# DISTRICT CENSUS HANDBOOK
# 1951

## GHAZIPUR DISTRICT

# FOREWORD

Several States, including Uttar Pradesh, have been publishing village statistics by districts at each census. In 1941 they were published in U. P. under the title "District Census Statistics" with a separate volume for each district. In the 1951 census, when the tabulation has been more elaborate than ever in view of the requirements of the country, the district-wise volume has been expanded into a "District Census Handbook", which now contains the District Census Tables (furnishing data with break-up for census tracts within the district), the District Index of Non-agricultural Occupations, agricultural statistics from 1901-02 to 1950-51 and other miscellaneous statistics in addition to the usual village population statistics. The village population statistics also are given in an elaborate form giving the division of the population among eight livelihood classes and other details.

2. It may be added here that a separate set of district-wise volumes giving only population figures of rural areas by villages and of urban areas by wards and mohallas and entitled "District Population Statistics" has already been published. This separate series was necessitated by the urgent requirements of the U. P. Government for elections to local bodies.

3. The number of District Census Handbooks printed so far is twenty-nine. Special arrangements for speeding up the printing have now been made and it is hoped that the remaining Handbooks will be printed before the end of 1955.

RAJESHWARI PRASAD, I.A.S.,
*Superintendent, Census Operations,*
*Uttar Pradesh.*

# INTRODUCTION

## A—The District

1. The district of Ghazipur is bounded on the north-west by Azamgarh, on the north-east and east by Ballia, on the south-east by Bihar, on the south-west by Banaras and on the west by Jaunpur. The total area of the district is 1,306 square miles and its population in 1951 was 11·4 lakhs. It has 3 tehsils, 11 parganas and 14 thanas.

**Topography**

2. As a whole the district is a fertile plain, the only marked variations of surface being those caused by the broad valley of the Ganga and the channels of the minor streams. Save the wide expanses of low rice country the tract is well wooded, for though there are no forests and few jungles, groves of mango and other species are dotted about in profusion and there is a large number of scattered trees, many of which attain a magnificent growth. The population is extremely dense, and in most parts the unusual frequency of villages and hamlets forms a striking feature in the landscape. To the same cause may be attributed the closeness of cultivation, which has long been extended to all but the most unprofitable land, so that little waste remains beyond sterile sand or the barren plains of *usar* which in some parts are very common, particularly in the north. The general slope of the country is from north-west to south-east, this being the direction usually taken by the subsidiary drainage lines, though the rule is by no means universal. Ganga is the most important river and all the other rivers are directly or indirectly affluents of this river. The Ganga banks are alternately steep and shelving, the ordinary rule being that a precipitous bank on one side is faced by a gentle slope of alluvium on the other. There are, of course, many indications of former channels in the river valley, sometimes silted up at either end and converted into the characteristic narrow lagoons called *bhagars*. Gomti and Gangi are the two important tributaries of Ganga. There are also some other small rivers. They practically complete the drainage system of the district but at the same time there are certain tracts in which the natural drainage is far from perfect; specially in the north of the district such depressions have given birth to a number of shallow *jhils* and lagoons.

**Soils**

3. The northern uplands, which comprise all the country north of the Ganga, with the exception of parts of Saidpur and Ghazipur and the greater portion of Mohammadabad, for the most part resemble the ordinary uplands of the Gangetic plain. On the higher levels sand preponderates and as the ground slopes inland from the banks of the streams the soil becomes a good fertile loam, usually of a somewhat light character, and in the depressions this merges into a stiff clay which turns into *usar* wherever saturation has occurred, and at all times is suited for the cultivation of rice. The light sandy soil is generally known as *balua*, the loam as *doras*, corresponding to the *dumat* of other parts, and the clay as *matiyar*. The type of clay ranges from stiff brown loam known as *matiyar* to the hard grey *dhankar*, which is fitted only for the cultivation of rice and is so tenacious that it can only be worked when well soaked, while in dry weather it hardens into an iron consistency. This soil is often infected with the saline efflorescence called *reh*. There is also a large amount of *kankar* in the subsoil.

In the lowlands the soil is of a different nature varying from pure river sand to the fine loam deposit and the characterisitc *karail*, a dark variety closely corresponding to the *mar* of Bundelkhand. The soil contains much alumina and when wet becomes extremely soft, so that it is almost impossible to traverse it during the rains. It is so rich that no manure is required and a minimum of labour is demanded; while it produces a spring crop without irrigation after a normal rainy season. On the other hand *karail* when dry becomes exceedingly hard, splitting into great cracks and fissures making ploughing, sowing and irrigation impossible.

**Classification of area**

4. The figures of classification of area during the last 50 years are given in Table 2 of Part III of this volume. The proportionate area under the various categories works out as follows for 1950-51 :

| Particulars | Actual figures (in acres) | Percentage |
|---|---|---|
| Cultivated area .. .. .. .. .. .. | 625,899 | 75·1 |
| Culturable waste (excluding current fallow) .. .. .. .. | 85,589 | 10·3 |
| Current fallow .. .. .. .. .. .. | 27,721 | 3·3 |
| Forest .. .. .. .. .. .. .. | .. | .. |
| Area not available for cultivation of which— | 94,251 | 11·3 |
| (*a*) *Covered with water* .. .. .. .. .. | *43,410* | *5·2* |
| (*b*) *Under sites, roads and buildings* .. .. .. .. | *23,716* | *2·8* |
| (*c*) *Barren* .. .. .. .. .. .. | *27,125* | *3·3* |

The figures of the above table regarding culturable waste taken from the Season and Crop Report is, however, misleading. The State Agriculture Department conducted in 1949-50 a detailed enquiry through the District Officers regarding the nature of this area in each district. The following analysis of the area resulted from this enquiry:

| Particulars | Area (in acres) | Percentage |
|---|---|---|
| **Total culturable waste (A+B+C)** .. .. .. .. | **92,828** | **100** |
| A—Area under culturable waste land not available for immediate cultivation .. | 25,518 | 27·49 |
| (i) Forest under any legal enactment .. .. .. .. | .. | .. |
| (ii) Groves .. .. .. .. .. .. | 22,020 | 23·72 |
| (iii) Forests of timber trees .. .. .. .. .. | .. | .. |
| (iv) Thatching grasses, shrubs and bushes .. .. .. | 2,048 | 2·21 |
| (v) Land kept for grazing .. .. .. .. .. | 1,450 | 1·56 |
| B—Area under culturable waste land available for immediate cultivation but which could not be cultivated .. .. .. .. | 24,718 | 26·63 |
| Of which due to— | | |
| (i) *Kans* growth .. .. .. .. .. | 880 | 0·95 |
| (ii) Threshing floors .. .. .. .. .. | 921 | 0·99 |
| (iii) Malaria .. .. .. .. .. .. | 4 | 0·00 |
| (iv) Floods .. .. .. .. .. .. | 738 | 0·80 |
| (v) Lack of drains .. .. .. .. .. | 165 | 0·18 |
| (vi) Lack of water .. .. .. .. .. | 6,270 | 6·75 |
| (vii) Distance from *abadi* .. .. .. .. .. | 302 | 0·33 |
| (viii) Damage from wild animals .. .. .. .. | 1,304 | 1·40 |
| (ix) Other causes .. .. .. .. .. | 14,134 | 15·23 |
| C—Area under culturable waste land that can be brought under immediate cultivation after some improvements besides the area given against 'E' .. | 42,592 | 45·88 |

From the above it will appear that of the total area recorded as culturable waste only 45·9 per cent. was really capable of being brought under immediate cultivation after some improvements.

Thus the land area cultivated and culturable including current fallow *per capita* works out to 64·8 cents of which 57·3* cents have already been brought under cultivation and only about 3·7 cents can be further brought under the plough after some improvements. It is obvious that the saturation point for cultivation has already been reached in the district.

**Climate and rainfall**

5. This district resembles the other eastern districts, the main characteristics being a comparatively short cold weather and great though not extreme heat in the summer, rendered much more trying and oppressive than in the western districts by the prevalence of easterly winds which frustrate all efforts to lower the temperature by artificial means. During the winter months the frosts are not uncommon. Heavy mists and fogs are characteristic of the cold weather.

The average rainfall for the last quinquennium was about 44·3 inches. During the last 45 years the rainfall has been less than 30 inches in only 3 years and has been usually over 35 inches. Early cessation of rains or an insufficient fall towards the end of the rainy season is particularly serious in this district owing to the large areas under rice.

**Irrigation**

6. Irrigation is derived from wells and other sources. In 1950-51 the irrigated area from wells was 89·1 per cent. and from other sources 10·9 per cent.

**Crops**

7. More acreage is sown under *kharif* crops than under *rabi*. The area under *rabi* in 1950-51 was 332,020 acres, that under *kharif* 420,442 acres and that under *zaid* 2,193 acres. The principal *kharif* crop is rice. The principal *rabi* crop is barley followed by gram. Sugarcane is one of the most valuable crops. The area under it was 29,934 acres in 1901-02 and now it stands at 34,239 acres.

* This figure also includes the area classed as current fallow.

## B—Analysis of the Statistics

1. The table below shows the two basic figures—land area and population—and the derived figures of land area *per capita*. **Population: General distribution and density**

| Tehsil | Population (in lakhs) | Density (number per square mile) | Land area (in lakhs of acres) | Land area *per capita* |
|---|---|---|---|---|
| Ghazipur .. .. .. .. | 4·88 | 875 | 3·57 | 0·73 |
| Mohammadabad .. .. .. | 2·86 | 913 | 2·00 | 0·70 |
| Saidpur .. .. .. .. | 3·67 | 858 | 2·74 | 0·75 |
| *Ghazipur district* .. .. .. | *11·41* | *879** | *8·31* | *0·73* |

The district though forty-seventh in order of area stands twenty-seventh in the State in respect of population. The density per square mile is 879 while the average density of the State is 557 only. The density of the district has not been to a very great extent inflated by the presence of large towns. The rural density of the district is al so as high as 821, the density of the rural parts of the tehsils being: Ghazipur 768, Mohammadabad 873 and Saidpur 845.

2. The district had a rapid increase of population during the last fifty years. Its population in 1951 was 33·0 per cent. higher than what it was fifty years ago. Compared to this the increase in the population of the State during the corresponding period has been only 30 per cent. The table below exhibits the variation in the total, rural and urban population for the last five decades. **Growth of population**

| Census year | Population | | | Variation | | |
|---|---|---|---|---|---|---|
| | Total | Rural | Urban | Total | Rural | Urban |
| 1901 .. | **858,090** | 789,083 | 69,007 | | | |
| 1911 .. | **788,537** | 716,988 | 71,549 | **—69,553** | —72,095 | +2,542 |
| | | | | (—8·1) | (—9·1) | (+3·7) |
| 1921 .. | **781,570** | 707,076 | 74,494 | **—6,967** | —9,912 | +2,945 |
| | | | | (—0·9) | (—1·4) | (+4·1) |
| 1931 .. | **824,971** | 734,410 | 90,561 | **+43,401** | +27,334 | +16,067 |
| | | | | (+5·6) | (+3·9) | (+21·6) |
| 1941 .. | **985,380** | 878,567 | 106,813 | **+160,409** | +144,157 | +16,252 |
| | | | | (+19·4) | (+19·6) | (+17·9) |
| 1951 .. | **1,141,278** | 1,016,272 | 125,006 | **+155,898** | +137,705 | +18,193 |
| | | | | (+15·8) | (+15·7) | (+17·0) |

Between 1901 and 1921 the population of the district recorded a decrease of 8·9 per cent. when that of the State decreased by 4 per cent. only. Plague mortality was very high in the district during the decade 1901—11, while the influenza reduced the population during 1911—21. During 1921—51 there were no abnormal deaths from plague or other epidemics and the population of the district recorded an increase of 46·0 per cent. against an increase of 35·5 per cent. in the population of the State during the same period.

The variation in the population of the tehsils during 1941-51 are shown in the marginal table. The increase in the population of the district has been well above the State average (11·8 per cent.) The increase is spread evenly in Ghazipur and Mohammadabad tehsils but Saidpur tehsil has shown a higher increase.

| Tehsil | Percentage variation 1941—51 |
|---|---|
| *Ghazipur district* .. .. .. .. | *+15·8* |
| Ghazipur .. .. .. .. .. | +14·2 |
| Mohammadabad .. .. .. .. | +14·9 |
| Saidpur .. .. .. .. .. | +18·8 |

*According to the area given by the Surveyor General it is 874.

**Vital statistics**

3. Births and deaths mainly account for the trends in the population growth. Migartion also is a factor though of a lesser importance. The following table gives the mean decennial registered birth and death rates and the calculated natural increase rates and the population growth rates of the last three decades for the district as a whole and for its rural and urban areas.

| | Total | Rural | Urban |
|---|---|---|---|
| *Mean decennial birth-rate* | | | |
| 1941—50 .. .. | **25·8** | 25·8 | 26·4 |
| 1931—40 .. .. | **33·7** | 34·5 | 27·4 |
| 1921—30 .. .. | **30·1** | 32·5 | 8·9 |
| *Mean decennial death-rate* | | | |
| 1941—50 .. .. | **15·7** | 15·5 | 16·8 |
| 1931—40 .. .. | **19·1** | 19·6 | 15·0 |
| 1921—30 .. .. | **27·0** | 29·3 | 6·6 |
| *Mean decennial rate of natural increase* | | | |
| 1941—50 .. .. | **10·1** | 10·3 | 9·6 |
| 1931—40 .. .. | **14·6** | 14·9 | 12·4 |
| 1921—30 .. .. | **3·1** | 3·2 | 2·3 |
| *Mean decennial growth-rate* | | | |
| 1941—50 .. .. | **14·7** | 14·5 | 15·7 |
| 1931—40 .. .. | **17·7** | 17·9 | 16·5 |
| 1921—30 .. .. | **5·4** | 3·8 | 19·5 |

There are large omissions in the registration of births as well as deaths and so the above rates do not represent the true picture at all. These may, however, be taken to be roughly indicative of the trends. Both birth and death rates have fallen during the last decade. Furthermore, the figures of natural increase and growth-rate suggest a gain of population by migration during 1921—30, 1931—40 and 1941—50.

The average yearly mortality from various causes in the district during 1941—50 was as follows :

| Causes | Number of deaths | Percentage of total deaths |
|---|---|---|
| Fever .. .. .. .. .. .. .. | 12,345 | 74·2 |
| Dysentry and diarrhoea .. .. . .. | 106 | 0·6 |
| Respiratory diseases .. .. .. .. .. .. | 162 | 1·0 |
| Plague, cholera and small-pox .. .. .. .. .. | 2,012 | 12·1 |
| Others .. .. .. .. .. .. .. | 2,019 | 12·1 |

As in the rest of the districts of the state ' fever ' is responsible for a majority of deaths. But fever covers a large number of ailments which the reporters are unable to identify. Deaths from plague, cholera and small-pox in the district are one of the highest in this State. *(Vide* Table 1, Part III of this Volume).

**Migration**

4. About 93·68 per cent. of the people enumerated in the district at the census of 1951 were born there, 4·85 per cent. were born in other districts of the State, 1·44 per cent. in other parts of India and 0·03 per cent. came from other countries. Of the imigrants from the districts of the State as many as 54,255 (males 8,011, females 46,244) came from the other districts of the same natural division and only 1,053 (males 417, females 636) came from other parts of the State. The sex proportion suggests that most of the migration from the neighbouring districts is marriage migration. Of 14,789 immigrants from the adjacent States 14,632 (males 1,519, females 13,111) are from Bihar. Most of this migration is also marriage migration. Of the immigrants who have come from territories beyond India 171 (males 71, females 100) are from Pakistan and 116 (males 53, females 63) are from Burma. The Pakistan-born are the displaced persons, who numbered 217 in the district. Persons born in Burma are generally the descendents of the former emigrants from the district. The number of Nepal-born was 16 (males 14, females 2).

There was no non-Indian national in the district.

Unfortunately the figures of emigration are not available. On the balance of migration according to vital statistics, however, the district appears to have gained 18,785 persons during 1921—30, 28,609 persons during 1931—40 and 47,696 persons during 1941—50. But it should be borne in mind that the figures contain a large element of registration error and are only indicative of the trends. (*Vide* Tables D-IV and D-VI)

**Decline of cultivation *per capita***

5. We may now analyse the growth of population in the district during the last thirty years in relation to the growth of cultivation during the same period. The figures are exhibited in the marginal table. (Figures of area shwon under the census years are the quinquennial averages for the five years ending with the crop year immediately preceding the census year). It is obvious that cultivation has failed to keep pace with population. The cultivated area *per capita* has gone down to 53·6 cents in 1951 from 73·2 cents in 1921. The magnitude of this drop is about one-third of the 1921 level. It means that (other things being equal) every man, woman and child must expect to get less food and other agricultural produce from the land in 1951 than in 1921.

| Census year | Population* | Net area sown (in acres) | Area of cultivation *per capita* (in cents) |
|---|---|---|---|
| 1921 .. | 832,289 | 609,560 | 73·2 |
| 1931 .. | 824,971 | 576,132 | 69·8 |
| 1941 .. | 985,380 | 596,287 | 60·6 |
| 1951 .. | 1,141,278 | 612,449 | 53·6 |

**Double cropped area *per capita***

6. It may be examined whether this shortage has been compensated by an increase in yield per acre. Increase in yield can be brought about by more double cropping, more irrigation, better fertilisation and better culture. The average (quinquennial) area sown more than once was 146,810 acres in 1921, 120,520 acres in 1931, 135,537 acres in 1941 and 157,502 acres in 1951. The figures of double crop cultivation *per capita* in cents are as below :

| Particulars | Quinquennial averages for the year preceding 1951 | 1941 | 1931 | 1921 |
|---|---|---|---|---|
| Double crop cultivation *per capita* in cents .. .. | 13·8 | 13·8 | 14·6 | 17·6 |
| Unirrigated double crop cultivation *per capita* in cents .. | 13·4 | 13·5 | 14·4 | 17·3 |
| Irrigated double crop cultivation *per capita* in cents .. | 0·4 | 0·3 | 0·2 | 0·3 |

It is evident that the double cropped area is not keeping pace with the growth of population.

**Irrigated area *per capita***

7. The average irrigated area in the district was 219,757 acres in 1921, 160,346 acres in 1931, 214,039 acres in 1941 and 202,087 acres in 1951. The average area irrigated more than once was 2,779 acres in 1921, 1,600 acres in 1931, 2,507 acres in 1941 and 4,450 acres in 1951.

The figures of irrigation *per capita* are shown in the table below :

| Particulars | Years 1951 | 1941 | 1931 | 1921 |
|---|---|---|---|---|
| Irrigated single crop cultivation *per capita* in cents .. | 17·3 | 21·5 | 19·2 | 26·1 |
| Irrigated double crop cultivation *per capita* in cents .. | 0·4 | 0·3 | 0·2 | 0·3 |

The trend since 1921 is towards a decline.

**Cropped area**

8. The area under food crops has gone down. During the quinquennium 1916—21 93·4 per cent. of the cropped area was under food crops and 6·6 per cent. was under non-food crops. Thirty years after, during 1946—51 the cropped area under food crops was 92·1 per cent. and that under non-food crops 7·9 per cent.

The proportionate area under different crops between 1921 and 1951 was as follows :

| Quinquennial average of | Total cropped area | Percentage of cropped area under Rice | Wheat | Barley | Maize | Gram | Juar | Bajra | Others |
|---|---|---|---|---|---|---|---|---|---|
| 1911—16 .. .. | 736,825 | 18·9 | 4·5 | 19·6 | 1·4 | 9·6 | 2·5 | 5·4 | 38·1 |
| 1916—21 .. .. | 745,905 | 21·5 | 4·7 | 17·7 | 1·3 | 10·3 | 2·7 | 4·5 | 37·3 |
| 1921—26 .. .. | 728,859 | 22·0 | 5·7 | 17·2 | 0·7 | 12·7 | 2·3 | 4·1 | 35·3 |
| 1926—31 .. .. | 703,001 | 22·4 | 5·7 | 16·3 | 0·9 | 12·6 | 2·5 | 4·1 | 35·5 |
| 1931—36 .. .. | 703,037 | 20·7 | 6·0 | 18·1 | 0·8 | 11·2 | 2·5 | 4·5 | 36·2 |
| 1936—41 .. .. | 743,108 | 23·2 | 5·8 | 15·6 | 0·7 | 12·4 | 2·2 | 3·7 | 36·4 |
| 1941—46 .. .. | 744,069 | 23·6 | 4·6 | 16·2 | 1·1 | 14·6 | 2·3 | 4·2 | 33·4 |
| 1946—51 .. .. | 768,984 | 26·9 | 4·4 | 17·1 | 1·0 | 12·8 | 1·9 | 3·7 | 32·2 |

*The figures of population of the various censuses relate to the then lay-out of the district.

The area under linseed, indigo, opium and tobacco has decreased. Under linseed the area in 1901-02 was 799 acres ; in 1950-51 it was 262 acres. Under indigo the area in 1901-02 was 1,489 acres and in 1950-51 it was nil. Under opium the area in 1901-02 was 15,034 acres ; in 1950-51 it was only 1,799 acres. The area under tobacco in 1901-02 was 447 acres while in 1950-51 it was only 114 acres. The area under sugarcane has, however, increased from 29,934 acres in 1901-02 to 34,239 acres in 1950-51.

**Live-stock, ploughs and carts**

9. Live-stock in this country live for a larger part of the year on by-products of agriculture supplemented by green fodder crops. They have, therefore, to be co-related not only with the grazing available but also with the total area under cultivation which carries a major portion of the burden of supporting the cattle population.

As will appear from table 3 of Part III the total number of cattle and buffaloes which had decreased during 1935—44 has increased to 4·9 lakhs in 1951.

The number of working cattle and buffaloes was 176 thousands in 1935, 144 thousands in 1944 and 193 thousands in 1951. The increase during 1944—51 is due to the progressive fractionalization of holdings. The number of carts also started rising since 1935 and now stands at 3·6 thousands. The average net area cultivated per plough is 5·7 acres in 1951 as against 7·3 acres in 1920 and the average net cultivated area per pair of working cattle works out to 6·5 acres in 1951 as against 6·6 acres in 1935.

Breeding cows and she buffaloes were 162 thousands in 1935, 138 thousands in 1944 and 161 thousands in 1951. The cows and females buffaloes in milk per 1,000 of human population were 37 and 25 respectively. Owing to the poor milk yield the share of milk per head is only a few ounces per day.

The sheep were 67 thousands in 1935, 57 thousands in 1944 and 60 thousands in 1951. The goats have increased since 1944. They were 56 thousands in 1944 and now their number stands at 98 thousands.

The number of horses and ponies is almost stationary since 1944 and stands at 3·6 thousands. Donkeys during the same period have, however, increased from 3·9 thousands in 1944 to 4·7 thousands in 1951.

Poultry has increased from 34·5 thousands in 1944 to 69·9 thousands in 1951.

Distributed on 1,000 of human population the figures of the main categories of live-stock in 1951 are as follows :

| Cattle | Buffaloes | Sheep | Goats | Poultry | Others |
|---|---|---|---|---|---|
| 336 | 92 | 53 | 86 | 61 | 14 |

10. To sum up, the population of the district is growing up at the biological natural rate since 1921 but on the other hand, the land area *per capita*, the double cropped area *per capita* and the irrigated are *per capita* have declined. There is at the same time no evidence that crop yield per acre has increased. The magnitude of the absolute numerical increase in relation to the practically stationary acreage under cultivation is, therefore, a great strain on the economy of the district.

**Villages and towns**

11. The district has 2,432 villages and 12 towns. Out of 11·4 lakhs of people who were counted at the census of 1951, about 10·2 lakhs lived in villages and 1·3 lakhs in towns, i.e., there were as many as 890 people per 1,000 of population who lived in rural areas and only 110 in towns. The corresponding figures for the State as a whole are : rural 864, urban 136.

The rural population per inhabited village works out to 418. The villages do not necessarily comprise of a single compact site. There are as many as 6,008 hamlets in the district. The population per hamlet is 169. The medium-sized village with inhabitants numbering between 500—2,000, is the dominant type in the district. Of the rural population 52·0 per cent. live in such villages ; 33·9 per cent. live in villages of population under 500; 13·1 per cent. live in villages of population between 2,000—5,000 ; and 1·0 per cent. live in villages of population of over 5,000.

Towns vary in number of inhabitants even more widely than villages. Only 3·6 per cent. of the urban population live in a town of population under 5,000 (Suhwal) ; 40·2 per cent. of the urban population live in towns of population between5,000—10,000 (Nauli, Bahadurganj, Saidpur, Bara, Zamania, Mohammadabad and Usia) ; 29·4 per cent. of the population live in towns of population between 10,000—20,000 (Gahmar, Reotipur, Sherpur) ; and 26·8 per cent. of them live in Ghazipur which had a population of 33,498 in 1951. The popu-

lation of Zamania has increased by 32·8 per cent. since 1941. The other towns have not recorded any significant increase.

**Occupations: Livelihood pattern**

12. Out of the total population of 1,141,278 (rural 1,016,272, urban 125,006) 890,244 (rural 833,761, urban 56,483) or 78·0 per cent. depend on agriculture for their means of livelihood and 251,034 (rural 182,511, urban 68,523) or 22·0 per cent. depend on non-agricultural sources. The following table gives the distribution of 100 persons of the total, rural and urban population of the district under the different livelihood classes:

| Description | Agricultural classes | | | | | Non-agricultural classes | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | Total | I | II | III | IV | Total | V | VI | VII | VIII |
| **Total** .. .. | **78·0** | **59·0** | **8·6** | **9·4** | **1·0** | **22·0** | **8·6** | **4·4** | **1·1** | **7·9** |
| Rural .. .. | 82·0 | 63·1 | 8·6 | 9·5 | 0·8 | 18·0 | 7·8 | 3·0 | 0·9 | 6·3 |
| Urban .. .. | 45·2 | 25·6 | 9·1 | 8·2 | 2·3 | 54·8 | 15·9 | 15·5 | 2·5 | 20·9 |

It is obvious that the district is one of the predominantly agricultural districts of the State. Here as many as 78·0 per cent. of the people depend on agriculture as against 74·2 per cent. in the whole State.

Of the total population of the district, 638,718 persons (males 255,186 females 383,532) or 56·0 per cent. have been classified as non-earning dependants. The percentage of non-earning dependants in agricultural population is 54·8 and in the non-agricultural 60·1. In the main they consist of the females. The male non-earning dependents are mostly children. 169,586 persons (males 43,666, females 125,920) or 14·8 per cent. of the population are earning dependants. Among the agriculturists their proportion is 16·4 per cent. and among non-agriculturists 9·2 per cent. Agriculture is a family occupation and it provides work to women and grown-up children in the family. The remaining 332,974 persons (males 271,873 females 61,101) or 29·2 per cent. of the population are self-supporting persons. Their proportion among the agriculturists is 28·8 per cent. and among non-agriculturist 30·7 per cent. Of the self-supporting persons 255,970 (males 209,933, females 46,037) belong to agricultural classes and 77,004 (males 61,940, females 15,064) to non-agricultural classes. On an average a self-supporting person maintains 2 non-earning dependants.

Of the 77,004 self-supporting persons belonging to the non-agricultural classes 1,875 persons (rural 1,644, urban 231) earn their livelihood from non-productive sources. Of the remaining 75,129 persons (rural 56,799, urban 18,330) 3,450 (rural 1,894, urban 1,556) or 4·6 per cent. are employers, 17,729 (rural 12,801, urban 4,928) or 23·6 per cent. are employees and 53,950 (rural 42,104, urban 11,846) or 71·8 per cent. are independent workers.

The distribution of 10,000 self-supporting persons of non-agricultural occupations, classified according to economic divisions is as follows:

| Name of division | Self-supporting persons by divisions |
|---|---|
| **All Industries and Services** .. .. .. .. .. .. | **10,000** |
| 0—Primary industries not elsewhere specified .. .. .. .. .. | 510 |
| 1—Mining and quarrying .. .. .. .. .. .. .. | 11 |
| 2—Processing and manufacture—foodstuffs, textiles, leather and products thereof .. | 2,114 |
| 3—Processing and manufacture—metals, chemicals and products thereof .. .. | 125 |
| 4—Processing and manufacture—not elsewhere specified .. .. .. .. | 1,187 |
| 5—Construction and utilities. .. .. .. .. .. .. | 533 |
| 6—Commerce .. .. .. .. .. .. .. .. | 1,886 |
| 7—Transport, storage and communication .. .. .. .. .. | 466 |
| 8—Health education and public administration .. .. .. .. .. | 738 |
| 9—Services not elsewhere specified .. .. .. .. .. .. | 2,430 |

There is no large scale industry worth mentioning in the district except the Government Opium Factory. Among the cottage industries the principal are cotton weaving, hemp, rope and *sutli* making and preparation of essential oils and perfumery.

**Variation in the livelihood pattern**

13. In the district the proportion of population depending on agriculture for their livelihood was 77·1* per cent. The unfortunate fact is that the agricultural proportion was increasing from 1901 to 1921 and has only slightly gone down in 1951. It was 70·5 per cent. in 1901. 75·2 per cent. in 1911, 80·7 per cent. in 1921 and now it stands at 77·1 per cent. The actual number of persons who depend on agriculture has increased to 879,604 in 1951 from 671,800 in 1921 or by 30·9 per cent. while the cultivated area has only slightly increased. This has resulted in the progressive fragmentation and subdivisions of holdings and increased pressure on impoverished soil. There appears to have been a gradual decline of vlilage arts and handicrafts. The cumulative result is the fall in the proportion of workers and a corresponding rise in dependency. The proportion of workers in the total population in 1951 was only 44·0 per cent. (agriculture 34·3 per cent., non-agriculture 9·7 per cent.) against 56·0 per cent. (agriculture 45·4 per cent., non-agriculture 10·6 per cent.) in 1921. The proportion of non-working dependants has consequently increased from 44·0 per cent. (agriculture 35·3 per cent., non-agriculture 8·7 per cent.) in 1921 to 56·0 per cent. (agri culture 42·8 per cent., non-agriculture 13·2 per cent.) in 1951. All this is an index of the increasing unemployment and under-employment. It is only by the diversion of the population to the cottage and other industries and by providing secondary occupations to the agricultural population that the present disequilibrium in the economy of the district can be redressed. (*Vide* Table B-I, B-II and B-III).

**Houses and households**

14. There were 166,622 occupied houses in the district, 147,603 in the villages and 19,019 in the towns. That gives an average of 6,885 persons per 1,000 houses or 6·9 persons per house in the rural areas and 6,573 persons per 1,000 houses or 6·6 persons per house in the urban areas.

There were 189,196 households in the district—166,397 in the villages and 22,799 in the towns. That gives an average of 6,106 persons per 1,000 households or 6·1 persons per household in the rural areas and 5,456 persons per 1,000 households or 5·5 persons per households in urban areas. The marginal table shows the development in the size of the household since 1921. The rural household was decreasing from 1921 till 1941 but has increased since then. It is bigger than the average rural household (5·07) in the State. The urban household has registered a decrease since 1941.

| Census year | Persons per 1,000 households of | |
|---|---|---|
| | Rural population | Urban population |
| 1921 .. .. .. .. | 6,140 | 4,873 |
| 1931 .. .. .. .. | 6,047 | 5,320 |
| 1941 .. .. .. .. | 5,930 | 5,848 |
| 1951 .. .. .. .. | 6,106 | 5,456 |

Of the 6,106 persons in every 1,000 rural households 3,043 are males and 3,063 females. There is a female excess, numbering 20 in every 1,000 households. Out of 5,456 persons in every 1,000 urban households 2,793 are males and 2,663 females. There is male excess numbering 130 in every 1,000 households. The type of migration will account for the difference.

Information regarding types of household and household relationship was also collected at this census with the help of a sample of about 4 per cent. According to this in every 1,000 sample households there are 6,045 persons (males 3,040, females 3,005) in the district. The corresponding figure for the total count is 6,027.

The table below shows the distribution by size of 1,000 sample households:

| Description | Small with 3 members or less | Medium with 4—6 members | Large with 7—9 members | Very large with 10 members or more |
|---|---|---|---|---|
| **Total** .. .. .. .. | 233 | 402 | 237 | 128 |
| **Rural** .. .. .. .. | 226 | 407 | 238 | 129 |
| **Urban** .. .. .. .. | 279 | 374 | 225 | 122 |

*The figure includes earning dependants according to their secondary means of livelihood while the figure of 78·0 in paragraph 12 includes earning dependants according to their principal means of livelihood and hence the difference.

Medium households are the dominant type in the villages as well as in the towns.

Family composition of 1,000 sample households is as follows:

| | | | Number in 1,000 households |
|---|---|---|---|
| A | Heads of households | Males (married) | 649 |
| | | Males (widowers) | 278 |
| | | Females | 73 |
| | Wives of heads of households | | 649 |
| | | | *1,649* |
| B | Sons of heads of households | | 1,235 |
| | Daughters of heads of households | | 903 |
| | | | *2,138* |
| C | Male relations of heads of households (other than sons) | | 838 |
| | Female relations of heads of households (other than daughters) | | 1,363 |
| | | | *2,201* |
| D | Persons unrelated to the heads of the households | Males | 40 |
| | | Females | 17 |
| | | | *57* |
| | | **Grand Total** | *6,045* |

Sons outnumber the daughters of the heads of the households. The latter leave the houses of their parents after marriage. Female relations (other than daughters) outnumber the male relations (other than sons). Such females are generally those who become members of these households by marriage. (*Vide* Tables A-I and C-I)

**Sex-ratio**

15. In the district as a whole the sex ratio was 1,000 i.e., there were 1,000 females to every 1,000 males. It varied among the tehsils. The lowest value was 994 in Ghazipur and the highest value was 1,008 in Saidpur. The ratio was 999 in Mohammadabad.

The sex-ratio is smaller in the towns than in the villages. For the district as a whole the sex-ratio in the villages was as high as 1,006 while that in towns was 950.

The corresponding figures of sex-ratio for the district were 958 in 1921, 951 in 1931, 972 in 1941 and 1,000 in 1951. The sex-ratio is increasing ever since 1931.

**Age-structure**

16. The number in each age group in the district is shown below as a percentage of the total number of all ages in the total, rural and urban population separatelty.

| Age-group | | Total population | | | Rural population | | Urban population | |
|---|---|---|---|---|---|---|---|---|
| | | Persons | Males | Females | Males | Females | Males | Females |
| Infants and young children | 0—4 | 14·4 | 7·3 | 7·1 | 7·4 | 7·1 | 7·4 | 6·7 |
| Boys and girls | 5—14 | 28·3 | 14·4 | 13·9 | 14·5 | 14·0 | 14·3 | 12·7 |
| Young men and women | 15—34 | 28·6 | 13·8 | 14·8 | 13·7 | 14·6 | 14·5 | 16·3 |
| Middle-aged men and women | 35—54 | 19·2 | 9·8 | 9·4 | 9·7 | 9·4 | 10·2 | 9·4 |
| Elderly persons | 55 and over | 9·5 | 5·0 | 4·5 | 5·1 | 4·5 | 4·0 | 4·5 |

It will be seen that the population is progressive. 42·7 per cent. of the population is of age under 15 and only 9·5 per cent. of it consists of elderly persons. Again it may be noted that a larger proportion of persons in working ages (15—54) is found in the urban areas. This is the effect of migration of workers to the towns from the villages many of whom are unaccompanied by their families. (*Vide* Table C-III)

**Marital status**

17. Out of every 10,000 persons in the district there are 5,031 males and 4,969 females.* Among them 2,163 males and 1,986 females are unmarried. If we reckon males and females together, the unmarried people are 41·5 per cent. of the population.

Of the males 43·0 per cent. were unmarried, 50·6 per cent. were married and 6·4 per cent. were widowed or divorced. Among females 40·0 per cent. were unmarried, 50·2 per cent. were married and 9·8 per cent. were widowed or divorced.

Of the married males 12·2 per cent. were of ages below 15, 44·2 per cent. were of ages 15—34, 32·0 per cent. were of ages 35—54 and 11·6 per cent. were of ages 55 and over. Among

*The corresponding figures for the total count are 5,000 and 5,000.

married females 14·4 per cent. were of ages below 15, 51·2 per cent. were of ages 15—34, 28·5 per cent. were of ages 35—54 and 5·9 per cent. were elderly women.

Marriage is universal. Among males and females aged 35 years and over 5·3 per cent. of the males and 6.8 per cent. of the females were found unmarried. Most of the females are married before they attain the age of 25. Child marriage is still prevalent 14·2 per cent. of the males of ages 0—14 and 17·2 per cent. of the females of ages 0—14 were returned as married. (*Vide* Table C-III)

**Languages**

18. About 99·96 per cent. of the people of the district returned Hindi, Hindustani or Urdu as their mother tongue. Among the other mother-tongues spoken the main is Bengali (0·03). Of the 11·4 lakh of people in the district only 145 or 0·01 per cent. were bilingual (in an Indian language). Those whose mother tongue is other than Hindi, Hindustani or Urdu are generally the migrants who are able to speak either of these as subsidiary language. Persons returning Hindi, Hindustani or Urdu as secondary language were 114 or 78·6 per cent. of those who were bilingual in some Indian language. (*Vide* Table D-I)

**Religion and special groups**

19. Of the 10,000 population of the district the number of persons belonging to different religions is : Hindus 9,159, Sikhs 2, Muslims 836 and Christians 3 ; of the 10,000 population in villages the numbers are : Hindus 9,338, Muslims 660 and Christians 2 ; of the 10,000 population in towns the numbers are : Hindus 7,710, Sikhs 15, Muslims 2,262 and Christians 13. Muslims, Sikhs and Christians are generally concentrated in the urban areas of the district as is the case in the other parts of the State.

There are 245 thousand persons belonging to the Scheduled Castes in the district. Their number per 10,000 of population works out to 2,147. In villages they are 2,266 for every 10,000 and in the towns their number per 10,000 is only 1,183. There are 13 Anglo-Indians (males 10, females 3) in the district. (*Vide* Tables D-II and D-III)

**Displaced persons**

20. The number of displaced persons in the district at the Census was 217 (males 120, females 97). Of them 57·6 per cent. have come from West Pakistan, 37·8 per cent. from East Pakistan and 4·6 per cent. from the districts which could not be traced. (*Vide* Table D-V)

**Literacy**

21. The percentage of male literacy was 18·8 in the district while that of the females was 3·7 in 1951. As compared to this the percentage of male literates in 1931 was 10·9 ; among females it was 1·0*. On January 1, 1951 there were 508 primary schools in the district with enrolment of 58,537 pupils. (*Vide* Table D-VII)

## C—Explanatory Note on the Statistics

1. The statistics in this volume have been presented in three parts :

I—District Census Tables

II—Village, Town, Pargana and Thana Statistics

III—Miscellaneous Statistics

Parts I and II contain census data. A brief account of the system of sorting of census slips and preparation of tables and abstract therefrom is given below.

Part III contains statistics throwing light on special aspects of population and its growth. These have been derived from miscellaneous sources. Table 1, "Vital Statistics", has been prepared from the published and unpublished records of the Director of Medical and Health Services, Table 2, "Agricultural Statistics", from the Annual Season and Crop Reports, Table 3, "Live-Stock, Agricultural Machinery and Implements", from the published figures of Live-Stock Census and Table 4, "List of Primary Schools ", from information specially supplied by District Inspector of Schools.

**Processing of census data**

2. The census data presented here has been derived from the census slips by a process of sorting, compilation and tabulation. In previous censuses the slips were first sorted by religion and this division was maintained throughout so that all data was cross-tabulated by religion. This procedure has been abandoned at this census and substituted by a division based on economic characteristics of the population. The whole population has been divided into eight livelihood classes, four of which are of the agricultural category and four of non-agricultural category as follows :

*Agricultural Classes—*

I—Cultivators of land wholly or mainly owned ; and their dependants

II—Cultivators of land wholly or mainly unowned ; and their dependants

III—Cultivating labourers ; and their dependants

IV—Non-cultivating owners of land ; agricultural rent receivers, and their dependants

*The numbers per mille (of the 10 per cent. sample population) of each sex aged 5 years and over who were returned as literate are as below :

| Males | | Females | |
|---|---|---|---|
| 1951 | 1931 | 1951 | 1931 |
| 223 | 130 | 42 | 13 |

*Non-agricultural Classes*—

V—Production (other than cultivation)

VI—Commerce

VII—Transport

VIII—Other services and miscellaneous sources

Another special feature of the sorting of this census was the separation, from the very start, of slips of displaced persons and of a 10 per cent. random sample from the remainder. This has enabled the data of displaced persons to be presented separately, while the 10 per cent. sample has been utilized for the preparation of Age Tables.

The slips of this census have been copied by Households into a National Register of Citizens, which has been prepared village-wise for rural areas and mohalla/ward-wise for urban areas. Table C-I is based on a 4 per cent. sample extracted from this Register.

**Tracts**

3. The slips were first sorted by villages for the preparation of the Primary Census Abstract. For the purpose of further sorting the State was divided into tracts consisting of (*a*) *rural tracts*, comprising the rural population of each tehsil, (*b*) *urban city tracts*, comprising the population of areas which had been declared as cities, (*c*) *urban non-city tracts*, comprising the population of urban areas of a district excluding areas declared as cities. Each tract was treated as a unit for sorting of slips. All data were compiled first by tracts and then by districts. This volume presents the tract-wise data for one district (with the exception of A and E Tables, which have been presented tehsil-wise), while the district-wise data for the whole State is contained in the following State volumes :

Part I-B—Subsidiary Tables

Part II-A—General Population Tables

Part II-B—Economic Tables

Part II-C—Age and Social Tables

**Explanatory notes**

4. Detailed explanatory notes are appended to each State table in the printed volumes of State tables. They apply to the tables in this volume also and should be referred to when necessary. A few notes of some of the tables are reproduced below :

*Table A-I*—Column 5 relating to "hamlets" has been introduced for the first time. Any distinctive cluster or agglomeration of houses has been treated as a "hamlet".

A clear distinction has been made in this census between a "House" and a "Household". A house is any human dwelling having a separate main entrance while a household is any commensal unit living in a census house. In previous censuses the figures under "Occupied Houses" used to be that of households, while the figures under columns 7—9 of the present table refer to occupied census houses as distinct from households.

*The Economic Tables*—The Indian Census Economic Classification Scheme, 1951, together with the occupational division and sub-division adopted for this census are given in Part II-B of the Report.

*Table B-I*—Each of the eight livelihood classes mentioned above has been divided into three sub-classes, with reference to the economic status, as follows :

(i) Self-supporting persons ;

(ii) Non-earning dependants ; and

(iii) Earning dependants

These were defined in the Instructions to Enumerators as follows :

"A 'self-supporting person' is one who is in receipt of an income and that income is sufficient at least for his own maintenance. To be 'self-supporting' a person need not be able to support his family. All that is necessary is that he should be earning sufficient for his personal needs. For purposes of this question the person enumerated is the unit and not the family or household. Any one who is not a 'self-supporting' person in this sense is a 'dependant'. A 'dependant' may be either an '*earning dependant*' or a '*non-earning dependant*'. The test is whether he secures a regular (and not casual) income, even though it may be small. Such income may be in cash or kind ; it may be continuous or seasonal employment. When the income which he secures is not sufficient to support him that person is an 'earning dependant'. A person who does not earn any income either in cash or kind is a 'non-earning dependant'. Where two or more members of a family household jointly cultivate land and secure an income therefrom, each of them should be regarded as earning part of the income. None of them is, therefore, a 'non-earning dependant'. Each of them should be classed either a 'self-supporting person' or an 'earning dependant' according to the share of income attributable to each. The same applies to any other business carried on jointly. The share of the income is what the head of household deems it to be. This does not mean that every one who works is necessarily a self-supporting person or an earning dependant. Thus, for instance, a housewife who cooks for the family, brings up the children or manages the household is doing very valuable work. Nevertheless, her economic status is that of a non-earning dependant, if she does not also earn an income, and should be recorded as such."

*Economically active, Semi-active and Passive persons*—All non-earning dependants are economically passive. They include persons performing house-work or other domestic or personal services for other members of the same family household. But they do not include "unpaid family workers" or persons who take part along with the members of the family household in carrying on cultivation or a home industry as a family enterprise.

All earning dependants are economically semi-active only. Though they contribute to the carrying on of economic activities, the magnitude of their individual contribution is deemed to be too small to justify their description as economically active. (Their contribution to economic activity is, however, taken into account in the tabulation of data based on secondary means of levihood.)

All self-supporting persons are, ordinarily economically active with the exception of the following classes and groups :

(*a*) All self-supporting persons of Agricultural Class IV.

(*b*) The following groups of self-supporting persons who are included in Non-agricultural Class VIII and derive their principal means of livelihood from miscellaneous sources (otherwise than through economic activity) :

(i) Persons living principally on income from non-agricultural property ;

(ii) Persons living principally on pensions, remittances, scholarships and funds ;

(iii) Inmates of alms-houses and recipients of doles;

(iv) Beggars and vagrants ; and

(v) All other persons living principally on income derived from non-productive activities.

*Table B-II*—For a self-supporting person who has more than one means of livelihood the *secondary means* of livelihood is the livelihood next in importance to his principal means of livelihood. For an earning dependant it is the source from which he secures his own income, where there are more than one subsidiary occupations only the one providing the largest income has been taken into account.

*Table B-III*—"Employers", "Employees" and "Independent Workers" have been defined as follows in the Instructions to Enumerators :

An "employer" is only that person who has necessarily to employ other person in order to carry on the business from which he secures his livelihood. Thus if a person employs a cook or any other person for domestic services, he should not be recorded as an "employer" merely for that reason.

An "employee" is a person who ordinarily works under some other person for a salary or a wage in cash or kind as the means of earning his livelihood. There may be persons who are employed as managers, superintendents, agents etc., and in that capacity control other workers. Such persons are also employees only and should not be regarded as 'employers'.

An "independent worker" means a person who is not employed by any one else and who also does not employ anybody else in order to earn his livelihood. (Sweepers, *dhobies*, *kahars* etc., who work for several masters are independent workers. If, however, any of them accepts whole-time employment under one master he becomes "employee". Daily wage-earners who work for different masters are likewise independent workers. But if they accept employment under one master, e.g., under a factory, they become "employees".)

*Tables C-II, C-III, C-IV and C-V*—The figures presented in these tables are based on single year age-return and have not been smoothed.

*Tables D-V* (i) *and* (ii)—For the purpose of these tables a "displaced person" has been defined as follows :

"A displaced person means any person who has entered India having left or being compelled to leave his home in Western Pakistan on or after the 1st March, 1947, or his home in Eastern Pakistan on or after the 15th October, 1946, on account of civil disturbances or on account of the setting up of the two Dominions of India and Pakistan."
