MOTIF

Once upon a time, Indian tiger, one of the magnificient species of the wild life used to roam freely throughout the length and breadth of India But, due to disappearance of forest for the reasons such as urbanization, industrialization and agricultural development, this species was isolated only in few parts of India Human greed for the tiger skins for different uses further reduced the tiger population. This alarming situation forced the Government to give protection to the tiger.

Melghat Tiger Project in the Amravati district is one of the many projects to protect and rear the tiger species in its natural surroundings The project, initiated some time in 1974, succeeded in increasing the tiger population from 32 to 80 in the year 1985.

Let us shoot tiger, not by the gun, but by camera.

FOREWORD

The District Census Handbook (DCH), compiled by the Census organisation on behalf of the State Government, is one of the most valuable products of the census. The DCH is constantly referred to by planners administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulating local level and regional plans and as an aid to district administration. The district census handbook is the only publication which provides Primary Census Abstract (PCA) data up to village level for rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The district census handbook series was initiated during the 1951 census. It contained important tables and PCA for each village and town of the district. During 1961 census the scope of the DCH was enlarged and it contained a descriptive account of the district administrative statistics census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the format of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning out regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column " total population and number of households " has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of SC and ST population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in class-I and class-II towns (statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic and other amenities and adult literacy classes/ centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns of civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part-A of the volume contains village and town directory and Part-B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri P. P. Mahana, the Director of Census Operations, Maharashtra on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA
Registrar General, India.

New Delhi:
The 26th April 1982.

ACKNOWLEDGEMENTS

The preceding foreword of the Registrar General and Census Commissioner, India, is quite exhaustive and gives the reader a complete account of the District Census Handbook Project. As has been mentioned therein the publication of District Census Handbook of Maharashtra is a joint venture of the Government of Maharashtra and the Census Organisation of the Government of India. The design for the 1981 District Census Handbooks was evolved centrally by the Census Commissioner, India. The contribution of the Government of Maharashtra comes by way of bearing the cost of printing. We are thankful to the Census Commissioner and to his band of devoted officers in the Social Studies Division for the valuable guidance they have given us, and to the Government of Maharashtra for the readiness they have shown to print and publish these handbooks. Our grateful thanks are also due to the District Inspectors of Land Records for helping us in marking village boundaries on the tahsil maps we have prepared and presented in these handbooks, and for recording a certificate of authenticity on each such map we referred to them.

Shri P. P. Mahana, who held the office of Director of Census Operations, Maharashtra, and guided the operations of the 1981 Census, left this organisation on 14th December 1982. The data presented in these handbooks were collected and compiled under the direction and guidance of Shri Mahana. We would deem it our duty, therefore, to offer him our sincere and grateful thanks for all that he did for this project.

In this directorate, the undersigned exercised overall supervision over the work of the project, while the main brunt of day-to-day supervision was borne by Shri A. S. Dange, Deputy Director. He was ably assisted in this work by Shri Madhav Shyam, Research Officer (Map) and Smt. V. Y. Joshi, Shri G. M. D. Lone and Shri V. S. Nagle, Assistant Directors. The list of their colleagues in the District Census Handbook Unit who put in untiring efforts to bring the project to fruition is fairly long and is not being given here for want of space. However, all these unnamed assistants in various grades who attended to the voluminous work of compilation, typing, comparing, checking and mapping, etc., deserve our heart-felt thanks.

A. W. MAHATME,
Joint Director of Census Operations.

Census Directorate, Maharashtra, Bombay.
Dated 26th January 1984 (Republic Day).

Note —The Source for the total area figures in respect of the districts is the Surveyor-General of India, while that for the total area figures in respect of the tahsils is the State Land Records Department. The total areas, as also the rural areas, for the tahsils in district, may not therefore strictly add upto the corresponding figures shown against the district

APPENDIX 1 TO SUMMARY TABLE I

Tahsilwise number of Villages with Population of 5,000 or over and of Towns with Population under 5,000

(Tahsils which have nothing to show for this statement have been omitted from presentation)

District/Tahsil	Villages with population of 5,000 or over			Towns with population under 5,000

ANALYTICAL NOTE

HISTORY AND SCOPE OF DISTRICT CENSUS HANDBOOK

The District Census Handbook compiled by the State Directorate of Census Operations is, in effect, a joint venture of the State Government and the Census Organisation of the Government of India. Its publication was started from 1951 census. Not only has it become a regular feature of every census but even its coverage has been enlarged and rationalized Naturally, this document is constantly being consulted by the planners, administrators, academicians and researchers alike. The 1981 district census handbook is the fourth in the unbroken series

In 1951, district census handbook contained important census tables and the primary census abstract for each village and town in the district. The scope of district census handbook was enlarged at the 1961 census by including descriptive account of the district and administrative statistics in addition to the census tables and the primary census abstract of every village and town. The 1971 district census handbook series was organised in three different parts. Part A related to the village and town directory, Part B to village and townwise primary census abstract (PCA) and Part C to analytical report, administrative statistics, census tables, analytical tables based on the PCA and amenity data for every village However, for Maharashtra State (as also for many other States in India), only Part A and Part B of the district census handbook were published Part C had to be given up mainly because of the problems relating to printing.

1981 district census handbook is comprised of two parts—Part A and Part B Part A includes village and town directory and Part B village and townwise primary census abstract. While designing the format of 1981 district census handbook data on some new items, such as adult literacy centres, primary health sub-centres and community health workers has also been included.

Village and Town Directory as well as primary census abstract included in the district census handbook are expected to meet the requirements of the planners for micro level planning Similarly, the additional data for town directory in respect of civic and other amenities in Class I and Class II towns are oriented to minimum needs programme especially in respect of slum dwellers. The data on amenities by size of town would be of great interest to the scholars and planners alike.

Brief History of the District

The name of the district is taken from the name of the district headquarter town. The name Amravati meaning the abode of immortals may be traced from its association with Lord Krishna. The history of the Amravati district, which contains both the ancient and the modern capitals of Berar, is to a great extent that of the province itself

Berar is first mentioned, under the name of Vidarbha, in the Mahabharata, one of the two great epics of the Hindus The early history of the district is vague and fragmentary. Berar formed part of the empire of Asoka Maurya who reigned from 272 to 231 B C. The region experienced Hindu and Muhammadan periods and went through rules of different dynasties.

In 1833 the district, with the rest of Berar, was assigned to the East India Company in satisfaction of the debt and for the future security. The province was divided into two districts, South Berar (Balaghat) with its headquarters at Hingoli and North Berar with headquarters at Buldana. North Berar included the present Amravati district, the northern half of Akola and part of Buldana. Subsequently, North Berar was reconstituted into East Berar with headquarters at Amravati and West Berar with headquarters at Akola A new district of Ellichpur (Achalpur) was created in 1857 by separating three tahsils of Ellichpur, Melghat and Daryapur from East Berar district. In 1905, when the districts of the province were redistributed, Ellichpur (Achalpur) district was again amalgamated with Amravati, while the Murtizapur taluk was transferred from Amravati to Akola

There were no major changes in the boundaries of the district or its tahsil between 1911 to 1955. The reorganization of states was taken place in the year 1956 when the district was transferred from Madhya Pradesh to Bombay State The district forms a part of Maharashtra since 1st May 1960. At the time of 1961 Census, this district was divided into 6 tahsils comprising 1,968 villages including 359 uninhabited villages and 13 towns.

The number of tahsils and towns namely 6 and 13 respectively remained unchanged in 1971 census. For 1981 census there was no change in the number of six tahsils of the district having 1,999 villages (including 301 uninhabited) as against 1,978 villages (including 341 uninhabited villages) in 1971 census. The number towns has been reduced from 13 in 1971 to 12 in 1981 census because of merger of Achalpur camp (Paratwada) into Achalpur.

Location, Relief and Drainage

Amravati district is situated right in the centre of the northern border of the state. It lies mainly in the Tapi basin with only some of its portion on the eastern border lying in the valley of Wardha. Its central part is situated in the drainage system of the river Purna which is an important tributary of the Tapi which runs for some distance along the north-west boundary of the district The district lies between 20° 32′ and 21° 46′ North latitude and 76° 38′ and 78° 27′ East longitude. It is bounded on the north by Nimar and Betul districts of Madhya Pradesh on the east by Wardha and Nagpur districts, on the south by Yavatmal and Akola districts and by Akola and Buldana districts on the west The area of the district is 12212 0 sq Km and its population in 1981 is 1,861,410 with 1,698 villages and 12 towns. It ranks 12th and 16th in terms of area and population of the state, respectively.

There is only one main system of hills which is the Satpuda and its off-shoots. The Gawilgad hills a part of the Satpudas pass through the Melghat tahsil in the north-western region of this district. The other range is a low line of trap hills rising in the vicinity of Amravati and extending towards east to some distance beyond Chandur Railway.

The main river of the district is Purna which takes its rise in the southern slopes of the Gawilgad hills and runs partly through Achalpur and partly through Amravati tahsils which form the Central part of the district till it turns westwards and forms the boundary between Murtijapur tahsil of Akola district and Daryapur tahsil.

Chandrabhaga, Shahnur and Bordi are the tributaries of the Purna. Other important rivers of the district are the Wardha and the Tapi. The tributaries of Wardha are Chamundamani, Bel and Matu which drain Morshi tahsil The Tapi flows along the north-west boundary of the district The Kamda, the Kapra, the Sipna and the Garga are its tributaries.

The district can be divided into two natural zones viz, plains which consist of Morshi, Achalpur, Amravati, Daryapur and Chandur tahsils and Melghat Zone comprising Melghat tahsil. The plains have normal rainfall and large tracts of fertile black soil along the banks of the rivers the Purna and the Wardha. The Melghat Zone contains a tract of mountainous country and large forests. It has a thin red soil and heavy rainfall

Climate

The climate of the district is hot and in general dry throughout the year excepting the period of monsoon season. To study the climate of this district, the whole year may be divided into four parts The winter season from December to February, the summer from March to May, the monsoon from June to September and post-monsoon period of two months viz. October and November The Mriga Nakshatra starts on the 7th of June but rains are generally started in the second week of June and lasted upto the end of September. The seasons show local variations within the district. The climate of Melghat which is a hilly tract is entirely different from other areas of the district In the plains the climate for the greater part of the year is extreme, but it is healthy. In the year 1979 the maximum and minimum temperature was recorded at 12 centres in the district The average maximum and minimum temperature recorded in the district was 44.2°C and 19.1°C respectively. The scorching heat of the day-time during the summer season is to some extent mitigated by the extreme dryness of the air and the coolness of the nights. In the Melghat tahsil the climate is cool for nine months in the year. During the rainy season weather is depressing In this district the hottest period of the year is May and early part of June.

The rainfall is more or less uniform in all parts of the district excepting the area of Melghat tahsil. About 90 per cent rainfall is received from the south-west monsoons from June-September. The rainfall in hot season is mainly accompanied with thunderstorms and sometimes with hail. There are occasional showers (in cold season also. Out of 12 towns in the district, Chikalda in Melghat tahsil which has been developed by the State Government as a holiday camp, has recorded the highest rainfall as 1707 9 mm whereas Daryapur Banosa and Dattapur Dhamangaon had the lowest rainfall as 767.8 mm. in the year 1979 Morshi in the north-east received 849 2 mm. Statement II).

Soil

The soil of the district varies from fertile black cotton soil of the plains to thin red soil of the plateau and the hilly region in the Satpudas. The rich black soil is found in the north of Daryapur tahsil, west of Amravati tahsil, South-west of Morshi tahsil, east of Chandur tahsil and around Achalpur tahsil. This fertile soil is well known as 'Aval Kali', 'Chikan' and Gao Ran. This type of soil is very much suitable for cultivation of rabbi crops as well as kharif crops.

Large area of Amravati tahsil consists of rich soil which is very much useful for cultivation of kharif and rabbi crops mainly for cotton, jowar, wheat and linseed. The soil in nearby hills becomes shallow and less fertile. Soil of major part of Chandur tahsil consists of black alluvial soil varying in depth. The soil of Morshi tahsil is black but some what shallower and slightly inferior in quality. Daryapur tahsil is a fertile plain of rich productive soil which is suitable for cultivation of jowar and cotton. The soil of the northern part of the tahsil is too shallow which is not useful for rabbi cultivation. The whole Melghat tahsil is hilly tract and contains very dense forest In general the soil of this tahsil is of the poorest quality with some small pockets of good soil found in the valleys where kharif crops are generally grown.

Census Houses and Households

Among other data relating to the district the total number of occupied residential houses and the number of households are given in columns 4 and 5 respectively of the primary census abstract published in this volume. "Census House" as per Indian Census is a building or a part thereof having a main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant, residential, non-residential or combination of both. A household is a group of persons who commonly live together and would take their meals from a common kitchen, unless the exigencies of work prevented them from doing so. It may be a group of persons related by blood or unrelated or both related and unrelated. There may be single member or more than one member households. The households are classified under three categories of normal, institutional and houseless households. The households of unrelated persons are called as "institutional households" which includes boarding houses, messes, hostels, residential hotels, rescue homes, jails, ashrams, etc.

Houseless population or households are those which do not have house and having no fixed place of residence, camp at night, or just live on the streets, in gardens or in open places. The total population as per 1981 census of the district viz, 1,861,410 consisting of 350,796 households stays in 344,232 residential houses. Average household size works out to 5 31 which is smaller than the state average of 5 37. Number of households per km² for Amravati district turns out to 29 which can be compared to state average of 38 households per km².

Distribution of population in Rural and Urban Areas

As per 1981 census the population of Amravati district is 1,861,410 with the break up of 961,564 males and 899,846 females. This constitutes 2 96 per cent of the total population of the state over 3 97 per cent of its shareof area Of the six tahsils of the district, the most populous tahsil is Amravati (602,587) and the lowest concentration of population is in Melghat tahsil (142,810) (Table 1).

TABLE 1

Population, Number of villages and towns

Serial No.	Name of tahsil	Population									No of villags		No of Towns
		Total			Rural			Urban

5	**Daryapur** ..	239,397	122,877	116,520	179,910	92,056	87,854	59,487	30,821	28,666	276	243	2
6	**Melghat**	142,810	72,836	69,974	140,190	71,360	68,830	2,620	1,476	1,144	344	314	1
	District Total .	1,861,410	961,564	899,846	1316,911	678,517	638,394	544,499	283,047	261,452	1,999	1,698	12

The least populous Melghat tahsil constitutes only 23 70 per cent of population of the most populous Amiavati tahsil This is because of large area of Melghat tahsil is under forest The other tahsil's in order of their population are Achalpur (306,929), Morshi (302,531), Chandur (267,156) and Daryapur (239,397).

The district and tahsils are divided into two parts viz. rural and urban The basic unit for rural area is a revenue "village" which may be defined as a statutory recognised unit having definite boundary and separate land records. The urban areas, on the other hand, are specially defined for census purposes. The criteria adopted to treat the unit as urban for 1981 census is :—

(*a*) All places with a municipality, corporation or contonment board or notified areas.

(*b*) All other places which satisfy the following criteria :

(*i*) A minimum population of 5,000 ;

(*ii*) At least 75 per cent of male working population engaged in non-agricultural (and allied) activities ;

(*iii*) A population of at least 400 persons per km².

Out of the total population of 1,861,410 of the district as many as 1 316,911 (70 75%) are living in country side and the remaining 544,499 (29 25%) in urban areas. As compared to 35 03 per cent urban population of Maharashtra, Amravati district is having 29.25 per cent urban population of the district and, therefore, this is one of the less urbanised district of the state.

Size, Class and Status of Towns

With the aim to have comprehensive analysis of varied demographic characteristics, all urban areas have been divided into the following class of towns on the basis of their population returned in 1981 census.

Class I	1,00,000 and above
Class II	50,000—99,999
Class III .. .	20,000—49,999
Class IV	10,000—19,999
Class V	5,000—9,999
Class VI .. .	Below 5,000.

In the 1971 census there were 13 towns in the district. The number has been reduced to 12 towns in 1981 census because of amalgamation of two towns *viz*, 'Achalpur' and Achalpur Camp named as 'Achalpur' (Table 2)

TABLE 2

New Towns/Towns declassified in 1981 Census

Name of towns (1)	Population 1981-Census (2)
(*a*) Added Nil	Nil
(b) Declassified	
(i) Achalpur Camp	N.A.

Not Available

Out of the 12 towns in the district, one is Class I (Amravati) , another one is Class II (Achalpur) ; five (Anjangaon, Badnera, Daryapur-Banosa, Morshi and Warud) are Class III , whereas, four towns (Chandur. Chandur Bazar, Dattapur-Dhamangaon, Shendurjana) are Class IV towns. Chikalda having 2,620 population is the only town which falls in Class VI. It is, thus, seen that there are seven towns each having more than 20,000 population, four towns in the population size class of 10,000—19,999 and one with less than 5,000 population (Statement I).

Urban Agglomeration

There is no urban agglomeration in this district.

Standard Urban Area

Standard Urban Area (S. U. A) concept introduced in 1971, has been followed in 1981 as well. The essential requirements for the constitution of S. U. A. are ,

(*i*) It should have a core town of a minimum population of 50,000 ;

(*ii*) The contiguous areas made up of other urban as well as rural administrative units should have mutual socio-economic links with the core town, and

(*iii*) In all probability this entire area should get fully urbanised within a span of two or three decades.

The constituent units of Amravati standard urban areas in Amravati district are as follows :—

Amravati S. U. A.—

Urban Components

1. Amravati City (M) 2 Badnera (M).

Rural Compcnents :

1.	Mhasala	2	Shegaon.
3	Nawasari.	4	Jewad.
5	Bercda.	6.	Nimbhora Kh
7.	Badnera (Rural).	8	Tarkheda
9	Gambhirpur.	10.	Amravati peth
11.	Mahajanpur.	12.	Saturna.
13.	Wadali.		

Table (3) gives the distribution of inhabited villages by their population range and their percentages to total inhabited villages in the district.

TABLE 3

Distribution of Inhabited Villages by population Ranges

Ranges of population (1)	No of villages in each range (2)	Percentage of villages in each range (3)
—200	427	25 15
200—499 . . .	498	29 33
500—1,999 ..	666	39 22
2,000—4,999	78	4 59
5,000—9,999	24	1 41
10,000 + .	5	0 30
All ranges	1.698	100 00

An inhabited village on an average has 776 population which can be compared to the State average of 1,037 persons. Of the 1,698 inhabited villages in the district, the highest number of villages 498 (29 33%) are in the size-class of 200—499 population, whereas, 5 villages (0 30%) are in the size-class of 10,000 and above As many as 427 (25.15%) villages are having less than 200 population each. There are 402 villages (23 67%) in the size-class 500—999 ; 264 (15 55%) in the size-class of 1,000—1,999 ; 78 (4.59%) in the size-class of 2,000—4,999 and 24 (1.41%) with more than 5,000 but less than 10,000 population.

To have broad classification of villages on the basis of their population they have been further grouped as small sized (population below 500), medium sized (500—1,999), large sized (2,000—4,999) and exceptionally large sized (5,000+). On the basis of this a grouping, the small sized villages share as many as 54.48 per cent of the total inhabited villages with 15.93 per cent of rural population in the district. The medium sized villages are 39 22 per cent with 49.08 per cent population, large sized villages (4 59%) with 17 75 per cent population and exceptionally large sized villages (1 71%) with a population of 17.24 per cent of the rural population of the district.

Population, Growth, Density and Sex Ratio

Amravati district registered the decadal growth rate (1971—81) of 20 78 per cent which was lower than the growth rate of the State (24 54%) as a whole. There was an addition of 320,201 persons in the total population with the break up of 200,385 persons in rural and 119,816 in urban areas in 1981 Census over 1971 It is seen that the urban growth rate (28 21%), of 1971—81 was less than the state growth rate (39 99%) whereas the rural growth rate (17.95%) was slightly more than the State (17 55%). Within the district, the highest growth rate (32.53%) was recorded in Melghat tahsil followed by Morshi (24 07%) and Amravati tahsil (23.87%) (Table 4).

TABLE 4

Decadal Changes in Distribution of Population

Name of tahsil (1)	Population 1971 Total (2)	1971 Rural (3)	1971 Urban (4)	1981 Total (5)	1981 Rural (6)	1981 Urban (7)	Percentage Decadal (1971—81) variation Total (8)	Rural (9)	Urban (10)
1 Amravati	486,472	265,195	221,277	602,587	308,832	293,755	+23 87	+16.45	+32.75
2. Achalpur	259,645	183,625	76,020	306,929	213,820	93,109	+18 21	+16 44	+22 48
3 Morshi	243,844	193,700	50,144	302,531	238,964	63,567	+24 07	+23 37	+26 77
4. Chandur	233,051	206,251	26,800	267,156	235,195	31,961	+14 63	+14.03	+19 26
5. Daryapur	210,437	162,482	47,955	239,397	179,910	59,487	+13 76	+10.73	+24 05
6 Melghat	107,760	105,273	2,487	142,810	140,190	2,620	+32 53	+33 17	+5 35
District Total ..	1,541,209	1,116,526	424,683	1,861,410	1 316,911	544,499	+20 78	+17 95	+28 21

Faster growth rate in these tahsils seems to be the result of migration corrected with the rapid industrial expansion as well as more job facilities provided in these areas. The lowest growth rate (13.76%) was experienced in Daryapur tahsil. Chandur and Achalpur tahsils recorded the growth rate of 14 63 and 18 21 per cent respectively. It is also observed that during 1971—81 the urban growth rate

was higher than the rural in the district and all tahsils excepting Melghat tahsil where urban growth rate (5 35%) was considerably less than the rural (33.17%). (Table 4)

The urban growth rate calculated at the 1951 Census was 22 25 per cent in the district and 62.42 per cent in the state. (Table 5).

TABLE 5

Growth, Density and Sex-Ratio of Urban Population in the District in relation to the State

N A —Not Available

In 1961 census growth rate came down to 13 87 per cent in the district and to 21 32 per cent in the State For 1971 census, urban growth rate in the district and the State rose to 40 75 per cent and 31 81 per cent, respectively. In the 1981 census, the district recorded an urban growth rate of 28.21 per cent as against 39 99 per cent in the State. The urban growth rate of the district in the 1981 census is more than the rural growth rate of 17 95 per cent. Of the 12 towns in the district, Amravati recorded the highest (34 88%) growth rate closely followed by Shendurjana town (33.35%). Daryapur-Banosa is the other town in the district where urban growth rate (29.17%) exceeded the district average The remaining other towns registered less growth rate than that of the district

The district Amravati has an average density of 152 persons per km² which is less than the State average of 204. However, Amravati (274) and Achalpur (241) tahsils have higher density as compared to the state average. The lowest density of 36 person per km² can be seen in Melghat tahsil of the district.

Table 6 shows distribution of villages according to density ranges.

TABLE 6

Distribution of villages by density

Range of density (Per Km²) (1)	Total No of villages in each density range (2)	Percentage of villages in each density range (3)
—10	89	5 24
11—20	53	3 12
21—50	168	9 89
51—100	434	25 56
101—200	622	36 63
201—300	176	10 37
301—500	98	5 77
501+	48	2 83
Not known	10	0 59
All density ranges	1 698	100 00

All the villages have been grouped under eight different density ranges It is seen from the table that 1,366 of the inhabited villages recorded density up to 200 persons per km². It varied between 201 and 500 in respect of 274 villages 48 villages recorded a very high density of more than 500 persons per km². For the remaining 10 villages, the density of population could not be worked out for want of their area figures In conformity with the State pattern there has been consistant rise in the urban density in the district since the post independence period It has been increased from 1,418 per km² in 1961 to 3,410 persons per km² in 1981 (Table 5). Among the various towns in the district, Warud recorded the highest density (10,142) for 1981 census (Statement I)

1981 Census recorded a sex ratio of 936 females per 1,000 males in the district which is almost equal to the sex ratio of the State (937). The sex ratios in the district and the State since 1901 are given in the following table.

TABLE 6 (1)

Sex Ratio 1901—1981

Year (1)	District (2)	State (3)
1901	960	978
1911	959	966
1921	953	950
1931	939	947
1941	946	949
1951	958	941
1961	933	936
1971	931	930
1981	936	937

From the above table it is seen that sex ratio in Amravati district was generally lower than that of the state Since 1901 excepting for 1921, 1951 and 1971 Census years. The highest and lowest sex ratio of 960 and 931 was recorded in the year 1901 and 1971 respectively.

Cf the six tahsils of the district, the highest sex ratio of 961 was recorded in Melghat tahsil and the lowest as 922 in Morshi tahsil in the 1981 Census. Daryapur tahsil recorded the sex ratio of 948 followed by 947 in Chandur, 940 in Achalpur and 925 in Amravati tahsil. However, it appears that more males are migrating from Melghat to other areas of the district and the state because of potentiality of work opportunities. Tahsilwise sex ratios of 1981 census are given in the following table

TABLE 6 (*a*)

Sex Ratio by Tahsils, 1981

District/Tahsil (1)	Females per 1,000 males (2)
Amravati District	936
Amravati tahsil	925
Achalpur tahsil	940
Morshi tahsil	922
Chandur tahsil	947
Daryapur tahsil	948
Melghat tahsil	961

It may be seen that 1981 urban sex ratio (924) of the district is significantly higher than that of the state (850) Trend over the past few decades (Table 5) shows consistant rise in the urban sex ratio of the state and the district since 1961

Scheduled Castes and Scheduled Tribes

To evolve any suitable plan for socio-economic uplift of the Scheduled Castes and Scheduled Tribes, the government needs data about scheduled castes and scheduled tribes Census is the main data source. One of the highlights of 1981 census, as that of 1971 and 1961 censuses, was the collection of detailed information on the socio-economic characteristics of scheduled caste and scheduled tribe population. There is no standard definition of scheduled castes or scheduled tribes Scheduled castes include castes, races of tribes as are declared to be scheduled castes by the President of India by public notification under article 341 (1) of the Indian Constitution. Similarly, scheduled tribes mean all such tribes of tribal community or part or group within such tribe or tribal community as are declared by the President of India, to be treated as scheduled tribes under article 342 (1) of the Indian Constitution. For Maharashtra state, 59 castes and 47 tribes have been declared to be recognised as scheduled castes and scheduled tribes respectively and the list of scheduled castes and scheduled tribes in the state is given below

44. Thakur, Thakar, Ka Thakur, Ka Thakar, Ma Thakur, Ma Thakar.
45 Thoti (in Aurangabad, Bid, Nanded, Osmanabad and Parbhani districts and Rajura tahsil of Chandrapur district).
46. Varli.
47. Vitolia, Kotwalia, Barodia

As per 1981 Census, scheduled caste population in Amravati district was 112,754 including 58,080 males and 54, 674 females It comprises 6 06 per cent of the total population of the district as against 4.25 percent in 1971. Of the total scheduled caste population in the district, 75,776 (67 20%) live in the rural areas and the remaining 36,978 (32.80%) in the urban areas. Out of the 1,698 villages in the district, 1,093 villages have scheduled caste population (Table 7).

TABLE 7

Daryapur tahsil . .	5 83	7 57		6 34
Melghat tahsil ..	5 49	5 18	73 66	74 42

At the time of 1981 Census, the scheduled tribe population of 241,704 persons, with the break up 123,665 males and 118,039 females, was returned in the district. It gives out 12.98 per cent as against 5 15 per cent scheduled tribe population of the district in 1971. There is a heavy rise in the proportion of scheduled tribe population in the district and also in other parts of the state mainly because of the removal of area restrictions for recognising the tribal population as scheduled-tribe in the State Earlier i. e. for 1971 Census, scheduled tribes were recorded only in Melghat tahsil Remaining five tahsils were without scheduled tribe population. In 1981 Census, all the six tahsils have recorded scheduled tribe population. Of the total tribal population, as many as 89 68 per cent is in rural area and 10 32 per cent resides in urban areas.

There are 1,698 inhabited villages in the district Of these villages, 1,327 are inhabited by scheduled tribe population. The proportion of scheduled tribe population to total population is upto 5 per cent in 382 villages, 6 to 15 per cent in 318 villages , 16 to 25 per cent in 110 villages , 26 to 35 per cent in 57 villages , 36 to 50 per cent in 58 villages and more than 50 per cent in 402 villages of the district (Table 8).

The scheduled caste and scheduled tribe population respectively comprise 6 79 per cent and 4 58 per cent of the total urban population of the district. The highest concentration of scheduled caste is in Chikalda and the lowest in Sendurjana town The scheduled tribe population is concentrated in the towns of Chikalda, Morshi and Dattapur-Dhamangaon in the descending order (Table 9).

TABLE 9

Proportion of Scheduled Caste/Scheduled Tribe population in Town

Literacy

As per Indian Census, the definition of literate is given as, ' any person who is able to both read and write with understanding in any language' . The 1981 Census recorded 51 82 per cent of the total population of the district as literate which is higher than the State average literacy rate of 47 18 per cent. Amravati district ranks 4th in the State in terms of literacy rate. Of the six tahsils of the district, the highest literacy rate of 57 77 per cent is registered in Amravati tahsil and the lowest 19 32 per cent in Melghat tahsil (Table 12). It is also noticed that the villages with more population are having high literacy rate It means that size of the villages and literacy rate are positively corelated (Table 10).

TABLE 10

Sendurjana (M. Cl)	55 89
Warud (M Cl)	60 34
All towns	61 78

During the span of 8 decades (1901 to 1981), the literacy rate in the district has considerably increased from 5 46 per cent in 1901 to 51 82 per cent in 1981.

TABLE 11 (*1*)

Progress of Literacy, 1901—1981

Year (1)	Total (2)	Males (3)	Females (4)
1901	5 46	10 21	0 47
1911	5 07	9.56	0 39
1921	7 01	12 74	1 00
1931	9 03	16 08	0 51
1941	38 35	45 61	30 68
1951	24 52	37 55	10 68
1961	33 68	45 91	20 57
1971	42 36	52 28	31 69
1981	51 82	60 50	42 55

There was slow progress in literacy till 1931. During these three decades the literacy rate has gone up from 5.46 per cent in 1901 to just 9 03 per cent in 1931 It went up to 33 68 per cent in another three decades i. e in 1961. As per the latest census of 1981, half of the district population is literate Rise in literacy may be because of more educational institutions opened by private bodies and educational policy of the government particularly after post-independence period in which more attention was paid on education through five year plans

Sexwise literacy rates show the differential variations as 10 · 7 (60 50 per cent male and 42 55 per cent female literates) in 1981 This ratio was 10 · 6 in 1971 and only 10 · 4 in 1961 It shows that the difference in literacy rate of males and females is narrowing in recent years as compared to earlier literacy rates of male and female population

There is variation in literacy rates of rural and urban like the literacy rates of males and females As per 1981 Census, literacy rate in rural area was 47 71 per cent as against 61 78 per cent in urban areas of the district The percentage of female literates (54.14%) is more in urban areas than the female literates in rural areas (37 80%) However, the difference between percentages of rural male literates (57 03%) and urban male literates (68 84%) is less than the percentage of female literates in rural and urban areas

Working Population

'Work' may be defined as participation in economically productive activity The participation may be physical or mental in nature Work involves not only actual work but also effective supervision and direction

There has been some conceptual change defining the worker at the 1981 Census A trichotomy of main workers, marginal workers and non-workers has been adopted instead of the dichotomy of workes and non-workers in 1971 and 1961 However, while accepting this conceptual change the feasibility of making the data comparable with the previous censuses was duly considered Conceptually, the main workers *plus* the marginal workers of 1981 are almost comparable with the 'workers plus non-workers with secondary work' of 1971 and 'workers' of 1961 Further, for 1981 Census on the recommendation of Planning Commission and Central Statistical Organisation, only four industrial categories of main workers i e cultivators, agricultural labourers, workers engaged in hosuehold industries and 'other workers' have been adopted against the nine industrial categories of workers in 1971 and 1961.

For main workers the major part of the preceding year (at least six months or 183 days) was adopted while those who worked for sometime during the preceding year but not for the major part, have been treated as marginal workers All those, who had not worked at all during the last year, were recorded as non-workers. Persons engaged in household duties, students, dependents, retired persons, rentiers, beggars are some of the categories grouped as non-workers

Out of the total population of the district 40 47 per cent population was main workers, 2 53 per cent as marginal workers and the remaining 57.00 per cent as non-workers (Table 12).

28 78	46.12	10 02	1.37	1.05	1.71	30.15	47.17	11.73	69.85	52.83	88 27

The similar figures for the state are 38.71 per cent, 3 85 per cent and 57.44 per cent. As compared to 1971, there has been little rise in the work participation rate both in the district (38 47 per cent in 1971 and 40.47 per cent in 1981) and the state (36 48 per cent in 1971 and 38 71 per cent in 1981)

At tahsil level, the work participation rate (at 1981 Census) is highest (45.19%) in Melghat tahsil and lowest (35.42%) in Amravati tahsil of the district. The work participation rate for males (52.90%) is nearly double than that for females (27 18%) in the district according to 1981 census. As regards the female participation rate in the district, it has been increased from 24 10 per cent in 1971 to 27.18 per cent in 1981 Similar increase in the average state is from 19 70 per cent to 23 98 per cent. It appears that there is relatively more rise in work participation rate for females than males during 1971-81.

As is obvious, the participation rate is higher in the rural areas (45.30%) than the urban areas (28.78%) for the 1981 census also. Comparison of male and female participation indicates that the differential is larger among females (34 20%) in rural and (10.02%) in urban than the males (55.74%) in rural and (46 12%) in urban.

It is revealed from the 1981 Census that among the main workers in the district, 24 42 per cent are cultivators, 52.61 per cent are agricultural labourers, 1.55 per cent are engaged in household industry and 21.42 per cent in other work. The corresponding percentages for the state are 35.12 per cent, 26.63 per cent, 2.55 per cent and 35.70 per cent. Comparison indicates that there is high proportion of agricultural labourers and low proportion of cultivators in the district as compared to the state averages. It is also seen that more than three-fourth of the workers in the district are directly engaged in agriculture as cultivators or agricultural labourers In other words, the district is more dependent on agricultural economics. Female participation as cultivators in the district (14.73%) is substantially lower than that of the state (38.48%). Whereas the position is reverse for the participation as agricultural labourers.

Of the total population of the district, 2.53 per cent was recorded as marginal workers (1.49% among males and 3.65% among females) The high incident of marginal workers among females as compared to males is understandable as the farmer besides looking after their household duties tend to engage themselves to some gainful activity to lend support to their male counterparts.

Availabilities of amenities—Education

Educational facility is available in 1,311 (77.21%) out of every 10 villages and comprises of 96.11 per cent rural population of the district (Table 13 and 14).

TABLE 13

Distribution of Villages according to the availability of different amenities

Serial No.	Name of tahsil	No. of inhabited villages	No. (with percentage) of villages having one or more of the following amenities

5	Daryapur	179,910	172,702 (95.99)	102,001 (56.70)	179,910 (100.00)	104,638 (58.16)	96,407 (53.59)	83,455 (46.39)	118,091 (65 64)	138,253 (76 85)
6	Melghat	140,190	126,152 (89.99)	34,075 (24.31)	140,190 (100.00)	45,518 (32.47)	26,153 (18.66)	39,281 (28 02)	41,661 (29.72)	101,843 (72.65)
	Total of all tahsils ..	1,316,911	1,265,745 (96.11)	671,947 (51.02)	1,316,911 (100 00)	778,003 (59.08)	714,409 (54.25)	748,779 (56.86)	713,583 (54 19)	1,187,279 (90 16)

The position regarding schools in the villages is still better in three tahsils, viz, Daryapur (83.54%), Chandur (80.16%) and Amravati (77.50%). In case of the remaining three tahsils, Achalpur tahsil is with only 72.80 per cent of its villages having educational facilities is at the bottom. Out of the total inhabited villages in Morshi and Melghat tahsils 75.75 per cent and 74.52 per cent villages are having educational facility serving 98.04 per cent and 89 99 per cent of their population, respectively. (Table 15).

TABLE 15

Distribution of villages according to population range and amenities available

Of the 387 villages which do not have educational facility as many as 378 villages are having less than 500 population and only 9 villages fall in the population range of 500—1,999. Among the villages (387) without educational amenity, the facility is available within the distance of 5 kms. for 307 villages, at a distance of 5—10 kms. for 62 villages and the remaining 18 villages have this facility at a distance of beyond 10 kms. (Table 16).

TABLE 16

All towns .	1.21	1.41	1 34	3.51

The ratio of population to institution on an average in urban areas of the district is 10,000 : 1.21 for Higher Secondary/Inter/PUC/Junior Colleges, 10,000 : 1 41 for Secondary/Matriculation Schools, 10,000 : 1.34 Middle Schools and 10,000 · 3.51 Primary Schools. In other words among urban areas, there is a Higher Secondary/ Inter/PUC/Junior College for every 8,250 persons ; Secondary/ Matriculation Schools for every 7,071 persons ; Middle School for every 7,459 persons and Primary School for 2,851 persons in the district

Medical

The medical institutions of any type (specified in the village directory) exists only in one out of every twenty (19.85%) villages, serving about 51.02 per cent rural population of the district This is of course not a happy situation. As it is true in respect of other rural areas of the state, more so in the country as such, the main cause of this situation is the unwillingness on the part of medical personnel to go back to villages and to serve the rural sector. However, with the establishment of primary health centres, opening of rural dispensaries and cottage hospitals are bound to steadily change the complexion in the coming years.

Of the 1,698 inhabited villages in the district, 337 villages (19 85%) are having some kind of medical facility which is available to 51.02 per cent population of the district Within the district, the position is some what better in Daryapur tahsil. In Daryapur tahsil 72 villages (29.63%) out of 243 total villages are served with one or other medical facilities. On the other hand in Melghat tahsil (though largest in area) only 26 villages (8 28%) out of 314 villages (Table 13) This facility is available to 56.70 per cent rural population of Daryapur tahsil with 24.31 per cent rural population can avail medical facility.

As many as 1,361 villages (80 15%) out of the 1,698 villages do not have any kind of medical facility However, this facility is available at a distance up to 5 kms. for 675 villages, at a distance of 5—10 kms. in respect of 414 villages and villagers of 272 villages have to walk the distance of 10+kms. to have some type of medical facility (Table 16). All large size villages (29) in the district have one or other type of medical facility available in the village itself. As against this, in the small size villages (less than 500 population), the facility is available just in 5.41 per cent villages (Table 15).

Table 19 gives the number of beds per 1,000 of population in the towns.

TABLE 19

No. of Beds in Medical Institutions in Towns

Class, name and civics status of the towns	No. of beds in medical institutions per 1,000 population
(1)	(2)
II Achalpur (M. Cl.) . .	0 92
I Amravati City (M. Cl.)	4 96
III Anjangaon (M. Cl) .	1 70
III Badnera (M. Cl) .	0 46
IV Chandur (M Cl) .. .	1.62
IV Chandur Bazar (M Cl)	2 01
VI Chikalda (M Cl) . ..	5.34
III Daryapur Banosa (M. Cl) .	1.62
IV Dattapur Dhamangaon (M. Cl)	1 74
III Morshi (M. Cl) ..	1 46
IV Sendurjana (M. Cl.) ..	0 93
III Warud (M Cl.)	1 40
All towns	3 05

It is seen from the Table 19 that on an average 3.05 beds are available per 1,000 of population in urban areas of the district.

Drinking Water

Drinking water facility is available in all the inhabited villages of the district.

Post and Telegraph

About one-fourth (24 09%) inhabited villages in the district have some kind of post and telegraph amenity and these villages cover 59.08 per cent of the rural population of the district. Within the district, Amravati tahsil is having a postal facility in about every third village and provides facility to more than three-fifth

of its population and thus, enjoys the place of pride. The position is, however, not satisfactory in Melghat tahsil where postal facility is available only after every eighth village.

The postal facility is not available in 1,289 villages of the district. However, the same facility is available at a distance up to 5 kms. in case of 911 villages, at a distance of 5—10 kms. in respect of 287 villages and beyond 10 kms. for the remaining 91 villages in the district. It is seen that all 29 villages, with size class of population 5,000 and above, have the post and telegraph facility whereas the same is prevalent in 93.59 per cent villages with population ranging between 2,000—4,999. The same percentage comes down to 39.04 with the village population size of 500—1,999 and only 5 08 per cent villages of the population size of less than 500 are having the postal facility in the village itself.

Market/Hat

The market/hat is held in as many as 406 villages covering 54.25 per cent rural population of the district. In Amravati tahsil as many as 31.67 per cent villages are having the advantage of periodical markets/hats whereas in Melghat tahsil only 7.64 per cent of inhabited villages cater periodical markets/hats.

The market/hat is not held in 1,292 villages of the district. The villagers of 707 villages will have to go to markets/hats held at a distance up to 5 kms., 5—10 kms. for 395 villages and beyond 10 kms. in respect of 190 villages in the district. Out of the 406 villages having market/hat facility, 68 villages are in the population size class of less than 500, 245 villages are in the population range of 500—1,999, 65 in 2,000—4,999 and 28 villages in the population range of 5,000 and above.

Communications

Out of the total villages of 1,698 in the district, the communication facility viz. bus stop/railway station is available in 537 villages which comprise more than 50 per cent of rural population of the district. Among the remaining 1,161 villages, it is available at a distance of 5 kms. in case of 653 villages, 5—10 kms. in respect of 298 villages and above 10 kms. for 210 villages. Of the total villages (537) having this amenity, 172 villages are in the population range of less than 500, 271 are in population range of 500—1,999, 67 in the range of 2,000—4,999 and 27 are in the population range of above 5,000.

Approach by Pucca Road

543 villages (31.98%), covering with 54.19 per cent of the rural population of the district, are approachable by pucca road. The position is better in Daryapur tahsil where 51.03 per cent villages are linked by pucca road. On the other hand, only 19.05 per cent villages of Chandur tahsil are approachable by pucca road. Among the villages linked with pucca road (543) 203 are in the population range of 500, 255 are in the range of 500—1,999, 60 are bigger size villages with the range of 2,000—4,999 population and 25 with more than 5,000 population.

Power Supply

The rural electrification programme assigned importance from the third five year plan and this has resulted in accelerating the supply of power in the rural areas. Of the total villages in the district, as many as 1,272 (74.91%) get the power supply. Within the district at tahsil level, Amravati tahsil tops the list with 86.94 per cent villages covered by this facility. However, the power supply is available to only half of the total villages of Melghat tahsil which is poorest amongst all the tahsils of the district. Of the total villages (1,272) having the power supply in the district, 568 villages fall in the population size of less than 500, 598 are in the population range of 500—1,999, 77 in the range of 2,000—4,999 and 29 villages with the population of more than 5,000.

Out of 1,698 inhabited villages in the district, 154 villages do not have any facility excepting that of drinking water (Appendix-III) . The number of such villages in each tahsil is : Melghat (57), Amravati and Chandur (24) each, Achalpur and Morshi (17) each and Daryapur (15). To summarise the information on various facilities available, one may say that 154 villages do not have any facility excepting drinking water, 387 villages are without any school, 1,361 villages are devoid of any medical facility, 1,289 villages are not having postal facility, market/hat is not held in 1,292 villages and bus stop/railway station facility is not available in 1,161 villages. Likewise 1,155 villages are not approachable by pucca road and 426 villages are yet to be electrified in the district. This is certainly not a happy situation. One may also observe a positive relationship between the size of the village and amenity provided.

Land Utilisation

The information of land use pattern of each village in the district is given in columns 15 to 19 of the village directory. The classification of land use adopted in the village directory corresponds to the classification recommended by the Ministry of Food and Agriculture.

Forest

The Amravati district consists of two forest divisions viz., Melghat and Amravati. The Melghat division covers only Melghat tahsil and that of Amravati, five main tahsils. The forests are mainly concentrated in the north-west hilly portion of the district in Melghat tahsil which occupy more than one-fourth area of the total area of the district. In the remaining tahsils the intensity of the forest is very low.

The forests, in the district, are broadly of the type south tropical dry mix deciduous which can be classified in two categories viz., (1) The plain forests in the east and south-east, and (2) The Melghat forests in the north-

west. The terrain of Melghat forests is hilly and occupies the Sawigarh ridge of the Satpuda range, whereas the plain forests are scattered in small blocks.

The most valuable forest produce found in the forests is "Teak". The prominent species are Salai Dhaora, Tendu, Achar, Rohan, Haldu, Ain, Dhamn, Sag, Shewan, Tiwas, Kalam, etc. Teak from these forests is of good quality and it is used for manufacture of furniture and construction. The logs of timber are auctioned through the Government Depots at Paratwada, Semadoh and Dhavni. The other commercially important associates found in the forests are Kadai or Kulha and Dhaora for gum, fodder and thatching grass. Bamboo, rosa grass, lac and tandu leaves (used for bidi making) are the other important minor forest products. Rosa grass is available in plenty in the western parts of Melghat tahsil comprising Chikalda range, War range and Dhulghat range. However, the eastern part does not have much grass. Rosa grass has two varieties viz., Motiya and Sophiya. Motiya varieties of rosa grass has fragnant smell and it is used as a base for perfumes in cosmetics specially in soap. Secondly, it is used for flowering of tobacco. This variety of gram is mainly exported to other countries. Sophiya has not much smell and, therefore, it is used for massaging and in medicine.

The forests in Melghat tahsil are fairly rich in game and wild animals like Boison, tiger, bear, sambhar, pig and chital.

Irrigated, Un-irrigated and Culturable Waste Areas

The figures relating to irrigated land (by type of source), unirrigated land and culturable waste areas are given in columns 16, 17 and 18 respectively of the village directory. The highest proportion of cultivable area to total area of the tahsil is (91.29%) noticed in Daryapur tahsil (Table 20).

TABLE 20

Distribution of villages according to the Land Use (in hectares)

Serial No.	Name of Tahsil	No. of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to the total cultivable area
(1)	(2)	(3)	(4)	(5)	(6)
1	Amravati	360	202,803.05	85.44	2.73
2	Achalpur	261	115,649.50	86 96	4.43
3	Morshi	268	140,923.04	80.55	12 45
4	Chandur	252	161,643 04	88.43	2.51
5	Daryapur	243	121,358 50	91.29	2 12
6	Melghats	314	133,471.85	62.58	0.83
	Total of all Tahsils	1,698	875,848.98	82.73	4 13

The other tahsils where the proportion of cultivated area exceeds the district average (82.73%) includes Amravati (85.44%), Achalpur (86 96%) and Chandur (88.43%). In the remaining tahsils viz., Morshi (80.55%) and Melghat (62.58%) the percentage of cultivated area is less than the district average.

Out of the total cultivated area of the district, hardly 4.13 per cent area is under irrigation. Within the district, Morshi tahsil (12 45%) is having a fair proportion of irrigated land.

Staple Food

Among the food crops of the district jowar and wheat are the most important cereals. Jowar is the main staple food of majority of the people of the district and next in order of importance is wheat (Table 21).

TABLE 21

Main Staple food in the Majority of Villages in each tahsil

Serial No.	Name of tahsil	Main staple food
(1)	(2)	(3)
1	Amravati . . .	Wheat, Jowar

All towns total ..	72.60	36.50	36.10	72 04	13 97	19.77	10 46	15.08	12.76

On an average per capita receipts are Rs. 72 60 of which Rs. 36.50 are received through local taxes and the rest Rs. 36.10 from all other sources. The total expenditure incurred per head is Rs. 72.04 of which Rs. 13.97 on general administration, Rs. 19.77 on public health and conveniences, Rs. 10.46 on public works, Rs. 15.08 on public institutions and Rs 12.76 on all other aspects.

Minerals

So far no deposits of any important mineral wealth have been traced in the district. However, in the lower Chikalda range, near Achalpur, sedimentary clay which are used for manufacturing potteries, earthen wares, bricks, stoneware pipes, etc are found at certain places viz., the main Khairalli-Bhairmghat ridge, nallah to the north-east of Nimbhora, the southern slope of the hill to the north-east of Pendhari and the lower ridge to the east of Belkheda. The mining activities, so far, are restricted only to quarrying of stones, clay, sand, gravel etc.

Fisheries

Fishing activities in the district are restricted to inland water of rivers, tanks and ponds but the water spread area is inadequate for development of fishing industry.

The commercially important varieties of fish found in the district are Botri, Chela, Chandni, Dhadkya, Dhaora, Gane, Karvadi, Katva, Kolus, Murrel, Mahaseer, Magur, Padhan, Poshi, Seenghan, Tambu and Zinga. However, these varieties of fish are not fast growing. There are few co-operative societies of fishermen in the district. These co-operative societies are given financial assistance by way of loans, subsidy and are, also, helped to secure tanks and ponds on lease for propagation of pisciculture.

Industries

Principal crops being cotton and oil seeds, most of the large scale factories in the district pertain to cotton

processing and oil crushing. In the year 1983 there were 10 units functioning under medium and large scale sectors in the district. Out of these oil milling, refining, solvant extraction and ginning and pressing activities cover six units. In these units the raw material mainly used is produced locally. These large and medium size sectors provided direct employment to 4,801 persons with a production value of about Rs. 3,929 lakhs during the year 1982-83.

As regards small scale industrial sector, there are about 894 units. Out of these 894 units largest group of 242 units belongs to engineering and allied industries It is followed by 205 agro based industries ; which includes 100 units of oil mills, 26 units of ginning and pressing and 8 units of 'dal' (pulses) mills. There are 101 units of building material and ceramices, 90 chemical based units and 86 forest based industries. The textile based industries are 15 in number and mineral based 2 units in the district.

These industries are mainly located at Amravati City itself because of the infiastructure and ready market available at Amravati. Besides Amravati, the oil mills and dal mills are located at Achalpur, ginning and pressing at Paratwada and Daryapur and saw mills at Paratwada.

In addition to the large, medium and small scale industrial units, there were 345 artisans based units, like processing of grains and pulses, carpentary and black-smithy, leather, cane-bamboo, etc., providing employment to about 663 persons. The main items of production in these units are bakery products, papad, furniture, agricultural implements, footware, tanning leather, sup, dawadi fale, etc

Trade and Commerce

The commodities are brought and sold in the weekly markets which are held on specific week days. In big cities like Amravati and Achalpur the transactions take place every day in local markets. The most important commodities manufactured, imported and exported in towns of Amravati district are given in the following Table-23.

TABLE 23

Most Important Commodities manufactured and exported in Town

Class, name and civic status of the town	Most important commodities		
	Manufactured	Exported	Imported
(1)	(2)	(3)	(4)
II Achalpur (M Cl.)	Wooden furniture	Wooden furniture	Teak wood
I Amravati City (M. Cl)	Cotton Seeds and oil cakes.	Cotton bales	Iron and Steel.
III Anjangaon (M Cl.)	Groundnut oil	Betel nut	Raw cotton
III Badnera (M. Cl.)	Sweet oil	Jute	Sugar
IV Chandur (M. Cl.)	Sweet oil	Groundnut oil	Groundnut
IV Chandur Bazar (M. Cl)		Jowar	Jaggery
VI Chikalda (M Cl)	Teak wood	Teak wood	Cloth
III Daryapur Banosa (M. Cl)	Cotton bales	Cotton bales	Raw cotton
IV Dattapur Dhamangaon (M Cl)	Cotton seed oil	Cotton bales	Wheat
III Morshi (M. Cl)		Jowar	Wheat
IV Sendurjana (M. Cl)	Bricks	Orange	Sugar
III Warud (M. Cl)	Bread Confectionery	Raw cotton	Wheat

As the Government and private timber depots are located in Achalpur, wooden furnitures are manufactured on large scale and those are exported from Achalpur. Teak wood is available in plenty at Chikalda and therefore, it is exported to other parts of the district and outside the district. Cotton ginning and pressing factories are established at Amravati, Daryapur-Banosa, Dattapur-Dhamangaon. In these factories cotton bales are prepared and those are sent to other parts of the state' Jowar is exported from Chandur Bazar and Morshi. There are orchards of betel leaves around Anjangaon and oranges around Shendurjana which are exported to other parts. As regards, imports of commodities are concerned, there are certain daily consumable items which are not locally available Sugar is imported in Badnera and Shendurjana and Jaggery in Chandur Bazar. Cereal like wheat is imported in Dattapur-Dhamangaon, Morshi and Warud. Groundnut is brought in Chandur, whereas raw cotton in Anjangaon and Daryapur-Banosa. Cloth is imported in Chikalda which is a hill station. Other items like teak wood, iron and steel are imported in Achalpur and Amravati city, where the industries of manufacturing of wooden furniture and that items from iron and steel are located.

Slum Population

There are no notified slums in the municipal limits of Achalpur town of Amravati district Amravati city is having some notified slum areas.

It is seen that the proportion of slums population to total population of Amravati city is 10 48 per cent. The density of slum population (population per sq. km.) is 105,385 (Table 24).

TABLE 24

Proportion of slum population in towns

Class, Name and Civil status of the town	Proportion of the Slums population To total Population of the town	Density in slums (per km²)
(1)	(2)	(3)
II Achalpur (M. Cl)	There are no notified slums within municipal limits, hence the information shows nil	
I Amravati city (M Cl)	10 48	105.385
Total	10 48	105 385

Places of Tourist Importance

The district is endowed with a rich variety of tourist attractions—ancient temples, scenic hill resorts, thick forests and varied wild life, hospitable people and colourful fairs and festivals. Amravati the historical city having the district headquarter, contains a large number of Hindu and two jain temples as well as several mosques The important Hindu temples are Amba Devi, Balaji, Ekvira Devi, Someshwar, Narayan and Dattamandir The Amba temple is said to be the oldest in Amravati and lays claim to a respectable antiquity of 1000 years Chikhalda hill resort is only 87 kms from Amravati and 807 Kms. from Bombay. It is full of splendid view points, lakes, water falls, flora and fauna. The forest is very rich in timber and shelters a variety of animals such as tiger, panther, boar, samber and deer The view points are Devi points, Gavilgad fort, Vana Udyan, Bir Talao, Monkey point Melghat sanctuary famous for 'Melghat Tiger Project' is about 60 kms. away from the din and bustle of Achalpur town. It is a beautiful place of charm and allure and shelters a great many birds. It is the famed abode of the tiger The other animals seen are the bison, wild oxen, sloth-bear, sambar, deer, barking deer, antelope and wild boar. The gorgeous peacock and the attractive gray jungle fowl are among the prominent birds The Rocky doh in Melghat sanctuary is a delightful spot for fishing.

The other important religious places are Kaudanyapur 'Vidarbha-Pandhari' and Ritpur (Rhudhipur) important place of 'Mahanubhav' sect The historical and tourist attraction places are Ellichpur (Achalpur) earlier capital city of 'Vaihad' having attractive carving on mosque and tombs. The tomb of Svah Doula Abdul Rahiman Gazi Gazanavi dates back to 1340 A. D. and is considered as the most famous of all the antiquities of Achalpur. Gavilgad fort is a historical fort on the hill The fort was built by mud by Gavali or Ahir Chieftains some where in 1425 A. D.

Most of the fairs held in the district are in the commemoration of some local ascetic or anchorite or a miraculous manifestation of one of the Gods or a religious festival. There are about nine such numerically important fairs in Amravati district and their short accounts are given below :—

(1) Bahiram fair at Karanja—Baheram, Achalpur Tahsil—The fair is held from Margashirsha Sud. 5 to Marga shirsha Vad. 5 in honour of God Bahiram. During this period about 1 to 1 5 lakh pilgrims mostly from Vidarbha region attend the fair.

(2) Ganeshotsav fair at Khel Choudhar (Karanjgaon), Achalpur Tahsil—The fair is held from Bhadrapad Sud. 4 to Bhadrapad Sud. 15 in honour of the God Ganesh or Ganapati. The total congregation of the fair is about 25,000 to 30,000.

(3) Shah Doula Rahiman Shah Gazi Urus at Achalpur, Achalpur tahsil—Urus is held from the 10th day to 15th day of the muslim month rabiul-Awwal at Achalpur. This is an important Muslim Urus in the district More than 25 to 30 thousand people of all religious attend the Urus.

(4) Salvardi fair at Salbardi, Morshi tahsil—the fair is celebrated in honour of God Mahadeo from Magha Vad. 12 to Phalgun Sud. 3. The total congregation is about 50,000.

(5) Shri Gadge Maharaj fair at Shegaon, Amravati tahsil—the fair starts on 13th December every year and lasts for 8 days, i. e. upto 20th December, Approximately twenty five to thirty thousand pilgrims from all parts of the state and all walks of life gather during this period.

(6) Shri Amba Devi fair at Amravati, Amravati. tahsil—This is one of the biggest fairs of the district It is held in honour of Goddess Shri Amba Devi in the month of Ashvina for 10 days from Ashvina Sud. 1 to Ashvina Sud 10. The congregation during the entire period of the fair is about 2 lakhs.

(7) Kaudanyapur fair at Kaudanyapur, Chandur Tahsil —The fair known as Shri Vithal Rukhmini fair, is held annually in honour of God Vithal and Goddess Rukhmini. It commences on Kartika Sud. 11 and ends on Kartika Vad. 2 Nearly 75,000 people attend the fair.

(8) Vithoba fair at Sawanga Vithoba, Chandur Tahsil—The fair is held in the month of Chaitra and Ashvina. The total congregation at the fair is about 25 to 30 thousands.

(9) Bendoji Baba fair at Ghuikhed, Chandur Tahsil—The fair is held in honour of the Saint Bendoji Baba for twelve days from Magha Sud. 1 to Magha Sud. 12. The total congregation is about 25 to 30 thousand.

VILLAGE DIRECTORY

SECTION I

PART A—VILLAGE AND TOWN DIRECTORY

SECTION I—VILLAGE DIRECTORY

Note Explaining the Abbreviations used in the Village Directory

The ' Village Directory ' gives the list of villages, their area, population, amenities such as educational, medical, communications, drinking water facilities etc. available to them and also the land use of each village. For this purpose, villages have been arranged tahsilwise in order of their location code number. The inclusion of alphabetical list of villages and the map of every tahsil depicting location of villages by population size, urban-spread and important infra-structural facilities available therein will further help the readers in identifying any village in the tahsil.

' Village ' is a statutory recognised unit having a definite boundary and separate land records. In case, a village is treated as an outgrowth of urban agglomeration, data on amenities and land use for that village have not been given in the Village Directory but shown alongwith the urban component. For those villages which have partly merged in an outgrowth, data pertaining to remaining part of the village is shown in the Village Directory and for the part merged or treated as an outgrowth, the details have been given under the concerned urban agglomeration. If a village, has fully merged in the town, the same has been specified as such in the Village Directory However, all such villages do appear in the Village Primary Census Abstract for any cross reference, Similarly, villages treated as Census Towns (urban) for the first time in 1981 Census are shown both in the Village Directory and the Village Primary Census Abstract for making any cross reference and no data relating to the amenities available have been indicated in the Village Directory. However, land use data for all such villages can be seen in the Appendix-II of the Village Directory.

If a village has fully merged into another village, the location code number and name of the merged village are given both in the Village Primary Census Abstract and the Village Directory at the appropriate place. Data in respect of these two villages put together appear against the village with which the other village has merged

The " un-inhabitated " villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i. e. the location code number, name and area of the village. In addition to all the above details, following four appendices to Village Directory have also been included :—

Appendix (*i*) Tahsilwise abstract of educational, medical and other amenities ;

Appendix (*ii*) Land utilisation data for census towns ;

Appendix (*iii*) Tahsilwise list of villages with no amenities available ; and

Appendix (*iv*) Tahsilwise list of villages according to proportion of Scheduled Castes/Scheduled Tribes population.

The first two appendices were also prepared for 1971 District Census Handbook. Appendices (*iii*) and (*iv*), added in 1981, are expected to help the planners for planning inputs in areas/villages where basic infrastructure is lacking and also for evolving suitable plans for the welfare of Scheduled Castes and Scheduled Tribes.

The Village Directory form has 20 columns and the details given under each column are as under :—

Column 1 gives the location code number of each village as the same is essential for identification of the village.

Column 2 indicates name of the village. For filling up of this column, 1971 District Census Handbook has been used as the basis.

Column 3 shows area figures (in hectares) as supplied by the State Revenue Department. For towns however, the area figures are in Km^2.

Column 4, which gives population and the number of households in each village has been introduced for 1981 census to examine the corelation between the amenities available to the population and the number of households. Figures given within bractets against total population in this column refer to the number of households in the village.

Data on amenities such as educational, medical communications, availability of drinking water, days of market/hat etc. are shown under columns 5 to 11 of the Village Directory. Additional feature for 1981 District Census Handbook is that in case if amenity is not available within the referrent village, a dash (—) is shown in the column and next to it, in brackets the distance from the village in broad ranges *viz.*, upto 5 km. 5-10 Km. and 10 Km.+ to the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provision of goods and services as well, so as to minimise the regional imbalances in the process of development.

Column 5 exhibits the availability of educational facilities *viz.* primary or elementary school, junior secondary or middle school, matriculation or secondary school, higher secondary/intermediate/pre-university/junior college, college, industrial school, training school, adult literacy school/centre and other educational institutions (Sanskrit pathshala, senior basic school, makhtab etc.).

If in a village, secondary school has middle and primary classes also the same has been counted as three schools *i. e.* secondary, middle and primary school. In case, there are more than one institutions of any type in a village their number is indicated within brackets against the prescribed abbreviation. Following abbreviations have been used for presenting data on educational amenities :

Primary or Secondary School	P
Junior Secondary or Middle School ..	M
Matriculation or Secondary School ..	H
Higher Secondary/Intermediate/Pre-University/Junior College (PUC).	PUC
College, any college (graduate level and above) like Arts, Science, Commerce etc.	C
Industrial School	I
Training School	Tr.
Adult Literacy Class/Centre	AC
Other Educational Institutions	O

Column 6, provides data on medical facilities available in the village. If in a village no medical facility is available 'dash' (—) has been placed and within the brackets the distance in broad ranges (upto 5 kms. 5-10 kms. and above 10 kms. of the nearest place where the most modest medical amenity such as dispensary/ community health worker is available) has been indicated. Various types of medical institutions included and codes used for them are as follows :—

Hospital	H
Maternity and Child Welfare Centre	MCW
Maternity Home	MH
Child Welfare Centre	CWC
Health Centre	HC
Primary Health Centre	PHC
Primary Health Sub-Centre	PHS
Dispensary	D
Family Planning Centre	FPC
T. B. Clinic	TB
Nursing Home	NH
Registered Private Practitioner	RP
Subsidised Medical Practitioner	SMP
Community Health Worker	CHW
Others	O

Column 7 gives information regarding availability of drinking water within the village In case more than one source is available for drinking water, the same has been mentioned. Following abbreviations have been used for indicating the source of drinking water in the village :

Tap water	T
Well water	W
Tank water	Tk
Tube-Well water	TW
Hand pump	Hp
River water	R
Fountain	F
Canal	C
Lake	L
Spring	S
Nallah	N
Others	O
Information Not Available	NA

Column 8, shows postal facilities such as post office, telegraph office, post and telegraph office and telephone connections available in the village. Various abbreviations adopted for indicating this information are :—

Post Office	PO
Telegraph Office	TO
Post and Telegraph Office	PTO
Telephone Connection	Phone

Column 9, gives information on day or days of the market/hat held in the village. This information is based on local enquiry and generally relate to weekly or bi-weekly market. If in any case, the market is held monthly or fortnightly it has been recorded accordingly in this column. In case weekly or bi-weekly or monthly market/hat is not being held, the column has been left blank.

Column 10 represents information as to whether the village is served by any mode of public transport like bus, rail and water-way and the same has been indicated as follows :—

Bus Stop	BS
Railway Station	RS
Navigable Water-way (including river, canal and back-water etc.).	NW

Column 11, refers to the state of roads etc. in the village. This will help us in determining as to whether the village is approachable both in fair and foul weather. Following abbreviations have been used for stating this information.

Pucca Road	PR
Kaccha Road	KR
Navigable River	NR
Navigable Canal	NC
Navigable Water-way (Other than river or canal).	NW
Foot Path	FP

Column 12 gives the distance in Kilometres within bracket from the nearest town. In case, the nearest town is located in another state the name of the state has also been indicated.

Column 13 relates to the availability of power supply to the village. The various sources of power supply have been indicated through the following codes :—

Electricity for Domestic purpose	ED
Electricity for Agriculture	EAg
Electricity for Other purpose like Industrial, Commercial etc.	EO
Electricity for All purposes listed above	EA

In case the power supply is realeased only for specific purpose, say agriculture or other, it has been stated accordingly.

Column 14 gives staple food (only in terms of grains) of the majority people of the village during the major part of the year. This may be rice, wheat, jowar, maize, ragi, etc. or a combination of grains where it is difficult to determine a particular grain.

Columns 15 to 19 give the details about land utilization. The land use pattern given in the Village Directory conforms to the classification recommended by the Ministry of Food and Agriculture, Government of India, which maintains the land records under the following five categories :—

(1) Forests.

(2) Not available for cultivation—

(*a*) lands put to non-agricultural uses.

(*b*) barren and unculturable land.

(3) Other uncultivated lands excluding fallow land.

(*a*) permanent pastures and other grazing lands.

(*b*) lands under miscellaneous tree crops and grooves not included in the net area sown.

(*c*) culturable wastes.

(4) Fallow lands.

(*a*) Fallow lands other than current fallows.

(*b*) current fallows.

(5) Net area sown.

Column 15 shows all the lands classed as forest under any legal enactment dealing with forest or administered as forests, whether state owned or private. In case, any portion of such land is not actually wooded but put to some agricultural use, that portion is included under the appropriate heading of cultivated or un-cultivated land.

Columns 16 and 17 cover all agricultural lands including the net area sown with crops and orchard and also the current and other fallow lands. Net area sown represents the area sown under various crops and orchards Areas sown more than once in the same year have been counted only once. Column 16 indicates extent of irrigated lands under various types of irrigation e. g. canal, tank, wells, tubewells etc and codes adopted for indicating various sources of irrigation are as under :—

Government Canal	GC
Private Canal	PC
Well (without Electricity)	W
Well (with Electricity)	WE
Tube Well (without Electricity).. ..	TW
Tube Well (with Electricity) . ..	TWE
Tank	Tk
River	R
Lake	L
Water Fall	WF
Others	O
Total	T

Column 18 gives information on culturable wastes lands and includes land available for cultivation whether or not taken up for cultivation once. Area taken up for cultivation once but not cultivated during the preceding five years or more in succession is also covered under this column. Such lands may either be fallow or covered with shrubs and jungles which are not put to any use. These lands may be assessed or unassessed and found in isolated blocks or within the cultivating holdings. Lands under thatching grasses, bamboo, bushes and other grooves for fuels etc., which are not included under orchards or forests, are included in this category. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest areas, are also included in this column.

Column 19 shows land not available for cultivation such as barren, unculturable land and land put to non-agricultural uses. All lands covered under buildings, roads, railways, rivers, canals etc. form part of the land under non-agricultural uses. Barren and unculturable lands include mountains, rocks, deserts etc. which cannot be brought under cultivation, except at a very highcost

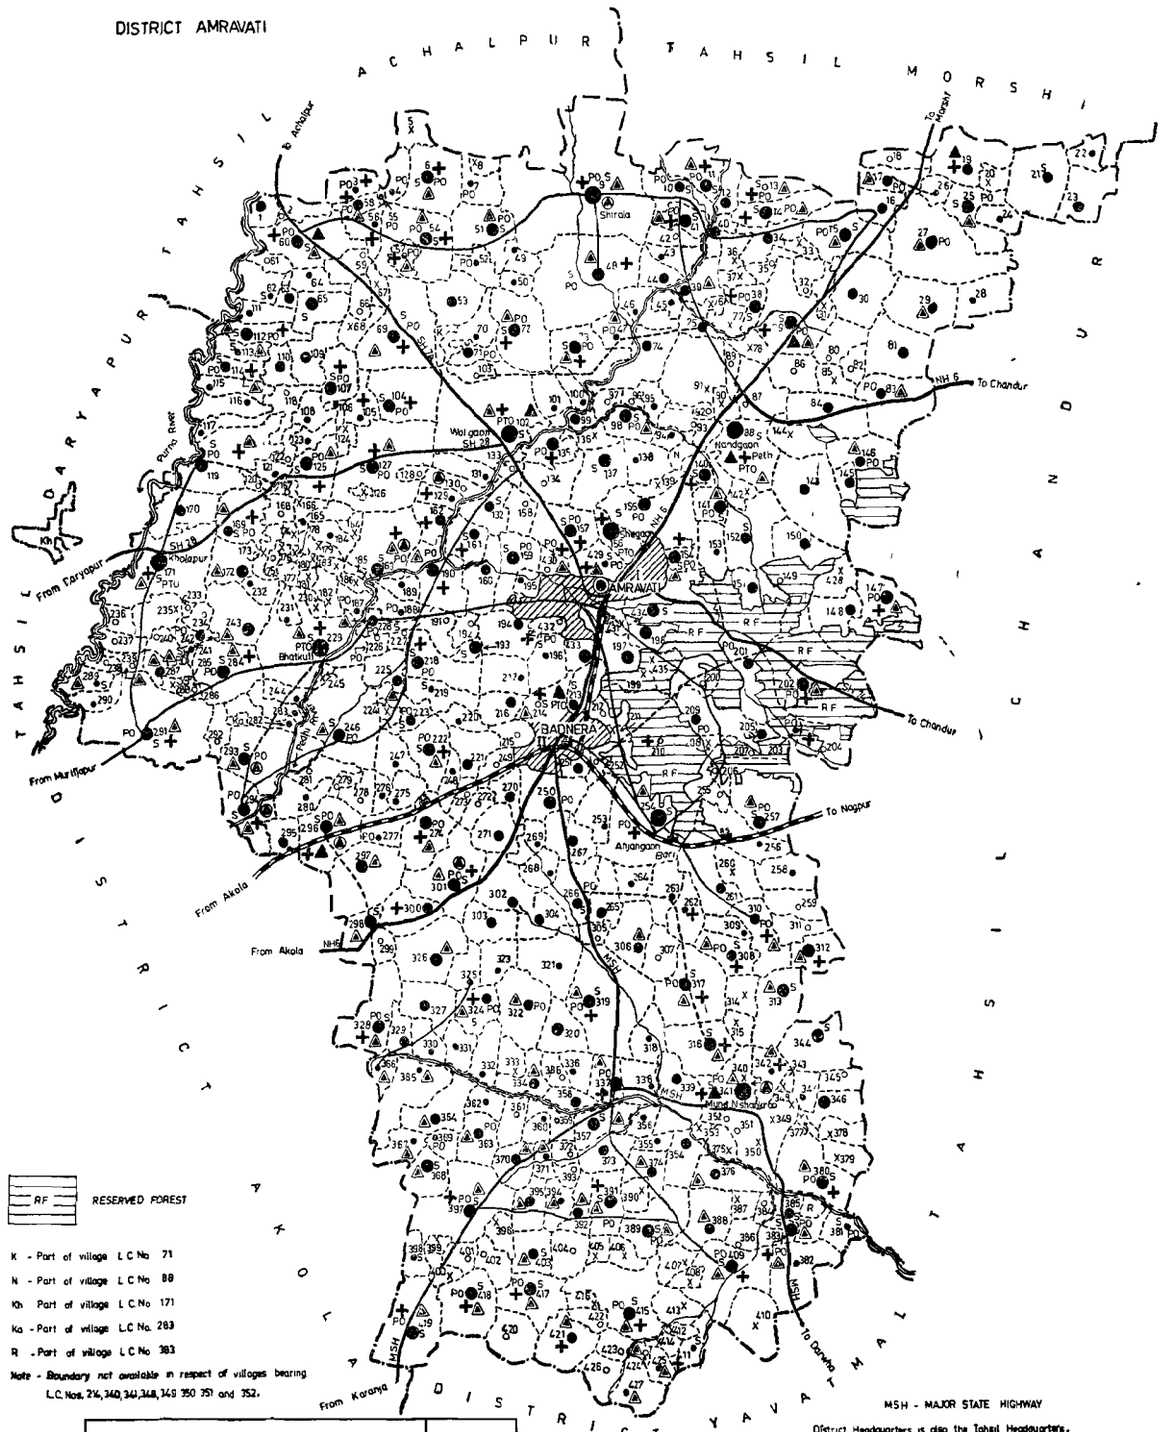

Column 20 has been filled up on the basis of local enquiry. Besides, recording the particulars of places of importance, it gives information on number of newspapers coming in the village, motor cycles/scooters, cars/jeeps and tractors available in the villages. Appropriate codes listed below have been used for presenting this information and number of items available is mentioned against the code used .—

N .. Copies of Newspapers coming in the village.
M .. Motor cycles/scooters available in the village.
C .. Cars/jeeps available in the village
T .. Tractors available in the village.
PS .. Police Station.

SECTION II

TOWN DIRECTORY

SECTION II—TOWN DIRECTORY

Note explaining the abbreviations used in Town Directory

The 'Town Directory' gives for each town the area population in 1981 and past censuses, growth rates density, sex ratio, physical aspects of towns, communications, municipal finances, civic, medical, educational and other amenities, and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. Seven statements (I to VI and IV-A) have been included for presentation of this data All the towns in the district are arranged in alphabetical order. In case of all urban agglomerations the particulars for each constituent town of agglomeration have been furnished separately, also Obviously, separate information could not be furnished in respect of outgrowths which did not qualify to be treated as independent towns. However, in all such cases asterisk mark has been placed against their names to indicate that they have outgrowths and details of their particulars have been merged with the referrent towns.

Data presented in the seven statements have largely been procured from the municipal bodies and for non-municipal towns the respective tahsildars supplied the information.

Statement I shows status and growth history of the towns in the district. Column (2) in this statement indicates class, name and civic administration status of a town (as in 1980). Class of the town indicated under this column has been introduced to facilitate the analysis of town directory data at the state and the national level. Census towns have no urban civic status Following abbreviations have been used to indicate the civic status of the town —

Municipal Corporation/Corporation	M. Corp.
Municipality	M.
Municipal Council	M. Cl.
Non-Municipal	N. M.
Cantonment Board/Cantonment ..	C. B.
Notified Area/Notified Area Committee/Notified Committee.	N. A. C.
Census Town	C. T.

Columns (7) to (15) give population and growth rate of towns since 1901 and would help in drawing the trends in their growth rate. Columns (5) (6) (16) and (17) to (19) showing area in Km^2 number of households including houseless households, density and sex ratio respectively are new additions and are expected to facilitate in analysing the town directory data both at the state and the national level.

Statement II shows physical aspects and location of each town. In physical aspects only the rainfall and temperature data as obtained from the Director-General of Meteorological Survey of India have been shown. Towns for which information could not be obtained from Meteorological Survey of India, the same has been collected locally or calculated in relation to the nearest town, to the extent possible Columns (6) to (12) have been filled up on the basis of local enquiry Distances respectively from the state, district and tahsil headquarters and the nearest city (Urban area with a population of 100,000+) would help in determining the location of a town. Communication facilities available are shown by railway station, bus route and navigable river/canal.

Statement III deals with municipal finances for the statutory and also non-statutory town bodies managing civic administration of the town provided they have separate budgets and accounts of their own.

Statement IV provides information on the civic and other amenities available in the town, Total population given under column (4) and Scheduled Castes/Scheduled Tribes population given in column (5) have been added to help in measuring amenities in respect of population size of the weaker sections of the community in the town. The information on the road length within the town shown under column (6) has been obtained from municipality (except for the highways). Codes used are :—

Pucca road	PR
Kuccha road	KR

Columns (7) to (11) reflect the information on system of sewerage, number of latrines and method of disposal of night soil.

Codes used are .—

Sewer/Sewerage	S
Open surface drains	OSD
Box surface drains	BSD
Sylk drains	SD
Cesspool method	CD
Pit system	Pt
Head Loads	HL
Baskets	B
Wheel Barrows	WB
Septic tank latrines	ST

Columns (12) and (13) indicates sources of protected water-supply to the inhabitants of the towns. The information of major source of water-supply is given in the column (12) and on major source of storage and capacity under column (13). For stating this information following codes have been used .—

Overhead Tank	OHT
Service Reservoir	SR
River Infiltration Gallery	IG
Borewell Pumping System	BWP
Pressure Tank	PT
Tubewell water/Hand pump	TW
Tap Water	T
Well Water	W
Tank Water	TK

Column (14) gives information regarding availability of fire-fighting services. In case, it is not available in the referrent town, the name of the nearest place where it is available has been mentioned and the distance from the town has also been indicated within brackets. Columns (15) to (19) pertain to the number of electricity supply connections available for domestic, industrial, commercial and road lighting points etc

The newly added Statement IV-A provides data on civic and other amenities in the notified or recognised slums of towns with a population of above 50,000 (i e. Class I and II towns)

Statement V gives information regarding availability of medical, educational, recreational and cultural facilities available in the town. 1981 population figures for each town have also been indicated and this will facilitate in analysing data on facilities available on the people.

Data on medical facilities have been obtained from the district and sub-divisional medical officers and shown under columns (4) and (5). All types of medical institutions whether allopathic, ayurvedic or homoeopathic have been covered and indicated by way of following codes :—

Hospital	H
Dispensary	D
Health Centre	HC
Family Planning Centre	FC
T. B Clinic	TB
Nursing Home	NH
Ayurvedic	A
Unani	U
Homoeopathic	Hom
Others	O

In case, more than one institution of any type is available, the exact number is shown within the brackets.

The information on educational amenities Cols. (6) to (9) is exhibited as

Arts only	A
Science only	S
Arts and Science only	AS
Commerce only	C
Arts and Commerce only	AC
Combined for all categories-Arts, Science and Commerce.	ASC
Law	L

Column (10) pertains to the number of recognized shorthand, typewriting and vocational training institutes (grouped as others) which include applied art/painting college, pharmacy college, B. Ed college, teacher's training school, music/dancing institute, nursing school, etc Various codes used for indicating this data are :—

Shorthand	SH
Typewriting	Type
Shorthand and Typewriting	Sh. Type
Others	O

Keeping in view the " Minimum Needs Programme " of the Planning Commission, the information regarding adult literacy classes/centres etc has also been collected and presented under column (15). Similarly, in view of the spurt in the employment of women in towns, information on number of working women's hostels and seats available therein has been given under column (16) This information would help in formulating plans for opening new hostels in order to meet the housing needs of the single working woman

Columns (17) to (20) show recreational and cultural facilities available in the town These include stadia, cinema, auditoria/drama, community halls, public libraries indicated as ' PL ' and the reading-rooms indicated as 'RR '

Statement VI presents information regarding trade, commerce, industry and banking services in the town. Columns (3) to (11) indicate three most important commodities imported, exported and manufactured in the town. Information on number of banks available in the town appears under column (12). Columns (13) and (14) show number of agricultural and non-agricultural credit societies respectively in each town.

STATEMENT I
