FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and ward-wise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The District Census Handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, Census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some States it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the villages have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled castes and scheduled tribes population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Progrmame by providing information on a few new items. A new statement on civic and other amenities in slums in Class I and Class II towns (statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series, it has been so designed that part-A of the volume contains village and town directory and Part-B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH, a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The district and Tahsil/Police Station/CD Block etc. level maps, depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri D.N. Dhir, I.A.S., the Director of Census Operations, Punjab on behalf of the State Government which has borne the cost of printing. The task of planning, designing and coordination of this publication was carried out by Shri N.G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M.M.Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA,

Registrar General, India.

New Delhi,

The 26th April, 1982.

PREFACE

As being regularly presented hithertofore, since 1951 census, we have now the privilege of presenting the District Census Handbooks consequent upon 1981 census.

To shorten the time lag to minimum after the compilation of census 1981 data and issuance of this Handbook as a sort of self-contained reference book, predominantly based on census data for the district, action was initiated upon the project as early as in July, 1979. The Registrar General, India indicated the revised formats and statements designed for this series of books. The improvements were with a view to making the data more useful for administrators, planners, scholars and other categories of users.

There are 134 towns categorised as urban area and 12,899 villages (45 tahsils) as the rural component in the state. The formidable task of collecting and compiling of this voluminous data for such a large number of units had its own problems and difficulties, both in the matter of chase up and in obtaining correct data which could be test-checked in terms of consistency with what was obtained and published consequent upon 1971 census data. Several gruelling cross checks had to be adopted to tally such items as area figures and the land use pattern for each unit.

The statements and schedules for collecting information from the rural areas were translated into Punjabi and also test-checked to assess their acceptability and responsiveness by those who were to make their use. (I had also unsuccessfully toyed with the idea of collecting information on some other items that could indicate comparative affluence of rural Punjab but had to give it up in the light of keeping uniformity in presentation of data on all India pattern).

The statements/schedules for town directory were transmitted to the Chief Executives of the local bodies and those for rural areas were transmitted to the SDOs (C) (since all tahsils in Punjab have been converted into subdivision) for necessary supply of data by the revenue staff under them. The officers and senior staff of the directorate that had been made directly responsible for houselisting operations and had reported to the field in October, 1979 were also charged with getting these through on personal contacts. This resulted in our getting the feed back by May 1980, on the conclusion of house listing operations, though some small instalments of these schedules continued till September/October, 1980.

A cell had been created at the directorate to scrutinise the data as received and make preliminary compilation. The data obtained from the field were supplemented with the data collected from the various heads of the departments at the State level, particularly in matters of amenities and facilities in the fields of education, medical, communications and the like. The staff working in the cell was once again out in the field for assisting in the second field operation, namely enumeration and it was only on its conclusion that the work of compilation started in May-June, 1981. The three Deputy Directors (at the regional tabulation offices) were in position about the same time in the field and the gaps in data, needing reconciliation in figures were got through these field officers on personal contacts with the concerned quarters.

On the compilation of the Primary Census Abstract (PCA) in March, 1982 when the figures were available for projection in this volume, the whole exercise was consolidated to give birth to the instant manuscript.

The data in the book is being presented in two parts—Part A comprises Village and Town Directory and Part B Primary Census Abstract villagewise and town/wardwise separately. In addition, Primary Census Abstract for scheduled castes upto tahsil/town level is also presented. (There are no scheduled tribes in the State).

An analytical note based on a number of inset tables compiled out of the data from village and town directory and PCA has also been added for the benefit of the users, but the greater aim has been to present the data as compiled and leave further deeper study to those for whom the publication is meant.

We are grateful to the large number of personnel of the State Revenue Department at the village, tahsil, subdivision and district levels and the municipal staff in all the local bodies in the State for their co-operation in filling up the statements/schedules for providing the data.

The production of this book (and for that matter all the 12 District Census Handbooks) has been the handiwork of consistent and constant efforts put in jointly by almost all the staff of the directorate, though only at one point of time or the other in certain cases. The collection of data for Village and Town Directory, as mentioned earlier, was a major work in the pre- census period and after the census, most of the staff was busy in tabulation and compilation of the census data both at the regional tabulation offices and at the directorate. The DCHB Cell (specially created) thereafter commenced work on inset tables, while the senior staff and the officers took to developing the fly-leaves and explanatory notes. Simultaneously the map section was deep in work for producing the maps that had to accompany these books.

I would resist the temptation of mentioning any single incumbent at any level of the hierarchy individually for apparent reasons, and would rest content with acknowledging my debt to all of them as appended hereto.

I had acted only as a co-ordinator and at times as an editor and was very ably supported by a set of dedicated officers who spared no pains to push in the manuscripts to the press in a record time, unknown in the annals of this directorate so far.

As in the case of other aspects of census work connected with this gigantic decadal exercise, I always looked up to Shri P. Padmanabha, Registrar General & Census Commissioner, India, for guidance, inspiration and an encouragement and I feel indebted to him. Shri N.G. Nag, Deputy Registrar General (Social Studies) was forthcoming in his unassuming and profound style for advice.

D.N. DHIR,

Director Census, Punjab.

Chandigarh,
September, 1982,

ACKNOWLEDGEMENTS

Preliminary work—collection, compilation and scrutiny of data relating to Village and Town Directory:

A cell was created in July, 1979 under J.C. Kalra, Deputy Director, who out of his earlier experience and the instructions as received from Registrar General, India, directed the collection of data and allied work. He was ably assisted by D.P. Jain, Charan Singh and Vishwa Mittar, Investigators on one occasion or the other. The Statistical Assistants, who laid down the work at the foundation level at that time consisted of Malkiat Singh, Munishwar Dutt, Joginder Singh and Pawan Kumar with cooperative efforts of number of Computors, namely Mohinder Pal, R.P. Pathak, Parkash Chand, Varinder Singh, Hardeep Kaur, Satya Arora, Harbeer Kaur and Asha Vasisht.

Primary Census Abstract included in this book—manual preparation at the Regional Tabulation Offices at Jalandhar, Patiala and Bathinda:

R.P. Tomar, R.K. Singh and S.P. Grover, Deputy Directors, were incharge of these tabulation offices respectively, and put in their best to conclude the work fairly ahead of the scheduled target. They were assisted by the Investigators, namely, N.S. Bhadauria, Charan Singh and Ajit Singh Dhillon, respectively. The Statistical Assistants and Computors who worked in these RTOs were S.C. Bassi, Balbir Singh, Jai Dev and R.P. Singh at Jalandhar Tarsem Lal Garg, S.K. Joshi, S.P. Goel and Varinder Singh at Patiala and Balwant Rai (now Investigator) Bhagirath Singh, Raghbir Singh, J.S. Nagi and H.P. Sharma at Bathinda.

Preparation of Inset Tables, framework of Handbooks and their drafting:

Inset tables, appendices and allied tables were prepared in the specially created cell of 'District Census Handbooks, headed by S.P. Grover, earlier and later by Ajit Singh, Deputy Directors. They have had experience of such publications earlier and imparted suitable directions to the staff in the cell for presentation of the data and its analysis as per the instructions received from the Office of Registrar General, India, from time to time. Charan Singh, Investigator, Balwant Rai (now Investigator), Raghbir Singh, Tarsem Lal, Statistical Assistants and Satya Arora, Santosh Kumari, Harbeer Kaur and H.P. Sharma, Computors worked in this cell.

The cell provided the frame work of the handbooks and the first drafts were attempted by Deputy/ Assistant Directors who were entrusted with particular volume (s). This first draft was then finalised during discussions in officers' meetings held almost daily with the Directors. Thus the final draft emerged.

Maps:

The work for preparation of maps to be included in District Census Handbooks commenced under the supervison of Madhav Shyam, the then Senior Geographer, but mid-way was taken over by G.S. Gill, Assistant Director who headed the map section during the vital period. He was ably assisted by Jiwan Singh Gill, Artist (now Senior Artist), Usha Kalra, Artist and Kulbir Singh, Draftsman. Because of his knowledge of geography and map work, he delivered the goods despite the absence of Geographer and Senior Geographer in the directorate.

Manuscript finalisation:

The final draft(s) as emerging out of the deliberations of the officers were entrusted to a cell called as 'Press Manuscript Cell" headed by M.L. Sharma, Assistant Director who was actively assisted by Balwant Rai Investigator and Azad Kumar Statistical Assistant. They raced against time frequently to give final shape to the volume (s) for onward transmission to the press.

Typing:

K.C. Pardesi, Confidential Assistant (formerly Senior Stenographer) headed this cell. His knowledge of such publications earlier was an asset. He was assisted by Ajmer Singh, Stenographer and some of the other typists from the various seats in the directorate.

Printing:

This cell was headed by M.L. Sharma, Assistant Director and actively assisted by H. S. Sudan and S. P. Goel. They drew upon the services of others in the directorate, wherever necessary.

To each one of them I acknowledge my thanks.

Shri M.S. Mahadeokar, Assistant Controller of the U.T. printing press co-operated in ensuring that the publication gets light of the day at the earliest.

Chandigarh :

September, 1982.

D.N. DHIR,

Director Census, Punjab.

AMRITSAR DISTRICT—A SHORT PROFILE

Location:

Amritsar is one of the border districts situated on the Indo-Pakistan border in the north-west of Punjab State. It has an international boundary with Pakistan extending to 240 kms. It is surrounded by Gurdaspur district in the north-east, Kapurthala district in the east, Firozpur district in the south and Pakistan on the west. The river Beas separates it from Kapurthala district in the north-east and Satluj separates it from Firozpur in the south-east, after its confluence with Beas at Harike.

Origin:

The district derives its name from the district headquarters town of Amritsar, the best known as the home o golden temple, the most sacred shrine of the Sikhs. It is said that here in 1579 Guru Ramdas, the fourth of the Sikh Gurus, decided to build a temple on the land gifted to him by the Emperor Akbar. A sacred tank, the pond of nectar, was first excavated here and later in 1588, in its midst, a temple was raised by the fifth Guru Arjan Dev to house the Guru Granth Sahib, the sacred book of the Sikhs. Ever since, the Darbar Sahib or divine court of Amritsar has been Sikhism's holiest shrine and a pilgrimage centre from all over the world.

Area:

The district ranks 5th in area in the state. According to the Surveyor General, India, the district has an area of 5087.0 square kilometres, out of which 4929.3 sq. km. is rural and the remaining 157.7 sq. km. is urban. The rural area has been derived by subtracting urban area from the total area. The tahsilwise break-up of area of the district is as follows:

Sr. No.	Tahsil	Total Area	Rural	Urban
1	2	3	4	5
1	Ajnala	1083·7	1080·5	3·2
2	Amritsar	1028·3	906·1	122·2
3	Baba Bakala	537·1	535·6	1·5
4	Tarn Taran	1363·7	1339·5	24.2
5	Patti	1043·5	1036·9	6·6
	Total	5056·3	4898·6	157·7

It would be seen from the above table that tahsil totals, when added up, do not tally with the district area supplied by the Surveyor General, India. The difference is due to the fact that tahsilwise area figures for rural areas have been supplied by the Director of Land Records, Punjab, whereas the urban figures have been supplied by the urban local bodies.

Climate :

The district has climate of Punjab plains. From middle of March temperature begins to rise, touching or even crossing 116° F on somedays during May and June, accompanied by hot winds. The rainy season sets in July and continues till the end of September. During this period temperature falls considerably when it rains but shoots up again shortly thereafter and it becomes sultry and humid. Towards the middle of September or early October the weather turns to fine, and by the end of October mild cold sets in. November is pleasant and generally free from rains. Some rains are received in winter from mid-December to mid-February which is usually the period of severe cold, some times accompanied by frost. The following table gives monthly rainfall (average of 5 years 1976—80) for Amritsar district :—

Month	*Rainfall (Cms.)*
1. January	3·18
2. February	2·63
3. March	2·75
4. April	0·65
5. May	0·70
6. June	6·38
7. July	46·91
8. August	17·39
9. September	2·63
10. October	0·65
11. November	1·21
12. December	1·90
Total	86·98

Rivers and Drains :—

The three major rivers which touch the district are Beas, Ravi and Satluj.

Beas :

It takes its rise from Beas Kund in the north of Kulu valley near Rohtang pass and enters the plains at Mirthal, a small village in Pathankot tahsil of Gurdaspur district. On entering plains it forms boundary between Hoshiarpur and Gurdaspur districts and then between Amritsar and Gurdaspur districts. The valley of Beas in the district is bounded by a cliff 22 feet to 30 feet in height. The Beas joins the Satluj at Harike Pattan towards the south of the district where boundaries of four districts viz. Amritsar, Kapurthala, Jalandhar and Firozpur meet.

Satluj :

It rises from the Mansrover lake in the Himalayas and flows westward entering India through Kinnaur district of Himachal Pradesh. It enters Punjab after traversing Himachal Pradesh near Bhakra (Rupnagar district). After meandering along Nangal, Anandpur Sahib and Kiratpur, it enters the plains at Rupnagar. From Rupnagar the river takes its westward course demarking boundaries of Rupnagar and Hoshiarpur districts, and Jalandhar and Ludhiana districts. From its confluence with the Beas at Harike, it takes southwest course forming the boundary between Amritsar and Firozpur districts. The river was notorious for its floods during the rainy season but its ravages have lessened after the construction of Bhakra Dam.

Ravi :

The river finds mention in the Vedas and is referred to as Iravati. The present name is a corruption of the old name. The river rises in the Himalayas in the Chamba district of Himachal Pradesh. It enters plains of Punjab near Shahpur in Gurdaspur district. At Madhopur, the Upper Bari Doab Canal takes off from its left bank. All along the border of the district, the bank of the river is not high enough to withstand the strong current when river is in flood resulting in extensive damage during the rainy season. A kacha embankment known as the Dhussi Bund has been constructed to prevent the overflow of the river.

Besides the three rivers there is Sakhi Nullah, flowing through the Ajnala tahsil, rising from Behrampur in Gurdaspur district. It enters the district near Ramdas,and meandering through Ajnala tahsil falls into the Ravi in village Ranian near Ajnala. It is said that this Nullah flows on the old bed of Ravi. This Nullah, when in flood during the rainy season, causes considerable damage to life and property and for that reason is called Ajal Nala (Stream of death). A small stream has been taken off from it for irrigation in Gurdaspur and Amritsar districts. Among other streams in the district are: the Patti Rohi, the Kasur Nala and the Hudiara Drain. The Patti Rohi and the Hudiara Drain take their rise in Gurdaspur district and flow through Amritsar district. The Patti Rohi flows through Amritsar and Tarn Taran tahsils and then passes on to Kasur tahsil in the West Punjab. The course of Kasur Nala is well defined but during rainly season does considerable damage to the surrounding areas, and so does the Hudiara Drain.

Topography :

The district is almost uniformly alluvial plain unbroken by hill or valley, with practically no forest, though well provided with trees. The soil is light redish yellow loam locally known as Maira, which stiffens into clay on drying after becoming wet. At some places the clay degenerates into strips of sandy and uneven soil locally known as Tibba. The land slopes gently to the south-west from the high right bank of the Beas to the left bank of the Ravi. Tahsils of Amritsar, Baba Bakala, Tarn Taran and Patti are for most part fertile, but Ajnala tahsil, lying along the bank of Ravi, has suffered badly on account of floods and waterlogging. However, the construction of Dhussi Bund has proved effective against the river action.

Present Jurisdiction :

The area constituting the present Amritsar district forms part of Majha tract, where Manjh Rajputs once ruled. During the Muslim rule the area was ruled by governors with headquarters at Lahore. During Ranjit Singh's time the district was divided into the following three Parganas :—

1. Pargana Amritsar included places like Jandiala, Batala, Majitha and Amritsar.
2. Pargana Tarn Taran included important places like Tarn Taran, Sarhali and Vairowal.
3. Pargana Saurian (now Ajnala tahsil) included Chhina, Thoba, Karial etc.

After the first Sikh war which ended in 1846 resulting in the victory of British, the Sikhs had to cede the territory between the Satluj and the Beas and the hill areas. In 1849 after the annexation of Punjab, Amritsar

was made a district comprising four tahsils of Amritsar, Tarn Taran, Ajnala and Rayya (or Narowal). But in 1867, Narowal tahsil was transferred to Sialkot district (now in west Pakistan). The same year, Batala tahsil was added to Amritsar. But Batala was retransferred to Gurdaspur in 1869. The boundaries of Amritsar had been undergoing changes off and on and there were frequent changes between Amritsar and Lahore districts.

The district gained areas from Lahore in 1947. These areas now form a separate tahsil of Patti.

At present the district is constituted into five tahsils viz ; Amritsar, Tarn Taran, Patti, Ajnala and Baba Bakala. Baba Bakala is a new tahsil which has been carved out of Amritsar tahsil after 1971 Census.

The district did not undergo inter-district transfers since 1971. However, there were a number of intra district transfers as given in the Appendix given at the end of the profile.

Land Utilisation :

The district stands 5th in area among the districts of the State. The total area of the district according to the Surveyor General, India is 5087·0 square kilometres. However, according to the village papers maintained by the Director Land Records, Punjab, the area of the district measures 5056·3 square kilometres. The following statement shows the land use in the district during the year 1980-81 :

		(in 000 hectares)
1. Reporting area for land use purposes	..	506
2. Under forests	..	15
3. Land not available for cultivation	..	61
4. Other uncultivated land excluding fallow land	..	8
5. Total fallow	..	5
6. Net area sown	..	417
7. Percentage to total area	..	82
8. Area sown more than once	..	276
9. Total cropped area	..	693

The above statement shows that four-fifths of the area of the district is under cultivation. There is sizeable area in the district under forests along the riverbeds, canals, roads and canal distributories.

The handicap of inadequate and uncertain rainfall in the district has almost completely been offset by extensive irrigation provided by a net work of branches of Upper Bari Doab Canal. The district has recorded an increase in area under irrigation during the years. As against 2,93,000 hectares in 1960-61 the area increased to 4,04,700 hectares in 1980-81. The percentage of net area irrigated to net area sown was 97.1 in 1980-81. The following statement shows areas irrigated by various sources:—

Source		Area irrigated (in 000 hectares)
1. Government canals	..	241·1
2. Tubewells and wells	..	162·9
3. Other sources	..	0·7
Total	..	404·7

It would be seen from the above statement that canals are the principal source of irrigation, followed by wells and tubewells. The number of tubewells and pumping sets have recorded an increase from 1305 in 1960-61 to 18,693 in 1979-80. It is interesting to note that number of wells used for irrigation has recorded a decline from 17,624 in 1960-61 to 3,620 in 1979-80. In fact increasing number of wells have been used either as tubewells or installed with pumping sets. Since the district was one of the first to receive irrigation by canals the water table has gone up quite appreciably. Due to this factor tubewells and pumping sets found more suitable for irrigation as a counter check for increasing water table.

The principal crops of the district are wheat, paddy, maize and sugarcane. Among fodder crops are Bajra and Jawar. The green fodder is very popular with the farmers for feeding milch cattle. The farmers of the district are quite adept in the modern agricultural practices. The use of improved seeds has become popular over the years as shown by the following table:—

Crop	Area under improved varieties (in 000 hectares)		Percentage of area under improved varieties	
	1967-68	1979-80	1967-68	1979-80
1	2	3	4	5
1. Wheat ..	10	296	5·6	100·0
2. Rice ..	3	166	4·3	88·8
3. Maize ..	3	5	6·1	14·7

The introduction of package programme in agriculture has popularised high yielding varieties of seeds, chemical fertilisers, pesticides, effective water management etc., which have helped the district in increasing agricultural yields. The resultant improvement in the crop yields is shown by the following table:—

Crop	Yield in kgs per hectare in the year	
	1960-61	1979-80
1	2	3
1. Wheat ..	1038	2773
2. Rice ..	1660	2202
3. Maize ..	1435	1698
4. Bajra ..	887	728
5. Sugarcane (Gur) ..	3674	4847
6. Cotton (American) ..	158	168
7. Cotton (Desi) ..	198	120

Animal Husbandry:

The home bred bullocks are there but for better breeds the cultivators have to depend on the Haryana tract. Amritsar has long been considered a heavily cultivated district and the scarcity of grazing lands and pastures was felt as back as the beginning of the present century. However, since after the introduction of green fodders like *Chhatala* the cattle feeds have improved, thereby adding appreciably milk yields. The people have now started thinking in terms of quality cattle rather than quantity. As a result of this mental attitude the number of cattle has gone down over years. In1972 there were 10,70,500 cattle, the number, however, declined to 7,20,400 in 1977. Contrary to this, poultry birds have increased. In 1972 there were 3,72,200 birds, the number, however, increased to 6,19,500 in 1977. On the whole the cattle are now receiving a better deal. The number of veterinary hospitals was 28 in 1966-67 which increased to 80 in 1977-78. The number of dispensaries also increased from 29 in 1966-67 to 40 in 1977-78. Thus the number of veterinary institutions per 100 inhabited villages increased from 4.87 in 1966-67 to 10.16 in 1977-78. Besides, the regular flow of animals effected by specialised dealers, Zila Parishad and some Block Samitis and Municipal Committees organise cattle fairs which are attended in large number by sellers and buyers. The biggest animal fair is held at Amritsar on Diwali and the next in importance are those held at Tarn Taran and Rayya.

Communication, Railways and Roads:

The district is well served with postal and telegraph facilities. In 1979-80, there were 477 post offices against 385 in 1966-67. The number of telegraph offices increased from 52 in 1966-67 to 79 in 1979-80. There were 19 telephone exchanges in the district in 1979-80. The notable feature about these facilities is that both coverage and frequency of the services rendered have improved over the years in the district.

Amritsar is also connected by air with Jammu, Srinagar, Chandigarh, Delhi and Kabul.

The district lies within the Firozpur Division of the Northern Railway. It is connected with Beas in the east, Attari in the west, Khem Karan in the south-west, Dera Baba Nanak in the north and Gurdaspur in the north-east through broad guage lines. There are five sections of the railway lines. The Amritsar-Beas line passes through Baba Bakala and Amritsar tahsils and has Jandiala as an important station. The Amritsar-Khem Karan line passes through Tarn Taran and Patti tahsils on which important towns are: Tarn Taran, Patti and Khem Karan. The Amritsar-Dera Baba Nanak line passes through Ajnala tahsil and has Ramdas as the only important station. Amritsar-Lahore section has also become operational but this is meant for passport holders only. The Amritsar-Khem Karan and Amritsar-Dera Bana Nanak lines have big strips (77 and 65 kms respectively) in the district. The total railway operational length is 257 kilometres.

The villages are now well connected and easily accessible due to development of an efficient net work of road transport. The road mileage has increased tremendously over the years, as there were 3.035 kms of metalled roads in 1979-80 against 867 kms in 1966-67. The total length of roads of all kinds was 1,327 kms in 1966-67, which increased to 3,035 kms in 1979-80. Thus cent per cent roads in the districts were metalled. In terms of area covered in 1966-67 there were 17.25 kms of metalled roads for every 100 sq. kms of area, which increased to 60 kms of roads in 1979-80. In terms of population too, a lot of improvement has taken place as revealed by the figures. In 1979-80 there were 138·58 kms of roads for 1 lakh population against 50.96 kms in 1966-67. Over the years the road and transport connections in this district have quite improved with the completion of modern bridges over Satluj near Harike and Beas near Goindwal. These have improved communications between Amritsar and Firozpur and Kapurthala districts. The new bridge at Beas on Beas river has improved transportation between Amritsar and Jalandhar and other places. All trade and commerce with Pakistan takes place through Wagah border in Amritsar. This is the only such place in the country.

Amenities :

The district is quite advanced in the matter of education. Khalsa Collage, Amritsar is one of the premier institutions in the field of education. With the setting up of Guru Nanak Dev University, the higher education has received a further fillip in the district. As far as school and college education is concerned, this witnessed a rapid expansion after partition. In the pre-partition days private educational societies rendered yeoman's service but the initiative was snatched by the government by opening large number of schools. But private educational societies still lead in the matter of running of colleges. In May, 1967, there were only 6 Arts and Science colleges in the district. The number, however, went up to 16 in September, 1979. Likewise the number of High and Higher Secondary Schools went up from 137 in 1967 to 233 in 1979; Middle schools increased from 106 in 1967 to 167 in 1979; and Primary Schools increased from 891 in 1967 to 1488 in 1979. As regards students in High and Higher Secondary Schools, there were 34,000 students in 1967 against 86,000 in 1979; in middle schools there were 80,000 students in 1979 against 36,000 in 1967 and in Primary Schools there were 2,75,000 students in 1979 against 1,32,000 in 1967. The strength of teaching staff has also increased appreciably, as revealed by the figures. The number of teachers in the high and higher secondary schools shows a decline from 2,773 in 1967 to 1,892 in 1979. Against this, middle school teachers increased from 1,195 in 1967 to 3,187 in 1979 and primary school teachers increased from 3,685 in 1967 to 7,192 in 1979. There is one government polytechnic located at Amritsar with an annual intake capacity of 188 students in 1980-81. Besides there were 5 Industrial Training Institutes with an intake capacity of 1,114 students annually. There are three medical colleges, one each imparting MBBS, BDS and GAMS courses. There are two training colleges one for General and one for Women.

The medical facilities have also improved appreciably in the district. The number of hospitals increased from 18 in 1962 to 35 in 1979-80. The primary health centres increased from 11 in 1962 to 17 in 1979-80. However, sharp increase was reported by medical dispensaries which increased from 40 in 1960-61 to 154 in 1979-80. In all the medical institutions increased from 69 in 1962 to 206 in 1979-80. The number of hospital beds increased from 2,517 in 1962 to 3,760 in 1979-80. In 1979-80 there were 2,202 doctors attending on patients in the government hospitals and dispensaries. The family planning centres increased from 6 in 1962 to 24 in 1979-80. The spread of medical facilities may further be measured from the following indicators; in 1962 there was one medical institution for every 22,621 persons, against 10,728 persons in 1979-80; in 1962 there was one bed for 621 persons against 588 persons in 1979-80. There was 1 doctor for 1099 persons in 1979-80.

The banking facilities are also on the increase as against 51 bank branches in 1966-67, there were 259 bank branches in 1979-80. The number of cinema houses has also increased from 17 in 1966-67 to 25 in 1979-80. The number of employment exchanges increased from 3 in 1966-67 to 5 in 1979-80. The number of market committees increased from 8 in 1966-67 to 13 in 1979-80.

The district is well served with drinking water facilities. All towns are provided with tap water facilities. In the district 97 villages were identified where drinking water facilities were scarce; out of these 17 villages (17·53 per cent) were provided with tapped water by 31st March 1981. The main sources of drinking water are wells, tubewells and hand pumps. The water table in the district is fairly high. Now there is cent per cent electrification in the district against 56·6 per cent in 1960-61. This achievement has been possible through crash programme of electrification undertaken some years back.

Demographic Characteristics:

On the sunrise of 1st March, 1981, the population of the district stood at 2,188,490 persons, out which 1,169,888 are males and 1,018,602 are females. The sex ratio for this district is 871 against 879 of the State. The district ranks 1st in the state in population size. In the district out of a population of 2,188,490 persons 1,466,861 lived in rural areas whereas only 7,21,629 persons lived in urban areas. Thus 32.97 per cent population lived in the urban areas against 27.68 per cent of the state. Thus the percentage of urban population is fairly high in the district. The district reports a density of 430 persons per square kilometres against 333 for the State, the figure being higher than the state. The district has reported a literacy rate of 41.05 per cent (males 46.83 and females 34.40 per cent) against 40.86 per cent of the state. Thus in the field of literacy this district is ahead of some southern districts in the State.

Occupations:

In the district 29.64 per cent population comprised main workers (53.48 per cent males and 2.27 per cent females) during 1981 census. The percentage of marginal workers is 1:32 (0.49 per cent males and 2.27 per cent females). The percentage by broad industrial categories of main workers is as follows :—

1. Cultivators	Persons	31·46
	Males	32·52
	Females	3·26
2. Agricultural Labourers	Persons	22·24
	Males	22·05
	Females	27·16
3. Household Industry	Persons	2·46
	Males	2·35
	Females	5·33
4. Other workers	Persons	43·84
	Males	43·09
	Females	64·25

It may be noted from the above description that sex differentials of workers are favourable to males in the categories of cultivators, while in the remaining three categories these favour females. It should, however, be noted that work participation rate among males (49·10 per cent) is much higher than females (1.74 per cent) in respect of main workers, while among marginal workers females (1.46 per cent)have an edge over males (0.56 per cent)

The district is predoninantly agricultural even though large number of industrial/commercial units are located in the urban areas. After the completion of Goindwal Industrial Complex, the district will recapture the first position in industy in the State. With the setting up of campus of Guru Nanak Dev University, a large number of lecturers and professors have come to reside at Amritsar. The district being on the border has number of para military establishments of Border Security Force. The cantonment complex has undergone quite an expansion during the years. Amritsar city has number of branches of banking institutions and trading firms as the city serves as the main marketing centre of wholesale trade and commerce in the state. The occupational pattern is likely to receive a big boost if peace prevails on the border as then trade and commerce is bound to flourish thereby providing employment to a large number of persons in the import and export trade.

Trade And Commerce :

Generally towns serve as centres of trade and commerce though business and commercial establishments are found all over the district even in the remote villages. Amritsar city stands head and shoulders higher than other towns. Since olden times Amritsar was centre of trade and commerce in the state. The town serves as the main centre for green tea, dry fruits, textiles, woollen cloth etc; even though town has suffered after partition. The town monopolises all trade with Pakistan and Afghanistan. The transport facilities have developed in such a manner that perishable commodities like vegetables and milk produced in the district, are marketed at Chandigarh after covering some 240 kilometres. Cotton, Cotton Seed, Cotton Yarn, Artificial Silk, Carpets, Cloth of all types, Blankets, Wheat Flour, Rice, Gram and other foodgrains, Toria, Chillies, Vegetables, machinery and machine tools, electric fans and appliances, Chemicals, plastic goods, wooden toys etc; are the main exports of the district. Tea is also exported through

Amritsar to Afghanistan and Jammu and Kashmir. The main imports are salt, sugar, coal, gunny bags, kerosene oil, machinery, silken and terryelene yarn, wool tops etc. On the agricultural front too the district has earned quite a distinction. There are 13 regulated agricultural markets as on 31st March, 1981 in the district. The markets are Ajnala, Amritsar, Bhikhiwind, Gehri, Khem Karan, Patti, Rayya, Tarn Taran, Jhabal, Chogawan, Mehta, Majitha and Khadur Sahib. The market arrivals of foodgrains and non-foodgrains increased from 6,807,000 quintals in 1973-74 to 9,942,000 qtls. in 1980-81. The following is the break up of the three principal agricultural commodities handled in the above markets during 1980-81. :—

1. Paddy	405,000	M. tonnes
2. Maize	700	M. tonnes
3. Wheat	457,000	M. tonnes

All markets in the district are well connected by metalled roads. The district has earned a name in dairy and dairy products. The Verka products are quite popular in the state and outside.

Industry :

This district occupied in the past the first place in industry in the State but now it has been relegated to second place by Ludhiana district. The district was known for Pashmina, silk goods and carpets for a long time. Since after partition industries like woollen textiles, artificial silk textiles, engineering and chemicial industries have also developed. Most of the industrial units are located at Amritsar, Chheharta, Verka and Goindwal. Verka has earned a name in dairy products. At Goindwal a new industrial estate is fast coming up which will have number of large industrial units. Some of the reputed industrial units of the district are; Oriental Carpet Manufacturers (briefly known as OCM engaged in the manufacture of woollen cloth, blankets and carpets) Kohinoor Paints (engaged in the manufacture of paints) Punjab Dairy (brand name Verka engaged in the manufacture of dairy products such as milk, butter, ghee, milk cake etc., Jwala Floor Mills (engaged in the manufactue of wheat flour and other wheat products) and Khasa Distillery (engaged in the manufacture of country liquor). In 1980 there were 1245 registered factories (986 under section 2m (i) 14 under section 2m (ii) and 245 under section 85) out of which 1156 were working with 27,646 average number of workers as against 984 working factories employing 22,953 workers in 1960. In 1980 there were 25 working factories employing 4,699 workers under section 2m(i) in public sector; 911 working factories employing 21,717 workers under section 2m(i) in Private Secters; 14 registered factories employing 475 workers under section 2m (ii) and 206 working factories employing 755 workers under section 85. During the period 1975-77 there were, 9,785 unregistered industrial units giving employment to 26,626 workers having total investment of Rs. 2051.9 lakh with gross production of goods worth Rs. 4226.4 lakh in different towns of the district. In order to give boost to small scale industries, lot of efforts are being made at the government level. During 1980-81, 25 parties were given loans worth Rs. 1,40,000 and 17 parties were given state and central subsidies worth Rs. 1,102,000.

Places of historical and other interest:

Amritsar.—It is the largest city in the State which is located at a distance of 28 kms from the Indo-Pakistan border. The town was founded by Guru Ram Das, the fourth Guru of the Sikhs, in 1579, on land gifted by Mugha Emperor Akbar. Guru Arjan Dev, the fifth Sikh Guru completed the project and built a temple in midst of a pool. In 1803, Maharaja Ranjit Singh got covered the lower half of the temple with marble and the upper half with copper andthen with pure gold leaf. Since then the temple became known as Swaran Mandir or Golden Temple which is very sacred for the Sikhs. The town takes its name from pool known as Amritsar. Besides Goldern temple there are a number of historical places connected with the Sikh History, such as Akal Takhat, tower of Baba Atal Rai. Another temple of considerable importance is Durgiana Mandir. Jallianwala Bagh is another place connected with the freedom struggle. It was here that about 2000 freedom lovers fell to the bullets of British and a memorial has been built to commemorate their memory. The city is a great centre of trade and commerce. Before partition it was a centre of trade with Afghanistan, Jammu and Kashmir, besides that of entire Punjab and frontier province. But town suffered a lot after partition. It is the seat of district administration. The campus of Guru Nanak Dev University is located in this town. The town has a medical college, a dental college, an Ayurvedic college, a mental hospital, a Pingalwara (a home for the destitutes). Besides there are a large number of educational instituions. The headquarters of Shiromani Gurdwara Prabandhak Committee are also located in the town. The town has a railway work-shop. It is also an important centre of industry. The important local products are: Cotton and Woollen textiles, Carpets, and engineering goods. The town now embodies the erstwhile Chhehatta town, where a big fair is held on Basant Panchami. On Diwali a cattle fair is held here. A large number of visitors come to pay a visit to Darbar Sahib.

Tarn Taran.—It is a tahsil headquarter town which is located some 23 kms from Amritsar. The town was founded by Guru Arjan Dev in 1590. It is famous for Darbar Sahib, the foundation of which was laid by Guru Arjan Dev in 1598. Maharaja Ranjit Singh rebuilt the temple in its present form and attached a big Jagir for Langar. The Gurdwara, which is domed, was built in 1768 to commemorate Guru Ramdas. The waters of the tank are believed to possess miraculous powers, especially for the cure of leprosy. A mile west of town is a lepers' home and hospital built in 1858.

Baba Bakala.—It is a tahsil headquarter and is situated 45 kms east of Amritsar on the Jalandhar Batala road. It has a magnificient Gurdwara sacred to the memory of ninth Guru Teg Bahadur. An annual fair is held here on Raksha Bandhan, the night of the full-moon of August.

Ram Tirath.—It is a small place situated some 13 kms west of Amritsar, having connections with Ramayana. According to a legend the place housed Ashram of sage Balmiki. Here Sita spent time during her exile. Rama's two sons Lav and Kush were born here. A pacca tank with temples attract large number of pilgrims from all over the country. On Kartik Puranmashi (full moon day) in November every year a fair is held which lasts for a few days. The place has been beautified as a result of efforts of the Ram Tirath Sudhar Sabha.

Ramdas.—It is a small town some 45 kms from Amritsar on the Amritsar-Dera Baba Nanak road. It is also connected with Dera Baba Nanak and Amritsar by rail. The town was founded by Guru Ramdas, the fourth Sikh Guru. There is a *Smadh*, a Gurdwara and a tank built to commemorate the memory of Baba Budha. The legend goes that Baba Budha used to graze cattle in the nearby fields. One day while Baba Budha was listening to discourse of Baba Nanak his cattle trespassed into the nearby fields. When the field owners came to enquire about the boy from Baba Nanak, he was converted into an old man with a beard and long hair and the owners failed to recognise him. Since then Baba Budha became known and people from far and near came to pay him their obeisance. A cot on which Baba used to sleep is preserved.

Goindwal.—It is situtated at a distance of 23 kms from Tarn Taran town on the banks of river Beas. The town has connection with Guru Amar Dass who lived here. Gurdwara Baoli Sahib built by the Guru stands here. Another Gurdwara known as Chaubara Sahib built by the Guru is also located here.

Khadur Sahib.—It is located some 32 kms east of Amritsar city in Tarn Taran tahsil near Goindwal. Guru-Angad Dev breathed his last here in 1552. His Smadhi was built here in 1815 by Maharaja Ranjit Singh. A Gurdwara with a tank has been built near the smadhi.

Jandiala.—It is a small town situated on G.T. Road at a distance of 18 kms from Amritsar. It is also called Jandiala Guru. Baba Hardaji, a contemporary of Guru Arjan Dev, was born here. Hardaji was the founder of Niranjnia Panth. A Gurdwara with a pacca tank has been built in memory of Baba Hardaji. Non-stop recitation of Granth Sahib is a special feature of this Gurdwara. There is another Gurdwara known as Jyotisar. The town is predominantly inhabited by Jains. There are three Jain temples in the town.

ANNEXURE

Jurisdictional Charges

Amritsar District

Intra district changes

(i)	Tarn Taran Tahsil of Amritsar district lost 38 villages to Amritsar Tahsil of Amritsar district	Vide notificationNo. 5148-RGI-75/96, dated 7-1-1976
(ii)	Amritsar Tahsil lost 182 villages to the newly created Baba Bakala Tahsil.	Vide notification No. 5148-RGI-75/96, dated 7-1-1976
(iii)	The newly formed Baba Bakala Tahsil comprising 182 villages from Amritsar Tashil of Amritsar district	Vide notification No. 2541-RGI-79/2420, dated 12-4-1979
(iv)	A new Estate Dera Baba Jaimal Singh comprising 283 Acres of village Bal Sarai and 117 Acres of village Wariach in Amrtisar Tahsil (now in Baba Bakala Tahsil)	Vide notification No. 9/16/78-LR(II)/19392, dated 19-9-1978
(v)	25 villages of Baba Bakala Tahsil retransferred to Tahsil Amritsar of Amritsar district	Vide notification No. 2/2(RGI)-8847-79/7399, 26-12-1979

INTRODUCTION TO DISTRICT CENSUS HANDBOOK

Keeping in view the needs of planners, for exhaustive infra-structural and amenity data upto village level, required for micro-level planning, the formats of the village and town directory of 1981 DCH series have been re-designed and some new features useful for planning have been added while maintaining the comparability with 1971 data. A few new items of information such as adult literacy centres, primary health sub-centres, community health workers in villages, etc. have been introduced to meet some of the requirements of revised minimum needs programme. A new item 'approach to village' has been introduced to give an idea about the villages in the district which are inaccessible. A new column 'Total population and number of households' has been introduced to examine the correlation of amenities with the population and number of households they serve. Two more appendices namely (i) listing the villages where no amenities are available and (ii) list of villages indicating ranges according to the proportion of scheduled castes to total population have been added with the same object in view. A significant addition is class of the town in all the six statements of the town directory which along with population and decadal variation during 1901 to 1981 will prove quite useful for analysing the infrastructure of amenities in the urban areas of State.

Contents :

The 1981 DCH series have been divided into two parts. Part A contains village and town directory and Part B, PCA of villages and towns and PCA for scheduled castes upto tahsil/town levels. Both parts are being published in this volume.

The village directory contains information about total area of each village in hectares, total population and number of households, amenities/conveniences available in the village, staple food of the people and the land-use pattern. There is also information about the nearest town and its distance from the village and approach to the village.

The town directory presents data on each town with the aid of six statements giving the status and class of the town, the decadal population and growth rate during 1901-1981, physical and locational aspects, municipal finance and availability of amenities/facilities like medical, educational, banking etc., trade, commerce and industry.

PCA incorporates tahsilwise data for each village and each town/ward under the following heads:—

(i) Area in hectares/sq. kms.
(ii) Number of occupied census houses.
(iii) Number of households.
(iv) Total population.
(v) Scheduled caste population (there is no scheduled tribe in Punjab State)
(vi) Literates.
(vii) Main workers classified into four categories of cultivators, agricutural labourers, household industry and other workers.
(viii) Marginal workers.
(ix) Non-workers.

Maps:

The map of the district and a map for each tahsil of the district have been included.

The district map shows the district boundary and location of its headquarter, tahsil boundaries and location of its headquarter, National highway, State highway, important metalled roads, railway lines, river and streams, towns and census villages according to population size, post and telegraph offices, degree colleges and technical institutions, rest houses etc.

The tahsil map contains boundary of tahsil and location of tahsil headquarter, villages with location code numbers, villages with population size, uninhabited villages with location codes, urban areas with location codes, roads, railway and service facilities such as post and telegraph offices, higher secondary schools, hospitals, etc.

Besides both the district and tahsil maps have an inset map wherein addition or loss of territory which has taken place during the decade, has been shown.

Sources:

Whereas PCA contains census data for compilation of village and town directory, the relevant schedules along with comprehensive instructions, were sent to the revenue officers (for rural areas) and executive officers of municipal bodies (for urban areas) to be filled in at their end. The completed schedules were collected from the relevant quarters during the houselisting operations in April, 1980 by the staff of this directorate. The schedules were scrutinised at the directorate and the directories were compiled therefrom.

Census concepts and definitions

Village and Town Directory:

RURAL-URBAN CLASSIFICATION—The 1981 census data are being presented by rural and urban areas, as in the previous censuses.

As far as rural area is concerned 'Village' has been adopted as the lowest census unit.

Rural Areas . 'Village'—The definition of the village adopted in census is identical with that of 'mauza' given under section 3(i) of the Punjab Land Revenue Act, 1887. It is the 'revenue estate' determined as such for the purpose of levy and collection of the land revenue. The revenue estate is defined in the Act *ibid* as an area:

(a) for which a separate record of rights exists; or

(b) which has been separately assessed to land revenue, or would have been so assessed if the land revenue had not been realised or compounded or redeemed ; or

(c) which the State Government may by general rule or specific orders declare to be an estate.

The village is thus not merely the *abadi-deh* (red lined area) for census taking but the entire land coming within the fixed boundaries of each village in terms of the Act *ibid.*

There are 1255 villages out of which 1191 are inhabited and 51 are uninhabited and 13 since merged in urban area in Amritsar District.

Urban Areas : *'Town'*—The following definition of an 'urban' area has been adopted at the 1981 census which is analogous to the criterion adopted in 1961 and 1971 censuses with some minor variation (as indicated below):—

(a) All places with a corporation, municipality or cantonment board or notified town area.

(b) All other places which satisfied the following criteria:—

(i) A minimum population of 5,000,

(ii) at least 75 per cent of the male working population engaged in non-agricultural (and allied) activity, and

(iii) a population of at least 400 per Sq. Km (or 1,000 per square mile).

The urban criterion of 1981 census varies slightly from that of 1961 and 1971 censuses, in that the males working in activities such as forestry, logging, etc.were then treated as engaged in non-agricultural activity. It therefore, contributed to the 75 per cent criterion in 1961 and 1971 censuses whereas in the 1981 census these activities have been treated as on par with cultivation and agricultural labour for the purpose of this criterion.

Prior to the 1961 census, the definition of 'urban' area was somewhat liberal and a lot was left to the, discretion of the local authorities. At the 1971 census, the state directors of census operations were also given discretion in marginal cases to include, in consultation with the State Government, a place that had other distinct urban characteristics, or to exclude an undeserving place from being treated as 'urban'.

Urban Areas in Amritsar District—With the merger of Chheharta town in Amritsar Municipal Corporation and with the addition of three more urban areas viz. Rayya, Ajnala and Chola Sahib NACs; Amritsar District has 11 towns, namely. Ajnala, Amritsar Cantt; Amritsar Municipal Corporation; Chola Sahib, Jandiala, Khem Karan, Majitha, Patti, Ramdas, Rayya and Tarn Taran at 1981 Census. Although state government abolished Ajnala, Chola Sahib and Khem Karan NACs in October, 1980 alongwith other 13 NACs; all the three NACs viz. Ajnala, Chola Sahib and Khem Karan have been treated as towns for the purpose of 1981 Census, as it was decided to freeze the urban frame as on 30th September, 1980.

Urban Agglomeration (UA)—Apart from town/city (a town with a population of one lac and above), the 1971 concept of urban agglomeration is also adopted for the 1981 census. Very often large railway colonies, university campuses, port areas, military camps, etc., come up outside the statutory limits of the city or town but adjoining it. Such areas may not by themselves qualify to be treated as towns but if they form a continuous spread with the town, they are outgrowths of the town and deserve to be treated as urban. Such towns together with their outgrowths have been treated as one urban unit and called 'urban agglomeration'.

An urban agglomeration may constitute :

(a) A city with continuous outgrowth (the part of outgrowth being outside the statutory limits but falling within the boundaries of the adjoining village or villages):

(b) one town with similar outgrowth or two or more adjoining towns with their outgrowths as in (a);or

(c) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Urban Agglomeration (UA) in Amritsar District—There is one Urban Agglomeration in Amritsar District, viz. Majitha comprising (i) Majitha (MC) and (ii) Rori and Idgah (out growth)

Standard Urban Areas (SUA)—The area constituting an 'urban agglomeration' may keep on changing from census to census depending upon the changing boundaries of the statutory core urban unit as well as the extent of other continuous urban outgrowths.The concept of 'Standard Urban Area', adopted at the 1971 Census and 1981 Census has taken care of these changes, covering areas beyond the extended urban limits and intermingling both rural and urban areas in the vicinity of large towns to a limit upto which contiguous urbanization is reasonably expected to take place in the next two decades. In brief, the Standard Urban Area may be defined "as the projected growth area of a city or town as it would be in 1991, taking into account not only the towns and villages which will get merged into it but also the intervening areas which are officially urban". Provision of Census data for such 'Standard Urban Areas" will have the advantage of providing comparable data for a definite area for a period of two decades greatly facilitating study of socio-economic and demographic trends in such a fixed area and thus help in urban planning. All towns with a population of 50,000 have been delineated as Standard urban areas. The essential requirements for the constitution of a Standard Urban Area are:—

(i) it should have a core town of a minimum population of 50,000;

(ii) the 'contiguous areas' made up of other urban as well as rural administrative units should have mutual socio-economic links with the core town ; and

(iii) in all probability this entire area should get fully urbanised in a period of two or three decades.

Certain SUAs were determined on this basis in 1971 and some basic data were presented for 1951, 1961 and 1971 for such areas and their components. Similar data are being presented for the SUAs in 1981 also. The idea is to present basic data for these areas for four to five decades so that the urbanisation process in those areas can be studied.

Standard Urban Area in Amritsar District—There is only one standard Urban Area viz. Amritsar SUA in the Amritsar District.

DEMOGRAPHIC CHARACTERISTICS BASED ON ANALYSIS OF INSET TABLES (PRIMARY CENSUS ABSTRACT)

Population:

TABLE 1

Population, Number of Villages and Towns, 1981

Sr. No.	Name of Tahsil	POPULATION									No. of villages		No. of towns
		Total			Rural			Urban			Total	Inhabited	
		P	M	F	P	M	F	P	M	F			
1	2	3	4	5	6	7	8	9	10	11	12	13	14
1	Ajnala	278,110	148,645	129,465	266,481	142,553	123,928	11,629	6,092	5,537	347	314	2
2	Amritsar	957,626	514,813	442,813	326,013	174,473	151,540	631,613	340,340	291,273	259	246	4
3	Baba Bakala	216,263	113,211	103,052	209,214	109,498	99,716	7,049	3,713	3,336	158	156	1
4	Tarn Taran	468,577	248,746	219,831	425,761	226,145	199,616	42,816	22,601	20,215	301	292	2
5	Patti	267,914	144,473	123,441	239,392	129,325	110,067	28,522	15,148	13,374	190	183	2
	Total District	**2,188,490**	**1,169,888**	**1,018,602**	**1,466,861**	**781,994**	**684,867**	**721,629**	**387,894**	**333,735**	**1,255**	**1,191**	**11**

Table 1 gives distribution of population tahsilwise by rural and urban areas with further break down by persons, males and females. Also break down of villages by total and inhabited villages has been attempted. In the last column number of towns has been given tahsilwise. At the bottom district totals columnwise have been given. This table shows that in Amritsar district out of 1,255 villages as many as 1,191 villages are inhabited. The maximum number of villages (347) and maximum number of inhabited villages (314) are in Ajnala tahsil, followed by Tarn Taran tahsil (292 inhabited villages out of 301 total villages), while newly created tahsil of Baba Bakala is at the bottom (156 inhabited villages out of 158 total villages). There are 11 towns in the district, out of which Amritsar tahsil has the maximum (4), whereas Baba Bakala tahsil has the minimum (1), the remaining 6 towns are shared equally by Anjala, Tarn Taran and Patti tahsils. The villages and towns together have a population of 2,188,490 persons (1,169,888 males and 1,018,602 females). In the district 1,466,861 persons (781,994 males and 684,867 females) reside in rural areas i.e. in 1191 villages, whereas 721,629 persons (387,894 males and 333,735 females) reside in urban areas, i.e. in towns. Amritsar tahsil with a population of 957,626 persons (514,813 males and 4,42,813 females) is the most populous tahsil of the district, followed at a considerable distance by Tarn Taran tahsil with a population of 468,577 persons (248,746 males and 219,831 females). Baba Bakala tahsil with a population of 216,263 (113,211 males and 103,052 females) is the least populous. Out of a total urban pupulation of 721,629 persons as many as 631,613 persons are residing in the urban areas of Amritsar tahsil alone out of which Amritsar City alone has 504,844 persons. Baba Bakala tahsil has the smallest number of urbanites (7,049 persons).

Growth Rate:

TABLE 2

Decadal Change in Distribution of Population

Sl. No.	Name of Tahsil	POPULATION						Percentage decadal (1971—81) variation		
		1971			1981					
		T	R	U	T	R	U	T	R	U
	1	2	3	4	5	6	7	8	9	10
1.	Ajnala Tahsil	224,749	220,427	4,322	278,110	266,481	11,629	+23·74	+20·89	+169·07
2.	Amritsar Tahsil	911,217	430,903	480,314	957,626	326,013	631,613	+5·09	+24·34	+31·50
3.	Baba Bakala Tahsil	54,113	54,113	..	216,263	209,214	7,049	+299·65	+286·62	N.A.
4.	Tarn Taran Tahsil	413,967	389,851	24,116	468,577	425,761	42,816	+13·19	+9·21	+77·54
5.	Patti Tahsil	231,454	204,736	26,718	267,914	239,392	28,522	+15·75	+16·93	+6·75
	District Total	**1,835,500**	**1,300,030**	**535,470**	**2,188,490**	**1,466,861**	**721,629**	**+19·23**	**+12·83**	**+34·77**

Table 2 gives population tahsilwise by total, rural and urban areas for 1971 and 1981 censuses separately. It also gives percentage decadal variation tahsilwise by total rural and urban areas for the decade 1971—81. The columnwise totals for the district have also been given. The table shows that in 1971 the population of the district was 1,835,500 which increased to 2,188,490 in 1981. Thus a percentage decadal variation of 19·23 was recorded for the district during 1971-81, which is lower than th state decadal variation of 23.89 per cent. Baba Bakala tahsil with

a decadal growth of 299·65 per cent leads other tahsils, whereas Amritsar tahsil records the lowest rate of 5.09 per cent. The reason for such abnormal rates is that large number of villages were transferred from Amritsar to the newly created Baba Bakala tahsil. The three tahsils viz. Amritsar, Tarn Taran and Baba Bakala were affected by inter tahsil transfers. The decadal growth in the district is low mainly due to the district being located on the border. The rural growth rate is extremely low (12.83 per cent) compared to the urban growth of 34.77 per cent during the decade.

Villages:

TABLE 3

Distribution of Villages by Population Ranges

Range of Population	No. of villages in each range	Percentage of villages in each range
1	2	3
Less than—200	111	9·32
200—499	180	15·11
500—1,999	702	58·94
2,000—4,999	174	14·61
5,000—9,999	24	2·02
10,000+	..	..
Total	**1,191**	**100·00**

Table 3 gives distribution of villages by population size in six ranges varying from less than 200 to 10,000 and above. The table shows that out of 1,191 inhabited villages maximum number 702 villages (58.94 per cent) fall in the range 500-1,999, followed at a considerable distance by 180 villages (15.11 per cent) in the range 200—499 and 174 villages (14.61 per cent) in the range 2,000—4,999. Also a sizeable number 111 villages (9.32 per cent) are in the range less than 200. It would, however, be noted that villages of size 10,000+ are conspicuous by their absence.

TABLE 4

Distribution of Villages by Density

Range of density (per sq. km.)	Total number of villages in each density range	percentage of villages in each density range
1	2	3
—10	13	1·09
11—20	10	0·84
21—50	22	1·85
51—100	56	4·70
101—200	152	12·76
201—300	299	25·10
301—500	521	43·75
501+	118	9·91
Not Known	..	..
Total	**1,191**	**100·00**

Density:

Table 4 gives distribution of villages by density ranges. The density of Amritsar district works out to 430 persons per square kilometre against 333 of the State. It would be clear that this district is more densely populated than other districts of the State, which is due to its having large urban population. Incidently the district has Amritsar City which is the second largest city in the State. The table shows that maximum number of villages 521 (43.75 per cent) fall in the density range 301-500, followed at a considerable distance by the density range 201—300 with 299 villages(25.10 per cent).However, the minimum number

of villages 10 (0.84 per cent) fall in the density range 11-20. Generally speaking the villages with high density are fewer as only 118 villages (9.91 per cent) report density of more than 500 persons per square kilometre.

TABLE 5

Proportion of Scheduled Castes Population to Total Population in Villages

Percentage range of Scheduled Castes population to total population	Number of villages in each range	Percentage of villages in each range
1	2	3
Nil	83	6·97
Less than 5	68	5·71
6—10	45	3·78
11—15	53	4·45
16—20	85	7·14
21—30	326	27·37
31 and above	531	44·58
Total	**1,191**	**100·00**

Scheduled Castes Population:

Table 5 gives number of villages with percentages by range of scheduled caste population, the percentage ranges varying from nil to 31 and above. The table shows that maximum number of villages 531 (44.58 per cent) have 31 and above per cent of scheduled caste population, followed by 326 villages (27.37 per cent) in the range 21-30. As many as 83 villages (6.97 per cent) report nil scheduled caste population. Table shows that there are fewer villages with lower percentage of scheduled castes population.

TABLE 6

Proportion of Scheduled Castes Population in Towns

Name of the town		Total population	Total Scheduled Caste population	Percentage of Scheduled Caste population to total population
1		2	3	4
1. Ajnala	N.A.C.	7,506	1,082	14·42
2. Amritsar	M. Corp.	594,844	95,306	16·02
3. Amritsar Cantt.	C.B.	11,040	1,686	15·27
4. Chola Sahib	N.A.C.	5,913	1,641	27·75
5. Jandiala	M.C.	16,335	4,327	26·49
6. Khem Karan	N.A.C.	8,757	2,033	23·22
7. Majitha*	U.A.	9,394	3,532	37·60
8. Patti	M.C.	19,765	2,869	14·52
9. Ramdas	M.C.	4,123	1,579	38·30
10. Rayya	N.A.C.	7,049	1,569	22·26
11. Tarn Taran	M.C.	36,903	5,579	15·12
All Towns		**721,629**	**121,203**	**16·80**

*Town having non-town components of urban agglomeration.

Table 6 gives scheduled castes population and percentage of scheduled castes population to total population by towns for all the 11 towns of the district. From the table it would be seen that out of 721,629 urbanites as many as 121,203 are scheduled castes, their percentage being 16.80 for the district as a whole. Among towns/cities the maximum number of scheduled castes are found in Amritsar (95,306 persons) followed by Tarn Taran at a considerable distance, whereas the lowest number (1082) is in Ajnala town. In term of percentages, the highest percentage (38.30 per cent) is reported in Ramdas, followed by Majitha (37.60 per cent,) the lowest (14.42 per cent) is reported in Ajnala. It may, however, be noted that percentages of scheduled castes are inversely proportional to the size of the town. This will be clear from percentages of Amritsar (16.02 per cent), Tarn Taran (15.12 per cent), Patti (14.52 per cent), etc. Jandiala (26.49 per cent) is, however, a notable exception.

It may, however, be noted that there is no scheduled tribes population in the district as no scheduled tribe has been notified in the Punjab State.

TABLE 7

Literacy Rates by Population Ranges of Villages

Range of Population	Number of villages in each range	Literacy rate
1	2	3
Less than 200	111	33·69
200—499	180	32·87
500—1,999	702	32·49
2,000—4,999	174	34·02
5,000—9,999	24	35·93
1,0000+	..	..
Total	**1,191**	**33·39**

Literacy:

Table 7 shows literacy rates of villages by population ranges. The table shows that literacy rate in rural areas of the district is 33.39 per cent. The highest literacy rate (35.93 per cent) is reported in 24 villages falling in the population range 5,000-9,999, followed by 34.02 per cent in 174 villages in popultion range 2,000—4,999. The lowest literacy rate (32.49 per cent) is, however, reported in 702 villages in the population range 500-1,999. It would be interesting to note that there is not much variation in the maximum (35.93 per cent) and minimum (32.49 per cent) literacy rates in various population ranges.

TABLE 8

Literacy Rates for Towns

Name of the town		Literacy rate
1		2
Ajnala	N.A.C.	53·90
Amritsar	M. Corp.	57·89
Amritsar	C.B.	51·48
Chola Sahib	N.A.C.	40·05
Jandiala	M.C.	51·48
Khem Karan	N.A.C.	31·87
Majitha*	U..A.	43·73
Patti	M.C.	52·11
Ramdas	M.C.	48·97
Rayya	N.A.C.	55·91
Tarn Taran	M.C.	55·81
All Towns		**56·62**

*Town having non-town components of urban agglometation.

Tabel 8 gives literacy rates by towns. The table shows that urban areas as a whole have 56.62 per cent literacy rate in this district. Among the towns, highest literacy rate (57.89 per cent) is reported by Amritsar followed by Rayya (55.91 per cent) and Tarn Taran (55.81 per cent). Khem Karan town, however, reports the lowest (31.87 per cent) literacy rate, the town having predominant rural characteristics, being situated on the border.

The district is not much ahead in the matter of literacy as it has 41.05 per cent literacy rate against 40.86 per cent of the State. Thus there remains lot to be done for improvement of literacy in the district.

Working Population

Table 9 gives tahsilwise break-up into total, rural and urban areas, for total population, percentages of scheduled castes literates, main workers, marginal workers, total workers and non-workers with break-up by sex. The table shows that 26.20 per cent of the district population (30.83 per cent in rural and 16.80 per cent in urban areas) belong to scheduled castes. The highest percentage 31.53 per cent (31.84 per cent in rural area and 22.26 per cent in urban areas) is in Baba Bakala tahsil, whereas the lowest 23.55 per cent (37. 01 per cent in rural areas and 16.60 per cent in urban areas) is in Amritsar tahsil. In the district 41.05 per cent population is literate, the percentage in rural and urban areas being 33.39 and 56.62 per cent respectively. Amritsar tahsil with 49.79 per cent literates (35.04 per cent in rural and 57.40 per cent in urban areas) tops in the district, while Patti tahsil with 30.47 per cent (28.63 in rural areas and 45.89 per cent in urban areas) has the lowest literacy rate. A close scrutiny of sex differentials shows wide disparities as female rates lag behind male rates by considerable margins.

The percentage of main workers for the district is 29.64 (29.65 per cent for rural and 29.62 per cent for urban areas), the highest percentage being 31.23 (31.46 per cent in rural areas and 29.27 per cent in urban areas) in Patti tahsil and lowest 28.53 per cent (28.51 per cent in rural areas and 28.96 per cent in urban areas) in Baba Bakala tahsil. In sex differentials there is a wide disparity, the male workers reporting a percentage of 53.48 (54.03 per cent rural and 52.36 per cent urban) workers against 2.27 per cent (1.82 per cent for rural and 3.19 for urban areas) for females in the district. Thus males report more than 50 per cent workers against hardly 2 per cent among females. The percentage of marginal workers for the district is 1.32 (1.91 per cent for rural and 0.11 per cent for urban areas) the highest being 2.59 per cent (2.68 per cent in rural areas and 0.11 per cent in urban area) in Baba Bakala tahsil, and the lowest 0.67 per cent (1.81 per cent in rural areas and 0.08 per cent in urban areas) in Amritsar tahsil. In case of marginal workers the notable features are; firstly females differentials are may times higher than male differentials and secondly urban differentials are quite lower than the rural differentials, due to women from poorer sections taking up jobs to supplement family incomes. The work participation rates (obtained by clubbing main workers and marginal workers) for the district is 30.96 per cent (rural 31.56 per cent and urban 29.73 per cent). The table reveals that 69.04 per cent (68.44 per cent rural and 70.27 per cent urban) population is non-working. Among males the non-workers are 46.03 per cent (45.26 per cent rural and 47.58 per cent urban), whereas among females percentage is as high as 95.47 per cent (94.90 per cent for rural and 96.64 per cent for urban areas). Thus rates of non-workers among females are almost double that of males.

BRIEF ANALYSIS OF VILLAGE AND TOWN DIRECTORY

VILLAGE DIRECTORY

Amenities available in the Villages

In the annexures immediately following this note, distribution of villages according to availability of different amenities has been given in Table 10. Table 11 gives proportion of rural population served by various amenities. Table 12 gives distribution of villages where amenities are not available within the villages but are available outside. Table 13 gives distribution of villages by distance range from the nearest town and availability of amenities and table 14 gives distribution of villages by population ranges and amenities available.

(i) Educational Facilities

Out of 1,191 inhabited villages in the district 1,105 (92.78 per cent) with 98.92 per cent of rural population have at least a primary school. However, as many as 86 villages do not have educational facility within the villages but can avail these from the nearby villages, out of which 83 villages avail these within 5 kms; whereas the remaining 3 villages avail within a distance 5—10 kms ; Tahsilwise percentage of villages enjoying educational facilities are ; Ajnala 89.17, Amritsar 94.72, Baba Bakala 95.51, Tarn Taran 95.89 and Patti 89.07. It could thus be seen that educational facilities are generally easily available, especially upto the primary stage.

(ii) Medical Facilities

Out of 1,191 inhabited villages 330 villages (27.71 per cent) have a medical facility such as hospital, maternity and child welfare centre etc. The percentage of villages enjoying medical facility is the highest (35.26 per cent) in Baba Bakala tahsil, followed by Tarn Taran (31.51 per cent) and Patti (30.60 per cent) tahsil. However, Ajnala tahsil has the lowest percentage (22.29 per cent), being riverain to large extent. Out of 861 villages where medical facilities are not available locally, the amenity is available in 763 villages within 5 kms ; in 97 villages within 5-10 kms ; and in 1 village in 10+ kms ; Percentage of villages having medical facility but located within 5 kms is the lowest (19.35 per cent) but it is the highest (35.47 per cent) in the distance range 6-15 kms. There are 59 villages (22.87 per cent) which enjoy medical facility but are located in the distance range 16-50 kms. This pattern is understandable as villages situated near the towns avail this facility from the nearest towns.

(iii) Drinking Water Facility

All the 1,191 villages enjoy drinking water facilities locally. The main sources of drinking water are handpumps, wells and tubewells. Even though drinking water was available in cent per cent villages, 97 villages were identified as scarcity villages, out of which in 17 villages tapped water facilities were made available to the villagers in the year 1980-81.

(iv) Post and Telegraph Facilities

Out of 1,191 inhabited villages of the district as many as 473 villages (39.71 per cent) have post and telegraph facilities within the village. The availability is the highest (49.32 per cent) in Tarn Taran tahsil, as out of 292 inhabited villages in the tahsil 144 villages have this facility, followed by Baba Bakala tahsil (42.31 per cent) with 66 villages out of 156 villages. However, the lowest percentage (27.07 per cent) is reported by Ajnala tahsil which has 85 villages out of 314 villages. In the district in the rural sector 63.82 per cent of the population avail this facility. In Tarn Taran 70.33 per cent of the population is covered, followed by Baba Bakala tahsil where 68.46 per cent population is covered. However, lowest percentage (47.37 per cent) of population is covered in Ajnala tahsil. In 718 villages, however, postal and telegraph facilities are not available. Out of these 634 villages enjoy these facilities within less than 5 kms. ; 79 villages enjoy within 5-10 kms ; and the remaining 5 villages avail at a distance of 10+kms ; In case of 473 villages where postal facilities are available within the village let us examine the distances from the nearest towns. Out of 473 villages, the highest number 269 (47.95 per cent) villages are within 6—15 kms. of a town, followed by 96 (37.21 per cent) villages in the range 16-50 kms. Only 108 villages (29.03 per cent) are located within 5 kms from the nearby town. Further out of 473 villages having this facility 275 (39.23 per cent) villages fall in the population range 500—1,999 and 156 villages (86.67 per cent) fall in the population range 2,000—4,999.

(v) Communications:

579 villages constituting 48.61 per cent of the inhabited villages are served either with public transport system or have good means of communications. The highest percentage (59.93) is reported in Tarn Taran tahsil, followed by Patti tahsil (49.18 per cent.) A population of 65.43 per cent avails these communications. The highest percentage (76.09) is reported in Tarn Taran tahsil, followed by Ajnala tahsil (64.28 per cent). However, lowest population covered is in Amritsar tahsil (53.39). This facility is not available in 612 villages. In 550 villages this facility is available within 5 kms; in 61 villages within 5—10 kms. and in 1 village 10+kms.. Again in 350 villages (62.39 per cent) the nearest town is located within 6—15 kms; followed by 119 villages (31.99 per cent) the town is within 5 kms. and in the remaining 110 villages (42.64 per cent) town is between 16—50 kms. The highest number of villages 326 (46.51 per cent) are in the population range 500—1,999, whereas the next highest number 150 villages (83.33 per cent) fall in the range 2,000—4,999.

(vi) Approach by Pucca Road:

Out of 1,191 villages as many as 1,025 (86.06 per cent) are approachable by pucca roads. The highest percentage (92.31 per cent) is in Baba Bakala tahsil, wherein out of 156 villages as many as 144 villages are approachable by the pucca roads, followed by Amritsar (90.65 per cent) and Ajnala (88.85 per cent) respectively. However, Patti tahsil (76.50 per cent) is at the bottom. In the rural areas of the district 90.95 per cent population avail the facility of the pucca roads. The highest and lowest percentages of population availing this facility are in Baba Bakala (96.98 per cent) and Patti (83.66 per cent) respectively. Out of 1025 villages (86.06 per cent) as many as 518 villages (92.34 per cent) are situated within 6—15 kms; 311 villages (56.72 per cent) are located within 5 kms. and the remaining 196 villages (75.97 per cent) are located within 16—50 kms; from the nearest town. Out of 1025 villages the highest number of villages 617 (88.02 per cent) are in the population range 500—1,999, followed by 216 villages (76.06 per cent) in the range less than 500. As many as 167 villages (92.78 per cent) are in the range 2,000—4,999. However, the smallest number of villges (25) with the highest percentage (96.15) are in the population range 5000+. Apparently the higher the population the higher is the percentage of villages which avail the facility of pucca roads.

(vii) Power Supply :

There is hundred per cent electrification of the villages in the state. This has been possible due to crash programme undertaken in the state some years ago.

(viii) Market/Hat :

Hat is an uncommon feature in the state as also in this district. Temporary markets are, however, held in the district at various places on fairs and festivals. But there is no regular periodicity like weekly, fortnightly or monthly markets. Since the district is quite advanced in the matter of urbanisation, there is no need for hats etc. The district being on the border is provided with a good net work of roads, which enable the villagers to make purchases locally or from the nearby towns of the district.

Land use pattern in the District:

Table 15 gives distribution of villages according to land use pattern. The table shows that out of 484,469 hectares 386,399 hectares or 79.76 per cent of the area is cultivable. The highest and the lowest percentages are in Baba Bakala (83.53 per cent) and Anjala (72.36 per cent) tahsils respectively. The district is one of the intensively irrigated districts of the state as 87.67 per cent of the cultivated area is irrigated. Tarn Taran tahsil leads other tahsils with a percentage of 92.82, closely followed by Amritsar tahsil with 91.91 per cent. Ajnala tahsil with a percentage of 78.97 is at the bottom as this is partly riverain. It should be noted that the district was one of the pioneer districts in the matter of canal irrigation since the construction of Upper Bari Doab Canal along the old alignment of Shahi Canal built to supply water to Darbar Sahib at Amritsar and Shalimar Bagh at Lahore. The canal was built in 1869 to resettle Sikh soldiers after the disbandment of the Khalsa Fauj.

Staple Food :

With the passage of time the food habits of the people have changed. Bajra which found wide consumption during winter months in the past has almost disappeared except in Patti tahsil. Wheat is now the main staple food throughout the year. It is supplemented by maize during winter and rice during the summer months. Berar or Gochani (wheat and gram mixed)is no longer popular as area under gram has diminished during the last few years due to the adoption of improved wheat varieties. The popularity of green fodder has helped in increasing milk yields. The robust physique of the people is atributable mainly to abundant availability of milk and healthy water.

TABLE 10

Distribution of Villages According to the Availability of Different Amenities

TOWN DIRECTORY

Urban Population :

Tables 16 to 20 appended to this note deal with this section. Table 16 of the town directory shows decadal growth rate, density and sex ratio of urban population in the the district and the state for the last four censuses i.e. 1951, 1961; 1971 and 1981. According to this table 32.97 per cent of the total population of the district is urban against 27.68 per cent of the sate. The urban component of the district has increased from 29.89 per cent in 1951 to 32.97 per cent in 1981. In 1971, however the urban component had declined to 29.17 per cent. The state figures show a net increase in urban component by 5.96 per cent whereas it is only 3.08 per cent for the district during 1951 to 1981. In the matter of urbanisation the district is ahead of other districts in the state. The pace of urbanisation is likely to pick up if relations with Pakistan remain cordial over the years.

Growth-Rate

TABLE 16

Growth, Density and Sex Ratio of Urban Population in the District in Relation to the State

	District						State					
Census year	Total population	Urban population	% Urban-population	Decadal percentage variation in urban Population	Density (population per sq. km)	Sex ratio (No. of females per 1000 males)	Total population	Urban population	% urban population	Decadal percentage variation in urban population	Density (population per Sq.Km)	Sex ratio (No. of females per 1000 males)
1	2	3	4	5	6	7	8	9	10	11	12	13
1951	1,366,555	408,507	29·89	—13·59	3,321	744	9,160,500	1,989,267	21·72	+20·02	N.A.	807
1961	1,534,162	464,024	30·25	+13·59	6,348	803	11,135,069	2,567,306	23·05	+29·06	4,090	817
1971	1,835,500	535,470	29·17	+15·40	7,300	831	13,551,060	3,216,179	23·73	+25·27	4,650	856
1981	2,188,490	721,629	32·97	+34·77	4,576	860	16,788,915	4,647,757	27·68	+44·51	3,877	865

Amritsar district has recorded an urban growth rate of 34.77 per cent against 44.51 per cent of the state during the last decade 1971-81. It would thus be seen that urban growth in the district lags behind that of state by a big margin. A notable feature about the urban growth in the district is that it has fluctuated during the period 1941 to 1981. This is mainly attributable to the partition of the country and uncertainty on account of strained Indo-Pak relations. However, after 1971 conflict the Indo-Pakistan relations are on the way to improvement. As a result the growth rate is likely to improve if normal relations continue. Also with the setting up of a-University at Amritsar and opening of traffic between India and Pakistan the pace of urbanisation is bound to improve as trade and commerce between the two countries gains momentum.

Density:

Density of persons per square km in urban areas has recorded a sharp decline during the decade as density declined from 7,300 in 1971 to 4,576 in 1981. There was a corresponding decline in the state density too which dipped from 4,650 in 1971 to 3,877 in 1981. The reason for this decline is that urban areas have witnessed a sharp increase in area during the decade. The notable feature, however, is that district density (4,576) in 1981 is higher than the state density (3,877), which is mainly due to the location of Amritsar city which is the second largest city of the state. The congestion in Amritsar is proverbial as in certain localities of walled city sunshine is unknown. An effort is being made to reduce pressure on Amritsar city by shifting some industrial units to Goindwal on the one hand and establishing new industires at the new industrial estate of Goindwal. But still there is long way to go in this respect.

Sex-Ratio:

Sex ratio or number of females per thousand males in urban areas has shown a gradual increase from 744 in 1951 to 860 in 1981. However, sizeable increase was reported during 1961—71 the sex ratio jumping from 803 in 1961 to 831 in 1971. The sex ratio figures for the state are higher than the district figures, though marginally. The sex ratio for the state improved from 807 in 1951 to 865 in 1981, the period 1961-71 reporting the highest increase from 817 in 1961 to 856 in 1971. The improvement of sex ratio in the district is attributed to the improvement in Indo-Pakistan relations as people find it safer to keep their families with them in the district.

New Towns/Towns Declassified:

TABLE 17

New Towns/Towns Declassified in 1981 Census

Name of Towns	Population 1981 Census
1	2
(a) Added	
(i) Ajnala	7,506
(ii) Rayya	7,049
(iii) Chola Sahib	5,913
(b) Declassified	Nil

Table 17 shows that since 1971 census 3 towns have been classified as new towns. The new towns are Ajnala, Rayya and Chola Sahib. Ajnala is a tahsil headquarters, whereas Rayya is a fast growing Mandi. Chola Sahib is a religious town requiring some development. No town, however, has been declassifed in the district after 1971 census.

Budget of the Towns:

TABLE 18

Per Capita Receipt and Expenditure in Towns

Class, name and civic status of the town			*Per Capita*								
			Receipt			Expenditure

V	Chola Sahib	N.A.C.	179·27	52·43	126·84	N.A.	N.A.	N.A.	N.A.	N.A.	N.A.
IV	Jandiala	M.C.	52·02	40·71	11·31	45·74	2·82	22·08	17·78	..	3·06
V	Khem Karan	N.A.C.	17·59	15·42	2·17	7·31	3·54	2·63	1·14	..	..
V	Majitha	M.C.	29·84	14·99	14·85	27·87	9·46	0·03	..	8·73	9·65
IV	Patti	M.C.	46·40	31·57	14·83	50·29	15·73	12·85	9·01	0·41	12·29
VI	Ramdas	M.C.	10·91	9·46	1·45	15·04	2·91	3·40	4·12	..	4·61
V	Rayya	N.A.C.	57·03	38·59	18·44	44·97	11·49	15·32	13·05	..	5·11
III	Tarn Taran	M.C.	62·57	39·97	22·60	60·48	..	5·42	26·58	3·63	24·85

Table 18 appended to this note shows per capita receipts and expenditure for 1978-79 for 11 towns of the district. Column 1 of the table lists class, name and civic status of the towns arranged alphabetically. There is 1 class I town (Amritsar), 1 class III town (Tarn Taran), 3 class IV towns (Amritsar Cantt; Jandiala and Patti), 5 class V towns (Ajnala, Chola Sahib, Khem Karan, Majitha and Rayya) and 1 class VI town (Ramdas). Out of 11 towns 1 town (Amritsar) has a municipal Corporation, 1 town (Amritsar Cantonment) has a Cantonment Board, 5 towns (Jandiala, Majitha, Patti, Ramdas and Tarn Taran) have Municipal Committees and the remainig 4 towns (Ajnala, Chola Sahib, Khem Karan and Rayya), have notified areas committees. Columns 2 to 4 of the table deal with receipts and show per capita total receipts, receipts through taxes and receipts from all other sources respectively. However, columns 5 to 10 deal with expenditure and give per capita total expenditure, expenditure on general administration public health and conveniences, public works, public institutions and expendutre on other aspects on the expendi-

ture side respectively. A close scrutiny of the table reveals that details of expenditure in case of Chola Sahib are not available. Hence receipts and expenditure of that town are not comparable. In the remaining 10 towns, there is 1 town (Amritsar Cantt), where per capita total income and expenditure are equal. Out of the remaining 9 towns in 6 towns (Ajnala, Jandiala, Khem Karan, Majitha, Rayya and Tarn Taran) receipts are more than expenditure. However in the remaining 3 towns (Amritsar, Patti and Ramdas) expenditure exceeds receipts. If we examine the figures on the receipt side we find that in as many as 8 towns (Amritsa , Jandiala, Khem Karan, Majitha, Patti, Ramdas, Rayya ad Tarn Taran) receipts through taxes exceed receipt from all other sources but in case of 3 towns (Ajnala, Amritsar Cantt. and Chola Sahib) receipts from other sources exceed receipts through taxes. On the expenditure side, however, we find that expenditue figures for Chola Sahib were not available. In 2 towns (Khem Karan and Patti) expenditure on general administration is maximum in 2 towns (Jandiala and Rayya) expenditure on public health and conveniences is maximum, in 2 towns (Amritsar and Tarn Taran) expenditure is maximum on public works and in 3 towns (Amritsar Cantt; Majitha and Ramdas) expenditure is maximum on other aspects It would, however, be noted that in as many as 5 towns (Ajnala, Jandiala, Khem Karan, Ramdas and Rayya) no expenditure was incurred on public institutions.

Social Studies:

TABLE 19

Schools Per Ten Thousand Population in Towns

Class, name and civic status of town			No. per ten thousand population			
			Higher Secondary/ Inter/PUC/ Junior College	Secondary/ Matriculation	Junior Secondary/ Middle	Primary
1			2	3	4	5
V	Ajnala	N.A.C.	..	2·66	5·33	6·66
I	Amritsar	M. Corp.	0·37	0·55	0·92	2·17
IV	Amritsar Cantt.	C.B.	0·91	..	0·91	0·91
V	Chola Sahib	N.A.C.	6·76	..	3·38	3·38
IV	Jandiala	M.C.	1·84	1·22	6·73	9·79
V	Khem Karan	N.A.C.	1·14	2·28	4·57	7·99
V	Majitha	M.C.	..	2·13	3·19	8·52
IV	Patti	M.C.	1·01	1·01	2·53	4·05
VI	Ramdas	M.C.	2·43	..	4·85	4·85
V	Rayya	N.A.C.	..	2·84	2·84	2·84
III	Tarn Taran	M.C.	0·81	0·54	1·35	2·17
		Total	**0·51**	**0·65**	**1·30**	**2·61**

Table 19 gives details of various types of schools per 10,000 population townwise by class, name and civic status of town alphabetically arranged in the district. The table shows that number of higher secondary/Inter/PUC/ Junior College is maximum (6.76) in Chola Sahib. In 3 towns (Ajnala, Majitha and Rayya) there is no such institution. The minimum number (0.37) is, however, in Amritsar City. The maximum (2.84) of Secondary/Marticulation Schools are located in Rayya town and minimum number (0.54) in Tarn Taran town. However, in 3 towns (Amirtsar Cantt; Chola Sahib and Ramdas) no such institution is located. As regard Junior Secondary/ Middle shcools the maximum number (6.73) is reported in Jandiala town and minimum (0.91) in Amritsar Cantonment. In the number of Primary Schools Jandiala (9.79) leads whereas Amritsar Cantt. (0.91) trails behind other towns. A point worth noting is that it is not necessary that schools in the first two categories must be reported in a particular town, especially in the smaller town as will be seen from table 19. But middle and primary schools are to be found as a matter of routine. However, the larger towns are an exception to this rule.

Medical Facilities

TABLE 20

Number of Beds in Medical Institutions in Towns

Class	Name and civic status of the town		No. of beds in medical institutions per 1,000 population
1			2
V	Ajnala	N.A.C.	6·66
I	Amritsar	M. Corp.	4·00
IV	Amritsar Cantt	C. B.	..
V	Chola Sahib	N.A.C.	0·68
IV	Jandiala	M.C.	0·24
V	Khem Karan	N.A.C.	2·28
V	Majitha	M.C.	..
IV	Patti	M.C.	2·53
VI	Ramdas	M.C.	7·28
V	Rayya	N.A.C.	0.57
III	Tarn Taran	M.C.	5·69
		Total	3·81

Table 20 shows the number of beds in medical institutions in various towns of the district. The table shows that maximum number of beds per thousand population are reported in Ramdas (7.28), followed by Ajnala (6.66). The lowest figure has, however, been reported by Jandiala (0.24), but Rayya (0.57) returns slightly better figures.

Slum Clearance:

In Punjab no slum areas have been notified although certain pockets have been identified separately here and there.

PART XIII A

Village & Town Directory

SECTION I–VILLAGE DIRECTORY

NOTE EXPLAINING THE CODES USED IN THE VILLAGE DIRECTORY

The village directory containing information about each village has been prepared for each tahsil in the ascending order of the census location code number, e.g., location code No. 17/11/3/22; means village No. 22 in tahsil No. 3 of district No. 11 of the state No. 17. It contains information relating to total area of the village in hectares, total population, No. of households, amenities available in the village i.e., educational, medical, drinking water, posts and telegraphs, communication, approach to village, nearest town and distance (in Kms.), and power supply. Besides it gives information regarding staple food, land-use i.e., area under different types of land use like forest, irrigated and un-irrigated cultivable and un-cultivable land. This is further supplemented by the information on places of religious, historical and archaeological interest as also information on copies of newspaper coming in the village and number of motor cycles/scooters, cars/jeeps and tractors available in the village.

Information about the amenities available have been given in columns 5 to 10 of the directory.

(i) Educational facilities have been shown by adopting the following abbreviations :—

P	=	Primary school.
M	=	Junior Secondary or Middle school.
H	=	Matriculation or Secondary school.
PUC	=	Higher Secondary/Intermediate/Pre-university/Junior College.
C	=	College (graduate level and above) like Arts, Science, Commerce etc.
I	=	Industrial school.
Tr.	=	Training school.
AC	=	Adult literacy class/centre.
O	=	Other educational institutions, these may include Sanskrit Pathshalas, Senior basic school, Maktab, etc.

Where figures like P(3), M(2), H(1) etc., occur these denote that the village has three primary, two middle and one matriculation or secondary school.

(ii) Medical facilities have been shown by the use of the following abbreviations :

H	=	Hospital.
MCW	=	Maternity and Child Welfare Centre.
MH	=	Maternity Home.
CWC	=	Child Welfare Centre.
HC	=	Health Centre.
PHC	=	Primary Health Centre.
PHS	=	Primary Health Sub-centre.
D	=	Dispensary.
FPC	=	Family Planning Centre.
TS	=	TS Clinic.
NH	=	Nursing Home.
RP	=	Registered Private Practitioner.
SMP	=	Subsidised Medical Practitioner.
CHW	=	Community Health Worker.
O	=	Others.

Number of institutions, if more than one in any village, have been given in brackets against each.

(iii) The types of the potable drinking water-supply and the sources available in the villages have been indicated by the following codes :

T	=	Tap Water.
W	=	Well Water
TK	=	Tank Water
TW	=	Tubewell Water
HP	=	Hand Pump
R	=	River Water
F	=	Fountain
C	=	Canal
L	=	Lake
S	=	Spring
N	=	Nullah
O	=	Others
NA	=	Information not available.

(iv) Post and telegraph facilities have been shown by adopting the following abbreviations :

PO	=	Post Office.
TO	=	Telegraph Office.
PTO	=	Post and Telegraph Office.
Phone	=	Telephone connections.

(v) Communication facilities have been indicated by the following codes :

BS	=	Bus Stop
RS	=	Railway Station
NW	=	Navigable Waterway (including river, canal, backwater, etc.).

Only public transport like bus, rail and waterway have been considered for this purpose.

(vi) *Approach to village*—This refers to the state of road etc. leading to the village.

This has been indicated by the use of following codes :

PR	=	Pucca Road.
KR	=	Kaccha Road.
NR	=	Navigable River.
NC	=	Navigable Canal.
NW	=	Navigable Waterway (other than river or canal).

(vii) *Nearest town and distance*—The distance in kms. of the nearest town (whether located in the state or in another state) has been given in brackets under column 12.

(viii) *Power Supply*—For this purpose, the following codes have been used under column 13 :

ED	=	Electricity for Domestic purpose.
EAG	=	Electricity for Agriculture.
EO	=	Electricity for Other purpose like industrial, commercial, etc.
EA	=	Electricity for All purposes listed above.

Information relating to places of religion, historical or archaeological interest is given under column 20(a). Information on copies of newspaper coming in the village (N). motor cycles/scooters available in the village (M), cars/jeeps available in the village (C). and for tractors available in the village (T) is also furnished under column 20. The numeral following the alphabet indicates the number of newspapers, motor cycles etc. Uninhabited villages and the villages that have got merged in towns have also been shown under column 20(a).

(ix) *Land Use*—Break-up of area under different types of land use viz. forest, irrigated area, unirrigated area, culturable waste and areas not available for cultivation has been furnished under column 15—19.

(a) Forests :

This includes all lands classed as forests under any legal enactment dealing with forests or administered as forests, whether state-owned or private and whether wooded or maintained as potential forest land. The area of crops raised in the forest and grazing lands or areas open for grazing within the forest has been included under the forest areas. If any portion of such land is not actually wooded but put to some agricultural use, that portion is included under the appropriate heading of cultivated or uncultivated land. In some cases there are instances whether patches of land put to agricultural use within statutarily notified forests are considered as forests by the revenue agency. These are treated as forests.

(b) Irrigated and unirrigated (land use) :

These two columns (cols. 16 and 17) cover all agricultural land and include net area sown with crops and orchards or net cropped area and also current and other fallows. The latter implied all lands which were taken up for cultivation, but are temporarily out of cultivation for a period of not less than a year and more than five years. The columns do not include gross area sown or gross cropped area. Net area sown thus represents the area sown with crops and orchards, counting areas sown more then once in the same year only once.

(c) Culturable waste :

This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once, but not cultivated during the five years or more in succession. Such lands are either fallow or covered with shrubs and jungles which are not put to any use. These have been assessed or unassessed and are in isolated blocks or within cultivated holdings. Lands under thatching grasses, bamboo bushes and other groves for fuel, etc. which are not included under orchards or forests also come under this head. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area have been included in this column.

(d) Area not available for cultivation :

This column (col. 19) includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use.

Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water e.g., rivers and canals and other lands put to uses other than agricultural.

Barren and unculturable lands cover all barren and unculturable lands, like mountains, deserts, etc. Land which cannot be brought under cultivation, except at a very high cost, has been classified as unculturable, whether such area is in isolated blocks or within cultivated holdings.

SECTION II
Town Directory

NOTE EXPLAINING THE CODES USED IN THE TOWN DIRECTORY

The town directory has been compiled in six different statements for all the urban areas of the district. The data on amenities and other aspects have been presented in codes which are explained below :

Statement I

gives the status and growth history of each town in the district.

Class has been introduced in all the statements of town directory to facilitate analysis for purposes of demographic and socio-economic characteristics of towns at the state and all India levels. It has been presented according to 1981 census population of the core town in the following manner :—

Population	*Class*
100,000 and above	.. I
50,000—99,999	.. II
20,000—49,999	.. III
10,000—19,999	.. IV
5,000—9,999	.. V
Below 5,000	.. VI

The civic administration status as in 1980 has been indicated by the following abbreviations. Census town are regarded as having no civic status. Code (C.T.) has been used for census town.

Municipal Corporation	=	M. Corpn.
Municipal Committee	=	M.C.
Cantonment Board	=	C.B.
Notified Area Committee	=	N.A.C.
Census Town (S.A.S. Nagar—Mohali and Talwara)	=	C.T.

Statement II :

Statement II gives for each town, physical aspects and location of towns.

Statement III :

This statement gives municipal finance for each town of the district.

Statement IV :

It gives civic and other amenities. The abbreviations used are indicated below: —

(I) *Road Length*

PR	=	Pucca Road
KR	=	Kucha Road

(II) *System of sewerage*

S	=	Sewer
OSD	=	Open surface drains
BSD	=	Box surface drains
SD	=	Sylk drains
CD	=	Cesspool method
Pt.	=	Pit system

(III) *Method of disposal of night soil*

HL	=	Head loads
B	=	Baskets
WB	=	Wheel barrows
ST	=	Septic tank latrines
S	=	Sewerage

(IV) *Protected Water supply-source and capacity of storage systems*

(a) Sources of water supply:

TW	=	Tubewell water/hand pump
T	=	Tap water
W	=	Well water
TK	=	Tank water

(b) System of storage of water:

OHT	=	Overhead tank
SR	=	Service reservoir
IG	=	River infiltration gallery
BWP	=	Borewell pumping system
PT	=	Pressure tank

Statement V:

This gives medical, educational, recreational and cultural facilities. The abbreviations used are indicated below:

Medical amenities:

H	=	Hospital
D	=	Dispensary
HC	=	Health Centre
FC	=	Family planning Centre
TB	=	T. B. clinic
NH	=	Nursing Home
O	=	Others
A	=	Ayurvedic
U	=	Unani
Hom	=	Homoeopathic

In case of allopathic, no separate code has been given. The information in col. 4 on medical facilities has been presented horizontally in the same line as illustrated below:

H(A-1, 2), D(Hom-2, 1, U-1)

Here H(A-1, 2) represents one Ayurvedic and 2 Allopathic hospitals and D(Hom-2, 1, U-1) represents 2 Homoeopathic, one allopathic and one unani dispensaries. If the medical facility is not available in a town, name of the nearest place (if in the same district) or nearest district (if in the same state) or other state and its distance from the town where the facility is available has been mentioned in column 4.

Educational amenities :

The codes that have been used are as follows:

A	= Arts only
S	= Science only
AS	= Arts and Science only
C	= Commerce only
AC	= Arts and Commerce only
ASC	= Combined for all categories-Arts, Science and Commerce.
L	= Law
SH	= Shorthand
Type	= Typewriting
Sh. Type	= Shorthand and Typewriting
O	= Others
P	= Primary school
M	= Junior secondary or Middle School
H	= Matriculation or Secondary
PUC	= Higher secondary/Intermediate/Pre-university Junior college/'10+2' system whether help in schools or colleges.

If there are more institutions of a type in the town, their number has been given against each in brackets

If any educational facility is not available in the town the name of nearest place (if in the same district) or the name of nearest district (if in the same state) or other state and its distance from the town where this facility is available has been given in brackets.

Recreational and cultural facilities:

The following codes have been used:

PL	= Public library
RR	= Reading room.

Statement VI :

Gives information on trade, commerce, industry and banking for each town of the district.

Appendix to the town directory shows towns of the district which have outgrowths and population of outgrowths.

Primary Census Abstract (General)
Primary Census Abstract (Scheduled Castes)

PART B

PRIMARY CENSUS ABSTRACT (GENERAL)

Primary Census Abstract (Scheduled Castes)

EXPLANATORY NOTE ON PRIMARY CENSUS ABSTRACT

The Primary Census Abstract (PCA) General and Scheduled Castes provides the basic information relating to population data pertaining to 1981 census. It contains the data in respect of areas, number of occupied residential houses and households, total population (including institutional and houseless population),population break up by sex, scheduled castes, literates, main workers classified into four categories of cultivators, agricultural labourers and other workers, marginal workers and non-workers for each village and for each town/ ward-wise.

The district totals given at the beginning of the PCA are followed by break up of rural and urban areas of the district. The data are presented tahsilwise.

The rural PCA presents the data for the villages arranged in ascending order of locations code numbers (assigned to the villages within the tahsil). The urban PCA presents wardwise data for each town. In rural PCA the uninhabited villages and the villages which have got merged in towns have also been indicated. It may be mentioned here that the PCA data provided here has been compiled on the basis of the basic schedules i.e., households schedule and the universal individual slip canvassed during 1981 census operations. The concepts and terms occuring in the PCA are briefly explained here.

Census House :

A census house is a building or part of building having a separate main entrance from the road or common courtyard or staircase etc., used or recognised as a separate unit. It may be occupied or vacant It may be used for a residential or non-residential purpose or both.

Occupied Residential House :

Occupied residential house is a dwelling house and includes a house used partly as dwelling and partly for some other purpose like shop, workshop, factory, etc., but does not include a 'vacant house' where no person was found to be residing at the time of census.

Household :

A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. Examples of unrelated households are boarding houses, messes, hostels, residential hotels, rescue homes, Jails, ashrams, etc. These are called 'institutional households'. There may be one member household, two member household or multi-member household. For census purposes, each of these types is regarded as a 'household'.

Another type of household for census purpose is houseless household which is a household comprising 'houseless person/persons'. A houseless person in census terminology has been defined as :

(i) a person who might be doing domestic service or other work with one or more households but who does not reside in any house and sleeps in the corridors, verandahs or passages in buildings or in the streets ;

(ii) wandering or nomadic tribes found to be staying in temporary huts etc.; and

(iii) beggar, vagrant, tramp, sadhu, fakir etc. who is found on the footpaths, streets, in places like parks, gardens, railway yards, etc.

Scheduled Castes are such castes, races or tribes or parts of groups within such castes, races or tribes as are declared to be scheduled castes by the President of India's orders issued under Article 314 of the Constitution of India.

Literate :

A person who can both read and write with understanding in any language has been taken as literate. A person who can merely read but cannot write, has not been considered as literate. It is not necessary that a person who is literate should have receieved any formal education or should have passed any minimum educational standard.

All children of the age of 4 years or less have been treated as illiterate even if the child has been going to a school and might have picked up reading and writing a few odd words.

Workers and Categories of Workers :

Work may be defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work.

In the economic questions, canvassed in 1981 census, there has been some difference. The 'work' concept in 1961 and 1971 censuses, as opposed to the 'income' or 'economic independence' concept of the earlier census was adopted for 1981 census, but the criterion for classification of persons as workers was changed. While in 1961 and 1971 censuses different approaches, namely, usual status and current status, were adopted with reference period of one year and one week for seasonal and for regular work respectively, at the 1981 census the usual status approach was adopted uniformly for all work.

In 1961, a person qualified as a worker if he had worked regularly during the last season or if he had worked at least for a day in regular (non-seasonal) work during the preceding fortnight. At the 1971 census a person was treated as a worker only if he spent his time mainly in work or if he worked at least for a day in regular (non-seasonal) work during the preceding week. The dichotomy of workers/non-workers of 1961 and 1971 censuses was discarded at the 1981 census and instead a trichotomy of main workers, marginal workers and non-workers was adopted. For main workers the time criterion of engagement in work for the major part of the year, i.e. at least 183 days was adopted. Those who worked for some time during the last year but not for the major part were treated as marginal workers. Those who had never worked during the last year were non-workers. This trichotomy partially permits a comparability of 1981 census economic data with that of 1971 as well as 1961. The main workers of 1981 census can be expected to correspond to the workers of 1971 and the main workers and marginal workers of 1981 together to correspond to the workers of 1961.

Classification of Main Activity :

The main activity of workers has been classified into four categories, *viz.*, cultivator, agricultural labourer, household industry and other worker. These terms are explained below :

Cultivator :

For purposes of the census, a person has been considered working as cultivator if he or she has been engaged either as employer, single worker or family workers in cultivation of land owned or held from government or private persons or institutions for payment in money, kind or share. Cultivation included supervision or direction of cultivation. It has been indicated by abbreviation 'C'

Agricultural Labourer :

A person who worked in another person's land for wages in money, kind or share has been regarded as an agricultural labourer. He/she had no risk in the cultivation but he/she merely worked in another person's land for wages. An agricultural labourer had no right of lease or contract on land on which he/she worked. It has been indicated by abbreviation 'AL'.

Household Industry :

Household industry has been defined as an industry conducted by the head of the household himself/herself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lived in urban areas. The larger proportion of workers in a household industry constituted of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act.

For a person who has returned his/her main activity as engaged in some production, processing, servicing or repair of articles or goods such as handloom weaving dyeing, carpentary, *bidi* rolling, pottery manufacture, bicycle repairing, blacksmithy, tailoring, etc,. It has been ascertained if it is a household industry and if so, it has been indicated by the abbreviation 'HHI' in the space provided for.

Other Workers :

All workers, i.e , those who have been engaged in some economic activity during the last one year have not been categorised as cultivators, or agricultural labourers or in household industry, are 'other workers' 'OW'. The type of workers that came under the category of 'OW' included factory workers, plantaion workers, those in trade, commerece, business, transport, mining, construction, political or social work, all government servants, municipal employees, teachers, priests, entertainment artists, etc.
