PART VIII-B	Administration Report—Tabulation (for office use only)	
PART IX	Census Atlas	
PART X	Special Report On Cities	

PREFACE

The plan of the present handbook follows that of the 1951 volume very closely although it has been possible to include in it census as well as official data more elaborately. It is worthwhile to take note in this connection that the excellent plan of the district handbook that was adopted in West Bengal in the 1951 series has now been accepted as the all India pattern for the present series. As envisaged in this plan, besides the census and official statistics, a brief introduction about the district has been given at the beginning of the volume so that the readers may get a brief but complete picture of the district.

Compilation of such a series of handbooks has been quite a stimulating task, and the author owes a deep debt of gratitude to Shri Asok Mitra, I.C.S., Registrar-General, India, for having given him this excellent opportunity and also for guiding him through the work with his advice and help.

In this connection, the author gratefully recalls the name of Shri J.C. Sen Gupta, I.A.S., formerly Superintendent of Census Operations, West Bengal & Sikkim, under whose able stewardship the 1961 Census was taken, and the results tabulated about completely. It is Shri Sen Gupta who gave the author the opportunity to be associated with the 1961 Census since its very inception. The author's colleagues and friends Shri J. Datta Gupta, W.B.C.S., Superintendent of Census Operations, West Bengal and Sikkim and Shri S. Sinha, W.B.C.S., Officer on Special Duty have always been a source of great inspiration to him. The debt he owes them for the care and attention with which they have guided him through the work cannot be repaid by mere acknowledgement. The census tables have been the handiwork of a number of zealous young persons who worked very hard under pressing demands characteristic of Census and produced the many complicated but excellent tables incorporated in this handbook. Majority of them are no longer in this office. The author gratefully recalls their silent contribution to the Census of 1961.

The author is full of gratitude to Shri B. Majumdar, I.A.S., District Magistrate, Malda, Shri D. Ghosh, W.B.C.S., Senior Deputy Collector, Malda and Shri A. K. Banerjee, W.B.C.S., Special Officer, Planning & Development and District Panchayat Officer, Malda, who helped him in many ways in getting official information quickly. Shri Banerjee's contribution of a precise account of the Panchayati Raj in the district is also thankfully acknowledged. The author is also grateful to Shri Amiya Kumar Banerjee, I.A.S., State Editor, District Gazetteers and his office for helping him with some information on the district. He is obliged to Dr. A. K. Saha, M.Sc., D. Phil (Cal.), Ph.D. (Toronto), Professor of Presidency College, Calcutta for revising the geological account of the district.

The author is particularly indebted to Shri S. Dutt Majumdar, I.A.S., Secretary, Home (C & E) Department for his keen interest and helpful attitude in resolving various administrative problems, the greatest of which was the selection of suitable private printing presses. The author's sincerest thanks are also due to Shri N. R. Chakraborty, M.A., W.B.C.S., Assistant Secretary, Home (C & E) Department, who has been always very kind to him in rendering all possible help, co-operation and guidance in the early publication of the handbook. Shri Amalendu Mookerjee, formerly, Assistant Editor, District Gazetteers, and now

Assistant Director of Tourism, helped the author in writing the history of the district. His untiring assiduity in going through the manuscript and suggesting various improvements, the author is unable to repay except with gratefulness.

The author gratefully remembers the notes of encouragemnt received from Shri A. Chandrasekhar, I.A.S., Officer on Special Duty and Sri K. D. Ballal, I.A.S., Central Tabulation Officer of the office of the Registrar-General, India for making the publication a success.

To his colleagues for many forms of assistance, specially to the printing section of the Census Office under the captaincy of Shri R. C. Bhar, the author remains grateful for the expeditious publication of the volume. The commendable services rendered by Shri M.C. Sarkar, Statistical Inspector and Shri S.C. Neogy, Tabulation Assistant deserve special mention. Shri S. Mookerjee, Superintendent, West Bengal Government Press helped him in farming out the voluminous publications to good private printing presses of Calcutta, for which the author is thankful to him.

His earnest thanks are also due to Shri A. K. Roy of M/s. Art Union Printing Works for the unfailing courtesy and utmost desptch with which he treated the Census work.

CENSUS OFFICE, Calcutta,
The 15th August, 1965.

NOTE ON SPELLING

In the notes and tables the spelling of the police stations follows generally that adopted by the Home (Police) Department, and of towns by the Land & Land Revenue Department, Government of West Bengal.

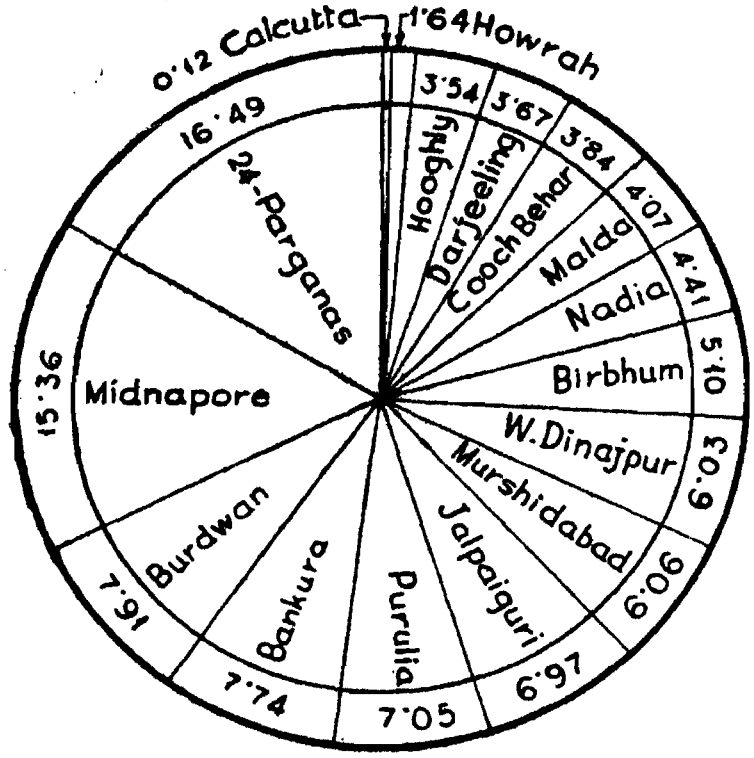

In the District Map appearing in the frontispiece, which has been prepared in the office of the Director of Land Records and Surveys, Government of West Bengal, the names of the police stations have been spelt as per the records of that office.

PART I

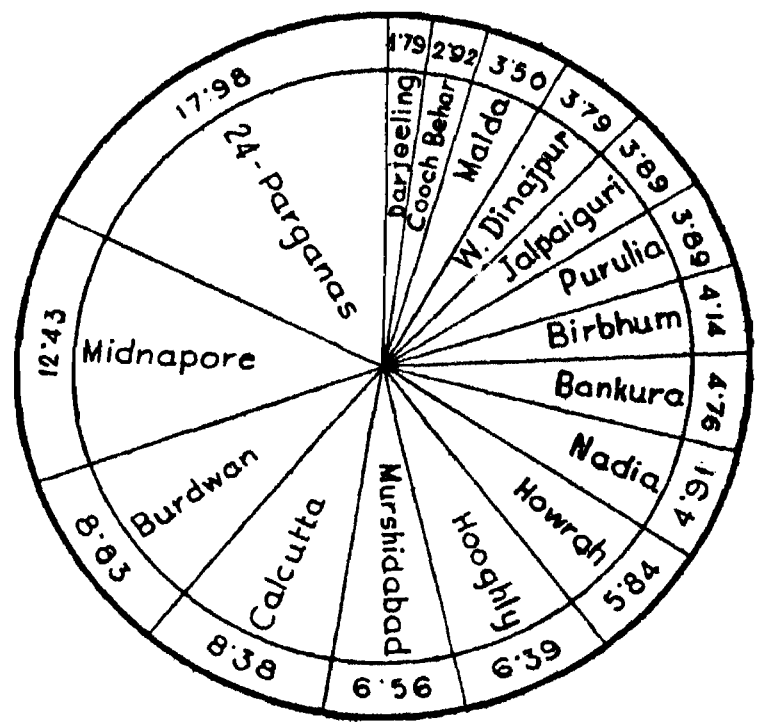

INTRODUCING THE DISTRICT

WEST BENGAL

PERCENTAGE OF AREA

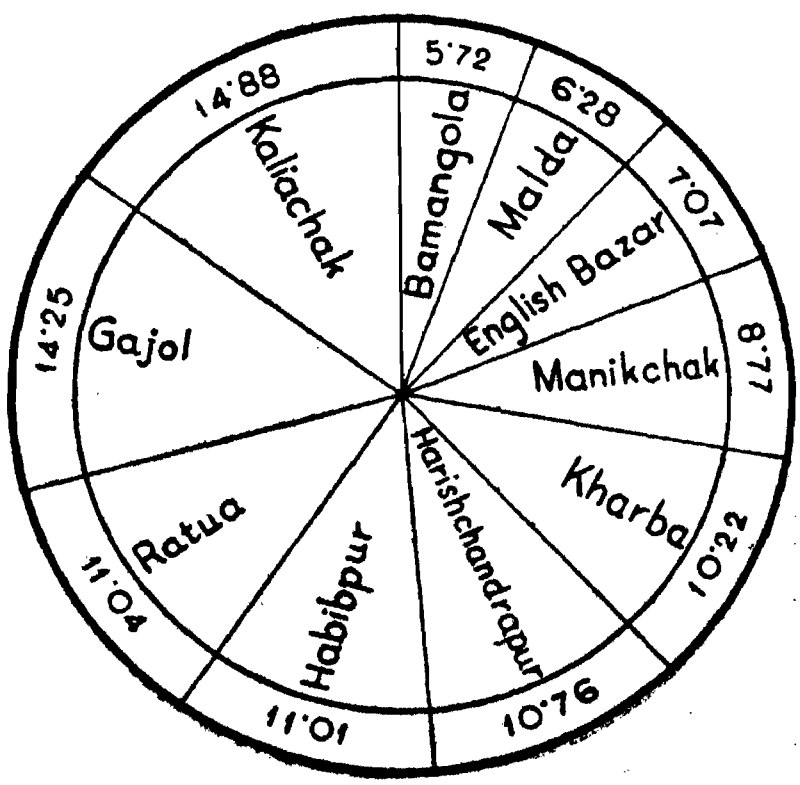

PERCENTAGE OF POPULATION

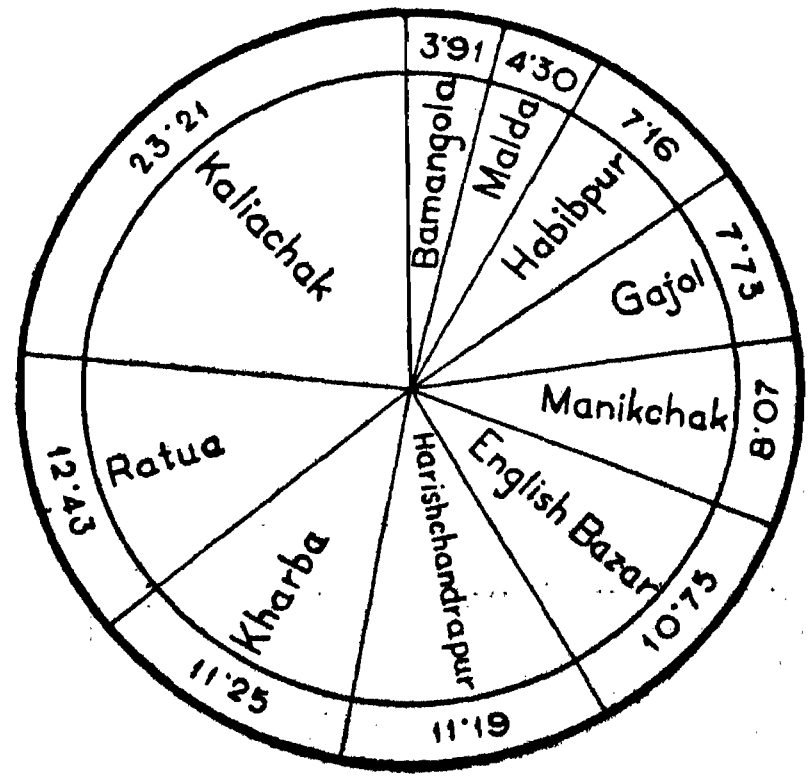

MALDA

PERCENTAGE OF AREA

PERCENTAGE OF POPULATION

above mentioned boundary and of the boundary following the course of the midstream of the main channel of the river Ganges as determined on the date of demarcation and not as it was on the date of the award. The demarcation of this line shall be made as soon as possible and at the latest within one year from the date of the publication of this decision.

The river Ganges forming the boundary between the districts of Malda and Murshidabad, due to the shifting of its course, sometimes threw *Char* islands either on the side of Malda or to the other. In this way there was some area adjustments between the districts Malda, Murshidabad and Santal Parganas. Between 1921 and 1931 an area of about 30 square miles was gained by Malda from Santal Parganas and Purnea, the largest single patch being the island of the Bhutni Diara tract in the bed of the Ganges.

Some minor changes in the Thana boundaries also took place after the present limits of the Thanas had been settled by the survey operations undertaken during 1928-35 in the district. In 1935, one *mauza* of Manikchak Police Station (J. L. No. 14) was merged with another *mauza* (J. L. No. 12) in the same police station. J. L. No. 31 of police station Kharba was transferred to Purnea District by Notification No. 49 Pl, dated 8th January, 1941. In this Census also the population of J. L. No. 14 has been merged with that of J. L. No. 12 of Manikchak Police Station. Certain small portions of police stations Porsha and Tapan of Old Dinajpur District, West of the Purnabhaba River were transferred to Bamangola Police Station of Malda.

In 1961 Census, the population of Ratua Police Station includes the population of five tolas of the *mauza* Govindpur (Thana No. 349 of Katihar Revenue Thana) on the Bihar-West Bengal border. West Bengal claimed these tolas as they had all along been administered as parts of this State. As per the decision of the Registrar General, India, Census in these tolas was taken by the West Bengal authorities without prejudice to the claims of either Government pending final settlement of the issue between them.

In the district, the total number of *mauzas* borne on the Jurisdiction List are 1,800, of which 191 are uninhabited. The total number of inhabited *mauzas* is 1,603 and two towns of Malda include six *mauzas* fully. The statement below indicates the changes in the number of inhabited villages during 1901-61 :

MALDA DISTRICT

1961	1,603
1951	1,577
1941	1,415
1931	1,711
1921	1,645
1911	3,502
1901	2,634

The district of Malda is at present under the Jalpaiguri Division, which has been recently created. The Government of West Bengal, Home (General Administration) Department Notification No. 998 G. A., dated the 4th March, 1963 created the Jalpaiguri Division. The Notification runs thus :

It is hereby notified for general information that the Governor is pleased to direct that there shall be a new Division in West Bengal, namely, the Jalpaiguri Division, with headquarters at Jalpaiguri, and that the said Division shall comprise the following districts, namely

(1) Darjeeling (2) Jalpaiguri (3) Cooch Beha
(4) Malda and (5) West Dinajpur

After the Partition of Bengal, but before March, 1963 this district was a constituent part of the Presidency Division.

The revenue, police and judicial jurisdiction of the district are conterminous with the geographical boundaries of the district. The District Magistrate and Collector is in over-all charge of the district administration. There is an Additional District Magistrate who is in immediate charge of the revenue administration of the district. The district has got only one subdivision and as such there is only one Subdivisional Officer in the district. The Subdivisional Officer, Sadar has his headquarters at English Bazar which is the headquarters town of the district as well. There are thirteen officers of the Executive Service in the district of whom 9 belong to West Bengal Civil Service and 4 to West Bengal Junior Civil Service. Of the nine Deputy Magistrate and Deputy Collectors one is the Sadar Subdivisional Officer and another is the Special Officer, Planning and Development. There are fifteen Development Blocks covering the ten police stations of the district. The Block Development Officers work under the supervision of the Special Officer, Planning and Development who himself works under the control of the District Magistrate and Collector. There is a Special Officer for Tribal Welfare in the district who belongs to the West Bengal Junior Civil Service. There is a Superintendent of Police in the district who is assisted by two Deputy Superintendents of Police. The District Magistrate and Collector is in over-all charge of the excise administration of the district. There is a Superintendent of Excise who belongs to the West Bengal Excise Service to help the District Magistrate in smooth running of the excise administration. There are four Sub-Inspectors at the headquarters and 3 Sub-Inspectors in the three different circles.

After the Partition of 1947, there existed the West Dinajpur-Darjeeling Judgeship whose jurisdiction extended over the four northern districts of West Bengal *viz.*, Darjeeling, Jalpaiguri, West Dinajpur and Malda. In 1956 this was split up into two. By Government of West Bengal,

Judicial Department Notification No. 2222 J, dated the 28th March 1956 a separate Judgeship for West Dinajpur-Malda was created and it started functioning with effect from the 1st April 1956, its headquarters being situated at Malda. A Subordinate Judgeship for West Dinajpur-Malda with its headquarters at Malda was also in operation with effect from the same date (created under the Government of West Bengal, Judicial Department Notification No. 2224 J, dated the 28th March 1956). There are two Courts of Munsifs at Malda. The First Court of Munsif has jurisdiction over five police stations *viz.*, English Bazar, Malda, Manikchak, Ratua and Habibpur and the remaining police stations fall under the jurisdiction of the Second Court of Munsif.

NOTE

Monmohan Chakrabatti in his 'A Summary of the Changes in the Jurisdiction of District in Bengal, 1757-1916' published in 1918 noted that the district of Malda was created in 1815. The relevant extract from his book is given below

Year of Order	Changes in jurisdiction since Permanent Settlement	References to Map, (+) or (−)			Remarks (Reasons and authority for the changes)
		Revenue	Civil	Criminal	
1815	District created with four thanas of Purnea, two of Dinajpur, and three of Rajshahi under a Joint Magistrate, but in Dinajpur Collectorate and zilla (except the Rajshahi thanas), with headquarters at Malda.	...	...	+25 +26 +27	Administrative efficiency Governor-General's order dated 25th April, 1815.

PHYSICAL ASPECTS

General Description

The district of Malda lies between the latitudes 25°32'08" and 24°40'20" in the northern hemisphere and is situated entirely to the north of the Tropic of Cancer. The easternmost extremity of the district is marked by 88°28'10" east longitudes and its western most extremity by 87°45'50" east longitudes. The chief town English Bazar is situated almost at the centre of the district at 25°0'14" north latitudes and 88°11'20" east longitudes.

With a territory extending over 1,391·9 square miles the district is bounded on the north by the Purnea District of Bihar and the West Dinajpur District, on the east by the Rajsahi District in East Pakistan, on the south by the Murshidabad District and on the west by the Murshidabad, Santal Parganas and Purnea Districts.

The district took its name from the town of Malda which is situated on the left bank of the river Mahananda at its junction with the river Kalindri, about four miles north from the district's present chief town English Bazar (Angrezabad or Engrezabad of the 18th century). In fact, after the commencement of the 19th century, the importance of town Malda was eclipsed by that of English Bazar. Upto the end of the 18th century the town Malda was a very important trading, commercial and manufacturing centre, but at the turn of the 19th century the town English Bazar being situated lower down the Mahananda became the new settlement of the East India Company because, due to its increasing importance and security, it was growing faster. At present English Bazar is popularly known as Malda and the town Malda of the early days is now known as Old Malda.

General Configuration

The general appearance of this part of the country is that of a low-lying plain, sloping gently towards the south presumably because of the southernly directions in which the rivers flow. The north-eastern part of the district having characteristics of the *barind* is an undulating country interspersed with ravines which is nowhere worthy of the name of hill. Some of these high lands have elevations upto 100 feet-from the level of the river Ganges. These elevations intersected by deep water channels sometimes have the appearance of small hills and make a considerable alteration in the general appearance of the country. In the plain area the village sites with their adjacent hills, embowered in luxuriant vegetation and swampy tract form the common scenery of the district.

Natural Division

The river Mahananda flowing north to south divides the district into two parts, the eastern part going by the name of the *barind*. This division corresponds to the boundary line of Rarh and Barendra which is still recognised by local tradition. The characteristic of the *barind* is an undulating country and the red clay soil geologically classed as old alluvium. The western part of the river Mahananda has again been divided into two parts by the river Kalindri flowing west to east from the river Ganges. The northern portion of this river is *tal* land. With the rise of the river there are high floods in this area which drain out by meandering streams into swamps. In Ratua and Harishchandrapur Thanas, a vast tract of uncultivated lands are covered with tall grass. The area lying to the south of the river Kalindri is the most fertile and thickly populated portion of the district. The most striking natural feature of this tract of land is a continuous line of high land and accretion formed in the bed of the Ganges by its ever changing currents and known as the *diara*, the long open stretches of which contrast with the patch-work-like effect of the miles of small embanked mulberry fields characteristic of the higher land of this portion of the district.

Geology

The district of Malda is covered by alluvium. Most of the area to the east of the Mahananda is occupied by an old alluvial formation, known as the *barind*, which is usually made up of massive, argillaceous beds of a pale reddish-brown hue, often weathering yellowish. Disseminated throughout this formation occur *kankar* and pisolitic ferruginous concretions. This old alluvial formation is considered to have formed in Pleistocene period. The *barind* area forms relatively high ground, and proceeding north to south the *barind* land surface has a slightly domical profile. A number of meandering streams, such as the Tangan and the Purnabhaba, traverse the *barind*, and the recent sediments deposited along their broad valleys cover the old alluvium.

The low-lying country to the west of the Mahananda is occupied by recent alluvium consisting of sandy clay and sand along the course of the rivers and fine silt consolidating into clay in the

flatter parts of the plain. However, the *barind* is found to underlie, near the surface, part of the *tal* depression between the Mahananda and the Kalindri showing that the present surface of the district is the result of denudation of the old alluvium of North Bengal, between which and the Rajmahal Hills, the Ganges forced its way south from the west.

Soil

The southern portion of the district of Malda which receives the Ganges silt, is the most fertile, and next in order comes the northern portion of the district, both these areas being largely double-cropped. The least fertile lands are the higher portions of the *barind*, and the poor soil of the *duba* (Bamangola and Habibpur) and *tal*.

Common soils of the later alluvium are clay with a small admixture of sand called *matiyal*, or *matal; dorash* or *doasla* a mixture of *matal* and sand, and as its name implies, suitable for growing two crops; the mixture of Ganges mud and fine sand known as *mashina*, *chama* or *jhenjhar*, sandy soil with a somewhat hard crust, only suitable for occasional cropping. *Basta* and *rangamati* are the names of the clay soils of the *barind* which are blackish and red respectively.

River System

Two important rivers, the Ganges and the Mahananda flow through the district of Malda. All the main rivers of the district are of Himalayan or sub-Himalayan origin and take a southernly course in flowing through the district. The Ganges first touches the district as it takes a sweep to the south round the Rajmahal Hills and forms about two-third of the western boundary and whole of the south-western boundary of the district. Considering the formation of the land on the western side of the district it could be conjectured with some amount of certainty that the Ganges gradually shifted its course westward. Originally the river flowed past the ancient City of Gaur, and for centuries that followed, it took to a process of gradual movement towards the west. Alluvion and diluvion had occurred constantly as a result of the continual change in the course of the river and this resulted in numerous changes of jurisdiction between the districts of Malda, Murshidabad and Santal Parganas. A subsidiary channel branched off at the point where the river sweeps south and rejoined the main stream after forming an island. The same *char* island known as Bhutni *diara* still exists, though in a smaller size than its original one. The position of the Ganges was, therefore, very similar in Rennell's time (1764-73) to what it is today. Buchanan Hamilton noted in 1810 that the general course of the river Ganges was away from plains of Malda. At the time of the revenue survey, Rajmahal was on the bank of the river but in 1870 the river took an eastward move leaving Rajmahal at its west and almost threatened to cut into the river Kalindri, as a result of which a good amount of erosion took place on the Malda bank. But at the present time, the river has been flowing through its western channel. A. Mitra's Account (1951) takes note of the popular belief that the river would again come down the eastern channel. As a matter of fact, in 1949-50, the river cut the east bank quite heavily.

The Ganges sends off a small stream Chhota Bhagirathi about two miles below Rajmahal. Presumably, this stream was an original channel of the river itself and is still revered as at least equal in holiness to any other part of the sacred stream. This is evident from the regular ceremonial bathing at Saduilapur Ghat all through the year. This stream flowing eastward roughly demarcates the boundary between Kaliachak and English Bazar Thanas. This, after being joined by another stream Pagla believed to be formerly a branch of the Ganges, moves unitedly to meet the river Mahananda in Pakistan. In summer, both the streams shrink to mere rivulets.

The Mahananda—The Mahananda has its origin in the Himalayas. It takes its rise from the Mahaldiram Range of Kurseong in the district of Darjeeling and flowing through Purnea first touches the district at its extreme north and from that point forms the boundary between the districts Malda and West Dinajpur for about 25 miles. During this course, the river receives as its sole tributary the Nagar from the east. On entering the district it flows down in a southernly direction and divides the district almost in two equal parts. The Kalindri is another important tributary of this river. In Renell's time, the river ran from Swarupganj Town along the western boundary of the Kharba Police Station instead of its present channel along the eastern boundary. The original channel is now known as Mora Mahananda. In Rennell's map, two subsidiary channels leading from the Mahananda into another river mentioned as the Nagore were shown. It can, therefore, be conjectured that the main stream of the Mahananda deserting its original course flowed through the subsidiary channels down the bed of the Nagore River which is no longer known to the local people.

At one time, the river Mahananda became a very important means of communication between lower Bengal and sub-Himalayan districts. But with the establishment of the railway the traffic of this river is merely limited to local imports and exports only. Buchanan Hamilton noted that boats carrying 500 maunds would go up the river as far as its junction with the Tangan almost throughout the year, but during the hot season

boats above 200 maunds failed to make their way above Malda. The position is very much the same today. The main channel of the river is fairly deep but narrow in places. The river above Old Malda is narrower and shallower, but down below, the river Kalindri as it joins the Mahananda fails to scour the silt accumulating with the passage of heavy flood waters of the Ganges. The Mahananda not being a silt carrying river is not subject to violent changes in its course. Alluvion and diluvion occur but the process is gradual. During rainy season the level of the river rises rapidly. The melting snow coupled with heavy rains has been known to cause a rise of about 10 feet within 24 hours. The maximum rise level is about 30 feet and the width of the river which in cold weather averages about 100 yards below Old Malda, increases to at least a quarter of a mile.

The Kalindri—This river is an important tributary to the Mahananda. In Rennell's map, this was shown simply as an offshoot of the eastern branch of the Ganges taking off about two miles north-west of Ratua Police Station. In Hunter's account and also in the District Gazetteer by Lambourn (1918), it is stated that the main body of its waters are brought down from the mountains of Nepal by the Panar River which assumes the name of Kalindri shortly before its entry into the district. But Buchanan Hamilton (1810), on the other hand, considered that the portion of the river lying in this district was nothing more than a branch of the Ganges. A. Mitra supports Buchanan Hamilton's views in the 1951 District Handbook. Probably the river became continuous later on. But at the time when Buchanan Hamilton wrote, the position of the Ganges was substantially the same as it is now. At the piont where the Ganges first touches the district as it sweeps round the Rajmahal Hills it is connected in the rains by a navigable channel down which the flood waters of the Ganges find a way. When the main channel of the Ganges is below Rajmahal as at present, the channel in the east on the Bhutni *diara* becomes shallow and large sandy *chars* form on that side of the river. Consequently when the level of the Ganges drops at the end of the rainy season its water is prevented by sand bars from flowing into the mouth of the channel. The Kalindri, thus, empties itself into the Mahananda and in hot weather its bed is nothing more than a series of pools. The Kalindri flowing mainly eastward divides the western part of the district into two distinct portions. The portion to the north of this river has been distinguished as *tal* land and the portion to the south as *diara*. The latter is the most fertile and hence the most populous area of the district. The Kalindri receives as its tributary the Kalkos, Kankar, Kos and Baromasia in the north. These four small streams cause heavy floods during the rainy season as they rise, but drain the entire *tal* land. After the rainy season is over and in the hot weather, they almost dry up. The changes in the course of the river Kalindri occasionally cause erosion of the English Bazar-Mathurapur Road. This river is navigable during the rainy season and fordable in the hot weather. The great depletion of the *tal* land clearly indicates that it must have been a river bed at one time, for along the whole length of the *tal* there are large swamps and *bils* which only recently have been reclaimed for cultivation.

Climate

An oppressive summer season, profuse rains and humid atmosphere all through the year are the main characteristics of the climate of the district Malda. The year may be divided into four seasons—hot summer from March to May, south-west monsoon from June to September, post monsoon from October to first half of November and the cold season covering rest of the year.

The hot season begins with strong westerly winds from the middle of March and continues upto the middle of May. The weather is oppressively hot and thunder-storms occur generally in the afternoon accompanied often with heavy rains with hails, on some occasions with severe squalls coming usually from the north-west. The westerly winds during this hot season are locally known as 'Pachhia' and often become the cause of wide spread village fires. So great is dread of this fire that sometimes villagers in the *diara* tract refrain from lighting their kitchen fires during day time and cook all their meals at night when it is easy to detect and put out a spark of mischief. The *kalbaishakhi* or the norwesters are often violent and cause sharp drop in temperature.

The rains commence in about the middle of June and continue upto September, the period from the middle of July to the middle of September being that of the greatest rainfall in the district. During the rains wind generally blows from the south veering to the east at their close. Storms and depressions of the Bay of Bengal in May and the post monsoon months often reach the district and its neighbourhood and cause widespread heavy rains and high winds. Depressions which originate at the head of the Bay of Bengal during the monsoon season also affect the district and thereby causing heavy rains. Rainfall during the monsoon is often associated with thunder. The post monsoon season *i.e.*, from October to first half of November is fairly pleasant. Of course, in October a few thunder-storms occur.

The cold season lasts till the end of February. In December and January, the cold after sun down is so bitter as it makes a fire quite agreeable. Occasional fog occurs in the cold season.

Rainfall

Records of rainfall in the district have been given in the Statistical Tables in Part IIB of this volume. The period from November to April being dry and fine, the normal rainfall during this period is under 1". August is the month of heaviest rainfall. The average annual rainfall in the district is 1,540·3 mm. (60·64"). The rainfall generally increases from the south-west to the north-east. The rainfall during the south-west monsoon season constitutes 78 per cent of the annual total. The variation in the rainfall from year to year was not very large during the last fifty years (1901-50). The highest annual rainfall was 137 per cent of the normal, which occurred in 1922. The lowest annual rainfall was in 1908 when it amounted to 59 per cent of the normal. In the same 50 year period rainfall was less than 80 per cent of the normal in 8 years, two of them being consecutive. On an average there are 67 rainy days (*i.e.*, days with rainfall of 2·5 mm. 10 cents or more) in a year. This number varies from 65 at Gajol to 70 at Malda.

Temperature

In a normal year days begin to be hot from the beginning of March. The day temperature reaches a maximum in April-May. The night temperature continues to rise even in the monsoon season. In fact, as the monsoon sets in, days become cooler but nights continue to be hot. The weather is very oppressive in summer due to the high moisture content in the air. Even sometimes in between two rains instead of feeling a soothing effect people of Malda experience the same oppressive weather because of high humidity and rising night temperature. Both days and nights begin to be cool as the south-west monsoon withdraws in the first week of October when the temperature drops down steadily. During the cold season the night temperature drops more rapidly than the day temperature. In January *i.e.*, in the coldest days the minimum temperature may go down by 4° or 5° below the freezing point. In April 1960 the mean maximum temperature was 39·5°C and the minimum temperature was only 22·6°C. In January 1960 the minimum temperature was 11°C and the mean maximum temperature was 24·7°C.

Humidity

The humidity of the atmosphere is high all through the year. It is lowest in March after which it increases steadily and reaches the highest point in August-September. In October there is a slight fall and at the beginning of February it begins to decrease further till the lowest grade of saturation is reached in March.

NOTE

The paragraph on Geology has been kindly contributed by Prof. A. K. Saha, M.Sc., D. Phil. (Cal.), Ph. D. (Toronto) of Presidency College, Calcutta.

HISTORY

The district of Malda takes its name from the town now called Old Malda. The word Malda comes from the Arabic word *mal* meaning wealth. The name possibly signifies that, during the medieval period, Malda, which was an imaortant centre of trade, was a place of great wealth and prosperity.

The district has a very rich history from ancient times. It will perhaps suffice for our purpose if we only indicate the land-marks as the full history is easily available from standard texts like the History of Bengal (Vols. I & II). A connected account of the history of the district would also be available in the Malda Volume of the new series of District Gazetteers of West Bengal that have begun to be published.

This region, which was called Gauda in ancient times appears to have formed a part of Pundravardhana. We find a reference to Gaudapura or the city of Gauda in the famous grammatical text of Panini who flourished in the fifth century B. C. Pundravardhana, of course including Gauda, formed a part of the Maurya Empire, and Kautilya in his *Arthasastra* mentions a kind of silver that was available in the country of Gauda. North Bengal formed a part of the Gupta Empire possibly since its inception, and, in any case, it was part of Samudragupta's empire. Gupta rule lasted in this region till about the middle of the 6th century A.D. Gauda appears to have become a distinct political entity during the reign of Shashanka, the Bengalee contemporary and rival of Emperor Harshavardhana. Shashanka's capital was, however, situated in the district of Murshidabad. Shashanka's death was followed by a series of political upheavals commonly termed *matsyanyaya* or the law of fishes under which there was no authority to enforce the law and the strong oppressed the weak. Ultimately, in about 750 A.D., the chieftains with the support of the people elected Gopala of Varendree (Varendree was the land between the Ganges and the Karotoya) to the throne of Gauda. This election of Gopala forms a unique feature of the ancient history of Bengal, a parallel of which can scarcely be found elsewhere. Gopala's son Dharmapala sought to establish his supremacy in North India. The powerful Gurjara-Pratiharas also had the same objective in view, and the two powers came into clash. Dharmapala was defeated by the Pratihara king, Vatsaraja in the Doab, but the powerful South Indian potentate, king Dhruba of the Rashtrakuta dynasty inflicted a disastrous defeat upon Vatsaraja and sent him fleeing to the desert. He defeated Dharmapala also, but as he soon returned to the Deccan, this defeat had virtually no effect on Dharmapala's fortunes. Dharmapala conquered many powerful kingdoms and placed his protege Chakrayudha on the throne of Kanyakubja (Kanauj) which was at the time considered the political centre of North India. Dharmapala's bid for suzerainty over the whole of North India was however again challenged by the Gurjara-Pratiharas. Dharmapala was defeated by Vatsaraja's son Nagabhata II. But Nagabhata II was again driven away by his hereditary enemy, the Rashtrakuta king Govinda III with whom Dharmapala had entered into an alliance. Dharmapala's son Devapala is said to have extended the boundaries of his kingdom as far as the Himalayas in the north, the Vindhyachala in the south and the seas in the east and the west. After the death of Devapala, however, the Pala emperors ceased to have a significant role in north Indian politics, but their firm sway over Bengal proper continued. In the second half of the eleventh century A.D., the Pala power was temporarily ousted by a rebellion led by the Kaibarta chief Divyaka. It was, however, soon restored by the Pala prince Ramapala. In about two decades of the death of Ramapala, and after about four hundred years of rule, the Pala power was however ousted by the Senas.

The district of Malda was the centre of political power during the Pala period, and enjoyed peace and good government. In fact, the Pala period may be termed the 'golden age' of Bengal during the ancient period. The Palas had a highly developed administrative system with a hierarchy of officials. Vedic learning flourished. Abhinanda's Ramacharita and Sandhyakara Nandi's more well-known *kavya* of the same name were composed during the Pala period. The Palas were Buddhists and encouraged spread of Buddhist teachings. Jagaddala Vihara in Varendree was one of the most important Buddhist institutions of the period and famous Buddhist teachers like Vibhutichandra, Danasila, Mokshakaragupta and Subhakaragupta belonged to this institution. The Pala kings, though Buddhists, were however not only tolerant of the Vedic religion but also patronised Brahminism and had Brahmin ministers.

Vijayasena of the Sena dynasty which held a local chieftaincy in Radha ousted the Pala king Madanapala from North Bengal about the middle of the twelfth century, and became king of Gauda.

The Sena administrative machinery was similar to that of the Palas, only a little more elaborate. The Senas were ardent followers of

the Brahminical religion, and Brahminism flourished under their patronage. Many ritualistic texts were written during their reign. Gauda, known as Lakshmanavati during the reign of Lakshmanasena, was one of the Sena capitals.

As is well known, Muhammad Bakhtyar Khalji suddenly attacked Lakshmanasena in his camp at Nadia. Lakshmanasena fled, and Bakhtyar dashed to North Bengal and completed his conquest of Varendree with the city of Gauda by 1203 A.D. Lakhnawati (Lakshmanavati) became the Muslim capital in about 1220 A.D. The Muslims began on the one hand to spread out by subjugating Hindu Princes and Chieftains, and on the other went on fighting amongst themselves for the throne of Gaur-Lakhnawati (Gauda-Lakshmanavati). The Muslim rulers of Lakhnawati repeatedly asserted their independence of the Delhi Sultanate. On several occasions the Delhi Sultans reduced the rulers of Lakhnawati to submission, but there appears to have been no lasting effect. Sultan Mughisuddin Tughril's assertion of independence (1280 A.D.) is worth particular mention. Sultan Mughisuddin was popular with both Hindus and Muslims, and it was after considerable difficulty that Sultan Ghiyasuddin Balban of Delhi succeeded in ousting him from Lakhnawati and ultimately surprising and killing him.

The Muslim rulers of Lakhnawati took vigorous steps for the encouragement of Islamic religion and studies. They established maqtabs and madrasas, demolished Hindu and Buddhist temples and constructed mosques at the same places and out of the same materials. They also encouraged their religious teachers to carry on vigorous proselytizing activities.

The accession of Sultan Shamsuddin Ilyas Shah to the throne of Lakhnawati in 1342 A.D., marks the beginning of a new era in the medieval history of Bengal. Sultan Firuz Shah Tughluq of Delhi invaded Bengal twice during the reign of Sultan Shamsuddin and his son Sultan Sikandar, but on both occasions the invasions were fruitless, and ultimately a treaty of friendship was entered into by the two kings. Sultan Ghiyasuddin Azam Shah of the Ilyas Shahi dynasty exchanged embassies with China and we find from the account of Mahuan, who was attached to the Chinese mission, that the silk and cotton textile industries were well developed. There was possibly at this time good overseas trade, and ships were manufactured for that purpose.

The Ilyas Shahi dynasty was temporarily supplanted by a local Hindu chief, Ganesh, who was a powerful noble in the Ilyas Shahi court and who ascended the throne under the title of Danujamardanadeva. The Ilyas Shahi dynasty was, however, recalled to the throne after some time.

The Ilyas Shahis were great patrons of culture; Sultan Sikandar constructed the magnificent Adina Mosque in Pandua, although that was with materials from Hindu temples. Sultan Ruknuddin Barbak Shah of the Ilyas Shahi dynsty evinced keen interest in Bengali literature. The Ilyas Shahi kings were tolerent and enlightened administrators. As observed in the History of Bengal, Vol. II : "Tolerance was their greatest asset. To have ruled over a people of an alien faith was itself a great achievement; to be reinstated on the throne after twenty-five years' exclusion was an even greater one. It was a singular proof of their popularity...."

Ala-ud-din Husain Shah ascended the throne in 1493 A.D. He secured the western frontier of his kingdom. He also conquered Kamtapur and Tipperah, ousted the Arakaneese from Chittagong and raided Orissa. Ala-ud-din Husain Shah wholeheartedly identified himself with the hopes and aspirations of Bengal, and maintained the old traditions. As observed in the History of Bengal, Vol. II, he gave to the country "peace, justice and political glory which she had not witnessed since the days of Ilyas. Posterity remembers him not only for the material advantages he conferred on the people, but for his liberalism and catholicity of mind of which it is hard to find a parallel in Muslim India until the age of the great Akbar ....His literary appreciation....was extended in an increasing degree to the vernacular literature. ....among the Bengali writers Maladhar Basu, Bipradas, Bijay Gupta (Chhota Vidyapati), and Jasoraj Khan mention his name....Husain was unlucky in not having an Abul Fazl to record his sayings and glorify his actions....'the name of Husain Shah, the good, is still remembered from the frontiers of Orissa to the Brahmaputra' (Blocmann, J.A.S.B., 1873, 291)". Ala-ud-din Husain Shah was, to quote the same source, "unquestionably the best, if not the greatest, of the medieval rulers of Bengal".

Sher Khan (later on Sher Shah) captured and devastated Gaur, and Bengal virtually remained under the control of the Surs till the death of Islam Shah.

In 1574 the Mughal General Munim Khan entered Tanda which was four miles west of Gaur, and which was at the time the capital. Munim Khan shifted the capital to the deserted city of Gaur, but it had to be vacated very soon due to outbreak of epidemic. Then followed the systematic subjugation of the Afghans and the local Hindu Chiefs, specially those of East Bengal, by the Mughals. Man Singh, who took over as Viceroy in 1594 A.D., shifted the capital from Tanda

to Akbarnagar (Rajmahal). Towards the end of the seventeenth century, the rebel Rahim Khan occupied a large area of western and northern Bengal including Malda. He was however soon driven out of Malda and ultimately subjugated.

The Mughals brought back peace to Bengal, and unified it with their Indian Empire. Unlike their illustrious predecessors like the Ilyas Shahis and the Husain Shahis, the Mughals however did not identify themselves with popular hopes and aspirations, and the local people, Hindus and Muslims alike, had no place in the administrative set-up. Most of the Mughal officers squeezed the people dry in order to get rich as quickly as possible.

The Mughal period however witnessed the arrival of the English and other foreign traders in Bengal, and the foreign trade increased by leaps and bounds. The *muslin* trade was in a flourishing condition, and we find a fine piece of *muslin* purchased at Malda by a Mughal Officer at as high a price as Rs. 4,000/-. According to tradition there was a market for the local silks even in Russia. The English established a factory at Malda in 1680 A.D. The French, the Dutch and other traders had also tried to get a foothold in the district, but without much success. The English began a brisk trade in *muslins*, silks and cotton textiles. The English trade at Malda was, however, almot immediately interrupted for some time when the had to leave Bengal for the time being. In 1690 the English returned, and their business at Malda was also resumed at about this time. After the Battle of Plassey, and especially after the East India Company's assumption of the Diwani in 1765, the Company's trade at Malda flourished all the more. It is interesting to note that the Commercial Residents of the Company at different factories were authorised to draw on the revenue treasuries of the districts for the money they needed for the Company's trading activities. Towards the end of the eighteenth century we find the Company's investments through the Malda factory amounting to £ 50,000. However, the monopolistic buying of the Company, and, what is more important, the invention of machines in England resulted in the gradual loss of the English and continental market for the silk and cotton goods of India, and the industry gradually declined.

Towards the close of the eighteenth century, Malda along with other parts of North Bengal were subjected to plundering raids by the Sannyasis and the Faqirs. These raids assumed rather serious proportions, and the Government had to send forces to put these malefactors down.

The district of Malda was created, as has been said earlier, in 1813 with several Thanas from the districts of Purnea, Dinajpur and Rajsahi. In 1947 the district was partioned according to the award of Sir Cyril Radcliffe, and the portion that was apportioned to India was constituted into the present district of Malda. The other portion has been in Pakistan.

THE PEOPLE

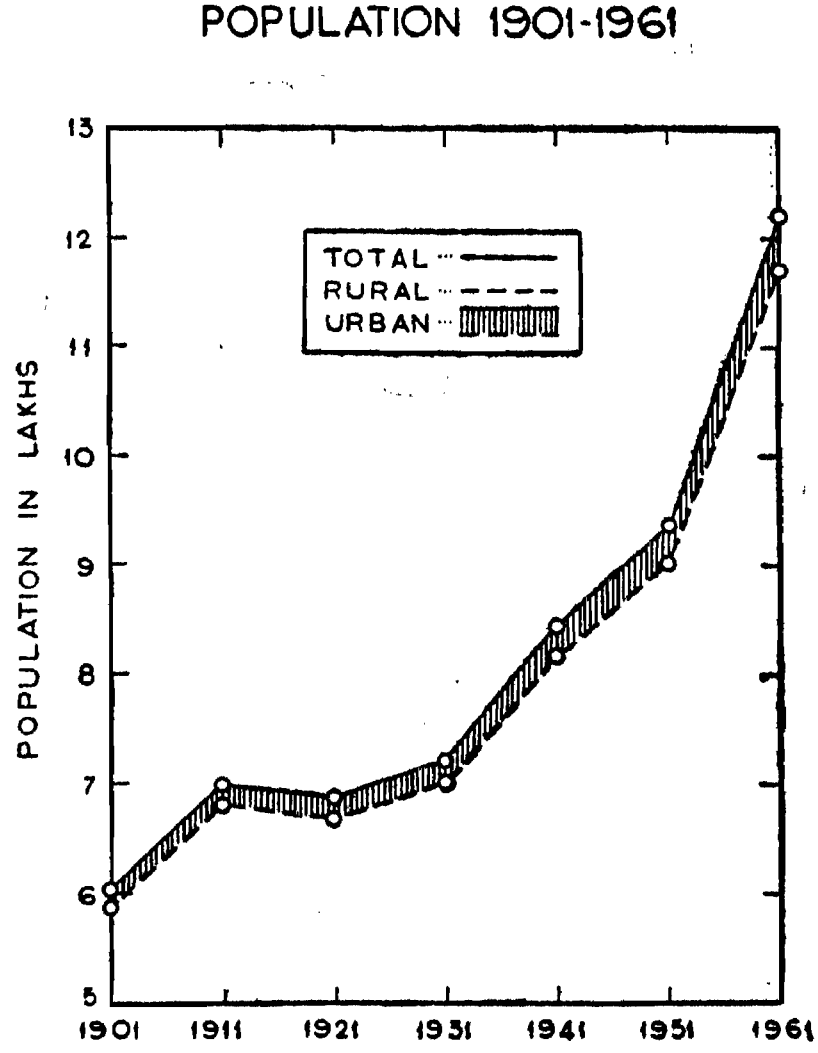

Population

The district is inhabited by 1,221,923 persons (males 621,990 ; females 599,933) according to the Census, 1961. Only ten years back the population of the district was 937,580. During these last ten years the population of Malda increased by 284,343 *i.e.*, 30·33 per cent over its population of 1951, the highest rate observed in the district in any of the last Census decades. The rural population of the district have increased by 29·78 per cent during the last decade while the urban population have gone up by 44·44 per cent. The following statement shows the growth of population in Malda District since 1901 separately for its total, rural and urban sectors :

Total Rural Urban	Year	Population	Decade Variation	Percentage Decade Variation
1	2	3	4	5
Total	1901	603,649	...	...
	1911	698,547	+ 94,898	+15.72

Since 1921 the district has always shown a lower growth rate of population than the West Bengal State as a whole. During the first twenty years of the present century, however, in both the Census decades 1901-11 and 1911-21, the district exceeded the rate of growth of population of the State. While during 1901-11 the whole of West Bengal registered an increase by only 6·25 per cent, the district of Malda showed an increase by more than 15·00 per cent over its population of 1901. During the next forty years *i.e.*, 1921-61 while the population of West Bengal have increased by nearly cent per cent, the population of Malda increased only by 78·00 per cent over its population of 1921. Since the beginning of this century while West Bengal registered an increase of its population by 106·00 per cent, Malda showed an increase of 102·00 per cent over its population of 1901. Since the year when the first Census was taken, Malda showed a steady increase of population excepting during the decade 1911-21. The district suffered from a depletion during the influenza epidemic of 1918-19. Though Malda's loss was not as much as it was observed in the case of entire State.

The population of the district in each of the last seven Censuses has been shown graphically below for total, rural and urban :

It is interesting to trace the growth of population in the district since the first Census was taken. During the period 1872-81 malarial fever took away many lives in several police stations and caused a net decrease of population in those areas. But during the next ten years, the district showed some positive signs of growing prosperity. The opening out of the *barind* by the Santals in 1876 helped the eastern region of the district prosper to a great extent. Ratua and Manikchak Police Stations also showed a phenomenal increase of population during

1881-91. Possibly the immigration of *shershabadia* muslims from Farrakka, Shamshirganj and Suti Police Stations of Murshidabad District was responsible for this. In 1900, a bad

outbreak of cholera took a heavy toll of life in English Bazar but in the first decade of the present century, the district made a steady progress in so far as the population growth is concerned. Except in the *barind* the general condition of the people was more prosperous than in other years. Crops were generally good during this period, though in 1908-9 the *barind* area experienced some scarcity of winter rice crops due to short rainfall. Another important feature in this decade was the opening of the Katihar-Godagari Railway which traversed the district from north-west to south-east. As a natural corollary to the opening of a railway, various distribution centres sprang up in the district and also the development of competitive marketing in jute, rice and other produces helped cultivators to profit considerably. This railway also flung open the ways for immigration into the thinly populated areas. Santals took this opportunity to come over to the *barind* and engaged themselves in reclamation of waste lands. The *shershabadia* muslims came to cultivate the new alluvial formation in the *diara* tract. 1911-21 was the decade of epidemic. Malaria on more than one occasion assumed epidemic form. Towards the later half of the decade, influenza epidemic also caused depletion of population in the district. During 1921-31, the decline of silk industry caused a set back in Kaliachak. The decline of lac industry in Ratua and Manikchak could not do so much harm in the growth rate of population because the *chars* thrown up by the Ganges on its way towards Santal Parganas attracted quite a number of immigrants from Murshidabad. In 1925-26, the *barind* area faced severe scarcity due to declining fertility of the soil and resisted further immigration into this area. The decade 1931-41 was a period of steady increase of population all through the district. The Great Famine of 1943 followed by the serious epidemic of 1944 resulted in decrease in the growth rate of population of the

district. Partition of Bengal in 1947 brought about influx of displaced persons from Pakistan and also some voluntary migration to that country. It is interesting to note that while all the police stations of Malda District registered a decrease during this decade, the police stations Habibpur and Manikchak situated on the south-western corner of the district registered an increase over their population of 1941. During 1951-61, the police stations English Bazar and Malda have grown most, next to them Kharba, Harishchandrapur and Ratua. The police stations in the *barind* area have grown at a lesser rate than the district average. The statements given above show the variations in population of the police stations and subdivision of the district between 1901-61.

The map at page xv gives a visual representation of the inter-censal growth rate of population in each Thana of the district.

From a study of the vital statistics of the district, it is observed that the death rate has appreciably fallen during this decade. Public health measures could control malaria and other epidemics which have been conspicuous by their absence during the last ten years. In the decade 1941-50, the death rate (registered) was 16·3, but this rate has been reduced nearly by 50.00 per cent in the present decade. The birth rate (registered), however, has not appreciably changed. It appears to have rather slightly gone up during 1951-60. If the registered births are taken into account, the position would be a bit confusing. If the number of births per thousand total population calculated on the estimated population on the 30th June of each year as derived by the Directorate of Health Services is taken into account it is observed that during 1951-60 the birth rate is more or less the same.

This is evident from the Table 2·1 on Vital Statistics in Part II B of this volume. The following statement gives an account of inter-census growth rate of population as compared to inter-census birth rate and death rate :

State/ District	Geometric Mean Population of Decade				Inter-Census Population Growth Rate				Inter-Census Birth Rate (Registered)			
	1951-60	1941-50	1931-40	1921-30	1951-60	1941-50	1931-40	1921-30	1951-60	1941-50	1931-40	1921-30
1	2	3	4	5	6	7	8	9	10	11	12	13
West Bengal	30,409,483	24,733,004	20,988,831	18,176,419	+28.4	+12.4	+20.6	+ 7.8	21.4	20.3	27.2	28.3
Malda	1,073,482	890,134	780,740	703,170	+26.5	+10.5	+15.9	+ 4.9	20.7	18.7	28.5	32.2

State/ District	Inter-Census Death Rate (Registered)				Inter-Census Rate of Natural Increase (Registered)				Migration-*cum*-Registration Error (Rate)			
	1951-60	1941-50	1931-40	1921-30	1951-60	1941-50	1931-40	1921-30	1951-60	1941-50	1931-40	1921-30
	14	15	16	17	18	19	20	21	22	23	24	25
West Bengal	8.8	18.7	20.7	25.7	+12.6	+ 1.6	+ 6.5	+ 2.6	+15.8	+10.9	+14.1	+ 5.3
Malda	8.7	16.3	20.1	27.0	+12.0	+ 2.5	+ 8.4	+ 5.3	+14.5	+ 8.0	+ 7.5	— 0.4

From this statement, it is seen that the inter-census rate of natural increase (registered) has gone up to 12·00 per cent during the last decade while it was only 2·5 per cent in 1941-50. Of course, the migration-*cum*-registration error (rate) has been found to be 14·5 per cent.

Density

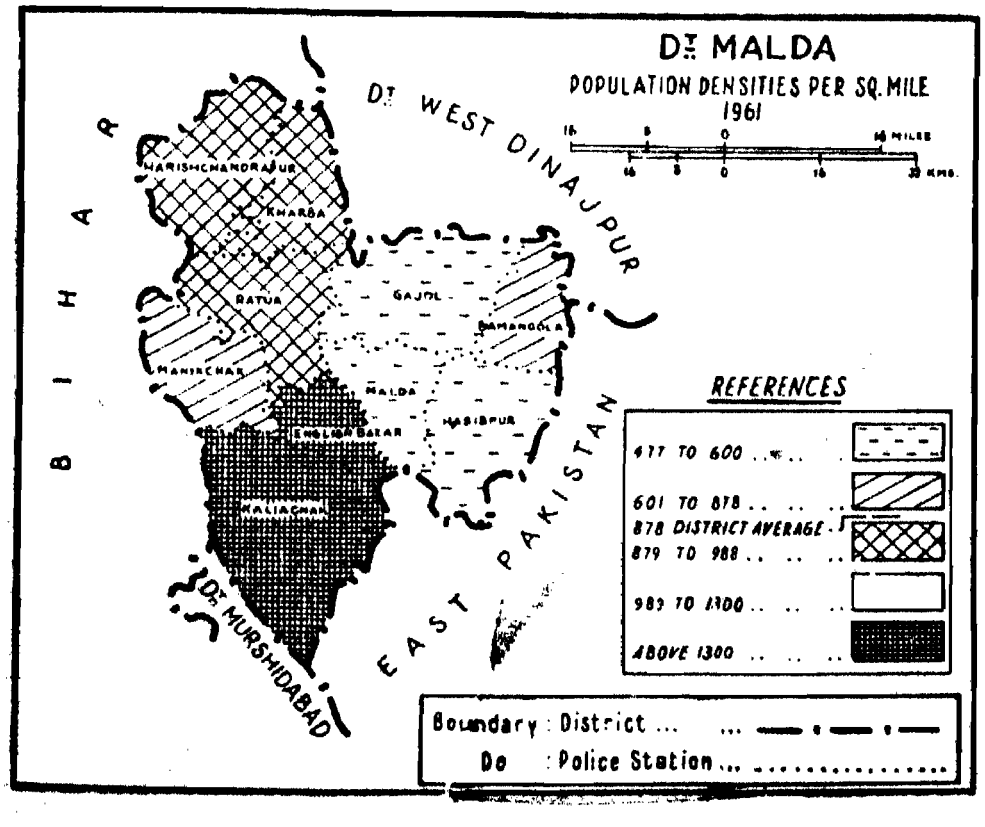

In 1951, only 674 persons were occupying one square mile of area on an average in the district. The 1961 Census reveals that the number of persons occupying one square mile of area on an average has increased to 878, though the density in the district is much below the State average. The number of persons per square mile has been found to be 1,021 in the State of West Bengal. In the rural sector as well as in the urban sector, the density in the district has risen considerably from that of 1951. The rural density of the district is 843 while it is 787 for the entire State. Towns of Malda likewise are more densely populated than an average urban area of the State. The urban density of the State is only 12,978 *vis-a-vis* the district urban density of 16,706. The statement below indicates changes in density during the last six decades for the rural and urban areas separately for the district :

Total Rural Urban	1961	1951	1941	1931	1921	1911	1901
Total	878	674	607	518	493	502	434
Rural	843	650	588	505	482	490	422
Urban	16,706	11,342	8,767	6,350	5,549	5,830	5,616

Two police stations of the district *viz.*, English Bazar and Kaliachak have recorded a density higher even than the State average. Kaliachak Police Station of Malda has all along been the most densely populated area of the district since 1901. The alluvial soil of this tract because of its high fertility attracts persons to settle down there. The Ganges flowing through its southern portion throws a large amount of silt to the side of Kaliachak making the soil of this area richer in fertility. This police station also has one of most important and profitable cottage industries in the State namely silk rearing and weaving. The majority of population of this area who do not work in the agricultural sector are profitably employed in this industry. Though Kaliachak's growth of population has not been to the extent observed in other areas of the district, its density has increased quite considerably and is still the highest in the district. The high density with lesser growth rate of population reasonably indicates that the pressure on the soil in this region is approaching the maximum.

English Bazar Police Station shows the next higher density in the district. It is remarkable that police stations situated on the western side of the district have shown higher density ranges than those observed in the *barind* areas. The low fertility of the soil in the *barind* area appears to have resisted more concentration of habitation in that region. The following statement shows variation in density (persons per square mile) of the district during the last sixty years :

District/Subdivision/ Police Station	Variation in Density (Persons per Square Mile)						
	1961	1951	1941	1931	1921	1911	1901
MALDA DISTRICT	**878**	**674**	**607**	**518**	**493**	**502**	**434**
Sadar Subdivision	**878**	**674**	**607**	**518**	**493**	**502**	**434**
English Bazar	1,335	954	849	708	649	748	715
Kaliachak	1,370	1,092	938	795	762	796	716
Malda	600	428	389	350	374	393	338
Habibpur	571	471	341	319	309	325	279
Ratua	988	754	670	558	527	551	451
Manikchak	808	635	530	462	452	472	386
Kharba	967	707	725	588	566	579	498
Harishchandrapur	912	675	667	551	480	381	318
Gajol	477	369	370	338	332	323	267
Bamangola	601	498	452	392	388	378	312

Sex Ratio

In 1901 and 1911, the district had a larger number of females than males. Since then the sex ratio was on the decline. While it was 1,007 in 1901, it has come down to 965 in 1961. But that is still the highest amongst the five north Bengal districts and shows a much higher proportion of female population as compared to that of the State of West Bengal as a whole. In West Bengal there are only 878 females per one thousand males according to 1961 Census. In all the Censuses since 1901 Malda has shown a higher sex ratio than that of the State. In case of the State of West Bengal the sex ratio has taken a turn towards improvement since 1951, before which year it had a declining tendency. But in Malda the sex ratio has been going down in each Census year since 1901, though its

variation between 1951-61 has been of negligible magnitude. The following statement gives an account of the variations in the proportion of sexes between the last sixty years for the district of Malda as compared to those for the entire State of West Bengal for total, rural and urban areas separately :

	No. of Females per 1,000 Males					
	Malda District			West Bengal		
Year	Total	Rural	Urban	Total	Rural	Urban
1901	1,007	1,012	854	945	994	652
1911	1,004	1,008	861	925	982	614
1921	991	996	802	905	970	591
1931	989	995	814	890	961	578
1941	983	988	827	852	945	559
1951	*966*	*971*	*853*	*865*	*939*	*660*
1961	965	969	873	878	943	701

The changes in sex ratio between 1901 and 1961 have not been of the same magnitude in the district of Malda as in West Bengal as a whole.

In the rural areas of Malda there are 969 females per one thousand males as per Census 1961, while in the urban areas there are only 873 females per one thousand males. Both in the rural and urban sectors the sex ratio of the district is higher than that of the State. The rural-urban difference in sex ratio indicates generally the selective migration of the male population from the rural areas to the urban areas in search of education and employment.

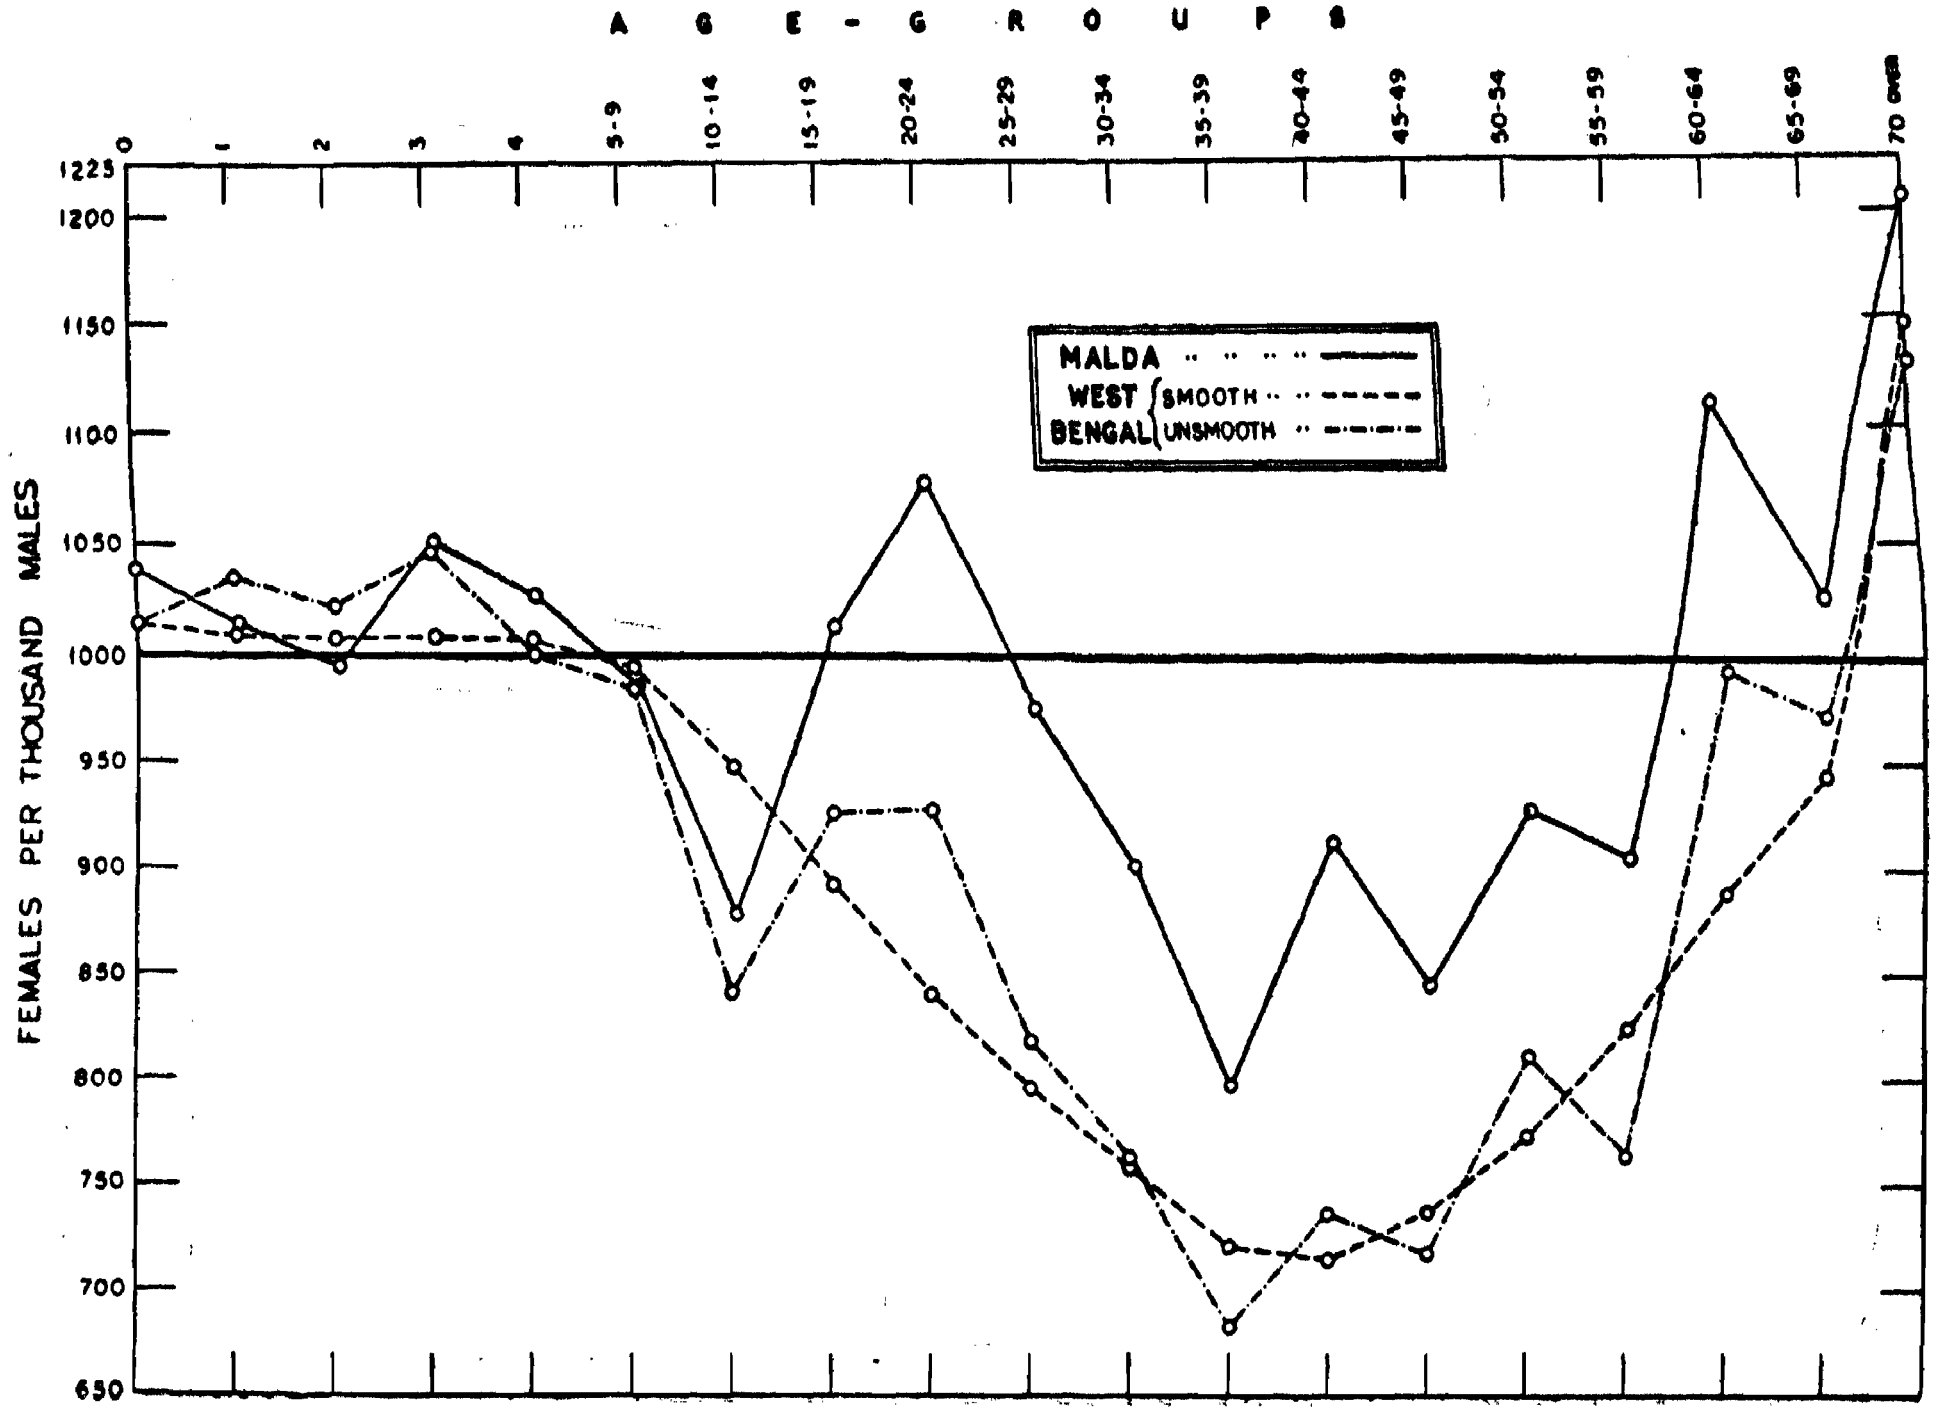

The sex ratio beyond the age-group 25-29 upto the age-group 55-59 appears to be lower than the district average. In the age-group 0-4, the proportion of female population to males is pretty high. There are more female children of the ages 0, 1, 3 and 4 than males in the district. Low mortality of the female children reasonably explains this state of affairs. In the age-group 10-14 there is a sharp fall in the sex ratio but it begins to improve in the next higher age-groups and reaches a maximum in the age-group 20-24. The marked fall in the sex ratio at the age-group 10-14 is a common feature in almost every part of the world. The over-statement of age in the age-group 10-14 is somehow compensated by sharp rise in the sex ratio in the age-group 20-24. In the next higher age-groups the sex ratio falls by a considerable degree. It is lowest in the age-group 35-39. After 39, the sex ratio fluctuates from one age-group to another. Digital preference acts as particular bias in the age returns and women have a special preference to return their ages in the number of years ending with zero. This is visualised in the curve given at page xix Sex ratio in different age-groups as is observed in Malda follows the same pattern as in West Bengal as a whole.

The statement below and the diagram at page xix give the proportion of the sexes in different age-groups in the district of Malda and the State of West Bengal. The sex ratio calculated on the smoothed data of age returns for the State of West Bengal has also been shown within brackets against each age-group. The curve on smooth data for West Bengal has also been shown in the diagram.

Age-group	West Bengal	Malda
0	1,014(1,014)	1,038
1	1,035(1,009)	1,014
2	1,021(1,008)	995
3	1,046(1,008)	1,051
4	1,000(1,007)	1,027

60-64	994(888)	1,112
65-69	973(945)	1,026
70+	1,130(1,148)	1,207

SEX RATIO

The tract having alluvial soil and the police Stations of Gajol and Bamangola in the *barind* area have shown a higher sex ratio than the district average. Manikchak Police Station shows quite a fair proportion of sexes. In the English Bazar Police Station the sex ratio has been the lowest in the district. The statement below gives the number of females per one thousand males in the administrative units of Malda for total, rural and urban :

Name of Unit	No. of Females per 1,000 Males		
	Total	Rural	Urban
Malda District . .	**965**	**969**	**873**
English Bazar . .	921	947	874
Kaliachak . . .	987	987	..
Malda . . .	939	947	868
Habibpur . . .	947	947	..
Ratua . . .	968	968	..
Manikchak . .	992	992	..
Kharba . . .	951	951	..
Harishchandrapur .	964	964	..
Gajol . . .	971	971	..
Bamangola . .	977	977	..

Rural Population

95·84 per cent of the population of Malda live in villages. This percentage of rural population is the highest among all the districts of West Bengal. In the State of West Bengal as a whole only 75·55 per cent of the population reside in villages. In 1951 Malda's percentage of rural population was 96·25. During these ten years, the rural population increased by 29·78 per cent in Malda, though this increase was less than that in the rural sector of the State as a whole: The growth of rural population in the district has even been lower than that of the total population of the district. This is because urban population grew faster than, and even at the cost of rural population. In the decade 1941-51 growth of population was only to the extent of 10·44 per cent. In the decade previous to that the rural population of the district had grown at a faster rate (16·61 per cent).

A village is co-terminus with a revenue survey *mauza* for the purpose of Census. In 1961, a village as a general rule, was taken to be a revenue survey *mauza* having a Jurisdiction List number. This was the case in all past Censuses. In 1901-11 when the cadestral survey had not been completed in most of the districts and when the *mauza* boundaries laid down in the general revenue survey was not always clearly traceable, the term village in Census parlance was rather indeterminate, because it had different meanings in different areas. Sometimes it meant a survey *mauza* and sometimes a residential village. It was since 1921 onwards that the term village corresponded to a revenue survey *mauza*.

Table A-III in Part IIA of this volume gives the number of villages according to the different size class of population as per 1961 Census for the district and its different administrative units. In 1961, as many as 1,603 villages were found to be inhabited. The number of inhabited villages in 1951 was 1,577. In 1941, this was even less (1,415). The total number of villages in the State of West Bengal decreased by nine during the last ten years. While it was 38,474 in 1951, it became 38,465 in 1961.

In Malda, the maximum number of villages have a population of less than 500. They account for nearly 59·00 per cent of the total number of villages but persons living in such villages account for only 18·85 per cent of the total rural population of the district. In 1951, this class of villages accounted for 66·00 per cent of total number of villages in the district. Actually the villages classified by size class of population in the range 1,000 to 1,999 gained more importance in 1961. The villages having a population of more than 1,000 but less than 2,000 account for 14·00 per cent of the total number of villages in 1961, while they accounted for only 9·9 per cent in 1951. Persons living in this class account for 26·00 per cent total rural population of the district in 1961, while ten years ago they accounted for only 23·88 per cent. Thus the villages of smaller sizes are diminishing faster at the cost of rapid growth of the villages of higher population sizes. The statement given below shows the percentage distribution of villages and population by class of villages of the district as compared to that of the State in 1951-61 :

		West Bengal		Malda District	
Class of villages (According to size of population)	Year	Percentage of number of villages in this class to total number of villages	Percentage of population in this class to total population	Percentage of number of villages in this class to total number of villages	Percentage of population in this class to total population
1	2	3	4	5	6
Less than 500 .	1961	57.97	19.24	59.18	18.85
	1951	67.69	27.95	66.08	24.88
500—999 .	1961	22.14	22.87	18.66	18.27
	1951	19.68	26.41	18.90	23.44

	1951	3.15	16.97	4.82	23.77
5,000—9,999 .	1961	0.63	5.85	0.56	4.83
	1951	0.30	3.77	0.25	2.89
10,000+ .	1961	0.06	1.32	0.06	1.07
	1951	0.04	1.07	0.06	1.14

There are 115 inhabited villages per 100 square miles of rural areas in the State of West Bengal. This is exactly the number found in case of Malda also. The northern police stations of the district show a higher distribution of the number of inhabited villages. In the *barind* area the density of the inhabited villages is much higher than the district averages. In the lower portion of Malda specially in the *diara* tract the average distribution of inhabited villages gives quite a low figure, even much lower than the district average. In the State of West Bengal 686 persons reside in a village on an average. In Malda, this average is quite high. As many as 731 persons live on an average in a village of this district. In Kaliachak, Manikchak and Ratua Police Stations, the average number of persons in a village is considerably high. A village in Kaliachak Police Station has more than double the number of persons living ordinarily in a village of Malda. The statement given below shows the rural area, rural population, number of inhabited villages, average population per village and number of villages per 100 square miles of area of the district and its police stations :

State/District/Subdivision/Police Station	Area in Sq. miles (rural areas)	No. of inhabited villages	Total persons (rural)	Average persons per inhabited village	No. of inhabited villages per 100 Sq. miles
1	2	3	4	5	6

Urban Population

In Malda there are only two towns—English Bazar and Old Malda. The total inhabitants of these two towns make only 4·16 per cent of the total population of the district. In West Bengal, the percentage of urban population is 24·45. In other words, while every fourth man in the State is a town dweller, in Malda only one in every twenty-five men lives in a town. Malda is the least urbanised district in the State.

An urban area for the purpose of Census 1961 includes (a) all municipal towns, cantonments and other areas being administered by local bodies such as Town Committees, Union Committees etc., (b) any other place which satisfies the following conditions *viz*, (i) a population of not less than 5,000 persons, (ii) a density of at least 1,000 persons per square mile and (iii) three-fourth of the adult male population of which are engaged in any pursuit other than agriculture.

Both the towns of Malda are municipalities. These towns have been existing since 1901. The following statement gives the growth of urban population in each town of the district during the last sixty years :

Name of Town	Status of Town	Year	Area Sq.Miles	Area Sq. Km.	Persons	Decade Variation	Percentage Decade Variation	Males	Females
English Bazar	Municipality	1901	..	..	13,667	..	..	7,314	6,353
		1911	..	..	14,322	+ 655	+ 4.79	7,697	6,625
		1921	..	..	14,057	− 265	− 1.85	7,869	6,188
		1931	..	..	16,907	+ 2,850	+ 20.27	9,387	7,520
		1941	..	..	23,333	+ 6,426	+ 38.01	12,815	10,518
		1951	..	..	30,663	+ 7,330	+ 31.41	16,348	14,315
		1961	1.79	4.64	45,900	+ 15,237	+ 49.69	24,495	21,405
Old Malda	Municipality	1901	..	..	3,743	..	..	2,074	1,669
		1911	..	..	3,750	+ 7	+ 0.19	2,014	1,736
		1921	..	..	3,145	− 605	− 16.13	1,676	1,469
		1931	..	..	2,779	− 366	− 11.64	1,468	1,311
		1941	..	..	3,845	+ 1,066	+ 38.36	2,064	1,781
		1951	..	..	4,498	+ 653	+ 16.98	2,626	1,872
		1961	1.25	3.24	4,885	+ 387	+ 8.60	2,615	2,270

It is seen that English Bazar has grown during the last ten years by 49·69 per cent, whereas Old Malda's growth has been very poor, the rate being only 8·6 per cent. The rate of growth for urban population of the district as a whole has been 44·44 per cent. Thus it appears that the town Old Malda has been losing its importance and has been deteriorating day-by-day. According to Census classification of towns based on population sizes, the town English Bazar is in Class III (population within 20,000 to 49,999), and the town Old Malda is in Class VI its population being less than 5,000. The

town Old Malda has all along been in Class VI since 1901. English Bazar was in Class IV upto 1931 and since then it has been in Class III. The density of urban population in the district is 16,706 persons per square mile against the State average of 12,958. The Headquarters town English Bazar is very thickly populated, as many as 25,642 persons living per square mile of area. The pressure on the soil in the town English Bazar has been getting higher and higher. The other town Old Malda is quite thinly populated. One square mile of area of this town is occupied by only 3,908 persons.

Both the towns of Malda have been classified as service towns. In a Census Report, towns are generally classified by population sizes. In 1961, the Registrar General, India attempted a functional classification of towns on the basis of the predominant function of a town based on Census data on Industrial Classification of all Workers adopted in 1961 Census. According to this classification, towns English Bazar and Old Malda are service towns.

Age Distribution

Distribution of population by quinquennial age-groups may be obtained from Table C-II in Part IIA of this volume. The following statement shows the percentage distribution of population in some broad age-groups in the last two Censuses of 1951 and 1961 for the district of Malda as compared to that of the State of West Bengal:

	Malda District				West Bengal			
	1951		1961		1951		1961	
Age-group	Males	Females	Males	Females	Males	Females	Males	Females
1	2	3	4	5	6	7	8	9
0—14	39.83	39.86	45.50	45.87	33.77	37.19	39.21	42.86
15—54	53.44	52.76	47.78	46.80	58.95	55.02	53.69	49.54
55+	6.73	7.38	6.72	7.33	7.28	7.85	7.10	7.60

During the last ten years, the proportion of child population has increased to a considerable degree in the district. This increase, peculiarly enough, has been observed to be of the same magnitude both in the cases of the male as well as female children. A fairly even distribution of children of both sexes among total male and female population in the district is also remarkable.

The increase in the proportion of children of the age-group 0-14 has almost been compensated by a decrease of the same extent in the population of middle aged men and women between the ages 15 and 54. A sharp increase in the age-group 0-4 has apparently been brought out by a fall of infantile mortality rate and a rise in birth rate. In the higher age-group 55 and over, the proportion has not appreciably changed. It has decreased by a very negligible magnitude during the last decade. The same trend is observed in the pattern of distribution of males and females in different broad age-groups while viewed in respect of the State of West Bengal as a whole. In the State too the proportion of child population in the age-group 0-14 has considerably increased apparently at the cost of a decrease by almost of the equal extent in the age-group 15-54. In the higher age-group of 55 and over, the proportion almost remains the same.

In West Bengal, male children of the age-group 0-14 only constitute 39·21 per cent of total male population of the State, whereas in the district of Malda they are nearly 46·00 per cent of the total male population.

Amongst females this proportion in the case of the State of West Bengal is about 42·86, while in the district this also is nearly 46·00. But in the age-group 15-54 both in case of males and females, the State proportion is higher than the district proportion.

During the decade a significant change is observed in the number of young and aged persons *i.e.*, persons in the age-groups 0-14 and 55 and over taken together per hundred of supporting population *i.e.*, persons in the age-group 15-54. This may be seen from the following statement of dependency ratio (*i.e.*, ratio between persons in the age-groups 0-14 and 55 and above and those in the age-group 15-54) :

Year	Total Rural Urban	Malda District	West Bengal
1951	Total	88	75
1961	Total	111	93
	Rural	112	102
	Urban	97	71

The 1961 population of the district as well as of the State bear a larger load of dependents than in 1951. This is possibly due to high fertility and low mortality in the State. This load is, however, greater in rural areas than in urban areas. The dependency ratio has even fallen in 1961 from the State average of 1951. Malda's population have to bear a load larger than even the State average. In 1951 also, the dependency ratio of Malda was much higher than the State average.

Marital Status

Civil condition of the people by age-group has been shown in Table C-II in Part IIA of this volume. The following is a statement of percentage of population by age-groups classified by different marital status for the Censuses of 1951 and 1961 :

Year	Age-group	Never Married		Married		Widowed		Divorced	
		Males	Females	Males	Females	Males	Females	Males	Females
1	2	3	4	5	6	7	8	9	10
1951	**All Ages**	**49.23**	**34.17**	**47.93**	**51.96**	**2.84**	**13.87**	..	..
	0—14	98.02	81.61	1.94	18.03	0.04	0.36	..	..
	15—34	28.40	3.75	69.82	88.40	1.78	7.85	..	..
	35—54	2.53	1.60	91.52	66.34	5.95	32.06	..	..
	55+	1.11	0.47	83.15	29.82	15.74	69.71	..	..
	Age not stated	80.00	63.64	20.00	36.36	..	..	..	..
1961	**All Ages**	**56.70**	**44.60**	**40.78**	**42.92**	**2.13**	**11.84**	**0.32**	**0.56**
	0—14	99.38	93.80	0.59	6.05	(N)	0.04	(N)	0.09
	15—34	36.88	4.75	61.63	90.37	0.78	3.53	0.60	1.21
	35—54	1.73	0.25	93.39	66.83	4.27	32.03	0.54	0.75
	55+	1.03	0.09	81.12	22.10	17.14	77.28	0.60	0.44
	Age not stated	73.60	74.45	22.63	17.47	1.51	6.77	0.75	0.44

In 1961 Census during sorting and tabulation all children below 10 years of age were treated as never married irrespective of their actual marital status return in the Enumeration Slips. Thus, there may be some scope for doubt about the observation on civil conditions of persons in the age-group 0-14. Child marriage apparently decreased to a considerable extent during the last decade. In 1951, about 18·00 per cent of the total female population in the age-group 0-14 were married. In 1961, this figure has come down to only 6·00 per cent. In the case of male population 99·3 per cent of those below 15 years of age have returned as unmarried in 1961 Census.

Another remarkable feature of the civil condition prevailing in Malda district revealed in the 1961 Census is that the proportion of married persons has fallen down in comparison with that at the 1951 Census. While about 48·00 per cent of the total male population and about 52·00 per cent of the female population returned as married in the 1951 Census, in 1961 this figure has come down to 40·78 in case of males and 42·92 in case of females. The proportion of those widowed or divorced has also decreased a little in 1961 as compared to that of 1951. Only a few women in the age-group 15-34 remained unmarried in 1961, about 90·00 per cent of them in this age-group being married. But in the next higher age-group *i.e.*, 35-54 nearly two-third of the women population were returned as married and about 32·00 per cent of them were widowed. Majority of the menfolk of the age-group 35-54 were married. In the age-group 55 and above about 77·00 per cent of the women were widowed. In case of male 17·00 per cent were widowed in this age-group. The number of divorced or separated men and women in the district was very small.

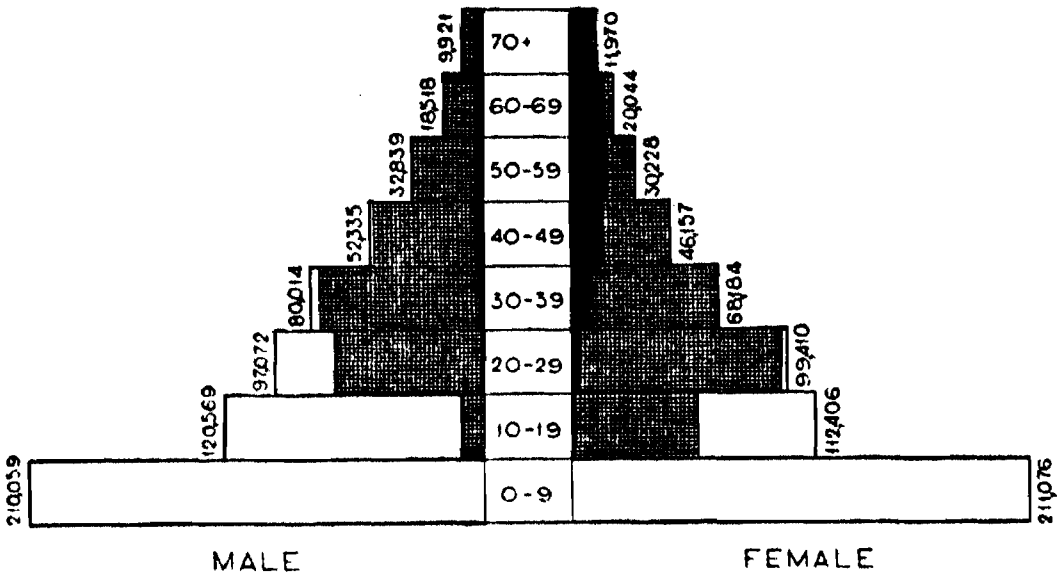

The statement below gives an account of the child-women ratio in the district as compared to that in 1951 :

Year	Total Rural Urban	Number of children 0-4 years per 1,000 females of 15-44	Number of children 0-4 years per 1,000 married women of 15-44	Number of total widow females per 1,000 married women of 15-44
1951	Total	494	584	361
1961	Total	863	989	337
	Rural	868	985	329
	Urban	739	1,114	561

The child-women ratio has considerably increased during the last ten years apparently suggesting a fall in infantile mortality rate in the district. The child-women ratio when standardised for married women of the age-group 15-44 illustrates how high the specific fertility of adult women of the district is. This ratio is higher in the urban areas indicating thereby higher fertility in the urban area than in rural area in the district. The incidence of widowhood has decreased since 1951. This is higher in urban areas than in the rural areas.

The diagram at page xxiv is the age-pyramid showing the different civil condition in each decennial age-group of the district as returned in 1961 Census. The left horizontal bars stand for the male population and the right horizontal ones stand for the female population. White portions signify the population of unmarried males and females, checks signify that of divorced or widowed males and females. The number inserted sideways to each horizontal bar signifies the total male and female

population in that particular age-group. The vertical legends in the middle between the two sets of horizontal bars indicate the age-groups to which the bars relate.

Literacy and Education

The vast masses of the people of the district of Malda living in villages and far off from urban centres have not attained as high a percentage of literacy as people of other parts of the State. Only 13·8 persons of Malda among every one hundred of its people have claimed themselves as literate and educated persons in 1961 Census, while in the State of West Bengal as a whole this percentage of literacy is as high as 29·3. The position has not altered materially since 1951. In the last Census of 1951 only 96 persons amongst every one thousand of the general population of Malda were literates, against the corresponding State literacy figure of 215 amongst every one thousand people. At the turn of the present century education was one of the rarest things that people of this district could dream of. Only 3·7 in every one hundred of its people attained literacy in 1901. Up to 30 years since then the position in respect of literacy in this district dwindled within a narrow range. In 1911 the percentage of literacy was only 4·6. In 1921 the position almost remained stationary. But in 1931 there was a sharp decline. From 4·7 in 1921 this percentage of literacy came down to 3·2 in 1931. So it seems that during these thirty years the people of Malda instead of advancing by any appreciable degree rather went back in the field of education. Since 1941 a steady progress was observed in respect of literacy in the district. In that year 6·9 per cent of the people were literates.

In Buchanan's time education was primarily confined in *pathsalas*, *muktabs* and *tols*. In *pathsalas* Bengali and 3 Rs *viz*., reading, writing and arithmetic were taught. Persian and Sanskrit were taught in the *muktabs* and *tols*.

Looking back to the past we find that as early as in the years 1856-57 there were only two Vernacular Schools which received aids from the Government with only 117 scholars. These schools were converted into Middle English Schools in 1860, the number of scholars being 169 that year. A decade after the district had the privilege of having 4 English Schools and 14 Vernacular Schools either under the direct management of the Government or aided by the Government with a total number of 986 pupils. There were many uninspected and unaided schools in the district at that time. These schools were indigenous ones, so to say. Their number was estimated to be 107. In 1872 Sir George Campbell's scheme for education was introduced, as a result of which 197 schools of Malda with 4,207 pupils were brought under Government supervision. In 1880 the number of schools had increased to 393 with a total number of students 6,535. In 1887 the District Board created under the Bengal Local Self Government Act took over the direct responsibility of looking after primary education in the district superseding the old District Committee of Public Instruction. In 1890 nearly twenty per cent of the estimated school going male population were taking education. The total number of schools both aided and unaided were about 350 and the total number of pupils attending the schools were 12,148. An amount of Rs. 8,000/- were spent on primary education that time. In 1900, the number of primary schools was 450, but the number of pupils attending these schools had not increased by any appreciable extent, their number being 12,197 only. In the next decade, that is, in 1910 the number of schools and the number of pupils increased appreciably, the corresponding figures being 508 and 19,257. At that time it was estimated that about 22·7 per cent of the male population in the school going age were attending different schools.

All these statistics related to the district of Malda as it was before the Partition of Bengal in 1947. In 1951-52 the district had a total number of primary schools 556 with 56,112 pupils. At the passing of the decade in 1961-62, the number of primary schools had increased to 892, with the student enrolment of 75,910. In 1962-63 primary education had a good coverage all over the district. The number of schools in that year were 1,030 with 828,723 pupils. The Village Directory in Part III of this volume shows the existence of primary school (s) in the different villages of the district.

In the Census year 1961, the number of students attending various primary schools in the district of Malda accounted for about 24·04 per cent of the total persons in the age-group 5-14 of the district. The male students accounted for 33·32 per cent of the total male population in the age-group 5-14, and amongst female population in the same age-group, the girl students of the district accounted for only 14·20 per cent.

In 1951 amongst the total population in the age-group 5-14 only 9 per cent were literates. In 1961 this corresponding percentage of literacy amongst the population in the age-group 5-14 had increased to nearly 13·5. Majority of the literate male population of the district are found in the age-group 15-34. In the urban areas most of the female literates are also found to be in this age-group 15-34. But a striking feature of female literacy is observed in the rural areas of the district that majority of the literate womenfolk are found in the age-group 5-14. The introduction of free primary education reached the doorsteps of the villagers of Malda so that a bulk of womenfolk of tender ages could come out to the arena of education to worship the Goddess of Learning shirking off their traditional beliefs and prejudices. Of course the same trend is observed in the State of West Bengal as well. The statement below gives the distribution of number of literate males and females per 1,000 of total male and female population of the district in the different age-groups above 5 years of age against the corresponding figures for the State of West Bengal as a whole :

State/District	Age-group	No. of Literate Males and Females per 1,000 total Males and Females of the respective Age-group			
		Urban		Rural	
		Males	Females	Males	Females
West Bengal	All persons above 5 years	660	500	389	117
	5—14	572	498	289	144
	15—34	702	574	469	140
	35—59	661	418	397	64
	60+	689	308	390	36
	Age not stated	302	145	197	32
Malda District	All persons above 5 years	644	446	239	55
	5—14	502	497	171	70
	15—34	731	556	301	66
	35—59	681	342	248	25
	60+	653	195	236	10
	Age not stated	..	..	100	22

In 1961, 21·5 per cent of the male population of Malda are literates. Amongst the females, percentage of literacy is limited to only 5·8. In 1951 the corresponding percentage of male literacy was 15·6 and that of female literacy was only 4·3. Thus female literacy did not make any commendable advancement during the last decade. As was seen earlier the increase in female literacy was only due to taking up of education by the young girls of the district only in very recent years. In rural areas literacy amongst menfolk has gone from 14·4 per cent in 1951 to 20 per cent in 1961. In 1951 only 3·5 per cent of the women living in the villages of Malda were literates. After the lapse of one decade this percentage increased to only 4·5. Nearly 56 per cent of the total male population living in the towns of Malda are literates as per Census of 1961. Amongst the females, the percentage of literacy is 37·7 in the urban areas. Ten years ago the corresponding literacy figures amongst men and women living in the towns were 48·8 and 29·4 respectively. Urban literacy in the district does not present so gloomy a picture as does rural literacy while compared to the standards prevailing in the State of West Bengal as a whole. The following statement will show percentage of literacy amongst males and females in the rural and urban areas separately for the district as well as for the State :

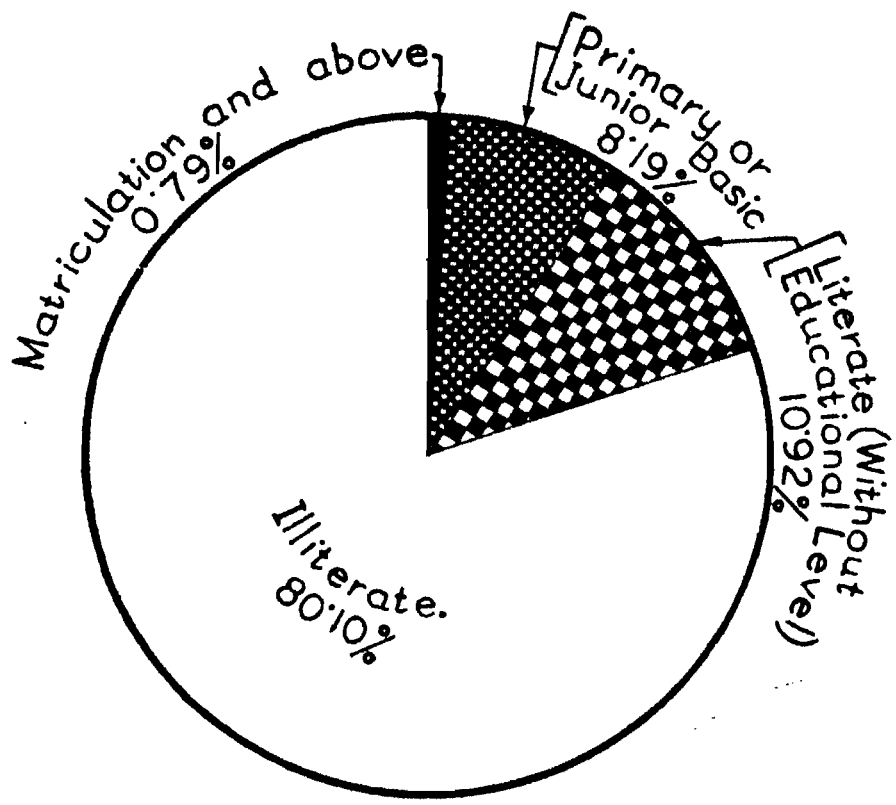

State/District	Rural Urban	Percentage of Literacy	
		Males	Females
West Bengal	Rural	32.86	9.73
	Urban	59.59	43.32
Malda	Rural	19.90	4.53
	Urban	55.82	37.68

The police station English Bazar has shown the highest literacy figure in the district. This is precisely because of the situation of the headquarters town of English Bazar within it. Kharba Police Station ranks second so far as the attainment of literacy is concerned. Next comes Malda Police Station. The police station Ratua has shown the percentage of literacy just as above the disrtict average. All other police stations of the district have been below the district average in so far as the attainment of literacy is concerned. If literacy amongst males is considered it is observed that police stations English Bazar, Kharba and Bamangola only come above the district average, and in case of female literacy English Bazar and Kharba Police Stations only are above it. The statement below gives the percentage of literacy by sexes in all the administrative units of the district :

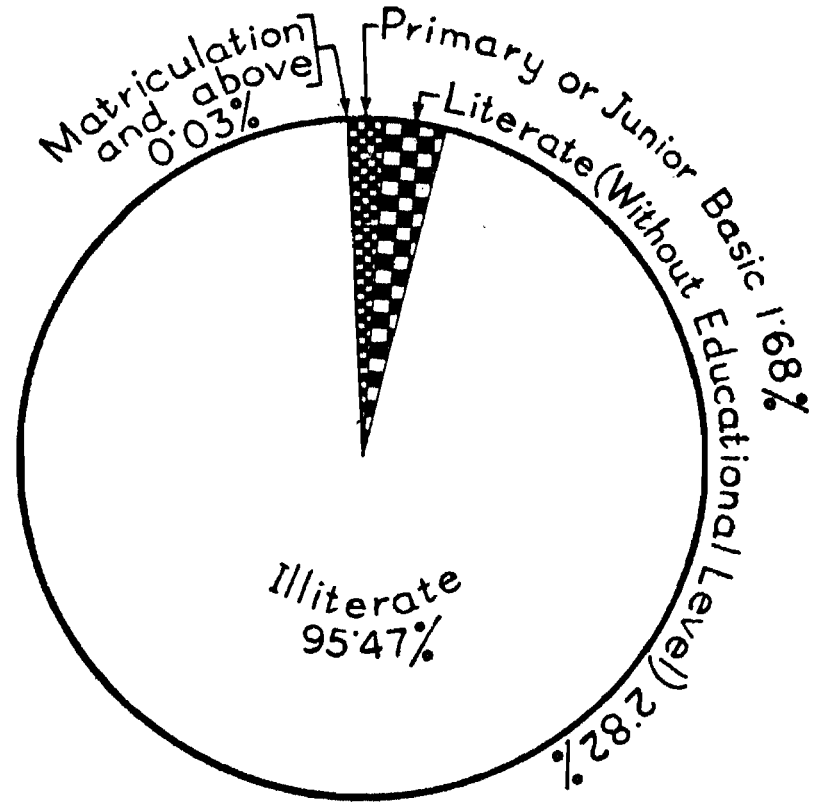

State/District/Subdivision/ Police Station	Percentage of Literacy		
	Persons	Males	Females
WEST BENGAL . . .	**29.28**	**40.08**	**16.98**
MALDA DISTRICT . .	**13.79**	**21.47**	**5.84**
Sadar Subdivision . . .	**13.79**	**21.47**	**5.84**
English Bazar . . .	27.38	36.06	17.96
Kaliachak	10.04	16.77	3.23
Malda	14.66	21.37	7.51
Habibpur	12.20	19.38	4.61
Ratua	13.11	21.00	4.96
Manikchak	11.62	19.28	3.90
Kharba	15.35	24.01	6.25
Harishchandrapur . . .	12.48	20.13	4.55
Gajol	10.55	17.46	3.42
Bamangola	13.00	22.30	3.48

RURAL

MALE

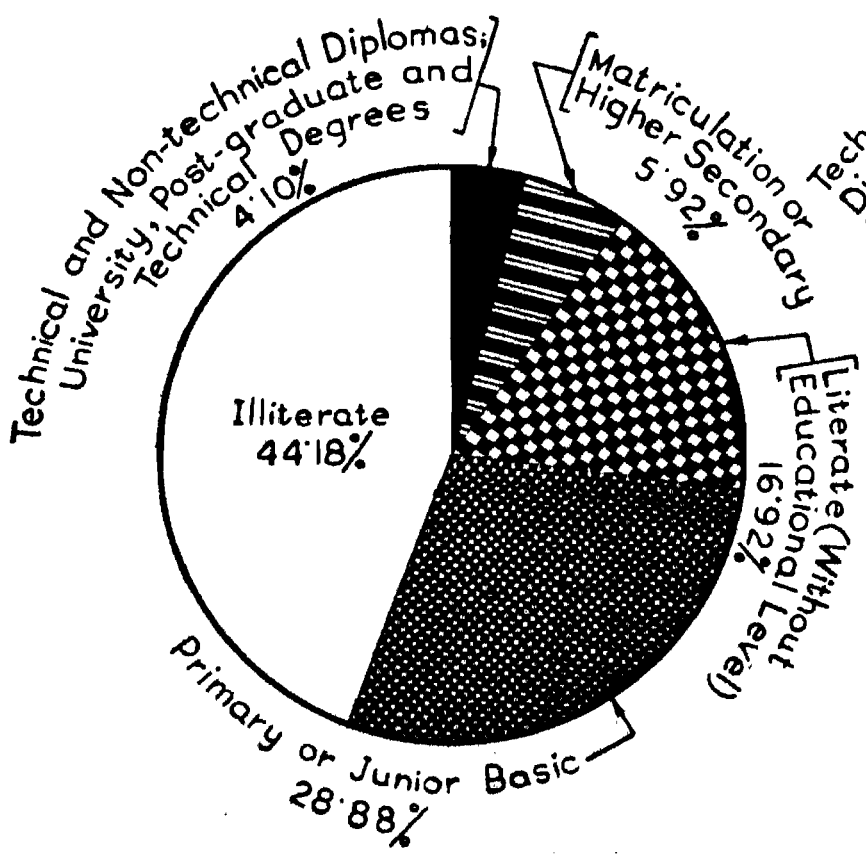

FEMALE

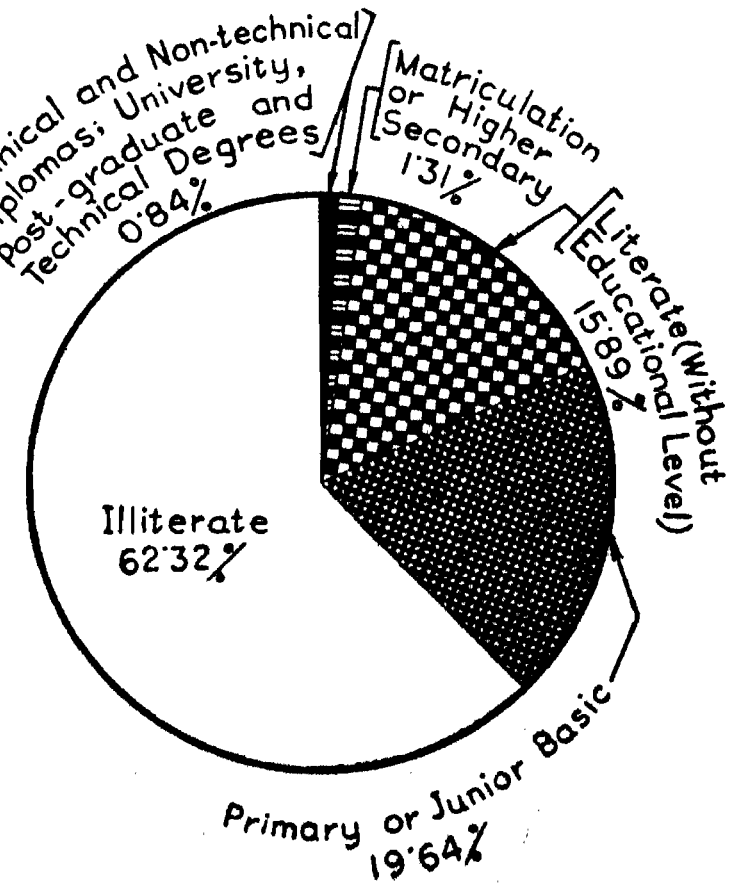

URBAN

MALE

FEMALE

Now coming to the different levels of education amongst the literate and educated persons of Malda, it is seen that in rural areas of the district 54·9 per cent male literates and 62·2 per cent female literates are without any educational level. But in the urban areas literates without any educational level account for only 30·3 per cent of the total male literates and 43·2 per cent of the total female literates living in the towns. Literate without any educational level means a person having knowledge of both reading, writing a simple letter with felicity but having not passed any recognised written examination. Amongst the literate persons in the rural areas, 41·1 per cent males and 37·1 per cent females are found to have passed the Primary or Junior Basic examination. In the urban areas the corresponding figures are 51·7 per cent amongst males and 52·2 per cent amongst females. 4 per cent of the literate males living in the villages have attained the educational level of Matriculation and above. Amongst the females the corresponding number is insignificant. In the urban areas 10·6 per cent of literate males and 3·5 per cent of literate females have passed Matriculation. Of them 7·3 per cent and 2·2 per cent respectively have attained educational level above Matriculation.

In Part IIB of this volume a full account of the present position of various educational institutions in the district has been given in different Tables on Official Statistics. The position in respect of primary education has been discussed earlier. In 1950-51 the district had 42 Junior High Schools with the student enrolment of 2,223. In 1960-61 the number of Junior High Schools had increased to 56 with a total number of 4,229 pupils. There were also a Senior Basic School in 1961. In 1950-51 there were only 24 High Schools in the district. Within the next 10 years the number of High Schools rose to 35. In 1961-62 there were 20 High Schools and 15 Higher Secondary Schools with student enrolment of 4,872 in the High Schools and 6,220 in the Higher Secondary Schools. By 1963 the number of Higher Secondary Schools further increased to 21. There was also one Higher Secondary Madrasa with 227 scholars. In 1963 the total number of Higher School scholars including those in Madrasa were 14,712. In the district headquarters town English Bazar there are 2 Girls' High Schools. The Burlow Girls' High School which was established in 1871 as a Primary Girls' School was named after Mr. Burlow, former Commissioner of Bhagalpur Division. This school got affiliation from the Calcutta University in 1936 as a High School. Another Girls' High School is C. C. Girls' High School which got affiliation in 1954. In the district there is only one college, the Malda College. This college was founded in 1944, with only Intermediate course of teaching. It was affiliated to B.A. standard in 1948. The then District Magistrate of Malda, Shri A. Mitra, I.C.S., took a keen interest in up-grading this college. In the District Handbook of Malda, 1951, Shri Mitra recorded two names who were intimately associated with the improvement of Malda College. These two gentlemen were Shri Panchanan Majumder and Shri Jyotirmohan Misra who lent invaluable support and encouragement to Shri Mitra in raising funds for the college. The Governing Body of the college was approved in 1951. The college received grant from the Malda Mango Improvement Committee to the tune of nearly one lakh. A similar amount was also sanctioned by the Government. In 1950-51 there were only 298 scholars in the college. In 1960-61 there were 905 scholars including 134 girl scholars. There are 2 Junior Basic Training Colleges and 1 Primary Teachers' Training School in the district. A Polytechnic has been founded at a place three miles away from English Bazar. There were also 3 Vocational and Technical Schools in the district.

Social Education

In the field of social and adult education, the district did not lack very much behind other parts of the country. To fight against the evil of illiteracy prevailing amongst the major portion of the population of the district, has been one of the principal objectives in the programme laid down by Social Education Unit of the Education Department. As many as 30 Night Schools which are run voluntarily in the district received aid from the Government. There were 22 complete Social Education Units which were aided by the State Government. The Government makes liberal grant for recreation activities like *Jatras*, Theaterical performances, *Gumbhira*, Vocational Songs, *Kabigan* etc.

Gumbhira is a festival which is very much characteristic of the district of Malda.

Lambourn has given a fine account of this in his Gazetter, which is quoted below :

> By far the most popular festival, however, in this district is that of the Gumbhira. It is celebrated everywhere during the last three days of the Bengali year, the end of Chait, though it is usually carried over into Baisakh and even later. The following is taken from the Census Report. 'The Koches and their congeners worship the Gramya Devata (village godlings) at a curious ceremony called *Gumbhira*, when the young people of the village disguise themselves, personating the deities and dance'. In this district, however, the ceremony is universal amongst low caste Hindus ; it is said that it is a form of the Ban Puja introduced by King Ban, whose capital was at Dinajpur. The king was a great worshipper of Siva and used to review at this ceremony the acts done during the year which was passing. The ceremony consisted originally in the annual review of the acts of the year and penance for misdeeds. As now celebrated in this district, a *shamiana* or a hut open on three sides is put up and an image of Siva (Mahadeb) installed, before which there is dancing, singing, masquerading and general merriment. It is customary to versify the past year's events. The

following is a verse of the topical song of April 1908 as sung in the *diara :*

বলব কি গান ওহে শিব বাগানে নাই আম।
গাছে গাছে বেড়িয়া দেখছি নূতন পাতা সব সমান ॥
মনে মনে ভাবছি বসে, কাজের কোন পায়না দিশা।
তেল ধান চাউলের দর খুব কশা ভুষার বেশী দাম ॥
আর এক শুন নূতন কাহিনী, ঠিক দুপ্রহরের
শিল আর পানি।
মাঠে হয় কৃষাণ পেরসানী মারিলে গহম ॥

"O Siva what song shall we sing to thee—there are no mangoes in the gardens—as we go from tree to tree nothing but new leaves are seen—our sole thought as we sit is what shall we do—oil, paddy and rice are very dear and also bran: listen again, just at mid-day come hail and rain to harass the farmer and destroy the wheat".

The allusion is to a severe hailstorm which occurred at the beginning of April that year.

The district has two School-*cum*-Community Centres, one under the management of Ramkrishna Mission and the other under Bangabani of Nabadwip. These centres receive financial aids from the Government. In the field of social service the role of Mahilasamities is also commendable. The district has a good number of libraries.

At the end of First Five Year Plan the District Library was established at a cost of about Rs. 130,000. The number of books has gone over 16,000 in this library. There are 20 State Controlled Rural Libraries which are run with loans of books from the District Library. The District Library in the year 1961-63 catered to the needs of these Rural Centres by supplying nearly 49,000 books. The number of Public Libraries in the district is only 168. Liberal grants have been sanctioned by the Government for encouragement of the educationally backward communities. Mention of this has been made in separate chapter dealing with Tribal Welfare in the district.

Language

The principal language of the district is Bengali. It is the mother-tongue of the majority of the people of the district. In 1961 Census, 83·59 per cent of the population of Malda returned their mother-tongue as Bengali: Excepting the police stations of Malda, Habibpur, Gajol and Bamangola in all other areas of the district more than 75·00 per cent of the popultion have Bengali as their mother-tongue. In these police stations there is good number of persons who returned Santali as their mother-tongue. In fact, Santali has second the largest number of speakers in the district. Nearly 7·19 per cent of the total population returned Santali as their mother-tongue. In Habibpur, nearly 40·00 per cent of the people speak Santali. In the lower region of the district *i.e.*, in English Bazar, Kaliachak and to some extent in Manikchak a fraction of the people speaks a language which is a big share of Hindi and Bengali known as Khotta or Khortha. This language is spoken by nearly 4·00 per cent of the total population of Malda. Slightly more than 25,000 of such speakers have been found to be residing in Kaliachak Police Station and nearly 20,000 persons speaking Khotta reside in English Bazar Police Station. Hindi is spoken by 2·5 per cent of the total population of Malda. Hindi speakers are mainly found in English Bazar, Malda and Habibpur Police Stations. In Harishchandrapur Police Station also a good by number of Hindi speakers have been found. In the *diara* tract, persons speaking Urdu are mainly found. The maximum number of Urdu speakers reside in Manikchak Police Station and about 3·00 per cent of the population of Malda, English Bazar and Kaliachak Police Stations have returned their mother-tongue as Urdu in 1961 Census. The languages Kuruk/Oraon, Mundari, Oriya and Paharia have also been returned by more than 1,000 persons in the district. In the district as many as 48 mother-tongues have been returned by its people in 1961 Census. The speaker of the remaining 39 mother-tongues constitute only 0·16 per cent of the population.

The people of Malda have not given an encouraging account regarding the extent of bilingualism in the district. Only 8·4 per cent of the total population have claimed to know a second language in addition to their mother-tongue. The settlers from Bihar, Chhotonagpur and Santal Parganas are commonly bilingual. According to 1961 Census returns, about 35·37 per cent of the people speaking the mother-tongue Khotta know a second language. Almost all such persons know Bengali. It is generally seen that the speakers of the tribal languages have claimed to know Bengali as a second language. Merely 34·32 per cent of the Santali speakers are bilingual, almost all such persons knowing Bengali. But bilingualism is quite uncommon amongst the Bengali speakers. Only 3·6 per cent of the Bengali speakers are bilingual. Majority of them know English, Khotta comes next, Urdu, Hindi, Arabic and Santali are also known to quite a large number of Bengali speakers. Amongst the Hindi and Urdu speakers, knowledge of Bengali is quite common.

Religion

Two major religions namely Hinduism and Islam are professed by the people of Malda. Majority are Hindus. In 1961 Census, 53·64 per cent of the total population of the district reported their religion as Hinduism. Islam Religion has been claimed to be professed by 46·18 per cent of the total population of the district. In his Statistical Account, of Bengal W. W. Hunter remarked that the district of Malda presents ethnologically aspects of the border district. Besides the Hindus and Muslims there are a few Christians

who constitute only 0·17 per cent of the people of Malda. In the district, only 85 persons claim to be Jains and only 47 persons claim to profess the religion of Sikhism in the district. The police station Kaliachak in the south and Ratua, Kharba and Harishchandrapur group of police stations in the north-western corner of the district are peopled predominantly by Muslims. Habibpur is the only police station where more than 95·00 per cent of the people are Hindus. The following statement gives a percentage distribution of Hindus and Muslims in the district and the police stations :

District.Police Station	Religion	
	Hindus	Muslims
Malda District	**53.64**	**46.18**
English Bazar	63.55	36.41
Kaliachak	37.48	62.52
Malda	71.96	27.74
Habibpur	96.71	2.39
Ratua	40.66	59.31
Manikchak	64.85	35.15
Kharba	38.80	61.19
Harishchandrapur	41.18	58.76
Gajol	72.93	26.08
Bamangola	81.62	18.22

The Hindus have increased during the decade 1951-61 by only 11·11 per cent in the district. This rate of increase has been from the general rate of growth of Malda poles apart. The Muslims, on the other hand, have increased during the decade by 62·80 per cent. All thanas except the already heavily Muslim populated thana of Kaliachak (which recorded rise of 25·30 per cent of its Muslim population) show high rates of increase, the highest rate (126·46) being recorded by Ratua, Kharba and Harishchandrapur group of police stations. Amongst the Christians, the increase has been to the extent of 145·78 per cent over the Christian population of 1951.

HOUSING PATTERN

It was for the first time in 1961 Census that a comprehensive Census of all houses was taken in this country on the basis of uniform list called the "Houselist". Information in respect of the materials of roof and walls of the census house, number of households living in a census house or number of census house(s) in the occupation of a household, number of rooms in the census house, and the different kinds of use to which it is put, was also collected. A house in this chapter refers to a census house which has been defined in the 1961 Census as follows :

> A Census house is a structure or part of a structure inhabited or vacant, or a dwelling, a shop, a shop-*cum*-dwelling or a place of business, workshop, school, etc., with a separate entrance.
>
> If a building has a number of flats or blocks, which have separate entrances of their own and are independent of each other giving on the road or a common staircase or common courtyard leading to a main gate, they will be considered separate census houses. If within an enclosed or open compound there are separate buildings then each such building will also be a separate census house. If all the structures within an enclosed compound are together treated as one building then each structure with a separate entrance should be treated as a separate census house.

It is clear from the above definition that each of two or more huts clustered on a person's house-stead, each being built at a short distance from the other around a courtyard was treated as a separate census house.

The terms 'household' and 'room' which are to be met with in the following paragraphs are defined as follows :

> A household is a group of persons, who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so'. There may be one or more households in a census house or there may be one or more census houses in the occupation of a household.
>
> A room should usually have four walls with a door way and with a roof overhead and should be wide and long enough for a person to sleep in, *i.e.*, it should be at least 6 feet long. Unenclosed verandah, kitchen, store, garage, cattle shed and latrine which are not ordinarily used for living and sleeping should not be treated as room. An enclosed room however, which is used for living, dining, storing and cooking should be regarded as a room.

In the district of Malda *pucca* houses—the walls of which are built with burnt brick are very rare. They constitute only 5·7 per cent of the total houses of the district. In the high land of *barind pucca* structures are very uncommon. In Gajol, Bamangola, Malda and Habibpur group of police stations *pucca* houses subscribe only to the extent of 3·4 per cent of the total houses of that area. In the western part of the district specially in the *tal* land also *pucca* houses are not very common. They constitute nearly 4 per cent of the total houses of the area under Harishchandrapur, Kharba and Ratua group of Thanas. *Pucca* structures are fairly come across in the southern portion of the district. In English Bazar, Manikchak and Kaliachak group of thanas they make about 8·2 per cent of the total houses of the area.

Mud houses and those made of grass, leaves, reeds or bamboo constitute a little less than 94 per cent of the total houses of the district. C.I. sheets, unburnt brick, timber and cement concrete have been used in construction of only a very small number of houses of Malda. The walls of not a single house in the whole of the district are found to be built of stone.

The *pucca* houses in urban areas of the district constitute about 62·6 per cent of the total houses in the two towns of Malda. In Old Malda about 60 per cent and in English Bazar town 63 per cent of the houses are built with burnt brick. Houses with mud walls in urban areas are very uncommon. Only 2·8 per cent of the total houses are mud walled in the urban areas. In Old Malda town, of course, a considerable number of mud-walled houses are found. They make about 11·7 per cent of the total houses of this town. In the headquarters town of English Bazar only two out of every one hundred houses are mud-walled. Houses with walls made of grass, leaves, reeds or bamboo are more common in the towns. They constitute slightly more than 34 per cent of the total houses in urban areas of the district as a whole. In Old Malda such houses constitute about 27·5 per cent while in English Bazar town they constitute slightly more than 35 per cent.

In rural areas, the *pucca* houses are very uncommon and they form only less than 4 per cent of the total houses in rural areas of the district as a whole. The houses with mud walls and those made of grass, leaves, reeds or bamboo are almost equally distributed if the whole of the rural areas of the district are considered.

Mud houses are mostly seen in the *barind* area. About eight out of ten houses there are mud walled and about 19 per cent of the houses are made of leaves, reeds, grass or bamboo. In the southern part of the district below the river Mahananda the proportion of mud houses and those of grass, leaves etc. are almost equal. Out of every one hundred houses in that area 47 are mud-walled and 48 are made of grass, leaves etc. The number of mud structures are remarkably

low in the *tal* land where inundations are frequent. In the area to the west of the Mahananda more houses are built with bamboo, reeds, leaves etc. About two out of every three houses are of such type. Mud houses there account for even less than 30 per cent of the total houses. C. I. sheets, timber, unburnt brick and cement concrete have seldom been used in constructing the walls in both rural and urban areas of the district.

About 69 per cent of the total houses in the district are thatched with straw, leaves, reeds or bamboo. Next come the houses with sheds built of tiles, slates or shingles, which form about 23 per cent of the total houses. In rural areas the two types of houses are slightly more than 70 per cent and slightly less than 23 percent respectively. In the urban areas they constitute about 23·5 and 19 per cents respectively. C.I. sheets and other metal sheets, brick or lime or cement concrete as material of roof are seldom used in the rural areas of the district, but they are extensively used in the urban areas where the houses with roof made of C.I. sheets etc. account for about 17·5 per cent, those made of brick and lime for more than 32 per cent and those made of cement concrete for slightly less than 8 per cent. Use of asbestos sheets and cement concrete as roof materials is conspicuous by its absence both in rural and urban areas of the district. Of the two towns in Malda District, in Old Malda Town the houses with roof built of brick and lime alone constitute slightly less than 54 per cent of the total houses, while they account for only 30 per cent in English Bazar Town. In Old Malda Town the roofs of 18 per cent of the houses are made of straw, leaves etc., those of about 17 per cent of the houses made of tiles, etc. About 10 per cent of the houses have been roofed with C.I. sheets, etc. Similarly these three types of houses account for more than 24 per cent, slightly less than 19 per cent and about 19 per cent respectively in English Bazar Town.

In the *tal* land straw is exclusively used as a material for roof. About 74 per cent of the total houses of this area are thatched with straw. Next comes the use of tiles, which accounts for slightly less than 28 per cent of the houses. C.I. sheets, as a roof material account for fairly more than 5 per cent of the houses. Straw is more extensively used in the *barind* where about 86 per cent of the houses are thatched with straw. Tiles and C.I. sheets are less common in that area. In the southern part of the district houses thatched with straw are less in number. In the Kaliachak, Manikchak and English Bazar group of thanas less than 58 per cent of houses are thatched with straw. Tile-roofed houses are seen by quite a large number there. They account for 35 per cent of the houses of that area. C.I. sheets have been used only in 3·5 per cent of the houses as the material for roof.

Houses are quite sparsely scattered all over the district. The density of census houses for the district as a whole is about 227 Census houses per square mile. In rural areas of the district 220 census houses are found to be standing on each square mile on an average as compared to 3,153 houses in urban areas of the district. In the high land of the *barind* the density of houses is found to be exceptionally low. Each square mile of area on an average shows only about 126 houses. This low density of houses there also bears testimony to its being a thinly populated area. In English Bazar Town an area of one square mile contains 4,893 houses as compared to only 744 houses in Old Malda Town which is situated on the other side of the river Mahananda.

In the district about one hundred persons live on an average in 26 houses. In the rural area the picture is the same. But any one hundred town dwellers of the district of Malda live only in 19 census houses.

In giving a complete analysis of the use of census houses in the district as a whole, the houses used solely as dwellings account for more than 92·15 per cent of the total houses. In rural areas the figure comes to more than 93 per cent as compared to 79 per cent in urban areas of the district.

In Old Malda Town only two-third of the total census houses are used for the purpose of dwellings but in the headquarters town of English Bazar more residential houses are found. Here more than 80 per cent of the census houses are used as dwellings. A very small number of houses are used as shop-*cum*-dwellings, workshop-*cum*-dwellings, shops excluding eating houses, and workshops and factories in the rural areas of the district. Such houses are found in quite a significant number in the towns of Old Malda. The house used as shop-*cum*-dwellings and those as workshop-*cum*-dwellings constitute 2·2 and 2 per cent of the total number of census houses in the Old Malda Town. Every twenty-first house in English Bazar Town is exclusively used as shop excluding eating houses.

In analysing the tenure status of the Census houses used either wholly or partly as dwellings, it is found that in the district as whole a little less than 97 per cent of them are owned by the households living in them. In the rural areas also this percentage is almost the same. But in the urban areas only three-fourth of the census-houses are owned by the dwellers themselves. One-fourth of the houses are rented out in the towns of Malda, whereas in the villages only 2·2 per cent of the census houses are rented out. But in Old Malda Town, this percentage is only slightly more than 14 while it is 26 in English Bazar Town.

About 27 per cent of houses used as shop-*cum*-dwellings and 22 per cent of those used as workshop-*cum*-dwellings fall in the rented category in the urban areas of the district. In rural areas of the district as a whole 81 per cent of houses as shop-*cum*-dwellings and 88 per cent of workshop-*cum*-dwelling are owned by the dwellers themselves. The incidence of such a high percentage in the case of the houses used as workshop-*cum*-dwellings in the rural areas can be explained by the fact that most of the cultivating and artisan households, which own Household Industries, conduct such industries in their own houses.

Majority of the households in this district live in one-roomed houses. They constitute about 56 per cent of the total households of the district as a whole. Next comes the number of households having two-roomed houses in their occupation and it forms more than 27 per cent. One in every ten households has in its occupation a census house comprising of three rooms. Four-roomed houses and five or more roomed houses are found to be occupied by only 3 per cent and a little more than 2 per cent respectively of the total households in the district as a whole. The picture is manifestly the same in the rural areas of the district. In the urban areas of the district however a different trend is observed. The percentages of households occupying houses with three or more number of rooms in urban areas are higher than those existing in rural areas. In urban area about 47·5 per cent of the households are stated to be living in one-roomed houses. The percentage of households with two-roomed houses in their occupation being only a little less than 26·5 per cent in urban areas is a bit higher than that prevailing in rural areas. Fairly more than 13 per cent, about 6 per cent and little more than 6 per cent of the households are found to live in urban areas with houses consisting of 3 rooms, 4 rooms and 5 or more rooms respectively.

ECONOMIC ASPECTS

Working Population

A significant deviation in presenting the data relating to economic activity of the people has been made in 1961 Census. In earlier Censuses, the element of income or the criterion of economic independence was adopted for measuring the economy of the country. But in the present Census emphasis has been laid on the work done or the economic activity pursued by an individual. Thus the persons engaged in productive work irrespective of their deriving any income or not have been treated as workers in 1961 Census. Persons such as family workers and children who work but do not earn enough to maintain themselves have also been considered as workers. Any person who generally spends more than one hour per day on any particular productive occupation has been included amongst working population. In respect of seasonal work like Cultivation, Livestock, Household Industry etc., persons having regular work for more than an hour a day throughout the greater part of the working season have been treated as worker. Undertrial prisoners or persons temporarily incapacitated if they were previously engaged in any productive work have also been recorded as workers.

The economic data have been presented according to nine Industrial Categories of Workers and Non-workers instead of eight Livelihood Classes classified by self-supporting persons and their dependants in 1951. The economic activity of the people residing in villages has been shown by the different Industrial Categories in the Village Directory. The Primary Census Abstract and the B-Series Tables in Part IIA of this volume also present the different facets of the economy of the district.

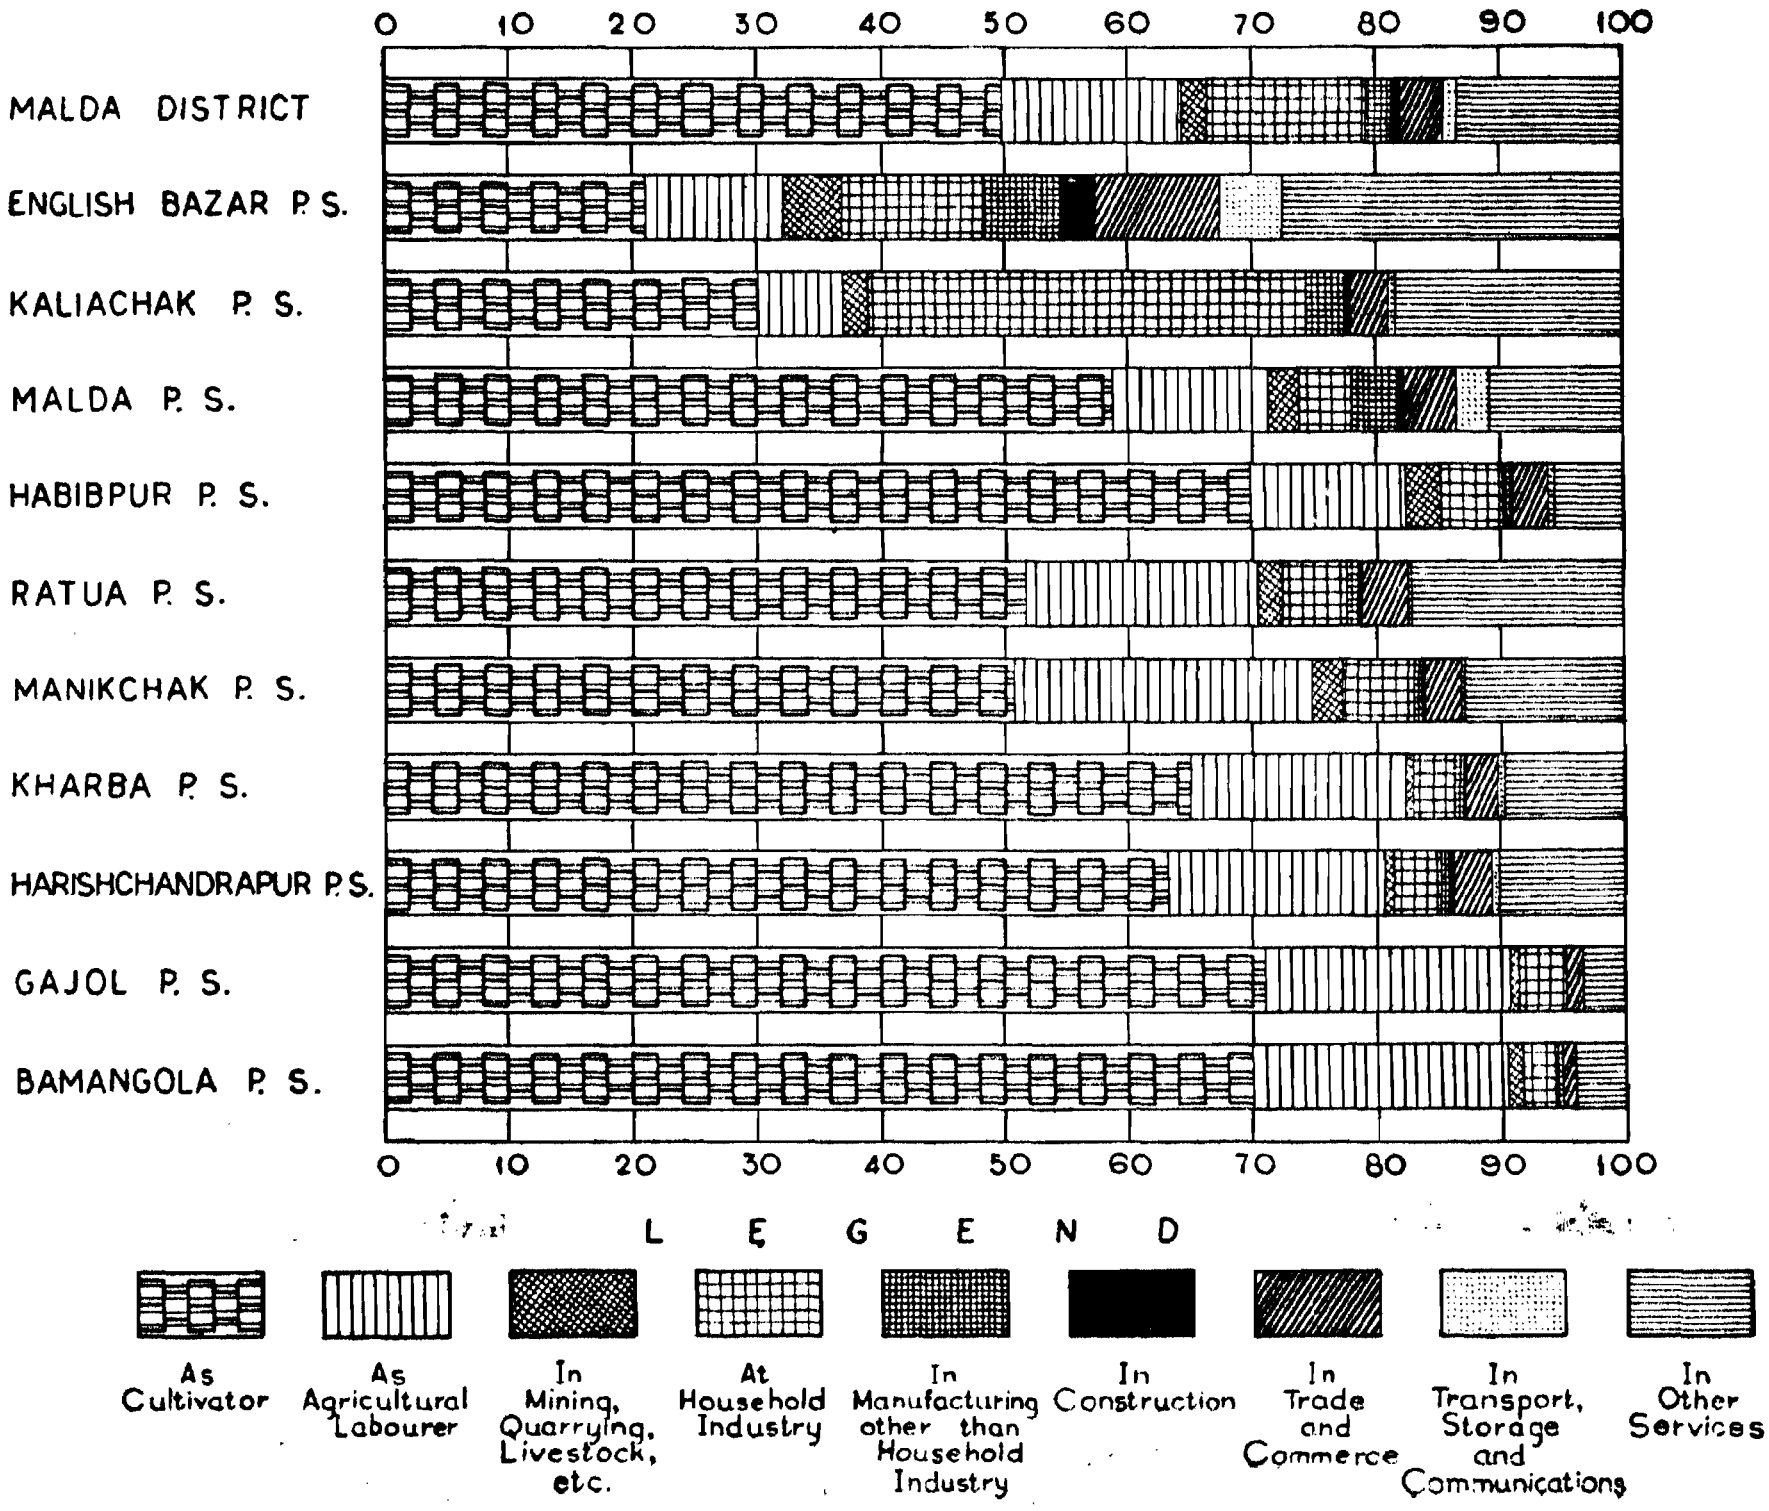

In the industrial classification of workers, industries have been classified as Household and Non-household. A Household Industry is defined as an industry which is not run on the scale of a registered factory and is participated in by the head of the household himself or any member of the household either at home or within the village in rural areas and in the same census house in urban areas.

In the district of Malda only 32·79 per cent of the total population have been recorded as workers in 1961 Census. Inspite of very liberal definition of a worker adopted in this Census it is found that only 328 out of every one thousand persons of Malda are engaged in some sort of productive occupation, and the remaining 672 persons have returned themselves as non-workers who are believed to be dependent on the working population for their sustenance. In the State of West Bengal, the position in respect of percentage of workers is slightly better. In West Bengal 332 out of every one thousand persons have been treated as Workers in 1961 Census, and the remaining 668 as Non-workers.

The labour participation ratio (*i.e.*, the percentage of workers to total population) in the rural sector is higher than in the urban sector, contrary to general expectation. The participation in the rural areas of Malda is also slightly better than in the State of West Bengal, where 327 out of every one thousand rural population are workers. In Malda 330 out of every one thousand rural population have returned themselves as belonging to the working population. Labour participation in the urban areas of the district has been awfully below the State average. Only 274 out of every one thousand urban population of Malda as against the corresponding State figure of 347 have returned themselves as workers.

The male component amongst the working force of Malda is much higher than the female component. The labour participation ratio amongst the male population of Malda has been found to be 53·37 while this ratio for the females is only to the extent of 11·46. Peculiarly enough, the labour participation ratio for males in the district of Malda has been found to be lower than the corresponding State ratio while the same for females has been found to be higher than the corresponding State average. The participation of the females in the working force of Malda has been greater both in the rural and urban sectors than the corresponding ratio for the State of West Bengal as a whole. The main sphere of activity of the female population of Malda having been confined to the agricultural sector and to the household industry, the labour participation ratio has become higher than the State average. Both in the agricultural sector and in the household industries female participation depends very much upon the crops produced in the field and the nature of the products manufactured in household industries. Female participation in agriculture (Category-I) and agricultural labour (Category-II) in the district of Malda remains at par with that in the State of West Bengal, but female participation in household industry (Category-IV) is much higher in the case of Malda than that in the State of West Bengal. In household industry participation of female workers is even better than that of male workers in the district of Malda.

PERCENTAGE DISTRIBUTION OF WORKERS

The Gajol Police Station has recorded the highest labour participation ratio being closely followed by the Habibpur Police Station. This ratio varies from 28·67 in Harishchandrapur Police Station to 37.88 in Gajol Police Station. The male participation has been highest in Habibpur Police Station. The Gajol Police Station recorded the highest female participation ratio. In the *tal* area the labour participation has been found to be generally below the district average. The *barind* area shows a better picture in this respect. Most of the workers in that area are engaged in the agricultural sector which is evident from their participation in Categories I and II. The statement below gives the proportion of the total population, males and females engaged in work, for the district and its administrative units for rural and urban areas separately :

		Percentage of Workers to Total Persons Males and Females		
		Persons	Males	Females
WEST BENGAL		**33.16**	**53.98**	**9.43**
Malda District	**Total**	**32.79**	**53.37**	**11.46**
	Rural	**33.03**	**53.68**	**11.71**
	Urban	**27.36**	**46.55**	**5.38**
English Bazar	Total	31.12	51.83	8.63
	Rural	33.14	54.68	10.41
	Urban	27.35	46.74	5.15
Kaliachak	Rural	35.81	53.65	17.72
Malda	Total	34.55	54.39	13.42
	Rural	35.27	55.42	14.00
	Urban	27.47	44.78	7.53
Habibpur	Rural	37.59	58.35	15.69
Ratua	Rural	28.91	50.87	6.22
Manikchak	Rural	32.11	51.17	12.89
Kharba	Rural	29.40	52.34	5.28
Harishchandrapur	Rural	28.67	52.21	4.25
Gajol	Rural	37.88	56.97	18.22
Bamangola	Rural	34.11	57.42	10.24

It appears from the statement above that working women in this district are not in keeping with their total numbers. As against 53·37 per cent of the males, only 11·46 per cent of the females are workers, though female participation in the case of West Bengal as a whole is only 9·43. It has been seen earlier that Malda's sex ratio is not as bad as that of West Bengal. For every one thousand males there are 965 females in the district. Amongst working population, for every one thousand male workers the number of female workers is 207, while the corresponding sex ratio amongst the working population in the State is only 153. On further analysis it appears that women of Malda engage themselves in some sort of productive occupation in the fields of agriculture and in household industry. In household industry women workers even out-number the males. For every one thousand male workers engaged in cultivation there are 117 female workers in the district. Amongst agricultural labourers there are 255 females per thousand males. In husoehold industry for every one thousand male workers there are 1,215 female workers. The corresponding sex ratio in the case of West Bengal as a whole in Categories I, II and IV are 146, 225 and 625 respectively. Female participation in household industry in greater proportion indicates that women of Malda are not very much unwilling to take recourse to any sort of productive work if opportunities are made available to them. The lack of proper opportunities appears to be the main reason for women becoming unproductive in the economic life of the country.

In Kaliachak, and English Bazar Police Stations, the majority of the female workers are engaged in the household industry. Nearly 86·69 per cent of the total female workers in Kaliachak Police Station and 47·69 percent in English Bazar Police Station are engaged in household industry. Very few women of these two police stations have taken opportunities to get themselves engaged in the agricultural sector. Women of the *barind* area get themselves mostly employed in cultivation. About a little less than three-fourth of the total working women of Gajol and Habibpur Police Stations are engaged in cultivation. In Harishchandrapur, Kharba, Ratua, Manikchak group of thanas working women generally work as cultivators and as agricultural labourers. Women of this area are better employed as agricultural labourers either because of better available opportunities or because of their being more suited for this sort of occupation.

Nearly fifty per cent of the total workers of Malda are engaged in cultivation. The workers of Malda participate in agriculture in greater proportion than those of the State of West Bengal taken as a whole. In the State, a larger percentage of workers are engaged as agricultural labourers than that in the district of Malda.

Household economy plays an important role in the economic life of Malda. Malda's participation in household economy has been in a greater proportion than that of the State. Nearly thirteen per cent of Malda's workers are engaged in Household Industry, whereas in the State of West Bengal this percentage is only four. In other services also, the workers of Malda are engaged in a higher percentage than in the State.

Female workers of Malda are employed in cultivation by a lesser percentage than the State average. While fifty-four per cent of the male Workers are engaged in cultivation, only one-third of the female workers are employed in that sector of the economy. Female participation as agricultural labourers has been found more encouraging than male participation in the district of Malda. In household economy, the female workers are better engaged than the males in this district. Nearly forty-one per cent of the

total female workers are found to be engaged in household industry, while only seven per cent of the male workers are found to work in that sphere. The statement below gives the distribution of a thousand workers, by persons, males and females and by nine Industrial Categories of workers for the district as compared to that of the State :

	Workers	West Bengal			Malda District		
		Persons	Males	Females	Persons	Males	Females
I	As Cultivator	385	333	368	498	539	303
II	As Agricultural Labourer	153	144	211	144	139	170
III	In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities	..	..	..	..	..	..
IV	At Household Industry	42	30	120	128	70	410
V	In Manufacturing other than Household Industry	144	124	49	20	21	14
VI	In Construction	13	14	5	6	7	N
VII	In Trade and Commerce	75	83	23	36	37	27
VIII	In Transport, Storage and Communications	34	39	4	10	13	N
IX	In Other Services	134	134	130	138	152	70

The proportion between the cultivators and agricultural labourers in the State is about 2·5:1, while that in the district is 3·3:1. The proportion of agricultural labourers with cultivators is lesser in the district than in the State.

In all the police stations of the district except in English Bazar and Kaliachak more than fifty per cent of the workers are engaged in cultivation. It is a remarkable feature that in Gajol, Bamangola and Habibpur Police Stations more than seventy per cent of the workers are engaged in cultivation. In Manikchak Police Station, quite a considerable number of workers are found to be engaged as agricultural labourers. Of the total workers of this police station, nearly one-fourth are engaged as labourers in the agricultural fields. Amongst the female workers of this police station, a little less than half are employed in the agricultural fields as labourers. In Kaliachak Police Station, maximum number of workers are found in household industry. About thirtyfive per cent of the total workers of this police station are engaged in household industry, while nearly thirty per cent are engaged in cultivation. Amongst the female workers of this police station, it is found that nearly eightyseven per cent of them are engaged in Household Industry, and female participation in other fields of economic life has been to a very negligible extent.

In the State of West Bengal, the maximum number of workers are engaged in the primary sector. This is more so in the district of Malda. The proportion of workers engaged in the primary sector of industry has been found to be higher in the district than the State average. In the secondary sector, the proportion of workers in the district though less than the State average has not been negligibly low. It has already been said that Malda's economy is somewhat dependent on the Household Industry of the district. In the tertiary sector also, employment has been found to be in lesser proportion than in the State. The following statement shows the distribution of thousand persons of each sex among primary, secondary and tertiary sectors of industry and non-workers for the district as compared to that of the State :

	West Bengal			Malda		
	Persons	Males	Females	Persons	Males	Females
Workers	**1,000**	**1,000**	**1,000**	**1,000**	**1,000**	**1,000**
Primary Sector I+II	178	287	55	211	362	54
III (except Mining and Quarrying)	12	16	7	7	13	1
Secondary Sector III (only Mining and Quarrying) + IV + VI (only Gas Electricity)	61	100	17	50	52	49
Tertiary Sector VII + VIII + IX (except Gas and Electricity)	80	137	15	60	107	11
Non-workers	**669**	**460**	**906**	**672**	**466**	**885**

Of the total workers of Malda, only 35·8 per cent is engaged in non-agricultural occupation. Of the total number of 143,347 engaged in non-agricultural occupations, only 51,326 are engaged in Household Industry. In Household Industry workers are mostly employed in Livestock and Hunting, Manufacturing of Foodstuffs, Tobacco Products, Cotton Textile, Manufacture of Wooden Products, Non-metallic Mineral Products, Manufacture of Brass and Bell Metal Products and other Miscellaneous Manufacturing Industries. Of those engaged in Non-household Industry, the majority work in Fishing, Livestock and Hunting, Manufacturing of Tobacco Products, Manufacturing of Non-metallic Mineral Products, in Construction, in Retailed Trading, in Transport, in Public Services, in Educational Services, in Personal Services etc.

Table B-IV in Part IIA of this volume gives a detailed distribution of workers according to different industries as classified in the Standard Industrial Classification adopted by the Government of India in the Ministry of Labour and Employment.

The Table B-V in Part IIA of this volume presents a detailed picture about the various occupations of, and services rendered by the working population of the district. These occupations have been classified and coded according to the National Classification of Occupations. From a study of these, the different types of services available to the people of Malda are easily obtained. So far as medical facilities are concerned, it is observed from Table B-V of 1961 Census that there are 616 Physicians, Surgeons and Dentists of whom 14 are women. But there are only 171 qualified Allopathic Physicians and Surgeons of whom three are women. This means that there is one doctor for a population of 7,146. The number of qualified lady doctor in the district is too small. For a total female population of 599,933 there are only three lady doctors. There are 85 Homeopathic Physicians in the district. 114 persons have returned themselves to be practising Ayurvedic system of medicine. 224 persons have been returned as Physicians, Surgeons and Dentists who could not be classified otherwise. They are possibly unqualified persons who due to experience have created some confidence in the minds of the people in their medical or supernatural abilities to cure their diseases. There are 221 nurses in the district of whom 198 are women. Out of 259 midwives and health visitors, only 14 are males. Nursing services as it appears from the Census Return do not seem to be much too adequate for the district requirement.

On the educational side, the total number of teachers is 3,623 as per 1961 Census, of whom only 166 are women. There are only 28 university teachers who generally teach in colleges; There is no such teacher amongst the women of Malda. There are 459 teachers of secondary schools of whom 52 are women. There are as many as 2,569 primary school teachers in the district, 61 of them being females.

There are only nine teachers of Nursery Schools of whom seven are females. 558 persons have returned their occupations as teaching but they could not be classified in any one of the above categories.

In the district there are 126 Architects and Surveyors, 60 of them are Civil Engineers including Overseers. There are only four Mechanical Engineers and one Electrical Engineer, two Metallurgical Engineers and 45 Surveyors in the district. Fourteen have returned their occupations as belonging to this group but they could not be classified in any one of the above classes.

There are 158 Jurists in the district of whom 13 are Judges and Magistrates. There are 105 Legal practitioners and Advisers in the district. There are four Law Assistants and 36 others who have not been classified elsewhere.

A total number of 33,107 persons have returned themselves as Farmers, Fishermen and Hunters, Loggers and Related Workers. Of them 357 are Farmers and Farm Managers, 8,405 are Farm Workers. There are 2,976 Fishermen (Inland and Coastal Waters in the district). 553 persons are returned as Loggers and other Forestry Workers.

2,548 persons have returned their occupations as belonging to Transport and Communication Services. There are 460 Deck Ratings (Ship), Barge Crews and Boatmen, 105 Railway Engine Drivers and Firemen. There are 1,247 Drivers engaged in Road Transport, of whom 354 are Cycle-Rickshaw Pullers and 531 are Animal Drawn Vehicle Drivers, Motor Vehicle Drivers are only 321 in number.

In the Divisions 7 and 8 *i.e.*, Craftsmen, Production Process Workers and Labourers not elsewhere classified, total number of persons returned are 72,374. There are 11,330 Spinners, Weavers, Knitters, Dyers and Related Workers, 1,153 Tailors, Cutters and Related Workers, 1,362 Jewellers, Goldsmiths, 1,924 Carpenters and Pattern Makers (Wood).

824 persons could not be classified by their occupations because of incomplete returns in the Enumeration Slips. There are also 722 workers whose occupations are unidentifiable or unclassifiable. 102 persons have not reported their occupation in the 1961 Census.

In the district of Malda out of 400,729 total number of workers as many as 26,496 are below

15 years of age. The total number of children of the age-group 0-14 are 558,231 as per 1961 Census. Generally speaking this age-group represents the school going age and as such few of them are expected to come in the working force. With the advancement of primary education this age-group will automatically go out of the working population. In the Census of 1961 only 4·8 per cent of the non-adult persons in the age-group 0-14 have returned themselves as being engaged in some productive occupations. Of the total working population the non-adult workers constitute about 6·6 per cent. This percentage seems to be a bit higher than the corresponding State percentage of child workers to total workers in the State. Amongst the child workers of Malda, the majority are engaged as cultivators. Those engaged as agricultural labourers are almost equal in number with those engaged in household industry. Quite a good number of them are also found in other services. Female child workers are mostly found to be engaged at household industry in this district. In Mining, Quarrying, Livestock, Forestry etc., quite a good number of male child workers are also found. In the urban area, the employment of child labourers has been found to be very low. They are mostly found to be engaged in other services. The age-group-wise distribution of workers for the district has been given in the following statement as compared to that of the State :

Age-group	West Bengal			Malda District		
	Persons	Males	Females	Persons	Males	Females
All ages	**1,000**	**1,000**	**1,000**	**1,000**	**1,000**	**1,000**
0—14	39	36	57	66	67	62
15—34	516	514	539	501	503	494
35—59	388	392	364	366	362	384
60 +	57	58	46	66	67	60
Age not stated	..	..	..	1	1	..

In 1961 Census the entire population were classified by nine broad Industrial Categories of workers according to a person's principal work. In case of a person engaged in more than one activity, the work in which he spent most of his time was considered to be his principal work, and what occupied his second most time was considered the secondary work of that person. Table B-VII in Part IIA of this volume gives information on such secondary work. Amongst the cultivators of Malda only twelve persons out of every one hundred of them have a secondary occupation. Most of them are secondarily engaged in the agricultural fields as labourers.

Only about five thousand cultivators of Malda are engaged in household industries in addition to their principal occupation. Only eleven per cent of the total agricultural labourers of this district have some secondary occupation, mostly being engaged as cultivators and a few at household industry. Of those primarily engaged in household industry about five per cent have their secondary occupation mostly as agricultural labourers and a few as cultivators. Even the persons who are primarily engaged in various non-agricultural and non-household industries like Manufacturing, Trade, Transport, Construction, Other Services etc., have by a small proportion secondary occupation in the household industry. About three per cent of the persons engaged in non-household industries are secondarily employed in household industries.

The Non-working Population

In 1961 Census as many as 67·2 per cent of the total population of the Malda District have reported themselves as non-workers. The corresponding figure for the State of West Bengal as a whole is 66·8 per cent. The male non-workers and the female non-workers separately account for 46·6 per cent and 88·5 per cent of the total males and females respectively in the district of Malda as against 46·0 per cent and 90·6 per cent in the State. The variation between the percentage ratio of male non-workers and female non-workers both in rural and in urban areas is striking. The statement below gives the percentage distribution of total male and female non-workers to total persons, total males and total females respectively of the District and the State for total rural and urban areas separately :

State/District	Total Rural Urban	Percentage of Non-workers to Total		
		Persons	Males	Females
West Bengal . . .	Total	66.84	46.02	90.57
	Rural	67.33	46.53	89.38
	Urban	65.54	44.62	94.88
Malda District . . .	Total	67.21	46.63	83.54
	Rural	66.97	46.32	88.29
	Urban	72.64	53.45	94.62

In the working age-group 15-59 amongst males, those who are not engaged in any productive activity and thus have been shown as non-workers in the Census 1961 form about 6·6 per cent only of total male population of the same age-group in the rural areas of the district. Amongst females more than two-third (about 79·7 per cent) of total female population in the working age-group 15-59 are not in the working force. The corresponding figures for male and female non-workers in the same age-group are 22·1 and 90·3 in the urban areas of the district. It shows that the percentage of female non-workers of the workable age is much higher than that of the male non-workers both in rural and urban areas. The unusually high percentage of the female non-workers is mainly due to the fact that most of the female non-workers of the workable age are engaged in household duties. The female non-workers of workable age engaged in household duties form

89·2 per cent and 88·0 per cent of the total female non-workers in the age-group 15-59 in rural and urban areas respectively. The percentage of male non-workers in the workable age seeking employment for the first time and of those employed before but now out of employment and seeking work together accounts for only 10·3 per cent and 9·3 per cent of the total male non-workers of the same age in rural and urban areas respectively as compared to 0·04 per cent and 3·0 per cent for the corresponding female non-workers.

In the age-group 0-14 the participation in the working force should be the least. This is more so in the urban areas, where 97·7 per cent of the boys and about 99·7 per cent of the girls between age 0-14 are non-workers. Most of the members of the young folk of the age-group 0-14 in urban areas are school going while in rural areas a significant number of young people belonging to age-group 0-14 is found to be engaged in agricultural pursuits. The following statement shows the percentage of non-workers in different age-groups to total males and females separately for the different age groups:

	Percentage of Non-workers to Total			
	Rural		Urban	
Age-group	Males	Females	Males	Females
Total	**46.32**	**82.29**	**53.45**	**94.62**
0—14	91.92	98.41	97.66	99.74
15—34	9.20	81.16	29.32	92.88
35—59	2.76	75.00	10.34	85.72
60+	20.15	86.84	46.57	93.49

In the urban areas of the district which consist of only two towns, English Bazar and Old Malda, the unemployed persons having educational attainment beyond Matriculation or Higher Secondary constitute only 5·7 per cent of the total unemployed in the urban areas as compared to 12·1 per cent formed by the unemployed having the educational level of Matriculation or Higher Secondary. The maximum number among the unemployed is found to have attained the Primary or Junior Basic level only. This category alone forms 40·0 per cent in the urban areas. Illiterate unemployed persons constitute 25.4 per cent. The rest of the unemployed persons are literates without any educational standards.

In rural areas male unemployed persons having educational level of Primary or Junior Basic account for 52·3 per cent as against 20·5 per cent illiterate unemployed males. Unemployed males with educational standard of Matriculation and above constitute only 10·7 per cent. But the picture as to the unemployed females is quite different from that of the unemployed males. 91·5 per cent of the total unemployed females in the rural areas are illiterates.

The distribution of a thousand non-workers according to the 8 types of activities of the non-workers shows that the largest number of male non-workers are found to be "dependants, infants or disabled". More or less equal number of female non-workers are found either as engaged in "household duties" or to be "dependents, infants or disabled". The number of female non-workers who are "full time students or children attending school" both in rural and urban areas are far less than such male non-workers. Again the number of fulltime students or children attending schools both for males and females in urban areas is, as it should be, higher than that in rural areas. The number of unemployed persons are also not very significant. The following statement showing distribution per thousand of non-workers according to different types of activities will give a clear idea about the non-workers:

	Total		Rural		Urban	
Type of activities of Non-working Population	Males	Females	Males	Females	Males	Females
Total Non-workers	**1,000**	**1,000**	**1,000**	**1,000**	**1,000**	**1,000**
Full time students or Children attending School	203	38	198	33	304	148
Household duties	0	433	0	431	0	477
Dependants, infants and disabled	777	518	783	525	646	366

AGRICULTURE

The district of Malda has been in the past, is to-day, and still for years to come will be a land of villages. Its economy being mainly rural in nature, majority of the people of Malda depend on agriculture as their principal source of livelihood. The participation of workers in the primary sector has been found to be in a higher proportion here than the State average. Out of every 1,000 people of the district about 218 persons have been found to be engaged in the primary sector of industries. Amongst every 1,000 working population of the district 642 persons work either as cultivators or as labourers in the agricultural fields. But due to certain peculiarities in its natural configuration this district could not have an efficient system of agriculture.

On a careful study of the pattern of land employment in the district, it is apparent that land utilisation was not very satisfactory. In 1947-48 the area sown in the district was of the extent of 729,900 acres, *i.e.*, 79·4 per cent of the total area of the district was sown. In 1953-54 this was diminished to an area of 721,600 acres, *i.e.*, 78·5 per cent of the total area of the district. A further diminution in the net area sown occurred in 1958-59 when the area sown was only 640,000 acres, *i.e.*, 69·6 per cent of the total area of the district. In 1953-54 area not available for cultivation was about 87,000 acres, current fallows 32,200 acres and other uncultivated areas excluding current fallows 50,100 acres. In 1957-58 the extent of cultivable waste was nearly 12,000 acres. The forest area being too small, practically there was not much scope to bring virgin soil under tillage by clearing forests.

The average annual rainfall is 1,540·3 mm. (60·64″). The maximum rainfall in the district is experienced in August-September.

Variations in rainfall are secondary so far cultivation is concerned to the annual inundation except, of course, in the high lands of *barind*. The nature of cultivation and the pattern of crops depend very much on the period during which the land remains under floods and also on the rate of rise of the rivers.

As stated earlier the district of Malda has been divided clearly in three distinct parts according to the geological formation of the country. In the *barind* area the land is high, open and undulating. The entire tract is practically devoid of shade except for the village sites and small patches of *sal* forest scattered here and there. The soil is baked and very hard. Moving through this part of the district, a spectator only commands a wide view of an endless series of terraced slopes devoid of any crops. In autumn, however, the same tract of land assumes the view of a green expanse of winter rice. The area between the river Mahananda in the north and the Kalindri in the south, commonly known as the *tal* land, being a low-lying area is generally subject to inundation with the rise of the rivers. The river Mahananda failing to find out an easy outlet when it is in spate generally over-flows this area to its south resulting in the crops on the lower level being very often flooded out. The entire *tal* land is wholly under cultivation. In Kharba Police Station jute and paddy are the principal crops. Mango groves are also come across here and there. In fact there are several orchards covering a large area in the police station of Harishchandrapur. In Ratua Police Station *aush* paddy and *rabi* crops are commonly grown. Patches of uncultivated land covered by low jungles and coarse grass can be occasionally found in the northern part of this tract. The central area of the district was once a land of mulberry cultivation, but has now been given over to mango. By the side of the main road leading from English Bazar to the ruins of Gaur and the belt of densely wooded villages along the river Mahananda, the country is constituted of a dark clayish soil producing *aman* paddy. *Boro* paddy is also grown on the edges of the *bils* in this tract of the district. Mango gardens are very common here. It can be found almost in every village. In fact the earth is invisible if viewed from the air. The most fertile land of the district is, what is known as the *diara* tract, which receives the Ganges silt, formed as a result of centuries of fluvial action by the Ganges. This tract of land is congenial to the growth of mangoes and mulberry. The principal crops here are *aus* paddy, wheat, barley, oats and mustard. Sugarcane is also grown to some extent. This area is fairly double cropped. Double cropping is also practised in some areas in the northern part of the district. Double cropping is mainly done in *do-ash* variety of soil. This is a light loam of a later alluvial formation consisting of admixture of clay and sand. To the east of the river Mahananda the proportion of clay is greater. To the west and as one approaches to river Ganges the soil contains greater proportion of sand. The *do-ash* variety of soil is also most suitable for growing of mangoes. Sandy soil covered with a thin deposit of silt with the somewhat hard crust found occasionally along the Ganges, the *chars* and other areas commonly known as *chama* or *jhenjar* are suitable for occasional cropping. *Basta* and *rangamati*, the reddish clay soil of old alluvial formation found in the *barind* are the least fertile.

Principal Crops—Mango and mulberry are extensively grown in the central and southern parts of the district as the soil, climate etc., of that area prove congenial to their growth. Mango cultivation is an important occupation in the district and mulberry is the food for silk-worms which constitute the vital industry of the district. The various field crops of the district may be distinctly classified as the *bhadoi*, the *aghani*, the *haimantik* and the *rabi* crops. *Bhadoi* is the early crop sown in May and reaped in August-September. Paddy, jute, maize and various other millets fall in this category. *Bhadoi* and *aghani* both are sown broadcast while the *haimantik* is transplanted. Both *aghani* and *haimantik* are the winter rice crops. The *rabi* crops principally include *kalai*, *khesari*, barley, wheat, mustard, peas, linseed and gram.

The distribution of general crops in the district in 1959-60 is given below :

Area of *aus* rice	146,800	acres
Area of *aman* rice	302,500	,,
Area of *boro* rice	26,900	,,
Area of wheat	8,200	,,
Area of barley	62,000	,,
Area of maize	35,600	,,
Area of pulses	189,000	,,
Area of jute	58,100	,,
Area of mesta	15,200	,,
Area of linseed	7,700	,,
Area of rape and mustard	37,800	,,
Area of sugarcane	8,900	,,

The *bhadoi* and *aghani* rice being sown broadcast are subject to similar methods of cultivation. The land is first ploughed and cross-ploughed for about four to eight times according to quality. A ladder (*moi*) or plank (*choma*) is used to break up the clods and cover the seeds. A harrow (*bidia*) is used to thin the plants when they are about four inches above the ground and the land is weeded. This helps the crops grow as regularly as it is in the case of transplantation. Ordinarily there is one weeding. A second weeding is generally given to the crops on high land. The *aus* paddy *i.e.*, the *bhadoi* is sown in early May and harvested in August-September. In the *diara* tract, low-lying lands are extensively used for *bhadoi* rice cultivation, the high lands being sometimes used for jute.

The outturn in these low lands depends very much on the extent of inundation caused by the rise of the rivers particularly the Ganges. If the floods visit the land before the crop is ripe there is a heavy loss and if it is late there is a bumper crop. The *bhadoi* rice not having keeping properties is generally consumed by the poorer classes.

The *aghani* variety of *aman* paddy, that is the non-transplanted winter rice, is sown in June-July and reaped, as its name implies, in *agrahayan i.e.*, November-December. This is mainly grown in the northern part of the district. This is a better variety of rice than the *Bhadoi*.

But the finest rice is the transplanted *haimantik*. After the showers in May low-lying plots or the plots near the irrigation tanks are prepared and sown broadcast for seedling. The fields which are to receive the paddy are ploughed four to six times throughout June. As the rains set in, the *ails* or low walls of mud are prepared to hold as much water as possible and the transplantation commences. It goes on from July to September according to rainfall. Weeding is not very much necessary. It is harvested in late November or in December. The valleys between the undulations in the *barind* are naturally the most productive.

The spring rice known as *boro* is sown in October in soft clayish soil generally situated near the edge of the *bils* where water remains throughout the cold weather. The land which is to receive them are ploughed three or four times and churned up with the water covering it. Transplantation is done as for *haimantik* paddy. The crop is harvested in April-May. The grains are generally coarser than other varieties of rice.

From the statement of crops in the district given earlier it appears that a large area of the district is under *rabi* crops. The *tal* land or the western part of the district where a considerable extent of land is liable to inundation, is the best cropped area for *rabi* cultivation. When the *bhadoi* crops are harvested in the higher lands and the flood water recedes away from the lower lands ploughing begins for fodder crops. The first sown is *kalai* which is generally grazed off, another crop following it. *Mash kalai* and *kurti kalai* are the two main varieties grown in the district. *Khesari* is generally sown broadcast in the *aghani* rice fields in October. Gram and *matar* are also widely grown. *Masur* is grown to a limited extent. For these two crops the higher lands are ploughed four to six times. For peas ploughing is generally done twice.

Mustard is another important spring crop grown extensively in the district, specially in the *tal* land. *Til*, linseed and *sorguji* are other crops under oilseeds grown in the district. The seeds of *sorguji*, which is more commonly known as *guji* are used for adulteration of mustard oil. The plant is about 2/3 feet high and it closely resembles the small sunflower in appearance. 'Towards the end of the cold weather the spectacle of field after field of guji and mustard is very pleasant to the eye, the orange and the lemon colour of the two crops blending into a harmonious whole.'

Jute is not a successful crop and it covers rather a small area of the district. But quality jute is grown in the low lands of Gajol Police Station. In Kharba and Harishchandrapur Thanas a considerable amount of jute is produced. *Mesta* and sugarcane are also grown in the district.

Of the different types of vegetables grown in the district those worth mention are brinjals, chillies, *potals*, *ucchas*, onions, radishes, cucumbers and gourds. Potatoes are grown on a small scale. Cauliflowers, cabbages and tomatoes are also grown in the district. Vegetables are mainly cultivated in garden plots for household consumption and also for sale in local bazars.

Malda's mango cultivation needs special mention. Carter in his Settlement Report (1928-1935) gives a fine account of it.

"The mango is another product for which Malda is famous. It is extensively grown over the whole district, with the exception of the *barind* tract where the red alluvium is not suitable for its cultivation, and the diara strip along the Ganges, where the proportion of sand in the soil is excessive. English Bazar is by far the largest best mango growing thana. The area covered by mango gardens is 15 square miles, or one sixth of the total area of the thana. It is followed by thanas Ratua, Kaliachak, Kharba, Malda, Harishchandrapur, in that order. The most thickly-grown area lies along the banks of the Mahananda and Kalindri rivers. Seen from the air, it presents an unbroken expense of foliage, with occasional open fields, studded with rows of dots, where new orchards have been planted. The trees are planted on fairly high ground, above the flood level, in soil which is generally a light and rather sandy loam. The fruit has an excellent flavour, and is free from the taste of turpentine so often found in mangoes of an inferior species. Probably the flavour is due to the soil, which is lacking in saline properties. The cocoanut palm for example, which requires a certain amount of salt in the soil, is hardly to be found in the mango-growing part of the district, and the few trees that do exist bear no fruit.

In the north-west of the district there are several large mango gardens belonging to the Chanchal, Harishchandrapur and Bhaluka zamindars. The gardens, which cover several hundred acres, are held khas, and in a good year bring a large income to their owners. It is rather interesting to note that in the time of the Nizams of Bengal and afterwards, the zamindars were deprived of this source of income. Writing of Nawab Jafar Ali Khan, the author of Riyaz-us-Salatin observes that the Nizam employed a Superintendent of mango supplies who was posted in the Chaklah of Akbarnagar (in the west of Malda district) 'and he, counting the mangoes of the khas trees entered them in the accounts, and showed their collection and disposal; and the watchmen and carriers, levying the expenses of carriage from the zamindars (a rather unkind imposition) sent the sweet and delicious mangoes from Malda, Kotwali, Husainpur, Akbarnagar and other places. And the zamindars had no power to cut down the khas mango trees : on the contrary, the mangoes of all the gardens of the aforesaid Chaklah were attached. And this practice was more rigorously observed in the times of previous Nizams of Bengal. Even at present (1788) when the administration of Bengal is virtually in the hands of the Christian English, and only the nominal Nizamat rests with Nawab Mubarak-ud-daulah, son of Nawab Jafar Ali Khan, in the mango season the Superintendent of the khas mangoes proceeds to Malda on behalf of the aforesaid Nawab Mubarak-ud-daulah, attaches the mangoes of the khas trees, and sends them to the Nawab, and the zamindars do not go near the khas mango trees. But the Superintendent no longer obtains the carriage expenses from the zamindars, nor does he enjoy his former prestige and respect.'

'The planting of a mango garden requires initially a certain amount of labour and attention. In fact there is a saying in the district that the nurture of young mango plants is as difficult as that of children. The ground is first ploughed up thoroughly, and sometimes has to be drained by excavating ditches round it. It then has to be fenced to prevent damage by cattle. Transplantation takes place in July, when the rainfall is at its heaviest, and each plant has to be separately fenced with a circular wall of bamboo matting. The plants are arranged in straight rows at intervals of about 10 yards. During the first year they require regular watering and constant attention, and up till the sixth year, when the young trees begin to bear fruit, the ground has to be regularly weeded or dug up to keep it clear of undergrowth. During the first few years it is possible to grow crops on the same land; but thereafter cultivation has to be stopped, in order that the trees may receive the full benefit of the soil. The initial cost of planting a mango garden is between Rs. 40 and Rs. 50 per acre. The rent for mango gardens where separate rates prevail, is generally Rs. 6 per acre, which is distinctly higher than the average rate of rent for paddy land.

There are in the main two varieties of mango —the *guti* or ordinary mango grown from seed, and the *kalam*, which is grown from graftings. The latter is a superior quality, and fetches a higher price.

The earliest mangoes are the Gopalbhog and Brindaban, a small but finely flavoured fruit. Then come the Lengra, Khirshapati, Kissonbhog and other species. The Fazli is the largest one. Last

comes the Aswini which, though rather inferior in flavour, generally commands a higher price, because it is the only available mango at that season.

The mango trade is one of the most important economic factors in the district. As soon as the trees have blossomed, speculation begins. The price varies according to the class of mango and the effect of the weather on the crop, for hails and heavy rains are most injurious to the formation of the fruit. When the price of a garden is finally fixed, the purchaser may re-sell it at a profit to another dealer, and in this way it may change hands three or four times before the fruit is actually picked. This is done with long bamboo poles to the end of which nets are attached. Almost the entire crop is then exported, chiefly to Calcutta. The railway platforms at this season are crowded with baskets filled with mangoes. Most of the dealers are local merchants and there are also middlemen, who do a business and receive a commission from the dealers and the owners of gardens.

A good year brings prosperity to a large section of the population. The owners of gardens make a handsome profit when prices are good, because once the trees have started bearing fruit, the cost of maintenance is negligible. The poor people also benefit, because there is an unwritten law that windfalls are the property of the first comer. Every storm or gale brings them out to collect what they can.

Even in the middle of the night one sees lanterns flickering in the mango gardens. In this way they manage to lay in a considerable stock whether they own trees or not, and as mangoes comprise half of their diet for about two months in the year, a good season is of no small importance to them. They can also make a small income by selling various preparations such as 'amchur' which consists of slices of green mango dried in the sun, and 'amsattwa'. This is a preparation which is exported in large quantities as far as Punjab and Madras. It is made from the juice of ripe fruit, which has been pressed, spread out and solidified by the application of a drying agent. The process by which the juice is dried is a trade secret of the people who manufacture 'amsattwa'.

The Fazli of Malda is a name amongst the mangoes of Bengal. Other well-known varieties that are grown in the district are Bombai, Lengra, Aswini, Kalapahar, Gopalbhog, Brindaban, Khirsapati and Kissonbhog. In 1958 mango cultivation covered an area of about 44,000 acres in the district. Of this area about 27,515 acres were mainly devoted to raising of grafted variety of mangoes. The Guti mangoes were grown in the rest of the area.

Before the Partition of the country Malda mangoes had a good market in East Bengal. Exploration of alternative markets is the principal difficulty faced by this trade in the present time. An air-field was established for air-lifting of mangoes from Malda. But the local traders did not take full advantage of the same. Recently the Mango Processing Co-operative Society was set up at Malda with a view to preparing various popular edible products from mango. These products have captured a favourable market both in and outside the district.

Improvement of Agriculture—The State Government have established one District Agricultural Farm in the district headquarters and nine Thana Farms in the rest of the nine police stations. The main objective of these farms are to help the agriculturists of the district to better their lot. Improved seeds are produced here for distribution to the cultivators. In some of the police stations where the farm's production cannot cope with the total requirements of the cultivators, a handful of the best and resourceful cultivators are selected, who are entrusted with the preparation of better varieties of seeds, which in turn could be distributed to others. The Research Unit of the district farm carries on research in various agricultural techniques on production of suitable crops befitting the local conditions of the district. Any new crop is introduced after it stands a test in the district farm. The Agriculture Department organises various demonstration plots to impress upon the local cultivators about the use of improved techniques chiefly consisting of improved varieties of seeds, use of proper manures and fertilisers to be chosen in the light of the properties of the soil, sufficient irrigation and use of improved types of agricultural implements.

The Block Development Officers supply whenever needed plant protection equipment like hand dusters, sprayers, power sprayers, power dusters, insectisides to the farmers.

Financial Assistance to Agriculturists—Financial assistance under the Agriculturists' Loans Act is generally provided to an individual needy cultivator. Loans under this act are also extended to a group of cultivators in case of any natural calamity occurring in the area like flood, drought etc. In 1957-58 an amount of Rs. 2,754,940 was advanced to 111,144 cultivators. In 1958-59 a little less than this amount (Rs. 2,736,670) was distributed to 116,838 cultivators of the district. The amount advanced in the next year *i.e.*, 1959-60 was much less when only a sum of Rs. 119,345 was given to only 4,467 cultivators. Next year the amount rose up to Rs. 253,675 the number of cultivators receiving the loan being 15,531 and in 1961-62 a total number of

33,259 cultivators were granted a loan of Rs. 827,908 only.

Loans are also advanced to the cultivators under Land Improvement Loans Act for bringing virgin soil under the plough. In 1957-58 only 2 cultivators of the district received a sum of Rs. 660 only as loan under this act. In each of the next two subsequent years the number of beneficiaries were only 6 and the loans advanced were Rs. 2,890 in 1958-59 and Rs. 3,930 in 1959-60. Next year no loan was granted under this act. In 1961-62 only five persons were granted a sum of Rs. 1,710 only.

A good number of cultivators derive benefit by getting financial assistance under Cattle Purchase Loans Act. In 1957-58 no less than two thousand and eighty nine persons were granted C. P. Loan amounting to Rs. 291,690. In 1958-59 also 1,015 persons were benefited by this loan of a total sum of Rs. 121,850. In the years that followed the number of beneficiaries became less. In 1959-60 only 209 persons got a sum of Rs. 29,450 and in the next year only Rs. 28,525 were advanced to 165 persons. In 1961-62 a sum of rupees sixty thousand were given to 360 persons as loan.

The Mango Processing Co-operative Society also received a loan of rupees one lakh in 1958-59 and Rupees Sixty Thousand in 1959-60 from the Government.

Irrigation

The importance of irrigation as a handmaid to agriculture has all along been recognised. The existence of a large number of tanks in the high land of the *barind* clearly points out to an efficient irrigation system prevailing in the country in earlier days. Even to day specially in a year of short rainfall these tanks prove themselves very useful for the purpose of irrigating cultivated land.

Carter has described two major irrigation systems prevailing in the district. To quote Carter :

"There are two methods of irrigation which are locally known as 'sechan' and 'melan'. Sechan consists of raising the water, when the land to be irrigated is on a higher level than the water of the tank. For this a 'jant' is imployed, consisting of a hollowed out tree trunk fastened to bamboo posts which are embedded in the tank. The water is raised, and sluiced down a narrow channel into the first field. When this field has received its full capacity, a cut is made in the ail, and the water is allowed to flow into the next field. The process is continued until all the fields have been irrigated within a convenient radius of the tank.

Melan is the reverse case, when the level of the water is higher than that of the land to be irrigated. A narrow cut is made in the bank of the tank, generally at one corner, through which the water runs until a sufficient supply has been obtained. The channel is then filled in with enough earth to stop the flow. As might be expected, sechan is the form of irrigation in general use during the earlier summer months, and melan when the rains have set in and the tanks are full of water."

Tank irrigation is not always sufficient. Various other irrigation schemes were executed by the Government to ensure adequate irrigation facilities to the cultivators of the district. Since Independence seven drainage schemes were executed with a view to put a large portion of land lying barren and waste, to production.

The police stations of Kharba, Ratua and Gajol were each benefited by two such schemes and one scheme was executed in Kaliachak Police Station. In addition to these, several embankment schemes as flood-production measures and a few other flushing and drainage schemes for protection from water-logging in certain areas under Harishchandrapur, Ratua, Malda and Kaliachak Police Stations were executed. The details about these schemes have been given elsewhere in this volume under 'Material Progress of the District'.

The importance of tank irrigation was also duly felt. During the first two plan periods a total number of 852 tanks of the district were re-excavated. Prior to the plan periods as many as 181 tanks were also improved. All these 1,033 tanks were improved at a cost of Rs. 2,280,276 thus benefitting an area of 21,778 acres of the district. Some minor irrigation schemes were also undertaken by the Tribal Welfare Department. The Agriculture Department arranged irrigation from the rivers by means of pumps. Deep tubewells were also sunk by them for providing irrigation in certain areas.

Forestry

This district is practically devoid of any deep forest. The undulations of the *barind* are conspicuous by the absence of trees. Sporadic growth of *simul, pakur, peepul* and *nim* trees are observed here and there. The central and southern parts of the district specially the banks of the rivers Mahananda and the Kalindri and the English Bazar and Kaliachak Police Stations are the heavily wooded area of the district.

Eucalyptus, *kadam*, *sisoo*, *simul* are mainly grown in the low-lying areas and on high lands are grown teaks, *kadam*, eucalyptus, *sisoo* and *sal*. Forestry in this district does not subscribe so much to its economic life as does agriculture

or small industry. In 1961 only 291 persons were returned whose primary occupations were forestry and logging.

In 1962-63 the forests covered an area of 5,922 acres of the district of which 1,295 acres were under reserved forests, and 2,072 acres under protected forests.

The unclassified forests extended over an area of 2,555 acres.

The reserved forest at Halna covers an area of 351·01 acres. The protected forests are scattered all over the district. They include Kalna protected forest on 122·70 acres, Pathar Mahadeb batu on 149·04 acres, Halna on 31·25 acres, Jamalpur on 124·49 acres, Mazilkhan on 20·62 acres, Goalchaita on 50·2 acres, Talisan on 4·70 acres, Patherbanpur on 157·91 acres, Anandapather on 45·28 acres, Kariali on 263·84 acres and Malancha and Kharuna on 67·90 acres.

The unclassed state forests include Pathar Sibram (13·20 acres), Dolachola Patharkhairan (332·72 acres), Adina (70·17), Saharol (549·04), Araji Debhrol (1·20), Kariali (2·00), Kutab Sayar (46·18), Kochakandar (17·01), Rajarampur (49·15), Kalna (23·29), Rangamati (8·51), Bhalukhola (1·72), Pather Sibram (84·73), Saluka (468·62), Balisimla Sasinda (225·50), Karjadanga (3·71), Garhar (54·00) and Abhirampur (8·03).

Thatch grass, timber and fire-wood are the main forest produces of Malda. Thatch grass alone fetches about twenty thousand rupees a year. In 1960-61 the total income derived from the forest produces was to the tune of Rs. 35,441. Actually the income falls short of expenditure incurred by the Forest Department for afforestation and maintenance. Afforestation mainly takes place in the non-cultivatable lands—the lands which are deemed too low for *aman* crops or too high for *aus* paddy. During the first plan afforestation took place over an area of about 1,843 acres and during the second plan about one thousand acres of fallow lands were put under forest.

Livestock

The district of Malda occupies a distinct place in so far as its cattle population is concerned. The total bovine population of the district as per Cattle Census of 1956 was 504,388 of which 454,722 were cattle and 49,666 buffaloes. There were 247,567 heads of goats, 20,358 sheep, 4,691 horses and 16,681 heads of pigs. The Livestock Census of 1956 further gives us data on the fowls and the ducks of the district. There were 38,124 number of fowls and 36,598 ducks at that time in Malda.

The Animal Husbandry and Veterinary Department of the Government had brisk activities for betterment of the position in respect of livestock in various fields. 91 bulls of superior breed were maintained by the Government (as on 31st March, 1961) which were made available for quality breeding of cattle. In March 1961 there were three Artificial Insemination Centres with 18 sub-centres in the district for artificially impregnating cows. During the first two plan periods intensive work on cattle development was carried on in the southern part of the district *i.e.*, in the Manikchak, Kaliachak and English Bazar Police Stations. There is a Poultry Extension Centre at Malda wherefrom superior types of poultry birds are distributed at subsidised rates.

No cattle epidemic was reported to have broken out during the long period of 1953-1960. In 1957-58 about 3,486 heads of cattle were inoculated against rinderpest and in 1959-60, 172 heads against anthrax. In 1959-60, 29,964 poultry birds were inoculated against a threat of Ranikhet disease in an epidemic form.

As told earlier a good quantity of fodder crops are grown in the district as winter crops. Jowar, maize and *kslai* are such crops.

INDUSTRY

As per 1961 Census a total number of 60,158 persons are engaged in industrial pursuits either in household industry or in manufacturing other than household industries. They constitute 15 per cent of the total working population of the district and amongst the total population of the district they are only 5 per cent. Of them, as many as 51,326 persons are engaged in household industries only. There is no big or large scale industry in this district. But as is seen above the small scale industries of this district play a vital role in its economy and provide employment opportunities to a major part of the working force.

The Census Department took a complete House Census in October, 1960 and prepared a detailed report on it to show various aspects of the uses of the census houses in the State. The total number of industrial establishments as existing in October, 1960 may be found in Table E-III published in Part IV(i)—Report and Main Tables on Housing and Establishments in West Bengal of the 1961 Census. There are a total of 5,354 industrial establishment in the district. Of these, only 112 *i.e.*, 2·09 per cent use power-driven machines. Only 32 establishments use machinery run on electricity, 77 use machinery run on liquid fuel and only 3 use machinery run on coal, wood or bagasse. In 5,242 establishments there are no power-driven machinery of any kind. Maximum number of the establishments relate to handloom industry. Cotton weaving in handlooms occupies as many as 2,482 establishments. 1,017 establishments belong to manufacture of various foodstuffs. A total number of 333 establishments of this district are used for manufacture of sundry hardwares such as G. I. pipe etc. Manufacture of jewellery, silverware and wares using gold etc., occupies 221 establishments. There are 179 establishments on manufacture of earthenware and earthen potteries, 153 on bidi manufacturing, 135 on tailoring, 106 on manufacturing of wooden furniture and fixtures, 103 on spinning of silk other than in mills, 74 on shoe repairing, 71 on bicycle repairing, 64 on manufacture of miscellaneous wooden products, 58 on manufacture of materials from bamboo, cane or leaves etc., 52 each on manufacturing of bricks and tiles, and manufacture of shoes, 44 on brass and bell-metal products.

Table B-IV in Part IIA of this volume gives the number of persons engaged in each of the above industries. In terms of number of persons engaged in different industries, it is observed that the maximum number is engaged in the manufacture of various food products. As many as 6,992 persons are gainfully employed in the different food processing industries. Of them 4,111 are engaged in production of rice, atta etc., by milling, dehusking and processing crops and foodgrains. 1,756 persons are engaged in hand pounding of rice by *dhekhi* and 168 in production of pulses. The production of palm *gur* received particular attention since 1950. It was estimated that in and around 1963 there were about 250,000 palm trees and 5,000 date trees. By 1953 fifteen centres for palm-gur production were opened in different areas of the district. But not much effective production was made and as per 1961 Census return only 11 persons are found in this industry.

About 5,743 persons of Malda are found to work in cotton weaving in handlooms. Cotton cloth of Malda had some reputation in earlier days because of certain characteristic features. In Dr. Buchanon Hamilton's Account a detailed description of cloth manufacturing of Malda is obtained. Dr. Buchanon mentions that in 1808 the ordinary cloth used in the district was gani (from which the modern name gunny for jute has come) or cotton. The particular type of cotton having yellow tinge produced in the northern part of the district is no longer cropped. There has been a lot of changes in the use and pattern of the looms for weaving cotton cloth. Cotton weaving in handlooms is mainly concentrated in Kaliachak Thana, where there are as many as 1,797 establishments on this industry engaging 4,627 persons of whom 2,528 are women. This is also one of the principal industries in English Bazar and Manikchak Police Stations. A little more than five hundred and a little less than four hundred persons are primarily engaged in this particular industry in English Bazar and Manikchak Thanas respectively. The number of establishments on this industry in English Bazar is 275 and Manikchak 265.

About 1,177 persons of Malda are engaged in Leather. Most of them, about three fourth, are employed in manufacture of shoes and other leather foot wear. In Kaliachak, Manikchak, Ratua and English Bazar Police Stations such workers are mostly found. In the town of Old Malda there are 9 establishments on shoe manufacturing where only 26 persons are employed. In 1951 there was a big depot in English Bazar which used to export to Calcutta large quantities of raw hide and perfunctorily tanned leather.

In Hunter's Account of the district mention was made of brass and bell-metal industry. In fact the braziers of Malda were well-known all

over Bengal in the past specially for spoons, ladles and *dabars* for keeping betel vine. These products were abundantly marketed all over the State and could meet a major part of the demand of the country. Nawabganj (now in East Pakistan) was the principal seat of this industry. The artisans of Nawabganj were mainly muslims.

In the report on the Survey of Cottage Industries which was published in 1929 a detailed account has been given about the brass and bell-metal industries of Malda. 650 persons were stated to have been engaged in this industry that time, of whom only 20 persons belonged to English Bazar. In fact after the Partition of 1947, large number of artisan families migrated to English Bazar, Araipur and Najpara from Nawabganj, Kansat and Sakerbati (now in East Pakistan). These are at present the chief centres of this industry. From 1961 Census we get a total number of 44 establishments on brass and bell-metal industries out of which 39 are situated in English Bazar. Out of 216 persons engaged in this industry 213 belong to English Bazar. The brass and bell-metal products of this district do not excell in any special shape but the local *gharas* and a particular shape of *jambati* are celebrated.

Lac cultivation is another industry which occupied distinct place in the economy of the district of Malda. At the present time this industry has only become a thing of the past and practically no lac is cultivated in this part of the country. Even in his Settlement Report (1928-35) Carter observed that this industry was facing the danger of total extinction. In fact lac cultivation declined since the World War of 1914-19 far more rapidly than the silk industry.

Lac cultivation was definitely in existence in the beginning of the nineteenth century. Buchanan Hamilton mentioned the use of stick lac as one of the principal dyeing materials of silk. But Hunter in his Statistical Account (1876) was silent about this industry in the district. This indicated that lac as a dyeing material was being replaced by other synthetic dyes. Carter in his Report says that this industry was certainly in existence before the World War I and it was during this period that this industry leaped into prominence. It was estimated that at that time the annual value of the crop was as much as 32 lakhs. In Carter's time there was no market for lac in the district.

Lac was mainly grown in the large strip of land following the river Ganges from Ratua in the north and Manikchak and Kaliachak in the south. The *diara* tract having large amount of sand contents in its soil was congenial to growing plum as well as *babul* trees. These plum trees were mainly used for infecting with lac insects in Malda. Adulteration and discovery of various better types of synthetic dyes were the main reasons for causing the lac industry in the district to meet with natural death in course of time.

In Hunter's Statistical Account mention is also made of another industry producing one important dyeing meterial, indigo. In 1873 twenty four factories were in operation in the district. The total production of indigo in 1872-73 was estimated to be about 4,000 maunds valued at about rupees eight lakhs. In Kaliachak Police Station about 1,100 maunds of indigo were produced.

The most important of all the industries of Malda is silk. The silk industry of Malda has a traditional past and is still the life-blood of the district. More than 80 per cent of the total output of silk thread of the State is produced in this district. Annual outturn of Malda's silk thread is about 400,000 lbs.

This part of the country produced silk even as early as in the days of Hindu Dynasties at Gaur. Silk cloths (*pattabastra*) were exported from here to the important cities of Dacca, Sonargaon and Saptagram. But this industry had to face critical situation during the Muhammadan invasion and it almost dwindled away at that time as weaving of *pattabastra* was somehow connected to some religious prohibitions. After the desertion of Gaur this industry revived. It is said that one Sita Basuni of Jalalpur brought the worms back to the bank of the Mahananda. Towards the end of the sixteenth century silk was exported to some foreign markets. In 1577 one Sheik Bhik set sail for Russia with three ships laden with silk cloths, two of which unfortunately wrecked somewhere near the Persian Gulf. The Dutch and English had silk factories at Old Malda at that time. In the beginning of the seventeenth century the Dutch established a factory at Old Malda. The English later shifted from Old Malda towards the other side of the river Mahananda under oppressive demand for gratuities and at the intrigues and rapacity of the local Fouzdar. The business agents and the silk weavers were harassed like anything by his officers.

This petty persecution eventually led the English to purchase a piece of land in 1680 from the Zamindar of Makdumpur, a *mauza* situated in the present English Bazar Town where they carried out their silk rolling, packing and despatching. Thus the English could avoid the levy of a heavy tax on merchandise which was the principal claim of the Fouzdar of Malda.

The East India Company had an agency in 1686 in the district. The Company issued instructions to their local agents to send better samples of silk and improve dyeing. The colour of the Bengal Silk was yellow. Weavers of England

preferred Turkey Silk to Bengal Silk because the latter was uneven and more susceptible to frequent breaking. When the Company obtained possession of Bengal, they tried to enforce systematic methods for improvement of the native way of reeling. In 1757 Mr. Wilder came to investigate into the causes of bad quality of Bengal Silk. The filature system was then introduced in this part of the country with the help of a Frenchman. The first silk filature factory was believed to be opened at Singatola by Mr. Udney. In 1770 Mr. Henchman built the Residency House of English Bazar which later turned into a silk factory. It is interesting to recall here that the present office building of the District Magistrate was built on the remnants of one raw silk factory constructed by the East India Company.

The original Maladhi cloth was a mixture of cotton and silk. It was Mr. Henchman who owes the credit of first introducing the weaving of cloth from silk alone. The traditional varieties of local cloth *viz.*, *bulbul chasm* (nightingale's eyes), *chand tara* (moon and stars) *mazchar* (riplets of the rivers), *kalintarakshi* (pigeon's eyes) named according to different patterns of weaving were either made of silk or a mixture. During 1760 to 1790 there was a boom in the silk trade. The company could now compete with Turkey in raw silk. But as the competition from France and Italy sprang up the trade declined here. In 1810 Buchanon found it greatly depressed. Practically the East India Company had the monopoly in this silk industry until 1835 when the factory was closed. But the trade flourished even after 1835 and the exports reached a maximum between 1866 and 1874. At that time there were seven European concerns. There was a French establishment belonging to Louis Poyen and Cie of Lyons.

In Hunter's time (1876) silk cloths were mainly marketed in Calcutta and Banaras. According to the then Collector's estimate silk cloths valued Rs. 5,000/6,000 were manufactured in this district. But raw silk manufacture was flourishing better. The annual production of raw silk in the hand of the European traders was approximately 620 maunds valued at about Rs. 6,20,000 and the Indian Silk traders produced annually about 1,500 maunds of raw silk valued at Rs. 900,000. About 25,000 maunds of cocoons were exported to Jangipur in Murshidabad and other places.

The silk industry consists of three divisions *viz.*, raising of cocoons, reeling of silk and finally the weaving of cloth. Lambbourn in his Gazetteer (1918) gave a description of the five different varieties of cocoon worms, which is quoted below.

> "The worms are of the following varieties—(i) Nisteri or purani or Mandraji (*Bombyx Crossi*) (ii) Chota palu or desi (*Bombyx fortunatus*), (iii) *Bara polu* (*Bombyx tenta*) (iv) China polu (*Bombyx Surensis*), and (v) Bula palu—all multivoltine varieties. Of these the first two are the most common, the *Desi* giving the cold weather crop and the *Mandraji* that of the hot weather. The worms are kept in bamboo trays placed in layers in a bamboo rack and fed twice a day ; they being to spin after 35 or 36 days and the cocoon is completed in three days. There are three main crops of cocoons or *bands*—named after the months in which they ripen. The chief *band* is that of November, comprising the Aghani, Maghi and Falguni *bands*; next in order comes the Chait (April) *band* and then the Baisakhi, Jyesthi and Bhadoi. In good years, or when the ordinary *bands* are affected by adverse conditions, other crops are raised, similarly named after the months in which they ripen".

The procedure for silk rearing has been finely described by Carter in his Settlement Report (1928-35).

> "As soon as the eggs begin to hatch out, they are covered over with young and finely chopped mulberry leaf into which the young silkworms climb. They are then removed to a clean tray, and kept separately from those which hatch out on the following day. It is essential to group worms of uniform size on each tray for the proper regulation of their diet. They are fed at intervals of 6 hours on chopped leaves during the first 4 to 6 days according to the season; and at the end of that period they lose their appetite completely and become torpid. This is the first moulting stage. During the next 24 hours they shed their skins and enter on the second stage. While moulting is in progress, feeding is stopped completely. When it is over, a cotton net, covered with young leaves, is placed over the silkworms, which crawl through the meshes and begin to feed on the leaves. These are changed at the end of every 24 hours. A net covered with fresh leaves is placed over them, on to which they climb, and the old leaves and litter are removed. After 3 to 5 days, according to the season, the second moult sets in. There after the silkworms take on the colour and form which they preserve until the end of their larval life. They grow rapidly and eat more; and from this stage stems of mulberry plants with leaves on them are spread on the net. Three meals a day, at intervals of 8 hours, are given. The same procedure is followed during the fourth and fifth periods. By the fifth period, the silkworms are eating a very large quantity of mulberry, and care has to be taken to see that a proper selection of leaves is made. The final period lasts from 5 to 7 days. The worms develop a golden and creamy appearance and begin to look round for a corner in which to start spinning.
>
> For this, a bamboo frame, about four feet square, called chandraki, is used. To it are fixed strips of plaited bamboo, an inch or two in depth, in the form of a continuous spiral. The worms are placed on this spiral, and commence to spin themselves into cocoons, a process which occupies two or three days. The cocoons which are required for reproduction are kept on a tray, and those from which the silk is to be reeled, are put out in the sun or dried by steam, in order to kill the chrysalis. This is necessary, because the silk thread is a continuous filament, and if the chrysalis is allowed to turn into a moth, it cuts its way out through the thread, thereby greatly imparing the value of the silk for reeling.
>
> The cocoons which have been retained for reproduction are kept for about a fortnight, after which the moths cut their way out, the males and females pair off (nature generally seems to provide an equal number) and the Females lay their eggs. The average number of eggs is about 300. These hatch out after about a fortnight, and the cycle begins again. The maximum number of days for the whole process is 80, and the minimum 40, according to the season and temperature ; so that on the average, six cycles can be completed in a year".

The art of seri-culture concerns itself with the growing of mulberry trees, the rearing of silk worms under artificial or domestic conditions, their feeding, the formation of cocoons and their collection before they are injured by moss. At the present time making up of raw material into cloth has been limited to the scope of small industry and the production of raw silk has gained much importance and has become a major industry of the district. Only like the neighbouring district of Murshidabad where cocoon rearing has lost ground there is no reason for thinking that this has receded in Malda. Mulberry plantation, therefore, has occupied an important position in the economy of Malda. The largest concentration of mulberry plantation is in the southern part of the district which accounts for about 84 per cent of the State's total mulberry areas. The yield of mulberry leaves is approximately 19,000 lbs. per acre in the alluvial soil of the *diara* tract of Malda.

In rearing of silk worms and production of cocoons and raw silk as many as 22,118 persons are engaged in the district as per Census of 1961. Of them majority are women, because womenfolk generally get favourable scope for employment in this particular branch of industry. In Kaliachak Police Station alone, the number of persons engaged in this industry is 20,222 of whom 12,237 are women. In English Bazar Police Station 1,554 persons are engaged in this industry.

About 95 per cent of the State's silk production is derived from the *nistary* variety of cocoons. This is an indigenous multi-voltine race tolerant of high temperature. The quality of silk produced from this variety is much inferior than the Japanese variety particularly in respect of neatness and filament length. The yield is also poor. It has been observed that about 20-25 *nistary* cocoon yielded as much as 8-10 cocoons of improved variety do. The State Government established two rearing stations of by-voltine races in the district of Darjeeling. These two stations supplied improved variety of races to the farmers of Malda. As it is not possible to replace the entire production of *nistary* cocoons by improved breeds due to hot weather prevailing in the country for more than six months in the year. But half of the production may be converted into high breed by-voltine varieties during the winter season.

The State Government has a permanent establishment of seri-culture in Malda consisting of seed formation at Piasbari and a silk reeling institute in English Bazar. They have also an extension service with a number of demonstrators in different seri-cultural villages of the district. The reeling institute demonstrates better methods of reeling silk. The nursery supplies desease-free indigenous silk worm eggs to a number of selected rearers who multiply the basic seed and supply to the commercial rearers. The extension service generally distributes the desease-free seeds and renders all assistance in the matter of disinfection of rearing houses and supply of equipments for taking preventive measures against the out break of pebrine.

Generally the rearing process is undertaken in the farmer's house. The worms are very much susceptible to desease up to the 3rd instar and about 40-45 per cent of the silk worms are lost in the earlier stages.

During the second plan a silk worm nursery introducing a new method known as *chowki* rearing was established at Jalalpur. In this centre a process was adopted where worms are reared up to the second instar at one place under expert care. It was seen that the cost of cocoons could be reduced by 30 per cent by this *chowki* rearing system.

During the second plan period several schemes have been implemented with a view to improve the quality of mulberry cocoons and raw silk and to reduce the cost of production. These schemes consist mainly of reorganisations of existing nurseries, three mulberry craft nurseries, young silk worm centre at Jalalpur, supply of pump, for irrigation of mulberry fields, introduction of seri-culture as basic craft in the high schools, training-*cum*-production for silk rearing at Peddie Silk Rearing Institute, replacement of crude *charka* by domestic basins.

The State Government has also a silk reelers' organisation, a number of master reelers. There are also three co-operative societies, the main function of which is to provide an assured market for a *charka* raw silk. They also introduced hand spinning of silk waste providing part time employment to a number of women of the district. The Khadi Commission has a silk Department to help the handloom silk weaving industry from which the seri-culturists of Malda derive a lot of benefit. During the third plan, among various schemes taken for the improvement of seri-culture in the district, one cold storage for preserving silk worm eggs has been established at Piasbari in English Bazar Police Station.

In the report on the Survey of Cottage Industries published in 1929, it was mentioned that raw silk of Malda was exported to Berhampore (Ganjam), Trichinopoly, Salem, Surat, Sujanagar (Gurudaspur), Mobarakpur (Azimgarh), Amritsar, North Arcot, Bangalor, Tanjor, Bhandara, Akyab, Kayts (Ceylon), Benaras etc. At the present time Malda's raw silk has an extensive market outside the district.

To impart training to the youths of Malda

in different industrial pursuits several training-*cum*-production centres have been established in different parts of the district. One such centre on tailoring-*cum*-cutting has been established in Harishchandrapur Police Station, one for the artisans in Gajol Police Station, one for textile block printing in Ratua Police Station, one on tailoring in Manikchak Police Station and one on jute weaving spinning in Kharba Police Station. Several training-*cum*-production centres have also been established for the benefit of the members of scheduled castes and scheduled tribes. There are three such centres. One at Hatimari on jute weaving and spinning, one at Kendpukur for jute and woolen goods manufacturing and another on beekeeping at Kadubari.

TRANSPORT AND COMMUNICATION

In Part IIB of this volume an account has been given of the system of communication available in the district. An account of the existing roads will also be found in the statistical tables relating to the Public Works Department and other village roads in Part IIB of this volume.

The principal means of communication was only along the rivers in the early days. Buchanan Hamilton left a fine account of the means of communication available in the district in his time. His account refers to the second quarter of the last century. Any account of the communication system existing prior to Buchanan's time was not readily available. But it could be well presumed that there must have been a fine net-work of roads converging on the city of Gauda which was once the capital of Bengal. Sultan Ghyasuddin was stated to have constructed a road linking Devkot in the present West Dinajpur District and Nagar in the district of Birbhum passing through the city of Gauda. This road was cut across by various rivers at different points. In Carter's Settlement Report mention has been made of another Badsahi Sarak passing some way through this district and ultimately leading to the district of Purnea in Bihar.

The district of Malda was classed as mostly riverine and the rivers had been the most important means of communication from the earliest time. During rainy season when the rivers swelled they could easily admit large boats to almost every part of the district and small boats could easily made their way to the interior villages. The imports and exports were mainly carried out in the rainy season. During dry season the produces of the country were generally collected in the warehouses situated on the bank of the rivers and when rains set in full loaded boats began to carry goods from one place to another. Dry season was mostly utilised in distribution of various articles from the marts to different market places. Most of the rivers were subjected to only a limited navigation in the dry season. For conveyance of goods from one place to another loaded cattles were used for which no good or accessible roads were strictly necessary. What Buchanan stated about the system of communication prevailing in the district was fully corroborated by Lambourn in his District Gazetteer of Malda (1918). Even upto the middle of the present century the communication system was far from satisfactory. Almost all parts of the district were accessible by bullock carts over a net-work of fair weather tracks only between November and July. At the advent of rainy season all such roads almost became impassable for wheeled traffic. Riverine communication or conveyance of goods on the back of the cattle was the only course open for exports and imports during the rainy season.

After the Partition of Bengal in 1947, communication system of the district of Malda had to undergo a thorough change which was undoubtedly for the better. Riverine communications lost its prominence because most of the navigable rivers except the Kalindri like the Mahananda, the Tangan, the Purnabhava flow through East Pakistan before joining the main stream of the Ganges. Of course the river Ganges flowing through the south of this district has formed a distinct boundary line between the northern and the southern Bengal. So if one has to set one's foot on the land of Malda the southermost district of the northern Bengal, one has to cross the river Ganges either by ferry or boat. The ferry services operating in the district have occupied a particular place in the system of communications existing in the district of Malda from very early days. In the beginning of the present century a line of steam boats used to run throughout the year from Lalgola in Murshidabad to Nimasari opposite Old Malda upto the river Mahananda in connection with the Ganges Steamer Service and the Eastern Bengal Railway Service. A steam ferry was also in service between Manikchak and Rajmahal and during rains this became a ferry service from Rajmahal to English Bazar via the river Kalindri, which operated only on three days a week. The Partition of the country in 1947 put a stop to through steamer service up and down the Mahananda to the Ganges. There are even now a large number of ferries to be in operation in the district. Most of them are maintained by the District Board. Of course the larger ferries are the property of the Government. Across the Ganges there are at present three ferry services. The Rajmahal-Manikchak Ghat Ferry Service is leased out by the Government to private persons. The Dhulian-Khejuriaghat Ferry generally carry heavier load of goods traffic than the Rajmahal-Manikchakghat Ferry. The distance of Malda from Calcutta is shorter by Dhulian-Khejuriaghat than by the route of Rajmahal. Another important ferry has now been in operation at Farakka. This Farakka-Khejuria Ferry now serves the unbridged rail and road link which is proposed to be constructed between Calcutta and Malda. The ferry across the Mahananda connecting English Bazar and Old Malda is one of the most important ferry service maintained by the District Board. The details of ferry services in operation in the district of Malda, as could not be shown in the Official Statistics in Part IIB of this volume are given here.

Name of Ferry	Description
1	2
1. Dhulian-Khejuria Public Ferry along with the vested ferries, *i.e.*, (1) Dhulian-Deonapur group of ferries including Arjunpur Ferry and Shibpur Ferry (2) Khejuria Farakka group of ferries (Sikarpur-Govindarampur ferries, Beniagram-Lakshipur Ferry.	Public Ferry across the river Ganges and situated on the National Highway 34. One side of the ferry is within Kaliachak Police Station, district Malda and the otherside of the ferry within Farakka Police Station, district Murshidabad.
2. Rajmahal Ferry with its subsidiary ferries Shoneghat and Narainpur	Public ferry across the river Ganges and situated on the road from Manikchak to English Bazar. One side of the ferry is within Manikchak Police Station, district Malda and the other side of the ferry is within Rajmahal Police Station, district Santhal Parganas.
3. Railway Ferry Service	Across the river Ganges one side of the ferry is Chamagram Railway Station (within Malda) and the other side of the ferry is Farakka (within Murshidabad).
4. Banshbari Ferry	On the river Mahananda on National Highway 34.
5. Sadar Station Road	Within English Bazar Municipality on one side and crossed the Mahananda River.
6. Jhowghatta	On the eastern side of English Bazar Town and crossed the Mahananda River.
7. Nimasarai	In the end of Rathbari Nimasarai Road and lies in the meeting point of the Mahananda and the Kalindri.
8. Noorpoor	End of Mathurapur-Noorpoorghat Road and crossed the Kalindri lying between Araidanga-Pirganj Road.
9. Madia	In the third mile of Malda Ferryghat crossed the Kalindri.
10. Pirganj	Lying between Araidanga-Pirganj and Pirganj Eklakhi Road and crossed the Mahananda River.
11. Pukhuria	In the sixth mile of Kumarganj Road and crossed the Moranadi.
12. Borkole	Lying between Balupur-Borkola Road and Borkoleghat-Adina Road and crossed the Mahananda.
13. Raipur	Off the third mile crossed the Mahananda River.
14. Bulbulchandi	In the first mile of Lal Bulbulchandi Road and crossed the Tangan River.
15. Muchia	In the end of Muchia Road and crossed the Tangan.
16. Sarjole	In the fourth mile of Samshi Ratua Road and crossed the Moranadi.
17. Balia Nawabganj	On Balia Nawabganjghat Road and crossed the Moranadi.
18. Budhia	About two miles down from Borkole and crossed the Mahananda.
19. Kailabad	Crossed the Mahananda River.
20. Alal	In the eighth mile of Alal Road and crossed the Mahananda.
21. Bamangola	In the tenth mile of Pakuaghat Road and crossed the Tangan.
22. Lalgola	In the first mile of Lala Harishankarpur Road and crossed the Tangan.

Name of Ferry	Description
1	2
23. Mirzatpur	In the first mile of Mirzatpur-Lalbathani Road and crossed the Kalindri.
24. Boirgachi	Near the Eklakhi Railway bridge crossed the Mahananda.
25. Araidanga	In the first mile of Araidanga Enaitpur Road and crossed the Kalindri.
26. Chatore	Lying between Alal and Boirgachi Ferry and crossed the Mahananda.
27. Balupur	In the beginning of Balupur-Borkole Road and crossed the Kalindri.
28. Debakipur	Near Koywali and crossed the Kalindri.
29. Sadullapur	In the end of Sadullapur Road and crossed the Bhagirathi River.
30. Debipur	In the third mile of Hyatpur Road and crossed the Baromasia.
31. Khanpur	At the end of Samshi Khanpur Road and crossed the Mahananda.
32. Dumrail	Beginning of Tulshihata Road and crossed the Mahananda.
33. Jagadishpur Tarapur	About 1½ miles up Dumrailghat.
34. Goalpara	About 6 miles up Khanpurghat and crossed the Mahananda.
35. Lahiridara	This ferry is a dead one.
36. Trimohini	End of Swarupganj Road and crossed in the Mahananda.
37. Gobraghat	In the end of Hayatpur Gobraghat Road crossed the Kankar River.
38. Khudua-dara	In the sixth mile of Tulshihatta-Hayatpur Road and crossed a *dara*.
39. Ekborabad	In the fifth mile of Sadullapur-Panchanandapur Road and crossed the Pagla.
40. Bhagalpur	This ferry crossed the Bhagirathi near Kagmari.
41. Kagmari	In the fourth mile of Amrity-Kagmari Road and crossed the Bhagirathi.
42. Mahadipur	In the first mile of Mahadipur-Golapganj and crossed the Bhagirathi.
43. Amaniganj	Off the fourth mile from the Mahadipur Road and crossed the Bhagirathi.
44. Belwari	In the tenth mile of Kaliachak-Mahadipur Road and crossed the Bhagirathi.
45. Gossaipur	In the fourth mile of Milki-Bangitola Road and crossed the Bhagirathi.
46. Trimohani	In the first mile of Kaliachak-Kistapur Road and crossed the Pagla.
47. Rajapur Kharab	Between Boirgachi and Pirganj and crossed the Mahananda.
48. Rangamatia	In the end of Nimasarai-Rangamatia Road, this ferry is only for the rainy season.
49. Nagharia	In the end of Amrity-Nagharia Road and crossed the Kalindri.
50. Itakjola	Crossed the Mahananda.
51. Sutidara	In the beginning of Sutidara-Madhaipur Road.
52. Tulbari	By the side of English Bazar Town.
53. Ghoga	In the tenth mile of the ferry is kept during the rains on the Mora Mahananda.
54. Ruhimari-dara	Crossed a *dara* and only for the rainy season.

Since Independence road and railway have become the principal means of communication in the district. Road development has considerably progressed and almost every part of the district is now well connected by a fine net-work of all weather roads.

A section of the National Highway No. 34 connecting Calcutta with Siliguri falls within this district. This National Highway No. 34 enters the district at Khejuriaghat and passes through English Bazar, Old Malda and Gajol, ultimately leading to Raiganj in the district of West Dinajpur. This section of the National Highway No. 34 covers a distance of about 67 miles in the district of Malda. The construction of a concrete bridge over the Mahananda is on way to completion. The ancient ruins of Gaur are only 8 miles off this National Highway. Gaur-Mahalipur National Highway No. 34 is a black topped nine and a half miles long road classed as other district road. Mahalipur-English Bazar Road via Gaur was considered the chief road in the district at one time. This was the old mail line.

There are three State Highways in the district. The 20 miles long Manikchak-English Bazar Road helps the entry of goods as well as passenger traffic into the chief town of Malda from Rajmahal. Like the N. H. 34 and other State Highways the width of the hard black crust of this road is 12 ft. The road connecting Malda and Gajol which is the second State Highway is about 16 miles long. This road passes by the side of Adina and Pandua the two places of great historical importance. Gajol is connected with Baniadpur (in the district of West Dinajpur) by another State Highway the length of which is about 20 miles.

Amongst the other roads Gajol-Samshi-Chanchal-Harishchandrapur Road is important. The length of this road is about 33 miles. Gajol can be said to be the nerve centre of the road communication in the district. There is another road which connects Gazol with Bamangola, Habibpur and Bulbulchandi. Between Gajol and Bamangola this road is intersected by the river Tangan which is yet to be bridged up. The total length of this road will be about 26 miles. There is another 10 miles long road which links Manikchak with Ratua via Mathurapur. Ratua is connected with Samshi by another short road measuring about 10 miles in length. All these roads are black topped.

Amongst other district roads 4½ miles long English Bazar-Kotoali Road, 10¼ miles long Mirzapur-Bangshihari Road and 13 miles long Baharal-Araidanga-Mediaghat road are worth mentioning. There are also several other roads which are maintained by the Government. These roads are uptil now fair weather roads.

The District Board maintains quite a number of roads, the details of which has been given in the Official Statistics in Part IIB of this volume. 8 major roads, 13 minor roads and about 105 village roads are maintained by the District Board.

The town of English Bazar has about 24 miles metalled road and 9 miles unmetalled road within it. The town of Old Malda has 6 miles metalled road maintained by the municipality.

As the district is well served by roads the major portion of the passenger traffic is carried out through public road transports. The North Bengal State Transport Corporation which is a Government Undertaking serves four routes by employing about 17 buses. The routes are Malda-Milki-Mathurapur-Manikchak, Malda-Kaliachak-Khejuriaghat, Malda-Gajol-Baniadpur-Gangarampur-Patirampur-Balurghat and Malda-Gajol-Baniadpur-Kaliaganj-Raiganj. Some of the buses carry passengers from the ferry point straight to Balurghat or Raiganj via English Bazar and Malda. For serving the local traders visiting *hats* and weekly market places another bus plies between Baniadpur and Gajol once a week. There are also some private buses serving various routes of the district. Some of these buses run seasonally. While in 1951 the route mileage was increased by 144 miles, at the present time the road mileage served by the privately owned buses alone is about 483 miles.

Lorries are mainly used for transportation of goods from one point to another within the district or outside the district. Cycle rickshaws are used for short journeys within the towns and sometimes for journeys to near about villages. A particular type of horse-drawn two wheeled vehicles is also found in English Bazar and Malda.

In that sector of economic pursuit namely transport and communications only 4,185 persons of this district are gainfully employed. Of them only 2 are women. The transport and communication workers of this district, therefore, forms a microscopic fraction of its total population. They make only 0·34 per cent of the total population and about 1·04 per cent of the total working population of the district.

From the Table on Occupational Classifications given in Part IIA of this volume we get that only 105 persons have been returned in 1961 Census as having their occupation as drivers and firemen, railway engine. There are 1,247 drivers of road transport of whom 531 are animal drawn vehicle drivers. Of these animal drawn vehicle drivers majority numbering about 460 live in the rural areas of the district. Motor vehicle drivers number about 321. There are 354 paddlers or rickshaw pullers in the district of whom 246 are town dwellers.

Railway service is not very extensive in the district of Malda. Three sections of the North-East Frontier Railways serve the people of Malda. All these sections are at present broad gauge routes. Katihar-Singhabad Section (about 52 miles long) became a broad gauge route in 1961. The Malda-Khejuriaghat route is about 26·70 miles long. A part of this route was meter gauge previously which has now been converted to broad gauge. There is another short route running from Mukuria to Kumedpur.

There is an air-strip near English Bazar Town. This landing ground was mainly constructed for facilitating export of Malda Mangoes in the mango season. But as full advantage of the landing strip was not taken by the mango traders, this is not in use at present.

Some information on postal communication has been given in the Official Statistics. The district is served at present by 1 Head Post Office, 12 Sub-Post Offices and 162 Branch Offices. Excepting Bamangola all other police stations of the district are served by the Sub-Post Offices. Telegraph service facilities are available at the headquarters of Malda, Kaliachak, Gajol, Ratua, Harishchandrapur Police Stations. Gajol and Chanchal Telegraph Offices serve Bamangola and Kharba Police Stations respectively.

The district of Malda is served by three Telephone Exchanges. The Malda Exchange has 200 direct connections and 11 extension lines. The Harishchandrapur Exchange has 41 connections at present out of a total capacity of 50. The Samshi Exchange has got 21 connections. The Post Offices at Malda, Gajol, Kaliachak, Harishchandrapur, Bulbulchandi and Samshi extend the facilities of Public Call Offices.

SCHEDULED CASTES AND TRIBES

The proportion of scheduled caste population in the district of Malda is not very high. Only 13·4 per cent of the total population of Malda have returned themselves in 1961 Census as belonging to the scheduled castes. In the State of West Bengal as a whole the percentage of scheduled caste population is 19·7. Thus, the State percentage is quite higher in respect of the scheduled caste population than that of Malda. In the rural sector of the district 13·6 per cent of its people are scheduled castes as against the State rural average of 23·6 per cent. In the State, 7·9 per cent of the urban population are scheduled castes, whereas they make only 7·9 per cent of the urban population of Malda. Of the total scheduled castes in West Bengal, Malda's contribution is only to the extent of 2·4 per cent. This percentage is 2·6 in respect of the rural areas. The scheduled caste population residing in the towns of Malda make only 0·6 per cent of the total urban scheduled caste population of the State.

The male-female ratio amongst the general population of Malda shows that per one thousand males there are only 965 females. The sex ratio amongst the scheduled caste population in this district gives a better picture. There are 978 females per one thousand scheduled caste males. In the rural area, a better sex ratio is observed. For every thousand scheduled caste males there are 981 females in the rural sector and 864 in the urban. Most of the scheduled caste population are engaged in the agricultural sector and in-migration and out-migration of the scheduled caste males have not been able to affect their sex ratio in this district to any considerable extent.

The maximum concentration of scheduled caste population is found in the *barind* area. Scheduled castes residing in Gajol, Bamangola and Habibpur Police Stations together make 38·36 per cent of the total scheduled castes of the district. Persons belonging to the scheduled castes reside in maximum numbers in the Habibpur Police Station. Alone they make 15·50 per cent of the total scheduled castes of the district. Next in order comes the place of Gajol. But in terms of percentage of total population in Bamangola Police Station it is observed that nearly 35·00 per cent of the population belong to scheduled castes. In Habibpur Police Station where the concentration of scheduled caste population is pretty high, they account for about 29·00 per cent of its total population. In Gajol and Malda Police Stations about 22·00 per cent of the population are scheduled castes. In other police stations, the percentage of scheduled caste population is below even the district percentage.

The scheduled castes of Malda have not shown a significant growth during the last decade as compared to that observed amongst the general population of the district. While the rate of growth of the total population of the district was to the extent of 30·33 per cent during the last decade, the scheduled castes registered a growth rate of only 19·84 per cent. In the rural sector, the rate of growth has been almost the same as the district rate whereas in the urban areas the growth of scheduled caste population has been quite high (41·90). Curiously enough in the *barind* area which can be said to be the main pocket of scheduled caste population of the district, the rate of growth amongst the scheduled castes has been abnormally high. Their increase has been to the extent of 114·87 per cent over 1951 scheduled caste population in that area. This area has been confined to the rural portion of Malda Police Station and Gajol, Bamangola and Habibpur group of thanas.

The population under the majority of the castes have increased by large percentage during the last ten years. Rajbanshis who formed the majority of scheduled caste population in 1951 and which are still the main scheduled caste in the district, have increased by 89·4 per cent during the decade. The second major scheduled caste of the district both at 1951 and 1961 is the Tiyar. But strangely enough this community has undergone a depletion during the last decade by nearly 36·00 per cent over its population of 1951. In the last Census as many as 20,063 persons returned themselves as belonging to the caste Tiyar, but in this Census 12,750 persons only have returned themselves as belonging to the same caste. A very remarkable change has been observed in the growth of the Paliyas. They have increased abnormally nearly by 238·00 per cent over their population of 1951. Another major caste of the district is the Bind. This community has not shown an appreciable change over the decade. They have grown only by a small percentage (5·7). Amongst some of the castes while the return was insignificant in 1951 Census there has been quite a good return for them in the present Census. The case of Gonrhi, Keot, Koch, Lohar, Mal and Sunri may fall in this category. Some castes which formed quite a significant part amongst the scheduled caste population of 1951 have undergone depletion at this Census. The cases of Bagdi, Bhuiya, Jalia Kaibartta, Musahar and Nuniya fall in this category. Have the people of these latter castes out of social ambition returned themselves as belonging to castes higher in the social ladder?

Rajbanshis form the major scheduled caste of Malda. About one-fourth of the total scheduled caste population belong to this community. The distribution of the Rajbanshis in the district may be seen in the map given at page lviii. The next major caste according to the 1961 Census is Tiyar. The Binds follow closely the Tiyars in so far as the population under this community are concerned. Namasudras cocupy the next position amongst the scheduled castes in the district.

Next come the Chamars, Haris, Paliyas, Jhalo Malos, Keots, Musahars, Pods and Dhobas. In the towns of Malda, maximum number of persons are found to be belonging to the Dhoba community. Bagdis, Chamars and Keots also live in towns in quite good numbers. Persons of Sunri, Dom and Jhalo Malo communities form quite a significant part of the scheduled caste population of the urban areas of Malda. The statement below shows some selected individual scheduled castes as percentage of the total scheduled caste population in the rural and urban areas separately :

Name of Caste	Percentage of Castes	
	Rural	Urban
1. Bagdi or Duley	0.97	9.56
2. Bauri	0.06	4.51
3. Bhuimali	1.64	..
4. Bhuiya	1.37	..
5. Bind	7.71	..
6. Chamar, Charmakar, Mochi, Muchi, Rabidas, Ruidas, or Rishi	4.23	9.44
7. Dhoba or Dhobi	2.19	16.94
8. Dom or Dhangad	0.90	6.91
9. Dosadh or Dusadh including Dhari or Dharhi	1.84	4.48
10. Gonrhi	1.81	..
11. Hari	3.96	0.92
12. Jalia Kaibartta	1.57	3.20
13. Jhalo Malo or Malo	2.87	6.29
14. Keot or Keyot	2.85	9.69
15. Lohar	1.44	0.72
16. Mal	1.16	0.69
17. Mallah	1.47	2.40
18. Musahar	2.59	..
19. Namasudra	6.55	..
20. Nuniya	1.84	0.22
21. Paliya	3.77	..
22. Pod or Poundra	2.45	2.30
23. Rajbanshi	24.07	2.06
24. Sunri excluding Saha	0.93	7.18
25. Tiyar	7.93	2.82
26. Turi	1.98	0.17

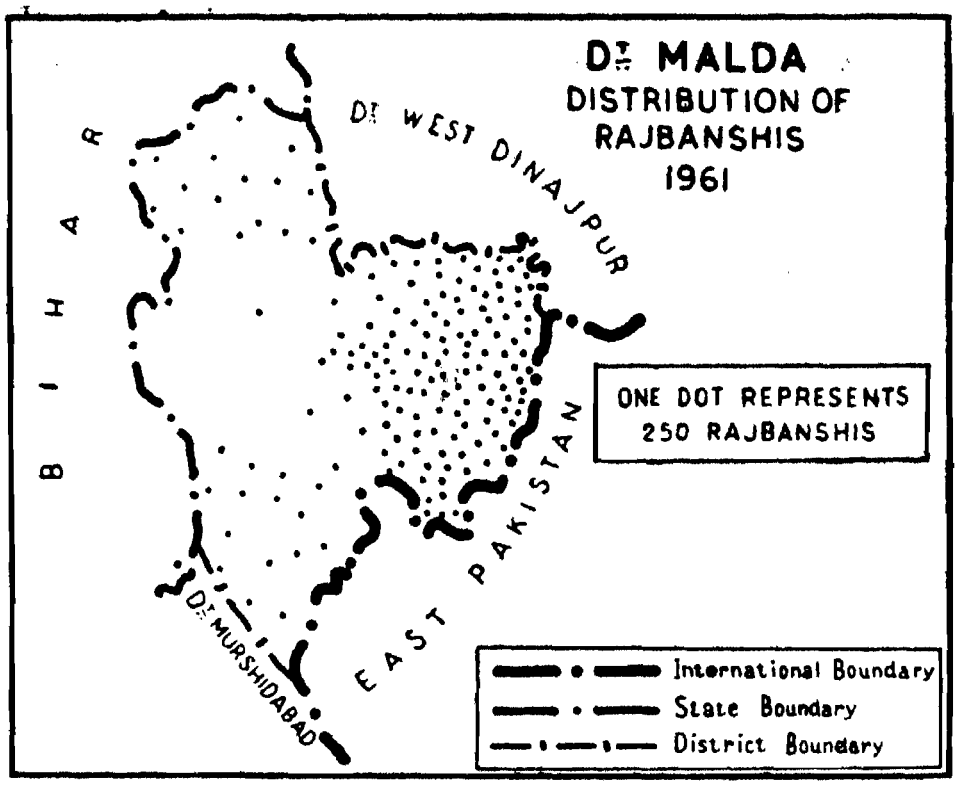

The main pocket of the Rajbanshis is Gajol-Bamangola group of Thanas. Of course, about one-fourth of them reside in Habibpur Police Station. The Tiyars reside mainly in Ratua and Manikchak Police Stations. Together they account for nearly 44·00 per cent of the persons belonging to this community. Of course, quite a good number of them are found in Harishchandrapur and English Bazar. Gajol and Bamangola Police Stations are the abode of the Namasudras and Paliyas. About 46·00 per cent of the Namasudra community reside in Bamangola Police Station. Only 30 per cent Paliyas are found in this Police Station. Of course, Habibpur Police Station has been the abode of nearly 38·00 per cent of the Paliyas. In Kaliachak Police Station abundant number of the Keots, Binds, Chamars and Dhobas are found. Quite a good number of Keots, also reside in English Bazar Police Station. Kharba and Harishchandrapur Police Station together account for about 97·00 per cent of the persons belonging to the Hari caste.

An account of the important Scheduled Castes of the district is given below. The accounts of the Rajbanshis, Palias, Deshis and Koches are adaptation of the excellent notes of these communities given in the 1951 Handbook by A. Mitra. The account of the Tiyars has been kindly furnished by my esteemed colleague Shri S. Sinha, W.B.C.S., on the basis of a survey conducted by Shri N. Dutt, M. Sc. of the members of the community residing in Tiyarpara (*mauza* Nesta, J.L. No. 136 of Police Station Ratua) at Gilabari (*mauza* Paharpur, J. L. No. 149 of Police Station Kharba).

Rajbanshis

The Rajbanshis are numerically the largest community. They claim to be descended from the same origin as the Cooch Behar family. Whether that is true or not their appearance and features—the high cheek bone—broad nose and slightly slanting eye are strongly suggestive of Mongolian origin and not Dravidian, as has been suggested. Their claim to Kshatriya status is very old, but it is only within comparatively recent times that attempts have been to advance their social status. The movement owes its origin to Rai Sahib Panchanan Barman, the Rajbanshi leader of Rangpur. A number of the more well-to-do Rajbanshis have taken the sacred thread and adopted the title of Singh, Singha Ray or Sarkar. The movement is handicapped however by the fact that the more backward Rajbanshis have not come into line, and the allied castes of Palias and Koches, who are even more backward, are not admitted by the Rajbanshis to have an equal social status.

Locally the Rajbanshis are known as Bangals, and the part of the village in which they reside, as the Bangalpara. The name is derived from their indigenous origin, as distinguished from the Santals and others who are immigrants. Little is known of their earlier history. They may go back as far as the time when the kingdom of Kamrup covered northern Bengal, and it is not improbable that after the capital of Gaur was abandoned in the latter part of the 16th century they settled in the outlying country.

The two most noteworthy of their customs are the Mahat system and the marriage system. In every village there is a headman known as the Mahat. He is elected and is distinct from the Mandal appointed by the landlord. Petty disputes are referred to and decided by him. Over each group of twentytwo Mahats there is a Raja, to whom any one can appeal if dissatisfied with the Mahat. Serious cases are often referred directly to him. The Raja has a Dewan whose duty is to make arrangements for trials and to inform the people through an intermediary known as the Barik. He secures the attendance of the villagers on the date fixed, and the case of either party is explained to the Raja by functionaries known as Mahats. All these posts are honorary and are filled by election, but as a matter of practice they have become hereditary. Their holders have a high social status and are given places of honour at social gatherings.

Among the majority of the Rajbanshis, the *nika* system or widow marriage is common. Sometimes a marriage is formally contracted but no moral stigma attaches to co-habitation. In formal marriages the cost is higher, because the bridegroom has to pay a dowry to the bride's father and give a marriage feast. In other cases a man may simply take a widow to live with him, a form of marriage known as "kahin" or a widow may retain her deceased husband's home and property and take a man to live with her. This is known as "dangua". Judged by orthodox standards, morality is lax among the Rajbanshis. Cases even occur in which wives are exchanged, or where an influential man arranges to purchase the wife of another.

In character they are timid. Unlike the Santals, they will not stand up for what they consider to be their rights. On the other hand they are more intelligent than the Santals and more thrifty. They are fairly good cultivators, and, unlike the Santals, work regularly. They make rather a speciality of cultivating vegetables and tobacco.

Palias, Deshis and Koches

The Palias, Deshis and Koches are ethnically allied to Rajbanshis. Dr. Buchanan Hamilton, writing early in the 19th century, considered that though they were distinguishable castes they came from the same origin. Their claim to Kshatriya status is not admitted by the Rajbanshis who consider themselves a superior caste.

Among the Palias there are two subdivisions—the Babu Palias and the Sadhu Palias. The former are akin to the Rajbanshis in manners and customs, but the latter unlike the Babu Palias are vegetarians. A movement has been started to raise their social status. They approached the pandits of Nabadwip, who obligingly quoted chapter and verse to prove that Sadhu Palias are Kshatriyas. Since then they have taken the sacred thread and proclaimed themselves as such. They have given up widow re-marriage, and are trying to follow the manners of higher caste Hindus.

The deshis call themselves Gaur Deshis. It is not unlikely that after the abandonment of the capital of Gaur they settled in the surrounding country and continued to call themselves inhabitants of Gaur. Their customs and habits are akin to those of the Rajbanshis.

The Koches may be described as the most backward of all the castes which are of Mongolian origin. They are worshippers of Shiva and their religious ceremonies include observances which are unknown among other Hindu castes and which may be a survival of earlier times. For example, they kill pigeons on the sacrificial altar and drink the blood. Polygamy is practised, as in Hindu society, but polyandry also exists, and a woman can inherit the property of more than one husband, if there are no children.

Tiyars

The name, Tiyar, has been written by Risley (1891) as Tior, Tiar, Rajbanshi, and Machna. The Tiyars of Malda spell their caste name as 'Tiyar' or 'Teyar'.

The Tiyars of Malda do not know any legend of origin or any history of their caste. Some of the Tiyar informants however identified them

with the Tibar (তীবর), which has been referred to in the Brahmavaivarta Purana.

There are some endogamous divisions among the Tiyars of Malda. The Tiyars of Tiyarpara reported that the Tiyars are divided into four endogamous groups namely (1) Gaurdeshi (2) Paloar (3) Ban and (4) Ulphi. The first one to which all the Tiyars of Malda studied, belong, claims highest social position. It may be mentioned here that the Tiyars of Gilabari are not at all aware of divisions other than that of their own (Gaurdeshi). The Tiyars of Gilabari believe the name Gaurdeshi has been originated from their residence Gaura country, which includes the district of Malda. The origin of other divisions is obscure.

Altogether three clans *viz.*, Kashyapa, Maudgalya and Alambayan have been found among the Tiyars of Malda. At Tiyarpara all the Tiyars belong to the same endogamous clan 'Kashyapa', while at Gilabari the Tiyars belong to either of the two gotras *vis.*, 'Alambayan' and 'Maudgalya'. Though there are two gotras at Gilabari, the Tiyars do not observe any restriction regarding marriage within or outside the 'gotra'.

The settlement pattern of the Tiyars is not at all significant with reference to that of the region where they reside. They live in villages with other Hindus, both Scheduled Castes and Caste-Hindus. But it has been noted that they live in separate 'paras' (hamlets) within the villages.

It is remarkable that the Tiyars have some common places of their community worships in the village. The number of these common places of worships, their names and constructions however may vary in different villages.

They generally take two major meals with rice besides one or two tiffins with fried rice, and flattend rice, daily. But the varieties in the daily menu and number of daily meals depend upon the means of the household. Various types of meat except pork and beef which are prohibited among them, are taken by them.

The habit of drinking intoxicants vary among the Tiyars. In some places as found at Gilbari where they are living in close contact with the advanced communities (Caste Hindus), this habit is found among the lesser number of Tiyars. But at Tiyarpara where the Tiyars are living with the backward communities only, are very much addicted to alcohol. They brew pachai (rice-beer) at home. On ceremonial occasions their women folk also drink.

The household utensils are more or less same as those found among the neighbouring Hindu communities. Well-to-do Tiyars use mainly brass and bell metal utensils while the poorer section use mainly earthen and aluminium utensils.

The Tiyars dress themselves like their neighbouring Hindus. They always purchase their dresses such as dhutis, saris, shirts, blouses etc., from the market. Some young Tiyar boys also wear trousers and bush-shirts.

The Tiyar women possess few ornaments, such as bangles made of silver, plastic and glass, brass earrings, silver neck-chains, and brass or silver finger rings. Married Tiyar women wear 'loha' (iron-bangles) and Sankha (conch-shell bangle). Only a few well-to-do Tiyars can afford gold ornaments for their wives or sisters.

The Tiyars are educationally very much backward. According to 1961 Census only 6·1 per cent of the Tiyars of Malda district are literates against 8·1per cent of the Tiyar literates of West Bengal. In regard to the educational standard it may be noted that almost all the Tiyar literates of Malda district have their education below matriculation standard. Field investigation also reveals similar fact.

Risely (Tribes and Castes of Bengal, 1891, Vol. II, P. 328) described the Tiyars as a 'boating and fishing caste of Bengal and Behar'. But Census data (1961) on occupation show that majority of the present day Tiyars of West Bengal, and of Malda district as well, are engaged in agriculture either as cultivator or as agricultural labourer.

The Tiyars investigated in Malda district claimed cultivation as their traditional occupation. Almost all of them still depend on agriculture either as cultivator or as agricultural labourer. In some places as found at Gilabari, majority of Tiyar households possess own agricultural land, while in others, as found at Tiyarpara, majority earn their livelihood as agricultural labourers in the fields of the neighbours.

Paddy is the main crop cultivated by the Tiyars. They also produce some winter crops such as pulses of Khesari and Arahar varieties and some winter vegetables. Tobacco leaves are also produced by some Tiyars in their kitchen gardens.

The Tiyars observe the birth rites almost in a similar way and with similar restrictions and prohibitions as their neighbouring Hindu communities do. Pregnancy is detected by the elderly women of the household, on examination of physiological symptoms of pregnancy such as stop of menstruation, swelling of belly, and vomiting tendency of the prospective mother. During the advanced stage of pregnancy, some Tiyars, as found at Gilabari, observe a ceremony called 'Sadh', generally

on the seventh month of pregnancy, like the neighbouring Caste Hindus.

Delivery takes place at a separate shed, specially built for the same purpose, in one corner of the verandah. A midwife of Hari Caste assists the delivery and cuts the umbilical cord by means of a sharp split bamboo. Placenta is buried in the courtyard by the midwife who is paid either in cash or in kind or sometimes in both for her services. Some well-to-do Tiyars call in qualified medical practitioners or removes the expectant mother to any neighbouring Hospital or Health Centre, if there is any, in case of difficult labour.

The period of pollution varies among the Tiyars. Some of them, as found at Gilabari, observe the said period for 7 days only, instead of 30 days, which they used to observe, as per their traditional custom, in the past. There are others, as found at Tiyarpara, who traditionally observe the pollution period for 22 days.

Purification ceremony is very simple and observed on the last day of the pollution period. The Tiyars do not employ any priest for purification ceremony. But the service of a barber (Napit) is essential for the mother and the baby to get their nails pared off. Some Tiyars, as found at Gilabari, also worship the goddess 'Sasthi' on the day of the ceremony.

The Tiyars do not observe any ceremony for selecting the names of their children. Names are generally selected by the elderly relatives after the birth of the child.

Some Tiyars, as found at Gilabari observe first rice-giving ceremony of the child on the sixth month in case of a boy and on the seventh month in case of a girl. On the day, selected as per almanac for the ceremony, the baby is bathed, dressed with new clothes, and the maternal uncle or in his absence any other male relative of the baby touches 'Payes' (rice boiled in sweetened milk) to its mouth. There are, however, some Tiyars, as found at Tiyarpara, who do not observe any such ceremony.

The Tiyars observe certain rites generally on the third, sixth or seventh month, according to their convenience, after the birth of a child. On the proposed day the baby is shaved by a barber (Napit). The shaved hair is either, as found at Gilabari, tied in a banana leaf and thrown into a pond in the name of Grihadevata (family deity), to whom long life of the baby is prayed, or as found at Tiyarpara, kept at the base of any one of the tree *viz.*, 'kul', 'neem' and mango, which are believed to be the seats of the 'chora devata', an evil spirit, to whom hair is offered with a view to avoid its evil look on the baby.

Tiyar girls are generally married in between 12 to 16 with few exceptions. About a decade ago the Tiyars used to practise polygyny in case of barrenness, incurable disease etc., of the first wife. But now monogamy is the general practice. Marriage is generally arranged by the parents through negotiation. Some relative or friend is appointed as go-between. The Tiyars avoid marriage of persons between whom relationship can be traced within three generations or more in the father's line and one generation in the mother's line.

According to their traditional custom, the Tiyars should pay for their brides. But now-a-days there are many Tiyars, specially those who are educated and well-to-do having closer contact with the caste Hindus, as found at Gilabari, do not claim any bride-price. On the contrary they offer presentations in kind to the bride-groom of their choice. The custom of payment for the bride is, however, in vogue among the educationally and economically backward, Tiyars and specially those who are living in contact with the backward communities, as found at Tiyarpara.

Marriage ceremony is performed by the Brahman priests in the usual Hindu method with Vedic rites and rituals. Like the caste Hindus, the Tiyars also take the service of a barber (Napit) in their marriage ceremonies. The binding part of the ceremony consists in the application of vermilion on the forehead of the bride by the bride-groom.

Among some Tiyars as found at Tiyarpara, levirate is permitted, while among others, as found at Gilabari, it is prohibited. Sorrorate, though permitted universally by the Tiyars, is practised on few occasions. A Tiyar widow is permitted to remarry. The Tiyars do not practise divorce.

Method of disposal of the dead varies among the Tiyars inhabiting different regions. In some places as found at Gilabari, the dead bodies are disposed in the same way as the regional caste Hindus do. But the others, as found at Tiyarpara, either bury the dead body or simply throw it into the river. For the later method of disposal they tie a bagful of sand with the dead body before throwing it into the river, so that it may sink into the water.

The eldest son or in his absence any other son performs the function of the chief mourner, who collects 'asthi' (bone) of the deceased. The bone is thrown into the Ganges by the chief mourner few days before the 'shradha' ceremony. But among the Tiyars, who bury the dead or throw it into the river, the chief mourner collects a piece of cloth torn from the clothings of the deceased persons before the disposal, and throws it into the river nearer to their village before the 'shradha' ceremony. It is also the duty of the chief mour-

ner to offer 'pindi' with cooked rice to the soul of the deceased ancestor for once every day during the mourning period either in front of the Tulsi-plant, as found at Gilabari, or on the bank of the river as found at Tiyarpara.

Period of pollution for death also varies among the Tiyars in different region. In some places, as found at Gilabari, the Tiyars, who used to observe the mourning period for 30 days in the past, have curtailed the period by 15 days. Others, as found at Tiyarpara, observe the said period for 11 days as per their traditional custom. The Tiyars observe mourning only for those relatives who fall within the three generations in the father's line.

The purification ceremony called 'Shradha' is observed on the last day of the mourning period. The ceremony is performed by the Brahman priest with usual Hindu rites and rituals. The service of a barber (Napit) is also necessary for shaving and paring off the nails of the mourners on the day before 'shradha' ceremony.

All the Tiyars are Hindus and belong to the 'Sakta' sect of Hinduism. The deities worshipped by the Tiyars, vary from place to place. In some places as found at Gilabari, the Tiyars are great devotees of Manasa and Lakshmi. These deities are worshipped by the Tiyar villagers together at their respective altars situated within the Tiyar hamlet. Besides, they worship many other deities of the Hindu pantheon such as Kali, Sitala, Narayana, Hari, Sasthi, Saraswati etc., in their respective household. They also participate in the Durga Puja festival observed by the Caste Hindus. They employ Brahman priests with the title of Pandey and Tewari for performing the religious ceremonies. They normally do not sacrifice any animal to the deities. But, if promised, they sacrifice goats, pigeons and ducks for the fulfilment of their vows.

The deities worshipped by some other Tiyars, as found at Tiyarpara, are quite different. They jointly worship the deities *viz.*, Burima, Hanuman, Gramdev, Premraj and Darwar, all being regarded as village deities, at their respective permanent altars in the village, twice in a year, once before the harvesting and once after the harvesting of paddy. These deities are worshipped by their own priest (Tiyar by Caste) by offering sacrifies of she-goat, pigeon, duck etc. Besides, they worship one of the following deities *viz.*, Bisara (Manasa), Parameswari, Gahili, Kali, Narasingha, Hanuman and Bagmasan as their household deities.

In some places, as found at Gilabari, where the Tiyars are living in close contact with the Caste Hindus, do not believe in magical practices. They generally take allopathic or homeopathic treatment from the qualified medical practitioners or quacks to cure diseases. In case of snake-bite they, however, entirely depend on the ojhas (magicians) either of their own caste or from different caste. Superstitious belief like 'bhute-dhara' (possession of an evil spirit on a person) is widely entertained by them like the most of the villager people. In such cases they depend on another type of ojha (magician) who is believed to know the magic of driving away the evil spirit from the person.

Again some Tiyars, as found at Tiyarpara, where they are living in close contact with the backward communities, still indulge largely on magical practices for the treatment of disease. They believe that diseases are caused by evil spirits. Among these Tiyars there are indigenous medicinemen, who apply indigenous herbs and roots and if such medicines fails, perform magical rites to cure disease.

The Tiyar society is patrilineal with patrilocal residence. Among them simple type of family units are more frequent than the joint family types. The brothers generally get separate after the death of their father.

Property, among the Tiyars is generally inherited in the male line. The brothers equally share their father's property. There is however no restriction for a female to inherit property.

About the social status of the Tiyars, A. Mitra, in "The Tribes and Castes of West Bengal, 1951", writes, "Social status is uncertain in some places. They are usually not served by the Dhobas and Napits. The priest is a degraded Brahman".

From field investigation it appears that the social status of the Tiyars in Malda District varies in different regions. In some places as found at Gilabari, their social status is not very low. They are served by the Brahman priests and as well by the Napits and Dhobas, who serve the Caste Hindus. Caste Hindus take water from them but refuse cooked food. In other places, as found at Tiyarpara, where the Tiyars are living only with the Scheduled Caste communities, the Brahman priests and Napits serve them, but do not take water from them.

Organised socio-political institutions like Caste Panchayat still exists with its unquestionable power among some of the Tiyars as found at Tiyarpara, while among others, as found at Gilabari, such organisations died out several years ago. The village Caste Panchayat of the Tiyars is known as 'Moral'. The office of the Panchayat is headed by an official known as 'Bara Moral' (Senior Headman). The 'Bara Moral' has an assistant known as Chota Moral (Junior Headman). These officials are selected by the elders of the Caste by considering their wisdom and greater experience

and knowledge of life. All sorts of socio-political disputes are arbitrated by the panchayat. The convict is fined and sometime excommunicated. The punishment, however, depends on the severity of the offence.

There is another larger socio-political organisation among the Tiyars. Such organisation is known as 'Baiser dak' and it covers about twenty two neighbouring Tiyar villages. The chief office bearer of this caste organisation is known as Raja', who is obviously selected from among the Bara-Morals' of the villages concerned. It generally arbitrates conflicts between the Tiyars of different villages within its jurisdiction.

Persons belonging to the scheduled castes do not seem to be very much lagging behind others in the district so far as literacy is concerned. In the district only 138 out of every one thousand persons are literates as per 1961 Census. In case of scheduled caste population only 105 persons out of every thousand have claimed themselves to be literates. This leads to a fair indication that the scheduled caste community of Malda have been able to overcome their traditional backwardness at least in the field of education. Of course, womenfolk amongst them could not compete with the menfolk in attaining literacy. Only 58 out of every one thousand scheduled caste women have been enumerated as literates. In the rural areas, the percentage of literacy amongst scheduled caste population is very near to that amongst the general population of the district. But the picture is quite otherwise in urban areas. Generally speaking persons living in towns are more prompt to take up education and thus, literacy condition amongst people is generally better in the urban tracts of any country.

But curiously enough, people belonging to the scheduled castes residing in the towns of Malda could not go ahead with education in comparison to the general urban population of the district. Thus, difference between the literacy figures amongst the general population and that amongst the scheduled caste population in the urban tracts of Malda seems to be quite high. While out of every one thousand urban population 474 persons have claimed themselves to be literates in 1961 Census, amongst the scheduled castes, this figures has been 205 only. It seems that the people belonging to the scheduled castes residing in the villages have been taking fuller advantage of the different educational facilities and concessions available to them than those living in the urban areas of the district. The following table shows a comparative statement of percentage of literacy amongst the general population and scheduled caste population in the total, rural and urban areas separately :

		Percentage of Literacy		
		Persons	Males	Females
Total Population . .	Total	13.79	21.47	5.84
	Rural	12.34	19.90	4.53
	Urban	47.36	55.82	37.68
Scheduled Caste . .	Total	10.51	18.15	2.69
	Rural	10.25	17.92	2.44
	Urban	26.51	26.87	13.15

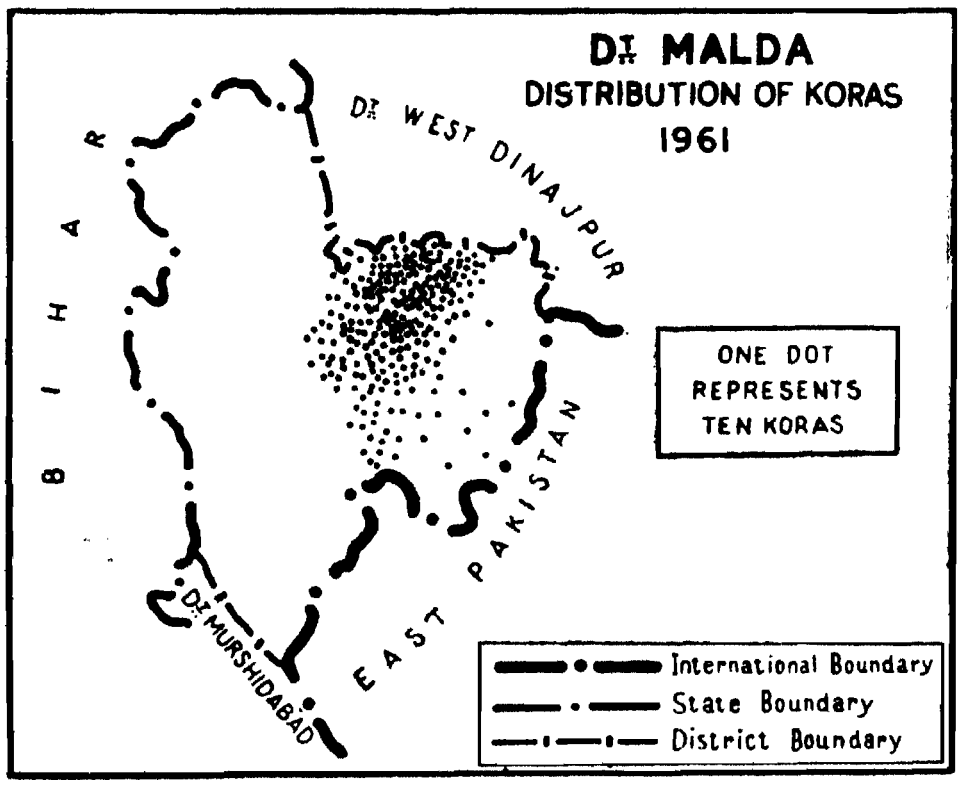

The economic activities of the scheduled castes follow almost the same pattern as observed amongst the general population of the district. The majority of the working population are engaged in the agricultural fields. The same is true for the scheduled caste population also. In the district, only 328 persons out of every one thousand population are workers, the remaining 672 persons having returned themselves as non-workers. Amongst the scheduled caste communities a greater number of persons have returned themselves as workers. Amongst them, there are 344 workers for every one thousand of their total number. The percentage of non-workers amongst the scheduled castes is thus less than that observed amongst the general population. For every hundred workers 64 worked in the agricultural sector, 50 working as cultivators and 14 working as agricultural labourers in the district. In case of scheduled castes, it is seen that 65 out of every hundred workers have found employment in the agricultural sector. Out of these 65 persons 45 are engaged as cultivators and 20 as agricultural labourers. Only 36 per cent of the total workers are engaged in other fields of industries *i.e.*, in Categories III to IX. This percentage amongst the scheduled caste, population is only 35. Household industries of Malda employ a bulk of the total workers. In this particular field 13 out of every one hundred workers of Malda are gainfully employed. In case of scheduled castes, these industries could account for only 4,683 of the total scheduled caste workers.

Female participation in the sphere of economic activities is not noticeable to a marked extent in the district of Malda. The same phenomenon is also observed amongst the scheduled caste people of the district. While 53·4 per cent of the male population are workers, amongst the females the percentage of workers is 11·5 per cent. In case of the scheduled castes 56·6 per cent belong to the working categories. Female participation amongst the working population is more pronounced in the rural areas which give a slight better picture even than that of the district. But in the urban areas female participation is awfully low. In the urban areas only 5·4 per cent of the general womenfolk are workers and amongst scheduled castes this percentage is only seven.

Scheduled Tribes

Nearly one lakh of persons of the district of Malda have returned themselves in 1961 Census to be belonging to eleven different types of scheduled tribes. Majority of the tribal population of the district are the Santals. Alone they account for 85 per cent of total scheduled tribes of the district. About 5 per cent of them are the Oraons. Next come the Koras. They account for only 2·5 per cent of the tribal population of the district.

About four thousand persons of the district have returned themselves as belonging to the scheduled tribes without mentioning the specific name of the tribe which they belong to. These persons have been classed as unclassifiable in Census 1961. They account for about 4 per cent of the total tribal population of the district.

The tribals are mostly found in villages. A very few of them are found in the towns of Malda. The town-dwellers amongst the tribals are only 103 in number. Of them, only one person belonging to Santal Tribe lives in Old Malda Town. The rest of these persons live in the headquarters town of English Bazar. Of these 102 persons residing in English Bazar Town, 81 are Santals, 6 Oraons and 15 Unclassifiable.

The tribals are mostly concentrated in the north-eastern corner of the district *i.e.*, high lands of the *barind*. They are found in maximum number in Habibpur Police Station. Next in order comes Gajol Police Station in terms of the number of tribal population residing in it. Bamangola and Malda Police Stations come next.

The total scheduled tribe population of the district account for only 8·14 per cent of the total population. As many as 40·42 per cent of the people of Habibpur Police Station are tribals. They account for 33·44 per cent of the total population of Gajol Police Station. For every one hundred persons of Bamangola Police Station 27 are tribals. In Malda Police Station twenty out of every one hundred belong to the scheduled tribes.

Majority of the tribals of this district are engaged in agricultural pursuits either as cultivators or as labourers. Quite a few of them are engaged in household industries as fishing, hunting, forestry etc. A comprehensive account of the various facets of their economic, social and cultural life will be obtained through different Census Tables presented in Part IIA of this volume on the Scheduled Tribes.

A very interesting account on the Santals of Malda left by A. Mitra in his celebrated 1951 District Handbook is reproduced here :

Of the agricultural classes, the most numerous among non-Muhammadans are the Santals. They are divided into four sects—the Christians, the Satyam Sibam, the Kheroars and the Santals proper who retain all the aboriginal customs.

The Christians are comparatively few in number, and are the converts of Protestant and Catholic missionaries, who have been working in the district since the present century. The Roman Catholic mission has several small churches in villages in the Barind. It must be recorded to the credit of the missionaries that they were the first to introduce any form of education among he Santals. Owing to their efforts several small schools were established, and they do what they can to protect their converts against the rapacious and dishonest methods of landlords and money-lenders.

The Satyam Sibam sect originated about the year 1905. It was founded by a Brahmin pleader from Dinajpur named Kasiswar Chakrabartty, whose object, apart from the fees which he received, appears to have been to claim the Santals for the Hindu community, rather on the lines of the Arya Samaj. He made a deep impression, and numbers of Santals adopted Hinduism. They gave up eating pigs, fowls and other forbidden food. This to the orthodox Hindu mind might appear highly commendable; but from the economic point of view it is the reverse. The possession of a number of pigs and fowls in times of distress is a considerable asset to the Santals.

In marriage and social customs this sect has nothing to distinguish it from ordinary Santals, and their moral and material condition has not been affected by their conversion. The slogan "Satyam Sibam Sundaram" is one used by the Brahmos but it is not clear why it was adopted by the reformer. Left to themselves, the Santals are naturally very much more truthful than most of their neighbours.

The Kheroars are followers of a preacher from Bihar who visits the Barind at intervals of about a year, or sends on his disciples. They are generally rather fairer in colour than the ordinary Santal, and do not take any flesh, or drink toddy or pachwai. In other respects there is no appreciable difference between them and the ordinary Santals.

The Santals proper are divided into twelve castes—Murmu, Kisku, Hemrom, Hansda, Soren, Mardi, Tudu, Besra, Baske, Chore, Bedea and Paurea. Their legend is that the first two human beings who were created were Pilchu Haram and Pilchi Budhi. They had seven sons and seven daughters. The sons were given the first seven names of the castes mentioned above, and married the seven daughters. Seven castes thus arose, and later five others were added, though it is not known how. It is interesting to note that each caste is exogamous, and a Marmu, for example, cannot marry the daughter of Marmu.

The Santal community invariably build their houses in a group together. This is known as, the Santalpara, and is always at some distance from the Rajbanshi group of houses, which is called the Bangalpara. The houses are well constructed, with solid walls of clay. They are kept scrupulously clean, and the Santals are very fond of growing hibiscus shrubs in front of them, the red flowers of which are worn by the women in their hair on festive occasion.

The social system is under the direction of village headmen, called Majhis. Their houses are identifiable by a mound of earth outside it, in the centre of which is fixed a wooden post, known as the Manjithan. On ceremonial occasions, the post is painted with vermilion in places, and sacrifices are offered to the spirits of departed chieftains. Each Majhi also keeps a hut, generally unfenced, for village meetings. His office is normally hereditary, but if the successor of a Majhi is reduced to straitened circumstances, or incurs the displeasure of his co-villagers, he is replaced by another. The ordinary duties of the Majhi are to control over his people and their punishment by fines or other means for breaches of social customs. When there are disputes between different villages, the Majhis of three or five villages sit together as a tribunal. When a family leaves the village in a year of scarcity to make a living elsewhere, their immovable property remains inthe custody of the Majhi.

The social unity among Santals is remarkable. Inter-marriage with any non-Santal is strictly forbidden, and the disregard of a Majhi's commands, or the commission of a serious social offence, brings the whole Santal community down upon the offender. On a market day the branch of a tree is held up and this attracts the entire Santal community present at the market. The incident is then briefly related, and all are directed to be present on a given day. On the date fixed the whole community appears, and when judgemen has been passed on the offender, his house is ransacked and defiled, and a branch is planted in it as a sign that he has been ex-communicated. Until he has paid the penalty, and the ban has been lifted, nobody dares to have anything to do with him.

In matters which are regarded as tribal secrets, there is a masonic reticence among Santals through which it is impossible to break. Repeated efforts have been made but without success to find out the name of the plant from which poison for arrow-heads is extracted; but everyone professes ignorance.

Santal customs are interesting. The first ceremony observed is the Napta, which takes place on the third or fifth day after the birth. The men are shaved and bathed at noon and when they have assembled the father names the child in their presence. The first is named after his grandfather and the first daughter after the grandmother. After the child has been named, the midwife goes round the assembly, sprinkling a solution of flour and water on the breasts of all present and repeating the name of the child. Rice which has been boiled with the dust of nim leaves is then served to the guests, after being offered first to the Hafram or deceased ancestors.

The next ceremony is the Sakhi, which is the name for the branding marks on the wrists of all Santal men. The branding is done with a piece of burning rag, when the child is five or six years old. The girls are not branded, but are tattooed on the breast and on one of the arms. After marriage the other arm is tattooed, but if a woman loses a child before the second arm has been tattooed it remains as it is. The idea is that in such cases the child would not be able to recognise the mother in the after life.

There are several systems of marriage. The negotiation may be carried out through a Ghatak or match-maker; but this is an imitation of Bengali society and not a tribal custom. It is however less costly as the dowry is smaller. Generally marriages are arranged by mutual selection, of the young man carries off the girl, and takes her to live with him. In such cases the bride's father approaches the Majhi of the bride-groom's village and demands a dowry. If this is paid, and the

girl is willing to stay with the young man, the marriage is concluded : otherwise a penalty is realised from him and the girl returns to her father's house without any social stigma.

Divorce is adjudicated by the village Majhis. If they decide that there should be a divorce, the termination of the marriage is indicated by the tearing across of a leaf or 'bitlaha'. The correspondent is required to pay double the wife's dowry to the husband as compensation.

The Santals cremate or bury their dead according to their convenience. There is no hard and fast rule in the matter, but they prefer cremation when fuel is available. Great respect is shown to the dead and almost the whole village attends the cremation or burial.

Of the Santal festivities the most important is the Bandna. This is a kind of harvest festival which takes place after the winter paddy has been reaped. There is no fixed date for it; but the village headmen arrange the day on which the festivities are to commence. On the first day sacrifices are made to Jahar at the place of worship outside the village. A few fowls and an egg are offered in sacrifice. The cattle are washed and made to walk over the place of worship. If one of them tramples on the sacrificial egg, it is considered an auspicious omen for its owner. Then for three days there commences a continuous round of festivity in which everyone joins, irrespective of age. The elders indulge in heavy drinking while the young men and girls amuse themselves as young folk will. The whole period is one of unrestrained abandon, and all restrictions are thrown off. On the last day a feast is arranged in which the whole village participates.

The sakrat festival is generally held about a fortnight after the Bandna. Its special feature is dancing with lathis. On the second day, a contest in archery is held. A plantain tree is set up at a distance, and the first competitor who hits it, is carried shoulder high by the Jog Majhi or joint headman and receives the homage of the spectators.

The Fagua is counterpart of the Doljatra festival. On the appointed day the villagers go to the place of worship and offer sacrifices. On the way back to the village they sprinkle each other with water, but it is considered highly objectionable to use coloured water.

The Charak festival takes place in April on a moonlit night and is attended chiefly by the younger folk. Normally no Santal will stay out of his house after dusk for fear of ghosts, but on this occasion they come to the festival uptill midnight. Singing and dancing are its chief features, and incidentally it provides an opportunity for clandestine meetings.

In character the Santals are naturally simple and straight-forward, though contact with some of their less honest neighbours tend to make them suspicious and crafty. They are very superstitious and in some matters extremely credulous. The Satyam Sibam sect, for example, was under the leadership of one Jitu Santal, whose wildest pronouncements were accepted by his followers as gospel truth. The Air Survey Company's aeroplane, when photographing over Habibpur thana, was reported to be an incarnation of Krishna. Another dictum of Jitu was that the payment of rent to landlords had been prohibited, and the only payment required was a basketful of paddy to himself. As not infrequently happens with these movements the Satyam Sibam sect tended to get mixed up with politics, and though it made no outward demonstration during the Civil Disobedience movement of 1931, it was always a potential source of trouble. The culminating point came when Jitu and a number of his followers proclaimed their "independence" and occupied the great mosque at Adina. Eventually an engagement took place in which one constable was killed by a poisoned arrow, Jitu was shot dead, and several other Santals were wounded. All this would never have taken place if the Santals were not so astonishingly credulous and if Jitu's activities could have been limited. Unfortunately attempts to restrict his liberty did not find favour with the High Court.

In spite of their simplicity, however, the Santals can be very reticent, as has been mentioned before, in certain matters affecting their tribal customs. There seems to be a kind of masonic bond or secret understanding between them, so that however simple they may appear, there are some things which can never be learned from them.

They are independent by nature and resent being put under any restriction. They will only work when it pleases them to do so. No Santal could ever lose his independence so far as to live by begging: he would prefer starvation. They are a cheerful, happy-go-lucky people, and there is probably none other that takes so little 'thought for the morrow'. Their life is full of festivities and they enjoy drinking and music. All over the Barind one hears the music of their bamboo pipes, especially towards sunset. On the other hand, they are lazy and improvident. If they get good crops, they are prepared to spend the next six months in idling and merrymaking. The women are very much harder workers than the men. In addition to the household work, they do most of the transplanting of paddy seedlings a back-breaking job—and much of the reaping and threshing.

Tribal Welfare

The district of Malda can claim a unique position regarding the Tribal Welfare Organisation in the State because it was this district which first set forth to look after the interests of the tribals as early as in the year 1933. Of course, much earlier than this period after the famous Kol Rebellion of 1855 followed by the Chuar Rebellion of 1870-71, the problems of the tribals engaged the attention of the British rulers but no organisation for dealing with tribal problems was set up in the state. Actually on the report on the Santals by Mac Alpine (1909) and on his suggested draft bill, the provisions of Chapter VII A of the Bengal Tenancy Act, were enacted in 1922. Some legal prtoection was given to the tribals. In 1932 a Santal unrest took place in Malda and it was as a result of this that a special organisation to look after the interests of the Santals and for promoting welfare amongst them was set up in the district. In 1933 a Special Circle Officer was appointed for the *barind* areas for this purpose. Thus the need for proper understanding of the tribal problems and to treat them psychologically was recognised by the British Government in the State. This Special Officer was later designated as Special Officer for Aboriginals. More such posts were created. These officers are now designated as Special Officer, Tribal Welfare. There is one such officer in charge of the whole district now.

In fact, with the attainment of Independence the entire approach to tackling of tribal problems was rationalised. The Constitution of India provided for protection of the rights and privileges of the weaker section of the people. Accordingly the State took upon itself the duty of promoting with special care the interests of the scheduled castes and scheduled tribes and protecting them from all forms of social injustice and exploitation. Various welfare activities were sponsored by the Government in the district with a view to ameliorating the economic conditions of the backward classes in all walks of life and effecting their social upliftment.

To raise the standard of literacy among the scheduled tribes and scheduled castes free tuition facilities were extended to the students reading in the Secondary Schools. Book grants, boarding charges, special stipends, examination fees were also liberally extended to deserving students from the backward communities. Capital grants were given for construction, improvement, renovation or extension of the school buildings specially in the areas where concentration of scheduled caste/tribe population is quite high *viz.*, the *barind* areas. Since 1961-62 a special scheme was introduced to offer free coaching facilities to the tribal students so that they might fare well in the examinations.

In the field of social education night schools were started at Kendpukur in Habibpur Police Station, Balarampur in Gajol Police Station and Mudipukur in Bamangola Police Station. Various non-official welfare agencies *viz.*, Ramkrishna Mission and Bharat Sevasram Sangha organised literacy drives amongst the scheduled castes and tribes of the district.

Grants were given to hospitals and dispensaries such as Rajadighi Christian Hospital in Gajol Police Station, Pakuahat Leprosy Clinic in Bamangola Police Station and others for treatment and free supply of costly medicines to the needy tribal patients. Emphasis was also laid on providing drinking water to the people belonging to the scheduled castes and tribes. A total of 332 water supply sources was provided during the period 1951-61 under the special programme for the welfare of the backward classes in the district.

To help the tribal people to improve their lot in the fields of agriculture, seeds were distributed at subsidised rates, grants were given for purchase of bullocks and agricultural implements. A large number of tanks was improved. Other minor irrigation schemes *viz.*, Kharibari Khal Bundh and Ottara Bundh in Habibpur Police Station were executed at Government cost for providing better irrigation facilities to the tribal agriculturists. Pump irrigation was also arranged for them.

Studbulls were supplied with a view to bringing up a better breed amongst the cattle. Poultry farms were also established in the tribal areas. Pig rearing, sheep rearing and goat keeping were introduced to improve the economic condition of the tribal people. Annual recurring maintainance grants are given to keepers of bulls, pigs, rams and bucks.

In the fields of co-operation, 15 grain-*gola*-cum-credit societies were set up in different areas of the district. A number of village roads were improved in the tribal areas. Bridges and culverts were also constructed in those areas. Grants for the purchase of house-sites and for construction of houses were given to the tribal people. Improved types of houses were also constructed for the people belonging to the scheduled castes/tribes in various places like Alampur, Paharivita in Gajol Police Station, Krishnapur, Govindpur in English Bazar Police Station, Paharpur in Kharba Police Station, Habibpur in Habibpur Police Station, Dogachhi in Bamangola Police Station, Khejuria Majhra in Malda Police Station, Wari in Harishchandrapur Police Station etc.

With a view to attract young men of the scheduled castes and tribes to industrial pursuits, the Tribal Welfare Department established during

the first plan period one Training-*cum*-Production Centre for jute and woolen goods where at least ten scheduled tribe persons might be trained each year with facility of a stipend of Rs. 20.00 each per month. Another Training-*cum*-Production Centre for jute spinning and weaving for the benefit mainly of the scheduled castes was established during the second plan period. The former is at Kendpukur in Habibpur Police Station and the latter is at Hatimari in Gajol Police Station under control and supervision of the Government.

Various other schemes were also undertaken to improve the economic and social conditions of the tribal people. The progressively increasing expenditure incurred for tribal welfare in the district points to the demand for greater extension of various welfare measures to the tribal people of Malda. The earnest co-operation and enthusiastic participation on the part of the tribes and other backward people of the district in such welfare measures have been creating a new orientation in their lives. The statement below gives the quantum of expenditure incurred on various schemes for tribal welfare for certain specified years.

	Schemes	1951-52	1952-53	1956-57	1960-61
		Rs.	Rs.	Rs.	Rs.

NATIONALITY AND MIGRATION

Most of the inhabitants of the district of Malda are Indian nationals. In 1961 out of a total population of 1,221,923 enumerated in the district, only 10·4 claimed themselves to be belonging to non-Indian nationalities. Of them, 8·8 returned themselves as Pakistani nationals, 14 as Nepali nationals and 2 as Danish nationals.

Majority of the people living in Malda were born in the district itself. They make about 90·20 per cent of the whole population. The rest 119,720 were outsiders in consideration of their place of birth. Amongst males those born outside the district of Malda constitute 9·23 per cent and amongst females they make 10·38 per cent. Amongst the total immigrants to the district numbering 119,720 who have come from outside to stay in the distrct males ar 57,432 in number and females 62,288. The sex ratio amongst these immigrants, therefore, come to 1,085 females per one thousand males.

During the last Census decade 1951-61 about 56,488 persons migrated from outside to this district. Of them majority are born in Pakistan. These Pakistan born persons are about 30,806 in number. The neighbouring State of Bihar sent also quite a significant number of people to this district during the last ten years numbering about 12,667. Malda's poor resources could not attract many from other parts of the State of West Bengal. Out of a total 9,397 persons coming from other areas of the State during 1951-61 majority about 6,270 persons came from the two neighbouring districts. The surplus district West Dinajpur in the north being very much close to the *barind* sent only 2,556 persons in that period. The fertile land of *diara* could attract about 3,714 persons of the district of Murshidabad on the other side of the river Ganges.

Most of the persons born outside the district were enumerated in the rural areas of the district. Amongst the immigrants to the district during the last ten year period about 45,962 persons are living in the villages of Malda. In the two towns of the district only 10,526 persons were enumerated who immigrated to this district during 1951-61. They constitute 20·73 per cent of the total urban population of the district.

The following table will give the statistics of persons enumerated in the district of Malda by place of birth :

EXTRACT TABLE D-II—PLACE OF BIRTH

Country/State where born	Total Rural Urban	Malda District Persons	Males	Females
1	2	3	4	5

MATERIAL PROGRESS OF THE DISTRICT

The Official Statistics presented in Part II B of this volume unfold a clear picture of the progress achieved during the last decade in almost all branches of administration. The Census decade 1951-61 nearly coincides with the first two five-year plan periods. It is worthwhile, therefore, to present a brief resume about how this district prospered during the first two plan periods, while studying the different aspects of the demographic and socio-economic life of the district in the light of the Census returns of 1961.

With the limited resources of the country it needs a series of inter-linked and integrated five year plans to raise the standard of living of the people and to open to them opportunities for richer and more varied life. Although this should embrace all aspects of human life including better nutrition, medical relief as well as educational and cultural opportunities, such a richer life can only be supported by a material base of economic prosperity. The basic approach is thus bound to be economic development. The First Five Year Plan was intended as a step in that direction. The Second Five Year Plan was drawn up with care to build up an economy which could bring prosperity within the grasp of our people. It emphasised rapid industrialisation with particuler emphasis on the development of basic and heavy industries. It launched a programme which would lead to maturity through different phases. Two five year plans were executed thus and the third one has been in operation.

Community Development

The highlight of the economic efforts of the first plan was amongst many other items, the inclusion of a very important scheme for development of the rural areas, namely the Community Development Programme. This scheme was really unique in its idea of persuading people to contribute in cash or kind for their own betterment.

Community Development is a technique devised to achieve social change through the utilisation of local resources, human and material which otherwise would remain idle.

The Community Development Programme now covers the entire district of Malda. In the ten police stations of the district fifteen Blocks have been opened. Each of the police stations Harishchandrapur, Kharba and Ratua has been covered by two Community Development Blocks. The Kaliachak Police Station has been divided into three Blocks. The rest of the police stations has been constituted into one Block each. During the first plan only 3 Blocks were opened covering an area of approximately 445·7 Sq. miles and extending over about 481 villages *i.e.*, about 30 per cent of the total villages of the district came under the purview of the Community Development Programme in course of the First Five-Year Plan. Another four Blocks were opened during the second plan engulfing a total area of about 473·8 Sq. miles covering another set of 575 villages. Thus at the end of the two plans Community Development Programme had its foothold on seven Blocks serving 1,056 number of villages *i.e.*, about 67 per cent of the total villages of the district extending over nearly 919·5 Sq. miles of area.

From the data on the achievement of the Community Development Programme in the district available from the Department of Community Development and Extension Service, Government of West Bengal, a rough idea can be formed about how the district progressed during the two plans under this programme. In the field of agriculture and animal husbandry, during the first plan only 440 maunds of manures and fertilisers were distributed to the cultivators through three Community Development Blocks opened during that period. During the second plan period the quantity of manures and fertilisers which were distributed to the cultivators of 7 Blocks opened, was raised to 23,493 maunds. In the first plan 914 maunds of improved seeds were distributed and during the second plan period the cultivators of the district could get the benefit of 15,051 maunds of improved seeds. In the first plan demonstration was held in 1331 agricultural plots only. The number of demonstration plots was raised to 7,993 during the second plan. 1,958 compost pits were prepared during the first plan, while this number for the second plan was 11,244. Improved variety of animals was also distributed through the Community Development Blocks. In first plan only 47 improved animals were distributed to the farmers. In the second plan this number was only 15. Only 256 improved type of birds were distributed in the first plan. In the second plan the number of improved birds distributed to the people of the seven Blocks as existing at that time was 2,728. In the field of public health rural latrines were constructed. 343 such latrines were constructed during the first plan, while this number for the second plan was 1,339. For supply of drinking water, wells were also constructed under the Community Development

Programme. In the first plan twenty such wells only were constructed and during the second plan the number of wells constructed was 398. A number of wells were also renovated with a view to supplying pure drinking water to the people living in the district. 110 such wells were renovated during the first plan and during the second plan 320 such wells were renovated. In the field of social education 39 adult education centres were functioning within the jurisdiction of three Blocks opened during the first plan and 128 units of peoples organisations were developed. At the end of the second plan the number of adult education centres functioning was raised to 325 and the units of peoples organisations to 636. Only seven Mahila Samities were started in the three Blocks during the first plan. At the end of second plan 41 Mahila Samities were functioning in the seven Blocks opened. The Community Department Programme also covered various other activities in other branches of administration. In the first plan peoples' contribution was estimated to be of the magnitude of Rs. 152.10 thousands and in the second plan this was about 1,407.52 thousands.

Agriculture

Agriculture is the bed-rock of any planning in India. This is more so in the State of West Bengal. Programmes of agricultural development, therefore, have been given due priority in the plan of the district. There is not much scope for extending the area under cultivation as is apparent from the earlier discussion in the chapter on Agriculture. The emphasis, therefore, has been given on bringing more of the cultivable area under irrigation, to make two or three crops grow in the area where at present a single crop is done and on adoption of improved agricultural practices for the best utilisation of the available land. To grow more food has been the principal target for the agricultural programme followed during the two plans. Improved seeds is one of the important factors which can increase food production to a great extent, and with this end in view the seed saturation scheme was taken up. The second plan envisaged work on establishment of five Thana seed firms and distribution of approximately 46 thousand maunds of improved seeds of paddy, wheat, mustard and pulses and distribution of about 16 thousand tons of different kinds of fertilisers. In 1962-63 about 2,026 maunds of improved variety of seeds of paddy, jute, wheat and gram were distributed to the cultivators from the different seed firms. The Directorate of Agriculture adopted different schemes to ensure additional food production. Some of the schemes were (1) irrigation, (2) distribution of fertilisers and manures, (3) distribution of improved seeds, (4) methods of agricultural practices, (5) plant protection, (6) soil preservation, (7) demonstration and firm information, (8) reclamation of water logged lands, (9) agricultural education and training, (10) agricultural research, (11) marketing and warehousing etc.

65 small irrigtion schemes were contemplated to be undertaken and 160 demonstration centres and plots to be set up for the propagation of improved methods of farming amongst the cultivators of the district in the second plan period. The second plan further contemplated about 5,000 acres of waste lands to be reclaimed by mechanised means. In order to imbibe a spirit of healthy competition among the cultivators, crop competitions were held in the district during that period. In 1962-63 there were 39 demonstration plots in the district.

Irrigation

Irrigation is the largest single factor which can change the face of the country by revolutionising its agriculture. Not only will it ensure a steady yield from lands which have hitherto been subject to recurrent drought and help bring more lands into cultivation, but it will also change the entire cropping pattern. Flood control and drainage are naturally linked up with the irrigation scheme. These two are also potent factors in pushing up the yield from agriculture. The problem is how to effectively divert the accumulation of too much water at certain places which is definitely injurious to a healthy growth of cultivation to an area having little water.

During the first plan period a number of *mauzas* of Kaliachak Police Station were saved from severe flood caused by the rise of the river Pagla by setting up a regulator at Tafiadanra and construction of two embankments. This scheme could save an area of about 3 Sq. miles from the ravages of flood, approximately at a cost of Rs. 66,500/-. In the Gajol Police Station about 3,000 bighas of agricultural lands could be protected by constructing one regulator and circular embankment in the Kanchan Beal area. The scheme approximately cost Rs. 54,600/-. In the Kharba Police Station the Boalia Beal Scheme could also save about 2 Sq. miles of area from floods. This scheme was executed at a cost of Rs. 82,714/-. The Mallikpara Danra Scheme in the Kharba Police Station was executed to irrigate an area of about 25 Sq. miles. The Rahamari Danra-Sambalpur Tal Bundh Scheme in the Ratua Police Station was executed by setting up a regulator at a cost of Rs. 37 thousand and there by protecting 1 Sq. mile of land from severe grip of flood. One regulator was also constructed at the Rampur-Kaliganj Danra in the Harishchandrapur Thana during the First Five Year Plan.

During the Second and Third Five Year Plans several other schemes were also taken up much to the benefit of agriculture in the district. The Batijor Scheme in the Gajol Police Station was taken up as a result of which 500 acres of land could be irrigated. This scheme was done at a cost of Rs. 33 thousand. More than one lakh of rupees was spent in setting up a regulator on the Kalapahar Bundh in the Ratua Police Station, thus protecting a vast area from a severe attack of flood. In the Ratua Police Station an embankment stretching over about 22 miles in length with three sluice gates was constructed at a cost of nearly 20 lakhs of rupees. This scheme could protect an area of about 10,880 acres of land and an annual increase of outturn of crops by 4,800 tons could be effected through this scheme.

Co-operation

The present Central Co-operative Bank at Malda was re-organised in 1958 after three Central Co-op.rative Banks were merged together. There is one land mortgage bank in the district. In 1955-56 an amount of Rs. 22,700/- was advanced as loans through this bank. In 1960-61 the amount of loans advanced was Rs. 18,200/-. The primary credit societies were also re-organised to strengthen the financial position of the credit societies. During the period 1955 to 62 the number of farming co-operatives has increased from 7 to 24. The membership increased during this period from 954 to 5,288 and the amount of loans granted was raised from Rs. 16,222 to Rs. 54,745. During the First Five Year Plan period there was no co-operative marketing society in the district. During the second plan 17 small co-operative marketing societies were established. In Malda where most of the productive units are small and scattered, the role of co-operation has been all the more marked as it could combine the initiative of the small scale production with the advantages that go with larger undertakings. The weavers' co-operative societies played a distinct role in augmenting the production of handloom and silk. The mango processing co-operative society also played a very prominent role in the economy of the district. The Government of West Bengal purchased a share of Rs. 25,000 in this society and advanced a loan of Rs. 260,000 to them. The society has also received Rs. 100,864 from the West Bengal Small Industries Corporation.

Panchayat

The Panchayati Raj structure in the district of Malda is a four-tier one the Zilla Parished at the district level, 15 Anchalik Parishads at the Block level, 136 Anchal Panchayats at the Anchal level and 827 Gram Panchayats at the Village level. The Zilla Parishad and the Anchalik Parishads were constituted in the later half of 1964. The Anchal Panchayats and Gram Panchayats were constituted from time to time. In 1959 the first series of 46 Anchal Panchayats and 288 Gram Panchayats were formed in Ratua, Kharba and Harishchandrapur Blocks, in 1960 a second series of 34 Anchal Panchayats and 200 Gram Panchayats were formed in Manikchak, Habibpur and Gajol Blocks and in 1964 a third series of 56 Anchal Panchayats and 339 Gram Panchayats were formed in English Bazar, Old Malda, Bamangola, Kaliachak-I, Kaliachak-II and Kaliachak-III Blocks. Now the whole district is covered by Panchayats. In 1962, 9 Nyaya Panchayats were also established.

The Anchal Panchayats of the district with 2,176 members (including 4 lady members) play a vital role as a Panchayat Raj Institution—impose and collect taxes, distribute money to Gram Panchayats for undertaking development work, guide and co-ordinate the activities of Gram Panchayats for undertaking development work and maintain the rural police. In 1964-65 the 136 Anchal Panchayats of the district imposed (a) taxes amounting to Rs. 380,000 on 204,570 owners and/or occupiers of land and/or buildings (b) licence fee of Rs. 77,600 on 38,770 carts and other two-wheeled animal drawn vehicles and (c) licence fee of Rs. 22,300 on 7,287 traders. In the same year the Anchal Panchayats received from Government Rs. 136,000 as grant for undertaking development work—and Rs. 239,000 as Government's Contribution towards salary of staff of the Anchal Panchayats. The Anchal panchayats collected in the previous years about 75 per cent of the assessments.

The 827 Gram Panchayats of this district have 10,050 members of whom 17 are ladies. In 1963-64, 480 functioning Gram Panchayats spent out of their funds Rs. 138,200 on development works such as sinking of tubewells and wells, repair of village road, assistance to Primary Schools, Clubs and Libraries, construction of culvert, purchase of agricultural implements etc.

APPENDIX I

GAZETTEER

Amaniganj Hat—An important silk mart on the Bhagirathi. There is no resident population but it is a centre for the Jalalpur duars of the silk trade in cocoons and raw silk, to which resort buyers from Murshidabad district. The turnover on a single day in the busy season previously amounted to a lakh of rupees and the prices made here control those of the whole district in these products.

Aiho—Aiho is an ancient trading village, situated on the junction of the Mahananda and Tangan rivers. In pre-partition times it used to be an important village commanding the trade of both rivers. Even now it is the most important market in this region of the district.

Araidanga—A large village on the east bank of the Kalindri in Ratua police station, about 7 miles south east of Ratua. Araidanga together with Mirdapur contains a large settlement of Maithilis and Maithili Brahmans—a community which immigrated from Northern India. In fact this locality within a radius of about 2 miles contains many settlement of Maithilis.

Bamangola—The headquarters of a police station in the north eastern corner of the district. The village of Bamangola is situated on the Tangan river and about 10 miles east of Gajol with which it is being connected by a first class district highway. Bamangola is an ancient village and the whole thana was very prosperous up to the 19th century. Along the southern border of the thana lies an ancient high embankment striking due east from Pandua proceeding towards Ghoraghat (now in Rajshahi district). The entire length of this embankment is studded with large and small tanks. The entire embankment was evidently a high way in Hindu and Muhammadan times, such a Minhaj-i-Siraj speaks of in his Tabakat-i-Nasiri.

Bhaluka—A village in the south western corner of thana Harishchandrapur about 7 miles north west of Ratua police station and 5 miles south west of Bhaluka Road Railway Station. In fair-weather Bhaluka is connected to the headquarters of the police station of Harishchandrapur by a fair weather track *via* Talgachhi and Jalalpur. This is a fairly large village with a market and a big weekly *hat* nearby and is rapidly assuming importance as a trading centre for jute and mango, as it is situated on the Kalindri and Konkhor rivers. This village command a number of interior *hats*: Mihaghat in the north west, Jalalpur in the north and Kariali and Masaldaha in the north east. Bhaluka was the seat of the Chhota Taraf of the Harishchandrapur zemindar families. Close to Bhaluka near Degun (J. L. 176) is the famous Siali Bil notable for all kinds of duck in the winter.

Chanchal—A large village about 9 miles north of the Railway station of Samshi in the Kharba police station and the seat of the famous Chanchal zamindars called Rajas. The most famous of the Chanchal zemindars was Sarat Chandra Roy who gave away large sums of money in charity. It was with his money that the Chanchal-Samsi Road was metalled. Chanchal is now an important junction of several roads under the West Bengal Road Plan: the Ratua-Samsi-Chanchal Road, the Harishchandrapur-Tulsihata-Chanchal Road and the Chanchal-Gajol-Bamangola Road. Chanchal contains the Chanchal Raj Palace.

Enayetpur—A village in Manikchak thana on the Manikchak-Englishbazar Road about 2 miles east of Manikchak. Enayetpur together with Chauki Mirdadpur contains a settlement of Bihari population including a liberal sprinkling of Muslims. There is a famous mango-growing area and has again assumed importance as a halting place for passengers travelling from English Bazar to Rajmahal. The soil of this area is a rich *doansh* soil.

English Bazar or Engrezabad—Headquarters town of Malda district, on the right bank of the Mahananda, in 25°0′N. and 88°9′E. Population 45,900 (1961). Being an open elevated site on the river bank in a mulberry growing country, it was chosen at an early date as the site of one of the Company's silk factories. The French and Dutch had also settlements here.

The East India Company's factory was of considerable importance during the last quarter of the 17th century, and its 'diaries and consultation' from 1685 to 1693 (with breaks) are still preserved in the India Office under the title of 'Maulda and Englesavade'. In 1770 Mr. Henchman built the commercial residency and factory of the Company at English Bazar and the modern town grew up round it, materials being largely taken from Gaur. To this day the portions of the town near the factory are known by names such as Lakrikhana (wood yard), Murghikhana (fowl yard) and similar names showing the original use to which the land was put. The factory was regularly fortified with bastions at the angles of the surrounding wall. It is now used as the court house and all the public offices at head-

quarters are within its walls. Other public buildings of the town are the jail, the new college and the high school. Many of the houses in the town are faced with carbed stones from the ruins of Gaur. There is an interesting collection of these stones in the court-house and also in the compound of the Collector's house.

The railway station is on the opposite side of the river. Its trade in silk, jute, mangoes and manufactured goods is considerable, and it has a considerable population of weavers. Silk thread is exported to Bishnupur, Varanasi etc.

It was constituted a Municipality in 1869 with 18 Commissioners, of whom two-thirds were elected. At present the Municipality is composed of 14 Commissioners all of whom are elected.

There is a small embankment protecting the town from the inundations of the Mahananda. A feature of the town is the extensive mango gardens which cut it off from the agricultural country to the west.

Golam Hussain, the historian of the early days and Rajnikanta Chakraborty, a historian of the present times and archaeologist Abid Ali Khan lived in this town.

Gajol—The headquarters of a police station of its name. The topography of Gajol indicates that up to the 17th century the whole thana must have been extremely populous and flourishing. The removal of the Muslim capital from Adina in Pandua situated at the south of the thana must have spelt the ruin of the area in the 17th and 18th centuries. Such places in the police station as Adina (J. L. 39), Kutubsahar (J. L. 32), Pandua (J. L. 33), and Homdighi (J. L. 48) containing the extensive ruins of the famous capital of Pandua, and the villages of Raykhandighi (J. L. 23), containing a very big tank, Saharol (J. L. 19), Mobarakpur (J. L. 9) and Rajaram Chak (J. L. 10) containing a famous set of embankments, Mayna (J. L. 119), Methrani (J. L. 138), Dhaoyail (J. L. 173), Deotala (J. L. 172), Salaidanga (J. L. 214), all bear testimony to ancient sites. The road from English Bazar to Bansihari *via* Gajol is an ancient highway which has been recently completely rebuilt as a National Highway. There are traces of an ancient road running from Adina *via* Hatimari, Mirzadpur, Panchpara, Shyamnagar and Mayna through to Hemtabad in West Dinajpur. Another district highway is now under construction connecting Chanchal in Kharba police station with Gajol and Gajol with Bamangola in the east. These two highways will quite effectively open up the four corners of the district and it is hoped that Gajol will again commence to have a prosperous life.

Gaur—The city of Gaur, a deserted capital of Bengal, is situated on an old channel of the Ganges in 24°52'N. and 88°10'E, 10 miles south-west of English Bazar, from which it is reached by a mecadamised road. Its dimensions as defined by the embankments which still exist are about 7½ miles in length north and south, and from 1 to 2 miles in breadth from east to west. It has been mentioned that at the time of the Mahomedan invasion another name of the city was Lakhnauti or Lakshmanavati. Dr. Buchanan Hamilton says in his MSS. that in his time the fort and palace of Lakshman were to be seen on what is now merely elevated ground in the vicinity of English Bazar, and it may be that the name of Lakhnauti was applied originally to describe the extension of the present city northwards round the king's residence. Hamilton appears to include this portion within the city limits, as he speaks of the area covered by Gaur as 20 square miles. The remains of embankments north and north-east of the city proper still exist, and they probably covered the suburbs in that direction and were defensive out-works. The line of swamps to the east and north-east of the city site show that at one time the Ganges flowed on the east face of the city, which was thus situated between the Bhagirathi and the Ganges. On the eastern side a double line of earth embankments of enormous thickness still exists, and it is supposed that these embankments protected the city from being washed away when, in the sixteenth century, the Ganges commenced to recede from what is now the Mahananda. At the present time the Ganges main stream is 10 miles west of the city, which is clearly defined by the abovementioned embankments on the east and by an irregular line of embankments on the north, which crosses the English Bazar-Nawabganj road at the fifth mile from English Bazar and continues down the Bhagirathi. This river with the Pagla forms the western boundary down to Mahadipur, from which place the southern ramparts extend almost continuously to the eastern, crossing the Nawabganj road at the Kotwali gate in the fourteenth mile from English Bazar. South from Mahadipur runs the Firozpur suburb down to Kansat, whilst on the north-west of the city is the Sadullapur suburb.

Almost the whole of the site is now cultivated land under field and orchard crops, with scattered villages. Some jungle remains, mostly along and close to the southern embankment. Of the fort within the city two gates, the Dakhil Darwaza, and the Lukachuri, still exist with a part of the ramparts. Within the fort precincts are some remains of the palace wall and various buildings described below. This wall, which is made of brick, is known from its height as the Baisgazi or 22 yards, the width at the top is 8 feet 6 inches. The clearing of the jungle and cultivation of the ground have led to the discovery of considerable quantities of gold and silver coins,

but all of these are of Mahomedan times, and beyond a few isolated carvings there is little to indicate the pre-Mahomedan history of the city. It may indeed be said that the only indication of its Hindu origin is to be found in the tanks with their longer sides running north and south, which are scattered throughout the city and its neighbourhood. Of these the most important is the great Sagardighi which measures 1,600 by 800 yards and is one of the largest pieces of ornamental water in Bengal. It was originally the site of the brick-fields of Gaur. On its banks are to be seen the remains of the tomb of the saint Akhi Seraj-ad-din, described as the first Hindustani recognised as a saint by Nizamuddin Aulia of Delhi. The gateway was built by Hosain Shah and the inscription on it refers to a building by Nasrat Shah. The *Panja* of the saint Nur Kutb Alam is taken on the Id Day, the day of the *Fatiha* (prayers for the dead) of Akhi Seraj-ad-din, from Pandua to the tomb as a mark of respect. On both Id and Bakr-Id days there are *melas*. Close by the tomb is the Jhanjhaniya mosque which bears an inscription that it was erected in the reign of Mahmud Shah, son of Husain Shah. At Sadullapur itself is the burning ghat on the Bhagirathi of the Hindus and the Durbasini shrine. It is still a place of great resort on festival days for bathing in the Ganges and is also used largely as a burning ghat. Tradition has it that at the time of the Mahomedan rule it was the only burning ghat allowed to the Hindus in Gaur.

Of the Mahomedan buildings in Gaur the oldest dates from the fifteenth century. The chief destructive agency apart from the secondary jungle, which up till recent years covered the greater part of the old city, would seem to have been earthquake and the quarrying of the ruins to provide the building material of Murshidabad, Malda and English Bazar. Mr. Reuben Barrow, who visited these ruins in 1787, says in his journal: "Gaur seems rather to have been destroyed by the removal of the materials for other purposes, than by time. These tombs were not long ago in perfect order and were held in a manner sacred, till they were torn to pieces for the sake of stone; indeed such of the gates as happened to have no stone in them are almost perfect, but wherever a piece of stone was happened to be placed, the most elegant buildings have been destroyed to get it out, so that there is now scarcely a piece left except a part in the round tower which happens to have been preserved by the peculiar construction of the building". The first systematic exploration of the site was made by Mr. Creighton in 1801.

In 1810 Dr. Buchanan Hamilton visited the ruins and wrote a description of them. His account will be available in Appendix III. These lie for the most part on both sides of, and close to, the English Bazar-Nawabganj road from the 8th to the 14th mile.

Habibpur—The headquarters of a police station in the south eastern corner of the district to the north of which is the thana of Bamangola. Habibpur is separated from Bamangola by a high embankment running from West to East from Pandua in Gajol police station to Ghoraghat in Rajshahi (now in Pakistan). The river Tangan forms the western boundary of the thana first with Malda police station and then with English Bazar police station. Further south it has boundaries with East Pakistan. In the west the river Purnabhaba forms boundary with East Pakistan commencing at the village Kadaripara (J. L. 62) and ending at village Ananda Pathar (J. L. 291). The principal villages in the thana are Habibpur, Anail, Bulbulchandi, Aiho and Singabad. The English Bazar-Muchai-Aiho-Bulbulchandi-Habibpur-Bamangola Road is being rebuilt to complete a circuit of communication. Communication is bad in the police station, most areas lying inaccessible by road except in fair-weather. Bulbulchandi is a large trading centre and the seat of a fairly ancient zemindar family called the Bulbulchandi Babus.

Harishchandrapur—The headquarters of the north-westernmost police station of the district. It is also the seat of the Harishchandrapur zemindars who are ancient families. Harishchandrapur is now a large village containing among other things a Central Co-operative Bank, a 50-bedded Hospital, and a Basic School. It is also the headquarters of the Circle Officer of Samsi, and the thana contains several large villages which are also markets. These are—Kushidha, in the north, Tulsihata which formerly used to be the headquarters of this thana, Srichandrapur in the north-east Malior, Jalalpur, Mihaghat, Bhaluka, Kariali and Masaldaha. The south of the thana contains the famous Tal area and a series of bils, the more important of which are Nawapara, Sadlichak, Tal Bhakuria, Belsur, Talsur, Tal Bangura, Tal gachi. The Kalindri river runs along the south-western border of the thana while the Baramasia river taking off from the Mahananda river at the north-eastern corner of the district forms the boundary of the thana first with the Kharba, and then with Ratua in the east.

Kaliachak—The headquarters of the police station of its name. Kaliachak thana is one of the most populous thanas in the State of West Bengal. The west and south-west of Kaliachak are bounded by the river Ganges. The south-east has its boundary with East Pakistan and on the east the Bhagirathi river roughly forms the boundary with Englishbazar. Agriculturally the thana is one of the richest areas in the State. The chief peculiarity in the population is a large section of what are called Shersabadiya Muslims who must have originally migrated from Murshidabad. The principal villages Kakribandha-Jhaubona in the north-west, the large market village of

Panchanandapur, the steamer point of Dogachhi, Baisnabnagar, Golapganj, Sahabazpur, Jalua Badhal (which incidentally is almost on the old site of the capital of Tanda), Jalalpur, Dalugram, Suzapur, Mandai, Mothabari and Gangaprasad. The river Pagla runs west to east across the middle of the thana and joins the Bhagirathi within the borders of the thana in the east. The eastern part of Kaliachak is famous for silk.

Kaligram—A large village in Kharba police station about 2 miles east of Chanchal and 4 miles south-west of Kharba, the headquarters of Kharba police station. Kaligram which is contiguous to Bagchara (J. L. 152) is an ancient village and is famous as a centre of cotton cloth weaving. There are many houses in Kaligram which have been built from bricks carried from the ruins of Gaur. Kaligram is the seat of the famous Goswami family mention of which has been recorded by Buchanan Hamilton. The Goswamis are an ancient family and have produced many learned men and logicians. The most famous name is Purusottam Goswami. Kaligram is by far the biggest village in the thana.

Kariali-Masaldaha—A large trading centre and village which has formed around Bhaluka Road Railway Station, important as an exporting centre of jute, gram and pulses. Has a ten bedded Union Health Centre and a Junior Basic School.

Kharba—Headquarters of the police station of its name. On the west the thana is bounded by the river Baramasia, on the north and east by the river Mahananda, and on the south the boundary is formed by the police station of Ratua. The headquarters of the police station is at the north-eastern corner of the thana in a village called Kharba. The more important villages of the thana are Gaurhanda, Anupnagar, Samsi, which is a railway station and a large trading centre, Malatipur, Chanchal, Hatinda and Sahabajpur. The south-east of the thana is mainly swamp area forming part of the Tal area. A tongue of the old alluvial land shoots out from Chanchal down Anupnagar and Malatipur as far south as Kandaran (J. L. 105) and Parakaram in thana Ratua. There are ruins of ancient buildings in Kandaran.

Kotwali—A large village in English Bazar police station about 4 miles north-west of English Bazar town close to Arapur village. This area is famous for mangoes and Kotwali is the seat of an ancient Pathan family of the district.

Mahadipur—A large village on the banks of the Pagla and formerly the south western portion of Gaur. Reference may be made to the appendices on Gaur for an account of its antiquities. It is a considerable centre for the trade of the diara tracts.

Malda or Old Malda—Town in Malda district situated on the left bank of Mahananda at its confluence with the Kalindri in 25°2'N. and 81°8'E. Population (1961) 4,885. The town is admirably situated for river traffic and probably rose to prosperity as the port of Pandua. During the eighteenth century it was a centre of cotton and silk manufactures and the French and Dutch had factories there as well as the English. The English factory was, however, transferred to English Bazar in 1770 and the town began to lose its prosperity with the rise of English Bazar. It has tended to decline throughout the nineteenth century. It is, however, still a considerable distributing centre of manufactured goods of the *barind* and does a large export trade in rice and jute. There is a railway station of the Katihar-Godagari line with a branch to the river side. The site of the large market of Balia-Nawabganj, which is held weekly, is just outside municipal limits. The town was constituted a Municipality in 1869 and had a board of 12 Commissioners, of whom two-thirds were elected. The Municipality is at present composed of 9 Commissioners all of whom are elected. The town proper is situated on a ridge and, land above flood level being limited, the houses mostly brick-built, though showing many traces of removal of building stone from Gaur and Pandua, are huddled together in very narrow streets only wide enough for a bullock cart to get through. This and the resulting unhealthiness has tended to make the place largely merely a business centre instead of a residential centre. The antiquities of the town are: (1) The Jama Masjid, a buiding of carved brick and stone 72′ by 27′. It has two big domes and one big arched vault, with minarets at the corners. It contains two sides chambers 16′ by 16′ and a central chamber 22′ by 16′. The pillars at the entrance gate are of handsomely carved stone. The inscription shows that it was built by one Musum Saudagar in 1566 A.D. (2) The shrine of Shah Gada containing the tomb of Shah Gada and others, as well as that of a parrot which learned to recite prayers from the Koran. Opposite the shrine is the grave of *dudh* (milk) *pir* at which the faithful offer milk to the *pir* by pouring it into a small hole close to the grave.

Two other mosques may be mentioned, the Phuti masjid (cracked mosque) built in 1495 and now given over to jungle; and the Nawab's mosque, now dilapidated, ascribed to the piety of a Nawab of Murshidabad.

Across the river and opposite the town of Malda is the tower of Nimasarai of 18 feet diameter and height 55 feet. It is studded with projecting stones and is a landmark of the neighbourhood. It is suggested that it was built for a hunting tower and also used as a watch or signal tower.

Pandua or Paruah—An old capital of Bengal in the Barind or *Barendrabhum* situated in 25° 8'N. and 88°E, at a distance of 6 miles north-east from Old Malda, on either side of the main road from Old Malda to Dinajpur. The railway station and the steamer ghat from which it is most easily reached are both in Old Malda though called Nimasarai and the road from that place is good except in the rains. Up till recent times the site of Pandua away from the road was covered with heavy jungle, in particular a species of bamboo called *beur bans*, exceptionally thorny and growing in clumps as impenetrable as a cane brake. It has been suggested that this variety was planted by the rulers of the city to help in its defence. Most of the jungle has now been cleared by Santhals though the population of the place is still small and confined to a few villages off the main road.

The comparative obscurity of Pandua has led to its antiquities being attributed to Gaur, and where a mention of the place is found in history, it has often been confused with the place of the same name in the Hooghly district.

The port of the city in its prosperity was Old Malda. There was also a fortified post at Raikhandighi some 10 miles further up the Mahananda which guarded the bridge over the Mahananda at Pirganj and the military road to the west. The suburbs of the city extended to both of these places, though very few remains have been discovered which suggests that all the buildings of the outskirts of the town were merely the common mud houses of the *barind*. A curious local tradition is that a place in the vicinity of the Adinah mosque used to be dug for lead.

Dr. Buchanan Hamilton thus describes Pandua:

"A road paved with brick from 12 to 15 feet wide and not very straight seems to have passed through the entire length of the town, which stretches nearly north and south and is about 6 miles in length. From the heaps of bricks on both sides it would appear to have been a regular street lined with brick houses, of which the foundations and the tanks can still be traced in many places. Almost all the surviving monuments are on the border of this road; near the middle is a bridge of three arches, partly constructed of stones, which has been thrown over a rivulet. It is rudely built and of no great size, and as is the case with all other monuments in Pandua, the materials have manifestly come from the Hindu temples as they still show sculptured figures, often inverted, of men and animals. At the northern end of the street are evident traces of a rampart, and the passage through it is called Garhduar (gate of the fort). At the south are many foundations which have probably belonged to a gate".

The remains which now exist may be divided into those of Pandua and Adinah, the distance between the places being about two miles. Full accounts of them will be found in the Appendices.

Pichhli—A village eight miles north-west of English Bazar near Gangarampur containing traces of old buildings, said to have been a residence of Lakshman Sen. Cunningham found an inscription here bearing date 1249 A.D.

Singabad—Singabad is a Railway Station and a fairly prosperous village. Formerly the Singabad zemindars, a family of Bhuinhar Brahmans from the west, having social ties with Lalgola Raj were quite prosperous.

Tanda or Tanra—An old capital of Bengal to which the royal seat was transferred by Sulaiman Kerani in 1564 on account of the unhealthiness of Gaur itself. It is supposed to have been a *char* of the Ganges to the south-west of Gaur, though the name is still borne by a piece of land near Lakhipur on the Rajmahal road. It continued to be the headquarters of the kingdom till the middle of the following century and Shah Suja was defeated in 1660 in its vicinity by Mir Jumla, Aurangzeb's general. The place continued to be used by the Moghul Governors till the time of Raja Man Singh. The *char*, on which the town was, has been completely swept away by the river.

APPENDIX II

An excerpt from 'An Account of Land Management in West Bengal, 1870-1950' by A. Mitra, I.C.S.

I. 1871

The definite area of the district was returned in September 1874 by the Boundary Commission at 1,806.64 square miles. In the year 1869-70 before recent transfers the area was estimated at 824,521 acres or 1,288.31 square miles. Of this total some what more than half, 426,583 acres or 666.54 square miles, was under tillage. Of the remainder, 244,130 acres or 381.45 square miles were returned as capable of being brought under tillage, and 153,808 acres or 240.32 square miles as absolutely uncultivable, or

Cultivated area	426,583	Acres
Cultivable but not cultivated .	244,130	,,
Uncultivable waste . . .	153,808	,,

No statistics approaching to accuracy exist which would show comparative cultivation of each of the crops. But the Collector has taken the pains to draw up the following estimates :

Rice	250,000	Acres
Wheat	25,000	,,
Other food grains . . .	10,000	,,
Oil seeds	25,000	,,
Indigo	30,000	,,
Fibres	3,583	,,
Tobacco	3,000	,,
Vegetables	15,000	,,
Pulses	50,000	,,
Mulberry	15,000	,,
Grand Total	**426,583**	,,

The staple crop is rice, of which there are four varieties : *boro*, *bhadoi*, *aman* and *haimantik*. The last crop requires to be transplanted and more resembles the ordinary *aman*.

The quality of the rice grown does not appear to have improved of late years, nor has any encouragement in this direction been offered on the part of the landlords. The great extension, however, of the area under rice has of late taken place and this is not at the expense of other cultivation. Much of pargana Sersabad in the neighbourhood of Gour which was nothing but jungle twenty years ago, now produces good rice crops. The same may be said of many other parts of the district notably in thanas Gomastapur and Nawabganj to the south-east. Sugarcane is not sufficiently cultivated in Malda to deserve notice. Indigo is extensively grown both by European planters and several rich Indians. The mango tree like the mulberry plant is a source of wealth to the cultivators who live in the more favoured part of the district. Mango orchards lie on the banks of the Mahananda in the neighbourhood of English Bazar. The mangoes of Malda are celebrated all over Bengal and when in season the fruit is exported largely to Murshidabad and even more distant towns.

A large quantity of land in the district has not yet been brought under tillage. Cultivation however is rapidly extending. But there will always remain a good deal of untractable and hilly jungle. There are no peculiar tenures in the district which aim directly at the reclamation of waste land, but on the whole the cultivating tenures generally are favourable to the extension of tillage.

English Bazar, Malda and Rohanpur, the three most popular places in the district conduct a considerable trade in garden and other products which chiefly passes in boats up and down the Mahananda. Many rice grain merchants live at these towns, especially at the two latter of them, who of course receive their stores by water. It is down the Mahananda and its tributaries that the surplus stock of Dinajpur and Malda rice amounting annually to about 2,000,000 maunds or 73,214 tons is exported on its way towards Bihar and the north-western provinces. A vast quantity of traffic is also consigned down the Mahananda to Calcutta consisting chiefly of rice, tobacco, gunny bags and oilseeds. The up traffic is mostly salt and cotton from Calcutta.

The only recommendations that the Collector has to offer on this topic are that a good metalled road should be made to connect English Bazar and other towns with the ferry that crosses the Ganges opposite Rajmahal; and other that a similar road should be done to meet the new line of rail to Darjeeling.

Manure is only used on mulberry lands, and they are given in the form of cowdung and *suti* or indigo refuse. From 8 to 15 maunds per bigha or from 17 to 32 cwts. per acre is considered to be a liberal allowance.

Irrigation is not necessary in this district, except for the *boro* rice crop inasmuch as almost the whole of the cultivated fields go entirely under water during the rains. For the irrigation of the *boro* rice no tanks or wells are required. It is always planted along the edges of wells or on the

banks of rivers so that the common *jant* is all that is wanted to throw the water over it.

When the fields are situated above the level of the annual floods, they are reserved for the growth of wheat and other cold weather crops and to restore their powers they are often left fallow for a year or two at a time. In some parts of the district especially in pargana Gourhand where the *halhasila* tenure is in vogue, the custom of leaving fallow some considerable portion of the village lands in alternate years extensively prevails. Rotation of crops is nowhere practised, nor can it be said to be required as by far the greater part of the arable land is each year refreshed with new deposit of river mud.

The *halhasila* tenure is an extremely common form of holding, chiefly in the less advanced tracts in the north and in Diara Mahals in the west and south of the district. The peculiarity of the tenure is that the cultivator only pays rent for such lands as he may have cultivated during the year, and the rate is proportioned to the kinds of crops that he has raised. There is no written agreement, but the tenant is recognised to have a claim to till. The lands actually capable and the rent payable vary each year and of course no right of occupancy can arise. The source of this tenure, however, is not to be found in the grasping disposition of the zemindar, but in the vitality of the old Hindu village system. It is in fact a relic of the days when the entire ranks of the village were annually divided afresh among all villagers. Even at present it is usually the headman of the village and not each individual peasant with whom the annual agreement and partition is made by the zemindar. "The entire village under the authority of the headman goes in concert." The land to the east of the village is cultivated for one or two seasons while the land to the west lies fallow and is used as grazing ground for cattle. After the loss of two years the land to the west is brought under cultivation, while that to the east lies fallow; and so on alternately. This is the simplest form of the *halhasila* tenure; but for the proper working of such system it is manifest that two requisites are necessary. The village community must retain its traditional influence over its members and there must be abundance of spare land. In pargana Gourhand this is apparently the case, for there the greater part of each holding is exchanged every year. In pargana Hatunda, however, where the pressure of the population is greater it would appear that a new variety of *halhasila* is springing up. The yearly exchange of land cannot be indulged in so frequently as a whole, for the peasant is in no way certain that his relinquished plot will not be occupied by an interloper before the year is out. This defect is met in the following way: In each new assessment on the part of the zemindar the lands are so rated that the tenant is enable to hold an extra quantity of land at a nominal rent, so that he may allow a certain portion of his holding to remain fallow each year, answering the double purpose, both to recoup its powers and of acting as a grazing ground for his cattle. The *halhasila* tenure, therefore, is losing its primitive character as an integral part of the customs of a village, and is tending to become a mere matter of contract between the landlord and the tenant. (cf. The *utbandi* system in Nadia ; the *fasli jama* in Murshidabad, and the *Khutkhamar* in Hooghly).

Yield per acre

The yield of paddy or unhusked rice from lands paying a rent of 7*s*-6*d* to 9*s* an acre would be from 10 to 12 maunds per bigha or from 22 to 26 cwts. per acre. Inferior rice land rented at a proportionately lower rate according to its quality yields from 7 to 10 maunds per bigha or from 15 to 22 cwts. an acre. The land on which the *bhadoi* or *aus* crop is sown is also suited for winter crops, such as mustard, peas, etc. These yield from 5 to 7 maunds per bigha or from 11 to 15 cwts. per acre. In short, a bigha of land adapted for both paddy and winter crops gives a fair return of from 16 to 20 maunds of crops. An acre would thus yield from 35 to 44 cwts.

This is the estimate returned by the Collector; but he ought to be expected, with caution, as taking the amount of paddy at too high a value, and disclosing a profit to the cultivator much above the average.

Average land per agriculturial family

The size of the holdings varies from 2 to 1,000 bighas or from 2/3rds of an acre to more than 300 acres. But anything beyond 800 bighas or 270 acres would be considered a very large farm and anything below 25 bighas or 8 acres as a very small farm in this district. About 30 to 50 bighas or 10 to 17 acres may be regarded as a fair-sized comfortable holding which would enable its tenant to live as well as a respectable shopkeeper. A pair of oxen will cultivate as much as 15 bighas or 5 acres of land; but so small a holding would not permit the cultivator to live according to the standard of a labourer with Rs. 8 or 16s a month. The usual practice in Malda is for several cultivators to group together; who have two or three ploughs in work at once, passing in turn from one holding to another. The condition of the cultivator is described as being on the whole good; and as a class they are not permanently in debt. The great majority of them are mere tenants at will; the proportion of those with occupancy rights being only about 15 per cent. and those not liable to enhancement of rent about 8 per cent. There is no class in the district of small

proprietors who own, occupy and cultivate their own hereditary lands, without either a landlord above them or a labourer of any sort below.

II. Imperial Gazetteer, 1881

Rice constitutes the staple crop throughout the district. Of the total food supply, it is estimated that the *aman* or winter crop, grown on low lands forms about 29 per cent. The following is a statement of percentage :

	per cent
Aman	29
Aus, *bhadoi* and autumn crop, grown on high land	16
Boro or spring crop, grown on marshes	8
The remainder, made up of cold weather food crops	39
Other food crops	7

These cold weather crops consist of pulses, and oilseeds of various sorts, wheat, maize, and inferior cereals, sown when the *aus* rice crop has been taken off the land. Among the miscellaneous crops are indigo, covering about 30,000 acres, chiefly on the sandy deposits near the Ganges; mulberry grown in little raised plots along the banks of the Mahananda; and the mango tree which here yields the most valued fruit in all Bengal.

The principle of the rotation of crops is not known, but fields are occasionally allowed to lie fallow. Spare land is still to be found in most parts of the district; but the limit of cultivation is steadily advancing, especially over the ruins of Gour.

Yield per acre

The average of produce of an acre of good rice land renting at 7s-6d is about 24 cwts. If a second crop can be raised from the same field it would amount to an additional 13 cwts. The total value is returned by the Collector as more than £6 (Rs. 60). But his estimate appears to be too high. The lowest rate of rent is 9d an acre paid for *aman* rice land; 7s-6d an acre is paid for land yielding three crops a year; while mulberry and mango gardens pay from 6s to 18s.

Among cultivating tenures the *halhasila* deserves notice, according to which the annual rent varies according to the amount of land put under cultivation and also according to the nature of the crop raised. This tenure is most common in the backward parts of the district, and one of its incidence is that it allows a certain portion of the tillage lands always to lie fallow.

III. 1903-04

Not available.

IV. District Gazetteer, 1918

The following is a statement of employment of land in 1918 :

	Acres
Normal cropped area	870,000
Winter rice (34 per cent. of normal cropped area)	290,000
Bhadoi rice (27 per cent. of normal cropped area)	234,000
Rabi crops (20 per cent. of normal cropped area)	174,000
Maize (3 per cent. of normal cropped area)	25,500
Wheat and barley	90,000
Gram	8,000
Other rabi crops	10,000
Mustard	60,000
Other oilseeds	20,000
Jute	30,000
Mulberry	23,000
Orchards	15,000
Tobacco	10,000

It cannot be said that the people are unduly conservative and there can be no doubt that they are good cultivators. Practically rotation of crops is practised in double crop lands which besides are annually re-fertilised by silt. It is true that complaints are heard of loss of fertility, but what evidence is available does not point to any general deterioration of the land. The diversity of crops is particularly due to the diversity of people who have reclaimed great parts of the district during the past half century: the Bihari, for example, is not used to jute, and dislikes working in deep water; the Santhal is not attracted towards the high land and the jungle and prefers maize cultivation; the man of the Diara is unable to live in the Barind and is attracted towards the Dubas and the Tal. The tendency, however, is for the new generation to sink its traditional prejudices and devote itself to the most profitable forms of cultivation. For example, maize cultivation extending in the Diara after it was found that the Santhals in the district were willing to trade winter rice against it. Capital is constantly flowing into mulberry and mango. Rice cultivation is extending in the Barind where the opening of the railway has given a value to land practically valueless a few years ago.

Cowdung manure is used for jute crops; for mulberry peat soil is also used. At one time also

bat quano was procurable in some quantities from the ruins of Gour; but with the restoration of the buildings the supply is negligible. Kalai is used as green manure. In the hot weather the stubbles and grass are commonly burnt in the north of the district. A good deal of valuable cattle manure is burnt for fuel, the supply of wood not being sufficient to satisfy the domestic demand as well as the requirements for reeling cocoons.

With the increased population and consequent demand for land holdings have become defined, but formerly large areas of waste land were cultivated irregularly on the system of *halhasli* tenure, by which a tenant paid rent only on the area which was found to be under cultivation by him in that particular year. Another form of rent payment by tenants, which was common in the west of the district, but is now extinct, was that known as *pauran*, by which the tenant bound himself to pay fixed quantities of produce independently of the outturn. (cf. the sanja system in Bankura and Midnapur districts.)

V. Settlement 1928-35

The following is a statement of land in Malda expressed in terms of percentages :

Percentage of area cultivated to total land area	73.3
Percentage of area culturable but not cultivated to total land area . . .	16.4
Percentage of area unculturable to total land area	10.3
Percentage of area cultivated to total culturable area	82.0

Cultivation has increased considerably during the last forty years owing to the influx of large number of Santhals and Muhammedans from the other side of the Ganges. Large uncultivated areas in the Tangan and Purnabhaba valleys and in the Tal area have been brought under cultivation. The figures show that there is still room for a further expansion of cultivation. Perhaps the two most noteworthy features are the rather high district figure for culturable but uncultivated land and the rather low percentage of cultivation in the Barind area—particularly in the case of thanas Habibpur and Old Malda. The fact that 16·4 per cent of the land area is capable of cultivation but lies fallow indicates that the pressure on land is still far below the level obtaining in southern and eastern Bengal. This is particularly so in the more sparsely inhabited areas where land quickly goes out of cultivation and becomes overgrown with high grass. In the Barind the great valleys of the Tangan and Purnabhaba rivers are primarily responsible for the percentage of the uncultivated area. Although cultivation has extended considerably, there are still wide tracts covered with coarse grass, hijal trees and wild rose bushes. On the other hand the area of unculturable land is comparatively small except in Ratua thana. Here the low-lying Tal area is constantly liable to inundations which leave behind water-logged stretches and deposits of weed. These cannot be classified as *beels*. They are rather shallow, saucer-shaped depressions which eventually dry up, but too late to allow of cultivation.

These general conclusions are corroborated by the detailed figures for fallow land of various classes. The principal Barind area, consisting of thanas Gajole, Habibpur, Old Malda and Bamangola, comrises about a third of the land area of the district, but contains rather more than half of both current fallow and old fallow. This is a large proportion, when it is considered that the area under homesteads, trees and bamboo is very much smaller there than in the rest of the district.

Malda is fortunate in the possession of a fairly large twice-cropped area. In this respect it presents a great contrast to the average paddy growing districts in South Bengal not only in its higher percentage, but in the great variety of crops grown. Thanas Harishchandrapur and Kharba in the north-west and Ratua and Manikchak on the western side of the district comprises by far the largest twice-cropped areas. Towards the centre of the district the percentage is less; and in the Barind it is comparatively very small. The total twice-cropped area is about 27 per cent of the net cropped area.

Paddy is the main crop of the district. Out of a total area under cultivation of 649,085 acres 375,622 is under paddy. Of the three varieties of paddy the largest area is under *aman*; a lesser but very considerable area is under *aus*; and a small area under *boro*. The distribution of *aus* paddy is very similar to that of the dofasli area, namely, in north-west and west of the district. In the north-west, thanas Harishchandrapur and Kharba each contain a fairly large acreage of *aus*, mainly towards the north. The southern portion of Harishchandrapur is lower in level and shelves into the Tal area; that of Kharba contains several large beels. Ratua thana has the largest areas of all. Here the higher lands along the west of the Mahananda and along the north and east of the Kalindri are very fertile, while in the Tal area owing to the annual floods during the monsoon, *aus* is grown much more widely than *aman*. In the west of the district thanas Manikchak and Kaliachak are large *aus*-producing areas, and in the centre, English Bazar. In the Barind little *aus* is grown as the soil is not suitable. The *aus*-growing area shown in Gajol, and Old Malda thanas consists mainly of the strips bor-

dering the Mahananda. Further east in the undulating country, there is practically none. In the rest of the district the most noteworthy feature is the extremely small acreage of *aman* in the central and western portions. In English Bazar thana the level of the land is rather high for the most part and not suited to the cultivation of winter rice. Moreover, rather more than a quarter of the cultivated area is under mango, orchard and mulberry. The eastern side of Kaliachak thana is also mainly devoted to mango and mulberry cultivation. As one goes further west into the Diara the danger of inundation from the Ganges increases, and the soil becomes lighter owing to the high proportion of sand. It is, therefore, better suited to *aus*, barley, wheat and *rabi* crops. This accounts for the very small acreage of winter rice. *Boro* paddy is grown throughout the district round the edges of *beels* as the water subsides. The highest figures are returned by Old Malda and Habibpur thanas where the net-work of *beels* left behind by the annual floods in the Tangan and Purnabhaba valleys provides favourable conditions.

In addition to paddy a large area is employed in the cultivation of various fodder crops. This is due primarily to the natural forces which make it impossible to grow winter rice in parts of the district; and secondly as might be expected the areas liable to inundation in the Tal and the west of the district and those which produce most *rabi* crops. Of these most widely grown is kalai, of which there are two main varieties : mashkalai and kurtikalai. Mustard is another spring crop which is generally grown all over the district, but principally in the Tal and the north-west of the district.

Barley is extensively grown in the same area that produces the major portion of the *rabi* crops, and wheat to a lesser extent.

Jute covers a comparatively small area, and is not a very successful crop. About two-thirds of the crop comes from Kharba and Harishchandrapur thanas. The remainder is cultivated rather sporadically down the western side of the district.

Yield per acre

The average yield of unhusked *aus* paddy may be taken at 12 maunds per acre. The average outturn of *aman* paddy is 18 maunds per acre, but the lowest levels locally known as Kandar is capable of producing 20 maunds. The slopes of the Kandar which are known as Ar Kandar produces on the average 14 to 15 maunds of *aman* paddy per acre. The average outturn of the Danga or high land in the Barind cannot be taken at more than 10 maunds of unhusked paddy per acre. The normal outturn of aman paddy, therefore, is 18 maunds per acre, but in the Barind it is difficult to give any accurate figure because the outturn varies considerably, as does the value of land according to the level.

Fertility of the soil

There is a general belief that the soil of the Barind is deteriorating. The origin of this belief is not, however, ascertainable and there is no apparent reason why this soil should deteriorate there more than elsewhere. It might be more correct to say that the outturn of paddy has decreased, but that is a very different proposition. Prosperity in the Barind depends primarily on a regular rainfall. Another reason to which the decreased outturn may be ascribed is the transference of lands in the hands of money-lenders and other non-agriculturists. So far as its effect upon agriculture is concerned it is evident that it is likely to lead to a decrease in production. Let us suppose that a tenant has three holdings. He falls into debts and mortgages one of them, which is eventually sold up. The Mahajan takes possession, and, according to the general custom, allows the tenant to continue on the land as an *adhiar*. The tenant bears all expenses of cultivation and receives half of the produce as his share. Obviously he is not going to take so much trouble over manuring and properly prepare his *adhi* land as he does over the other two holdings. It may be true that he will penalise himself by decreasing his own share of produce, but he has not the same interest in the *adhi* land. Consequently *adhi* cultivation is carried out either in a rather superficial manner, or in a hurry after the tenant has financed cultivation of his own lands. There is therefore ground for believing that the increase in the transference of occupancy rights to non-agriculturists proportionately decreases the output of the soil.

Mr. Addams-Williams considered that it would be a practicable proposition to develop an irrigation scheme for the Barind by using the Mahananda as the source of water supply, and running pipe-lines from centres located along the river bank. But any such scheme would be extremely expensive and for that reason there is no object in putting it forward at present as a practical suggestion.

Average land per agricultural family

The average area of *rayati* holdings works out at 2.30 acres. The table below gives the percentage of *raiyati* holdings of various areas :

Below 1 acre	44
1 to 2 acres	24
2 to 5 acres	22
5 to 10 acres	7
10 to 20 acres	2.40
20 to 50 acres	0.57
Above 50 acres	0.03

The following is a statement of land employment in the district :

Description	Area
Area sown—	
(a) Bhadoi	153,758
(b) Aghani	254,578
(c) Rabi	200,333
(d) Others, *e.g.*, mango, plantain, guavas, etc.	40,416
Total	649,085
Dofasli	131,659
Net area sown	517,426
Current fallow	21,370
Culturable area (including old fallow) other than current fallow	93,816
Area not available for cultivation	98,618
Total uncultivated area, including area not available for cultivation, culturable area other than current fallow, and current fallow	213,803
Total area of the district	731,229

The following is a statement of crops in the district:

Description	Area
Rice :	
(a) Aus	105,988
(b) Aman	253,763
(c) Boro	15,771
Wheat	9,486
Barley	23,328
Gram (pulses)	19,733
Other foodgrains including pulses	28,666
Oilseeds—	
(a) Linseed	4,895
(b) Til	2,088
(c) Rape and mustard	46,485
Sugarcane	642
Jute	18,986
Tobacco	3,638
Fodder crops including jowar and kalai	57,409
Fruits	28,117
Potato	1,190
Total area sown	649,085
Area sown more than once	131,659
Net area sown	517,426

VI. Ishaque Survey: 1944-45

The agricultural statistics of the district are as follows :

Description	Ishaque Survey	Settlement
Cultivated area	673,592	517,426
Culturable waste	79,878	93,816
Unculturable	122,532	98,618

The difference between the two sets of figures is obviously due to a different classification of culturable and unculturable during settlement and Ishaque Survey operations. It is, however, clear that the sum total of the two, as recorded in the District Settlement, has decreased considerably which clearly indicates the general tendency of bringing more waste lands under cultivation.

The following is a statement of areas under principal crops:

Description	Ishaque Survey	Settlement	Difference
Aman paddy	293,375	253,763	+39,612
Aus paddy	174,427	105,988	+68,439
Boro paddy	18,717	15,771	+2,946

The increase in paddy is due to increase in population and high prices of food crops. The cultivation of *rabi* crops is believed to have suffered due to the silting up of the upper reaches of the Mahananda river.

The following is a comparative statement of crops of the Ishaque Survey and District Settlement figures :

Description	Ishaque Survey	Settlement	Difference
Unculturable waste including water	122,532	98,618	+23,914
Culturable waste	79,878	93,815	−13,937
Cultivated—			
Aman paddy	293,375	253,763	+39,612
Total area of the district	875,992	731,229	+144,763

The following is a statement of density of population, per capita cropped and paddy areas in the district :

Total population in 1941	844,315
Total area of the district	731,229 acres
Density per square mile	607
Total cropped area (net cropped and dofasli)	649,085 acres
Per capita cropped area	0.77 acres
Total paddy area	486,519 acres
Per capita paddy area	0.58 acres

Approximate time of sowing and harvesting

Name of crops	Time of sowing	Time of harvesting
Aman	July-August	January-March
Rabi	January-March	April-May
Bhadoi	April-May	September-November

APPENDIX III

Glossary of the better known Ancient Monuments in the district of Malda

[*Reprint of Table No. 10·1 from the District Census Handbook of Malda, 1951 by A. Mitra, I.C.S.*]

GAUR

The city of Gaur lies along the English Bazar-Sibganj Road. It is easily accessible by car, as the road is metalled up to the 14th mile, and there are motorable roads leading to the various buildings. The whole city was originally surrounded by ramparts, which are said to have been covered with buildings. These have now disappeared and the ramparts remain overgrown with trees and jungle. On the eastern side of the city there is a double rampart of great thickness, flanked by a moat on the inside. The height of these ramparts is at least 30 feet in places and the breadth at the base 50 yards. Their object was evidently to serve as a protection against the river, rather than as a military fortification. In the Ain-i-Akbari they are referred to as dams. If the river flowed to the east of the city as is generally accepted, and later moved westwards to the present course of the Bhagirathi, there was a natural defence on both sides, and naval protection must have been just as important to the city as military. This theory is supported by the existence of a causeway built by Ghiyasuddin (now the alignment of the English Bazar-Rajmahal Road) which was probably constructed as a protection against the river. There is also and old embankment running east and west through the beel which lies a mile west of English-Bazar.

As one approaches Gaur from the north, one passes through the now non-existent Phulbari gate about three miles from English Bazar, and continues south as far as Piasbari dak bungalow. Here a road leads off to the west, and then turns south to Ramkeli, where the annual mela is held in commemoration of the visit of Chaitanya, the religous reformer, early in the 16th century.

A little further south, one comes to the Bara Sona Masjid also known as the Bara Dwari Masjid. This is the largest of the monuments of Gaur. It is a fine building of black basalt surmounted originally by forty four domes. A corridor over which eleven domes are still standing runs the whole length of the building and opens on to the courtyard through eleven pointed arches. On the other side of the courtyard is an entrance gate of the same stone with one archway. Above this arch and on either side of it are two stone slabs on which a lotus has been carved. This indicates that the basalt was obtained from Hindu buildings of an earlier period. The name, Sona Masjid or "golden mosque", is supposed to refer to the practice of gilding the domes. The alternative name Bara Dwari is not so easily explained. It was thought to mean the "mosque of twelve entrances" but as there are only eleven, this seems unlikely.

About half a mile further south is the Dakhal Darwaza which was the entrance gate to the citadel of Gaur. It stands in the great rampart, about a mile in length and half as wide on the average, which surrounds the area of the citadel. One enters the passage leading down its centre by a high elephant arch. On either side of the passage are guard rooms, the walls of which are nearly ten feet thick. The building is made of the small flat bricks, found generally in Gaur, and is ornamented on the outside with carvings.

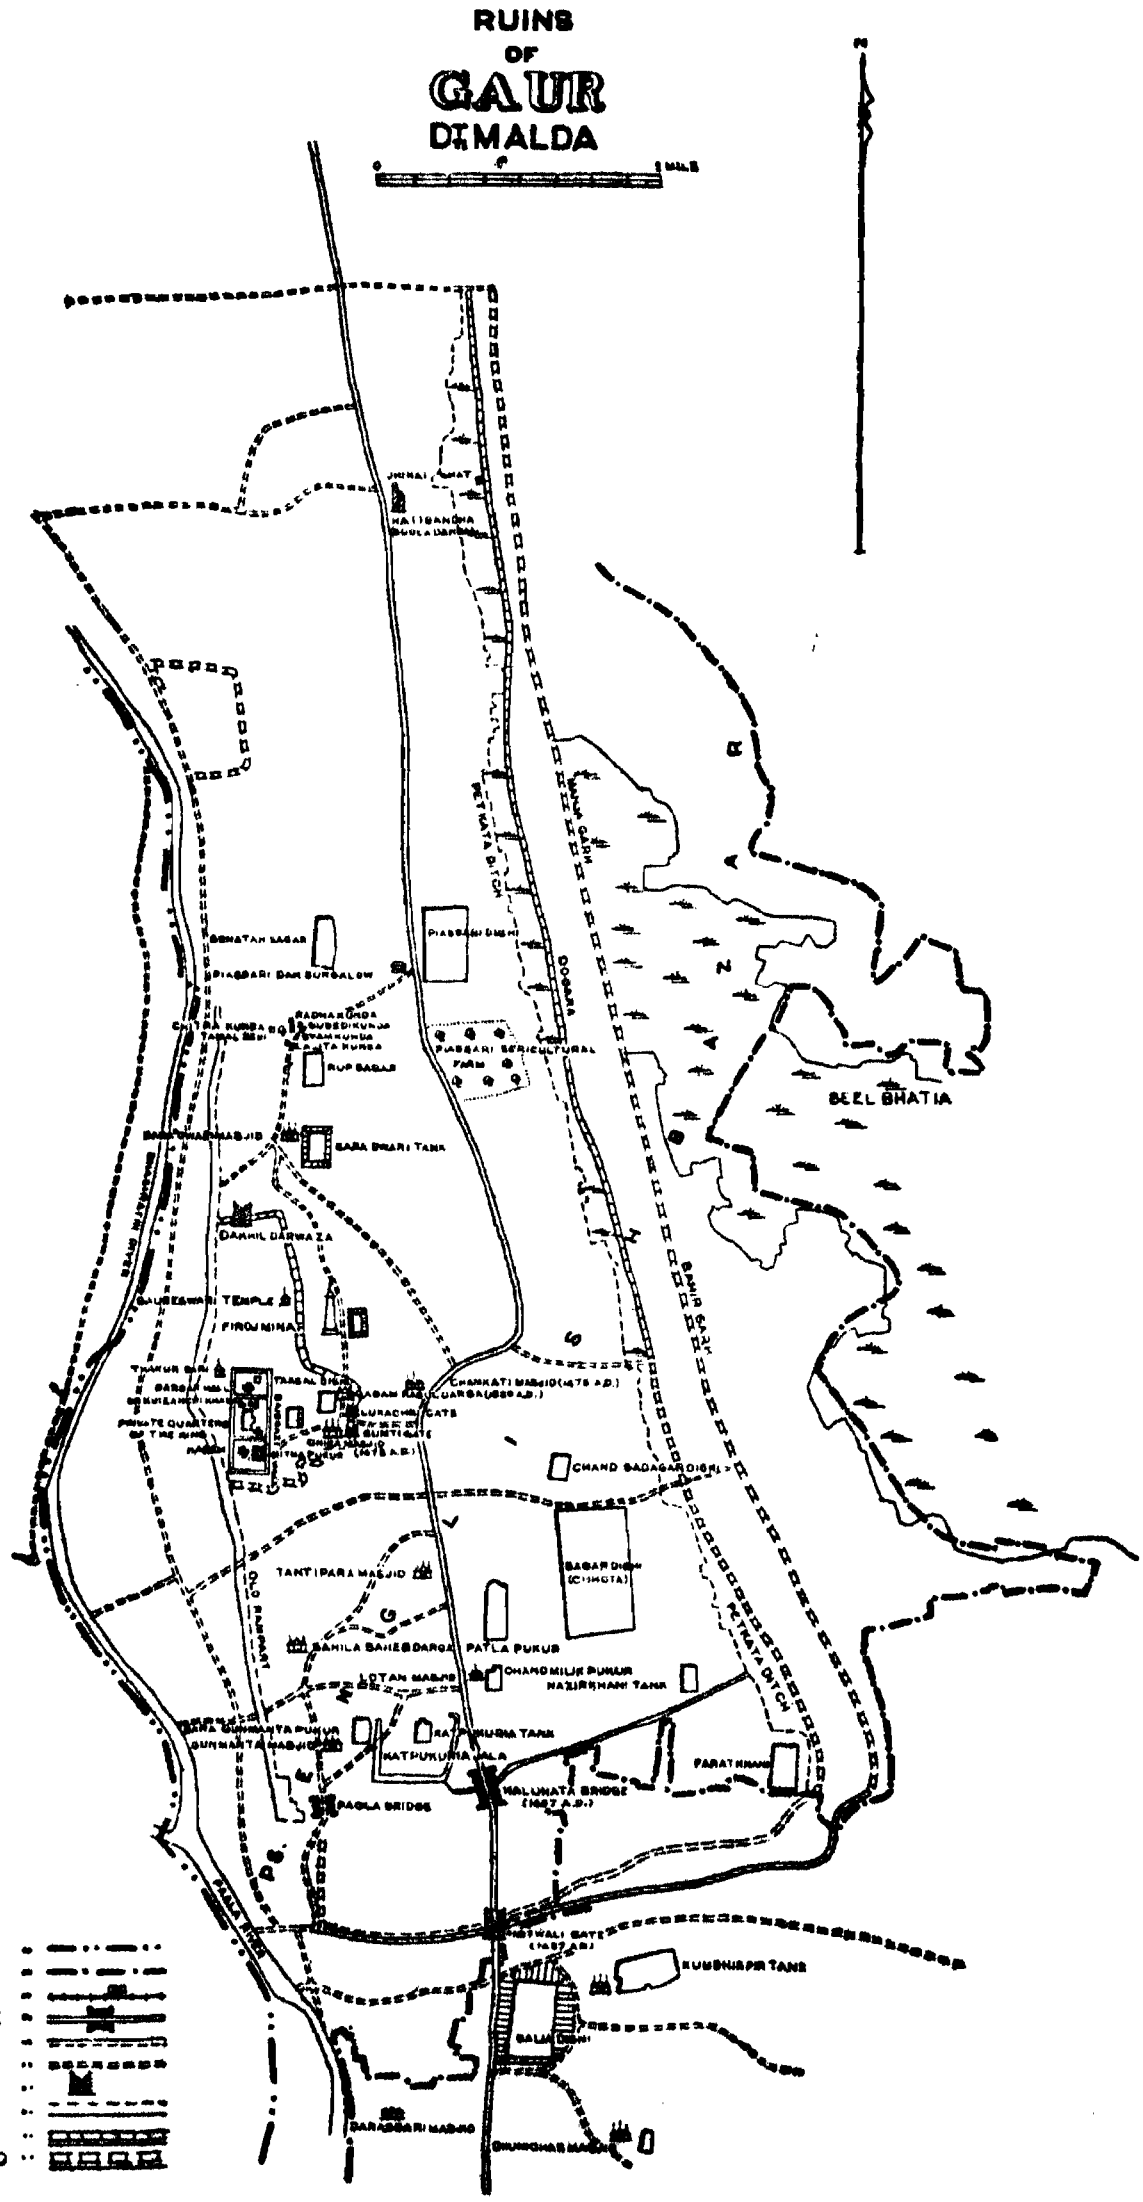

Half a mile further south one comes to the Firoz Minar, a tower built of brick 84 feet high and 64 in circumference with a spiral staircase leading up to a small room at the top. Originally it was surmounted by a dome. The tower is thought to have been erected by Saifuddin Firoz Shah, and to represent a piller of victory; but it is not clear what victory it commemorates.

Less than half a mile further south and near to the eastern entrance to the citadel is the Chamkati Masjid. This is a mosque of brickwork, surmounted by a single dome. There are still some enamelled bricks of different colours to be seen at the cornice. From the name of Chamkati, "skin cutter", it is surmised that the mosque was built by a sect of dervishes who used to gash themselves with knives.

Near to the Chamkati Mosque is the eastern gate into the citadel, called the Lukachuri gate. It is a fairly large building originally three storied, and surmounted with battlements with a single narrow entrance. The architectural style is very different to that of the other gates. The arches, instead of being pointed, are slightly rounded.

Just inside the gateway is the Qadam Rasul, or footprint of the prophet. The building is a single-domes mosque of brickwork, beautifully carved on the front. The two turrets at either side are an example of the best carving on brick to be seen in Gaur. Inside the building stands a pedestal of black marble, on which the foot-

RUINS OF GAUR DT. MALDA

print is placed when visitors arrive. The footprint consists of a rectangular piece of stone about two inches thick, rather like pumice stones in appearance, on which the outline of a footmark is clearly imprinted. It is said to have been brought to Gaur by Hussain Shah from the Chilla Khana of the saint Jalaluddin Tabrezi at Pandua. Later it was taken to Murshidabad in Sirajuddaula's time, but restored to Gaur by Mir Jafar. Close to the Qadam Rasul is a small mausoleum containing the tomb of Fatte Khan, son of Dilu Khan, who was an emissary of the Emperor Aurangzeb. Its sloping roof gives it the appearance of a cultivator's hut, and it looks rather incongruous beside the Qadam Rasul.

Not far from the Qadam Rasul is the Chika Masjid, a square brick building with a single dome. It is not known why it is called "Masjid" because there is no sign of any pulpit of prayer niche. The theory that it is a mausoleum is also improbable in view of the absence of any local tradition regarding the graves. It is more likely to have been a prison or something of the sort. Beside it there was originally a large building, which has now disappeared, leaving behind only the black basalt pillars. This is reported locally to have been some offices within the citadel. Its proximity to the Chika Masjid suggests that the latter may have been the jail, or perhaps a record room.

Just to the east of the Chika Masjid is the Gumti gate, a small single-domed building, which may have served as another entrance to the citadel or possibly as a guard room for the jailors. The corner pillars contain enamelled bricks of different colours. The building is now being used as a museum.

West of the Gumti and Lukachuri gates one comes to the royal palace. This was enclosed on the north, east and south by a high wall called the "Baisgazi" from the fact that it was 22 "Gaz" (the equivalent of 66 feet) in height. Its breadth is about 15 feet at the base and 9 at the top. On the west the palace was protected by a rampart. In this area there is the Khazanchi Khana or treasury house. In the centre there is a fair sized tank, known as the Taksal Dighi, or "tank of the mint."

Leaving the palace area and turning south along the main road, one comes to the Tantipara Masjid about half a mile further on. This must originally have been a very fine mosque, but the domes and part of the walls fell down during the earthquake of 1885. It is built of red brick, richly ornamented with carving, and has two octagonal towers at either end. The only remains inside are the black basalt pillars which divided the building into two aisles. The name implies that the mosque was situated in the weavers' quarter and has nothing to do with its origin. The inscription giving its date and the name of the king who built it, is thought to be the one which is now inside the Qadam Rasul.

A mile further south stands the Latan Masjid on the left of the main road. This is a single-domed mosque of brick in a good state of preservation. Originally it was covered with enamelled tiles in blue, white, green and yellow and of these considerable traces still remain. The meaning of the name has not been clearly established. It is supposed to be a corruption of the word "mosque of the dancing girl." One theory is that it was built by a dancing girl, who put the king's name in the inscription tablet (this sounds rather unlikely): another is that the glittering appearance suggested a dancing girl.

About a mile west of the Latan Masjid there are the remains of a large mosque called the Gunmant Masjid. Originally this must have been almost as large as the Bara Dwari Mosque, and like it had a corridor running the length of the building. The lower part is built of stone, and the remainder, from the arches upwards, was of brick. The brickwork has now almost entirely disappeared.

Continuing south by the main road from the Latan Masjid one crosses a five-arched bridge, dated 1457, and comes nearly half a mile further on to the Kotwali gate. This was the southern entrance to the city and stands in the great southern rampart. The archway over the road has now fallen in, but there is a photograph of it in Ravenshaw's "Gaur". It was 30 feet high and nearly 17 feet across.

Gaur is full of dighis and tanks of various sizes. Of those within the limits of the city, the largest is the Chota Sagar Dighi, which lies nearly half a mile north-east of the Latan Masjid. The dighi measures about 700 by 420 yards and lies north and south, as do the very great majority of tanks in Gaur, indicating that they are of Hindu origin. There is another large dighi, just behind the Piasbari dak bungalow, about a quarter of a mile in length, and 260 yards in breadth. But by far the largest of all is the great Sagar Dighi, which lies four miles by road from English Bazar just north of the Sadullapur Road. The actual measurements of this dighi excluding the banks are : Length 1,518 yards and breadth 748 yards, and 1,617 by 1,056 yards including the banks. The remains of six bathing ghats can still be traced—two on either side and one at each end. Tradition ascribes the excavation of this enormous dighi to Lakshman Sen, during the latter part of the 12th century.

Lakshman Sen, as has been mentioned, was driven out of Nabadwip at the beginning of the 13th century, and is thought to have fled to Gaur or its surroundings, and thence made his way by river to Eastern Bengal. The village of Bagbari or Ballalbari, which lies two miles west of English Bazar, just north of the Rajmahal Road, is connected with the name of Ballal Sen, who was Lakshman Sen's father. It is thought that this was originally the oldest part of Gaur, and the combined residence and fortress of the king. It is surrounded by ramparts, about 20 feet high and of enormous thickness. The inner rampart forms a rough four-sided figure rounded at the north, and based at the south on the Rajmahal Road. The length, north and south is one mile, and the breadth along the road, three quarters of a mile. Inside the enclosed area, there is a second rampart running north and south, and roughly dividing it in half. A ditch flanks this rampart on the western side, and another 25 feet in width, runs along the northern side of the road and round the outer rampart. It is thought that the eastern half of the enclosed area was the palace, and the western, the fortress. Still further north at Pichli on the southern bank of the Kalindri river, there are remains consisting of piles of bricks with bits of glazed pottery here and there. These remains are also connected with an early Hindu Monarchy. Buchanan Hamilton mentions the fact that there was then a local tradition (at the beginning of the 19th century) that Pichli was the residence of Adisur, the Hindu king who is said to have brought the Brahmins from Kanauj to Bengal. An important inscription, dated 1249 A.D., was found here by General Cunningham but subsequently disappeared. It was rediscovered by Mr. Stapleton and has now been placed in the care of Khan Bahadur Abdul Hayat Khan Chowdhury, Zamindar of Kotwali.

PANDUA

The evidence of an earlier Hindu dynasty is again found in the ruins of the city of Pandua, which lie about six miles north of Old Malda along the Dinajpur Road. The city was called Firozabad, during Muhammadan times, and had another name, Pirrua, which appears in Rennell's map. The latter is not historically correct, in view of the evidence now available. It is known from the coins struck during the reign of Raja Kans in the early 15th century that the name of the city was then Pandunagar. Buchanan Hamilton mentions the local tradition that the city was founded by a Raja of the Pandava family. This is confirmed by the existence of a small building described later on, which is still locally known as the Pandab Raja Dalan.

The most interesting discovery which was made during the settlement operations, was the existence of a rampart right round the city. This discovery would have been impossible without the help of air survey photographs. In places the rampart appears to be a shelving bank over grown with grass scrub and trees in places it has almost disappeared under cultivation and only a slight undulation remains. Its continuity; was obvious however from the air photograph, on which it stands out clearly. The rampart forms a rough square, rounded at the corners with a perimeter of about 18 miles.

Previously it had never been suspected that Pandua extended over such a large area. Buchanan Hamilton wrote : "Near the street, and amidst the heap of bricks, are many small tanks, and I am inclined to think that, in general, the town extended only a very little way, either east or west of the principal street." It is now evident that the city covered an area of about 25 square miles. The citadel must have been in the north-east corner of the enclosure at Damdama, which is a local name of mauza Purba Binodepur. The village immediately to the west (Barijpur or more properly Burjpur) must have been named during Muhammadan times, as Burj is a Perisan word meaning "fort." In this village the kanungo in charge found the remains of a "Shiv Lingam" in the ruins of an old Hindu temple. Almost all the tanks which are numerous and scattered over the whole area, lie north and south, indicating their Hindu origin.

The enclosure is roughly bisected by the Dinajpur Road, which enters the rampart at the south-western corner, and leaves it at a point in the centre of the northern rampart, where there are clear traces of an old gateway. This road evidently ran through the central part of the city, as is evident from the brick remains embedded in the earth on either side. A second road takes off from it, about half a mile south of the northern gate, and runs mainly north to Panchpara where it crosses the Gazole-Alal Road, and continues to Maina. At this point it passes into Dinajpur District, and goes on as far as Raiganj. This is undoubtedly a very old road. There are traces of metalling in places which must date to early times, as the road is not even under the control of the District Board. A third embanked road runs eastward from the gate in the centre of the eastern rampart. It is broken in places, but can be traced as far as Raniganj, five miles to the east, on the edge of the Tangan valley. Here it stops, but reappears on the opposite side of the valley, and runs eastwards along the boundary between Habibpur and Bamangola thanas. It again disappears in the Purnabhaba valley but continues on the other side in Dinajpur district. It is said to have been an old military road running to eastern Bengal. Between the Tangan and Purnabhaba valleys, it is very clearly

defined, and would be about 100 yards in width at its base. There are traces of brickwork here and there, which suggest that there may have been fortified points for garrisons along it.

In mauza Boglahagi, near Raniganj market, there are traces of what may have been a fort. It is surrounded by a deep ditch on three sides, the fourth side being protected by the Tangan river.

Another embankment, which may have been a road, runs westwards for three miles from the south-western corner of the rampart up to the Mahananda river. On the opposite side of the river there is no trace of it. At Raniganj there are the ruins of a Hindu temple to Kali. The whole Barind to the north and east is scattered with remains, of brick buildings, now largely buried, which testify to the extent of the city and its environs.

The city is entered from the south either from Old Malda by the bumpy and dusty Dinajpur Road; or by a metalled feeder road leading to the Dinajpur Road from Adina railway station. About half a mile along the latter road, one passes the rampart, which is not very conspicuous either at that point or at the point where the road from Old Malda passes it.

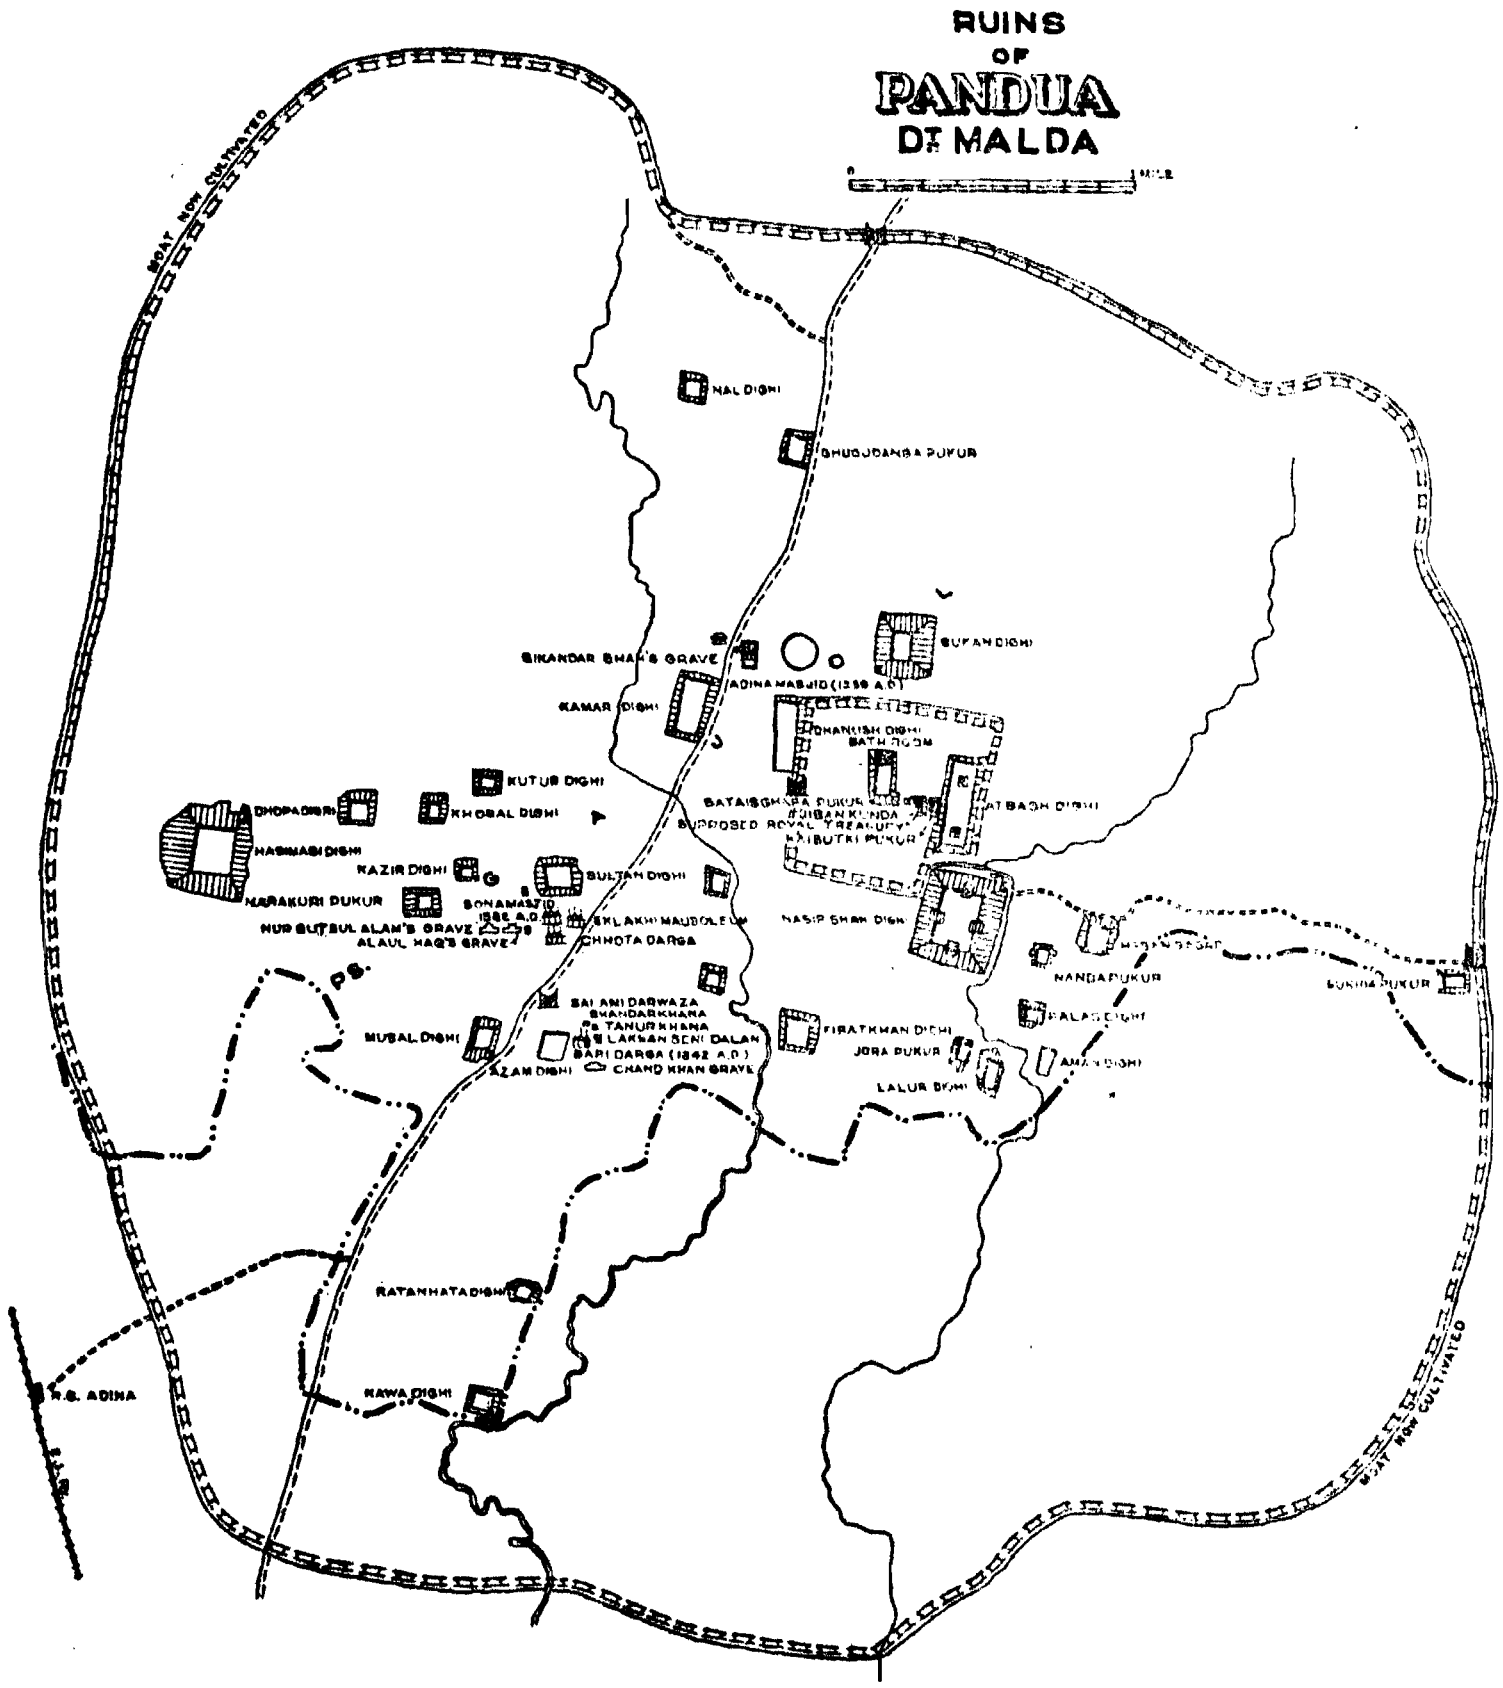

The first monument is the Bari Darga, which lies about two miles further on to the right of the road, and commemorates the famous saint, Hazrat Shah Jalal Tabrezi. He came from Tabriz, in Persia, and according to the historians spent a life of devotion in travelling over the eastern world. He is said to have come to Bengal from Delhi, but it is not known definitely where he died or where his tomb is situated. According to one account, it is at Sylhet; according to another, in the Maldive Islands. The supposed tomb at Pandua, and the shrine, are maintained from the income of the Bais Hazari Wakf Estate. The estate is supposed by tradition to have been acquired by Shah Jalal himself. It is now under the management of a matwalli and a committee, who allot the expenditure for the Urs, or anniversary of the saint, the illuminations, repairs to buildings, and educational grants.

One approaches the shrine and other buildings by a path leading off the main road. At the junction with the main road there is a gateway called the Salami Darwaza. The principal building is the Jame Masjid, which is reported to have been built in 1342 A.D. by Alauddin Ali Shah over the spot where the saint used to sit in meditation. In front of the mosque are two carved pillars, which appear to be of Hindu origin; and at the northern end of the passage facing the mosque, is a stone-latticed window ornamented with the most exquisite carving. To the west of the mosque is a tank called Azima Dighi, on the north bank of which is a building, named Lakhan Seni Dalan. To the east are the Bhandar Khana, or store house, and the Tanoor Khana or cook house. The former, which includes an Astana or place of meditation, was built by Chand Khan, whose tomb is situated to the south-east of the mosque. About a quarter of a mile further on, at the opposite side of the road, is the Chhota-Darga, which commemorates two saints,—Alaul Huq, and his son Nur Kutbul Alam. The tomb of the latter is covered with a canopy of cloth supported by four pillars. To the west of the tomb is the Saints Chilla Khana, and close to it the kitchen. Immediately to the north of Abaul Huq's tomb is three-domed mosque. There are several other tombs and smaller buildings close by, all standing at the back of a tank which fronts the main road. The shrines of these two saints are endowed from the income of the Shah Hazari Estate, another revenue-free property similar to the Bais Hazari Estate. A little further to the left hand side of the road, is the guest room which now houses the post office. Out side it are two large copper drums.

Just beyond the guest room, and also on the west side of the road, stands the Kutub Shahi Masjid, also known as the golden mosque. This is a later building than most of the other monuments at Pandua, the date ascribed being 1582. It is built of stone and brick, with a turret at each corner, and fronted by five pointed arches. The roof has fallen in, but the walls and pulpit are in good condition.

Close to the Kutub Shahi Mosque is the building called the Eklakhi mausoleum. This is an almost square building, built of brick, with walls of enormous thickness. It is surmounted by a single dome, the inner diameter of which is over 48 feet. The walls are ornamented with carving, but the brick-work is crumbling in places. It is noticeable that on the stone over the doorway is a carving of a Hindu diety, and on the other stones round the doorways are traces of figures. The materials from which the mausoleum were built were thus evidently taken from Hindu buildings. Inside the mausoleum are three tombs said to be those of Jalaluddin (the son of Raja Kans who was converted to Islam), his wife and son.

About one mile beyond, and nearly opposite to the dak bungalow, stands the great Adina Mosque, the largest and finest of all the buildings either at Gaur or Pandua. Its dimensions are: length north to south, 507½ feet; breadth, east to west, 285½ feet. It is built partly of brick and partly of stone. It is surrounded by an outer wall of stone below and brick above which, on the western side, is elaborately carved. It is of

uniform height, except at the point opposite the nave on the western side, where it rises to a greater height. There are two entrances, one at the south-east corner, the other in the centre of the western wall. Within the outer wall, there was originally a row of cloisters surmounted by domes running round the four sides of the mosque, and divided by columns into aisles. On the north, east and south the cloisters were divided into three aisles; and on the western side there were five aisles, running up as far as the nave in the centre. Altogether there were 306 domes. The cloisters have now almost entirely fallen in, and their position is marked only by the base of basalt columns supported them.

The prayer niche and pulpit, which stand at the western end of the nave are made of black basalt and are noteworthy for their fine workmanship. A little to the north, along the western wall, is a raised platform called the Badshah-ka-Takht, on which it is thought that the ladies of the royal family attended prayers. It is supported by large columns of black basalt, and was originally constructed of the same material, though now-a-days the stone slabs have been removed and there is only a wooden platform. The three prayer niches on the west wall are remarkable for the exquisite carvings of inscriptions and designs. The domes over the Badshah-ka-Takht are still in existence.

Opposite the Badshah-ka-Takht, and on the outer side of the western wall, is a chamber, known as Sikandar Shah's chamber, which was probably added after the outer wall had been constructed. It is said that Sikandar Shah was buried in this chamber, and that when the domes, which had fallen in, were being removed, the tomb was also removed.

The mosque was built between 1364 and 1374, the inscription of Sikandar Shah being dated 1369. There is the same evidence in this mosque that the materials were taken from Hindu buildings. In the steps of the pulpit there is the head of a lion, and there are traces of Hindu idols in various prayer niches. There are two large carved lotus flowers in the western wall of the nave and other lotus flowers in Sikandar Shah's chamber. High up on the western wall there is a lingam and outside the eastern wall there is the carved figure of a gargoyle which looks like a cross between a crocodile and an elephant.

The other remains of interest at Pandua lie within the palace area, which is situated a short distance to the south-east of the Adina Mosque. It is enclosed by an embankment, which forms an almost exact square. One enters by the centre of the western rampart. Just to the north of this point is a tank called Dhanush Dighi, about a quarter of a mile in length, and 120 yards in breadth, which is now overgrown with reeds and grass. At the entrance stands a brick tower in a rather broken condition. From its situation, at one side of the entrance, it appears that there was probably a simialr tower on the opposite side, forming a complete gateway.

The first tank inside the palace area is the Sataisghara Dighi, a north by south tank of Hindu origin which measures 220 by 117 yards and lies to the east of the entrance gateway. Buchanan Hamilton refers to it as the Satasghar, or "sixty towers," but according to the local evidence the name is certainly Sataisghara, which may mean that there were twenty-seven rooms. The name refers to the buildings, now largely overgrown with earth, which run along the northern bank of the tank. These were evidently the royal baths. At the north-west corner there is an arched room surrounded by smaller rooms, and in its wall clear traces of water pipes are visible. The baths were built into the slope of the tank, and were flanked by a gallery running along the water's edge. Possibly they are the baths referred to in the Riyaz, where it is recorded: "It is said that at that time (the accession of Firoz Shah at Delhi) Sultan Shamsuddin built a bath, similar to the Shamsi bath of Delhi. Sultan Firoz Shah who was furious with anger against Shamsuddin, in the year 754 A.H. set out for Lakhnauti and after forced marches reached close to the city of Panduah which was then the metropolis of Bengal."

A short distance to the south-east of the Sataisghara tank is the building, previously referred to, called the Pandap Raja Dalan. This, in spite of the old historical association of the name, is apparently of more recent construction than any other of the buildings in the palace area. It is built of brick, now cracking and crumbling in places owing to the trees growing on it, and was evidently a Turkish bath, like the buildings along the Sataisghara tank. Towards the south-eastern corner is a round circular well, which is locally known as the "Jiban Kund" or well of life. Its waters were supposed to have the power of restoring the dead to life. Possibly the name refers to their healing qualities and the royal family went there to "take the waters." The well is now filled up with bricks and other debris, but people say that it was full of water until the earthquake of 1897. Close beside the Pandap Raja Dalan, there is a small pond, in which according to local evidence, a masonry building originally stood. Possibly it may have been a pavilion, similar to that mentioned below, though the pond is quite a small one.

Further to the east, there is a large tank, lying north by south, about 500 yards long and 175 yards broad. This is known as the "At-Bagh"

tank, though it may also be the "Rahat Bank" tank. The oldest inhabitant, who generally turns out to air his views to visitors, mentioned that Rahat Bank was the name of the small pond close to the Pandap Raja Dalan. In either case the meaning of the word "reposeful curve" would apply to the strip of water round the pavilions which are said to have stood in these tanks. In the map of Pandua, two islands have been shown in the At-Bagh Dighi. This is in accordance with local traditions, but actually only the northern island is now visible. It consists of a pile of bricks connected by an earthen ridge to the remains of a brick ghat on the western bank. The islands in the At-Bagh tank are said to have been connected by a subterranean passage just to the west of the ghat mentioned above, to a small tank locally known as the Koibutki pukur.

At the south-eastern corner of the palace area, there is a very fine tank called the Nasir Shah Dighi. It measures 374 by 278 yards and lies north by south, a fact which suggests that Nasir Shah may have re-excavated an existing tank. It is in very good condition without any trace of reed or grass, and the water is perfectly clear. It used to be full of crocodiles. There is some doubt whether it was excavated by Nasiruddin Mahamud (1442-1459) or Nasiruddin Nasarat Shah (1519-1532). On general considerations the former may be the more probable, as the capital had shifted to Gaur before the 16th century.

The largest tank of all in the Pandua area, though now silted up as its name implies, is the Sukan Dighi, which lies a short distance to the north of the palace area in Barijpur mauza. This is obviously a very old tank, and its presence near to the village known as Damdama (the modern Purba Binodepur) suggests that the old Hindu citadel lay in this direction. It lies north and south, and measures 625 by 275 yards.

OLD MALDA

There are several buildings of interest at Old Malda, though they are, generally speaking of a later date than those at Gaur or Pandua. The oldest is known as the Phuti Masjid or cracked mosque, a local name probably given after an earthquake. The date ascribed to it is 1495. The central dome and one of the verandah domes have fallen in and the building is in a very dilapidated condition.

The Juma Masjid is a larger building. It is comparatively modern in appearance and is well preserved. The centre is roofed by a vaulted arch and each side by a round dome. The style of architecture is different to that of the older mosques. There is not much external ornamentation, but there are well-designed carvings on the stone pillars. The date ascribed to the building is 1596.

Just to the north of Old Malda Post Office stands the Katra or rest house, where travellers with their merchandise are supposed to have been accommodated. It is an immense structure of brick but has now fallen into complete ruin. The two gates at the north and south are still standing, but the rooms on either side of the road have almost completely disappeared.

About a hundred yards south of the Katra one comes to the river. Here there is a bathing ghat built of brick and stone which is in good state of preservation, although it is very old. It is 184 feet long and 59 feet wide.

On the opposite side of the river, at the confluence of the Kalindri with the Mahananda stands a minar known as the Nimasarai tower. The name Nimasarai, which has now been attached to the railway station near Old Malda, is derived from the Persian word nim, meaning half, and sarai a tavern. Nimasarai was therefore the halfway tavern between Gaur and Pandua. The tower as it now stands is about 55 feet high, but the top storey has fallen down. It is a round tower built of brick, with numerous stone pillars projecting from its surface. Its origin, and the reason for its construction, are not definitely known. From its similarity to other towers, it is considered to belong to the time of Akbar; and it has been conjectured that its object was to serve as a watch tower, from which signals by fire or other means could be transmitted between Gaur and Pandua. The objection to this theory is, that if the date be correct, Pandua had ceased to be the capital for nearly a century and a half, and Gaur had recently been abandoned in favour of Tanda. There would therefore appear to be no object in constructing a watch tower at that period. The local tradition is that the tower was constructed by a merchant.

DEOTOLA

The village of Deotola lies on the Dinajpur Road, one and a half miles from the northern boundary of the district. Here there is a fine shrine to the saint Shah Jalal Tabrezi, whose main shrine at Pandua has already been described. It is situated just to the west of the road, and is under the care of the Bais Hazari Wakf Estate, to whose property the village belongs. The walls are decorated with excellent ornamental work. The date of the actual shrine is not known, but from the inscriptions which are found on the walls, it may belong to the late 16th century. The first of these is fixed on the gateway at the entrance to the courtyard. It

is dated 1464, and records the construction of a mosque during the reign of Barbuk Shah "in the village of Tabrizabad." The second is dated 1571, and records the building of a mosque by Sulaiman Kararani in "the blessed village of Tabrizabad knwon at Deotola." The third, which is in the main wall of the Chilla Khana is dated 1527 and records the erection of a mosque in 1527 in "the territory of Shaikh Jalal Mahammad Tabrizi."

There is a smaller shrine to Jalal Tabrizi in mauza Methrani. It is also under the control of the Bais Hazari Estate, which maintains a Khadem to perform the necessary religious ceremonies. It is said to have been built about the same time as the shrine at Deotola. Local tradition has it that whenever this influential and widely travelled saint visited his estates, the virit was commemorated by the erection of an asthana or shrine.

PART II

A. CENSUS TABLES
AND
B. OFFICIAL STATISTICS

A. CENSUS TABLES

Explanatory Notes

This part contains 44 tables presenting the 1961 Census data for the district. Most of the tables present materials for each police station and some tables present data for each town. The figures for the district as a whole have been given first followed by the figures for a subdivision and the police stations under a subdivision. The police stations in a subdivision have been arranged according to the location code number assigned to a police station for the purpose of the 1961 Census.

The tables presented in this part do not however cover the whole range of census statistics partaining to the district. The tables on migration and certain other topics have not been included in this volume for want of space. Those will be found in the West Bengal Census Table Volumes.

The following paragraphs will give a brief account of the tables included in this volume. A detailed note on each of the tables has been given in respective census publications containing 1961 Census Tables. Definitions adopted for certain terms often used in census parlance have been given in Appendix I to this note.

A—Series

General Population Tables

There are, in all, four General Population Tables and three Appendices in this series. But only two tables *i.e.*, A-I and A-III have been selected for presentation in the District Census Handbook.

Table A-I

This table presents area, density, number of villages inhabited and uninhabited separately, number of towns, occupied residential house and total population with sex break-up. These data have been shown down to police station and each town separately under each police station having such town.

The Director of Land Records and Surveys, West Bengal was unable to furnish the revised area figures of the territorial units for the 1961 Census. In absence of the figures furnished the State Survey Department, area figures for different territorial units had to be computed for the purpose of Census from the various available sources. Area figures mostly were taken from the last published Jurisdiction List for the *mauzas*.

The area of a town administered by the Municipal Commissioners was obtained from the civic authority concerned. For non-municipal towns, the area figures were obtained by adding up the area figures of the constituent *mauzas*. The density figures in the Table A-I have been calculated on the computed area figures.

Occupied Residential House meant the occupied Census-house. All Census-houses used wholly or partly as dwellings including a parlour or sitting room, a kitchen, which were located in structures auxiliary to the main house were counted as occupied Census-houses, but cowsheds, grain-gollas etc., though auxiliary to the main house, were excluded.

Table A-III

This table gives an account of the distribution of inhabited villages for the district and each police station in accordance with the size of population which has been broadly classified by seven groups *i.e.*, less than 200, 200-499, 500-999, 1,000-1,999, 2,000-4,999, 5,000-9,999 and 10,000 and above.

B—Series

(*i*) *General Economic Tables*

The B-Series tables show the distribution of population by economic activity co-related with sex, age and educational level. The classification by economic activity has been made first by workers and non-workers and then the workers have been further classified into nine broad Industrial Categories.

In the 1941 and earlier Censuses, religion was adopted as the basis on which primary sorting and tabulations were done. The population classified by religion and sex, thus obtained, was given in the village statistics. In the 1951 Census Economic Classification substituted the classification based on religion. For this purpose population was divided into eight Livelihood Classes and in each livelihood class the self-supporting persons and their dependents were included. At the 1961 Census the concept of dependency was abandoned for Economic Classification of population and the concept of work was adopted.

The workers in the nine Industrial Categories shown in the Primary Census Abstract conform to the industry divisions as given in the Standard Industrial Classification as follows ;

Category	Industry Division
I Caltivator II Agricultural Labourer	Minor Groups 000,001,002, 003 and 004 from Division 0
III In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities	Division 0 except Minor Groups 000 to 004 and Division 1 (unless carried on in household level)
IV At Household Industry	Division 0 except Minor Groups 000 to 004, Divisions, 1, 2 and 3 (it carried on in household level)
V In Manufacturing other than Household Industry	Division 2 and 3 (unless carried on in household level)
VI In Construction	Division 4
VII In Trade & Commerce	Division 6
VIII In Transport, Storage and Communications	Division 7
IX In Other Services	Divisions 5, 8 and 9

Definitions of Workers and Non-workers have been given in Appendix I.

Tables B-I and B-II

Table B-I is the basic economic table of 1961 Census. It shows the distribution of persons into nine broad Industrial Categories of workers and non-workers, with sex break-up under each category. This table also shows the distribution of the population into four broad age-groups under each category. The data have been presented for the district and each police station with rural-urban break-up. Table B-II which shows similar figures for the towns has been combined with Table B-I and entries for each town have been shown under the police station where it is situated.

Table B-III

This table has been prepared in two parts *i.e.*, B-III Part A and B-III Part B, of which the former relates to urban areas and the latter to rural areas. In both the parts each of the nine categories of workers and non-workers have been cross-tabulated by literacy and educational levels with sex break-up. The figures have been presented down to police station and town.

Table B-IV

This table shows the distribution of workers engaged in household industry and non-household industry, trade, business, profession or service by sex, industrial divisions, major groups (Appendix II) and by status of employment *i.e.*, "Employer", "Employee", "Single Worker" and "Family Worker" (Appendix I). In the case of workers engaged in household industry the status of their employment has been classified into two *i.e.*, "Employee" and "Others".

The figures have been presented for the working population except cultivators and agricultural labourers of rural and urban areas separately down to police station.

Table B-V

This table gives the Occupational Classification (Appendix IV to this note) of persons who are working in non-agricultural sector. In this table data have been shown for rural and urban working population engaged in non-agricultural sector separately with sex break-up, by occupational group. The figures have been presented down to police station.

Table B-VI

This table presents the distribution of workers except those engaged in agricultural sector into occupational division and further they have been classified by four broad age-groups and age not stated, and by educational levels. This table shows the figures of urban areas only for the district as a whole.

Table B-VII Part A

This table presents workers engaged as cultivators, agricultural labourers and at household industry classified by the nature of their secondary work as cultivators, agricultural labourers and at household industry by sex. The figures have been shown for rural and urban working population separately down to police station. Figures have been presented by major groups of industries in the case of the district and in the case of police stations figures have been shown only against the divisions of the Standard Industrial Classification.

Table B-VII Part B

This table furnishes the distribution of workers engaged principally in non-agricultural and non-household industry in accordance with their secondary work at household industry only. These workers have further been classified by sex, industrial divisions and major groups. These figures have been presented down to police station.

Table B-VIII Part A

This table accounts for the distribution of unemployed persons of age 15 and above who are seeking employment for the first time and who were employed before but now out of employment by broad age-groups. They have further been classified by sex and educational levels. This part relates to only the urban population and has been shown for the total urban population of the district as a whole.

Table B-VIII Part B

This part of the table contains the same material as that contained in Part A. The difference is that this part shows the figures for the rural population only down to police station. Further

classification of the educational levels beyond matriculation has not been shown for the rural unemployed persons and the classification by age groups has also not been done.

Table B-IX

This table shows the distribution of all the non-working population by broad age-groups as in Table B-I. They have further been classified by sex and eight different types of activity of non-workers (for defination of different types of activity see the Appendix I). The figures have separately been shown for rural and urban population and down to police station.

(*ii*) *Household Economic Tables*

Tables B-X to B-XVIII account for the economic activity of a household as unit. The related figures have been compiled and tabulated from the data extracted from the entires of the Household Schedules on the basis of 20 per cent sample. These tables have been prepared in the Mechanical Tabulation Unit of the office of the Registrar General of India, New Delhi. The figures of different tables relate to the number of households engaged in cultivation or household industry or both, size of land or interest in land cultivated and/or the household industry conducted by the household and the number of family workers and/or hired workers engaged in either of the two activites separately or together.

C—Series

Social and Cultural Tables

Table C-I

This table gives the composition of the members in a household. Sample Households have been classified by size, composition by family and non-family members, and by economic activity. The households engaged in cultivation have been further classified by size of land holding. This table is of sociological interest indicating, as it does, the strength of the joint family system. The material of this table has been collected from the Household Schedules on the basis of 20 per cent Sample and the table has been prepared in the Mechanical Tabulation Unit of the office of the Registrar General of India, New Delhi. The figures have been presented for total, rural and urban households for the district only.

Table C-II

This is a very important demographic table. This table gives an account of distribution of rural and urban population separately by sex, age-groups and marital status. The entire population in 0-9 years age-group has been treated as never married and as such no other classifications have been shown against them. This table will give the readers an idea about the trend of variations in the proportions in the various marital status conditions over the last ten years. The figures have been presented down to police station.

Table C-III Part A

This part of the Table C-III relates to the total population of both the rural and urban areas. This table shows the distribution of the population by sex, age-groups and educational levels. The figures have been presented down to district only.

Tables C-III Part B and Part C

These two parts contain the same data as contained in Part A. Only difference is this that Part B deals with the urban population, while Part C deals with rural population. Again in regard to educational levels more detailed educational classifications have been adopted in the case of urban area than those in rural area. In Part B figures have been presented for the total urban population of the district as a whole. Part C represents the population down to police station.

Table C-V

This table presents the distribution of population by sex and mother-tongues. There are as many as 48 mother-tongues spoken in this district. The figures have been shown for rural and urban areas separately down to police station.

Table C-VII

This table shows the distribution of population for rural and urban areas separately by sex and religions. The population has been classified into 6 main religions arranged alphabetically and the population belonging to other religions have been shown together under "Other Religions". There is another classification which describes "Religion not stated". The figures have been presented down to police station.

Table C-VIII Part A

This table presents the distribution of the scheduled caste population by sex, industrial categories of workers and non-workers and by literacy. The figures for the rural and urban scheduled caste population have been shown separately down to police station. This table is considered important from the view point of the classification of scheduled caste population into various economic activities.

Table C-VIII Part B

This table contains the same distribution and presentation of data as in C-VIII Part A. This part relates to only scheduled tribes.

SCT—Series

Special Tables for Scheduled Castes and Tribes

Table SCT-I Part A

This table gives an account of the distribution of the scheduled caste population by sex and industrial categories of workers and non-workers. The entire scheduled caste population belong to as many as 48 castes arranged alphabetically. Persons who returned themselves as belonging to scheduled castes without specifying the names of the castes have been shown under "Unclassifiable". There is another interesting classification of special occupations *i.e.*, "Tanning and currying of hides and skins" and "Scavenging". The figures have been presented for rural and urban areas separately down to police station.

Table SCT-I Part B

This table contains the same distribution and presentation as in Part A. This table relates to scheduled tribes which are as many as 12 in numbers in this district and arranged alphabetically. There is no column for the special occupations in this part.

Both these parts are interesting as they give detailed information about individual castes and tribes.

Tables SCT-III Part A(i) to Part B(ii)

These tables show the distribution of the scheduled caste or scheduled tribe population by name of caste or tribe, sex and educational levels for rural and urban areas separately down to district only.

Tables SCT-V Part A & Part B

These tables show the distribution of the households belonging to scheduled castes and tribes engaged in cultivation showing their interest in land and size of land. The figures have been collected from the household schedule on the basis of 20 per cent sample. These tables have also been prepared in the Mechanical Tabulation Unit of the office of the Registrar General of India, New Delhi. The figures have been presented for rural areas only for the district level. Part A of the table relates to the scheduled castes and Part B to the scheduled tribes.

Table SC-I

This table shows the distribution of the scheduled caste population by sex, by 3 main types of activities non-working and educational levels. Other types of activity have been clubbed together and shown under "Others". The figures have been presented for rural and urban areas separately only for the district.

Table ST-I

This table gives an account of the distribution of the scheduled tribe population by name of tribe, mother-tongue, bilingualism and by sex. The figures have been presented only for the district.

Table ST-II

This table corresponds to SC-I in respect of the manner of distribution and presentation except in that distribution by educational levels has not been shown. It relates to scheduled tribes.

Industrial Establishments

This table accounts for the distribution of different industrial establishments returned in the Housing Census of October, 1960 as carried on in Census house(s) by villages and towns under each police station separately. The nature of industry has been indicated by the minor groups of the Standard Industrial Classification (Appendix II). Number of such industrial establishments has been put within brackets against each minor group. The data have been collected from the Houselists prepared during the house-numbering operation.

APPENDIX I

Definitions

Census House: A census house is a structure or part of a structure inhabited or vacant, or a dwelling, a shop, a shop-*cum*-dwelling or a place or business workshop, school, etc., with a separate entrance.

If a building has a number of flats or blocks which have separate entrances of their own and are independent of each other giving on the road or a common staircase or a common courtyard leading to a main gate, they will be considered as separate census houses. If within an enclosed or open compound there are separate buildings then each such building will also be a separate census house. If all the structures within an enclosed compound are together treated as one building then each structure with a separate entrance should be treated as a separate census house.

Census Household: A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so.

Literacy : A person who can neither read nor write or can merely read but cannot write in any language was treated as illiterate. A literate is a person who can both read and write with understanding. The test for reading is ability to read any simple letter either in print or in manuscript with felicity. The test for writing is ability to write a simple letter.

If the person can both read and write and has also passed a written examination or examinations as proof of an educational standard attained the highest examination passed to denote the educational level attained by him was recorded.

Mother-tongue: Mother-tongue is language spoken in childhood by the person's mother to the person or mainly spoken in the household. If the mother died in infancy the language mostly spoken in the person's home in childhood was taken as mother-tongue. In the case of infants and deaf mutes the language usually spoken by the mother was written.

Worker : The basis of work will be satisfied in the case of seasonal work like cultivation, livestock, dairying, household industry, etc., if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce the basis of work will be satisfied if the person was employed during any of the fifteen days preceding the day on which the household was visited for enumeration. Persons temporarily incapacitated from work at the time of Census enumeration due to illness or other causes are also treated as Workers. An under-trail prisoner in prison during the Census enumeration is also treated as worker if he did some productive work before he was apprehended. Convicts in a prison or long term inmates of hospitals or mental institutions, are not however treated as Workers. Work includes not only actual work but effective supervision and direction of work. Persons under training as apprentices with or without stipend or wages will be regarded as working. An adult woman who is engaged in household duties but doing no other productive work to augment the family's resources should not be considered as working. Persons like beggars, pensioners, agricultural or non-agricultural, royalty, rent or dividend receivers, who may be earning an income but who are not participating in any productive work should not be treated as working. A public or social service worker who is actively engaged in public service activity or a political worker who is also actively engaged in furthering the political activity of his party will be regarded as a worker.

Status of Employment: (*i*) An *Employer* is a person who has to employ other persons in order to perform the work. That is to say, such a person is not only responsible for his own personal work but also for giving work to others in the business. But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others, is not an employer, even if he has the power to employ another person in his office on behalf of his own employer or employers.

(*ii*) An *Employee* is a person who usually works under some other person for salary or wages in cash or kind. There may be persons who are employed as managers, superintendents, agents, etc., and in that capacity employ or control other workers on behalf of their own employers. Such persons are only employees, as explained above, and should not be regarded as employers.

(*iii*) A *Single Worker* is a person who works by himself but not as Head of household in a Household Industry. He is not employed by any one else and in his turn does not employ anybody else not even members of his household except casually. This definition of a *Single Worker* will include a persons who works in joint partnership with one or several persons hiring no employees, and also a member of a producers' co-operative. Each one of the partners or members of such producers' Cooperative should be recorded as "Single Worker".

(*iv*) A *Family Worker* is a member who works, without receiving wages in cash or kind, in an industry, business, or trade conducted mainly by members of the family and ordinarily does at least one hour of work every day during the working season. Such an industry should be on a scale larger than what has been covered in 'Household Industry' whether run at home or away from home in town or village and even away from village in rural area and should ordinarily be in the nature of a recognised partnership, joint stock company or registered factory. For the purpose of this definition members of a family may be drawn from beyond the limits of the household by ties of blood or marriage. The family worker may not be entitled to a share of the profits in the work of the business carried on either by the person or head of the household or other relative.

Members of the household who help solely in household duties should not be treated as family workers.

Household Industry: A Household Industry is defined as an industry conducted by the Head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be run on the scale of a registered factory. Thus the main criterion for a Household Industry is the participation of one or more members of a household in rural areas. In the Urban areas the industry should be confined to the house.

A Household Industry should relate to production, processing, servicing, prepairing or making and selling of goods. If does not include professions such as pleader or doctor or barber or waterman or astrologer.

Non-workers: All persons who are not workers are non-workers. They should fall under any one of the following categories :

1. Full time student or child attending school who does no other works.
2. A person engaged in unpaid home duties (like housewife or other adult female).
3. Any dependent, including an infant or child not attending school or a person permanently disabled from work because of illness or old age.
4. A retired person who is not employed again, rentier, person living on agricultural or non-agricultural royalty, rent or dividend or any other persons of independent means for securing which he does not have to work and who does no other work.
5. Beggars, vagrants or independent women without indication of source of income and others of unspecified source of existence.
6. A convict in jail or an inmate of a penal, mental or charitable institution.
7. A person who has not been employed before but is seeking employment for the first time.
8. A person employed before but now out of employment and seeking employment.

APPENDIX II

STANDARD INDUSTRIAL CLASSIFICATION

Major Group (Code)	Description	Minor Group (Code)
Division 0—Agriculture, Livestock, Forestry, Fishing and Hunting		
00	*Field Produce and Plantation Crops*	
	Production of cereal crops (including Bengal gram) such as rice, wheat, jowar, bajra, maize	000
	Production of pulses, such as arhar, moong, masur, urd, khesari, other gram	001
	Production of raw jute and kindred fibre crops	002
	Production of raw cotton and kindred fibre crops	003
	Production of oilseeds, sugarcane and other cash crops	004
	Production of other crops (including vegetable) not covered above	005
	Paoduction of fruits and nuts in plantation, vines and orchards	006
	Producion of wood, bamboo, cane reeds, thatching grass, etc.	007
	Production of juice by tapping palms	008
	Production of other agricultural produce (including fruits and nuts not covered by code number 006 and flowers) not covered above	009
01	*Plantation Crops*	
	Production of tea in plantation	010
	Production of coffee in plantation	011
	Production of rubber in plantation	012
	Production of tobacco in plantation	013
	Production of ganja, cinchona, opium	014
	Production of other plantation crops not covered above	015
02	*Forestry and Logging*	
	Planting, replanting and conservation of forests	020
	Felling and cutting of trees and transportation of logs	021
	Preparation of timber	022
	Production of fuel including charcoal by exploitation of forest	023
	Production of fodder by exploitation of forests	024
	Production of gums, resins, lac, barks, herbs, wild fruits and leaves by the exploitation of forests	025
	Production and gathering of other forest products not covered above	026
03	*Fishing*	
	Production of fish by fishing in sea	030
	Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries	031
	Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, pond	032
04	*Livestock and Hunting*	
	Production and rearing of livestock (large heads only) mainly for milk and animal power such as cow, buffalo, goat	040
	Rearing of sheep and production of wool	041
	Rearing and production of other animals (mainly for slaughter) such as pig	042
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming	043
	Rearing of bees for the production of honey, wax and collection of honey	044
	Rearing of silk worms and production of cocoons and raw silk	045
	Rearing of other small animals and insects	046
	Trapping of animals or games propagation	047
	Production of other animal husbandry products such as skin, bone, ivory and teeth	048
Division 1—Mining and Quarrying		
10	*Mining and Quarrying*	
	Mining of coal	100
	Mining of iron ores	101
	Mining of gold and silver ores	102
	Mining of manganese	103
	Mining of mica	104
	Mining of other non-ferrous metallic ores	105
	Mining of crude petroleum and natural gas	106
	Quarrying of stone (including slate), clay, sand, gravel, limestone	107
	Mining of chemical earth such as soda ash	108
	Mining and quarrying of non-metallic products not classified above such as precious and semiprecious stones, asbestos, gypsum, sulphur, asphalt	109

APPENDIX II—*contd.*

STANDARD INDUSTRIAL CLASSIFICATION

Major Group (Code)	Description	Minor Group (Code)
Division 2 & 3—Manufacturing		
20	*Foodstuffs*	
	Production of rice, atta, flour, etc. by milling dehusking and processing of crops and foodgrains	200
	Production of sugar and syrup from sugarcane in mills	201
	Production of indigenous sugar, gur from sugarcane or palm juice and production of candy	202
	Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits	203
	Slaughtering, preservation of meat and fish and canning of fish	204
	Production of bread, biscuits, cake and other bakery products	205
	Production of butter, ghee, cheese and other dairy products	206
	Production of edible fats and oils (other than hydrogenated oil)	207
	Production of hydrogenated oils (Vanaspati)	208
	Production of other food products such as sweetmeat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge	209
21	*Beverages*	
	Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery	210
	Production of country liquor	211
	Production of indigenous liquor such as toddy, liquor from mahua, palm juice	212
	Production of other liquors not covered above	213
	Production of aerated and mineral water	214
	Production of ice	215
	Production of ice cream	216
	Processing of tea in factories	217
	Processing of coffee in curing works	218
	Production of other beverages	219
22	*Tobacco Products*	
	Manufacture of bidi	220
	Manufacture of cigars and cheroots	221
	Manufacture of cigarette and cigarette tobacco	222
	Manufacture of hookah tobacco	223
	Manufacture of snuff	224
	Manufacture of jerda and other chewing tobacco	225
	Manufacture of other tobacco products	226
23	*Textile—Cotton*	
	Cotton ginning, cleaning, pressing and baling	230
	Cotton spinning (other than in mills)	231
	Cotton spinning and weaving in mills	232
	Cotton dyeing, bleaching	233
	Cotton weaving in power looms	234
	Cotton weaving in handlooms	235
	Manufacturing of khadi textile in handlooms	236
	Printing of cotton textile	237
	Manufacturing of cotton nets	238
	Manufacturing of cotton, cordage, rope and twine	239
24	*Textile—Jute*	
	Jute pressing and baling	240
	Jute spinning and weaving	241
	Dyeing and bleaching of jute	242
	Printing of jute textile	243
	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta	244
25	*Textile—Wool*	
	Wool baling and pressing	250
	Wool cleaning and processing (scouring)	251
	Wool spinning and weaving in mill	252
	Wool spinning other than in mills	253
	Wool weaving in power loom	254
	Wool weaving in handloom	255
	Embroidery and art work in woollen textile	256

APPENDIX II—*contd.*

STANDARD INDUSTRIAL CLASSIFICATION

Major Group (Code)	Description	Minor Group (Code)
Division 2 & 3—Manufacturing—*contd.*		
26	*Textile—Silk*	
	Spinning and weaving of silk textile in mill	260
	Dyeing and bleaching of silk	261
	Spinning of silk other than in mills	262
	Weaving of silk textile by power loom	263
	Weaving of silk textile by handloom	264
	Printing of silk textile	265
	Manufacture of silk cordage, rope and twine	266
27	*Textile—Miscellaneous*	
	Manufacture of carpet and all other similar type of textile products	270
	Manufacture of hosiery and other knitted fabrics and garments	271
	Embroidery and making of crepe lace and fringes	272
	Making of textile garments including raincoats and headgear	273
	Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags	274
	Manufacture of waterproof textile products such as oil cloth, tarpaulin	275
	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling	276
	Manufacture of coir and coir products	277
	Manufacture of umbrellas	278
	Processing and manufacture of textile products not covered above	279
28	*Manufacture of Wood and Wooden Products*	
	Sawing and planing of wood	280
	Manufacture of wooden furniture and fixtures	281
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows	282
	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures	283
	Manufacture of other wooden products such as utensils, toys artwares	284
	Manufacture of veneer and plywood	285
	Manufacture of plywood products such as tea chest	286
	Manufacture of boxes and packing cases other than plywood	287
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products	288
	Manufacture of other wood and allied products not covered above	289
29	*Paper and Paper Products*	
	Manufacture of pulp from wood, rags, waste-paper and other fibres and the conversion of such pulp into any kind of paper and paper board in mill	290
	Manufacture of pulp from wood, rags, waste-paper and other fibres and the conversion of such pulp into any kind of paper and paper board handmade	291
	Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp	292
30	*Printing and Publishing*	
	Printing and publishing of newspapers and periodicals	300
	Printing and publishing of books	301
	All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry	302
	All types of binding, stitching, sizing and other allied work connected with binding industry	303
31	*Leather and Leather Products*	
	Currying, tanning and finishing of hides and skins and preparation of finished leather	310
	Manufacture of shoes and other leather footwear	311
	Manufacture of clothing and wearing apparel (except footwear) made of leather and fur	312
	Manufacture of leather products (except those covered by code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles	313
	Repair of shoes and other leather footwear	314
	Repair of all other leather products except footwear	315
32	*Rubber, Petroleum and Coal Products*	
	Manufacture of tyres and tubes	320
	Manufacture of rubber footwear	321
	Manufacture of rubber goods used for industrial purpose	322
	Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat	323
	Production of petroleum, kerosene and other petroleum products in petroleum refineries	324
	Production of coaltar and coke in coke oven	325
	Manufacture of other coal and coaltar products not covered elsewhere	326

APPENDIX II—*contd.*

STANDARD INDUSTRIAL CLASSIFICATION

Major Group (Code)	Description	Minor Group (Code)
Division 2 & 3—Manufacturing—*contd.*		
33	*Chemicals and Chemical Products*	
	Manufacture of basic industrial chemicals such as acids, alkalis and their salts not elsewhere specified	330
	Manufacture of dyes, paints, colours and varnishes	331
	Manufacture of fertilizers	332
	Manufacture of ammunition, explosives and fire works	333
	Manufacture of matches	334
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap	335
	Manufacture of soap and other washing and cleaning compounds	336
	Manufacture of turpentine, synthetic, resin, and plastic products and materials (including synthetic rubber)	337
	Manufacture of common salt	338
	Manufacture of other chemicals and chemical products not covered above (including inedible oils and fats)	339
34	*Non-metallic Mineral Products other than Petroleum and Coal*	
	Manufacture of structural clay products such as bricks, tiles	340
	Manufacture of cement and cement products	341
	Manufacture of lime	342
	Manufacture of structural stone goods, stone dressing and stone crushing	343
	Manufacture of stonewares, other than images	344
	Manufacture of stone images	345
	Manufacture of plaster of paris and its products	346
	Manufacture of asbestos products	347
	Manufacture of mica products	348
35	Manufacture of earthenware and earthen pottery	350
	Manufacture of chinaware and crockery	351
	Manufacture of porcelain and its products	352
	Manufacture of glass bangles and beads	353
	Manufacture of glass apparatus	354
	Manufacture of earthen image, busts and statues	355
	Manufacture of earthen toys and artwares except those covered by code No. 355	356
	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above	357
	Manufacture of other non-metallic mineral products not elsewhere specified	359
36	*Basic Metals and their Products except Machinery and Transport Equipment*	
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods	360
	Manufacture including smelting, refining of nonferrous metals and alloys in basic forms	361
	Manufacture of armaments	362
	Manufacture of structural steel products such as joist, rail, sheet, plate	363
	Manufacture of iron and steel furniture	364
	Manufacture of brass and bell metal products	365
	Manufacture of aluminium products	366
	Manufacture of metal products (other than of iron brass, bell metal and aluminium) such as tin can	367
	Enamelling, galvanising, plating (including electroplating) polishing and welding of metal products	368
	Manufacture of sundry hardwares such as G.I. pipe, wire net, bolt, screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38 and 39)	369
37	*Machinery (All kinds other than Transport) and Electrical Equipment*	
	Manufacture and assembling of machinery (other than electrical) except textile machinery	370
	Manufacture and assembling of prime mover and boilers, other than electrical equipment, such as diesel engines, road rollers, tractors	371
	Manufacture of machine tools	372
	Manufacture of textile machinery and accessories	373
	Manufacture of heavy electrical machinery and equipment such as motors, generators, transformers	374
	Manufacture of electric lamps and fans	375
	Manufacture of insulated wires and cables	376
	Manufacture of all kinds of battery	377
	Manufacture of electronic equipment such as radio, microphone	378
	Manufacture of electric machinery and apparatus, appliances not specified above	379

APPENDIX II—*contd.*

STANDARD INDUSTRIAL CLASSIFICATION

Major Group (Code)	Description	Minor Group (Code)
Division 2 & 3—Manufacturing—*contd.*		
38	*Transport Equipment*	
	Manufacture, assembly and repairing of locomotives	380
	Manufacture of wagons, coaches, tramways and other rail road equipment other than that covered by code No. 363	381
	Manufacture and assembling of motor vehicles of all types (excepting motor engines)	382
	Manufacture of motor vehicles engines parts and accessories	383
	Repairing and servicing of motor vehicles	384
	Manufacture of bicycles and tricycles and accessories such as saddle, seat frame, gear	385
	Building and repairing of water transport equipment such as ships, boats and manufacture of marine engines	386
	Manufacture and repair of air transport equipment including aeroplanes, aeroengines	387
	Repairing of bicycles and tricycles	388
	Manufacture of other transport equipment not covered above such as animal drawn and handdrawn vehicles	389
39	*Miscellaneous Manufacturing Industries*	
	Manufacture of optical instruments and lenses, opthalmic goods and photographic equipment and supplies	390
	Manufacture of scientific, medical and surgical instruments and equipment and supplies	391
	Assembling and repairing of watches and clocks	392
	Manufacture of jewellery, silverware and wares using gold and other precious metals	393
	Manufacture and tuning of musical instruments	394
	Manufacture of stationery articles not covered elsewhere such as pencil, penholder, fountainpen	395
	Manufacture of sports goods	396
	Manufacture and repair work of goods not assignable to any other group	399
Division 4—Construction		
40	*Construction*	
	Construction and maintenance of buildings including erection, flooring, decorative constructions, electrical and sanitary installations	400
	Construction and maintenance of roads, railways, bridges, tunnels	401
	Construction and maintenance of telegraph and telephone lines	402
	Construction and maintenance of water ways and water reservoirs such as bund, embankments, dam, canal, tank, tubewells, wells	403
Division 5—Electricity, Gas, Water and Sanitary Services		
50	*Electricity and Gas*	
	Generation and transmission of electric energy	500
	Distribution of electric energy	501
	Manufacture of gas in gas works and distribution to domestic and industrial consumers	502
51	*Water Supply and Sanitary Services*	
	Collection, purification and distribution of water to domestic and industrial consumers	510
	Garbage and sewage disposal, operation of drainage system and all other types of work connected with public health and sanitation	511
Division 6—Trade and Commerce		
60	*Wholesale Trade*	
	Wholesale trading in cereals and pulses	600
	Wholesale trading in vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry and other food-stuff (not covered elsewhere)	601
	Wholesale trading in all kinds of fabrics, and textiles products such as garments, hessian, gunny bag, silk and woollen yarn, shirtings, suitings, hosiery products	602
	Wholesale trading in beverages, such as tea (leaf) coffee (seed and powder), aerated water	603
	Wholesale trading in intoxicants such as wines, liquors	604
	Wholesale trading in other intoxicants such as opium, ganja, etc.	605
	Wholesale trading in tobacco, bidi, cigarettes and other tobacco products	606
	Wholesale trading in animals	607
	Wholesale trading in straw and fodder	608
61	Wholesale trading in medicines and chemicals	610
	Wholesale trading in fuel and lighting products such as coke, coal, kerosene, candle	611
	Wholesale trading in toilets, perfumery and cosmetics	612
	Wholesale trading in metal, porcelain and glass utensils, crockery, chinaware	613
	Wholesale trading in wooden, steel and other metallic furniture and fittings	614
	Wholesale trading in footwear	615
	Wholesale trading in tyres, tubes and allied rubber products	616
	Wholesale trading in petrol, mobil oil and allied products	617
	Wholesale trading in other household equipment not covered above	618

APPENDIX II—*contd.*

STANDARD INDUSTRIAL CLASSIFICATION

Major Group (Code)	Description	Minor Group (Code)
Division 6—Trade and Commerce—*contd.*		
62	Wholesale trading in bricks, tiles and other building materials	620
	Wholesale trading in wood, bamboo, cane, thatches and similar products	621
63	Wholesale trading in paper and other stationery goods	630
	Wholesale trading in agricultural and industrial machinery equipment and tools and appliances other than electrical	631
	Wholesale trading in electrical machinery and equipment like motor, battery, electric fan, bulb	632
	Wholesale trading in all kinds of transport and storage equipment	633
	Wholesale trading in skins, leather and fur	634
	Wholesale trading in clocks, eye glasses, frames	635
	Wholesale trading in hardware and sanitary equipment	636
	Wholesale trading in scientific, medical and surgical instruments	637
	Wholesale trading in precious metals and stones, gold and silverwares and jewellery	638
	Wholesale trading in all goods not covered above	639
64	*Retail Trade*	
	Retail trading in cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry	640
	Retail trading in beverages such as tea (leaf), coffee (Seed and powder), aerated water	641
	Retail trading in intoxicants such as wines, liquors	642
	Retail trading in other intoxicants such as opium, ganja, etc.	643
	Retail trading in tobacco, bidi, cigarettes and other tobacco products	644
	Retail trading in fuel such as coke, coal, firewood and kerosene	645
	Retail trading in foodstuffs like sweetmeat condiments, cakes, biscuits, etc.	646
	Retail trading in animals	647
	Retail trading in straw and fodder	648
65	Retail trading in fibres, yarns, dhoti, saree, readymade garments of cotton, wool, silk and other textiles and hosiery products: (this includes retail trading in piece-goods of cotton, wool, silk and other textiles)	650
	Retail trading in toilet goods, perfumes and cosmetics	651
	Retail trading in medicines and chemicals	652
	Retail trading in footwear, head-gear such as hat, umbrellas, shoes and chappals	653
	Retail trading in tyres, tubes and allied rubber products	654
	Retail trading in petrol, mobil oil and allied products	655
66	Retail trading in wooden, steel and other metallic furniture and fittings	660
	Retail trading in stationery goods and paper	661
	Retail trading in metal, porcelain and glass utensils	662
	Retail trading in earthenware and earthen toys	663
	Retail trading in other household equipment not covered above	664
67	Retail trading in bricks, tiles and other building materials	670
	Retail trading in hardware and sanitary equipment	671
	Retail trading in wood, bamboo, cane, bark and thatches	672
	Retail trading in other building materials	673
68	Retail trading in agricultural and industrial machinery equipment, tools and appliances	680
	Retail trading in transport and storage equipments	681
	Retail trading in electrical goods like electric fan, bulb, etc.	682
	Retail trading in skins, leather and furs and their products excluding footwear and head-gear	683
	Retail trading in clock and watch, eye glass, frame	684
	Retail trading in scientific, medical and surgical instruments	685
	Retail trading in precious stones and jewellery	686
	Retail trading in musical instruments, gramophone record, pictures and paintings including curio dealing	687
	Book-selling	688
	Retail trading in goods unspecified	689
69	*Trade and Commerce Miscellaneous*	
	Importing and exporting of goods and commodities	690
	Real estate and properties	691
	Stocks, shares and futures	692
	Providents and insurances	693
	Money lending (indigenous)	694
	Banking and similar type of financial operation	695
	Auctioneering	696
	Distribution of motion pictures	697
	All other activities connected with trade and commerce not covered above, including hiring out of durable goods such as electric fan, microphone, rickshaw, etc.	699

APPENDIX II—*contd.*

STANDARD INDUSTRIAL CLASSIFICATION

Major Group (Code)	Description	Minor Group (Code)
Division 7—Transport, Storage and Communication		
70	*Transport*	
	Transporting by railways	700
	Transporting by tramway and bus service	701
	Transporting by motor vehicles (other than omnibus)	702
	Transporting by road through other means of transport such as hackney carriage, bullock cart, ekka	703
	Animal transporting by animals such as horses, elephant, mule, camel	704
	Transporting by man such as carrying of luggage, hand cart driving, rickshaw pulling, cycle rickshaw driving	705
	Transporting by boat, steamer, ferry etc. by river, canal	706
	Transporting by boat, steamer, ship, cargo boat by sea or ocean	707
	Transporting by air	708
	Transporting by other means not covered above	709
71	Services incidental to transport such as packing, carting travel agency	710
72	*Storage and Ware Housing*	
	Operation of storage such as ware-houses	720
	Operation of storage such as cold storage	721
	Operation of storage of other type	722
73	*Communication*	
	Postal, telegraphic, wireless and signal communications	730
	Telephone communication	731
	Information and broadcasting	732
Division 8—Services		
80	*Public Services* (This does not include Govt., Quasi-Govt. or local body activities, other than administrative, in such fields as transport, communication, information and broadcasting, education and scientific services, health, industries, production, construction, marketing and operation of financial institution each of which is classified in the appropriate industry groups)	
	Public service in Police	803
	Public service in administrative departments and offices of Central Government	804
	Public service in administrative departments and offices of quasi-government organisation, municipalities, local boards, etc.	805
	Public services in administrative departments and offices of State Governments	809
81	*Educational and Scientific Services*	
	Educational services such as those rendered by technical colleges, technical schools and similar technical and vocational institutions	810
	Educational services such as those rendered by colleges, schools and similar other institutions of non-technical type	811
	Scientific services and research institutions not capable of classification under any individual group	812
82	*Medical and Health Services*	
	Public health and medical services rendered by organisations and individuals such as by hospitals, sanatoria, nursing homes, maternity and child welfare clinic as also by hakimi, unani, ayurvedic, allopathic and homœpathic practitioners	820
	Veterinary services rendered by organisations and individuals	821
83	*Religious and Welfare Services*	
	Religious services rendered by religious organisations and their establishments maintained for worship or promotion of religious activities, this includes missions, ashrams and other allied organisations	830
	Religious and allied services rendered by pandit, priest, preceptor, fakir, monk	831
	Welfare services rendered by organisations operating on a non-profit basis for the promotion of welfare of the community such as relief societies, red-cross organisation for the collection and allocation of contributions for charity	832
84	*Legal Services*	
	Legal services rendered by barrister, advocate, solicitor, mukteer, pleader, muhurie, munshi	840
	Matrimonial services rendered by organisations and individuals	841

APPENDIX II—*contd.*

STANDARD INDUSTRIAL CLASSIFICATION

Major Group (Code)	Description	Minor Group (Code)
Division 8—Services—*contd.*		
85	*Business Services*	
	Engineering services rendered by professional organisations or individuals	850
	Business services rendered by organisations of accountants, auditors, book-keepers or like individuals	851
	Business services rendered by professional organisations or individuals such as those of advertising and publicity agencies	852
	Business services rendered by professional organisations or individuals such as of those rendered by news-agency newspaper correspondent, columist, journalists, editors, authors	853
86	*Community Services and Trade and Labour Associations*	
	Services rendered by trade associations, chambers of commerce, trade unions and similar other organisations	860
	Services rendered by civic, social, cultural, political and fraternal organisations such as rate payers association, club, library	861
	Community services such as those rendered by public libraries, museums, botanical and zoological gardens etc.	862
87	*Recreation Services*	
	Production of motion picture and allied services such as processing editing, etc.	870
	Recreation services rendered by cinema houses by exhibition of motion pictures	871
	Recreation services rendered by organisations and individuals such as those of theatres, opera companies, ballet and dancing parties, musicians, exhibitions, circus, carnivals	872
	Recreation services rendered by indoor and outdoor sports by organisations and individuals including horse, motor, etc., racing	873
88	*Personal Services*	
	Services, rendered to households such as those by domestic servants, cooks	880
	Services rendered to households such as those by governess, tutor, private secretary	881
	Services rendered by hotels, boarding houses, eating houses, cafes, restaurants and similar other organisations to provide lodging and boarding facilities	882
	Laundry services rendered by organisations and individuals, this includes all types of cleaning, dyeing bleaching, dry cleaning, services	883
	Hair dressing, other services rendered by organisation and individuals such as those by barber, hair-dressing saloon and beauty shops	884
	Services rendered by portrait and commercial photographic studios	885
89	*Services (not elsewhere classified)*	
	Services rendered by organisations or individuals not elsewhere classified	890
Division 9—Activities not adequately described		
90	Activities unspecified and not adequately described including activities of such individuals who fail to provide sufficient information about their industrial affiliation to enable them to be classified	900
	Fresh entrants to the Labour Market	999

APPENDIX III

LIST OF COMMON HOUSEHOLD INDUSTRIES WITH THEIR INDUSTRIAL CODE NUMBER

Industrial Code Number	Household Industry
Major Group	
00	*Field Produce and Plantation Crops*
005.1	Production of Vegetables
005.2	Production of roots etc., not included above
006.1	Production of fruits and nuts in plantation, vines and orchards
006.2	Production of copra (from coconuts)
007.1	Production of thatching grass
007.2	Production of wood, bamboo, cane reeds, etc. (excluding thatching grass)
008.1	Production of juice (neera) by tapping coconuts trees
008.2	Production of juice by tapping other palms like date, palmyra n.e.c.
009	Production of other agricultural produce (including fruits and nuts not covered by 006 and flowers) not covered above
Major Group	
01	*Plantation Crops*
013	Production of tobacco in plantation
015.1	Pan Cultivation
015.2	Plantation Crops except tea, coffee, rubber, tobacco, ganja, cinchona, opium and pan
Major Group	
02	*Forestry and Logging*
023.1	Production of charcoal
023.2	Production of other fuels by exploitation of forests
024	Production of fodder by exploitation of forests
025.1	Production of Kathha
025.2	Production of Lac
025.3	Production of gum
025.4	Production of resins, barks, herbs, wild fruits, berries and leaves etc., n.e.c.
026	Production and gathering of other forest products not covered above
Major Group	
03	*Fishing*
030	Production of fish by fishing in sea
031	Production of fish by fishing in inland waters and ponds including fish farms and fish hatcheries
032	Production of pearls, conch, shells, sponges, sea herbs, corals etc., by gathering or lifting from sea, river, pond
Major Group	
04	*Livestock and Hunting*
040.1	Rearing of goat for milk and animal power
040.2	Rearing of buffalo for milk and animal power
040.3	Rearing of cows for milk and animal power
040.4	Rearing of camels and other big domestic animals
040.5	Production and rearing of livestock mainly for milk and animal power n.e.c.
041.1	Sheep breeding and rearing
041.2	Production of wool

Industrial Code Number	Household Industry
Major Group	
04	*Livestock and Hunting*—contd.
042.1	Rearing and production of pigs and goats (mainly for slaghter)
042.2	Rearing and production of other animals (mainly for slaughter) n.e.c.
043.1	Poultry keeping and production of eggs
043.2	Rearing and production of ducks, hens etc. and other small birds *e.g.* pigeons, parrots, peacock, maina etc.
044.1	Bee keeping for production of honey and wax
044.2	Collection of wax and honey
045	Rearing of tassar/eri/mulberry and other silk worms and production of cocoons and raw silk
046.1	Dog breeding, rearing of rabbits and guinea-pigs
046.2	Rearing of other small animals and insects n.e.c.
048.1	Collection of bones
048.2	Manufacture of glue from animal carcasses
048.3	Manufacture of gut
048.4	Production of other animal husbandry products such as skin, ivory, teeth and hair etc.
Major Group	
10	*Mining and Quarrying*
107.1	Extraction of chalk
107.2	Quarrying of lime-stone
107.3	Stone and slate quarrying
107.4	Quarrying of sand, clay, gravel etc., n.e.c.
Major Group	
20	*Foodstuffs*
200.1	Production of flour by village chakkies or flour mill by grinding wheat, maize, gram etc.
200.2	Hand pounding of rice by Dhekhi or Ukhal
200.3	Production of rice by milling, dehusking and processing of paddy by rice mill
200.4	Grinding of chillies, turmeric etc.
200.5	Production of pulses
200.6	Parching of grains
200.7	Production and processing of other crops and food grains n.e.c.
202.1	Gur and Khandsari making from sugarcane and palm
202.2	Production of bhoora and candy
202.3	Production of jaggery from coconut and palmyra juice (neera)
202.4	Production of other indigenous products from sugar and jaggery n.e.c.
203.1	Manufacture of achar, pickles, chutney and murabba
203.2	Production of sauce, jam and jelly
203.3	Processing of cashew nut
203.4	Manufacture of kokam products
203.5	Fruit preservation (canning of fruits)
203.6	Making dried vegetables
203.7	Production of other fruit products and perservation of fruits n.e.c.
204.1	Slaughtering, preservation of meat and fish and canning of fish
204.2	Fish currying or curing and salting (currying applies more to skin and hide)
205	Production of bread, biscuit, cake and other bakery products

APPENDIX III—*contd.*

LIST OF COMMON HOUSEHOLD INDUSTRIES WITH THEIR INDUSTRIAL CODE NUMBER

Industrial Code Number	Household Industry
Major Group	
20	*Foodstuffs*—contd.
206	Production of butter, cream, ghee, cheese, chhana, khowa and other dairy products
207	Oil pressing ghani, kolhu or by small machines
209.1	Confectionery
209.2	Making of sweet-meats, laddu, peda, barphi, batasa etc.
209.3	Sattu, bhunja, papar, barri, danauri, tilauri, sewai, apalam etc.
209.4	Making of chura or chira, muri, murki, khoi
209.5	Making of chat
209.6	Making of dalmot, chanachur (jor) garam, rewari etc.
209.7	Making of other food products for residuary snacks
209.8	Production of other food products like cocoa, chocolate, toffee, lozenge
Major Group	
21	*Beverages*
210.1	Manufacture of vinegar from coconut juice (neera)
210.2	Manufacture of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery
211	Production of country liquor from material obtained from sources other than trees and shrubs
212.1	Production of indigenous liquor such as liquor, toddy, neera from mahua and palm trees
212.2	Production of other indigenous liquors from other materials from trees and shrubs
214.1	Production of mineral water
214.2	Production of aerated water such as soda water, lemonade etc.
215	Production of ice
216	Production of ice cream, ice-candy or kulphimalai, milk-shake etc.
218	Grinding of Coffee
219.1	Preparation of sharbats and squashes
219.2	Preparation of jerrapani
219.3	Production of other beverages n.e.c.
Major Group	
22	*Tobacco Products*
220	Manufacture of bidi
221	Manufacture of cigars and cheroots
223	Manufacture of hookah tobacco
224	Manufacture of snuff
225	Manufacture of jerda, kimam, khaini and other chewing tobacco
226	Manufacture of other tobacco products n.e.c.
Major Group	
23	*Textile—Cotton*
230	Cotton ginning, cleaning, carding, pressing and baling
231	Cotton spinning (by charkha and takali)
233.1	Dyeing of cloth (cotton) and yarn
233.2	Bleaching of cloth (cotton) and yarn
233.3	Tie and dye (bandhani) of cloth and yarn
234	Cotton cloth weaving in power looms
235	Cotton cloth weaving in handlooms
236	Manufacture of khadi textile in handlooms
237	Printing of cloth (cotton)

Industrial Code Number	Household Industry
Major Group	
23	*Textile—Cotton*—contd.
238.1	Making of fishing net
238.2	Making of mosquito net
238.3	Making of other nets
239.1	Making of sacred thread
239.2	Making of thread, rope, cordage and twine (cotton)
Major Group	
24	*Textile—Jute*
240	Jute pressing and baling
241	Jute spinning and weaving of mats, asanis etc.
242	Dyeing and bleaching of jute
244.1	Making of rope and cordage, out of hemp
244.2	Making of rope and cordage, out of jute
244.3	Making of rope by palm fibre
244.4	Making of rope by date palm fibre
244.5	Making of fibre, sunn-hemp fibre
244.6	Making of other products from jute and similar fibres such as hemp, mesta
Major Group	
25	*Textile—Wool*
250	Wool baling and pressing
251	Cleaning, sorting, carding, scouring and processing of wool
253	Spinning of wool by charkha or takali
254	Weaving of woollen cloth in power loom such as blankets, asanis etc.
255	Weaving of woollen cloth in handloom such as blankets, rugs, pashmina, thulma, gudma, etc.
256.1	Embroidery with various colours, combinations of various threads and art work in woollen textile
256.2	Shawls (with traditional borders)
Major Group	
26	*Textile—Silk*
261	Dyeing and bleaching of silk
262.1	Spinning of tussar, other than in mills
262.2	Spinning of eri, other than in mills
262.3	Spinning of silk, other than in mills n.e.c.
263.1	Weaving of Traditional silk (Atlas) by power loom
263.2	Weaving of tussar by power loom
263.3	Weaving of eri by power loom
263.4	Weaving of silk and artificial silk in power loom n.e.c.
264.1	Weaving of mashru, himroo, brocade, kinkhab by handloom
264.2	Weaving of silk and artificial silk in handloom n.e.c.
265	Printing of silk textile
266.1	Goaf making
266.2	Making of silk cordage, rope and twine n.e.c.
Major Group	
27	*Textile—Miscellaneous*
270.1	Making of durries
270.2	Making of carpets and druggets
270.3	Manufacture of other similar textile products n.e.c.
271.1	Making of hosiery goods such as banyans, socks, sweaters, mufflers etc.
271.2	Making of nalas and azarbands

APPENDIX III—*contd.*

LIST OF COMMON HOUSEHOLD INDUSTRIES WITH THEIR INDUSTRIAL CODE NUMBER

Industrial Code Number	Household Industry
Major Group	
27	*Textile—Miscellaneous*—contd.
271.3	Making of parandas and chootelas
271.4	Manufacture of hosiery and other knitted fabrics and garments n.e.c.
272.1	Embroidery and making of phulkari
272.2	Making of jari thread, zardoshi
272.3	Traditional embroidery
272.4	Patchwork embroidery
272.5	Lace garland making
272.6	Making of fringes and crepe laces
272.7	Making of kargota, main garlands, shell garlands etc.
272.8	Making of other embroidery products n.e.c.
273.1	Making of cap, hat, and other head-gear
273.2	Traditional garments
273.3	Chrochet work (bora caps)
273.4	Making of textile garments including rain-coats and head-gears n.e.c.
274.1	Weaving of khes, bed covers, curtains, pillow cases and table-cloth, cloth bags etc.
274.2	Making of newar
274.3	Manufacture of other made-up textile goods like mattress, quilt, rezai etc., n.e.c.
275	Manufacture of water proof textile products such as oil cloth, tarpaulin etc.
276.1	Making of namda felt
276.2	Making of suzani (padded quilts)
276.3	Processing of coconut fibre for upholstery
276.4	Handicraft articles made of flax and fibre
276.5	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling n.e.c.
277.1	Manufacture of coir matting, cactus fibre for ropes and rope making from coconut fibre
277.2	Making of brush, broom etc. from coconut fibre
277.3	Coir spinning
277.4	Coconut curing
277.5	Other allied products of coir industry n.e.c.
278	Manufacture and repair of umbrellas
279.1	Making of daura (thread) batua, cotton thread, buttons
279.2	Manufacture of dolls and toys (rags and cotton)
279.3	Manufacture of other textile products not elsewhere classified
Major Group	
28	*Manufacture of Wood and Wooden Products*
280	Sawing, planing and milling of wood
281	Manufacture of wooden furniture and fixtures
282	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows
283.1	Carpentary works concerned with repairs of agricultural implements (wood)
283.2	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipments and fixtures
284.1	Lacquerware (if on wood)
284.2	Manufacture of wooden utensils, artware and decorative wooden boxes (patras)
284.3	Manufacture of wooden toys
284.4	Sandal wood and other wood carving
284.5	Bead making from wood
284.6	Sawdust and plaster figure making
284.7	Marquetry boxes (inlay work)

Industrial Code Number	Household Industry
Major Group	
28	*Manufacture of Wood and Wooden Products*—contd.
284.8	Manufacture of photo frames and framing of photo paintings etc.
284.9	Manufacture of other wooden products n.e.c.
285	Manufacture of match splinters, plywood and veneers
287	Manufacture of boxes and packing cases other than plywood
288.1	Making of box from moonjgrass
288.2	Making of rope mats etc. from moonj and sawai grass and making of cadjar for thatching purposes
288.3	Making of mats, handfans and umbrellas from palm leaves
288.4	Making of sirki, moora and chhaj
288.5	Making of baskets and broomsticks
288.6	Making of donas (drone) and pattals (patravali) from leaves
288.7	Caning of chairs
288.8	Making of chicks, cuscus-tatti and fans, sticks and poles from bamboo
288.9	Manufacture of other articles from leaf, cane, bamboo, cork and other allied products n.e.c.
289.1	Making of sticks and poles from wood
289.2	Making of wooden kharaus and other wooden sandals
289.3	Making of artwheels
289.4	Manufacture of other wood and allied products n.e.c.
Major Group	
29	*Paper and Paper Products*
291	Manufacture of pulp and paper by hand
292.1	Making of envelopes and paper bags
292.2	Papier mache articles
292.3	Making of kite
292.4	Paper decorations for homes
292.5	Making of card-board boxes and cards
292.6	Making of paper toys
292.7	Making of paper flowers etc.
292.8	Manufacture of other paper products from paper, paper board and pulp n.e.c.
Major Group	
30	*Printing and Publishing*
301	Printing and publishing of books
302.1	Printing works, printing of handbills, invitation cards etc.
302.2	Lithography, engraving, etching, block making, type cutting and other works connected with printing industry
303	Book binding, stitching, sizing and other work connected with book binding industry
Major Group	
31	*Leather and Leather Products*
310.1	Flaying, processing of hides and skins including taxidermy
310.2	Currying, tanning and finishing of hides and skins preparation of finished leather
310.3	Stuffed animals

APPENDIX III—*contd.*

LIST OF COMMON HOUSEHOLD INDUSTRIES WITH THEIR INDUSTRIAL CODE NUMBER

Industrial Code Number	Household Industry
Major Group	
31	*Leather and Leather Products*—contd.
311.1	Making of leather boots, shoes or chappals (slippers, sandals)
311.2	Making of Poola shoes
311.3	Manufacture of other footwear n.e.c.
312	Making of clothing and wearing apparel (except footwear) made of leather and fur
313	Manufacture of leather products such as leather upholstery suit cases, pocket-books, cigarette and key cases, purses, saddlery, whip, acquaducts (Kos), charsa and other articles
314	Repair of shoes, chappals and other leather footwear
315	Repair of all other leather products except footwear
Major Group	
32	*Rubber, Petroleum and Coal Products*
320	Vulcanising tyres and tubes
321	Manufacture of chappals from torn tyres and other rubber footwear
322	Manufacture of rubber products from natural and synthetic rubber including rain-coats, oil cloths, waterproof cloths etc.
Major Group	
33	*Chemicals and Chemical Products*
331.1	Manufacture of dyes, paints, colours, abir, sindoor, varnish etc.
331.2	Manufacture of indigo
332	Manufacture of fertilizer (including from bones)
333	Manufacture of fireworks and other explosives suchs as *pataka* etc.
334	Manufacture of matches
335.1	Manufacture of incense and perfumes
335.2	Manufacture of Agarbatti
335.3	Manufacture of rose water
335.4	Manufacture of powder, snow, cream, bindi, tikali, hair oil and nail polish
335.5	Manufacture of kumkum and hinglo
335.6	Manufacture of mascara and kajal
335.7	Manufacture of medicines (ayurvedic, unani etc.) and pharmaceutical preparations
335.8	Manufacture of perfumes, cosmetics and other toilet preparations n.e.c.
336.1	Manufacture of soap and washing soda
336.2	Manufacture of other washing and cleaning compounds n.e.c.
337.1	Manufacture of plastic toys
337.2	Making of plastic buttons
337.3	Manufacture of other plastic goods
337.4	Making of celluloid goods
337.5	Manufacture of turpentine, synthetic resin and other materials n.e.c.
338	Salt production
339.1	Manufacture of ink including fountainpen ink
339.2	Making of candles
339.3	Making of tooth powder
339.4	Making of boot polish and inedible oils etc.
339.5	Manufacture of other chemical products n.e.c.

Industrial Code Number	Household Industry
Major Group	
34-35	*Non-metallic Mineral Products other than Petroleum and Coal*
340.1	Making of bricks
340.2	Manufacture of roofing tiles
340.3	Manufacture of other clay products n.e.c.
341.1	Manufacture of cement door frames and sanitary fittings
341.2	Manufacture of cement jali and tiles
341.3	Making of cement statues
341.4	Making of cement products n.e.c.
342.1	Manufacture of lishu
342.2	Manufacture of lime
343.1	Stone carving
343.2	Marble carving
343.3	Granite carving
343.4	Manufacture of other structural stone goods, stone dressing and stone crushing n.e.c.
344	Making of chakki, chakla, silaut, lorha, jainta, utensils and other articles from stone
345	Manufacture of stone images and toys
346.1	Making of images from soap stone
346.2	Manufacture of images, toys and other articles of plaster of paris
348.1	Mica splitting
348.2	Manufacture of mica products, including mica grinding
350	Making of earthenware such as pottery, etc.
351	Manufacture of crockery
353.1	Making of glass bangles
353.2	Making of glass beads
353.3	Manufacture of bead garlands (where making of garlands is undertaken at the place of manufacture of beads) (also see 399)
354	Manufacture of Laboratory glass apparatus
355	Making of clay models, earthen images, busts and statues
356.1	Making of earthen toys and artware
356.2	Decorative ceramics
357	Manufacture of glass and glass products except optical and photographic lenses
Major Group	
36	*Basic Metals and their Products except Machinery and Transport Equipment*
360.1	Re-rolling of M. S. Rods
360.2	Manufacture of iron and steel including smelting, refining, rolling, etc. such as billets, blooms, tubes, rods n.e.c.
362	Manufacture of arms and weapons and their repair service
364	Manufacture of iron and steel furniture
365.1	Making of utensils of brass and bell metal
365.2	Making of brassware
365.3	Making of bottom part of hookah from brass and bell metal
365.4	Making of brass and bell metal ornaments
365.5	Making of other brass and bell metal products n.e.c.
366.1	Making of aluminium utensils
366.2	Making of other aluminium products n.e.c.
367.1	Making of tin utensils
367.2	Making of articles from tin sheets
367.3	Copper utensils
367.4	Bronze works including bronze images, medals and articles of alloys
367.5	Manufacture of other metal products (excluding iron, brass, bell metal, aluminium) n.e.c.

APPENDIX III—*contd.*

LIST OF COMMON HOUSEHOLD INDUSTRIES WITH THEIR INDUSTRIAL CODE NUMBER

Industrial Code Number	Household Industry
Major Group	
36	*Basic Metals and their Products except Machinery and Transport Equipment*—contd.
368.1	Lacquerware (if on metal)
368.2	Nickel planting and electroplating
368.3	Engraving, embossing, polishing and welding of metal products
368.4	Enamelling and galvanizing of metal products
368.5	Plating and electroplating of metal n.e.c. including silverplating, goldplating, E. P. N. S. etc.
369.1	Manufacture of agricultural implements such as ploughshare, khurpi, kudal etc.
369.2	Manufacture of light engineering goods including bolts and screws
369.3	Making of iron utensils (*e.g.* buckets etc.) and articles from iron sheets
369.4	Making and repairing of locks and trunks
369.5	Cutlery
369.6	Manufacture of pins
369.7	Manufacture of scales, weights and measures
369.8	Foundry Industry (including blacksmithy)
369.9	Manufacture of other sundry hardwares such as G. I. pipe, Wire net etc., n.e.c.
Major Group	
37	*Machinery (All Kinds other than Transport) and Electrical Equipment*
370	Manufacture of mechanical water pumps, tube well pumps, air pumps etc.
372	Manufacture of small machine tools and machine parts
373	Manufacture of sewing machine parts
375	Repairing and servicing of fans
376	Manufacture of insulated wires
377.1	Manufacture of storage batteries
377.2	Manufacture of charging batteries
377.3	Manufacture of other batteries n.e.c.
378	Repairing and servicing of radios
379.1	Manufacture of domestic electrical appliances
379.2	Repairing and servicing of electrical apparatus, heaters, oven etc.
Major Group	
38	*Transport Equipment*
382	Manufacture of body of trucks and buses including carpentry and joinery work involved
384	Repairing and servicing of automobiles
385.1	Manufacture of cycle parts and accessories such as saddle, seat frame and gear etc.
385.2	Manufacture of rickshaw parts
386	Manufacture of boats and barges

Industrial Code Number	Household Industry
Major Group	
38	*Transport Equipment*—contd.
388	Repair of cycle and rickshaw
389	Manufacture of animal drawn and hand drawn vehicles such as bullock cart, tamtam, lagadi, palaki cab, wheelbarrow, handbarrow etc.
Major Group	
39	*Miscellaneous Manufacturing Industries*
390.1	Repair of spectacles
390.2	Manufacture of small photographic equipment
390.3	Manufacture of optical and photographic equipment n.e.c.
391	Manufacture of scientific goods
392	Repairing and servicing of watches and clocks
393.1	Inlay work with ivory and brass
393.2	Goldsmithy
393.3	Manufacture of jewellery, silverware and wares using gold and other precious metal and precious and semi-precious stones
393.4	Silver artware, including silver repousse work on copper (such as in Tanjore) and silver images
393.5	Silver filigree industry
393.6	Manufacture of gold and silver leaves
393.7	Gold covering work (fancy jewellery)
393.8	Bidriware industry
393.9	Manufacture of jewellery, silverwares etc., n.e.c.
394	Manufacture, repairing and tuning of musical instruments such as harmonium, tabla, sitar, bansuri etc.
395.1	Manufacture of chalk pieces
395.2	Making of slate and slate pencil
395.3	Making of rubber stamps
395.4	Manufacture of fountainpen parts
395.5	Manufacture of other stationery articles such as pencils, penholders etc.
396.1	Manufacture of deshi sports goods such as lezzim and dumballs
396.2	Making of rubber balls and balloons
396.3	Manufacture of other sports goods n.e.c. bats, rackets, balls etc.
399.1	Making of tikka and cowdung cakes
399.2	Making of beads from conch shells and horn goods
399.3	Making of traditional objects such as Orissa, Mysore and Tanjore paintings etc.
399.4	Making of lac bangles
399.5	Making of buttons (bone, shell, ivory)
399.6	Making of gangavan (making of wig from human hair)
399.7	Making of garlands from flowers, camphor, sandal wood shavings, seeds and other materials, like beads etc.
399.8	Repair of petromax lights etc.
399.9	Making and repairing of goods n.e.c.

Note :

n.e.c.—not elsewhere classified.

APPENDIX IV

NATIONAL CLASSIFICATION OF OCCUPATIONS

Divisions and Groups

0 Professional, Technical and Related Workers

00 Architects, Engineers and Surveyors
01 Physicists, Chemists, Geologists and other Physical Scientists
02 Biologists, Veterinarians, Agronomists and Related Scientists
03 Physicians, surgeons and Dentists
04 Nurses, Pharmacists and other Medical and Health Technicians
05 Teachers
06 Jurists
07 Social Scientists
08 Artists, Writers, and Related Workers
09 Draughtsmen, and Science and Engineering Technicians, n.e.c.
0X Other Professional, Technical and Related Workers

1 Administrative, Executive and Managerial Workers

10 Administrators and Executive Officials, Government
11 Directors and Managers, Wholesale and Retail Trade
12 Directors, Managers and Working Proprietors, Financial Institutions
13 Directors, Managers and Working Proprietors, other

2 Clerical and Related Workers

20 Book-keepers and Cashiers
21 Stenographers and Typists
22 Office Machine Operators
28 Clerical Workers, Miscellaneous
29 Unskilled Office Workers

3 Sales Workers

30 Working Proprietors, Wholesale and Retail Trades
31 Insurance and Real Estate Salesmen, Salesmen of Securities and Services and Auctioneers
32 Commercial Travellers and Manufacturers' Agents
33 Salesmen, Shop Assistants and Related Workers
34 Money Lenders and Pawn Brokers

4 Farmers, Fishermen, Hunters, Loggers and Related Workers

40 Farmers and Farm Managers
41 Farm Workers
42 Hunters and Related Workers
43 Fishermen and Related Workers
44 Loggers and other Forestry Workers

5 Miners, Quarrymen and Related Workers

50 Miners and Quarrymen
51 Well Drillers and Related Workers
52 Mineral Treaters
59 Miners, Quarrymen and Related Workers, n.e.c.

6 Workers in Transport and Communication Occupations

60 Deck Officers, Engineer Officers and Pilots, ship
61 Deck and Engine-room Ratings (ship), Barge Crews and Boatsmen
62 Aircraft Pilots, Navigators and Flight Engineers
63 Drivers and Firemen, Railway Engine
64 Drivers, Road Transport

6 Workers in Transport and Communication Occupations—contd.

65 Conductors, Guards and Brakesmen (Railway)
66 Inspectors, Supervisors, Traffic Controllers and Despatchers, Transport
67 Telephone, Telegraph and Related Telecommunication Operators
68 Postmen and Messengers
69 Workers in Transport and Communication Occupations, n.e.c.

7-8 Craftsmen, Production Process Workers, and Labourers not elsewhere Classified

70 Spinners, Weavers, Knitters, Dyers and Related Workers
71 Tailors Cutters, Furriers and Related Workers
72 Leather Cutters, Lasters and Sewers (except Gloves and Garments) and Related Workers
73 Furnacemen, Rollers, Drawers, Moulders and Related Metal making and Treating Workers
74 Precision Instrument Makers, Watch Makers, Jewellers and Related Workers
75 Tool Makers, Machinists, Plumbers, Welders, Platers and Related Workers
76 Electricians and Related Electrical and Electronics Workers
77 Carpenters, Joiners, Cabinet Makers, Coopers and Related Workers
78 Painters and Paper Hangers
79 Bricklayers, Plasterers and Construction Workers, n.e.c.
80 Compositors, Printers, Engravers, Book Binders and Related Workers
81 Potters, Kilnmen, Glass and Clay Formers and Related Workers
82 Millers, Bakers, Brewmasters and Related Food and Beverage Workers
83 Chemical and Related Process Workers
84 Tobacco Preparers and Products Makers
85 Craftsmen and Production Process Workers, n.e.c.
86 Testers, Packers, Sorters and Related Workers
87 Stationary Engine and Excavating and Lifting Equipment Operators and Related Workers
89 Labourers, n.e.c.

9 Service, Sport and Recreation Workers

90 Fire Fighters, Policemen, Guards and Related Workers
91 House Keepers, Cooks, Maids and Related Workers
92 Waiters Bartenders and Related Workers
93 Building Caretakers, Cleaners and Related Workers
94 Barbers, Hairdressers, Beauticians and Related Workers
95 Launderers, Dry Cleaners and Pressers
96 Athletes, Sportsmen and Related Workers
97 Photographers and Related Camera Operators
99 Service, Sport and Recreation Workers n.e.c.

X Workers not Classifiable by Occupation

X8 Workers reporting Occupations unidentifiable or unclassifiable
X9 Workers not reporting Occupation

Note :

n.e.c.—not elsewhere classified.

NOTES :

1. The Sq. Km. and density figures of urban areas of Police Station/Subdivision/District are worked out using the area figures corrected upto 2 places of decimal obtained by adding the areas of towns in respective Units and not using the area figures given in the table. In addition to this the area figures relating to Sq. Km. are further adjusted to make the Police Station/Subdivision/District totals tally.

2. The population of Ratua Police Station in the district of Malda includes the population of five tolas of the *mauza* Govindpur (Thana No. 349 of Katihar Revenue Thana) on the Bihar-West Bengal border. West Bengal claimed these tolas as they had all along been administered as parts of West Bengal. It was decided by the Registrar General that Census in these tolas would be taken by the West Bengal authorities without prejudice to the claims of either Government, pending final settlement of the issue between them.

3. The following abbreviation has been used for the status of a town :
M . . Municipality

TABLE A-III—VILLAGES CLASSIFIED

202.1	Gur and Khandsari making from sugarcane and palm	2	2	..
205	Production of bread, biscuit, cake and other bakery products	4	3	1
206	Production of butter, cream, ghee, cheese, chhana, khowa and other dairy products	17	17	..
207	Oil pressing ghani, kolhu or by small machines	98	96	2
209.2	Making of sweet-meats, laddu, peda, barphi, batasa etc.	29	28	1
209.3	Sattu, bhunja, papar, barri, danauri, tilauri, sewai, apalam etc.	7	7	..
209.4	Making of chura or chira, muri, murki, khoi	31	30	1
220	Manufacture of bidi	167	162	5
231	Cotton spinning (by charkha and takali)	234	227	7
233.2	Bleaching of cloth (cotton) and yarn	1	1	..
233.3	Tie and dye (bandhani) of cloth and yarn	1	1	..
235	Cotton cloth weaving in handlooms	523	519	4
238.1	Making of fishing net	13	13	..
238.3	Making of other nets	15	15	..
240	Jute pressing and baling	1	1	..
241	Jute spinning and weaving of mats, asanis etc.	5	2	3
244.2	Making of rope and cordage, out of jute	21	21	..
244.6	Making of other products from jute and similar fibres such as hemp, mesta	2	2	..
253	Spinning of wool by charkha or takali	2	2	..
262.1	Spinning of tussar, other than in mills	92	92	..
262.3	Spinning of silk, other than in mills n.e.c.	46	45	1
264.1	Weaving of mashru, himroo, brocade, kinkhab by handloom	6	6	..
264.2	Weaving of silk and artificial silk in handloom n.e.c.	183	183	..
271.1	Making of hosiery goods such as banyans, socks, sweaters, mufflers etc.	6	6	..
273.2	Traditional garments	53	45	8
280	Sawing, planing and milling of wood	4	4	..
281	Manufacture of wooden furniture and fixtures	8	8	..
282	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows	47	45	2
283.1	Carpentary works concerned with repairs of agricultural implements (wood)	2	2	..
284.2	Manufacture of wooden utensils, artware and decorative wooden boxes (patras)	1	1	..
284.9	Manufacture of other wooden products n.e.c.	114	112	2
288.2	Making of rope mats etc. from moonj and sawai grass and making of cadjar for thatching purposes	1	1	..
288.3	Making of mats, handfans and umbrellas from palm leaves	19	19	..
288.4	Making of sirki, moora and chhaj	14	14	..
288.5	Making of baskets and broomsticks	45	42	3
288.7	Caning of chairs	2	2	..
288.9	Manufacture of other articles from leaf, cane, bamboo, cork and other allied products n.e.c.	63	63	..
289.3	Making of artwheels	23	22	1
292.8	Manufacture of other paper products from paper, paper board and pulp n.e.c.	3	2	1
302.1	Printing works, printing of handbills, invitation cards etc.	1	1	..
310.2	Currying, tanning and finishing of hides and skins preparation of finished leather	18	18	..
311.1	Making of leather boots, shoes or chappals (slippers, sandals)	66	65	1
313	Manufacture of leather products such as leather upholstery suit cases, pocket-books, cigarette and key cases, purses, saddlery, whip, acquaducts (Kos), charsa and other articles	1	1	..
314	Repair of shoes, chappals and other leather footwear	13	12	1
335.8	Manufacture of perfumes, cosmetics and other toilet preparations n.e.c.	1	..	1
340.1	Making of bricks	1	1	..
340.2	Manufacture of roofing tiles	2	2	..
345	Manufacture of stone images and toys	1	1	..
350	Making of earthenware such as pottery, etc.	98	97	1
355	Making of clay models, earthen images, busts and statues	4	2	2
356.1	Making of earthen toys and artware	2	1	1
365.1	Making of utensils of brass and bell metal	14	6	8
365.5	Making of other brass and bell metal products n.e.c.	2	..	2
367.1	Making of tin utensils	1	..	1
367.2	Making of articles from tin sheets	1	..	1
368.3	Engraving, embossing, polishing and welding of metal products	1		1
369.1	Manufacture of agricultural implements such as ploughshare, khurpi, kudal etc.	38		2
369.4	Making and repairing of locks and trunks	2	..	2
369.5	Cutlery	1	1	..
369.8	Foundry Industry (including blacksmithy)	58	52	6
382	Manufacture of body of trucks and buses including carpentry and joinery work involved	1	1	..
388	Repair of cycle and rickshaw	5	5	..
393.2	Goldsmithy	120	109	11
394	Manufacture, repairing and tuning of musical instruments such as harmonium, tabla, sitar, bansuri etc.	6	5	1
399.1	Making of tikka and cowdung cakes	1	..	1
399.2	Making of beads from conch shells and horn goods	2	2	..
399.4	Making of lac bangles	1	..	1
399.7	Making of garlands from flowers, camphor, sandal wood shavings, seeds and other materials, like beads etc.	2	2	..
399.9	Making and repairing of goods n.e.c.	10	10	..

NOTES : Mother tongues printed in italics belong to countries outside the Indian Sub-continent.
Names occuring after hyphen (-) have been introduced by the Linguist to indicate groupings.
‡Denotes that the mother tongue is unclassified in Linguistic Survey of India.
†Denotes that the mother tongue though classified in L. S. I. is either tentatively reclassified or considered unclassifiable by the Linguist
‡†Denotes that the mothertongue is unclassified by Grierson but is tentatively classified by the Linguist.

TABLE 17·1—CALENDAR OF IMPORTANT EVENTS

1900 .. Outbreak of Cholera in an epidemic form and taking away a heavy toll of life in English Bazar.

1905 .. Malda District was transferred back from the Bhagalpur Division to the Rajshahi Division on the formation of the province of Eastern Bengal and Assam. (It was formerly a part of Rajshahi Division, but was transferred from that Division to Bhagalpur in 1876.)

1906 .. There were heavy floods from an abnormal rise in the rivers and prices rose sharply.

1907 .. Severe hail-storms occured on 1st April. It began at 11-30 A.M. and lasted for half an hour. About 19 persons were killed, chiefly from house-collapse and inumerable persons were wounded. There was also widespread damage of crops.

1909 .. Katihar-Gadagari Railway was opened in this year. It helped the economy of the district to make much headway.

1933 .. Heavy hail-storms occured.

1934 .. Earthquake and Severe hail-storm occured.

1935 .. The Santal rebellion took place. The rebellion first started claiming Adina Mosque as a temple and was then directed against the ruling power. There was also a heavy flood in this year.

1937 .. A Museum, a Town Hall and a Library were established.

1938-39 Malda had its first supply of Electricity. Heavy flood again occured in 1938.

1944 .. Malda college was founded and was started as an Intermediate college. The District Hospital was taken over by the Government from the District Board.

1947 .. The district was affected by partition, and between the 12th and the 15th August, the fate of the district as to which side it should go, to East Pakistan or to India was undecided. During these few days, the district was under a Magistrate of East Pakistan. When the details of the Radcliffs Award were published, it came over to west Bengal on the 17th August. The district was deprived of the Thanas of Shibganj, Nawabganj, Bholahat, Nachol and Gomastapur. Subsequently the Bagge Tribunal in the early part of 1950 declared a minor decision on the Border between Malda and East Pakistan. After the partition, the district was included in the Presidency Division.

1948 .. The partition brought about some Voluntary migration in either direction. There was a bad flood. Malda College was affiliated to B.A. Standard.

1954 .. The whole district was covered by the Community Development Blocks.

1958 .. The Panchayats started in May-June. A new Hospital Building was opened. B. R. Sen Library was converted into District Library.

1959 .. Malda Town became prominent as a Commercial Centre with the extension of the Broad gauge Railway line from the Bank of the Ganges at Khejuriaghat (with a ferry accross the Ganges) to new Jalpaiguri connecting the old Railway system (Converted into Broad gauge) on N. F. Railway with a bridge over Mahananda. The town is now on the direct Railway route from Calcutta to North Bengal.

1962 .. Acharya Vinoba Bhabe entered this district on the 9th November in connection with the Bhudan Movement.

1963 .. A Stadium for Soccer and other games was opened at Malda Town. A Polytechnic College was started in Malda in 1962-63. The construction of Sambalpur Bundh in Ratua Police Station was also completed in 1962-63. The bundh is constructed for the purposes of irrigation and protection against inundation.

1964 .. The construction of Mallor Bundh in Harishchandrapur Police Station was completed. B. T. College started. The elections to Anchal Parishads as a Preliminary to the setting up of Zilla Parishad to replace the District Board took place.

PART III

VILLAGE DIRECTORY

This Directory renders on account of each Village and each Town

THE VILLAGE DIRECTORY

Explanatory Note

The Village Directory renders an account of each village, entered on the Jurisdiction Lists for each Thana maintained by the Director of Land Records and Surveys, West Bengal. For villages included in town figures are given for the town and not for the separate villages which it contains. In case of a municipal town figures are presented separately for each ward. It gives the Jurisdiction List number, name, area of the village, number of Occupied Houses, Census Households, Total population, Scheduled Caste and Scheduled Tribe population, number of literates, and workers classified into the following nine Industrial Categories of Workers and Non-workers :

I As Cultivator

II As Agricultural Labourer

III In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities

IV At Household Industry

V In Manufacturing other than Household Industry

VI In Construction

VII In Trade and Commerce

VIII In Transport, Storage and Communications

IX In Other Services

X Non-workers

These basic data are presented police stationwise first for the rural portion and next for urban portion in this directory. A notional map of the police station has been given at the beginning of the Village Directory of each police station showing the Jurisdiction List number of each village and the location of town, if any, and an inset map of the district has also been given to show the location of the police station in the district. An alphabetical list of villages has been given facing each thana map. This list shows the Jurisdiction List number of each village and the names of the villages arranged alphabetically and its population in 1951 and in 1961. The thana map and the alphabetical list together facilitate location of any village in the Village Directory as well as on the spot.

A village, as a general rule, is the revenue survey *mauza*. The uninhabited *mauzas* and the *mauzas* that have been completely merged in urban areas have been indicated accordingly. In respect of the villages which are partly included in urban areas and partly outside the limits of a town, the particulars for the portion included in urban area have been clubbed together with the particulars furnished for the corresponding town and for the portion lying outside the town limits *i.e.*, included in the rural area, the data have been shown in the Village Directory against the corresponding *mauzas*. The area figures of the villages have been obtained from the 1951 Census Handbooks.

The area of the municipal towns has been presented according to the figures available from the respective municipalities.

For the definition of a Worker and Non-worker and detailed description of nine Industrial Categories of workers, the Explanatory Note to the Primary Census Abstract and other economic tables in Part II of this Volume may be referred to.

Symbols will frequently be seen against a village or town. They will indicate that the institutions offering the particular facilities which the symbol denotes is situated within the village or town. These facilities are shown by symbols as explained below against the name of village and town :

(a) Schools :
P=Primary Schools
H=High Schools

(b) Medical Facilities :
D=Dispensaries
Rhc=Rural Health Centres
Hos=Hospitals
Mcw=Maternity Child Welfare Centres

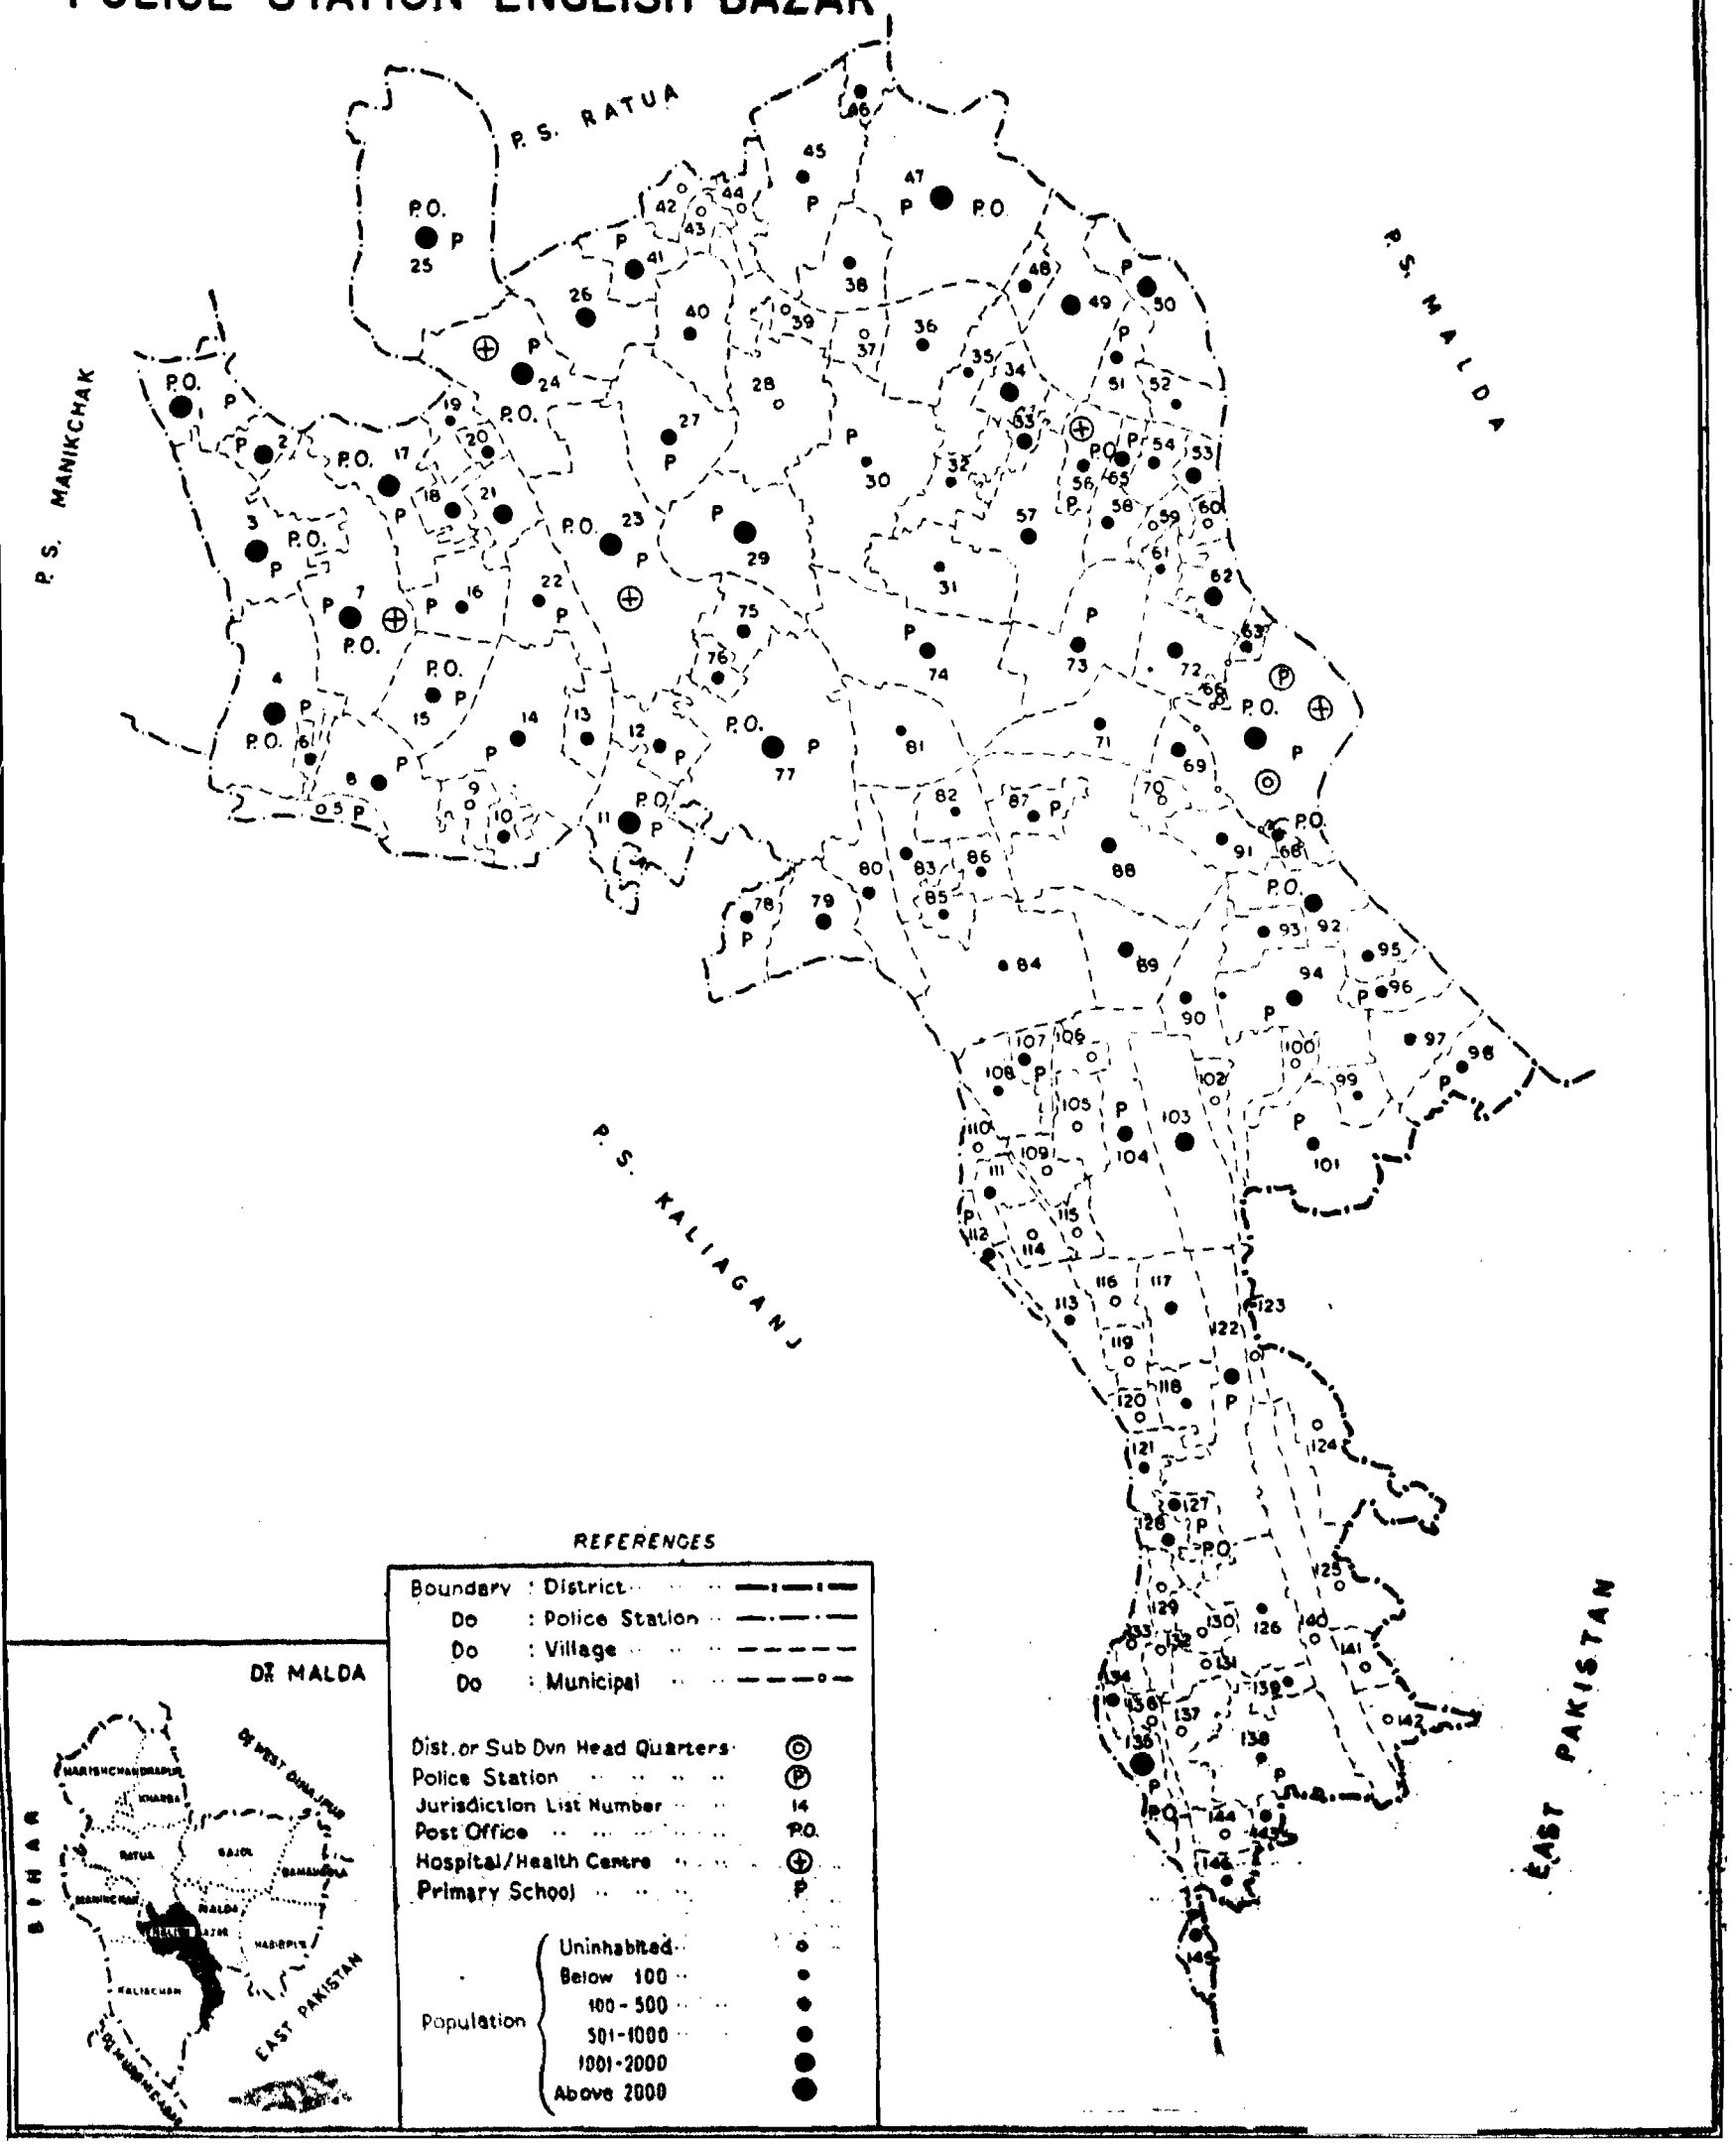

(c) Post Office :
Po=Post Office

(d) Electricity :
E=Electricity

(e) Library :
L=Library

Where figures like 5P or 2H or 2Hos *etc.*, occur they denote that the *mauza* or the town has five Primary Schools or two High Schools or two Hospitals *etc.*

† The population of Ratua Police Station in the District of Maida includes the population of five tolas of the *mauza* Govindpur (Thana No. 349 of Katihar Revenue Thana) on the Bihar-West Bengal border. West Bengal claimed those tolas as they had all along been administered as parts of West Bengal. It was decided by the Registrar General that Census in these tolas would be taken by the West Bengal authorities without prejudice to the claims of either Government, pending final settlement of the issue between them.

† The population of Ratua Police Station in the District of Malda includes the population of five tolas of the *mauza* Govindpur (Thana No. 349 of Katihar Revenue Thana) on the Bihar-West Bengal border. West Bengal claimed those tolas as they had all along been administered as parts of West Bengal. It was decided by the Registrar General that Census in these tolas would be taken by the West Bengal authorities without prejudice to the claims of either Government, pending final settlement of the issue between them.
