CELLULAR JAIL

Situated in Port Blair, the Cellular Jail stands as a silent witness to the history of the freedom struggle of our country. It mutely narrates the saga of sacrifices of our freedom fighters.

The jail museum and the marble plaques bearing the names of freedom fighters deported to the islands since 1857, when the First War of Indian Independence was fought, leave an indelible imprint on the minds of on-lookers about the relentless struggle our people had to wage to free the country from the foreign yoke.

The construction of the Jail having 698 cells was completed in 1906 as a three-storeyed edifice with seven wings, each stretching from a Central Tower like the spoke of a wheel. It was designed in such a way that the front portion of each wing faced the back side of the other wing, thus preventing the possibility of any communication between the prisoners.

The Cellular Jail was declared a National Memorial in 1979. The Jail is a place of pilgrimage for all freedom loving people.

FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The district census handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The district census handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part A related to village and town directory, Part B to village and town PCA and Part C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the format of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres, and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the village in the district which are inaccessible. A new column "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled caste and scheduled tribe population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class I and Class II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in

statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part A of the volume contains village and town directory and Part B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto tehsil/town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The district and tehsil/Police Station/C.D. Block etc., level maps depicting the boundaries and other important features have been inserted at appropriate places to further enhance the value of the publication.

This publication is a joint venture of the U. T. Administration and the Census Organisation. The data have been collected and compiled in the Union Territory under the direction of the Director of Census Operations, Andaman & Nicobar Islands on behalf of the U. T. Administration which is bearing the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

NEW DELHI
the 26th April, 1982.

P. PADMANABHA
REGISTRAR GENERAL, INDIA

PREFACE

The publication of District Census Handbook (DCH) follows its trail from 1951 Census—the first Census of independent India wherein the Village and Town Directories and villagewise and townwise Primary Census Abstract were comprehensively presented to the data users through DCH. Prior to 1951 Census, data at district level were incorporated in General Reports and Tables. In 1961 Census, DCH was made more informative as non-census data on some basic amenities available in villages and towns were also incorporated alongwith the census data. In 1971 Census, an attempt was made to enlarge its scope further by incorporating in it a fairly detailed account of administrative statistics in Part C of the DCH. However, keeping in view the time involved in obtaining administrative statistics and the resultant delay in the preparation of DCH, it was decided to abandon the presentation of administrative statistics in DCH in the publication programme of 1981 Census. The present volume, therefore, is the manifestation of 1961 pattern of DCH and contains, besides analytical note, village and town directory as it relates to the Union Territory of Andaman and Nicobar Islands.

The Village Directory gives a list of villages, their population and also information on basic amenities such as schools, drinking water, medical services, postal services, etc., as available in these villages. The Town Directory gives information about the area, population, growth rate as recorded in the past censuses, density, sex ratio, availability of transport and communications, municipal finances, civic, medical, educational and other amenities including the availability of trade, commerce and banking facilities.

Due to some reasons, DCH could not be published for earlier censuses in respect of the Union Territory of A & N Islands. The publication of this volume under the publication programme of 1981 Census, therefore, attains special significance. I hope that the volume would prove useful to researchers and data users, alike.

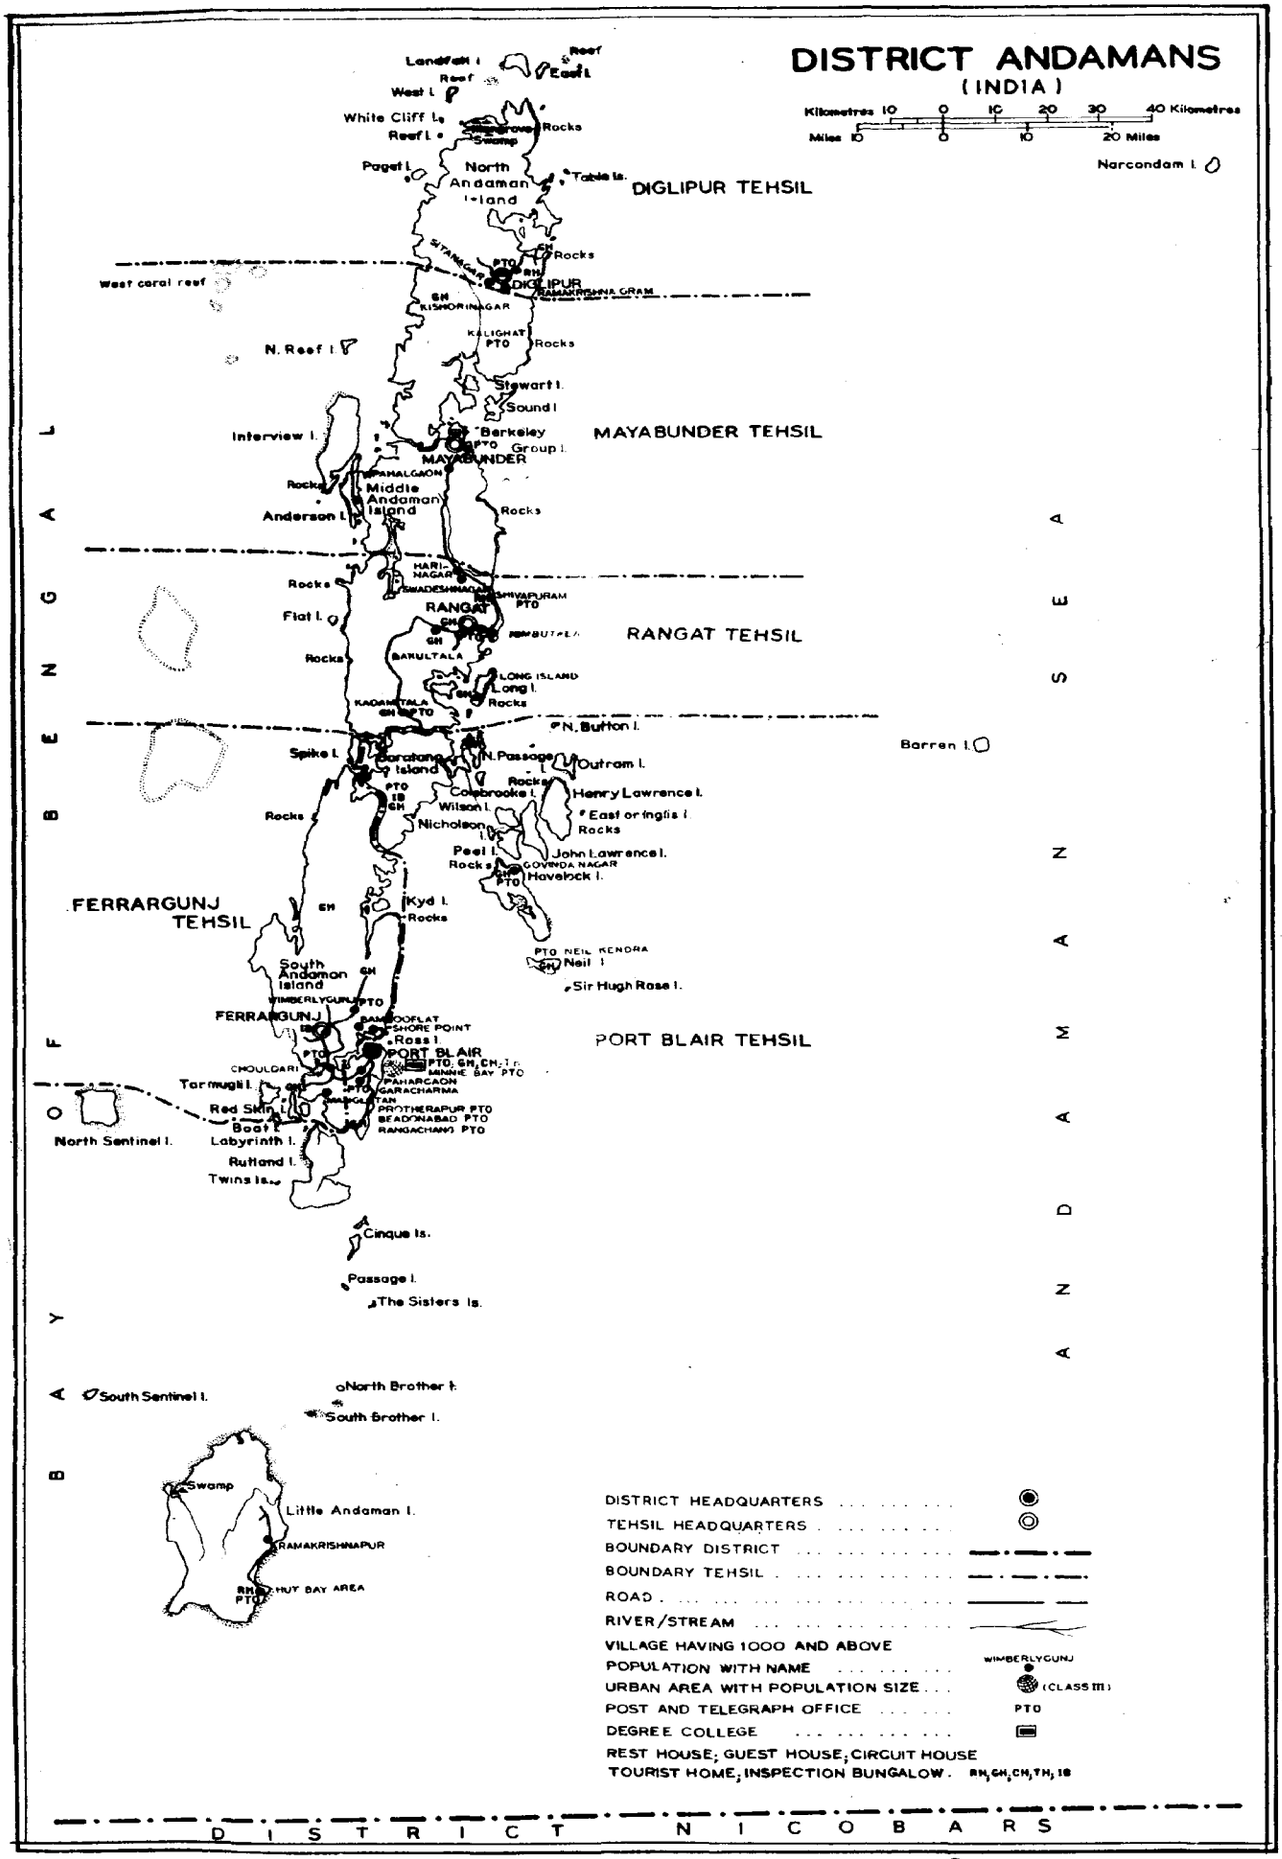

The project DCH was initiated under the able guidance of Shri P. Padmanabha, the former Registrar General, India, who also provided its frame and necessary guidance. I record my gratitude to him. I am also grateful to Shri V. S. Verma, Registrar General and Census Commissioner, India, for his valuable advice at various stages which proved helpful in finalising this volume. I am also thankful to Shri V. P. Pandey, Joint Registrar General, India, who not only helped us in all census matters but also lightened our burden in printing matters so far as census publications of this Union Territory are concerned.

The preparation of this volume involved collection of a variety of data and various types of information. Though a part of information was collected through normal communication channels, yet a lot of information had to be collected by deputing officials of the Directorate to various departments. The invaluable assistance rendered by the staff of technical and administrative wings of the Census Directorate in collection of the voluminous data is also acknowledged. In technical wing, I am thankful to S/Shri P. K. T. Nair and K. N. Mishra (Statistical Assistants), V. O. Koshy, B. N. Mishra, Pradip Das Gupta and Smt. M. V. Saraswathi and Smt. Thankom Thomas (Computors). I am also thankful to Shri M. L. Puri (Office Superintendent), Smt. Saramma Samuel (Assistant), Smt. N. Meenambal (Accountant), Smt. Pennamma Cherian and Smt. K. S. Nalini (Upper Division Clerks) and Shri Churchil (Lower Division Clerk). My thanks are also due to Shri K. V. K Nair (Junior Stenographer) for rendering all secretarial assistance ungrudgingly.

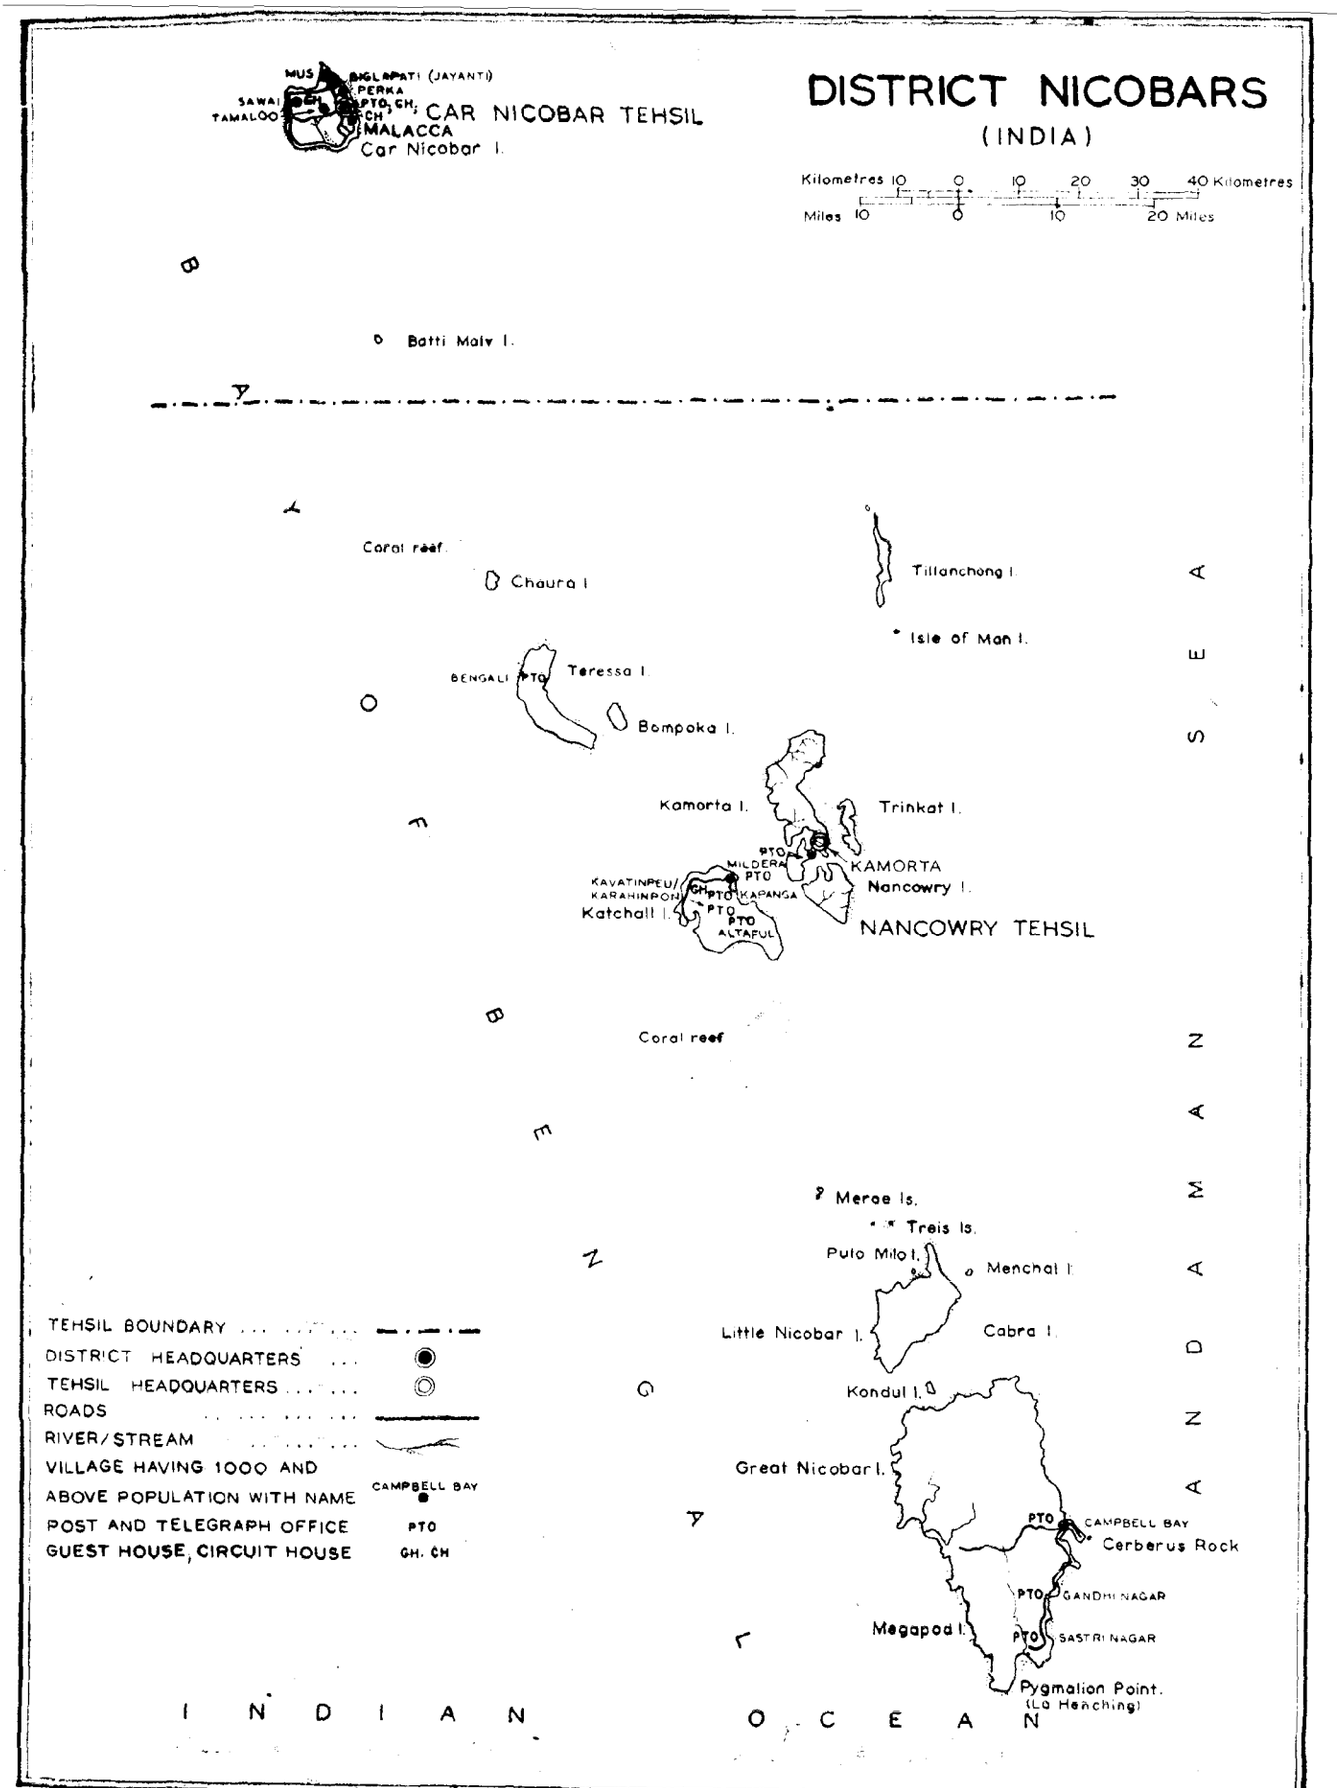

The first draft of this volume was prepared by Shri S. P. Sharma, Dy. Director. Consequent upon his transfer to the mainland, Shri R. K. Bhatia, his successor took upon himself the task of revising the volume under the supervision of Shri R. D. Kapur, my predecessor who also held the charge of Director of Census Operations, A & N Islands in an ex-officio capacity. Despite his pre-occupations with administrative matters, Shri Kapur involved himself deeply in giving a final shape to the volume. I record my appreciation for the deep personal involvement of these three officers but for whose joint efforts, the volume could not have gone to press.

S. R. SHARMA,
Chief Secretary,
Andaman & Nicobar Islands.

ANALYTICAL NOTE

Rural and Urban Areas

The Census data are traditionally presented by two major classifications, namely, the rural and the urban. Village or town is recognised as the basic unit of habitation.

Rural Areas

In the rural areas, Census village is the lowest unit. It covers the following habitations :

(i) All revenue villages notified as such,

(ii) All traditional tribal villages,

(iii) All places of human habitations located outside the revenue areas such as,

- (a) Forest camps;
- (b) A.P.W.D. camps;
- (c) Bush Police camps;
- (d) Contractors' camps; and
- (e) Encroachment areas, etc.

In the Andaman & Nicobar Islands, about 86 per cent of the total area is under forest. For the purpose of proper census taking and full coverage, all the places of human habitation mentioned in category (iii) above, which were located outside the revenue boundaries, were treated as separate 'Census villages'. The Forest, A.P.W.D. or Bush Police Camps, etc. which were located within the revenue boundary of a village were treated as part of the same village and their entity was not kept separate.

Urban Areas

A uniform definition of urban area was adopted throughout the country. According to the definition, the places which satisfied the following criteria were treated as "Urban" :

(a) All statutory towns, i.e., all places with a municipal corporation, municipal board, cantonment board or notified town area, etc.

(b) All other places which satisfied the following criteria:

- (i) A minimum population of 5,000;
- (ii) 75% of the male working population engaged in non agricultural (and allied) activity; and
- (iii) A density of population of at least 400 per sq. km. (1,000 per sq. mile).

The urban criterion of 1981 was the same as that for 1961 and 1971. However, whereas fishing, livestock, hunting, logging, plantations and orchards, etc. (falling in industrial category III) were treated as non-agricultural activities in the 1961 and 1971 Censuses, these activities were treated as agricultural in the 1981 Census for the purpose of determining the male working population in non-agricultural activities.

In so far as the Union Territory of Andaman & Nicobar Islands is concerned, there is only one town viz., Port Blair which has a Municipal Board and has been categorised as urban area. No other place qualifies to be declared as urban area as per the above conditions laid down for this purpose.

Urban Agglomeration

Apart from town/city, the 1971 Census concept of urban agglomeration was also adopted in the 1981 Census. Very often large railway colonies, university campuses, port areas, military camps, etc. come up outside the statutory limits of the city or town but adjoining it. Such areas may not by themselves qualify to be treated as towns but, if they form a continuous spread with the town, they are outgrowths of the town and deserve to be treated as urban. Such towns together with their outgrowths have been treated as one urban unit and called 'Urban Agglomeration'. An Urban Agglomeration may thus constitute :

(a) a city with continuous outgrowths (the part of outgrowth being outside the statutory limits but falling within the boundaries of the adjoining village or villages);

(b) a town with similar outgrowth or two or more adjoining towns with their outgrowths as in (a); or

(c) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

As regards this Union Territory, there was no "Urban Agglomeration" at the 1981 Census.

Standard Urban Area

A new concept of Standard Urban Area introduced in the 1971 Census was also followed at the 1981 Census. The essential requirements for the constitution of a Standard Urban Area are :

(i) It should have a core town with a minimum population of 50,000, (ii) the contiguous areas made up of other urban as well as rural administrative units should have mutual socio-economic links with the core town and (iii) in all probability this entire area should get fully urbanised in a period of two or three decades. Certain Standard Urban Areas were determined on this basis in 1971 and some basic data were presented for 1951, 1961 and 1971 for such areas and their components. It was proposed that similar data would be presented for the Standard Urban Areas in 1981 also. The idea was to present

the basic data for these areas for four to five decades so that the urbanisation process in those areas could be studied.

As in the case of 'Urban Agglomeration', no Standard Urban Area was either formed at the 1971 Census or the 1981 Census in this Union Territory.

Other terms and concepts adopted at the 1981 Census are discussed below:

Census House

A Census House is a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc. used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

In case of a building having a number of flats or blocks which were independent of one another having separate entrance of their own from the road or common staircase or common courtyard leading to the main gate, these were treated as separate census houses. While, if in a large enclosed area, there were separate buildings owned by different persons then each such building was treated as one or more separate house.

Where there were separate buildings within an enclosed compound owned by an undertaking or company or even government and actually in occupation of different persons, these were treated as separate buildings and, if in any one of those buildings there were flats in occupation of different households, each such flat in these buildings was treated as a separate 'census house'.

The detailed instructions with illustrations explaining the application of definition of 'census house' in different situations were issued for the benefit of enumerators. Each census house and building was to be numbered at the time of house-numbering and houselisting operations both in the urban and rural areas of this Union Territory. In the case of Port Blair M.B., the whole town was thoroughly surveyed and each building/census house, whether pucca or kutchha, permanent or temporary, was given a separate census house number with paint. This was done prior to housenumbering and houselisting operations. Similarly in the rural areas, all census houses were numbered with paint by the enumerators. These house numbers were adopted for the actual census enumeration also which was organised about five months after the housenumbering and houselisting operations.

Household

A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. Examples of unrelated households are boarding houses, messes, hostels, residential hotels, rescue homes, jails, *ashrams, etc.* These are called 'Institutional households'. There may be one member households, two member households or multi-member households. For census purposes, each one of these types was regarded as a 'household'.

In case of a group of persons who were unrelated to each other and found living in a census house but were not having their meals from the common kitchen, they were not treated as Institutional households and each such person was treated as a separate household.

Scheduled Castes & Scheduled Tribes

Under Article 341 (1) of the Constitution of India, the President may, with respect to any State, and where it is a State specified in Part A or Part B of the First Schedule, after consultation with the Governor or Rajpramukh thereof by public notification, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purpose of this Constitution be deemed to be Scheduled Castes in relation to that State.

Under Article 342 (1), the President may, with respect to any State, and where it is a State specified in Part A or Part B of the First Schedule, after consultation with the Governor or Rajpramukh thereof, by public notification, specify the tribes or tribal communities or parts of or groups within tribes or tribal communities which shall for the purposes of this Constitution be deemed to be Scheduled Tribes in relation to that State.

The process of notification of the statutory lists of scheduled castes and scheduled tribes in pursuance of these constitutional provisions was initiated in 1950-51. These lists have since been modified or amended or supplemented from time to time. Later on, the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act, 1976 came into force. The main purpose of this Amendment Act was to remove the area restrictions in respect of most of the Scheduled Castes and Scheduled Tribes.

Scheduled Castes

The statutory list of Scheduled Castes has been notified in pursuance of Scheduled Castes and Scheduled Tribes Orders (Amendment) Act of 1976. Since no caste was notified as Scheduled Caste in relation to A & N Islands, no data could be collected for Scheduled Castes for this Union Territory.

Scheduled Tribes

In terms of the Constitution (Andaman & Nicobar Islands) Scheduled Tribes Order, 1959 as stands amended by the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act, 1976 (108 of 1976), the following tribes are Scheduled Tribes in relation to this Union Territory:—

1. Andamanese, Chariar, Chari, Kora, Tabo, Bo, Yere, Kede, Bea, Balawa, Bojigiyab, Juwai, Kol.
2. Jarawas
3. Nicobarese

4. Onges
5. Sentinelese
6. Shom Pens

The Jarawas and the Sentinelese, who still lead an isolated life, could not be contacted and enumerated in any census in the past. However, a breakthrough was made in the case of the Jarawas by listing and enumerating 31 of them (21 males and 10 females) for the first time at the 1981 Census. These Jarawas were contacted at three places in Middle Andaman. The number of Sentinelese and the remaining Jarawas at the 1981 Census has been estimated in consultation with the members of the contact teams constituted by the A & N Administration to be friend these tribes.

Literacy

A person who can both read and write with understanding in any language has been taken as literate. A person who can merely read but cannot write is not literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

Economic Activity

One of the important features of the Census relates to collection of information about the economic activity of the people. At the 1981 Census, the questions which were canvassed in the Individual Slip to elicit information in this regard were the following:

I. Q. 14A Worked any time at all last year?
Yes

No. (H/ST/D/R/B/I/O)

II. Q. 14B If yes in 14A, did you work for major part of last year? Yes (1)/No (2)

III. Q. 15A Main activity last year?
Yes in 14B (C/AL/HHI/OW)

No in 14B (H/ST/D/R/B/I/O)

IV. 14B Yes—Any other work any time last year? Yes (C/AL/HHI/OW)/No
Q. 15B.----------
14B No—Work done any time last year? (C/AL/HHI/OW)

V. Q. 16 If no in 14A or 14B seeking/available for work? Yes (1)/No (2)

The formulation of these questions was a matter of considerable discussion at the Data Users Conferences and in technical groups. It may be recalled that soon after the publication of the provisional results of the 1971 Census, there was some debate regarding the comparison of the results with those of the 1961 Census and the influence that changes in concept or definition could have brought to bear on these results. At the 1981 Census it was considered desirable to obtain as detailed a profile of the working characteristics of the population as possible without losing the possibility of some comparability with the 1961 and the 1971 results. Also, it was thought that in the context of our country, the enquiry relating to current status of a worker was rather irrelevant and that usual status was more appropriate. Another anxiety was to obtain figures of participation of women and children in as accurate a manner as possible so that their participation could be recorded fully. Keeping these points in view the questions indicated above were evolved. Basically, the questions have been formulated so as to first attempt to divide the population into those who have worked any time at all during the last year and those who have not worked at all. Having classified the population into these broad groups, the next attempt has been to divide those who have worked any time into two groups, namely (i) those who have worked in some economic activity over a period of six months or more or in both the agricultural seasons and (ii) those whose work was considered as marginal or secondary. Finally, an attempt has also been made to determine whether those who were non-workers or those who were marginal workers were seeking or were available for work.

Work has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work.

In all these questions, the reference period is the one year preceding the date of enumeration. Certain types of work such as agriculture and household industry are carried on either throughout the year or only during certain seasons or parts of the year depending on local circumstances. In such cases the reference period has been the broad time span of the agricultural seasons preceding the enumeration.

Main Workers

The Main workers were those who had worked for a major part of the year preceding the enumeration. By major part of the year was meant that the persons had worked for 183 days (or six months) or more. The main activity of workers was classified into four categories viz. (i) Cultivator, (ii) Agricultural Labourer, (iii) Workers of household industry and (iv) Other workers. This was determined by the information available in Q. 15A of the Individual slip.

Marginal workers

Marginal workers were those who worked any time in the year preceding the enumeration but did not work for a major part of the year i.e., those who worked for less than 183 days or six months.

Non-workers

Non-workers were those who had not worked any time at all in the year preceding the date of enumeration.

Cultivators

A person was considered as cultivator if he or she was engaged either as employer, single worker or family worker in cultivation of land owned or held from government or held from private persons or institutions for payment in money, kind or share of

crop. Cultivation included supervision or direction of cultivation.

A person who had given out his/her land to another person or persons for cultivation for money, kind or share of crop and who did not even supervise or direct cultivation of land was not treated as cultivator. Similarly, a person working in another person's land for wages in cash or kind or a combination of both was not treated as cultivator.

Cultivation involved ploughing, sowing and harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, ground-nuts, tapioca, etc. and pulses, raw jute and kindred fibre crop, cotton, etc., but did not include fruit growing, vegetable growing or keeping orchards or groves or working on plantation like tea, coffee, rubber, cinchona and other medicinal plantations.

Agricultural Labourers

A person who worked in another person's land for wages in cash, kind or share of crop was regarded as an agricultural labourer. Such a person had no risk in cultivation but merely worked in another person's land for wages. An agricultural labourer had no right of lease or contract on land on which he worked.

For certain reasons, the growing of certain crops was not considered as agriculture. If a person was engaged in the growing of such crops he or she has not been considered as a cultivator or an agricultural labourer.

A person was classified as a cultivator or as an agricultural labourer *only on the basis of the crops grown*. The growing of the following crops was considered as cultivation. Therefore, a person who grew these crops or who worked on land on which these crops were grown has been classified as a cultivator or an agricultural labourer, as the case might be :—

(i) Cereal and millet crops, paddy, wheat, jowar, bajra, maize, ragi, barley, gram, etc.

(ii) Pulses : Arhar, moong, masur, urd, khesari, etc.

(iii) Fibre crops : Raw cotton, jute, mesta, sunhemp and kindred fibre crops.

(iv) Oil seeds : Sesamum, ground-nut, rape, mustard, linseed, castor, etc.

(v) Cash crops : Sugarcane.

The growing of the following crops was not considered as cultivation :

(i) Plantation crops : Tea, coffee, rubber, tobacco, pepper, cardamom, etc.

(ii) Edible nuts (other than ground-nut) : Walnut, almond, cashewnut, etc.

(iii) Fruits : Bananas, apples, grapes, mangoes, oranges, etc.

(iv) Coconut.

(v) Ganja, cinchona, opium and medicinal plants.

(vi) Betel-nut (areca).

(vii) Flowers.

(viii) Roots and tubers, chillies and spices (other than pepper and cardamom).

(ix) Vegetables.

(x) Other crops not specifically included under cultivation.

Workers engaged in Household Industry

For a person who returned his/her main activity as engaged in some production, processing, servicing or repair of articles or goods such as handloom weaving, dyeing, carpentry, bidi rolling, pottery manufacture, bicycle repairing, blacksmithy, tailoring, etc., it was to be ascertained whether it was a household industry.

Household industry was defined as an industry conducted by the head of the household himself/herself and/or by the members of the household at home or within the village in rural areas, and only within the precincts of the house where the household lived in urban areas. The larger proportion of workers in a household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory.

The main criterion of a household industry was the participation of one or more members of a household. This criterion applied in urban areas too. Even if the industry was not actually located in the house in rural areas there was greater possibility of the members of the household participating even if it was located anywhere within the village limits. In the urban areas, where organised industry was more prominent, the household industry was to be confined to the precincts of the house where the participants lived. In urban areas even if the members of the houshold by themselves ran an industry but at a place away from the precincts of their home, it was not considered a household industry.

A household industry is one that is engaged in production, processing, servicing, repairing or making and selling (but not merely selling) of goods. It does not include professions such as those practised by a pleader, doctor, barber, musician, dancer, *dhobi*, astrologer, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Sometimes it was likely that the person who might not be working in his/her own household industry might be working in another household industry. In such cases, enquiries were made whether the person who was not working in his/her own household industry was working in any other household industry and returns were recorded as per instructions given above.

As mentioned earlier, a household industry was related to production, processing, servicing, repairs or

making and selling of foods. However, a household could be engaged in certain other activities collectively but these might not qualify for being considered as household industries.

Certain activities even though conducted by members of the same household did not constitute a household industry. These are indicated below and therefore, the members of the family working in such industries were classified as 'other workers' (OW) and not 'HHI' :—

(i) Plantation work ;

(ii) Livestock maintenance and production such as cattle, goats, sheep breeding, poultry farms, bee-keeping, rearing of silk worm and production of cocoons and raw silk, production of milk, eggs, honey, wax, bones, etc. ;

(iii) Hunting, trapping and selling of the catch ;

(iv) Forestry and logging; log, fuel, charcoal production, gathering and selling of fodder and other forest produce, etc. ;

(v) Fishing including rearing of fish, collection of pearls, shells, sea products, etc. ; and

(vi) Mining and quarrying.

'HHI' stood for worker in household industry. The main characteristics of the household industry were the following :

(a) One or more members of the household must participate. Participation by hired labour must be minimum ;

(b) The activity should relate to some production, processing, servicing, repairing or making and selling of goods ;

(c) The goods produced should not be for consumption by the household itself but should be wholly or partly for sale :

(d) In an urban area the industry must be carried on *in the precincts of the house in which the household lives.* In the rural areas, the industry may be anywhere within the limits of the village ;

(e) The activity should not be on the scale of a registered factory; and

(f) Professions such as those practiced by pleader, doctor, barber, musician, dancer, *dhobi,* astrologer, etc., will not be 'HHI'.

Other workers

All those who worked in any field of economic activity other than cultivation, agricultural labour or household industry were 'other workers'. The types of workers that came under this category included factory workers, plantation workers, those in trade, commerce, business, transport, mining, construction, political or social work, all government servants, municipal employees, teachers, priests, entertainment artists etc. In fact, all those who worked in any field of economic activity other than cultivator, agricultural labourer and household industry, are 'other workers'. They were recorded as 'OW'.

BRIEF HISTORY OF THE DISTRICTS

The districts of Andamans & Nicobars were formed in the year 1974 vide Andaman & Nicobar Administration's Notification No. 110/74/F-15-145/74-J dated 19-7-1974. Prior to this, the Union Territory of A & N Islands was a uni-district territory.

Andamans District

The Andamans district was constituted with four tehsils namely, (1) Diglipur, (2) Mayabunder, (3) Rangat and (4) South Andaman. The South Andaman tehsil was further bifurcated into two tehsils, namely, 'Port Blair' and 'Ferrargunj' in the year 1975 vide A & N Administration's Notification No. 106/75/F.40-6/74-J dated 30th October, 1975. Thus, at the time of the 1981 Census, the district of Andamans comprised five tehsils the details of which are given below

Diglipur tehsil

This tehsil consists of 39 inhabited villages which are spread over in four inhabited islands, namely, (1) Narcondam, (2) East, (3) North Andaman (Part) and (4) Smith. This tehsil is located at the northernmost part of this territory.

Mayabunder tehsil

There are 58 inhabited villages in this tehsil as per the 1981 Census. These villages form part of five inhabited islands, namely, (1) North Andaman (Part), (2) Stewart, (3) Aves, (4) Interview and (5) Middle Andaman (Part).

Rangat tehsil

This tehsil consists of 66 inhabited villages which are mainly spread over part of Middle Andaman island. The other inhabited islands falling in this tehsil are porlob and Long islands.

Port Blair tehsil

This tehsil has the distinction of having the highest number of 81 inhabited villages among the five tahsils of the Andamans district. These villages are located in 9 inhabited islands viz. (1) North Passage, (2) Strait, (3) Baratang, (4) Peel, (5) Havelock, (6) Neil, (7) South Andaman (Part), (8) Rutland and (9) Little Andaman. Apart from having the highest number of inhabited villages, the lone town, 'Port Blair' which is the seat of the Andaman & Nicobar Administration, is also located in this tehsil.

Ferrargunj tehsil

This tehsil consists of 76 inhabited villages. All these inhabited villages except one are located in South Andaman island (Part). The remaining village i.e. Viper island is located very near to South Andaman Island.

Nicobars district

At the time of the 1981 Census, the district of Nicobars consisted of two tehsils, namely, Car Nicobar and Nancowry.

Car Nicobar tehsil

Car Nicobar tehsil has 16 villages. The area is predominently inhabited by the tribals.

Nancowry tehsil

This tehsil has the largest number of villages among all the seven tehsils of both the districts of Andamans and Nicobars. There are 165 villages in this tehsil. Out of these, 11 villages are uninhabited, Semi-nomadic tribals, Shom Pens, reside in this tehsil. At the time of the 1981 Census, Shom Pens were enumerated in 12 villages.

BRIEF HISTORY OF THE DISTRICT CENSUS HANDBOOK

The District Census Handbook was introduced for the first time at the 1951 Census. The District Census Handbook includes, inter alia, the village Directory and the Town Directory, besides the Primary Census Abstract. Prior to this, the much needed villagewise population figures were not available to the reader. Inclusion of District Census Handbook (DCH) in the publication programme was a big landmark in the history of the Indian Census. Since 1951, DCHs are being regularly published in each State. However, as regards the Union Territory of A & N Islands, no District Census Handbook has been brought out so far, though the villagewise basic population data was published in some census publications. The present volume is, therefore, the first of its kind ever brought out as a separate volume for this territory.

Initially, we had thought of bringing out separate district census handbooks for the two districts of Andamans & Nicobars of this Union Territory, but at a later stage, having regard to the volume of data available and in the interest of economy, we decided to bring out a combined volume for both the districts.

PHYSICAL ASPECTS

The Andaman and Nicobar islands are a group of picturesque Islands, big and small, inhabited and uninhabited, lying in the South-Eastern part of the Bay of Bengal. Often described as green islands in the marigold sun on which the horizons are fixed, they were known throughout the country as 'Kalapani' because of their having been a penal settlement under the British Rule, a reputation they are fast shedding since Independence.

The Unio Territorny of A & N Islands is cut off from the mainland by vast stretches of sea. The islands are sprawling in the Bay of Bengal from North to South and, with the exception of Narcondam island, these islands form almost like an arch within a parallelogram located between 6 and 14 degrees of the North Latitude and 92 and 94 degrees of East Longitude.

The total area of the Union Territory of A & N Islands as supplied by the Surveyor General is 8,249 sq.kms. The area of Andamans district is 6,408 sq.kms. while that of Nicobars district is 1,841 sq. kms. Each district is under the charge of a Deputy Commissioner.

This Union Territory comprises more than 300 named and unnamed islands and over 260 named and unnamed rocks. However, only 33* islands are inhabited. Of these, 20 are located in Andamans district and 13 in Nicobars district.

A Pradesh Council has been set up under the A & N Islands (Administration) Regulation, 1979. The Pradesh Council consists of the Administrator, the Member of the House of People representing the Union Territory, the Chairman of the Port Blair Municipal Board and 25 persons elected or nominated from the areas of the Union Territory in the manner specified in column (2) of the Table below paragraph 1 of the First Schedule to the A & N Islands (Administration) Regulation, 1979. In addition to these, two members are nominated by the Administrator, one belonging to any of the Scheduled Tribes of Andamanese, Onges and Shom Pens and one woman, if no woman becomes a member of the Pradesh Council under any of the foregoing clauses.

The Pradesh Council may discuss and make recommendations to the Administrator on—

(a) matters of the Administration relating to the Union Territory, involving geseral questions of policy and schemes of development in so far as they relate to matters enumerated in the State List or in the Concurrent List in the Seventh Schedule to the Constitution;

(b) the five-year plans and annual plan proposals for the development of the Union Territory;

(c) the estimated receipts and expenditure pertaining to the Union Territory to be credited to, and to be met from, the Consolidated Fund of India;

(d) proposals for undertaking legislation for the Union Territory with respect to any of the matters enumerated in the State List or in the Concurrent List in the Seventh Schedule to the Constitution; and

(e) any other matter which the Administrator may refer to the Pradesh Council for consideration and advice.

Till 11th November, 1982, the Chief Commissioner was the administrative head of the Union Territory. From 12th November, 1982, the territory has been placed under the charge of the Lt. Governor.

Note.—This figure does not include Chatham and Ross islands. Chatham was enumerated under South Andaman island whereas Ross was treated as an uninhabited island.

THE GEOLOGY

The following extracts from the Local Gazetteer, The Andaman and Nicobar Islands 1908', give a full geological background of these two groups of islands :

"The acceptable evidence on this subject that is so far available goes to show, on the assumption that except in the case of isolated volcanic peaks 200 fathoms is the extreme limit of the rising and sinking of land on the earth's surface, the possibility of there having been a time when the whole Andaman group with Preparis and Cocos formed one continuous hill connected with Cape Negrais, and that this hill was separated by a strait of, say 400 fathoms deep and, say, 30 miles wide, from the Nicobars considered as one island and the general Nicobar island again from Sumatra by a strait of, say, 600 fathoms deep, and perhaps not more than 30 miles wide. The 100 fathom line connects the Preparis Group with Burma (Cape Negrais) converts all the Andamans with the Cocos Group into one island and except for a few deeper soundings, all the Nicobars into another island. It would also convert the Invisible Bank, 40 miles East of the South Andamans, now a mere "rock awash" in mid ocean, into a considerable island and would considerably enlarge the area of Barren Islands, but it would leave Narcondam Island as it is. So that in reality, as above indicated, the Andamans and Cocos are, geographically speaking, exhibitions of one summit and the Nicobars of another of the sub-marine range between Burma and Sumatra, whose Eastern outlying spurs are expressed by the Invisible Bank and Barren Island. Narcondam belongs to the Asiatic Continent (Burma)."

"The accepted conclusive argument proving the isolation of the Andaman Sea from the connected oceans is that of Carpenter, who showed that the temperature of its great depths involved the existence all round it of submarine hills, the greatest depth of which below sea level could not be more than about 750 fathoms. The contours of the depths of this sea from such data as the available charts at my disposal afford seem to fully support Carpenter's conclusion. The openings into the Andaman Sea from the connected oceans are : from Bay of Bengal, the North and South Preparis Channels, the Coco Channel, Duncan Passage, Ten Degrees Channels and the Great Channel : from the Gulf of Siam, the Straits of Malacca. This last has a bar only a few fathoms deep and clearly isolates the Andamans Sea from the Gulf. The greatest depths in the other Channels are as under : North Preparis Channel, 47 fathoms; South Preparis Channel, 150 fathoms; Coco Channel, 36 fathoms; Duncan Passage, 17 fathoms; Ten Degrees Channel, 565 fathoms; Great Channel, 798 fathoms".

"On either side the line of the Andamans and Nicobars the sea rapidly deepens to 1000 fathoms and thence on the west in the Bay of Bengal to over 2000 fathoms within 60 miles of the Nicobars and probably within 100 miles of the Andamans; and on the east in the Andamans Sea to 2000 fathoms which 85 miles of the Nicobar and within about 95 miles of the Andamans. The contours thus show beyond doubt the existence of a lofty range of submarine mountains between Cape Negrais and Achin Head rising from the ocean depths upto 15000 feet and nowhere less than 6000 feet on the East, and upto 15000 feet and nowhere less than 10000 feet on the west, thus separating the Bay of Bengal from the Andaman Sea. Of this great range 700 miles long, taking 100 fathoms as a base, the continental and island summits are shown in one central line north to south as (1) Cape Negrais (Arakan Yomas) and Preparis Islands, (2) Cocos and Andaman Islands, (3) Nicobar Islands, (4) Achine Head (Sumatra). The Western Banks, the Sentinal Islands and Dalrymple Baks are lower summits to the west of the central line. According to the contours outlying summits of detached spurs of the central line to the east are Barren Island and the Invisible Bank. They also show that Narcondam and the Submarine the Sentinal Islands and Darlymple Banks are Central Andaman and Nicobar range, being summits of outlying spurs of the Yomas attached to Cape Negrais. Thus last fact supports the old assumption that the dormant Barren Island volcano belongs to the immediate Sunda group of volcanoes, while the long extinct Narcondam Volcano belongs to the Pegu group, both belonging to the general Sunda group".

"Narcondam and Barren Islands are, as already noted, properly volcanoes belonging to the Sunda group, and line, with the Nicobars, along one of the principal lines of weakness in the earth's surface. The Andamans are just off this and escape the violent earthquakes to which the others are liable".

FORESTRY

The Union Territory of Andaman & Nicobar Islands has a geographical area of 8,249 sq. kms. of which about 86 per cent is under forest. The break-up of area among various categories is as given below :—

	Percentage
Geographical area	100.00
Reserved forests	25.43
Protected forests	31.41
Tribal reserves	28.10
Sancturies and national parks . . .	1.21
Other than forest areas	13.85

The Andaman and Nicobar Islands abound in forest wealth. Forests are the main source of this territory's revenue and are also indisputably one of

the major sources of its economic development. The forests are mostly tropical evergreen, containing more than two hundred tree species of which only about fifty-five are of commercial value at present.

History

Forestry in this territory dates back to 1883. At that time there was no regular working plan and the harvesting of timber was confined to a very few species only viz., Padauk, Silvergrey and Kokko. The only processing unit was the Government Saw Mill at Chatham initially established in 1883. Apart from this unit, the only industry worth the name was a match-splint factory established in the private sector by M/s WIMCO in 1929. By 1930-31, more species found their way into the market due to development of match and plywood industries in the country. As a result thereof, forestry operations were intensified. But these operations received a severe setback during the 2nd World War. On re-occupation in 1945, forestry operations were restarted. However, the problems created by partition resulted in large scale induction of displaced persons for permanent settlement in the islands necessitating forest clearance and preparation of agricultural land.

Timber extraction

Timber is extracted according to the working plans and projects which are duly approved by the Government of India. These plans are spread over an area of about 540,000 hectares. Timber extraction is done by the Government agency and also by private contractors.

Regeneration

All harvested forest areas are being scientifically regenerated under regeneration schemes for perpetuating tree cover and also for increasing the yield. The regeneration is being done by natural and artificial methods. The natural regeneration is carried out under the standard Andaman canopy-lifting Shelterwood system. Under the scheme of natural regeneration endemic species of plants are encouraged by planting such seedlings. An area of about 2500 hectares was regenerated naturally during 1982-83. Artificial regeneration is confined to the raising of plantations of economically valuable species like Teak and Padauk. An area of about 300 hectares was covered under artificial regeneration during 1982-83.

Research and Training

Research works in forestry are undertaken under various schemes, particularly pertaining to silviculture and social forestry programmes. Research gardens, research nurseries, experimental plots, tree increment plots and preservation plots are also maintained for research purposes. Research on silviculture problems is also conducted in two research centres located in South and Little Andamans. A Forest training school also functions near Wimberlygunj.

Organisation

With the increased forest activities in these islands the organisational set up improved considerably and, at present, the department is headed by the Chief Conservator of Forests who is assisted by three Conservators of Forests. The Conservator of Forests (Andaman circle) is incharge of the circle consisting of five territorial divisions viz., South, Middle & North Andamans, Baratang and Nicobar Divisions. The Baratang and Nicobar Divisions were created during the decade 1971-81. The Conservator of Forests (Andaman circle) is also ex-officio Chief Wildlife Warden for the territory. The wildlife Division was created during the year 1977-78 for the protection and conservation of wildlife in these islands. The conservator of Forests (Development & Utilisation) is incharge of the four functional divisions viz., Mill Division, Chatham, Utilisation Division, Depot Division at Calcutta and Madras. The Conservator of Forests (Headquarters) is incharge of the Silviculture and Working Plan Division. This Circle and Utilisation Division were also created during the last decade i.e. 1971-81.

Forests Utilisation

The forests of the Andaman & Nicobar Islands have been categorised as one of the highest potential productivity zones in India owing to favourable climate and edaphic factors obtaining in these islands. On the basis of the total growing stock of valuable timber the annual sustained yield has been recokned approximately 3 lakhs cubic metres. In addition, it is estimated that about 4 lakh cubic metres in the form of wood chips would also be available from non-commercial trees, lops and tops of commercial trees and other left over material in the forests.

In order to utilise the additional available timber potential the Andaman & Nicobar Islands Forest & Plantation Development Corporation was established during the year 1977-78. The Corporation has a very important role to play in these islands for gearing up production of wood and establishment of wood based industries, building up infrastructure and also for raising economic plantations.

The level of timber extraction during 1971-81 increased from 97,000 cubic metres to 168,000 cubic metres by all agencies. During this period the forest based industries established in these islands were allotted forest coupes on a long term basis for a period of 10 years to enable them to meet their full requirement of timber raw material.

The main source of Forest Revenue is sale of timber since there is no significant minor forest produce. The timber extracted from the forest is supplied to the local forest based industries, departmental saw mills and other government departments. After meeting the local demands for logs and sawn timber, the surplus is shipped to mainland depots for sale and supply to the various agencies through the Agency of D.G.S. & D. and Railway etc. As the main economy of these islands is based on forestry and forest produce, the wood based industries have to play an important role for the economic development of these islands. Accordingly, emphasis was laid in the latter part of the last decade (1971-81) on processing and

manufacturing of finished products from a large quantity of commercial timber by the local wood based industries.

The Forest Department contributes about 70 per cent of the State Revenue in the Andaman & Nicobar Islands. The annual revenue receipts of the department increased from Rs. 167 lakhs to Rs. 514 lakhs during the last decade (1971-81). The revenue receipts during the year 1982-83 were about Rs. 656 lakhs.

Wild Life

During the last decade, emphasis was also laid on protection and conservation of wildlife in these islands. The Wildlife (Protection) Act, 1972 was promulgated. Four wildlife sanctuaries and an area of about 8000 hectares have also been declared as National Parks/Biosphere Reserve in these islands. The A & N Administration have also planned to establish a project to study the bioecology of the rare and threatened species of these islands and to establish a Marine National Park and a Turtle and Crocodile Farm.

ELECTRICITY AND POWER

The history of electricity in these islands dates back to 1949 when the Electricity Department headed by an Assistant Engineer under the control of the Harbour Master, Marine was created. The Electricity Department was made independent during the year 1957 and the post of Assistant Engineer was upgraded to that of Resident Engineer during 1965. A full fledged division alongwith 3 sub-divisions was created during the year 1966 which controlled Port Blair. Car Nicobar and Mayabunder areas. Another division was created during the year 1973. The activities of the department in the field of power generation, transmission, distribution and sale kept on increasing and ultimately the Government of India created a circle having 3 divisions. These divisions are known as (i) Headquarters, (ii) Rural and (iii) Procurement and Store.

The Headquarters Division has been entrusted with the work of power generation, transmission, distribution and its sale in the entire main islands of South Andaman. The plan scheme in these areas is also looked after by them.

The Rural Division has been entrusted with the work of power generation, transmission, distribution and its sale in all the islands other than the main islands of South Andaman.

The Procurement and Store Division looks after the entire purchase of materials for plan and non-plan works for the department. The safe storing of materials and its receipt and despatch are also looked after by this division.

During the last decade, the activities of the Electricity Department have expanded rapidly in all spheres. The installed capacity during the year 1971-72 was 3,095.5 KW which rose to 7,473 KW in the year 1980-81. The district-wise position is that in case of Andamans district, the installed capacity was 2,853.5 KW in 1971-72 which rose to 7,089 KW in the year 1980-81. In the case of Nicobars district, the installed capacity rose from 242 KW in 1971-72 to 384 KW in 1980-81. During the last decade there has been a tremendous increase in the generation of power. It rose from 40,96,528 KWH in the year 1971-72 to 76,74,554 KWH in the year 1980-81.

During the last decade, the development under sector 'Power' was remarkable. Earlier the main sources of generation had been Chatham Power House having two small steam turbo generators. During the decade 1971-81 many schemes for augmentation of diesel generating (DG) capacity at Port Blair were taken up and now the last scheme for addition of 3 MW of DG capacity at Port Blair is nearing completion.

During the period 1971-81, a central power station at Rangat Bay was established which feeds power upto Mayabunder on one side and Bakultala on the other. Similarly the power generation schemes were taken up at Campbell Bay, Nancowry, Havelock, Long Island, Kadamtala, Kalighat, Baratang, etc. The D.G. capacity at the beginning of the decade i.e. during 1970 was only 3 MW where as at the end of the decade it was about 7.5 MW.

The power requirement in these islands was so far arranged to be met on *ad hoc* basis by installation of DG sets etc. The load in South Andaman has reached the level during the decade requiring reliable and long term arrangements to put the power supply on sound footing. The Central Electricity Authority has carried out studies to meet long term power requirement in these islands and comparative economics for installation of the coal based Thermal Power Station was examined. The project report was prepared for 2×5 MW coal based thermal power station, which was ultimately sanctioned and approved by the Government of India. This scheme is further being examined. As an interim arrangement a scheme for installing 5×2.5 MW diesel set is under consideration.

INDUSTRY

The Union Territory of Andaman and Nicobar Islands is industrially backward and the Government of India has classified this territory under Category 'A'—a special region/No Industry District. For accelerating the promotion of new industries and developing the existing industries, the Industries Department was upgraded to a fullfledged Directorate in the year 1978. Simultaneously, in the same year, the District Industries Centre was also set up. No sale tax is levied on the goods in this Union Territory. As an incentive, small scale units are exempted from octroi duty for import of plant, machinery and equipment from the mainland. Besides, under the Industrial Estate Programme, small scale units are provided with industrial sheds and developed plots for setting up their units in this area. Package assistances are being rendered by the Directorate of Industries and the District Industries Centre to the enterpreneurs in setting up industrial activities in this backward area.

75 per cent Central Transport Subsidy

As per Government of India Policy, for those units which were set up after 31-12-1976 and also those units which have taken expansion programme after the same date, 75% of the freight charges towards bringing the raw materials from the mainland and exporting the finished products to the mainland are allowed as Transport Subsidy with effect from 1-4-1983.

Capital Investment Subsidy

To give incentive to the industrial units, new as well as existing, the Government of India has also announced 25% capital subsidy on capital investment with effect from 1-4-1983 subject to a maximum limit of Rs. 25 lakhs. Capital investment includes land, building, plant and machinery and equipments.

During the year 1984-85, an amount of Rs. 34.7 lakhs and Rs. 9.0 lakhs was sanctioned as Transport Subsidy and Investment Subsidy respectively to 13 industrial units from this Union Territory.

Present Status of Industry

At present there are five DGTD units, including one Government Saw Mill, functioning in these islands. These are :—

(1) WIMCO	Manufacture of match splints
(2) Andaman Timber Industries	Manufacture of plywood block boards
(3) Jayashree Timber Products	Manufacture of plywood
(4) Asian Woods & Polymers Pvt. Ltd.	Manufacture of plywood, veneers
(5) Govt. Chatham	Sawn timber.

Saw Mill

Besides, as on 31-3 1985, 373 villages and small industries were also functioning and registered with the State Directorate in this Union Territory.

During the period 1984-85, 42 units under SSI, Rural and Cottage Industries were financially assisted to a tune of Rs. 26.40 lakhs.

MARINE AND SHIPPING

Water transport plays a vital role in the life of the people here. The territory being dependent upon the mainland for most of its supplies, shipping is in fact the life line of these islands.

Mainland-Island Services

At present, 4 passenger-cum-cargo ships are plying between the mainland and these islands. The particulars of these ships are furnished below :—

Name of Vessel	Passenger capacity	Cargo carrying capacity (in tonnes)
1. M. V. Akbar . . .	1,571	500—1000 (passenger and cargo capacity may vary)
2. M. V. Andamans . .	618	1150
3. M. V. Harshavardhana .	749	1550
4. T. S. S. Nancowry . .	900	2000

M. V. Akbar and M. V. Andamans are owned by the Andaman & Nicobar Administration. M. V. Harshavardhana and T.S.S. Nancowry belong to the Shipping Corporation of India (SCI). Except M. V. Akbar, the passenger-cum-cargo ships plying between the mainland and these islands are being manned, maintained and operated by SCI at present M.V. Akbar is being manned, maintained and operated by the Mogul Lines Ltd.

M. V. Akbar was pressed into service in this sector in 1982 only. This vessel is also being used for Haj Service.

Two cargo vessels viz. M. V. Shompen and M. V. Diglipur belonging to the SCI are also plying exclusively in this sector. The cargo carrying capacity of M. V. Shompen is 3500 tonnes while that of M. V. Diglipur is 5600 tonnes. Besides, some private cargo vessels owned by Messrs. Hauers Lines (P) Ltd. and Messrs. Eilon Hinango (P) Ltd. also ply in this sector.

Inter-island Shipping service

Three types of services are being operated. These are :—

(i) Inter-island services
(ii) Off-shore ferry services
(iii) Harbour ferry services

(i) Inter-island services

The following vessels are deployed on inter-island services :—

Name of the Vessel	Cargo capacity	Passenger capacity
	tonnes	
M. V. Sentinel . .	200	300
M. V. Onge . . .	85	204
T. S. S. Yerewa . .	85	209
S. S. Cholunga . .	60	194
M. V. Chowra . .	200	300

Besides, there are two small cargo vessels viz., M. V. 'Teressa' and M. V. 'Kondul' of 40 tonnes capacity each which are being used for carrying supplies to outlying islands. Some private cargo vessels are also engaged in inter-island service.

(ii) Off-shore ferry services

Coastal ferry services are being provided between Port Blair and Little Andaman, Neil, Havelock, Baratang and Rangat and Kadamtala. Ferry services are also being provided between Mayabunder and Diglipur four times a week.

(iii) Harbour ferry services

Harbour ferry services are being run in Port Blair harbour, from Mayabunder to Kalighat, Parangara and Bajota and from Nancowry to Champion.

M. V. Milale is utilised for establishing contacts with the tribals. Regular trips are arranged to Strait Island, Jarawa area and Dugong Creek.

In Nicobar group, ships call at Car Nicobar, Teressa, Chowra, Katchal, Nancowry, Kondul, Pilo Milo and Great Nicobar Islands.

Organisational set up of Marine and Shipping Departments

The Harbour Master is responsible for smooth and efficient functioning of Marine and Shipping Departments. In the discharge of his duties relating to the Marine Department, the Harbour Master is assisted by the Marine Engineer. In discharge of his duties relating to the Shipping Department, the Harbour Master is assisted by the Pilot, Assistant Harbour Master and Controller, Andaman Labour Force. The Marine Engineer is the Head of Office in respect of the Dockyard Establishment. The Asstt. Harbour Master is the Head of Office in respect of the Afloat Establishment. The Head of Office in respect of the Andaman Labour Force is the Controller, Andaman Labour Force. He also supervises the shed godowns.

The functions of the Marine Department and the Shipping Department are described below in brief:—

Marine Department.—The Marine Department consists of the Dockyard Establishment. The dockyard consists of 9 technical shops viz., Fitting, Plater, Machine, Welding, Electrical, Carpentry, Smithy, Foundary and Sail Maker. The main activities of the dockyard are to maintain and overhaul machineries of powered vessels, repairing of pontoons, survey of vessels, construction of powered boats, dump barges, non-powered pontoons, buoys and navigational aids, etc. There exists a small but well designed graving dock in the dockyard which is capable of accommodating all small sized vessels upto 200 ft. length and 9 ft. draft. Besides, there are 4 slipways capable of accommodating 300 DWT capacity vessels and shallow draft vessels for undertaking repairs. The dockyard also undertakes repairs of vessels belonging to other departments, including Navy, and privately owned vessels, whenever the capacity permits. This department employs a total of 399 technical and non-technical personnel.

Shipping Department.—The Shipping Department consists of three distinct sections viz., (i) Shipping, (ii) Afloat, and (iii) Andaman Labour Force.

(i) *Shipping :*

The Shipping Section is responsible for port conservation administration. It controls traffic and provides navigational aids within the ports besides collecting port dues, fees, etc.

These functions are by and large governed by the provisions of the Indian Ports Act, 1908 under which the Harbour Master is the Conservator of Ports. His statutory functions in this capacity include regulating time and hours when vessels can enter/leave the port, the speed at which the vessels may ply etc., entry of vessels into ports, allotting them berths and anchorage, regulating the number of crew etc.

For carrying out all these functions, a total of 11 personnel (including HM, AHM, and Pilot) are available. This, however, does not include the Customs Assistants (2 nos.) and the office staff. The Harbour Master is also the Assistant Collector (Customs).

(ii) *Afloat*

The Afloat Section is responsible for management of inter-island shipping including ferry and harbour services. For this purpose, a fleet of 36 ships/ferry vessels of different types and sizes is maintained by this section. To operate these vessels the Afloat Section employs 377 technical and non-technical personnel.

(iii) *Andaman Labour Force*

The entire stevedoring work of the ships calling at Port Blair is done by the Andaman Labour Force. Personal luggage of the passengers travelling by the ship is also loaded/unloaded by the labourers of the Andaman Labour Force.

The removal of cargo from the jetty to the shipping godown, stacking the same in the godown and its ultimate delivery to the consignees concerned is also the responsibility of the Andaman Labour Force. For carrying out all these functions the Andaman Labour Force employs about 400 persons.

TRANSPORT

The State Transport Service (STS) had a humble beginning in 1956 with five petrol driven buses. Its present fleet consists of 104 buses though all of them are not on road. The bus services are being operated in 8 STS units at various outlying islands, besides the rural and urban areas of South Andaman. During 1980-81, 91 routes were being operated with a route length of 1,824 kms. as against 44 routes and a route length of 1,007 kms. in 1971. The daily kilometres covered by the buses have increased from 2,745 in 1971 to 4,385 kms. in 1980-81 with simultaneous increase in the number of trips and revenue earnings.

The State Transport Service in these islands is operating as a service organisation rather than as a commercial undertaking.

FISHERIES

The sea around the Union Territory of Andaman and Nicobar Islands abounds in a variety of fish. Fisheries, therefore, constitute an important item of natural resources of these islands. In fact, varieties of fish available from the sea and creeks serve as a major article of diet of the Andamanese and the Nicobarese. Nearly 2,000 kilometres of coastline and 34,955 kilometres of continental shelf provide ample opportunities for the development of fisheries. The Department of Fisheries headed by the Director of Fisheries under the charge of the Development Commissioner is responsible for the development of fisheries

in these islands. Besides other activities, this Department has established a mechanised fishing base at Wandoor in South Andaman for operating departmental mechanised boats in fair season.

The Fisheries Department continues to undertake research programmes for the development of fisheries in this Union Territory. Some of the programmes on hand include Brackish Water Prawn and Fish Culture and propogation and Culture of Quick Growing Fresh Water Major Carps. The Department provides services of retail marketing of its own fish catch through the departmental stall. The Department also provides training and assistance to the fishermen by supplying essential fishing requisites like fishing line, fishing hooks, nylon twine, gill net webbing, fishing fleats etc. Fishing materials worth Rs. 1.53 lakhs were supplied to the fishermen during 1982-83.

The establishment of a Fisheries Development Corporation for a deep sea fishing is under consideration.

AGRICULTURE

Characterised by hilly and mountaineous terrain coupled with heavy rainfall and undulating nature of the soil, these islands are ideally suited for raising plantation crops. However, for historical reasons, agriculture remained virtually undeveloped here until the recent past. Paddy has been the only food crop raised in the territory. It was sown in an area of 3,748 hectares during 1955-56.

The first ever significant programme for developing agriculture in these islands was introduced only during the Second Five Year Plan. Besides bringing more area under paddy cultivation, cultivation of coconut, arecanut and a variety of fruits was also encouraged. By the end of 1968-69, 7,910 hectares of land was brought under paddy cultivation. Considerable emphasis was laid on achieving self-sufficiency in foodgrains for the inhabitants of these islands during the Fifth Five Year Plan.

The Director of Agriculture, who heads the department, is assisted by a team of experts from various fields such as soil conservation officer, soil chemist, spice development officers, marketing officers, agricultural engineer, minor irrigation engineer, soil survey officer, plant protection officer, etc. The development schemes are being implemented under 3 main categories viz., (i) agricultural production, (ii) minor irrigation and (iii) soil conservation. An expenditure of Rs. 74.73 lakhs was incurred on these schemes during 1982-83. About 48,000 hectares of land has since been brought under agriculture and allied activities.

The programme of agricultural production includes distribution of paddy seeds of high yielding varieties, promoting intensive and multiple cropping programme, development of horticulture and plantation crops, field demonstration before cultivators, plant protection, construction of agricultural godowns, expansion of fruit preservation and demonstration unit, establishment of progeny farm for spices, extension of credit facilities, development of tuber crops, etc.

Under the programme of minor irrigation and drainage, the department provides loan-cum-subsidy for construction of ponds and installation of pump sets.

Heavy rainfall and undulating nature of the land essentially call for soil conservation measures in the islands. The soil conservation programme therefore, aims at maintaining high level of productivity through effective control of soil erosion. The department also provides loan cum-subsidy to the cultivators for this purpose

In addition to the above, the Agriculture Department is maintaining agricultural farms, multipurpose farms, progeny orchards, coconut plantation/nursery, coffee, cocoa and spice farms etc.

The programme of development undertaken under the Five Year Plans has made it possible to diversify agricultural activities. Though not on a very large scale, a good beginning has been made in the cultivation of pulses, spices, fruits, tuber crops, cashew nuts etc.

TOURISM

The Andaman and Nicobar Islands are undoubtedly one of the very few places in the world to-day where man has so far survived in his original form and manners, successfully withstanding the onslaught of the march of the civilisation. The natural scenic beauty, serpentine creeks, palm fringed sandy beaches, coral reefs, evergreen forests, undulating green hills and fabulous under-water life make the islands a paradise for tourists, both domestic and foreign.

Of late, restrictions on foreign tourists have been relaxed. Foreign tourists can now visit Port Blair Municipal area, Cinque and Joly Buoy Islands after obtaining prior permission. Permission is also accorded to foreign nationals in organised groups for visiting other 4 islands close to South Andaman, namely, Grub, Red Skin, Boat and Snub.

There are two hotels in Port Blair, one run by the Travel Corporation of India and the other by the Welcome Group. Both these hotels have deluxe accommodation and cater to the needs of affluent tourists. One more hotel with 60 beds is going to come up in the near future. Four Tourist Homes and a Youth Hostel with a total capacity of 140 beds provide accommodation to middle class tourists. The Youth Hostel was opened in 1983.

Conducted tours are arranged from convenient pick-up points by the Andaman & Nicobar Administration. A harbour cruise on board m.v. "Dweep Viharnee" is also organised in the evening thrice a week. The cruise has a run of about 2 hours and touches several points like Panighat, Bombooflat, Haddo, Dundaspoint, Viper and Junglighat. Booking

for the cruise is done by the Marine Department, Port Blair.

With the increase in facilities, the number of tourists visiting the islands has been increasing. About 19,000 tourists visited the islands in 1984 as against just 4,000 tourists in 1978.

The places of historical and tourist importance are listed below:—

(i) Anthropological Museum

This museum displays the tools, implements, models of habitats of aboriginal tribes in the territory. Their arts and handicrafts are other attractions.

(ii) Marine Museum

Over 350 species of sea life are carefully preserved here. The exhibits provides an insight into the nature and character of marine life found in the waters here.

(iii) Chatham Saw Mill

This is one of Asia's largest saw mills where one can see some of the world's best species of timber being transformed into various sizes for use in railways, ship building yards, building constructions and other manufacturing industries.

(iv) Wimco Factory

Adjacent to the Chatham Saw Mill is WIMCO, one of the match factories in the private sector. Splints and veneer are manufactured here.

(v) Zoological Gardens

Situated at Haddo, here one can see some of the rarest species of birds and wildlife found in these islands.

(vi) Chiriya Tapu

Chiriya Tapu is the southern-most tip of South Andaman. The scenic beauty with a picturesque beach at Chhota Balu is a major tourist attraction. It is a beautiful spot for picnics and line fishing. It is an hour's drive from Port Blair by bus/taxi.

(vii) Wandoor Beach

Situated on the West-Coast, Wandoor is one of the ideal locations for picnics, diving and fishing. Tourists can visit nearby islands like Grub, Red Skin and Jolly Buoy. It is also an hour's drive from Port Blair.

(viii) Viper Island

Not far from the Harbour exists a crescent shaped island measuring about 69 acres in area. The island known for the availability of Viper snakes in the past has its own history to tell. Once a full fledged prison for local as well as mainland convicts, the island had gallows on the top of a hillock. The jail was housed here prior to the commissioning of the Cellular Jail.

Regular or chartered motor launch facility is available for visiting the spot.

(ix) Corbyn's Cove

Not far from Port Blair town, this is an ideal beach for bathing and picnicking. The crescent shaped beach provides picturesque view to a beholder of nature. The Andaman Beach Resort run by the Travel Corportion is on the outskirts of this beach. The hotel provides accommodation for foreign and domestic tourists. There is a Government Guest House also at Corbyn's Cove. This is a most frequented place during week ends.

(x) Sipighat Farm

Situated about 14 Km. from the town of Port Blair, the Government Agricultural Farm at Sipighat is spread over an area of 80 acres. It is a research station where experiments on different crops, including horticulture, spices like clove, nutmeg, dalchini and pepper, etc., are undertaken for their extensive propagation in the islands.

(xi) Ross Island

The Island is situated in the north of Port Blair harbour and is about 200 acres in area. During the British rule, Ross was the administrative headquarters of the territory. The ruins of Ross Island include a church building. Spotted deer and peacocks are the other attractions of the island. Visitors have to take permission from the Indian Navy for going to this island.

(xii) Cellular Jail

Known as the Bastille of India, the Cellular Jail is a National Memorial now. The Jail brings back to the mind of the visitor a saga of struggle for emancipation of people kept in bondage by an alien power. The Jail with 698 cells was completed in the year 1906.

(xiii) Dilthaman Tank

Situated in the heart of Port Blair town, this tank was once the only source of drinking water in the town. This is now a picnic spot.

Considering the potential of tourism in these islands, the Government of India is thinking of developing one or two islands here as beach resorts.

TRIBAL WELFARE

Six indigenous tribes have been identified in this Union Territory. These are Great Andamanese, Onges, Jarawas, Sentinelese, Shompens and Nicobarese. All these six tribes have been notified as Scheduled Tribes

as per the provisions of the Constitution of India. Leaving aside the Nicobarese, all the tribes aforesaid are primitive. The Jarawas and the Sentinelese still live in isolation. The Administration is trying to befriend them by sending contact parties to their areas.

The Tribal Welfare Cell of the Andaman and Nicobar Administration looks after the Welfare of the tribals. The Andaman Adim Janjati Vikas Samiti has been assigned he task of promoting welfare of the primitive tribes.

The tribal welfare programme is channelised through the Tribal Sub-Plan of this Union Territory Part I of the Sub-Plan relates to the flow of funds from the Union Territory Plan. Part II relates to the Special Central Assistance of the Ministry of Home Affairs and Part III relates to the Special Central Assistance of the Home Ministry for the development of the Primitive Tribes. An expenditure of about Rs. 402.67 lakhs was incurred during 1982-83 under the Tribal Sub-Plan of this Union Territory of which about Rs. 380.24 lakhs was spent under Part I, Rs. 13.65 lakhs under Part II and Rs. 8.78 lakhs under Part III of the Sub-Plan.

OUTLAY FOR THE SEVENTH FIVE YEAR PLAN

The approved outlay for the Seventh Five Year Plan of the Andaman & Nicobar Islands is given below:

(Rs. in lakhs)

I. Agriculture & Allied Services	
1. Agriculture	315.00
2. Soil & Water Conservation	182.00
3. Animal Husbandry	425.00
4. Fisheries	405.00
5. Forests	1,200.00
Total (I)	2527.00
II. *Rural Development*	
1. Community Development & Panchayats	20.00
2. Land Reforms	15.00
Total (II)	35.00
III. *Co-operation*	79.00
IV. *Minor Irrigation*	270.00
V. *Power Excluding NRSE & IREP NRSE & IRTE*	2,442.00
NRSE & TREP	80.00
Total (V)	2,522.00
VI. *Industry & Minerals*	
Village & Small Industries	206.00
VII. *Transport*	
1. Minor Parts & Lighthouses	1,766.00
2. Shipping	12,357.00*
3. Roads & Bridges	2,925.00
4. Road Transport	509.64
5. Tourism	70.00
6. Inter Model Transport	25.00
Total (VII)	17,652.64
VIII. *Scientyfic Services & Research*	
1. S. & T. Programme	26.00
2. Environmental Programme	11.00
Total (VIII)	37.00
IX. *Social & Community Services*	
1. Education	
(i) General Education	1,500.00
(ii) Art & Culture	15.00
(iii) Technical Education	250.00
(iv) Sports including Youth Services	75.00
Total Education	1,840.00
2. Medical (Excluding ESI) Public Health & Sanitation	400.00
3. Sewerage & Water Supply	1127.00
4. Housing including Police housing	702.00
5. Urban Development	250.00
6. Information & Publicity	65.00
7. Labour & Labour Welfare	23.00
8. Welfare of SC, ST & Other Backward Classes	7.00
9. Social Welfare	35.00
10. Nutrition	70.00
Total (IX)	4,519.00
X. *Economic Services*	
1. Sectt. & Economic Services	4.00
2. Economic Advice & Statistics	5.50
Total (X)	9.50
XI. *General Services*	
1. Stationery & Printing	30.00
2. Public Works	500.00
3. Civil Supplies	53.00
Others	
(i) Rehabilitation	9.86
(ii) Fire Services	50.00
Total (XI)	642.86
GRAND TOTAL	28,500.00

*Includes Rs. 90.00 crores earlier under Central Sector.

SCOPE OF VILLAGE DIRECTORY, TOWN DIRECTORY STATEMENTS AND PCA

Village Directory

The Village Directory consists of 20 columns and provides village-wise information about amenities and land use pattern. Here villages mean not only revenue villages but all places of human habitations where people were found living at the time of the 1981 Census. The census villages comprise all revenue villages and permanent and temporary camps of Forest, A.P.W.D., Bush Police, Contractors' and A & N Forest & Plantation Development Corporation's camp, besides encroachment areas located on forest land outside the boundaries of revenue villages. All such camps which were located within the boundaries of a revenue village were treated as part of that village for all purposes of census taking and no separate entity has been maintained in respect of such camps. The data presented in the village directory have been mainly obtained from the Tehsildars and the concerned Divisional Forest Officers. Blank forms and copies of instructions explaining the manner in which each column should be filled in were sent to the concerned authorities in the month of March, 1980.

The completed forms received back in this Directorate were scrutinised and omission and mistakes observed were rectified either by visiting the tehsil; DFO headquarters or through correspondence or both. In some cases, it took a lot of time to get the acceptable information in respect of some columns of the Village Directory.

Information about each column is given below:—

Column 1 : *Location code no.*

In order to ensure that every census village has been taken into account for census purpose, location code numbers were assigned to each of the villages in a particular order. Thus, all the census villages which comprised revenue villages, forest camps, A.P.W.D. camps, bush police camps, contractors' camps, A & N Forest & Plantation Development Corporation's camps and encroachment areas etc., have been given separate location code number and this is noted in this column.

Column 2: *Name of village*

In this column, the name of village has been given. As explained earlier, forest, A.P.W.D. bush police and other camps etc. located within the boundaries of a revenue village have been treated as part of the same village. All types of camps and encroachment area, etc. located outside the revenue boundaries have been treated as separate census villages and listed separately with the known names noted in this column. The readers will find that in certain cases there are two census villages with the same name, one being the revenue village and the other encroachment area.

Column 3 : *Total area of the village in hectares*

The total geographical area of villages in hectares has been noted in this column. The area of only revenue villages of the five tehsils of Andamans district could be collected. In the case of other non-revenue census villages of all the five tehsils of Andamans district and all the census villages of both the tehsils of Nicobars district, the area figures were not available. Hence these could not be presented in this column.

Column 4 : *Total population and no. of households*

In this column, the total population of each villages as well as the number of households have been given. The number of households appears within brackets.

Columns 5—10 : *Amenities available*

In these columns, different types of amenities which are available within the village such as educational, medical, drinking water, post & telegraph, day or days, of market/hat and communication have been given. In case these amenities are not available within the village, a dash (—) has been shown against the same in the relevant column and next to it the distance of the nearest place from where such facilities are available to the village have been given in broad ranges of distance of less than 5 kms., 5—10 kms. and 10+kms.

Column 5 : *Educational*

In this column, the type of educational institutions functioning in the village are given. The codes used to indicate the availability of educational facilities are given below:—

P	Primary or Elementary School
M	Junior Secondary or Middle School
H	Matriculation or Secondary School
PUC	Higher Secondary (Intermediate/Pre-university Junior College
C	College, any college (graduate level and above) like Arts, Science, Commerce etc.
I	Industrial School
AC	Adult literacy class/centre
O	Other educational institutions.

Where there are more than one institutions of a type in the village, the number has been indicated within brackets against the abbreviations like P(2), M(3) & H(2) etc. If the facility is not available within the village, a dash (—) has been shown in the column. But next to it in brackets, the distance in broad ranges, viz., less than 5 kms., 5—10 kms. and 10+kms. of the nearest place where educational facility is available has been shown.

Column 6 : Medical

Medical facilities have been shown by using the following abbreviations :—

H	Hospital
MCW	Maternity & Child Welfare Centre
MH	Maternity Home
CWC	Child Welfare Centre
HC	Health Centre
PHC	Primary Health Centre
PHS	Primary Health Sub-Centre
D	Dispensary
FPC	Family Planning Centre
TB	T. B. Clinic
NH	Nursing Home
RP	Registered Private Practitioner
SMP	Subsidised Medical Practitioner
CHW	Community Health Worker
O	Others

Number of institutions of a type has been shown in brackets against each e.g. H(2), D(2) etc.

Column 7 : Drinking water

The types of potable drinking water supply sources available within a village have been indicated by the following abbreviations :—

T	Tap Water
W	Well Water
TK	Tank Water
TW	Tube-well Water
HP	Hand Pump
R	River Water
F	Fountain
C	Canal
L	Lake
S	Spring
N	Nallah
O	Others

Column 8 : Post & telegraph

Post and Telegraph facilities have been shown in this column by using the following codes :—

PO	Post Office
TO	Telegraph Office
PTO	Post & Telegraph Office
Phone	Telephone connection

Column 9 : Day or days of market/hat

Here, the day or days on which weekly market/hat, if any, held in the villages is/are given. The practice of weekly markets/hats, etc. is not prevalent throughout the Union Territory except at a few places about which information has been given in this column.

Column 10 : Communications

In this column, communication and public transport facilities have been shown by the following codes :—

BS	Bus
RS	Railway Station
NW	Navigable waterway (including river, canal back waters etc.)

Column 11 : Approach to village

The approach to village refers to the type of road, etc. leading to the village. The type of road approachable to village is indicated by the following codes :—

PR	Pucca Road
KR	Kutcha Road
NR	Navigable River
NC	Navigable Canal
NW	Navigable waterway (other than river or canal)
FP	Footpath

Where more than one such approach facilities are available, the same have been indicated separately by individual codes.

Column 12 : Nearest town & distance

In this column, the nearest town and distance from the village is to be recorded. In case of this territory, there is only one town, Port Blair M. B. The distance in Kms. by shortest route (i.e. either by road or sea) has also been given, wherever available.

In case of certain villages, particularly of Nicobars district, information about the distance of each village from Port Blair is not available. In such cases, the distance between the islands where such villages are situated and Port Blair has been given and this has been explained in the foot notes.

Column 13 : Power supply

The following codes have been used if power supply is available within the village :—

ED	Electricity for domestic purpose
EAg	Electricity for agriculture
EO	Electricity for other purpose like industrial, commercial, etc.
EA	Electricity for all purposes, listed above.

Column 14 : Staple food

In this column, staple food, only in terms of grain and no other food material, of the majority population of the village during the major portion of the year has been recorded e.g., rice, wheat, jowar, maize, ragi etc. Sometimes, when it is difficult to clearly determine a particular grain as the staple food, the combination of grains mainly

used as staple food e.g., rice and jowar, wheat and maize, etc. has been indicated.

Columns 15—20 : *Land use data*

The land use pattern in Village Directory conforms to the pattern of classification of land use as recommended by the Ministry of Food and Agriculture, Government of India. The Ministry of Food and Agriculture has recommended the maintenance of records of land use pattern under five categories. These are as follows : —

1. Forests
2. Not available for cultivation :
   (a) Lands put to non-agricultural uses
   (b) Barren and unculturable lands
3. Other uncultivated lands excluding fallow lands
   (a) Permanent pastures and other grazing lands
   (b) Lands under miscellaneous tree crops and groves not included in the net area sown
   (c) Culturable wastes
4. Fallow lands:
   (a) Fallow lands other than current fallows
   (b) Current fallows
5. Net area sown

In the Village Directory format, column 15 (forest) is the same as category 1 above. Columns 16 (irrigated) and 17 (unirrigated) give the break-up of agricultural land. These are a combination of categories 4 (a+b) and 5 above. Column 18 (culturable waste) corresponds to category 3 (a+b+c) above. Column 19 corresponds to category 2 (a+b).

Village level land use data in this territory is only available partially. Neither the total area nor the land use data is available for all the non-revenue census villages which comprise different types of temporary and permanent camps and encroachment areas, etc. located on the forest land. Similarly, the land use data for all the villages of both the tehsils of Nicobars district is also not available, as villages are yet to be cadastrally surveyed in this district. The land use data is available only in respect of revenue villages falling in the five tehsils of Andamans district. Thus, in case of non-revenue villages of Andamans district and in case of all villages of both the tehsils of Nicobars district, the information is not available and NA is shown in these columns.

Due to non-availability and non-maintenance of the land use data at village level, this information was not published in the Village Directory at the last Census of 1971 also. However, an attempt has been made to collect and publish the land use data in respect of revenue villages of five tehsils of Andamans district at the 1981 Census as stated above. The various column headings relating to land use data are discussed below: —

Column 15 : *Forests*

This includes all lands classed as forests under any legal enactment dealing with forests or administered as foests, whether stateowned or private and whether wooded or maintained as potential forest land. The area of crops raised in the forest and grazing lands or areas open for grazing within the forest remain included under the forest area. If any portion of such land is not actually wooded but put to some agricultural use, that portion shall be included under the appropriate heading of cultivated or uncultivated land. In some cases there may be instances where patches of land put to agricultural use within the statutorily notified forests area considered as forests by the revenue agency. These have been treated as forests.

Columns 16-17 : *Irrigated by source and unirrigated* (*land use*)

These two columns cover all agricultural land and include net area sown with crops and orchards or net cropped area and also current and other fallows. The columns do not include gross area sown or gross cropped area. Net area sown thus represents the area sown with crops and orchards counting areas sown more than once in the same year only once.

Column 16 : *Irrigated* (*by source*)

In this column, the land under irrigation by source such as canal, tube well, etc. has been recorded. But as may be seen from the village Directory, no irrigation facility is available in any of the villages in this Union Territory. Thus, a dash is indicated against all the villages of all the tehsils of both the districts.

Column 17 : *Unirrigated*

The extent of unirrigated but cultivable land has been furnished in this column.

Column 18 : *Culturable waste* (*including pastures & groves*)

This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once, but not cultivated during the five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. These may be assessed. But as may be seen from the Village Directory, within cultivated holdings. Lands under thatching, grasses, bamboo bushes and other groves for fuels, etc., which are not included under orchards or forests shall also come under this head. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest areas shall be included in this column. The area

classified as culturable waste has been given in this column in hectares.

Column 19 : *Area not available for cultivation*

The information given in this column included land not available for cultivation such as barren, uncultivable land and land put to non-agricultural uses.

Land put to non-agricultural uses stands for all lands occupied by buildings, roads and railways or under water e.g. rivers and canals and other lands put to uses other than agriculture.

Barren and unculturable lands cover all barren and unculturable lands like mountains, deserts, etc., land which cannot be brought under cultivation unless at a high cost have been classed as unculturable whether such land was in isolated blocks or within cultivated holdings. Information for this column is only available in case of revenue villages for which area figures are given.

Column 20 : *Remarks including any place of religious, historical or archaeological interest*

This column is intended to record particulars of any place of importance and not just to list out all places of worship, etc.

Information on such aspects as the number of copies of news papers coming in the village and motor-cycles/scooters, cars/jeeps and tractors available in the village has also been given. The following codes are adopted :—

N — Copies of the news papers coming in the village

M — Motorcycles/scooters available in the village

C — Cars/jeeps available in the village

T — Tractors available in the village

Town Directory

The Town Directory consists of six statements viz.

Statement I	Status and Growth History
Statement II	Physical Aspects and Location of Towns, 1979
Statement III	Municipal Finance, 1978-79
Statement IV	Civic and other Amenities, 1979
Statement V	Medical, Educational, Recreational and Cultural facilities 1979
Statement VI	Trade, Commerce, Industry and Banking, 1979

Statement I has been compiled on the basis of the information available in this Directorate while Statement II to VI have been compiled by obtaining data from the Port Blair Municipal Board and other agencies.

The scope of the data and meaning of the abbreviations used in each statement are explained below.

Statement I : Status and growth history

This statement runs into 19 columns and is primarily intended to give some basic statistics of each town and also a comparative picture of the population of each town at the time of different censuses from 1901 to 1981.

Column 1 : *Serial No.*

In this column, the serial number of the town listed in this statement is given. In case of this Union Territory, there is only one town—Port Blair.

Column 2 : *Class, name and civic administration of town*

This column contains information about the class of the town based on its population size, name and the civic status. According to the 1981 Census, there are six classes of towns as per their population size given below :—

Population	Class
100,000 & above	I
50,000—99,999	II
20,000—49,999	III
10,000—19,999	IV
5,000—9,999	V
Below 5,000	VI

In this Union Territory, we have only one town, Port Blair which is a Class III town. Its civic administrative status is Municipal Board (M. B)

Column 3 : *Location Code*

A location code number is assigned to each town which is necessary with a view to locating the town in the map. Roman numerals are used to indicate the location code numbers.

Column 4 : *Name of tehsil Hq.*

The name of the tehsil headquarters in which a particular town is situated is given in this column.

Column 5 : *Area (Sq. Km.)*

This is a new column which has been introduced at the 1981 Census to facilitate analysis of the Town Directory data upto state and all India levels. Information about the area of the town indicated in this column is generally supplied by the civic bodies. However, in the case of Port Blair M. B., necessary information was supplied by the Assistant Commissioner (Settlement). The area is indicated upto two places of decimal.

Column 6 : No. of households including houseless households

This column contains information about the total number of households, including the houseless households, as per the 1981 Census.

Columns 7-15 : Population and growth rate of town at (different) censuses from 1901 to 1981.

In these columns, the population figures for the town since 1901 alongwith their decadal growth rates from census to census are given. The percentage decadal growth rates have been given in brackets below the population figures.

As regards Port Blair M. B., the only town of this territory, columns 7 to 11 relating to population figures for 1901 to 1941 are blank, as the town was formed for the first time in the 1951 Census only.

Column 16 : Density (1981)

This is also a new column introduced at the 1981 Census to facilitate analysis of the Town Directory data. The density has been calculated after taking into account the area figures given in column 5 and the population of 1981 given in column 15 of this statement. The density figures are per sq. km.

Columns 17—19 : Sex Ratio 1961-1981.

Like other demographic indicators, sex ratio i.e., females per 1,000 males, has also been introduced to facilitate analysis of the Town Directory data. The sex ratio recorded at the 1961, 1971 and 1981 censuses has been given in columns 17, 18 and 19 respectively.

Statement II : Physical aspects and location of town, 1979

This statement containing 12 columns gives information about physical aspects and location of the town. The column headings are discussed below :—

Column 1 : Sl. No.

This is self-explanatory. In case of this Union Territory, there is only one town—Port Blair.

Column 2 : Class and name of town

In this column, the population, size and class of each town, besides its name, are recorded. In case of this Union Territory, there is only one town viz., Port Blair which falls in Class III.

Columns 3 to 5 : Physical Aspects

Column 3 contains rainfall data. The rainfall data have been obtained from the Regional Meteorological Centre, Calcutta. The average for preceding 10 years (1970-79) has been worked out for arriving at the rainfall data as given in this column.

In columns 4 and 5 maximum and minimum temperatures are given in centigrades, like rainfall data, the temperature data have also been obtained from the Regional Meteorological Centre, Calcutta. The maximum and minimum temperatures as given in columns 4 and 5 respectively have been worked out on the basis of periodic averages for last 10 years (1970-79).

Colmuns 6 to 8 : Name of and the road distance in km. from State/District/tehsil headquarters

In these columns, the name of and the road distance from the state, district and tehsil headquarters are recorded. In the case of the lone town of Port Blair of this Union Territory, the State, district and tehsil headquarters being the same as the nearest town itself, the distance has been recorded as '0' in each column below the name of the town.

Columns 9 to 12 : Name of and road distance in km. from nearest city, railway station, bus route, navigable river/canal

In column 9, the name of Madras City, which has a population of more than one lakh and which is the nearest to Port Blair as compared with any other city, has been recorded. Similarly, in column 10, the name of Madras railway station has been recorded which is the nearest railway station from Port Blair. Madras is about 1,190 km. away from Port Blair. In column 11, the bus route is to be recorded. In case of Port Blair, since the town is enjoying bus route within itself, the name of the same has been given and '0' distance has been recorded below the name of the town. In column 12, the distance from the navigable river/canal etc. is to be recorded. In case of Port Blair, navigation facility is available from the town itself by sea. As such a dash is shown in this column.

Statement III : Municipal Finance, 1978-79

This statement contains 17 columns and gives information about the actual receipts and expenditures of the civic body for the year 1978-79. This statement is based on the information furnished by the Port Blair M.B.

Statement IV : Civic and other amenities

There are 19 columns in this statement which relate to civic and other amenities available in the town. These are discussed below :

Columns 1 to 3 : Relate to Sl. No., class and name of the town and civic administration status of the town

These are self-explanatory.

Column 4 : Population

This column gives the total population of the town as per the 1981 Census. The total population of the Port Blair area at the 1981 Census was 49,634.

Column 5 : SC and ST population

No Scheduled Caste population was recorded as such in this town as well as in case of the Union Territory. Only Scheduled Tribes were enumerated in this Union Territory and Port Blair Municipal area. At the 1981 Census, 271 'ST' were enumerated in Port Blair Municipal area.

Column 6 : Road length in km.

The total road length in km. is given in this column. This has been obtained from the A.P.W.D. which is responsible for the construction and maintenance of the roads in Port Blair.

Column 7 : Sewage System

Only one type of sewage system i.e. open service drain (OSD) is in existence in Port Blair town.

Columns 8 to 10 : No. of latrines

The number of water borne and service type latrines has been given in columns 8 and 9 as supplied by the Municipal authorities. Information in respect of column 10 'Others' is nil.

Column 11 : Method of disposal of night soil.

Three methods of disposal of night soil are prevalent in Port Blair. Here night soil is disposed of with the help of :

(1) Baskets (B);

(2) Wheel Barrows (WB); and

(3) Septic tank latrines (ST).

Columns 12 & 13 : Protected Water Supply

The protected water supply in Port Blair town is through tap water (T). Suitable code has been given in column 12. In column 13, the system of storage alongwith capacity in litres has been given. In Port Blair, the system of storage is 'service reservoirs' (SR).

Column 14 : Fire fighting service

The fire fighting services are available in Port Blair M.B. the details of which are given in this column.

Columns 15 to 18 : Electrification (No. of connections)

The number of domestic, industrial, commercial and road light points have been given in columns 15, 16, 17 and 18 respectively.

Information for column 19 'Others' is nil.

Statement V : Medical, educational, recreational and cultural facilities, 1979

There are 20 columns in this statement which relate to the medical, educational, recreational and cultural facilities available in the town.

Columns 1 to 3 : Sl. No., Class & name of town and population

These are self-explanatory.

Column 4 : Hospital, dispensary, TB Clinic, etc.

Particulars regarding different types of medical institutions functioning in the town are indicated in this column. The abbreviations used are as follows :

(i) Hospital	H
(ii) Dispensary	D
(iii) T. B. Clinic	TB
(iv) Family Planning Centre . .	FPC
(v) Nursing Home	NH
(vi) Others	O

Column 5 : Beds in medical institutions

In this column, the number of beds provided for in-patients in the medical institutions mentioned in column 4 is given.

Columns 6—14 : Educational facilities

Column 6 : Arts/Science/Commerce College

There is only one college in Port Blair town. In this college, Arts, Science, and Commerce (ASC) are taught upto degree level. Post-graduate studies were available only in one subject i.e. English uptill 1981.

Column 7 : Medical Colleges

There is no medical college in Port Blair which is the only town in this Union Territory.

Column 8 : Engineering Colleges

No engineering college is located in Port Blair town.

Column 9 : Polytechnics

There was no Polytechnic situated in Port Blair town at the time of the 1981 Census.

Column 10 : Recognised shorthand, typewriting and other vocational training instiuttions.

No such recognised training institutes are functioning in Port Blair town. Some unrecognised shorthand and typewriting institutes are functioning in Port Blair town the details of which have not been given here.

Column 11 : Higher Secondary/Intermediate/PUC (Pre-University) College/Junior College level

There are six such institutions located in Port Blair town.

Column 12 : Secondary/Matriculation

Nine secondary/matriculation schools are located in Port Blair town.

Column 13 : *Jr. Secondary/Middle Schools.*

There are 15 Jr. Secondary/Middle Schools located in Port Blair town.

Column 14 : *Primary Schools*

The number of primary schools located in Port Blair town is 20.

While giving the number of secondary/middle junior and middle schools and primary schools in columns 12 to 14, single school, providing education for classes 1 to 12, 1 to 10 and 1 to 8 have been treated as having multiple units. For example, if in a senior secondary school where education is being imparted from Class I to Class XII, it will be counted as four units i.e. 1 for senior secondary, 1 for secondary, 1 for junior secondary and middle and 1 for primary school. Similarly, if in a middle school classes are run from I to VIII, it will be treated as 2 units viz. 1 middle school and 1 primary.

Column 15: *Adult literacy classes/centres, others (specify)*

There are eight adult literary centres located in Port Blair town.

Column 16 : *Working women's hostels with No. of seats*

Only one working women's hostel is located in Port Blair town with a capacity of 31.

Columns 17 *to* 20 *: No. of recreational and cultural facilities.*

Column 17 : *Stadia*

There is no stadium in Port Blair town.

Column 18 : *Cinema*

There are three cinema houses in Port Blair town out of which one is of a temporary type.

Column 19: *Auditoria/Drama/Community Halls*

The number of such units is 6.

Column 20 *: Public libraries including reading room.*

There are two public libraries (PL) and three reading rooms (RR) in Port Blair town.

Statement VI : Trade, Commerce, Industry and Banking, 1979

This statement has 14 columns giving information about trade, commerce, industry and banking.

Columns 1 *and* 2 *: Sl. No. & Class and Name of Town*

These are self-explanatory.

Columns 3 *to* 5 *: Names of* 3 *most important commodities imported*

In these columns, the names of three most important commodities imported to Port Blair have been shown in order of their volume. These commodities are :

(i) Cereals and edibles;

(ii) construction materials: and

(iii) grocery and textiles.

Columns 6 *to* 8 *: Names of* 3 *most important commodities exported.*

These columns show the names of three most important commodities exported from Port Blair. These commodities are:

(i) Timber;

(ii) Plywood and match splints; and

(iii) Copra and arecanut.

It may not be out of place to mention here that Port Blair, which is the seat of the Administration, is the only main commercial centre located in these islands. Various commodities are first imported from the mainland to Port Blair from where they are distributed to far-flung areas located in these islands. Similarly Port Blair is also the centre of export.

Various commodities from different parts of the territory are generally brought to Port Blair for onward shipment/export to mainland.

Columns 9 *to* 11 *: Names of three most important commodities manufactured*

The names of three most important commodities manufactured in Port Blair town have been given in these columns.

Column 12: *No. of banks*

Six banks are located in Port Blair M.B.

Column 13 : *Agricultural societies*

Information for this column is nil.

Column 14 : *No. of non-agricultural societies*

Eight non-agricultural credit societies are functioning in Port Blair town.

PRIMARY CENSUS ABSTRACT

In part B of the District Census Handbook of each district, "Primary Census Abstract" is presented. It contains the basic tables of demographic importance obtained on full count basis of the Individual Slips. Data in these tables are furnished village-wise for the rural areas and ward-wise in respect of each census town for the urban areas.

The PCA table consists of 28 columns. The scope of each of these columns is discussed below :

Column 1: *Location Code No.*

The location code number is a number assigned to each village within a tehsil and each census town within a district in a particular order. The numbers assigned to the tehsils and villages are international numerals while those assigned to towns are Roman numerals. The districts and the Union Territory have also been assigned location code numbers with international numerals.

The Andamans district has been given location code number 1 while the Nicobars district has been assigned code No. 2. The location code numbers of tehsils and the lone town of Port Blair are given below:

Name of tehsil/town	*Location Code No.*
ANDAMANS DISTRICT	
Diglipur tehsil	1
Mayabunder tehsil	2
Rangat tehsil	3
Port Blair tehsil	4
Port Blair M. B.	1
Ferrargunj tehsil	5
NICOBARS DISTRICT	
Car Nicobar tehsil	1
Nancowry tehsil	2

Column 2: *Name of village/town/urban ward*

The name of the village and town corresponding to the location code numbers are given in this column.

Column 3 : *Area of village in hectares and of town/ward in sq. kms.*

In this column, the particulars of total geographical area of the revenue villages furnished by the Tehsildar concerned has been given. In case of the Port Blair M.B. area the figures as supplied by the Asstt. Commissioner (Settlement) have been given. Similarly, area figures of tehsil have been supplied by the Assistant Commissioner (Settlement). The area of the Union Territory and the district is as furnished by the Surveyor General of India through the Central Statistical Organisation. Village level area figures for all the villages of both the tehsils of the Nicobars district are not available and so is the case with the non-revenue villages of the Andamans district. No attempt has been made to reconcile the data as supplied by the Surveyor General of India and the local revenue authorities.

Column 4: *No. of occupied residential houses*

In this column, the number of such houses, which were in actual use for residential purpose, either wholly or partly, at the time of the enumeration (i.e., between February 9 and 28, 1981), is given.

Column 5: *No. of households*

The total number of households, including institutional households and houseless houscholds, if any, in a village or block is given in this column.

Columns 6 *to* 8 : *Total population (including institutional and houseless population)*

The total and sex-wise population figures given in this table include population of institutional and houseless households but exclude the population of the Sentinelese and the major group of the Jarawas who could not be contacted and enumerated. It was only for the first time that 31 Jarawas (21 males and 10 females) were enumerated in the history of the census of these islands. These 31 Jarawas are also included in the total population figures of these islands.

Columns 9 *and* 10 : *Scheduled Castes*

No castes have been specified as Scheduled Castes in relation to the Union Territory of Andaman and Nicobar Islands. Information in respect of the Scheduled Castes is, therefore, nil.

Columns 11 *and* 12 : *Scheduled Tribes*

These two columns furnish the population of Scheduled Tribes by sex. The expression Scheduled Tribes means such tribes or tribal communities or parts of or groups within such tribes or tribal communities as are deemed under Article 342 to be Scheduled Tribes for the purposes of the Constitution of India.

Columns 13 *and* 14 : *Literates*

In these columns, the number of literates which include both, those who have not attained any educational level and also those who have attained some educational level, by sex, has been given.

Columns 15 *to* 24 : *Main Workers*

In columns 15 and 16, the number of total main workers has been given sex-wise. Further break-up of these main workers in four broad categories has also been given in the appropriate columns.

Columns 17*and* 18 : *Cultivators*

In columns 17 and 18, the sex-wise break-up of cultivators is given.

Columns 19 *and* 20 : *Agricultural labourers*

In these columns the figures relating to agricultural labourers are given sex-wise.

Columns 21 *and* 22 : *Household Industry*

In these columns, workers engaged in household industry are given with their sex-wise break-up.

Columns 23 *and* 24 : *Other Workers*

Other workers are defined as all workers i.e. those who are engaged in some economic activity during the last one year who are not cultivators or agricultural labourers or in household industry. The types of workers that come under the category of other workers include factory workers, plantation workers, workers engaged in trade, commerce, business, transport, mining, construction, or political or sociai work, government servants, municipal employees, *teachers, priests, entertainment artists, etc.* In effect, all those, who worked in any field of economic activity other than cultivation, agricultural labour or household industry are treated as 'other workers'.

Columns 25 *and* 26 : *Marginal Workers*

In columns 25 and 26, the number of marginal workers is given sex-wise in the PCA.

Columns 27 *and* 28 : *Non-workers*

Non-workers are those who did not work at all during the year preceding enumeration.

In columns 27 and 28, the number of non-workers has been given sex-wise.

Non-workers comprise the following categories of persons:—

(i) Persons with Household duties
(ii) Students
(iii) Dependents
(iv) Retired persons or rentiers
(v) Beggars etc.
(vi) Inmate of institutions
(vii) Other non-workers

BRIEF ANALYSIS OF VILLAGE DIRECTORY DATA

We will now briefly analyse the Village Directory data. As mentioned earlier, the Village Directory shows the different types of amenities and land use data at the village level.

First of all, let us study the distribution of villages according to availability of different amenities. This can be studied with the help of Table 1 given below:

TABLE 1

Distribution of villages according to the availability of different amenities

Sl. No.	Name of UT/district/tehsil	No. of inhabited villages	No. (with percentage) of villages having one or more amenities							
			Education	Medical	Drinking water	Post & telegraph	Market/ hat	Communi-cation	Approach by pucca road	Power Supply
1	2	3	4	5	6	7	8	9	10	11
	A & N ISLANDS . .	491	206 (41·96)	98 (19·96)	487* (99·19)	70 (14.26)	25 (5·09)	262 (53·36)	204 (41·55)	98 (19·96)
	ANDAMANS DISTRICT .	320	158 (49·38)	62 (19·38)	316* (98·75)	50 (15·63)	24 (7·50)	174 (54·38)	157 (49·06)	76 (23·75)
1.	Diglipur tehsil . . .	39	21 (53·85)	11 (28·21)	39 (100·00)	3 (7·69)	2 (5·13)	11 (28·21)	11 (28·21)	2 (5·13)
2.	Mayabunder tehsil . .	58	26 (44·83)	12 (20·69)	57 (98·28)	7 (12·07)	4 (6·90)	22 (37·93)	15 (25·86)	12 (20·69)
3.	Rangat tehsil . . .	66	33 (50·00)	19 (28·79)	63* (95·45)	11 (16·67)	8 (12·12)	34 (51·52)	29 (43·94)	16 (24·24)
4.	Port Blair tehsil . . .	81	39 (48·15)	11 (13·58)	81 (100·00)	13 (16·05)	5 (6·17)	56 (69·14)	45 (55·56)	25 (30·86)
5.	Ferrargunj tehsil . . .	76	39 (51·32)	9 (11·84)	76 (100·00)	16 (21·05)	5 (6·58)	51 (67·11)	57 (75·00)	21 (27·63)
	NICOBARS DISTRICT .	171	48 (28·07)	36 (21·05)	171 (100·00)	20 (11·70)	1 (0·58)	88 (51·46)	47 (27·49)	22 (12·87
1.	Car Nicobar tehsil . .	16	15 (93·75)	15 (93·75)	16 (100·00)	7 (43·75)	..	16 (100·00)	16 (100·00)	120 (62·50)
2.	Nancowry tehsil . . .	155	33 (21·29)	21 (13·55)	155 (100·00)	13 (8·39)	1 (0·65)	72 (46·45)	31 (20·00)	12 (7·74)

* Exclude 3 Jarawa villages as the source of drinking water is not known.

In the above table, the number of villages having educational, medical, drinking water, post & telegraph, market/hat, communication, approach by pucca road and power supply facilities and their percentage to total villages in a particular tehsil have been given. The comparative picture of each tehsil enjoying the above facilities is as follows:

Education

Among the five tehsils of the Andamans district, Diglipur has the highest percentage of villages having educational facilities. In this tehsil 21 out of 39 villages (53.85 per cent) have educational facilities. The second position is occupied by Ferrargunj tehsil where 39 out of 76 villages (51.32 per cent) have educational facilities. The third, fourth and fifth positions are occupied by Rangat (50.00 per cent), Port Blair (48.15 per cent) and Mayabunder (44.83 per cent) respectively.

Among the two tehsils of the Nicobars district, 15 out of 16 villages (93.75 per cent) of Car Nicobar tehsil have educational facilities. The position in respect of Nancowry tehsil is that only 33 out of 155 villages (21.29 per cent) have educational facilities. The proportion of villages having educational facilities is the lowest in this tehsil among all the tehsils of both the districts.

Medical

As regards medical facilities, among the five tehsils of the Andamans district, Rangat occupies the first position where 19 out of 66 villages (28.79 per cent) have medical facilities. Diglipur with 28.21 per cent villages occupies the second position followed by Mayabunder (20.69 per cent), Port Blair (13.58 per cent) and Ferrargunj (11.84 per cent).

Among the two tehsils of the Nicobars district, Car Nicobar tehsil is in a very happy position where 15 out of 16 villages have medical facilities available within the village. However, in the case of Nancowry tehsil, only 21 out of 155 villages (13.55 per cent) have medical facilities.

Drinking water

With regard to availability of drinking water, it may be stated here that drinking water from tap, nallah, stream, well, etc. is available within all the villages of these islands, except one village of the Andamans district.

Post & Telegraph

In the Andamans district, Ferrargunj tehsil with 16 out of 76 villages (21.05 per cent) have post & telegraph facilities. This is followed by Rangat (16.67 per cent), Port Blair (16.05 per cent), Mayabunder (12.07 per cent) and Diglipur (7.69 per cent).

In the Nicobars district, Car Nicobar tehsil has a lead over Nancowry tehsil with regard to post & telegraph facilities also. In Car Nicobar tehsil 7 out of 16 villages (43.75 per cent) have post & telegraph facilities as compared with 13 out of 155 villages (8.39 per cent) in Nancowry tehsil.

Market/hat

As may be observed from the foregoing table, a limited weekly/fortnightly/monthly market/hat system exists only in a few places in these islands. Two villages in Diglipur tehsil, 4 villages in Mayabunder tehsil, 8 villages in Rangat tehsil and 5 villages each in Port Blair and Ferrargunj tehsils of the Andamans district have market/hat facility available within the village. In Nancowry tehsil of the Nicobars district only one village has market/hat facility available within the village.

Communication

With regard to communication facilities, Port Blair tehsil tops the list of tehsils in the Andamans district. In this tehsil, 56 out of 81 villages (69.14 per cent) have communication facilities available within the village. The next position in this regard is occupied by Ferrargunj tehsil with 67.11 per cent of villages having communication facilities available within the village. The third, fourth and fifth positions are occupied by Rangat (51.52 per cent), Mayabunder (37.93 per cent) and Diglipur (28.21 per cent) respectively.

So far as the Nicobars district is concerned, all villages in Car Nicobar tehsil have communication facilities available within the village while in the case of Nancowry tehsil 72 out of 155 villages (46.45 per cent) have such facilities.

Approach by pucca road

Amongst the five tehsils of the Andamans district, 57 out of 76 villages (75.00 per cent) of Ferrargunj tehsil are approachable by pucca road. Port Blair tehsil with 55.56 per cent villages approachable by pucca road is at the second position followed by Rangat tehsil (43.94 per cent), Diglipur tehsil (28.21 per cent) and Mayabunder (25.86 per cent).

As regards the Nicobars district, all the villages of Car Nicobar tehsil are approachable by pucca road while in the case of Nancowry tehsil about 20 per cent villages only are approachable by pucca road.

Power supply

Port Blair tehsil with 25 out of 81 villages forming 30.86 per cent of the total villages of this tehsil has the highest proportion of villages having power supply available within the village as compared with all other tehsils of the Andamans district. Ferrargunj tehsil has this facility in 21 out of 76 villages (27.63 per cent), thus occupying the second position, followed by Rangat tehsil (24.24 per cent), Mayabunder tehsil (20.69 per cent) and Diglipur tehsil (5.13 per cent).

So far as the Nicobars district is concerned, 10 out of 16 villages (62.50 per cent) of Car Nicobar tehsil have power supply available within the village

as compared with only 12 out of 155 villages (7.74 per cent) of Nancowry tehsil.

After studying the distribution of villages according to the availability of different amenities it will be of great interest to know about the proportion of rural population served by different amenities.

The proportion of rural population served by different amenities is given in the following table :—

TABLE 2

Proportion of rural population served by different amenities

Sl. No.	Name of UT/district/tehsil	Total population of inhabited villages in tehsil	Proportion of rural population served by the amenity of							
			Education	Medical	Drinking water	Post & telegraph	Market/ hat	Communi-cation	Approach by pucca road	Power supply
1	2	3	4	5	6	7	8	9	10	11
	A & N ISLANDS	139,107	115,473 (83·01)	72,828 (52·35)	139,074* (99·98)	63,022 (45·30)	35,655 (25·63)	107,596 (77·35)	107,871 (77·55)	74,343 (53·44)

*Exclude 31 Jarawa population as their drinking water facility is not known.

The following picture emerges from the above table :

Education

In the Andamans district 82.60 per cent of the rural population is covered by educational facilities. The proportion of rural population covered by educational facilities is little higher in the case of the Nicobars district where 84.47 per cent of the population of the district is covered by these facilities.

When we compare the educational facilities within the five tehsils of the Andamans district, it is observed that Ferrargunj occupies the first position having 88.02 per cent of its rural population served with educational facilities within the villages of their habitation. The second position is occupied by Rangat tehsil where 85.41 per cent of the rural population is served with such facilities. This is closely followed by Mayabunder tehsil (85.17 per cent) and Diglipur tehsil (81.17 per cent). The population covered by educational facilities in Port Blair tehsil is 73.86 per cent.

In the Nicobars district, 99.75 per cent population of Car Nicobar tehsil is served with educational facilities. This proportion is the highest in respect of the rural population of the Union Territory of A & N Islands. In the case of Nancowry tehsil the proportion of population covered by educational facilities is 68.66 per cent.

Medical

Only 46.38 per cent of the rural population is served with medical facilities within the village of their habitation in the Andamans district as compared with 73.66 per cent in the Nicobars district.

Amongst the five tehsils of the Andamans district, Rangat tehsil occupies the first position with a

proportion of 63.21 per cent population being served with medical facilities within the village. The second position is occupied by Diglipur tehsil with 46.32 per cent population served by these facilities followed by Mayabunder tehsil (44.58 per cent), Ferrargunj tehsil (40.30 per cent) and Port Blair tehsil (38.44 per cent). The low proportion of population of Port Blair tehsil where medical facilities are available within the village may be due to the fact that most of the villages located in South Andaman island near the periphery of Port Blair M.B. are being covered by the medical facilities available at the main G. B. Pant Hospital located in Port Blair town.

In the Nicobars district, with regard to medical facilities, Car Nicobar tehsil has the highest proportion of rural population (96.96 per cent) amongst all the tehsils of the U.T. being served with medical facilities within the village. In case of Nancowry tehsil, this proportion is 49.56 per cent.

Drinking water

As may be seen from the foregoing table, 99.97 per cent population of the Andamans district and cent per cent population of the Nicobars district is having drinking water facility of one or other kind within the village itself.

Post & Telegraph

In the Andamans district, 44.89 per cent rural population is covered with post and telegraph facilities within the village. The proportion of rural population enjoying these facilities in the Nicobars district is slightly higher 46.80 per cent.

Among the tehsils of the Andamans district, Rangat tehsil occupies the first position having the highest proportion (55.49 per cent) of rural population served with post & telegraph facilities within the village. This tehsil is closely followed by Ferrargunj tehsil where the proportion of rural population enjoying these facilities is 52.30 per cent. The third, fourth and fifth positions are occupied by Mayabunder, Port Blair and Diglipur tehsils with a proportion of 44.00 per cent, 42.91 per cent and 19.41 per cent respectively.

Amongst the two tehsils of the Nicobars district. Car Nicobar has 48.25 per cent of its rural population covered by these facilities available within the village. Nancowry tehsil has about 45.30 per cent of these facilities available within the village.

Market/hat

The system of weekly/fortnightly/monthly market/hat is not widely prevalent in these islands. Only a few places with very small proportion of population are having this facility, that too mainly in the Andamans district. No market/hat system is prevalent in the Nicobars district except in one village of Nancowry tehsil.

Rangat occupies the first position among other tehsils of the Andamans district with a proportion of 50.39 per cent population enjoying this facility which is followed by Ferrargunj tehsil with 30.03 per cent of population and Mayabunder tehsil (29.55 per cent) population served with this facility. In Port Blair tehsil 22.60 per cent and in Diglipur tehsil only 16.27 per cent of the rural population is covered by this facility.

In Car Nicobar tehsil this system of market/hat does not exist. In Nancowry tehsil, about 15.32 per cent of the population is covered by this facility.

Communication

In the Andamans district, about 75.17 per cent of the rural population is served with communication facilities within the villages as compared with 85.11 per cent of the rural population in the Nicobars district.

Amongst the tehsils of the Andamans district, Ferrargunj tehsil occupies the first position with 90.89 per cent of its population having communication facilities available within the village. The next position is occupied by Port Blair tehsil where 81.49 per cent of the rural population is served with communication facilities within the village. The third, fourth and fifth positions are occupied by Rangat, Mayabunder and Diglipur tehsils with 74.21 per cent, 56.39 per cent and 54.57 per cent respectively of the total population of these tehsils having communication facilities available within the village.

In the two tehsils of the Nicobars district, cent per cent of rural population of Car Nicobar tehsil is having communication facilities available within the village while this percentage in case of Nancowry tehsil is 69.70.

Approach by pucca road

Amongst the two districts, Andamans has 77.40 per cent of the rural population enjoying the pucca road facility while in the case of Nicobars 78.05 per cent of the rural population is approachable by pucca road.

Amongst the tehsils of the Andamans district, the proportion of rural population approachable by pucca road is highest in Ferrargunj tehsil where 95.53 per cent of population is approachable by pucca road. The proportion of population approachable by pucca road in the other tehsils of the district is: Port Blair—77.48 per cent, Rangat—75.13 per cent, Mayabunder 64.18 per cent and Diglipur—60.22 per cent.

Cent per cent population is approachable by pucca road in Car Nicobar tehsil of the Nicobars district. In the case of Nancowry tehsil of this district, 55.34 per cent population is approachable to pucca road.

Power supply

In the Andamans district 53.99 per cent population is served with power supply. The percentage of population served with power supply in the Nicobars district is 51.50.

Rangat tehsil leads all other tehsils of the Andamans district having the highest proportion of rural population served with electricity (66.95 per cent). This is followed by Ferrargunj tehsil (60.07 per cent), Port Blair tehsil (58.33 per cent), Mayabunder tehsil (45.48 per cent) and Diglipur tehsil (23.26 per cent).

As regards the Nicobars district, 72.04 per cent of the rural population of Car Nicobar tehsil enjoys facilities of power supply. However, in Nancowry tehsil, only 30.25 per cent of the rural population is served with power supply.

Main staple food

The main staple food of the rural population in all the five tehsils of Andamans district is rice and wheat while in case of both the tehsils of the Nicobars district, the staple food of the rural population is rice.

TABLE 3

Main staple food in the majority of villages in each tehsil

Sl.No.	Name of tehsil	Main staple food
1	2	3
	ANDAMANS DISTRICT	
1.	Diglipur	Rice, Wheat
2.	Mayabunder	Rice, Wheat
3.	Rangat	Rice, Wheat
4.	Port Blair	Rice, Wheat
5.	Ferrargunj	Rice, Wheat
	NICOBARS DISTRICT	
1.	Car Nicobar	Rice
2.	Nancowry	Rice

Distribution of villages according to land use

The land use data are available only in respect of some revenue villages. As regards non-revenue villages which are spread all over the five tehsils of the Andamans district, even their total area is not available. Similarly, in a case of the Nicobars district where cadastral survey of villages has yet to be carried out, the total area of the villages as well as the land use data are not available.

However, an effort has been made to present the land use data in the following table in respect of the revenue villages of the five tehsils of the Andamans district.

TABLE 4

Distribution of villages according to land use

Sl. No	Name of tehsil	No. of inhabited village for which area figures are available	Total area (hectares)	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
	ANDAMANS DISTRICT				
1.	Diglipur	21	11,819.21	26.50	..
2.	Mayabunder	29	14,830.61	48.65	..
3.	Rangat	36	12,584.94	35.39	..
4.	Port Blair	37	12,654.24	29.65	..
5.	Ferrargunj	52	20,713.58	24.34	..
	NICOBARS DISTRICT				
1.	Car Nicobar	..	NA	NA	NA
2.	Nancowry	..	NA	NA	NA

It may be seen from the above table that Mayabunder tops the list with 48.65 per cent of its total areas of the villages as cultivable. The second position is occupied by Rangat tehsil where 35.39 per cent of the total area of revenue villages as cultivable. This is followed by Port Blair tehsil (29.65 per cent), Diglipur tehsil (26.50 per cent) and Ferrargunj tehsil (24.34 per cent).

No irrigation facilities are available in any of the tehsils. Accordingly, the percentages of irrigated area to total area under cultivation are nil.

Distribution of villages according to population range and amenities available

There are 491 inhabited villages in the Union Territory of A & N Islands. The district wise break-up is as follows:

(i) Andamans district . 320 Villages
(ii) Nicobars district . 171 Villages

The following table gives the distribution of villages according to the population range and amenities available.

TABLE 5

Distribution of villages according to population ranges and amenities available

*Exclude 3 Jarawa villages as their drinking water facility is not known.

Andamans district

The foregoing table reveals that out of 320 inhabited villages of the Andamans district, 254 villages have a population of less than 500 each, 60 villages fall in the population range of 500—1,999 and remaining 6 inhabited villages belong to the population range of 2,000—4,999. There is no village which has a population of 5,000 and above.

In case of villages falling in the population range of less than 500, 38.19 per cent villages have educational facilities within the village while 9.84 per cent villages have medical facilities available within the village. Drinking water facilities are available in 98.43 per cent of the villages. However, post & telegraph facilities are available for only 6.30 per cent villages. Market/ hat facilities are available to 1.97 per cent villages of

this population range. With regard to communication, 47.24 per cent of these villages have communication facilities available within the village and 38.98 per cent villages are approachable by pucca road. With regard to power supply, 14.57 per cent of villages of this population range have power supply available within the village.

As regards the villages falling in the population range of 500—1,999, 91.67 per cent villages are covered by educational facilities, 53.33 per cent by medical facilities, cent per cent villages by drinking water supply, 46.67 per cent villages by post & telegraph facilities and 21.67 per cent villages by market/hat. Similarly, 80 per cent of the villages have communication means available within the villages and 86.67 per cent villages of this range are approachable by pucca road. The percentage of villages to total villages in this population range having power supply is 55.00.

There are only 6 villages in the pjopulation range 2,000—4,999. All the villages in this population range have facilities like education, drinking water, post & telegraph, market/hat, communication and power supply available within the village. Similarly, all the 6 villages are approachable by pucca road. Medical facilities are available for 83.33 per cent of the villages falling in this population range.

Nicobars district

In the Nicobars district, out of 171 inhabited villages, 152 villages have a population of less than 500 each. 17 villages fall in the population range of 500—1,999. Only 2 villages belong to the population range 2,000—4,999.

With regard to different types of amenities available within the villages falling in the population range of less than 500, 19.08 per cent villages have educational facilities, 11.84 per cent villages have medical facilities, cent per cent villages have drinking water facilities and 5.92 per cent villages are covered by post & telegraph facilities. Similarly, 46.05 per cent villages of this range have communication facilities and 18.42 per cent villages are approachable by pucca road. Power supply is available within the village in this range for only 6.58 per cent villages.

With regard to the villages falling in the population range of 500—1,999, all the 17 villages are covered by education and drinking water facilities and are also approachable by pucca road. Medical facilities are available in 94.12 per cent villages. Post & telegraph facilities are available in 52.94 per cent villages and communication facilities are available in 94.12 per cent villages falling in this population range. Power supply is available in 58.82 per cent of these villages.

There are only two villages in the population range 2,000—4,999 and both these villages are covered by all facilities such as education, medical, drinking water, post & telegraph, communication and power supply. Both these villages are also approachable by pucca road.

The system of weekly/fortnightly market/hat etc., is not prevalent in the Nicobars district, the only exception being one village in Nancowry tehsil where such facility is available.

The distribution of villages according to distance from the nearest town and availability of different amenities has been worked out and is given below in table 6.

TABLE 6

Distribution of villages according to the distance from the nearest town and availability of different amenities

Total	171	48 (28·07)	36 (21·05)	171 (100·00)	20 (11·70)	1 (0·58)	88 (51·46)	47 (27·49)	22 (12·87)

*Exclude 3 Jarawa villages as their drinking water facility is not known.

In this Union Territory there is only one town, Port Blair M.B. This town is situated in Port Blair tehsil of the Andamans district. No area in the Nicobars district has been declared as urban so far.

It may be seen from the above table that the inhabited villages have been distributed into the following five ranges according to distance from the nearest town :

(i) At a distance of 0—5 kms.

(ii) At a distance of 6—15 kms.

(iii) At a distance of 16—50 kms.

(iv) -At a distance of 51 kms. and above

(v) Distance unspecified.

The number of villages alongwith their percentages having different types of amenities such as educational, medical, drinking water, post & telegraph, market/hat, communication, approach by pucca road and power supply have been shown for the Union Territory as a whole and for both the districts for each distance range in the above table. The figures in the brackets in the table indicate the percentages.

Distribution of villages not having certain amenities arranged by distance range from the place where these are available

As stated earlier, there are 491 inhabited villages in the Union Territory of A & N Islands. Outr of these, 320 are located in the Andamans district and the remaining 171 in the Nicobars district. We have already discussed the position with reagrd to villages having different types of amenities such as education, medical, drinking water, post & telegraph, market/hat, communication, etc. Now we will examine the villages where certain amenities are not available. The

following table indicates distribution of these villages arranged by the distance ranges from the place where these are available:

TABLE 7

Distribution of villages not having certain amenities arranged by distance ranges from the places where these are available

Villages not having the amenity of	Number of villages where the amenity is not available & available at a distance of			
	Less than 5 kms.	5—10 kms.	10+ kms.	Total (cols. 2 to 4)

Andamans district

It may be seen from the above table that in the Andamans district, out of 320 inhabited villages, there are 162 villages where educational facilities are not available within the villages. Of these, 104 villages enjoy these facilities at a distance of less than 5 kms. The number of villages where educational facilities are available at a distance of 5 to 10 kms. and 10 kms. and above are 25 and 33 respectively. With regard to medical facilities, there are 258 villages where these facilities are not available within the villages. The number of villages falling in three distance ranges of less than 5 kms. 5—10 kms. and 10 kms. and baove where these facilities available are 136, 46 and 76 respectively. Drinking water facilities are available in all the villages except 4 villages of the Andamans district (including 3 villages of Jarawas for which, in fact, correct position is not known). As regards post & telegraph, 270 villages do not enjoy these facilities within the villages. Of these 106 villages enjoy post & telegraph facilities within a distance of less than 5 kms. 46 villages avail of these facilities at a distance of 5 to 10 kms. and 118 villages have to go to a distance beyond 10 kms. for availing such facilities. Similarly, communication facilities are not available within the villages in case of 146 villages. The bulk of these i.e. 68 villages avail communication facilities within a distance of 5 kms. The number of villages which gets communication facilities at a distance of 5 to 10 kms. and 10 kms. and above are 27 and 51 respectvely.

Nicobars district

In the case of the Nicobars district, the proportion of villages not having certain amenities is rather high as compared with the Andamans district. Out of a total of 171 inhabited villages in the Nicobars district, the number of villages not having educational facilities is 123. Of these, 57 villages avail these facilities within a distance of 5 kms. The number of villages falling in the two other distance ranges of 5 to 10 kms. and 10 and above kms. where educational facilities are available to them is 27 and 39 respectively. In the case of medical facilities, the number of villages where such facilities are not available is still high. Here, 135 out of 171 villages do not have medical facilities available within the villages. The number of villages falling in the three distance ranges of less than 5 kms., 5 to 10 kms. and 10 kms. and above where these facilities are available is 54, 32 and 49 respectively. With regard to post & telegraph, the position is alarming because out of 171 villages, 151 villages do not have these facilities available within the villages. The number of villages which get post & telegraph facilities within a distance of less than 5 kms. is only 23. The number of such villages in the range of 5 to 10 kms. is 21. As many as 107 villages out of 151 villages get aforesaid facilities at a distance of 10 kms. and above.

As regards communication, there are 83 villages where communication facilities are not available within the villages. Of these, more than 95 per cent villages get these facilities at a distance of 10 kms and above. The number of villages where communication facilities are available within 5 kms. and 5 to 10 kms. is 2 and 1 respectively.

BRIEF ANALYSIS OF TOWN DIRECTORY

As discussed earlier, there is only one town—Port Blair M. B. in this Union Territory which is located in Port Blair tehsil of the Andamans district. The other district, Nicobars, is completely rural. Port Blair town was recognised as such for the first time in 1951.

The percentage of urban population to total population, decadal variation in urban population,

density of population and sex ratio for the Andamans district in which Port Blair town is situated and for the Union Territory as a whole is given in the following table:

TABLE 8

Growth, density and sex ratio of urban population in the district in relation to the Union Territory

Census Year	District Andamans						Union Territory					
	Total population	Urban population	Percentage of urban population	Decadal percentage variation in urban population	Density (population per sq. km.)	Sex ratio (No. of females per 1,000 males)	Total population	Urban population	Percentage of urban population	Decadal percentage variation in urban population	Density (population per sq. km.)	Sex ratio (No. of females per 1,000 males)
1	2	3	4	5	6	7	8	9	10	11	12	13
1951 .	18,962	7,789	41.08	..	859	545	30,971	7,789	25.15	..	859	545
1961 .	48,985	14,075	28.73	+80.70	1,788	573	63,548	14,075	22.15	+80.70	1,788	573
1971 .	93,468	26,218	28.05	+86.27	3,298	558	115,133	26,218	22.77	+86.27	3,298	558
1981 .	158,287	49,634	31.36	+89.31	3,510	720	188,741	49,634	26.30	+89.31	3,510	720

It may be seen from the above table that the urban population which was only 7,789 in the year 1951 has increased to 49,634 in the year 1981. An interesting feature is that for the year 1951 the percentage of urban population to total population in the Andamans district was 41.08 and for the Union Territory as a whole it was only 25.15 per cent. However, in the subsequent two decades there was a decline in the proportion of urban population to total population in the Andamans district as well as in the Union Territory as a whole.

In the Andamans district, the proportion of urban population to total population came down to 28.73 per cent in 1961 and 28.05 per cent in 1971. Similarly, the percentage of urban population to total population for the Union Territory as a whole came down to 22.15 in the year 1961. There was a slight improvement in the percentage of urban population to total population for the Union Territory as a whole in 1971 but this (22.77 per cent) was well below the 1951 mark. In the Andamans district the percentage of urban population to total population in 1981 was 31.36 as against 26.30 per cent recorded for the Union Territory as a whole.

Density

The density of urban population was 859 persons per sq. km. in the year 1951. It increased to 1,788 in 1961, 3,298 in 1971 and 3,510 in 1981.

Sex ratio

The sex ratio i.e. number of females per 1,000 males recorded in the urban area was 545 in the year 1951. This ratio improved slightly in the year 1961 when a sex ratio of 573 was recorded. It, however, came down to 558 in the year 1971 but considerably improved during the last decade i.e. 1971—81. A sex ratio of 720 has been recorded at the 1981 Census.

Per capita total receipts and expenditure

The total per capita receipts and expenditure for the year 1978-79 for Port Blair town can be studied with the help of the following table:

TABLE 9

Per capita receipts and expenditure in town, 1978-79

Class, name & civic status of the town	Per capita receipts			Per capita expenditure					
	Total	Receipt through taxes	Receipt from all other sources	Total expenditure	General administration	Expenditure on public health & conveniences	Public works	Expenditure on public institutions	Other aspects
1	2	3	4	5	6	7	8	9	10
III. Port Blair M. B. . . .	92.30	73.66	18.64	93.22	4.78	28.36	20.81	0.17	39.10

The total per capita receipts during the year under report were Rs. 92.30. Out of this, Rs. 73.66 were through taxes and the remaining Rs. 18.64 from other sources.

In the field of expenditure, the total per capita expenditure during the year under report was Rs. 93.22. The highest per capita expenditure of Rs. 28.36 was on public health and conveniences. The next position is occupied by public works where the per capita expenditure was Rs. 20.81. The per capita expenditure on general administration was Rs. 4.78, while on public institutions it was Rs. 0.17. The remaining per capita expenditure of Rs. 39.10 was on other aspects.

Schools

TABLE 10

Schools per 10,000 population in the town

Class, name and civic status of town	Number per ten thousand population			
	Hr. Secondary/Inter/PUC/Junior College	Secondary/Matriculation	Junior Secondary/Middl	Primary
1	2	3	4	5
III, Port Blair (M.B.)	1	2	3	4

As may be seen from the above table, there is 1 higher secondary school for every 10,000 population in the town. The number of secondary/matriculation schools works out to 2 per 10,000 population in the town. Similarly, the number of junior/secondary/middle and primary schools works out to 3 and 4 respectively per 10,000 population.

No. of beds in medical institution

TABLE 11

Number of beds in medical institution in the town

Class, name and civic status of the town	No. of beds in medical institution per 1,000 population
1	2
III Port Blair (M.B.)	5

There is only one hospital which caters to the needs of the urban population in addition to the adjoining rural population. The total number of beds available in this hospital is 262 for the entire urban population of 49,634 which works out to about 5 beds for one thousand population.

Most important commodities manufactured, imported and exported

The names of the most important commodities manufactured, imported and exported in the town have been given in the table below :—

TABLE 12

Most important commodity manufactured, imported and exported in the town

Class, name & civic status of the town	Most important commodity		
	Manufactured	Exported	Imported
1	2	3	4
III Port Blair (M.B.)	Ply wood & match splints	Timber (including sawn timber)	Cereals & all kinds of edible oils

Plywood and match splints have been listed in order of their importance under the column 'commodity manufactured'.

Timber is the most important commodity exported from the town. The most important commodities imported in the town are cereals and all kinds of edible oils.

BRIEF ANALYSIS OF PCA

As explained in the explanatory note, the Primary Census Abstract (PCA) provides an abstract of the primary information relating to the 1981 Census. It contains data in respect of area, number of occupied residential houses, number of households, total population, including institutional and houseless population, and its break-up by sex, Scheduled Castes and Scheduled Tribes, literates and educated persons, workers and non-workers for each village for the rural areas and town/ward-wise for the urban areas. The workers have been classified into the following four broad categories of economic activities :—

(i) Cultivators—(I)
(ii) Agricultural Labourers—(II)
(iii) Workers engaged in Household Industry—Manufacturing, processing, servicing and repairs—[V(a)]
(iv) Other workers—[III, IV, V(b) and VI to IX]

At the 1971 Census and earlier censuses, the workers were classified into 9 industrial categories of economic activities.

Rural/Urban break-up

Let us now study the rural and urban break-up of the population and the number of total and

inhabited villages and the number of towns for both the districts and each tehsil with the help of the following table:—

TABLE 13

Population, number of villages and towns, 1981

Sl. No.	Name of district/tehsil	Population									No. of villages		No. of towns
		Total			Rural			Urban					
		P	M	F	P	M	F	P	M	F	Total	inhabited	
1	2	3	4	5	6	7	8	9	10	11	12	13	14
	ANDAMAN & NICOBAR ISLANDS	188,741	107,261	81,480	139,107	78,401	60,706	49,634	28,860	20,774	516	491	1
	ANDAMANS DISTRICT	158,287	90,446	67,841	108,653	61,586	47,067	49,634	28,860	20,774	334	320	1
1.	Diglipur tehsil	15,702	8,509	7,193	15,702	8,509	7,193	..	..	..	39	39	..
2.	Mayabunder tehsil	13,954	7,792	6,162	13,954	7,792	6,162	..	..	..	60	58	..
3.	Rangat tehsil	24,289	13,756	10,533	24,289	13,756	10,533	..	..	..	70	66	..
4.	Port Blair tehsil	76,329	44,701	31,628	26,695	15,841	10,854	49,634	28,860	20,774	86	81	1
5.	Ferrargunj tehsil	28,013	15,688	12,325	28,013	15,688	12,325	..	..	..	79	76	..
	NICOBARS DISTRICT	30,454	16,815	13,639	30,454	16,815	13,639	..	..	..	182	171	..
1.	Car Nicobar tehsil	15,486	8,031	7,455	15,486	8,031	7,455	..	..	..	16	16	..
2.	Nancowry tehsil	14,968	8,784	6,184	14,968	8,784	6,184	..	..	..	166	155	..

It may be seen from the above table that out of a total population of 188,741, the share of rural areas is 139,107 i.e., 73.70 per cent of the total population of the Union Territory. The remaining population of 49,634 (26.30 per cent) belongs to the urban area.

Four out of five tehsils of the Andamans district and both the tehsils of the Nicobars district are completely rural. Only Port Blair tehsil has both rural and urban components. Out of a total population of 76,329 of Port Blair tehsil, 49,634 i.e. 65.03 per cent of the total population of the tehsil comes under the urban area which comprises the lone town of Port Blair M.B.

No. of villages

At the 1981 Census, there were 491 inhabited villages as compared with 390 inhabited villages listed at the 1971 Census. The total number of villages including 25 uninhabited villages (located on the inhabited islands) at the 1981 Census was 516.

Among various tehsils of the Andamans district, the largest number of inhabited villages (81) was in Port Blair tehsil. The next position was occupied by Ferrargunj tehsil with 76 villages followed by Rangat (66 villages), Mayabunder (58 villages) and Diglipur (39 villages).

In case of the Nicobars district, Nancowry tehsil recorded as many as 155 inhabited villages while Car Nicobar tehsil has only 16 inhabited villages.

Decadal change in the distribution of population

The change in the distribution of population during the decade 1971-81 for both the districts and each tehsil is given in the following table with rural and urban break-up.

TABLE 14

Decadal change in distribution of population

Union Territory/ district/tehsil	Population						Percentage decadal (1971—81) variation		
	1971			1981					
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10
ANDAMAN & NICOBAR ISLANDS	115,133	88,915	26,218	188,741	139,107	49,634	+63.93	+56.45	+89.31
ANDAMANS DISTRICT	93,468	67,250	26,218	158,287	108,653	49,634	+69.35	+61.57	+89.31
Diglipur tehsil	9,470	9,470	..	15,702	15,702	..	+65.81	+65.81	..
Mayabunder tehsil	8,443	8,443	..	13,954	13,954	..	+65.27	+65.27	..
Rangat tehsil	15,169	15,169	..	24,289	24,289	..	+60.12	+60.12	..
Port Blair tehsil	42,511	16,293	26,218	76,329	26,695	49,634	+79.55	+63.84	+89.31
Ferrargunj tehsil	17,875	17,875	..	28,013	28,013	..	+56.72	+56.72	..
NICOBARS DISTRICT	21,665	21,665	..	30,454	30,454	..	+40.57	+40.57	..
Car Nicobar tehsil	13,504	13,504	..	15,486	15,486	..	+14.68	+14.68	..
Nancowry tehsil	8,161	8,161	..	14,968	44,968	..	+83.41	+83.41	..

It may be seen from the above table that the overall percentage decadal increase in population for the Union Territory as a whole during the decade 1971-81 is 63.93. The district of Andamans recorded a hihger growth rate of 69.35 per cent when compared with the district of Nicobars where a growth rate of 40.57 per cent was recorded.

Among various tehsils of the Andamans district, the highest growth rate of 79.55 per cent has been recorded for Port Blair tehsil during the decade 1971-81. The second position is occupied by Diglipur tehsil with a percentage increase of 65.81. Mayabunder closely follows Diglipur with a percentage decadal variation of 65.27. The fourth and fifth positions are occupied by Rangat tehsil and Ferrargunj tehsil with a percentage increase of 60.12 and 56.72 respectively.

In the case of the Nicobars district, Nancowry tehsil has recorded the highest percentage growth rate of 83.41 which is even more than the overall growth rate for the Union Territory during 1971-81. Car Nicobar tehsil has recorded a growth rate of only 14.68 per cent which is the lowest of all the tehsils of Andaman and Nicobar Islands.

Urban areas

When we study the urban percentage decadal variation in population, it is observed that the urban areas have recorded a higher percentage decadal variation of 89.31 per cent as against 63.93 per cent general growth rate recorded for the Union Territory as a whole during the decade 1971-81.

Distribution of villages

The distribution of villages by various population size groups for each district is given in Table 15.

TABLE 15

Distribution of villages by population ranges

Range of population	No. of villages in each range			Percentage of villages in each range		
	A & N Islands	Andamans district	Nicobars district	A & N Islands U.T.	Andamans district	Nicobars district
1	2	3	4	5	6	7
Less than 200	306	165	141	62.32	51.56	82.46
200—499	100	89	11	20.37	27.81	6.43
500—1,999	77	60	17	15.68	18.75	9.94
2,000—4,999	8	6	2	1.63	1.88	1.17
5,000—9,999	..	..	..	..	..	..
10,000+	..	..	..	..	..	..
Total	491	320	171	100.00	100.00	100.00

It may be seen from the above table that 62.32 per cent of the total inhabited villages in the Union Territory have a population of less than 200 each. In the Andamans district the percentage of villages having a population of less than 200 is 51.56 while in the Nicobars district the percentage of such villages is 82.46.

The percentage of villages within the population range of 200—499 is higher in the Andamans district than in the Nicobars district. The percentage of such villages in the Andamans district is 27.81 as against 6.43 in the Nicobars district.

As regards villages falling in the population range of 500—1,999, again the percentage of villages for the Andamans district is higher (18.75) than that of the Nicobars district (9.94).

A very small percentage of villages belonging to the population size 2,000—4,999 has been recorded both for the Andamans and Nicobars districts. The percentage in the Andamans district is 1.88 while in the case of the Nicobars district it is 1.17.

No village with a population of 5,000 or above was listed at the 1981 Census for this Union Territory.

Scheduled Tribes (ST) population in the town

The following table gives the ST population and its percentage to the total population in the Port Blair town:—

TABLE 16

Proportion of Scheduled Tribes population in the town

Name of the town	Total population	Total ST population	Percentage of ST population to total population
1	2	3	4
Port Blair M.B.	49,634	271	0.55

It may be seen from the above table that just 271 persons belonging to Scheduled Tribes forming only 0.55 per cent to the total population were enumerated in Port Blair town.

Literates, workers, non-workers and scheduled tribes population

It will be of great interest to study the comparative picture of literates, workers, non-workers and Scheduled Tribes population in each tehsil of both the districts of the Union Territory of Andaman and Nicobar Islands.

The following table gives the percentage of persons, males and females for each of these categories:—

TABLE

LITERATES, WORKERS, NON-WORKERS, SCHEDULED CASTE AND

Name of UT/ District/Tehsil	Total Rural Urban	Total population			Percentage of SC population to total population	Percentage of ST population to total population	Literates to total population

Scheduled Tribes population :

It may be seen from the above table that the percentage of ST population to the total population for the Union Territory as a whole is 11.85. The ST population is concentrated in the Nicobars district where it forms 69.52 per cent of the total population of the district. In the Andamans district, the percentage of ST population to the total population is only 0.75.

Amongst various tehsils of the Andamans district the highest percentage of ST population to total population has been recorded for Port Blair tehsil where the percentage is 1.42 of the total population of the tehsil. The percentage of ST population to total population in the remaining tehsils of the Andamans district is less than 1.

In Car Nicobar tehsil, the percentage of ST population to the total population is 87.27 while in the case of Nancowry tehsil, this percentage is 51.16.

Literates :

A literacy rate of 51.56 per cent has been recorded for the Union Territory as a whole at the 1981 Census. In the case of males, the percentage of literates to the total male population is 58.72 while in the case of females, this percentage is 42.14.

When we compare the literacy position in the two districts, it is observed that the percentage of literates in the Andamans district is higher than in the Nicobars district. In the case of the Andamans district, the percentage of literate population to the total population is 53.95 as against 39.16 per cent recorded for the Nicobars district.

Amongst the tehsils of the Andamans district, the highest literacy rate of 59.73 per cent has been recorded for Port Blair tehsil. The second position is occupied by Ferrargunj tehsil where the percentage of literates to total population of the tehsil is 52.61. This is followed by Rangat (49.79 per cent), Diglipur (46.29 per cent) and Mayabunder (40.86 per cent).

As regards the Nicobars district, the percentage of literates to total population of the tehsil is 40.10 and 38.18 for Car Nicobar tehsil and Nancowry tehsil respectively.

If we compare the sex-wise literacy rates we find that for the Union Territory as a whole, for both the districts as well as in case of all the tehsils, the males have a higher percentage of literacy rate than the females.

Main workers :

The percentage of main workers to the total population for the Union Territory as a whole is 33.21. The percentage of main workers to the total population is 33.60 in the Andamans district and 31.17 in the Nicobars district.

54.59 per cent of the total males and 5.07 per cent of the total females are returned as main workers for the Union Territory as a whole. In the Andamans district, these percentages for males and females are 55.47 and 4.44 respectively.

Amongst the five tehsils of the Andamans district, Port Blair tehsil occupies the first position with main workers constituting 36.18 per cent of the total population. As regards the remaining four tehsils of the district, the percentages of main workers vary between 30.06 per cent (Diglipur tehsil) and 31.80 (Rangat tehsil).

In the case of male workers, the highest proportion (57.70 per cent) of main workers is in Port Blair tehsil and the lowest in Diglipur tehsil (52.66 per cent).

Port Blair tehsil with 5.76 per cent of female main workers to its female population has recorded the highest percentage of female main workers. The lowest percentage of female main workers (2.66 per cent) to its female population was recorded in Rangat tehsil.

In the Nicobars district, the percentage of male main workers to the total male population is 49.82 and in the case of females this percentage is 8.18.

Of the two tehsils in the Nicobars district, Nancowry tehsil has recorded higher percentage of main workers both for males and females in comparison to Car Nicobar tehsil. In Nancowry tehsil, there are 56.57 per cent of male main workers and 8.39 per cent of female main workers as agtinst 42.45 per cent male main workers and 8.01 per cent females main workers reported for Car Nicobar tehsil.

Marginal workers :

The percentage of marginal workers to the total population for the Union Territory as a whole is 3.67. The percentage of marginal workers is higher for the Nicobars district where 10.21 per cent of the total population is found having marginal work as against only 2.42 per cent marginal workers found in the Andamans district.

Amongst the tehsils of the Andamans district, Rangat tehsil has recorded the highest percentage of marginal workers (3.55 per cent) to the total population of the tehsil. The percentage of marginal workers to the total population in the remaining four tehsils of the Andamans district varies from 1.71 (Diglipur tehsil) to 3.33 (Ferrargunj tehsil).

Amongst the tehsils of the Andamans district, Ferrargunj tehsil has the highest percentage (1.95) of marginal male workers to total male population while Diglipur has the lowest percentage of marginal male workers where only 0.93 per cent of male workers have been listed having marginal work. In the case of female marginal workers among the tehsils of this district, the picture is slightly different from that of male marginal workers. The highest proportion of female marginal workers has been recorded in the case of Mayabunder tehsil (5.87%) whereas the lowest percentage of marginal female workers has been recorded for Port Blair (2.38%).

As regards the two tehsils of the Nicorbars district, the percentages of male and female marginal workers to the total male and female popualtion are higher in the case of Car Nicobar tehsil as compared with Nancowry tehsil. In the case of Car Nicobar tehsil, 7.36 per cent males and 18.66 per cent females have marginal work while in the case of Nancowry tehsil the percentages of male and female marginal workers are 4.56 and 11.73 respectively.

Total workers :

The percentage of total workers to the total population for the Union Territory as a whole works out to 36.88. The Nicobars district has 41.38 per cent total workers as against 36.02 per cent total workers in the Andamans district.

Among males and females, the percentage of total workers is much high in the case of males when compared with females for the Union Territory as a whole. About 56.71 per cent of males have been recorded as total workers, while only 10.78 per cent females have been recorded as total workers.

In the Andamans district, the percentage of males and females total workers are 56.89 and 8.18 respectively while in the case of the Nicobars district these percentages are 55.72 and 23.70 respectively.

In the case of tehsils of the Andamans district, the highest percentage of total male workers has been recorded for Port Blair tehsil (58.95 per cent) and the lowest for Diglipur tehsil (53.59 per cent).

Amongst females, the highest proportion of total workers has been recorded for Mayabunder tehsil where their percentage is 10.32 to the total female population of the tehsil. The lowest percentage of female total workers has been recorded in the case of Diglipur tehsil where their percentage is 5.96.

As regards the Nicobars district, total male workers are 61.13 per cent of the total male population in Nancowry tehsil while in the case of Car Nicobar the percentage of total male workers is 49.81. The percentages of female total workers to the total female population are 26.67 and 20.12 for Car Nicobar and Nancowry tehsils respectively.

Non-workers

Out of a total population of 188,741, the number of non-workers in this territory is 119,129, which works out to 63.12 per cent of the total population as per the 1981 Census. 43.29 per cent males and 89.22 per cent females are non-workers. In the Andamans district, the percentage of non-workers is higher than that of the Nicobars district. In the case of the Andamans district 63.98 per cent and in the case of the Nicobars district 58.62 per cent of the total population has been recorded as non-workers. The percentages of non-workers are 43.11 in case of males and 91.82 in case of females respectively for the Andamans district. In the case of the Nicobars district, the percentages of male and female non-workers to total male and female population are 44.28 and 76.30 respectively.

Among the tehsils of the Andamans district, the highest proportion of non-workers has been recorded in the case of Diglipur tehsil (68.23 per cent) and the lowest in the case of Port Blair tehsil (62.10 per cent). Among males, the highest percentage of non-workers (46.41) has, however, been recorded for Diglipur tehsil and the lowest (41.05 per cent) in respect of Port Blair tehsil. Diglipur tehsil has recorded the highest proportion of female non-workers (94.04 per cent) while the lowest percentage of female non-workers has been recorded for Mayabunder tehsil (89.63 per cent).

Amongst the two tehsils of the Nicobars district, Car Nicobar has a higher percentage (50.19) of male non-workers to its total population as compared with 38.87 per cent of Nancowry tehsil. In the case of female non-workers the position is different. Nancowry tehsil has recorded 79.88 per cent female non-workers as against 73.33 per cent in respect of Car Nicobar.

Scheduled Tribes population in rural areas

The following table gives the number of villages and the percentage of ST population to total population classified according to their percentage ranges:—

TABLE 18

Proportion of Scheduled Tribes population to total population in village

Percentage range of ST population to total population	No. of villages in each range	Percentage of villages in each range
1	2	3
ANDAMAN & NICOBAR ISLANDS		
Nil	302	61.51
5 or less	19	3.87
6—15	6	1.22
16—25	1	0.20
26—35	2	0.41
36—50	..	..
51 & above	161	32.79
Total	491	100.00
ANDAMANS DISTRICT		
Nil	292	91.25
5 or less	16	5.00
6—15	4	1.25
16—25	1	0.31
26—35	..	..
36—50	..	..
51 & above	7	2.19
Total	320	100.00
NICOBARS DISTRICT		
Nil	10	5.85
5 or less	3	1.75
6—15	2	1.17
16—25	..	..
26—35	2	1.17
36—50	..	..
51 & above	154	90.06
Total	171	100.00

It may be seen from the above table that out of 491 inhabited village in the Union Territory, there are 302 villages, which form about 61.51 per cent of the total villages, have no representation of scheduled tribes population. The percentage of villages which have ST population of 5 per cent or less is 3.87. Similarly, the percentages of villages with ST population falling in the ranges of 6—15, 16—25 and 26—35 are 1.22, 0.20 and 0.41 per cent respectively. There is no village which has ST population in the range 36.50. The percentage of villages which have ST population in the range of 51 per cent and above works out to 32.79 for the Union Territory as a whole.

When the percentages falling in various percentage range groups of ST population to total population are compared for the Andamans and Nicobars districts, it may be observed that in the Andamans district 91.25 per cent villages have no ST population. There are only 2.19 per cent villages in the Andamans district which have ST population falling in the percentage range of 51 and above. The position in regard to the Nicobars district is just the reverse where only 5.85 per cent villages have no ST population. The percentage of villages which have 51 per cent and above ST population is as high as 90.06 per cent in the Nicobars district.

Literacy rate—Rural areas:

The literacy rate by size class of population of villages can be studied with the help of the following table:—

TABLE 19

Literacy rates by population ranges of villages

Range of population	No. of villages in each range	Literacy Rate
1	2	3
ANDAMAN & NICOBAR ISLANDS		
Less than 200	306	35.82
200—499	100	46.67
500—1,999	77	47.07
2,000—4,999	8	54.50
5,000—9,999	..	..
10,000+	..	..
Total	491	46.58
ANDAMANS DISTRICT		
Less than 200	165	42.89
200—499	89	47.08
500—1,999	60	48.97
2,000—4,999	6	54.84
5,000—9,999	..	..
10,000+	..	..
Total	320	48.66
NICOBARS DISTRICT		
Less than 200	141	22.91
200—499	11	43.39
500—1,999	17	40.69
2,000—4,999	2	55.29
5,000—9,999	..	..
10,000+	..	..
Total	171	38.83

It may be observed from this table that an overall literacy rate of 46.58 per cent has been recorded for the rural areas as against 51.56 per cent recorded for the Union Territory as a whole. Amongst the two districts, the rural areas of the Andamans district have a higher literacy rate of 48.66 per cent as compared with 38.83 per cent recorded for the Nicobar district.

A very interesting feature of the literacy rates and the villages falling in various population ranges is that the villages with lower population sizes have lower literacy rates. This holds good for the Union Territory as a whole and for the Andamans district. As regards the Nicobars district, higher literacy rates for bigger villages have been recorded as compared with smaller villages except in the case of villages falling in the population range 500—1,999 where lower literacy of 40.69 per cent has been recorded than that of the villages falling in the population size 200—499.

Literacy rate in towns

There is only one town, Port Blair M.B. in this Union Territory.

Out of the total population of 49,634 of Port Blair M.B., the number of literates is 32,528 which forms 65.54 per cent of the total population.

TABLE 20

Literacy rates of town

(2) Area fiugres of Union Territory, Districts and Tehsils include Area of uninhabited islands/islets/rocks.

(3) Area fiugres for tehsils are as supplied by the Revenue Authorities (Assistant Commissioner (Settlement). There is a total difference of (—) 68·00 Sq. Km. in the area figures of district of Andaman and (+) 112·00 Sq. Km. in case of Nicobars district, when the district figures of Surveyor General, India are compared with the total of tehsil figures supplied by the Revenue Authorities. These diffrence in area figures at Union Terrirtoy and district levels are due to the revision of area figures by Surveyor General, India. The revision at the tehsil level is yet to be done by the Revenue Authorities.
