CENSUS OF INDIA—1981

A—CENTRAL GOVERNMENT PUBLICATIONS

The 1981 Census Reports on Punjab will bear uniformly Series No. 17 and will be published in the following parts:—

Part I A	Administration Report-Enumeration (for official use only).	(Printed)
Part I B	Administration Report-Tabulation	
Part II	General Population Tables.	(Printed)
Part III	General Economic Tables.	
Part IV	Social and Cultural Tables.	
Part V	Migration Tables.	
Part VI	Fertility Tables.	
Part VII	Tables on houses and Disabled population.	(Printed)
Part VIII	Household Tables.	
Part IX	Special Tables on Scheduled Castes and Scheduled Tribes.	
Part X A	Town Directory.	
Part X B	Survey Reports on Selected Towns.	
Part X C	Survey Reports on Selected Villages.	
Part XI	Ethnographic notes and special studies on Scheduled Castes and Scheduled Tribes.	
Part XII	Census Atlas.	

B—STATE GOVERNMENT PUBLICATIONS

Part XIII	District Census Handbook for each District.	
Part XIII A	Village and Town Directory.	
Part XIII B	Village and Townwise Primary Census Abstract

FOREWORD

The District census handbook (DCH), compiled by the Census Organisation on behalf of the State governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies formulation of local level and regional plans and as an aid to district administration. The district census hand, book is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The district census handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part A related to village and town directory, Part B to village and town PCA and Part C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due todelay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuing of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub centres and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled caste and scheduled tribe population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class I and Class II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic and other amenities and adult literacy classes/ centres under educational facilities, in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part A of the volume contains village and town directory and Part B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginnig of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the ifrastructure has been introduced to enhance its value. The district and Tahsil/Police Station/C. D Block etc. level maps, depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri D. N. DHIR, the Director of Census Operations Punjab on behalf of the State Government which has borne the cost of printing. The task of planning, designing and coordination of this publication was carried out by Shri N.G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B.K. Roy, Deputy Registrar General (Map) provided the

technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M.M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

New Delhi :

The 26th April, 1982.

P. PADMANABHA;

Registrar General, India.

PREFACE

As being regularly presented hithertofore, since 1951 census, we have now the privilege of presenting the District Census Handbooks consequent upon 1981 census.

To shorten the time lag to minimum after the compilation of census 1981 data and issuance of this Handbook as a sort of self-contained reference book, predominantly based on census data for the district, action was initiated upon the project as early as in July 1979. The Registrar General, India indicated the revised formats and statements designed for this series of books. The improvements were with a view to making the data more useful for administrators, planners, scholars and other categories of users.

There are 134 towns categorised as urban area and 12,899 villages (45 tahsils) as the rural component in the state. The formidable task of collecting and compiling of this voluminous data for such a large number of units had its own problems and difficulties, both in the matters of chase up and in obtaining correct data which could be test-checked in terms of consistency with what was obtained and published consequent upon 1971 census data. Several gruelling cross checks had to be adopted to tally such items as area figures and the land use pattern for each unit.

The statements and schedules for collecting information from the rural areas were translated into Punjabi and also test-checked to assess their acceptability and responsiveness by those who were to make their use. (I had also unsuccessfully toyed with the idea of collecting information on some other items that could indicate comparative affluence of rural Punjab but had to give it up in the light of keeping uniformity in presentation of data on all India pattern).

The statements/schedules for town directory were transmitted to the Chief Executives of the local bodies and those for rural areas were transmitted to the SDOs(C) (since all tahsils in Punjab have been converted into sub-divisions) for necessary supply of data by the revenue staff under them. The officers and senior staff of the directorate that had been made directly responsible for houselisting operations and had reported to the field in October 1979 were also charged with getting these through on personal contacts. This resulted in our getting the feed back by May 1980, on the conclusion of houselisting operations, though some small instalments of these schedules continued till September/October 1980.

A cell had been created at the directorate to scrutinise the data as received and make preliminary compilation. The details obtained from the field were supplemented with the data collected from the various heads of the departments at the State level, particularly in matters of amenities and facilities in the fields of education, medical, communications and the like. The staff working in the cell was once again out in the field for assisting in the second field operation, namely enumeration and it was only on its conclusion that the work of compilation started in May-June 1981. The three Deputy Directors (at the regional tabulation offices) were in position about the same time in the field and the gaps in data, needing reconciliation in figures were got through these field officers on personal contacts with the concerned quarters.

On the compilation of the Primary Census Abstract (PCA) in March 1982 when the figures were available for projection in this volume, the whole exercise was consolidated to give birth to the instant manuscript.

The data in the book are being presented in two parts—Part A comprises Village and Town Directory and Part B Primary Census Abstract, village-wise and town/wardwise separately. In addition Primary Census Abstract for scheduled castes upto tahsil/town level is also presented. (There are no scheduled tribes in the state).

An analytical note based on a number of inset tables compiled out of the data from village and town directory and PCA has also been added for the benefit of the users, but the greater aim has been to present the data as compiled and leave further deeper study to those for whom the publication is meant.

We are grateful to the large number of personnel of the State Revenue Department at the village, tahsil, sub-division and district levels and the municipal staff in all the local bodies in the state for their co-operation in filling up the statements/schedules for providing the data.

The production of this book (and for that matter all the 12 District Census Handbooks) has been the handiwork of consistent and constant efforts put in jointly by almost all the staff of the directorate, though only at one point of time or the other in certain cases. The collection of data for Village and Town Directory, as mentioned earlier, was a major work in the pre-census period and after the census, most of the staff was busy in tabulation and compilation of the census data both at the regional tabulation offices and at the directorate. The DCHB Cell (specially created) thereafter commenced work on inset tables while the senior staff and the officers took to developing the fly-leaves and explanatory notes. Simultaneously the map section was deep in work for producing the maps that had to accompany these books.

I would resist the temptation of mentioning any single incumbent at any level of the hierarchy individually for apparent reasons, and would rest content with acknowledging my debt to all of them as appended hereto.

I had acted only as a co-ordinator and at times an editor and was very ably supported by a set of dedicated officers who spared no pains to push in the manuscripts to the press in a record time, unknown in the annals of this directorate so far.

As in the case of other aspects of census work connected with this gigantic decadal exercise, I always looked up to Shri P. Padmanabha, Registrar General and Census Commissioner, India, for guidance, inspiration and encouragement and I feel indebted to him. Shri N. G. Nag, Deputy Registrar General (Social Studies) was forthcoming in his unassuming and profound style for advice.

CHANDIGARH :
September 1982.

D. N. DHIR,
Director, Census, Punjab.

ACKNOWLEDGEMENTS

Preliminary Work—Collection, Compilation and Scrutiny of Data Relating to Village and Town Directory :

A cell was created in July 1979 under Shri J.C. Kalra, Deputy Director, who out of his earlier experience and the instructions as received from Registrar General, India, directed the collection of data and allied work. He was ably assisted by S/Shri D.P. Jain , Charan Singh and Vishwa Mittar, Investigators on one occasion or the other. The Statistical Assistants, who laid down the work at the foundation level at that time consisted of S/Shri Malkiat Singh, Munishwar Dutt, Joginder Singh and Pawan Kumar with co-operative efforts of number of Computors, namely S/Shri Mohinder Pal, R.P. Pathak, Parkash Sharma and Varinder Singh and S/Shrimati Hardeep Kaur, Satya Arora, Harbeer Kaur and Asha Vasisht.

Primary Census Abstract included in this book-manual preparation at the Regional Tabulation Offices at Jalandhar, Patiala and Bathinda :

S/Shri R.P. Tomar, R.K. Singh and S.P. Grover, Deputy Directors, were incharge of these tabulation offices respectively, and put in their best to conclude the work fairly ahead of the scheduled target. They were assisted by the Investigators, namely S/Shri N. S. Bhadauria, Charan Singh and Ajit Singh Dhillon respectively. The Statistical Assistants and Computors who worked in these R.T.Os. were S/Shri S. C. Bassi, Balbir Singh, Jai Dev and R.P. Singh at Jalandhar, Tarsem Lal Garg, S.K. Joshi, S.P. Goel, H.S. Sudan and Varinder Singh at Patiala and Balwant Rai, Bhagirath Singh, Raghbir Singh, J.S. Negi and H.P. Sharma at Bathinda.

Preparation of Inset Tables, frame work of Handbook and their drafting :

Inset tables, appendices and allied tables were prepared in the specially created cell of 'District Census Handbooks' headed by Shri S. P. Grover, earlier and later by Shri Ajit Singh, Deputy Directors. They have had exprience of such publications earlier and imparted suitable directions to the staff in the cell for presentation of the data and its analysis as per the instructions received from the office of Registrar General, India, from time to time. S/Shri Charan Singh, Investigator Balwant Rai (Now Investigator) Raghbir Singh, Tarsem Lal, Statistical Assistants and S/Shrimati Satya Arora, Santosh Kumari, Harbeer Kaur and Shri H. P. Sharma, Computors worked in this cell.

The cell provided the framework of the Handbooks and the first drafts were attempted by Deputy/ Assistant Directors who were entrusted with particular volume(s). This first draft was then finalised during discussions in officer's meetings held almost daily with the Director. Thus the final draft emerged.

Maps :

The work for preparation of maps to be included in District Census Handbooks commenced under the supervision of Shri Madhav Shyam, the then Senior Geographer, but mid-way was taken over by Shri G.S. Gill Assistant Director, who headed the map section during the vital period. He was ably assisted by Shri Jiwan Singh Gill, Artist (now Senior Artist), Shrimati Usha Kalra, Artist and Shri Kulbir Singh, Draftsman Because of his knowledge of geography and map work, he delivered the goods despite the absence of Geographer and Senior Geographer in the directorate.

Manuscript finalisation :

The final draft(s) as emerging out of the delibrerations of the officers were entrusted to a cell called,as 'Press Manuscript Cell' headed by Shri M.L. Sharma, Assistant Director who was actively assisted by S.A.'s Sh. Balwant Rai (Now Investigator), S. P. Goel and Azad Kumar. They raced against time frequently to give final shape to the volume(s) for onward transmission to the press.

Typing :

Shri K.C. Pardesi, Confidential Assistant (formerly Senior Stenographer) headed this cell. His knowledge of such publications earlier was an asset. He was assisted by Shri Ajmer Singh, Stenographer and some of the other typists from the various seats in the directorate.

Printing :

This cell was headed by Shri M.L. Sharma, Assistant Director and actively assisted by H. S. Sudan and S. P. Goel. They drew upon the services of others in the directorate, wherever necessary.

To each one of them I acknowledge my thanks.

CHANDIGARH : D.N. DHIR,

September, 1982. Director Census, Punjab.

PS : Shri Mahadeokar Assistent Controller of the U.T. Printing Press co-operated in ensuring that the publication gets the light of the day at the earliest.

CHANDIGARH : D.N. DHIR,

September, 1982. Director, Census, Punjab.

BATHINDA DISTRICT—A SHORT PROFILE

Location :

Forming the central-southern part of Punjab, Bathinda district lies between 29°-33′ and 30°-36′ north latitude and 74°-38′ and 75°-46′ east longitude, touching northern boundaries of Hissar and Sirsa districts of neighbouring Haryana state, and bounded by the Punjab districts of Faridkot in the north and west and Sangrur in the east.

Origin :

The district derives its name from the present headquarters of the district-Bathinda. It is historically an ancient town with a long and chequered history. Its name is said to have been derived from the names of a Rajput ruler by the name of Binai Pal and his *Vazir* who bore the name of Thanda Ram. In recent times the town was conquered by Maharaja Ala Singh(near about 1754 AD) and since then it has followed the history of erstwhile princely state of Patiala. With the dawn of independence and merger of Patiala and East Punjab States into a Union styled as PEPSU, Bathinda became a fullfledged district which status has continued even after the merger of PEPSU with erstwhile Punjab state in 1956. (The spellings have been recently revised from "Bhatinda" to "Bathinda" on the authority of the Survey of India, to conform to the phonetical expression, as locally pronounced).

It consists of 527 villages, out of which 520 are inhabited and 7 uninhabited, and 12 towns distributed in the four tahsils, namely Rampura Phul, Bathinda, Talwandi Sabo and Mansa.

Area :

According to information from Surveyor General of India, the district covers an area of 5,551 sq. kms. ; being the third biggest in terms of area in the state. The area figures of the tahsils as indicated by the Director of Land Records, Punjab, are as follows :

Tahsil	Area in sq. kms.		
	Total	Rural	Urban
Rampura Phul ..	875·2	869·4	5·8
Bathinda ..	1,518·5	1,428·8	89·7
Talwandi Sabo ..	950·4	934·9	15·5
Mansa ..	2,192·3	2,163·1	29·2

Climate :

The district lies in the south-western dry region of the state on the one hand far away from the Shivalik ranges in the north of the state, and on the other, nearer to the Thar desert of Rajasthan, and is far away from the major river lines that run through the State. Climatically, therefore, the district has a very hot summer,a mild rainy season and a dry but embracing winter. Dust storms are a regular feature of summer when the mercury touches over 46°C in the peak summer in June, rising distinctly and rapidly from March onwards. The monsoon is scanty(as compared to other parts of the state). The average annual rainfall is 410 mm. The nights, as in desert area, are cool and pleasant. During December and January the minimum temperature at night could touch 0°C.

Rivers and Drains :

Though no perennial river flows through the district, Ghaghar, a seasonal river runs through the south-eastern part of the district traversing through Mansa tahsil to the adjoining Sirsa district of Haryana, state. During the rainy season the volume of water in this river can be considerable and sometime causes damage in the low lying areas along its course. A number of drains like Bareta, the Sirhind Choa, the Bahadur Singhwala drain, the Lasara *Nala* and Chandbhan drain lie in the affected parts as protective measures against these sporadic floods.

Topography :

The soil in the district is mostly sandy and one can still have a view of the sand dunes dotting various parts of the district. However, the topography is under vast change, with the various ventures connected

with green revolution, and some parts of the district, particularly in and around the bigger towns and *mandis* have definitely developed green outlook.

Special efforts for afforestation in arresting the spread of desert have also contributed considerably to this change in the landscape.

Present Jurisdiction :

Bathinda as a district came into existence with the formation of PEPSU in 1948. It then comprised Faridkot, Bathinda and Mansa tahsils. On merger of PEPSU with Punjab in 1956 the district formed a part of Patiala Division and more or less continued with its original jurisdiction, till the new district of Faridkot was created in August 1972 and jurisdictional changes were effected in Bathinda and neighbouring district of Firozpur. Later still, after the creation of Firozpur Revenue Division, Bathinda was severed from Patiala Division and fell to the jurisdictional control of the former.

Depending on the administrative convenience and other considerations by state governments during the decade, there have been inter district and intra district jurisdictional changes as also upgrading of various administrative units. These inter-censal changes have been indicated in the annexure.

Land-Utilisation :

The economy of the district is still primarily agricultural. The percentage of area under cultivation is 91.30 . There has been a decrease in the uncultivated area and cultivable waste as compared to 1971 census figures, indicating necessary catching up with the green revolution activities in the state. There has been depletion of the limited private forests but the government's efforts for afforestation on the land available along the roads, canals, drains and railway lines has more than offset this small depletion ;(recently) there has been reversal in the outlook of the progressive farmers in so far as they are providing necessary chunks for grove-lands in their own fields. Raising and sale of timber has also become a more profitable proposition.

The state canals-Sirhind and Bhakra lines, and deep tubewells systematically dug up under expert advice by the State Tubewell Corporation and other agencies are the main sources of irrigation. The principal crops of the district are wheat, gram, maize, pulses, bajra, jowar and mustard but cotton as a commercial crop is extensively cultivated and the district is known for it in all the textile centres in the country.

Animal Husbandry :

The district has a rich cattle wealth which includes bullocks and bulls, buffaloes, horses and ponies, donkeys and mules, sheep and goats and camels. The increase in the last ten years in cattle wealth has been 9.95 per cent from 1966-67 to 1977-78 raising the number from 7,17,700 to 7,97,000 heads. Of late, there has been a spurt in poultry raising and vast number of poultry farms lie on main approaches to the various towns in the district. The increase in poultry stock from 1966-67 to 1977-78 is 61.11 per cent, which in numbers has increased from 92,700 in 1966-67 to 1,51,700 in 1977-78.

The district is studded with 34 veterinary hospitals and an equal number of dispensaries for looking after the health of the livestock in its length and breath.

Communications-Railways and Roads :

Bathinda has one of the biggest railway junctions not only in the state but in the country. As many as seven lines pass through it towards Jakhal/Rohtak/New Delhi, Firozpur, Dhuri/Patiala/Ambala, Hindumal Kot/Abohar/Ganganagar, Hanumangarh/Suratgarh, Fazilka and Hanumangarh/Bikaner, both on broad and meter gauges. This accessibility has been supplemented, by a net work of roads connecting the towns of the district, inter-district and intra-district and by a vast number of link roads connecting the villages to the nearest main roads. The road milage which was 732 kms. in 1966-67 rose to 2,181 kms. in 1977-78, raising figure of length of roads per 100 kms. to 40 as compared to 11 then. The roads per lakh of population similarly has risen from 55.5 kms in 1966-67 to 185.88 kms during this period. The major district roads are from the district headquarter to Kot Kapura, Talwandi Sabo, Mansa and Barnala.

Amenities-Educational, Medical, Postal, Water Supply and Electricity :

At one time known as educationally backward district, it has since made great strides and today it boasts of 9 Arts and Science Colleges, 175 high/higher secondary schools, 288 middle schools and 624 primary schools. Each village has got at least a primary school.

In matters of medical facilities the district has 55 hospitals, 126 dispensaries and 34 primary health centres. Though the medical institutions per 100 sq. kms. is relatively small i.e. of the order of 5 but then

it has to be appreciated that this district has very populous villages (in comparison to the villages in the central Punjab) surrounded by vast stretches of agricultural lands.

On an average there are 4.56 post offices per 100 sq. kms. in 1977-78 in the district and the telephone service due to the predominance of *mandi* towns is one of the substantial spread outs in this part of the country.

All the inhabited villages and towns in the district are served by a chain of water works to cater to potable water supply to the inhabitants.

There is 100 per cent electrification in the district-both in rural and urban areas.

Because of the comparative backwardness of the district, it has development potential and due to the fact that the area has in recent times successfully sent out individuals in political fields, determining the administrative/government pattern in the state, the district has been receiving special attention and is well on the road to development.

PRESENT DEMOGRAPHIC PICTURE

Population and Density :

With the density of population still low (second lowest in the state) at 235 persons per sq. km, the increase in population during the decade 1971—81 was 27.24 per cent as against the state percentage of 23.89. As on 1st March, 1981 1,304,606 persons (699,815 males and 604,791 females) lived in the district.

In the matter of number of females per thousand males it has recorded a slight improvement of 9 females raising the number from 855 in 1971 to 864 in 1981 though it continues to be fairly below the state figure of 879 in this respect.

Rural and urban percentages of increase in population tahsilwise are as below :

Tahsil		Total	Rural	Urban
Rampura Phul	..	25·00	23·19	36·25
Bathinda	..	38·43	20·92	83·75
Talwandi Sabo	..	24·29	14·60	74·63
Mansa	..	21·14	19·30	33·82

In the matter of urban growth Bathinda city has increased its population from 65,318 to 127,363 in 1981 giving a percentage of 94.99 which is amongst the highest in the state and is an unmistakable pointer to industrial shift from the agricultural background of the town.

Literacy :

The district still continues to be at the lowest rung in respect of literacy. Out of 100 persons 27.72 are literates (the test being simple reading and writing only) as against 40.86 in the state or 50.60 being the highest literates in the district of Ludhiana. The position calls for further efforts in the matter of female literacy which is 20.29% against 33.69% in the state or 44.15% of Ludhiana, the most forward district of the state. Though the improvement in literacy is commensurate with such a figure in some of the districts of the state but the overall picture of comparative educational backwardness of the district still continues.

Occupations :

The number of workers have more or less continued to be the same in the decade, 30.84 per cent in 1981 as against 30.73 per cent in 1971. Some females have come forward as workers in this district which had earlier not seen the face of women at work either in the field or in an office. Their limited hold then was on the girls' schools and female hospitals. There has also been loss of 6.41% workers in 'primary' sector in 1981 as compared to 1971 and corresponding gain to the 'secondary' and 'tertiary' sectors which is an indication of style shift in the overall economy of the district from agriculture to the industries.

Trade and Commerce :

Bathinda district has been predominantly the agricultural stronghold in the heart of Malwa region of the state. Apart from the staple varieties of foodgrains like wheat and gram, it has been known for

cotton. In fact the "floating silver" is feast to the eyes when one travels to the district during early winter when cotton blossoms.

Situated in south Punjab, away from the main heartland of the state, the district is studded with flourishing *mandis*. In fact at every 20 kms. or so there is a *mandi* providing an important centre to the sellers from within the district and the purchasers from outside the district. These *mandis*, apart from the famous old *mandi* of Bathinda, are at Goniana, Bhucho, Rampura Phul, Maur, Kot Fatta, Mansa, Raman, Budhlada and Bareta. In fact all the towns (urban areas) in the district are built on these *mandis* as the nucleus.

The principal items of import are salt, sugar, kerosene oil, motor spares, metals, gunny bags, textiles and machinery. Bathinda town is very famous for wholesale business in cloth and it caters in this respect, to not only the various centres in south Punjab but also to places in northern Rajasthan. With the advancement of cooperative movement, a marketing society at district level has also been organised with its branches all round the district since 1957. It deals now in seeds, fertilizers, agricultural implements and insecticides. Apart from transacting business on behalf of its member societies in foodgrains and other local products, the various *mandis* in the district provide nucleus for hectic activities by the Punjab State Cooperative Supply Marketing Federation Limited (MARKFED) and Cotton Corporation of India (CCI) at the time of cotton arrivals. In all the textile centres in the country, Bathinda and cotton are talked of as synonyms.

The principal exports are cotton, oil seeds (especially mustard oil) and of course the agricultural produce in staple foodgrains.

The importance of Bathinda in trade and commerce can be gauged from the fact that Bathinda town is reported to have the busiest telephone exchange in the country, in the size of the town.

Industry :

The decade from 1971 upwards has seen industrial activity of substantial magnitude in Bathinda district consequent upon the material alteration of skyline in Bathinda town. The first on the ground was Guru Nanak Dev Thermal Plant(GNDTP) with 4 units of 110 MW each. This thermal plant has been augmenting the power supply position in the state and has opened up a vast source for employment (about 4,000 persons).

The Indian National Fertilizer Limited (NFL) has established its plant in close proximity to the thermal plant at a capital cost of 240.47 crores. Besides offering direct employment to about 1,200 persons, it has generated employment for 5,000 people who are engaged in marketing, distribution activities and other allied activities.

A big milk plant under public sector (MILKFED) has also come into existence in the outskirts of the town which has given a great fillip to the development of animal husbandry in the district, well known for its well-fed cattle heads.

The fourth unit in the large scale comprises a weaving and spinning unit by the Punjab State Industrial Development Corporation (PSIDC) with a capacity of 50,000 spindles. It has been first of the series of such mills proposed in and around Bathinda as also in neighbouring districts to generate employment on one hand and ensure conversion of cotton into yarn before it is despatched outside the state, on the other.

With the coming up of these public sector projects, vast scope for development of ancillary units in small scale as well as in cottage industries has arisen. The ancillary units manufacture steel balls, transformers, S.W. pipes, welding rods, polythene coated bags, straw board, cattle feed, bone meal, ice cream, sulphuric acid etc. New horizons are being explored for further establishment of ancillary units based on cotton, leather goods, gaskets, zinc sulphate, hydrochloric acid, tannery, detergents, poultry, gears, ball bearing, conduit pipe, ginning and pressing, pipe fitting, electric fans, ceramic, lime, electric motors etc.

Not only has this meant increase in establishment of industrial units in and around Bathinda town but also these are spread over in the entire district where industrial focal points had been and are being developed.

The number of registered small scale units had recorded 73 per cent increase in the previous two years (from 817 in 1977-78 to 1,417 in 1981-82).

The industrial activities have received further fillip with the declaration of the district as industrially backward and consequential eligibility to various subsidies and concessions that go with such declaration, both for setting up new units as also for the expansion of the old ones. The traditional occupations of shoe making, *ban* and rope making, carpentry, blacksmithy, handloom weaving have not only continued but have flourished.

In the large scale sector, another half a dozen units, with a total investment of Rs. 13 crores are in the pipeline and over 100 crores further investment is envisaged in various projects for which over a dozen letters of intent have since been issued by the Central Government in favour of the entrepreneurs both public and private, for establishment of large units.

The census 1981 returned a population of 127,363 of Bathinda town against population of 65,318 in 1971 thus showing an increase of 94.99 per cent. There is a material shift in its appearance; from an agricultural small *mandi* town, it is transforming into an advanced industrial centre. There has been a phenominal increase of 165.53 per cent in respect of neighbouring Bhucho mandi ; its population increasing from 2,945 in 1971 to 7,820 in 1981. The other important towns in the district have also reported substantial increase due to the industrial wave.

Simultaneously an attempt has been made to improve the marketing and service facilities in the rural areas and during the decade, focal points catering to the facilities for a purchase centre, veterinary hospital, civil dispensary, fertilizer depot and shopping centre were reportedly established at 27 rural places, 3 each in all the 9 development blocks that cover the entire district.

Historical Towns :

Strictly from the historical point of view, the only other important place apart from Bathinda in the district is Talwandi Sabo-connected with the history of the Sikhs.

Sri Guru Gobind Singh, after his fiercest battles with the Mughals at Anandpur Sahib, Chamkaur Sahib and Muktsar, came to Talwandi Sabo and rested there for 9 months. The place is alternatively called 'Damdama Sahib' (*Dam* means rest in Punjabi). He made it a centre for spreading his mission and hence another name 'Guru ki Kashi'. He redictated Adi Granth Sahib here and called this place as 'Khalsa da Takhat'. It is now the headquarters of the Nihangs of the state. A statewide *mela* is held here on Baisakhi day (in April).

The old awe-inspiring relic of its past splendour is the old fort at Bathinda, which is indisputably larger than its competitors at Lahore, Phillaur and Hanumangarh. It stands as a gigantic sentinel in the heart of the town. Sri Guru Gobind Singh also stayed here and inside the fort is a Gurdwara. It has a long fascinating history behind it.

In this era of new culture, which is the gift of industrial development, the Rose Garden and the Boating Club at Bathinda have started drawing record visitors both from outside and from within the district. In fact in the desert and arid landscape of Bathinda these provide the oasis of invigorating relief and feast for the eyes.

ANNEXURE

JURISDICTIONAL CHANGES

Bathinda District

Inter-district changes :

(i) Bathinda tahsil lost village Peori, Hadbast No. 6 to Muktsar tahsil of newly created Faridkot district—*vide* notification No. 943-RG-I-71/1967, dated 2nd June, 1971.

(ii) The entire tahsil of Faridkot was transferred to newly formed Faridkot district—*vide* notification No. 2120-RG-I-72/2155, dated 17th July, 1972.

Intra-district changes :

(i) Bathinda tahsil lost 6 villages to Mansa tahsil—*vide* notiication No. 765-RG-I-74/1571, dated 10th June, 1974.

(ii) Bathinda tahsil lost 4 villages to Rampura tahsil—*vide* notification No. 765-RG-I-74/1571, dated 10th June, 1974.

(iii) Bathinda tahsil lost 3 villages to Mansa tahsil—*vide* notification No. 1632-RG-I-75/1989, dated 22nd July, 1975.

(iv) Bathinda tahsil lost 4 villages of sub-tahsil Talwandi Sabo and 28 villages to newly formed tahsil Talwandi Sabo—*vide* notification No. 2541-RG-I-79/2420, dated 12th November, 1979.

(v) Mansa tahsil lost 17 villages to newly formed tahsil Talwandi Sabo—*vide* notification No. 2541-RG-I-79/2420, dated 12th November, 1979.

(vi) The newly formed tahsil Talwandi Sabo comprises :—

(a) Sub-tahsil Talwandi Sabo of Bathinda tahsil.

(b) 28 villages from Bathinda tahsil.

(c) 17 villages from Mansa tahsil ;

vide notification No. 2541-RG-I-79/2420, dated 12th November, 1979.

(vii) 17 villages which were transferred to Talwandi Sabo tahsil—*vide* notification No. 2541-RG-I-79/2420, dated 12th April, 1979 were re-transferred to tahsil Mansa—*vide* notification No. 4750-RG-I-79/4260, dated 12th July, 1979.

INTRODUCTION TO DISTRICT CENSUS HANDBOOK

Keeping in view the needs of planners, for exhaustive infra-structural and amenity data upto village level, required for micro-level planning, the formats of the village and town directory of 1981 DCH series have been redesigned and some new features useful for planning have been added while maintaining the comparability with 1971 data. A few new items of information such as adult literacy centres, primary health sub-centres, community health workers in villages, etc. have been introduced to meet some of the requirements of revised minimum needs programme. A new item 'approach to village' has been introduced to give an idea about the villages in the district which are inaccessible. A new column 'Total population and number of households' has been introduced to examine the correlation of amenities with the population and number of households they serve. Two more appendices namely (i) listing the villages where no amenities are available and (ii) list of villages indicating ranges according to the proportion of scheduled castes to total population have been added with the same object in view. A significant addition is class of the town in all the six statements of the town directory which alongwith population and decadal variation since 1901 to 1981 will prove quite useful for analysing the infrastructure of amenities in the urban area of State.

Contents :

The 1981 DCH series have been divided in two parts. Part A contains village and town directory and Part B PCAs of villages and towns and PCA for scheduled castes upto tahsil/town levels. Both parts are being published in this volume.

The village directory contains information about total area of each village in hectares, total population and number of households, amenities/conveniences available in the village and the land-use pattern. There is also information about the nearest town and its distance from the village and approach to the village.

The town directory presents data on each town with the aid of six statements giving the status and class of the town, the decadal population and growth rate since 1901—1981, physical and locational aspects, municipal finance and availability of amenities/facilities like medical, educational, banking, etc., trade, commerce and industry.

PCA incorporates tahsil-wise data for each village and each town/ward under the following heads :

(i) Area in hectares/sq. kms.

(ii) Number of occupied census houses

(iii) Number of households

(iv) Total population

(v) Scheduled caste population (there is no scheduled tribe in Punjab State)

(vi) Literates

(vii) Main workers classified into four categories of cultivators, agricultural labourers, household industry and other workers

(viii) Marginal workers

(ix) Non-workers

Maps :

The map of the district and a map for each tahsil of the district have been included.

The district map shows the district boundary and location of its headquarter, tahsil boundaries and location of its headquarter, national highway, state highway, important metalled roads, railway lines, river and streams, towns and census villages according to population size, post and telegraph offices, degree colleges and technical institutions, rest houses etc.

The tahsil map contains boundary of tahsil and location of tahsil headquarter, villages with location code numbers, villages with population size, uninhabited villages with location codes, urban areas with location codes, roads, railway and service facilities such as post and telegraph offices, higher secondary schools, hospitals, etc.

Besides both the district and tahsil maps have an inset map where additions or loss of territory has taken place during the decade, has been shown.

Sources :

Whereas PCA contains census data for compilation of village and town directory, the relevant schedules along with comprehensive instructions, were sent to the revenue officers (for rural areas) and executive officers of municipal bodies (for urban areas) to be filled in at their end. The completed schedules were collected from the relevant quarters during the houselisting operation in April, 1980 by the staff of this directorate. The schedules were scrutinised at the directorate and the directories were compiled therefrom.

CENSUS CONCEPTS AND DEFINITIONS

Village and Town Directory :

Rural-Urban Classification :

The 1981 census data are being presented by rural and urban areas, as in the previous censuses.

As far as rural area is concerned, 'village' has been adopted as the lowest census unit.

Rural Area : 'Village' :

The definition of the village adopted in census is identical with that of 'mauza' given under section 3(i) of the Punjab Land Revenue Act, 1887. It is the 'revenue estate' determined as such for the purpose of levy and collection of the land revenue. The revenue estate is defined in the Act *ibid* as an area

(a) of which a separate record of rights is maintained or

(b) which has been separately assessed to land revenues or would have been so assessed if the land revenue had not been realised or compounded or redeemed or

(c) which the State Government has otherwise declared as an Estate.

The village is thus not merely the *abadi deh* (red lined area) for census taking but the entire land coming within the fixed boundaries of each village in terms of the act *ibid.*

There are 529 villages (including 7 uninhabited and 2 since covered in urban area in Bathinda district).

Urban Area : 'Town' :

The following definition of an 'urban' area has been adopted at the 1981 census which is analogous to the criterion adopted in 1961 and 1971 census with some minor variation (as indicated below) :

(a) All places with a corporation, municipality or cantonment board or notified town area.

(b) All other places which satisfied the following criteria :

(i) a minimum population of 5,000 ;

(ii) at least 75 per cent of the male working population engaged in non-agricultural (and allied activity ; and

(iii) a population of at least 400 per km^2 (or 1,000 per square mile).

The urban criterion of 1981 census varies slightly from that of 1961 and 1971 censuses, in that the males working in activities such as forestry, logging, etc., were then treated as engaged in non-agricultural activity. It, therefore, contributed to the 75 per cent criterion in 1961 and 1971 censuses whereas in the 1981 census these activites have been treated as on par with cultivation and agricultural labour for the purpose of this criterion.

Prior to the 1961 census, the definition of 'urban' area was somewhat liberal and a lot was left to the discretion of the local authorities. At the 1971 census, the State directors of census operations were also given discretion in marginal cases to include, in consultation with the State Government, a place that had other distinct urban characteristics or to exclude an undeserving place from being treated as 'urban'.

Urban Area in Bathinda District :

With the transfer of Faridkot sub-division from Bathinda district to newly formed Faridkot district in August 1972, three towns, namely Faridkot, Jaitu Mandi and Kot Kapura were transferred from Bathinda to Faridkot district. Talwandi Sabo NAC was added to the list of towns in Bathinda district during the decade. Although the State Government abolished Talwandi Sabo as NAC in October, 1980 along with other 15 NACs, this has been treated as an urban area for 1981 census since it was decided to freeze the urban frame as on 30th September, 1980.

The district had 12 towns at 1981 census.

Urban Agglomeration (UA) :

Apart from town/city (a town with a population of one lakh and above), the 1971 concept of urban agglomeration is also adopted for the 1981 census. Very often lage railway colonies, university campuses, port areas, military camps, etc., came up outside the statutory limits of the city or town but adjoining it. Such areas may not by themselves qualify to be treated as towns but if they form a continuous spread with the town, they are outgrowths of the town and deserve to be treated as urban. Such towns together with their outgrowth have been treated as one urban unit and called 'urban agglomeration'.

An urban agglomeration may constitute :

(a) A city with continuous outgrowth (the part of outgrowth being outside the statutory limits but falling within the boundaries of the adjoining village or villages) ;

(b) one town with similar outgrowth or two or more adjoining towns with their outgrowths as in (a) ; or

(c) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Urban Agglomeration in Bathinda District :

The only urban agglomeration in Bathinda district is Bathinda UA with Model Town as its outgrowth.

Standard Urban Area (SUA) :

A new concept of standard urban area (SUA) as introduced in 1971 census was also followed for the 1981 census. The essential requirements for the constitution of a standard urban area are ;

(i) it should have a core town of a minimum population of 50,000 ;

(ii) the contiguous 'areas' made up of other urban as well as rural administrative units should have mutual socio-economic links with the core town ; and

(iii) in all probability this entire area should get fully urbanised in a period of two or three decades.

Certain SUAs were determined on this basis in 1971 and some basic data were presented for 1951, 1961 and 1971 for such areas and their components. Similar data are being presented for the SUAs in 1981 also. The idea is to present basic data for these areas for four to five decades so that the urbanisation process in those areas can be studied.

Standard Urban Area in Bathinda District :

In Bathinda district, Bathinda was the only urban area having population above 50,000 as at 1971 census and SUA was delineated around Bathinda town. The basic particulars of this SUA are :

Name of SUA	Rural components (with Hadbast No.)	
Bathinda	Bathinda (Rural)	(70)
	Bhagu	(59)
	Phus Mandi	(60)
	Mehna	(175)
	Gobindpura	(176)
	Bhucho Kalan	(201)
	Bhucho Khurd	(207)

This continues in 1981.

DEMOGRAPHIC CHARACTERISTICS BASED ON ANALYSIS OF INSET TABLES (PRIMARY CENSUS ABSTRACT):

Population:

Table 1 below gives sex-wise population for total rural and urban areas, number of total and inhabited villages and towns as at 1981 census. The district has a population of 1,304,606 persons (699,815 males and 604,791 females). 22.68 per cent of the population of the district lives in its urban area compared to 27.68 per cent of the state as a whole. Bathinda sub-division has urban component of 36.99 per cent which is higher than the proportion of the state urban population. The other three sub-divisions of the district, namely, Talwandi Sabo, Rampura Phul and Mansa have an urban component of 22.69, 15.12, 13.98 per cent, respectively each of which is significantly lower than the state average; but Talwandi Sabo has proportion of urban population more or less equal to the district urban proportion. The reason for lower proportion of urban population of sub-division Rampura Phul is that there is only one town Rampura Phul itself and for Mansa sub-division, besides Mansa there are two small towns i.e., Bareta (Class V) and Budhlada (Class IV) and secondly it has fairly large number of 242 inhabited villages.

TABLE 1

Population, Number of Villages and Towns, 1981

Sl. No.	Name of tahsil	Population									No. of Villages		No. of towns
		Total			Rural			Urban					
		P	M	F	P	M	F	P	M	F	Total	Inhabited	
1	2	3	4	5	6	7	8	9	10	11	12	13	14
1	Rampura Phul	210,854	113,108	97,746	178,964	96,134	82,830	31,890	16,974	14,916	76	76	1
2	Bathinda	409,881	220,723	189,158	258,270	137,692	120,578	151,611	83,031	68,580	122	117	5
3	Talwandi Sabo	192,263	103,009	89,254	148,638	79,751	68,887	43,625	23,258	20,367	85	85	3
4	Mansa	491,608	262,975	228,633	422,857	226,757	196,100	68,751	36,218	32,533	246	242	3
	District Total	**1,304,606**	**699,815**	**604,791**	**1,008,729**	**540,334**	**468,395**	**295,877**	**159,481**	**136,396**	**529***	**520**	**12**

*Includes 7 uninhabited and 2 inhabited villages since merged in towns.

Sex Ratio :

The sex ratio for the district is 864 females per 1,000 males as against the corresponding state figure of 879 which is a moderate improvement over sex ratio of 855 in 1971. The highest sex ratio of 869 has been observed from Mansa sub-division and lowest 857 for Bathinda sub-division, the other two sub-divisions, Talwandi Sabo and Rampura Phul have a sex ratio of 867 and 864, respectively.

Table 2 shows change in distribution of population during the last decade 1971—81 for the district and its sub-divisions.

TABLE 2

Decadal Change in Distribution of Population

Tahsil	Population						Percentage decadal variation (1971—81)		
	1971			1981					
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10
Rampura Phul	168,682	145,276	23,406	210,854	178,964	31,890	25·00	23·19	36·25
Bathinda	296,089	213,579	82,510	409,881	258,270	151,611	38·43	20·92	83·75
Talwandi Sabo	154,685	129,704	24,981	192,263	148,638	43,625	24·29	14·60	74·63
Mansa	405,815	354,438	51,377	491,608	422,857	68,751	21·14	19·30	33·82
District Total	**1,025,271**	**842,997**	**182,274**	**1,304,606**	**1,008,729**	**295,877**	**27·24**	**19·66**	**62·33**

Growth Rate :

The district has shown a growth rate of 27.24 per cent as against the state growth rate of 23.89 per cent, rural growth rate is 19.66 per cent as against state rural growth rate of 17.48 per cent and the urban growth rate is 62.33 per cent as against the state urban growth rate of 44.51 per cent.

The highest urban growth rate (83.75%) has been recorded by Bathinda sub-division and the lowest (33.82%) by Mansa. In terms of urban growth rate, Bathinda is second in rank in Punjab State. The highest growth rate 88.84 has been recorded by Rupnagar. This is a definite indicator of socio-economic development for Bathinda district and Bathinda sub-division in particular. Rapid industrialisation is apparently at its base. Bathinda district so far called as back water of Punjab, is fast catching up with central Punjab districts.

Table 3 below gives the distribution of villages according to population ranges :

TABLE 3

Distribution of Villages by Population Ranges

Range of population	No. of inhabited villages in each range	Percentage of inhabited villages in each range
1	2	3
Less than 200	2	0·38
200—499	23	4·42
500—1,999	313	60·19
2000—4,999	162	31·16
5,000—9,999	20	3·85
10,000 +	..	..
Total	**520**	**100·00**

Villages :

The district has 520 inhabited villages, 7 uninhabited (bechirag) and 2 villages which have been merged in towns. Bathinda sub-division has 4 uninhabited villages and Mansa 3 uninhabited villages. One village viz., Bathinda of sub-division Bathinda and one village, viz., Mansa Kalan of sub-division Mansa have been merged in Bathinda M.C. and Mansa M.C., respectively. The average number of persons per inhabited village in the district works out to 1,939. There is preponderance of middle sized villages (500—1,999), their number being 313, their proportion being 60.19 per cent of the total inhabited villages of the district. There are 20 villages of population exceeding 5,000 persons.

Density :

The density of the population in the district works out to 235 persons per sq. km. which is the second lowest amongst the districts of the state, and significantly lower than the state average density of 333 persons per sq. km. but it has recorded a substantial increase of 47 persons per sq. km. from 188 persons per sq. km. in 1971 to 235 persons per sq. km. in 1981.

There is a wide gap in the density of rural and urban areas of the district, 186 in rural areas and 2,110 for urban areas. Table 4 given below indicates the distribution of villages by density :—

TABLE 4

Distribution of Villages by Density

Range of density (per sq. km.)	Total No. of inhabited villages in each density range	Percentage of villages in each density range
0—10	1	0·19
11—20	—	—
21—50	1	0·19
51—100	11	2·12
101—200	271	52·12
201—300	217	41·73
301—500	18	3·46
501+	—	—
Not known	1	0·19
Total	**520**	**100·00**

271 (52.12%) out of the total 520 villages have a density lying between 101—200 persons per sq. km. 217 (41.73%) are with density between 201—300 persons per sq.km.; 13 (2.50 per cent) villages have a density less than 100 persons per sq. km. and 18 villages (3.46 per cent) have density between 301—500 persons per sq.km.

Scheduled Caste Population :

The district has relatively a high percentage of scheduled caste population i.e. 27.02 per cent compared to 26.87 for the state as a whole. The following table 5 gives proportion of schduled caste population in inhabited villages;

TABLE 5

Proportion of Scheduled Castes Population to Total Population in the Villages

Percentage range of scheduled caste population to total population	Number of inhabited villages in each range	Percentage of inhabited villages in each range
1	2	3
Nil	2	0·38
Less than 5	2	0·38
6—10	8	1·53
11—15	18	3·47
16—20	54	10·39
21—30	211	40·58
31 and above	225	43·27
Total	**520**	**100·00**

Majority of villages i.e. 225 or 43.27 per cent have scheduled caste population above 31 per cent. 211 (40.58%) have a scheduled caste population ranging between 21 to 30 per cent, 84 (16.15%) villages have scheduled caste population below 21 per cent.

Table 6 gives proportion of scheduled caste population in urban areas. As compared to rural areas, the urban areas have substantially, lower proportion of scheduled caste population constituting 19.7 per cent of the total population. Talwandi Sabo with 37.68 per cent of scheduled caste population ranks highest amongst the towns of the district and the lowest (14.10%) has been revealed by Budhlada while Bathinda has a proportion of 16.19, the second lowest. A sub-division-wise study of scheduled caste population can be made from table 9 There is no scheduled tribe population in Punjab State.

TABLE 6

Proportion of Scheduled Castes Population in Towns

Serial No.	Name of the town	Total population	Total Scheduled Caste population	Percentage of Scheduled Caste population to total population

*Urban Agglomeration (U.A.)

**Talwandi Sabo N.A.C. has since been denotified by State Government.

Literacy :

In the matter of literacy it stands at the lowest rung out of the 12 districts of the state. Only 27.73 per cent of the population of the district is literate (i.e. which can at least read and write a letter with understanding, as the definition of 'literate' in census goes as against the state percentage of 41.28. The male literacy rate is 34.16 per cent and female literacy rate is 20.29 per cent being the lowest for any district in the state. However, the literacy rate has shown improvement over the literacy rate in 1971 by 4.1 points and this improvement is commensurate with the improvement in the literacy rate of some of the other districts of Punjab. Bathinda sub-division leads with a literacy rate of 33.98 per cent over the other sub-divisions, Talwandi Sabo (23.82%), Rampura Phul (28.36%) and Mansa (23.75%). The literacy rates for rural and urban areas of the district respectively are 22.00 per cent and 47.22 per cent. Sub-division-wise literacy rates for total, rural and urban and for persons, males and females can be examined from table 2. Table 7 below gives literacy rate by population ranges of the villages and it is revealed that there is no consistent trend in the literacy rate vis-a-vis range of population.

TABLE 7

Literacy Rates by Population Ranges of Villages

Range of population	Number of inhabited villages in each range	Literacy rate
1	2	3
Less than 200	2	25·54
200—499	23	23·53

Working Population :

The main workers constitute 30.84 per cent as against 30.73 per cent in 1971. There are 55.75 per-cent male workers and only 2.03 per cent female workers. Female workers have shown substantial improve ment over 1971 when only 0.88 per cent female workers were recorded. Of the total working force, 68.92 per cent of workers are engaged in agriculture as cultivators and agricultural labourers as against 75.33 per cent in 1971. Thus, there has been a decline of 6.41 per cent points in the primary sector and there has been corresponding increase of 6.41 per cent in the secondary sector of the economy (Table 9).

BRIEF ANALYSIS OF THE VILLAGE AND TOWN DIRECTORY

VILLAGE DIRECTORY

Amenities available in the village:

In the annexure immediately following this note, distribution of villages according to availability of different amenities/facilities has been indicated in table 10 while table 11 indicates the proportion of rural population served by these amenities and table 14 indicates the distribution of villages according to population range and amenities available. Table 13 indicates the distribution of these villages according to the distance from the nearest town and availability of different amenities and according to it, out of 520 inhabited villages 139 (26·73%) have a town at a radius of 5 kms., 269 (51·73%) villages have an urban centre in a distance slab of 6—15 kms and the remaining 112 (21·54%) have an urban centre in a distance slab of 16—50 kms. This indicates that by and large the district is rural and a fair number of villages are away from the urban centres.

Table 12 sums up the number of villages where certain amenities are not available within the jurisdiction of the villages and the distance ranges where the inhabitants of these villages avail them.

Amenity-wise analysis reads below:—

(i) Educational Facilities :

Of the total 520 inhabited villages in the district, 518 (99·62%) with a population of 99·94 per cent of the rural population of the district are equipped with the facility of at least a primary school. Two villages, namely Kalian Sada and Maujo Kalan with population of 335 and 264 falling in the sub-divisions of Bathinda and Mansa, respectively, are devoid of this basic facility. The percentage of the villages having at least primary school increased from 76·75 per cent to 99·62 per cent over the last decade, thus, showing that Bathinda has made a great stride in providing the minimum educational needs. Even the two villages which do not enjoy the facility of primary education could avail the facility by commuting a distance of less than 5 kms.

(ii) Medical Facilities:

231 (44·42%) out of 520 inhabited villages have at least one of the medical institutions, viz., hospital maternity and child welfare centre, health centre, primary health centre, dispensary, family planning centre and the like. The proportion of villages enjoying one or more of the medical facilities are highest in respect of Rampura Phul sub-division and lowest for Mansa sub-division. (The perusal of the tables reveals that larger sub-divisions of the district tend to have comparatively much lower percentage of medical facilities than for the smaller sub-divisions). Of the 289 inhabited villages of the district which do not have any medical facility available for their population, for 179 the amenity is available within a radius of 5 kms, for 68 villages within the range of 5—10 kms and the inhabitants of remaining 42 have to cover a distance of more than 10 kms to avail of the medical facility. The percentage of villages enjoying medical facilities is highest (50·36%) among the villages situated within a radius of 5 kms of an urban centre whereas it is the lowest (34·82%) in a distance range of 16—50 kms. For villages lying in the distance range of 6—15 kms, 45·35 per cent possess medical facilities. Thus, it can be inferred that lesser the distance, the more is the availability of medical facility for the population of the component villages. Apparently the villages in the neighbourhood of urban centres tend to have more medical facilities.

(iii) Drinking Water Facility :

All the 520 inhabited villages of the district invariably enjoy the drinking water facility. The main source of drinking water is handpump supplemented by well/tubewell.

(iv) Post and Telegraph Facilities :

Out of total 520 inhabited villages 252 (48·46%) have the facility of post and telegraph. Sub-division-wise 59·21 per cent in Rampura Phul, 53·84 per cent in Bathinda, 41·18 per cent in Talwandi Sabo and 45·04 per cent in Mansa are enjoying the facility of post and telegraph. Proportion of population to whom post and telegraph facilities are available in the district is 66·41 per cent, the proportion being highest in Rampura Phul sub-division i.e., 79·44 per cent followed by Bathinda, 69·88 per cent, Mansa, 63.08 per cent and Talwandi Sabo 54·18 per cent. Of the 268 villages in which the post and telegraph facility is not available, the people of 218 villages have to commute a distance less than 5 kms, population of 42 villages between 5—10 kms and 8 villages more than 10 kms. Again out of the 252 villages which are availing the benefit of post and telegraph facilities, maximum number (142) of these villages i.e. 52.79 per cent have an urban centre at a distance of 6—15 kms., 61 (43·88%) at a radius of 5 kms. and 49 (43·75%) within a distance range of 16—50 kms. Further 136 or 83·95% of the villages falling in the population range 2,000—4,999 have the amenity of P. & T. and all the 20 villages exceeding the population range of 5,000 persons are availing the facility of P. & T. Out of 25 villages with population less than 500, only two villages are enjoying the facility of P. & T. of the 313 villages

falling in the population range of (500—1,999) 94 villages (30·03%) have been recorded to avail the P & T facility.

The conclusion is that 33·59 per cent of the total population residing in 51·54 per cent of the villages which do not have any P. & T. facility, majority of them have to travel a distance between 0—5 kms., population of 42 such villages have to travel a distance of 5—10 kms and people of 8 villages have to travel even more than 10 kms.

(v) Communications :

The rural population of 392 (75·38%) villages constituting 83·51 per cent population is served by public transport system. 128 villages do not have any facility of communication within the territorial jurisdiction of the village or a little far away from the actual settlement. Of these 128 villages, 108 can avail of the facility after commuting a distance within 5 kms. radius, 17 between 5—10 kms and 3 more than 10 kms. According to population range of villages, 40·00 per cent of the villages falling in population range of less than 500, 70·29 per cent comprising population range of 500—1,999, 87·65 per cent falling in the population range 2,000—4,999 and all the 20 villages of population range 5,000 and above have the communication facility. The above analysis shows that the existence of the communication facility is directly proportional to the size of the villages as far as Bathinda district is concerned.

(vi) Approach by Pucca Road :

Of all the inhabited villages, 91 per cent covering a population of 93 per cent have been recorded to be connected by a pucca road and are, therefore, accessible both in fair and foul weather. Sub-division-wise Bathinda (99·15%), Rampura Phul (94·74%), Talwandi Sabo (98·82%) and Mansa (82·64%) have villages which are connected by a pucca road. In Mansa sub-division 42 villages covering a population of 14·89 per cent of the total rural population of the sub-division still lack the facility of a pucca road. The percentage of villages connected by pucca road which have an urban centre within a radius of 5 kms comes to 98 per cent and those within a distance range of 6—15 kms., 88·48 per cent and those within a distance range 16—50 kms. 87·50 per cent. This shows that proportion of villages having pucca road bears inverse correlation with its distance range from the nearest town, i.e.higher the distance from nearest urban centre, lower the proportion of villages connected by pucca road. The proportion of villages connected by pucca road comprising population range 5,000+ is 100 per cent. This proportion is 95.06 per cent for villages with a population range 2,000—4,999, 88·82 per cent for population range 500—1,999 and 80 per cent for population range less than 500. This shows that in the smaller villages still largar proportion of villages remains to be connected by pucca road in comparison to larger villages.

(vii) Power Supply:

All the villages of the district have invariably got the facility of power supply. The state has since been hundred per cent electrified.

TABLE 10

Distribution of Villages According to the Availability of Different Amenities

Serial No.	Name of tahsil	No. of inhabited villages	No. (with percentage) of villages having one or more of the following amenities							
			Education	Medical	Drinking water	Post and telegraph	Market/ Hat	Communi-cation	Approach by pucca road	Power supply

Staple Food :

Wheat, maize and bajra constitute the staple food of the people of the district. Rice is consumed largely on special occasions as the Punjabis are not habitual rice eaters.

Gram is also consumed as it is the local produce of the district besides the above mentioned foodgrains.

TABLE 15

Distribution of villages according to landuse

Serial No.	Name of Tahsil	No. of inhabited villages	Total area (hectares)	Percentage cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Rampura Phul	76	87,507	91·37	71·90
2	Bathinda	117	138,571	91·09	67·52
3	Talwandi Sabo	85	89,478	93·24	67·64
4	Mansa	242	213,513	90·62	66·32
	Total District	**520**	**529,069**	**91·30**	**67·79**

Land Use Pattern in the District :

The land use pattern is depicted in table No. 15. The table reveals that 91.30 per cent of the total area of the district is under cultivation. Sub-divisionwise Talwandi Sabo has the highest percentage of cultivated area i.e., 93.24 per cent followed by Rampura Phul 91.37 per cent, Bathinda 91.09 per cent and Mansa 90.62 per cent. The proportion of irrigated area to the total cultivated area in the district is 67.79 per cent. Sub-division-wise, Rampura Phul has the highest percentage of irrigated area i.e., 71.90 per cent and Mansa the lowest i.e. 66.32 per cent. Bathinda and Talwandi Sabo have 67.52 per cent and 67.64 per cent irrigated area respectively. The state canals and tubewells are the main sources of irrigation in the district.

Miscellaneous : Cropping Pattern, Staple Food and Markets :

Apart from harvesting wheat, maize, bajra, gram and jowar, which constitute the staple food of the people in the whole of the district there are vast areas under cotton and groundnut. There are mandis at about 20 kms distance from each other which serve as the nucleus for purchases and sales by the local inhabitants. Their expansion is a testimony to the fruits of the green revolution being enjoyed by the farmers.

TOWN DIRECTORY

Urban Population :

Tables 16 to 19 appended to the note deal with this section.

Table 16 shows growth rate, density and sex ratio of urban population in the district in relation to the state for 1981 census and the preceding three censuses 1971, 1961 and 1951. The 1981 census reveals that 22.68 per cent of the population of the district lives in its urban areas as compared to 27.68 per cent of the state as a whole. The urban component of the population in the district increased by 4.90 per cent from 17.78 per cent in 1971 to 22.68 per cent in 1981. The urban component of population in 1961 had increased by 2.56 per cent from 1951. The corresponding figures of urban population for the district and the state at 1971, 1961 and 1951 are 17.78 per cent for the district as against 23.73 per cent for the state, 17.81 per cent for the district as against 23.05 per cent for the state and 15.25 per cent as against 21.72 per cent for the state respectively.

Growth Rate:

The district shows a tremendous decadal growth of 62.33 per cent in the urban areas for 1981 as compared to 44.51 per cent for the state. During the previous decade 1961—71, the district had recorded urban growth rate of 23.53 per cent as against 25.27 per cent for the state and during the decade 1951—61, the district recorded a growth rate of 56.17 per cent as compared to 29.06 per cent for the state. The reason for the significant growth rate during 1951—61 is primarily due to coming into existence of some new towns, namely Bareta, Bhucho Mandi, Goniana, Kot Fatta, Maur, Raman and Sangat, their economic development attributed to influx of refugees and their settlement. Their growth during 1951—61 is at an alarnning rate as compared to the decade 1961—71 when the growth of the towns was stagnant. During 1971—81 tremendous growth rate of 62.33 is mainly attributed to fast economic development of Bathinda town whose population approximately doubled, in absolute number. The increase to be recorded was 62,045 persons, i.e., from the total population of 65,318 in 1971 to 127,363 at 1981.

Density:

The district has recorded at 1981 Census an urban density of 2,110 persons per sq. km. as against 3,835 for the state. The corresponding urban densities for the district during 1971, 1961 were 3,421 and 3,151 as against 4,650 and 4,090 for the state. The density of the district has shown a decline of 1,311 persons per sq. km in 1981 compared to 1971 although there was an increase in density by 270 persons per sq. km. during the previous decade 1961— 71. This decline in the urban density is mainly due to substantial increase in urban area of the district.

Sex Ratio :

The urban population of district has recorded a sex ratio of 855 in 1981, 862 in 1971, 827 in 1961 and 823 at 1951 as compared to 865, 856, 817 and 807 at the corresponding census years for the state. There is a consistent increase in the sex ratio during 1951, 1961 and 1971 but a decline of 7 females for 1,000 males at 1981. This is mainly due to influx of more male workers to the towns of the district particularly Bathinda city.

New Towns :

This relates to information of new town (s) and declassified town (s) during the decade. In Bathinda district, no town from those existing at 1971 has been declassified. New town of Talwandi Sabo was added to the district during the decade for 1981 census. The NAC was abolished by a notification by the State Government in early October, 1980. However, for 1981 census the list of 134 towns was adhered to since it was necessary to freeze the urban frame as already finalised for the purpose of 1981 census. Consequently the urban status of Talwandi Sabo as NAC has been retained.

Budget of the Towns:

Table 17 relates to it. Bathinda district has 12 towns; one with Class I status, Bathinda city, two Class III towns, Mansa and Rampura Phul, 4 Class IV towns, Budhlada, Maur, Raman and Talwandi Sabo, three Class V towns, Bareta, Bhucho Mandi, Goniana and two Class VI towns, i.e., Kot Fatta and Sangat.

In respect of four towns, viz. Bathinda, Goniana, Raman and Rampura Phul, *per capita* receipt is lower than *per capita* expenditure and in case of remaining seven towns the receipt exceeds *per capita* expenditure. For Talwandi Sabo NAC the data are not available. The highest *per capita* receipt of Rs. 149.32 is recorded for Bhucho Mandi and the lowest Rs. 6.63 for Kot Fatta M.C. For Bathinda city *per capita* receipt is Rs. 71.55. The receipt through taxes forms the major source of revenue in most of the towns of the district. Government grants, loans, advances etc. are the other supplementary sources of revenue of municipalities. On expenditure side, the highest *per capita* expenditure (Rs. 137.28) has been recorded in respect of Bhucho Mandi and the lowest Rs. 5.22 for Kot Fatta M.C. In respect of Bathinda city *per capita* expenditure of Rs 73.15 has been recorded as against *per capita* receipt of Rs. 71.55. The main heads of expenditure are general administration, public health and conveniences, public institutions, etc.

Social Amenities-Educational:

Table 18 depicts higher secondary, secondary, matriculation, junior secondary/middle and primary schools per 10,000 population. The table reveals that only Bathinda and Mansa have got higher secondary

or an equivalent school (s). Mansa has highest number of higher secondary schools (0.46) per 10,000 population and Bathinda comes next with 0.31 schools per 10,000 population. The number of higher secondary schools per 10,000 population in the district is 0.20. Secondary/matriculation schools are located in all the towns of the district. Bathinda city which has the highest number (6) of secondary/matriculation schools, accounts for only 0.47 of secondary/matriculation schools per ten thousand population. Thus Bathinda city still comparatively lacks the educational facilities in terms of secondary/matriculation and higher secondary levels, Junior secondary or middle schools are also existing in all the towns of the district, The highest number of primary schools (10.49) per 10,000 population are located in Sangat town. For Bathinda district as a whole the number of primary schools for its urban population is 2.50 per 10,000 persons. Higher Secondary school facilities for Bathinda city have not grown compared to with the growth of the town during the last decade. The number of high/higher secondary schools in Bathinda city has dropped from 1.2 per 10,000 population in 1971 to 0.78 per 10,000 population in 1981. However, at primary level, the position has improved from 0.90 per 10,000 in 1971 to 1.81 per 10,000 population in 1981.

Medical Facilities:

Table 19 gives the distribution of total number of beds per 1,000 population in medical institutions, available in each town of the district. The number of beds per 1,000 population has been taken as the criterion for determining the extent of medical facilities. The table reveals that there are in all 2.01 or 2 beds per 1,000 urban population of the district. Bareta has the highest number of beds 2.63 and Bhucho Mandi, the least 0.51 per 1,000 of population. Bathinda city has 2.18 beds for 1,000 of its population.

Slum Population in Towns:

In Punjab State, no slum area has been notified, although certain pockets have separately been identified.

TABLE 16

Growth, Density and Sex ratio of urban population in the District in relation to the State

PART XIII—A

VILLAGE AND TOWN DIRECTORY

SECTION I—VILLAGE DIRECTORY

NOTE EXPLAINING THE CODES USED IN THE VILLAGE DIRECTORY

The village directory containing information about each village has been prepared for each tahsil in the ascending order of the census location code numbers, e.g., location code No. 17/11/3/22 means village No. 22 in tahsil No. 3 of district No. 11 of the State No. 17. It contains information relating to total area of the village in hectares, total population, No. of households, amenities available in the village, i.e., educational, medical, drinking water, posts and telegraphs, communication, approach to village, and power supply. Besides it gives information regarding staple food, land-use, i.e., area under different types of land-use like forest, irrigated and unirrigated, cultivable and uncultivable land. This is further supplemented by the information on places of religious, historical and archaeological interest as also information on copies of newspaper coming in the village and number of motorcycles/scooters, cars/jeeps and tractors available in the village.

Information about the amenities available have been given in columns 5 to 10 of the directory.

(i) Educational facilities have been shown by adopting the following abbreviations:

P	..	Primary school
M	..	Junior secondary or middle school
H	..	Matriculation or secondary school
PUC	..	Higher Secondary/intermediate/pre-university/junior college
C	..	College (graduate level and above) like Arts, Science, Commerce, etc.
I	..	Industrial school
Tr.	..	Training school
Ac	..	Adult literacy class/centre
O	..	Other educational institutions. These may include Sanskrit Pathshala, Senior basic school, Maktab, etc.

Where figures like P(3), M (2), H (1), etc. occur these denote that the village has three primary, two middle and one matriculation or secondary school.

(ii) Medical facilities have been shown by the use of the following abbreviations :

H	..	Hospital
MCW	..	Maternity and child welfare centre
MH	..	Maternity home
CWC	..	Child welfare centre
HC	..	Health centre
PHC	..	Primary health centre
PHS	..	Primary health sub-centre
D	..	Dispensary
FPC	..	Family planning centre
TB	..	TB clinic
NH	..	Nursing home
RP	..	Registered private practitioner
SMP	..	Subsidised medical practitioner
CHW	..	Community health worker
O	..	Others

Number of institutions, if more than one in any village, have been given in brackets against each.

(iii) The types of the potable drinking water supply and the sources available in the village have been indicated by the following codes:

T	..	Tap water
W	..	Well water
TK	..	Tank water
TW	..	Tubewell water
HP	..	Hand pump
R	..	River water
F	..	Fountain
C	..	Canal
L	..	Lake
S	..	Spring
N	..	Nullah
O	..	Others
NA	..	Information not available.

(iv) Post & telegraph facilities have been shown by adopting the following abbreviations:

PO	..	Post Office
TO	..	Telegraph office
PTO	..	Post and Telegraph office
Phone	..	Telephone connection

(v) Communication facilities have been indicated by the following codes:

BS	..	Bus stop
RS	..	Railway station
NW	..	Navigable waterway (including river, canal, backwaters, etc.)

Only public transport like bus, rail and waterway have been considered for this purpose.

(vi) **Approach to village.**—This refers to the state of road, etc. leading to the village. This has been indicated by the use of following codes:

PR	..	Pucca road
KR	..	Kaccha road
NR	..	Navigable river
NC	..	Navigable canal
NW	..	Navigable waterway (other than river or canal).

(vii) **Nearest town and distance:**

The distance in kms. of the nearest town (whether located in the state or in another state) has been given in brackets under column 12.

(viii) **Power supply:**

For this purpose, the following codes have been used under column 13:

ED	..	Electricity for domestic purpose
EAg	..	Electricity for agriculture
EO	..	Electricity for other purpose like industrial, commercial, etc.
EA	..	Electricity for all purposes listed above.

Information relating to places of religion, historical or archaeological interest is given under column 20(a). Information on copies of newspaper coming in the village (N), motor cycles/scooters available in the village (M), cars/jeeps available in the village (C), and for tractors available in the village (T) is also furnished under column 20. The numeral following the alphabet indicates the number of newspapers, motor cycles etc. Uninhabited villages and the villages that have got merged in towns have been shown under column 20(a).

(ix) **Land use:**

Break-up of area under different types of land use viz., forest, irrigated area, unirrigated area, culturable waste and areas not available for cultivation has been furnished under columns 15—19.

(a) **Forest:**

This includes all lands classed as forests under any legal enactment dealing with forests or administered as forests, whether state-owned or private, and whether wooded or maintained as potential forest land. The area of crops raised in the forest and grazing lands or areas open for grazing within the forest has been included under the forest area. If any portion of such land is not actually wooded but put to some agricultural use, that portion is included under the appropriate heading of cultivated or uncultivated land. In some cases there are instances where patches of land put to agricultural use within statutorily notified forests are considered as forest by the revenue agency. These are treated as forests.

(b) Irrigated and unirrigated (land use):

These two columns (Cols. 16 and 17) cover all agricultural land and include net area sown with crops and orchards or net cropped area and also current and other fallows. The latter implied all lands which were taken up for cultivaton, but are temporarily out of cultivation for a period of not less than a year and more than five years. The columns do not include gross area sown or gross cropped area. Net area sown thus represents the area sown with crops and orchards, counting areas sown more fthan once in the same year only once.

(c) Culturable waste :

This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once, but not cultivated during the five years or more in succession. Such lands are either allow or covered with shrubs and jungles which are not put to any use. Those have been assessed or unassessed and are in isolated blocks or within cultivated holdings. Lands under thatching grasses, bamboo bushes and other groves for fuel, etc. which are not included under orchards or forests also come under this head. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area have been included in this column.

d) Area not available for cultivation:

This column (Col. 19) includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use.

Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water, e.g., rivers and canals and other lands put to uses other than agricultural.

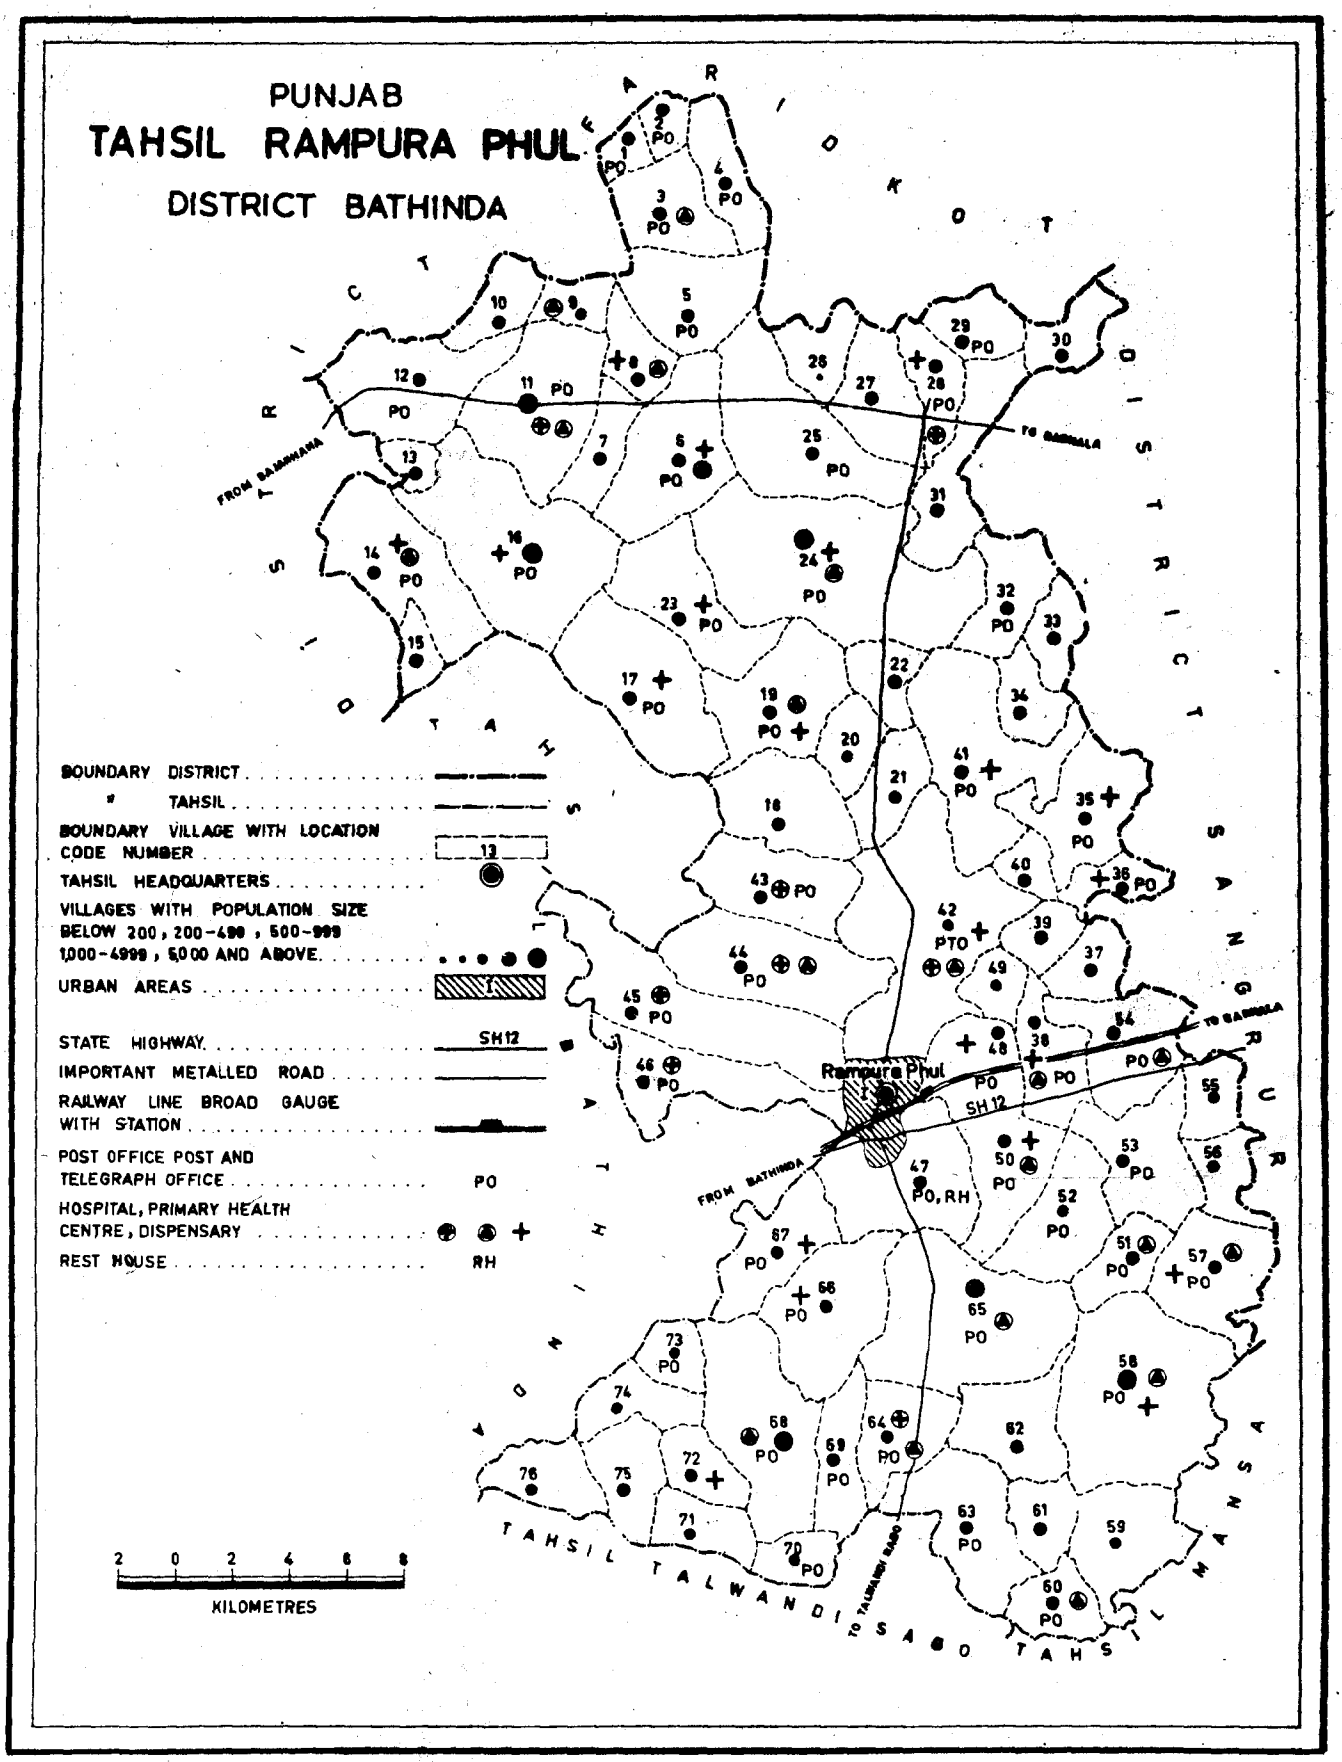

Barren and unculturable lands cover all berren and unculturable lands, like mountains, deserts etc. Land which cannot be brought under cultivation, except at a very high cost, has been classified as unculturable, whether such land is in isolated blocks or within cultivated holdings.

Remarks regarding places of importance are given in column 20(a). Information on such aspects as the number of copies of newspapers, coming in the village and motor cycle/scooters, cars/jeeps and tractors available in the village was collected. The number of items available in the village is added against the codes given below:

N	..	Copies of the news paper coming in the village
M	..	Motor cycles/scooters available in the village
C	..	Cars/jeeps available in the village
T	..	Tractors available in the village.

20(a) The column is intended to record particulars of any historical places of importance to religious one.

*excludes villages with Nil S. C. population.

TOWN DIRECTORY

NOTE EXPLAINING THE CODES USED IN THE TOWN DIRECTORY

The town directory has been compiled in six different statements for all the urban areas of the district. The data on amenities and other aspects have been presented in codes which are explained below.

Statement I :

Gives status and growth history of each town of the district.

Class has been introduced in all the statements of town directory to facilitate analysis for purposes of demographic and socio-economic characteristics of towns at the state and all India levels. It has been presented according to 1981 census population of the core town in the following manner :

Population	Class
100,000 and above	.. I
50,000—99,999	.. II
20,000—49,999	.. III
10,000—19,999	.. IV
5,000—9,999	.. V
Below 5,000	.. VI

The civic administration status as in 1980 has been indicated by the following abbreviations. Census towns are regarded as having no civic status. Code (C. T.) has been used for census town.

Municipal Corporation	=	M. Corp.
Municipal Committee	=	M. C.
Cantonment Board	=	C. B.
Notified Area Committee	=	N. A. C.
Census Town (S.A.S. Nagar Mohali and Talwara)	=	C. T.

Statement II:

Statement II gives for each town, physical aspects and location of towns.

Statement III :

This statement gives municipal finance for each town of the district.

Statement IV :

It gives civics and other amenities. The abbreviations used are indicated below :

(I) Road Length

PR=Pucca Road

KR=Kuccha road

(II) System of sewerage

S=Sewer

OSD=Open surface drains

BSD	=	Box surface drains
SD	=	Sylk drains
CD	=	Cesspool method
Pt	=	Pit system

(III) Method of disposal of night soil

HL	=	Head loads
B	=	Baskets
WB	=	Wheel barrows
ST	=	Septic tank latrines
S	=	Sewerage

(IV) Protected water supply—Source and capacity of storage systems

(a) Sources of water supply :

TW	=	Tubewell water/hand pump
T	=	Tap water
W	=	Well water
TK	=	Tank water

(b) System of storage of water :

OHT	=	Overhead tank
SR	=	Service reservoir
IG	=	River infiltration gallery
BWP	=	Borewell pumping system
PT	=	Pressure tank

Statement V :

This gives medical, educational, recreational and cultural facilities. The abbreviations used are indicated below :

Medical amenities :

H	=	Hospital
D	=	Dispensary
HC	=	Health Centre
FC	=	Family Planning centre
TB	=	TB clinic
NH	=	Nursing Home
O	=	Others
A	=	Ayurvedic
U	=	Unani
Hom	=	Homoeopathic

In case of allopathic, no separate code has been given. The information in column 4 on medical facilities has been presented horizontally in the same line as illustrated below :

H(A—1, 2), D(Hom—2, I, U—1)

Here H(A—1, 2) represents one ayurvedic and 2 allopathic hospitals and D(Hom—2, 1, U—1) represents 2 homoeopathic, one allopathic and one unani dispensaries. If the medical facility is not available in

a town, name of the nearest place (if in the same district) or nearest district (if in the same state) or other state and its distance from the town where the facility is avialable has been mentioned in colum 4.

Educational amenities :

The codes that have been used are as follows :

A	=	Arts only
S	=	Science only
AS	=	Arts and Science only
C	=	Commerce only
AC	=	Arts and Commerce only
ASC	=	Combined for all categories—Arts, Science and Commerce.
L	=	Law
SH	=	Shorthand
Type	=	Typewriting
Sh. Type	=	Shorthand and Typewriting
O	=	Others

If there are more institutions of a type in the town, their number has been given against each in brackets.

If any educational facility is not avilable in the town the name of nearest place (if in the same district) or the name of nearest district (if in the same state) or other state and its distance from the town where this facility is available, has been given in brackets.

Recreational and cultural facilities :

The following codes have been used :

PL	=	Public Library
RR	=	Readig Room

Statement VI :

Gives information on trade, commerce, industry and banking for each town of the district.

Appendix to the town directory shows towns of the district which have outgrowths and population of outgrowths

PART B

Primary Census Abstract (General)

Primary Census Abstract (Scheduled Castes)

PART B

PRIMARY CENSUS ABSTRACT (GENERAL)
Primary Census Abstract (Scheduled Castes)

Explanatory note on Primary Census Abstract :

The primary Census Abstract (PCA) General and Scheduled Castes provides the basic information relating to population data pertaining to 1981 census. It contains the data in respect of area, number of occupied residential houses and households, total population (including institutional and houseless population), population break up by sex, scheduled castes, literates, main workers classified into four categories of cultivators, agricultural labourers and other workers, marginal workers and non-workers for each village and for each town/wardwise.

The district totals given at the beginning of the PCA are followed by break up of rural and urban areas of the district. The data are presented tahsilwise.

The rural PCA presents the data for the villages arranged in ascending order of location code numbers (assigned to the villages within the tahsil). The urban PCA presents ward-wise data for each town. In rural PCA, the uninhabited villages and the villages which have got merged in towns have also been indicated. It may be mentioned here that the PCA data provided here has been compiled on the basis of the basic schedules i.e., household schedule and the universal individual slip convassed during 1981 census operations. The concepts and terms occurring in the PCA are briefly explained here.

Census House :

A census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc., used or recognised as a separate unit. It may be occupied or vacant' It may be used for a residential or non-residential purpose or both.

Occupied Residential House :

Occupied residential house is a dwelling house and includes a house used partly as a dwelling and partly for some other purpose like shop, workshop, factory, etc., but does not include a 'vacant house' where no person was found to be residing at the time of census.

Household :

A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix or both. Examples of unrelated households are boarding houses, messes, hostels, residential hotels, rescue homes, jails, **ashrams**, etc. These are called 'institutional households'. There may be one member household, two member household or multimember household. For census purposes, each one of these types is regarded as a 'household'.

Another type of household for census purpose is houseless household which is a household comprising of 'houseless person/persons'. A houseless person in census terminology has been defined as :

(i) a person who might be doing domestic service or other work with one or more households but who does not reside in any house and sleeps in the corridors, varandahs or passages in buildings or in the streets,

(ii) wandering or nomadic trives found to be staying in temporary huts etc., and

(iii) beggar, vagrant, tramp, sadhu, fakir, etc. who is found on the footpaths, streets in places like parks, gardens, railway yards, etc.

Scheduled Castes are such castes, races or tribes or parts of groups within such castes, races or tribes as are declared to be scheduled castes by the President of India's Orders issued under Article 314 of the Constitution of India.

Literate :

A person who can both read and write with understanding in any language has been taken as literate. A person who can merely read but cannot write, has not been considered as literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

All children of the age of 4 years or less have been treated as illiterate even if the child has been going to a school and might have picked up reading and writing a few odd words.

Workers and Categories of Workers :

Work may be defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work.

In the economic questions, canvassed in 1981 census, there has been some difference. The 'work' concept in 1961 and 1971 censuses, as opposed to the 'income' or 'economic independence' concept of the earlier census was adopted for 1981 census, but the criterion for classification of persons as workers was changed. While in 1961 and 1971 censuses different approaches, namely, usual status and current status, were adopted with reference period of one year and one week for seasonal and for regular work respectively, at the 1981 census the usual status approach was adopted uniformly for all work.

In 1961, a person qualified as a worker if he had worked regularly during the last season or if he had worked at least for a day in regular (non-seasonal) work during the preceding fortnight. At the 1971 census a person was treated as a worker only if he spent his time mainly in work or if he worked at least for a day in regular (non-seasonal) work during the preceding week. The dichotomy of worker/non-worker of 1961 and 1971 censuses was discarded at the 1981 census and instead a trichotomy of main workers, marginal workers and non-workers was adopted. For main workers the time criterion of engagement in work for the major part of the year, i.e., at least 183 days was adopted. Those who worked for some time during the last year but not for the major part were treated as marginal workers. Those who had never worked during the last year were non-workers. This trichotomy partially permits a comparability of 1981 census economic data with that of 1971 as well as 1961. The main workers of 1981 census can be expected to correspond to the workers of 1971 and the main workers and marginal workers of 1981 together to correspond to the workers of 1961.

Classification of Main Activity :

The main activity of workers has been classified into four categories, viz., cultivator, agricultural labourer, household industry and other worker These terms are explained below :

Cultivator :

For purposes of the census, a person has been considered working as cultivator if he or she has been engaged either as employer, single worker or family workers in cultivation of land owned or held from Govt., private persons or institutions or payment in money, kind or share. Cultivation included supervision or direction of cultivation. It has been indicated by abbreviation 'C'.

Agricultural Labourer :

A person who worked in another person's land for wages in money, kind or share has been regarded as an agricultural labourer. He/She had no risk in the cultivation but he/she merely worked in another persons' land for wages. An agricultural labourer had no right of lease or contract on land on which he/she worked. It has been indicated by abbreviation 'AL'.

Household Industry :

Household industry has been defined as an industry conducted by the head of the household himself/ herself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lived in urban areas. The larger proportion of workers in a household industry constituted of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act.

For a person who has returned his/her main activity as engaged in some production, processing servicing or repair of articles or goods such as handloom weaving , dyeing, carpentry, *bidi* rolling, pottery manufacture, bicycle repairing , blacksmithy, tailoring, etc., it has been ascertained if it is a household industry and if so, it has been indicated by the abbreviation 'HHI' in the space provided for.

Other Workers :

All workers, i.e., those who have been engaged in some economic activity during the last one year, have not been categorised as cultivators or agricultural labourers or in household industry, are 'other workers' 'OW'. The type of wokrers that came under the category of 'OW' included factory workers, plantation workers, those in trade, commerce, business, transport, mining, construction, political or social work, all government servants, municipal employees, teachers, priests, entertainment artists, etc.
