PREFACE

This Handbook contains mainly statistical data and is not intended to replace the District Gazetteer which gives a comprehensive account of the district in narrative form. Most of the statistical tables included in the volume are based on materials collected in the 1951 Census, but some non-census statistics have also been included.

2. Before this, District Handbooks containing important census tables and other statistics were published in 1905 and 1916 in the form of statistical supplements to District Gazetteers. These Handbooks did not contain any statistics relating to individual villages. Madras and certain other provinces and Indian States published village statistics of some districts at the 1921, 1931 and 1941 censuses. In Bihar also, there were proposals in 1921 and 1931 for publishing similar statistics, but they did not materialise. The idea of publishing Handbooks like this containing both district tables and statistics of area, population, literacy and livelihood pattern for each village besides other useful statistics relating to the district owes its inception to Shri R. A. Gopalaswami, I.C.S., Census Commissioner of India in 1951 who made a recommendation to this effect to all State Governments in March, 1951. This recommendation was readily accepted by the Government of Bihar who have sanctioned the publication of the Handbooks at their own cost.

3. As already indicated detailed statistics for villages were not compiled for any district in Bihar before this. The task was formidable, and the compilation and editing had to be done within a limited time simultaneously with the preparation of the State Census tables and report. Every effort has been made to ensure correctness and accuracy of the data and though there are shortcomings, it can be fairly claimed that this Handbook removes a long-felt want for a book of reference containing the basic statistical information for the district and small units down to the mauza.

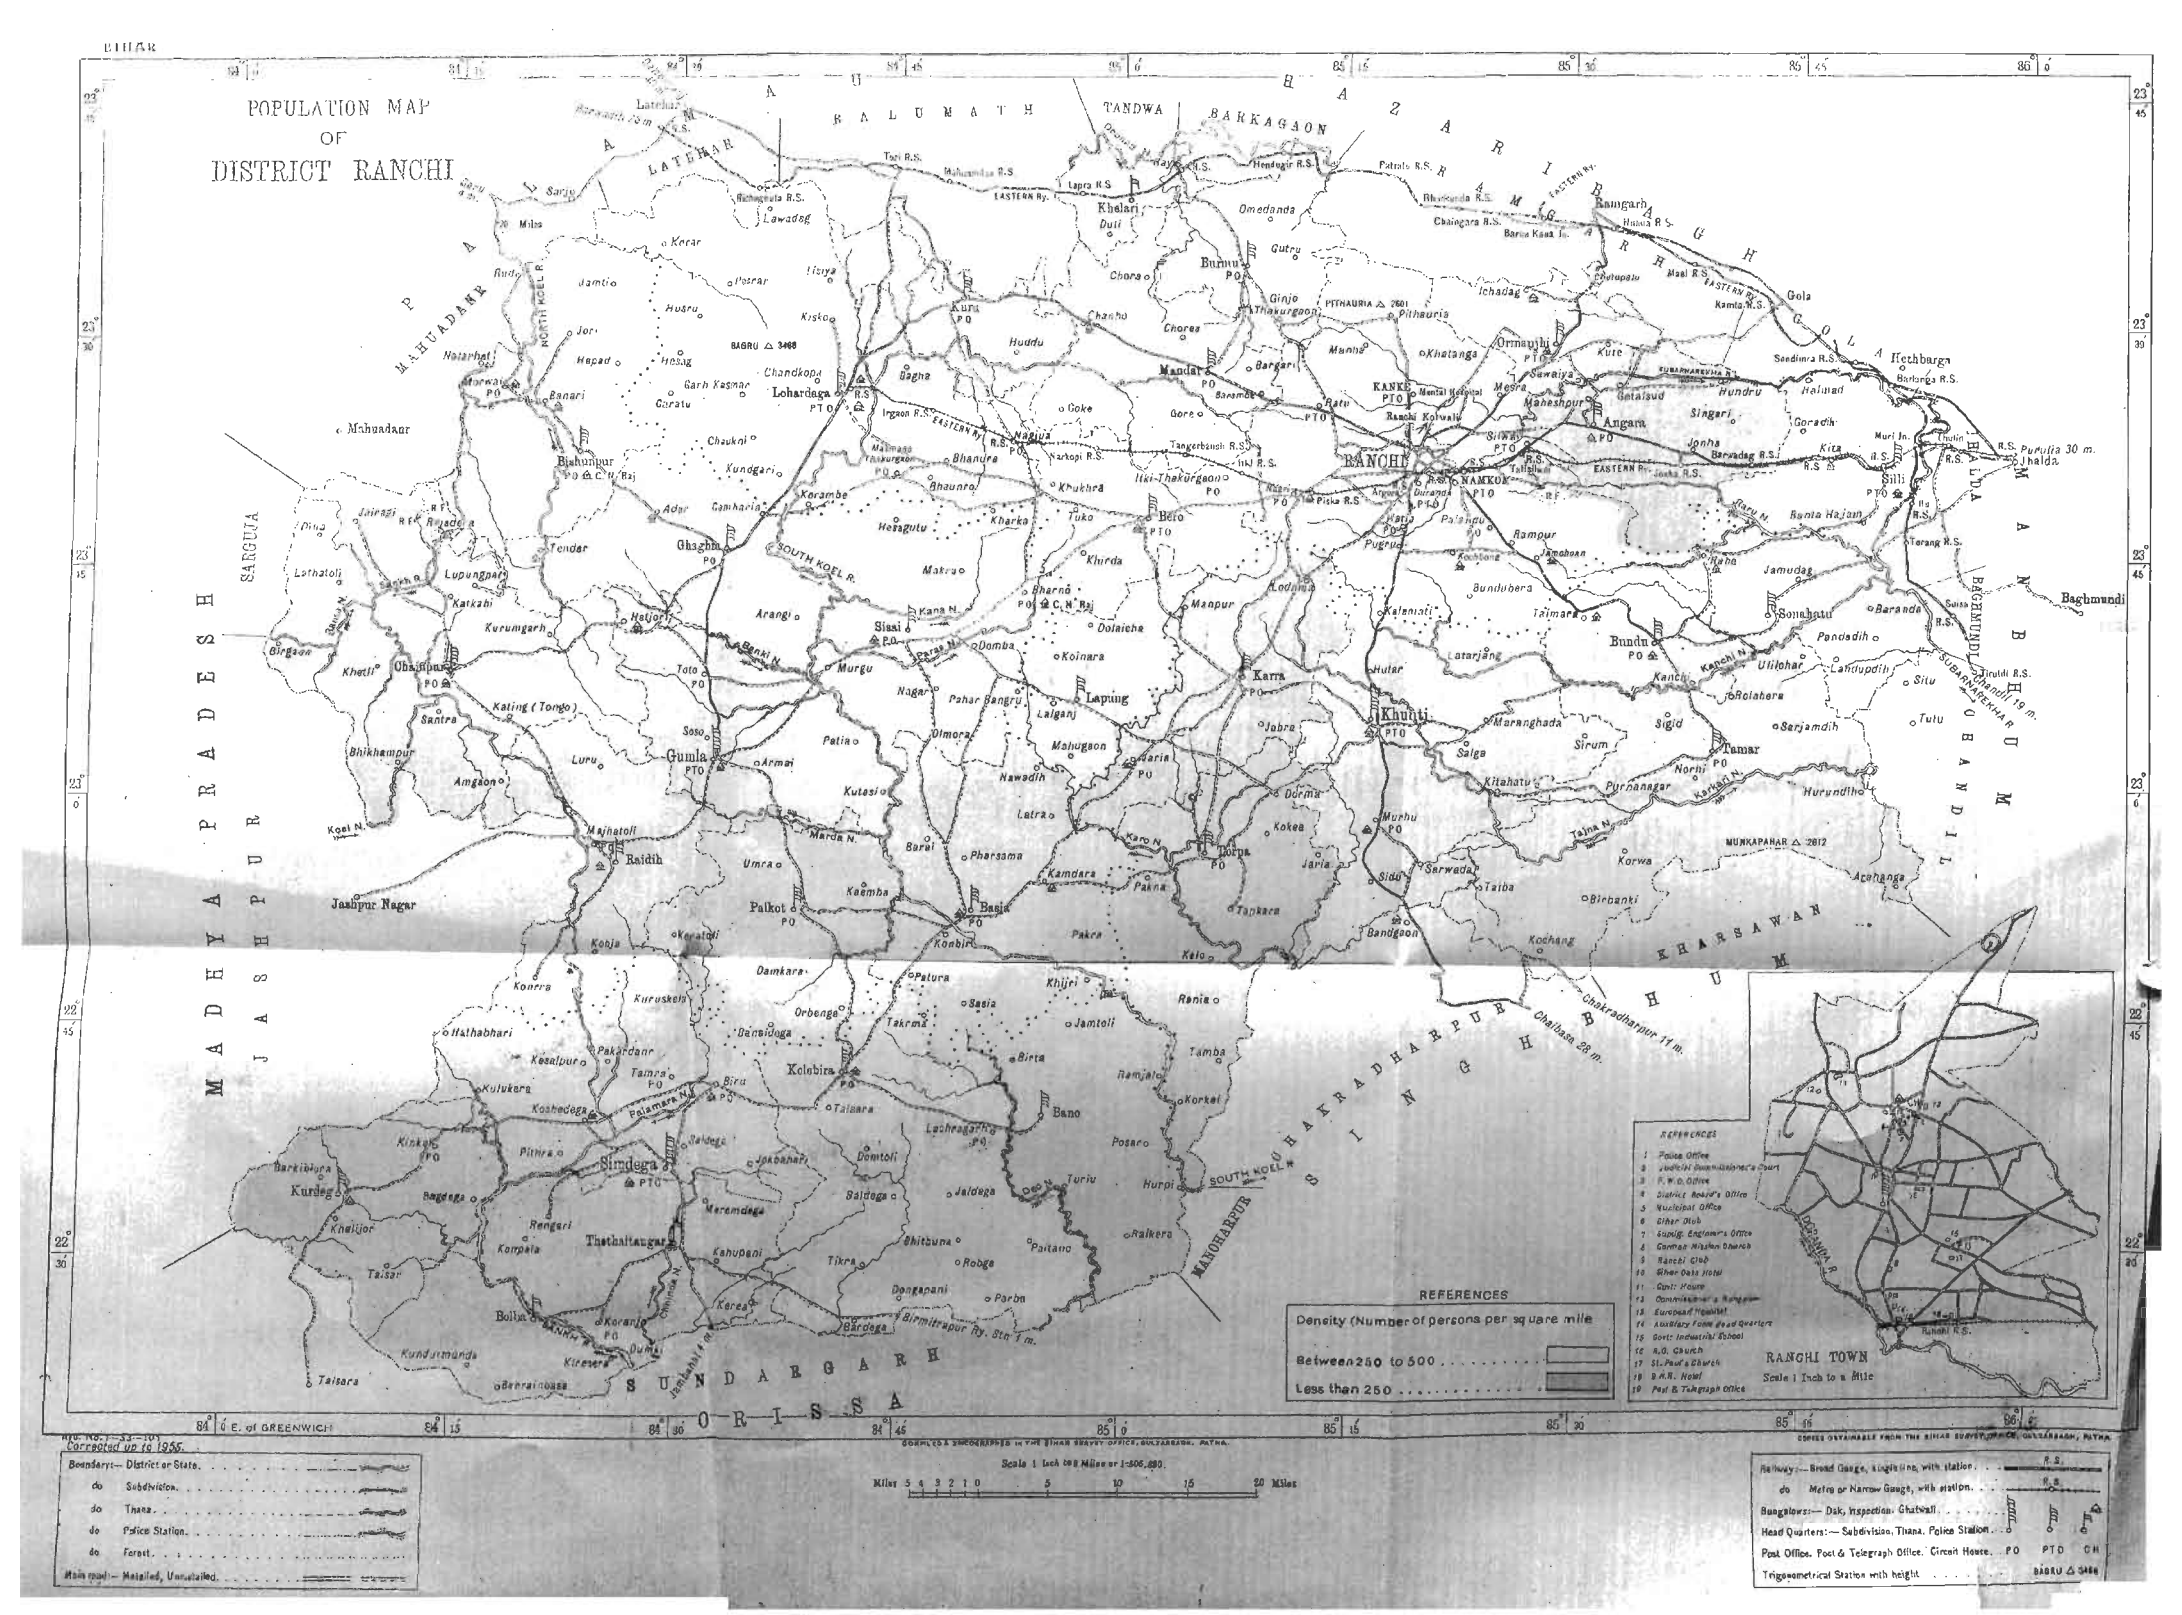

4. The compilation of the census statistics included in this volume was done in the Chotanagpur Tabulation Office at Hazaribagh under the able guidance of Shri Rameshwar Nath, Joint Superintendent of Census Operations, Bihar who has also supervised the work of printing and publication of this volume. I desire to acknowledge my obligation to him and the staff who helped in the work and particularly to the persons named in the margin for the care and interest taken by them in the work of compilation and checking of statistical material. Lastly, but very far from the least, my thanks are due to Shri S. N. Chatterj e, Superintendent, Secretariat Press, Bihar and his staff for the care and interest shown in the printing and publication of this Handbook.

1. Shri Ram Bahadur Singh, Technical Assistant.
2. Shri Mahendra Shanker Sahay, Supervisor.
3. Shri Shree Narain Prasad, Tabulation Clerk.
4. Shri Chaitanya Charan Naik, Tabulation Clerk.

189. All towns and City of Ranchi District.		1. Ranchi 2. Lohardaga 3. Bundu

4. *Rural Statistics*—These are also based on Census data.

5. *Other Statistics*—Other statistical tables are based on materials obtained from different departmehts. Every possible effort has been made to ensure correctness of the data. The sources from which the figures have been obtained, have been indicated briefly in notes appended to tables, where necessary.

PART I

A-I—AREA, HOUSES AND POPULATION

This table shows for the District and for each Subdivision, the area, the number of towns and villages, the number of occupied houses and the total urban and rural population, male and female.

2. The total area of the District has been shown in this table as 6,917 square miles only. This has been arrived at by totalling the figures of constituent units e.g. police-stations. The Surveyor-General of India has reported the area of the District as 7,159 square miles. The difference between the two figures is not large and can be ignored.

3. "Villages" in column 3 mean revenue villages or mauzas other than those which are wholly absorbed in towns, and uninhabited mauzas.

4. "Houses" in columns 5, 6 and 7 mean buildings or homesteads with separate main entrances, and not commensural houses.

5. The urban population of the district is 125,045 ; and the urban-rural ratio is 1:4.

B-III—EMPLOYERS, EMPLOYEES AND INDEPENDENT WORKERS IN INDUSTRIES AND SERVICES, BY DIVISIONS AND SUBDIVISIONS.

This table relates only to economically active persons whose principal means of livelihood is non-agricultural. Economically active persons are such self-supporting persons as derive their income from productive activities.

2. The scheme of classification adopted in this table is different from that of tables 1 and 11. Instead of the four non-agricultural classes, this table gives figures for industries and services classified under 10 Divisions and 88 Subdivisions.

3. Economically active persons have been shown in this table under three categories, namely, (1) Employers, (2) Employees and (3) Independent workers. The numbers are separated by sexes as well as by urban and rural. Totals have been furnished for the District and for each Census tract. Tracts for which the total figure under a Division or Subdivision is nil, have not been shown under such Division or Subdivision.

4. Beggars and vagrants numbering 194 males and 168 females who are included under livelihood class VIII in table B-I do not appear in this table as they derive their income otherwise than through productive activity.

The total of all industries and services in this table plus the number of beggars and vagrants mentioned above is equal to the total number of self-supporting persons of all non-agricultural classes in Table B-I.

5. The scheme of classification adopted in this Table is based on the Occupational Scheme of the 1931 census, but fairly extensive changes have been made with a view to simplify and improve the method of presentation and to secure comparability of data with the International Standard Industrial Classification adopted by the United Nations Organisation.

C—HOUSEHOLD AND AGE (SAMPLE) TABLES

In this series, there are five tables :

C-I—Household (Size and Composition);

C-II—Livelihood Classes by Age-Groups ;

C-III—Age and Civil Condition;

C-IV—Age and Literacy;

C-V—Single year Age Returns.

2. All these tables are based on samples drawn randomly. Table C-I, Household (Size and Composition) is based on sample of 1 in every 25 household. Tables C-II to C-V are based on a 10 per cent sample extracted by taking every sixth slip as the first sample and selecting every tenth slip thereafter. The method of extraction of sample for Table C-I, is explained in the fly-leaf of that table.

3. 'Age' means number of completed years on the 1st March, 1951.

4. The size of the sample on which Tables C-II to C-V are based, is shown below :—

Persons	Males	Females
9.8%	10.2%	9.4%

C-I—HOUSEHOLD (SIZE

This table shows the distribution of sample households by size, composition of sample house-
civil condition in sample households of the district with rural and urban break up.

2. A 'household' includes all the persons living together in the same house and having a

3. One household in every twenty-five was taken as a sample. The samples were selected
of households in each village or town-ward by 25 and adding one to the remainder. Every

The sample households so selected were then divided into two sets; the first, third, fifth, and
Figures in the table are the mean of the figures obtained from the two sets.

D—SOCIAL AND CULTURAL TABLES

In this series, there are six tables—

D-I— Languages.
(*i*) Mother-Tongue.
(*ii*) Bilingualism.
D-II—Religion.
D-III—Scheduled Castes and Scheduled Tribes.
D-IV —Migrants.
D-VII—Livelihood Classes by Educational Standards.

D-I—LANGUAGES

(*i*) Mother-Tongue

This table shows the number of persons—males and females—in the District speaking different languages as mother-tongue. The different languages returned have been grouped for convenience of study and comparability with past census data under the following broad heads :—

(1) Indo-Aryan ;
(2) Munda ;
(3) Dravidian ;
(4) Other languages of India ;
(5) Asiatic languages foreign to India ; and
(6) European languages.

Within each group, the languages have been arranged according to the number of speakers.

2. As at past censuses, figures for Urdu have been shown with Hindi in the table. There were 41,261 returns of Urdu.

3. As in 1931, a large number of languages have been returned as mother-tongue although the number of speakers of some was small. Languages with small numbers have been clubbed together under relevant classes as shown below :—

D-I(*ii*)—BILINGUALISM.

This table gives the number of persons who commonly use another Indian language in their everyday life in addition to (and sometimes largely in supersession of) their mother tongue.

2. Column 2 gives the total number of persons who have as their mother tongue the language mentioned in column 1. Column 3 shows the total number of persons from among those shown in column 2, who use a subsidiary language. The number of persons using different subsidiary languages has been shown in column 4 against each subsidiary language.

D-VII—LIVELIHOOD CLASSES BY EDUCATIONAL STANDARD

This table shows for the District and for each tract the number of males and females of different livelihood classes who are literate or educated.

2. 'Literates' that is person who can read and write but have not passed the Middle or any higher examination, have been shown first. The number of persons who have passed the Middle and higher examination has been shown therefore separately for each grade or standard.

3. For arriving at totals for different standards, only such persons have been counted as have not passed a higher examination. Thus a person with the degree of Master of Arts or Science has been shown only under that head and not also under B. A. or B. Sc. or lower standards though he has no doubt also passed B. A., B. Sc., and lower examinations.

4. Persons who have passed examinations, such as, Prathama, Madhyama, Sahityratna, Bisharad, Alim-Fazil, etc., have been shown under "Others".
