PREFACE

The District Census Handbook of Nadia in the *1961-series* has been divided into three broad parts. Part I introduces the district to the readers in all its aspects, though the main emphasis has been laid on the review of population—its growth and distribution. Several important studies on the temples and crafts of the district and also on the Vaisnavism written by eminent scholars, have been appended to this part.

Part II of this volume deals with the various Census Tables and Official Statistics. The statement showing the village and town-wise list on industrial establishments in the district is a new feature of this Census. As far as possible, an attempt has been made through the various statements presented under the official data to give an epitome of the progress made by the district in various fields of administration during the intercensal period of 1951-61.

In Part III of this volume the basic economic data for the smallest administrative unit—the village have been presented, indicating in addition the basic amenities available in each village. An alphabetical list of villages and towns in each police station has been given preceding the Village Directory to facilitate reference. A notional thana map for each police station showing villages by population sizes and also location of educational, medical and postal institutions in the village has been incorporated.

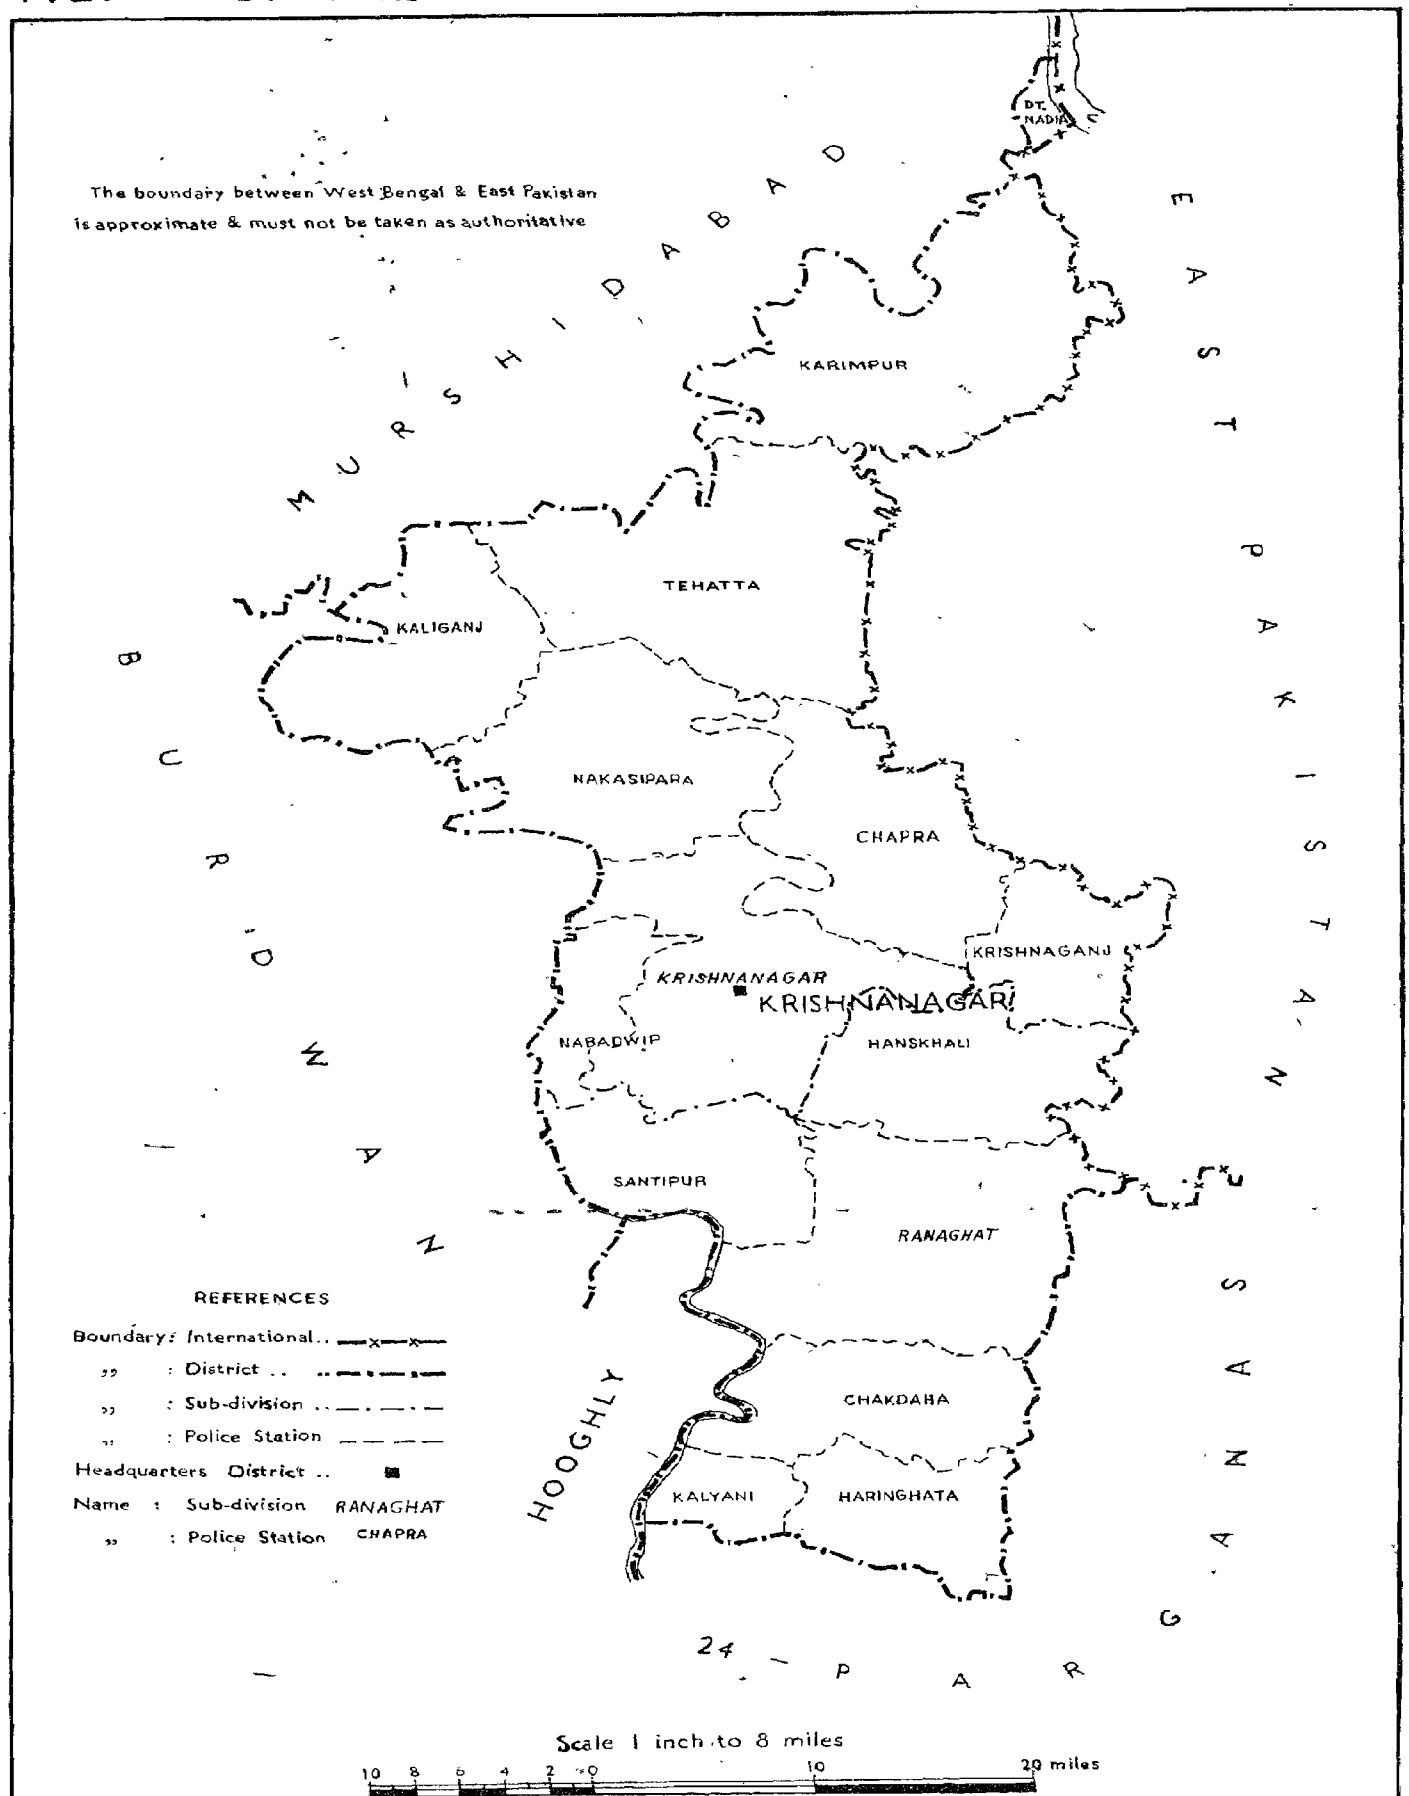

I am deeply indebted to Shri A. Mitra, I.C.S., the Registrar General, India, for having given me this opportunity of editing the *1961-series* of the District Census Handbooks of West Bengal and to Shri A. Chandra Sekhar, I.A.S., Additional Registrar General, India, for his active encouragement and support all through my work.

My grateful obligations are also due to Prof. David J. McCutchion, Prof. Sanat Kumar Bose, Shri Amar Nath Mukherjee and Shri Sukumar Sinha for various help and association with the publication of the volume.

I also desire to acknowledge, with gratitude, the assistance rendered by Sarbashri Pankaj Chakraborty, Aniruddha Sengupta, Gouri Shankar Chatterjee, Krishna Chandra Karmakar, Kamal Dutta, Sishu Lal Saha, Mihir Kumar Das, Amiya Ranjan Kar and Ram Chandra Bhar in seeing the book through the press.

The 16th April, 1967 BISWESWAR RAY

NOTE ON SPELLING

In the notes and tables the spelling of the police stations follows generally that adopted by the Home (Police) Department, and of towns by the Land & Land Revenue Department, Government of West Bengal.

In the District Map appearing in the frontispiece, which has been prepared in the office of the Director of Land Records and Surveys, Government of West Bengal, the names of the police stations have been spelt as per the records of that office.

PART I

INTRODUCING THE DISTRICT

INTRODUCTION

THE DISTRICT OF NADIA took its present shape after the Partition of Bengal, August, 1947. It lies in the heart of the Presidency division of the State. Irregular in shape, this district takes its name from the town of Nadia or Nabadwip, a famous religious centre, situated at present on the western bank of the Bhagirathi river, though the chief town and the administrative headquarters of the district is Krishnanagar on the Jalangi river.

Extending over an area of 1,514 sq. miles (3,921 sq. kms.) the district is inhabited by 1,713,324 persons of which 879,430 are males and 833,894 females as per Census 1961. In terms of population it ranks eighth amongst the districts of West Bengal including Calcutta while in order of size it holds the tenth place. The districts of 24-Parganas, Midnapore, Burdwan, Calcutta, Murshidabad, Hooghly and Howrah are above this district in so far as the population is concerned. The position of the district among others in this respect may be seen in the diagrams given at page (4).

The present area of this district is 1,514 sq. miles according to the Surveyor General of India. Area figures according to the State Survey Department are not available because revisional survey operations and the consequent revision of the Jurisdiction Lists had not been finalised. According to the computation made in the Census Office from the latest available Jurisdiction Lists the total area of the district is 1,509. 1 sq. miles (3,908.5 sq. kms.) of which 1,465.1 sq. miles or 3,794.8 sq. kms. are rural and 44.0 sq. miles or 113.7 sq. kms. urban. In terms of area the districts 24-Parganas, Midnapore, Burdwan, Bankura, Purulia, Jalpaiguri, Murshidabad, West Dinajpur and Birbhum are above the district of Nadia.

The district comprises two subdivisions (virtually three) namely, Sadar North, Sadar South and Ranaghat. Krishnanagar is the headquarters of both the Sadar North and South subdivisions and of the district as well. Ranaghat town is the headquarters of the only outlying subdivision bearing the same name. The Sadar North subdivision consists of the police stations Karimpur, Tehatta, Kaliganj and Nakasipara, and Sadar South of the police stations of Krishnagar, Nabadwip, Chapra and Krishnaganj. The Ranaghat subdivision comprises the police stations of Ranaghat, Chakdah, Haringhata, Hanskhali and Santipur.

The district has twelve towns, six administered by the Board of Municipal Commissioners and the other six are non-municipal urban areas, declared as such for the first time at the Census of 1961. The municipal towns are Krishnanagar, Nabadwip, Ranaghat, Birnagar, Chakdaha, and Santipur. All these towns are in the police stations of the same name, only except the town of Birnagar which falls within the jurisdiction of Ranaghat police station. The Sadar subdivision has only two towns Krishnanagar and Nabadwip, the rest ten being in Ranaghat subdivision. Two town-groups have been conceived of at the 1961 Census, namely, the Ranaghat town-group comprising Ranaghat(M), Birnagar(M) and Taherpur (N.M.), and the Kalyani, Kataganj and Gokulpur Govt. Colony town-group formed by Kalayni(N.M.), Gayespur Govt. Colony (N.M.) and Kataganj and Gokulpur Govt. Colony (N.M.). Kanchrapara Development Area Rural Colony, a non-municipal town of 1951 Census has been merged in Kalyani and Gayespur Govt. Colony towns of 1961 Census. The other two non-municipal towns of the district are Bagula in Hanskhali police station and Phulia in Santipur police station.

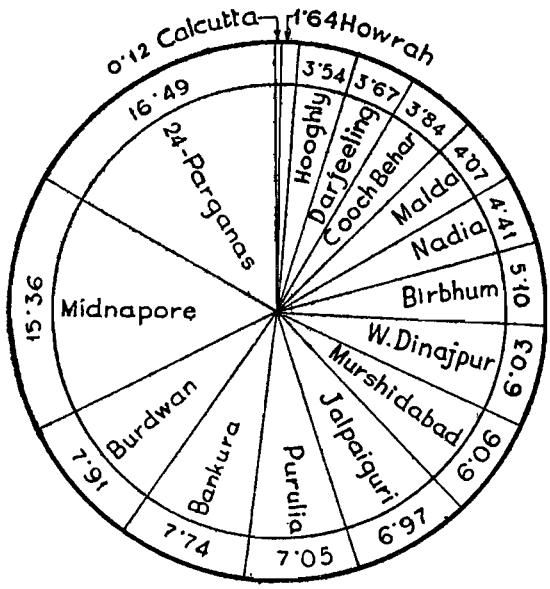

In the district the total number of *mauzas* borne in Jurisdiction Lists is 1,418 of which 101 are uninhabited. The total number of inhabited *mauzas* in the district is 1,282, though in Table A-III in Part II A of this volume the total number of inhabited *mauzas* has been shown as 1,279. Three *mauzas viz.*, Bhepur (J.L. No. 46), Daluipur (J.L. No. 47) and Dhandhania (J.L. No. 48) all within Haringhata police station have been included in Haringhata Firm for administrative convenience and as such no separate population figures have been shown against these *mauzas* individually, and hence the difference of 3 in the number of inhabited *mauzas* between the Tables A-I and A-III. But for all practical purposes this number should be taken as 1,282. In this connection it may also be noted that places like Haringhata Dairy Firm, Dhubulia Camp, Cooper's Camp and Ranaghat Women's Home have been taken as a single unit for the purposes of population record at the Census 1961. The entire urban tract of the district covers a number of 35 *mauzas* in full and 28 *mauzas* in part. The statement below indicates the changes in the number of inhabited villages during 1901-61.

Year	No. of inhabited villages
1901	1,655
1911	1,221
1921	1,228
1931	1,240
1941	1,182
1951	1,238
1961	1,282

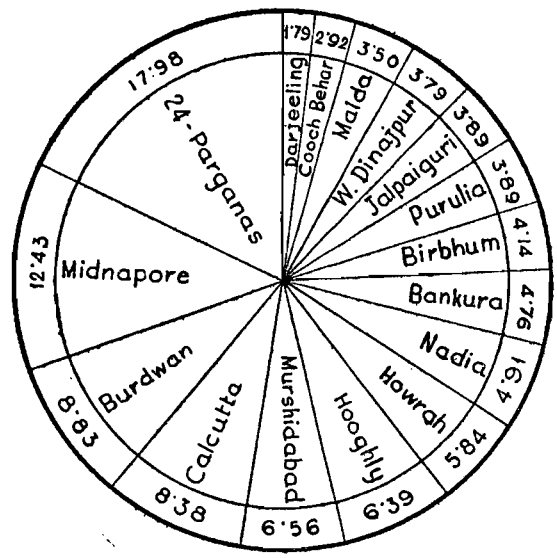

The variations over sixty years in the number of inhabited *mauzas* are largely due to changes in number of *mauzas* by settlement operations, changes

WEST BENGAL

PERCENTAGE OF AREA

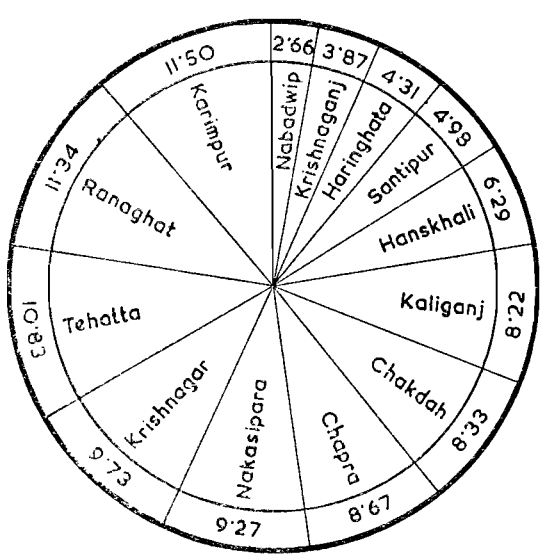

PERCENTAGE OF POPULATION

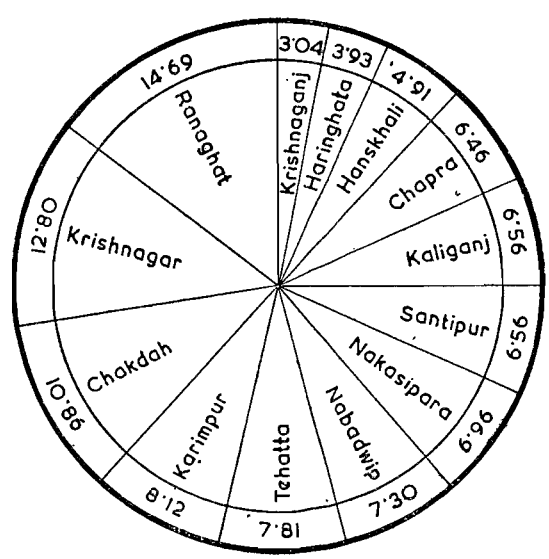

NADIA

PERCENTAGE OF AREA

PERCENTAGE OF POPULATION

in number of inhabited *mauzas* and absorption of rural *mauzas* by towns.

There has been a little change in the area of the district over the last few census decades, as is evident from the following statement.

Year	Area in sq. miles
1881	1,501
1891	1,501
1901	1,501
1911	1,502
1921	1,501
1931	1,511
1941	1,507
1951	1,509
1961	1,514

It is interesting to recall here the various administrative changes that had taken place since the establishment of the British rule in the country.

The Diwani of Bengal was assigned to the East India Company in 1765. In 1769 British supervisors were appointed to superintend the local collection of revenue. The supervisors acted under the control of two Provincial Councils at Murshidabad and Patna. In 1772, the East India Company took over the whole control of the collection of revenue. The chief revenue office was removed from Murshidabad to Calcutta, and a Collector, assisted by a native officer called *Dewan*, was appointed for each district. The system of mixed European and native agency in the districts produced only a partial improvement, and was in its turn abolished, the European Collectors being recalled from the districts in the year 1774, and the collection of revenue being entrusted to native agents called *Amils* under the superintendence of six Provincial Councils. In course of time it was found that the work of supervision could not be adequately carried out by these Provincial Councils, and in 1781 they were abolished, their place being taken by a Committee of Revenue (subsequently the Board of Revenue) with headquarters at Calcutta and European Collectors were again placed in charge of each district. In March 1787, the President of the Board of Revenue submitted proposals to the Board for the "abolition of the present division of the country into 36 different establishments for the collection of the revenues, 8 of which had been created since my departure from Bengal in February 1785," and for the establishment, in place of them, of 23 collectorships. In the proposed rearrangement it was suggested to annex "the greatest part of the Hooghly collectorship to the district of Krishnagar". The proposals were approved by the Board of Revenue and submitted to the Governor General in Council on the 13th March, 1787, and accepted in their entirety at a meeting of the Council held on the 21st of the same month. In accordance with these orders F. Redfearn was appointed as the first Collector of Nadia, with G. Cherry as his assistant. But the district of Nadia at that time contained certain portions of Bongaon subdivision of the present 24-Parganas district and a big slice of the Hooghly district. Up to 1854 Nadia was included in Jessore, but when the office of the Superintendent of Police for the Lower Provinces was abolished in that year a rearrangement of the Commissioners' Divisions was made under which Nadia division was constituted, with headquarters at Krishnanagar. For various reasons the Commissioner did not take his residence at Krishnanagar for more than a year. In February 1855 he applied for permission to remain at Alipur, but after correspondence with the Board of Revenue, the Lieutenant Governor decided that the headquarters of the division must be at Krishnanagar. In 1860, however, the Murshidabad district having in the meantime been included in the Rajshahi division, the headquarters of the Nadia division, later called the Presidency division, were retransferred to Alipur. The pre-partition boundaries of the district took shape around 1870. On the western boundry there were two strips of land included in the district, though they lie at present on the west bank of the Bhagirathi. On the southernmost of these, which has an area of about 11 square miles, lies the town of Nabadwip of Nadia ; the other strip was the island of Agradwip, which lies about 15 miles north of Nabadwip. It is probably that the first strip of Nadia would have been transferred to the district of Burdwan, within the natural boundary of which it now falls, had it not been for the previous history of the river and the anomally which would have been caused by including within another district the town from which the Nadia district derives its name : indeed the order for transfer was actually passed by Sir George Campbell in 1873 ; but was rescinded in the following year by his successor, Sir Richard Temple. The other strip of Agradwip, however, was transferred to the district of Burdwan with effect from the 1st April 1888. There seems no doubt that at one period the main channel of the Bhagirathi passed through the west of both these strips.

Between 1870 and 1947 the district maintained more or less a uniform boundary and jurisdiction until it was split in two by the Radcliffe Award of 1947. Before the Award the district of Nadia extended over an area of nearly 2,800 square miles. As a result of the Award the district lost the bulk of the fertile and prosperous lands contained in the subdivisions of Kushtia, Chuadanga and Meherpur to East Bengal. The portion of the verdict of Sir Cyril Radcliffe dated August 12, 1947, which concerns the definition of the boundary of the district is reproduced below :

"From the point on the river Ganges where the channel of the river Mathabhanga takes off, the line shall run along that channel to the northernmost

point where it meets the boundary between the thanas of Daulatpur and Karimpur. The middle line of the main channel shall constitute the actual boundary. From this point the boundary between East and West Bengal shall run along the boundaries between the thanas of Daulatpur and Karimpur ; Gangani and Karimpur ; Meherpur and Karimpur ; Meherpur and Tehatta ; Meherpur and Chapra ; Damurhuda and Chapra ; Damurhuda and Krishnaganj ; Chaudanga and Krishnaganj ; Jivannagar and Hanskhali ; Mahespur and Hanskhali ; Mahespur and Ranaghat."

On the 14-15th August 1947, the district as at present constituted came to the portion of West Bengal. Subsequently there was disagreement between Pakistan and India over the interpretation of the sentence : "From the point on the river Ganges where the channel of the river Mathabhanga takes off, the line shall run along that channel to the northernmost point where it meets the boundary between the thanas of Daulatpur and Karimpur. The middle line of the main channel shall constitute the actual boundary." Another Boundary Tribunal was appointed towards the end of 1949 and was called the Bagge Tribunal. The Bagge Award, issued early in 1950, on the definition of the above sentence of Sir Cyril Radcliffe, was worded as follows :

"The boundary between India and Pakistan shall run along the middle line of the main channel of the river Mathabhanga which takes off from the river Ganges in or close to the north-western corner of the district of Nadia at a point west-south-west of the police station and the camping ground of the village of Jalangi as they are shown on the air photograph map of 1948, and then flows southwards to the northernmost point of the boundary between the thanas of Daulatpur and Karimpur.

"The point of the off-take of the river Mathabhanga shall be connected by a straight and shortest line with a point in the midstream of the main channel of the river Ganges, the said latter point being ascertained as on the date of the award or if not possible as on the date of the demarcation of the boundary line in Dispute I. The said point so ascertained shall be the south-easternmost point of the boundary line in Dispute I, this point being a fixed point."

The district is, therefore, very new, having started its life in August, 1947. In the same month a number of notifications were issued in the *Calcutta Gazette*, defining the boundary and jurisdiction of Nadia district. These notifications are mentioned below :

Notification No. 2533Pl, dated 28.7.41 regarding transfer of villages of J. L. Nos. 1 to 6 and 15 from P. S. Tehatta to P. S. Kaliganj.

Notification No. 545GA, dated 23.2.48 forming the district of Nadia after partition with the following police stations :

(1) Krishnagar, (2) Chapra, (3) Nabadwip, (4) Kaliganj, (5) Nakasipara, (6) Krishnaganj, (7) Karimpur, (8) Tehatta, (9) Ranaghat, (10) Santipur, (11) Chakdah, (12) Haringhata and (13) Hanskhali.

Notification No. 59GA, dated 17.8.47 regarding formation of Krishnagar subdivision with the following police stations :

(1) Krishnagar, (2) Chapra, (3) Nabadwip, (4) Kaliganj, (5) Nakasipara, (6) Krishnaganj, (7) Karimpur, (8) Tehatta.

Notification No. 61GA, dated 17.8.47, stating that P. S. Karimpur shall consist the following areas :

(a) Areas now included in Karimpur P. S. in the district of Nadia, and

(b) Areas now included in Daulatpur P.S., in the district of Nadia and lying to the west of the River Mathabhanga up to and including the middle line of the present main channel of the said river.

The former notification concerning Ranaghat subdivision having remained undisturbed, it was unnecessary to repeat the notification in August, 1947.

In 1961 three *mauzas* bearing the J. L. Nos. 1, 7 and 12 of Hanskhali police station were transferred to Krishnagar police station by Notification No. 2088 Pl, dated 25th May, 1961.

The river Hooghly forms the boundary between the districts of Hooghly and Nadia at the lower reaches. Its deep stream is constantly changing its course, now swinging to the left and now to the right, cutting away the bank of one side and rebuilding it on the other and all the while forming islands in the middle of its bed. Successive floods and deposits of silt or sand add to these islands and thus gradually raise the *chars* permanently above flood level. Thus with the frequent change of the deep mid-stream of the river and with the consequent throwing up of *chars*, there has been some area adjustments between the districts of Hooghly and Nadia.

These *char* islands are a constant source of litigation. The islanders are often at a loss as to which side they should approach for settlement of disputes. Sometimes they seek redress in respect of criminal or civil matters from the courts of law in the district on the eastern bank and sometimes they approach the police authorities on the western bank for

protection and maintainance of law and order. These anomalies continue until a final settlement is reached on their jurisdiction by the Land and Land Revenue Department.

In fact pending issue of formal notifications by the Government on the final transfer of certain *chars* from Hooghly to Nadia and *vice versa*, it was decided to enumerate these *char* islands on the basis of the *status quo* at the 1961 Census. Due to this arrangement the *mauzas* enumerated by the Nadia authorities have been shown in the Nadia Handbook. The *mauzas* Gournagar, Raninagar and Durllabhpur shown under Chakdah police station in the Village Directory in Part III of this volume illustrate this.

The revenue, police and judicial jurisdiction of the district are conterminous with its geographical boundaries. The District Magistrate and Collector is in over-all charge of the district administration. He is aided by two Additional District Magistrates. One of the Additional District Magistrates is in immediate charge of the revenue administration of the district. There is a Subdivisional Officer at Sadar North and Sadar South each and another at Ranaghat. The sanctioned strength of the Executive Officers at different stations are : nine Officers of the West Bengal Civil Service and four Officers of the Junior Civil Service at Sadar subdivision, and three of the West Bengal Civil Service and one of the Junior Civil Service at Ranaghat. But in August 1965 there were seven W.B.C.S. Officers and four W.B.J.C.S. Officers at Sadar, and three Deputy Magistrates and four Sub-Deputy Magistrates at Ranaghat.

There is a District and Sessions Judge at Krishnanagar. There is also an Additional District Judge stationed at Krishnanagar. The Superintendent of Police is in charge of the police administration of the district. He is aided by an Additional Superintendent of Police and two Deputy Superintendents of Police. There is a Subdivisional Police Officer in charge of Ranaghat subdivision.

There are sixteen Development Blocks covering the thirteen police stations of the district. They all work under the supervision of the Special Officer, Planning and Development, who is a member of the West Bengal Civil Service. The Special Officer works under the control of the District Magistrate. There is a Special Officer for Tribal Welfare in the district belonging to the West Bengal Junior Civil Service. The Additional District Magistrate (General) is in immediate charge of the excise administration of the district. He is assisted by one Superintendent of Excise who belongs to the West Bengal Excise Service. The Superintendent of Excise is himself assisted by three Range Inspectors in charge of different units.

PHYSICAL ASPECTS

1. General Description

The district of Nadia lies between 22°53′ and 24°11′ N. latitude and 88°09′ and 88°48′ E. longitude. The chief town Krishnanagar is situated on the Jalangi river in latitude 23°24′ N. and longitude 88°31′ E.

With a territory extending over 1,514 sq. miles the district is bounded on the north and north-west by the district of Murshidabad. The district of Kushtia in East Bengal forms the boundary on the north-east. In the west the river Bhagirathi except for a small strip of country around Nabadwip town forms the boundary of the district with Burdwan and Hooghly. In the south and the south-east the district is bounded by 24-Parganas. In shape the district is irregular, lying north to south.

2. Natural Configuration

The Nadia district is a large alluvial plain stretching southwards from near the head of the delta formed by the successive rivers into which the Ganges has from time to time distributed itself. As to the formation of this delta, the following remarks of Dr. Thomas Oldham recorded in the proceedings of the Asiatic Society of Bengal, 1870, page 47, may be quoted :

> I suppose no one will hesitate to acknowledge that the whole of the country, including the Sundarban proper, lying between the Hooghly on the west and the Meghna on the east is only the delta caused by the deposition of the debris carried down by the rivers Ganges and Brahmaputra, and their tributaries. It is also equally well known that in such flats the streams are constantly altering their courses, eating away on one bank and depositing on the other, until the channel in which they formerly flowed becomes choked up, and the water is compelled to seek another course. It is also certain that in this peculiar delta the general course of the main waters of the Ganges has gradually tracked from the west towards the east, until of late years the larger body of the waters of the Ganges have united with those of the Brahmaputra and have together proceeded to the sea as the Meghna. Every stream, whether large or small, flowing through such a flat, tends to raise its own bed or channel by the deposition of the silt and sand it holds suspended in its waters, and by this gradual deposition the channel bed of the steams is raised above the actual level of the adjoining flats. It is impossible to suppose a river continuing to flow along the top of a raised bank, if not compelled to do so by artificial means, and the consequence of this filling in and raising of its bed is that, at the first opportunity, the stream necessarliy abandons its original course, and seeks a new channel in the lower ground adjoining, until after successive changes it has gradually wandered over the whole flat and raised the entire surface to the same general level. The same process is then repeated, new channels are cut out and new deposits formed.
>
> Bearing these admitted principles in mind, look to the delta of the Ganges and Brahmaputra. The Ganges river emerging from its upper levels round the Rajmahals Hills, and prevented by their solid rocky barrier from cutting further to the west, sought its channel in the lower ground adjoining, and originally the main body of its waters flowed along the general course now indicated by the Bhagirathi and Hooghly. But gradually filling up this channel, it was again compelled to seek a new course in the lower, because as yet comparatively unfilled-in, ground lying to the east. And the same process being repeated, it wandered towards the eastern. If this progress eastwards was allowed to be sufficiently slow to admit of the gradual filling in of the country adjoining, the delta was formed continuously up to the same general level, and the larger streams or channels passing through this flat to the sea became unavoidably diminished in size and in the quantity and force of the water they carried, the main body passing around further to the east, and having its course in the channels successively formed there. I need not here point out the successive stages in the formation of the delta, or shew how these have been exactly paralleled by similar change in the course and deposits of the Brahmaputra and the other rivers which unite with the Ganges.

Revd. J. Long, in an article entitled "The Banks of the Bhagirathi," and published in volume VI, December 1846, of the *Calcutta Review*, writes thus : "We name this article the banks of the Bhagirathi, though some Europeans call the river as far as Nudiya the Hugly ; but Hugly is a modern name given to it since the town of Hugly rose into importance ; the natives call it Bhagirathi, because they say it was the channel Bhagirath cut in bringing the Ganges from the Himalayas to Ganga Sagar. This name recalls, what is believed to be a fact, that the Ganges itself formerly ran by Katwa, Tribeni, and not as it does now into the Padma ; our reasons are, the natives attribute no sanctity to the waters of the Padma, thinking the Bhagirathi to be the true bed of the river ; hence the water flowing by Bishop's College is not esteemed holy, as they say that the site of Tolly's Nala was the ancient bed ; there are no places of pilgrimage along the banks of the Padma, while on the Bhagirathi are Tribeni, Sagar, Nudiya and Agradip. Dr. Buchanan states on that subject : 'I think it not unlikely that on the junction of the Kosi with the Ganges, the united mass of water opened the passage now called Padma, and the old channel of the Bhagirathi from Songti (Suti) to Nudiya was then left comparatively dry. In this way we may account for the natives considering that insignificant channel as the proper continuation of their sacred river, as they universally do, a manner of thiking that, unless some such extraordinary change had taken place, would have been highly absurd.' The names of places near the Bhagirathi ending in *dwip* island, *danga* upland, *daha* abyss, *sagar* sea, seem to indicate that a large body of water formerly flowed near them."

The country is flat and the general aspect is that of a vast level alluvial plain, dotted with villages

and clusters of trees and intersected by numerous rivers, backwaters, minor streams and swamps. The soil is agriculturally classed as high land and bears cold weather crops as well as rice. In the west of the district is the Kalantar, a low lying tract of black clay soil which stretches from the Murshidabad district through the gap in the north-western boundary between the Jalangi and Bhagirathi, down into the Kaliganj and Tehatta thanas. This tract bears only winter rice and is specially liable to famine when the monsoon fails ; it is also liable to serious injury from inundations from the Bhagirathi when the Lalitakuri embankment in the Murshidabad district gives way.

3. River System

At present all the Nadia rivers may be described as off-shoots of the Padma, or main channel of the Ganges, but it seems clear that at one time the Ganges found its way to the sea along the course of the Bhagirathi, and in those days, before the Padma broke its way to the eastward and intersected the drainage of the Darjeeling Himalayas, there must have been some earlier streams to carry that drainage to the sea, of which the Bhairab is said to have been one. Now-a-days, however, all the drainage of Northern Bengal is intercepted by the Padma before it reaches Nadia.

3.1 The Jalangi—The Jalangi leaves the Padma at the extreme north of the district, and after forming the greater part of the north-western boundary, passes within the district at a point some miles north of Tehatta. Thence it pursues a tortuous course in a southerly direction until it reaches Krishnagar, from which point it proceeds due west until it falls into the Bhagirathi opposite the town of Nabadwip.

3.2 The Bhagirathi—The Bhagirathi impinges upon the district near Plassey, and for some distance, forms its western boundary. It takes the name of the Hooghly from its junction with the Jalangi opposite Nabadwip town. In its upper reaches it is at present a comparatively insignificant stream, but the surrounding country gives evidence of the vast size which it attained, when it formed the main bed of the Ganges, the name of which is still applied to it by the villagers along its banks.

3.3 The Mathabhanga—The Mathabhanga or Hauli leaves the Padma about ten miles below the point where the Jalangi diverges from it. It flows first in a south-easterly direction as far as Hat Boalia, where it bifurcates, and one branch, which is thereafter known as the Kumar or Pangasi, proceeds, in the same direction, past Alamdanga up to the boundary of the district which it forms for a few miles until it passes into Jessore, while the other branch pursues a very tortuous course, the general trend of which is to the south, until, after passing Chuadanga, it reaches Kissengunge, east of Krishnagar, where a second bifurcation takes place, the two resulting streams being known as the Churni and Ichhamati, and the name of the parent river being lost.

3.4 The Chhurni—The Churni passes in a direction slightly west of south, past Hanskhali and Ranaghat and falls into the Hooghly between Santipur and Chakdah.

3.5 The Ichhamati—The Ichhamati flows in a south-easterly direction and after forming the boundary of the district for a few miles passes into the Bongaon subdivision of 24-Parganas district.

3.6 Nadia Rivers—The following is an account of the Nadia rivers very nicely compiled by A. Mitra in his celebrated 1951 Handbook and is borrowed from that book. The whole district is a network of moribund rivers and streams, but the Bhagirathi, the Jalangi and the Mathabahga are the three which have been for more than a century, and still are distinctively known as the "Nadia Rivers." Until the advent of the railways, these waters-courses afforded the regular means of communication between the upper valley of the Ganges and the seaboard. Ever since the British occupation of the country much difficulty has been experienced in keeping them open for navigation throughout the year. They have, when left to themselves, been a very sluggish current which fails to carry off the large quantities of silt which they receive from the Ganges. In 1781 Major Rennell recorded that they were not usually navigable in the dry season. Captain Colebrook, in a memoir on the course of the Ganges (1797), writes thus : "The Bhagirathi and Jalangi are not navigable through during the dry season. There have been instances of all these rivers continuing open in their turn during the dry season. The Jalangi used formerly to be navigable during the whole or greater part of the year. The Bhagirathi was navigable in the dry season of 1796. The Mathabhanga when surveyed in 1795, was navigable throughout in the dry season for boats of a moderate burden. This year (1797), however, I was informed that the passage was no longer practicable for boats proceeding to Calcutta. Experience has shown that none of these rivers are to be depended on". Early in the nineteenth century the Mathabhanga appears to have been more easily navigable than either the Jalangi or the Bhagirathi, and it is said to have continued open every year from 1809 to 1818. In 1813 measures were taken towards improving its channel, and a toll was established to defray the expense of the work. Very little good, however, appears to have resulted from the effort then made, for in 1818 "the obstructions had become so many and dangerous, as to cause the wreck of innumerable boats, and to entail heavy losses on account of demusrage paid for detention of ships waiting expected cargoes. The merchants of Calcutta in

that year urgently petitioned Government that steps should be taken for remedying an evil from which the commercial interest suffered too severly."

In order to allow the ordinary large traffic-boat of 250 to 300 maunds to pass by this route, there must be a minimum depth of not less than 2½ or 3 feet. This amount of water can of course always be obtained during the rains from the middle of June to October. But during the other seven months of the year, obstructions and shoals form, which render navigation always uncertain, and often impossible, by the beginning of February. In 1819-20, C. K. Robison was appointed Superintendent and Collector of the Mathbhanga, and he succeeded in clearing the mouth of the river, where it leaves the Ganges in the north of the district, from the sand banks which had formed over sunken boats and timber. The channel was also narrowed by means of *bandhals* described below, and the river rendered navigable from its head to the point where the Kumar branches off to the east. This river carried away five-sixths of the supply of water from the Mathabhanga, and an attempt to divert a portion of its current into the Mathabhanga proved unsuccessful. Shortly afterwards, C. K. Robison was succeeded in his office by a Mr. May, who conducted the duties over twenty years, and first directed his attention to the damage caused by the numerous trees which were allowed to grow on the river side, and which fell into the stream wherever the waters cut into the banks. Many wrecks took place every year from boats running against these fallen trees, and Captain Lang states that in 1820 the number of sunken *sal* timber logs was incredible. In a single year timber rafts to the value of a lakh of rupees are said to have been lost. During 1820 and the following year, three hundred sunken timbers and many boats and trees were removed from the bed of the river, some of them being buried to a depth of twelve feet in the sand. During 1820-1, the upper channel of the Mathabhanga was deepend by means of *bandhals*, constructed as follows:— At the shoals, to be operated on, line of bamboo stakes is run out from each bank of the river. These stakes gradually converge so as to force and concentrate the current into a narrow channel. They are well driven into the bed of the river, supported by struts, and fastened at the top by longitudinal ties. Large mat screens (*jhamps*) are then let down as far as possible, and well secured to the bamboo frame-work. The first result from the *bandhal* is a great velocity within the channel it is intended to creat, and a diminished current on both sides. Owing to the increased pressure below, the mat screens (*jhamps*) can never be sunk quite to the bottom of the river, and through the space left there the water rushes with immense force in a circular direction, cutting away the sand, and carrying it under the matting and behind the line of bamboos, where the stream being sluggish, constant deposit takes place. The force of the current in the centre of the channel is at the same time gradually cutting and bearing down stream the sand in its course, so that by these two actions the depth is increased in the channel enclosed by the *bandhal*, while on each side of it towards the bank, large collections of sand take place, materially narrowing and deepening the stream. The depth of the channel within the *bandhal* scarcely varies more than an inch or two, which is remarkable ; and although the rivers may fall two or three feet after the *bandhals* are constructed, and shoal proportionately at other points, the uniform depth, be it three, four or five feet, is generally maintained within their channels till the next rainy season. All that is necessary is to drive the bamboo piling further down as the water cuts away the sand, and to sink the *jhamps* from time to time to suit the fall of the river. It sometimes happens that the weight of gravel and sand swept away by the current within the *bandhal* sinks immediately on getting beyond it, thus forming another shoal which requires the construction of another *bandhal* to remove it.

These works, carried on in the upper channel of the Mathabhanga during the dry season of 1820-1, rendered the river navigable till the end of March, from its mouth to the entrance of the Kumar, at which point further measures were undertaken to divert a portion of its current into the Mathabhanga. A cut, 1,540 yards in length, was made to shorten one of the bends of the latter river, and to increase the fall ; a caisson was also sunk, together with a number of old boats, across the mouth of the Kumar. These operations involved an expenditure of Rs. 14,000. When the river fell again to its usual dry season level, it was ascertained that the works had not been without effect, that the entrance of the Kumar had shoaled considerably, and that the depth of the Mathabhanga had increased in proportion. Throughout 1821-2, a depth of three feet of water was always to be found at the worst shoals, and boats of three hundred maunds burden passed without difficulty. In the beginning of 1823, a dredging machine worked by oxen was supplied at a cost of Rs. 10,400. In the meantime, however, the condition of the river had altogether changed, and although the dredge only drew 2 feet 4 inches of water, it was conveyed up the river with difficulty, and the entrance was found so shallow from the masses of sand which had been thrown up across the mouth by the Ganges, that the machine could not be used. Having found the Mathabhanga so obstructed, and seeing no prospect of improving it, Mr. May proceeded in 1823, by order of Government, to inspect the Bhagirathi and Jalangi. The channel of the former was discovered to be greatly obstructed by trees which had fallen into its bed during the two preceding inundations. At the Jalangi head, a little to the west of the Mathabhanga entrance, sufficient water was found for boats of three hundred maund burden, there being a depth of ten feet at the entrance, and only one shoal of

three feet in its course. Here a *bandhal* was erected, and a depth of four feet secured. The Bhagirathi head, which turns off from the Ganges in Murshidabad district had shifted about half a mile to the east of its former position before the rains, and in the month of December was even more favourable than the Jalangi ; for, although there was less water at the entrance, yet it lay so well open to the stream of the Ganges with no detached sand-banks near, that there was every prospect of its being kept open for large boats throughout the season. The dredging boat was therefore despatched to this river. During 1824, Mr. May was appointed to the additional charge of the Bhagirathi and Jalangi, and a regular establishment was sanctioned for the three rivers. A great change, however, took place soon afterwards in the Bhagirathi. At the end of the year it was found that the entrance of the river had shifted five miles farther westward. Its new head lay quite open to the direct current down the Ganges which forced itself with such violence down it, that its breadth rapidly enlarged from two hundred and fifty feet to half a mile. Across this entrance there was a depth in January, 1825, of twenty-two feet, the shoals down the river were easily removed by means of *bandhals*, and a depth of three feet was maintained throughout the dry season from the Ganges to Nadia.

The favourable condition of the Bhagirathi head did not last long. In 1825 the Ganges altered its course, and the entrance to the Bhagirathi shifted eight miles to the south-east. The river became wholly unnavigable as early as November, and it was found that it would be useless expenditure to attmept to improve it. In spite of a second dredging boat, which was supplied at a cost Rs. 15,000, all the rivers became closed at the beginning of March, 1826.

During the following five years, 1826-7—1830-1, all the rivers, with the exception of the Jalangi, continued in an unsatisfactory state as regards navigation, although the usual operations were vigorously carried on. In 1826-7, the sandbank at the mouth of the Bhagirathi was found to have increased in breadth and length. After the rains of 1826 it extended far below the entrance, and the river became impassable, except by small boats, before the end of December. During the inundations of 1829, however, another change took place at the head of the Bhagirathi, by which the entrance was removed three and a half miles from its position of the previous year, and the old channel of 1823 re-opened ; but its course for some miles being through a loose sandy soil, shoals soon began to appear, and before January, 1830, it again became impassable.

The Jalangi, however, was in a much more favourable state. In 1826-7 it was closed for a portion of the year. In 1827-8 it continued navigable for boats of two feet draught during the greater part of the dry season, and in the two following years, by constant attention to the usual works for removing obstacles, it remained navigable for small boats throughout the dry season. In 1830-1 the river continued navigable for large boats to the end of December, and for boats drawing two feet throughout the year.

The Mathabhanga continued in a bad state throughout the five years 1825-30. In 1828-9 a steam dredger received from England was sent to work in this river, but the machinery did not answer well, and the draught of the boat, six feet, rendered her very ill adapted for the river.

During the next few years, very little improvement appears to have been effected, and, in the case of the Jalangi, greater difficulties were experienced in navigation than during the previous five years. In the early part of 1831-2 an unusual flood occurred in the Bhagirathi, caused by heavy rain in the Rajmahal Hills swelling the tributary streams. The force of the current cleared away the shoals below Berhampur, and re-opened the communication for small boats, which had been entirely closed since January. During the inundation of 1832 an unfavourable change took place at the entrance of Jalangi, the head having shifted five miles to the north.

In 1835 doubts seem to have arisen whether the benefits that accrued from the works were commensurate with the expense incurred. Orders were given in February to stop operations and the establishment was discharged. Mr. May's report on the work done during the previous three years showed that 359 *bandhals* had been constructed on the different rivers. 118 sunken boats raised 219 sunken trees and timbers removed, 12 masonry buildings pulled down, and 1,731 trees cut down on the banks to prevent them falling into the stream. He explained that the extraordinary deviations annually occurring in the course of the Ganges, affecting as they did all the streams that flowed from it, rendered it impossible to lay down any fixed rule of guidance or Plan of operations by which the navigation of the Nadia rivers could be permanently maintained. An experience of thirteen years had convinced him that the changes which took place in the great river during one inundation afforded no data to determine what the next would bring forth, and therefore there was no assurance that the measures adopted for mitigating or repairing the evils of one season would be of the least avail in the ensuing one. Dredging machinery could only be usefully employed where the stream was rapid. Its use was to stir up the sand, so that the current might carry it away, rather than to lift the sand itself out of the bed. In sluggish water, where a bucketful was raised it was instantly replaced by the falling in of the surrounding mass.

During two years (1835-7) the operations were stopped, but in February, 1837, Mr. May proceeded,

by order of the Government, to again inspect and report upon the state of the rivers. He found that obstacles to navigation had much increased since the suspension of the works, and in June, 1837, he was reappointed Superintendent. For the next three years the Bhagirathi was the most favourable of the three rivers for navigation.

In August 1840 Mr. May resigned his office, and was succeeded in November of the same year by Captain Smyth. The operations carried on by this officer during the next seven years were the same as those previously adopted by Mr. May. The rivers continued in much the same state as before, the Bhagirathi being the most favourable for navigation. In 1840-1 this stream was kept open for large boats throughout the dry season, and in 1841-2 for boats of 2½ feet draught. In 1842-3, however, it was found to be in a worse state than at any time during the previous five years, and many complaints came up of the obstructions to navigation. Strenuous efforts were made to clear it of its shoals, and with much difficulty a passage was maintained throughout the season for boats of from 250 to 350 maunds burden. In 1845-6 the river was kept navigable throughout the dry season for boats drawing two feet, but in thr following year, 1846-7, it shoaled at the entrance to such an extent as to close altogether in February 1847. A fresh opening was made from the Ganges to the Bhagirathi, and in May, when the rains set in, this cut rapidly enlarged itself, and gave a depth of from five to ten feet of water, whereas at the old entrance there was only a depth of one foot. The cost of the excavation was soon repaid by the increase of the toll collections.

The Jalangi remained in a very bad state throughout the whole seven years (1840-7), and the Mathabhanga was never navigable in the dry season below the point where the Pangasi branches off from it.

In December 1847, Captain Lang was appointed Officiating Superintendent of the Nadia rivers, and, in support of further remedial operations, he brought to the notice of Government that, during the eight previous years, the total toll collections on the rivers had yielded an average annual surplus of Rs. 165,090 over the amount expended in keeping open the navigation, including the cost of collecting the tolls, and of all establishments. During the year 1847-8 the amount of tolls realised from each of the rivers was as follows :—Bhagirathi, Rs. 151,482 ; Jalangi, Rs. 63,222. Mathabhanga, Rs. 24,028 ; total toll collections, Rs. 238,733. On the expenditure side the charges for facilitating the navigation were Rs. 36,122 ; for collection of tolls, Rs. 22,360 ; total expenditure, Rs. 58,482. Surplus of receipts over expenditure, Rs. 180,250.

The same system of operations without much variation was carried on in the succeeding years. In 1859 a further attempt was made to improve the current down the Mathabhanga, at the expense of the Kumar, by cutting channels across a few of the bends in the former. The following year some experiments were made by towing a rake or harrow over the entrance shoals by a steamer when the Ganges began to fall in the autumn, but no success was obtained .

In 1881, Mr. Vertannes, Superintending Engineer, submitted a memorandum on the state of the rivers. At that period the Mathabhanga had the best entrance. It was said, however, that this was the first year for nearly 20 years that that river had been navigable for large boats. Alluding to the cuts on the Mathabhanga made in 1859, Mr. Vertannes said : "Of the five cuts-off made in the river by the late Mr. J. W. Armstrong, four have already deepened out, and are only a little narrower than the normal width of the river. These cuts, now that they have been worked out, seem to have benefited the river, as far as navigation is concerned, but I feel that they must have tended to raise considerably the flood level of the river lower down, and the damages recently caused to the Eastern Bengal State Railway, are, I think, more due to this than to any breaching of the embankments above Murshidabad."

In 1888, the revenue administration of the Nadia rivers which had up till then been controlled by the Board of Revenue was transferred to the Public Works Department, and a separate division, called the "Nadia Rivers Division", was constituted, and placed in charge of an Executive Engineer. Since that year an average sum of about 1¼ lakhs of rupees was spent annually, chiefly on training works, to increase the depth in the dry season over the many shoals which formed every year as soon as the rivers begin to fall. From December, 1906 to March, 1907 two small dredgers were hired and worked on the head shoal of the Jalangi river. The experiment cost nearly Rs. 38,000; it was temporarily successful, but no permanent improvement was effected. Two dredgers were again employed, at a cost of Rs. 12,000, during the following cold weather, in dredging 6¼ miles of the Jalangi river. The result was—in two miles, less depth than before dredging ; in two miles, depth slightly increased ; and in 2¼ miles, maintenance of full depth dredged.

The possibility of maintaining a navigable entrance to the Bhagirathi was discussed in 1906, 1907 and 1909. In 1909 the Steamer Companies submitted a representation strongly urging that the river be made fit for steamer traffic throughout the year, as the water-route from Calcutta to up-country would thereby be shortened by 425 miles. In September, 1906, the Chief Engineer estimated that the initial cost of the plant necessary for dredging the off-take of the river from the Ganges would be 126 lakhs of rupees, and that, if the scheme were undertaken, the yearly recurring charge for main-

tenance would be very heavy, and such as could not possibly be met by any tollage which the steamer companies could afford to pay : he also pointed out the necessity of caution in the execution of any works in these rivers, as it was possible that any channels which might be made might become larger and deeper, and that this might eventually lead the main Ganges into the Hooghly and thereby ruin the port and city of Calcutta. A further point to be remembered was that any increase in the volume of water passed down these rivers must mean a decrease in the volume passing down the Ganges below their off-takes, and that such decrease would produce a deterioration in the present navigable channels of the Ganges.

The following is a description of the Nadia rivers with a reference to the Bhagirathi by H. G. Reaks, River Surveyor to the Port of Calcutta in 1916.

There have been considerable changes in the Nadia group of rivers and probably only the Bhagirathi has remained fairly constant in its present direction. The Kumar formerly occupied a position something like that of the upper Mathabhanga at present, and then flowing in a east-south-easterly course, emerged into the old Ganges near Madaripur. It has since been cut across by the Madhumati and also the Chandana, an offshoot from the Ganges at Kushtia, with the result that it has decayed over a great part of its course. The Bhairab, which in very early times was undoubtedly a most important river, ran from below the Bhagirathi off-take south-eastwards past Jessore and Khulna into the Madhumati and Haringhata estuary. About 300 or 400 years ago the Jalangi opened out across its course, taking the drainage south-west into the Hooghly, and lower down the Mathabhanga cut across it, also running south-westwards. The upper Bhairab opened again in 1874 into the Jalangi, and recently the Jalangi off-take from the Ganges has practically closed, but the intermediate section of the Bhairab has died and the lower section decayed. In its lowest portion below Jessore, it now taps a large volume of the Kumar and Garai spill, but recently the south-easterly direction of the flow from Khulna to the Madhumati,has been changed and the Bhairab now takes the Atharabanka water from the Madhumati south-westward into the Rupsa and so through the Pussur into the Marjata estuary.

The Ichhamati was probably a branch of the old Bhairab, flowing nearly south. Since the Mathabhanga opened up the Churni distributary to the south-west into the Hooghly, the Ichhamati has deteriotated. The Jabuna effluent, and relic of the old Jabuna branch of the Ganges, given off from the left bank of the Hooghly near Bansberia, which met the Ichhamati lower down, has closed in its upper course. The Jalangi and Mathabhanga Churni are comparatively new rivers, the modern Churni having opened out since Rennell's time at the end of the 18th century. They carried the spill from the Ganges in this region south-westward into the Hooghly instead of south-east into the Bay, as was the trend formely.

In the river channels proper of the feeders, changes are incessant, but while in individual portions, alterations are continually taking place, loops being formed, cut through and reformed, so that traces of the old channels in the form of semi-circular jhils or lakes are frequent along the banks, the rivers as a whole have preserved their general characters and directions for a considerable time.

In Rennell's survey of the Nadia district, 1772, it will be seen that the only portions of the Bhagirathi channel which have persisted apparently unchanged are the straight sections from Jiaganj to Murshidabad and at Berhampur. The permanency of the channel in these places is probably due to the Bhagirathi embankment on the left bank, but between the sections, the Moti jhil is left as a relic of the main channel where a loop in Rennell's survey has been cut through, and below to Plassey, to which place the embankments continue, changes have been considerable. Katwa has apparently always been on the river bank, but between this town and Nadia, the channel has wandered over a large tract, and Agradwip which in Rennell's time was on the left bank, lay on the right bank of the river for years previous to 1913, when the cutting through of the Agradwip loop transferred it again to the left bank. His map also shows traces of the old channel, the change from which brought Nadia from the left to the right bank.

The Jalangi shows similar changes, but in certain portions, particularly the lower sections between Patkabari and Krishnagar, the formation of the bends have been well preserved and what alterations are exhibited seem very small when allowance is made for slightly incorrect mapping in Rennell's chart. As a matter of fact, this section gives the appearance of a river with well formed and established banks in places, probably in stiffer material and so less subject to erosion. This is all the more remarkable as since Rennell's survey the Bhairab has opend, entering the Jalangi at Muktiapur above Patkabari.

Rennell shows the Bhairab as a thread of a channel draining south from the Kulkuli river at Akriganj and following generally and indefinitely the present Banti and Suti Nadis. The Kulkuli itself, probably an old Ganges channel, had no definite connection with the main river and was only a flood season spill stream, flowing due east and passing Akriganj and Maricha ; it then took the general course of the present Sialmari river south into the Jalangi. It was obviously only mapped in roughly by Rennell, probably being regarded as unimportant. Since his time the connection between Akriganj and Maricha has been destroyed (probably through the Ganges channel working southward into it); the Sialmari became an independent flood spill stream and the Bhairab found an entrance of its own near Akriganj. This, probably by lying open to the Ganges main current at some time, forced a greater discharge into the river with the consequence that the lower reaches opened and a new eastern branch, or the Bhairab proper, developed through country in which Rennell gives no indication of the existence of any stream. This seems to have been definitely effected as recently as 1874, developing in the eighties, when it became the real entrance channel of the Jalangi, the old channel from Jalangi having completely silted up and flowing now only in the flood season. The Bhairab had in 1914 appropriated the upper course of the Kulkuli and took off the Ganges about 10 miles westward of Akriganj for which length it flows a short distance away from and generally parallel with the main river. The old Jalangi channel is at present only a flood spill stream and the entrance is now appropriated by the Mathabhanga, as it was between 1840-1850, when both rivers had a common off-take. The old Jalangi, being a cross channel with a later flood than the Bhairab, has naturally deteriorated and is unlikely to improve while the Bhairab is a good river, but it may resume its activity with an deterioration of the latter.

The Mathabhanga has changed considerably throughout. Below Sibnibas in Rennell's time it continued along the present Ichhamati channel for about twenty miles and the Churni which was a mere nullah, then branched off due westward and passing somewhere just north of Aranghata, trended south-westward into its present channel at Ranaghat. Probably with the greater discharge into the Mathabhanga in the last years of the 18th century, the modern Churni opened out south-westward from Sibnibas through a tract where Rennell shows no stream and then joined the old channel near Ranaghat.

The district, described in the Census Report of 1901 as once famous as a health resot, deteriorated into a water-logged area, dry, swampy, mala-

rious and greatly lacking in drinking water. In the 1860's Colonel Cotton had advocated the building of a barrage on the Ganges to resuscitate the Nadia rivers. The report of the Drainage Committee of Bengal for the Presidency Division, extracts from which have been quoted later in this volume, reflects the mood of pessimism which the state of drainage, irrigation and public health brought to the mind of the Government In the meantime, population continued steadily to decline and the district grew more and more unhealthy. The condition of the Nadia rivers continued to disturb the Government fitfully until in 1928 Sir William Willcocks surveyed this area and made his recommendations to the Bengal Government. The following observations of Sir William Willcocks, reproduced from his *Ancient System of Irrigation in Bengal* will be of great interest.

Central Bengal, which we have now entered, is full of the most interesting irrigation and River works to be carried out in the future in any country in the world. When we compare the works to be carried out on the Ganges front with those before us on the sea front we feel the truth of the saying that "it more stirs the blood to rouse a lion than to start a hare." When I first came here I was so struck with every word I heard or saw written about the Ganges, that I determined to see the Ganges after I had spent some days on the Ganges Brahmaputra river where at one place I was told that I should not be able to see one bank from the other. And I can say with perfect truth, that when I afterwards saw the Ganges at the Hardinge Bridge, I went up to it and stroked its mane. After walking over the river protective works up-stream of the bridge I asked the Engineer in charge why they had provided against Noah's floods, he told me that in the Bell bunds they had provided against a cyclone. The River said "Yes". On this Ganges front, we have the training of the Ganges, and the securing of the head waters of the Hooghly, whether they are principally on the Bhagirathi as they are today or on the Jelingi as they were when Rennell made his map. We have the fixing and maintaining of the head of the Mathabhanga, and its restoration as the great feeder canal of Central Bengal. And then we have the controlling of the head of the Gorai River and its diminution, and the fixing of the works there. These works are all as glorious as they are beneficent, and they need to have put over them the ablest River Engineer in India. It is the only way to do the works economically. Leaving the Ganges to work its will as it had worked it these 70 years, with huge stern-wheelers going up and down it, will spell ruin to Central Bengal.

In the way of restoration of the old canals there is only one work of any magnitude, comparable in any way with those on the Ganges, and that is the restoration of the great feeder canal of Central Bengal, the Mathabhanga. In ordinary canals which from start to finish carry nothing but river water, work must start from the head downwards ; but with the overflow irrigation of Bengal we have other conditions. The irrigation is done principally by rainfall, and the river water is used to manure the rainfall and kill the mosquitoes or deprive them of their malignity. Such canals are real canals at their heads carrying nothing but river water ; while at their tails they are practically drains carrying little but rain water. This leads us to the solution. On such canals we must begin work from the tails upwards, because it is the tails which principally carry the irrigation water. Such work will be rendered easy by the fact that the Mathabhanga in its head reaches traverses the very friable soil of the recent Ganges delta in the north, while in its lower reaches it traverses the compact soil of the old Damodar delta in the south. Once a good opening is made through the compact soil, it will be easy for the Ganges water, with the aid of the current, to scour out a clear passage through the friable soil of the north, just as the Gorai has done recently. Indeed there is more fear of its doing too much than too little. To guard against this I propose two regulators for the Mathabhanga, one near the beginning of the hard clay soil and the other at the head of the canal on its left bank, which from the first mention of the Mathabhanga over a hundered years ago was always draining away the waterof this canal eastwards into the Gorai, while the authorities wanted it go westwards into the Hooghly. By building these two regulators it will be possible to so regulate the supply of the Mathabhanga that there will be no necessity for a Barrage on the Ganges until Bengal is rich enough to afford such luxuries. Indeed of every work I have proposed for Bengal it can be truly said that it can be started in a small way and be made to prove itself as it goes on. Here, even on this giant Mathabhanga canal, it will be imperative on the Engineers to dig a small canal to begin with, throwing the spoil banks well back. The two masonary works alone will be built to final size. The canal will be annually widened, and each year's experience will be available for the following year.

In Central Bengal the most pressing work is the "overflow irrigation" of the poor sandy districts of Murshidabad, Nadia and Norther Faridpur of which I spoke in paragraphs 11 and 12 of my first lecture. "Kans" or "Esparto" as it is known in the western Mediterranean countries, must be prevented from getting possession of these sandy tracts. Muddy river water is one of its chief enemies. In these sandy tracts the old "overflow canals" have been in many places ploughed up and levelled and their traces have been destroyed ; but there are still traces of old canals in many places and the best of these might be made a beginning with. In Egypt we have no difficulty about the public domain ; and as the permanent settlement of Bengal was made with the owners of lands, there should be no difficulty here about the irrigation canals which must of necessity have been left out. Until the value of the muddy waters of the rivers has been brought home to everybody and all begin to clamour for it, the State might well consider a sluice in a bank, be it small or big, as including the masonry or iron pipe and the channels leading to it and leading away from it.

Where these sandy lands are high-lying and abandoned by their owners, and, to-day, the property of the State, or wherever the banks can be protected and made secure on the upper Gorai, say where near the Railway bridge, powerful pumps might be put up and channels led off and experiments made in irrigation with the rich, muddy waters of the early floods followed by the less muddy waters of the ordinary floods. We have to add muddy water to the 50 or 60 inches of rainfall in the monsoon ; and in these sandy tracts we may succeed beyond our wildest imaginings. Similar experiments migh be made on the Bhagirathi near Berhampur.

There is another place, where a beginning might be made, with one or two powerful pumps, to irrigate with the early flood water of the Hooghly, and that is the tract north of Calcutta. A big city like Calcutta would dispose of every kind of superior garden produce in the way Cairo does. In the selected evidence before the Indian Irrigation Commission of 1902-03, we hear Sir Edward Buck, a great authority on Indian agriculture, saying :—"The earlier floods contain all the valuable waters, and these should, as far as possible, be put on the land." I have already given you our Egyptian experience of such water in paragraph 35. Successful experiments made near Calcutta would be known to the whole of Bengal. Modern pumps are very effective, and lift twice as much water as old pumps and at half the cost. Working for Sir Ernest Cassel in Egypt, we replaced 4 powerful old pumps on the Nile by 4 pumps absolutely up-to-date. We spent £100,000 on the work and added £470,000 to the value of the Estate.

If you want muddy water at its best, get it as early as you can from the river by pumps. You can then irrigate by free flow when the flood is established ; and, after the flood, you can lift your clear water in winter and secure a winter crop.

If there is summer water also available, you can use your pumps and have a third crop. Two crops of vegetables, and a rich crop of leguminous fodders between, are worth much near a big city. If there is only flood water available in the rivers, there are always tanks and wells to fall back upon in winter and summer. Once the flood waters of the rivers are again freely used, all the old tanks, which to-day are more or less discredited, will again take a high place in the economy of your agriculture. The Indian Irrigation Commission and much of the select evidence was strongly in favour of wells and tanks for October irrigation and double cropping. With so much coal at your doors, wells worked by central electric stations might be found economical.

The idea of a barrage across the Ganges somewhere near Rajmahals, with a device to resuscitate the dead and dying rivers of the district was not a new one. But Sir William did the country an inestimable service by drawing his finger along the old channels of drainage and irrigation and distinguishing the natural river beds from artificial canals dug by human agency. It was he who rescued the following passage from Bernier and brought its implications into proper focus :

The knowledge I have acquired of Bengal in two visits, inclines me to believe that it is richer than Egypt. It exports in abundance cottons and silks, rice, sugar and butter.... From Rajmahal to the sea is an endless number of canals, cut in bygone ages from the Ganges by immense labour, for navigation and irrigation, while the Indian considers the Ganges water as the best in the world.

Between 1930 and 1945 the idea of having a barrage across the Ganges was put into cold storage, first by the great economic crisis, and then by the Second World War. In 1945, however, when the war ended, the Government applied its mind vigorously to the Damodar, the Mor and the Ganges. Between 1947 and 1952, the Government of India, in conjunction with the Government of West Bengal, studied the problem of a barrage more closely, investigated the matter fairly thoroughly and drew up blueprints of a Ganges barrage with all its subsequent works down the country across the Nadia district. From what information is available at the moment of the barrage scheme it is clear that it will confer very substantial benefit when executed and change the entire aspect of the district. The scheme aims at keeping the Bhagirathi navigable throughout the year, and its distributaries well-drained and well-filled, so that they can be of the greatest benefit to the countryside. These distributaries and tributaries will also carry a great load of river traffic and provide and alternative means of communication between Southern Bengal and Northern Bengal, upwards to Northern India.

The Farakka barrage is now under construction. With a few years left yet to be completed, this barrage will change the river system of lower Bengal and accordingly ensure an effective change in the drainage and irrigation systems in the lower Ganga delta.

4. Lakes and Marshes

The names of the chief lakes and marshes in the district are given in the following list :

Sadar Subdivision—Abhangi, Adityapur, Arangsarisa, Aundhari, Bachamari, Bairampur, Bakshi, Baliadaha, Bara Chapra, Barbhanga, Bhajanghat, Bhaluka, Chapra, Charatola, Chingrimari, Chinichora, Digri, Dubli, Dumri, Chidaha, Goaradaha, Gurguria, Hansadaha, Hansadanga, Haridaha, Jhora, Jhori, Jiddha, Kaniadaha, Keturi, Khaira, Khana, Nelor, Nutan, Padma, Pagla, Panighata, Poaldaha, Sajanipur, Sat-tala, Sonajuli, Sukni, Tengra, Tungi, Usidpur.

Ranaghat Subdivision—Amda, Bali, Bara Kachua, Bayeswar, Bhomra, Champta, Chapra, Chinili, Damarail, Dhoktadaha, Dohar, Gangaprasadbaor, Gopaya, Haripur, Jhakri, Kachua, Kulia, Kataganj, Mogra, Mondoura, Morail, Nasta, Nrisinghapur, Panikhali, Pocha, Saguna, Sat Sholaki, Shejdiar, Ukundi.

Many (*bills*) are of small size, but others are practically inland lakes. Some are mere accumulations of water upon low-lying ground, while others are natural drainage basins the level of which does not admit of drainage. The formation is due to the configuration of the district, which is divided by the interlacing of the rivers, into what are practically islands. Each of these is bounded by rivers, and the highest level is along their banks, so that the fall from all directions is towards the centre, which again is drained by a creek or *khal* communicating with one of the surrounding rivers. In some places the basin thus formed is on a fairly high level, and the central depression, being sufficiently high to be above water at least during some months of the year, is used for growing crops. Other such depressions are water-logged, but can still be used for growing rice, while others again are inland lakes always under water and cannot be used for cultivation.

5. Geology

In the district of Nadia the soil is composed of recent alluvium and the surface consists of sandy clay and sand along the course of the rivers, and fine silt consolidating into clay in the flatter portions of the plan, such as in the Kalantar tract between the Bhagirathi and Jalangi.

6. Soils

The soil varies but little all over the district of Nadia ; except for the tract known as the Kalantar, and some portions of the Karimpur thana and Ranaghat subdivision, it is almost universally a light sandy loam, possessing but little fertilising power, and

incapable of retaining moisture. The enrichment of the soil by periodic coatings of silt brought by floods no longer takes place. The only tract of any size which presents any marked differences from the general average is that known as the Kalantar. This tract commences in the Murshidabad district, comes into Nadia through the gap on the western boundary between the Bhagirathi and the Jalangi, and stretches through the district in a south-easternly direction. It is about 15 miles long and 8 miles broad. It is low-lying, and the surface soil has hardened into a comparatively stiff blackclay, which, under favourable conditions, produces a good crop of *aman* rice, but is too water-logged for any autumn crop, and is unsuitable for regular winter crops.

In recent years in connection with the rehabilitation of Displaced persons from Pakistan the soil of the district has been examined more closely all over and it is the general opinion that there is no reason to doubt that the soil will respond generously to irrigation. In fact, irrigation and drainage are the two greatest problems of the soil of the district, which itself is not particularly deficient. In fact, the Agriculture Department is of the opinion that the south-east portion of the district is ideally suited to winter crops, pasture, fodder crops, green manure, winter vegetables and pulses. It is to be remembered that contrary to all other parts of West Bengal, the chief crop in this district is not *aman* rice, but *aus*, and the land, therefore, is amenable to alternation with jute, followed by rich winter crops, if only irrigation were available. In thanas like Chapra, Krishnaganj, Hanskhali, Santipur, Ranaghat, Chakdah, Haringhata, the use of small irrigation pumps and the drainage of small *bils* by private effort have already produced a great change and a welcome increase in winter crops and vegetables. Under the auspices of the Development Department, in the Community Development Projects, a unique experiment in West Bengal's history is going to be tried out in the matter of irrigation. This will be irrigation by sinking a network of tubewells fitted with electric pumps, designed to bring under cultivation a consolidated area of 6,000 acres in the tract of country between Birnagar and Ranaghat. Simultaneously several large lift irrigation pumps will be placed on the Churni, which will irrigate about 6,000 acres more. In the Haringhata State Dairy Farm, cultivation is conducted with the help of drainage and irrigation channels and tubewells the results achieved being quite satisfactory. In many places of the district small and medium farms have sprung up, some based on the co-operative method, irrigated by means of small tubewells. All these are encouraging prospects for the district.

7. Flora

The stretches of low-lying land under rice cultivation afford a foothold for many marsh species, while the numerous ponds and ditches are filled with submerged and floating water plants. Remarkable among these for its rarity, and interesting on account of its distribution to Europe on the one hand, and to Australia on the other, is the floating *Drocera*. The edges of sluggish creeks are lined with large sedges and bulrushes, and the banks of rivers frequently have a hedge-like shrub jungle. The sides of embankments and village sites, where not occupied by human habitations, are densely covered with large growths of semi-spontaneous vegetation, often interspersed with clumps of planted bamboos, and groves of *Areca*, *Moringa*, *Mangifera* and *Anona*. Waysides and waste places are filled with grasses and weeds, usually of little intrinsic interest, but sometimes striking because of their distribution. A large proportion of the species of this class to be met with in the district have been inadvertently introduced by human agency, and besides weeds that are indigenous in other parts of India, European, African and American species are sometimes found, which can not only hold their own with, but actually spread more plentifully than, similar weeds of truly Indian origin. The most remarkable is water hyacinth. In many places the soil does not seem to suit mango, jack and other indigenous fruit trees, and consequently the poorer classes are, in times of scarcity and famine, deprived of one resource which they can fall back upon in more favoured districts.

From various early accounts relating to this part of the country it is clear that there were forests in this district long before there were fields, though at present no large forest is seen in the district. Stavornius in 1785, writes—"The village of Chakdah which gives its name to the channel, stands a little inland, and there is a great weekly market or bazar here: the channel terminates about three Dutch miles inland, and on its right has many woods a little way we soon met with the traces of tigers in plenty, and therefore we did not think it prudent to venture further; we met in the way the remains of a Bengali who had been torn in pieces by a beast of prey". Further evidences are also not lacking to corroborate to the fact that the tigers were not uncommon in the district in the latter part of 18th century. It is said that during that period persons travelling in the neighbourhood of Nabadwip were compelled to sound instrument to frighten the animals away. In 1802, expeditions were made to Krishnagar to hunt them. So, the features of distribution of these animals present a vivid picture of the actual condition of the plant cover prevailing over the different parts of the district.

Tracing the early history, it is further gathered that there were forest growths all along the banks of the big rivers where the Raja and the Court used to hunt Royal game. It appears, timber trees were allowed to grow in the river side, particularly

along the banks of Mathabhanga. These trees fell into the stream wherever the waters cut into the banks. Many wrecks took place every year from boats running against these fallen trees and Captain Lang states that, in 1820, the number of sunken *Sal* timber logs was incredible. In a single year, timber rafts to the value of lakhs of rupees were said to have been lost. During 1820 and the following year, three hundred sunken timber trees were removed from the bed of the river. To make the rivers navigable, it appears, trees along the banks of the river were cut down to prevent them from falling into the rivers.

The sides of embankments and village sides, where human habitations were remarkably poor, dense growth of shruby jungles interspered with clumps of bamboos etc. were noticed. Way sides and fallows were filled with tall grasses and weeds.

Another account of the existence of a beautiful forest along the banks of the river Churni, in the neighbourhood of Krishanganj thana can be obtained from Bishop Hebers' report who visited the place in 1824 and wrote "We landed with the intention of walking to some pagodas whose high angular domes were seen above the trees of a thick wood...." Extensive tract of forests in Krishanganj area harboured many games and Raja Krishnachandra who was fond of sport, led many hunting expeditions to that part of the district.

In former years energetic District Officers persuaded private landlords to plant small areas under timber, notably in Nakasipara and Tehatta thanas in the Sadar subdivision, and Santipur thana in the Ranaghat subdivision. There are several very fine patches of Indian teak (*tectona grandis*) around Krishnagar and Santipur. Since 1947, however, some headway has been made by the Forest Department of the State in acquiring pieces of land for forest plantation. There are no reserved or private forests in the district. The Bengal Private Forests Act has not been extended to the district. The following six plantations on Government acquired land were reported by the conservator General of Forests in 1950's :

(1) Bethuadahari and Jugpur plantations, 1946-51. Area : 602.42 acres. The principal species planted in this plantation are teak, sissoo and gamar for timber, and minjri, babul and arjun for fuel.

(2) Hijuli at Ranaghat, 1949-51. Area : 85.33 acres. The principal species planted in this plantation are teak, sissoo, minjri, babul, arjun and akasmani.

(3) The Debgram plantation, 1950. Area : 76.59 acres. The principal species planted in this plantation are gamar, babul, minjri, etc.

(4) The Mahatpur plantation, 1952. Area : 519.74 acres. The principal species planted are teak, gamar, sissoo, minjri, arjun and akasmani.

(5) The Bahadurpur plantation of 1953. Area : 397.00 acres. The principal species planted are the same as in number (4).

(6) The Khisma Radhakantapur plantation. Area : 242.00 acres. The principal species planted as in number (4).

The total area under plantation was at that time 1,923 acres or about 3 square miles. The timber plantations are teak, sissoo, gamar, toon and simul, and the fuel species are arjun, nim, babul, cassia siamea, jam and debdaru.

The exotic species that are being tried are narikel (*sterculia alata*) and khair, from North Bengal and wattle from Australia.

The Forest Department has no teak plantation more than 10 years old. The area under pure teak is about 120 acres. Wherever the terrain of the country is undulating plantations are raised on ridge lines along the contour.

8. Fauna

At the beginning of the nineteenth century tigers were common in the more sparsely inhabited portions of the district near the Bhagirathi. A reference has been made to their depredations in the *Gazetteer* article on Chakdah. It is, however, many years since the last of these animals disappeared, and none are now to be found nearer than in the Sundarbans. Leopards, however, are still fairly common. They do a good deal of damage to goats and young cattle. Wild hogs are common, especially where protected for the purposes of pig-sticking near Shikarpur Kuthi.

Among lesser fauna are fox, hare and porcupine. Monkeys (the black-faced *hanuman* or *langur*) are numerous and destructive in the towns, especially Krishnagar, where they cause much damage in gardens, and to the mango crop when it is ripening. Jackals are credited with carrying off a number of infants yearly, and many cases of hydrophobia are caused by their bites. Crocodiles are fairly common, especially in the Garai and other rivers in the north of the district, and they occasionally kill human beings.

With the development of forestry in the district various wild animals are being attracted towards

recently grown forests. The patch of forest in Bethuadahari has been a shelter for leopard, pig, porcupine and birds like partridges. Pythons have also been reported from this area.

Of game-birds, the florican used to breed on the field of Plassey, but appears to have deserted the district altogether. Snipes are very common in the south of the district during the latter part of the rains and the beginning of the cold weather. Various species of wild ducks and other aquatic birds are found in large numbers in the east and north of the district during the cold weather. A few partridges and quails are occassionally met with. Snakes are common, and account for many deaths annually. Innumerable varieties of fishes are also found in this district.

9. Climate

The climate of Nadia is substantively the same as in other districts of lower Bengal. Oppressive hot summer, high humidities and well distributed rainfall during the monsoon season are some of the characteristics of the climate of Nadia. The seasons are well marked. The cold weather begins from about the middle of November and lasts upto the end of February. The summer season lasts from March to May. June to September is the south-west monsoon season. October and the first half of November constitute the paot monsoon season. At the beginning and termination of the rainy season the climate is oppressive, and the weather cloudy and sultry.

Rainfall and temperature data of the district will be available in Series I of the Official Statistics presented in Part IIB of this volume. The average annual rainfall in the district is 1310.4 mm (51.59″). The rainfall during the monsoon months June to September constitutes about 71 per cent of the annual rainfall, August being the rainiest month. The variation in the rainfall from year to year is not large. In the fifty year period 1901 to 1950 the highest annual rainfall amounting to 149 per cent of the normal occurred in 1913, while the lowest annual rainfall which was 65 per cent of the normal occurred in 1935. During the same 50 year period the rainfall less than 80 per cent of the normal occurred in three years, two of them being consecutive. Considering the individual stations, rainfall less than 80 per cent of the normal occurred in five consecutive years during 1934-38 at Ranaghat and in four consecutive years at Ranaghat and Haringhata during 1942-45 and 1918-21 respectively.

The rainfall is not uniform throughout the district. Haringhata in the southern part of the district gets only 1110.4 mm (43.72″) on the average in a year while Krishnanagar further north in the middle portion of the district has an annual rainfall of 1473.6 mm (58.01″). All the three rainfall stations are situated in southern half of the district. However from the general trend it appears that in the northern part of the district rainfall is significantly higher than at Krishnanagar.

On an average there are 75 rainy days (*i.e.*, days with rainfall of 2.5 mm—10 cents—or more) in a year in the district. The number varies from 68 at Haringhata to 81 at Krishnanagar.

The heaviest rainfall recorded in 24 hours at any station in the district was 293.9 mm (11.57″) at Krishnanagar on 1900 September 20.

During the monsoon season climatic conditions are very similar to those obtaining in other parts of south-west Bengal. The rainfall is maintained chiefly by cyclonic storms, which form in the north-west angle of the Bay of Bengal and influence weather over the whole of the south-west of the State, and also by inland depressions, which form over the central districts of Bengal and move westward. During the hot season thunderstorms occur commonly, mostly in the afternoons. Associated with them heavy rains, occasional hail and severe squalls occur. These thunderstorms called norwesters are locally known as *Kalbaisakhi* and the squalls associated with them usually come from the north-west. A sharp drop in temperature is experienced during these storms. Rain during the monsoon season is also often associated with thunder.

The district has a meteorological observatory at Krishnanagar. Temperature begins to rise rapidly from about the end of February. April is the hottest month with the mean daily maximum temperature at 37.1°C (98.8°F). There is welcome relief from it though only temporarily when thundershowers occur on some days in this season. With the advance of the south-west monsoon into the district early in June, day temperature drops appreciably but the night temperature remains nearly as high as in the summer months. Due to the continuing high night temperature, with the increased humidity in the air, the weather during the monsoon season is often uncomfortable in between the rains. With the withdrawal of the monsoon by about early October the temperature begins to drop. The drop in the night temperature is more rapid from about the middle of November. January is the coldest month with mean daily maximum temperature at 25.9° C (78.6°F) and the mean daily minimum at 11.0° C (51.8°F). In association with passing western disturbances spells of cold waves are experienced in the winter season. The minimum temperature may then occasionally go down to about 3 or 4° C (37.4 or 39.2°F).

The highest maixmum temperature recorded at Krishnanagar was 45.9°C (114.8°F) on 1960 May 6. The lowest minimum was 3.9° C (39.0°F) on 1934 January 19 and on 1886 February 5.

The air is highly humid throughout the year. In the summer months March and April, the relative humidities are comparatively less, particularly in the afternoons, being about 40 to 45 per cent.

Skies are moderately clouded in May and heavily clouded to overcast in the south-west monsoon season. Cloudiness decreases in October and the skies are clear or lightly clouded in the rest of the year.

Winds are generally light or moderate with a slight increase in force during the summer and monsoon seasons. Winds blow mostly from directions between the south and east in May and in the south-west monsoon. Winds are light and variable in the post monsoon and cold seasons. In March and April they are mostly between south and west.

HISTORY

The earliest history of the district is shrouded in obscurity. No systematic study seems to have been made to subject many local traditions and relics to which a number of places of this district are connected, to a scientific scrutiny.

Ptolemy's Map of the second century shows the southern portion of the Ganga delta as cut off to such an extent by rivers and waterways as to consist practically of a succession of islands. This marked the first stage in the reclamation from the land to sea. Nadia as a part of the lower Ganga delta in those days must have been a fen country intersected with rivers and morasses and probably inhabited by a few scattered settlements of fishermen and boatmen.

Glimpses of Bengal in the early centuries after Christ are afforded by the *Periplus of Erythraean Sea*, the Geography of Ptolemy, the *Milinda-Panho* and the Nagarjunikonda inscriptions. The *Milinda-Panho* mentions Vanga in a list of maritime countries where ships congregated for purposes of trade. In the Nagarjunikonda inscriptions we have references to Vanga in connection with missionaries' activities of the monks of Ceylon. It is likely that Nadia formed in ancient times a part of this famous *janapada* Vanga.

Kalidasa, the traditional contemporary of Dinnaga (fifth century A.D.), places the Vangas amidst the streams of the Ganges (*Gangasroto'ntara*). The western boundary of their country possibly at times extended beyond the Hooghly to the river Kapisa or Kasai in the Midnapore district. The inclusion within Vanga of an area beyond the Hooghly is also vouched for by the Jaina Upanga styled the *Prajnapana*.

Vanga of Pala and Sen records seems to have been a smaller tract than the old territory known to the Jaina *Prajnapana* and the *Raghuvamsa* of Kalidasa. A part of the delta embracing Jessore and certain adjoining tracts came to be distinguished as Upavanga. This last mentioned territory is also referred to in the *Brihat-samhita* of Varahamihira. The *Digvijaya-prakasa*, a mediaeval work assigned to *cir.* 1600 A.D., places in Upavanga Jessore and some other tracts abounding in forest (*Upavanga Yasoradyah desah kanana-samyutah*). Vanga proper was now restricted to the eastern part of the Ganga delta.

In the later Pala period Vanga was divided into two parts, northern and southern (*anuttara*). *Anuttara* or southern Vanga is distinctly referred to in the Kamauli Grant of Vaidyadeva, a minister of Kumarapala. The two divisions of Vanga implied in Vaidyadeva's Grant may have corresponded roughly to the two *bhagas* of the same territory mentioned in later Sena inscriptions, namely the *Vikramapura-bhaga* and *Navya*.

Navya, which means "accessible by a boat or ship," is a fitting designation of the south-eastern part of the Ganga delta which is a labyrinth of rivers and creeks. As *Navyam* has the sense of *newness*, one is reminded of *Navyavakasika* (lit. new intermediate space or opening) of the Faridpur Grants of the sixth century A.D.

In the tenth and eleventh centuries the northern delta seems to have formed a part of the empire of Pala Kings, and it is certain that it was included in the kingdom of the Sen Rajas who were master of both Vanga and Radha. The town of Navadwip from which the name of the present district Nadia seems to have been derived, is said to have been founded by Lakshman Sen, son of Ballal Sen and it is probable that Ballal Sen himself used to visit the locality, as his name is still connected with a mound and a tank in the village of Bamanpukur which is closed by Navadwip.

There is no evidence that Navadwip was ever the permanent capital of the Sen Kings. It was merely a holy place on the bank of the Ganga, where pious people took up their residence out of regard for its sanctity. With the coming of the Sen King and his officers, a city grew up from the thronging of the traders and servants who ministered to the needs of a rich and populous Court. The city, however, consisted almost entirely of thatched bamboo houses,—the characteristic feature of Bengal architecture. Every rich or pious person wished to live as close to the holy river as possible and therefore these houses formed a long narrow sprawling line for some six miles along the bank of the Ganga. No fort, no protective wall of brick, is mentioned by any historian as guarding Navadwip then or ever afterwards, and such a defensive work seems unlikely to have existed in 1200 A.D. Most probably a bamboo palisade,—like the *sal* wood palisade of ancient Pataliputra noticed by Megasthenes—encircled the main portion of the city, with an octroi post at the gate.

Bengal's strategic point of defence from any land attack from the western side at that time was the narrow pass of Teliagarhi near Rajmahal. So the Sen Raja left Navadwip denuded of troops.

In the beginning of the thirteenth century Malik Muhammad Bakhtyar raided the city of Navadwip

and his capture of the royal palace of the Raja Lakshman Sen decided for ever the fate of the Hindu sovereignty of Bengal.

Sir Jadunath Sarkar writes on the raid of Nadia as :

"The actual scene of the surprise of Nadia has been hitherto misunderstood through lack of a careful and detailed study of the exact words of Minhaj-i-Siraj, our earliest and best authority. We give a literal translation of the Persian text here :

'The second year from this, Muhammad Bakhtyar got his troops ready, started from Bihar and suddenly entered the city of Nadia, so fast that not more than 18 troopers could keep up with him, while the rest of his army were coming up behind him. When he reached the gate of the city he did not molest any one, but (proceeded) silently and modestly, so that none could imagine that it was Md. Bakhtyar, but most probably the people thought that the (new-comers) were traders who had brought high-priced horses for sale. When he reached the gate of the residence of Rai Lakhmaniya, he drew his sword and began the slaughter of infidels. At that time the Rai .....was seated at his meal .....when cries rose up from the gate of his palace and the middle of the city. By the time that he learnt what the circumstances were, Md. Bakhtyar had run into his palace and *harem* and cut down a number of people ; (so) the Rai fled away by the back-door with bare feet.....' (*Tabaqat-i-Nasiri*, text, Bib. Ind., 150-151).

"Carefully interpreting the words of this original authority and bearing in mind the topography of Nadia as just described, we can thus reconstruct the story of the attack with the help of a small amount of allowable historical imagination :

"From his last night's resting place in the woods, some 20 miles north-west of Navadwip Muhammad Bakhtyar resumed his march at sunrise. It was already noon when he came to the gate of the city and by that time only 18 troopers, mounted on the best horses, were able to keep up with him, the others coming behind in straggling groups, separated one from another by a quarter of an hour's ride. He rode through the city slowly and silently in an unostentatious style without molesting any people, so that this small party was naturally taken for a band of foreign traders, who had brought horses for sale. That they did not excite the people's curiosity is a proof that caravans of Turkish horse-dealers had visited Nadia before and no doubt spied out the secrets of the place. At this slow pace Muhammad Bakhtyar took some 25 minutes to pass from the custom-barrier of the city to the gate of the Rajah's bungalow, a distance of at least $1\frac{1}{2}$ miles, and by this time a second batch of his horsemen had already entered by the city gate and a third batch was within hail of it.

"The sun had already begun to decline from the meridian, and according to the immemorial Indian practice,—which even the Mughal Emperors followed,—the morning Court having been dismissed, all people had returned home to take their bath, noonday meal, and the inevitable *siesta*, and there was a general slackness and dispersion of people throughout the city, every man going his own way. Such was the moment of the attack.

"Arrived at the Rajah's palace-gate, Muhammad Bakhtyar's party drew their swords, cut down the unsuspecting and probably half-undressed guards, and pushed into the inner quarters. Immediately on hearing this clamour the *second* party of silently pacing Turkish horsemen, who had now reached some sopt midway between the city-gate and the palace-gate, raised their war cry and began an attack where they were, and the third and fourth bands of stragglers spurred their jaded horses and hastened to share in the loot. Thus only can we explain the significant statement that at the time of Muhammad Bakhtyar's very first onset "cries roes up from the gate of the Rajah's palace and the middle of the city",—*i.e.*, there were two groups of Turks making a simultaneous attack on two parts of the city, and not a single party of 19 horsemen attacking one point only."

Muhammad Bakhtyar's surprise of Nadia was not a mere fortunate stroke of random raid, but the starting point of a well-planned campaign. Bakhtyar did not send any troops in pursuit of the fugitive king nor did he leave any detachment behind to occupy the Radha tract permanently. He stopped only for a few days at Nadia to collect booty by sacking the city thoroughly, and swept forward to strike at Gaur, the historic capital of Bengal. History does not record definitely how and when the city of Gaur with its ample and mighty fortifications fell to the lance of Bakhtyar.

Malik Ikhtyaruddin Yuzbak, Governor of Oudh, succeeded Masud Jani in 650 A.H. After having consolidated his authority in Varendra, he led an expedition to Radha in 651 A.H. (*c.* November-December 1253) to retrieve the prestige of the Turkish arms. It proved a hard job, as a vigourous chief of Orissa, a son-in-law of Raja Narasimhadev I, had consolidated a powerful vassal kingdom with his capital at Mandaran in the district of Hooghly. During this campaign three battles were fought and in the last of them Malik Ikhtyaruddin Yuzbak suffered defeat with heavy loss. He reorganized his own arms and two years later in November-December 1255 again invaded Radha. By a well-planned attack he captured Mandaran. He next turned his arms to reducing the whole country of Radha, which was almost completed

with the second conquest of Nadia. He later on assumed the title of Sultan Mughisuddin. The Muslim power of Lakhnawati owed much to the vigour and earnest efforts of Yuzbak, who annexed permanently the whole of Radha as far as the modern northern boundary of the districts of Midnapore and Bankura. This proved in the subsequent period the base of operations of Muslim arms against the decaying Sen kingdom of Eastern and South Bengal.

The annexation of at least a part of Jessore and Khulna districts is implied by the inscription on the tomb erected at Bagherhat in October 1459 by Khan Jahan to whom local tradition ascribes the first Muslim colonization to the area. Whether this was the result of sustained operations in this region, it is difficult to say. Nor is it clear if any powerful antagonist was encountered by Khan Jahan. Orissa still held extensive tracts in south-western Bengal, and it is not unlikely that during the uncertainties of the last few reigns the Muslim frontier may have been pushed back to Bhagirathi river whose waves the Ganga kings frequently claimed to have ruled. It might be that the tract under the present district of Nadia was also under the independent Muslim principality of Khan Jahan.

In the latter part of the sixteenth century the northern half of the Nadia district was probably under the rule of Pratapaditya, who exercised sway over the greater part of the Jessore and Khulna districts. Pratapaditya's father was Srihari, a Kayastha writer in the service of Daud Karrani, who rose to be the chief's confidant. On the fall of Daud, Srihari fled away with his wealth and the Government treasure in his custody, and set up for himself in the extreme south of the Khulna district. In this marshy land he build a home for his family and a safe refuge for fugitives from the advancing tide of invasion.

Raja Pratapaditya was known to all as one of the most powerful zamindars of Bengal of this age. The *Baharistan* and the travel-diary of Abdul Latif and the contemporary European writers, particularly, the Jesuits, all testify to his personal ability, political preeminence, material resources, and martial strength, particularly, in war-boats. His territories covered the greater part of Jessore, Khulna and Backerganj districts.

Raja Pratapaditya had broken his pledge of military assistance and personal service in the war with Musa Khan, and had thus proved guilty of disloyalty and disobedience as a vassal. When the Jessore King found that Islam Khan was determined to crush all the zamindars he hastened to make amends for his folly. Islam Khan, however, took up a stern attitude and decided to punish him by conquering his kingdom.

Islam Khan took all possible steps for ensuring the success of the Jessore campaign. The power, wealth, and military resources of Pratapaditya were considerable and a prolonged and severe contest appeared to be certain. A large expedition was accordingly organised.

Another force was sent at the same time against Ram Chandra, son of Raja Kandarpa Narayan of Bakla and son-in-law of Pratapaditya so that no assistance might reach the Jessore king from this side, and that in case Bakla was speedily conquered the imperial contingent might be free to proceed against Jessore from the south-east and completely overpower Pratapaditya. An equally strong force was employed for purposes of defence, particularly, against 'Usman.

There was some delay in the assemblage of the imperial officers and forces from the different thanas. Ghiyas Khan with the land force at his disposal started from Alapsingh, and after several stages of march, south-westward, crossed the Padma near Alaipur, and then moved along the banks of the Jellinghy and its tributary, the Bhairab, till he reached Pakhwan (on the Bhairab, 20 miles north of Krishnanagar city) then known as Mahadpur-Baghwan (Mohatpur, six miles north of Krisnanagar city, Rennell's *Bengal Atlas* No. I), where he encamped, awaiting the arrival of the other officers, particularly, Mirza Nathan, with the fleet.

Mirza Nathan's arrival at Baghwan was delayed owing to a rebellion in the Jagir Pargana of Chilajuwar of two zamindars, Pitambar (progenitor of the Puthia Raj family of Rajshahi) and his nephew, Ananta. Unable to cope with Mirza Nathan, the rebels sought shelter with the neighbouring zamindar, Ilah Bakhsh of Alaipur, who gave them ready asylum, and fought hard for some time to shake off Mughal tutelage. The Mughal elephants finally succeeded in breaking open the enemy forts, and the rebels were compelled to disperse. Mirza Nathan resumed his march with the fleet, and soon joined Ghiyas Khan at Baghwan, moving along the Ganges, the Jellinghy, and the Bhairab. About the middle of December, 1611, the entire army marched south-eastwards towards Jessore along the Bhairab and the Ichhamati, and passing by Bongong (Rennell's *Bengal Atlas*—Bongong about 36 miles south-east of Baghwan), reached a place named Salka about 10 miles south of Bongong, near the confluence of the Jamuna and the Ichhamati. Here the first engagement with Pratapaditya took place.

The advance of the Mughal army put Pratapaditya on his mettle. He equipped a strong army and a fleet and placed them under expert officers, including Feringis, Afghans, and Pathans and decided to defend personally his fortified capital Dhumghat. And he sent his eldest son, Udayaditya, with the greater part of his land army, elephants, artillery, and the fleet (500 war-boats) to hold the strategic point of Salka. Udayaditya made a big

fort at Salka. It had natural barriers on three sides which rendered it almost impregnable. Udayaditya was assisted by two able officers, Jamal Khan, son of Qutlu Khan, who was placed in charge of the cavalry and the elephants, and Khwaja Kamal, who acted as the admiral of the fleet.

The imperialists proceeded towards the enemy fort in a very cautious manner, with two detachments of the land forces, one on each bank of the Ichhamati, immediately supported by two divisions of the imperial fleet and with the general support of the main fleet moving along the river. Udayaditya suddenly appeared on the scene and launched a vigorous attack on the imperialists. Leaving Jamal Khan in charge of the garrison and the elephants at Salka fort, he advanced with the entire fleet, putting Khwaja Kamal in the van with the stronger and more powerful war-boats and floating batteries (*ghurabs*), and himself leading in the centre with the other boats.

In the engagement that followed, the Jessore fleet by its overwhelming numbers gained an initial advantage and pressed the imperial navy very hard. But the active and steady support of the imperial detachments on both banks of the river not only saved the advance guard but the entire fleet, and soon turned the course of the battle. Mirza Nathan by a daring act cut off the enemy fleet by a rapid march along the western bank of the river to a point where he found the van under Khwaja Kamal behind him and the centre under Udayaditya in front and on his flanks. In the melee Khwaja Kamal was killed. The fall of the admiral decided the battle. Udayaditya lost heart and hastily fled to his father, narrowly escaping capture, Jamal Khan also evacuated the fort of Salka and followed Udayaditya with all the elephants. The imperialists secured a rich booty, the greater part of the fleet and the artillery falling into their hands.

The imperialists spent the night at the fort of Salka, and marching southwards next morning along the western bank of the Ichhamati, reached the fort of Burhan and encamped there.

Meantime the expedition sent against Raja Ramchandra had triumphed and reached the skirts of the Jessore kingdom. According to the orders of Islam Khan, Raja Satrajit escorted Ramchandra to Dacca. The latter was deprived of his kingdom and also of his personal liberty, and kept confined at Dacca.

After the conquest of Bakla, the expeditionary force, according to previous arrangement, moved towards Jessore to join the army engaged in fighting Pratapaditya.

This new danger stirred Pratapaditya into fresh activity. He decided to fight a second time from a new base, about 5 miles north of his capital, near the confluence of the Kagarghat canal and the Jamuna. He made a big fort at a strategic point, similar to the fort of Salka. After three days, the imperialists left the fort of Burhan, and proceeding south-eastward along the Jamuna, reached the fort of Kharawanghat after three marches.

Early in the morning of a day at the beginning of January 1612 Mirza Nathan, with his own forces and the war-boats, began the battle by an attack on the enemy fleet stationed at the confluence of the Kagarghat canal and the Jamuna, and passed it so hard as to compel it to seek shelter beneath the fort. But his further advance, also the advance of the main imperial fleet beyond the confluence, was checked by the heavy cannonade of the Jessore artillery. As Ghiyas Khan, commander, could not cross the Jamuna to join Mirza Nathan, the latter, along with Lachmi Rajput, had to play a prominent part in the battle. In the midst of a heavy fire, they succeeded in moving along the Kagarghat canal to a point in front of the enemy fort across a quagmire.

The next problem was how to cross the Kagarghat canal. As Mirza Nathan began to cross the river, the Jessore artillery opened fire on him and was kept so busy as to be unable to come to the relief of the Jessore fleet, which was suddenly attacked by the imperial fleet and completely defeated. The imperial fleet was then free to run to the help of Mirza Nathan, who soon crossed the canal and fell upon the enemy fort with the elephants in front. A severe hand fight followed, and a large number of men were wounded and killed on both sides. At last Pratapaditya felt compelled to retreat, leaving the fort in the hands of the imperialists, who then encamped at Kagarghata.

The second defeat sealed the fate of Pratapaditya and ended the Jessore campaign. Jamal Khan, who had so long fought loyally, now abandoned Pratapaditya and joined the imperialists. The Raja fell back on his capital 'with a defeated heart and eyes brimming with tears'. Here in consultation with Udayaditya, he decided to give up further resistance. By voluntary submission, he hoped to secure favourable terms from the Bengal Governor.

Pratapaditya lost no time in tendering submission to the imperial commandar Ghiyas Khan at Kagarghata. The latter was convinced of the Jessore king's sincere desire for peace, treated him very courteously, and ordered the suspension of hostilities. It was arranged that Ghiyas Khan should personally escort Pratapaditya to Dacca to meet Islam Khan, and pending his final orders, the imperialists should remain at Kagarghata,

and Udayaditya should continue to hold the capital.

Pratapaditya's hope of securing a favourable treatment from Islam Khan was not realised. The Jessore king was put in chains, and his kingdom was annexed. His sons also appear to have shared his fate, and were later on sent to Court, from which they were ultimately released owing to the intercession of Ibrahim Khan Fathjang. Ghiyas Khan was placed in charge of the conquered country.

Thus the conquest of Jessore and Bakla was finished in about a month's time (*c.* middle of Dec., 1611—middle of January, 1612).

Towards the end of the 17th century the Subahdar of Bengal Ibrahim Khan's indolent and immartial character and supine administration encouraged a rising which for the first time broke the deep peace that Bengal had enjoyed since the accession of Shah Jahan. Sova Singh, zamindar of Midnapore, took to plundering his neighbour. Rahim Khan the leader of Orissa Afghans joined him and greatly increased his military strength. By the middle of 1697 the Emperor dismissed Ibrahim Khan from the viceroyalty and appointed Azim-uddin in his place. In January 1698 Zabardast Khan returned to the imperial camp in the Deccan and that greatly weakened Mughal Empire, Azim-uddin halted nearly a year at Burdwan without taking any vigorous action. The rebels now came out from the jungle treats and renewed their raids on all sides. Rahim after again plundering the Nadia and Hooghly districts arrived near Burdwan. Here the prince vainly tried to pacify him by negotiation.

One among the zamindars crushed by Murshid Quli Khan, who deserves our notice because of his meteoric rise and fall is Sitaram Rai of Bhushna, an Uttar Rarhi Kayastha, and the son of the Hindu collector under the Muslim *faujdar* of Bhushna (16 miles east of Magura in the Khulna district). He took a lease of the Naldi pargana promising to pay the revenue regularly and to suppress the rebel Afghans and bandit gangs of that tract (*c.* 1686). His strong and able rule greatly increased his wealth and power and he formed the nucleus of a kingdom, which grew up as he added more parganas by farming their revenue from the Bengal governor. He is said to have secured an imperial farman and the title of Raja by paying tribute to the Emperor of Delhi. To keep up his new dignity he founded a capital at the village of Bagjani (10 miles from Bhushna) and named it Muhammadpur (in honour of a Muslim saint). This place he fortified by means of long earthen embankments and a *fosse.* Here he built many temples, palaces, offices and store-rooms and stables and dug tanks of fresh water. In pride of power, he humbled and robbed the smaller zamindars of the country round and stopped sending any revenue to the subahdars. His success was made easier by the supine rule of Ibrahim Khan (1689-1697) and the friction between Murshid Quli and 'Azim-ush-shan, which lasted till 1710. At last in 1713 when he killed Sayyid Abu Turab, the *faujdar* of Hooghly, Murshid Quli could no longer overlook his audacity. A strong force was detached under Murshid Quli's relative Bakhsh 'Ali Khan (newly appointed faujdar of Bhushna) ; and with the help of all the neighbouring zamindars' levies, Sitaram was overwhelmed and captured with his family, and his capital was sacked (Feb-March 1714). Thus fell the last Hindu kingdom in Bengal.

The execution of Sitaram Rai took place in 1712. Maharaja Krishna Chandra of Nadia came to the *Gadi* in 1728. During his administration the district was constantly oppressed by the Maratha raids and he was forced for a time to transfer his residence to Sibnibas in Kissengunge thana.

The last day of the Muslim rule in Bengal were drawing near. On the 23rd June, 1757, a village of this district became the scene of a historic battle which was destined to revolutionize the life of India indirectly and slowly that of eastern hemisphere. This fateful battle is the Battle of Plassey between the last independent Muslim ruler of Bengal Nawab Siraj-ud-daullah and Robert Clive. The memory of the last Nawab of Bengal and this fateful battle has been redeemed by a poet's genious. The Bengali poet Nabin Chandra Sen in his masterpiece *The Battle of Plassey* has washed away the follies and crimes of Siraj-ud-daullah by artfully drawing forth his readers' tears for fallen greatness and blighted youth. To quote Sir Jadu Nath Sarkar, an eminent historian :

"When the sun dipped into the Ganges behind the blood-red field of Plassey, on that fateful evening of June, did it symbolise the curtain droping on the last scene of a tragic drama ? Was that day followed by 'a night of eternal gloom for India', as the poet of Plassey imagined Mohal Lal foreboding from the ranks of the losers ? Today the historian, looking backward over the two centuries that have passed since then, knows that it was the beginning, slow and unperceived, of a flourishing dawn, the like of which the history of the world has not seen elsewhere. On 23rd June, 1757, the middle ages of India ended and her modern age began".

In 1765, The East India Company obtained the *diwani* of Bengal, Bihar and Orissa. A change of various administrative units since the British rule was established in this district has been briefly outlined in the introductory chapter.

In March 1787 the President of the Board of Revenue Mr. John Shore, submitted proposals to the Board for the "abolition of the present division of the country into thirty-six different establishments for the collection of the revenues, eight of which

have been created since my departure from Bengal in February 1785", and for the establishment in place of them of twenty-three Collectorships. In the proposed rearrangement it was suggested to annex "the greatest part of the Hooghly Collectorship to the district of Kishenagur". The proposals were approved by the Board of Revenue and submitted to the Governor-General in Council on 13th March, 1787, and accepted in their entirety at a meeting of the Council held on the 21st of the same month. In accordance with these orders Mr. F. Redfearn was appointed as the first Collector of Nadia, with Mr. G. Cherry as his assistant.

In the year 1808 the crime of gang-robbery or dacoity was very prevalent in the district. Mr. Lumsden, in a minute recorded on 13th June of that year, stated "that the existing system of police has entirely failed in its object, and that the detestable crimes of gang-robbery and murder are now equally prevalent in every part of Bengal (the Division of Dacca, perhaps, excepted) as at any former period, are truths of too much notoriety to admit of dispute."

Mr. Blaquiere, the Magistrate of Nadia, dealt very vigorously with this state of affairs, and in the course of a year succeeded in almost freeing the district of these criminals.

During the first half of the nineteenth century the manufacture of indigo was the most important industry in the district. It sprang originally from very small native factories which were bought up by Europeans. The district became gradually dotted with indigo concerns, owned by English capitalists.

Up till 1854 Nadia was in the Jessore Division, but, when the office of Superintendent of Police for the Lower Provinces was abolished in that year, a rearrangement of the Commissioners' Divisions was made, under which the Nadia Division was constituted, with headquarters at Krishnanagar. For various reasons the Commissioner did not take up his residence at Krishnanagar for more than a year. In February 1855 he applied for permission to remain at Alipore, but after correspondence with the Board of Revenue, the Lieutenant-Governor decided that the headquarters of the Division must be at Krishnanagar. In 1860, however, the Murshidabad district having in the meantime been included in the Rajshahi Division, the headquarters of the Nadia Division were retransferred to Alipore.

The battle of Plassey had historically associated Nadia as well as Bengal with a sense of national defeat and humiliation. A strong feeling for erasing the stigma of Plassey was very much felt by the people of Nadia during the *Swadeshi* movement in the early years of the present century. It was, however, never all quiet even during the years between the battle of Plassey and the Rebellion of 1857.

Much of lower Bengal including Nadia was in tumult in 1859-61 on account of what is called the Indigo disturbances. The European planters practised a double tyranny as being both members of the rulling race and landlords. The peasantry rose in revolt; Ashannagar, not far from Krishnagar still cherishes the memory some of the valiant fighters against the planters ; Meghai Sardar died fighting ; Bishwanath was hanged in a public place still known as "Fansital". Nadia had her village Hampdens in Digambar Biswas and Bishnu Charan Biswas who were the first to lead an organised revolt against the Indigo planters. A lady zamindar Peary Sundari of Sadarpur (Kushtia) also rendered much help to the victims of Indigo planters.

In the next phase of the movement, what has been described as the "petitioning phase", the British Indian Association was formed in 1851 and in 1856 was founded the Anti-Polygamy Tract Movement. In both of these enterprises, participated a number of persons of this district.

The Krishnagar Students' trial of 1884 is a memorable incident of the period indicating the growing mood of revolt against the foreign rule.

Manmohan Ghosh was the Chairman of the Reception Committee at the 6th session of the Congress in Calcutta in 1890. Lalmohan Ghosh was President of the 9th session of the Congress at Madras in 1903. The move for partition of Bengal in 1905 stirred this district as violently as it did elsewhere all over Bengal.

Jatin Mukherjee or *Bagha Jatin* is a son of this district. During this time many centres of social service, libraries and literary clubs were founded in the district. The Daridra Bhandar in Krishnanagar, Santipur Public Library, Bandhu Sabha and Sahitya Sabha were some of the institutions founded in 1912-13. Jatindranath died fighting during an armed encounter with the police on September 9, 1915 near Balasore, Orissa,

The Non-cooperation Movement was inaugurated in Krishnanagar by Bipin Chandra Pal. Deshbandhu Chittaranjan also visited Krishnanagar, Kushtia and other places for raising contribution to the Tilak Swarajya Fund.

The agrarian revolt of 1922 in Shikarpur and neighbouring areas of Pabna, Rajshahi and Murshidabad was directed primarily against European landlords and indigo planters.

The National School started at Garabani Cottage, Krishnanagar, in 1921 was the first of its kind in the entire district. Besides the boycott of educational

institutions, picketing of liquor shops and campaign against the sale of foreign goods, textiles were organised.

A memorable event of 1926 was the holding of the annual session of the Bengal Provincial Conference in Krishnanagar. Nazrul Islam, who was at that time residing in Krishnanagar, supervised and guided the formation of a volunteer crops and caused a tremendous stir by his national songs.

The first all Bengal Youth and all Bengal Students' convention were held in Krishnanagar under the Chairmanship Sri Tulsi Goswami and Sm. Sarojini Naidu respectively in 1926. Regular parades and route marches were held thereafter by organised Red-shirt volunteers in Krishnanagar Kushtia and other places. In 1927 this Red-shirt movement followed by a library movement spread throughout the district.

In the thirtees top leaders like Dr. Rajendra Prasad, Netaji Subhas Chandra, Dr. Aney, Dr. P. C. Ghosh, and Shri F. K. Nariman addressed a vast gathering in the Krishnanagar Town Hall. The Krishnanagar Bomb throwing case, the Krishnanagar Arms fire case, and the derailment of a railway train by damaging culvert near Darshana were some of the notable incidents of this period.

The no-tax movement was first started at Chanderghat on April 13, 1932. It spread over two subdivisions and covered the entire area of two police stations and twenty-two unions.

THE PEOPLE

1. Population and its Growth

In the Census 1961, 1,713,324 persons have been counted in the district of Nadia of which 879,430 are males and 833,894 females. Table A-I in Part II A of this volume gives the distribution of population for all the administrative divisions of the district for total, rural and urban areas separately.

Ten years back the district was inhabited by 1,144,924 number of people. During these last ten years, therefore, the population of the district have increased by 568,400 *i.e*, 49.65 per cent over its population of 1951, the highest rate of growth observed in the district in any one of the past census decades. The rural population of the district have increased by 49.23 per cent during the last decade while the urban population have gone up by 51.53 per cent.

In the State of West Bengal as a whole the population have increased by 32.80 per cent during the decade of 1951-61. The rural population have gone up by only 31.81 per cent in the State, while the urban population have shown an increase of 35.97 per cent during the last decade.

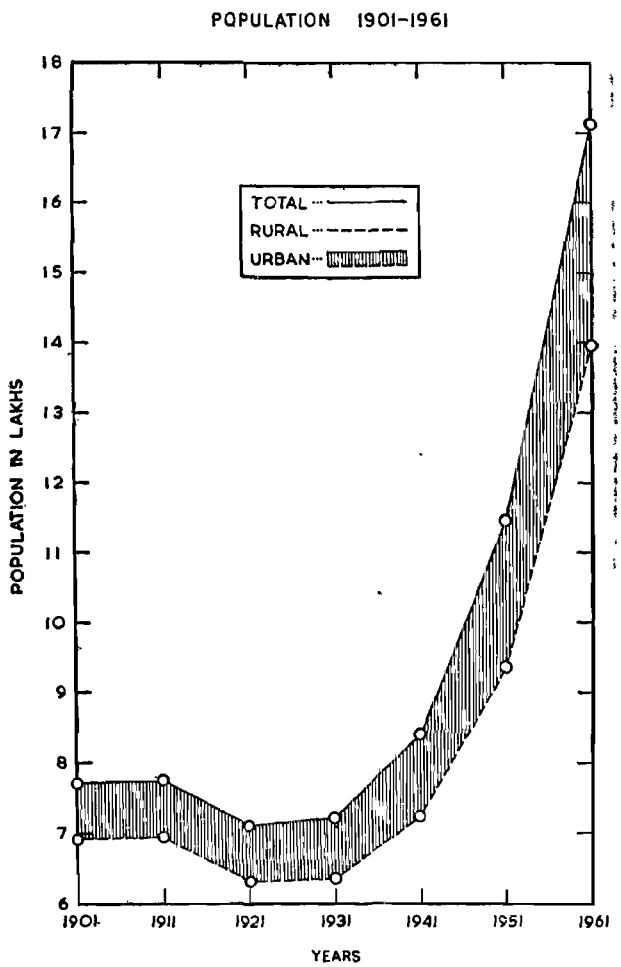

The statement 1.1 given below shows the growth of population in Nadia district since 1901 separately for its total, rural and urban sectors :

STATEMENT 1.1

Total Rural Urban	Year	Population	Decade Variation	Percentage Decade Variation
1	2	3	4	5
Total	1901	773,202		
	1911	775,986	+ 2,784	+ 0.36
	1921	711,706	— 64,280	— 8.28
	1931	721,907	+ 10,201	+ 1.43
	1941	840,303	+ 118,396	+ 16.40
	1951	1,144,924	+ 304,621	+ 36.25
	1961	1,713,324	+ 568,400	+ 49.65
Rural	1901	693,527		
	1911	695,893	+ 2,366	+ 0.34
	1921	631,848	— 64,045	— 9.20
	1931	636,048	+ 4,200	+ 0.66
	1941	724,017	+ 87.969	+ 13.83
	1951	936,823	+ 212,806	+ 29.39
	1961	1,397,986	+ 461,163	+ 49.23
Urban	1901	79,675		
	1911	80,093	+ 418	+ 0.52
	1921	79,858	— 235	— 0.29
	1931	85,859	+ 6,001	+ 7.51
	1941	116,286	+ 30,427	+ 35.44
	1951	208,101	+ 91,815	+ 78.96
	1961	315,338	+ 107,237	+ 51.53

Compared to the growth rate of the State, the district of Nadia had shown a lesser growth rate in the earlier decades. But since 1951 the district has been growing at a higher rate than the State. During 1911-21 the State suffered from a depletion by 2.91 per cent, while Nadia's loss was much more. Its decrease was even to the extent of 8.28 per cent. Since 1921 the district was steadily growing. The same phenomenon is observed both in the case of the rural and urban population. Rural Bengal suffered a loss during 1911-21 by only 4.43 per cent. Rural Nadia encountered a heavy loss of 9.20 per cent during the great epidemic decade of 1911-21. The urban population of Nadia also grew always at a lesser rate since the beginning of the present century than the urban population of the State. During the influenza epidemic decade of 1911-21 while the population living in towns of West Bengal increased by only 7.16 per cent inspite of an overall loss of population in the State, those living in the towns of Nadia had gone down though by a nominal percentage of 0.29 only. During 1941-51 Nadia registered a phenomenal growth of urban population of 76.96 per cent against the State's urban growth of only 32.52 per cent.

The population of the district in each of the last seven censuses has been shown graphically below for total, rural and urban areas.

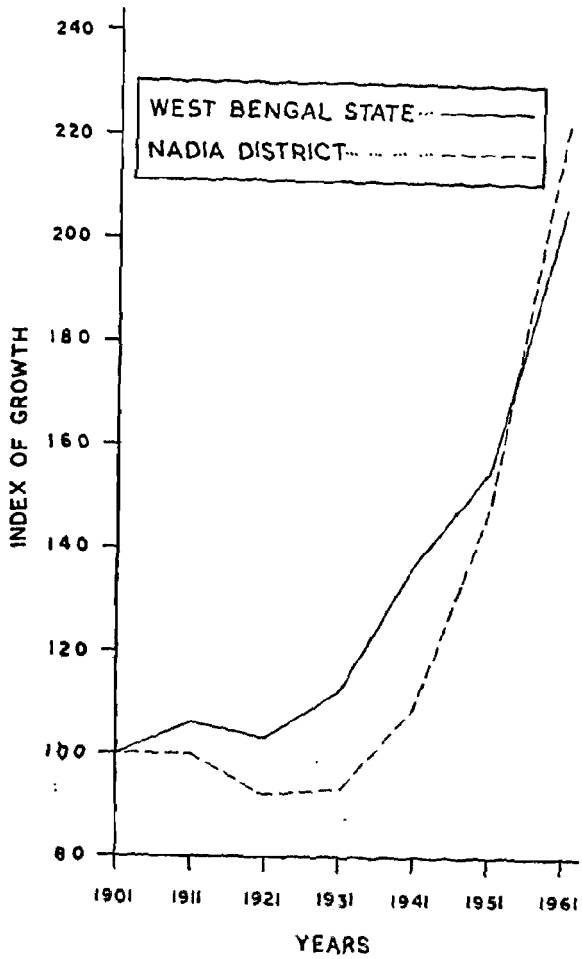

During the first twenty years of the present century the district of Nadia registered a decrease of population by only 7.95 per cent against the State's growth of 3.15 per cent. In spite of very little urban growth, being itself of the extent of 0.22 per cent, overall decrease of population in the district of Nadia is mainly because of the fact that the rural population during this twenty-year period of 1901-21 suffered a considerable loss by 8.89 per cent.

During the next forty years, *i.e.*, 1921-61 while the population of West Bengal increased by nearly cent per cent, the population growth of Nadia was much more, the growth being only 140.73 per cent over the population of 1921. The rural population had not grown so fast as their urban counterpart. The rural population during this period increased only by 121.25 per cent, while in the urban areas the growth had been as much as 294.87 per cent.

Since the turning of the present century *i.e.*, during the last sixty-year period of 1901-61, the State of West Bengal registered an increase of its population by 106.18 per cent. The district of Nadia during this period showed an increase more than that, 121.50 per cent over its population of 1901. In the rural sector the growth was less pronounced, it being only to the extent of 101.58 per cent. But urbanisation in Nadia during these sixty years had been quite remarkable in that respect, as is evident from the growth of population in the urban sector which had been to the extent of 295.78 per cent.

The index of growth of population since 1901 has been shown in the diagram below for the State and the district of Nadia for all the seven census decades. The year 1901 has been taken as the base year and the population in that year has been taken as 100. From the diagram and the statement 1.2 given here it is indicated that Nadia has all along been below the State.

STATEMENT 1.2

	Index of Population Growth						
	1901	1911	1921	1931	1941	1951	1961
West Bengal	100	106	103	112	137	155	206
District Nadia	100	100	92	93	109	148	222

In 1872 when the first official Census was taken the district of Nadia was inhabited by 1,812,795 souls. Some of the earlier attempts of population estimates of the area seems to have been done. A rough aproximation appears to have been made in 1802 by the Collector who reported the existence of 5,749 villages and hamlets, supposed to contain 127,405 houses, and allowing six persons to a house he calculated that the population aggregated to 764,430 souls. In Thornton's Gazetteer Nadia was said to contain 298,736 inhabitants. The survey estimate in the year 1856 was 551,229. In 1869 Mr. Monro had a rough enumeration made and his total was 1,213,000 ; but this number did not apparently include the town population and in 1869 the thana of Comercolly had not been added to the district. With rough adjustments on these two accounts the total number could have been 1,400,000. All these estimates are believed to be under-estimates by Mr. C. C. Stevens, the Magistrate and the Collector in 1872 when the first Census was taken in the country. Of course, the areas of the district in all these years obviously were not the same as those just before the partition of 1947 or as at present.

The causes for decay in Nadia's population has to be found in the conditions obtaining in the district whether in its climate or agriculture. It will be recalled that the Burdwan Fever

worsted the district between 1860 and 1872. There are records to show that already by 1870 the reasons for this scourge had been located. There are several excellent dissertations on the depopulation of this district, of which two of the more important ones are easily available : *Malaria and Agriculture in Bengal* by C. A. Bentley and *Rivers of the Bengal Delta* by S. C. Majumdar. But it is important for the purpose of this study to go to much earlier sources and show that even at the time the epidemic raged in the nineteenth century, its causes were located but the Government regarded it as beyond its power to tackle them at the source.

The following is a letter No. 6, dated the 31st December, 1867, from J. Westland, Joint Magistrate of Nadia to the Collector of Nadia, stating the cause of depopulation of Nadia. (Reprinted from pages 238 to 239 of *Selections from the Records of the Government of Bengal relating to the Nadia Rivers*, 1848 to 1926) :

"I have the honour to acknowledge the receipt of your docket upon Commissioner's No. 6 of 18th December, 1867, which I herewith return. I have recently (21st December) sent you a pretty full report upon the very subject ; and as my observation and the Executive Engineer's information, though perfectly independent, tend to the same conclusion, I take it that they are some evidence of each other's reliability.

"My discussion of the matter in the communication just referred to, leaves me the less now to say. The depopulation of the region named is a fact. Of that there can be no doubt, though I think the Executive Engineer overstates it. The epidemic, which has arisen from the jungle and waterless state of the villages, has carried off a fair share of the deficient inhabitants, and the rest may be put down to the desertion of their houses by many of the villagers. The latter is caused both by the panic caused by the epidemic, but principally from the pure inconvenience of living in villages that are little better than are arid wilderness, so covered are they with jungle and so destitute of water-supply.

"The zemindars' treatment of their ryots has much to do with it, for it takes a great deal to make a ryot leave his ancestral home, and he might be willing to endure a jungly and malarious and waterless home if the zemindar's conduct left a possibility of existence comfortable in other respects.

"I was previously aware of a migration southwards, either to the parts about Calcutta or further south. Since the date of my letter above quoted, I have received reliable information that Nudea ryots are migrating also to the Jessore District.

"You ask me what measures I would wish to adopt for the sanitary improvement and relief of the places mentioned. I have discussed them partly in my previous letter, and I classify them thus :

"1st—Clear the villages of the overgrown jungle, and fill up those pools of black stagnant water which mark where the material for mud houses has been taken from. Compel the zemindar to let out the land so cleared on terms which will allow some margin for risk and profit to the ryot, so that it may not so readily return to its present state.

"2nd—Give the villagers a water-supply by restoring the old tanks.

"I may be allowed to repeat here the opinion I expressed before, *viz.*, that, unless we make the burthen of the above work fall upon the zemindars, we will only temporarily remove the evil, and we will have the whole thing to do again in ten years' time. We must make it a matter of self-interest to the zemindars to keep their estimates in an uninjured state by compelling them to repair at their own expense the deterioration they cause stimulated by partnership disputes, by his (*sic*) own self-aggrandizement and by the uncertainty of his (*sic*) tenure (for estates and under-tenures are perpetually being transferred by sales under decree). Each zemindar and under-tenant religiously pursues the policy of "killing the goose which lays the golden eggs," and the result which is now beginning to be realized is the most natural thing in the world. I am afraid a complete remedy will be found only in a complete change of the relations between Government, the zemindars and the ryots, at the expense of the zemindar and his position, which is very much more than the theory of the Indian land system gives him.

"This is a question which is however much too wide to be entered on at present ; and I allude to it only because the evils complained of, along with a hundered others, may all be traced up to this ultimate source.

"One matter, however, which is very closely connected with the jungle and the uncultivated state of villages in the region under consideration, has to do with cows, and cattle trespass. I collected some facts about it about three weeks since, and would have written you sooner, but that I have not as yet ascertained the issue of one of my principal acts."

The following letter from H. Williams of the Church Missionary Society, Ballabhpur, dated 5th January, 1884, to the Assistant Collector of Meherpur is of considerable interest as dis-

cussing the scarcity of water in the district, loss of fertility of the soil and the prevalence of disease. (Reprinted from pages 291-3 of *Selections from the Records of the Government of Bengal relating to the Nadia Rivers*, 1848 to 1926) :

"I am anxious to bring to your notice a matter which has occupied much of my attention during the last three years, namely, the state of the rivers in your subdivision.

As you are aware, my work brings me into a very close acquaintance with all the villages of the Meherpur district, I may perhaps venture to boast that, as regards the outward aspect of the country, no one knows it so as I do. There is hardly a *mat* or a village that I have not walked through last rainy season. I walked all around the district, visiting the villages on the banks of the Jellinghee, Ganges and Mathabhanga rivers. I mention this in order that I may not be accused of rashness in writing about what I have no knowledge of.

Lest I should be charged with being over-officious, I would say that I do not wish to be understood as dictating to you what ought to be done. My letter is a protest, such as everyone who sees a great evil has the right and is bound, to make. It is a protest against the inaction of the Government in allowing the country to be most seriously, perhaps irretrievably, injured by neglecting to preserve the rivers.

If any one unacquainted with the true state of the case were to glance at the map, he would at once remark upon the excellence of the water system. He would see the country intersected in every direction by rivers. He would think that two of the requisites for making a country great and prosperous, are to be found here—'a fertile soil and easy communication for men and commodities from one place to another'. If the Government had done its duty in preserving the waterways, this would have been true ; but now what is the state of things ?

To begin with the Sharasatti khal, flowing from the Jellinghee. This was formerly a fine river. An old man at Bhugwan told me that he remembers boats of large burden sailing by his village. At the present time the bed of the river from Maniknagar and onwards is under cultivation. The *khal* that remains as far as Maniknagar is getting smaller every year. Bhugwan was formerly a large and flourishing town. The records of its greatness remain in picturesque mounds and numerous mango groves. Its ruin is probably due to the loss of the river as a means of communication with other trade centres.

A little further north we come to the Morangree. This must have been splendid river formerly. As I passed the place of its junction with the Jellinghee, I noticed that the bed of the river was under cultivation, and that a *bund* was made to prevent the rising waters of the Jellinghee from destroying the flourishing rice crops.

From the last point mentioned and onwards the condition of the Jellinghee itself claims a remark, becuase the river appeared to me to be in a dying state. The fine stream of water that flows past Krishnagar realy comes down the Bhyrub of Moorshedabad. At the end of July the water in the Jellignhee above its junction with the Bhyrub of Moorshedabad was quite pure, showing that its junction with the Ganges had not been affected sufficiently to allow a strong current to flow in. About the first or second of August the water became discoloured. Unless something is done the northern part of the Jellinghee will be 'Morgangree' before long.

We came next to the Bhyrub flowing through *the middle of your subdivision*. On the map it is marked as second only to such rivers as the Jellinghee. An old saying current among the people makes the Bhyrub to be the eldest and greatest of the five sister rivers—Bhyrub, Padma(?), Jumna (?), Ganga and Jellinghee. Its glory has now departed. I could not detect any clearly defined bed at its supposed junction with the Jellinghee. For a long distance the upper part of its course is under cultivation. In going up the stream last September we pushed the boat through the weeds as far as Kultee. Above that place the river is ruined for traffic.

Coming down the east boundary of the subdivision on the Howlea or Mathabhanga river we find two rivers mentioned on the map —*the Kujlah* and the Chantea. About them I can only say this,—that although I looked carefully for them, I saw no trace of their junction with the Mathabhanga. The beds of both have been too well and too often cultivated. I passed by them in the month of August.

Thus the district which looks so fine on the map , has as regards its rivers, been ruined by the neglect of the Government and by the selfish avarice of the people. Saving in times of *extraordinary floods, not a drop of healthy Ganges water* can get into your district. The rivers now merely *receive the drainage of the country*.

Whether you consider the rivers as a means of sanitation, irrigation, or communication, the loss is simply inestimable. As for *sanitation*, without going into the wide question taken up by the *Fever Commission*, a Magistrate may easily ascertain the loss the country has sustained by turning teetotaler and spending most part of the year wandering through the villages. With regard to

irrigation, it *was sad* in this *year of drought* to see the people pumping up the little water to be found here and there in the *rivers* and *khals* when we knew that by a little effort there would have been *streams* supplying water enough for thousands of acres. Then as to the rivers as a means of communication, I have been told that Nuddea is considered to be decaying district. If we seek for the cause of its decay, I believe that, as far as the Meherpur subdivision is concerned the chief, perhaps the *only reason*, will be found in its isolation from the centres of trade by the drying up of its rivers."

"There is a special system of land settlement in the district called the *utbandi*. It is applied to land held for a year, rather for a season only. The general custom is for the husbandman to get verbal permission to cultivate a certain amount of land at a particular place at a rate agreed upon. While his crop is on the ground the land is measured and the rent is assessed on it. A large proportion of the cultivated area of the Nadia district is let out in *utbandi*, but it is difficult to say whether there is any decrease or increase of this tenure. The land agent of the largest zemindar in the district in 1901 said that the *utbandi* system was on the decrease ; but he stood alone among other opinions to the contrary. In estates containing not considerable quantity of *izara* or leased lands *utbandi* tenures were undoubtedly on the increase. On estates where the *utbandi* cultivation shows a slight tendency to decrease, it results rather from the desire of the cultivators to hold their lands by leases than from a wish on the part of the landlord to discontinue the *utbandi* system. The large number of *utbandi* tenures in Nadia district is attributed to the breaking up of other more stable tenures, by the famine of 1865-6, and by the epidemic which prevailed in the district from 1861 to 1868. As a general rule, throughout the district the rate for *jama* or regularly settled lands is about half that of *utbandi*. *Utbandi* rates are charged according to the quantity of land actually under cultivation, and are higher than the *jama* or leasehold rates which are paid whether the land is cultivated or not. J. M. Pringle and A. H. Kemm in their *Settlement Report of Nadia* published in 1928 came down rather heavily on the evil effects of the *utbndi* system, and summarised them under four head : (1) it put a premium on dishonesty by encouraging the ryot and the cutchery staff to cheat the landlord and the poorer or more scrupulous tenant ; (2) it put a discount on enterprise, by taxing the cultivation of more valuable crops and giving no security of tenure ; (3) it often left the ryot in a perpetual state of uncertainty of his true liability ; so that even if he knew what his rights were, he would have difficulty in proving them ; and (4) before the settlement operation the landlords did not recognise the *utbandi* tenant however long or continuously he might be cultivating as a tenant at will."

The following account of the condition of the district should thus be read with reference to the above context. During 1891-1901 conditions were not favourable to the growth of the population. Fever was prevalent in the south of the district, especially in Krishnagar town and in the old jungle-smothered villages of the Ranaghat subdivision. Cholera also was very prevalent, especially in 1891, 1892 and 1896. The only two healthy years of the decade were 1897 and 1898. The seasons were on the whole unfavourable to the crops especially those of 1895 and 1896, in which years the early rice crop was little more than a half and a third, respectively of the normal outturn. The winter rice suffered even more, yielding less than half of an average crop in 1895 and barely a seventh in 1896. Distress was severe throughtout the district and deepened into famine in the tracts where late rice was the staple crop. The relief afforded by Government was eminently successful in preventing loss of life, and the deaths reported in the years 1896, 1897, and 1898 were less numerous by nearly 50 per cent than those of the preceding triennium.

This decade taught a lesson which went unheeded. Krishnaganj the easternmost police station of the Sadar subdivision and Hanskhali of the Ranaghat subdivision below it showed the greatest increase of any in the district in 1891-1901. These police stations lie in the hollow across which the floods of the Bhagirathi sweep whenever the great Lalitakuri embankment in the Murshidabad district gives way, and they suffered severely in the floods of 1885 and 1890. The reaction was immediate. These two police stations showed the greatest percentage increase for the district in the 1901 census on the 1891 population. In 1891 Krishnaganj had recorded a decrease of 0.1 and Hanskhali a decrease of 17.6 per cent on their 1881 population : in 1901 the former showed an increase of 15.4 per cent, and the latter an increase of 14.5 per cent on the 1891 population. In 1901-11 Krishnaganj again relapsed to a decrease of 5.1 per cent. Nothing could be more instructive of the cleaning, invigorating and beneficent effects of the flushing and drainage caused by this fortuitous flood in a decaying area.

Conditions between 1901 and 1911 were very unfavourable, the only healthy years being 1904, 1909 and 1910. Not only was fever generally prevalent, but there were constant epidemics of Cholera from 1902 to 1908, the death rate from Cholera in those seven years averaging over 4 per mile and as high as 7 per mile in 1907. There was, moreover, scarcity in 1908, when conditions approached a famine, though it was not found

necessary to declare famine under the Famine Code. The rainfall of 1905, though in excess of the normal was badly distributed. Next year it was below the average and was again unequally distributed, while in 1907 it was still more deficient, there being an almost complete failure of the monsoon in September and October. The distress which ensued in 1908 affected the north-east of the district. This decade, however, saw the opening of the Ranaghat-Murshidabad line in 1905, while the Santipur-Krishnanagar Light Railway had opened in 1899. The influenza epidemic was responsible for great loss of life in 1918-9. There was a flood in 1912. During 1921-31, a filtered water supply was installed in Krishnanagar which improved the health of the town and attracted middle class resident from rural area to settle there particularly for the education of their children. Nabadwip grew in importance as a sacred place of the Hindus, whilst the village of Mayapur on the east of the Bhagirathi developed into a large settlement. The Churni Bridge to Santipur Railway opened in 1925 and the Krishnanagar-Nabadwipdham Light Railway opened in 1926. There was acute scarcity and distress in 1940. In 1935 there was a heavy flood followed by continued drought and distress. In 1938 there was flood of moderate intensity and in 1939 a devastating flood which caused extensive damage. During 1941-51 the cyclone of 1942 caused modest damage, but the famine and epidemic of 1943-44 took a toll ; the Partition of the district came in 1947 and quite a large scale virtual exchange of population took place between 1948 and 1951. There was a period of severe distress in 1951 caused by failure of crops. These ten years had therefore been responsible for large changes in the district.

In 1951 young people of the ages (0-5) comprised 38.1 per cent of the total population of the district. On an analysis of the percentage of age-groups and of married women (15-40) to total population, and children (0-5) to married women (15-40) for the Census decades 1901-51, A. Mitra contends in his 1951 Census report on the poorer stamina of the population of Nadia. It appears from his analysis that the high proportion of young population and proportionately low proportion of the adult population in the district can point to one thing that a great deal of adult population die comparatively young and as such, birth and death rates are higher than most other districts. It also indicates the low vitality of girls and women and the low proportion of married women. The influence of epidemic left a deep scar in 1921 as it appears from a percentage figure of 72.2 of children (0-5) to total married women (15-40).

Mitra further contends that increase in 1951 was patently due to immigration of displaced persons into the district. Immigrants for 1951 included 426,907 displaced persons. Decreases in Tehatta and Karimpur were thought by him due to continuation of insanitary conditions and exodus of Muslims to East Pakistan. According to the West Bengal Government 223,350 Muslims migrated into Pakistan between 1947 and 1951 of whom 121,595 Muslims later returned. This was the heaviest exodus of Muslims for any district in the State. By contrast the exodus of Muslims from the neighbouring district of Murshidabad was only 5,970 of whom all returned later. Between 1901-51 health condition greatly improved in the district but the fact remained that immigration into the Krishnagar, Nabadwip, Ranaghat, Chakdah and Santipur and the heavy influx of displaced persons were mainly responsible for this apparent increase in 1951. If this elements were excluded, Mitra thinks that every decade would have shown a decrease of population.

From a statement on migration between Nadia and other districts of West Bengal between 1891-1921 and 1951 prepared though on unadjusted figures for the partitioned area of the district falling in West Bengal, Mitra observes, "the portion that has gone to East Bengal being more fertile and alluvial, it is likely that emigration should have taken place rather from the infertile and malarious tracts of the West Bengal portion than from other tracts. On the other hand, immigration is more likely to have taken place into the portion now in East Bengal than into the portion now in West Bengal. The evenness of emigrating males and females in the statement suggests that large numbers of families must have emigrated entire to escape annihilation. On the other hand immigration from contiguous districts suggests importation of brides, and immigration from other districts suggests periodic immigration of families on business or service. But what hits the eye at once is the irrefutable conclusion that the productivity of the soil diminished at the hands of a fiver-ridden population and drove away large numbers of agriculturists to other districts".

In 1961 Census a spectacular increase of population is observed in the district of Nadia. It has added half the number more to its population of 1951. The district of Cooch Behar in the Jalpaiguri division with a growth rate of 52.45 per cent has registered the highest rate of population increase during 1951-61 in the State of West Bengal, being closely followed by the district of Nadia. Nadia's increase has not been equally shared by its two subdivisions. Ranaghat has been growing immensely since 1951, when it added nearly 70 per cent to its population of 1941. In this Census it has grown by more than 60 per cent over the 1951 population. In that respect Sadar subdivision has been going on adding to its population decade to decade. While the growth rate for this subdivision in 1951 was only

21.7 per cent, it has gone up to the tune of 43.2 per cent in 1961. The highest increase is observed in Haringhata police station which has grown by 77.51 per cent during 1951-61. The only police station in the Ranaghat subdivision remaining below the district average is Santipur with a growth rate of only 41.13 per cent. The only police station in the Sadar subdivision remaining above the district average is the northernmost thana of Karimpur which has registered a growth rate of 58.74 per cent during the last decade. This police station along with Tehatta had experienced a falling off of population in 1951, in the former case so much so as to the extent of 13.4 per cent. The statements 1.3 and 1.4 given below show the variations in population of the police stations and subdivisions of the district during the last sixty years.

The map given here shows the inter-censal growth of population for 1951-61 in all the police stations of the district. Settlement of displaced persons in different parts of the district has had a great bearing on the growth of population. In the Census of 1961 as many as 604,426 persons have returned themselves as being born outside the district. During the ten-year period of 1951-61, a number of 344,216 persons have immigrated to this district. In other words it may be said that every fifth person of Nadia seems to have come to this place within the last ten years. Out of the total migrants cited above as many as 502,645 persons have come from Pakistan. Of them 281,531 persons have come during the last ten-year period of 1951-61. The Pakistan borns comprise about 30 per cent of the total population of the district. On further analysis it appears that as many as 15,505 persons came from Pakistan within one year preceding 1st March of 1961, and 91,566 between 1955 to 1960. Between 1951 to 1955 as many as 174,440 persons came from Pakistan to this district.

From a study of the Vital Statistics of the district, it is observed that the death rate has fallen quite appreciably during the passing decade. It has been looking down

decade to decade since 1921. Improved public health measures could control malaria and other epidemics which have been conspicuous by their absence during the past ten years. In the decade 1941-50, the death rate (registered) was 23.1, but the rate has been reduced to only 7.4 per cent in the present decade. The birth rate (registered) has also shown a downward trend during the last forty years. In 1941-50, the registered birth rate was seen to be 23.3 while the decade before it was as high as 35.6 and in the present decade of 1951-60 it has gone down further to 22.9. If the number of births per thousand total population on 30th June of each year as derived by the Director, State Bureau of Health Intelligence, West Bengal, is taken, it is observed that during the last decade the birth rate is considerably low being of the order between 11 and 12.

From the available data of Vital Statistics on registered births and deaths, if the following statement 1.5 is constructed the inter-census birth and death rates of the district in comparison with that of the State can be studied.

From the statement 1.5, it is seen that the inter-census rate of natural increase (registered) has gone up to 15.5 per cent in 1951-60, while in the last decade it was only 0.2 per cent. Of course, the registration-*cum*-migration error (rate) has been found to be 24.8 per cent.

STATEMENT 1.5

State/District	Geometric Mean Population of Decade				Inter-Census Population of Growth Rate				Inter-Census Birth Rate (Registered)			
	1951-60	1941-50	1931-40	1921-30	1951-60	1941-50	1931-40	1921-30	1951-60	1941-50	1931-40	1921-30

2. Density

The pressure on the soil in Nadia is higher than that in the State of West Bengal taken as a whole. The Presidency division of which Nadia is one the constituent districts forms the high density zone in the State of West Bengal. Nadia's density is the second highest for the districts in the Presidency division and is higher than any of the districts of the Jalpaiguri division and four western districts of the Burdwan division *viz.*, Birbhim, Bankura, Midnapore and Purulia.

In the State of West Bengal only 1,021 persons on an average are found to be occupying one sq. mile of area but in the district of Nadia as many as 1,135 persons appear in the Census of 1961 to be living on an average in one sq. mile.

The rural density of this district is much higher than that of the State. It is lower than any other district within the Presidency division except the district of 24-Parganas. In fact in terms of rural density Nadia ranks fifth in the State of West Bengal. The first four places have gone to Howrah, Hooghly, Murshidabad and Burdwan respectively. The pressure on the urban soil on the other hand is not so high in this district as is seen in other urban areas of the State. In the urban areas of the State of West Bengal as many as 12,978 persons are found to be occupying one sq. mile of area. In the district only 7,183 persons are found to occupy on an average every sq. mile of urban area.

In the beginning of the present century the district does not seem to have felt quite a heavy pressure of the population on its soil. The density was just above five hundred souls to a sq. mile in the first two decades of the present century, but the next two decades envisaged a decline in the density of population, the lowest being touched in 1921 when only 472 persons were found to have inhabited each sq. mile of the district. Since then it is on the way of improvement. The population pressure

was substantially felt in 1951, and after a passage of another ten years in 1961 the density of the district has even surpassed the average density of the State of West Bengal as a whole. The statement 2.1 given below shows the changes in the general, rural and urban density of the district between 1901-61.

STATEMENT 2.1

Total Rural Urban	Changes in Density (Persons per square mile)						
	1961	1951	1941	1931	1921	1911	1901
Total	1,135	759	557	478	472	514	512
Rural	954	639	494	434	431	475	473
Urban	7,183	4,740	2,649	1,956	1,819	1,824	1,815

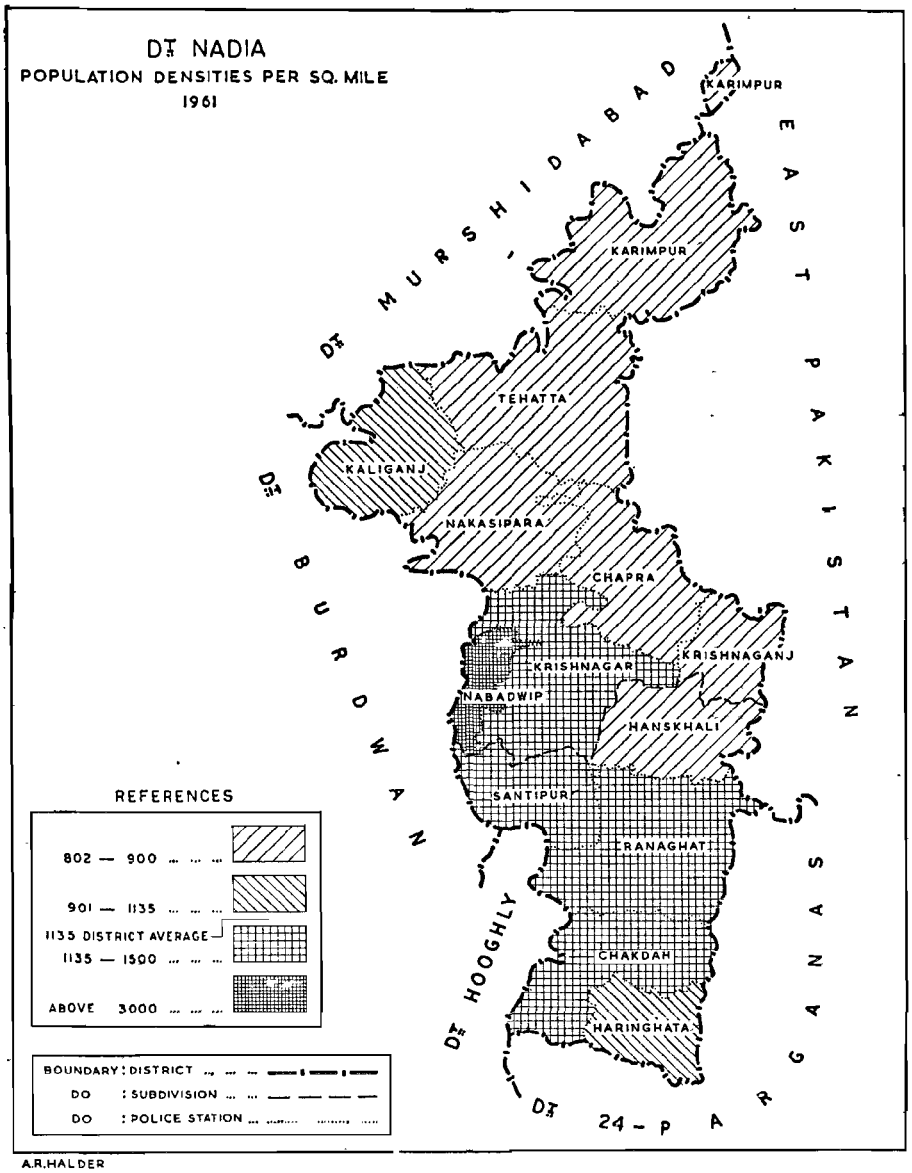

The human wealth, as controlled by the geographical phenomena, is generally not uniformly distributed all over the district. There are certain areas which overflow with population whereas some considerable areas restrict human habitation. The topographic variations have no doubt a profound influence on the pattern of the distribution of population in any tract, but in the district of Nadia the population distribution and for that matter a very heavy pressure in some of the areas is very much related to the process of settlement through migration. The migration in this district has played a very important role in its population increase, as well as, on a very heavy pressure of population on its soil. This factor alone has also influenced greatly the distribution of population in the different parts of the district. The population pressure in its part has affected a great deal the economic pressure on the soil whose capacity of the production has, as a result, depreciated with the decay of the distributary rivers, leaving the Ganges to join the Hooghly estuary, and a resultant lowering of the sub-soil water level.

Three police stations Krishnagar, Nabadwip and Santipur have formed a closely situated compact area of high population density. The police station of Nabadwip was all along having a high population density ever since 1901. Its density has now reached 3,113 persons per square mile. Krishnagar and Santipur are also having a population pressure of more than 1,000 persons per square mile. The Ranaghat subdivision is more densely populated than the Sadar. In fact, the northern and western thanas of the Sadar subdivision have lower densities in comparison to other areas of the district. The statement 2.2 below shows variations in density for the last seven census decades for all the administrative units of the district.

STATEMENT 2.2

VARIATIONS IN DENSITY (PERSONS PER SQUARE MILE) BETWEEN 1901 AND 1961

Santipur	1,497	1,062	734	629	612	653	661

The inequality in the distribution of population, great as they are, same to follow still greater inequality in the economic capacity of the soil. The district contains only very little of waste uncultivable land and more extension of cultivation of which the margin is not much, has little possibility of growth. The overall density per square mile of area is not a good index of agricultural crowding. The truer index is the density of population being engaged in agricultural pursuits per square mile of cultivable area. From Table B-X given in part IIA of this volume the number of cultivating households are obtained. An average household of Nadia district comprises of 5.35 persons. Thus the population of the cultivating households of the district number at about 760,529. The net area sown in the district pertaining to 1958-59 as given in the Statistical Abstract of 1961 published by the State Statistical Bureau, West Bengal, is about 710,180 acres and gross area sown is about 1,048,714 acres. Thus the density of population dependent on agriculture per square mile comes as 685 for the net area sown and 464 for the gross area sown. Net area sown per capita of this population dependent on agriculture is 0.93 acres, while the gross area sown per capita of the same population is 1.37 acres.

3. Sex Ratio

In the Indian Subcontinent males outnumber females. The same is true with the State of West Bengal also. In West Bengal males have always outnumbered females since 1901 when the sex ratio was 945. Upto 1941 it was gradually going down in each census year and the Census of 1951 marked a slight improvement over that of 1941. In the present Census it has further gone up. In 1961 there are 878 females for every one thousand male population in the State of West Bengal.

In the district of Nadia females outnumbered males in 1901, the proportion of sexes in that decade being 1,014 females for every 1,000 males. Since then the sex ratio has been gradually coming down though in the present decade it seems to have looked up a little as compared to two preceding decades. In fact since 1911 there has been reversal in the sex ratio and it has continued up till now, the lowest being touched in 1951, when the district had only 937 females for every 1,000 males.

Nadia shows a better proportion of sexes as compared to that of the State of West Bengal as a whole and also to that observed in the nearest industrial district of 24-Parganas. The proportion of female population over males was always high in this district in comparison to that in the State of West Bengal in all the past census years.

In the present Census the district of Bankura shows the highest sex ratio in the State. Bankura has 981 women for 1000 men.

The statement 3.1 given below shows the variation in sex ratio between the last sixty years for the district of Nadia as compared to those for the entire State of West Bengal for total, rural and urban areas separately.

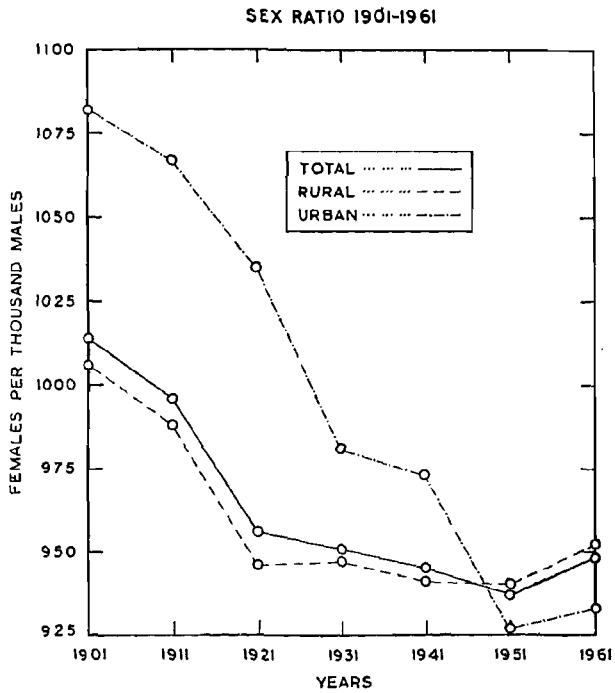

STATEMENT 3.1

Number of females per 1,000 males

Year	West Bengal			Nadia District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	945	994	652	1,014	1,006	1,082
1911	925	982	614	996	988	1,067
1921	905	971	591	956	946	1,035
1931	890	961	578	951	947	981
1941	852	945	559	945	941	973
1951	865	939	660	937	940	927
1961	878	943	701	948	952	933

In the rural areas of the district the proportion of female population to males is quite high. In fact, females outnumbered males in the rural areas of the Nadia district in 1901 but since then preponderance of males over females are being observed in the rural tracts. In 1921 the sex ratio of rural Nadia came down at 946. In the next decade this ratio improved only very slightly being only 947. But in 1951 the sex ratio came down at 940. In the present Census the sex ratio has appreciably improved than the last few previous decades, there being 952 females for every 1,000 of the rural male population.

In the urban sector of the district unlike the general trend females had always outnumbered males upto 1921. At the turn of the present century the proportion of sexes in this district was 1,082 females for every 1,000 urban males. Since then it was gradually coming down and in 1951 this ratio touched the bottom at 927. In the present Census a slight improvement has been noticed when the sex ratio for urban Nadia is 933. Peculiarly enough the sex ratio of urban areas was always higher than of the rural areas upto 1941. Since then the reversal occurred. Thus the rural urban difference in sex ratio in this district is quite marked which indicates generally the selective migration of the male population from the rural areas to the urban areas in search of education and employment during the last few census decades. The diagram given below shows variation in sex ratio for total, rural and urban areas of the district between the last sixty years.

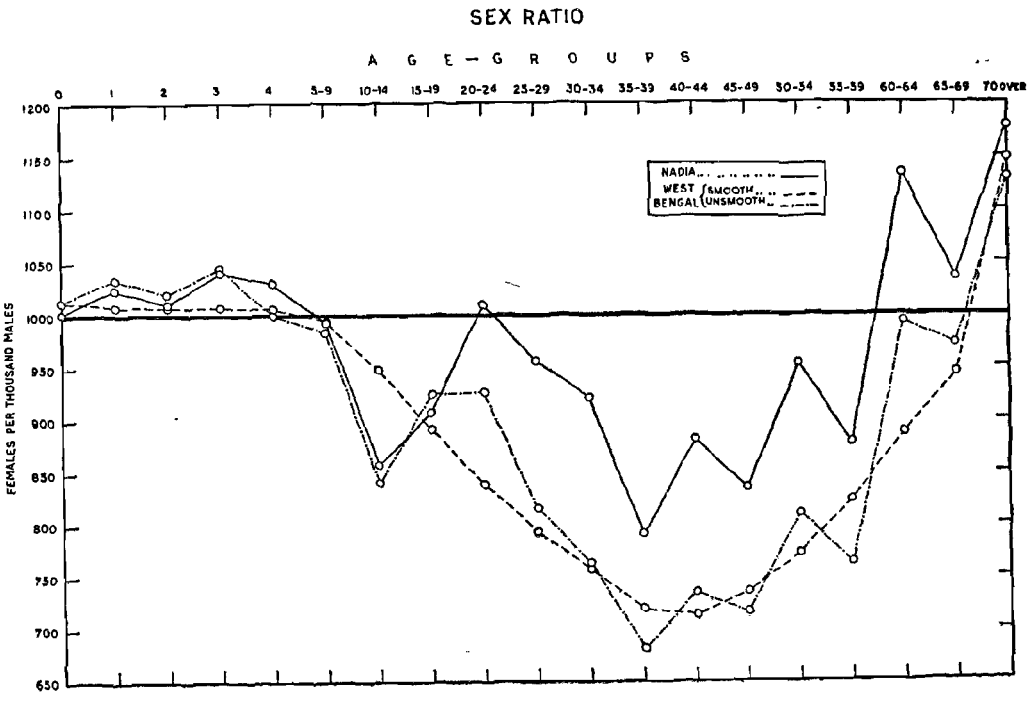

The inaccuracy of the age statistics especially for females is so great that it is difficult for any conscientious demographer to place much reliance on the proportion of females to males at each age period. The deficiency of female population is more marked in the age-group 10-14 and also beyond the age-group 25-29 upto the age period 55-59, where the sex ratio appears to be lower than even the district average excluding the age-group 50-54. Preponderance of females over males is observed in the district as in the State as a whole in all the ages 0, 1, 2, 3 and 4. High mortality of female children in this part of the country reasonably explains away this state of affairs.

The marked deficiency of females in the age-group 10-14 is a common feature in almost every part of the world. In the age-group 10-14 there is a sharp fall in the sex ratio but it begins to improve in the next higher age-group and reaches a maximum in the age period 20-24. This marked deficiency seems due to under-statement of their age if still unmarried and to the exaggeration of it if they are married and especially if they have become mothers. The over-statement of age in the age-group 10-14 seems somehow to be compensated by a sharp use in the sex ratio in the age-group 20-24. In the age-group 20-24 females have outnumbered their male counterparts. In the next higher age-groups the sex ratio falls by a consi-

derable degree. It touches the bottom in the age-group 35-39 after which period the sex ratio appears to fluctuate from one age-group to another.

The alternative rises and falls in the proportion of females at subsequent age periods beyond 39 illustrate the special predilection of women for multiples of 10 in stating their age. Digital preference acts as particular bias in age returns and specially in the case of the women. The alternative ups and downs in the proportion of sexes may be visualised in the curves given below.

Beyond 59, *i.e.*, in the age-groups starting from 60-64 females bear a larger proportion over males and this steady increase in their relative number beyond the age 59 might be due to in part their greater longivity.

The single year age returns have been smoothed for the State of West Bengal in the Office of the Registrar General, India. The proportion of sexes for different age periods has been calculated on the smoothed data for age returns for the State. In the diagram given above the two curves have been given showing the proportion of sexes in different age-groups calculated on the smoothed data of ages as well as on the raw data for the State. The statement 3.2 given below indicates the sex ratio at different age periods based on raw age returns for the State and the district. The sex ratio on the smoothed data have been shown within brackets against each age-group for the State.

STATEMENT 3.2

Age-group	Sex Ratio by Age-groups	
	West Bengal	Nadia
0	1,014 (1,014)	1,003
1	1,035 (1,009)	1,025
2	1,021 (1,008)	1,011
3	1,046 (1,008)	1,041
4	1,000 (1,007)	1,031
5—9	985 (995)	994
10—14	841 (949)	858
15—19	926 (893)	909
20—24	928 (840)	1,010
25—29	817 (795)	957
30—34	763 (758)	922
35—39	682 (720)	791
40—44	736 (714)	882
45—49	717 (736)	835
50—54	812 (773)	954
55—59	764 (824)	879
60—64	994 (888)	1,134
65—69	973 (945)	1,035
70+	1,130 (1,148)	1,179

The sex ratio is generally high in the Sadar subdivision. Amongst all the police stations of the district Krishnagar containing the district headquarters town shows the highest sex ratio. Next to it are Karimpur and Santipur where the sex ratio is 960. The sex ratio of Tehatta, Chapra and Kaliganj remains above the district average. The sex ratio of Nabadwip and Nakasipara is at par with district average. The rest of the police stations show their sex ratio below the district average. Chakdah police station shows the lowest sex ratio amongst all police stations of the district.

In the rural areas of the district Krishnagar shows the highest sex ratio where there are 993 females for every one thousand of its rural male population. Karimpur police station comes next. Tehatta, Ranaghat and Santipur police stations have the same proportion of sexes as 957. The sex ratio of Chapra police station remains just a little above the district average. The rest of the rural police stations of the district are below the district average in respect of proportion of sexes.

In the urban areas Santipur police station containing Santipur and Phulia towns shows the highest urban sex ratio in the district. The sex ratio of Nabadwip town is above the district average. The rest of the towns of the district are below the district average.

The statement 3.3 given below shows the number of females per 1,000 of male population in the administrative units of the district for total, rural and urban areas separately.

STATEMENT 3.3

4. Rural Population

About three-fourths of the total population of the State of West Bengal live in the villages. But in the district of Nadia more people, accounting for about 82 per cent of the total population of the district live in villages.

A village is conterminous with the revenue survey *mauza* for the purpose of census. The exact definition of village has been very much confusing during the first few census decades. When the Census Commissioner of India observed in his Report for 1931 that "the distribution between a town and a village however arbitrary is easily effected on a numerical basis but the definition of the village as unit is by no means always so easy", he was speaking for his successors as well as for his predecessors. The way of defining a village was contemplated in the Census of 1881 as well as in 1891 to be by defining a village community according to Sir Henry Maine, but this did not yield much positive result for by that time revenue village or *mauza* had already come in the picture, thanks to the great Revenue Surveys of India which had commenced in the 18th century. The slow emergence of the revenue *mauza* as the village is traced in the first three volumes of Phillimor's Historical Records of the Survey of India.

In 1901 and 1921 when cadastral survey had not been completed in most of the districts of West Bengal and when the *mauza* boundaries laid down in the general revenue survey had not always been clearly traceable, the term village in census parlance was rather indeterminate, because it had different meanings in different areas. Sometimes it meant a survey *mauza* and sometimes a residential village. In the own words of E.A. Gait, the Census Superintendent of 1901 of Bengal, 'A village may be either a collection of houses bearing a separate name, or else the *mauza i.e.*, the area treated as a village at the survey. The latter has the advantage of being a definite unit regarding which there can be no manner of doubt so long as the boundaries laid down at the survey are known, but it does not at the present time necessarily correspond to the residential village. One of the latter may spread over two *mauzas* or the *mauza* may be altogether uninhabited. On the other hand, if the survey unit be neglected, it is very difficult to say with any precision what constitutes a village. There are many collections of houses which would by one person be called separate villages, while another would treat them as hamlets of other villages in the neighbourhood. In Bengal the records of the revenue survey have not been kept up-to-date and in most districts the survey *mauza* is no longer clearly traceable. Generally, therefore, a village was taken for census purposes to mean a residential village, *i.e.*, as a collection of houses bearing a separate name with its dependent hamlets. Where, however, there has been a recent cadastral survey, as in parts of Bihar and Orissa, the survey *mauza* was taken as the census unit'.

O'Malley in 1911 commented on the Census village as follows :

'The census village corresponds to the *mauza* or survey unit of area in the Burdwan and Presidency Division and Cooch Behar, and elsewhere to the residential village, or collection of houses bearing a common name with its dependent hamelts. As a rule, the difference between the *mauza* and the residential village is small ; but this is not so in tracts which were uninhabited at the time of revenue survey, and so were not properly subdivided. A striking instance of this is found in the western part of Midnapore district, known as the Jungle Mahals, where nineteen *mauzas* contain more than 20,000 villages and hamlets. The village is thus a somewhat indeterminate entity'.

It was from 1921 onwards the term village in West Bengal corresponds to a revenue survey *mauza*. Owing to the peculiar configuration of the country the houses being scattered over the face of the land without any reference to civic unity or corporate life there was practically nothing much which could correspond a village in ordinary sense of the term. The *mauza* which had been demarcated as a unit for revenue purposes was translated as village for convenience's sake.

It should be borne in mind that what is reckoned for all administrative purposes and consequently also for the census as a village may or may not be the same as what we normally have in mind when we speak of a village. A village in the ordinary sense may mean a cluster of houses whose inhabitants are regarded by themselves as well as by others as distinctive social units with its identities marked by distinctive local name. The village in the administrative sense is the *mauza,* a settled area with definite boundaries for which records have been prepared. The administrative convenience for taking the survey unit of the area as a village is very great. It enables the census field staff to make absolutely certain that no tract however remote is left out of account. Thus in 1961 a village as a general rule has been taken to mean a revenue survey *mauza* with Jurisdiction List number.

Table A-III in Part II A of this volume gives the number of villages according to the different size classes of population as per 1961 Census for the district and its administrative units. In 1961 Census as many as 1,282 villages have been found to be inhabited in the district of Nadia. Changes in the number of inhabited villages during the last sixty years' period of 1901 to 1961 have already been indicated at page (3). There has been a large reduction in the number of villages in this district owing to the jurisdictional changes that had taken place from time to time in fixing up the district boundaries. There was drastic reduction in the number from 1,655 to 1,221 during 1901-1911. Since then it went up to 1,240 in 1931, but again there was a drop in 1941. In the year 1951 the number of villages increased by 56 from what it was in 1941. During the last ten years there has been an increase also in the number by 44. In the State of West Bengal the number of inhabited villages have decreased by nine during the last decade. It may be mentioned in this connection that in Table A-I of Part II A the total number of inhabited villages in the district has been shown as 1,282. But in Table A-III three less have been shown because the population figures of villages Bhepur (J.L. No. 46), Daluipur (J.L. No. 47), Dhandhania (J.L. No. 48) in the police station Haringhata have been merged with Haringhata Firm of the same police station for administrative convenience. But for all purposes the total number of inhabited villages in the district should be taken as 1,282.

The spatial distribution of the inhabited villages has been indicated by a number of 115 villages being located in 100 square miles of the rural areas of the State of West Bengal. Villages in the district of Nadia are more sparsely distributed. There are only 88 villages to every one hundred square miles of the district's total area. In Ranaghat subdivision the distribution of villages shows comparatively more congregated pattern, where there are 114 villages on an average per hundred square miles of its rural area. There is not a single police station in the district, where one square mile of rural area contains two or more villages on an average. The maximum density of villages is observed in Chakdah police station, where 141 villages cover hundred square miles of area. Next to it is Haringhata police station where there are 137 villages per hundred square miles of rural area. In Sadar subdivision villages are more sparsely situated. In Chapra police station clustering of villages is least observed where only 70 villages are covered by hundred square miles of its rural area. In Santipur police station each village covers on an average only one square mile of area.

In the State of West Bengal 686 persons reside in a village on an average. In the district of Nadia more number of persons live together in a village on an average. As many as 1,090 persons are found to be living in one inhabited village on an average. In the Sadar subdivision each of the three police stations of Nabadwip, Tehatta and Krishnagar shows the average number of persons per inhabited village quite high. In Nabadwip this number is as high as 1,936, it is 1,538 in Tehatta and 1,252 in Krishnagar police station. The number of persons per inhabited village is also above the district average in the police stations of Chapra

and Nakasipara. The least populous villages are found in Haringhata police station where any village contains on an average only 756 persons.

The statement given below shows the rural population, number of inhabited villages, average population per village and number of villages per 100 square miles of rural area of the district and its different administrative units as also for the State as a whole.

STATEMENT 4.1

State/District/Subdivision/ Police Station	Area in Sq.miles (Rural areas)	No. of inhabited villages	Total persons (Rural)	Average persons per inhabited village	No. of inhabited villages per 100 Sq. miles (Rural)

Hanskhali	93.5	78	79,535	1,020	83
Santipur	64.2	63	57,431	912	98

In the district of Nadia the maximum number of villages have a population less than 500. A little more than one-third of the total number of villages are in this class but population living in such villages account for only 8.27 per cent of the total rural population of the district. In 1951 this class of villages accounted for more than half of the total number of villages of the district and persons living in such villages accounted for 18.64 per cent of the total rural population of the district. Villages having a population between 500 and 999 accounted for about 23.37 per cent of the total rural population in 1951. In the present Census of 1961 persons living in this class of villages account for only 18.69 per cent of the rural population of the district. In 1951 maximum number of the rural population were found to be living in villages having a population range of 1,000-1,999, when 29.62 per cent of the rural population lived in this class. In 1961 about 29.60 per cent of the total rural population live in this class. Maximum rural population are living in the population range of 2,000 to 4,999 in 1961 Census. A little less than one-third of the total rural population are living in this class. In 1951 only 18.74 per cent of the total rural population were living in the villages of this range. In the next higher class of villages, that is, those having a population between 5,000 to 9,999 about 7.59 per cent of the population are found to living. In 1951 they accounted for only 2.17 per cent of the rural population of the district. Only 3.21 per cent of the rural population inhabit the villages having a population of more than 10,000. In 1951 this percentage was higher (7.46). Only 0.16 per cent of the total number of villages of the district are in this class. In 1951 it was a little more (0.24 per cent). Thus the proportion of villages having a population range of 10,000 and above was higher in 1951 than in 1961 Census.

The villages of smaller sizes, appear, therefore, to be diminishing faster at the cost of rapid growth of villages of higher population sizes. The sate-ment below shows the percentage distribution of villages and population by class of villages of the district as compared to that of the State both for 1951 and 1961.

STATEMENT 4.2

Class of villages (According to size of population)	Year	West Bengal		Nadia	
		Percentage of number of villages in this class to total number of villages	Percentage of population in this class to total population	Percentage of number of villages in this class to total number of villages	Percentage of population in this class to total population

	1951	0.04	1.07	0.24	7.46

In the district of Nadia there is no village comprising the whole of a revenue *mauza* having a population more than 10,000. In fact, Refugee Coopers Camp No. I within the jurisdiction of Dhubulia under Krishnagar police station and Refugee Camp No. II of Ranaghat police station have a population of 22,512 and 22,364 respectively. These two units have been taken as rural units without any jurisdiction list number and they have been shown under the category of villages of population size of 10,000+. Refugee Camp No. I is adjacent to Dhubulia Railway Station on the Krishnagar-Murshidabad Branch. There is one primary school, two high schools, a post office, a hospital and a dispensary here. The Refugee Camp No. II is situated on the other side of the Ranaghat Railway Station. There is a hospital within this camp. Of the total persons residing here most of them are engaged in cotton weaving in handloom industry. There are seventy-eight weaving handloom centres here. Ranaghat police station has two more refugee camps with lower population sizes.

There are 17 villages which have population more than 5,000 but below 10,000. Mahatpur (J.L. No. 100) in the police station Chapra is the biggest village in the sense of revenue unit in the Nadia district in respect of population size. Being situated on the bank of the river Jalangi at the south-west corner of the police station Chapra it is inhabited by as many as 8,546 persons covering 7,796.15 acres of area and is thus numerically larger than even any of the non-municipal towns of the district. There are six primary schools and two post offices in this village. Maximum workers of this village are engaged in agricultural sector.

The second largest revenue village in the district is Debagram (J.L. No. 60) in the police station of Kaliganj. It has a population of 8,439 souls covering the area of 4,909 acres. It has a railway station of the same name under Krishnagar-Lalgola (Murshidabad branch) line. There are 5 primary schools, a high school, one post office, one electric power station, one library and a health centre in it. Next to it is Aranghata Narayanpur (J.L. No. 49) of Ranaghat police station which is inhabited by 7,769 persons. It is situated on the bank of the river Churni covering 2,746.16 acres of land. Aranghata railway station under the Ranaghat Banpur railway line is situated within this village. There are 6 primary schools, 2 high schools, 2 post offices, and a library in it. This village has also the benefits of electricity. The village Palasi ranks fourth in accordance with the size of population. This is the village with the historical 'Battle of Plassey-1757' fame. A monument has been erected in remembrance of that historical battle in this village. It is situated on the side of the river Bhagirathi. On the other side of the river is the district of Murshidabad. The village covers an area of 2,508 acres and has 4 primary schools, one post office and a library. Of the other big villages of the district those worth mention are Bhalika (J.L. No. 68) of Krishnagar police station, Gadigachha

(J.L. No. 17) and Mahisunra (J.L. No. 30) of Nabadwip police station, Bara Andulia (J. L. No. 3) in Chapra police station, Matiari (J. L. No. 89) in Kaliganj thana, Betai (J. L. No. 89), Patharghata (J. L. No. 113) and Tehatta (J. L. No. 101) in Tehatta thana, Andhaketha (J. L. No. 111), Barnipara (J. L. No. 119) and Dogachhi (J. L. No. 1) in Karimpur police station.

5. Urban Population

It is a fond belief to many a student of demography that West Bengal, where almost every fourth person is a town-dweller, is one of the highly urbanised States of the country, and that West Bengal has decided to tread the path of trade, industry and commerce leaving agriculture in the shade. But a close scrutiny of the pattern of urbanisation in this State gives us the idea that West Bengal's urban concentration is limited to a few highly industrialised districts around the river Hooghly at its lower reaches, Durgapur-Asansol in the district of Burdwan, and Siliguri in the district of Darjeeling in the north.

Urbanisation is a process through which people agglomerate in a certain region in search of livelihood and sustenance, principal means of which is generally derived from non-agricultural economic pursuits. The growth of Nadia's urban centres is also quite interesting in that respect. All its twelve towns are distributed in the south-western part of the district. The old municipal towns centre round the principal rivers of the district—the Bhagirathi, the Jalangi and the Churni. The new towns have grown more on the principal railway communication line. The fair intrusion of the Calcutta Metropolitan area into this district towards the south has helped urbanisation making a rapid stride towards further growth.

Nadia with 18.41 per cent of urban population occupies the fifth place in so far as the rate of urban population increase is concerned. In this respect it is preceded by the districts of Howrah, 24-Parganas, Hooghly and Darjeeling.

For the first time in 1951 all Census statistics were presented separately for rural and urban areas. This has been continued in 1961 as a basic stratification as fundamental as the presentation of all data separately for males and females. An urban area for the purpose of 1961 Census includes (a) all municipal towns, cantonments and any other areas being administered by local bodies such as town committees, union committees etc., (b) any other place which satisfies the following emprical tests *viz.*, (i) a population of not less than 5,000 persons (ii) a density of at least 1,000 persons per square mile and (iii) three-fourths of the occupations of the working population should be outside of agriculture and (iv) the place should have a few pronounced urban characteristics and amenities like location of educational, medical or public institutions, offices or trading centres in it.

There are twelve towns in the district of which six are municipalities and the other six are non-municipal urban areas. These six non-municipal towns have only been added up in 1961. All the towns of the district Nadia have been constituted by 35 villages in full and 28 in part.

During the last sixty-year period Nadia's growth of urban population showed phenomenal increase only in last two decades 1941-51 and 1951-61, as is evident from the statement given at page (27). In the former case such increase was only due to influx of refugees coming from East Bengal, but in the latter it is to some extent due to inclusion of more areas under urban command. The statement 5.1 shows the constituent *mauzas* of new towns which have been added up in 1961 Census with their area and 1951 population.

STATEMENT 5.1

In 1901 this district had only six towns. In 1951 one town was added to the list. But that could not exist by itself in 1961 when it was merged with two new towns of 1961. Kalyani and Kataganj & Gokulpur Govt. Colony town-group has been newly created in 1961 by three constituent towns *viz.*, Kalyani, Gayespur Govt. Colony and Kataganj & Gokulpur Govt. Colony. The village Bagula of Hanskhali police station has been given the urban status as it could satisfy the emprical tests laid down for the purpose. Another town Phulia has also sprung up making the total number of towns twelve. Taking the urban population of 1901 as 100 the index of urban growth has been calculated both for the State and the district of Nadia which is given in the statement 5.2 below.

STATEMENT 5.2

Year	Index of Urban Growth	
	West Bengal	Nadia
1901	100	100
1911	114	101
1921	122	100
1931	140	108
1941	229	146
1951	304	261
1961	413	396

During the first three decades of the present century, the urban component of Nadia's population remained more or less stationary. In the decade ending in 1931 the urban population of the district became a little more than what it was in 1901. In 1941 the urban population became nearly one and a half time more than that of the base year 1901. In the next decade *i.e.*, in 1951 it became more than two and a half times of the 1901 population. In the present Census it has nearly become four-fold of the base population.

The following statement 5.3 gives the growth of urban population in each town of the district during the last sixty-year period, 1901-61.

STATEMENT 5.3

GROWTH OF POPULATION OF EACH TOWN SINCE 1901

The most marked growth is observed in Chakdaha where the growth rate has been to the extent of 128.27 per cent over its population of 1951. A decade before *i.e.*, 1941-51 the growth rate was much more even as high as 179.80 per cent. This town has overgrown to such a large proportion due to the influx of refugees from East Pakistan since 1947. Though a municipality of a long studing it looked nothing more than a small village and a kind of sleepy hollow upto 1947. But after 1948 Chakdaha rapidly expanded in area, by growing colony after colony of industrious displaced population. The refugee population has had a way of settling down mainly along the railway line of the Eastern Railway.

The growth of most of the towns in this district is very much related to the settlement of refugee population. The way how these areas have been rapidly filled up may not be uninteresting for a short review.

Faced with a sudden heavy tide of displaced persons in 1948 and particularly in 1950, the Government opened several large refugee transit camps. The biggest was what is known as the

Ranaghat Transit Centre or Cooper's Depot, close to Ranaghat Railway Station. This during the Second World War used to be a large storage depot of the army. Around this Cooper's Depot grew a number of small refugee camps which housed a large population. The second largest camp was housed at Dhubulia Aerodrome at Dhubulia Railway Station on the Ranaghat-Bhagwangola line. The abandoned buildings of the Dhubulia Aerodrome and the network of paved roadways, depots and store-houses formed convenient receptacles for a large displaced population, and this place Dhubulia has now the largest concentration of displaced population and can well be described as a medium town, the Government having built large number of houses and provided underground sewage disposal and a liberal supply of this camp was estimated by the State Government to be nearly 25,000. There was a third group of refugee camps, close to the Kanchrapara Development Area Rural Colony, called the Chandmari Camps. The Kanchrapara Development Area Rural Colony had been called a census town in 1951 by courtesy, as the density was very great, the population being 12,019 in an area of 0.56 square miles. The population in this colony is composed entirely of displaced persons from Pakistan, the State Government having laid down roads and facilities for drinking water and sewage disposal by way of septic tanks and dug-well latrines. These two were on land abandoned by army storage depots set up during the Second World War. In December 1950, the population in this group of camps was estimated to be 14,500. In 1950 the State maintained a small camp at Chamta.

Between 1950 and 1952, the Government settled a large displaced population in a group of villages called Gopalpur, Kataganj, Gokulpur, Gayespur, Jadavpur, and Saguna, very close to the brand new town of Kalyani, which the State Government has undertaken to build out of nothing at all in Kanchrapara at the south-western tip of the district. The Chakdah group of colonies has already been mentioned. In the tract of land bounded by Santipur, Ranaghat, Duttapulia, Aranghata, Birnagar the concentration of refugee population has been particularly heavy. The Government have established a colony, predominantly of the middle class, in a village called Taherpur about a mile west of Birnagar, where the population in the middle of 1953 was estimated to be around 18,000. There have been fairly heavy gravitations in Karimpur, Tehatta, Chapra and Krishnaganj, of agricultural refugees and in Debagram, Kaliganj and Nakasipara, of middle class refugees. The concentration of middle class refugees is however, greatest in the towns of Nabadwip, Krishnanagar, Santipur and Ranaghat, not counting the solid and formidable blocks at Dhubulia and Cooper's Depot. In 1950 the Government of India, in collaboration with the Government of West Bengal, took a bold decision to build a brand new township from out of nothing whatsoever, called Fulia on what was formerly known as Baincha Railway Station, later renamed Fulia. The plan of this township was good and well-contemplated so far as it went, with provision both for industry and agriculture, training facilities for many kinds of craft and agricultural practice, reinforced by a resident population. Considering the money spent it was a very laudable venture, rescued from possible neglect by the conversation of the area into a Community Development Project Block under the State Development Department. The present population of this town, treated as such for the first time in 1961 Census, is about 3,811.

The Livestock Research-*cum*-Breeding Station at Haringhata is also growing into a kind of small town, with the establishment of the farm itself, the population of several new civil offices having been transferred to it, like the office of the River Research Institute, and the prospect of a few more migrating into the area.

The large town of Kanchrapara falls just outside the district, but a brief description of the prospects of Kalyani town is called for in this connection.

The scheme for the development of a modern town was mooted in 1951 by the Governor of the State himself. The object was to relieve the increasing pressure on Calcutta and also to help disperse industry by providing a new town with all modern amenities and electrical power. The Government selected an abandoned army base area immediately to the north of Kanchrapara Railway Station on the Sealdah-Ranaghat line, only 28 miles from Calcutta by rail, but connected with the city by rail, road and river. The site is surrounded by a ring of very important concerns, the more important of them being the Kanchrapara Railway Workshop, the State Tuberculosis Hospital, several army units, the town of Kanchrapara, the Livestock Research-*cum*-Breeding Station at Haringhata. The total area taken over for the town as 10,000 acres, of which over 6,000 are enclosed by a good circular road. 4,000 acres will be kept for parks, lakes and other greeneries. The plan of the town itself was approved by renowned engineers. 6,300 acres available for building will be distributed among public and private buildings, wide roads, small parks, open spaces, and artificial waters. The urban area has been divided into six contiguous blocks, four on the western side of the railway line and two on the eastern. At the moment only two blocks have been laid out in detail and offered to sale. Among other amenities are pipe water supply, underground drainage and sewage, central sewage disposal, electricity, modern roads, parks and

public buildings, including educational institutions. The area of the A and B Blocks together is about 2,300 acres. The scheme for the development of the total area of 10,000 acres was estimated to cost Rs. 110 million. The development of the B Block itself had been estimated to cost Rs. 22 million. A considerable extent of roadway have already been built, sewers and water pipes laid and electricity set up. In addition to the residential area a large tract of land comprising about 278 acres has been set apart for the location of industries and establishments. In the B Block alone about 5,600 houses will be built.

Much to the advantage of the dwellers of these towns, the wide Calcutta-Baharampur Road runs through their entire length. The people of this area are excellently served by frequent motor stage services and also by electric trains. The over populous city of Calcutta has been greatly relieved by many men having chosen these urban areas of Nadia as their place of residence for a comfortable and peaceful living. These people can very easily attend to their place of duties located either in the city of Calcutta and its nearby industrial places daily in time and at very little recurring expenses by electric trains.

The density is maximum in the small town of Kataganj and Gokulpur Govt. Colony non-municipal town, where 47,150 souls are seen to be occupying only one square mile of its area. This is next to the city of Calcutta and the industrial town of Titagar (61,143) in 24-Parganas district. Gayespur Govt. Colony (18,467) occupies the second place amongst the towns of the district in respect of density. Next to it is Taherpur non-municipal town where 16,501 persons live in one square mile of area on an average. Nabadwip municipal town shows a density of 16,191. The other towns of the district have shown their density below the state average. Amongst all the towns of Nadia, Kalyani non-municipal town shows lowest density where only 546 persons are seen to be occupying one square mile of its area.

The district headquarters town Krishnanagar shows a density of 11,548, while the subdivisional headquarters town of Ranaghat has a density of 11,834. The density of Chakdaha is 5,848 while Santipur shows 5,388 persons per square mile of its area. More or less three thousand persons are seen to be occupying one square mile area of each of the Birnagar, Bagula and Phulia non-municipal towns.

Preponderance of males is a characteristics feature with almost every urban area of the country. But Nadia's towns being more or less residential, the proportion of female population to males is not as small as is seen in other industrialised towns of West Bengal. It has already been seen that Nadia's urban sex ratio (933) is actually significantly higher than that (701) in urban West

STATEMENT 5.4

STATEMENT OF CHANGES IN CLASSIFICATION OF TOWNS, 1901-1961

Class I 100,000 and above

*Kanchrapara Development Area Rural Colony of 1951 was merged in Kalyani and Gayespur Government Colony Towns of 1961, separate population of the portions merged is not available.

Note : The following abbreviations have been used for the status of a town :

M Municipality
N.M. Non-Municipal Town

Bengal as a whole. Proportion of female population is highest in Kataganj & Gokulpurre Govt. Colony non-municipal town. There a 1,067 females for every 1,000 male population in this town. This town is newly created in this Census. In all other towns of this district males outnumber females. In Santipur municipal town the sex ratio is 974, in 1951 it was 979. In the headquarters town of Krishnanagar there are 915 females for every one thousand male population. In the populous town of Nabadwip there are 957 females for every thousand males. Proportion of female population is least in Kalyani non-municipal town where the sex ratio is only 564.

According to Census classification of towns based on population sizes three towns are in Class II, two in Class III, two in Class IV, two in Class V and three in Class VI. None of the towns in this district is classed as a city. Nabadwip has the maximum population (72,861). The district headquarters town of Krishnanagar follows Nabadwip in terms of population size. It contains a population of 70,440. The statement 5.4 at page (48) shows the changes in classification of from towns 1901 in the district of Nadia.

In a Census report towns are generally classified by population sizes. In 1961 the Registrar General of India, attempted the functional classification of a town based on Census data. According to this classification three towns, *viz.*, then district headquarters of Kr ishnanagar and the on-municipal town group of Kalyani, Kataganj and Gokulpur and Gayeshpur Govt. Colony, and Phulia have been classified as service towns. Nabadwip and Santipur have been categorised as artisan towns, and Ranaghat, Birnagar, Taherpur, Chakdaha and Bagula as traders' towns.

6. Age Distribution

The distribution of population by quinquennial age-groups may be obtained from the Table C-II in Part II A of this volume. The following statement shows the percentage distribution of population in some broad age-groups in the last two Censuses of 1951 and 1961 for the district of Nadia as compared to that of the State of West Bengal.

STATEMENT 6.1

	Nadia District				West Bengal			
	1951		1961		1951		1961	
Age-group	Males	Females	Males	Females	Males	Females	Males	Females
1	2	3	4	5	6	7	8	9
0—14	37.72	33.04	43.21	44.11	33.52	37.02	39.21	42.86
15—54	55.63	58.82	49.17	47.46	59.30	55.22	53.69	49.54
55+	6.65	8.14	7.62	8.43	7.18	7.76	7.10	7.60

During the last ten years, the proportion of child population has increased to a considerable degree in the district. This increase is greater in case of female children than in the case of the male children. The increase in the proportion of children of the age-group 0-14 has almost been compensated by a decrease of the same extent in the population of middle aged men and women between the ages 15 and 54. An appreciable increase in the age-group 0-4 has apparently been brought out by a fall of infantile mortality rate and a rise in birth rate. In the higher age-groups 55 and over, the proportion has come down. It has decreased slightly during the last decade. Almost the same trend is observed in the pattern of distribution of males and females in different broad age-groups while viewed in respect of the State of West Bengal as a whole. In the State too the proportion of child population in the age-group 0-14 has considerably increased apparently at the cost of a decrease by almost of the equal extent in the age-group 15-54. In the higher age-groups of 55 and over the proportion has almost remained the same both in 1951 and 1961 in the State.

Majority of the males, as well as of the females about one-third of them are between the ages 15 and 34 in the district. The abundance of young men and women is no doubt a healthy sign in the age composition of a country. But the proportion of the young men and women has been gradually coming down. In 1951 they enjoyed a larger proportion amongst the total males and females. In the next higher age-group (35-54) the proportion of the persons of both sexes have also gone down within the last ten years.

The children both males and females in the school-going age (5-14) constitute more than one-fourth of the total male and female population of the district. In other words every fourth male or female in Nadia is a boy or a girl in the school-going age. The children of this group are growing in number. Their proportion has considerably increased over the decade in this district.

In the district of Nadia the proportion of female children is higher than the corresponding proportion of male children amongst total male population. In the age period 0-4 females comprise 16.90 per cent amongst their total number while this percentage for males is 15.67. In 1951 the percentage of female population of the age-group 0-4 was 11.67 while this percentage for males was 12.51 of their total population. In the next higher age-group 5-14, the proportion amongst males is 27.54 against the female proportion of 27.21. In the working age-group 15-54 the male proportion is higher than the corresponding female proportion. In the district the aged women are more in number than the aged menfolk.

In West Bengal, male children of the age-group 0-14 only constitute 39.21 per cent of total male population of the State, whereas in the district of Nadia they are nearly 43.21 per cent of the total male population of the district. Amongst females, this proportion in the case of the State of West Bengal this is about 42.86, while in the district this is nearly 44.11. But in the age-group 15-54 both in case of males and females, the State's proportion is higher than the district proportion.

During the decade a significant change is observed in the number of young and aged persons *i.e.*, persons in the age-group 0-14 and 55 and over taken together per hundred of supporting population *i.e.*, persons in the age-group 15-54. This may be seen from the following statement of dependency ratio (*i.e.*, ratio between persons in the age-group 0-14 and 55 and over and those in the age-group 15-54).

STATEMENT 6.2

Year	Total Rural Urban	Dependency Ratio	
		Nadia District	West Bengal
1951	Total	75	75
1961	Total	107	93
	Rural	110	102
	Urban	95	71

The 1961 population of the district as well as in the State bear a larger load of dependency than in 1951. This is possibly due to the high fertility and low mortality in the State. This load is however, greater in rural areas than in urban areas. Nadia's population have to bear a load larger than even the State average. In 1951 the dependency ratio of Nadia was the same with the State average.

7. Marital Status

The civil condition of the people by age-groups has been shown in Table C-II in part II A of this volume. The following statement shows the percentage of population by age-groups classified by different marital status of the district of Nadia for the Censuses of 1951 and 1961.

STATEMENT 7.1

Year	Age-group	Never Married		Married		Widowed		Divorced and separated and unspecified status	
		Males	Females	Males	Females	Males	Females	Males	Females
1951	All ages	52.37	36.23	41.74	49.57	5.89	14.20	..	..
	0—14	98.11	92.02	1.80	7.67	0.09	0.31	..	..
	15—34	39.79	14.49	58.56	78.35	1.65	7.16	..	..
	35—54	3.84	0.56	82.54	68.00	13.62	31.44	..	..
	55+	1.82	0.59	58.39	36.80	39.79	62.61	..	..
1961	All ages	58.95	45.22	38.14	39.72	2.69	14.69	0.22	0.37
	0—14	99.82	95.59	0.15	4.31	N	0.03	0.03	0.07
	15—34	49.26	8.78	49.67	85.99	0.73	4.54	0.34	0.69
	35—54	3.09	1.32	91.37	59.16	5.14	38.95	0.40	0.57
	55+	1.88	1.67	77.84	17.78	19.89	80.14	0.39	0.41

In 1961 Census during sorting and tabulation all children below 10 years of age were treated as never married irrespective of their actual marital status return in the enumeration slips. Thus there may be some scope for doubt about the observation on civil conditions of persons in the age-group 0-14.

Child marriage apparently decreased to a considerable extent during the last decade. In 1951 about 7.67 per cent of the total female population in the age-group 0-14 were married. In 1961, this figure has come down to only 4.31 per cent. In the case of male population 99.82 per cent of those below 15 years of age have returned as unmarried in 1961 Census.

Another remarkable feature of the civil condition prevailing in Nadia district revealed in the 1961 Census is that the proportion of married persons has fallen down in comparison with that at the 1951 Census. While about 41.74 per cent of the total male population returned as married in the 1951 Census, in 1961 this figure has come down to 38.14 per cent. Peculiarly enough, in case of females this proportion is higher than males. While 49.57 per cent of the total female population in 1951 was married in 1961 Census

this percentage is only 39.72. The proportion of those widowed or divorced has also decreased in 1961 as compared to that of 1951 in case of male population. But in case of females this proportion has increased a little than what it was in 1951. Only a few women in the age-group 15-34 have remained unmarried in 1961, about 86 per cent of them in this age-group being married. But in the next higher age-group *i.e.*, 35-54 a little less than three-fifths of the women population have been returned as married and about 39 per cent of them are widowed. Majority of the men-folk of the age-group 35-54 are married. In the age-group 55 and above about 80.14 per cent of the women are widowed. In case of male only 19.89 per cent are widowed in this age-group. The number of divorced or separated men and women in this district is very small. In the above statement the figures for divorced and separated in 1951 Census have been shown together under the figures for widowed. So no separate figures are available for divorced or separated persons for 1951 Census.

The child-women ratio has been increased considerably during the last ten years apparently suggesting a fall in infantile mortality rate in the district. The child-women ratio when standardised for married women of the age-group 15-54 illustrates how high the specific fertility of adult women of the district is. The ratio is higher in the urban areas indicating thereby higher fertility in the urban area than in rural areas of the district. The incidence of widowhood has increased since 1951. This is higher in urban areas than in the rural areas.

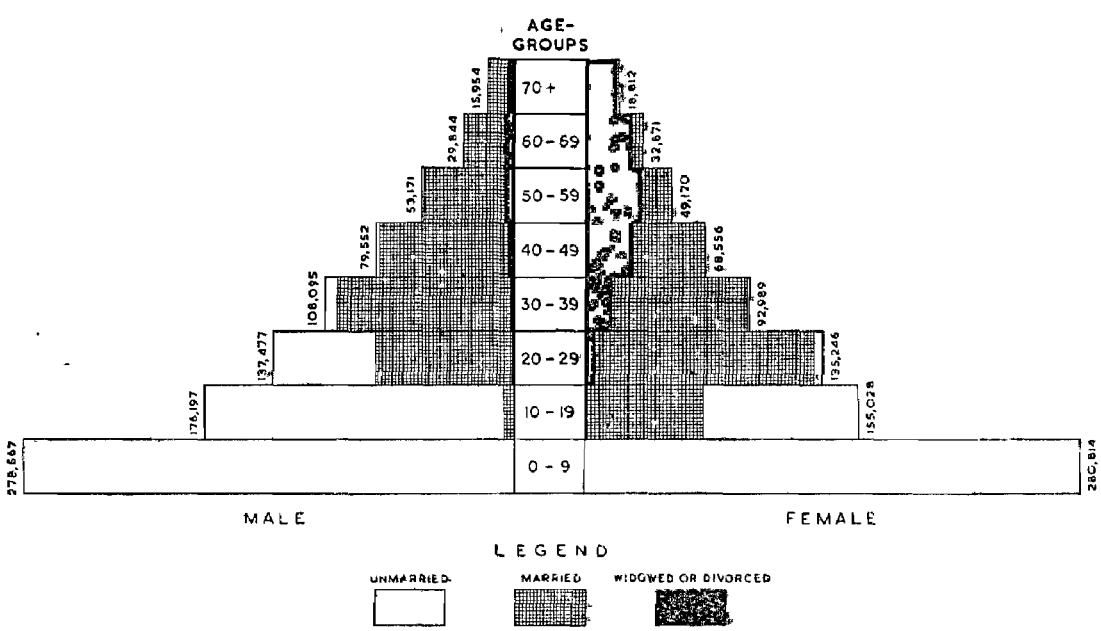

The statement below gives an account of the child-women ratio in the district in 1961 as compared to that in 1951.

STATEMENT 7.2

CHILD-WOMEN RATIO

Year	Total Rural Urban	No. of children 0-4 years per 1,000 females of 15-44	No. of children 0-4 years per 1,000 married women of 15-44	No. of total widowed females per 1,000 married women of 15-44
1	2	3	4	5
1951	Total	494	637	359
1961	Total	829	1,008	443
	Rural	871	1,027	439
	Urban	652	914	463

The diagram below is the age-pyramid showing the different civil condition in each decennial age-group of the district as returned in 1961 Census. The left horizontal bars stand for the male population and the right horizontal ones stand for the female population. White portions signify the population of unmarried males and females, checks signify the extent of married males and females and blacks signify that of divorced or widowed males and females. The number inserted sideways to each horizontal bar signifies the total male and female population in that particular age-group. The vertical legends in the middle between the two sets of horizontal bars indicate the age-groups to which the bars relate.

8. Language

The principal language of the district is Bengali. It is the mother tongue of the majority of the people of the district. In 1961 Census 97.67 per cent of the population of Nadia have returned their mother tongue as Bengali. This proportion has not materially changed since 1951, when about 97.24 per cent of the population had returned themselves as Bengali-speakers. Bengali speaking population arewell distributed all over the district. Chakdah police station has only 93.58 per cent of its population as Bengali-speakers. The incidence of other languages is practically nil in Chapra police station, where 99.78 per cent of population speak Bengali. In Nakasipara, Tehatta, Kaliganj and Karimpur police stations the Bengali speakers are above 99 per cent of each thana's population. In Krishnagar police station their percentage is 95.74.

Hindi is the next major mother tongue in vogue amongst the inhabitants of Nadia. This language has been returned by about 1.49 per cent of the total population of the district as their mother tongue. In Chakdah police station 3.46 per cent of its total population have returned their mother tongue as Hindi. On the other hand Chakdah police station accounts for about one-fourth of the total Hindi speakers of the district. This police station has a number of industries and a significant number of non-Bengali mill-hands reside here. As such Hindi has been returned here in a higher proportion than in other areas. In Krishnagar more than two and half per cent of its population have claimed Hindi as their mother tongue. In Nabadwip about 2.39 per cent of the population belong to the Hindi mother tongue group. In Ranaghat their percentage is 1.98 and in Haringhata it is 1.69 per cent. In Santipur police station Hindi has been claimed to be the mother tongue of 1.44 per cent of its people.

Santali occupies the third position in so far as the mother tongue returns are concerned. It is the mother tongue of only 0.26 per cent of the total population of the district. Santali speakers are more abundantly found in the Ranaghat subdivision specially in Chakdah and Haringhata. In Haringhata about 2.34 per cent of its population have their mother tongue Santali. Chakdah police station has only 0.89 per cent Santali speakers. These two police stations together account for a little less than three-fourths of the total Santali speaking population of the district.

In 1911 about 98.62 per cent of the district's total population were Bengali speakers. Since then their proportion was gradually going up upto 1931, when it became about 98.87 per cent obviously at the cost of the proportion of Hindi speakers. Since 1931 the Bengali speakers' proportion has been gradually coming down. In 1951 their percentage was 97.22. In the present Census they have regained a little. The growth of Bengalis peaking population has always been slightly higher than the general rate of growth of population of the district. In the last decade they have grown by 50.35 per cent over 1951, which is slightly higher than the general rate of growth of population (49.65 per cent) in the district of Nadia. In the first quarter of present century Bengali speakers in this district grew at a higher rate than others belonging to different language groups. While in the influenza epidemic decade of 1911-21 Nadia's population suffered a depletion by 8.29 per cent, the Bengali speakers suffered a depletion of only 8.19 per cent over their number of 1911. In the next decade while general population increased by only 1.43 per cent, the Bengali speakers could grow by 1.59 per cent.

Hindi speakers were having a decreasing share in the district's population upto 1931. In 1951 Census they could make up a little. In 1961 their proportion has again slightly gone down. While in 1931 their share of the district's population was limited to the extent of 0.75 per cent, it became 1.88 in 1951. In 1961 the Hindi speakers comprise only 1.54 per cent of Nadia's total population. In 1911-21 when the district suffered from depletion, Hindi speakers of Nadia registered a decrease by one-fifth of their number of 1911. In 1951 they registered a phenomenal growth rate to the tune of 297.11 per cent. In the present Census the rate of growth is only 23.19 per cent over their number of 1951.

The Santali speakers formed only 0.01 per cent of the district's population in 1911, while in 1961 Census their percentage to total population is 0.27. In 1911-21 the Santali speakers increased by 195.83 per cent. Santali speaking people had grown fantastically in 1951 but in the present decade their rate is only 3.20 per cent.

The statement 8.1 below gives population at each Census, intercensal variation and percentage to total population for the three major languages in the growth district.

STATEMENT 8.1

Showing percentage change in each decade (1911-1961) of population of three numerically most important languages (including mother tongues grouped under them) as of 1961.

Mother tongue		1961	1951	1931	1921	1911
1		2	3	4	5	6
Bengali*	(a)	1,673,511	1,113,066	713,756	702,574	765,260
	(b)	+ 5.35	+ 55.94	+ 1.59	— 8.19	..
	(c)	97.68	97.22	98.87	98.72	98.62

	(b)	+ 3.20	+1,642.97	+80.28	+195.83	..
	(c)	0.20	0.39	0.04	0.02	0.01

Note : (a) Absolute figures.
(b) Percentage variation.
(c) Percentage to total population.

*Malpaharia (Persons 63) has been grouped with Bengali.

**Devanagari (Persons 6) and Nagari-Hindi (Persons 981) have been grouped with Hindi.

† Mahili (Persons 32) and Paharia (Persons 163) have been grouped with Santali.

Kurukh/Oraon is the next major mother tongue of the district. This language has been returned by only 0.25 per cent of the total population of the district. Kurukh/Oraon speakers are mainly found in the Chakdah, Krishnagar, Hanskhali, Santipur and Haringhata police stations. This mother tongue is found mainly in the rural areas of the district. In Chakdah police station they comprise about 0.86 per cent of its population. In Hanskhali police station 0.71 per cent of its total population have their mother tongue Kurukh/Oraon. In Krishnagar they comprise 0.67 per cent.

As many as fifty-five mother tongue names have been returned by the people of Nadia. Of them nine belong to countries outside the Indian subcontinent. These nine mother tongues have been treated as foreign languages in the Census of 1961. Bariya and Bhutnagri have been found unclassifiable by the Linguist for want of any dependable information on them so far.

The rest of forty-four classified mother tongues have been divided into four families, *viz.*, Austric Family, Tibeto-Chinese Family, Dravidian Family and Indo-European Family following the method of Grierson's classification of languages.

Seven mother tongues belong to the Austro-Asiatic sub-family of the Austric Family. Of them one mother tongue is Khasi of Khasi group in Mon-Khmer Branch and Santali, Mundari, Kharia, Mahili, Baiti and Paharia mother tongues are of Munda Branch.

There are four mother tongues in the Tibeto-Burman sub-family of the Tibeto-Chinese Family. Of them Tibetan and Bhotia mother tongues are of Tibetan group and Newari is of Non-Promominalized Himalayan group of Tibeto-Himalayan Branch and Manipuri/Meithei mother tongue is of Meithei sub-group of Kuki-Chin group under Assam-Burmese Branch.

In the Dravidian Family four mother tongues, *viz.*, Madrasi, Tamil, Malayalam and Kannada are classified in the Dravida group. Kurukh/Oraon, Adibhasha-Kurukh/Oraon, Khond/Kondh and Malto are found in Intermediate group and Telugu is found in Andhra Language.

In the Aryan sub-family of the Indo-European Family there are as many as twenty-four mother tongues. Of them Persian in the Persian group and Afghani in the Afghanistan-Baluchistan sub-group under Eastern group are in the Eranian Branch, Punjabi and Sindhi mother tongues of North-Western Group, Marathi of Southern Group, and Oriya, Bengali, Assamese, Bihari, Khortha/Khotta, Malpaharia and Maithili of Eastern group belong to outer sub-Branch of Indo-Aryan Branch. Urdu, Hindi, Gurmukhi, Gujarati, Nagari-Hindi, Marwari, Rajasthani, Hindustani, and Devanagari of central group and Nepali, Gorkhali and Garwali of Pahari group belong to Inner sub-branch of Indo-Aryan Branch.

The predominant language of the district is the dialect of Bengali classified by Dr. Grierson as Central Bengali or Standard Colloquial Bengali.

Dr. Suniti Chatterji, the great Linguist of the country, in his Origin and Development of the Bengali Language (Calcutta University, 1926) states, "The speech of the upper classes in the western part of the Delta and in Eastern Radha gave the literary language to Bengal, and now the educated colloquial of this tract, especially of the cities of Nadiya and Calcutta, has become the standard one for Bengali".

It is the same dialect which is employed in the districts of 24-Parganas, Murshidabad, Hooghly and Howrah, and, as spoken by the higher classes, is claimed to be the most pure form of Bengali. The great prose writer Pramatha Chaudhuri, boosted the language of Santipur as the best Bengali dialect available and held it up as a literary model.

Dr. Grierson gives specimens of this dialect in Vol. V of the Linguistic Survey of India, Part I, which is reproduced below.

পাঁচু সেখ ও মালি মণ্ডলের কথোপকথন

পাঁচু।—ভুইকম্পটা পেরথম পশ্চিম দিক হতে এলো। তারপর ঘর দোর সব কাঁপতে লাগলো। তারপর কেরমেসে জল নড়তে লাগলো। তারপর গরু বাছুর জীব জানোয়ার সব কাঁপতে লাগলো। তুই কি কচ্ছিলি?

মালি।—আমি আমার মহাজনের বাড়ি ধানের জন্য গিয়াছিলাম। সেখানে খুঁটি হেলান দিয়া বসে ছিলাম। এমন ধারা ভুইকম্প আমার গেয়ানেতে দেখিনি কখন। তুই সে সময় কোথায় ছিলি?

পাঁচু।—আমি গোয়াড়ি হতে বাড়ি গিয়ে কাপড় ছেড়ে দাঁড়ায়ে কাঁপতে কাঁপতে বাইরে গিয়ে দাঁড়ালাম॥

মালি।—বাড়ি গিয়ে দেখলাম ছেলে পিলে ফারাকে এসে দাঁড়িয়ে রয়েছে॥

The people of Nadia have not given an encouraging account regarding the extent of bilingualism in the district. Only 3.50 per cent of the total population of Nadia have claimed to have known a second language in addition to their mother tongue. It is seen that 5.60 per cent of the total male population of the district have known a subsidiary language. The Bengali speaking population have little inclination in knowing a subsidiary language. Only nine among every ten thousand Bengali speaking women know a second language, while every twentieth man amongst the Bengali speakers have claimed to have known another language. The

number of Bengali speakers knowing a second language is shown for each of the subsidiary language as : English (M-41,285, F-6,975); Hindi (M-1,668, F-305); Arabic/Arbi (M-285, F-78); Urdu (M-269, F-6); Sanskrit (M-183, F-2); Santali (M-23, F-28); Telugu (F-11); Oriya (M-8, F-3); Assamese (M-9, F-1); Paharia (M-6); Burmese (M-1); French (M-1); Khortha/Khotta (F-1); Maithili (M-1); Malayalam (F-1); Malpaharia (M-1); Nepali (M-1).

About 13.58 per cent of the Hindi speakers have known another language. Amongst male Hindi speakers, 13.84 per cent know a second language, while for females this percentage is only 12.94. The number of such Hindi speakers is shown against each of the subsidiary language as : Bengali (M-2,219, F-921); English (M-240, F-15); Urdu (M-25, F-2); Sanskrit (M-3); Gujarati (M-1); Nepali (M-1).

The speakers of tribal languages are generally bilingual. Amongst those having mother tongue Kurukh/Oraon about 43.59 per cent know Bengali as second language. Nearly 30 per cent of the Santali speakers have claimed to have known Bengali. Amongst the people belonging to foreign language groups two men having mother tongue American have claimed Bengali as their subsidiary Language.

9. Religion

Two major religions *viz.*, Hinduism and Islam are noticed in the district of Nadia. Majority of the people profess Hinduism. They account for nearly three-fourths of the total population of the district (74.95 per cent). The followers of Islam also form a significant proportion of the population of this district. About one-fourth of the total population of the district have returned their religion in the Census of 1961 as Islam.

The composition of Nadia's population by different religious communities has not altered to any appreciable extent over the decade of 1951-61. In 1951 Hindus comprised 77.03 per cent and the Muslims 22.36 per cent of the district's total population. In the Census of 1961 about 0.63 per cent of the district's total population have reported their religion as Christianity. But in 1951 they comprised only 0.51 per cent. A negligible fraction of Nadia's population are the followers of Buddhism, Jainism and Sikhism. 18 persons of the district have reported their religion as Marangburu, 16 persons as Brahmo and 7 persons as Santal. These three religions are classified as other religions and persuasions in the 1961 Census.

Chapra police station of the Sadar subdivision, situated in the border of East Pakistan is the only area where Hindus and Muslims live nearly in the same proportion, each having a percentage share of about 48 among its total population. In Nakasipara, Kaliganj and Karimpur police stations of the same subdivision Muslims also account for more than forty per cent of the total population of each of the police stations. In Tehatta police station Muslims constitute 35.46 per cent of its total population. These police stations ares ituated in the extreme north of the district. In Krishnagar police station they account for nearly 32 per cent and in Haringhata police station 31 per cent. In all other police stations of the district the proportion of the Muslim population is below the district average. The lowest proportion of Muslims is found in Krishnaganj police station, where only 5.63 per cent of the total population are Muslims.

The Muslim population of the district have registered a phenomenal growth rate of 63.16 per-cent during the Census decade of 1951-61. The Christians have also recorded a growth rate as high as 84.2 per cent. The Jains have grown by 63.64 per cent during the decade of 1951-61. But Buddhists have suffered a severe loss of 82.49 per cent in the same decade. The Hindus have registered a growth rate of 45.61 per cent over their number of 1951 during the last ten years. Sikhs have also grown by only 11.73 per cent during 1951-61 decade.

Table C-VII of Part IIA of this volume gives the distribution of different religions in this district. The statement given below shows the percentage distribution of the Hindus and the Muslims in the district and its administrative units.

STATEMENT 9.1

District/Subdivision/ Police Station	Religion	
	Hindu	Muslim
Nadia District	**74.95**	**24.38**
Sadar Subdivision	*67.31*	*31.84*
Krishnagar	81.89	17.07
Nabadwip	85.64	14.35
Chapra	48.47	47.78
Krishnaganj	94.36	5.63
Nakasipara	55.44	44.56
Kaliganj	54.77	45.20
Tehatta	63.01	35.46
Karimpur	57.14	42.78
Ranaghat Subdivision	*85.98*	*13.62*
Ranaghat	89.84	8.42
Chakdah	86.93	13.00
Haringhata	69.11	30.87
Hanskhali	84.81	15.19
Santipur	84.91	14.80

The Christian community is scattered over the whole district, Krishnagar itself being quite a stronghold of this faith. The Catholic Church has spread itself out in Krishnagar, and recently built a large church and set up a good polytechnic school both for instruction and as a business proposition. The Church Missionary Society has a long history in the district and has extensive colonies in Chapra and Tehatta.

Nabadwip is a famous city of the Vaishnavas. An account of the Vaishnavism written by my esteemed colleague and friend Prof. Sanat Kumar Bose has been given in an appendix to the Part I.

10. Housing Condition

It was for the first time in 1961 Census that a comprehensive census of all houses was taken in this country on the basis of uniform list called the "Houselist". Information in respect of the materials of roof and walls of the census house, number of households living in a census house or number of census house(s) in the occupation of a household, number of rooms in the census house, and the different kinds of use to which it is put, was also collected.

In earlier censuses houselisting was confined mainly to the listing of the occupied census houses used as dwellings. Non-residential houses such as factories, workshops, schools, office or business premises, hotels, shops, temples, etc., were not entered in the houselist as the main purpose of the operations was to locate the places of human habitation for census enumeration only.

The statistics and knowledge about the housing condition of the country, which undoubtedly forms one of the basic necessities of life, are very poor and scanty. The lack of data, even of a basic nature, on housing conditions and industrial establishments in the country has been keenly felt for a long time. The need became all the more pressing with the advent of the age of all round development and five-year plans in which large sums of money are provided for housing, slum clearance etc. The position has been finely described by the Planning Commission in the Third Five Year Plan (page 697) thus :

"The present position of housing statistics is unsatisfactory in relation to the needs of planning. Except for data regarding the total number of houses and households in the country thrown up by the decennial census there are no proper statistics on such aspects as current building activity, additions to houses made each year, quantity and cost of materials used, production and consumption of building materials and prices of building materials. Certain basic items of information on housing conditions have been collected in the Population Census of 1961. These will facilitate compilation of an inventory of housing in the country and throw useful light on structural, functional, size and tenure characteristics".

The third session of the conference of statisticians of the ECAFE region held in April, 1960 recognised the gap in the industrial statistics available to the countries in the region due to the lack of appropriate data on housing and industrial establishments and commended the action taken in 1961 Census to provide data on housing and industrial establishments in the houselists. A house in this Chapter refers to a census house which has been defined in the 1961 Census as follows :

"A Census house is a structure or part of a structure inhabited or vacant, or a dwelling, a shop, a shop-cum-dwelling or a place of business, workshop, school, etc., with a separate entrance.

If a building has a number of flats or blocks, which have separate entrances of their own and are independent of each other giving on the road or a common staircase or common courtyard leading to a main gate, they will be considered separate census houses. If within an enclosed or open compound there are separate buildings then each such building will also be a separate census house. If all the structures within an enclosed compound are together treated as one building then each structure with a separate entrance should be treated as a separate census house."

It is clear from the above definition that each of two or more huts clustered on a person's homestead, each being built at a short distance from the other around a courtyard was treated as a separate census house.

The terms 'household' and 'room' which are to be met with in the following paragraphs are defined as follows :

'A household is a group of persons, who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so.' There may be one or more households in a census house or there may be one or more census houses in the occupation of a household.

'A room should usually have four walls with a door way with a roof over head and should be wide and long enough for a person to sleep in, *i.e.*, it should be at least 6 feet long. Unenclosed verandah, kitchen, store, garage, cattle shed and latrine which are not ordinarily used for living and seleping should not be treated as room. An enclosed room, however, which is used for living, dining, storing and cooking should be regarded as a room'.

10.1 House-types

When O'Malley described in the Census Report of 1911 about the nature of the dwelling houses in this part of the country, he possibly summed up the position of Central and Southern Bengal. To quote O'Malley, 'In Bengal dwelling house, or, as it may perhaps be more properly called, the homestead, is as a rule composed of four huts, built round and facing a central courtyard, with detached cattle-sheds and out-houses. Two of the huts forming

the house are used as living rooms—one for the male and the other for the female members of the household—another is a cookshed and the third is the *baitakkhana* or sitting room, where visitors are received and the men sit and smoke. They are usually built of earth, which, in the lateritic tracts of West Bengal, hardens, with exposure to the air, almost of the consistency of stone. The earth required for the plinth and walls is taken from pits dug in the neighbourhood, which in the rains are full of water and afford congenial breeding grounds for mosquitoes. The roofs are covered with thatch of considerable thickness, and have a curved hog-backed ridge, especially designed for withstanding the heavy rainfall of the delta. Sometimes the roofs are tiled and those with corrugated iron (in which they adhere to the same immemorial curve), as a protection against arson, which is a favourite form of crime in some parts of Bengal'.

The picture remains very much the same even to-day and for this district of Nadia as well. Linear clusters and clusters around a central courtyard are very frequently seen in the village side. Mud walled houses thatched with straw or C.I. sheets in the convex form very much typical of the Bengali style are mostly seen in the villages.

The 'physical environments and culture of the people largely influence the form, function and structure (both internal and external) of the house-types. Rural house-types in the district, however, illustrate the interruption of physical and human controls in the use of building materials and their influence on architectural features. Of all the factors, 'the climatic elements', *i.e.*, temperature, wind, rainfall, etc., generally 'influence the orientation and external structure of dwellings'. "The climate", observe Brunhes, "expresses itself through the form of roof" and this remark is rightly applicable when we examine the rural dwellings of the district. The ridge pole and the whole surface of the slopes are of convex nature so that the ends of the caves come close to the ground and entrance can be had at the centre where it is high. This particular kind of curved roof has a beauty of its own and was widely copied in stone and brick in balconies of Mughal and Rajput buildings during the best days of their architecture. Building materials of rural dwellings, clearly point out micro-regional characteristics of geology, soils and vegetal cover. The size, height, use of imported materials (tin, asbestos, etc.), standard of comforts—all indicate the economic conditions of the area.

The basic materials used for buildings of the houses are mud, bamboo (*Bambusa*/SPP), Palmyra Palm (*Borassus flabelifer*), rice-straw and mango woods (*Mongifera indica*). The mud walls, the thatched and curved roofs, *Uthans* (the courtyards) and *Verandahs* are some of the most characteristic features of the rural dwellings in this district. Though there may be variations in details of these houses from one physiographic unit to another, they are almost the same in their basic elements. Generally, one-storeyed *char-chala* (four shaded) houses are prevailing type.

The sticky soils of this area provide easy material for house walls and luxuriant growth of palmyra palms helps for the construction of frame of the roof. The mud is mixed with water and made into a paste by puddling with foot. It is then made into small lumps which are placed one above the other on the plinth. It is raised to a height of approximately 4.57 metres (in case of double-storey, it is greater) and its thickness varies from 0.45 to 0.76 metres. The roof is thatched with paddy-straw of more than a cubit feet deep. Such type of roof keeps the room cool in summer. The rural dwellings is "about 16 cubits long 12 cubits broad", including *verandah* which invariably faces the *uthan* (courtyard). This *courtyard* is indispensable for the rice-producing area. It is in the *uthan* where the peasants perform grinding, husking and drying of grains. The *uthan* is generally surrounded either by mud walls or by the rooms on two or three sides. The main entrance faces the village-path. This is provided with a door approximately 1.83 metres high and is mainly made of mango wood. The *verandah* is used as the parlour or drawing room of the peasants' family. Their friends and visitors sit on *Chatai* or *Pati* (mat) and gossip here generally in the evening. This *verandah*, facing the main road, is rarely used by the ladies.

There are four types of rooms; the big room, known as *Baroghar*, is used for sleeping and residential purposes; the other smaller rooms are toolrooms for keeping implements of husbandry; *Rannaghar* or *Pakerghar* (kitchen) where cooking for the family is done. This kitchen is generally made at a considerable distance from the living rooms. The main reason of it is to save the dwellings free from the fire. *Denkishala* (rice-husking paddle room), *Goshala* or *Goal* (cow-shed) is also seen in the well-to-do farmers' houses. Near the cowshed, is the grannery of paddy, popularly known as *Gola* or *Morai*. It is cylindrical in shape, made of bamboo, with a circular shed on the top. It contains a quantity of paddy, sufficient for the consumption of the family, from one harvest to another. Not far from the grannery, is the *Palui* (straw-stack) where an immense pile of paddy straw kept in open air to serve as fodder for cattle and for thatching of houses. Behind the kitchen is the *Astakud* (dustheep). This is somewhat harmful from the sanitation point of view but it supplies the farmer with manure for his field.

In the compact villages two-storeyed or three-storeyed houses are seen. The rich farmer can afford *Atchala* houses (eight-shaded). These houses

are made of mud, paddy-straw and imported materials like, C.I. sheets, flat tiles or asbestos. The palmyra palms and bamboos are used for construction of frame of the roof and poles. The vertical expansion of houses takes place in some compact villages and possibly due to lack of space and possibly to protect from summer heat. Mudwalls of considerable thickness keep the room cool when 'Loo' type of wind prevails in summer. The Orientation of the houses is guided by local belief and superstitions. Most of the houses are southfacing, because these houses receive fresh winds from the south.

ECONOMIC ASPECTS

1. Working Population

A significant deviation in presenting the data relating to economic activity of the people has been made in 1961 Census. In earlier censuses, the element of income or the criterion of economic independence was adopted for measuring the economy of the country. But in the present Census emphasis has been laid on the work done or the economic activity pursued by an individual. Thus the persons, engaged in productive work irrespective of their deriving any income or not have been treated as workers in 1961 Census. Persons such as family workers and children who work but do not earn enough to maintain themselves have also been considered as workers. Any person who generally spends more than one hour per day on any particular productive occupation has been included amongst working population. In respect of seasonal work like cultivation, livestock, household industry etc., persons having regular work for more than an hour a day throughout the greater part of the working season have been treated as worker. Undertrial prisoners or persons temporarily incapacitated if they were previously engaged in any productive work have also been recorded as workers.

The economic data have been presented according to nine industrial categories of workers and non-workers instead of eight livelihood classes classified by self-supporting persons and their dependents in 1951. The economic activity of the people residing in villages has been shown by the different industrial categories in the Village Directory. The Primary Census Abstract and the B-Series Tables in Part IIA of this volume also presents the different facets of the economy of the district.

In the industrial classification of workers, industries have been classified as household and non-household. A household industry is defined as an industry which is not run on the scale of a registered factory and is participated in by the head of the household himself or any member of the household either at home or within the village in rural areas and in the same census house in urban areas.

1.1 Labour Participation Ratio

Inspite of a very liberal definition of a worker in this Census only 272 for every thousand persons have returned themselves in 1961 Census as workers in the district of Nadia. The labour participation ratio (*i.e.*, the percentage of workers to total population) in this district is even below the State average. In the entire State of West Bengal for every one thousand of its population only 332 persons have been classed as workers, and the rest of 668 persons have been recorded as non-workers who are believed to be dependent on the working population for their sustenance. In Nadia 728 persons per *mille* are non-workers as per Census 1961. The labour participation ratio in Nadia is the lowest among all the districts of the State of West Bengal.

The above observation also holds good in case of labour participation amongst the rural population of Nadia district. The labour participation ratio in the rural areas of the district is awfully below the State average. In the State of West Bengal as a whole 327 out of every thousand rural population are workers. But in the district of Nadia only 277 per *mille* of its rural population have returned themselves in the Census 1961 as workers. Labour participation for the rural population in the district Nadia is the lowest in the State except the district of Howrah.

In the urban sector labour participation is even worse than in the rural sector of the district. Only 249 out of every 1,000 urban population of Nadia are workers. The labour participation ratio in the urban areas of the district is also below the State average. In the State of West Bengal as a whole 347 out of every 1,000 urban population are workers. Labour participation amongst the urban population of Nadia is also the lowest in the State.

The male component amongst the working force of Nadia is much higher than the female component. The labour participation ratio amongst the male population of Nadia has been found to be 49.5 while this ratio for the females is only of the extent of 3.6. The participation both by males and females in the district of Nadia has been found lower than the corresponding State figures. In the State of West Bengal 53.98 per cent of the total male population are workers in 1961 Census.

In rural sector labour participation both by males and females has been lower in Nadia than in the State. While 53.47 per cent amongst males and 10.62 per cent amongst females in the State of West Bengal are workers, in the district of Nadia only 51 per cent amongst males and only 3.2 per cent amongst females have been classed as workers. In the urban areas participation by males of Nadia has been found lower than the corresponding State figure but amongst females participation is higher in Nadia than the corresponding participation by females living in all towns of West Bengal taken as a whole.

Nadia's women labour force in the urban sector are mostly engaged in household industries located in the towns of the district.

The labour participation ratio has gone down in this Census from what it was in 1951 Census. In 1951 about 29.48 per cent of the district's total population were regarded as workers. In the present Census 27.16 per cent are regarded as workers. The labour participation ratio amongst males is higher in 1961 than in 1951. In 1951 Census the percentage of workers amongst males was 48.8 whereas in 1961 it is 49.5. But the labour participation amongst females has very much gone down in 1961 from that in 1951. In 1951 the percentage of workers amongst females were 8.88 whereas in 1961 it is only 3.6.

1.2 Labour Participation in different Administrative Units

The labour participation is the highest in Sadar subdivision. This ratio for Sadar subdivision has even been higher than the district average. Amongst all the police stations of the district, Haringhata police station, having the busy Haringhata Dairy Firm has shown the highest labour participation ratio in the district where 30 per cent of its population are workers. Nabadwip police station of Sadar subdivision follows closely the Haringhata P.S. having the percentage of workers 29.67. Next comes the rural police station of Chapra with 29.37 per cent of workers, being followed by the two rural police stations of Krishnaganj and Kaliganj having the percentage of workers as 28.64 and 28.40 respectively. In Hanskhali this ratio is around 28 per cent. These police stations are mainly rural in nature having employment opportunities only in the agricultural fields and to a little extent in some household industries. Santipur and Nakasipara police stations also have this ratio higher than the district average. In Ranaghat police station the participation is quite poor where only 24.26 per cent of its population are workers. In the urban sector maximum labour participation has been observed in the Nabadwip police station where this ratio is 28.10. The labour participation in the Bagula town is 26.0 being closely followed by the urban areas of Santipur police station. The headquarters town Krishnanagar's labour participation ratio is also higher than the district average.

The labour participation by males is found to be highest in the rural police station Chapra where 55.13 per cent of its male population have been returned as workers in 1961 Census. Next comes the police station of Haringhata where the labour participation ratio for males is 53.10. Karimpur and Tehatta police stations have also shown quite high participation by males. In Hanskhali, Nakasipara and Kaliganj police stations labour participation ratio amongst males is of the order of 51. In Krishnaganj police station the labour participation ratio for males is 52.60. It is seen that male population are better employed in the rural than in the urban sector.

Amongst the females the maximum participation is seen in Nabadwip police station where majority of the female workers are found to be engaged in household industries. They are mainly engaged in the weaving in handloom industry at home. A good number of female workers are also found to be engaged in the *bidi* industries. The female participation in Santipur, Krishnagar and Chakdah police stations is also remarkably higher than the district average. Female workers are mostly employed in the household industries in these three police stations.

The statement 10.1 below gives the percentage of workers amongst total population, males and females for all the administrative units of the districts as well as for the State as a whole by total, rural and urban areas separately.

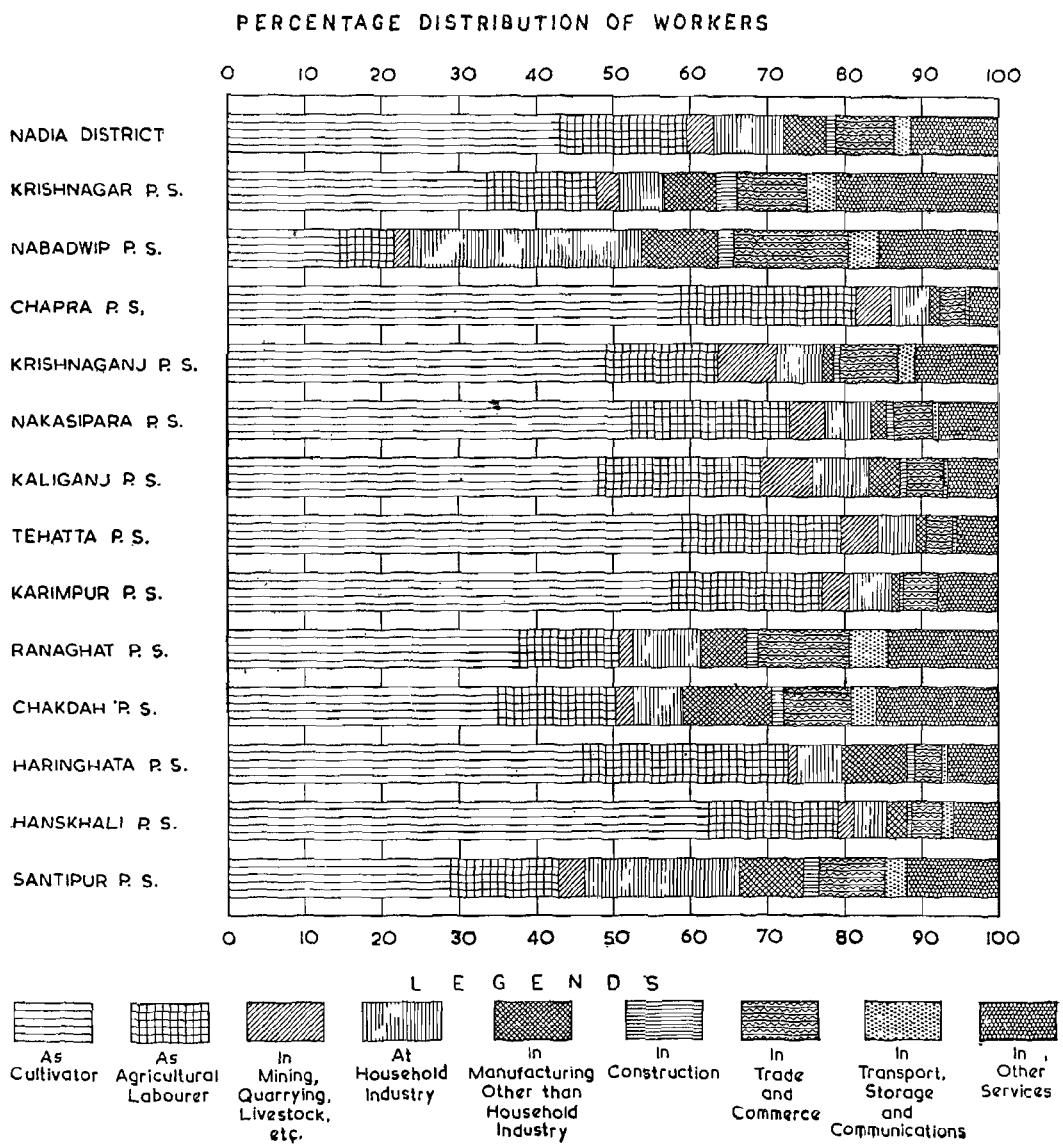

STATEMENT 10.1

State/District/ Police Station	Total Rural Urban	Percentage of Workers		
		Persons	Males	Females
1	2	3	4	5
WEST BENGAL	**Total**	**33.16**	**53.98**	**9.43**

	Rural	28.96	52.62	4.23
	Urban	25.60	45.20	5.27

1.3 Participation by different Industrial Classes

Most of the workers of this district are engaged in agricultural pursuits. Every three out of any group of five workers seem to be in the agricultural sector, either as a cultivator or as an agricultural labourer. In the State of West Bengal as a whole only 54 per cent of the total working population are engaged in agriculture against 59.61 per cent in the district of Nadia. The proportion between cultivators form about 2.6 times more in number than the agricultural labourers. In the State of West Bengal the proportion between cultivators and agricultural labourers is about 2.5 : 1.

In all other spheres of activity Nadia's participation is in much lower proportion than that of the State except the household industries. Household industries play a significant role in the economic life of Nadia district. Only 14.42 per cent of the total workers of the district are engaged in any industrial pursuits, household or non-household. Household industries have absorbed more persons here than in other manufacturing industries. Every 90 persons per *mille* are gainfully employed in household industries against the State's participation of 42 workers per *mille* and in all other manufacturing industries 54 workers per *mille* are engaged here against the corresponding State's figure of 114 persons per thousand working population.

Mining and quarrying though not very significant for the district's economy give some employment to the workers of Nadia. 34 persons per one thousand of the total working population of this district are seen to be engaged in mining, quarrying, plantation, forestry etc. In the State of West Bengal as a whole the corresponding proportion of the workers in mining, plantation etc., is 50 in every one thousand of working population. Trading and commercial activities have engaged about 7.4 per cent of the total workers of the district. In the State also this sector of industries accounts for about 7.5 per cent of the State's total working population. Transport and communication services have accounted for 24 persons per *mille* of the total workers in the district against the corresponding State figure of 34. In other services 11.5 per cent of the workers have been engaged in this district against the State's corresponding percentage of 13.4.

Amongst the female workers of Nadia, it is seen that their participation in household industries has been quite marked. This proportion in this district is remarkably higher than in other parts of the State of West Bengal. Nearly 43 per cent of the total working women of Nadia are engaged in household industries against the State's percentage of only 12. In manufacturing other than household industries also women have been engaged by a larger proportion in this district than in other parts of the State. In Nadia 89 for every thousand female workers are engaged in manufacturing industries, while this number for the entire State is only 49. Structural clay products such as bricks, tiles are one of the major industries of the district which employ more women than men. In the trade and commerce activities women have been engaged by a larger proportion in this district than in other parts of the State. In the district of Nadia every twentieth female worker is employed in trade and commerce, whereas in the State as a whole the percentage is only 2.3. The same is true for other services also. While 213 per *mille* of women workers in the district are seen to be working in other services, only 130 such women are engaged in other services in the State of West Bengal.

Amongst male workers of Nadia about 62 per cent are seen to be engaged in agricultural sector. This percentage is significantly higher than the State average. In the State of West Bengal as a whole only 53 per cent of the male workers are engaged in this sector. About 45 per cent of the total working men of Nadia are engaged as cultivators against the State's percentage of only 39. In Nadia 172 for every thousand male workers are engaged as agricultural labourers, while this number for the entire State of West Bengal is only 144. In household industries also more men have been engaged in this district than in other parts of the State. In the district of Nadia every fifteenth male worker is employed in household industries whereas in the entire State of West Bengal this proportion is only 30 per *mille*. Nadia's handloom products is a popular name in the Bengali houses. The incidence of handlooms principally carried on as household industries fairly explains away the high percentage of workers in this particular sector.

The statement below indicates the distribution of 1,000 workers by persons, males and females and by industrial categories of workers for the district of Nadia as compared to that of the State.

STATEMENT 10.2

Category of Workers	West Bengal			Nadia District		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
Total Workers	1,000	1,000	1,000	1,000	1,000	1,000
I	385	388	368	429	451	110
II	153	144	211	167	172	96
III	50	44	90	34	36	11
IV	42	30	122	90	67	425
V	114	124	49	54	52	89
VI	13	15	3	13	14	2
VII	75	83	23	74	75	52
VIII	34	38	4	24	25	2
IX	134	134	130	115	108	213

In all the rural police stations labour participation has, as expected, been by a large proportion in the agricultural sector. In Chapra, Tehatta and Hanskhali police stations more or less six persons in any group of ten workers are engaged as cultivators. In Karimpur police station 57.40 per cent of the total workers are engaged as cultivators. In Nakasipara police station of Sadar subdivision every alternate worker is a cultivator. Krishnaganj and Kaliganj within Sadar subdivision and Haringhata in Ranaghat subdivision are the other police stations where proportion of cultivators to total workers is above the district average.

Proportion of agricultural labourers in this district is also quite high. In the entire State of West Bengal 15.3 per cent of the total workers are agricultural labourers, whereas in Nadia this percentage is 16.7 Maximum incidence of agricultural labourers is found in the police station of Haringhata, where this percentage is 26.37. In Nakasipara, Kaliganj, Tehatta and Karimpur police stations every fifth worker is an agricultural labourer. Hanskhali police station also remains above the district average in this respect.

Workers in mining and quarrying are mostly found in Krishnaganj where they form about 8 per cent of the total working population of the police station. In Kaliganj police station their proportion is about 7 per cent. In Chapra, Nakasipara and Tehatta police stations every twentieth worker is in mining and quarrying. In Santipur police station

this percentage is also above the district average. Workers in household industries are mostly found in Nabadwip police station where almost every third person is a worker in household industry. In Santipur police station every fifth worker is in the household industries. Incidence of weaving in handloom in these localities reasonably explains away this fact. All other police stations of this district are below the district average in this respect.

Manufacturing employment is maximum in Chakdah police station where almost every eighth person is a manufacturing worker. Every tenth worker is in the manufacturing industries in Nabadwip police station. In Haringhata and Santipur police stations every twelfth person is a manufacturing worker. In the Krishnagar and Ranaghat police stations the percentage of manufacturing workers is above the district average. Trading activities in Nabadwip, Ranaghât, Krishnagar, Chakdah, Santipur and Krishnaganj police stations are remarkably higher than the district average. Transport and communication services are remarkable in Ranaghat, Nabadwip, Krishnagar, Chakdah and Santipur police stations.

Incidence of workers engaged in other services is found in the highest proportion in the headquarters police station of Krishnagar where every fifth worker is engaged in other services. Every sixth worker is engaged in other services in each of the police stations of Nabadwip and Chakdah. Preponderance of general labourers not elsewhere classified being grouped in the industrial classification under other services has increased the proportion of workers under this class. In Ranaghat subdivision other services workers are mostly found in Ranaghat and Santipur police stations. In Ranaghat every seventh worker is engaged in other services and in Santipur police station every eighth worker is in this sector.

Maximum incidence of female cultivators is found in Hanskhali police station where almost four in ten working women are cultivators. Maximum females at work as agricultural labourers are seen in Haringhata police station where they form one-fourth of its total working women. Female participation in household industry is most prominent in Nabadwip police station where every seven out of any group of ten workers are seen to be in this sector of economy. Female labour participation in household industry is also significant in Santipur (45.19 per cent), Ranaghat (41.28 per cent), Haringhata (32.77 per cent) and Krishnagar (28.37 per cent) police stations. Females in manufacturing industries are more particular in Chakdah police station. Maximum females at work in other services are seen in Krishnagar police station where almost four in ten working women are in other services. Every fifth female worker is seen to be engaged in other services in each of the police stations of Ranaghat, Chakdah, Krishnaganj, Nakasipara, Karimpur and Santipur police stations.

1.4 Participation by Sector of Economy

In the State of West Bengal maximum number of workers are engaged in the primary sector. This is more so in the district of Nadia, where about 63 per cent of the workers are found in the primary sector. Next to the primary sector, Nadia's working population are found to be engaged in the tertiary sector of industries. Proportion of workers engaged in secondary sector is less than those engaged in the tertiary sector. The maximum female workers are engaged in the secondary sector, which accounts for about 51.7 per cent of the total working women of the district. The female workers of Nadia have been engaged in the secondary sector even by a higher proportion than in the State. Female workers are more favourably engaged in weaving in handloom industry in this district. The female agriculturists is in lesser proportion in this district than in the State.

The following statement shows the distribution of 1,000 workers of each sex among primary, secondary and tertiary sectors of economy for the district of Nadia as compared to that of the State.

STATEMENT 10.3

	West Bengal			Nadia District		
	Persons	Males	Females	Persons	Males	Females
Total Workers	1,000	1,000	1,000	1,000	1,000	1,000
Primary Sector	574	561	660	630	658	217
I+II	538	532	579	596	623	205
III (except Mining and Quarrying)	36	29	81	34	35	12
Secondary Sector						
III (only Mining and Quarrying)+ IV+V+VI+IX (only Gas and Electricity)	184	185	183	159	134	517
Tertiary Sector						
VII+VIII+IX (except Gas and Electricity)	242	254	157	211	208	266

It is noteworthy that while there was a significant growth of manufacturing employment in the district during the period 1921-51, the position has all the more improved in the present decade. Manufacturing employment in Nadia have even surpassed the district's general growth rate of population.

A statement published in 'Regional Planning for West Bengal' by the Calcutta Metropolitan Planning Organisation may be of some interest to the readers and is given below.

STATEMENT 10.4

RATE OF GROWTH OF EMPLOYMENT AND POPULATION

	Employment				Population	
	1921-51		1951-61			
	Total Emp.	Mfg. Emp.	Total Emp.	Mfg. Emp.	1921-51	1951-61
West Bengal	0.88	1.40	2.39	3.23	1.37	2.9
Nadia	1.56	3.34	0.86	6.36	1.60	4.1

1.5 Sex Ratio of Workers

It appears from the above discussions that working women in this district are not in keeping with their total number. It has been seen earlier that against 49.47 per cent of the males only 3.63 per cent of the females of this district are workers. Nadia's sex ratio amongst general population is not as bad as that of West Bengal. For every 1,000 males there are 948 females in Nadia, but amongst the working population it is 153. It appears, therefore, that women of Nadia have been engaged in any sort productive occupation by a lesser proportion than the women living in other parts of the State as a whole. Women generally find favourable employment either in household industries or in other services. In these two categories the sex ratio has been found to be 442 and 136 respectively. The corresponding sex ratio in the State is 625 in category IV and 148 in category IX. In manufacturing other than household industry and trade and commerce the proportion of sexes is higher in Nadia than in the State. In Nadia the sex ratio is 120 in category V and 48 in category VII against the State figure of 61 and 43 respectively. The statement 10.5 given below shows the sex ratio (females per 1,000 males) among the total population, total workers, each category of workers and non-workers in rural and urban areas of the district of Nadia as compared to that of the State.

STATEMENT 10.5

SEX RATIO (FEMALES PER 1,000 MALES)

	West Bengal			Nadia District		
	Total	Rural	Urban	Total	Rural	Urban
Total population	*878*	*943*	*701*	*948*	*952*	*933*

1.6 Workers in Industries

Of the total workers of Nadia a little more two-fifth are engaged in non-agricultural occupation and almost one in a group of every ten workers are engaged in household industry. The total number of persons being primarily engaged in any household industry in the district is 41,909. In household industries workers are mostly employed in manufacturing of foodstuffs, tobacco products, cotton textiles, manufacture of wood and wooden products, non-metallic mineral products other than petroleum and coal, basic metals and their products except machinery and transport equipment and other miscellaneous manufacturing industries. More than half of the workers engaged in household industries of Nadia are seen to be employed in manufacturing of cotton textiles, (23,504). Nadia's weaving industry is quite popular in India for their durability and good design. 14,416 persons are engaged in weaving in handloom industry. 3,218 women of this district are engaged in cotton spinning, cleaning, pressing and baling as household industry. In wood and wooden products 3,662 persons are engaged. 2,509 persons are engaged in non-metallic mineral products industries. Of them 1,863 persons are engaged in manufacture of earthenware and earthen pottery. Majority of the women (3,327) are engaged in production of rice, atta, flour etc., and 2,839 females are engaged in the weaving in handloom industry in this district.

Of those engaged in various non-household industries majority are employed in different types of services and next in trade and commerce. 6,725 persons of Nadia are employed in production and rearing of livestock mainly for milk and animal power such as cow, buffalow, goat and 7,704 persons in fishing in inland waters including the operation of fish farms and fish hatcheries.

Persons engaged in different manufacturing industries are mostly employed in manufacturing of foodstuffs, manufacturing of bidi, cotton textile industry, miscellaneous textiles, wood and wooden products, manufacture of structural clay products such as brick, tiles etc., manufacture of transport equipment and manufacture of jewellery, silverware and wares using gold and other precious metals.

A good proportion of workers of this district are engaged in different wholesale and retail trading. In different forms of retail trading 60,678 persons are engaged and in wholesale trading 4,454 persons. 7,742 persons of the district are employed in transporting by railways and 6,672 persons are employed in transporting by men such as carrying of luggage, hand cart driving, cycle-rickshaw driving. A large number of workers are also engaged in different public services, educational services, public and health services, religious and welfare services and personal services.

There are 10,019 persons whose services could not be classified elsewhere and there are about 20,194 persons in this district whose activities were not adequately described in the census returns.

Table B-IV in Part II A of this volume gives a detailed distribution of workers according to different industries as classified in the standard industrial classification adopted by the Government of India in the Ministry of Labour and Employment.

1.7 Workers by Occupation

The Table B-V in Part II A of this volume presents a detailed picture about the various occupations of and services rendered by the working population of the district. These occupations have been classified and coded according to the National Classification of Occupations. From a study of these, the different types of services available to the people of Nadia are easily obtained. So far as medical facilities are concerned, it is observed from Table B-V of 1961 that there are 1,734 physicians, surgeons and dentists of whom 15 are women. But there are 417 qualified allopathic physicians and surgeons of whom only 7 are women. This means that there is one doctor for a population of 4,139. There are 340 homœopathic physicians in the district. 277 persons have returned themselves to be practising ayurvedic system of medicine. 495 persons have been returned as physicians, surgeons and dentists who could not be classified otherwise. They are possibly not qualified persons who due to experience have created some confidence in the minds of the people in their medical or supernatural abilities to cure their diseases. There are 591 nurses in the district of whom 515 are women. Out of 195 midwives and health visitors, only 45 are males.

On the educational side, the total number of teachers is 8,575 as per 1961 Census, of whom only 1,465 are women. There are 228 university teachers who generally teach in colleges. There are only 7 such teachers amongst the women of Nadia. There are 1,552 teachers of secondary schools of whom 307 are women. There are as many as 5,191 middle and primary school teachers in the district, 721 of them being females.

There are only 249 teachers of nursery and Kindergarten schools of whom 205 are women. 1,355 persons have returned their occupation as teaching but they could not be classified in any one of the above categories.

In the district of Nadia there are 538 architects and surveyors, 293 of them are civil engineers including overseers. There are only 9 mechanical engineers and 21 electrical engineers, 3 chemical engineers and 136 surveyors in the district. There are 75 persons who have returned their occupations belonging to this groups but they could not be classified in any one of the above classes.

There are 411 jurists in the district of whom 15 are Judges and Magistrates. There are 189 legal practitioners and advisors in the district. There are one hundred law assistants and 107 others who have not been classified elsewhere.

A total number of 19,075 persons have returned themselves as farmers, fishermen and hunters, loggers and related workers. Of them 1,017 are farmers and farm managers. There are 1,137 persons in the district working as Government administrators and officers, 265 of them are in the Central Government and 595 are in the State Government. There are 46 persons working as administrators and executive officials in local bodies and 230 persons working as village officials.

In the district there are 27,314 persons working as wholesale and retail trade proprietors, 619 of them are wholesale trade proprietors and 26,695 retail trade proprietors.

There are 6,644 persons who have returned their occupation as belonging to transport and communication services. There are 510 deck ratings (ship), barge crews and boatmen and 209 railway engine drivers and firemen. There are 3,651 drivers engaged in road transport of whom 2,098 are cycle-rickshaw pullers and 459 are animal drawn vehicle drivers. Motor vehicles drivers are only 921 in number.

In the Divisions 7 & 8 *i.e.*, craftsmen, production process workers and labourers not elsewhere classified, total number of persons returned is 83,193. There are 27,397 spinners, weavers, knitters, dyers and related workers of them 18,368 are drawers and weavers. There are 2,722 tailors, cutters and related workers ; in this district. There are 3,767 bricklayers, plasterers and construction workers and 2,652 potters and related clay formers. There are fourteen hundred jewellers, goldsmiths and silversmiths and 3,157 carpenters, joiners and pattern makers (wood). There are about 16 thousand labourers who could not be classified elsewhere.

There are also 2,140 workers whose occupations are unidentifiable or unclassifiable. 212 persons have not reported their occupation in the 1961 Census.

1.8 Workers by Age-groups

On an analysis of the age structure of the workers of Nadia district it is observed that a larger proportion of workers of this district belongs to higher age-groups in comparison to those in other parts of the State. Table B-I in Part II A of this volume gives a distribution of working population by different

industrial categories of workers and by broad age-groups. About forty-nine per cent of the workers of Nadia is in the working age-group of 15-34. The proportion of workers in this age-group is about 51.6 per cent in the entire State of West Bengal.

The proportion of child workers in the district is much above the State average. While amongst every 1,000 of the State's total workers only 39 are child workers, in the district Nadia their proportion is as high as 49 per *mille*. Generally speaking, this age-group represents the school-going age and as such a few of them are expected to come in the working force. With the advancement of primary education this age-group will automatically go out of the working population. Amongst the child workers in this district majority are engaged in agricultural pursuits, some at livestock, forestry, fishing and plantation etc., or in household industries. In the urban areas employment of children below 15 years of age in household industries and as sales assistants is not very infrequent. The pattern of employment of the child workers is almost the same as in other parts of the State also. Nadia's employment of child labour is markedly above the State average which indicates that Nadia's children are more on the look out for jobs than being engaged in the pursuits of knowledge. In the urban areas participation by child workers in Nadia has been limited to only 9 for every 1,000 of total child population. In the State as a whole the corresponding percentage of child workers in the urban areas is 1.23. The statement 10.6 below gives the age-group wise distribution of workers in the district so as well as for the State.

STATEMENT 10.6

	West Bengal			Nadia District		
Age-group	Persons	Males	Females	Persons	Males	Females
All Ages	*1,000*	*1,000*	*1,000*	*1,000*	*1,000*	*1,000*
0—14	39	36	57	49	49	40
15—34	516	514	533	493	496	458
35—59	388	392	364	391	388	428
60+	57	58	46	67	67	74

1.9 Literacy amongst Workers

The Table B-III in Part II A of this volume shows industrial classification of workers by different educational levels both in rural and urban areas separately. The rural workers of this district seem to be poorer in attainment of literacy than their counterparts in other areas of the State. Among the rural workers of Nadia about 32 out of every one hundred persons are literate. In the State of West Bengal as a whole the extent of literacy amongst the working population is seen to be limited within 34 persons for every one hundred of their total rural workers. Amongst the male workers living in the villages of Nadia about 33.39 per cent are literate but amongst the female workers in rural Nadia illiteracy is very much marked where about 87.90 per cent of the total rural female workers are illiterate. Only 20 out of every one hundred working men in the rural areas of the district are literate without having attained any educational level, 11.53 per cent of the total rural workers have passed primary or junior basic examination and only 2 amongst one hundred rural working men have passed the Matriculation examination. Majority of the literate working women living in the villages of Nadia are literate without having attained any educational level. More of the illliterate workers, as expected are generally engaged in the agricultural sector. A good number of them are also engaged in household industry, other services and livestock, plantation etc.

Spread of literacy amongst the urban working force is more pronounced in the district of Nadia than in the State of West Bengal as a whole. In Nadia 70.21 per cent of the urban workers are literate, whereas in the State 63.32 per cent of the urban workers are literate. Amongst the male urban workers 74.29 per cent are literate against the State percentage of 65 only. Amongst the female workers in the urban areas 36.81 per cent are literate in this district, whereas in the State, for every 10 females at work 3 are literate. Majority of the literate working men and women are without any educational level. About 31.72 per cent of the working men and 19.91 per cent of the working women are literate having no educational level in the urban areas of the district. Amongst the female workers in the urban areas 7.76 per cent have passed Matriculation examination. About 9.14 per cent of them have passed the primary or junior basic examination. About 26.85 per cent of the total urban male workers have passed the primary or junior basic examination, whereas 15.72 per cent of them have passed the Matriculation examination. Majority of the literate workers are engaged in other services, household industry, trade and commerce and manufacturing other than household industry.

1.10 Secondary Occupation

In 1961 Census the entire population are classified by nine broad industrial categories of workers according to a person's principal work. In case of a person engaged in more than one activity the work in which he spent most of his time was considered to be his principal work, and what occupied his second most time was considered the secondary work of that person. Table B-VII in Part IIA of this volume gives information on such secondary work.

Amongst the cultivators of Nadia almost every sixth person has a secondary occupation. Most of them are secondarily engaged in the agricultural fields as labourers. Only about 2,816 (1.41 per cent)

cultivators of Nadia are engaged in household industries in addition to their principal occupation. Amongst the agricultural labourers of this district almost every fifth person has some secondary occupation, mostly being engaged as cultivators and a few (only 307) at household industry. Of those primarily engaged in household industries about 4.74 per cent have a secondary occupation mostly as cultivators and a few (0.10 per cent) as agricultural labourers. The persons who are primarily engaged in various non-agricultural and non-household industries like manufacturing, trade, transport, construction, other services etc., have by a negligible proportion (only 0.29 per cent) some secondary occupation in the household industry.

2. Non-working Population

In 1961 Census as many as 72.84 per cent of the total population of the Nadia district have reported themselves as non-workers. The corresponding figure for the State of West Bengal as a whole is 66.8 per cent. The male non-workers and the female non-workers separately account for 50.53 per cent amongst males and 96.37 per cent amongst females respectively in the district of Nadia as against 46.0 per cent and 90.6 per cent in the State. The variation between the percentage ratio of male non-workers and female non-workers both in rural and urban areas is striking. The statement below gives the percentage distribution of total male and female non-workers to total persons, total males and total females respectively for the district and the State for total, rural and urban areas separately.

STATEMENT 10.7

State/District	Total Rural Urban	Percentage of Non-workers to total		
		Persons	Males	Females
1	2	3	4	5
West Bengal	Total	66.84	46.02	90.57
	Rural	67.33	46.53	89.38
	Urban	65.34	44.62	94.88
Nadia	Total	72.84	50.53	96.37
	Rural	72.33	49.03	96.82
	Urban	75.10	57.12	94.38

In the working age-group 15-59, amongst males, those who are not engaged in any productive activity and thus have been shown as non-workers in the Census 1961, form about 12.09 per cent only of total male population of the same age-group in the rural areas of the district. Amongst females about 94.31 per cent of total female population in the working age-group 15-59 are not in the working force. The corresponding figures for male and female non-workers in the same age-group are 27.20 per cent and 90.23 per cent respectively in the urban areas of the district. It appears, that the percentage of female non-workers of the workable age is much higher than that of the male non-workers both in rural and urban areas. The unusually high percentage of the female non-workers of the workable age is mainly because that most of them are engaged in household duties. They form 87.22 per cent and 77.48 per cent of the total female non-workers in the age-group 15-59 in the rural and urban areas respectively. The percentage of male non-workers in the workable age seeking employment for the first time and of those employed before but now out of employment and seeking work together accounts for 13.37 per cent and 27.94 per cent of the total male non-workers of the same age in rural and urban areas respectively as compared to 0.05 per cent and 0.95 per cent for the corresponding female non workers. The following statement shows the percentage of non-workers in different age-groups to total males and females separately in those age-groups.

STATEMENT 10.8

Age-group	Percentage of Non-workers to total			
	Rural		Urban	
	Males	Females	Males	Females
1	2	3	4	5
Total	*49.03*	*96.82*	*57.12*	*94.38*
0—14	93.49	99.71	98.76	99.51
15—34	16.09	95.36	35.50	91.36
35—59	6.23	92.60	14.78	88.40
60+	31.92	95.81	59.44	95.35

In the age-group 0-14 the participation in the working force should be the least. This is more so in the urban areas than rural areas, where 98.76 per cent of the boys between the age-group 0-14 are non-workers. In case of girls the percentage of non-workers in the rural areas is a little more than that in urban areas. Most of the members of the young folk of the age-group 0-14 in urban areas are school going while in rural areas a significant number of young people belonging to age-group 0-14 are found to be engaged in agricultural pursuits.

In the rural areas male unemployed persons having educational level of primary or junior basic comprise half of the total unemployed persons aged 15 years and above, while in the urban areas they form a little more than one-third. Amongst the unemployed male population literates having without any educational level comprise 21.60 per cent in rural areas, as against 29.03 in urban areas. In the urban areas of the district the unemployed persons having educational attainment of Matriculation or Higher Secondary and above comprise only 16.68 per cent of the total unemployed persons aged above 15 years, while they form 15.83 per cent in the rural areas. In both rural and urban areas of the district maximum number among the unemployed is found to have attained the primary or junior basic level only. In the urban areas illiterate male unemployed

persons account for 16.51 per cent as against 11.15 per cent in rural areas. In case of unemployed females maximum number is found to have attained the primary or junior basic level in the urban areas. This category alone forms 38.55 per cent in urban areas as against 19.15 per cent in rural areas. About 46.28 per cent of the total female unemployed are illiterate in rural areas, whereas, 25.65 per cent are illiterate among them in urban areas. Unemployed females having passed Matriculation account for 11.16 per cent in urban areas. The literates having without any educational level among total unemployed females comprise 24.64 per cent in urban areas as against only 13.30 per cent in the rural areas. Table B-VIII in Part II A of this volume shows the unemployed persons aged above 15 years by different educational levels both in rural and urban areas separately.

The distribution of a thousand non-workers according to the eight types of activities of the non-workers shows that the largest number of male non-workers are found to be dependants, infants or disabled. More or less equal number of female non-workers are found either in household duties or as dependants, infants or disabled. The number of female non-workers who are full time students or children attending schools both in rural and urban areas are far less than such male non-workers. Again the number of full time students or children attending schools both for males and females in urban areas is as it should be higher than that in rural areas. The number of unemployed persons are also not very significant. The following statement showing the distribution per thousand of non-workers according to the different types of activities will give a clear picture about the non-workers for total, rural and urban areas for males and females separately.

STATEMENT 10.9

Types of activities of non-working population	Total		Rural		Urban	
	M	F	M	F	M	F
1	2	3	4	5	6	7
Total non-workers	*1,000*	*1,000*	*1,000*	*1,000*	*1,000*	*1,000*
Full time students or children attending school	288	78	252	59	426	165

LITERACY AND EDUCATION

1. Progress of Education

The progress of education in the district can be viewed more rationally from a study of the census figures in respect of attainment of literacy by the people of the district. In Census 1961, the enumerator was instructed to record a person as illiterate if that person could neither read nor write or could merely read but was unable to write in any language. A person who could both read and write with understanding was treated as literate. The test for reading was ability to read any simple letter in print or in manuscript. The test for writing was ability to write a simple letter. If a person could both read and write and also had passed a written examination or examinations as proof of an educational standard attained, the highest examination passed by the person was recorded in the enumeration slip.

In the district of Nadia only 273 persons for every one thousand of its population have passed the test for literacy in the Census of 1961. Compared to other parts of the State the standard of literacy as prevalent in this district is not very much encouraging. On the result of 1961 Census Nadia occupies the eighth place amongst the districts of West Bengal in terms of literacy. In the State of West Bengal as a whole only 293 persons out of every thousand have the rudiments of learning. Thus the standard of literacy in this district is much below the State average. As regards individual district, Calcutta is *facile princeps*, 593 out of every thousand persons having sufficient knowledge to pass the census test. Nadia's literacy is higher than that of the districts of Jalpaiguri, Cooch Behar, West Dinajpur, Malda, Murshidabad, Birbhum, Bankura and Purulia.

In the rural sector of the district, as in the State as a whole, only 216 persons for every one thousand of its population are literate. Nadia occupies the seventh place amongst all the districts of the State in terms of rural literacy. All the districts of Jalpaiguri division except Darjeeling are below Nadia, but all the districts except Birbhum, Bankura and Purulia in the Burdwan division, and all the districts except Murshidabad in the Presidency division have shown higher literacy rate in the rural sector than the district of Nadia.

Persons living in the towns of Nadia have shown a little lower literacy rate as compared to other urban areas of the State of West Bengal. In this district 521 persons for every one thousand of its town dwellers are literate, whereas in the State every 529 such persons are literate as per 1961 Census. In terms of urban literacy Nadia occupies the third place, Calcutta and Cooch Behar having occupied the first two positions. The percentage of urban literates in Calcutta and Cooch Behar is 59.29 and 56.98 respectively.

If literacy amongst male population is considered, it is seen that Nadia occupies the ninth place. Amongst the men-folk 36 out of every 100 are literates in Nadia district, against this figure of 40 for the whole State. The women-folk of Nadia though not at par with their male counterparts in attainment of literacy, evidently seem to be quite advanced in this respect as compared to other parts of the State. Nadia's women-folk occupy the fourth place in the State. Amongst every 100 of them 18 women have known the rudiments of learning against the State female literacy figure of 16.98 per cent. For every 1,000 literate men only 483 women of Nadia are literate.

In the last Census of 1951 the percentage of literates in Nadia was only 15.31 against the State percentage figure of 21.5. At the turn of the present century only 12.08 per cent of the total population of the district knew the rudiments of learning. At that time literacy was mainly concentrated among the men-folk. Twentytwo out of every hundred men of Nadia in 1901 knew how to read and write. Female education was a far cry at that time. Only nineteen out of every one thousand women population of the district in 1901 were literate. In 1911 there was a sudden fall in the literacy rate in the district, when it touched the bottom. There was only a little progress in respect of literacy in the decade 1911-21. From 11.72 per cent in 1911 the percentage of literates became 13.54 in 1921. But in 1931 there was again a decline in the literacy rate in Nadia. In course of next ten years Nadia's population showed a remarkable progress in the attainment of literacy. In 1931 the percentage of literates was only 12.49 whereas in 1941 it became 20.32 per cent. Commendable advancement was particularly noticed amongst the females of this district to take up education. In 1941 about 9.83 per cent of the women became literate against only 1.87 per cent forty years back. In 1951 there was suddenly a remarkable fall in the literacy rate. In the present Census of 1961 both males and females of this district have shown an appreciable progress in taking up education and attainment of literacy. Thus it appears that instead of a regularly steady progress the district was so long having ups and downs in the matter of

attainment of literacy by its people all through the last seven census decades. The statement 11.1 given below shows the percentage of literates amongst total population and separately for males and females in the district for each of the census decades during the last sixty years.

STATEMENT 11.1

Year	Percentage of Literates since 1901		
	Persons	Males	Females
1	2	3	4
1961	27.25	35.78	18.24
1951	15.31	18.16	12.23
1941	20.32	30.24	9.83
1931	12.49	19.85	4.74
1921	13.54	22.35	4.31
1911	11.72	20.55	2.85
1901	12.08	22.43	1.87

In the rural areas of the district, as has already been stated, 216 persons are literate for every thousand of the rural population. But in 1951 this proportion was only 126 persons to 1,000. Amongst men-folk literacy has gone up from 16.06 per cent in 1951 to 29.97 per cent in 1961. In the entire State of West Bengal literates amongst the rural males form 32.86 per cent. In 1951 only 8.76 per cent of the women living in the villages of Nadia were literate. One decade passed by this percentage has considerably gone up. Female literacy in rural areas is even higher in this district than the State of West Bengal taken as a whole. In the district of Nadia 129 females per *mille* are literate whereas in the State this literacy is seen to be limited only to 97 women for every thousand of their total number in the rural areas.

Education is, as might be expected, far more widely disseminated amongst the urban than the rural areas. About 52.10 per cent of the total population living in the towns of Nadia district are literate. Urban literacy has been rapidly increasing from decade to decade. In the last Census of 1951 it was 28.17 per cent and in the present Census it has become 52.10 per cent. Amongst the males living in the urban areas of Nadia the percentage of literates is 61.33. Ten years back their percentage was only 28.03. In case of female population for every one thousand of total women living in the towns of Nadia 422 have returned themselves as literate in 1961. A decade before, their proportion was only 283 for every one thousand of their number. Peculiarly enough the 1951 percentage of female literates was higher than that of the males in the urban areas. The statement below will show the percentage of literates amongst persons, males and females in the rural and urban areas separately for the district as well as for the State.

STATEMENT 11.2

State/ District	Rural Urban	Percentage of Literates		
		Persons	Males	Females
1	2	3	4	5
West Bengal	Rural	21.64	32.86	9.73
	Urban	52.89	59.59	43.33
Nadia	Rural	21.64	29.97	12.89
	Urban	52.10	61.33	42.20

2. Literacy for different Administrative Units

Of the two subdivisions in the district, the Ranaghat subdivision has given a fairer account in respect of the attainment of literacy by its people. In the Ranaghat subdivision almost every third person is literate. The rural people of Ranaghat are comparatively better off in respect of literacy than the Sadar but for the urban people the position is just the reverse.

Amongst all the police stations of the district, Nabadwip police station containing the ancient town of Nabadwip, famous for Sanskritic education and culture has shown the highest literacy rate. Every two in any five persons of this police station are literate. Next to Nabadwip is Ranaghat police station, where 358 persons per *mille* are literate. The urban areas of Ranaghat police station also shows a high literacy rate, where 551 persons per *mille* are literate. Of the three towns in this police station, Ranaghat town shows the highest literacy rate, where 582 persons per *mille* are literate. As a single town Kalyani shows the highest literacy rate as high as 64.62 per cent. In the district headquarters town of Krishnanagar 548 for every one thousand persons are literate as per 1961 Census. The Chakdah police station of Ranaghat subdivision containing three newly created towns has also given quite a fair account of literacy, where 53.47 per cent of its population are literate. 534 persons per mille are literate in Nabadwip town. Chapra police station of Sadar subdivision has shown the lowest literacy figure in the district, where only 14.23 per cent of its population have returned themselves in 1961 Census as literate.

Of all the towns of the district Kalyani shows the highest literacy rate amongst male population where 69.85 per cent males are literate. Ranaghat, Krishnanagar and Nabadwip towns have shown the male literacy rate above the district average. The district headquarters town Krishnanagar shows the highest percentage of literates among its female population, where 47.50 per cent of the females are literate. Nabadwip and Ranaghat towns have shown the female literacy above the district average. The statement given below will show the percentage of literates for each of the administrative units of the district separately for males and females for total, rural and urban areas.

STATEMENT 11.3

State/District/ Subdivision/ Police Station	Total Rural Urban	Percentage of Literates		
		Persons	Males	Females

	Urban	43.00	52.59	33.05

3. Literacy by Age-group

In 1951 amongst the children of the age-group 5-14 only 14.27 per cent were literate. In 1961 this corresponding percentage has gone up to 28.57. In the rural sector 283 out of every 1,000 young men of the age-group 5-14 are literate against the corresponding State figure of 289 in 1961 Census. Amongst the girls for every 1,000 of those within the age-group 5-14 only 183 are literate. Amongst the girls of rural areas maximum indicence of literacy is observed in this particular age-group unlike the male population in which case steady rise in relative strength of male literates is observed as they advance in years. The explanation of this apparent anomaly is that the education among women being a development of comparatively recent times, the number of those who have received instruction is naturally greater among the younger generation. A secondary cause is that the education of a girl is rarely continued after she has left her home for husband's house and undertaken the duties of a housewife. The same phenomenon is also observed if the entire State is taken into the consideration. Majority of the literate males are found in the age-group 15-34, which is precisely the working age-group. The percentage of male literates amongst the persons in the age-group 15-34 in the rural areas is as high as 43.7. In the urban areas their percentage is even higher being of the order of 79 per cent. Literacy amongst womenfolk in the urban areas are more pronounced in the middle age-group, *i.e.*, 15-34 contrary to that observed in the rural areas of the district. In the rural areas persons belonging to the age-group 35-59 have given a fairer account in respect of literacy than those age above 60 years. The same trend is observed in the urban areas of the district. But in the urban areas of the State of West Bengal as a whole persons belonging to the age-group 60 and above have given a fairer account in respect of literacy than those in the next below age-group of 35-59. But in the rural areas the State has shown more or less the same trend as the district of Nadia. The statement below gives the distribution of the number of literate males and females per 1,000 of total male and female population of the district of Nadia in different age-groups above 0-4 years of age in the rural and urban areas separately as compared to that of the State.

STATEMENT 11.4

State/District	Age-group	Rural		Urban	
		Males	Females	Males	Females
1	2	3	4	5	6
West Bengal	All persons above 4 years	389	117	660	500
	5—14	289	144	572	498
	15—34	469	140	702	574
	35—59	397	64	661	418
	60+	390	36	689	308
	Age not stated	197	32	302	145

	5—14	283	183	560	471
	15—34	437	186	793	621
	35—59	348	104	736	392
	60+	344	51	724	235
	Age not stated	199	44	..	..

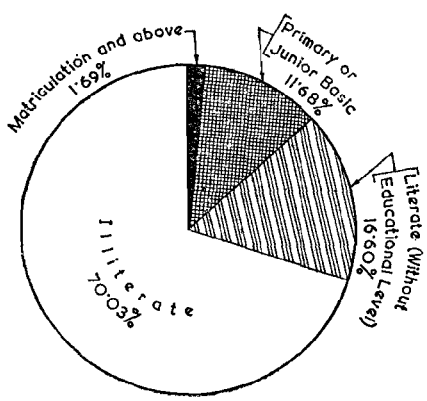

4. Different Educational Levels

Table C-III in Part IIA of this volume gives a distribution by different levels of education amongst

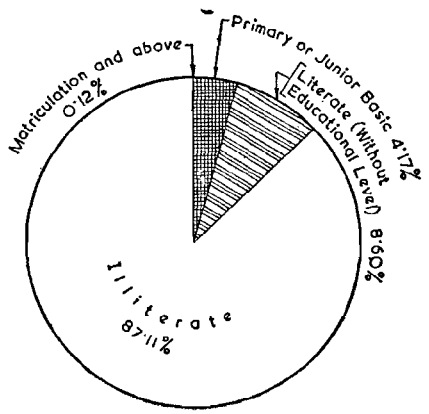

the population of Nadia in rural and urban areas separately. It is seen that amongst the rural population of Nadia, males having just passed the test of literacy in Census 1961 and not having gone through any recognised written examination account for only 16.60 per cent amongst the total male population. Amongst the females, literates without any educational level account for 8.60 per cent of the total rural female population. About 117 men per *mille* living in different villages of Nadia have passed the primary or junior basic examination. Majority of such men are in the age-group of 10-14. Amongst the rural female population of Nadia one in a group of every 25 has passed the primary or junior basic examination. About one-third of the total women having passed the primary or junior basic examination are in the age-group 10-14. This evidently indicates that advancement of education amongst the females living in rural interiors has been more pronounced in recent years. Higher education has not very much disseminated amongst the villagers. Only 17 out of 1,000 men-folk living in different villages of the district have passed the Matriculation or Higher examination. Amongst the females in the rural areas higher education is still a far cry. Only one amongst every 1,000 of female population living in the villages of Nadia has claimed to have passed the Matriculation examination.

RURAL

MALE

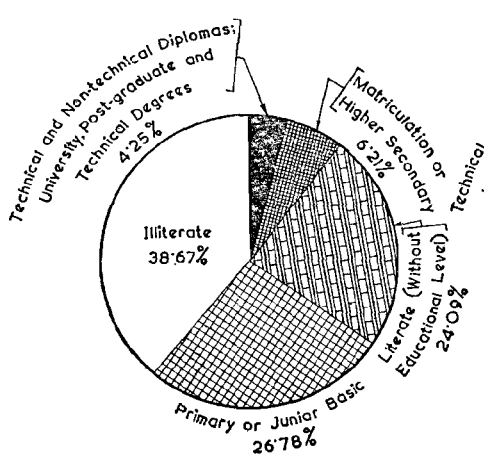

FEMALE

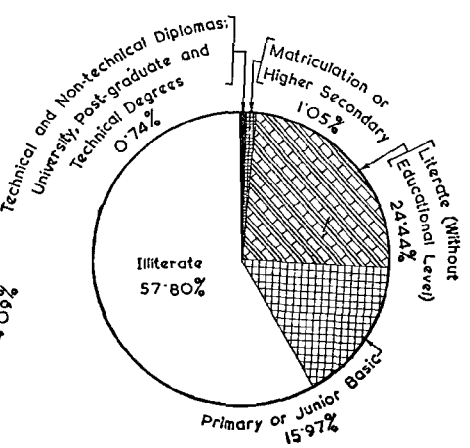

URBAN

MALE

FEMALE

Every fourth man or woman in the urban tracts of Nadia is literate but without having any educational standard. He can only read and write but has not passed any recognised written examination. Amongst the male population in this class more persons belong to higher age-groups but amongst the female population more of such women are in the age-group 5-14 which account for more than one-fourth of the total literate women having no educational level. About 268 men per *mille* and 160 women per *mille* amongst the town dwellers of Nadia have passed the primary or junior basic examination. A little less one-third of the total men having passed the primary or junior basic examination are in the age-group 5-14. Amongst such females in the urban areas a little more half are in the age-group 10-19. About 62 men and 2 women per thousand of total males and females living in urban areas of the district have passed the Matriculation or Higher Secondary Examination. Those having taken post-Matriculation higher studies account for 43 in case of males and seven in case of females for every thousand of total their number. Quite a number of persons in this district are found to have taken different technical and non-technical diploma not equal to degree. There are about 3,100 persons living in the different towns of Nadia who have taken University degree or Post-graduate degree other than technical degree. Amongst the technical degree holders a number of persons have taken degrees in Engineering, Medicine, and in Teaching. The diagrams given at page (71) illustrate the position of different educational levels amongst the people of Nadia in its rural and urban areas separately.

5. Primary Education

The Official Statistics presented in series 12 in Part IIB of this volume give a full account of the present position of various educational institutions in the district. Within ten years after the 1st Census was taken in the post Independence period, the number of primary schools in this district has increased considerably. In 1951-52 the district had a total number of 808 primary schools with the student enrolment of 73,174. In 1960-61 the number of schools have become 1,393 and the number of students attending these schools have become 153,077. These figures include those for the junior basic schools. In 1960-61, there were 81 junior basic schools with a student enrolment of 8,948. Thus the primary schools in the district in 1961 are 1,312 with a number of 144,129 pupils. The number of schools directly managed by the Government is 125 with 24,305 on the rolls. The District School Board and the different Municipalities of the district have been managing 1,126 number of primary schools having a strength of 110,610 students. 71 schools are under private management which have been receiving aids from the Government or from the District or Municipal Boards. This district has no unaided school.

In the Census year 1961 the number of students attending various primary and junior basic schools in the district have accounted for about 35.58 per cent of the total persons in the age-group 5-14. The male students have accounted for 41.58 per cent and the girl students for 29.18 per cent amongst the total male and female population of the district in the age-group 5-14 respectively.

6. Secondary Education

The progress of secondary education in the district of Nadia has been quite appreciable during the last decade. In 1951-52 this district had a total number of only 60 high schools with a number of scholars 19,721 only. At the passage of one decade in 1961 the total number of high or higher secondary institutions in the district has risen to 98. The student enrolment has gone up to 41,172. In the whole State of West Bengal the total number of high and higher secondary schools is only 1,957. District 24-Parganas has the largest number of such schools (388), followed by Calcutta (280), Midnapore (238), Burdwan (172) and Hooghly (164).

Out of the total number of 98 schools, 62 are high schools and the rest 36 are higher secondary institutions. More number of students have preferred the school final examination to the higher secondary course. The students for higher secondary institutions are 15,925 in number against the student enrolment of 25,247 in the high schools. Of the higher secondary schools two institutions are entirely under the management of the Government with a number of scholars 707 in these schools. The rest of the higher secondary institutions numbering 34 are aided schools. These schools have 15,218 scholars in 1961. Of the total number of 62 high schools in the district 47 are aided high schools and 15 unaided, all of them being under the private management. The number of high or higher secondary schools for girls are 31.

There are 117 junior high schools in the district of Nadia. In 1951-52 this district had a total number of only 45 junior high schools with a number of scholars 4,629 only. The scholars enrolment has gone upto 11,764 in 1960-61. Out of the total number of 117 schools, 113 are junior high schools and rest four are senior basic schools. Out of the total number of 113 junior high schools, 36 are 2-class schools (that is teaching is given upto class VI) and the rest 77 junior high schools are 4-class schools where teaching is imparted upto class VIII. The total number of scholars reading in all these 113 junior high schools of the district is 11,532.

The district has for centuries been famous for its learning, but in early days literacy was confined to a few privileged castes. The coming of a large displaced population for East Bengal, has jerked up the percentage of literacy in the district since

1947. This factor alone has also given a good impetus for boosting up secondary education. In this respect the large refugee camps established at various places of this district have been quite responsible for the growth of education.

7. Collegiate Education

This district has a fairly large number of colleges. Out of 124 colleges in the entire State, Nadia has ten colleges for imparting general education to its young people. Calcutta the metropolitan city has the largest number of colleges (35), the district of 24-Parganas has 18 colleges followed by Hooghly (12) and Midnapore (11). Nadia occupies the next position in so far as the number of colleges are concerned. In 1951-52 this district had only 4 colleges. The number of scholars attending different colleges at that time was only 1,083. Almost a decade after in 1960-61 the number of college students has become 3,537 including those of the colleges for professional and special education. Of these, the Krishnanagar College is the oldest. During the war the Vidyasagar College of Calcutta opened a branch at Nabadwip, which has come to stay as an established college in that town. Three colleges have been opened in recent years ; Santipur College at Santipur, Ranaghat Intermediate College at Ranaghat and the Srikrishna College at Bagula.

The Krishnanagar College was announced on the 1st October of 1845 as follows : "The Governor General having sanctioned the foundation of a college at Krishnanagar inthe district of Nadia, it is hereby notified for general information that the college will open for the admission of pupils on the 1st November 1845, and instruction will commence as soon after that date as possible". It was finally opened on the 1st of January 1846, and Capt. D. L. Richardson,—the well-known Shakespearian scholar,—was appointed first Principal of the College which he joined on the 28th November 1845. The first meeting of the local Governing Committee was held on 6th December 1845. Among the earliest Bengali teachers of the College, the names of Ramtanu Lahiri (1846-51 and again from 1861-5), and Pandit Madan Mohan Tarkalankar (January to June 1846), are equally illustrious. It appears that the first years 1946-8 were not very propitious for the pursuit of education.

In June 1848 the control of the College was transferred from the Local Committee to the Council of Education at Calcutta. Drinkwater Bethune, the great educationist, was a great patron of this College, and frequently visited it. The College also acquired a reputation as a nursery of progressive ideas. In 1856 the College went into the new buildings which still stand in Krishnanagar.

The College stands upon an enclosed compound of upwards of 100 bighas. It occupies two buildings. The larger one, which is the main College building, is a handsome structure covering about three bighas, or one acre. It was erected in 1856 at a cost of the building, each donation of Rs. 1,000 having entitled the donar to nominate to one free studentship in perpetuity, and each additional Rs. 500 to one further similar nomination. The smaller building is a later addition, in which parts of the Physical and Chemical Laboratories are located. Part of the ground occupied was purchased by Government; for the remainder the College is indebted to the munificence of the Maharaja of Nadia and Maharani Swarnamayi of Cossimbaear.

In 1871 the B.A. classes were abolished by Sir George Campbell, then Lieutenant Governor of Bengal, and for some years the College only afforded instruction up to the First Examination in Arts. In 1875, however, Sir Richard Temple, on the petition of the chief inhabitants of the district, consented to restore the College to its former status, provided that a considerable share of the increased cost was subscribed by the community. A sum amounting to more that Rs. 40,000 was subscribed during the year, and with this endowment B.A. classes in the B course were opened. Classes for the A course for the B.A. were opened in June 1888.

The College, which was affiliated in 1857, has been affiliated in Arts up to the B.A., and in Science upto the B. Sc. standard, under the new regulations.

In respect of technical and vocational education the district has not lagged behind others as it has quite a number of such institutions. In the field of social education also the district is making a steady progress. A distinctive feature of the district is the presence of *Kirtan* and *Kathakata* schools in Nabadwip.

NATIONALITY AND MIGRATION

1. Non-Indian Nationals

Most of the inhabitants of Nadia are Indian nationals. Only a total number of 243 persons enumerated in the district are non-Indian nationals. In 1951 non-Indian nationals numbered about 41,720 in the district.

In 1951 majority of the non-Indian nationals were Pakistani nationals. There number in 1951 was 41,617. But in 1961 their number is only 201. The Pakistani nationals residing in Nadia account for only 1.29 per cent of their total number in the State. There are 31 Nepali nationals in this district.

2. Migration

The fact that strikes most about the distribution of population over any region is its unevenness, its variation in density from place to place. Changes in the pattern of population distribution in a country are the product of two forces, (a) migratory movement and (b) variations in the rate of natural increase. The later factor alone as has already been discussed in earlier chapters, in a country or in a region marked by rural-urban differentials in fertility and mortality would produce a considerable change in the pattern of population distribution. But where economic opportunities exist, migratory movements play a vital role in fixing the population distribution of that region.

As already stated, apart from natural increase, migration plays a predominent role in the growth of population in a region where urbanisation is taking place, and urbanisation is the result of rapid industrialisation and is a process of population concentration. People unusually migrate from one place to another for higher wage rate, good economic opportunities and good land to settle.

The census definition of migration must be clarified first. People in a particular region have been enumerated according to their place of birth and duration of stay in that particular region. The place of birth statistics regarding migrants will naturally be a crude measure of inflow and outflow of migrants. But in absence of any other reliable data, they will provide a good picture of the flow-pattern of the migrants and its impact on population growth.

The data on migration as processed in 1961 Census have been fully presented in Census of India 1961, Part II-C (ii), Vol. XVI, West Bengal and Sikkim. For want of space any such data could not be presented in this volume.

The data on migration have been broadly divided under two classes, (a) all time inmigrants into Nadia district by place of birth (both rural and urban) and (b) inmigrants to and outmigrants from Nadia district from and to other districts of West Bengal.

An extract Table D-II is given below showing all time inmigrants into the district of Nadia by place of birth (rural and urban).

2.1 Inflow and outflow by other districts

The inmigrants coming from other districts of West Bengal are 70 thousand in number. Of the total number of 604 thousand all time inmigrants into the district of Nadia, they comprise about 12 per cent.

Of the total inmigrants into this district from other districts of West Bengal, Murshidabad has contributed the highest, 18,300. 24-Parganas and Calcutta come next with 16,640 persons and 7,531 persons respectively. In respect of outflow from this district it is observed that because of heavy pull factor in the industrialised and urbanised districts of Calcutta, 24-Parganas, Howrah, Hooghly and Burdwan the outmigrants have out-numbered the immigrants from these districts.

About 33,107 persons born in the district have gone to 24-Parganas, and 23,572 persons to Calcutta. In fact this district has sent out its native-borns more in number than it could have drawn in from other districts of the State. The outmigrants from Nadia exceed the inmigrants by a figure as high as 47,147.

STATEMENT 12.2

THE TREND OF INMIGRANTS INTO AND OUTMIGRANTS FROM THE DISTRICT OF NADIA FROM AND TO OTHER DISTRICTS OF THE STATE

Name of district	Inmigrants	Percentage of Inmigrants from different districts	Outmigrants	Percentage of outmigrants to different districts	Net migrants

SCHEDULED CASTES AND TRIBES

1. Scheduled Castes

From the first Indian regular Census of 1872 caste and tribe denominations of the population have been regularly recorded till 1941, though variations exist in the extent of detailed tabulation. Beverley's Report of 1872 is a pioneer and painstaking study of the castes. In 1881 the statistics relating to 66 castes having a population of not less than one hundred thousand were tabulated for every district of Bengal. In the Census of 1891 every caste having a population of more than one thousand in any district was tabulated down to the thana.

In 1901 Risley, then Census Commissioner of India, attempted for the first time to classify the Hindu castes according to their social standing. This according to Mitra (Preface to the Tribes and Castes of West Bengal, 1951) resulted in "incidentally sowing the dragon's tooth of 'depressed' and 'scheduled' tribes and castes". Risley's monumental 'Tribes and Castes of Bengal' was published in 1891, which, in fact, determined the fate of the next three Censuses. 'This apparently limitless and ever widening horizon was, however, circumscribed in 1911 with the confining of tabulation only to those castes which subscribed 50,000 or more to the population of the province, or 25,000 to the population of a district, and to those others of special local importance or ethnological interest'. The Census of 1921 seems to have paused for breath. In 1931, 141 castes and tribes were tabulated district wise. In 1941, the scheduled castes were defined by the Government of India Orders of 1936 based on the Government of India Act, 1935. This list contained the names of 62 scheduled castes and 14 scheduled tribes, but in the census a total of 118 castes and 17 tribes, scheduled as well as non-scheduled were tabulated down to the district. For the first time castes, as such, were not recorded in the Census of 1951. The caste or tribe of a person was entered if he belonged to the scheduled castes or scheduled tribes or backward classes.

The recording of castes for the general population was dispensed with in the 1961 Census also. The caste or tribe of a person was only entered in the individual slip, if a person belonged to any scheduled caste or scheduled tribe, the names of which have been listed by the President of India as belonging to the scheduled castes and scheduled tribes in the appropriate order passed by him. The list of the scheduled castes and scheduled tribes for the State of West Bengal has been given in the Preface to Part II-A, General Population Tables, Census 1961, Volume XVI, West Bengal and Sikkim. In better fulfilment of the constitutional responsibilities a more detailed tabulation of the data relating to the scheduled castes and scheduled tribes have been undertaken in this Census. The collective population of the scheduled castes and scheduled tribes for individual villages in any police station of the district have been shown in the Village Directory in Part III of this volume; other tables of significance have been given in the SCT series in Part II A of this volume. The Census of India 1961, Volume XVI, Part V-A (i) and (ii)—Tables for Scheduled Castes and Scheduled Tribes for West Bengal will give an elaborate picture of the different aspects of the people belonging to the scheduled castes and scheduled tribes in the different districts of West Bengal.

1.1 Concentration of Scheduled Castes

The scheduled caste population inhabiting the district of Nadia comprise 20.44 per cent of its total population. This percentage is more than the State average. In the State of West Bengal almost every fifth person belongs to a scheduled caste. In the rural sector of the district, 23.24 per cent of its people are scheduled castes as against the State rural average of 23.6 per cent. In the urban sector the proportion of scheduled caste population in the district is little higher than in the State. In the State only 7.9per cent of the urban population are scheduled castes, whereas they make 8.00 per cent of the urban population of the district of Nadia. Of the total scheduled castes in the State as a whole, those living in the district account for only 5.08 per cent. This percentage is 5.23 in respect of rural areas, and 3.75 in respect of urban areas.

Amongst the male population of the district 20.58 per cent are scheduled castes and amongst the females their percentage is 20.29. In the rural sector 23.40 per cent of the male population have returned themselves to be belonging to the scheduled castes and amongst the females their percentage is 23.08. In the urban areas 8.23 per cent of the male population are scheduled castes, whereas amongst the females their percentage is 7.76. The male population amongst the scheduled castes of this district account for 5.03 per cent of the total male scheduled castes in the entire State of West Bengal. In case of females their percentage is 5.14. In the rural and urban sector the male population amongst the scheduled castes of this district account for 5.22 per cent and 3.46 per cent respectively of the total male scheduled castes of the State. In the case of females in the rural

areas they comprise 5.23 per cent and in the urban areas 4.15 per cent.

Scheduled caste population of this district mostly live in Ranaghat subdivision where they account for nearly 51.75 per cent of the district's total scheduled caste population. 48.25 per cent of the total scheduled castes of the district live in Sadar subdivision.

Amongst the police stations of the district of Nadia maximum concentration of the scheduled castes is found in the Ranaghat police station. 18.95 per cent of the total scheduled castes of the district is found in Ranaghat police station. Chakdah police station in Ranaghat subdivision ranks second accounting for 12.73 per cent and the third position goes to Krishnagar police station of the Sadar subdivision, where this percentage is 9.92. More than two fifth of the total scheduled castes of the district is accounted for by these three police stations. Next in order comes Hanskhali police station of the Ranaghat subdivision where this percentage is 8.78. In the police stations Tehatta and Nakasipara of the Sadar subdivision they comprise 7.23 and 7.17 per cent of the district's scheduled caste population respectively. About 6.72 per cent of the district's total scheduled caste population live in Santipur police station of the Ranaghat subdivision. In Chapra, Kaliganj and Karimpur police stations of Sadar subdivision this percentage is 5.76, 5.60 and 5.25 respectively. More than 4 per cent of scheduled caste population of the district reside in each of Krishnaganj police station of Sadar subdivision and Haringhata police station of Ranaghat subdivision. Nabadwip police station of Sadar subdivision forms the area of least concentration of the scheduled castes in this district accounting for only 2.59 per cent of the district's total scheduled caste population.

The following statement gives the percentage of scheduled caste population to total population of the police stations and other administrative units of the district of Nadia.

STATEMENT 13.1

District/Subdivision/ Police Station	Percentage of Scheduled Castes
Nadia District	**20.44**
Sadar Subdivision	*16.70*
Krishnagar	15.84
Nabadwip	7.23
Chapra	18.21
Krishnaganj	31.84
Nakasipara	21.07
Kaliganj	17.45
Tehatta	18.93
Karimpur	13.20
Ranaghat Subdivision	*25.83*
Ranaghat	38.73
Chakdah	23.95
Haringhata	23.78
Hanskhali	36.58
Santipur	20.93

1.2 Strength of individual Scheduled Castes

Namasudras form the major scheduled caste in the district. This caste alone forms 47.95 per cent of the total scheduled castes of the district of Nadia. In the rural areas this caste accounts for 49.23 per cent of the total rural scheduled caste population of the district. Numerically Bagdis come next to Namasudras. In the villages of Nadia 11.87 per cent of total rural scheduled castes of the district belong to the Bagdi community. Next to the Bagdis Chamars have the largest share among the rural scheduled castes of the district. Jhalo Malo or Malos and Rajbanshis are next in order in the rural sector in terms of numerical predominance. They form 8.33 and 3.63 per cent respectively of the total rural scheduled castes of the district. Next place goes to the Rajbanshis and they account for about 2.40 per cent of the total rural scheduled castes. Numerically Pod or Poundra and Rajwar are next in order in the rural sector. They form 2.40 per cent and 1.98 per cent respectively of the total rural scheduled castes of the district. Jalia Kaibarttas and Dhoba or Dhobis account for more than 1 per cent of the total rural scheduled castes of the district. All other castes account for even less than one per cent of their total number in rural Nadia.

In the urban sector also Namasudras form the major scheduled caste community. They account for 31.54 per cent of the total urban scheduled castes of the district. Chamars occupy the next position. They account for 8.76 per cent. Bagdis form 7.38 per cent. In the towns of Nadia Dhoba or Dhobis have the next position (6.64 per cent). Jhalo Malo or Malos come next in position, accounting for 5.53 per cent. 3.86 per cent of the total scheduled castes living in the towns of Nadia are Jalia Kaibarttas. Rajbanshis come next in order accounting for 3.77 per cent. Haris form more than 2 per cent of their total number in urban Nadia.

The statement below shows 13 numerically important scheduled castes as percentage of the total scheduled castes in the rural and urban areas of the district.

STATEMENT 13.2

Name of Scheduled Caste	Rural	Urban
Namasudra	49.23	31.54
Bagdi or Duley	11.87	7.38
Chamar	8.59	8.76
Jhalo Malo or Malo	8.33	5.53
Rajbanshi	3.63	3.77
Pod or Poundra	2.40	0.58
Rajwar	1.98	0.03
Jalia Kaibartta	1.54	3.86
Dhoba or Dhobi	1.23	6.64
Hari	0.78	2.32
Bhuimali	0.80	0.78
Bind	0.77	0.63
Patni	0.66	0.07

In the rural sector maximum number of Namasudras live in Ranaghat police station of Ranaghat subdivision, where they account for 22.22 per cent of their total number living in the rural areas of the district. In Chakdah police station Namasudras account for 13.89 per cent of their total number. Hanskhali police station occupies the next place as it accounts for the habitation of 13.47 per cent of the Namasudra population of the rural district. These three police stations, all of them belonging to Ranaghat subdivision thus account for about 49.48 per cent of the rural Namasudras of the district.

Majority of Bagdi or Duleys live in Krishnagar police station where they form 18.54 per cent of their total number living in the rural areas of Nadia district. Santipur police station's share is 12.59 of the total Bagdi or Duleys living in the rural areas of the district. Ranaghat police station of Ranaghat subdivision accounts for 11.93 per cent of the total rural Bagdi or Duleys population. Chakdah police station ranks third according to the percentage of rural Bagdi or Duleys population (11.82 per cent) of the district. More than eight per cent of them live in each of Haringhata and Chapra police stations.

In the rural sector maximum number of Chamars live in Kaliganj police station. The percentage of Chamars in this district is 13.12 per cent of the total rural Chamar population. In Chapra police station Chamars account for 13.08 per cent of their total number. Police stations Nakasipara, Tehatta and Karimpur have more than 10 per cent of the total rural Chamars of the district. About 76 per cent of the total rural Chamar population live in Sadar subdivision of the district.

More than 26 per cent of the Jhalo Malo or Malos population are found in Ranaghat police station of Ranaghat subdivision and about 16.26 per cent in Chapra police station of the Sadar subdivision. Krishnaganj, Tehatta and Chakdah police stations account for 13.73 per cent, 10.27 per cent and 10.49 per cent respectively of the total rural Jhalo Malo or Malos population.

In urban areas, majority of the Jhalo Malo or Malos live in the towns of Krishnagar police station where they account for 53.98 per cent of the total urban Jhalo Malo or Malos population of the district of Nadia. Ranaghat town accounts for 12.90 per cent of them. About 28.09 per cent of the district's total Dhoba or Dhobis live in Santipur town. Krishnanagar town accomodates 21.35 per cent of their total number. A little less than 20 per cent of the total Dhoba or Dhobis live in Chakdaha town. About 59.22 per cent of the Chamars living in the urban areas of Nadia are found in Krishnanagar town. Out of total Bagdi or Duley urban population in the district 38.13 per cent live in Krishnanagar town and 36.84 per cent in Chakdaha town.

1.3 Sex Ratio

Amongst the scheduled caste population of Nadia for every one thousand males there are 935 females. But amongst the general population the sex ratio is 948. In the rural sector the proportion of sexes amongst the general population in a bit higher than that amongst the scheduled caste population in the district. While it is 952 amongst the general population in the rural areas, it is 939 amongst the scheduled caste population. For every one thousand scheduled caste males residing in different towns of Nadia there are 880 females, whereas amongst the general urban population there are 933 females to one thousand males.

The proportion of sexes, while studied for the individual scheduled castes in the district shows that the Namasudras have greater number of women than the district average for the scheduled castes. In the rural areas, for every one thousand of their male population they have 936 females. In the urban areas their females outnumber males with the sex ratio 1,071.

Bagdi or Duleys show a lesser proportion of sexes than the district average with 907 females per one thousand males. In the rural and urban areas it is 904 and 958 respectively.

For the scheduled caste Chamar the sex ratio is 901. In the rural sector there are 927 females of this caste for every one thousand of their male population. This ratio for the towns of Nadia is 628.

Jhalo Malo or Malos also show a greater proportion of sexes than the district average. In the rural areas for every one thousand of males they have 936 women, but in the urban sector their females outnumber males with the sex ratio 1937.

1.4 Economic Activities

Labour participation is proportionately higher amongst the scheduled castes than the general population of the district. While for every one thousand of general population of Nadia 272 are workers, this proportion for scheduled castes is 288 persons per *mille*. In the rural areas participation by scheduled castes at work is seen to be higher than the general population. Male component of the scheduled caste participants is much higher than the corresponding female component. Amongst every one thousand male scheduled castes in the district 518 are actively engaged in any sort of productive occupation, and among their women-folk only 42 per *mille* are engaged as workers. The proportion of both male and female workers amongst scheduled castes in the district is higher

than that amongst general population. Participation by scheduled caste females at work is more pronounced in urban areas than in the rural areas. While only 5.6 per cent of the total urban females are workers in the district, amongst the scheduled caste females living in different towns of Nadia, the percentage of workers is 8.34. But in the urban areas as a whole labour participation is also higher among scheduled caste population. In case of general population percentage of workers in the urban areas is 24.9 while for the scheduled castes this percentage is 31.1. Participation by male scheduled castes is also higher than that of general population. In case of general male population percentage of workers is 42.9 while for the scheduled castes this percentage is 51.08.

It has already been observed that more workers of Nadia are engaged in the primary sector. This is more so in case of scheduled caste workers. For every one thousand of general workers 429 are engaged as cultivators and 167 as agricultural labourers. Among the scheduled castes 406 for every one thousand of their working population are engaged as cultivators. But the scheduled caste workers are engaged as agricultural labourers by a higher proportion than the general workers. 228 scheduled caste workers for every 1,000 of their total number are agricultural labourers. In the rural sector 437 to every 1,000 of their working population are engaged as cultivators and 243 per *mille* as agricultural labourers.

In household industries participation is less pronounced amongst the scheduled castes than the general population. Only 8.56 per cent of the scheduled caste workers are engaged in household industries while this percentage among general population in the district is 9.00.

In plantation, livestock etc. participation is less amongst the general population than the scheduled caste population. Only 3.40 per cent of the general workers are engaged in this category while this percentage among scheduled castes in the district is 8.41. Only 4.11 per cent of the scheduled caste workers are engaged in manufacturing industries.

In trade and commerce 4.05 per cent of tl scheduled caste workers are engaged. In the urban areas this percentage is 3.19. A little less than 2 per cent scheduled caste workers are engaged in transport and communication service.

In other services participation by scheduled caste workers is less than the general workers of the district. While 11.53 per cent of the total workers are engaged in other services, among the scheduled caste workers this percentage is 8.60. Female participation among scheduled castes in other services is much higher than the male workers. 21.40 per cent of the scheduled caste women are engaged in other services against the figure of 7.62 per cent of male workers. Amongst the female workers belonging to scheduled castes participation in other services is marked by a percentage of 54.72 against 22.11 for the male workers in the towns of Nadia.

Amongst the individual scheduled castes of the district, it is seen that those belonging to Rajwar, Bind, Namasudra, Bagdi or Duley, Chamar and Rajbanshi communities are primarily engaged in agriculture. In the rural areas 85.92 per cent of Rajwars are engaged in agricultural sector. Of them 55.73 per cent are engaged as agricultural labourers and 44.27 per cent are engaged as cultivators. In the rural areas 3.78 per cent of them are engaged in other services. In the rural sector; Binds are engaged as agricultural labourers by 82.75 per cent of their total working population and nearly 68 per cent of them are engaged as cultivators.

Among the working population of the Namasudras 76.11 per cent are engaged in agricultural sector in the district. In other services Namasudras are engaged by 17.74 per cent in the rural areas and 4.65 per cent in the urban areas. Amongst the workers of Bagdi or Duley community about 76 per cent are engaged in the agricultural sector, 54 per cent as agricultural labourers and 46 per cent as cultivators; About 30.25 per cent of the Bagdi or Duley workers living in urban areas are engaged in other services. In the rural areas of the district Chamars have 65.98 per cent workers who are engaged in agricultural sector. Out of this 65.98 per cent of Chamars, 40.29 per cent are engaged as cultivators and 59.71 per cent are engaged as agricultural labourers. In the urban areas of the district 17.38 per cent of Chamars are engaged in other services.

1.5 Literacy

The scheduled castes of Nadia have not given quite a fair account of themselves in so far as the attainment of literacy and education is concerned. In 1961 Census only 273 persons for every 1,000 of its population have passed the test for literacy in the district. But amongst the scheduled caste population only 168 persons out of 1,000 could come out successfully in the literacy test laid down in 1961 Census. They seem to be quite lagging behind others in the district in taking up education. Amongst the male population 35.78 per cent have been shown as literate in the district. Amongst the male scheduled castes the percentage of literates is 25.55. Female literacy among the scheduled castes comes out to be only 73 amongst 1,000 of their women-folk as has been enumerated in 1961 Census against 182 amongst the general women-folk of the district.

In the rural sector 161 out of 1,000 persons of the scheduled castes are literate. Amongst the scheduled caste males of rural areas the percentage of literates is 24.59, while for general population it is 29.97. Amongst the women belonging to the scheduled castes and living in the rural areas of the district literacy is confined within only 70 out of every thousand of their total number. In the urban areas of the district about 52.10 per cent of the population are literate, while this percentage for scheduled castes in the urban areas is only 25.62. The percentage of male literates among scheduled castes living in the urban areas is 37.53, whereas for general population it is 61.33. Amongst the women-folk 12.08 per cent of the scheduled castes living in the towns of Nadia are seen to be literate. But their percentage for general women is 42.20 for the urban Nadia. It seems thus that the people belonging to scheduled castes in this district are in a little extent aware in taking advantages of the different educational facilities and concessions available to them.

The statement given below shows the comparative statement of percentage of literates amongst the general population and the scheduled caste population in the total, rural and urban areas separately.

STATEMENT 13.3

		Percentage of Literates		
		Persons	Males	Females
Total Population	Total	27.25	35.78	18.24
	Rural	21.64	29.97	12.89
	Urban	52.10	61.33	42.20
Scheduled Castes	Total	16.76	25.55	7.37
	Rural	16.08	24.59	7.01
	Urban	25.62	37.53	12.08

Sunris are the most literate community in the district. In the rural areas their percentage of literates is 49.23 while in the urban areas it is 53.40. In the rural sector Dhoba or Dhobis hold the next position in attainment of literacy and education. 26.19 per cent of Dhoba or Dhobis are literates. Among Sunri males in the rural areas the percentage of literates is 56.40 and for their females it is 40.68. Among Dhoba or Dhobis males the percentage of literates is 38.53 and among their females it is 13.04 in the rural areas of the district of Nadia. Namasudras come next in order of literacy in the rural areas. The percentage of literates for this caste is 21.25. Their men are more advanced in this respect, 31.58 per cent of them being literate. The percentage of literates among the female Namasudras is 10.21. For the caste Patni the percentage of literates is 19.59 in the rural district. For their males this percentage is 27.80 and for their females it is only 10.30. In the rural sector the percentage of literates among the Jalia Kaibratta caste is about 19.23. For their males it is 29.63. per cent and for their females it is only 7.48 per cent. Among the Sunris in the rural sector 25.12 per cent of their males are literate without educational level, about 27 per cent of their males have passed primary or junior basic standard and only 4.26 per cent of their males are Matriculates.

In the urban sector also maximum incidence of literacy is found amongst the Sunri caste. Nuniyas follow them. The percentage of literates for Nuniyas is 55.26, which also stands for the male literacy, as there are no female Nuniyas in the urban sector of the district according to 1961 Census. Amongst the Nuniyas in the urban sector exactly 50 per cent are literate without educational level and 5.26 per cent have passed the primary or junior basic standard. Extent of literacy among the Namasudras are also not unsatisfactory. About 34 per cent of Namasudras living in the towns are literate. The male percentage of literates among Namasudras is 52.89 and for their females it is 16.21 per cent. About 27 per cent of Namasudra males are literate without any educational level. 23.15 per cent of them have passed the primary or junior basic standard. Cent per cent illiteracy is found in the urban areas of the district for the castes Bediya, Doai, Kadar, Kandra, Kaur, Kharia, Lalbegi and Musahar.

2. Scheduled Tribes

In the district of Nadia nearly 22 thousand persons have returned themselves as belonging to eleven different types of scheduled tribes. Of them about 9.8 thousand have been recorded as belonging to the scheduled tribe Oraon, 4.5 thousand belonging to the scheduled tribe Santal and 3.2 thousand have been recorded as belonging to scheduled tribe Munda. The scheduled tribe of this district make only a small fraction of the total population of the district, accounting for only 1.28 per cent of the total inhabitants of Nadia. In the rural sector scheduled tribes are more predominant. 1.51 per cent of the villagers of Nadia belong to the scheduled tribes. In the urban sector the scheduled tribes form only 0.28 per cent of the total urban population of the district, their absolute number being only 880. The scheduled tribes of the State of West Bengal make only 5.88 per cent of the total population of the State. In the rural areas of the State the proportion of scheduled tribes is 7.60, while in the urban sector it is as low as 0.56. Thus the proportion of scheduled tribes to total population of Nadia is much lower than that in the State as a whole. Scheduled tribes of Nadia account for 1.07 per cent of the total scheduled tribes in the State of West Bengal. In the rural areas they account for 1.05 per cent and in the urban areas 1.83 per cent.

Amongst the male population of the district 1.27 per cent belong to scheduled tribes and amon-

gst the females the percentage of scheduled tribes is 1.29. In the rural sector scheduled tribe males account for 1.49 per cent of the total male population living in the rural areas of the district. The proportion of rural female scheduled tribes is 1.52 per cent of the total rural females of Nadia. In the urban areas of the district 0.28 per cent of the male population belong to the scheduled tribes and amongst the females the percentage of scheduled tribes is 0.24. The male scheduled tribes of this district account for 1.07 per cent of the total scheduled tribe males of the State and the female scheduled tribes living in Nadia form 1.06 per cent of the total tribal women in the State of West Bengal. Preponderance of scheduled tribe population is observed in Ranaghat subdivision where they account for 62.77 per cent of the total tribal population of the district. The rest of the tribes (*i.e.*, 37.23 per cent) are distributed within the Sadar subdivision. Chakdah police station alone accounts for 28.48 per cent of the total tribal population of the district. Next comes Krishnagar police station which accounts for 20.83 per cent of the total scheduled tribes of the district. These two police stations together comprise a little more than 49 per cent of the total tribal population of the district. Haringhata police station of the Ranaghat subdivision comprise 13.07 per cent of the total tribal population. Santipur police station accounts for nearly 8.76 per cent of their total number in the district. Next to it is Nakasipara police station of Sadar subdivision, where 8.56 per cent of the total tribes of the district are found to inhabit. Ranaghat police station accomodates 6.64 per cent of the total tribes of the district. Hanskhali police station of Ranaghat subdivision accounts for 5.82 per cent of the total tribal population of the district. The rest are distributed over other six police stations. Nabadwip police station of Sadar subdivision has the lowest percentage of scheduled tribe population in the district, which is 0.34 per cent.

2.1 Strength of individual Scheduled Tribes

Oraons are the maximum in number in this district. In the rural areas they account for 46.41 per cent of the total rural scheduled tribes of the district. Next are the Santals who account for 18.26 per cent of the total rural scheduled tribes of the district of Nadia. Mundas and Bhumijs are next in order. They account for 15.14 per cent and 4.45 per cent of the total scheduled tribes in the rural areas of the district.

In the urban sector Santals account for 72.05 per cent of the total urban scheduled tribes of the district ranking first among the scheduled tribes. Oraons account for 3.18 per cent.

Oraons are mainly distributed in Krishnagar, Nakasipara police stations of Sadar subdivision and Chakdah police station of Ranaghat subdivision. In Krishnagar police station Oraons account for 34.09 per cent, in Chakdah 24.39 per cent and in Nakasipara police station 16.29 per cent.

About 32.36 per cent Santals of this district is found in Haringhata police station. Chakdah accounts for 29.50 per cent of them. Krishnagar police station ranks third in this respect. Here 12.72 per cent of Santals reside.

Numerically Mundas form the third largest tribe in this district. More than 55 per cent of them are found in Chakdah police station of Ranaghat subdivision. Santipur police station accounts for 20.42 per cent of them.

The statement below shows the percentage of certain scheduled tribes to total tribal population in rural and urban areas separately.

STATEMENT 13.4

Name of Scheduled Tribe	Rural	Urban
Oraon	46.41	3.18
Santal	18.26	72.05
Munda	15.14	2.05
Bhumij	4.45	..
Unclassified	10.47	18.75

2.2 Sex Ratio

For every one thousand male scheduled tribe population in the district of Nadia there are 964 scheduled tribe females. In the rural areas the sex ratio is 967. The tribal sex ratio in the urban areas is lower, only 901 females for every one thousand male population.

The sex ratio for the Oraon tribe is 971. For Santals this ratio is 940. Amongst the Mundas females outnumber males; there are 1,038 females to every one thousand male Mundas. In the rural areas the sex ratio of Mundas is 1,046.

2.3 Literacy

The scheduled tribes of Nadia have given a very poor account of themselves in so far as the attainment of literacy and education is concerned. Only 5.26 per cent scheduled tribes in the district have been able to pass the Census enumeration test laid down for literacy.

The position of female literacy among the scheduled tribes is all the worse. Female education amongst the tribal population of this district seems to be far cry. Only 96 amongst every ten thousand of the tribal women in this district have been recorded in the 1961 Census as literate. In the rural areas the picture is almost the same. In the urban sector literacy has disseminated a

little more where about 89 persons are found to be literate for every one thousand of the total tribal population living in the towns of Nadia. But amongst the male population living in the urban areas the percentage of literates is found to be 15.55. Female literacy also in the urban areas is, as expected slightly better than in the rural areas of the district. The statement given below shows the comparative statement of the percentage of literates amongst the general population and the tribal population in the total, rural and urban areas of the district :

STATEMENT 13.5

		Percentage of Literacy		
		Persons	Males	Females
Total Population	Total	27.25	35.78	18.24
	Rural	21.64	29.97	12.89
	Urban	52.10	61.33	42.20
Scheduled Tribes	Total	5.26	9.42	0.96
	Rural	5.11	9.15	0.94
	Urban	8.86	15.56	1.44

In the rural areas Mahalis seem to be the most literate community in the district. 26.09 per cent Mahalis living in the rural areas of the district are literate. Among their male population percentage of literates is 46.67. Next to them are the Garos. 24.14 per cent of the Garos are literate in the rural areas. All other scheduled tribes show a very low percentage in respect of literacy. In the urban areas Mal Pahariyas are the most literate tribe in the district, where 10.00 per cent of the Mal Pahariya population are literate. 9.62 per cent of Santals are literate in the Urban areas. Among their male population 17.18 per cent are literate. Cent per cent illiteracy are found among the tribes Kora and Lodha in the urban areas of the district.

2.4 Economic Activities

Labour participation is more pronounced amongst the tribal population. 42 per cent of the tribals in the district are workers as per 1961 Census. Amongst their males, the percentage of workers is 57.01 and for females 26.31. In the rural areas 41.77 per cent of the tribal population are workers. Amongst their males this percentage of workers is 57.00 and for females 26.03. In the urban sector 45.91 per cent of the scheduled tribes are workers. 57.24 per cent male tribes living in the urban areas of the district are workers while females have only one third workers amongst them.

Majority of the tribal workers are engaged in agricultural sector. Nearly 74 per cent of the total tribal workers are so engaged. Of them 36.01 per cent workers are engaged as cultivators and 37.88 per cent as agricultural labourers. Only 6.17 per cent of the tribal workers are engaged in other services. In the rural sector 76.44 per cent of the tribal workers are engaged in agricultural pursuits. Of them 37.01 per cent are engaged as cultivators and 4.0 per cent as agricultural labourers in the rural areas of the district. 5.43 per cent of the rural tribal workers are engaged in other services. In the urban areas about 19 per cent of the tribal population are working in agricultural pursuits. 22.28 per cent of the urban tribal workers are engaged in other services.

AGRICULTURE

1. Introduction

The district of Nadia is pre-eminently an agricultural district and agriculture forms the major industry of the district. Most of the workers of this district are engaged in agricultural pursuits. A little more than three-fourths of its workers are engaged in the agricultural sector either as a cultivator or an agricultural labourer. In the State of West Bengal, as a whole, only 54 per cent of the total working population are engaged in agriculture against the district's percentage of 76. The proportion between the cultivators and agricultural labourers in the district is 2.6:1, and in the State of West Bengal this proportion is only 2.5:1. Thus in the district of Nadia the cultivators bear a larger proportion to the agricultural labourers than in the State of West Bengal as a whole.

The soil and other characteristics like rainfall, weather condition etc., which generally govern the agriculture of any country to a considerable degree have been adequately described earlier in the Chapter on Physical Aspects.

2. General Conditions

The soil varies but little all over the district, except for the tract known as the Kalantar and some portions of the Ranaghat subdivision. It is almost universally a light sandy loam, possessing but little fertilising power, and incapable of retaining moisture. In earlier days, before the rivers had completed their work of land making, the district was far more liable than it is now to considerable inundations, which, although they might destroy the crop which was actually standing at the time of their visitations, brought with them a coating of silt, which ensured on excellent outrun for the following crop. This enrichment of the soil, however, no longer takes place as frequently as it is used to, and as the very light mannuring which is applied is insufficient to compensate for the loss occasioned to the soil by cropping, there can be little doubt that the land is getting less and less capable of giving a good return. This is particularly noticeable in the steady diminution which took place in the net area cropped in the district up to 1931, which means that it was becoming increasingly necessary to allow the land to lie fallow for longer periods between croppings. The soil in Nadia is not sufficiently fertile to enable the same percentage of the population to depend upon agriculture as would be the case were the district more favourably circumstanced in this respect than it is. Other reasons have been suggested, such as the precarious nature of the tenure under which a large proportion of the land is held, and loss of vitality and energy among the inhabitants owing to repeated attacks of malaria; but though these may be contributing causes, there seems little doubt that the main reason why the percentage of the population engaged upon agriculture is so comparatively low in Nadia is that the land is, on account of its infertility, incapable of affording a livelihood to a large percentage.

The physical characteristics of the district are almost uniform throughout, and the agricultural conditions vary but little. The only tract of any size which presents any marked differences from the general average is that known as the Kalantar. This tract commences in the Murshidabad district, comes into Nadia through the gap on the western boundary between the Bhagirathi and the Jalangi, and stretches through the district in a south-easterly direction. It is about 15 miles long and 8 miles broad. It is low-lying, and the surface soil has hardened into a comparatively stiff black clay, which, under favourable conditions produces a good crop of *aman* rice, but is too water-logged for any autumn crop, and is unsuitable for regular winter crops. The inhabitants of this tract, being dependent upon the one crop, which is liable in some years to be swept away by violent floods, and in other years, when the monsoon fails, to die for want of moisture, are naturally more exposed to famine than those of the other parts of the district, where a second crop may afford some compensation for loss of the first.

3. Land Utilisation

The total area under cultivation in 1903-04 was 901 square miles, the land classed as cultivable waste amounting to 544 square miles.

The following figures of 1910 relating to undivided Nadia are obtained from the District Gazetteer giving an account of the employment of land :

Land employed	Area
Culturable waste other than fallows	348,000 acres
Current fallows	400,000 acres
Area under autumn or *bhadoi* rice	358,800 acres or 69 per cent of net cropped area.
Area under winter or *aman* rice	119,600 acres or 23 per cent of net cropped area.
Rabi crops (gram, other rabi cereals and pulses)	291,200 acres or 56 per cent of the normal net cropped area.

Land employed	Area
Jute	72,800 acres or 14 per cent of net cropped area.
Sugarcane	10,400 acres or 2 per cent of net cropped area.
Gram	80,000 acres or 15 per cent of normal net cropped area.
Other *rabi* cereals (peas, *masuri* etc.)	52,000 acres or 10 per cent of net cropped area
Wheat	23,100 acres
Barley	7,500 acres
Oilseeds	114,400 acres or 22 per cent of net cropped area
Orchards and gardens	20,000 acres

Note—$\frac{1}{4}$ ths of the total cropped area is twice cropped and the net cropped area is 41% to the total culturable area.

At the time of the Settlement of 1918-26, 70 per cent of the district's area was cultivated. The statistics of land utilisation at that time is given below.

Description	Area
Cultivated area	
(a) *Bhadoi*	296,648
(b) *Aghani*	229,831
(c) *Rabi*	257,684
(d) Other cropped areas, *e.g.*, mango, *til*, *pan*, plantain, guavas, etc.	44,851
Total cropped area	829,015
Dofasli	201,251
Net cropped area	627,764
Current fallows	89,414
Culturable area other than current fallows	124,144
Area not available for cultivation	102,874
Total of current follows, culturable area other than current fallows and area not available for cultivation	316,432
Total area of the District	944,197

The following is a statement of crops in the district at the time of the Settlement, 1918-26.

Crops	Area
Rice :	
(a) *Aus*	271,119
(b) *Aman*	227,962
(c) *Boro*	469
Wheat	11,791
Kalai :	
(a) Gram (pulse)	74,875
(b) Other food grains including pulses	110,005
Oilsceds :	
(a) Linseed	25,657
(b) *Til*	1,855
(c) Rape and mustard	12,877
Sugarcane	1,868
Jute	24,824
Tobacco	3,221
Fodder crops, including jowar and kalai	9,156
Potato	891
Total	829,015
Area sown more than once	201,251
Net area sown	627,764

The decay of the river system, the growing poverty of the soil, extreme low health, together with the prevalent tenure system of *utbandi*, which introduced insecurity of tenure and consequent reluctance on the part of the cultivators to improve their land are the reasons for the deplorable of agriculture in the district. The general health was far from satisfactory and the disease sapped the energy and initiative of the people, and the district may be definitely called decayed. This will be clear from the following figures.

Description	Ishaque Survey	Settlement
Culturable waste	161,239	124,144
Unculturable waste	108,963	102,874
Net Cultivated area	668,570	717,179

Both culturable and unculturable waste of the district increased, the former due to depopulation, but certain areas of the latter due to the opening of new roads, factories, deposits of sand, etc.

The number of special crops with acreage as found during the Ishaque Survey and the Settlement are shown below.

Name of crop	Ishaque Survey	Settlement
Aman rice	214,996	227,120
Aus rice	281,176	271,120
Wheat	7,790	11,791
Gram	100,053	74,875
Jute	21,583	24,824
Sugarcane	6,385	1,868

The productivity of the land was deteriorating and a good deal was kept fallow regularly at least for one year.

The following is a comparative statement of Ishaque Syrvey and district Settlement figures.

Description	Ishaque Survey	Settlement	Difference
Unculturable waste including water	108,963	102,874	+ 6,089
Culturable waste	161,239	124,144	+37,085
Cultivated :			
(a) *Aman* paddy	214,996	227,962	—12,966
Total area of the district	938,772	944,197	— 5,425

More area has been brought under tillage since then by rendering other uncultivated lands through the process of land reclamation. How the cropped area has been gradually increasing proportionately is evident from the following statement. Cropped area, of course, does not remain constant all through. Similar is also the case with the areas remaining current fallows. It depends on various geophysical factors and fluctuates with the prevailing weather and natural conditions and the agro-economic situation of the country.

	Percentage distribution of kinds of area to total areas				
	1947-48	1950-51	1954-55	1956-57	1958-59
	1	2	3	4	5
Area not available for cultivation	8.59	9.16	13.41	14.274	14.79
Other uncultivate lands excluding current fallows	10.94	9.66	10.05	8.288	7.03
Current Fallows	3.58	21.28	10.41	5.858	4.66
Net area sown	76.89	59.90	66.13	71.552	73.52

A fairly large proportion of the net area sown is being used in this district to raise more than one crop. The extent of double cropping has been gradually improving. In 1947-48 only 32.65 per cent of net area sown was subjected for yielding more than one crop. This percentage has since been rising to 39.41 in 1950-51, 44.37 in 1956-57 and 47.67 in 1958-59.

Thus it appears that there being not much of land left as margin in the district, the produce of the land will have to be increased by growing more crops per acre than is grown at present and also by getting two or more crops out of lands which bear a single crop now.

4. Cropping Pattern

The statistics relating to crops in the district have been given in Table 3.1 in the Official Statistics in Part II B of this volume. The distribution of the general crops in the district in 1960-61 is given below.

Area in Acres under Crops (1960-61) in Nadia

Total Rice	544,373
Bhadoi or Aus	281,206
Aman	261,190
Boro or Summer	1,977
Wheat	10,131
Barley	10,131
Jowar	247
Maize	247
Gram	124,788
Other food grain	250,070
Sugarcane	17,792
Other grains grown for sugar	494
Rape and Mustard	22,734
Til or seasamum	741
Linseed	37,313
Other oil seeds	494
Condiments and spices	1,236
Jute	73,884
Other fibres	45,962
Tobacco	247
Fodder crops	2,965
Fruits and vegetables	8,896
Miscellaneous food crops	741

About 47 per cent of the cropped area of the district covers rice, about 6 per cent jute, 10 per cent gram each and 22 per cent other food-grains. A little area is also under linseed, mustard and sugarcane. There has been some changes in the cropping pattern during the last decade, as will be seen from following statement. In 1951-52 rice covered more area.

Percentage of Area under Certain Important Crops to Total Cropped Area for Certain Years

Crops	Years		
	1951-52	1956-57	1960-61
Total Rice	51.17	42.91	47.19
Aus	25.95	22.41	24.39
Aman	25.07	20.41	22.64
Boro	0.15	0.04	0.71
Wheat	2.42	2.35	0.88
Maize	0.11	N.A.	0.2
Gram	2.09	14.65	10.82
Other food grains	N.A.	11.90	21.68
Sugarcane	0.70	0.68	1.54
Linseed	2.24	4.40	3.23
Fruits and vegetables	N.A.	1.20	0.77
Jute	19.27	6.61	6.41

N.A.—Not available

As elsewhere in lower Bengal, the most important crop is rice, but Nadia differs from all other districts in depending far more upon the autumn variety (*aus*) than upon the winter variety (*aman*). Little summer rice (*boro*) is grown. *Rabi* crops, of which the most important are gram and other *rabi* cereals and pulses, are quite significant; while sugarcane is comparatively unimportant. It is said that more than a thousand different varieties of rice were formerly grown; many considerable villages have a variety of their own, and old varieties are constantly being replaced by new ones.

Autumn rice or *aus*—The autumn rice or *aus*, is also known as *bhadoi* rice, after the name of the month in which it is harvested. As already stated it is by far the most important crop which is grown in the district. It requires less water than the other varieties of rice, and in fact it cannot be grown on land which is liable to be flooded during the rains to a depth or more than three or three-and-a-half feet, and it does not possess the power of accommodating its growth to the depth of water surrounding it, as do the long stemmed varieties. Cultivation of the land for it commences as soon as the early showers permit ploughing and the seed is sown broadcast in April or May. As soon as the young plants have attained the height of 5 or 6 inches, the field is harrowed with a view to somewhat thinning out the crop, and also to prepare the way for the first weeding. During May and the first half of June it is most

necessary to keep the fields clear of weeds, and it is the amount of labour required in this operation which makes the *aus* a more troublesome crop even than the transplanted *aman*. Under favourable conditions the crop is ready for the sickle in August or September. The rice yielded is of coarse quality, and difficult to digest; it is used by the lower classes only. The outturn is less in weight, and fetches a lower price than that afforded by the *aman* crop, but it provides the raiyat with a food grain, and his cattle with fodder, at a time of the year when both are scarce. Moreover it is off the ground early enough to permit of the preparation of the land for the *rabi* or winter crop, which gives it another advantage over the *aman*. The normal outturn of *aus* rice in Nadia is 8 maunds per acre, which compares unfavourably with the figures for other districts. *Aus* paddy is one of the best cleaning crops for lands which have become badly infested with weeds; and it is occasionally grown for this purpose. It is specially useful for ridding from *ulu* grass land on which it is desired to plant out an orchard.

Winter rice or *aman*—The crop of next importance to the district is the winter rice or *aman*. It is in this class that the most varieties occur, and it furnishes all the finest qualities of rice. The preparation of the land for this crop begins early in the year. In April or May the seed is sown very thick in a nursery, and when the seedlings make their appearance another field is prepared into which to transplant them. For this purpose it is necessary to repair the embankments round the field so that it shall retain all the rain which it receives. It is then repeatedly ploughed up until the surface is reduced to thick mud. The seedlings are then taken out of the nursery and transplanted into rows about nine inches apart, where they are left to mature, the only subsequent operation being one or two weedings in the latter part of August. The crop is harvested in November or December. The most critical period for this crop is when it begins to blossom in the latter part of October. If there is not sufficient moisture at this time, no grain will form in the year. The soil most suited to the *aman* crop is one that contains a large admixture of clay. In Nadia *aman* rice is nearly the sole crop in the Kalantar. The normal yield is about 9 maunds of rice per acre, which is less than what is obtained in the other districts of the Presidency Division.

Jute—The cultivation of jute has been steadily increasing of late years, and this crop now occupies a fair share of the normal net cropped area. Generally speaking, it does well on lands which are suitable for *aus* rice. The preparation of the land for this crop begins as soon as sufficient rain to moisten it has fallen. It is first ploughed twice or thrice and then allowed to rest for a time, while the cultivator mannures it with cow-dung and any other fertilizing agent upon which he can lay his hands. It is ploughed again in May, and the surface rendered as fine as possible, after which the seed is sown. When the seedlings are five or six inches in height, a harrow is passed over the field with a view to thinning out the plants where they are too thick, and also to assist in the absorption of moisture by breaking up the surface of the ground. The first weeding does not take place until the plants are about a foot high; every effort is then made to entirely eliminate the weeds, and if the work is well done no further weeding is required. The crop matures in August or September, and it is then cut and tied up in bundles about 15 inches in diameter, which are steeped in the nearest stagnant water for about a fortnight until the stalks have become sufficiently decomposed to admit of the extraction of the fibre from them. In performing this operation of the stem is broken near the root, and the broken portion drawn off; the portruding end of the fibre is then grasped, and, by gradual pulling and shaking, the rest of the fibre is extracted from the stalk. It is then well rinsed in water, and hung up on bamboos in the sun to dry. Jute is an exhausting crop to the land, and cannot be grown on the same plot for two years in succession. Some of the loss to the land is made up by scattering on the surface the leaves of the plant which are stripped from the stalks before they are steeped.

The quality of the jute grown in the Nadia district is inferior to that grown in the districts north of the Ganges.

Since 1952 the Agriculture Department of the State has established a large Jute Seed Multiplication Farm at the former race course site of Krishnagar. The Seed Multiplication Farm is expected to be sufficiently productive of improved jute seeds, not only to supply the district of Nadia, but other districts of the State.

Rabi crops are generally sown in October and early November and reaped in March. The most important of these are gram, peas, and *masuri*. A large amount of *arhar* is grown. *Dhaincha* is extensively grown in the district as a green manure crop. Quantities of *sunnhemp* also are grown. Crops producing oilseeds, are cultivated mainly in the north, in Tehatta and Karimpur. In Tehatta some chilli and turmeric also are grown. Indigo, the manufacture of which was once the most important industry in the district, is now completely extinct, and so is the cultivation of cotton. The cultivation of potatoes, wheat and barley is extending, especially in the south of the district near the railway line, in which parts other garden produce is freely grown "where the conditions of the soil permit", and exported to Calcutta.

Appendix I

GAZETTEER

AMGHATA-GANGAVAS—Gangavas is the name given to a portion of the village of Amghata, which is situated about 6 miles west of Krishnagar. It lies on the Alakananda, which was an off-shoot of the Jalangi falling into the Bhagirathi, but has now silted up. The waters of this stream, owing to its connection with the Ganges, were considered holy, and a palace was built on the banks by Maharaja Krishna Chandra, and named Gangavas, *i.e.*, residence on the Ganges. Temples were also erected in which the images of Hari and Hara and six other gods and goddesses were installed, and provision was made on a liberal scale for their worship. As a consequence the fame of Gangavas spread far and wide, and it became a place of pilgrimage, at which a large number of persons assembled on the Paush Sankranti, Barun and Dasahara days, to bathe in the sacred waters of the Alakananda, and pay their homage at the various shrines. When the stream silted up, the place gradually lost its importance, and the temples were neglected and fell into ruins. Only those of Hari, Hara and Kal Bhairav have withstood the ravages of time, and now one Brahman, on a small pittance allowed by the present Maharaja of Krishnagar, performs the daily *puja* to the idols. The Ram padak (*i.e.*, footprint of Ram) which is still to be seen here is said to have been brought from the Chitrakuta hills.

ARANGHATA—Village situated in the Ranaghat thana about 6 miles north of Ranaghat. It lies on the main line of the Eastern Railway and has a station called after its name. The river Churni passes by the village and on its bank is the Hindu temple of Jugal Kishor, which is believed to have been constructed about 1728 A.D., and which contains the images of Krishna and Radha. According to tradition the former was brought from Brindaban and first installed at Samudraghar (near Nabadwip), whence it was transferred to Aranghata by Ganga Ram Das, the first *mahanth* of the temple. The image of Radha is said to have been brought from the palace of Krishna Chandra, the famous Maharaja of Nadia, who made a grant of 125 bighas of rent free land for the support of the temple. A big fair is held here annually throughout the month of Jaista, and is attended by pilgrims from all parts of Bengal: among the visitors females predominate, owing to the belief that any women who visits the temple will escape widowhood, or, if she be already a widow, will be spared from that fate in her next birth. To the south of this temple there is another, and a more ancient one, containing the idol of Gopi Nath, but this possesses no special fame or sanctity.

BAGULA—A small village and a station on the Eastern Railway. Until Krishnagar received a direct railway service, it was the nearest railway station to that place, with which it is connected by a metalled road 11 miles in length. It is now of little or no importance except as a large concentration of Displaced population. It was for some time, from 1862 onwards, an outstation of the Church Missionary Society. In the 1930's the place was famous for capon.

BAMANPUKUR or MAYAPUR—A village in the Kotwali thana on the east bank of the Bhagirathi opposite Nabadwip. There seems no doubt that a portion of the old Nabadwip of the Hindu kings of Bengal lay within this village: the remainder of the site now lies under the waters of the Bhagirathi. In the village there is a large mound which is called Ballaldhibi and is believed to be all that is left of the palace of Ballal Sen; and near by is a tank which is called Ballaldighi. The village has now grown famous as a rival centre to Nabadwip.

BIRNAGAR—The ancient name of this small town was Ula. It is in the Ranaghat subdivision about five miles from Ranaghat and 13 from Krishnagar, and is situated in 23°15′ N. and 88°34′ E. The town was constituted a Municipality in 1869, with 12 Commissioners, 8 of whom are elected and the remainder nominated. The Subdivisional Officer of Ranaghat was *ex-officio* Chairman until 1901, but since that year there has been a non-official Chairman. The public buildings are (1) the Municipal Office, (2) the Municipal Charitable Dispensary and (3) the Municipal Market.

One of the earliest traditions connected with this town is that it was once visited by Srimanta Saudagar, the mythical Hindu merchant-prince. At that time the Ganges flowed past the place, and as Srimanta was sailing up to it, a terrific storm came on. In response to divine inspiration he called upon Ulai Chandi, one of the wives of Siva, the destroyer, to help him. She answered his prayer and protected his fleet; whereupon he instituted a special worship of her in this place, which has been carried on to the present day. The Ulai Chandi festival is celebrated here annu-

ally in the month of Baisakh, and is attended by many pilgrims, who, it is said, are housed and fed by the residents.

According to tradition the present name of Birnagar (*anglice*, town of heroes) was conferred upon the town in recognition of the bravery of its inhabitants in capturing noted dacoits on two occasions. The first capture was that of a notorious bandit, who was known as Shena Shani, a native of Santipur, and a Goala by caste: it is said to have been effected by Anadi Nath Mustafi, of the Mustafi family of Ula. The second capture was that of the gang of dacoits who were headed by Baidya Nath and Biswa Nath, and ravaged the district during the latter part of the eighteenth century. Sri Mahadeb Mukhapadhyay is said to have effected this capture, though this is somewhat at variance with the account of the destruction of the gang which has been given by Sir William Hunter.

The following letter, dated 29th October 1800, from Mr. J. Lumsden, Registrar, to the Secretary to the Government in the Revenue and Judicial Departments, has been traced, and may be quoted *in extenso*, "Sir,—In a trial before the Third Judge of the Calcutta Court of Circuit at the last Jail delivery for Zilla Nuddea which came under reference before the Nizamat Adawlut, it appeared in evidence that a night attack having been made on the house of Mahadeo Muckerjee, a respectable resident in the village of Ooloo, by a large Gang of armed Dacoits, the Inhabitants of the Village immediately assembled, surrounded the House, and after a desperate Resistance in which nine of the Villagers were wounded, apprehended on the spot eighteen of the Robbers, who were tried and convicted and sentenced to perpetual Imprisonment and Transportation.

2. The Judge of Circuit considered the Inhabitants of Ooloo as entitled to some mark of Distinction for their Behaviour on this occasion, and the Nizamat Adawlut concurring in this Opinion, desired him to propose some specific Recompense which might with propriety be made to them.

3. I have now received the Orders of the Court to transmit to you the enclosed copies of two letters from the 3rd Judge of the Calcutta Court of Circuit on this subject, and to request that you will lay them before the Most Noble the Governor-General in Council, with their recommendation that his Lordship will be pleased to authorize the Magistrate of Nuddea to pay a reward of twenty sicca Rupees to each of the nine Villagers who were wounded in apprehending the Robbers, and to change the name of the Village from Ooloo to Beernagur, as proposed by the Judge, notifying the same by Proclamation in the manner suggested in Mr. Camac's Letter of 25th instant.

4. The timid Behaviour of the Natives of Bengal in general, in deserting their Habitations and Property when attacked by Gangs of Dakoits, is to be ascribed, in the opinion of the Court, more to the horrid acts of Barbarity which are often perpetrated by the Robbers, than to any want of personal Courage, and it is believed that the occasional notice and approbation of an Opposite Line of conduct by Government, may operate as a spur to excite others to follow the example, and by creating a Spirit of Emulation throughout the Country, may prove the most effectual means of checking the Depredations of the banditti, and raising up opponents to them in every village."

The Mustafi Family was founded by one Rameswar Mitra, who visited Delhi in the time of Aurangzib, and who is said to have much impressed the Emperor with his scholarship and personal appearance, and to have obtained from him an introduction to Murshid Kuli Khan then Nawab of Bengal. The Nawab gave him a high post in the Accounts Department, in which he so distinguished himself and did such good work, as to earn for himself the title of Mustafi. This title has been retained in the family during the generations which have passed since it was conferred. Owing to partition and litigation the fortunes of the family have greatly declined and they are no longer well off.

The Mukhopadhyay family, whose founder is alleged to have been instrumental in the capture of the gang of Baidya Nath and Biswa Nath, are the local magnates of Birnagar, and keep open house for all who care to avail themselves of their hospitality when visiting the town.

Birnagar was once a large and prosperous town, but the epidemic of malarious fever in 1857 caused great ravages in the place, and it has been steadily declining ever since.

The following account of the place is taken from an article by Revd. J. Long which appeared in the *Calcutta Review* in 1846. "Not far from Ranighat is Ula, so called from Uli, a goddess whose festival is held here, when many presents are made to her by thousands of people who come from various parts. There are a thousand families of Brahmans, many temples and rich men living in it. As Guptapara is noted for its monkeys, Halishar for its drunkards, so is Ula for fools, as one man is said to become a fool every year at the *mela*. The Baruari Puja is celebrated with great pomp; the headmen of the town have passed a bye-law that any man who, on this occasion refuses to entertain guests, shall be considered infamous, and, shall be excluded from society. Saran

Siddhanta of Ula had two daughters, who studied Sanskrit grammar and became very learned. In 1834 the Babus of Ula raised a large subscription and gave it to the authorities to make a pukka road through the town."

CHAKDAHA—A town in the Ranaghat subdivision on the main line of the Eastern Railway, situated in 23°6′ N. and 88°33′ E., not far from the left bank of the Hooghly river. Tradition says that Bhagirath, when bringing the Ganges from Himalaya to Ganga Sagar to water his forefathers' bones, left the traces of his chariot wheel (*chakra*) here; hence the name. Not much appears to be known of the ancient history of the town, but it is believed that the army of General Man Singh was weather bound here for some days, on its way to the subjugation of Pratapaditya at the close of the sixteenth century. Chakdah, as well as Bansbaria and Ganga Sagar, was once notorious for human sacrifices by drowning. In Hamilton's "Description of Hindostan", London, 1820, it is stated that "this town was formerly noted for voluntary drownings by the Hindoos, which however latterly have become a mere ceremony of immersion without any fatal result." Stavorinus, 1785, writes, "The village of Chagda, which gives its name to the channel, stands a little inland, and there is a great weekly market or bazar here: the channel terminates about three Dutch miles inland, and on its right has many woods in which are tigers and other wild beasts; on entering the woods a little way, we soon met with the traces of tigers in plenty, and therefore we did not think it prudent to venture further; we met in the way the remains of a Bengali who had been torn in pieces by a beast of prey". There is other evidence to show that tigers were not uncommon in the district in the latter part of the eighteenth century; it is said that during that period persons travelling in the neighbourhood of Nabadwip were compelled to sound instruments to frighten these animals away; in 1802 expeditions were made to Krishnagar to hunt them, and as late as 1825, a tiger was killed at Dogachhia 6 miles west of Nabadwip. Tigers have long since disappeared, but leopards are still found occasionally in the district, especially near Dignagar.

At the beginning of the nineteenth century, dacoits committed great havóc in the neighbourhood of Chakdah. At the trial of some men who had committed a dacoity in the town, one of the witnesses stated that "the country is in the hands of the dacoits, and they do not scruple to plunder in broad daylight." In 1809 one Hanif, with eight companions, was hanged in the town for dacoity.

Chakdaha used to be an important trade centre, but a change in the course of the river affected it adversely in this respect. The main public buildings in the town are the Municipal office, dispensary and hospital, and the office of the Sub-Registrar. The town was constituted a Municipality in 1886, with 12 Commissioners, all of whom were nominated.

CHAPRA—A village about ten miles north of Krishnanagar on the road between that town and Meherpur. It has been a centre of work of the Church Missionary Society for over 100 years. A church was built here in 1841, and a school was started in 1850; the latter is now a most useful institution; in 1908, there were 202 boys on the rolls, and teaching was carried on up to the Middle English Standard. There is a thana in the place, and not far off, on the banks of the Jalangi, is the village of Bangaljhi, which was once an important river-mart, and in which there is still a certain amount of local trade.

DHUBULIA—A railway station on the Krishnagar-Bhagwàngola line. About 8 miles north-west of Krishnagar across the Kharia or Jalangi river. During World War II it was made a very large aerodrome. After the cessation of war and at the Partition of the State, Dhubulia was converted into a large centre for the reception of Displaced persons from Pakistan. It has still remained a great collection of Displaced persons, the population rising in 1951 at one stage to over 25,000. There is little fallow agricultural land around the camp, nor is there any other worthwhile industry. The inmates of Dhubulia, therefore, use the village mainly for residence and for moving about in search of employment.

PHULIA—A new small town, 6 miles from Ranaghat and 4 miles from Santipur on the Santipur-Ranaghat road. Built mainly at the instance of the Government of India to house Displaced persons arriving in the district, the town was carefully planned to contain large industrial buildings, administrative buildings, a vocational training centre, an agricultural farm, facilities of irrigation, a central pipe water supply and electricity. The town was well laid out with roads, streets and lanes, including provision for community recreation centres, hospitals, high schools, primary schools and parks. It certainly is an example of how a small town should be built up from nothing at all. The present population of the town is about 3,811. The venture has suffered on account of few industries having been persuaded to establish themselves there.

GHOSHPARA—A village situated in the Chakdah thana of the Ranaghat subdivision, about five miles north-west of the Kanchrapara Railway Station. It is also known under the name of Nityadhán. This village is the headquarters of the *Kartabhaja* sect, of which an account has been given in *The Tribes and Castes of West Bengal*. According to Sri Gopal Krishna Pal, who has written an interesting note on the sect, festivals

are held at Ghoshpara at the *Dol Jatra*, in the month of Falgun; at the *Rath Jatra* in the following month; on the anniversary of the death of Ramdulal or Dulal Chand, the son of the original founder of the sect, in the month of Chaitra; on the anniversary of the death of the founder, in the month of Asarh; and on the anniversary of the death of the founder's wife in Aswin. The places visited by the pilgrims are the room where the founder's wife was buried, the room containing the relics of the founder, and the room containing the relics of his son; in each of which places daily prayers are also offered. In addition to the above, two tanks, named Dalimtala and Himsagar, are also visited by the pilgrims; both of these tanks are associated with the name of the Fakir who assisted in the founding of the sect. Except for its connection with the sect, the village of Ghoshpara is of no interest or importance.

GHURNI—The north-eastern suburb of the town of Krishnagar, famous for the manufacture of clay figures and models of remarkable excellence. The industry is carried on by a few men of the Kumar or potter caste, and specimens of their work have received medals at the London and Paris exhibitions. Ghurni is said to have been the birth place of Gopal Bhar, the celebrated jester of the court of Maharaja Krishna Chandra.

KALYANI—A new venture of the West Bengal Government at building a large model town with all modern amenities and facilities. The town has been declared as a notified area by the Govt. of West Bengal recently.

The following is an account taken from a Report by the Chief Engineer of Kalyani Township in 1965. The total area acquired for the Kalyani was 9,480 acres. The area was divided originally into six blocks, namely, A, B, C, D, E & F together with areas reserved as green belt on the periphery of the same. The Blocks A, B, C and D are on the western side of the Railway line running from Sealdah to Ranaghat and the Blocks E and F are on the eastern side. The four Blocks on the western side covered about 3,674 acres and the Green belt covered 1,432 acres. The balance of 4,374 acres comprise Blocks E & F. The actual area of the four blocks are :

Block	Area
A	1,216
B	1,098
C	640
D	720
Total	*3,674*

Execution of the Scheme started in the year 1950 when the foundation stone of the Township was laid by the then Governor, Dr. K. N. Katju. It was originally intended that Block 'D' should be earmarked for industries and other areas should be developed for residential purpose. An estimate amounting to Rs. 2 crores approx. was sanctioned initially for development of the Block 'B' and the land acquisition cost for the whole area. The 'B' Block contained about 5,688 residential and commercial plots and 45 parks. Land was allocated for markets, schools, health centres and other social services etc. Development of this Block has been completed during the Second Five Year plan.

There are about 52 miles of black-top roads, under-ground sewer, water mains and electric transmission lines in this Block. Besides, there are two over-head tanks for water-supply to ensure 24 hours supply to the plot holders. A scientific and modern sewage disposal plant is functioning in this Block.

In Block 'B' an Administrative Building at a cost of about Rs. 4 lakhs has been constructed. Various Offices from Calcutta and other places have been shifted there. A fine High School building has also been constructed and the Higher Secondary School both for girls and boys is functioning. A market with 52 shop-rooms and open platform for fish and vegetable stalls has been started in 1956. Almost all the shop-rooms have been let out. A full fledged Police Station is functioning in the Township.

In the year 1954, it was decided with the approval of the Chief Minister to restrict the Township Area within the four Blocks, namely, A, B, C and D only. The area on the eastern side of the Railway line which was earmarked for development has been transferred to various Govt. Deptts., such as, Home (Defence) Deptt., Medical Deptt., R. R. Deptt., Fisheries Deptt., Agriculture & Animal Husbandary Deptt.

In the Second Phase, about 200 acres of land in Block 'D' was initially developed for setting up industries during the Second Plan Period. 23 plots for industrial purposes of different sizes were developed in this area and all the plots were leased out to different industrialists. The following are the names of some of the industries which have been functioning or going to function very soon.

(*a*) M/S. Sen & Pandit Industries Ltd.
(for manufacturing cycle parts)

(*b*) M/S. Davidson of India Ltd.,
(for manufacturing plants & machinery for tea industries)

(c) Kalyani Spinning Mill
(for production of yarn)

(d) M/S. Bombay Steel Rolling Mill
(for re-rolling of steel rods, angles etc.)

(e) M/S. Eastern Commercial Corporation
(manufacturing railway sleepers and other allied materials)

(f) M/S. Ramsarup Industrial Corporation
(fabrication of steel materials)

There is also an Industrial Estate sponsored by Commerce and Industries Deptt. Where large number of Small Scale Industries have been established and have gone into production.

In view of the increased demand for industrial plots it has been recently decided by Govt. to extent the Industrial Belt by another 375 acres. The land development of 375 acres is also nearing completion. A Scheme for Industrial Housing at an estimated cost of Rs. 19 lakhs has been sanctioned to construct about 300 tenements in multi-storied building. This work has also been completed and all the flats are now ready for occupation.

The entire area of Block 'C' along with some other lands from the adjoining Blocks, totalling about 832 acres has been transferred to the Education Deptt., for setting up of the Kalyani University.

The Kalyani University has already constructed a number of buildings for Hostel accommodation and Lecture Halls etc. This is mainly a residential University having faculties in agriculture, arts and science.

Development of part of Block 'A' has recently been sanctioned at an estimated cost of Rs. 128.72 lakhs. Besides, residential plots there will be open spaces, parks, schools, and hospitals. Two Hospital buildings—one for 500 beds and another for 250 beds have already been constructed in this Block by the Deptt. of Health. This Block will offer about 2,500 plots of different sizes for residential purposes. A proposal for establishment of a Tel. Communication Training Centre of the Posts & Telegraphs Deptt. in this Block is under consideration.

Sale of plots—Out of the 5,688 plots in the original layout plan of Block 'B', about 1,126 plots have been utilised for building houses by Govt. All the remaining plots of this Block have already leased out to the member of the public.

Housing programme—In the year 1954-55, 526 houses were constructed at a cost of about Rs. 95 lakhs inclusive of the cost of land. About 50 per cent of these houses have been sold to the public either on hire-purchase system or on outright sale. The remaining houses are now occupied by the Govt. employees. Other housing schemes taken up by Govt. are :—

(i) 100 Nos. houses under Middle Income Group Housing Scheme have been completed. Steps are now being taken to allot these houses to the prospective buyers either on hire-purchase system or on outright sale.

(ii) 100 Nos. houses under Rental Housing Scheme have been completed. These have been allotted to different Govt. Offices and Industrialists for residential accommodation of their staff on rental basis.

(iii) 400 Nos. houses under Low Income Group Housing Scheme have also been constructed. Construction of these houses have been completed and they are being offered to the public for purchase.

Existing Institutions at Kalyani—Besides Kalyani University and the B. T. College, the following Institutions are functioning at Kalyani—

Government :

(i) Block Level Co-operative Officers Training Centre sponsored by Reserve Bank of India, Govt. of West Bengal and Govt. of Assam.

(ii) Industrial Training Institute of the Industries Deptt.

(iii) Work-*cum*-orientation Centre for educated un-employed-Administrative Deptt. is Development & Planning Deptt.

(iv) Orientation Training Centre for Block Development Officers—started by the C. D. Ministry, Govt. of India.

Non-Government :

(i) *Kalyani Civic Association*—It is a non-official body which the plot holders of Kalyani formed in the year 1955. We have not noticed much of their activities. They send from time to time representation about local grievances to the Development Commissioner. Ex-Development Commissioner on one or two occasions received a deputation of the Civic Association in Calcutta.

(ii) *Kalyani Club*—They have been granted 10 cottahs of land in the Civic Centre.

(iii) *Kalyani Town Club*—There application for grant of land has been accepted by Govt. They are constructing "Club-houses" on the site allotted to them.

HANSKHALI—A village on the Churni river at the point where the metalled road from Bagula to Krishnagar crosses that river. It was, before the advent of the railways, a river-mart of some importance, but has now greatly declined, especially since Krishnagar obtained a direct railway service. It is a station for the collection of Nadia Rivers tolls. There is a thana on the right bank of the river by the ferry.

HARINGHATA—An area on the Kanchrapara-Jagulia road which contains the Haringhata Farm, the office of the River Research Institute and an army depot.

The scheme for the establishment of a Central Livestock Research-*cum*-Breeding Station at Haringhata was sanctioned in 1945. The scheme had the twin aim of breeding quality livestock required for improving the livestock wealth of Bengal and of carrying out research in the breeding, feeding and management of livestock and dairying.

KANCHRAPARA—A fairly large village in the extreme south of the district, and about 3 miles west of the station on the main line of the Eastern Railway, to which it has been given its name. It is about a mile to the east of the Hooghly, and is on the road to Ghoshpara, the seat of the *Karta bhaja* sect. At one time Kanchrapara was a big and important village, and was very largely attended by visitors on the occasion of the celebration of the Rath Jatra festival. It is now, however, on the decline, and is being depopulated by malaria. The village temple of Krishna and Radhika is said to have been built by the Maliks of Calcutta in 1708.

KRISHNAGAR SUBDIVISION—Headquarters subdivision of the district, lying between 23°17′ and 23°49′ N. and 88°9′ and 88°48′ E. It has an area of 969 square miles, and consists of a wide alluvial plain, bounded on the west by the Bhagirathi, and intersected by the Jalangi which flows past the headquarters station, and, eight or nine miles further on, joins the Bhagirathi opposite Nabadwip.

KRISHNANAGAR—Head-quarters of the district, situated in 23°24′ N. and 88°31′ E., on the left bank of the Jalangi, about 9 miles above its junction with the Bhagirathi.

The town covers an area of about 6½ square miles, and its population is 70,440 in 1961, as compared with 25,550 in 1891 and 26,750 in 1872.

The original name of Krishnagar is believed to have been Reui. In this village a palace was erected by Maharaja Raghab, whose son Rudra Rai changed the name to Krishnagar or Krishnanagar, in honour of Krishna. Since then the town has remained, almost continuously, the residence of the Maharaja of Nadia. A municipality was constituted in 1864 with 21 Municipal Commissioners, two-thirds of whom are elected and the remainder nominated.

Up till 1898 the town was without the benefit of a railway service, and the nearest railway station was Bagula, on the Eastern Bengal State Railway, with which it was connected by a metalled road about 11 miles in length, broken at Hanskhali by the Churni river, which was unbridged and had to be crossed in open ferry boats. In 1898 a light 2½ feet gauge railway was constructed from Krishnagar *via* Santipur to Aistola Ghat, on the right bank of the Churni, near Ranaghat, and the Eastern Bengal State Railway ran a siding down to the opposite bank from Ranaghat station. Finally in 1906 the Ranaghat-Lalgola branch of the Eastern Bengal State Railway, with a station at Krishnagar, was opened, and the town was at last placed in direct railway communication with Calcutta.

Krishnagar contains the usual public offices. In addition to these buildings there is a Government College affiliated to the Calcutta university. Attached to the college is a Collegiate school. The attendance at both these institution has shown a steady increase since 1881.

The town is a centre of Christian evangelistic enterprise: it is the headquarters of a diocese of the Roman Catholic Church, and an important station of the Church Missionary Society, each of these bodies having its own church and schools. The Church of England Zenana Mission also maintains here two dispensaries, a hospital and two schools.

The great Hindu Swinging festival (Baradol) is celebrated in Krishnagar annually in March or April, when 12 idols, belonging to the Maharaja of Krishnagar and representing Sri Krishna in twelve different personalities, are brought together to the Rajbari from different parts of the district and worshipped. Many thousand pilgrims assembly every year for this festival, and a fair lasting for three days is held simultaneously.

The town suffered somewhat serverely in the great earthquake of 1897: some masonry buildings were destroyed and many were seriously damaged, including the Collectorate office, the main entrance of which collapsed.

THE HORTICULTURAL RESEARCH STATION KRISHNANAGAR

The Horticultural Research Station at Krishnanagar, which is the only Horticultural station of its kind in West Bengal, was established in the year 1934. with financial help from the Indian (the Imperial) Council of Agricultural Research for carrying out research work on fruit growing in the plains of Bengal. Krishnanagar was selected as the site of the station as this was on the fruit growing belt of Bengal and was well known for the quality of mango, lichee and other fruits produced there. To start with, the work was taken up on 16 acres of Khasmahal land adjoining the Government Demonstration Farm. The station was later on expanded in 1946 by the inclusion of the 40-acre Demonstration Farm. It was then planned to make this a Central Horticultural Research and Fruit Technological Station. This unfortunately has been delayed due to the partition of the country. The development of the station has now been taken up in right earnest.

The main work at the station consists of (a) breeding and selection work to evolve better varieties of fruits and vegetables with high yield, good quality, early and late maturity, resistance to insect pests and diseases etc.; (b) cultural and manurial trials to determine the best cultural methods and manurial practices for different horticultural crops; (c) production of reliable and true to type planting materials of fruits and vegetables, such as grafts, seeds and seedlings, and (d) advisory work regarding various aspects of fruit and vegetable culture in the State. Among fruits, mango, lichee, citrus fruits, guava, jackfruit, custard, apple, bael, banana, papaya and pineapple and among vegetables pumpkin, cucumber, lady's finger, amaranthus, cauliflower, tomato, brinjal, spinach, garden pea, etc. are the principal crops under study. A large number of grafts and seedlings of fruits and large quantity of seeds of vegetables are produced and distributed to the growers through the extension staff of the Directorate of Agriculture. These reliable and genuine materials are literary taken to the doors of growers in the remotest corner of the State at a very moderate price.

JUTE SEED MULTIPLICATION FARM, KRISHNANAGAR

Nuclear stocks of improved strains of jute seeds have been maintained by the Jute Agricultural Research Institute under the Indian Central Jute Committee. Large scale multiplication thereof in the jute growing States is imperative in the interest of rapid self-sufficiency in jute both in quality and quantity. Multiplication of jute seeds in the State Agricultural Farms in West Bengal having proved far too inadequate to cope with the demands of the agriculturists, a 250-acre Jute Seed Multiplication Farm has been established at Krishnanagar. The Government of India have granted an interest-free loan of Rs. 400,000/- towards non-recurring and recurring expenditure of the farm for the first few years. The farm is in a Khasmahal land adjoining the State Horticultural Research Station at Krishnanagar.

The land was taken over by the Directorate of Agriculture, West Bengal in May, 1951.

The work of reclamation started with the state-owned tractors right from the time the possession of the land was taken. At this stage an *ad-hoc* financial grant from the State Government was obtained pending official sanction to the Scheme. It was possible to put 60 acres under jute for seed multiplication in the 1951 Kharif season.

The reclamation work on the farm is now nearly complete and 162 acres have been put under cultivation during the current Kharif season (1953). Cattle-shed, godown, residential quarters for the officers and other necessary buildings have been constructed. The construction work on a 6" tubewell is under progress and a discharge of about 30,000 gallons water per hour is expected out of it. The roads are under construction and the layout of the farm will be completed during the current year. 1,000 trees were planted on the farm boundary and on road sides, during the Vanomahatsab this year.

The main work of the farm will undoubtedly be the production of jute seed of high yielding varieties, but advantage of crop rotation will be taken for production of seeds of recommended varieties of food crops such as paddy, wheat, pulses, oil seeds, etc. The work on the Mustard Seed Multiplication Scheme recently sanctioned by the Indian Central Oil-Seeds Committee will also be taken up on this Farm, the object of the Scheme being the multiplication of seed of high-yielding mustard varieties.

The following seeds of improved varieties were produced and distributed among the growers during the first two years, 1951-52 and 1952-53:

Jute	441 Mds.	37 Srs.
Paddy	383 "	16 "
Pulses	683 "	15 "
Mustard	85 "	5 "
Wheat	60 "	5 "
Inferior millets	33 "	0 "

Besides the above, 469 mds. 26 srs. of jute fibre was produced and sold out at market rates.

TRAINING CENTRE AT KISHNANAGAR FOR THE AGRICULTURAL EXTENSION STAFF

It was increasingly felt during recent years that a thorough training should be given to Union Agricultural Assistants, to equip them better for the rank of all round development of the rural areas of the country. With this object in view, a training centre for Union Assistants has been recently established at the State Agricultural Farm at Krishnanagar. Fifty trainees will be trained at a time and the course of training will be for a period of six months. Apart from agriculture, which is the major subject of study, the course includes co-operative movement, public health, social education etc. The State Agricultural Farm at Krishnanagar has an area of 300 acres including the State Horticultural Research Station and is equipped with tractors and mechanical agricultural implements suitable both for large and small scale agriculture. The area is all high land and is, therefore, suitable for growing various types of crops non-irrigated as well as irrigated. Irrigation water is available from the tanks, of which there are a few and two tube-wells, one 6″ and another 3″. The centre will shortly be equipped with its dairy and poultry units and a workshop. Apart from one whole time Instructor, lectures are also delivered by other specialists on agriculture at Krishnanagar and also from different expert sections at Calcutta. Help in this direction has also been received from other departments of the State Government which have made available the services of their officers. A class room, a hostel with a common room, dining hall and kitchen and quarters for the Instructor have been constructed for the centre.

In addition to their usual pay and allowance, each trainee has been allowed a stipend of Rs. 40/- per month for the period of training, so that he may not be financially embarrassed when living away from the family. The fact that a corporate and social life is essential for the trainees has not been lost sight of and they have been provided with games, both indoor and outdoor, newspapers and magazines. Provision has also been made for their visit to a number of important centres in the State dealing with the subjects taught.

One training centre can hardly be expected to train up all Union Agricultural Assistants, of which there are 2,386 in the State. The establishment of a number of similar centres in different parts of the State is, therefore under contemplation. The plans for starting one more training centre at Malda this year on the lines of that at Krishnanagar are already complete.

KULIA—Small village, situated in the Chakdah thana of the Ranaghat subdivision, about 3 miles north-east of the Kanchrapara Railway Station. A fair is held here annually on the 11th day of Paush: it is called the *Aparadh Bhanjan Mela*. There are various legends as to the origin of this fair: that which, perhaps, obtains the greatest credence is that the place was once visited by Chaitanya, who was well entertained there by one Debananda, after having been refused hospitality in the neighbouring village of Kanchrapara, and he was so pleased with the treatment which he received, that he sanctified the place and declared that all who worshipped there on the 11th day of Paush would be absolved of all their sins. There is a temple in the village, known as Debanandapat: it is of comparatively recent date and is said to have been built by Sri Kanai Lal Dhar of Calcutta. Adjoining the temple are some tombs, among which one is alleged to be that of Debananda.

MURAGACHHA—Village in the Nakasipara thana of the head quarters subdivision, about 12 miles north-west of Krishnanagar. It is now a station on the Ranaghat-Lalgola branch of the Eastern Bengal State Railway. The village has two temples, one dedicated to the god Siva, and the other to the goddess Sarvamangala; the latter is said to have been built in 1870 by Devi Das Mukhopadhyay, a salt Dewan of Hijli, who also established a High English School in the village. A fair is held in honour of goddess on the day of the full moon in Baisakh: it lasts for three days, and is attended by one to two thousand pilgrims. The importance of the village dates from the time of Dewan Devi Das, whose family, known as the Dewan family of Muragachha, is still one of the most respected in the district.

NADIA OR NABADWIP—The town from which the district derives its name. It lies in 23°24′ N. and 88°23′ E., on the west bank of the Bhagirathi, opposite the confluence of the Jalangi with that river: it covers an area of 4½ square miles, and has a population (1961) of 72,861, as compared with 13,334 in 1891 and 8,863 in 1872.

There are three different traditions as to the origin of the name Nabadwip: the first is that the town originally stood on an island, which was called Nabadwip (*i.e.*, new island), to distinguish it from Agradwip (former island) which lies about 15 miles up the Bhagirathi from Nabadwip; the second is that it was formerly the resort of a recluse who used to practice his religious rites at night surrounded by 9 lights, whence it came to be called 'Nava-dip' or 'nine lights', but this derivation, as will be observed, does not account for the letter 'w' in the last syllable; and the third is that it formed one of a group of nine islands (Navadwip) an account of which is given by Narahari Das in his 'Nabadwip Prikrama Paddhati'.

Nabadwip is a very ancient city, and is reputed to have been founded in 1063 A.D. by one of the Sen kings of Bengal, who is said to have been induced to transfer his capital there from

Gaur, on account of its superior sanctity owing to its position on the sacred Bhagirathi; and also probably because it was considered less liable to Mughal raids. On the east bank of the river, immediately opposite the present Nabadwip, is the village of Bamanpukur, in which are to be found a large mound known as 'Ballaldhigbi' said to be the remains of the King's palace, and a tank called 'Ballaldighi'. These names go to prove that Ballal Sen had some connection with the place, though it is not universally admitted that the actual capital was transferred there from Gaur. (In the Ain-i-Akbari it is noted that in the time of Lakshman "Nadia was the capital of Bengal, and abounded with wisdom.") It is clear, however, that it was the constant resort of the kings of Bengal until 1203 A.D., when it was captured by Muhammad Bakhtiar Khilji, and the foundation stone of the conquest of Bengal by the Muhammadans was laid.

The following account of the capture and sack of Nabadwip is taken from the Riazu-s-Salatin, as translated by Abdus Salam (Calcutta, 1904).

"That year Malik Bakhtiar, bringing to subjugation the Subah of Behar, engaged in introducing administrative arrangements, and the second year coming to the kingdom of Bengal he planted military outposts in every place, and set out for the town of Nadiah, which at that time was the capital of the Rajahs of Bengal. The Rajah of that place, whose name was Lakhmania, and who had reigned for eighty years over that kingdom, was at the time taking his food. Suddenly Muhammad Bakhtiar, with eighteen horsemen, made an onslaught, so that before the Rajah was aware, Bakhtiar burst inside the palace, and unsheathing from the scabbard his sword that lightened and thundered, engaged in fighting, and put the harvest of the life of many to his thundering and flashing sword. Rajah Lakhmania getting confounded by the tumult of this affair, left behind all his treasures and servants and soldiers, and slipped out bare-foot by a backdoor, and, embarking on a boat, fled towards Kamrup. Muhammad Bakhtiar, sweeping the town with the broom of devastation, completely demolished it, and making anew the city of Lakhnauti, which from ancient times was the seat of Government of Bengal, his own metropolis, he ruled over Bengal peacefully."

For many centuries Nabadwip has been famous for its sanctity and learning. From its earliest days the patronage of the Hindu kings and the sanctity of its site attracted, from far and near, erudite scholars, who taught Sanskrit philosophy to thousands of students. Of such were Halayudha Pasupati, Sulapani and Udayanacharya, who are believed to have flourished there during the reign of Lakshman Sen, and also Abdhihodha Yogi, a Pandit from the upper country, who is said to have been the first scholar to set up a school of logic in Nabadwip. The most celebrated of the native savants of the place were Basudev Sarbabhauma, who while a pupil of Pakshadhar Misra, the first logician of Mithila, is said to have learnt by heart the whole of the treatise on logic; and his distinguished pupils, Raghunath Siromani, the author of the Didhiti and the commentary on the Gautam Sutra; Raghunandan Smarta Bhattacharya, the most renowned Pandit of Smriti, whose school is followed even today throughout the whole of Bengal; Krishnananda Agambagis, whose work on Tantra philosophy is the standard book on the subject; and Gauranga, or Chaitanya, the great Vaishnava reformer of the 16th century. Chaitanya was the son of Jaganath Misra, and was born at Nabadwip in 1485 A.D. He was undoubtedly a man of great intellect, but the keynote of his philosophy was universal love, and he is still spoken of as the 'Apostle of Love'. He was the founder of the Vaishnava sect, and has still a very large following throughout Bengal.

The present Nabadwip still continues to be famous for its Sanskrit teaching. The indigenous Sanskrit schools known as *tols*, in which Smriti (Hindu social and religious law) and Nyaya (logic) are taught, from the principal feature of the town. A valuable report was submitted upon them by the late Professor E. B. Cowell in 1867. This report contains a full account of the schools, the manner of life of the pupils and the works studied and is reprinted elsewhere in this volume as an appendix. Cowell describes the *tol* as consisting generally of a mere collection of mud hovels round a quadrangle, in which the students live in the most primitive manner. Each student has his own hut with his brass waterpot and mat; few have any other furniture. A student generally remains at the *tol* for 8 or 10 years according as he is studying Smriti or Nyaya. No fees are charged, and, until comparatively recent years, the pandit even provided his pupils with food and clothing. He himself makes his living by the presents which his fame as a teacher ensures him at religious ceremonies.

The following extract is taken from Professor Cowell's report :

"I could not help looking at these unpretending lecture halls with a deep interest, as I thought of the pandits lecturing there to generation after generation of eager inquisitive minds. Seated on the floor with his 'corona' of listening pupils round him, the teacher expatiates on those refinements of infinitesimal logic which make a European's brain dizzy to think of, but whose labyrinth a trained Nadia student will thread with unfaltering precision. I noticed during my visit

middle-aged and even grey-haired men among the students of the celebrated *tols*."

Sir William Hunter remarks: "The sole end of the Nadia scholastic training is Vichara, *i.e.*, to win the victory at a festival by adroit arguments, which silence the opponent for the time being. According to the established rule in Hindu dialectics, the disputant first presents his opponent's views, and exhausts whatever can be adduced in their favour, and then proceeds to overthrow all that he has just brought forward, and to establish his own opinion. The pandits, therefore, come to a discussion with a store of plausible arguments on both sides, and love to oppose a popularly received opinion in order to win credit by successfully supporting an apparently hopeless cause. The very form of Hindu logic involves error, and it is so bound up with technical terms that it is apt to degenerate into a mere play of words. This tendency reaches its climax in the Nadia schools. Mr. Cowell in three of the *tols* listened to the students exercising themselves in such discussions. He noticed the intense eagerness of the disputants, as well as the earnest sympathy of the surrounding students and pandits. A successfull sophism was responded to by a smile of approval from all."

In 1829 Professor Wilson found between 500 and 600 pupils studying at the *tols*. In 1864 Cowell found 12 *tols* attended by about 150 pupils. In 1881 there were 20 *tols* with 100 pupils, in 1901, 40 with 274 pupils, and 1908, 30 with 250 pupils. Maharaja Krishna Chandra instituted a monthly allowance of Rs. 100 for the maintenance of the *tols*. This grant was confirmed by the Committee of Revenue in 1784, but was stopped in 1829 on the ground that no mention had been made of it in the correspondence relating to the Decennial Settlement. Formerly the almanacs of Nabadwip were of great repute, and their meteorological predictions were held to be infallible; but the Acharya (astrologer) class has become nearly extinct.

Sir William Hunter remarks: "The past of Nadia raises very high expectations, but its present state is disappointing. It is not an ancient city with venerable ruins, crowds of temples, a great population and time-honoured *tols* in every street, with numbers of learned pandits, such as one might expect from its antiquity. All that meets the eye is a small rural town with little clusters of habitations, and a community of Brahmans, busied with earning their bread, rather than in acquiring a profitless learning. The caprices and changes of the river have not left a trace of old Nadia. The people point to the middle of the stream as the spot where Chaitanya was born. The site of the ancient town is now partly *char* land, and partly forms the bed of the stream which passes to the north of the present town (adherents of Mayapur claim that place to have been the birthplace of Chaitanyadeva—A.M.). The Bhagirathi once held a westerly course, and old Nadia was on the same side with Krishnagar, but about the beginning of this (19th) century the stream changed and swept the ancient town away."

The town, being situated on the bank of the holy Bhagirathi, is frequented by pilgrims from all parts of Bengal, chiefly those of the Vaishnava sect, who bathe in the sacred waters, and at the same time pay their homage at the shrine of Chaitanya. The concourse of pilgrims is very large at the time of the full moon in the months of Baisakh, Kartik and Magh. In order to enable the Municipality to make better conservancy and sanitary arrangements for these large gatherings, the Pilgrims' Lodging-house Act IV (B.C.) of 1871 was extended to the town of Nadia by Government Notification dated 8th August 1891.

Nabadwip was constituted a municipality in the year 1869 with 12 Commissioners, of whom 8 were elected and the remainder nominated.

The principal industry of the place at present is the manufacture of brass utensils. It was, in former times, noted for its manufacture of conch-shell bracelets, and one of the streets is still known as Sankari Sarak. The East India Company once had a cotton spinning factory here, the site of which is pointed out by old inhabitants.

The present site of the town is not satisfactory: it lies below the level of the river when in flood, and is full of pits and hollows where water stagnates during the rainy season. At one time it was protected all round by embankments, but these have been suffered to fall into bad repair. The cost of restoring them satisfactorily was estimated at Rs. 10,000 and Sir John Woodburn, while Lieutenant-Governor of Bengal, offered a Government contribution of Rs. 5,000 provided that an equal amount were raised locally: advantage was not, however, taken of the offer, and nothing was done to restore the embankments till a later date. Under such circumstances it is remarkable that the health of the town does not compare more unfavourably than it does with that of other towns in the district.

That the climate of Nabadwip was at one time considered beneficial, or at any rate less unhealthy than that of Calcutta, is clear from the following extracts which have been taken from the "Diary and Consultations Book of the United Trade Council of Fort William in Bengal" :

"673. *The Governor goes for a change of air.*

January 3rd, 1713

The Governor having for Several Months been very much Indisposed and being advised by the Physitians to go up to Nuddea for change

of Air, as the only means left for the Recovery of his health—Agreed. That during his absence the Worshipful Robert Hedges Esq. act as Chief and Transact all affairs with the rest of the Council, and also take charge of the Cash—Ordered that the Doctor go with the Governor, and considering the troubles in this Country, that Captain Woodvill with 50 Soldiers go as a Guard."

"688. Return of the Governor.

February 17th

This day the Governor returned from Nuddea, where he has been some time for the Recovery of his health."

"691. The Governor has a relapse.

February 23rd

The Governor not being perfectly recovered of his Illness and beginning to relapse which the Doctors impute to difference between the air of this place and Nuddea, where he has been lately for the Recovery of his health, and therefore advise him to go up thither again, Agreed that Mr. Hedges act as Chief during his absence."

"Ordered that Thirty Soldiers do go up with the Governor as a Guard, also that Severall of the Company's Servants who are now indisposed go up with the Govr. for the Recovery of their Health."

The change does not appear to have afforded any permanent benefit to Mr. Russel, for his health became hopelessly impaired, and he was forced to leave India for good at the close of the year.

PLASSEY—Village in the headquarters Subdivision, situated in 23°47′ N. and 88°16′ E., on the east bank of the Bhagirathi, near the point at which that river first impinges upon the district. It is famous as the scene of Clive's victory over Sirajud-daula, Nawab of Bengal, on 23rd June 1757. After the capture of Calcutta by Sirajud-daula in June 1756, Clive was despatched with a force from Madras, and he recaptured Calcutta in January 1757. After prolonged negotiations he succeeded in gaining overMir Jafar, the Nawab's general, whom he promised to instal as Nawab in place of Sirajud-daula. In March Chandernagore was taken from the French, and on the 13th June a fresh advance was made; Katwa (on the west bank of the Bhagirathi in the Bardwan district) was captured on the 18th, and on the 22nd the troops marched to Plassey, where Sirajud-daula was encapmped with an army of 50,000 foot, 18,000 horse and 50 pieces of cannon, mostly 24 pounders and 32 pounders drawn by oxen. To oppose this army Clive had a force of 900 Europeans, of whom 100 were artillery men, and 50 sailors, 100 Topasses or Portuguese half-castes and 2,100 Sepoys; the artillery consisted of 8 sixpounders, and 2 howitzers. Clive encamped in a mangogrove, the greater part of which is believed to have since been cut away by the Bhagirathi, and the enemy were entrenched on the river bank to the north of him. At day-break on the 23rd the enemy advanced to the attack, enveloping Clive's right, Mir Jafar being on the extreme left of the line. Both sides maintained a vigorous cannonade until 2 o'clock, when Sirajud-daula returned to his entrenchments. At this Mir Jafar lingered behind on the left, and eventually joined the British. Clive advanced and cannonaded the Nawab's entranchment, and entered his camp at 5 o'clock after a slight resistence, Sirajud-daula having already fled to Murshidabad. The decisive victory was won with only a small loss, but it made the British masters of Bengal. In 1883 the Bengal Government erected on the spot a somewhat meagre monument to commomorate the battle: the inscription upon it is simple, but dignified, and consists of the one word "Plassey". This was later replaced by an obelisk. Up till 1905 the site of this famous battle was very inaccessible, being 34 miles from the nearest railway station, but in that year the Ranaghat-Lalgola branch of the Eastern Bengal State Railway was opened with a station only 2 miles south-east of the place, and a metalled road now runs from the station to the furnished Dak Bungalow. Cannon-balls have constantly been found by the cultivators while tilling the soil. The place is of no importance, except as being the site of the famous battle.

RANAGHAT SUBDIVISION—The southernmost subdivision of the district, lying between 22°53′ and 23°20′ N., and 88°20′ and 88°45′ E., with an area of 532 square miles. The subdivision is a deltaic tract, bounded on the west by the Hooghly, on the south by the Barasat subdivision of the 24-Parganas district, on the east by the Bangaon subdivision of the 24-Parganas district, and on the north by the Krishnagar subdivision. It contains much jungle and numerous marshes and backwaters, and the whole tract is malarious and unhealthy. The subdivision contains four towns, *viz.*, Ranaghat (population 35,266), Santipur (51,109), Chakdaha (35,019) and Birnagar (7,623) and six new ones: Taherpur, Kalyani, Gayespur Govt. Colony, Kataganj and Gokulpur Govt. Colony, Bagula and Phulia and 570 villages. For police purposes it is divided into five thanas, *viz.*, Ranaghat, Santipur, Chakdah, Haringhata and Hanskhali. The headquarters of the subdivision was originally at Santipur, but was transferred to Ranaghat in the year 1863.

RANAGHAT—Headquarters of the subdivision of the same name. It is situated in 23°11′ N. and 88°34′ E., on the Churni river: it covers an area of about 3 square miles, and in 1961 had a

population of 35,266. The town contains the usual Subdivisional Offices, Munsif's Court, Municipal Office, Sub-Jail and Hospital. It has been the headquarters of the subdivision since 1863, before which year the headquarters was at Santipur. It was constituted a municipality in 1864 with 14 commissioners, 5 of whom were appointed *ex-officio*, and the remaining 9 nominated by Government.

Ranaghat carries on a large river traffic, and is one of the principal seats of commerce in the district. It is an important railway junction, as here the Jessore and Khulna branch, and the Ranaghat-Lalgola branch meet the main line of the Eastern Railway. There is also a light railway connecting the town with Krishnagar *via* Santipur.

The Ranaghat Medical Mission was established here in 1893 by J. Monro, C.B.: the headquarters of this Mission has since then been moved to a site just outside the limits of the town.

Very little seems to be known of the early history of this place. It is said to have been originally called Ranighat after the Rani of the famous Krishna Chandra, Maharaja of Nadia. It is on record that dacoits swarmed here in 1809 when Mr. Tytler was Magistrate.

The town is the seat of the Pal Chaudhuri family of Ranaghat referred to by Bishop Heber in his journal. The family was founded by Krishna Chandra Panti and Sambhu Chandra Panti, two brothers who were originally petty traders in the place. It is said that their wealth originated in the fortunate purchase from Ganga Ram Das Mahanth, the founder of the Jugal Kishwar temple at Aranghata, of a large store of grain, which appeared to have deen hopelessly damaged by insects, and was to have been thrown away, when Krishna Chandra appeared on the scene and offered a small sum for it, which was accepted. When the grain came to be removed, it was found that only the outer layer had been damaged, and it was sold at an enormous profit. This occurred in 1780, and with the capital thus amassed, which was increased by judicious trading, the brothers became great merchants, and almost monopolized the trade in salt, which at that time was sold by auction by the Board of Revenue. The family were most munificent in charity and works of public utility, and it is said that the Marquis of Hastings offered Krishna Chandra the title of Raja when he visited Ranaghat in the course of a tour; but, being of a modest and retiring disposition, he declined the offer, preferring to retain merely the title of "Pal Chaudhuri," which had been conferred upon him by the Maharaja of Nadia, and has been borne by the family ever since. For the two succeeding generations the family were deeply involved in the famous Pal Chaudhuri suit in the Supreme Court, which lasted from 1821 to 1850, being carried four times in appeal to the Privy Council, and which cost them an enormous sum of money. Sri Gopal Pal Chaudhuri, the great-grandson of one of the founders, was a very publicspirited zamindar; he subscribed largely to many works of public utility, and founded the Ranaghat High English School which has since been mainly supported by his descendants. The family now own zamindaris in the districts of Nadia, Khulna and Jessore.

The Poultry Multiplication Centre at Ranaghat was established with the object of making readily available poultry of improved strains (*viz.* Rhode Island Reds and White Leghorns) and also Khaki Campbell ducks to the villagers for propagation of those strains in rural areas and also for grading up the indigenous stock.

The farm has a keeping capacity of 350 laying birds with their followers.

In course of the last 3 years the following quantities of poultry and eggs were supplied from this centre at concessional rates for the purpose mentioned above.

	1950-51	1951-52	1952-53
(1) Poultry	1,938	2,133	3,175
Eggs for hatching	6,509	3,958	1,894

In addition to the above the following amounts of eggs were sold for the table to the local people.

1950-51	9,408
1951-52	10,430
1952-53	7,284

SANTIPUR—A town in the Ranaghat subdivision, situated in 23°15′ N. and 88°27′ E., on the left bank of the Hooghly. The town covers an area of about 9½ square miles, and its population in 1961 was 51,190, as against 30,437 in 1891, and 28,635 in 1872. Though there has thus been a decline, it is still one of the most populous towns in the district. Santipur is about equidistant from Krishnagar and Ranaghat, and is connected with each of these towns by a good metalled road, and also a 2 feet 6 inches gauge light railway. The road between Krishnagar and Santipur is believed to have been originally constructed by Rudra Rai, the Maharaja of Nadia, who is reputed to have given its present name to the former of these two towns. Santipur is also connected with Calcutta by a steamer service on the Hooghly.

Very little information is forthcoming in connection with the ancient history of this town. It can be gathered, however, that Santipur was

in existence at the time of Raja Ganesh, who ruled Bengal in the 12th century. It is said that forts were at one time erected at Santipur by the Mughal Emperors. The names of Sutragarh, Saragarh and Topkhana, which are attached to certain portions of the town, support the popular view, but no trace of the alleged fortifications can now be found. In the latter part of the 15th century. Adwaitacharya, who was supposed to be an incarnation in one person of both Vishnu and Siva, flourished here: it is said that Chaitanya took his initiation from Adwaitacharya, who, afterwards, himself became a disciple of Chaitanya. Ever since then the place has been held sacred. In the time of Rudra Rai, Maharaja of Nadia, it was a populous town and a celebrated cloth-mart. In the old days of the East India Company it was the site of a Commercial Residency, and the centre of large Government Cloth factories. The Government purchases of Santipur muslin, which then had a European reputation, averaged over 12 lakhs during the first 28 years of the nineteenth century. None of these factories are still in existence, the last ruins having been pulled down and sold between 1870 and 1880; only the name of the suburb Kuthirpara remains to indicate that there were once rows of kuthis or factories in the neighbourhood. It is said that the Commercial Resident enjoyed an annual salary of over Rs. 42,000, and lived in a magnificent house with marble floors, built by himself at the cost of a lakh of rupees: the Marquis of Wellesley spent two days there in 1802: the ruins of the house were finally sold for Rs. 2,000.

Holwell was landed at Santipur as a prisoner on his way to Murshidabad, after having survived the misery of the Black Hole: he was marched up to the Zamindar of Santipur "in a scorching sun near noon for more than a mile and a half, his legs running in a stream of blood from the irritation of the irons". From thence he was sent in an open fishing boat to Murshidabad, exposed to a succession of heavy rain or intense sunshine".

It is stated that in the early part of the 19th century no place was so infested with dacoits as Santipur, until the appointment of a resident Deputy Magistrate, and the provision of swiftly sailing guard-boats which put a great check on river dacoity.

There are many mosques and temples in the town. The oldest mosque is in Topkhana; it was erected by one Yar Muhammad in the year 1115 Hijri, during the reign of the Emperor Aurangzib: it is now in a very dilapidated condition. Of the temples, the three most famous are that of Syamachand, built in 1726 at the reputed cost of two lakhs of rupees, by one Ram Gopal Khan Chaudhuri, whose family was one of the wealthiest in Santipur: that of Gokulchand, built about 1740; and that of Jaleswar, said to have been built by the mother of Maharaja Ram Krishna of Nadia about the beginning of the 18th century.

Santipur was constituted a Municipality in 1865, with 24 Commissioners (of whom 16 were elected and the remainder nominated), and an *ex-officio* Chairman in the person of the Subdivisional Officer of Ranaghat.

The manufactures of Santipur are in a decaying condition. The cloth industry has been practically killed by the competition of machine-made goods, and the weavers are no longer prosperous. The East India Company once had a sugar manufactory in the town, but this has met with the same fate as the cloth factories; however, there are still some native refineries in which date-palm molasses, imported from Bangaon, is refined. There is a certain amount of local trade in other articles.

The town is visited by a large number of pilgrims at the time of the full moon in the month of Kartik, when the Rash Jatra festival lasts for two days and ends with a procession in which the idols of the Gosains are carried about on elevated wooden platforms. Santipur is also a celebrated bathing place.

The town suffered severely in the earthquake of 1897; many of the largest buildings were destroyed, and the impoverished owners have been unable to restore them.

SIBNIBAS—A village on the bank of the river Churni, nearly due east of Krishnagar, in thana Krishnaganj of the Headquarters subdivision: the name of this village has been changed for the station Majhdia upon the main line of the Eastern Railway.

Sibnibas was established as a country seat in the first half of the 18th century by the great Maharaja of Nadia, Krishna Chandra. Two accounts are given of the reason why he selected the place. The first is that, while out hunting, he casually came upon it and was so struck with its beauty and pleasant situation on the banks of the Churni, that he built a palace there for his occasional residence. According to the second account the place was selected because it was surrounded on three sides by the Churni and thus afforded a comparatively safe and easily defended retreat from the incursions of the Mahrattas who were giving much trouble in those days. It is said that through the bounty of the Maharaja no less than 108 temples were constructed in the place. Sibnibas was deserted by Maharaja Shiv Chandra, son of Krishna Chandra, and now only five temples survive in a more or less dilapidated condition. Of these three

are of fair size, standing about 60 feet in height; two contain images of Siva, 9 feet and 7½ feet high, and the third contains an image of Ramchandra, about 4 feet high. A fair is held here on the Bhumi Ekadashi day, and is visited by about 15,000 persons. The village was purchased in 1860 by one Swarup Chandra Sarkar Chaudhuri, whose son Brindaban Sarkar Chaudhuri, is said to have done much to improve its material condition.

In 1824, Sibnibas was visited by Bishop Heber on his way by boat to Dacca and the following account is taken from his journal (London, 1828). The gentleman with whom he had an interview may have been a descendant of Krishna Chandra, but he was certainly not the then Maharaja of Nadia--

"We landed with the intention of walking to some pagodas whose high angular domes were seen above the trees of a thick wood, at some small distance, which wood, however, as we approached it, we found to be full of ruins, apparently of an interesting description....As we advanced along the shore, the appearance of the ruins in the jungle became more unequivocal, and two very fine intelligent looking boys, whom we met, told me, in answer to my enquiries that the place was really Sibnibashi, that it was very large and very old, and there were good paths through the ruins.... We found four pagodas, not large but of good architecture, and very picturesque....The first (temple) which we visited was evidently the most modern, being, as the officiating Brahmin told us, only fifty-seven years old. In England we should have thought it at least 200, but in this climate a building soon assumes, without constant care, all the venerable tokens of antiquity. It was very clean however, and of good architecture, a square tower, surmounted by a pyramidal roof, with a high cloister of pointed arches surrounding it externally to within ten feet of the springing of the vault. The cloister was also vaulted, so that, as the Brahmin made us observe with visible pride, the whole roof was "pucka" or brick, and "belathee" or foreign. A very handsome gothic arch with an arabesque border, opened on the south side, and showed within the statue of Rama, seated on a lotus, with a gilt but tarnished umbrella over his head, and his wife, the earth-born Seeta, beside him. From hence we went to two of the other temples, which were both octagonal, with domes not unlike those of glass-houses. They were both dedicated to Siva and contained nothing but the symbol of the Deity, of black marble....Meantime the priest of Rama, who had received his fee before, and was well satisfied, came up with several of the villagers to ask if I would see the Rajah's palace. On my assenting they led us to a really noble gothic gateway, overgrown with beautiful broad-leaved ivy, but in good preservation, and decidedly handsomer, though in pretty much the same style with the "Holy Gate" of the Kremlin in Moscow. Within this, which had apprently been the entrance into the city, extended a broken, but still stately, avenue of tall trees and on either side a wilderness of ruined buildings, overgrown with trees and brush-wood. I asked who had destroyed the place and was told Serajah Dowla, an answer which (as it was evidently a Hindoo ruin) fortunately suggested to me the name of the Raja Kissen Chand. On asking whether this had been his residence, one of the peasants answered in the affirmative, adding that the Raja's grand children yet lived hardby....Our guide meantime turned short to the right, and led us into what were evidently the ruins of a very extensive palace. Some parts of it reminded me of Conway Castel, and others of Bolton Abbey. It had towers like the former, though of less stately height, and had also long and striking cloisters of Gothic arches, but all overgrown with ivy and jungle, roofless and desolate. Here, however, in a court, whose gateway had still its old folding doors on their hinges, the two boys whom we had seen on the beach came forward to meet us, were announced to us as the great-grandsons of Raja Kissen Chand, and invited us very courteously in Persian to enter their father's dwelling. I looked round in exceeding surprise. There was no more appearance of inhabitation than in Conway. Two or three cows were grazing among the ruins, and one was looking out from the top of a dilapidated turret, whither she had climbed to browse on the ivy. The breech of a broken cannon, and a fragment of a multilated inscription lay on the grass, which was evidently only kept down by the grazing of cattle, and the jackals, whose yells began to be heard around us as the evening closed in, seemed the natural lords of the place. Of course I expressed no astonishment, but said how much respect I felt for their family, of whose ancient splendour I was well informed, and that I should be most happy to pay my compliments to the Raja, their father. They immediately led us up a short steep straight flight of steps in the thickness of the wall of one of the towers, precisely such as that of which we find the remains in one of the gateways of Rhuddlan Castle, assuring me that it was a very "good road" and at the door of a little vaulted and unfurnished room like that which is shown in Carnarvon Castle, as the queen's bed chamber, we were received by the Raja Omichand, a fat shortish man, of about 45, of rather fair complexion, but with no other clothes than his waist cloth and Brahminical string, and only distinguished from his vassals by having his forehead markedall over with alternate stripes of chalk, vermilion and gold leaf....I confess I was moved by the apparent poverty of the representative of a house once very powerful, and paid him more attention than I perhaps might have done had his drawing room presented a more princely style. He was exceedingly pleased by my calling

him "Maharaja", or Great King, as if he were still a sovereign like his ancestors. ....The news had probably spread through the village that a "Burra admee" (a great man) had come to see the Raja, with diverse account of our riches and splendour, and about one o'clock an alarm of thieves was given by my sirdar bearer, who happening to look out of one of the cabin windows, saw three black heads just above the water, cautiously approaching the sides of the vessel. His outcry of "Dacoit, Dacoit" alarmed us, but also alarmed them; they turned rapidly round, and in a moment were seen running up the river banks. Thus we had a specimen of both the good and evil of India".

SWARUPGANJ—A village on the south bank of Jalangi at its junction with the Bhagirathi. It was at one time an important mart, and centre of river trade, but with the opening of the railways it has lost its importance. It is a station for the collection of Nadia River tolls.

TAHERPUR—A settlement of Displaced population, about 2 miles west of Birnagar. The composition of the population is mainly middle class.

Appendix II

ANCIENT MONUMENTS AND FAIRS*

I. Ranaghat Subdivision

A—Chakdah Police Station

1. Kulia (J. L. 83). This is a famous site on which Chaitanyadeba pardoned the Pandit Debananda. The site at which the pardon was given is called the *Aparadhbhanjanpat*. This place has now a modern temple and is situated about 3 miles north-west of Kanchrapara railway station, adjacent to Kanchrapara Tuberculosis Hospital.

2. Ghoshpara (J. L. 63). Ghoshpara is about 5 miles north of Kanchrapara railway station, and is the greatest centre of the *Kartabhaja* sect. There are no ancient buildings except an old staircase leading down to Himsagar Dighi. A very large *mela* is held during the *Dol* ceremony in spring.

3. Jasra (J. L. 24). Alight at Chakdah railway station, 38 miles from Calcutta. Jasra is one mile west of the railway station, and contains the Sripat of the famous Vaishnava, Jagadish Pandit, and a temple called the Jagannathdeb temple. Jagadish Pandit consecrated the image of this temple.

4. Kanthalpuli (J. L. 22). About half a mile north-west of Chakdah railway station. This contains the Sripat and alter of Mahesh Pandit, one of the 12 Gopals of the Vaishnava sect. Mahesh Pandit was the brother of Jagadish Pandit. A large *mela* is held to commemorate the death of Mahesh Pandit on the 13th day of the dark moon period of the month of Agrahayana.

5. Palpara (J. L. 35). About 2 miles from Chakdah railway station. Contains an early brick temple of the *char-chala* hut type, more massive than is usual with this design. The temple was rescued from jungle and protected by the Archaeological Survey of India in 1920, but is again falling to ruin and has been occupied by a *sadhu* who has installed a painted clay image of Kali. Terracottas above the entrance depict the Battle of Lanka in lively 17th century style. Between Simurali and Chakdah there are large mounds and old tanks, which lead one to presume that excavation may yield excellent results.

B—Ranaghat Police Station

1. Haradham (Uttar Haradham, J. L. 128, and Dakshin Haradham, J. L. 127) and Anandadham (J. L. 129). Alight at Pairadanga railway station, about 42 miles from Calcutta. These two places are about 3 and 3½ miles north-west of the railway station along the Union Board Road. The villages contain ruins of the old residence of the Krishnagar Rajas. The palaces are nearly all in ruins. Only the temple of Chinmayee Kali is still frequented.

2. Debagram (J. L. 105). Alight at railway station Gangnapur on the Ranaghat-Bongaon Railway. Debagram is about 2½ miles north-east of Gangnapur on a District Board Road. There is a large mound in this village, popularly known as Deganr Dhibi. This mound is the ruins of an ancient fort supposed to be the remnants of the capital of a Kumbhakar king called Debapal or Depal, mentioned in Bharatchandra's *Annadamangal* as King Depala of Degan.

3. Birnagar (J. L. 19). Alight at railway station Birnagar, 51 miles from Calcutta. Birnagar is an ancient town, the old name being Ula.

There is a cluster of twelve temples in the Bengal hut style called the dwadoshmundir in association with a Kali temple. The finest temple in the village is the *jorbangla* temple of Krishna, built by the Mustafi family of Ula in 1694. The facade is decorated with terracotta plaques, now badly worn and damaged by lime wash. Nearby is a *chandimandapa* with extensive wood carving on the front pillars and interior roof supports, including many Puranic and secular figures. It originally had a sweeping thatched *bangla* roof, which has now been replaced by tin. There is another terracotta-decorated temple (of Vishnu) in Dakshinpara, but this is now in a ruinous overgrown condition.

In Palitpara (J. L. 25), about a mile north of Birnagar, two brothers, Kanailal and Nilmani Acharyya, invented the famous ornaments for images called *daker saj*.

C—Santipur Police Station

1. Fulia (J. L. 54). This contains the ancient alter of the famous Vaishnava, Jaban Haridas. Fulia is also the birth place of the great Bengali poet, Krittibas. The alter of Haridas contains some exquisite specimens of carved wooden images.

Prof. David J. McCutchion of Jadavpur University has kindly revised this account taken from A. Mitra's Glossary of Better known Ancient Monuments of Nadia.

2. Santipur town. 58 miles from Calcutta. This a very ancient town, more than 800 years old. It has a Sripat of the Vaishnavas. The town contains several temples, the largest of which is the Syamchand temple built in 1726 by Ramgopal Khan Chowdhuri and his three brothers of the weaver caste; it is a huge *at-chala* design, with little decoration beyond floral plasterwork and lotus medallions. The smaller *at-chala* temple of Gokul Chand is said to have been built in 1740 by Ghanasyam Goswami; it has a terracotta-decorated facade with some spirited hunting and processional scenes along the base. Earlier than either of these is the Jalesvara Siva temple, a *char-chala* design, said to have been built about the beginning of the 18th century by the mother of Maharaja Ramkrishna of Nadia; this has terracotta panels of curious and varied subject matter on both the east and south facades, the latter unfortunately somewhat obscured by a modern *natmandapa*. Besides these and other temples, there is a fairly ancient mosque called the Topkhana mosque.

3. Baganchra (J. L. 12). About 3 miles north-west of Santipur. Outside the village in an area overgrown by jungle is an old brick Siva temple, built by one Chand Rai in 1665; it is now a complete ruin encased in the roots of trees, between which the floral and geometrical terracotta decoration may still be seen; the date plaque has been removed to the Ashutosh Museum.

II Sadar Subdivision

A—Krishnaganj Police Station

1. Sibnivas (J. L. 37). Alight at Majdia railway station, 65 miles from Calcutta, and proceed along the Majadra-Krishnanagar Road; Sibnivas is about 2½ miles from Majdia railway station. The place was established by Maharaja Krishnachandra of Nadia, who is said to have built 108 temples, of which only three now remain in recognizable shape. The most imposing is that of Rajarajesvara Siva, a very tall octagonal temple with a pointed *chala* roof and slender minaret like projections at each of the corners: the exterior is plain but for brick panelling; it houses an enormous linga 8 feet high. Beside it is a square-based temple, almost equally tall, with a *char-chala* roof similarly pointed: it houses another large linga. Further to the East is the temple of Ram-Sita, a double-storeyed building with straight cornices, as plain as the other two; apart from the cult images, there is an old stone image of Vishnu in the porch. The Rajarajesvara temple was built in 1754, that of Ram-Sita in 1762; both have recently been renovated garish taste by a religious trust. See the description of Sibnivas by Bishop Heber, quoted in the Gazetteer section of this Handbook.

2. Matiari (J. L. 52). About 1½ miles north-east of Banpur railway station. Matiari was the original capital of the Nadia Rajas. Ruins of the ancient palace are still to be seen in the village. The grandson of the founder of the Nadia Raj family moved the capital from Matiari to Krishnagar. Matiari is famous for its brass and bellmetal industries and is a very ancient village.

B—Krishnagar Police Station

1. Krishnanagar. There is a noted temple of Anandamoyi Kali: the present structure does not appear to be very old, consisting of a lower flat-roofed chamber and verandah, surmounted by a *char-chala* upper storey; contains a fine large clay image of Kali with traditional flamboyant head-dress. The extensive buildings of the *rajbari* are of some interest, including a large *durga-dalan* with typical 19th century stucco decoration in a good state of preservation.

2. Subarnabehar (J. L. 54). About 3 miles south-west of Krishnanagar town is the ruin of an old temple, known as the Nrisinhadeba temple. The image of Nrisinhadeba, now housed in a recent temple, is supposed to be an ancient image of black alabaster, and is a fine example of carving. There are other extensive ruins in this village, covering about half an acre of land and 12 feet in height. This mound is supposed to be the ruins of an old Buddhist Vihara founded by the Pala Kings.

3. Dignagar (J. L. 83). The railway station of Dignagar is midway between Santipur and Krishnanagar, 6 miles from either place. The village contains a large tank excavated by Raja Raghabchandra, great-grandfather of Maharaja Krishnachandra, and grandson of Bhabananda Mazumdar, founder of the Nadia Raj. Near the tank within the village stands the temple of Raghabesvara Siva, consecrated in 1669. It is a *char-chala* design, richly decorated with terracottas on both east and south facades, including interesting social scenes along the base. Beside it stands another temple of the same type, now in a ruinous condition.

4. Amghata (J. L. 57). 5 miles west of Krishnanagar on the Krishnanagar-Swarupganj light railway, close to the railway station Amghata. The place contains the ruins of the family seat of the Rajas of Nadia, called Gangabas. The temple of Harihara, established in 1776, is a flat-roofed structure with twin domes.

C—Nabadwip Police Station

1. Ballaldighi, or Mayapur (J. L. 14). About 1½ miles north of Maheshganj railway station. It is now maintained that Mayapur is the

ancient Nabadwip and contains the site in which Chaitanyadeb was born. All buildings, however, are recent.

2. Bamanpukur (J. L. 9). About half a mile north of Mayapur. Contains the grave of Chand Kaji and large mounds called Ballaldhibi, supposed to be the ruins of King Ballal Sena's palace. Ballaldhibi is about 400 feet long and 25 to 30 feet high, and is now a protected monument.

3. Nabadwip. 41 miles from Bandel Junction on the Bandel-Barhwara line. Nabadwip is one of the most ancient places in the State, and is so celebrated as a centre of learning that it is not possible to mention any famous name without associating it with Nabadwip. Nabadwip is called the Brindaban of West Bengal. The most famous sites are the temple Poramatala, the temples of Burosib, Siddheswari Kali, Sonar Gouranga, Shyamsundar, etc. There are other famous temples, built comparatively recently.

D—Kaliganj Police Station

1. Debagram (J. L. 60). Alight at Debagram, 87 miles from Calcutta on the Calcutta-Bhagwangola line. A few ruins and high mounds can be seen in this village. Historians suppose that this was a cantonment of the Sena Kings.

2. Plassey (Palasi) (J. L. 4). Alight at Plassey railway station, 93 miles from Calcutta and proceed 3 miles north-west along the Krishnagar-Baharampur Road. There is a monument at Plassey, commemorating the battle of 1757.

Appendix III

TWO TRADITIONAL CRAFTS OF NADIA

I

Design Weaving of Santipur*

by

A. N. Mukherjee,

Deputy Director of Industries, (C.D.P.), W.B.

1. Of the 11,930 current looms of Ranaghat subdivision (Nadia), the Santipur Municipality along claims 5,000. About 3,000 looms of Santipur are (Fly shuttle) jacquard looms and the remaining ones are ordinary Fly shuttle looms. Whereas, tne jacquards are specialised in design *Sarees* the others still weave *Dure* (*Matha Saree*) and ordinary *Dhuti*.

2. The jacquard looms have only been in the area for about 35-40 years and it is reported that Late Bhupati Charan Pramanik introduced it. Design *Sarees* were restricted to about 2,000 looms 10 years back and 500 looms 25 years back.

3. Before jacquards, the weavers were used to reproduce designs in hand only (*Hate tola Buti*) in ordinary throw shuttle looms as embroidery work. That time, the weavers were themselves designers. But, now, the designs are on punched cards set on jacquards machine and, not necessarily, a weaver is a designer himself. The designs are being evolved as a separate job and the weavers mostly start with designs converted on punched cards by them. Of course, there are weavers now who are also designers themselves.

4. The design weavers of Santipur have their Units concentrated in Sahapara, Dalalpara, Kuthirpara, Sutragarh and Sarbanandapara. As far as it could be ascertained from local weavers, the following are and were the master-weavers:

1967

(1) Shri Sudhir Chandra Pramanik
(2) ,, Anil Kumar Dalal
(3) ,, Tapan Kumar Sen
(4) ,, Pravas Kumar Basak
(5) ,, Baidya Nath Sen
(6) ,, Gora Chandra Kastha
(7) ,, Madan Mohan Pramanik
(8) ,, Santosh Kumar Sen
(9) ,, Kala Chandra Ghosh
(10) ,, Kanai Pal

10 years back

(1) Shri Netai Chand Dhantari
(2) ,, Mritunjoy Kastha
(3) ,, Lalit Mohan Khan
(4) ,, Chinmoy Bidyanta
(5) ,, Panchu Gopal Saha
(6) ,, Rabindra Nath Saha
(7) ,, Gour Ch. Bange
(8) ,, Gobinda Ch. Pramanik
(9) ,, Sk. Nazurul Islam
(10) ,, Panchanan Mondal

25 years back

(1) Shri Bejoy Nath
(2) ,, Kartik Ch. Pramanik
(3) ,, Susil Kumar Sen
(4) ,, Ananda Gopal Pramanik
(5) ,, Bhadreswar Dalal
(6) Late Purna Chandra Pramanik
(7) ,, Jiban Krishna Dalal
(8) ,, Hazari Lal Pramanik
(9) ,, Bhupati Charan Pramanik
(10) ,, Panchu Gopal Sen

Most of the existing design-weavers belong to the age-group of 25-40. It is talked about that, the heavy jacquard looms can rather conveniently be operated by younger group.

5. The speciality of Santipur was in *Sarees*. The pre-jacquards designs had local names of: *Bhumri*, *Chandmala*, or *Tara*, *Benki*, *Rajmahal*, *Dorokha*, *Kalka*, *Aishn*, *Mandir*, *Taj*, *Dharma*, *Gachpar*, *Machpar*, *Khejarchari*, *Sarbasundari*, *Kharka Moti*, *Duria*, *Lataful*, *Pakhi*, *Parijat*, *Mahal*, *Daccaiful*, *Karnish*, *Tekha*, *Manus*, *Hati*, *Ghora*, etc. None of the above traditional designs are now reproduced, although, some of the designs like *Dhumri Benki*, *Rajmahal*, *Dorokha*, *Kalka*, *Kharika Moti*, could be and were reproduced in jacquards also. All these designs were woven on border (*Par*) and *Anchla*. The border designs were of 5"–6" width. The colour was deep black and red. Perhaps in

*On the basis of field Investigation by Shri R. P. Mitra, Handlom Development Officer, Santipur and constructive suggestions of Shri P. Das, Assistant Director of Industries (Designs)

the eighteenth century, pure silk yarn was used. The design (*Naksa*) was woven with *jaree* and silk.

6. The current speciality of Santipur is also in *Sarees* and reflected on the border and *Anchla*. As jacquards permit the reproduction of any kind of designs, the weavers adopt any *Naksa* having market demand, particularly in Calcutta. The border has now a shorter width of 1"—4" and the designs are reproduced with *jaree* and pure/art silk on dyed cotton yarn (of 100's-120's) of various lighter shades. The dye-stuff used was and still is vat in character. The jacquard machines are of 100-200 hooks. Incidentally the other important *Saree* areas in West Bengal are (i) Dhaniakhali, having specialised on Dobby. (ii) Fulia having specialised in Tangail type in jacquards, (iii) Samudragarh, having specialised as in Fulia and (iv) Katwa having specialised in Tangail type with plain border without jacquards.

7. Another distinctive feature of a Santipur *Saree* was and is its superb texture on fine cotton yarn which is the effect of almost equal number of ends and picks in an inch. Generally, *Saras* of 72 and 76 are used. The *Sara* or the reed was previously of *Sar* or bamboo, but, now, it is of steel.

8. It is reported that Late Girish Chandra Pal and Late Kishori Lal Pramanik were pioneers in the traditional line. It is further reported that Late Girish Pal could produce cloth known as *Kalabati* made of only *Jaree* without any yarn, costing Rs. 500/- in his time. Late Kishori Lal Pramanik was reputed for embroidery work on the border with muga silk. The weavers say that the clothes of the traditional artisans had good demand in Delhi, Kabul, Iran, Arabia, Turkey, Greece and Italy.

9. The sale price of a Santipur *Saree* is Rs. 15/- to 75/- at the present moment. The variation in the current price and the pre-jacquard price will be primarily due to the present use of cotton yarn and swifter productions due to jacquards.

10. The stages of production are: Sizing

(a) Soaking of Grey yarn ;
(b) *Mar Dewa*
(c) *Charkha Natai*
(d) Winding (*Nali Pakano*)
(e) Warping (*Tana*)
(f) Denting (*Sara Gantha*)
(g) Beaming (*Tana Penchano*)
(h) Drafting (*Bo tola*)
(i) Loom fitting (*Tant jora*)
(j) Weaving (*Bona*)

11. The improved equipment and accessories now in use are warping Drum, Steel Reed, C.V. Healds and Fly shuttle loom with jacquard machine. The jacquards control the extra warp for figuring only having no connection with ground work.

12. The length of a warp is 125 yards and the width is 48" to produce 24 pieces of *Sarees*. Weaving in this case will be complete in one and a half months time. Roughly, a weaver can turn out 15 pieces per month. Per loom, there is one full-time weaver and two helpers. Now-a days, there has been a demand for *Sarees* of 6 yds. length.

13. There are eleven Weavers' Cooperative Societies in the area. Of them, the following have been functioning quite satisfactorily :

(i) The Santipur Kuthirpara Weavers' Society.
(ii) The Santipur Industrial Cooperative Weavers' Society.
(iii) The Ranaghat Subdivisional Cooperative Weavers' Society.
(iv) The Santipur Tantu Cooperative Society.

The looms, yarn and dye-stuff are available from Calcutta and local markets. Sales are effected through private agencies, State Emporia and Apex Cooperative Society. The slack season is reported to be November-January.

14. Efforts of the State Government in the Cottage and Small Scale Industries Directorate to assist the industry have been intensified from 1965 when the office of one Handloom Development Officer was set up that time in Santipur with an adjunct of Industrial Centre for both Training and Servicing. Under the direct technical and administrative supervision of the Zonal Office located in Krishnanagar, that officer renders the following assistance to the Handloom Cooperative Societies :

(i) Working Capital Loan at the rate of Rs. 500/- per loom.
(ii) Share Capital Loan to the extent of 75% of share value.
(iii) Loan (25%) and Grant (25%) for improved appliances.
(iv) Rebate on Sales at the rate of 5% on retail sales value and 3% on wholesales.
(v) Marketing assistance through Government Sales Emporia at Calcutta and Small Industries Corporation.
(vi) Supply of designs obtained from Central Design Centre of the Cottage & Small Scale Industries Directorate, Weavers' Service Centre of All India Handloom Board and those reproduced in Industrial Centre itself.
(vii) Technical assistance in Units by 14 technical personnel in the Handloom Development Officer, Santipur.

II

Clay Modelling & Doll Making of Krishnagar*

by

S. Goswami,

Assistant Director of Industries (Handicrafts) West Bengal.

1. *Location*: The clay modelling and doll making of Krishnagar is localised at Ghurni by the side of Krishnanagar town. The centre is about one hundred kilometres from Calcutta and can be approached by Calcutta-Lalgola Broad-gauge Railway Line. Ghurni stands on the bank of the river Jalangi locally known as *Khorey*.

2. *Past Patronage*: The craft is reported to have received patronage from the Hindu rulers of Bengal, *viz.*, Raja Krishna Chandra of Krishnagar and the Maha Rajas of Lalgola, Nashipur and Cossimbazar.

3. *The Units*: The artisans have a tradition of eight generations. Their details are given below in respect of those primary Units having specialised in artistic items only.

Heads of the leading artisans' families in Ghurni	Age	Fathers' name	Names of the living master craftsmen	Pioneer master craftsmen
1	2	3	4	5
1 Sri Kartick Ch. Pal	50	Late Khitish Ch. Pal	1 Sri Kartick Ch. Pal	1 Late Mohan Pal (225 yrs. back)
2 ,, Bishnu Pada Pal	45	,, Ram Nrisingha Pal	2 ,, Mukti s/o. Sri Nirmal Pal	2 ,, Jadu Nath Pal (1821-1920)
3 ,, Luxmi Kanta Pal	40	,, Ram Nrisingha Pal	3 ,, Sambhu s/o. Sri Nirmal Pal	3 ,, Paran Ch. Pal (1828-1924)
4 ,, Nirmal Krishna Pal	56	,, Satish Ch. Pal	4 ,, Biren Pal	4 ,, Bakreswar Pal (1875-1924)
5 ,, Narendra Nath Pal	65	,, Bakreswar Pal	5 ,, Ganesh Pal	5 ,, G. Pal (1896-1952)
6 ,, Prakash Ch. Pal	45	,, Jiban Krishna Pal		
7 ,, Karuna Prasad Pal	42	,, Sashi Bhusan Pal		
8 ,, Biswanath Pal	35	,, Sashi Bhusan Pal		
9 ,, Ganesh Ch. Pal	40	Sri Narendra Nath Pal		
10 ,, Biren Pal	35	,, Narendra Nath Pal		

At the present moment, 175 potters are employed in Ghurni area, of whom, the ten organised Units have been mentioned in Col. 1 above. All the existing establishments are proprietory in character working independently, mostly with family labour, and, occasionally, with hired labour.

4. *Raw materials*: The clay from the banks of the river Jalangi constituted the basic raw material for the industry. Due to the erosion of the banks of the river, collection of clay from Jalangi has now been discontinued and, at present, necessary clay is obtained from the locality, mainly, through local agents experienced in the line. Semi-plastic, as well as sandy, are the two different varieties of clay used by the clay modellers of Krishnagar. Other raw materials used by the clay modellers include colours of different kinds *viz.*, Rajmahal white clay and raw colour soluble in water, wire, cloth and costumes, jute, nylon fibre etc. The types of colour used are stated below:

*1 Based on field investigation by Shri R. Bhattacharyya of 'Handicrafts Cell' Headquarters in December, 1967, who was assisted locally by Sri R. B. Bose, Manager, Government Toy Making and Artistic Pottery Centre, Sarvasree Kartik and Mukti Pal, Master Craftsmen and Shri A. Chakravarty, Extension Officer (Industries). 2. Primary Field Investigation Schedule and Editing Sri A. N. Mukherjee, Deputy Director of Industries (CDP), West Bengal.

(1) *Maja Khari* (white),

(2) Raw colour (soluble in water) (a) Yellow (b) Yellow ochre (*Bela mati*) (c) Vermillion red (d) Burnt turkey amber (e) Raw Sienna (*Pora mati*) (f) Burnt Siena (g) Crimson Lake *Khun* (*Kharapi or Mina*) (h) Ultra marine blue (i) Persian Blue (*Dela Nil*) (j) Deep Black (*Bhunsa Kali*) (k) Naples yellow (*Farsa*) (l) Emarald Green (m) Deep Green (n) *Bronze powder* (i) Gold, (ii) Silver, (iii) Fire, (iv) Green, (v) Copper, (vi) Violet.

5. *Investment*: It has been estimated that, a sum of rupees sixty thousand (approximately) has been invested in the industry at Krishnagar, of which, a sum of rupees forty thousand represent fixed assets and the working capital accounts for a sum of rupees twenty thousand only. As a recurring measure, many potters are used to take short-term loans from local money lenders.

6. *Tools & implements* : The potters of Krishnagar use very simple hand tools and implements, *viz.*, ordinary spade, buckets, baskets, water-containers, small wooden planks and hammers, knives, bamboo strips of 1/8"—1" width for scrapping and shaping (locally known as *Chiari*) and high quality brush of different sizes.

7. *Production*: The clay modellers of Krishnagar produce models and dolls of many different varieties, generally of a height between 3" to 2'. The items are:

(1) All kinds of Indian fruits, vegetables.
(2) Indian spices, *viz.*, cloves, cinnamon, cardamon, betelnut and its fine cuttings etc.
(3) Biscuits and groundnuts.
(4) Varieties of animal, birds, fishes (like lobstar) and insects (like lizard).
(5) Life sketches of village folk—*viz.*,—ploughmen, carpenter, Brahmin at worship, Baishnab, Santhal etc.
(6) Models with Indian & partly foreign motifs, *viz.*, Rajasthani and Hindusthani girl, Venus, Bathing girls, Nagas etc.
(7) Indian gods and goddesses.
(8) Relief work.

As in case of most cottage units, no manufacturing establishment of Krishnagar maintains any record of production and sale. It has been roughly estimated that, the manufacturing units of Krishnagar have produced clay models and dolls worth about Rs. 50,000/- during 1967.

8. *A class by itself, but subject to a gradual change*: The traditional clay dolls and toys of the country are not naturalistic. But the realistic clay dolls of Krishnagar is an exception to the traditional types and is a class by itself. Play of colour, the grace of line, the vivid details of realism out of keen observation and the inimitable style of perfection make the Krishnagar products objects of exquisite beauty and superb excellence. It is true that, all the craftsmen are not uniformly skilful. Many traditional designs are being transmitted from father to son and grandson. New designs are also continuously being evolved by master craftsmen. Changes in designs are also due to preference of selected customers and film. It is mentioned here that, the production of the traditional clay dolls of Krishnagar with anatomical details executed exclusively by hand process are gradually on the decrease, and, that, at present, Krishnagar mostly produce clay dolls of moulded varieties, which is somewhat different from the lines of the past.

9. *Manufacturing process*: (a) Krishnagar clay models and dolls pass through the following twelve successive stages before final production:

(1) Producement of local clay.
(2) Processing of clay: (a) Storing in reservoir for about a week; (b) Thorough mixing for fineness (*Chana+Pachana+Dalana*).
(3) Modelling.
(4) Making of moulds (*Chanch Dhala*).
(5) Production by use of moulds (*Chanche Dobana*).
(6) Finishing at initial stage (*Putul Sara*)
(7) Drying of the articles in normal atmospheres temperature.
(8) Finishing before firing (*Siris Kata o Jala Tuli Bulana*).
(9) Firing in kiln (*Puane Porano*).
(10) Finishing after firing (*Fata Sara o Siris Kata*).
(11) Application of colour and glaze and painting eyes etc.
(12) Decoration—(a) clothing, (b) Hair-setting, (c) fixing ornaments.

(b) No mould is, however, used for production of the reputed clay dolls of traditional varieties, such dolls being done exclusively by hand process.

10. *Cost of production, wages and Sales price* : From an analysis of the cost of production of some of the popular varieties of dolls, it will appear that, the cost of raw material varies from 10 per cent to 20 per cent, labour charges constitute as high as 50 per cent to 75 per cent and that the margin of the producers varies from 15 per cent to 20 per cent. In every Unit, piece-rate system of wage-payment

is in vogue, wages ranging from Rs. 50/- to 100/- per month per worker. Current sales prices are:

(i)	Cloves—	Rs. 0.03 paise per piece
(ii)	Human figures 6"	Rs. 3.00 ,,
		Rs. 5.00 ,,
(iii)	Human figures 12"	Rs. 18.00 ,,
(iv)	Relief work	Rs. 20.00 ,,
		Rs. 45.00 ,,

11. *Marketing*: Marketing of the Krishnagar models and dolls are effected through different ways/agencies as indicated below:

(a) Direct purchase by customers/tourists visiting Krishnagar.
(b) Procurement in lots by dealers and middlemen for sale through private emporia and normal trade channel.
(c) Push sale by the manufacturers in Calcutta market.
(d) Sale through *melas* (Like *Bardol* and *Rash-melas* of Krishnagar and *Rath-melas* of different places).

An analysis of marketing shows that, the moulded varieties of dolls and toys are more easily sold out because they are cheaper than the traditional varieties, although, the latter represent the character and tradition of Krishnagar at their very best. While the middle-class families have a preference for the images of Gods and Goddesses, the lovers of arts and crafts including the foreigners would like the models of village folk, local fruits, insects and fishes etc.

12. *Difficulties faced by potters*: The potters of Krishnagar have been facing a number of major difficulties like (i) High price of Rajmahal clay; (ii) the fragility of the goods; (iii) Packing problem; (iv) Inter-State Sales Tax/State Sales Tax causing problems. The artisans formed a Co-operative society; but, it is now defunct.

13. *Lines of Improvement*: (a) Sculpture-type realistic figures based on Indian motifs in addition to doll varieties as at present, may be introduced to meet modern demands of different countries. These figures would require firing at 1000°C instead of at current 500°-600°C. These figures will be (i) burnt, but not painted, to look like terracotta products; (ii) burnt and then hand-painted and (iii) burnt and then glazed to look like common-clay glazed products.

(b) A Common facility Service Centre may be usefull locally for regular supply of Rajmahal clay, firing facilities and packaging. The Cottage and Small Scale Industries Directorate has recently got a person specially trained in scientific packaging for the purpose.

(c) Sales Taxes may be withdrawn.

Appendix IV

A NOTE ON BENGAL VAISNAVISM

by

PROF. SANAT KUMAR BOSE

Introduction

Bengal Vaisnavism is that particular form of Bhakti cult which was enunciated by Krishna Chaitanya (in the early decades of the 16th century), elaborated later on, by the Bengali Goswamis of Vrindaban and propagated mainly in Bengal by the spiritual followers of Sri Chaitanya.

Importance of Nabadwip

As Sri Chaitanya himself was born and brought up at Nabadwip (also called Nadia), the latter became the focal point from which rays of light emanated towards various directions. Hence the importance of Nabadwip in the history of Bengal Vaisnavism.

Hindu Society in the immediate pre-Chaitanya era

Prior to Sri Chaitanya's birth, Nabadwip was the leading centre of learning in Bengal. Its fame had spread all over India and the names of at least three of its leading scholars, Smarta Raghunandan, Raghunath Siromoni and Krishnananda Agambagis were universally known. Backed with such mighty scholars with their respective followers and seats of learning (*tols*), Nabadwip guided the Bengali Hindu Society at large. But the problems of the Bengali Hindu Society during the period under discussion (*i.e.*, late 15th century) were too grave and complicated to be tackled by scholarship and ritualistic practices alone. It was groaning under oppression. There was sign of decadance all over the body polity. The Tols (schools) of Nabadwip were unable to check the decay which had set in.

Background of Bengal Vaisnavism

From the socio-cultural points of view, the two most important factors that brought about the decay were the impact of Moslem invasion from outside, and the dominance of Brahmanical priesthood with its moribund ritualistic views from inside. Seething with discontent and frustration, the Hindu Society was awaiting eagerly for the emergence of some great man who would be capable of breaking through these barriers and restore it to its proper footing. We see glimpses of this aspiration in the prayers and activities of two of the leading Vaisnav saints of the pre-Chaitanya era, Adwaita Acharjya and Haridas (commonly known as Javan Haridas). The former was a traditional Brahmin scholar of immense learning while the latter was a Moslem by birth who had given up his traditional religious views and accepted the Vaisnav faith and came down to Nabadwip to work unitedly with the former. Among the other notable Vaisnavs of the pre-Chaitanya era who had gathered together at Nabadwip at this period, and who had a common purpose in life, mention may be made of Sribas, Gadadhar, Murari, Mukunda, Sibananda etc. The leader of this group was Adwaita Acharjya. According to Vaisnav Tradition, it was due to their incessant and sincere invocations (specially that of Adwaita Acharjya and Haridas) that Sri Chaitanya was born (1486 A.D.) as an incarnation of the Lord Vishnu, to rescue the Hindu Society from disintegration. These men had to face tremendous ordeals which were in a way quite natural, because they wanted to give a new connotation to the meaning of life and society. They wanted to break through the stagnant tradition which was choking the flow of life-blood in the society. It is significant that the germs of that religious philosophy which was subsequently to be propounded and practised by Sri Chaitanya himself, are clearly discernible in the views and practices of these pioneers of the faith. It may therefore be said that the emergence of the leader was not a historical accident. It was rather a historical necessity.

But to say this is not to minimise the importance of Sri Chaitanya himself. That is, he did not merely repeat what his elder and would-be disciples hesitatingly uttered. Neither did the philosophy of Vaisnavism subsequently follow the beaten track traced by Adwaita Acharjya or the other Vaisnav leaders of the day. We shall have to come back to this point later on. Before proceeding further however, it would be necessary to give a short sketch of the biography of Sri Chaitanya.

A short biography of Sri Chaitanya

Sri Krishna Chaitanya, son of Jagannath

Misra and Sachi Devi, was born in Nabadwip, in the year 1486. He was the youngest living child of the family, all the other children except one brother (Visvarup), having predeceased. His only living brother Visvarup renunciated life and took to Sannyas when Sri Chaitanya (known in his early life by the name of Vissambhar) was only a child. Hence his parents became extra cautious about his future activities and tried to guide him so that he might not follow in the footsteps of his elder brother. Accordingly, he was married to a beautiful girl, Laxmi Devi and after her death, to Vishnupriya.

During his early school days, the boy showed exceptional sharpness and mental faculties and leading scholars of the day thought he would grow up to be a giant scholar if he could stick to his studies. He was an extremely handsome, haughty, self-confident young scholar who however did not make learning and scholarship, the sole purpose of his life. It is said that whatever else might have been noticed in his boyhood character, there was no sign of humility and Bhakti, at least in his external makeup. Adwaita who is said to have fallen in love with him even while he was a mere boy, used to lament over the fact that such a lovable and 'whole man' had no trace of Bhakti in him.

But a complete change came over him after he returned from Gaya (1509) where he had gone to perform the last rights of his deceased father. At Gaya, he had met Isvar Puri (a disciple of the famous Vaisnav saint Madhab Puri) who symbolised all that was best in the Vaisnav Bhakti cult. This contact brought about a transformation in the life of Sri Chaitanya and he at once adopted the Vaisnav faith, having become a disciple of Isvar Puri. He was no longer the conceited haughty scholar. Instead he had now become a full-fledged Vaisnav Bhakta, wholly devoted to ecstatic meditation. He gave up teaching and confined all his activities to Nam Samkirtan and meditation. The Vaisnavs of Nabadwip, specially Adwaita Acharjya did not fail to notice this change and they at once accepted him as their leader and master. It was from this period that the real Avatar in him started manifesting itself through diverse activities. He was acclaimed as such *i.e.*, Avatar) by all the Vaisnavs.

The Vaisnav movement was further strengthened during this period by the arrival of Nityananda at Nabadwip. Nityananda who is considered by the Vaisnavs to be the incarnation of Balaram, (Krishna's brother) was older than Sri Chaitanya by about ten years. He had left home and took to Sannyas at the early age of twelve years and after having travelled all over India, at last came to Nabadwip to meet Sri Chaitanya. He had already adopted Vaisnav cult having been initiated into this faith by the famous Madhav Puri. The two at once recognised each other and their role in the Vaisnav movement vis-a-vis each other.

Under the guidance of the three leaders, Sri Chaitanya, Nityananda and Adwaita, with Sri Chaitanya at the head, the movement began to break through all the barriers of the Hindu Society and the dreams of the pre-Chaitanya Bhaktas came to be true. Shortly afterwards, in order to further strengthen the movement, Sri Chaitanya went to Katwa (1510), to take the vow of Sannyas from the hermit Keshav Bharati, who gave him the significant name of Sri Krishna Chaitanya.

After this he remained at Nabadwip for a brief period and left for Puri (known in Vaisnav literature as Neelachal) where he remained till the end of his life (1534), with brief intervals during which he visited some parts of southern and northern India. He himself remained at Puri, completely absorbed in his devotional ecstasies, while the movement was left in the able hands of Nityananda and Adwaita Acharjya.

Apart from other activities with which the Vaisnav leaders were concerned, Sri Chaitanya took up the task of reviving the glories of Vrindaban and for this purpose, he selected six able and competent men and commissioned them for this work. These men, *viz.*, Rup, Sanatana, Jiva, Gopala Bhatta, Raghunath Bhatta, and Raghunath Das, who were known as six Goswamis of Vrindaban, left for the latter place where they spent their entire life, fulfilling their mission.

It is necessary to mention the names of those who were in most intimate contact with the leader during his stay at Puri. Among them, the most important were Rai Ramananda, Swarup Damodar, Haridas (whom he had brought with him from Nabadwip), and Vasudeva Sarvabhouma. The latter, a formidable scholar was converted to the Bhakti cult by the personal influence of Sri Chaitanya.

A few words must be told about the three of Sri Chaitanya's intimate disciples, Rup, Sanatana and Rai Ramananda. The two former were brothers and held very high (ministerial) positions in the administration of the Sultan of Bengal. They subsequently gave up all their wealth and worldly activities in order to devote themselves to the task assigned to them by Sri Chaitanya. Their task was two-fold; to revive and revitalise the glories of Vrindabana and to lay down the theoretical principles of the Vaisnav philosophy (Bengal School). Rup was mainly concerned with the Rasa and Lila Tatwa (principles), while Sanatana was busy with stating and expanding the philoso-

phical aspects of Vaisnavism as propounded by Sri Chaitanya.

Rai Ramananda, who was also a high government official, was rather 'discovered' by Sri Chaitanya during his sojourn in south India. The latter was so much impressed with his talks and views that he brought him to Puri. He was the most intimate associate of the leader (excepting probably Swarup Damodar) during the latter's stay at Puri. Historically speaking, it was perhaps Adwaita Acharjya and Rai Ramananda, who cast maximum influence over the activities of Sri Chaitanya—the former during the Nabadwip residence (Nabadwip Lila) and the latter during the Puri residence (Neelachal Lila) of the leader. It was Rai Ramananda who was the first to realise the double incarnation of Radha and Krishna in Sri Chaitanya and to hail him as such. The fundamental tenets of Bengal Vaisnavism, which were subsequently propounded by the Goswamis of Vrindavan, also emerged for the first time, in course of his discussions with the leader.

Vaisnav views about Sri Chaitanya

A few lines may be written on the Vaisnavs' estimate of Sri Chaitanya. We have seen that the pre-Chaitanya Vaisnav leaders (specially Adwaita Acharjya) passionately prayed so that the Lord Krishna might come down to this earth with a positive purpose, *viz.*, to save the Hindu Society and to preach the cult of Bhakti. And Sri Chaitanya was born as an Avatar of Visnu (or Krishna) to fulfill those tasks. They subsequently even took up the view that Sri Chaitanya was not merely an Avatar but Krishna himself. It was from this view that the cult of Chaitanya worship arose after the latter's demise. During this phase of his activities it seems that Sri Chaitanya himself behaved likewise. But a distinct change came over the leader during his stay at Puri and specially after his meeting with Rai Ramananda. From this time onwards, he led a completely different life. He was constantly in a state of ecstatic frenzy (divine madness), seeking for a union with the Lord. In other words, he now considered himself to be an incarnation of Radha, eternally craving for her Lord. To his intimate associates of this period, however, he was considered to be the incarnation of both Radha and Krishna in their eternal cosmic union. The philosophy of Bengal Vaisnavism which was mainly based on the theoretical teachings of the Goswamis of Vrindaban, subsequently adopted the latter view. In other words, they held that Sri Chaitanya was the incarnation of Krishna "diversified by the brightness of the state of Radha".

Fundamental teachings of Bengal Vaisnavism

The fundamental tenets of Bengal Vaisnavism are based on the spiritual philosophy of this school. The theoretical principles and concepts of this philosophy are too abstract and technical to be condensed in this short essay. Only a few salient points may be touched here.

The ultimate object of this philosophy is to realise the eternal Lila (motiveless sport) of the Lord (Bhagavat) with his Associates (Parikars) *i. e*, the infinite, motiveless sport of the Saktimat with his own Saktis and the relationship between these Saktis and their possessor is designated by the principle of Acintya-Bhedabheda. The highest manifestation of the essence of the Lord, *i. e.*, of his Svarup, takes place when this Lila proceeds on the basis of what is called the Madhura Bhava. Of all the Associates (or Bhaktas) of the Lord, Radha alone is capable of displaying this Madhura Bhava in its highest and purest form. For the realisation of this Bhava or Mood, complete surrender, devotion and love to Lord Krishna (the manifestation of the Bhagavat in its fullest form) are essential. The Vaisnav Bhakta seeks to attain these qualities and hence he aims at following in the footsteps of Sri Chaitanya, his teacher and master.

But it is not given to all to follow these abstract concepts of Vaisnav philosophy and to implement them through such a course of rigorous practices. For the common man, only some fundamental 'working principles' are necessary. These consist of kindness in words and deeds to all, irrespective of caste or creed, and complete surrender to Lord Krishna through love and bhakti. By themselves, these tenets were of course not new, so far at least as Indian religious practices are concerned. But the Bengal school reasserted them with a spirit that was certainly unique. By his own practices, Sri Chaitanya seemed to have given a new connotation to these doctrines, and brought them so close to the soil that they no longer seemed merely unrealisable theoretica ideals. Even the common people could grasp the central idea behind these principles. Hence his preachings created a lasting influence in Bengal and its neighbourhood.

Its impact on the cultural life

Its impact on the cultural life of Bengal was phenomenal. With a view to develop the practice of community prayer, by means of community-singing, a new type of music was created, known as Kirtan. In course of its development, Kirtan has branched out in various directions, each of which is an essential element of Bengali culture. Simultaneously developed the Bengali literature, centering round what is known as Vaisnav Pada-

valis, and Vaisnav biographical literature. Bengali language received a tremendous spurt, thanks to the efforts of the Vaisnav poets. In this connection mention must be made of the two standard biographies of Sri Chaitanya, *viz.*, Chaitanya Bhagvat by Vrindaban Dasa and Chaitanya Charitamrita by Krishnadasa Kaviraj. In short, the impact of Vaisnavism on the cultural field of Bengal was too great to be condensed in a short essay.

PART II

A. CENSUS TABLES AND B. OFFICIAL STATISTICS

A. CENSUS TABLES

Explanatory Notes

This part contains 44 tables presenting the 1961 Census data for the district. Most of the tables present materials for each police station and some tables present data for each town. The figures for the district as a whole have been given first followed by the figures for a subdivision and the police stations under a subdivision. The police stations in a subdivision have been arranged according to the location code number assigned to a police station for the purpose of the 1961 Census.

The tables presented in this part do not however cover the whole range of Census statistics pertaining to the district. The tables on migration and certain other topics have not been included in this volume for want of space. Those will be found in the West Bengal Census Table Volumes.

The following paragraphs will give a brief account of the tables included in this volume. A detailed note on each of the tables has been given in respective census publications containing 1961 Census Tables. Definitions adopted for certain terms often used in census parlance have been given in Appendix I to this note.

A—Series

General Population Tables

There are, in all, four General Population Tables and three Appendices in this series. But only two tables *i.e.*, A-I and A-III have been selected for presentation in the District Census Handbook.

Table A-I

This table presents area, density, number of villages inhabited and uninhabited separately, number of towns, occupied residential house and total population with sex break-up. These data have been shown down to police station and each town separately under each police station having such town.

The Director of Land Records and Surveys, West Bengal was unable to furnish the revised area figures of the territorial units for the 1961 Census. In absence of the figures furnished the State Survey Department, area figures for different territorial units had to be computed for the purpose of Census from the various available sources. Area figures mostly were taken from the last published Jurisdiction List for the *Mauzas*.

The area of a town administered by the Municipal Commissioners was obtained from the civic authority concerned. For non-municipal towns, the area figures were obtained by adding up the area figures of the constituent *Mauzas*. The density figures in the Table A-I have been calculated on the computed—area figures.

Occupied Residential House meant the occupied Census-house. All Census-houses used wholly or partly as dwellings including a parlour or siting room, a kitchen, which were located in structures auxiliary to the main house were counted as occupied Census-houses, but cowsheds, grain-gollas etc., though auxiliary to the main house, were excluded.

Table A-III

This table gives an account of the distribution of inhabited villages for the district and each police station in accordance with the size of population which has been broadly classified by seven groups *i.e.*, less than 200, 200-499, 500-999, 1,000-1,999, 2,000-4,999, 5,000-9,999 and 10,000 and above.

B—Series

(i) General Economic Tables

The B-Series tables show the distribution of population by economic activity co-related with sex, age and educational level. The classification by economic activity has been made first by workers and non-workers and then the workers have been further classified into nine broad Industrial Categories.

In the 1941 and earlier Censuses, religion was adopted as the basis on which primary sorting and tabulations were done. The population classified by religion and sex, thus obtained, was given in the village statistics. In the 1951 Census Economic Classification substituted the classification based on religion. For this purpose population was divided into eight Livelihood Classes and in each livelihood class the self-supporting persons and their dependents were included. At the 1961 Census the concept of dependency was abandoned for Economic Classification of population and the concept of work was adopted.

The workers in the nine Industrial Categories shown in the Primary Census Abstract conform to the industry divisions as given in the Standard Industrial Classification as follows :

Category	Industry Division
I Cultivator II Agricultural Labourer	Minor Groups 000,001,002, 003 and 004 from Division 0
III In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting, Plantations, Orchards and allied activities	Division 0 except Minor Groups 000 to 004 and Division 1 (unless carried on in household level)
IV At Household Industry	Division 0 except Minor Groups 000 to 004, Divisions 1, 2 and 3 (it carried on in household level)
V In Manufacturing other than Household Industry	Division 2 and 3 (unless carried on in household level)
VI In Construction	Division 4
VII In Trade & Commerce	Division 6
VIII In Transport, Storage and Communications	Division 7
IX In Other Services	Divisions 5, 8 and 9

Definitions of Workers and Non-workers have been given in Appendix I.

Tables B-I and B-II

Table B-I is the basic economic table of 1961 Census. It shows the distribution of persons into nine broad Industrial Categories of workers and non-workers, with sex break-up under each category. This table also shows the distribution of the population into four broad age-groups under each category. The data have been presented for the district and each police station with rural-urban break-up. Table B-II which shows similar figures for the towns has been combined with Table B-I and entries for each town have been shown under the police station where it is situated.

Table B-III

This table has been prepared in two parts *i.e.*, B-III Part A and B-III Part B, of which the former relates to urban areas and the latter to rural areas. In both the parts each of the nine categories of workers and non-workers have been cross-tabulated by literacy and educational levels with sex break-up. The figures have been presented down to the police station and town.

Table B-IV

This table shows the distribution of workers engaged in household industry and non-household industry, trade, business, profession or service by sex, industrial divisions, major groups (Appendix II) and by status of employment *i.e.*, "Employer", "Employee", "Single Worker" and "Family Worker" (Appendix I). In the case of workers engaged in household industry the status of their employment has been classified into two *i.e.*, "Employee" and "Others".

The figures have been presented for the working population except cultivators and agricultural labourers of rural and urban areas separately down to police station.

Table B-V

This table gives the Occupational Classification (Appendix IV to this note) of persons who are working in non-agricultural sector. In this table data have been shown for rural and urban working population engaged in non-agricultural sector separately with sex break-up, by occupational group. The figures have been presented down to police station.

Table B-VI

This table presents the distribution of workers except those engaged in agricultural sector into occupational division and further they have been classified by four broad age-groups and age not stated, and by educational levels. This table shows the figures of urban areas only for the district as a whole and each of the towns having population of 50,000 and above in the district.

Table B-VII Part A

This table presents workers engaged as cultivators, agricultural labourers and at household industry classified by the nature of their secondary work as cultivators, agricultural labourers and at household industry by sex. The figures have been shown for rural and urban working population separately down to police station. Figures have been presented by major groups of industries in the case of the district and in the case of police stations figures have been shown only against the divisions of the Standard Industrial Classification.

Table B-VII Part B

This table furnishes the distribution of workers engaged principally in non-agricultural and non-household industry in accordance with their secondary work at household industry only. These workers have further been classified by sex, industrial divisions and major groups. These figures have been presented down to police station.

Table B-VIII Part A

This table accounts for the distribution of unemployed persons of age 15 and above who are seeking employment for the first time and who were employed before but now out of employment by broad age-groups. They have further been classified by sex and educational levels. This part relates to only the urban population and has been shown for the total urban population of the district as a whole and each of the towns having population of 50,000 and above in the district.

Table B-VIII Part B

This part of the table contains the same material as that contained in Part A. The difference is that this part shows the figures for the rural population only down to police station. Further classification of the educational levels beyond matriculation has not been shown for the rural unemployed persons and the classification by age-groups has also not been done.

Table B-IX

This table shows the distribution of all the non-working population by broad age-groups as in Table B-I. They have further been classified by sex and eight different types of activity of non-workers (for definition of different types of activity see the Appendix 1). The figures have separately been shown for rural and urban population and down to police station.

(ii) Household Economic Tables

Tables B-X to B-XVII account for the economic activity of a household as unit. The related figures have been compiled and tabulated from the data extracted from the entires of the Household Schedules on the basis of 20 per-cent Sample. These tables have been prepared in the Mechanical Tabulation Unit of the office of the Registrar General of India, New Delhi. The figures of different tables relate to the number of household engaged in cultivation or household industry or both, size of land or interest in land cultivated and/or the household industry conducted by the household and the number of family workers and/or hired workers engaged in either of the two activities separately or together.

C—Series

Social and Cultural Tables

Table C-I

This table gives the composition of the members in a household. Sample Households have been classified by size, composition by family and non-family members, and by economic activity. The households engaged in cultivation have been further classified by size of land holding. This table is of sociological interest indicating, as it does, the strength of the joint family system. The material of this table has been collected from the Household Schedules on the basis of 20 per cent Sample and the table has been prepared in the Mechanical Tabulation Unit of the office of the Registrar General of India, New Delhi. The figures have been presented for total, rural and urban households for the district only.

Table C-II

This is a very important demographic table. This table gives an account of distribution of rural and urban population separately by sex, age-groups and marital status. The entire population in 0-9 years age-group has been treated as never married and as such no other classifications have been shown against them. This table will give the readers an idea about the trend of variations in the proportions in the various marital status conditions over the last ten years. The figures have been presented down to police station.

Table C-III Part A

This part of the Table C-III relates to the total population of both the rural and urban areas. This table shows the distribution of the population by sex, age-groups and educational levels. The figures have been presented down to district only.

Tables C-III Part B and Part C

These two parts contain the same data as contained in Part A. Only difference is this that Part B deals with the urban population, while Part C deals with rural population. Again in regard to educational levels more detailed educational classifications have been adopted in the case of urban area than those in rural area. In Part B figures have been presented for the total urban population of the district as a whole and each of the towns having population of 50,000 and above in the district. Part C represents the population down to police station.

Table C-V

This table presents the distribution of population by sex and mother-tongues. There are as many as 55 mother-tongues spoken in this district. The figures have been shown for rural and urban areas separately down to police station.

Table C-VII

This table shows the distribution of population for rural and urban areas separately by sex and religions. The population has been classified into 6 main religions arranged alphabetically and the population belonging to other religions have been shown together under "Other Religions". There is another classification which describes "Religion not stated". The figures have been presented down to police station.

Table C-VIII Part A

This table presents the distribution of the scheduled caste population by sex, industrial categories of workers and non-workers and by

literacy. The figures for the rural and urban scheduled caste population have been shown separately down to police station. This Table is considered important from the view point of the classification of scheduled caste population into various economic activities.

Table C-VIII Part B

This table contains the same distribution and presentation of data as in C-VIII Part A. This part relates to only scheduled tribes.

SCT—Series

Special Tables for Scheduled Castes and Tribes

Table SCT-I Part A

This table gives an account of the distribution of the scheduled caste population by sex and industrial categories of workers and non-workers. The entire scheduled caste population belong to as many as 46 castes arranged alphabetically. Persons who returned themselves as belonging to scheduled castes without specifying the names of the castes have been shown under "Unclassified." There is another interesting classification of special occupations *i.e.*, "Tanning and currying of hides and skins" and "Scavenging". The figures have been presented for rural and urban areas separately down to police station.

Table SCT-I Part B

This table contains the same distribution and presentation as in Part A. This table relates to scheduled tribes which are as many as 12 in numbers in this district and arranged alphabetically. There is no column for the special occupations in this part.

Both these parts are interesting as they give detailed information about individual castes and tribes.

Tables SCT-III Part A(i) to Part B(ii)

These tables show the distribution o the scheduled caste or scheduled tribe population by name of caste or tribe, sex and educational levels for rural and urban areas separately down to district only.

Tables SCT-V Part A and Part B

These tables show the distribution of the households belonging to scheduled castes and tribes engaged in cultivation showing their interest in land and size of land. The figures have been collected from the household schedule on the basis of 20 per cent Sample. These tables have also been prepared in the Mechanical Tabulation Unit of the office of the Registrar General of India, New Delhi. The figures have been presented for rural areas only for the district level. Part A of the table relates to the scheduled castes and Part B to the scheduled tribes.

Table SC-I

This table shows the distribution of the scheduled caste population by sex, by 3 main types of activities, non-working and educational levels. Other types of activity have been clubbed together and shown under "Others". The figures have been presented for rural and urban areas separately only for the district.

Table ST-I

This table gives an account of the distribution of the scheduled tribe population by name of tribe, mother-tongue, bilingualism and by sex. The figures have been presented only for the district.

Table ST-II

This table corresponds to SC-I in respect of the manner of distribution and presentation except in that distribution by educational levels has not been shown. It relates to scheduled tribes.

Industrial Establishments

This table accounts for the distribution of different industrial establishments returned in the Housing Census of October, 1960 as carried on in Census house(s) by villages and towns under each police station separately. The nature of industry has been indicated by the minor groups of the Standard Industrial Classification (Appendix II). Number of such industrial establishments has been put within brackets against each minor group. The data have been collected from the Houselists prepared during the house-numbering operation.

APPENDIX I

Definitions

Census House :

A census house is a structure or part of a structure inhabited or vacant, or a dwelling, a shop, a shop-*cum*-dwelling or a place of business workshop school, etc., with a separate entrance.

If a building has a number of flats or blocks which have separate entrances of their own and are independent of each other giving on the road or a common staircase or a common courtyard leading to a main gate, they will be considered as separate census houses. If within an enclosed or open compound there are separate buildings then each such building will also be a separate census house. If *all the structures within an enclosed compound are together* treated as one building then each structure with a separate entrance should be treated as a separate census house.

Census Household :

A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so.

Literacy :

A person who can neither read nor write or can merely read but cannot write in any language was treated as illiterate. A literate is a person who can both read and write with understanding. The test for reading is ability to read any simple letter either in print or in manuscript with felicity. The test for writing is ability to write a simple letter.

If the person can both read and write and has also passed a written examination or examinations as proof of an educational standard attained the highest examination passed to denote the educational level attained by him was recorded.

Mother-tongue :

Mother-tongue is language spoken in childhood by the person's mother to the person or mainly spoken in the household. If the mother died in infancy the language mostly spoken in the person's home in childhood was taken as mother-tongue. In the case of infants and deaf mutes the language usually spoken by the mother was written.

Worker :

The basis of work will be satisfied in the case of seasonal work like cultivation, livestock, dairying, household industry, etc., if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce the basis of work will be satisfied if the person was employed during any of the fifteen days preceding the day on which the household was visited for enumerations. Persons temporarily incapacitated from work at the time of Census enumeration due to illness or other causes are also treated as Workers. An under-trial prisoner in prison during the Census enumeration is also treated as worker if he did some productive work before he was apprehended. Convicts in a prison or long term inmates of hospitals or mental institutoins, are not however treated as Workers. Work includes not only actual work but effective supervision and direction of work. Persons under training as apprentices with or without stipend or wages will be regarded as working. An adult woman who is engaged in household duties but doing no other productive work to augment the family's resources should not be considered as working. Persons like beggars, pensioners, agricultural or non-agricultural, royalty, rent or dividend receivers, who may be earning an income but who are not participating in any productive work should not be treated as working. A public or social service worker who is actively engaged in public service activity or a political worker who is also actively engaged in furthering the political activity of his party will be regarded as a worker.

Status of Employment :

(i) *An Employer is a person who has to employ other* persons in order to perform the work. That is to say, such a person is not only responsible for his own personal work but also for giving work to others in the business. But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others, is not an employer, even if he has the power to employ another person in his office on behalf of his own employer or employers.

(ii) An *Employee* is a person who usually works under some other person for salary or wages in cash or kind. There may be persons who are employed as managers, superintendents, agents, etc., and in that capacity employ or control other workers on behalf of their own employers. Such persons are only employees, as explained above, and should not be regarded as employers.

(iii) A *Single Worker* is a person who works by himself *but not as Head of household in a Household Industry.* He is not employed by any one else and in his turn does not employ anybody else not even members of his house hold except casually. This definition of a *Single Worker* will include persons who works in joint partnership with one or several persons hiring no employees, and also a member of a producers' co-operative. Each one of the partners or members of such producers' Co-operatves should be recorded as 'Single Worker'.

(iv) A *Family Worker* is a member who works, without receiving wages in cash or kind, in an industry, business, or trade conducted mainly by members of the family and ordinarily does at least one hour of work everyday during the working season. Such an industry should be on a scale larger than what has been covered in 'Household Industry'. whether run at home or away from home in town or village and even away from village in rural area and should ordinarily be in the nature of a recognised partnership, joint stock company or registered factory. For the purpose of this definition members of a family may be drawn from beyond the limits of the household by ties of blood or marriage. The family worker may not be entitled to a share of the profits in the work of the business carried on either by the person or head of the household or other relative.

Members of the household who help solely in household duties should not be treated as family workers.

Household Industry :

A Household Industry is defined as an industry conducted by the Head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be run on the scale of a registered factory. Thus the main criterion for a Household Industry is the participation of one or more members of a household in rural areas. In the urban areas the industry should be confined to the house.

A Household Industry should relate to production, processing, servicing, reparing or making and selling of goods. It does not include professions such as pleader or doctor or barber or waterman or astrologer.

Non-workers :

All persons who are not workers are non-workers. They should fall under any one of the following categories :

1. Full time student or child attending school who does no other works.
2. A person engaged in unpaid home duties (like housewife or other adult female).
3. Any dependent, including an infant or child not attending school or a person permanently disabled from work because of illness or old age.
4. A retired person who is not employed again, rentier, person living on agricultural or non-agricultural royalty, rent or dividend or any other persons of independent means for securing which he does not have to work and who does no other work.
5. Beggars, vagrants or independent women without indication of source of income and others of unspecified source of existence.
6. A convict in jail or an inmate of a penal, mental or *charitable institution.*
7. A person who has not been employed before but is seeking employment for the first time.
8. A person employed before but now out of employment and seeking employment.

APPENDIX II

STANDARD INDUSTRIAL CLASSIFICATION

Major Group (Code)	Description	Minor Group (Code)
	Division 0—Agriculture, Livestock, Forestry, Fishing and Hunting	
00	*Field Produce and Plantation Crops*	
	Production of cereal crops (including Bengal gram) such as rice, wheat, jowar, bajra, maize	000
	Production of pulses, such as arhar, moong, masur, urd, khesari, other gram	001
	Production of raw jute and kindred fibre crops	002
	Production of raw cotton and kindred fibre crops	003
	Production of oilseeds, sugarcane and other cash crops	004
	Production of other crops (including vegetables) not covered above	005
	Production of fruits and nuts in plantation, vines and orchards	006
	Production of wood, bamboo, cane reeds, thatching grass, etc.	007
	Production of juice by tapping palms	008
	Production of other agricultural produce (including fruits and nuts not covered by code No. 006 and flowers) not covered above	009
01	*Plantation Crops*	
	Production of tea in plantation	010
	Production of coffee in plantation	011
	Production of rubber in plantation	012
	Production of tobacco in plantation	013
	Production of ganja, cinchona, opium	014
	Production of other plantation crops not covered above	015
02	*Forestry and Logging*	
	Planting, replanting and conservation of forests	020
	Felling and cutting of trees and transportation of logs	021
	Preparation of timber	022
	Production of fuel including charcoal by exploitation of forest	023
	Production of fodder by exploitation of forests	024
	Production of gums, resins, lac, barks, herbs, wild fruits and leaves by the exploitation of forests	025
	Production and gathering of other forest products not covered above	026
03	*Fishing*	
	Production of fish by fishing in sea	030
	Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries	031
	Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, pond	032

Major Group (Code)	Description	Minor Group (Code)
	Division 0—Agriculture, Livestock, Forestry, Fishing and Hunting—*contd.*	
04	*Livestock and Hunting*	
	Production and rearing of livestock (large heads only) mainly for milk and animal power such as cow, buffalo, goat	040
	Rearing of sheep and production of wool	041
	Rearing and production of other animals (mainly for slaughter) such as pig	042
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming	043
	Rearing of bees for the production of honey, wax, and collection of honey	044
	Rearing of silk worms and production of cocoons and raw silk	045
	Rearing of other small animals and insects	046
	Trapping of animals or games propagation	047
	Production of other animal husbandry products such as skin, bone, ivory and teeth	048
	Division 1—Mining and Quarrying	
10	*Mining and Quarrying*	
	Mining of coal	100
	Mining of iron ores	101
	Mining of gold and silver ores	102
	Mining of manganese	103
	Mining of mica	104
	Mining of other non-ferrous metallic ores	105
	Mining of crude petroleum and natural gas	106
	Quarrying of stone (including slate), clay, sand, gravel, limestone	107
	Mining of chemical earth such as soda ash	108
	Mining and quarrying of non-metallic products not classified above such as precious and semiprecious stones, asbestos, gypsum, sulphur, asphalt	109
	Division 2 and 3—Manufacturing	
20	*Foodstuffs*	
	Production of rice, atta, flour etc. by milling dehusking and processing of crops and foodgrains	200
	Production of sugar and syrup from sugarcane in mills	201
	Production of indigenous sugar, gur from sugar cane or palm juice and production of candy	202
	Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits	203
	Slaughtering, preservation of meat and fish and canning of fish	204
	Production of bread, biscuits, cake and other bakery products	205
	Production of butter, ghee, cheese and other dairy products	206
	Production of edible fats and oils (other than hydrogenated oil)	207

APPENDIX II—*contd.*

STANDARD INDUSTRIAL CLASSIFICATION

Major Group (Code)	Description	Minor Group (Code)
	Division 2 and 3—Manufacturing—*contd.*	
20	*Foodstuffs*—contd.	
	Production of hydrogenated oils (Vanaspati)	208
	Production of other food products such as sweet meat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge	209
21	*Beverages*	
	Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery	210
	Production of country liquor	211
	Production of indigenous liquor such as toddy, liquor from mahua, palm juice	212
	Production of other liquors not covered above	213
	Production of aerated and mineral water	214
	Production of ice	215
	Production of ice cream	216
	Processing of tea in factories	217
	Processing of coffee in curing works	218
	Production of other beverages	219
22	*Tobacco Products*	
	Manufacture of bidi	220
	Manufacture of cigars and cheroots	221
	Manufacture of cigarette and cigarette tobacco	222
	Manufacture of hookah tobacco	223
	Manufacture of snuff	224
	Manufacture of jarda and other chewing tobacco	225
	Manufacture of other tobacco products	226
23	*Textile—Cotton*	
	Cotton ginning, cleaning, pressing and baling	230
	Cotton spinning, (other than in mills)	231
	Cotton spinning and weaving in mills	232
	Cotton dyeing, bleaching	233
	Cotton weaving in power looms	234
	Cotton weaving in handlooms	235
	Manufacturing of khadi textile in handlooms	236
	Printing of cotton textile	237
	Manufacturing of cotton nets	238
	Manufacturing of cotton, cordage, rope and twine	239
24	*Textile—Jute*	
	Jute pressing and baling	240
	Jute spinning and weaving	241
	Dyeing and bleaching of jute	242
	Printing of jute textile	243
	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta	244

Major Group (Code)	Description	Minor Group (Code)
	Division 2 and 3—Manufacturing—*contd.*	
25	*Textile—Wool*	
	Wool baling and pressing	250
	Wool cleaning and processing (scouring)	251
	Wool spinning and weaving in mill	252
	Wool spinning other than in mills	253
	Wool weaving in power loom	254
	Wool weaving in handloom	255
	Embroidery and art work in woollen textile	256
26	*Textile—Silk*	
	Spinning and weaving of silk textile in mill	260
	Dyeing and bleaching of silk	261
	Spinning of silk other than in mills	262
	Weaving of silk textile by power loom	263
	Weaving of silk textile by handloom	264
	Printing of silk textile	265
	Manufacture of silk cordage, rope and twine	266
27	*Textile—Miscellaneous*	
	Manufacture of carpet and all other similar type of textile products	270
	Manufacture of hosiery and other knitted fabrics and garments	271
	Embroidery and making of crepe lace and fringes	272
	Making of textile garments including raincoats and headgear	273
	Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags	274
	Manufacture of waterproof textile products such as oil cloth, tarpaulin	275
	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling	276
	Manufacture of coir and coir products	277
	Manufacture of umbrellas	278
	Processing and manufacture of textile products not covered above	279
28	*Manufacture of Wood and Wooden Products*	
	Sawing and planing of wood	280
	Manufacture of wooden furniture and fixtures	281
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows	282
	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures	283
	Manufacture of other wooden products such as utensils, toys, artwares	284
	Manufacture of veneer and plywood	285
	Manufacture of plywood products such as tea chest	286
	Manufacture of boxes and packing cases other than plywood	287

APPENDIX II—*contd.*

STANDARD INDUSTRIAL CLASSIFICATION

Major Group (Code)	Description	Minor Group (Code)
	Division 2 and 3—Manufacturing—*contd.*	
28	*Manufacture of Wood and Wooden Products*—contd.	
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products	288
	Manufacture of other wood and allied products not covered above	289
29	*Paper and Paper Products*	
	Manufacture of pulp from wood, rags, waste-paper and other fibres and the conversion of such pulp into any kind of paper and paper board in mill	290
	Manufacture of pulp from wood, rags, waste-paper and other fibres and the conversion of such pulp into any kind of paper and paper board handmade	291
	Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp	292
30	*Printing and Publishing*	
	Printing and publishing of newspapers and periodicals	300
	Printing and publishing of books	301
	All other types of printing including lithography engraving, etching, block making and other work connected with printing industry	302
	All types of binding, stitching, sizing and other allied work connected with binding industry	303
31	*Leather and Leather Products*	
	Currying, tanning and finishing of hides and skins and preparation of finished leather	310
	Manufacture of shoes and other leather footwear	311
	Manufacture of clothing and wearing apparel (except footwear) made of leather and fur	312
	Manufacture of leather products (except those covered by code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles	313
	Repair of shoes and other leather footwear	314
	Repair of all other leather products except footwear	315
32	*Rubber, Petroleum and Coal Products*	
	Manufacture of tyres and tubes	320
	Manufacture of rubber footwear	321
	Manufacture of rubber goods used for industrial purpose	322
	Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat	323

Major Group (Code)	Description	Minor Group (Code)
	Division 2 and 3—Manufacturing—*contd.*	
32	*Rubber, Petrolium and Coal Products*—contd.	
	Production of petroleum, kerosene and other petroleum products in petroleum refineries	324
	Production of coaltar and coke in coke oven	325
	Manufacture of other coal and coaltar products not covered elsewhere	326
33	*Chemicals and Chemical Products*	
	Manufacture of basic industrial chemicals such as acids, alkalis and their salts not elsewhere specified	330
	Manufacture of dyes, paints, colours and *varnishes*	*331*
	Manufacture of fertilizers	332
	Manufacture of ammunition, explosives and fire works	333
	Manufacture of matches	334
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap	335
	Manufacture of soap and other washing and cleaning compounds	336
	Manufacture of turpentine, synthetic resin, and plastic products and materials (including synthetic rubber)	337
	Manufacture of common salt	338
	Manufacture of other chemicals and chemical products not covered above (including inedible oils and fats)	339
34	*Non-metallic Mineral Products other than Petroleum and Coal*	
	Manufacture of structural clay products such as bricks, tiles	340
	Manufacture of cement and cement products	341
	Manufacture of lime	342
	Manufacture of structural stone goods, stone dressing and stone crushing	343
	Manufacture of stonewares, other than images	344
	Manufacture of stone images	345
	Manufacture of plaster of paris and its products	346
	Manufacture of asbestos products	347
	Manufacture of mica products	348
35	Manufacture of earthenware and earthen pottery	350
	Manufacture of chinaware and crockery	351
	Manufacture of porcelain and its products	352
	Manufacture of glass bangles and beads	353
	Manufacture of glass apparatus	354
	Manufacture of earthen image, busts and statues	355
	Manufacture of earthen toys and artwares except those covered by code No. 355	356
	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above	357
	Manufacture of other non-metallic mineral products not elsewhere specified	359

APPENDIX II—*contd.*

STANDARD INDUSTRIAL CLASSIFICATION

Major Group (Code)	Description	Minor Group (Code)
	Division 2 and 3—Manufacturing—*contd.*	
36	*Basic Metals and their Products except Machinery and Transport Equipment*	
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods	360
	Manufacture including smelting, refining of nonferrous metals and alloys in basic forms	361
	Manufacture of armaments	362
	Manufacture of structural steel products such as joist, rail, sheet, plate	363
	Manufacture of iron and steel furniture	364
	Manufacture of brass and bell metal products	365
	Manufacture of aluminium products	366
	Manufacture of metal products (other than of iron brass, bell metal and aluminium) such as tin can	367
	Enamelling, galvanizing, plating (including electroplating) polishing and welding of metal products	368
	Manufacture of sundry hardwares such as G.I. pipe, wire net, bolt, screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38 and 39)	369
37	*Machinery (All kinds other than Transport) and Electrical Equipment*	
	Manufacture and assembling of machinery (other then electrical) except textile machinery	370
	Manufacture and assembling of prime mover and boilers, other than electrical equipment, such as diesel engines, road rollers, tractors	371
	Manufacture of machine tools	372
	Manufacture of textile machinery and accessories	373
	Manufacture of heavy electrical machinery and equipment such as motors, generators, transformers	374
	Manufacture of electric lamps and fans	375
	Manufacture of insulated wires and cables	376
	Manufacture of all kinds of battery	377
	Manufacture of electronic equipment such as radio, microphone	378
	Manufacture of electric machinery and apparatus, appliances not specified above	379
38	*Transport Equipment*	
	Manufacture, assembling and repairing of locomotives	380
	Manufacture of wagons, coaches, tramways and other rail road equipment other than that covered by code No. 363	381
	Division 2 and 3—Manufacturing—*concld.*	
38	*Transport Equipment*—contd.	
	Manufacture and assembling of motor vehicles of all types (excepting motor engines)	382
	Manufacture of motor vehicles engines parts and accessories	383
	Repairing and servicing of motor vehicles	384
	Manufacture of bicycles and tricycles and accessories such as saddle, seat frame, gear	385
	Building and repairing of water transport equipment such as ships, boats and manufacture of marine engines	386
	Manufacture and repair of air transport equipment including aeroplanes, aeroengines	387
	Repairing of bicycles and tricycles	388
	Manufacture of other transport equipment not covered above such as animal drawn and hand drawn vehicles	389
39	*Miscellaneous Manufacturing Industries*	
	Manufacture of optical instruments and lenses, opthalmic goods and photographic equipment and supplies	390
	Manufacture of scientific, medical and surgical instruments and equipment and supplies	391
	Assembling and repairing of watches and clocks	392
	Manufacture of jewellery, silverware and wares using gold and other precious metals	393
	Manufacture and tuning of musical instruments	394
	Manufacture of stationery articles not covered elsewhere such as pencil, penholder, fountainpen	395
	Manufacture of sports goods	396
	Manufacture and repair work of goods not assignable to any other group	399
	Division 4—Construction	
40	*Construction*	
	Construction and maintenance of buildings including erection, flooring, decorative constructions, electrical and sanitary installations	400
	Construction and maintenance of roads, railways, bridges, tunnels	401
	Construction and maintenance of telegraph and telephone lines	402
	Construction and maintenance of waterways and water reservoirs such as bunds, embankments, dam, canal, tank, tubewells, wells	403

APPENDIX II—*contd.*

STANDARD INDUSTRIAL CLASSIFICATION

Major Group (Code)	Description	Minor Group (Code)
	Division 5—Electricity, Gas, Water and Sanitary Services	
50	*Electricity and Gas*	
	Generation and transmission of electric energy	500
	Distribution of electric energy	501
	Manufacture of gas in gas works and distribution to domestic and industrial consumers	502
51	*Water Supply and Sanitary Services*	
	Collection, purification and distribution of water to domestic and industrial consumers	510
	Garbage and sewage disposal, operation of drainage system and all other types of work connected with public health and sanitation	511
	Division 6—Trade and Commerce	
60	*Wholesale Trade*	
	Wholesale trading in cereals and pulses	600
	Wholesale trading in vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry and other foodstuff (not covered elsewhere)	601
	Wholesale trading in all kinds of fabrics, and textiles products such as garments, hessian, gunny bag, silk and woollen yarn, shirtings, suitings, hosiery products	602
	Wholesale trading in beverages, such as tea (leaf) coffee (Seed and powder), aerated water	603
	Wholesale trading in intoxicants such as wines, liquors	604
	Wholesale trading in other intoxicants such as opium, ganja, etc.	605
	Wholesale trading in tobacco, bidi, cigarettes and other tobacco products	606
	Wholesale trading in animals	607
	Wholesale trading in straw and fodder	608
61	Wholesale trading in medicines and chemicals	610
	Wholesale trading in fuel and lighting products such as coke, coal, kerosene, candle	611
	Wholesale trading in toilets, perfumery and cosmetics	612
	Wholesale trading in metal, porcelain and glass utensils, crockery, chinaware	613
	Wholesale trading in wooden, steel and other metallic furniture and fittings	614
	Wholesale trading in footwear	615
	Wholesale trading in tyres, tubes and allied rubber products	616
	Wholesale trading in petrol, mobil oil and allied products	617
	Wholesale trading in other household equipment not covered above	618

Major Group (Code)	Description	Minor Group (Code)
	Division 6—Trade and Commerce—*contd.*	
62	Wholesale trading in bricks, tiles and other building materials	620
	Wholesale trading in wood, bamboo, cane, thatches and similar products	621
63	Wholesale trading in paper and other stationery goods	630
	Wholesale trading in agricultural and industrial machinery equipment and tools and appliances other than electrical	631
	Wholesale trading in electrical machinery and equipment like motor, battery, electric fan, bulb	632
	Wholesale trading in all kinds of transport and storage equipment	633
	Wholesale trading in skins, leather and fur	634
	Wholesale trading in clocks, eye glasses, frames	635
	Wholesale trading in hardware and sanitary equipment	636
	Wholesale trading in scientific, medical and surgical instruments	637
	Wholesale trading in precious metals and stones, gold and silverwares and jewellery	638
	Wholesale trading in all goods not covered above	639
64	*Retail Trade*	
	Retail trading in cereals, pulses, vegetables, fruits, sugar, species, oil, fish, dairy products, eggs, poultry	640
	Retail trading in beverages such as tea (leaf), coffee (Seed and powder), aerated water	641
	Retail trading in intoxicants such as wines, liquors	642
	Retail trading in other intoxicants such as opium, ganja, etc.	643
	Retail trading in tobacco, bidi, cigarettes and other tobacco products	644
	Retail trading in fuel such as coke, coal, firewood and kerosene	645
	Retail trading in foodstuffs like sweetmeat condiments, cakes, biscuits, etc.	646
	Retail trading in animals	647
	Retail trading in straw and fodder	648
65	Retail trading infibres, yarns, dhoti,saree, readymade garments of cotton, wool, silk and other textiles and hosiery products: (this includes retail trading in piece-goods of cotton, wool, silk and other textiles)	650
	Retail trading in toilet goods, perfumes and cosmetics	651
	Retail trading in medicines and chemicals	652
	Retail trading in footwear, head-gear such as hat, umbrellas, shoes and chappals	653
	Retail trading in tyres, tubes and allied rubber products	654
	Retail trading in petrol, mobil oil and allied products	655

APPENDIX II—*contd.*

STANDARD INDUSTRIAL CLASSIFICATION

Major Group (Code)	Description	Minor Group (Code)
	Division 6—Trade and Commerce—*concld.*	
66	*Retail trading in wooden, steel and other* metallic furniture and fittings	660
	Retail trading in stationery goods and paper	661
	Retail trading in metal, porcelain and glass utensils	662
	Retail trading in earthenware and earthen toys	663
	Retail trading in other household equipment not covered above	664
67	Retail trading in bricks, tiles and other building materials	670
	Retail trading in hardware and sanitary equipment	671
	Retail trading in wood, bamboo, cane, bark and thatches	672
	Retail trading in other building materials	673
68	Retail trading in agricultural and industrial machinery equipment, tools and appliances	680
	Retail trading in transport and storage equipments	681
	Retail trading in electrical goods like electric fan, bulb, etc.	682
	Retail trading in skins, leather and furs and their products excluding footwear and head-gear	683
	Retail trading in clock and watch, eye glass, frame	684
	Retail trading in scientific, medical and surgical instruments	685
	Retail trading in precious stones and jewellery	686
	Retail trading in musical instruments, gramophone record, pictures and paintings including curio dealing	687
	Book-selling	688
	Retail trading in goods unspecified	689
69	*Trade and Commerce Miscellaneous*	
	Importing and exporting of goods and commodities	690
	Real estate and properties	691
	Stocks, shares and futures	692
	Providents and insurances	693
	Money lending (indigenous)	694
	Banking and similar type of financial operation	695
	Auctioneering	696
	Distribution of motion pictures	697
	All other activities connected with trade and commerce not covered above, including hiring out of durable goods such as electric fan, microphone, rickshaw, etc.	699
	Division 7—Transport, Storage and Communication	
70	*Transport*	
	Transporting by railways	700
	Transporting by tramway and bus service	701

Major Group (Code)	Description	Minor Group (Code)
	Division 7—Transport, Storage and Communication—*contd.*	
70	*Transport*—contd.	
	Transporting by motor vehicles (other than omnibus)	702
	Transporting by road through other means of transport such as hackney carriage, bullock cart, ekka	703
	Animal transporting by animals such as horses, elephant, mule, camel	704
	Transporting by man such as carrying of luggage, hand cart driving, rickshaw pulling, cycle rickshaw driving	705
	Transporting by boat, steamer, ferry, etc. by river, canal	706
	Transporting by boat, steamer, ship, cargo boat by sea or ocean	707
	Transporting by air	708
	Transporting by other means not covered above	709
71	Services incidental to transport such as packing, cartingtravel agency	710
72	*Storage and Ware Housing*	
	Operation of storage such as ware-houses	720
	Operation of storage such as cold storage	721
	Operation of storage of other type	722
73	*Communication*	
	Postal, telegraphic, wireless and signal communications	730
	Telephone communication	731
	Information and broadcasting	732
	Division 8—Services	
80	*Public Services* (This does not include Govt., Quasi-Govt. or local body activities, other than administrative, in such fields as transport, communication, information and broadcasting, education and scientific services, health, Industries, production, construction, marketing and operation of financial institution each of which is classified in the appropriate industry groups)	
	Public Service in Police	803
	Public service in administrative departments and offices of Central Government	804
	Public service in administrative departments and offices of quasi-government organisation, municipalities, local boards, etc.	805
	Public services in administrative departments and offices of State Governments	809
81	*Educational and Scientific Services*	
	Educational services such as those rendered by technical colleges, technical schools and similar technical and vocational institutions	810

APPENDIX II—*concld.*

STANDARD INDUSTRIAL CLASSIFICATION

Major Group (Code)	Description	Minor Group (Code)
	Division 8—Services—*contd.*	
81	*Educational and Scientific Services*—contd.	
	Educational services such as those rendered by colleges, schools and similar other institutions of non-technical type	811
	Scientific services and research institutions not capable of classification under any individual group	812
82	*Medical and Health Services*	
	Public health and medical services rendered by organisations and individuals such as by hospitals, sanatoria, nursing homes, maternity and child welfare clinic as also by hakimi, unani, ayurvedic, allopathic and homoepathic practitioners	820
	Veterinary services rendered by organisation and individuals	821
83	*Religious and Welfare Services*	
	Religious services rendered by religious organisations and their establishments maintained for worship or promotion of religious activities, this includes missions, ashrams and other allied organisations	830
	Religious and allied services rendered by pandit, priest, preceptor, fakir, monk	831
	Welfare services rendered by organisations operating on a non-profit basis for the promotion of welfare of the community such as relief societies red-cross organisation for the collectionand allocation of contributions for charity	832
84	*Legal Services*	
	Legal services rendered by barrister, advocate, solicitor, mukteer, pleader, muhuric, munshi	840
	Matrimonial services rendered by organisations and individuals	841
85	*Business Services*	
	Engineering services rendered by professional organisations or individuals	850
	Business services rendered by organisations of accountants, auditors, bookkeepers or like individuals	851
	Business services rendered by professional organisations or individuals such as those of advertising and publicity agencies	852
	Business services rendered by professional organisations or individuals such as of those rendered by news-agency, newspaper correspondent, columist, journalists, editors, authors	853
86	*Community Services and Trade and Labour Associations*	
	Services rendered by trade associations, chambers of commerce, trade unions and similar other organisations	860

Major Group (Code)	Description	Minor Group (Code)
	Division 8—Services—*concld.*	
86	*Community Services and Trade and Labour Associations*—contd.	
	Services rendered by civic, social, cultural, political and fraternal organisations such as ratepayers association, club, library	861
	Community services such as those rendered by public libraries, museums, botanical and zoological gardens, etc.	862
87	*Recreation Services*	
	Production of motion picture and allied services such as processing, editing, etc.	870
	Recreation services rendered by cinema houses by exhibition of motion pictures	871
	Recreation services rendered by organisations and individuals such as those of theatres, opera companies, ballet and dancing parties, musicians, exhibitions, circus, carnivals	872
	Recreation services rendered by indoor and outdoor sports by organisations and individuals including horse, motor, etc., racing	873
88	*Personal Services*	
	Services rendered to households such as those by domestic servants, cooks	880
	Services rendered to households such as those by governess, tutor, private secretary	881
	Services rendered by hotels, boarding houses, eating houses, cafes, restaurants and similar other organisations to provide lodging and boarding facilities	882
	Laundry services rendered by organisations and individuals, this includes all types of cleaning, dyeing, bleaching, drycleaning services	883
	Hair dressing, other services rendered by organisation and individuals such as those by barber, hair-dressing saloon and beauty shops	884
	Services rendered by portrait and commercial photographic studios	885
89	*Services (not elsewhere classified)*	
	Services rendered by organisations or individuals not elsewhere classified	890
	Division 9—Activities not adequately described	
90	Activities unspecified and not adequately described including activities of such individuals who fail to provide sufficient information about their industrial affiliation to enable them to be classified	900
	Fresh entrants to the Labour Market	999

APPENDIX III

LIST OF COMMON HOUSEHOLD INDUSTRIES WITH THEIR INDUSTRIAL CODE NUMBER

Industrial Code Number	Household Industry
Major Group 00—Field Produce and Plantation Crops	
005.1	Production of Vegetables
005.2	Production of roots etc., not included above
006.1	Production of fruits and nuts in plantation, vines and orchards
006.2	Production of copra (from coconuts)
007.1	Production of thatching grass
007.2	Production of wood, bamboo, cane reeds, etc. (excluding thatching grass)
008.1	Production of juice (neera) by tapping coconut trees
008.2	Production of juice by tapping other palms like date, palmyra n.e.c.
009	Production of other agricultural produce (including fruits and nuts not covered by 006 and flowers) not covered above
Major Group 01—Plantation Crops	
013	Production of tobacco in plantation
015.1	Pan Cultivation
015.2	Plantation Crops except tea, coffee, rubber, tobacco, ganja, cinchona, opium and pan
Major Group 02—Forestry and Logging	
023.1	Production of charcoal
023.2	Production of other fuels by exploitation of forests
024	Production of fodder by exploitation of forests
025.1	Production of Kathha
025.2	Production of Lac
025.3	Production of gum
025.4	Production of resins, barks, herbs, wild fruits, berries and leaves etc. n.e.c.
026	Production and gathering of other forest products *not* covered above
Major Group 03—Fishing	
030	Production of fish by fishing in sea
031	Production of fish by fishing in inland waters and ponds including fish farms and fish hatcheries.
032	Production of pearls, conch, shells, sponges, sea herbs, corals etc., by gathering or lifting from sea, river, pond
Major Group 04—Livestock and Hunting	
040.1	Rearing of goat for milk and animal power
040.2	Rearing of buffalo for milk and animal power
040.3	Rearing of cows for milk and animal power
040.4	Rearing of camels and other big domestic animals
040.5	Production and rearing of livestock mainly for milk and animal power n.e.c.
041.1	Sheep breeding and rearing
041.2	Production of wool
042.1	Rearing and production of pigs and goats (mainly for slaughter)
042.2	Rearing and production of other animals (mainly for slaughter) n.e.c.
043.1	Poultry keeping and production of eggs
043.2	Rearing and production of ducks, hens etc. and other small birds *e.g.* pigeons, parrots, peacock, maina etc.
044.1	Bee keeping for production of honey and wax
044.2	Collection of wax and honey
045	Rearing of tassar/eri/mulberry and other silk worms and production of cocoons and raw silk
046.1	Dog breeding, rearing of rabbits and guinea-pigs
046.2	Rearing of other small animals and insects n.e.c.
048.1	Collection of bones
048.2	Manufacture of glue from animal carcasses
048.3	Manufacture of gut
048.4	Production of other animal husbandry products such as skin, ivory, teeth and hair etc.
Major Group 10—Mining and Quarrying	
107.1	Extraction of chalk
107.2	Quarrying of lime-stone
107.3	Stone and slate quarrying
107.4	Quarrying of sand, clay, gravel etc. n.e.c.
Major Group 20—Foodstuffs	
200.1	Production of flour by village chakkies or flour mill by grinding wheat, maize, gram etc.
200.2	Hand pounding of rice by Dhekhi or ukhal
200.3	Production of rice by milling, dehusking and processing of paddy by rice mill
200.4	Grinding of chillies, turmeric etc.
200.5	Production of pulses
200.6	Parching of grains
200.7	Production and processing of other crops and food grains n.e.c.
202.1	Gur and Khandsari making from sugarcane and palm
202.2	Production of bhoora and candy
202.3	Production of jaggery from coconut and palmyra juice (neera)
202.4	Production of other indigenous products from sugar and jaggery n.e.c.
203.1	Manufacture of achar, pickles, chutney and murabba
203.2	Production of sauce, jam and jelly
203.3	Processing of cashew nut
203.4	Manufacture of kokam products
203.5	Fruit preservation (canning of fruits)
203.6	Making dried vegetables
203.7	Production of other fruit products and preservation of fruits n.e.c.
204.1	Slaughtering, preservation of meat and fish and canning of fish
204.2	Fish currying or curing and salting (currying applies more to skin and hide)
205	Production of bread, biscuit, cake and other bakery products
206	Production of butter, cream, ghee, cheese, chhana, khowa and other dairy products
207	Oil pressing ghani, kolhu or by small machines
209.1	Confectionery
209.2	Making of sweet-meats, laddu, peda, barphi, batasa etc.
209.3	Sattu, bhunja, papar, barri, danauri, tilauri, sewai, apalam, etc.
209.4	Making of chura or chira, muri, murki, khoi
209.5	Making of chat
209.6	Making of dalmot, chanachur (jor) garam, rewari etc.

APPENDIX III—*contd.*

LIST OF COMMON HOUSEHOLD INDUSTRIES WITH OTHER INDUSTRIAL CODE NUMBER

Industrial Code Number	Household Industry
Major Group 20—Foodstuffs—*contd.*	
209.7	Making of other food products for residuary *snacks*
209.8	Production of other food products like cocoa, chocolate, toffee, lozenge
Major Group 21—Beverages	
210.1	Manufacture of vinegar from coconut juice (neera)
210.2	Manufacture of distilled spirits, wines, liquor from alcholic malt, fruits and malts in distillery and brewery
211	Production of country liquor from material obtained from sources other than trees and shrubs
212.1	Production of indigenous liquor such as liquor, toddy, neera from mahua and palm trees
212.2	Production of other indigenous liquors from other materials from trees and shrubs
214.1	Production of mineral water
214.2	Production of aerated water such as sodawater, lemonade etc.
215	Production of ice
216	Production of ice cream, ice-candy or kulphi-malai, milk-shake etc.
218	Grinding of coffee
219.1	Preparation of sharbats and squashes
219.2	Preparation of jeerapani
219.3	Production of other beverages n.e.c.
Major Group 22—Tobacco Products	
220	Manufacture of bidi
221	Manufacture of cigars and cheroots
223	Manufacture of hookah tobacco
224	Manufacture of snuff
225	Manufacture of jerda, kimam, khaini and other chewing tobacco
226	Manufacture of other tobacco products n.e.c.
Major Group 23—Textile—Cotton	
230	Cotton ginning, cleaning, carding, pressing and baling
231	Cotton spinning (by charkha and takali)
233.1	Dyeing of cloth (cotton) and yarn
233.2	Bleaching of cloth (cotton) and yarn
233.3	Tie and dye (bandhani) of cloth and yarn
234	Cotton cloth weaving in power looms
235	Cotton cloth weaving in handlooms
236	Manufacture of khadi textile in handlooms
237	Printing of cloth (cotton)
238.1	Making of fishing net
238.2	Making of mosquito net
238.3	Making of other nets
239.1	Making of sacred thread
239.2	Making of thread, rope, cordage and twine (cotton)
Major Group 24—Textile—Jute	
240	Jute pressing and baling
241	Jute spinning and weaving of mats, asanis etc.
242	Dyeing and bleaching of jute
244.1	Making of rope and cordage, out of hemp
244.2	Making of rope and cordage, out of jute

Industrial Code Number	Household Industry
Major Group 24—Textile—Jute—*contd.*	
244.3	Making of rope by palm fibre
244.4	*Making of rope by date palm fibre*
244.5	Making of fibre, sunn-hemp fibre
244.6	Making of other products from jute and similar fibres such as hemp, mesta
Major Group 25—Textile—Wool	
250	Wool baling and pressing
251	Cleaning, sorting, carding, scouring and processing of wool
253	Spinning of wool by charkha or takali
254	Weaving of woollen cloth in power loom such as blankets, asanis etc.
255	Weaving of woollen cloth in handloom such as blankets, rugs, pashmina, thulma, gudma, etc.
256.1	Embroidery with various colours, combinations of various threads and art work in woollen textile
256.2	Shawls (with traditional borders)
Major Group 26—Textile—silk	
261	Dyeing and bleaching of silk
262.1	Spinning of tussar, other than in mills
262.2	Spinning of eri, other than in mills
262.3	Spinning of silk, other than in mills n.e.c.
263.1	Weaving of Traditional silk (Atlas) by power loom
263.2	Weaving of tussar by power loom
263.3	Weaving of eri by power loom
263.4	Weaving of silk and artificial silk in power loom n.e.c.
264.1	Weaving of mashru, himroo, brocade, kinkhab by handloom
264.2	Weaving of silk and artificial silk in handloom n.e.c.
265	Printing of silk textile
266.1	Goaf making
266.2	Making of silk cordage, rope and twine n.e.c.
Major Group 27—Textile—Miscellaneous	
270.1	Making of durries
270.2	Making of carpets and druggets
270.3	Manufacture of other similar textile products n.e.c.
271.1	Making of hosiery goods such as banyans, socks, sweaters, mufflers etc.
271.2	Making of nalas and azarbands
271.3	Making of parandas and chootelas
271.4	Manufacture of hosiery and other knitted fabrics and garments n.e.c.
272.1	Embroidery and making of phulkari
272.2	Making of Jari thread, zardoshi
272.3	Traditional embroidery
272.4	Patchwork embroidery
272.5	Lace garland making
272.6	Making of fringes and crepe laces
272.7	Making of kargota, main garlands, shell garlands etc.
272.8	Making of other embroidery products n.e.c.
273.1	Making of cap, hat, and other head-gear
273.2	Traditional garments
273.3	Chrochet work (bora caps)

APPENDIX III—*contd.*

LIST OF COMMON HOUSEHOLD INDUSTRIES WITH THEIR INDUSTRIAL CODE NUMBER

Industrial Code Number	Household Industry
Major Group 27—Textile—Miscellaneous—*contd.*	
273.4	Making of textile garments including rain-coats and head-gears n.e.c.
274.1	Weaving of khes, bed covers, curtains, pillow cases and table-cloth, cloth bags etc.
274.2	Making of newar
274.3	Manufacture of other made-up textile goods like mattress, quilt, rezai etc., n.e.c.
275	Manufacture of water proof textile products such as oil cloth, tarpaulin etc.
276.1	Making of namda felt
276.2	Making of suzani (padded quilts)
276.3	Processing of coconut fibre for upholstery
276.4	Handicraft articles made of flax and fibre
276.5	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling n.e.c.
277.1	Manufacture of coir matting, cactus fibre for ropes and rope making from coconut fibre
277.2	Making of brush, broom etc. from coconut fibre
277.3	Coir spinning
277.4	Coconut curing
277.5	Other allied products of coir industry n.e.c.
278	Manufacture and repair of umbrellas
279.1	Making of daura (thread) batua, cotton thread, buttons
279.2	Manufacture of dolls and toys (rags and cotton)
279.3	Manufacture of other textile products not elsewhere classified
Major Group 28—Manufacture of Wood and Wooden Products	
280	Sawing, planing and milling of wood
281	Manufacture of wooden furniture and fixtures
282	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows
283.1	Carpentary works concerned with repairs of agricultural implements (wood)
283.2	Manufacture of wooden industrial goods, other than transport equipment such as bobbin and similar equipments and fixtures
284.1	Lacquerware (if on wood)
284.2	Manufacture of wooden utensils, artware and decorative wooden boxes (patras)
284.3	Manufacture of wooden toys
284.4	Sandal wood and other wood carving
284.5	Bead making from wood
284.6	Sawdust and plaster figure making
284.7	Marquetry boxes (inlay work)
284.8	Manufacture of photo frames and framing of photo printings etc.
284.9	Manufacture of other wooden products n.e.c.
285	Manufacture of match splinters, plywood and veneers
287	Manufacture of boxes and packing cases other than plywood
288.1	Making of box from moonjgrass
288.2	Making of rope mats etc. from moonj and sawai grass and making of cadjar for thatching purposes
288.3	Making of mats, handfans and umbrellas from palm leaves
288.4	Making of sirki, moora and chhaj
288.5	Making of baskets and broomsticks
288.6	Making of donas (drone) and pattals (patravali) from leaves

Industrial Code Number	Household Industry
Major Group 28—Manufacture of Wood and Wooden Products—*contd.*	
288.7	Caning of chairs
288.8	Making of chicks, cuscus-tatti and fans, sticks and poles from bamboo
288.9	Manufacture of other articles from leaf, cane, bamboo, cork and other allied products n.e.c.
289.1	Making of sticks and poles from wood
289.2	Making of wooden kharaus and other wooden sandals
289.3	Making of artwheels
289.4	Manufacture of other wood and allied products n.e.c.
Major Group 29—Paper and Products	
291	Manufacture of pulp and paper by hand
292.1	Making of envelopes and paper bags
292.2	Papier mache articles
292.3	Making of kite
292.4	Paper decorations for homes
292.5	Making of card-board boxes and cards
292.6	Making of paper toys
297.7	Making of paper flowers etc.
292.8	Manufacture of other paper products from paper, paper board and pulp n.e.c.
Major Group 30—Printing and Publishing	
301	Printing and publishing of books
302.1	Printing works, printing of handbills, invitation cards etc.
302.2	Lithography, engraving, etching, block making, type cutting and other works connected with printing industry
303	Book binding, stitching, sizing and other work connected with book binding industry
Major Group 31—Leather and Leather Products	
310.1	Flaying, processing of hides and skins including taxidermy
310.2	Currying, tanning and finishing of hides and skins preparation of finished leather
310.3	Stuffed animals
311.1	Making of leather boots, shoes or chappals (slippers, sandals)
311.2	Making of Poola shoes
311.3	Manufacture of other footwear n.e.c.
312	Making of clothing and wearing apparel (except footwear) made of leather and fur
313	Manufacture of leather products such as leather upholstery suit cases, pocket-books, cigarette and key cases, purses, saddlery, whip, acquaducts (Kos), charsa and other articles
314	Repair of shoes, chappals and other leather footwear
315	Repair of all other leather products except footwear
Major Goup 32—Rubber, Petroleum and Coal Products	
320	Vulcanising tyres and tubes
321	Manufacture of chappals from torn tyres and other rubber footwear
322	Manufacture of rubber products from natural and synthetic rubber including rain-coats, oil cloths, waterproof cloths etc.

APPENDIX III- *contd.*

LIST OF COMMON HOUSEHOLD INDUSTRIES WITH THEIR INDUSTRIAL CODE NUMBER

Industrial Code Number	Household Industry
Major Group 33—Chemical and Chemical Products	
331.1	Manufacture of dyes, paints, colours, abir, sindoor, varnish etc.
331.2	Manufacture of indigo
332	Manufacture of fertilizer (including from bones)
333	Manufacture of fireworks and other explosives such as *pataka* etc.
334	Manufacture of matches
335.1	Manufacture of incense and perfumes
335.2	Manufacture of Agarbatti
335.3	Manufacture of rose water
335.4	Manufacture of powder, snow, cream, bindi, tikali, hair oil and nail polish
335.5	Manufacture of kumkum and hinglo
335.6	Manufacture of mascara and kajal
335.7	Manufacture of medicines (ayurvedic, unani etc.) and pharmaceutical preparations
335.8	Manufacture of perfumes, cosmetics and other toilet preparations n.e.c.
336.1	Manufacture of soap and washing soda
336.2	Manufacture of other washing and cleaning compounds n.e.c.
337.1	Manufacture of plastic toys
337.2	Making of plastic buttons
337.3	Manufacture of other plastic goods
337.4	Making of celluloid goods
337.5	Manufacture of turpentine, synthetic resin and other materials n.e.c.
338	Salt production
339.1	Manufacture of ink including fountainpen ink
339.2	Making of candles
339.3	Making of tooth powder
339.4	Making of boot polish and inedible oils etc.
339.5	Manufacture of other chemicals products n.e.c.
Major Group 34-35—Non-metallic Mineral Products other than Petroleum and Coal	
340.1	Making of bricks
340.2	Manufacture of roofing tiles
340.3	Manufacture of other clay products n.e.c.
341.1	Manufacture of cement door frames and sanitary fittings
341.2	Manufacture of cement jali and tiles
341.3	Making of cement statues
341.4	Making of cement products n.e.c.
342.1	Manufacture of lishu
342.2	Manufacture of lime
343.1	Stone carving
343.2	Marble carving
343.3	Granite carving
343.4	Manufacture of other structural stone goods, stone dressing and stone crushing n.e.c.
344	Making of chakki, chakla, silaut, lorha, jainta, utensils and other articles from stone
345	Manufacture of stone images and toys
346.1	Making of images from soap stone
346.2	Manufacture of images, toys and other articles of plaster of paris
348.1	Mica splitting
348.2	Manufacture of mica products, including mica grinding
350	Making of earthen ware such as pottery, etc.
351	Manufacture of crockery
353.1	Making of glass bangles
353.2	Making of glass beads

Industrial Code Number	Household Industry
Major Group 34-35—Non-metallic Mineral Products other than Petroleum and Coal—*contd.*	
353.3	Manufacture of bead garlands (where making of garlands is undertaken at the place of manufacture of beads) (also see 399)
354	Manufacture of Laboratory glass apparatus
355	Making of clay models, earthen images, busts and statues
356.1	Making of earthen toys and artware
356.2	Decorative ceramics
357	Manufacture of glass and glass products except optical and photographic lenses
Major Group 36—Basic Metals and their Products except Machinery and Transport Equipment	
360.1	Re-rolling of M. S. Rods
360.2	Manufacture of iron and steel including smelting, refining, rolling, etc. such as billets, blooms, tubes, rods n.e.c.
362	Manufacture of arms and weapons and their repair service
364	Manufacture of iron and steel furniture
365.1	Making of utensils of brass and bell metal
365.2	Making of brassware
365.3	Making of bottom part of hookah from brass and bell metal
365.4	Making of brass and bell metal ornaments
365.5	Making of other brass and bell metal products n.e.c.
366.1	Making of aluminium utensils
366.2	Making of other aluminium products n.e.c.
367.1	Making of tin utensils
367.2	Making of articles from tin sheets
367.3	Copper utensils
367.4	Bronze works including bronze images, medals and articles of alloys
367.5	Manufacture of other metal products (excluding iron, brass, bell metal, aluminium) n.e.c.
368.1	Lacquerware (on metal)
368.2	Nickel plating and electroplating
368.3	Engraving, embossing, polishing and welding of metal products
368.4	Enamelling and galvanizing of metal products
368.5	Plating and electroplating of metal n.e.c. including silverplating, goldplating, E. P. N. S. etc.
369.1	Manufacture of agricultural implements such as ploughshare, khurpi, kudal etc.
369.2	Manufacture of light engineering goods including bolts and screws
369.3	Making of iron utensils (*e.g.* buckets etc.) and articles from iron sheets
369.4	Making and repairing of locks and trunks
369.5	Cutlery
369.6	Manufacture of pins
369.7	Manufacture of scales, weights and measures
369.8	Foundry Industry (including blacksmithy)
369.9	Manufacture of other sundry hardwares such as G. I. Pipe, Wire net etc., n.e.c.
Major Group 37—Machinery (All Kinds other than Transport) and Electrical Equipment	
370	Manufacture of mechanical water pumps, tube well pumps, air pumps etc,

APPENDIX III—*concld.*

LIST OF COMMON HOUSEHOLD INDUSTRIES WITH THEIR INDUSTRIAL CODE NUMBER

Industrial Code Number	Household Industry
	Major Group 37—Machinery (All Kinds other than Transport) and Electrical Equipment—*contd.*
372	Manufacture of small machine tools and machine parts
373	Manufacture of sewing machine parts
375	Repairing and servicing of fans
376	Manufacture of insulated wires
377.1	Manufacture of storage batteries
377.2	Manufacture of charging batteries
377.3	Manufacture of other batteries n.e.c.
378	Repairing and servicing of radios
379.1	Manufacture of domestic electrical appliances
379.2	Repairing and servicing of electrical apparatus, heaters, oven etc.
	Major Group 38—Transport Equipment
382	Manufacture of body of trucks and buses including carpentry and joinery work involved
384	Repairing and servicing of automobiles
385.1	Manufacture of cycle parts and accessories such as saddle, seat frame and gear etc
385.2	Manufacture of rickshaw parts
386	Manufacture of boats and barges
388	Repair of cycle and rickshaw
399	Manufacture of animal drawn and hand drawn vehicles such as bullock cart, tamtam, lagadi, palaki cab, wheelbarrow, handbarrow etc.
	Major Group 39—Miscellaneous Manufacturing Industries
390.1	Repair of spectacles
390.2	Manufacture of small photographic equipment
390.3	Manufacture of optical and photographic equipment n.e.c.
391	Manufacture of scientific goods
392	Repairing and servicing of watches and clocks
393.1	Inlay work with ivory and brass
393.2	Goldsmithy
393.3	Manufacture of jewellery, silverware and wares using gold and other precious and precious and semi-precious stones
393.4	Silver artware, including silver repousse work on copper (such as in Tanjore) and silver images
393.5	Silver filigree industry
393.6	Manufacture of gold and silver leaves
393.7	Gold covering work (fancy jewellery)
393.8	Bidriware industry
393.9	Manufacture of jewellery, silverwares etc., n.e.c.
394	Manufacture, repairing and tuning of musical instruments such as harmonium, tabla, sitar, bansuri etc.
395.1	Manufacture of chalk pieces
395.2	Making of slate and slate pencil
395.3	Making of rubber stamps
395.4	Manufacture of fountain pen parts
395.5	Manufacture of other stationery articles such as pencils, penholders etc.
396.1	Manufacture of deshi sports goods such as lezzim and dumballs
396.2	Making of rubber balls and balloons
396.3	Manufacture of other sports goods n.e.c. bats, rackets, balls etc.
399.1	Making of tikka and cowdung cakes
399.2	Making of beads from conch shells and horn goods
399.3	Making of traditional objects such as Orissa, Mysore and Tanjore paintings etc.
399.4	Making of lac bangles
399.5	Making of buttons (bone, shell, ivory)
399.6	Making of gangavan (making of wig from human hair)
399.7	Making of garlands from flowers, camphor, sandal wood shavings, seeds and other materials, like beads etc.
399.8	Repair of petromax lights etc.
399.9	Making and repairing of goods n.e.c.

n.e.c.—not elsewhere classified.

APPENDIX IV

NATIONAL CLASSIFICATION OF OCCUPATIONS

Divisions and Groups

0 Professional, Technical and Related Workers

00 Architects, Engineers and Surveyors
01 Physicists, Chemists, Geologists and other Physical Scientists
02 Biologists Veterinarians, Agronomists and Related Scientists
03 Physicians, Purgeons and Dentists
04 Nurses, Pharmacists and other Medical and Health Technicians
05 Teachers
06 Jurists
07 Social Scientists
08 Artists, Writers, and Related Workers
09 Draughtsmen, and Science and Engineering Technicians, n.e.c.
0X Other Professional, Technical and Related Workers

1 Administrative, Executive and Managerial Workers

10 Administrators and Executive Officials, Government
11 Directors and Managers, Wholesale and Retail Trade
12 Directors, Managers and Working Proprietors, Financial Institutions
13 Directors, Managers and Working Proprietors, other

2 Clerical and Related Workers

20 Book-keepers and Cashiers
21 Stenographers and Typists
22 Office Machine Operators
28 Clerical Workers, Miscellaneous
29 Unskilled Office Workers

3 Sales Workers

30 Working Proprietors, Wholesale and Retail Trades
31 Insurance and Real Estate Salesmen, Salesmen of Securities and Services and Auctioneers
32 Commercial Travellers and Manufacturers' Agents
33 Salesmen, Shop Assistants and Related Workers
34 Money-Lenders and Pawn-Brokers

4 Farmers, Fishermen, Hunters, Loggers and Related Workers

40 Farmers and Farm Managers
41 Farm Workers
42 Hunters and Related Workers
43 Fishermen and Related Workers
44 Loggers and other Forestry Workers

5 Miners, Quarrymen and Related Workers

50 Miners and Quarrymen
51 Well Drillers and Related Workers
52 Mineral Treaters
59 Miners, Quarrymen and Related Workers, n.e.c.

6 Workers in Transport and Communication Occupations

60 Deck Officers, Engineer Officers and Pilots, ship
61 Deck and Engine-room Ratings (ship), Barge Crews and Boatmen
62 Aircraft Pilots, Navigators and Flight Engineers
63 Drivers and Firemen, Railway Engine
64 Drivers, Road Transport

6 Workers in Transport and Communication Occupations—contd.

65 Conductors, Guards and Brakesmen (Railway)
66 Inspectors, Supervisors, Traffic Controllers and Despatchers, Transport
67 Telephone, Telegraph and Related Telecommunication Operators
68 Postmen and Messengers
69 Workers in Transport and Communication Occupations, n.e.c.

7-8 Craftsmen, Production Process Workers, and Labourers not elsewhere Classified

70 Spinners, Weavers, Knitters, Dyers and Related Workers
71 Tailors, Cutters, Furriers and Related Workers
72 Leather Cutters, Lasters and Sewers (except Gloves and Garments) and Related Workers
73 Furnacemen, Rollers, Drawers, Moulders and Related Metal making and Treating Workers
74 Precision Instrument Makers, Watch Makers, Jewellers and Related Workers
75 Tool Makers, Machinists, Plumbers, Welders, Platers and Related Workers
76 Electricians and Related Electrical and Electronics Workers
77 Carpenters, Joiners, Cabinet Makers, Coopers and Related Workers
78 Painters and Paper Hangers
79 Bricklayers, Plasterers and Construction Workers, n.e.c.
80 Compositors, Printers, Engravers, Book Binders and Related Workers
81 Potters, Kilnmen, Glass and Clay Formers and Related Workers
82 Millers, Bakers, Brewmasters and Related Food and Beverage Workers
83 Chemical and Related Process Workers
84 Tobacco Preparers and Products Makers
85 Craftsmen and Production Process Workers, n.e.c.
86 Testers, Packers, Sorters and Related Workers
87 Stationary Engine and Excavating and Lifting Equipment Operators and Related Workers
89 Labourers, n.e.c.

9 Service, Sport and Recreation Workers

90 Fire Fighters, Policemen, Guards and Related Workers
91 House Keepers, Cooks, Maids and Related Workers
92 Waiters Bartenders and Related Workers
93 Building Caretakers, Cleaners and Related Workers
94 Barbers, Hairdressers, Beauticians and Related Workers
95 Launderers, Dry Cleaners and Pressers
96 Athletes, Sportsmen and Related Workers
97 Photographers and Related Camera Operators
99 Service, Sport and Recreation Workers n.e.c.

X Workers not Classifiable by Occupation

X8 Workers reporting Occupations unidentifiable or unclassifiable
X9 Workers not reporting Occupation

Note :

n.e.c.—not elsewhere classified.

TABLES

TABLE A-I -AREA, HOUSES AND POPULATION

District/Subdivision/ Police Station/ Town-Group/Town	Total Rural Urban	Area in Sq. miles	Area in Sq. Km.	Population per Sq. mile	Number of Villages Inhabited	Number of Villages Uninhabited	No. of Towns	No. of Occupied Residential Houses	Population Persons	Population Males	Population Females

Santipur	Total	71.1	194.5	1,497	63	10	2	22,085	112,432	57,353	55,079
	Rural	64.2	166.4	895	63	10	..	12,386	57,431	29,344	28,087
	Urban	10.9	28.1	5,069	..	..	2	9,699	55,001	28,009	26,992
Santipur (M) . .	Urban	9.50	24.60	5,388	..	..	1	8,953	51,190	25,937	25,253
Phulia (N.M.) . .	*Urban*	*1.35*	*3.50*	*2,823*	..	..	*1*	*746*	*3,811*	*2,072*	*1,739*

NOTES :

1. The Sq. Km. and density figures of urban areas of Police Station/Subdivision/District are worked out using the area figures corrected upto 2 places of decimal obtained by adding the areas of towns in respective units and not using the area figures given in the table. In addition to this the area figures relating to Sq. Km. are further adjusted to make the Police Station/Subdivision/District totals tally.

2. Towns treated as such for the first time in 1961 are printed in italics.

3. *Mauzas* which have been merged in forest units, and for which the boundary lines could not be demarcated on the ground, have been together counted as a single inhabited village for the purposes of Tables A-I and A-III. There is a difference of 3 inhabited villages between column 5 of Table A-I and column 2 of Table A-III because separate population figures of the following inhabited *mauzas* which have been treated as separate units in A-I, but merged in A-III could not be ascertained :

District	Name of Police Station	Name of *Mauza* with J. L. No.	Remarks
Nadia	Haringhata	J. L. No. 46—Bhepur	Included in 'Haringhata Firm' for Administrative convenience
	Ditto	J. L. No. 47—Daluipur	
	Ditto	J. L. No. 48—Dhandhania	

The following abbreviations have been used for the status of a town :

M . . Municipality
N.M. . . Non-municipal Town

TABLE A-III—VILLAGES CLASSIFIED

281	Manufacture of wooden furniture and fixtures	4	4	..
282	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows	40	34	6
283.1	Carpentary works concerned with repairs of agricultural implements (wood)	4	4	..
283.2	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipments and fixtures	1	1	..
284.3	Manufacture of wooden toys	1	..	1
284.9	Manufacture of other wooden products n.e.c.	134	119	15
288.2	Making of rope mats etc. from moonj and sawai grass and making of cadjar for thatching purposes	1	1	..
288.3	Making of mats, handfans and umbrellas from palm leaves	35	31	4
288.4	Making of sirki, moora, and chhaj	7	2	5
288.5	Making of baskets and broomsticks	57	44	13
288.8	Making of chicks, cuscus-tatti and fans, sticks and poles from bamboo	4	3	1
288.9	Manufacture of other articles from leaf, cane, bamboo, cork and other allied products n.e.c.	49	47	2
289.3	Making of art wheels	15	14	1
289.4	Manufacture of other wood and allied products, n.e.c.	1	..	1
291	Manufacture of pulp and paper by hand	2	2	..
292.1	Making of envelopes and paper bags	1	1	..
292.8	Manufacture of other paper products from paper, paper board and pulp n.e.c.	4	4	..
301	Printing and publishing of books	1	..	1
310.2	Currying, tanning and finishing of hides and skins preparation of finished leather	4	4	..
311.1	Making of leather boots, shoes or chappals (slippers, sandals)	20	19	1
311.3	Manufacture of other foot wear n.e.c.	1	1	..
313	Manufacture of leather products such as leather upholstery suitcases, pocket-books, cigarette and key cases, purses, saddley, whip, acquaducts (Kos), charsa and other articles	3	3	..
314	Repair of shoes, chappals and other leather footwear	2	2	..
331.1	Manufacture of dyes, paints, colours, abir, sindoor, varnish etc.	1	..	1
335.1	Manufacture of incense and perfumes	1	1	..
335.4	Manufacture of powder, snow, cream, bindi, tikali, hair oil and nail polish	1	1	..
336.1	Manufacture of soap and washing soda	1	..	1
337.4	Making of celluloid goods	1	..	1
340.1	Making of bricks	1	1	.
340.3	Manufacture of other clay products n.e.c.	1	1	..
342.2	Manufacture of lime	3	3	..
350	Making of earthenware such as pottery, etc.	200	174	26
355	Making of clay models, earthen images, busts and statues	10	7	3
356.1	Making of earthen toys and artware	3	1	2
365.1	Making of utensils of brass and bell metal	73	54	19
365.4	Making of brass and bell metal ornaments	1	..	1
365.5	Making of other brass and bell metal products n.e.c.	2	1	1
368.3	Engraving, embossing, polishing and welding of metal products	11	8	3
369.1	Manufacture of agricultural implements such as ploughshare, khurpi, kudal etc.	50	46	4
369.2	Manufacture of light engineering goods including bolts and screws	1	1	..
369.5	Cutlery	1	1	..
369.8	Foundry Industry (including blacksmithy)	69	63	6
388	Repair of cycle and rickshaw	7	6	1
392	Repairing and servicing of watches and clocks	1	1	..
393.2	Goldsmithy	90	63	27
394	Manufacture, repairing and tuning of musical instruments such as harmonium, tabla, sitar, bansuri etc.	10	8	2
399.1	Making of tikka and cowdung cakes	4	4	..
399.2	Making of beads from conch shells and horn goods	5	5	..
399.4	Making of lac bangles	44	41	3
399.5	Making of buttons (bone, shell, ivory)	2	2	..
399.7	Making of garlands from flowers, camphor, sandal wood shavings, seeds and other materials, like beads, etc.	1	1	..
399.8	Repair of petromax lights, etc.	10	10	.
399.9	Making and repairing of goods n.e.c.	4	2	2

TABLE B-XV—SAMPLE HOUSEHOLDS ENGAGED BOTH IN CULTIVATION AND URBAN AREAS

(Based on

Size of land (class ranges in acres)	Total of Cultivating Households which are engaged in Household Industry				Cultivating Households

(a) Households engaged neither in cultivation nor in household industry.
(b) Households engaged in household industry only.
(c) Households engaged in cultivation.

NOTE: The heads of households are shown as less than the total number of households in some areas on account of the fact that some enumerators had apparently not indicated any person as the head of household in the 'Population Record' where the conventional head of household was absent from the household at the time of enumeration and had not been enumerated in that household.

NOTES:

Mother tounges printed in italics belong to countries outside the Indian Sub-continent.
Names occurring after hyphen (-) have been introduced by the Linguist to indicate groupings.

*Denotes that the mother tongue is unclassified in Linguistic Survey of India.

†Denotes that the mother tongue, though classified in Linguistic Survey of India is either tentatively reclassified or considered unclassifiable by the Lingutis.

*†Denotes that the mother tongue is unclassified by Grierson but is tentatively classified by the Linguist.

NOTES :

Mother tongues printed in italics belong to countries outside the Indian Sub-continent.
Names occurring after hyphen (-) have been introduced by the Linguist to indicate groupings.

*Denotes that the mother tongue is unclassified in Linguistic Survey of India.

†Denotes that the mother tongue, though classified in Linguistic Survey of India is either tentatively reclassified or considered unclassifiable by the Linguist.

†*Denotes that the mother tongue is unclassified by Grierson but is tentatively classified by the Linguist.

NOTE : The Death rate is the number of annual death per 1,000 of the same sex calculated on the population of 1951.

*Relates to the period 1951-58

†Rates have been calculated on per thousand of live and still births.

TABLE 17—CALENDAR OF IMPORTANT EVENTS

Year	Particulars
1890	Manmohan Ghose was the Chairman of the Reception Committee at the 6th session of the Congress in Calcutta.
1897	The earthquake.
1902	The Nadia District School Board was established in this year.
1903	Lalmohan Ghosh was the President of the 9th session of the Congress at Madras.
1905	Patriotism poured itself out in a stream of stirring songs, in the solemn ceremony of brotherhood "Rakhibandhan" and in popular demonstrations all over the district taking the sacred pledge to boycott foreign goods.
1918	22–The cadastral Survey Settlement.
1921	The National School started at "Garabani Cottage", at Krishnanagar, which was the first of its kind in the entire district.
1926	A memorable event was the holding of the annual session of the Bengal Provincial Conference in Krishnanagar. Nazrul Islam who was at that time residing in Krishnanagar supervised and guided the formation of a volunteer corps and caused a tremendous stir by his national songs.
1929	30–A series of non-cooperation movement conferences were held at various places of the district. Magic lantern lectures "Desher Dak" were organised throughout the district.
1930	A noticeable feature of the movement was the active participation of womenfolk on a large scale in the national struggle. The first procession in violation of Sec. 144 in Krishnanagar was joined by as many as two hundred young girls and elderly matrons.
1931	The Hijli Detention Camp Firing on Sept. 10 and in which Govinda Pada Datta, a most popular and militant youth leader of the district was severely wounded, produced a storm of indignation all over the district.
1932	Dr. Rajendra Prasad, Netaji Subhas Chandra, Dr. Aney, Dr. P. C. Ghosh and Shri F. K. Nariman addressed a vast gathering in the Krishnanagar Town Hall.
	The no-tax movement was first started at Chanderghat on April 13. Gradually it was spread all through the district.
1938	Flood occurred in this year. Netaji Subhas Chandra Bose visited Nabadwip on November 14 as Congress President.
1943	Great Bengal Famine.
1947	The district was partitioned on 16th August, 1947 and as a result the district lost the bulk of fertile and prosperous lands extending over the subdivisions of Kusthia, Chuadanga and Meherpur which were allotted to the portion of East Pakistan.
1950	The exodus.
1951	The scheme for the development of a modern town Kalyani was rooted in this year by the Governor of the state of West Bengal.
1956	Flood occurred in this year. The Zamindary system of this district was abolished from this year.
1959	Flood.
1964	The Panchayat Raj has been established all over the district from October. The Krishnanagar Municipality celebrated its centenery in this year. Influx of refugees from East Pakistan due to the disturbances in Khulna in January, 1964.

PART III

VILLAGE DIRECTORY

This Directory renders an account of each Village and each Town

THE VILLAGE DIRECTORY

Explanatory Note

The Directory renders an account of each village, entered on the Jurisdiction Lists for each Thana maintained by the Director of Land Records and Surveys, West Bengal. For villages included in town figures are given for the town and not for the separate villages which it contains. In case of a municipal town figures are presented separately for each ward. It gives the Jurisdiction List number, name, area of the village, number of Occupied Houses, Census Households, Total Population, Scheduled Caste and Scheduled Tribe Population, number of literates, and workers classified into the following nine Industrial Categories of Workers and Non-workers :

I As Cultivator
II As Agricultural Labourer
III In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting, Plantations, Orchards and allied activities
IV At Household Industry
V In Manufacturing other than Household Industry
VI In Construction
VII In Trade and Commerce
VIII In Transport, Storage and Communications
IX In Other Services
X Non-workers

These basic data are presented police stationwise first for the rural portion and next for urban portion in this directory. A notional map of the police station has been given at the beginning of the Village Directory of each police station showing the Jurisdiction List number of each village and the location of town, if any, and an inset map of the district has also been given to show the location of the police station in the district. The boundaries, specially the international one is very much notional and should not be taken as authentic for the purpose of survey or any reference. An alphabetical list of villages has been given facing each thana map. This list shows the Jurisdiction List number of each village and the names of the villages arranged alphabetically and its population in 1951 and in 1961. The thana map and the alphabetical list together facilitate location of any village in the Village Directory as well as on the spot.

A village, as a general rule, is the revenue survey *mauza*. The uninhabited *mauzas* and the *mauzas* that have been completely merged in urban areas have been indicated accordingly. In respect of the villages which are partly included in urban areas and partly outside the limits of a town, the particulars for the portion included in urban area have been clubbed together with the particulars furnished for the corresponding town and for the portion lying outside the town limits *i.e.*, included in the rural area, the data have been shown in the Village Directory against the corresponding *mauzas*. The area figures of the villages have been obtained from the 1951 Census Handbook. The total area for any police station shown below each Primary Census Abstract has been taken from Table A-I given in Part IIA of this volume.

The area of the municipal towns has been presented according to the figures available from the respective municipalities. The area in respect of the non-municipal towns has been computed from the area figures of the corstituting *mauzas*.

For the definition of a Worker and Non-worker and detailed description of nine Industrial Categories of workers, the Explanatory Note to the Primary Census Abstract and other economic tables in Part II of this Volume may be referred to.

Symbols will frequently be seen against a village or town. They will indicate that the institutions offering the particular facilities which the symbol denotes is situated within the village or town. These facilities are shown by symbols as explained below against the name of village and town:

(a) Schools :
P=Primary Schools
H=High Schools

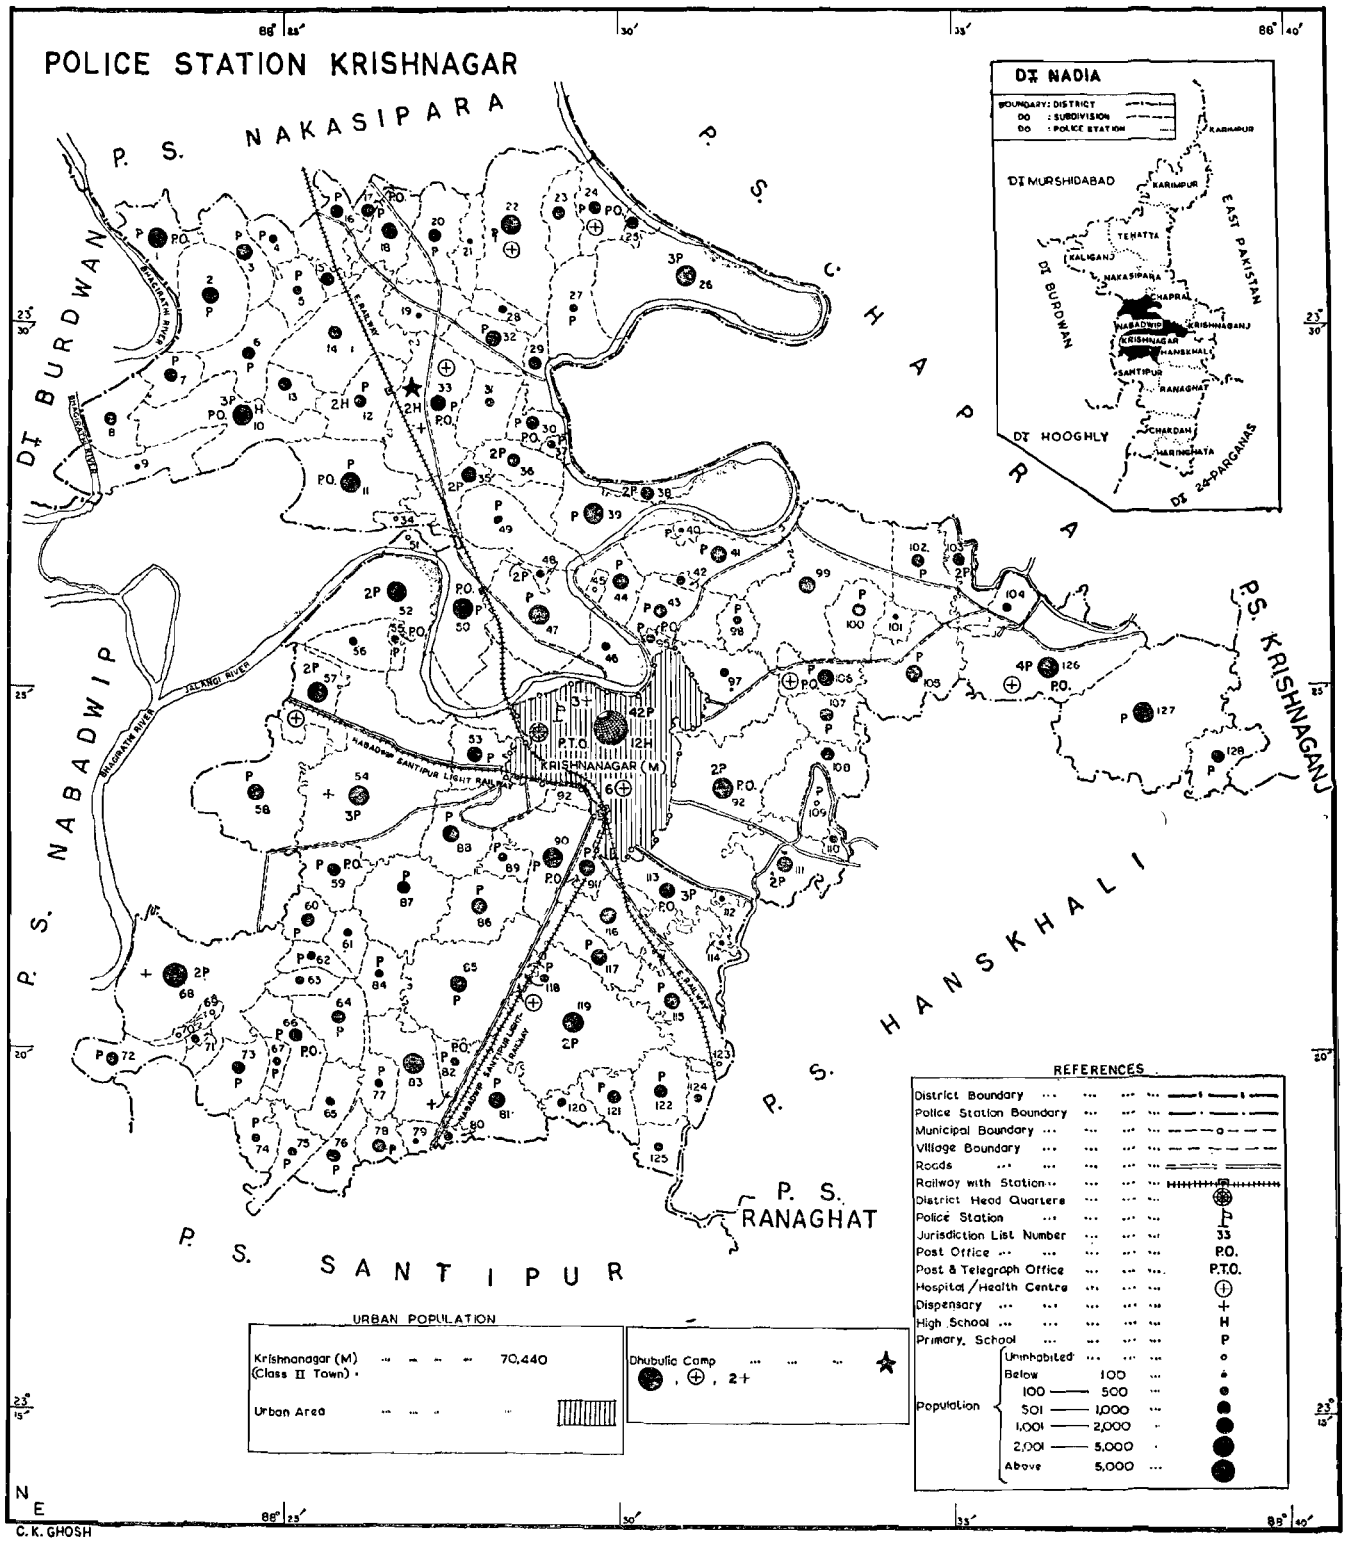

(b) Medical facilities :
D=Dispensaries
Rhc=Rural Health Centres
Hos=Hospitals
Mcw=Maternity and Child Welfare Centres

(c) Post Office :
Po=Post Office

(d) Electricity :
E=Electricity

(e) Library :
L=Library

Where figures like 5P or 2H or 2Hos *etc.*, occur they denote that the *mauza* or the town has five Primary Schools or two High Schools or two Hospitals etc.
