PREFACE

This Handbook contains mainly statistical data and is not intended to replace the District Gazetteer which gives a comprehensive account of the district in narrative form. Most of the statistical tables included in the volume are based on materials collected in the 1951 Census, but some non-census statistics have also been included.

2. Before this, District Handbooks containing important census tables and other statistics were published in 1905 and 1916 in the form of statistical supplements to District Gazetteers. These Handbooks did not contain any statistics relating to individual villages. Madras and certain other provinces and Indian States published village statistics of some districts at the 1921, 1931 and 1941 censuses. In Bihar also, there were proposals in 1921 and 1931 for publishing similar statistics, but they did not materialise. The idea of publishing Handbooks like this containing both district tables and statistics of area, population, literacy and livelihood pattern for each village besides other useful statistics relating to the district owes its inception to Shri R. A. Gopalaswami, I.C.S., Census Commissioner of India in 1951. This recommendation was readily accepted by the Government of Bihar who have sanctioned the publication of the Handbooks at their own cost.

3. As already indicated, detailed statistics for villages were not compiled for any district in Bihar before this. The task was formidable, and the compilation and editing had to be done within a limited time simultaneously with the preparation of the State Census tables and report. Every effort has been made to ensure correctness and accuracy of the data and though there are shortcomings, it can be fairly claimed that this Handbook removes a long-felt want for a book of reference containing the basic statistical information for the district and small units down to the mauza.

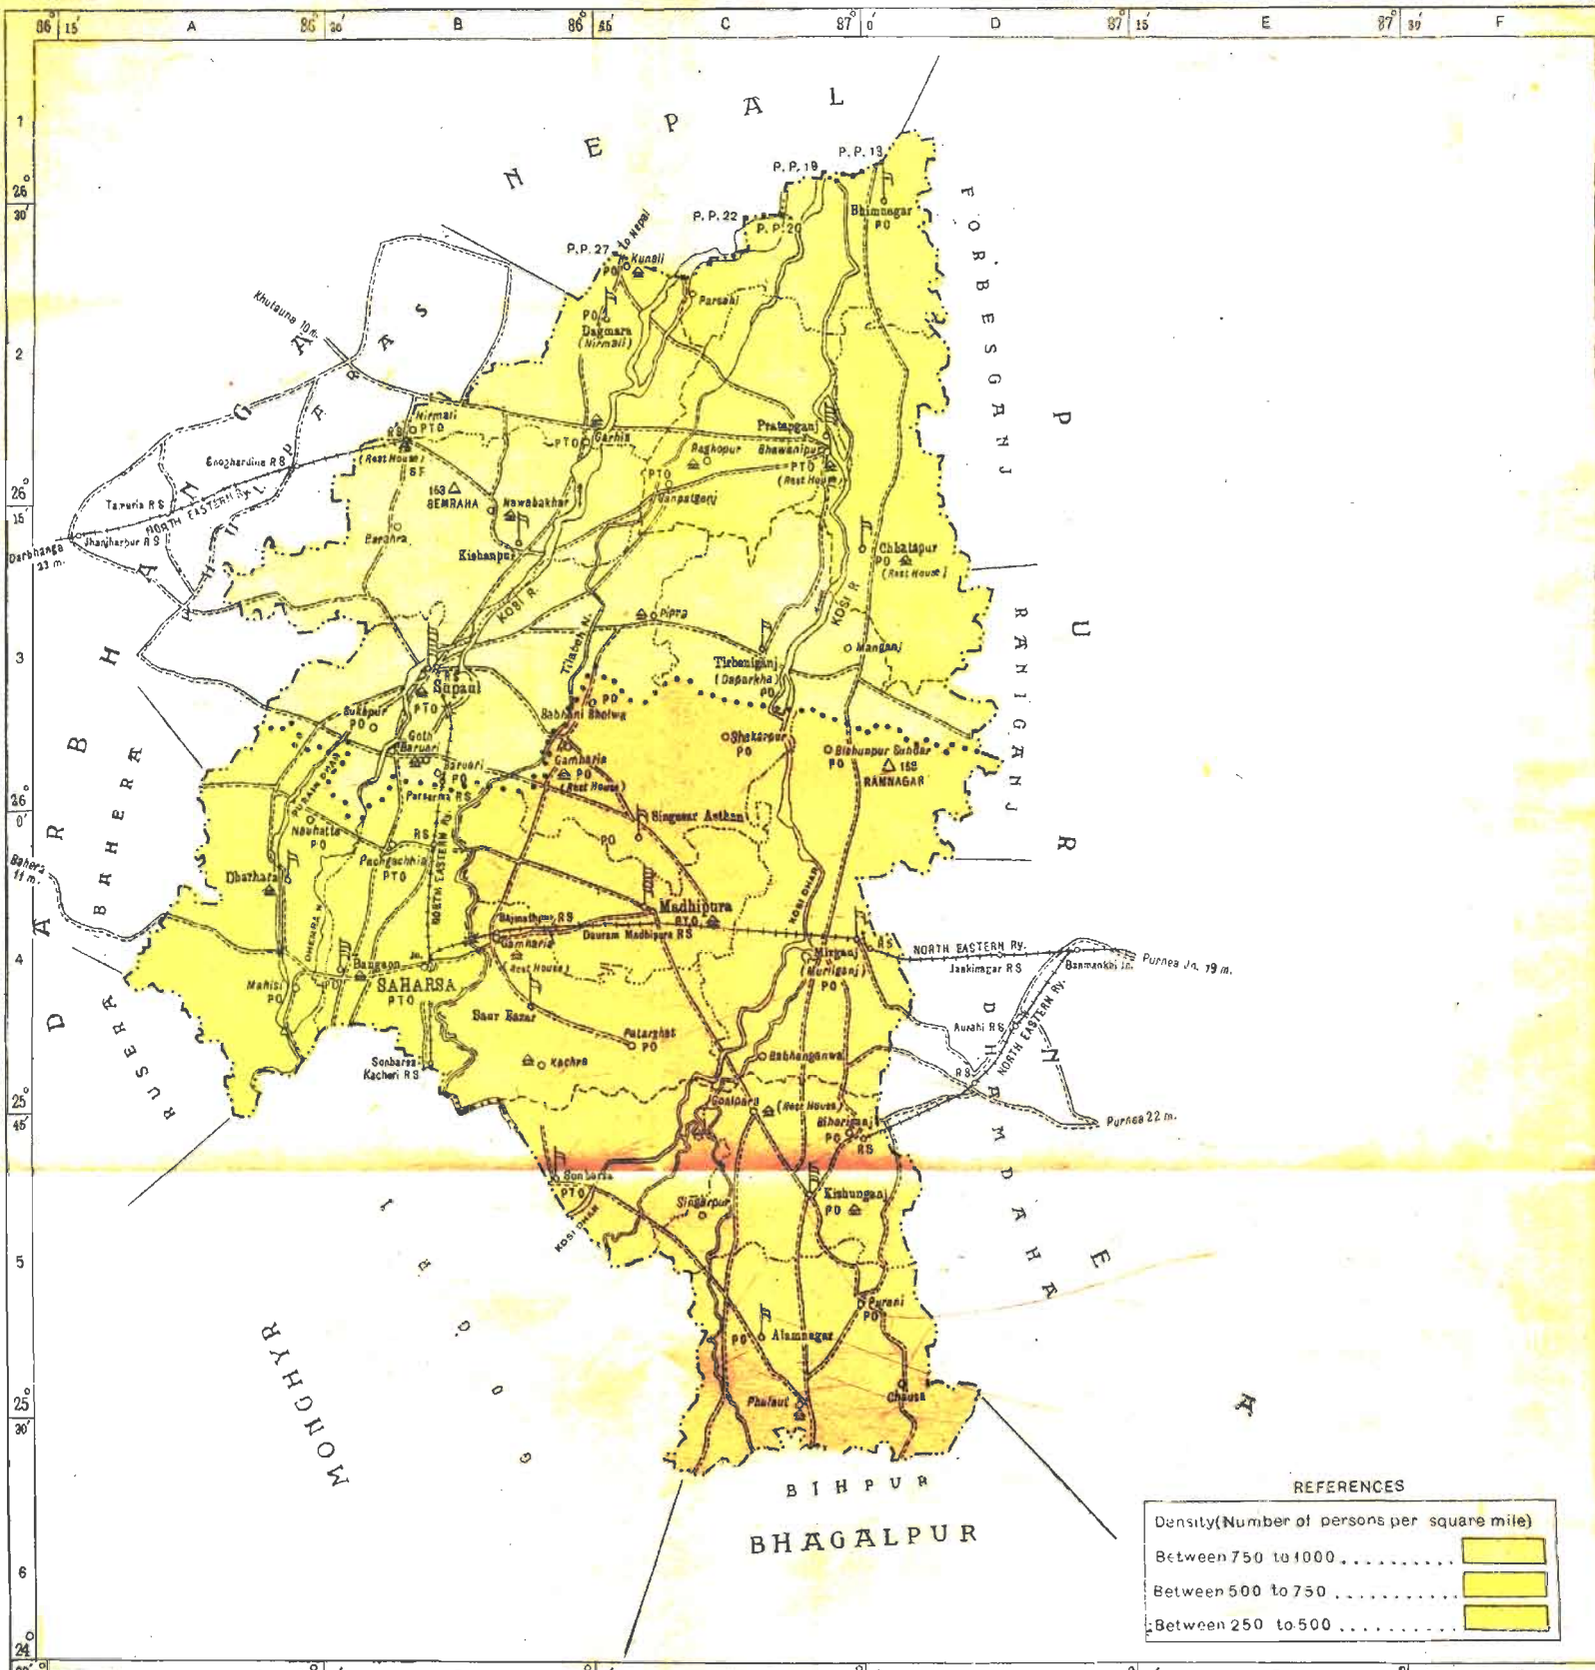

4. The tabulation of the Census statistics included in this volume was done in the Bhagalpur Regional Tabulation office under the able guidance of Shri V. N. Ojha, Deputy Magistrate and Deputy Collector. I desire to acknowledge my obligation to him and the staff named in the margin for the care and interest taken by them in the final checking and the proof reading of this volume. My thanks are also due to Shri Rameshwar Nath, Deputy Magistrate and Deputy Collector who has helped in the editing of the non-census statistics and supervised the proof reading. Lastly, but very far from the least, my thanks are due to Shri S. N. Chatterji, Superintendent, Secretariat Press, Bihar and his staff for the care and interest shown in the preparation and publication of this Handbook.

141. Kishanganj Revenue Thana	Kishanganj ..	1. Kishanganj 2. Sonbarsa 3. Alamnagar

4. *Rural Statistics.*—These are also based on Census data.

5. *Other Statistics.*—Other Statistical tables are based on materials obtained from different departments. Every possible effort has been made to ensure correctness of the data. The sources from which the figures have been obtained have been indicated briefly in notes appended to tables, where necessary.

PART 1

A-I—AREA, HOUSES AND POPULATION

1. This table shows for the district and for each subdivision, the area, the number of towns and villages, the number of occupied houses, and the total urban and rural population, male and female.

2. The total area of the district has been shown in this table as 2,143 square miles only. This has been arrived at by totalling the area figures of constituent units, e. g., police-stations. The Surveyor-General of India has reported the area of the district as 2,092 square miles. The difference between the two figures is not large and can be ignored.

3. "Villages" in column 3 mean revenue villages or mauzas other than those which are wholly absorbed in towns, and uninhabited mauzas.

4. "Houses" in columns 5, 6 and 7 mean buildings or homesteads with separate main entrances and not commensural houses.

B-III—EMPLOYERS, EMPLOYEES AND INDEPENDENT WORKERS IN INDUSTRIES AND SERVICES BY DIVISIONS AND SUBDIVISIONS

This table relates only to economically active persons whose principal means of livelihood is non-agricultural. Economically active persons are such self-supporting persons as derive their income from productive activities.

2. The scheme of classification adopted in this table is different from that of tables 1 and 11. Instead of the four non-agricultural classes, this table gives figures for industries and services classified under 10 Divisions and 88 Subdivisions.

3. Economically active persons have been shown in this table under three categories, namely, (1) Employers, (2) Employees and (3) Independent workers. The numbers are separated by sexes. Totals have been furnished for the District and for each Census tract. Tracts for which the total figure under a Division or Subdivision is nil, have not been shown under such Division or Subdivision.

4. The scheme of classification adopted in this table is based on the Occupational Scheme of the 1931 census, but fairly extensive changes have been made with a view to simplify and improve the method of presentation and to secure comparability of data with the International Standard Industrial Classification adopted by the United Nations Organisation.

C—HOUSEHOLD AND AGE (SAMPLE) TABLES

In this series, there are five tables :

CI—Household (size and composition) ;

C-II – Livelihood Classes by Age Groups ;

C-III—Age and Civil Condition ;

C-IV—Age and Literacy ;

C-V—Single Year Age Returns.

2. All these tables are based on samples drawn randomly. Table C-I, Household (Size and Compostion) is based on sample of 1 in every 25 household. Tables C-II to C-V are based on a 10 per cent sample extracted by taking every sixth slip as the first sample and selecting every tenth slip thereafter. The method of extraction of sample for Table C-I is explained in the fly-leaf of that table.

3. 'Age' means number of completed years on the 1st March, 1951.

4. The size of the sample on which Tables C-II to C-V are based is shown below :—

Persons	Males	Females	
10.0%	10.5%	9.4%	..

C-I.—HOUSEHOLD (SIZE AND COMPOSITION)

This Table shows the distribution of sample households by size, composition of sample households by family relationship and age-group (infants, non-adults and adults) and the pattern of civil condition in sample households of the district with rural and urban breakup.

2. A 'household' includes all the persons living together in the same house and having common mess.

3. One household in every twenty-five was taken as a sample. The samples were selected from National Registers of Citizens. The first sample was obtained by dividing the number of households in each village or town-ward by 25 and adding one to the remainder. Every 25th household thereafter was taken as sample.

The sample households so selected were than divided into two sets ; the first, third, fifth, and so on, sample households in one set and the second, fourth, sixth and so on, in the other.. *Figures in the table are the mean of the figures obtained from the two sets.*

(*i*) Mother Tongue
(*ii*) Bilingualism

D-II—Religion

D-III—Scheduled Castes and Scheduled Tribes

D-IV—Migrants

D-VII—Livelihood Classes by Educational Standards.

D-I—LANGUAGES

(*i*) Mother Tongue

This table shows the number of persons—males and females—in the District speaking different languages as mother tongue. The different languages returned have been grouped for convenience of study and comparability with past census data under the following broad heads :—

1. Indo-Aryan ;
2. Munda ;
3. Dravidian ;
4. Other languages of India ;
5. Asiatic languages foreign to India ; and
6. Eurpean languages

Within each group, the languages have been arranged according to the number of speakers.

2. As at past censuses figures for Urdu have been shown with Hindi in the table. There were 63,802 returns of Urdu.

3. As in 1931 a large number of languages have been returned as mother tongue although the number of speakers of some was small. Languages with small number have been clubbed together under relevent classes

D-VII—LIVELIHOOD CLASSES BY EDUCATIONAL STANDARDS

This table shows for the District and for each tract the number of males and females of erent livelihood classes who are literate or educated.

2. 'Literates' that is person who can read and write but have not passed the Middle or r higher examination, have been shown first. The number of persons who have passed the ldle and higher examination has been shown therefore separately for each grade or standard.

3. For arriving at totals for different standards, only such persons have been counted as e not passed a higher examination. Thus a person with the degree of Master of Arts or ence has been shown only under that head and not also under B. A. or B. Sc. or lower ndards though he has no doubt also passed B. A., B. Sc., and lower examinations.

4. Persons who have passed examinations, such as, Prathama, Madhyama, Sahityaratna, harad, Alim-Fazil, etc., have been shown under "Others".
