as a member of the household. Their enumeration was done at the place of their usual residence i.e. hostel. A hotel or hostel where a number of persons live together is recognised as an institutional household. So is a jail.

9. *Columns* 6 *to* 8 of the Abstract show the total population (including institutional and houseless population) and its sex-wise break-up. A 'houseless person' in Census terminology has been defined as :

(i) A person who might be doing domestic service or other work with one or more households but who does not reside in any house and sleeps in the corridors, verandahs or passages in buiidings or on the streets :

(ii) Wandering or nomadic tribes found to be staying in temporary huts, etc. ; and

(iii) Beggar, vagrant, tramp, sadhu, *fakir*, etc., who is found on the footpaths, streets, in places like parks, gardens, railway yards, etc.

The followlng abbreviations have been used here :—

P for persons indicating the total of males and females.

M for males.

F for females.

10. *Columns* 9 *to* 12 present the sex-wise break-up of the persons belonging to Scheduled Castes and Scheduled Tribes as notified in Government of India, Ministry of Home Affairs Communication No. S.R.O. 2477-A, dated the 29th October, 1956 and published as the Scheduled Castes and Scheduled Tribes lists (Modification) Order, 1956.

Scheduled Castes are such castes, races or tribes or parts of groups within such castes, races or tribes as are declared to be Scheduled Castes by the President of India's Orders issued under Article 341 of the Constitution of India.

Scheduled Tribes are such tribes or tribal communities as are declared to be Scheduled Tribes under Article 342 of the Constitution of India. There is no Scheduled Tribe in the Punjab State.

11. *Columns* 13 *and* 14 give the number of literate and educated persons. A *literate* is defined as a person who can both read and write with understanding in any language. A person who can merely read but cannot write has not been considered as literate. This column also includes figures in respect of persons having higher education.

12. *Under Columns* 15 *and* 16 the total number of male and female workers has been given. *A worker*, as defined at the 1971 Census, is one whose main activity is participation in any economically productive work by his/her physical or mental activity. And for that matter work involves not only actual work but effective supervision and direction of work.

In the case of regular work in trade, profession, service or business, the basis for work is satisfied if the person was employed one week prior to the date of enumeration. Persons temporarily incapacitated from work at the time of census enumeration due to illness, travel, holiday, temporary break-down, strike etc. have been treated as workers. However, a person who had been offered work but had not actually joined has been treated as 'non-worker'.

In the case of seasonal work like cultivation, livestock keeping, plantation works some types of household industry etc , a person's main activity has been ascertained with reference to such work in the last one year even if he was not active in the week prior to enumeration.

A man or woman who is engaged primarily in household duties such as cooking for own household or performing one's own household duties or a boy or a girl who is primarily a student attending institution, even if such a person helps in the family economic activity but not as a full time worker, has not been treated as a 'worker' for the main activity On the other hand if a person is primarily engaged in some economic activity but at the same time also attends to some household chores or attends a night school etc., he or she has been treated basically as a worker.

A person who merely receives an income such as a rent receiver or a pensioner, who does not have to work for receiving the income, has not been treated as 'worker' unless the person is engaged in some economic activity and if that activity is returned by him as the main activity of the individual.

The population classified as 'workers' is the economically active population.

13. *Columns* 17 *to* 36 furnish sex-wise distribution of workers into nine industrial categories. Brief explanatory notes for each of these categories are recorded below :—

Category I :

This category includes both the owner and tenant cultivators. Cultivator, according to the definition adopted at the 1971 Census, is a person who is engaged in cultivation by oneself or by supervision or direction in one's capacity as the owner or lessee of land held from Government or as a tenant of land from private persons or institutions for payment of money, kind or share. The term 'cultivation' involves ploughing, sowing and harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and pulses, raw jute and kindered fibre crops, cotton, etc. and other crops such as sugarcane, groundnuts, tapioca etc. and does not include fruit growing or keeping orchards or groves or working in plantations like tea, coffee, rubber, cinchona and other medicinal plantations.

Category II :

This category includes agricultural labourers. An agricultural labourer has been recognized in

census as a person who works in another person's land for wages in money, kind or share of produce. He has no risk in the cultivation. He has further no right of lease or contract on land on which he works.

Category III :

Workers engaged in livestock, forestry, fishing, hunting and plantations, orchards and allied activities, are included in this category.

Category IV :

This category includes workers engaged in mining and quarrying.

Category V :

This category includes workers engaged in manufacturing, processing, servicing and repairs in the :

(a) Household Industry.

(b) Other than Household Industry.

The household industry has been defined in Census as an industry conducted by the head of the household himself/herself and/or mainly by the members of the household at home or within the village in rural areas and only within the premises of house where the household lives in any urban area. The industry should not be run on the scale of a registered factory but may use machinery and employ power like steam engine or oil engine or electricity to drive the machinery. The main criterion of a household industry is the participation of one or more members of a household. A household industry relates to production, processing, servicing or repairs and includes making and selling (but not merely selling) of goods. It does not include professions such as pleader or doctor or barber, musician, dancer, waterman, dhobi, astrologer, etc. or merely trade or business, even if such professions, trades or services are run at home by members of the household. Persons working in other person's household industry as paid employees are also treated as workers in household industry.

Workers engaged in manufacturing including all types of production, processing, servicing or repairing of goods and not considered to be working in the household industry have been treated as engaged in other than household industry.

Category VI :

This category includes workers engaged in construction and maintenance of buildings, roads, railways, bridges, telegraph, telephones, waterways, reservoirs, etc.

Category VII :

This category includes workers engaged in any capacity in wholesale or retail trading activity and commercial transactions relating to exports and imports, real estates and properties, stock and shares, insurance, money lending, banking, etc.

Category VIII :

This category includes workers engaged in transport activity by air, rail, road or water and in services incidental to transport, such as packing, carting, loading, unloading, etc. Workers engaged in storage, warehousing and communication services such as post & telegraph, telephones, wireless, signalling, information and broadcasting are also included in this category.

Category IX :

This category includes other services such as public utility services, like electricity, gas or water supply, sanitary services, Central, State or Municipal employees, professional services, etc.

14. *Columns 37 and 38* give the total number of male and female non-workers. Non-workers have been classified under seven broad heads :

(i) *Household duties.*—This covers all those persons basically engaged in unpaid home duties doing no other work, or even if such a person may also be participating in some other work, it is not to the same extent as a whole-time worker and if the person had returned his or her main activity as attending to household duties.

(ii) *Student.*—This refers to those whose main activity is returned as a student and covers all full-time students or children attending school. Even if such person participated in some work but not to the same extent as a full time worker by merely helping casually as an unpaid family worker in family cultivation, household industry, trade or business, they are treated primarily as students.

(iii) *Retired person or a rentier.*— A person who has retired from service and is doing no other work i.e. not employed again in some full time work or does not engage himself in some other work as cultivation, in business, trade, etc., or a person who is a rentier or living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work, is classified under this head.

(iv) *Dependent.*—This category includes all dependents such as infants or children not attending school or a person permanently disabled from work because of illness or old age. It includes all non-workers, even if able bodied who have no other activity coming under any of the categories of non-workers and who are not seeking any work either but are purely dependent.

(v) *Beggars, etc.*—This covers beggars, vagrants or such cases as independent women without indication of source of income and those of unspecified source of subsistence who are not engaged in economically productive work.

(vi) *Institutions.*—This covers convicts in jails or inmates of penal, mental or charitable institution even if such persons are compelled to do some work such as carpentry, carpet weaving, vegetable growing, etc. in such institutions. An under trial prisoner in jail, however, is not included in this category and has been indicated according to the main activity he was engaged in before he was apprehended.

(vii) *Other non-workers.*—This includes all non-workers who have not come under any of the six categories above but are seeking work. A boy or a girl who has completed education or has stopped studying and is seeking work, has been included in this category. A person, irresepective of age and whether educated or not, if he reports that he is not engaged in any other activity but is seeking work, has been included under this category.

The following abbreviations have been used in the Primary Census Abstract :—

M.C.=Municipal Committee

C.B.=Cantonment Board

N. A.=Not Available

OG=Outgrowth
