(iii) Special PCA on Scheduled Castes (Total, Rural, Urban). . . 184—185

FOREWORD

The district census handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District Administration. The district census handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in village and towns, etc.

The district census handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well, so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health subcentres and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled caste and scheduled tribe population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class-II towns (statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in statement

IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The formats of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part-A of the volume contains village and town directory and part-B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto tehsil/ Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non census data in relation to the infrastructure has been introduced to enhance its value. The district and tehsil/ Police Station/C.D. Block etc., level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri A. H. Khan, IAS the Director of Census Operations, Jammu and Kashmir, Srinagar on behalf of the State Government which has borne the cost of printing. The task of planning, designing and coordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA
Registrar General, India

New Delhi
the 26th April, 1982

PREFACE

The compilation and publication of District Census Handbooks has been a traditional feature of the Indian census since 1951. However, in Jammu and Kashmir State, where no census was conducted in 1951 due to the unsettled conditions prevailing then, this work was taken up as a regular feature of census since 1961 with certain improvements and additions in the data content of the publication at the 1971 census, further enhancing its utility for the Data Users.

The 1981 series of the District Census Handbook which we have begun with the district of Punch will contain two parts each. Part A deals with Town and village Directory and Part B consists of Town and Villagewise Primary Census Abstract. In 1971 census there was also third part of the Handbook, published as a separate volume, comprising administrative and census statistics. However, in view of the considerable delay experienced then in getting the relevant administrative statistics pertaining to various departments, compilation of this volume has been given up at the 1981 census. It is expected that such statistics would be available to the data users in the usual publications of the State Directorate of Evaluation and Statistics.

The Town Directory of the Handbook consists of seven statements which are almost similar to those adopted for the 1971 census except that a few new columns have been added to facilitate analysis of the data. A significant addition is of class of town in every statement which has been done on the consideration that the infrastructure of amenities and facilities found in urban India can best be analysed with reference to this specific parameter. The addition of the column on civic administration status in statements III and IV and population in statements IV and V also serves the same purpose vis-a-vis the respective statements. Due consideration has also been given to the Minimum Needs Programme of the Planning Commission. The columns on Scheduled Caste population in statement IV and and adult literacy classes/ centres in statement V are a sequal to this programme.

The Village Directory also follows the same pattern as in 1971 census except again for a few additional columns. The column on total population and number of households has been added to facilitate analysis of the other data in the Directory. The column on approach to village is to identify the number of inaccessible villages in the district. The column on number of households living in owned houses or posessing house sites in the village is again intended to cater to the Minimum Needs Programme of the Planning Commission.

It is hoped that with its present content the Handbook would, more than ever, serve as a useful reference publication, particularly for such Administrators and Data Users as have to deal with planning, implementation and evaluation of development programmes, including the Minimum Needs Programme, at the grass roots level.

The compilation of the Handbook would not have been possible but for the cooperation extended by the Revenue, Education, Medical, Public Health and other local authorities of the District in making relevant data available, for which we owe them our grateful thanks.

It must be stated here that the task of finalising and printing the present volume has fallen on me, since Shri A. H. Khan, IAS, Director of Census Operations, Jammu and Kashmir, under whose able stewardship the census operations of 1981 were carried out, retired from Government service by the time the volume could be taken up for compilation.

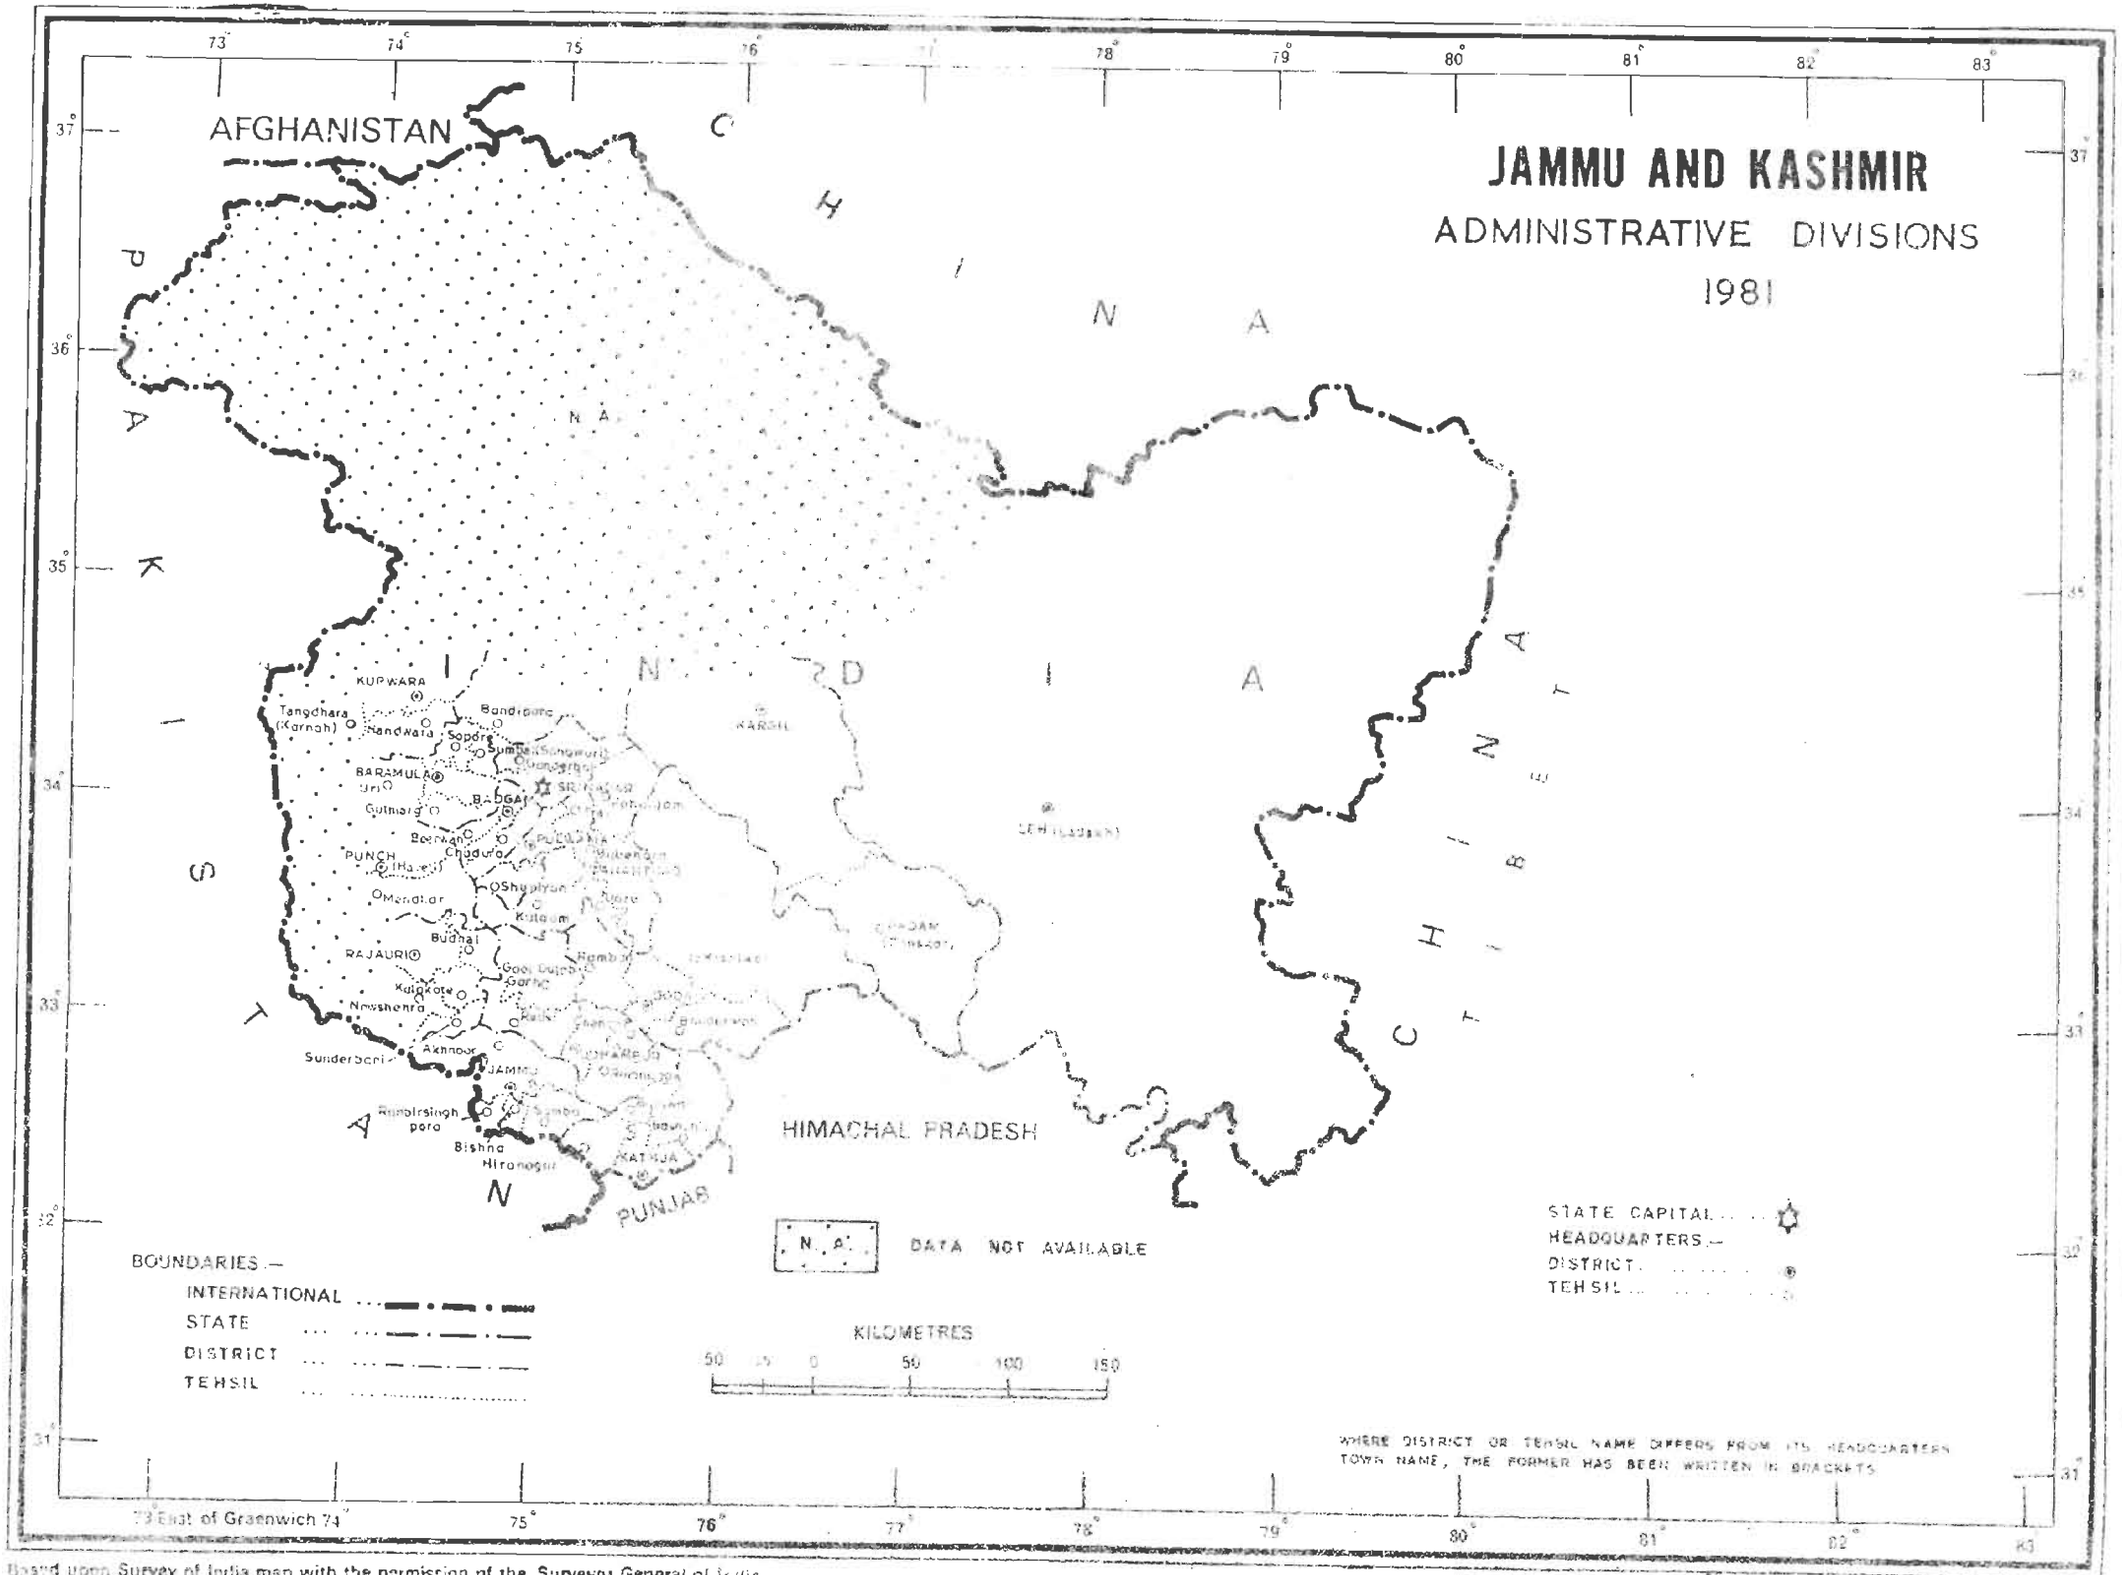

We are grateful to Shri P. Padmanabha, IAS Registrar General and Census Commissioner of India and Shri N. G. Nag, Deputy Registrar General (Social Studies) whose detailed instructions, guidance and advice were available all through.

The credit for compiling this Handbook, including analysis of data, belongs to Shri H. L. Kalla, Deputy Director and Shri Shamus-ud-Din, Tabulation Officer, who ably assisted the former in this task and both deserve appreciation for their respective contributions.

The handbook has been provided with seven maps, one showing the administrative divisions of Jammu and Kashmir State as in 1981, one pertaining to Anantnag district and rest to its five constituent tehsils. These were prepared by the staff of our Cartographic section under the close and valuable guidance of Dr. B. K. Roy, Deputy Registrar General (Map) of the office of the Registrar General India. Their names along with those of other officials who rendered valuable assistance in bringing out the volume are mentioned separately in this handbook.

NOTE :—*The population figures exclude population of area under unlawful occupation of Pakistan and China where census could not be taken.

**Includes 78114 Sq. Km. under illegal occupation of Pakistan and 5180 Sq. Km. illegally handed over by Pakistan to China and 37555 Sq. Km. under illegal occupation of China in Leh (Ladakh) District.

@Excludes 3, 1 & 4 villages of Srinagar, Chadura and Badgam tehsils forming out-growths of Srinagar Urban Agglomeration, 6 villages of Jammu tehsil forming out-growths of Jammu Urban Agglomeration respectively and 1 village of Udhampur tehsil treated as Census Town.

(a)Provisional.

ANALITICAL NOTE

A description of the various concepts used at the 1981 census and a broad appraisal of the administrative statistics vis-a-vis the history of the district, the social & cultural changes witnessed by the district during the last ten years particularly in relation to economic resources, social, cultural and developmental activities and a brief description of the places of historical and religious importance in the district is given in the following pages :

Rural/Urban Classification

For the 1981 census the classification of urban areas have been based on the following criteria :

a) All places with a municipality, corporation or cantonment board or notified town area committee.

b) All other places which satisfied the following tests :

i) A minimum population of 5000

ii) At least 75 percent of male working population engaged in non agricultural (and allied) activity.

iii) A density of population of at least 400 per sq. km. (1000 per sq. mile).

The places which satisfied the criterion(a) above were treated as statutory towns while those as were not statutory towns but satisfied the tests laid down in criterion (b) above were treated as census towns. All other places which did not satisfy either of the above two criteria were classified as rural. Areas which qualified to be treated as towns under criterion (a) and (b) above were further classified by population ranges in the following order :

Population range	*Class*
1,00,000 and above	I
50,000 — 99,999	II
20,000 — 49,999	III
10,000 — 19,999	IV
5,000 — 9,999	V
Below 5,000	VI

Census House

A Census house was defined as a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc. used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purposes or both.

Census Household

A household for purposes of the 1981 census has been defined as a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both.

Scheduled caste/Scheduled tribe

In Jammu and Kashmir State there are no scheduled tribes. However, the following 13 castes stand notified as Scheduled Castes under the State constitution :

1. Barwala
2. Basith
3. Chamar or Ramdasia
4. Batwal
5. Chura
6. Dhyar
7. Doom or Mahasha
8. Gardi
9. Jolaha
10. Megh or Kabirpanthi
11. Ratal
12. Saryara
13. Watal

At the 1981 census only those persons who returned themselves as belonging to any of the 13 castes specified above was treated as Scheduled Caste.

Literacy

For purposes of census a person was treated as literate if he/she could read and write in any language with understanding power. A person who could merely read but was not able to write was classified as illiterate. For a person to be treated as literate it was not necessary that he/she should have received any formal education or should have passed any minimum educational standard.

Workers/Non-workers

For the 1981 census a person was treated mainly as a worker if he had participated in any kind of economically productive work during the major part of the reference year i. e., at least 6 months or 183 days or more prior to the date of enumeration. A person who claimed to have participated in any kind of economically productive work for less than six months prior to the date of enumeration was treated as a marginal worker. However, persons who did not participate in any kind of economically productive work during the whole period of the reference year were treated as non-workers.

Brief history of the district

Anantnag is one of the six districts of Kashmir valley situated in its south and south western direction. Geographically the district lies between 33°—20′ to 34°—15′ north latitude and 74°—30′ to 75°—35′ east longitude, bounded in the north and north-west by Srinagar and Pulwama districts respectively and in the north-east by Kargil district. It is also bounded by Doda and Kishtwar tehsil in the east and south-east and bordered by tehsil Gool Gulab Garh of Udhampur district, Ramban tehsil of Doda district and tehsil Budhal of Rajauri district in the south and south-west. However, its western portion is contiguous with Mendhar tehsil. Its entire southern sector and major part of the eastern region is strewn with thick forests and mountains. The height of these mountains in the east, south and west of the district ranges between 2438 ms. to 3048 ms. and in some cases, the peaks even soar to a height of 4267-4572 ms.

The name of Anantnag District according to a well known archaeologist, Sir A. Stein has been derived from the great spring Ananta Naga issuing at the southern end of the town. This is also corroborated by almost all local historians including Kalhana according to whom the town has taken the name of this great spring of Cesha or Ananta Naga land of numerous springs.

The district as well as its headquarter town are also called Islamabad. Regarding this second name no mention is to be found in the old chronicles of Kashmir. It is however, said that the name of Islamabad was assigned to the town by one Islam Khan who was the Governor of Kashmir in 1663 A.D., but the change in its nomenclature proved temporary and in course of time the principal town as well as the district resumed their old name, Anantnag. Before the advent of Muslim rule in 1320 A.C., Kashmir was divided into three divisions, viz ; Maraj in the south, Yamraj in the centre and Kamraj in the north of the valley. Old chronicles reveal that the division was the culmination of the rift between Marhan and Kaman, the two brothers, over the crown of their father. The part of the valley which lies between Pir Panjal and Srinagar now called the district Anantnag was given to Marhan and named after him as Maraj. The part below Srinagar fell to Kaman and was known as Kamraj. While Srinagar is no longer known as Yamraj, the areas to its north and south are still called Kamraj and Miraj respectively. Lawrence in his book valley of Kashmir states that these divisions were later on divided into thirty four sub-divisions which after 1871 were again reduced to five zilas or districts.

Anantnag like the rest of the Kashmir valley has witnessed many vicisstudes and experienced many upheavals from time to time. What must have once been magnificent architectural show pieces like the Martand complex of temples situated at a distance of nine kilometers from the district headquarters or the places of Laltaditya and Awantivarman at Awantipora lying midway between Srinagar and Anantnag town are now in grand ruins. The Moughal emperors especially Jehangir developed many beauty spots of the district, but of their noble and magnificent edifices

only fainted traces survive. All the same, even in their present ruinous conditions, these monuments do not fail to feast the eye or excite the imagination of admirers at large.

Brief history of District Census Handbooks

The District Census Handbook were published for the first time in 1951 as a part of the census publication programme in almost all States of India except Jammu and Kashmir State where due to the disturbed conditions prevailing in the wake of tribal invasion of 1947-48, no census could be undertaken and as such no data was collected for the decade 1941-51. The publication of District Census Handbook series fulfilled a long felt need. These gave out not only the data contained in Primary Census Abstract according to new classifications but included a sufficient account of the district and its people, and a vast magnitude of other data covering such topics as communication, education, public health etc. in respect of each town and village of the district. Consequently these have been found to be of immense help to all the departments of the State Government for planning and development at the grass-roots level. With the introduction of single line administration at the district level, the utility and importance of these publications for constant use and reference by District Development commissioners has increased enormously. The present handbook is proposed to contain even more comprehensive data than in the past so as to meet also the requirements of minimum needs programme set forth by the Planning Commission. The publication will besides the basic population data emanating from the 1981 Census, contains comprehensive information pertaining to amenities and land-use pattern and other infrastructural statistics in respect of each village and town of the district so as to serve as a ready reference material for planners and administrators for assessment of past achievements and formulation of new programmes of development at the grass roots level.

Town directory

The Town directory covers information at town level and includes items such as status of administration, growth of population, growth pattern since 1901, physical aspects and location, civic finance, civic and other amenities, medical, educational, recreational and cultural facilities, trade, industry and commerce, banking facilities etc.

In addition demographic data like sex-ratio, number of households, density of population and position of civic and other amenities in notified or recognised slums of class I and II towns have also been introduced. Considering the increasing employment of women in urban areas and the consequent housing need of single working woman, it has been felt necessary to indicate in the town directory also suc h hostels with number of seats.

A broad appraisal of the data incrorporated in the seven statements of the town directory is attempted in the following paragraphs :

Statement-I gives information on civic administration status as in 1980, growth history of towns from 1901 to 1981, sex ratio of towns from 1961 to 1981, density and area in sq. kms.

Statement-II gives the physical as well as locational aspects of towns of the district. Under the physical aspects data on annual rainfall (in cms.) and maximum and minimum temperature (in centegrade) have been highlighted. The statement also gives information on distance of the town from the nearest city with a population of one lakh and above, distance from the State, district and tehsil hqrs., from the railway station and bus route. It also provides information on the existence of river/canal if any within 10 kms.

Both Jammu and Srinagar, the winter and summer capitals of the State Government are situated at a long distance from Anantnag. The former is approximately 54 kms. and the latter 237 kms. from the headquarters of the district. Jammu is the nearest railway station for Anantnag. The towns are however, connected by various bus routes.

Statement-III provides the budgetary statements pertaining to the financial year 1978-79. The statement has been apportioned into the receipt and expenditure heads. Under the receipt head information has been given on such items as "receipt through taxes, revenue

derived from municipal properties and power apart from taxation, Government grants, loans, advances and other sources". Expenditure head shows expenditure on general administration, public safety, public health and conveniences, public works, public institutions and others.

Statement-IV depicts civic and other amenities available in the towns of Anantnag District and gives information on such items as length of the road in the town, system of sewerage, number and type of latrine, method and disposal of night soil, source and capacity of drinking water and fire fighting services. The statement also highlights the pattern of electricity consumed in the town and indicates the number of connections under sub-heads like domestic, industrial, commercial, road-lighting and others.

Statement IV-A which is meant to depict civic and other amenities available in the notified slums of class I and II towns has no relevance for Anantnag district.

Statement-V gives medical, educational, recreational and cultural facilities as were available in the towns in 1979. Under medical facilities are indicated the type of medical institutions and the number of medical beds available. Likewise, different types of educational institutions available have been covered under educational facilities. Information regarding the number of cinema houses, stadia, auditoria/drama halls and public libraries have also been incorporated in the statement to bring out the extent of availability of recreational and cultural facilities. In addition, information about number of working women hostels has also been given in the statement. If a medical or an educational facility was not available in the town, the name of the nearest place where it is available has also been given in the statement.

Statement-VI gives the facilities of trade, commerce, industry and banking available in the towns in 1979. Besides, the number of credit cooperative societies operating the details of three most important commodities imported, exported and manufactured in the town have also been indicated.

Village Directory

The village directory portion of the Handbook depicts particulars of amenities available in each village of the district in the field of education, medical care, power supply, drinking water, post and telegraph, communication, besides information about land use and places of religious, historical and archeological importance in the village. In case where a particular amenity is not available within the village, distance at which such a facility is available, even in the most modest form has been indicated in three broad ranges viz. —5 kms., 5—10 kms., and 10+ kms.

If there are composite schools, like middle schools with primary classes, or secondary schools with middle classes, these have also been included in the number of primary and middle schools, respectively. For example if in a village or a town there were two primary schools and one middle school with primary classes, in the village/town the number have been given as three and that of middle school as one even though there are only three educational institutions, so also in case of sccondary schools.

The village directory also carries the following four appendices :

Appendix-I : It gives the abstract of educational, medical and other amenities available in the tehsils of the district.

Appendix-II : It furnishes the land utilisation data in respect of census towns. This appendix however, is not relevant to Anantnag district.

Appenix-III : This is a list of villages where no amenities other than drinking water like education, medical, post and telegraph, communication, power supply are available.

Appendix-IV : It provides a list of villages according to the proportion of scheduled caste population by ranges.

All these appendices appears after the main village directory.

Primary Census Abstract

The Primary Census Abstract part of the publication is exclusively based on the 1981 Census data. It provides information in respect of each village and ward/mohalla of a town at tehsil level in respect of its area, number of residential houses, number of households, total population, scheduled caste population, literate and educated persons and working population by sex in four broad industrial categories viz; (i) cultivators, (ii) agricultural labourers, (iii) household industry, manufacturing, processing, servicing and repairs and (iv) other workers besides non-workers as a separate category.

Special PCA on Scheduled Castes

It is for the first time that a special Primary Census Abstract has been introduced in the District Census Handbooks for the Scheduled Caste population. The special PCA provides information pertaining to Scheduled castes in respect of number of residential houses and their population, literates, main workers classified by cultivators, agricultural labourers, workers in the household industry and other workers, marginal workers and non-workers classified by sex. This PCA is also presented for District, Tehsil and Town levels.

Physical Aspects

During the inter-censal period 1971-81 the district has undergone notable jurisdictional changes. The area of the district which stood at 5,382 kms. in 1971 has shrunk now to 3,984 kms. This is because in pursuance of the notification issued on the first of July, 1979 the old district of Anantnag has been bifurcated into two districts ; (a) Anantnag comprising four tehsils viz; Anantnag, Doru, Kulgam and Pahalgam and (b) Pulwama comprising three tehsils viz; Shoupiyan, Pulwama and Tral.

During 1980-81, Niabat Bijbehara was upgraded to the level of a tehsil, after adding into its jurisdiction nine Patwar Halqas, three more other from Kulgam tehsil and one from Pahalgam tehsil raising the total number of patwar halqas in this new tehsil to 13. In this way the total number of tehsils in Anantnag district now stand at five.

The district has been sub-divided into the following 10 Community Development Blocks :

1. Dachnipora
2. Khoveripora
3. Shangas
4. Achabal
5. Breng (Kokernag)
6. Kakipo (Shabad)
7. Qazigund
8. Qaimoh
9. Kulgam
10. Damhal Hanji Pora

The district encompasses one town Area, 7 Notified Areas and 645 villages of which 19 are un-inhabited and this whole jurisdiction stands divided into 26 land Revenue circles and 151 Patwar Halqas.

Major characteristics and social and cultural events

According to the 1977 live stock census, the live stock population of the district stood at 4.37 lakhs and poultry at 3.40 lakhs. For treatment of live stock population the district has 25 Veternary dispensaries, 8 live-stock Development Centres functioning under gujjar and bakarwal development scheme. In addition, 10 First-Aid Centres and one Mobile Dispensary have also been set up bythe State Government for the upkeep of the health of the live stock. For development and improvement of the local breed, there are 50 ICD centres, 4 Frozen Semen Centres and one artificial breeding station in the district. As for poultry development, there is one poultry project at Mattan and 7 poultry extension centres functioning in the district. For sheep husbandry there is one central sheep and breeding farm at Daksum as also 65 Sheep and Wool-Extension Centres.

The district has 90 primary Agricultural Societies, 11 Marketing Societies, 4 Sale Service Societies and 9 other types of Cooperative Societies. There is also one wholesale store (Super Bazar) with eight branches, two primary consumer stores, one central cooperative bank with 10 branches and one consumer store. During 1981-82 about 6452 tonnes of fertilizer were distributed through primary agricultural societies among the farmers of the

district. Likewise, short-term and medium term loans to the tune of Rs. 103.11 lakhs have been advanced through cooperative societies to the members.

Except for small sized thermal power station established at Pahalgam, no electricity is generated within the district even though the district is dotted with a network of perennial rivers, nallas, streams, water falls etc. The present demand of electricity is met from sources outside the district. While all the urban areas of the district have electricity the rural position is that out of a total of 626 inhabited villages 588 stood electrified by the end of March, 1982 which indicates an achievement of 94%. This is no mean achievement considering the fact that the coverage of rural electrification in the district was hardly 15% until as late as 1973.

Several power generating projects are under investigation in the district which may be briefly described here.

1. It is proposed to generate power in four stages on Lidder Nallah from Sheshnag to Bawan. It envisages construction of first power house at Chandanwari with an installed capacity of 50 MW. In line another power house with a generating capacity of 50 MWS is also proposed to be located at Laripora, Pahalgam. A third power house is likely to be situated at Aishmuqam with an installed capacity of 22 MWS of power. Yet another power house is proposed to be installed at Bawan with a generating capacity of 20 MWS. The investigations on these schemes are in progress.

2. In the meantime the department has proposed a power generation scheme at Pahalgam very near the old defunct power house. The scheme is to generate three MWS of power at an estimated cost of about Rs. 6 crores. The scheme awaits the approval of the Central Water Commission.

3. Also under consideration is another interim scheme which envisages to generate power on Lidder between Pahalgam and Batakote. The scheme contemplates setting up a power house at Batakote with a generating capacity of about 23 MWS of power. As the State Power Development Department completes their investigations, the project is expected to be submitted to the Central Water Commission for clearance.

4. One more scheme under investigation with the department is Brinji Hydel Scheme. The proposed power house on Brinji Nallah is expected to have a generating capacity of about 7 MWS of power.

5. Yet another scheme under consideration is the Kandia Hydel Scheme. This scheme is envisaged to generate about 72 MW of power during 6 months of peak demand in winter months. A 200 high rock-fill dam is proposed across Kandia Nallah near Reshi Pora Nogam villages of Kulgam tehsil.

6. One more scheme under priliminary investigation is the Vishow Hydel Scheme at Aharabal. The scheme envisages generating power in 2 stages; between Kounsernag and Kongwaten where a power house with 15 MWS generating capacity is proposed to be located at Kongwatten and between Kongwatten and Wattoo where a power house with an installed capacity of 50 MWS is proposed to be situated in the vicinity of villages Avil and Wattoo.

The level of literacy recorded by the district at the 1981 Census is 22.93% as against 26.67% for the State as a whole. By sex the literacy rate works out to 36.29% for males and 15.88% for females. The distribution of different levels of educational institutions in the district inclusive of both rural and urban areas is as follows :

S. No.		*Total*
1.	Primary Schools	879
2.	Middle Schools	256
3.	High Schools	72
4.	Higher Secondary Schools	5
5.	Degree Colleges	2
6.	Adult Education Centres	23

The enrolment of school going children in Government schools as on 30-9-81 is indicated below :

(Fig. in Lakhs)

Age-group	Boys	Girls	Total
6—11	0.36	0.18	0.54
11—14	0.12	0.05	0.17
14—18	0.06	0.02	0.08
	0.54	0.25	0.79

Correspondingly there were 3,351 male teachers and 899 female teachers working in all the Primary, Middle High and Higher Secondary Schools put together.

The teachers pupil ratio and the school teacher ratio thus works out as under :

Type of schools	Teachers pupil ratio	School teacher ratio
Primary Schools	1 : 26	1 : 2
Middle Schools	1 : 18	1 : 8
High Schools	1 : 14	1 : 16
Higher Secondary Schools	1 : 15	1 : 24

The district has made considerable progress in the field of medical facilities. The position of medical institutions as functioning in the district is as under including both rural and urban areas :

Type of medical institutions	*Number*
Hospital	2
Dispensary	85
Maternity and Child Welfare Centre	25
Primary Health Centre	18
Family Planning Centre	15

The Department of Social Welfare looks after the schemes of up-liftment of the down trodden, destitudes and other economically and socially backward population in the district. A full-fledged district office is in position to administer the implementation of special schemes to benefit children, widows, orphan, handicapped and diseased person which, among other things, include measures to provide education, health, housing and economic welfare. There are 16 social welfare centres and one Markazi-Fallahi-Mastoorat in the district where training like cutting and tailoring, embroidery etc. is being imparted.

Anantnag district is well known for traditional handicrafts like Gabbas, Wooden products Willow Wicker work. Gabba making and Wood work are traditional household industries of the district. Among other products, toys with a wide range of items such as balls, horses, baby walkers, spinning wheels, whistles etc. are produced. The district is also famous for manufacture of the traditional fire pot—Kangri.

Rich in perennially flowing streams of old and clean water, the district is appropriately known as anglers paradise. For further promotion of fishing the existing streams like Lidder, Brengi, Kokernagh and Verinag are being further improved while new streams like Ishtal in Kulgam tehsil, Panzeth in Qazigund area and Sarbal in Verinagh area are being developed as new trout streams. The development of commercial trout farm at Kokernagh has been taken up with Danish collaboration at an estimated cost of Rs. 91.75 lakhs. The procurement of land and the chain link fencing around the area have already been completed.

By a recent State Government decision all the agricultural development programmes are being coordinated at the district level. This step has been taken for fuller utilization and coordination of the manpower resources and for achieving effective results through the process of single-line district administration. The Chief Agriculture Officer is responsible for the coordination and implementation of Agriculture Development Programmes in the district for the following schemes :

1. Agriculture Development, extention service and plant protection measures.
2. Mushroom Development
3. Agriculture Development
4. Soil and Water Conservation
5. Soil Testing
6. Vegetable Development

The field staff provided under the above schemes, including the Agriculture extension officers, have been rationalised and workable units have been carved out and thus 25 agricultural zones under the technical and administrative control of the Agricultural officers have been created at the Zonal level. The offices of the Zonal Agricultural Officers

also serve as store and sale centres for all the Agricultural inputs.

Until 1974-75 irrigation facilities were available for an area of 29,503 acres of cultivable land. By 1980 however, these facilities had been made available for as much as 70,865 acres of cultivable area.

An amount of Rs. 22.18 lakhs has been spent on various flood control measures. In all 53 schemes have been sanctioned for this purpose of which 7 have already been completed, 22 are near completion and 36 are under various stages of progress. An amount of Rs. 20.23 lakhs was spent in the district on various flood control activities.

Greater attention has been given in the district plan to the construction of roads and bridges. Presently there are in all 208 schemes under various stages of implementation with an estimated cost of Rs. 9.64 crores to be incurred during this period. The construction of Daksum-Simpthan-Kishtwar road is one of the important schemes in the plan project. So far an amount of Rs. 1.20 crores has been spent on the construction of the Daksum-Kishtwar road and out of its total length of more than 32 kms., the construction work on 30 kms. length has already been completed and on the remaining 2 kms. the work is in progress. However, it is expected that by the end of March, 1982 the entire construction work on this road would have been completed. Another important road viz ; Lahawan-Margan road is expected to be completed at a cost of Rs. 32.70 lakhs in the year, 1982. During the current year, the construction of 2 important bridges namely, Khanabal bridge and Doonipawa bridge have already been taken in hand at an estimated cost of Rs. 97 lakhs.

Upto 1974-75 the district had a road length of 403.77 km. in black top while during the years 1975-76 to 1979-80, 116 km. road length in this category was added. In total, during this period construction of 18 km. road length of metal top road, 132.50 km. length of singling and 172 km. of fair weather roads and a jeepable road length of 169.32 km. have already been completed.

Provision of drinking water facility was given first priority during the current district plan. Every effort has been made to provide drinking water facility to the public in both rural and urban areas. For this an amount of Rs. 1.05 crores had been allocated which has since been spent on various schemes sanctioned for the purpose. There are another 48 schemes in hand to be completed and amongst them 27 schemes have already been completed. With the completion of these schemes, 34 villages comprising a population of 31,000 have been benefitted. The district had during 1974-75 only 70 villages and 26 hamlets with a population of I.14 lakhs having drinking water facility. By the end of the year 1974, 114 villages and 23 hamlets having population of 1.43 lakh persons were brought under the provision of potable drinking water. By and during 1979 however, another 2.57 lakh persons in the district have come to enjoy this facility. During the current year it is proposed to provide drinking water facilities to another 27 villages which would benefit another 21 thousand persons in the district. In addition, eight other small schemes are being sanctioned at a cost of Rs. 2.14 crores for provision and extension of drinking water facility so as to bring more population under its fold.

Sericulture industry has earned a good name among all the small household industries in the district. It is estimated that about nine thousand households are living on this industry alone in the district and for its further development an amount of Rs. ten lakh is being proposed to be spent, out of which Rs. 8.50 lakhs have already been utitized. However, during the year one lakh and three thousand mulberry trees were planted in the district.

With a view to providing job opportunities to the educated unemployed youth a programme for self employment has been sanctioned in the district. Under this scheme 362 small scale

units have been opened in the district for which liberal loans to the tune of Rs. 27.90 lakhs have been given by the Government to the entrepreneurs. During the current year it is proposed to open 40 more industrial units.

Under the supervision of District Industries Centre, the small industries have made considerable progress and about 1,400 units have been opened in the district so far. By this measure 6,400 persons have got employment in this sector alone. The industries centre has provided a loan of Rs. 22.78 lakhs to 125 entrepreneurs. The Cricket Bat Industries have so far exported about 3.22 lakh bats outside the State.

For manufacture of sports goods, an industrial complex on a land area of 216 canals is being constructed. The complex will accommodate 60 industrial units and will be provided with modern facilities for manufacturing of standard sports goods.

During the current year an amount of Rs. 5.08 lakhs is being spent on development and manufacture of Gabbas. During 1980-81 about 247 small industrial units have been registered in the district while another 283 units are registered with the Khadi and Industrial Board. For speedy development of industries in handloom and handicraft a loan of Rs. 1.55 lakhs was distributed among 48 parties under the State Aid Industries Act. There are presently 45 Handicraft Training Centres functioning in the district which have imparted training in different trades to 1,125 persons during 1980-81. In addition, there are 2,793 registered shops and commercial establishments giving employment to a number of persons in the district.

Brief description of religious and historical places and places of tourist interest :

Shrine of Aishmuqam

Village Aishmuqam is very well known in every part of Kashmir on account of the historical shrine of Sheikh Zain-ud-Din who lived in the 15th century A.D. and was one of the principal disciples of Sheikh Nur-ud-Din, the leading Reshi of Kashmir.

It is commonly known in Kashmir that Sheikh Zain-ud-Din, who was known by the name of Zia Singh before his conversion was a prince and belonged to the ruling Rajas of Kishtwar. His father Yesh Singh, the then Kishtwar ruler, is said to have been assassinated when Zia Singh was only 13 years old. Zia Singh is believed to have been suffering from some disease which took a serious turn leaving no aspect of his recovery. Sheikh Nur-ud-Din is said to have passed through Kishtwar just at that time and having heard of his miraculous performances, Zia Singh's mother begged of the Sheikh to visit the patient and to pray for his recovery. The Sheikh agreed to pray on the understanding that Zia Singh would meet him in Kashmir after he recovered. Zia Singh did not however keep his promise and after sometime he was again confined to bed. His mother kept on crying day and night until she had a vision in which the Sheikh reminded her of the promise she had made. Zia Singh's mother promised that she would fulfil her obligation this time if her son would recover again. With the restoration of his normal health, Zia Singh proceeded to Kashmir to meet his benedictor. The mother and the son undertook the hazardous journey from Kishtwar to Bumzua, a village about 8 miles south of Aishmuqam, where Sheikh Nur-ud-Din was staying at that time. It was at this place that both Zia Singh and his mother embraced Islam under the names of Zain-ud-Din and Zoon Ded respectively.

Among the local inhabitants the legend has it that Zain-ud-Din meditated for a long time in village Mandjan of tehsil Sopore where he attained spiritual perfection. It was at this stage that Sheikh Nur-ud-Din advised him to migrate to the cave at Aishmuqam and to meditate there for the remaining period of his life. On his arrival, Sheikh Zain-ud-Din found the entrance to the cave blocked by snakes, cobras and reptiles. It is said that the saint carried with him a club which he had received from his master. Seeing the serpents he placed the club on the ground and it was instantaneously transformed into a dreadful cobra. The snakes in the cave got awestricken and not only surrendered to the Sheikh but also vacated it and migrated to the village Puhurpujan which is about 16 miles to the east of Aishmuqam.

The exact date of the death of the saint is not known. His urs or anniversary is, however, being celebrated on the 13th day of Baisakh corresponding to 25th of April.

Two mosques, one known as Khankah are also attached to the shrine. The Khankah besides being used for prayers is also a repository of the relics of the saint which are held in high esteem. These consist of a bow, a patten, a wooden bread, a rosary, a wooden club and a copy of Quran. It is said that the saint observed fasts frequently and whenever he felt hungry he licked the wooden bread to satisfy his appetite. These relics are publicly displayed whenever the village meets with some catastrophy, such as a femine, epidemic, etc. The shrine attracts hundreds of thousands of people from all parts of the valley every year. On the date of anniversary of the saint congregational prayers are held which are attended to by no less than 20,000 people.

According to the legend, the festival continues to be celebrated from pre-Islamic times and dates back to about 2,000 years.

The shrine of Zain-ud-Din is respected by all communities and they actively participate in the celebration of the anniversary. There is no restriction to the entry into the shrine which is open to visits by persons of either sex and of any community.

Tomb of Baba Hyder Reshi

The tomb of Baba Hyder Reshi popularly known as Harda Reshi or Reshi Molu, the saint at whose anniversary local people of the area abstain from flesh eating for one week, is visited by both Muslims and Hindus alike. The shrine is one of the famous places frequented by people from all over the valley. It is situated in Mohalla Reshi Sahib in Anantnag Town. The body of the saint is enshrined alongwith 21 of his disciples in the tomb.

Born on 29th Rajab, 909 Hijri (27-1-1504) A.D. in village Dandar of tehsil Anantnag in the house of Sheikh Abdulla a blacksmith by profession, Baba Hyder Reshi is said to have performed great miracles in his very childhood. He used to look after cultivation, tend cattle, and spent his life in complete celibacy. His spiritual guide had been Hazrat Sheikh Hamza Makhdoom Sahib, a great saint of Kashmir whose shrine is situated on the hill of Hari-Parbat located in Srinagar city. From him, he is said to have received religious education and spiritual inspiration.

Baba Reshi came into prominence when the then ruler of Kashmir Ali Shah Chak and the prince Yousuf Shah Chak started paying courtesy calls on him. The one time great scholar and chief Qazi of Kashmir Baba Dawood Khaki also used to visit him. Reshi Saheb possessed great spiritual powers and abstained throughout his life from eating meat and onions. Some of the miracles attributed to him are given below :

An eighty year old devotee of the saint Ab. Rahim Badal who was a rich man had no issue and had given up all hopes to have one. One day he visited the saint and asked for what was apparently impossible. The saint offered an apple to his devotee. After nine months a male child was born in his house who was named Mohd. Sharief. However, the child's mother died. The child refused to suckle any other breast. When brought before him, the saint put his own finger into the child's mouth which he at once started sucking. The child in his adulthood attained spiritual enlightment and later joined as one of the disciples of the saint. The saint is said to have passed away in 976 Hijri (1568 A.D.) at the age of 67 years in deep meditation. The relic has been passed from Khalifa Hazrat Ali to Sheikh Shahab-ud-Din Sohrawardi and afterwards it is said to have been presented to Baba Reshi by Hazrat Makhdoom Sahib when the former accepted him as his spiritual guide. There is also a rosery and a walking stick of the saint preserved in the shrine of Reshi Sahib.

Masjid Syed Sahib

The mosque of Syed Sahib has been constructed in the memory of one Hazrat Syed Mohd. Inayat-Ullah Qadiri Samnani who came to Kashmir alongwith other disciples from Samnan city (central Asia) in the year 935 Hijri (1528 A.D.). He undertook the

construction of the mosque in the town in the same year which is now situated at the foot of the Anichteep of the Martand Plateau. Syed Mohammad Anayat-Ullah Samanani died at the age of 75 years in 995 Hijri on Friday the 6th Shaban (27-1-1587) A.D. His body is buried in the nearby shrine.

The death anniversary of the saint Hazrat Syed Sahib is observed every year according to Islamic Calendar on 8th of Shaban.

Masjid Baba Dawood Khaki

Masjid Khaki is one of the oldest mosques in the town and is situated in Reshi Bazar of mohalla Kakhi Sahiban in Anantnag town. It is more than 600 years old and is named after Hazrat Sheikh Baba Dawood Khaki the chief disciple of Hazrat Sheikh Hamza Makhdoom Sahib. Baba Dawood Khaki has also been the chief Qazi of Kashmir and a scholar of great repute. It is said that Shah Hamdan the great saint of Hamdan in Iran who had come to Kashmir about 600 years back, visited the town and offered prayers at a platform where now the present mosque of Hazrat Sheikh Baba Dawood Khaki stands. The ground floor of the mosque was completed in 800 Hijri (1397 A.D.) by Mir Mohd. Hamdani, the son of Shah Hamdan. It is reported that Baba Dawood Khaki undertook the construction of the first floor of the mosque in 987 Hijri (1579 A.D.) while the second floor of the mosque was completed in 990 Hijri (1582 A.D.) under his own supervision. The saint propogated the ideology of Islam and constructed number of mosques in different villages of Anantnag district, which even now remain named after him. The saint died in 995 Hijri (1587 A.D.) after staying in the district for about ten years. The legend has it, that after a period of three weeks of the death of the saint, the then Mughal Governor of Kashmir had a dream in which he saw Mukhdoom Sahib directing him to bring the body of Baba Dawood Khaki to be laid by his side at Srinagar. The Governor therefore secretly planned to bring the body of Baba Dawood back to Srinagar. He proclaimed that the Royal party from Srinagar would be visiting the town and that the inhabitants of the town should remain indoors till the Royal party had returned to Srinagar. The party was accompanied by an army contingent. They visited the shrine of Reshi Sahib and dug out the body of Baba Dawood in complete secrecy and placed it in a coffin and left for Srinagar. When the party had just reached Khanabal—a place on the outskirts of the town a—word went round among the inhabitants of the town that the body of the saint Baba Dawood Khaki has been stealthily removed from his grave by the Royal party and that they were on their way to Srinagar. A big crowd of townsmen rushed to meet the Royal party to snatch away the coffin. A big scuffle ensued. Finally it was decided that the body would be awarded to the group which could lift the coffin from the ground. Inspite of all efforts the inhabitants of the town failed to lift the coffin. The Royal party on the other hand lifted it comfortably and carried it away to Srinagar where the body of the saint stands buried by the side of the grave of Hazrat Sheikh Hamza Mukhdoom Sahib.

Amarnath Ji

The district is also famous for the Amarnathji cave situated at a distance of 46 kms. from district headquarters. Thousands of pilgrims visit the cave every year. The annual Amar Nath procession starts from Srinagar and passes through this district is a most impressive spectacle with the Mace of Lord Shiva carried at the head of the long colourful procession of the devotees. Mention of this sacred cave is made by Pandit Kalhana in Rajatarangini where according to him king Ram Dera is stated to have imprisoned the debauch King Sukh Deva and drowned him in the Lidder river among the mountains of Amarnath and that at about one thousand B.C. King Sandimati (34 B.C. to 17 B.C.) had visited the sacred ice Shivalingam. It only indicates that the sacred cave of Amar Nath Ji was known to people in the very early times. The cave is said to have been discovered by a party of Kashmiri Muslim shepherds and even today the descendants of Kashmiri Muslim Maliks of Pahalgam have a share in the offerings to the deity. The cave is known as the sacred abode of Lord Shiva who is supposed to live within the cavern in the form of a block of ice. Nearer to it is another smaller breast like shape which symbolizes the consort of Lord Shiva—the Goddess Parvati. Yet another smaller block of ice signifies the enblem of

Maha Ganeshji, the son of Lord Shiva. The symbols of these deities pulsates as they wax and wane with the moon and on the full-moon nights of the pilgrimage attain their largest size and slowly reduces in the days that follow. It is also said that on the full-moon night, two pigeons haunt the cave and are seen on the day of Sawan Purnima when the pilgrims have a darshan of Lord Shiva.

The tirath of Amarnath has been mentioned in the old chronicles as Amaresbara and is said that Sultan Zain-ul-Abdin the pious ruler of Kashmir paid a visit to the sacred cave. Elaborate arrangements for yatries enroute to the sacred cave are made by the State Government.

Martand Temple

Martand is the impressive and the grandest of all old monuments of Kashmir which has been much admired and often described by the foreign travellers as the ruins of Martand temple or Sun temple and form the most striking of the surviving remains of the ancient architecture of Kashmir. The temple is situated near the edge of the Mattan plateau. The temples are said to have been errected in honour of the presiding deity i.e., the Sun God of the sacred spring which gushes out at the foot of this plateau. The whole structure consists of a lofty central edifice with a small detached shrine on either side of the entrance. It has an impressive quadrangular courtyard of imposing dimensions surrounded by several colonnades.

About a little more than a km. to the north-west of the temple and at the foot of the plateau lie the sacred spring of the Martanda "tiratha". It has remained to the present day one of the most celebrated pilgrimage places in the valley and attracts thousands of visitors from all parts of the country particularly in connection with the performance of "Sharad" ceremony of their forefathers.

Naghbal

The entire complex is known popularly as Naghbal and is famous Hindu religious centre in Anantnag district. The holy spring which originates from here and the formation of which is attributed to Vishno or Narayana is said to be a Vedic 'tirath'. The spring rises beautifully from the foot of a small hill-lock and is dedicated to the worship of Ananta or Vishno. It enjoys a commanding position having a big tank which encloses the spring. Lower down another tank dotted with the temple in its centre is built. There are long shaddy chinnars which stand guard round the tank. These tanks are full of sacred fish and the place also serves as shelter and shade to many weary pilgrims who visit it from different places in and out side the State. By the left side of the holy spring, a small temple now partly in dilapidated condition had been constructed in the times of Maharaja Rambir Singh, the second Dogra Ruler of Kashmir. The diety of Ananta Baghwan has been installed in a small temple just at the outlet of the spring. The Naghbal complex has also other temples built in its premises. The oldest among them being Shiv Ji temple in which the deity of Lord Shiva has been installed in the reign of Maharaja Partap Singh somewhere in 1885 to 1925 A.D. There is also a sulpur spring in the Naghbal complex, which is visited by persons suffering from skin deseases.

Khir Bhawani Asthapan (Devibal)

Devibal temple is situated in mohalla Khaki Sahiban and is just adjacent to the mosque of Hazrat Sheikh Baba Dawood Khaki. It is dedicated to the holy spring of Khir Bhawani which issues here and is now enshrined in a small stone-built one storey temple. It attracts a good number of devotees and is considered a holy place by the entire Kashmiri Pandit community. It attracts large congregations every day and is said to have the same importance as that of Khir Bhawani temple in Tula Mula of Srinagar district. According to a local legend it is believed that once the famous saint of the town Reshi Molu, held in great esteem by Muslims and Hindus of the valley alike, had prayed for the holy "Darshan" of Goddess Durga and requested her to show her presence in the town. She is believed to have acceded to his request and later appeared in his dream in which she is said to have

communicated to him that She is already present in the form of a small spring. According to another belief it is believed that Wazir Panu had a dream in which Goddess Durga told him that She was living underneath the spring. He located the spring and asked one of the priests namely Balkak to look after it. Maharaja Pratap Singh while on his way to Jammu or back to Srinagar would stop here and pray in the name of the Goddess and offer lot of milk in the spring. He also donated some cultivable lands in the name of the shrine. The water that issues from the spring is reported to be changing colours.

Chapel of John Bishop's Memorial Hospital, Anantnag

A small Chapel located in the premises of John Bishop Memorial Hospital, Anantnag is situated in the eastern end of the town in mohalla sarnal and is the only praying ground for the Christians of the town. The chapel was built in 1942 primarily to meet the needs of Protestant Christians of the town and the Christian employees working in the John Bishop Memorial Hospital as also the then high protestant Christian officials posted in and around the town.

Uma Devi of Uma Nagri

Goddess Uma is said to have selected Her abode in the lap of great Himalayas in Kashmir in Umanagri, Uttarassoo in Anantnag tehsil. She is believed to have manifested herself in the form of a stream and appeared in the shape of "Omkar" in five springs. It is said that one Shri Shiv Ram Ji who later assumed the name of Swami Shivananda had attained a high reputation of honesty and sincerity and that while supervising the collection of paddy in the adjoining village of Brah one of the peasants pointed out to him the grain husks stikking to his shawl and reminded him to swift them off before leaving the grain-store. This sarcastic remark had a shocking effect on him and he is said to have thought of detaching himself from the worldly things and started maditating round the clock at Snusha a secluded place near Brah. He is then said to have had a divine vision of Mother Uma directing him to go to her abode at village Uttarasoo. Accordingly, he located the place and went into deep meditation on the specified spot. He lit a continuous pyre (Dhooni) at the place of his meditation near the spring. A Vedic Yagh is since then being performed on the anniversary of the Swami Shivananda in the month of 'Phusa' every year and the relics of the Swami are still preserved at the Dhooni Sahib which are worshipped by numberless devotees. The situation of the shrine comprises 5 springs located in the form of divine Omkara. Out of these springs, 2 merge into a single spring thereby signifying the communion of Shiva and Shakti. The sacred shrine attracts large pilgrims and is revered by all faiths.

Places of tourist interests

The district can rightly boast of possessing the largest number of health resorts in the whole State. Of them particular mention may be made of Verinag, Kukernag, Achabal, Daksum and Pahalgam. During the summer months these are usually filled to the brim by tourists coming from all parts of the country and even a sizeable number of foreigners. Thanks to the sustained effort by the Government in putting the tourist industry of the State on a sound footing, not only have these resorts been given a face-lift in physical appearance in recent years but a large number of Huts, Dak Bunglows and Rest houses have been constructed at each place for accommodating the visitors in all possible comfort.

Brief Analysis of PCA data

Part-B of this publication contains data collected during 1981 Census and is based on the Primary Census Abstract which depicts valuable information in respect of each village and ward/mohalla of a town in the district incorporating various demographic aspects viz; area, number of residential houses, number of households, total population with sex-wise break-up, scheduled caste population, literate and educated persons and sexwise break-up of working population categorised into main workers, marginal workers and non-workers. The information collected from the PCA data has been summarised in the various inset tables giving an insight into the demographic structure of its tehsils. A brief analysis of the

data indicated in these tables has been attempted hereafter for highlighting the various demographical changes that have taken place in the rural and urban areas of the district at tehsil level, particularly during the decade 1971-81.

The sub-joined table No. 1 gives an account of the distribution of population at tehsil level :

TABLE NO. 1

Population, Number of Villages and Towns, 1981

Sl. No.	Name of Tehsil	Population									No. of villages		No. of Towns
		Total			Rural			Urban					
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	Total	Inhabited	
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)	(14)
1.	Pahalgam	50,433	26,940	23,493	47,807	25,483	22,324	2,626	1,457	1,169	67	66	1
2.	Anantnag	237,361	125,593	111,768	190,681	100,942	89,739	46,680	24,651	22,029	171	165	4
3.	Duru	82,174	43,760	38,414	80,187	42,730	37,457	1,987	1,030	957	79	78	1
4.	Kulgam	236,899	125,553	111,346	228,697	121,229	107,468	8,202	4,324	3,878	289	280	1
5.	Bijbehara	49,484	25,860	23,624	38,693	20,179	18,514	10,791	5,681	5,110	39	37	1
	Total District	656,351	347,706	308,645	586,065	310,563	275,502	70,286	37,143	33,143	645	626	8

The total population of the district at the 1981 Census has been recorded at 656,351 persons made up of 347,706 males and 308,645 females. Of this population, the highest proportion (36.16) falls in Anantnag tehsil followed by Kulgam tehsil where it stands at (36.09). Pahalgam constitutes the lowest populated tehsil (7.69 percent) in the district. Out of 645 villages in the entire district, 289 fall in the jurisdiction of Kulgam tehsil followed by 171 villages in Anantnag tehsil and 39 villages in Bijbehara tehsil. The district was, however, constituted of 1,202 villages at the 1971 census. The decrease in the number of villages is due to the transfer of various villages to the newly formed district of Pulwama carved out from within the earstwhile Anantnag district. Accordingly, tehsils of Shupiyan, Pulwama and Tral formerly parts of district Anantnag now form the Pulwama district. Bijbehara and Duru have been elevated to tehsil status during 1971-81 period and within the present Anantnag district.

Table 2 below depicts the decennial changes in the distribution of tehsil-wise population in the district :

TABLE NO. 2

Decadal change in distribution of population

Sl. No.	Name of Tehsil	Population								
		1971			1981			Percentage decadal (1971-81) variation		
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
1.	Pahalgam	40,692	38,357	2,335	50,433	47,807	2,626	+23.94	+24.64	+12.46
2.	Anantnag	191,005	156,868	34,137	237,361	190,681	46,680	+24.27	+21.56	+36.74
3.	Duru	64,556	64,556	..	82,174	80,187	1,987	+27.29	+24.21	..
4.	Kulgam	183,515	177,146	6,369	236,899	228,697	8,202	+29.09	+29.10	+28.78
5.	Bijbehara	38,354	29,844	8,510	49,484	38,693	10,791	+29.02	+29.65	+26.80
	Total District	518,122	466,771	51,351	656,351	586,065	70,286	+26.68	+25.56	+36.87

The table reveals that Anantnag district has registered a lower growth rate of 26.68 percent in its population in the decade 1971-81 as compared to the State average of 29.69 percent.

While rural growth during the decade has been of the order of 25.56 in the district, Kulgam and Bijbehara tehsils have registered a growth rate of 29.10 percent and 29.65 percent respectively which is on a higher side compared to the State rural growth of 25.77 percent.

Table 3 below deals with the distribution of villages by population ranges :

TABLE NO. 3

Distribution of villages by population ranges

Range of population	No. of villages in each range	Percentage o villages in each range
(1)	(2)	(3)
—200	72	11.50
200—499	148	23.64
500—1,999	351	56.07
2,000—4,999	54	8.63
5,000—9,999	1	0.16
10.000+	..	..
Total	626	100.00

From the above table it is evident that out of 626 inhabited villages in the district as many as 351 villages or 56.07 percent fall in the population range of 500—1,999 followed by 23.64 percent in the range of 200—499. There is only one village falling in the population range of 5,000—9,999 and none in the range of 10,000 and above.

Table 4 below deals with the distribution of villages by density ranges :

TABLE NO. 4

Distribution of Villages by Density

Range of Density (per sq. km.)	Total No. of villages in each density range	Percentage of villages in each density range
(1)	(2)	(3)
— 10	..	..
11— 20	1	0.16
21— 50	3	0.48
51—100	9	1.44
101—200	9	1.43
201—300	51	8.15
301—500	203	32.43
501+	349	55.75
Not known	1	0.16
Total	626	100.00

349 villages which make more than 55 percent of total villages in the district fall in the density range of 501+ persons per sq. km. followed by 203 villages or 32.43 percent in the range of 301—500 while 51 villages or 8.15 percent fall in the density range of 201—300. 9 villages each or about 1.44 percent fall in the density rangcs of 51—100 and 101—200.

Table 5 shows the proportion of scheduled castes population to total population in the villages :

TABLE NO. 5

Proportion of Scheduled Caste population to total population in the villages

Percentage range of Scheduled Caste population to total population	No. of villages in each range	Percentage of villages in each range
(1)	(2)	(3)
Nil	625	99.84
5 or less	1	0.16
6—10	..	..
11—15	..	..
16—20	..	..
21—30	..	..
31 and above	..	..
Total	626	100.00

It will be seen that of the 626 inhabited villages, the scheduled Caste population inhabits in only one village, constituting a very small percentage of 0.16 in the population range of 5 or less.

Table 6 below gives the literacy rate by population ranges of the villages :

TABLE NO. 6

Literacy rates by population ranges of villages

Range of population (1)	No. of villages in each range (2)	Literacy rate (3)
— 200	72	18.45
200— 499	148	19.06
500—1,999	351	20.47
2,000—4,999	54	22.47
5,000—9,999	1	14.38
10,000—+	..	..
Total	626	20.75

In 1981 Census Anantnag district has registered a rural literacy rate of 20.75 percent which is lower than over-all literacy rate of 26.67 percent returned for the State as a whole which itself is no satisfactory level. Thus the position of backwardness in literacy is quite discernible whatever the population range in which the villages of the district fall. It is however, observed that the villages in the population range 2,000—4,999, which constitute 22.47 percent of the total villages in the district are slightly better placed in the position of literacy as compared to those falling in other population ranges even though these are not near the average literacy rate of the State.

Table No. 7 below indicates the urban literacy rates in the district :

TABLE NO. 7

Literacy rate for towns

Name of town (1)		Literacy rate (2)
Achabal	..	28.42
Anantnag	..	48.03
Bijbehara	..	37.49
Kokernag	..	31.21
Kulgam	..	33.30
Pahalgam	..	14.93
Mattan	..	42.58
Qazigund	..	39.86
All Towns	..	41.14

As is evident from the table like rural part of the district, the literacy level of all the urban areas of the district put together is 41.14 percent which places it lower than the level obtaining for the urban part of the State as a whole which stands at 45.56 percent. However, Anantnag urban has returned a literacy rate of 48.03 percent.

The sub-joined table No. 8 gives tehsilwise distribution of literates, workers, non-workers and scheduled caste population in the district :

TABLE NO. 8

Literates, Workers, Non-workers, Scheduled Caste/Tribe population in the district

Note :— N = Nil

As already mentioned, Anantnag district has a population of 656351 persons made up of 347706 males and 308645 females and of this only 6 persons belong to scheduled castes. The district has returned a literacy percentage of 22.93 of the total population or in absolute terms 150532 persons are literates in the entire district. The males literacy is registered at 33.58 percent and female literacy at 10.94 percent. There are 207903 persons or 31.67 percent of the total population who have been engaged on some kind of work for six months or more than six months in a year and have been categorised as main workers. Of this, 53.15 percent are males and 7.49 percent are females. The lower female percentage of main workers is obviously due to inadequate female literacy returned in the district. Most of the females traditionally engage themselves mainly with household duties with only marginal participation in the seasonal work like agriculture and household industry.

The district has returned marginal workers to the extent of 10.77 percent of which 2.76 percent are males and 19.78 percent are females. The higher percentage of female marginal workers is due to the fact that apart from household activity they do some work during the day or as already stated take to part time seasonal work for augumenting the household income. The corresponding proportions returned for both main and marginal workers returned for the State stand at 44.26 percent, 55.81 percent and 31.31 percent respectively. It would also be seen that a total of 278572 persons constituting 42.44 percent of the population of the district are workers. By sex the work participation rate turns out to be 55.91 percent in case of males and 27.27 percent in case of females. Non-workers number 377799, constituting 57.56 percent of the total population of the district. Sex-wise, 44.09 percent of males and 72.73 percent of females are non-workers. The corresponding proportions of non-workers for the State as a whole are 55.74 percent for both sexes, 44.19 percent for males and 68.69 percent for females.

Analysis of Village Directory data

The data collected from the revenue and other Government agencies regarding availability of various amenities has been tabulated in the main Village directory statement. The salient features of this data in broad aggregates is brought out below in the form of inset tables :

The position of availability of various amenities at district/tehsil level is indicated in the following table :

TABLE NO. 9

Distribution of villages according to the availability of different amenities

Sl. No.	Name of Tehsil	No. of inhabited villages	No. (with percentage) of villages having one or more of the following amenities							
			Education	Medical	Drinking water	Post & Telegraph	Market/ hat	Communication	Approach by pucca road	Power supply
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
1.	Pahalgam	66	59 (89.39)	10 (15.15)	66 (100.00)	13 (19.70)	.. (..)	26 (39.39)	60 (90.91)	64 (96.97)
2.	Anantnag	165	151 (91.52)	55 (33.33)	165 (100.00)	38 (23.03)	.. (..)	69 (41.82)	129 (78.18)	161 (97.58)
3.	Duru	78	66 (84.62)	19 (24.36)	78 (100.00)	14 (17.95)	.. (..)	11 (14.10)	56 (71.79)	61 (78.21)
4.	Kulgam	280	230 (82.14)	40 (14.29)	280 (100.00)	47 (16.79)	.. (..)	29 (10.36)	216 (77.14)	266 (95.00)
5.	Bijbehara	37	33 (89.19)	5 (13.51)	37 (100.00)	7 (18.92)	.. (..)	5 (13.51)	11 (29.73)	36 (97.30)
	Total District	626	539 (86.10)	129 (20.61)	626 (100.00)	119 (19.01)	.. (..)	140 (22.36)	472 (75.40)	588 (93.93)

The table reveals that of the total 626 inhabited villages in the district, 539 accounting for 86 percent villages have one or the other type of educational institutions like middle, high, higher-secondary schools located within the villages and this amenity is almost evenly distributed in all the five tehsils. As regards medical facility, however, only 129 villages have either a dispensary or primary health centre or a hospital which makes a meagre proportion of 20.61 percent of the total villages. Inter-tehsil comparison shows that the proportion of villages covered under this basic amenity ranges between 13.51 percent to 15.15 percent in Bijbehara, Kulgam and Pahalgam which is far lower than even the corresponding proportion of 24.36 percent and 33.33 percent in Duru and Anantnag tehsils respectively. Drinking water facility is however available to all the villages in the district from one source or the other. However protected drinking water supply is available to 201 villages only which form just 32% of the total number of villages which makes a poor position indeed. In the matter of Post and Telegraph facilities while the proportion of villages covered is 19.01 percent at the district level, their distribution is not very uneven at tehsil level with the proportion of villages ranging from 16.79 percent in Kulgam to 23.03 percent in Anantnag tehsil. In communications, however, Kulgam, Bijbehara and Duru tehsils have to make a large leeway even to reach the level of Pahalgam and Anantnag in as much as the proportion of villages covered in the former group of tehsils ranges from just 10.36 to 14.10 percent as compared to 39.39 and 41.82 percent in case of Pahalgam and Anantnag. As regards approach by pucca road Bijbehara alone lags far behind other tehsils with a proportion of 29.73 villages only while the corresponding proportion ranges between 71.79 percent in Duru and 90.91 percent in Pahalgam. The progress is by far the most significant in the matter of rural electrification with 588 villages out of total of 626 in the district covered under this amenity. Inter-tehsil position is more or less even with more than 95 percent villages covered in each tehsil except for Duru where this proportion is 78.21 which itself is fairly satisfactory.

The table No. 10 below highlights the availability of various amenities in terms of proportion of population served by each. :

TABLE NO. 10
Proportion of rural population served by different amenities

Sl. No.	Name of Tehsil	Total population of inhabited villages in the tehsil	Proportion of Rural population served by the amenity of : Education	Medical	Drinking water	Post and Telegraph	Market/ Hat	Communication	Approach by pucca road	Power Supply
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
1.	Pahalgam	47,807	96.17	35.89	100.00	41.99	..	54.70	91.12	96.37
2.	Anantnag	190,681	98.55	50.91	100.00	44.98	..	53.70	86.72	98.66
3.	Duru	80,187	94.22	46.34	100.00	40.28	..	25.64	84.88	82.35
4.	Kulgam	228,697	94.99	31.45	100.00	33.38	..	16.12	81.63	96.00
5.	Bijbehara	38,693	98.43	32.03	100.00	47.60	..	38.61	26.01	96.12
	Total District	586,065	96.37	40.22	100.00	39.74	..	34.28	80.83	95.03

It will be noticed that the position is relatively brighter in terms of the population served by various amenities even in fields like medical care, post and telegraph offices and communications than what came out in the earlier table in terms of the proportion of villages both for the district as a whole as also at the tehsil level. Of course the proportion of population benefitted is nearly full or substantial only in the fields of education, power supply and approach by pucca road, besides drinking water in all the tehsils except for the fact that in Kulgam tehsil the facility of approach by pucca road is available to only 26.01 percent of the population which is very low indeed. In case of other amenities while the position is still far from satisfactory in all the tehsils, Anantnag seems to be better placed, though Pahalgam, Duru and Bijbehara also have an edge in one or the other individual amenity over other tehsils.

Distribution of villages not having certain amenities arranged by distance ranges from the places where these are available are indicated in table No. 11 below :

TABLE NO. 11

Distribution of villages not having certain amenities, arranged by distance ranges from the places where these are available

Villages not having the amenity of	Number of villages where the amenity is not available and available at a distance of			
	—5 kms.	5-10 kms.	10+ kms.	Total (cols. 2-4)
(1)	(2)	(3)	(4)	(5)
1. Education	86	..	1	87
2. Medical	448	42	7	497
3. Drinking water	..	..	..	..
4. Post & Telegraph	457	44	6	507
5. Market/Hat	..	..	..	..
6. Communication	478	6	2	486

This table makes rather an encouraging reading. It will be noticed that more than 90 percent of the villages where medical care, communications or post and telegraph facilities are not available within the village itself fall within a distance of less than 5 kms. from places where these facilities are available. Even for the bulk of the remaining small proportion these facilities are available within a distance of 5-10 kms. As regards education all but 1 of the 87 villages where this amenity is not available also fall within a distance of less than 5 kms. from where it is available. It is thus clear that particularly all the basic amenities are available to most of the rural population of the district within a distance of less than 5 kms. of their village of residence if not within the village itself and the proportion of population who have to walk a distance of more than 10 kms. to avail of any particular amenity is negligible indeed.

The table below gives the distribution of villages according to distance from the nearest town and the availability of different amenities :

TABLE NO. 12

Distribution of villages according to the distance from the nearest town and availability of different amenities

Distance range from the nearest town (in kms.)	No. of inhabited villages in each range	No. (with percentage) of villages having the amenity of							
		Education	Medical	Drinking water	Post and Telegraph	Market/ Hat	Communication	Approach by pucca road	Power Supply
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
0—5	220	188 (85.45)	39 (17.73)	220 (100.00)	43 (19.55)	..	42 (19.09)	161 (73.18)	215 (97.23)
6—15	332	283 (85.24)	70 (21.08)	332 (100.00)	59 (17.77)	..	75 (22.59)	254 (76.51)	321 (96.69)
16—50	74	68 (91.89)	20 (27.03)	74 (100.00)	17 (22.97)	..	23 (31.08)	57 (77.03)	52 (70.27)
51+	..	..	..	..	..	..	..	..	..
Unspecified	..	..	..	..	..	..	..	..	..
Total	626	539 (86.10)	129 (20.61)	626 (100.00)	119 (19.01)	..	140 (22.36)	472 (75.40)	588 (93.93)

It will be seen that distance from the nearest town does not seem to have any major effect on the provision of various amenities in the villages except for medical care, communications and to some extent post and telegraph facilities where the villages placed at a distance of more than 15 kms. seem, for good reason to have received relatively better attention than those placed nearer a town. However, the difference in the proportions is not as substantial as one should have expected and this might possibly be so due to a relatively less proportion of population inhabiting the more distant villages.

The table below gives the distribution of villages according to population ranges and amenities available to them :

TABLE NO. 13

Distribution of villages according to population range and amenities available

population range	No. of inhabited villages in each range	No. (with percentage) of villages having the amenity of							
		Education	Medical	Drinking water	Post and Telegraph	Market/ Hat	Communication	Approach by pucca road	Power Supply
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
— 499	220	141 (64.09)	8 (3.64)	220 (100.00)	8 (3.64)	..	30 (13.64)	157 (71.36)	204 (92.73)
500—1,999	351	343 (97.72)	80 (22.79)	351 (100.00)	68 (19.37)	..	80 (22.79)	267 (76.07)	320 (91.17)
2,000—4,999	54	54 (100.00)	40 (74.07)	54 (100.00)	42 (77.78)	..	29 (53.70)	48 (88.89)	53 (98.15)
5,000+	1	1 (100.00)	1 (100.00)	1 (100.00)	1 (100.00)	..	1 (100.00)	..	1 (100.00)
Total	626	539 (86.10)	129 (20.61)	626 (100.00)	119 (19.01)	..	140 (22.36)	472 (75.40)	588 (93.93)

As will be readily observed the population size of the villages has a direct bearing on determining the position of various amenities with more populated villages expectedly attracting more attention than less populated villages. The highest benificiaries are obviously the villages with a population of 2,000 and above in the field of practically each basic amenity and the least proportion is of those with a population of less than 500, particularly in the field of medical care and post and telegraph facilities where the coverage of such villages is less than 4 percent.

The subjoined table indicates the staple food in the majority of villages in each tehsil :

TABLE NO. 14

Main staple food in the majority of villages in each tehsil

Sl. No.	Name of tehsil	Main staple food
(1)	(2)	(3)
1.	Pahalgam	Maize & Rice
2.	Anantnag	Rice
3.	Duru	Rice
4.	Kulgam	Rice
5.	Bijbehara	Rice

It will be seen that the main staple food in all the tehsils of the district is rice. However, in Pahalgam rice shares this status jointly with maize.

Distribution of villages according to land use is given in table No. 15 below

TABL NO. 15

Distribution of villages according to land use

Sl. No.	Name of Tehsil	No. of inhabited villages	Total area	Percentage cultivable area to total area	Percentage of irrigated area to total cultivable area
(1)	(2)	(3)	(4)	(5)	(6)
1.	Pahalgam	66	10,377.47	81.81	51.91
2.	Anantnag	165	34,243.33	77.79	52.91
3.	Duru	78	14,853.31	81.14	59.06
4.	Kulgam	280	45,865.96	75.91	56.60
5.	Bijbehara	37	10,636.06	82.86	50.82
	Total District	626	115,976.13	78.30	54.84

It will be seen that practically all the tehsils of the district are more or less evenly placed both in terms of the proportion of cultivable area to the total area as in the proportion of irrigated area to total cultivable area. The relatively bigger tehsils of Kulgam and Anantnag do not differ much in the proportion of the cultivable area to the total area from the other three tehsils which are relatively much smaller and in every tehsil irrigated area makes a proportion of more than 50 percent of the total cultivable area which is significant indeed.

Brief analysis of Town Directory data

Separate data in respect of urban population structure, civic finance, the availability of various amenities has been compiled in the main town directory tables I to VI. For facilitating a brief commentary and assessment of the progress made by urban population some of the important statistics have further been subdivided in table Nos. 16 to 21.

The table No. 16 below indicates the figures relating to urban population, its percentage variation, density and sex-ratio :

TABLE NO. 16

Growth, Density and Sex-ratio of Urban Population in the District in relation to the State

	District						State					
Census Year	Total population	Urban population	%Urban population	Decadal percentage variation in urban population	Density (population per sq.km.)	Sex ratio (No. of females per 1,000 males	Total population	Urban population	%urban population	Decadal percentage variation in urban population	Density (population per sq.km.)	Sex ratio (No. of females per 1,000 males
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)
1961	401,461	34,000	8.47	..	1,605	832	35,60,976	593,315	16.66	..	N.A.	844
1971	518,122	51,351	9.91	+51.03	1,099	854	46,16,632	858,221	18.59	+44.65	N.A.	860
1981	656,351	70,286	10.71	+36.87	1,472	892	*59,87,389	12,60,403	21.05	+46.86	2,146	875

*The population figures exclude population of area under unlawful occupation of Pakistan and China where census could not be taken.

As can be readily seen from the table Anantnag district lags half way behind the State as a whole in its progress towards urbanisation, the position having been consistently so during the last three decades. The district thus continues to be predominantly rural in character, the proportion of urban population having increased to only 10.71 percent in 1981 as against 8.47 percent in 1961. The corresponding proportion for the State as a whole has increased to 21.05 percent in 1981 as against 16.66 percent in 1961. The pace of urbanisation in the district during the decade 1971-81 has also been much lower in the district as compared to the State although in the preceding decade the position seems to have been vice versa. As regards density of population, in the absence of area figures for the State urban for 1961 and 1971, comparable picture is available only for 1981 indicating that urban density of population per sq. km. in Anantnag district is more than half of what it is for the State as a whole. In the matter of urban sex ratio however, the district compares favourably with the State, both showing steady increase since 1961, the pace in the case of Anantnag district, being even slightly better than that for the State, although in both cases, it still continues to be adverse to females.

The table below is intended to identify the towns added or declassified during the 1971-81 decade :

TABLE NO. 17

New towns added/towns declassified in 1981 census

Name of towns (1)	Population 1981 census (2)
(a) **Added**	
(i) Achabal	3,649
(ii) Qazigund	1,987
(b) **Declassified**	..

It will be seen that over the last ten years Achabal and Qazi Gund have come to be recognised as the two new towns of the district while there has been no declassification of any town previously recognised as such. In this way the number of towns in the district has gone upto 8 in 1981 as against 6 in 1971.

Table No. 18 below indicates the per capita receipt from various resources and expenditure on various amenities in respect of each town of the district :

TABLE NO. 18

Per capita receipt and expenditure in towns

Class, name & civic status of the towns		PER CAPITA								
		Receipt			Expenditure					
		Total	Receipt through taxes	Receipt from all other sources	Total Expenditure	General administration	Expenditure on public health and conveniences	Public works	Expenditure on public institutions	Other aspects
(1)		(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
VI Achabal	N.A.	9.29	1.07	8.22	4.28	4.28	..	..	..	..
III Anantnag	T.A.	70.06	70.06	..	55.05	..	..	28.84	..	26.21
IV Bijbehara	N.A.	46.07	19.74	26.33	43.05	19.97	..	9.58	11.71	1.79
VI Kokernag	N.A.	22.99	14.54	8.45	9.03	9.03	..	..	..	..
V Kulgam	N.A.	24.51	11.06	13.45	17.34	13.75	0.65	2.94	..	..
V Mattan	N.A.	14.90	3.15	11.75	1.68	..	1.68	..	..	..
VI Pahalgam	N.A.	194.44	106.85	87.59	165.69	29.78	..	70.25	2.48	63.18
VI Qazi Gund	N.A.	65.02	13.59	51.43	44.73	18.61	0.76	22.64	..	2.72
Total		55.56	43.39	12.17	43.38	6.82	0.26	19.02	1.90	15.38

It will be seen that both in per capita receipt as well as expenditure Pahalgam is far ahead of other towns in the district. The other towns which are relatively better placed than others are Anantnag, Qazi Gund and Bijbehara. However, while bulk of the per capita receipt in Anantnag and Pahalgam towns comes from taxes, in the case of Qazi Gund and Bijbehara much of it comes from other sources. Similarly while bulk of the per capita expenditure in case of Pahalgam and Anantnag towns goes in public works and other aspects in Bijbehara more of it is claimed by general administration. Surprisingly the per capita expenditure on public health and conveniences is nil or negligible in the case of all the towns of the district.

The sub-joined inset table No. 19 gives the number of educational institutions per ten thousand of population in each town of the district :

TABLE NO. 19

Schools per ten thousand population in towns

Class, name and civic status of towns			No. per ten thousand population			
			Higher Secondary Inter/PUC/ Junior colleges	Secondary Matriculation	Junior Secondary/ middle	Primary
(1)			(2)	(3)	(4)	(5)
VI	Achabal	N.A.	..	5.48	2.74	5.48
III	Anantnag	T.A.	0.29	1.77	6.77	11.77
IV	Bijbehara	N.A.	0.93	1.85	2.78	11.12
VI	Kokernag	N.A.	4.45	..	4.45	26.68
V	Kulgam	N.A.	1.22	1.22	4.88	9.75
V	Mattan	N.A.	1.47	1.47	4.41	7.35
VI	Pahalgam	N.A.	..	3.82	3.82	7.62
VI	Qazi Gund	N.A.	..	10.07	10.07	10.07
	Total		0.71	2.13	5.41	10.96

It will be seen from the table that towns with smaller population have been better provided for in terms of schools of various levels than those with larger population, the chief consideration probably having been to equip these towns with such facilities regardless of whether they deserve these at all in relation to their population.

The subjoined inset table No. 20 gives the number of medical institutions per one thousand population :

TABLE NO. 20

No. of beds in medical institutions in towns

Class, name & civic status of the towns			No. of beds in Medical institutions per 1,000 population
(1)			(2)
VI	Achabal	N.A.	2.74
III	Anantnag	T.A.	2.94
IV	Bijbehara	N.A.	0.93
VI	Kokernag	N.A.	..
V	Kulgam	N.A.	1.22
V	Mattan	N.A.	1.47
VI	Pahalgam	N.A.	1.90
VI	Qazi Gund	N.A.	5.03
	Total		2.21

It will be seen that Qazi Gund town with a total population of 1987 and ten hospital beds is placed better than any other town with 5.03 beds per 1,000 population. Anantnag and Achabal are the other two towns which though far below Qazi Gund with a strength of 2.94 and 2.74 beds per 1,000 of total population respectively have still an edge over the other five towns where the corresponding position is far lower.

The below mentioned inset table highlights the extent of most important commodity manufactured, imported and exported in the towns of Anantnag district:

TABLE NO. 21

Most important commodity manufactured, imported and exported in the towns

Class, name & civic status of the towns			Most important commodity		
			Manufactured	Exported	Imported
(1)			(2)	(3)	(4)
VI	Achabal	N.A.	Gabbas	Timber	CGI Sheets
III	Anantnag	T.A.	Gabbas	Apple	Suger
IV	Bijbehara	N.A.	Sports Goods	Bats	Suger
VI	Kukernag	N.A.	Carpets	Fire wood	Cloth
V	Kulgam	N.A.	Carpets	Rice	Cloth
V	Mattan	N.A.	Gabbas	Rice	Tea
VI	Pahalgam	N.A.	..	Ghee	Wool
VI	Qazi Gund	N.A.	Carpets	Spices	Tea

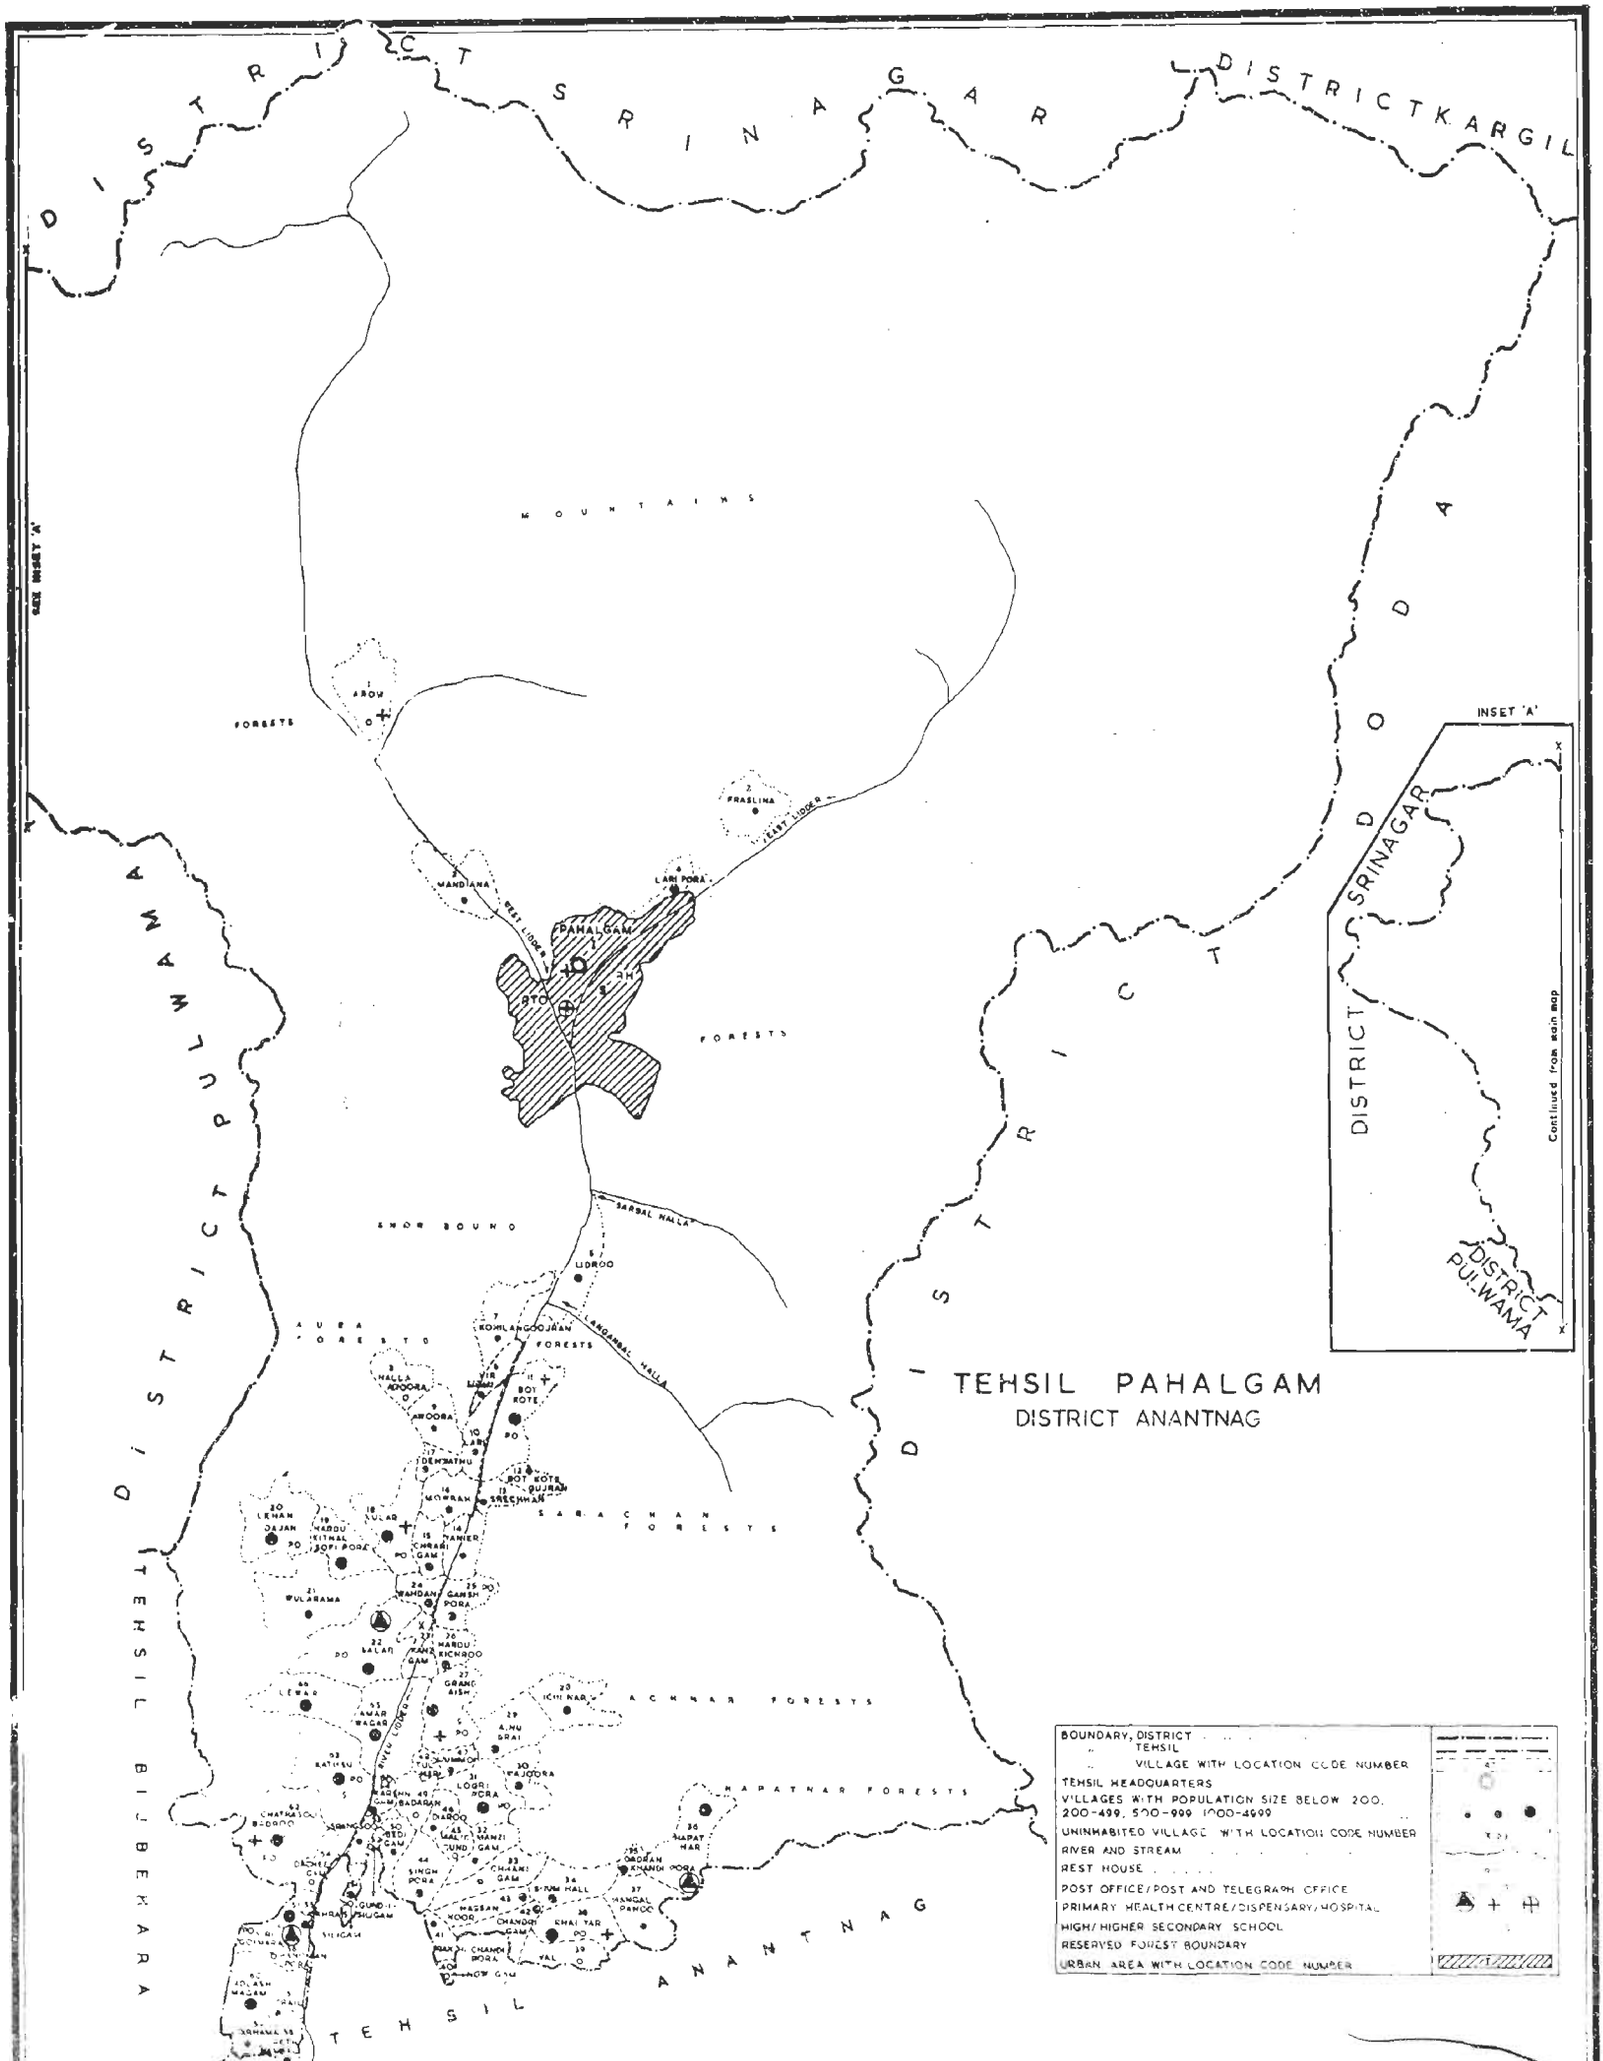

While the table speaks for itself it will be noticed that Gabbas or Carpets are the main items of manufacture in six towns out of eight and one town viz Bijbehara specializes in the manufacture of export of sports goods.

NOTE EXPLAINING THE CODES USED IN THE VILLAGE DIRECTORY

A number of codes has been used in the Village Directory. These are amplified below :

Column Number	*I t e m*	*Code*
5 (Educational* Amenities)	Primary or elementary school	P
	Junior secondary or middle school	M
	Matriculation or Secondary	H
	Higher Secondary/Intermediate/ Pre-University/Junior college	PUC
	College, Any college (graduate level and above) like Arts, Science, Commerce etc.	C
	Industrial School	I
	Training School	Tr
	Adult literacy class/centre	Ac
	Other educational institutions, These includes Sanskrit Pathshala, Senior basic school, Makhtab, etc.	O
6 (Medical** Amenities	Hospital	H
	Maternity and child welfare centre	MCW
	Maternity home	MH
	Child welfare centre	CWC
	Health centre	HC
	Primary health centre	PHC
	Primary health sub centre	PHS
	Dispensary	D
	Family planning centre	FPC
	T. B. clinic	TB
	Nursing home	NH
	Registered private practitioner	RP
	Subsidised medical practitioner	SMP
	Community health worker	CHW
	Others	O

Colnmn Number	*I t e m*	*Code*
7 (Drinking water Amenities)	Tape water	T
	Well water	W
	Tank water	Tk
	Tubewell water	TW
	Handpump	Hp
	River water	R
	Fountain	F
	Canal	C
	Lake	L
	Spring	S
	Nallah	N
	Others	O
	Information not available	NA
8 (Post & telegraph Amenities)	Post Office	PO
	Telegraph Office	TO
	Post & Telegraph Office	PTO
	Telephone Connection	Phone
10 (Communications)	Bus	BS
	Railway station	RS
	Navigable water-way (including river, canal, back-waters, etc.)	NW
11 (Approach to village)	Pucca Road	PR
	Kaccha road	KR
	Navigable river	NR
	Navigable canal	NC
	Navigable water-way (other than river or canal)	NW
	Foot path	FP

Column Number	*I t e m*	*Code*
13 (Power supply)	Electricity for domestic purposes	ED
	Electricity for agriculture	EAG
	Electricity for other purpose like industrial commercial, etc.	EO
	Electricity for all purposes	EA
16 (Irrigated by source)	Government Canal	GC
	Private Canal	PC
	Well (without electricity)	W
	Well (with electricity)	WE

* Represents provisional geographical area figures supplied by the surveyor general. Figures for urban areas are those supplied by the Local bodies. Area figures for rural areas are derived by subtracting the urban area from the total area of the district. The total of the area figures of the tehsils will not tally with the district figures because the former represent paper area and are derived from the figures supplied by the Revenue Department.

Conversion factor : 1 Acre = 0.40,469 Hectares and 100 Hectares = 1 Km^2.
