## FOREWORD TO THE D.C.H. SERIES

The District Census Handbook (D.C.H.), compiled by the Census Organization on behalf of the State Government, is one of the most valuable products of the census. The D.C.H. is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to district administration. The District Census Handbook is the only publication which provides Primary Census Abstract (P.C.A.) data upto village level for the rural areas and ward-wise for each city or town. It also provides data on infrastructure and amenities in villages and towns etc.

The District Census Handbook series was initiated during the 1951 census. It contained important census tables and P.C.A. for each village and town of the district. During 1961 census the scope of the D.C.H. was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including P.C.A. The 1971 D.C.H. series was planned in three parts. Part—A related to village and town directory, Part—B to village and town P.C.A. and Part—C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on P.C.A. and amenity data in respect of villages. However, in some states Part—C was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 D.C.H. series, some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new item of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the village in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of Scheduled Caste and Scheduled Tribe population to population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. The columns on Scheduled Castes and Scheduled Tribes population in Statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in Statement V are also added *inter alia* with this view. A significant addition is class of town in all the six statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 census.

In order to avoid delay in publication of 1981 D.C.H. series, it has been so designed that Part—A of the volume contains village and town directory and Part—B, the P.C.A. of villages and towns including the Scheduled Castes and Scheduled Tribes P.C.A. upto tehsil/town levels. At the beginning of the D.C.H. a detailed analytical note supported by a number of inset tables based on P.C.A. and non-census data in relation to the infrastructure has been introduced to enhance its value. The district and tehsil/police station/C.D. block etc., level maps depicting the boundaries and other important features have been inserted at appropriate places to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Sri M. Vijayanunni, Director of Census Operations, Kerala on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Sri N. G. Nag, Deputy Registrar General (Social Studies) of my office, Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Sri M. M. Dua, Senior Research Officer. I am thankful to all who have contibuted in this project.

New Delhi,

P. PADMANABHA,

## PREFACE TO THE DISTRICT CENSUS HANDBOOK SERIES

The District Census Handbook (D.C.H.) constitute an important set of census publications brought out by the census organization which are widely made use of by the State Government and its district level and lower officials for planning, development and administration purpose as well as by a large cross section of data users like academicians, scholars, researchers and other non-governmental agencies.

This volume presents the Village and Town Directories under Part A and the Primary Census Abstract under Part B. The Village Directory gives for each village the area, population, educational, medical, civic and other amenities, and land use. The Town Directory gives for each town the area, population, characteristics physical aspects, communications, municipal finance, educational, medical, civic and other amenities and trade, commerce, industry and banking facilities. The Primary Census Abstract presents certain other basic data like number of residential houses and households, literates, Scheduled Caste and Tribe population, workers by main categories, marginal workers and non-workers.

The data presented under Village and Town Directories were furnished by the village officers through the Tahsildars in respect of rural villages and by the Commissioners or Executive Officers concerned in respect of urban areas respectively. The data presented under Primary Census Abstract were collected during the census operations by census field organization consisting of Enumerators, Supervisors, Charge Officers and District Census Officers. Thanks are due to all these field officials who have provided the basic data required for the compilation of this volume.

The preparation of the statements and tables for this volume was undertaken in the Census Directorate of Kerala, Trivandrum by M. K. Vilasini, Statistical Assistant and S. Radhamony, M. Parvathi Ammal, E. Rahima Beevi and B. Prasannakumari, Computors under the guidance of Smt. P. M. Rugmini Amma. A. Sadasivan Achari, V. Thulaseedharan and Michael Gomez, Draughtsmen and S. Krishna Pillai, Artist drew the maps and art work. Rema Soman Junior Stenographer typed the manuscript and V. Rajasekharan Nair, Printing Inspector, P. R. Prema Kumar and Sethu Madhavan, Proof Readers attended to the printing aspects. S. P. Grover, Deputy Director wrote the preliminary draft and S. Jayashanker prepared the final draft and attended to the production of the volume at all stages. I record my appreciation for the painstaking and dedicated services rendered by all my colleagues in giving shape to this volume.

While the collection and tabulation of data and the designing, compilation and production of these District Census Handbook volumes were undertaken by the census department at its own expense, in keeping with the past practice, the State Government agreed to bear the cost of printing which is only appropriate since the State Government Departments and offices are the major users of these handbooks and the bulk of the copies are made available to them free of cost. It is hoped that all data-users will find the format and contents of the 1981 D.C.H. series convenient and useful.

Trivandrum,
July 1983.

## REFERENCE DATES ADOPTED FOR THIS VOLUME

The Village Directory and Town Directory data were gathered as on 1st October 1979 and hence relate to the position as on that date. The Primary Census Abstract (P.C.A.) data and general statistics were collected during the census operations as on 1st March 1981 which was the reference date for the 1981 census, and hence this volume presents census and statistical data on the district, taluks, villages, towns, panchayats and development blocks as per their jurisdiction on 1st March 1981 without reference to the subsequent changes, if any, in the jurisdiction of these units. However, if changes in jurisdiction had occurred in the case of any unit during the period after 1st March, 1981 an indication to that effect has been, given for information, against the administrative units concerned which have undergone changes.

# ANALYTICAL NOTE

## GENERAL

**Evolution and scope of the District Census Hand Book**

The District Census Handbook was introduced for the first time in the 1951 census. The lay-out of the volume comprised of a short account of the district and the people, important census tables, rural statistics and urban statistics separately covering details of area, houses, population, number of literates, distribution of livelihood classes, the number of institutions; and general information on amenities, etc., in respect of each village. The data for the area forming part of the present Kerala State were included in the District Census Handbooks of South Kanara and Malabar of Madras State and in the District Census Handbooks for the districts of Trichur, Kottayam, Quilon and Trivandrum of the erstwhile Travancore-Cochin State.

2. A detailed procedure was adopted for the preparation of the District Census Handbooks in the 1961 census. The District Census Handbook was divided into three parts viz. Part-A dealing with the general description of the district, progress made during the last decade, review of population, literacy, employment, unemployment, household economic data and gazetteer; Part-B covering census tables; and Part-C consisting of Village and Town Directory showing the amenities, Primary Census Abstract (PCA) and the number of industrial establishments according to type. At the time of the 1961 census, there were 9 districts in the state viz., Cannanore, Kozhikode, Palghat, Trichur, Ernakulam, Kottayam, Alleppey, Quilon and Trivandrum and for each district a separate volume was published.

3. In the 1971 census, the content of District Census Handbook was modified. It comprised of three parts—Part-A comprising of the Town and Village Directory, Part-B Village and Town Primary Census Abstract and Part-C Census tables. Of these, Parts A and B were combined and published as one volume and Part-C as another volume. The presentation of Panchayat and Community Development Block PCA was a special feature of the DCH of 1971. There were 10 districts (Cannanore, Kozhikode, Malappuram, Palghat, Trichur, Ernakulam, Kottayam, Alleppey, Quilon and Trivandrum) at the time of the 1971 census (i.e. 1st April 1971). On 26th January 1972, a new district, Idukki, was formed carving out portions of Ernakulam and Kottayam districts. To cater the needs of the data users, a special volume on Idukki was also published subsequently.

4. In the 1981 census, the District Census Handbook for each district is brought out in one volume comprised of two parts—Part-A Village and Town Directory and Part-B Primary Census Abstract. At the outset, an analytical note is given which depicts a general background on the district and the analytical results on the statements and tables included in the volume. It is hoped to serve as a useful reference book for administrators, planners and scholars.

**Village Directory**

5. The Village Directory included in this volume gives the amenities available in each village in respect of educational, medical, drinking water, markets, power supply, post and telegraph, communications, approach to villages, places of archaeological and religious interest and distribution of land use area. A consolidated abstract of all these amenities for each taluk is presented as an Appendix in Section I. Land utilisation data in respect of census towns (villages), list of villages where no amenities are available and taluk-wise list of villages according to the proportion of SC/ST population by ranges are the other appendices included in Section I.

6. The amenities available in the rural areas of the district are presented in the Village Directory. If an amenity is not available in the referent village, the distance, in broad ranges, from the nearest place where the amenity is available is given. The re-structuring of the formats for the 1981 District Census Handbook is intended to incorporate more data on infrastructural aspects in relation to amenities useful for rural planning. Some new items of information such as adult literacy centres, primary health sub-centres have been added in the present volume as compared to 1971.

**Town Directory**

7. The Town Directory data are presented in six statements in which the towns are arranged in alphabetical order within the district. These statements include status of towns (i.e. corporation, municipal, cantonment, township, non-municipal), population for the period 1901 to 1981, physical aspects, location, municipal finance, civic and other amenities, educational, medical, recreational and cultural facilities and trade, commerce, industry and banking, etc.

8. Part-B consists of the Primary Census Abstract (PCA). PCA comprises of basic population data (i.e. population, number of SC and

ST literates, workers and their categories and non-workers) upto the level of desom for rural areas and wards for urban areas. Another salient feature of the 1981 census is the introduction of an additional PCA on Scheduled Castes and Scheduled Tribes. In addition, the Community Development Block and Panchayat PCA are also presented in the DCH volumes of Kerala.

**Census Concept**

RURAL-URBAN AREAS

9. The classification of rural and urban areas adopted in census is as follows. Urban areas comprise of statutory towns and non-municipal towns (census towns). It may, however, be noted that panchayats include non-municipal towns also. The concepts of urban and rural adopted in the 1981 census are given below:

URBAN

(i) *Statutory towns*—all places with local authority like corporations, municipalities, cantonments, notified town areas, etc., irrespective of whether they satisfy the criterion laid down under item (*ii*) below:

(ii) *Census towns*—all other places which satisfy the following criteria:

(a) A minimum population of 5,000;

(b) A density of population of at least 400 per sq. km. (1,000 per sq. mile) and

(c) At least 75 per cent of the male working population engaged in non-agricultural pursuits.

10. Accordingly, in the 1981 census in Kerala, all statutory towns were treated as towns irrespective of whether they satisfied the three-fold criteria or not. The criteria were then strictly applied to all revenue villages based on the 1971 census data and all villages which satisfied the criteria were treated as Census Towns. Census Towns (Non-Municipal Towns) are places treated as towns only for the purpose of Census. In the present census, industrial category III comprising of activities like fishing, livestock, hunting, plantations and orchards etc., was treated as allied agricultural activity and was not treated as a non-agricultural occupation for the purpose of the third criterion mentioned above. Thus, the third criterion was calculated with reference to the figures for working categories IV to IX given in the Primary Census Abstract of the 1971 Census.

RURAL

11. It is rather difficult to give a precise definition for rural area. The urban areas were defined in each census and all the residuary portion is treated as rural. Since varying definitions were followed for urban areas in each census, the composition of rural areas also varied from census to census.

URBAN AGGLOMERATION

12. The concept of urban agglomerations adopted for the first time in the 1971 census was an improvement of the concept of *town group* adopted in the 1961 census. The same urban agglomeration concept has been continued in the 1981 census. An Urban Agglomeration is a continuous urban spread consisting of a town and its adjoining urban outgrowths or two or more physically contiguous towns together with continuous well-recognized urban outgrowths, if any, of such towns. For example, around a core city or statutory town there might have come up sizable and well-established urban appendages like railway colonies, university campuses, ports, military camps, etc., which are part of a continuous urban spread though outside the statutory limits of the core city or town. While such outgrowths will fall in the adjoining revenue village, it will not be realistic to treat such urban outgrowths as rural units. At the same time each such individual area by itself may not satisfy the minimum population limit to qualify to be treated as an independent urban unit. Such areas deserve to be reckoned along with the core town and the continuous urban spread including the core town and such urban outgrowths are treated as an urban agglomeration. The constituents of an urban agglomeration should satisfy the conditions of urbanisation, contiguity and viability. These are the general principles based on which urban agglomerations are formed.

13. The following are the possible different situations in which urban agglomerations would be constituted:

(i) A city or town with a continuous growth which is outside the statutory town limits but coming within the boundaries of the adjoining village or villages.

(ii) Two or more adjoining towns with their outgrowths.

(iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

14. The area constituting an urban agglomeration may keep on changing from census to census depending upon the changing boundaries of the statutorily notified main urban unit as well as the extent of other urban outgrowths. However, only those areas which are actually contiguous are treated as part of an agglomeration and not areas which are not contiguous now but which are expected to form a continuous urban spread some time in the future. The intention in delineating the urban agglomeration is to take into account the present urban spread only. (The potentiality of development of urban growth in the next decade or two is covered separately under the concept of *Standard Urban Area*).

15. Urban Agglomerations were formed for the first time in Kerala in the 1981 census. There is no urban agglomeration in this district.

STANDARD URBAN AREA

16. Another concept developed in the 1971 census for tabulation of census data was that of the standard urban area. The essential requirements of a Standard Urban Area are :

*(i)* It should have a core town of a minimum population size of 50,000 ;

*(ii)* The contiguous areas made up of other urban as well as rural administrative units should have close mutual socio-economic links with the core town, and

*(iii)* The probabilities are that this entire area will get fully urbanized in a period of two to three decades.

The intention was if data for the standard urban area were to be made available upto 1991, it is likely to yield much more reliable and meaningful picture to study urbanization around large urban nucleii. In the 1971 census, 13 standard urban areas were formed in the state. All these SUAs continued in the 1981 census. Details of SUA are available in Part II-A—General Population Tables.

CENSUS HOUSE

17. A census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

HOUSEHOLD

18. A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. Examples of unrelated households are boarding houses, messes, hostels, residential hostels, rescue-homes, jails, ashrams, etc. These are called 'Institutional households'. There may be one member households, 2 member households or multi-member households. For census purposes, each one of these types is regarded as a 'household'.

**Scheduled Castes and Scheduled Tribes**

19. The 1956 order was amended by the Scheduled Castes and Scheduled Tribes orders (Amendment) Act, 1976 (No. 108 of 1976) and it was this revised list which was adopted in the 1981 census. The revised list is given below:

SCHEDULED CASTES

1. Adi Andhra (ആദി ആന്ധ്ര)
2. Adi Dravida (ആദി ദ്രാവിഡ)
3. Adi Karnataka (ആദി കർണ്ണാടക)
4. Ajila (അജില)
5. Arunthathiyar (അരുന്ധതിയാർ)
6. Ayyanavar (അയ്യനവർ)
7. Baira (ബൈര)
8. Bakuda (ബകുഡ)
9. Bandi (ബാൻഡി)
10. Bathada (ബതട)
11. Bellara (ബല്ലാര)
12. Bharatar (ഭരതർ)
13. Boyan (ബോയൻ) [excluding the areas comprising the Malabar district as specified by sub-section (2) of section 5 of the States Reorganisation Act, 1956 (37 of 1956)]

SCHEDULED TRIBES

1. Adiyan (അടിയാൻ)
2. Arandan (അരണ്ടൻ)
3. Eravallan (ഇരവാലൻ)
4. Hill Pulaya (ഹിൽ പുലയൻ)
5. Irular, Irulan (ഇരുളർ, ഇരുളൻ)
6. Kadar (കാടർ)
7. Kammara (കമ്മാര) [in the areas comprising the Malabar district as specified by sub-section (2) of section 5 of the States Reorganisation Act, 1956 (37 of 1956)]
8. Kanikaran, Kanikkar (കാണിക്കാരൻ, കാണിക്കാർ)
9. Kattunayakan (കാട്ടുനായ്ക്കൻ)
10. Kochu Velan (കൊച്ചു വേലൻ)
11. Konda Kapus (കൊണ്ട കപ്പുസ്)
12. Kondareddis (കൊണ്ടറെഡ്ഡി)
13. Koraga (കൊരഗ)
14. Kota (കൊടാ)
15. Kudiya, Melakudi (കുടിയ, മേലക്കുടി)
16. Kurichiyan (കുറിച്ചിയൻ)
17. Kurumans (കുറുമൻ)
18. Kurumbas (കുറുംബാസ്)
19. Maha Malasar (മഹാമലസർ)
20. Malai Arayan (മല അരയൻ)
21. Malai Pandaram (മല പണ്ടാരം)
22. Malai Vedan (മല വേടൻ)
23. Malakkuravan (മലക്കുറവൻ)
24. Malasar (മലസർ)
25. Malayan (മലയൻ) [excluding the areas comprising the Malabar district as specified by sub-section (2) of section 5 of the States Reorganisation Act, 1956 (37 of 1956)]
26. Malayarayar (മല അരയർ)
27. Mannan (മന്നാൻ)
28. Marati (മാരാട്ടി) (in Hosdurg and Kasaragod taluks of Cannanore district)
29. Muthuvan, Mudugar, Muduvan (മുതുവാൻ, മുഡുഗർ, മുഡുവൻ)
30. Palleyan (പളളെയൻ)
31. Palliyan (പള്ളിയൻ)
32. Palliyar (പള്ളിയർ)
33. Paniyan (പണിയൻ)
34. Ulladan (ഉള്ളാടൻ)
35. Uraly (ഊരാളി)

20. Substantial changes have occurred in the 1981 list as compared to the 1971 list by way of addition of new castes/tribes which satisfy the prescribed criteria, deletion of certain castes/tribes which do not satisfy the criteria, transfer from the caste list to the tribe list and *vice versa*, removal of area restrictions, etc. The following are the changes between the lists adopted in the 1971 census and 1981 census.

*(i)* 7 Scheduled Castes (Boyan, Chakkiliyan, Kuravan or Sidhanar, Nayadi, Pallan, Paraiyan or Parayan or Sambavar and Valluvan) and 6 Scheduled Tribes (Irular or Irulan, Kadar, Kammara, Malayan, Marati and Muthuvan or Mudugar or Muduvan) have no change in the areal restrictions from 1971 to 1981 while the remaining 61 Scheduled Castes and 29 Scheduled Tribes have undergone changes in areal jurisdiction as per the revised list.

*(ii)* In the lists of SC and ST adopted in the 1971 census, 'Ulladan' was a Scheduled Caste and 'Ulladan (Hill dwellers)' was a Scheduled Tribe. As per the revised list, Ulladan has been deleted from the SC list and the name of the tribe 'Ulladan (Hill dwellers)' has been changed as 'Ulladan'.

*(iii)* Uraly was a Scheduled Caste as well as a Scheduled Tribe in 1971. But Uraly has now been deleted from the list of SC and retained only under ST.

*(iv)* 2 Scheduled Tribes viz. Malayakandi and Vishavan which had no population in 1971 have now been deleted from the list of ST.

*(v)* While 'Pulayans' came under both SC and ST in 1971, they no longer come under ST as per the 1976 revised list and are only SC.

21. On a comparison of the figures of SC and ST for 1971 with those of 1981, it can be seen that the deletion of Pulayan from the list of Scheduled Tribes and the removal of the area restriction for Pulayan under SC have resulted in a substantial fall in the ST population and increase in the SC population in the state, especially in the erstwhile Malabar region.

**Literacy**

22. A person who can both read and write with understanding in any language was taken as a literate. A person could merely read but could not write was not a literate. It was also not necessary that a person who was a literate should have received any formal education or should have passed any minimum educational standard. All children below the age of 4 years or less were treated as illiterates, even if they are school-going children and might have picked up reading and writing a few odd words.

**Economic questions in the 1981 Census**

(A) QUESTIONS IN THE INDIVIDUAL SLIP (UNIVERSAL)

23. Following are the economic questions in the Individual Slip (Universal) which were canvassed in all areas and filled up for all individuals at the time of the 1981 census.

Q. 14A. Worked any time at all last year ?

Yes

No (H/ST/R/D/B/I/O)

Q. 14B. If yes in 14A, did you work for major part of last year ? Yes (1) No (2)

Q. 15A. Main activity last year ?

Yes in 14B (C/AL/HHI/OW)

No in 14B (H/ST/D/R/B/I/O)

If HH1/OW in 15A

*(i)* Name of establishment

*(ii)* Description of work

*(iii)* Nature of industry, trade or service

*(iv)* Class of worker

Q. 15B. 14B Yes—Any other work any time last year ?

Yes (C/AL/HHI/OW)/No

14B No—Work done any time last year ?

(C/AL/HHI/OW)

If HHI/OW in 15B

*(i)* Name of establishment

*(ii)* Description of work

*(iii)* Nature of industry, trade or service

*(iv)* Class of worker

Q. 16. If No in 14A or 14B, seeking/available for work ?

Yes (1)/No (2)

(B) QUESTIONS AND THEIR IMPLICATIONS

24. The first question 14A in 1981 is intended to divide the population into two basic streams based on a liberal definition of work. Work was defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involved not only actual work but also effective supervision of work. The reference period was the preceding one year. Question 14A was intended to find out whether a person had done any work at all during the last year or whether he did not work at all and if it was the latter, how the person spent his time as a non-worker. The question was expected to net all workers irrespective of the quantum of their contribution to economic activity. In other words, full-time workers, part-time workers and marginal workers were netted by this question. This question also gave the number of persons who belong to the non-worker category of H(Household duties), ST(Students), D(Dependents), R(Retired or rentier persons), B (Beggars, vagrants, etc.), I (Inmates of institutions) and O (Other non-workers) recorded in Question 14A, to ascertain whether the person had worked for the major part of the year. All persons who had worked for 183 days or six months or more were treated as having worked for the major part of the year. Question 15A was intended to elicit information on the details of the main activity (working or non-working) in which he was engaged during the major part of the year. In Q. 15B, details of secondary work, if any, for workers (Yes in 14B) and marginal work for all persons did not work for the major part (No in 14B) were collected. Q. 16 i.e. 'seeking work or available for work' was asked of all persons who had no work at all for the entire year (No in Q. 14A) and no work during major part of the year (No in 14B). In order of the questions was designed after a pilot study (in 1978) and two pretests (in 1978 and 1979), the intention being to net all full-time workers marginal workers, persons having secondary work and persons seeking or available for work.

25. The concepts of main workers, marginal workers and non-workers are briefly indicated below:

*(i) Main workers* : The main workers are those who have worked for major part of the year preceding the enumeration. In other words, those for whom the answer would have been 'yes' in Q. 14A and 'yes (1)' in Q. 14B of the Individual Slip (Universal) are categorised as main workers. Workers are further divided into cultivators, agricultural labourers, those engaged in household industry and other workers based on the information available in Q. 15A.

*(ii) Marginal Workers* : Marginal workers are those who have worked any time at all in the year preceding the enumeration but have not worked for the major part of the year. In other words marginal workers would be those for whom the entry in Q. 14A of the Individual Slip (Universal) is 'yes' and the entry in Q. 14B of the slip is 'No (2)'. The type of the work in which the marginal workers were engaged is collected through Q. 15B of the Individual Slip (Universal) but at this stage data on such marginal workers have not been generated.

*(iii) Non-workers:* Non-workers are those for whom the answer is 'No' in Q. 14A of the Individual Slip (Universal). They are persons who have not worked any time at all in the year preceding the enumeration period.

*(iv) Work-participation rate* : The term 'work-participation rate' used in this census refers to the proportion of workers to total population and *not* the proportion of the labour force to total population, though the latter is often the conventional usage. This distinction has to be noted while referring to the figures given in this volume. Again, as per the definitions of main workers, marginal workers and non-workers, these are exclusive categories and hence if the number under the 3 categories are added together one will arrive at the total population itself.

(C) RELATIONSHIP WITH THE INDUSTRIAL CATEGORIES ADOPTED IN THE 1981 AND 1971 CENSUS

26. The correspondence of the respective categories of workers in the 1981 and 1971 censuses for the presentation of PCA in the 1971 census are given below :

| *1981 Census* | *Related industrial category adopted in the 1971 Census* |
|---|---|
| Cultivator (C) | Category I |
| Agricultural Labourer (AL) | ,, II |
| *Household Industry (HHI)* | ,, V(a) |
| Other workers (OW) | ,, III, IV, V(b) and VI to IX |

## INTRODUCTION TO THE DISTRICT

27. Alleppey, the smallest district in the State was formed on 17th August, 1957. It is bounded on the north and north-east by Ernakulam district (Kanayannur) and Vaikom taluk, on the east by Kottayam district (Kottayam and Changanacherry taluks) and Quilon district (Pathanamthitta taluk) on the south by Quilon district (Karunagappally and Kunnathur taluks) and on the west by the Lakshadweep sea. It lies between north latitude 9°05″ and 9°52″ and east longitude 76°17″ and 76 48″. It consists of seven taluks viz., Shertallai, Ambalapuzha, Kuttanad, Thiruvalla, Chengannur, Mavelikkara and Karthigappaly.

**Brief history of the district**

28. Alleppey is an anglicised form of Alapuzha, which means the 'land between the sea and the river'. The inland waterways through backwaters and canals provided cheap mode of transport in the region and thereby Alleppey flourished as a major commercial centre for the past few centuries.

29. The history of the district is obscure. There is no clear evidence about the palaeolithic age. Even though the pre-historic period of Alleppey district is not known, some old relics remniscent of that age are found in some areas of Thiruvalla, Kadapara and Kodukulanji. Some archaeological antiquities in the form of architecture, inscriptions, mural paintings, historical monuments etc., are found in the temples, rock-cut caves, churches etc., show clear picture about the historic period. The Kaviyur cave temple of Pallava style of Architecture and the stone image of Buddha (Karumadikuttan) at Karumadi of Ambalapuzha taluk are some of the earliest specimen of stone sculpture supposed to be in 7th to 9th century A.D. The inscriptions engraved on the central shrine of Kaviyur temple depicts details of the area in the Kali era of 4051 and 4052. The inscriptions in the Subramania Swami Temple, Haripad mention about Raman Adicha Varman, an eminent ruler of Odanad and his predecessors. There are some epigraphical records assigned to post-Portuguese period in the Roman Catholic Church at Pallipuram of Shertallai taluk and the Orthodox Syrian Church at Niranam. A bronze statue of archaeological interest of Perumal Pallivanavar, a legendary Chera king, is kept outside the Bhagavathy temple at Neelamperoor in Kuttanad taluk.

30. It is significant to note that Pliny, the famous traveller of the first century A.D. had described in his famous book 'Pereplus' about Purakkad (Barace), Niranam (Neleynda), river Pamba (Baris) and about the exporting pepper supplied from Kuttanad, Chengannur, Thiruvalla, and Ambalapuzha. Christianity had a strong foot-hold in the district from the middle of the first century. In 52 A.D. St. Thomas, the Apostle landed at Maliankara and he founded seven churches in the Malabar coast, two of which have been located at Pallipuram and Niranam. The early Cheras known as 'Kuttuvans' had their headquarters at Kuzhumoor in Kuttanad, the north-eastern part of the district, while south-eastern portions upto Thiruvalla was ruled by the Aykingdom with their headquarters at South Travancore.

31. In the Sangam age (the first five centuries) the district formed part of Kuttanad. From 9th to 12th Century A.D. the present Alleppey district formed part of Odanad and Nanthuzainad of the second Chera empire which had its capital at Mahodayapuram. Odanad had its capital at Kandiyurmattom (Mavelikkara) and later it was shifted to Eruva on the outskirts of Kayamkulam. The Kandiyur inscriptions in the Vattezhuthu alphabets in the old Malayalam language of Ravi Kerala Varma signifies the chief of Odanad, Ramakotha Varma of 13th century. It has been mentioned that the famous poem 'Unninilisandesam' was composed by Iravivarma, a ruler of Odanad, in 14th century. The inscriptions in the old Malayalam language recorded in the Vishnu temple at Thiruvanvandoor by Srivallabhan Kotha, the then ruler of Venad signifies the local assembly of three hundred (Munnuttuvar) of Nanuthuzhainad of 10th century A.D. Thiruvalla and Chengannur taluks were part of Nanthuzhainad. Later it was merged to Odanad and subsequently with Thekkumkur.

32. It is worth mentioning that in the 9th century A.D. the district had flourished in the field of culture and literature. One of the famous literary work was 'Ascharya Choodamani' a drama in Sanskrit composed by Sakthibhadra a brahmin scholar of Chengannur. The famous Niranam poets and Rama Panicker known as 'Kannassan' who have made great contributions to Malayalam literature also belonged to this district. During 15th Century A.D. after the shifting of capital to Kayamkulam Odanad was known as Kayamkulam. The other principalities of that period were Chempakasseri (often known as Purakkad or Ambalapuzha) comprising the

present Ambalapuzha taluk and portions of Kuttanad taluk while Karappuram (present Shertallai taluk) consisted of Muthedeth and Iledath.

33. In the 16th century Purakkad came under the political influence of the Portuguese as a result of the treaty signed by the Purakkad Raja to escape from the repeated attacks of the Portuguese. From this time onwards, Christianity became popular in Purakkad and the neighbouring principalities. They were permitted to build churches in various parts of the district. Among them, the churches of Arathungal, Purakkad and Kudamalur were most important. During this period Chempakassery kingdom flourished in the field of literature and learning. The kingdom was in its zenith during the reign of Pooradam Thirunal Devanarayana who was a famous scholar. His famous work is 'Vedantharatnamala' which is a commentary on the first verse of Bhagavatgeetha. His court was patronised by the famous scholars Melpathur Narayana Bhattathiri, Shri Nilakanta-Dikshithar and Shri Kumaran Namboothiri, the famous architect and the author of 'Silparatna'.

34. In the 17th century the power of the Portuguese declined and the Dutch came into prominence especially in the coastal areas of the district. In 1663 Dutch captured Cochin. As a result of the treaty signed by the Dutch Company and Raja of Purakkad the Dutch assisted the Raja in the local wars and in turn the Raja allowed to build a factory at Purakkad for trading pepper and ginger obtained from these principalities. The Dutch Company then came into contact with Kayamkulam and another treaty was also signed. They built a warehouse at Kayamkulam for storing pepper by the consent of the Raja. The treaty which were signed for pepper trade made the Dutch to have a key position in the political affairs of the region at the beginning of the 18th century. The interference of the Dutch in the cultural affairs of the principalities resulted in enmities between the chieftains of the principalities.

35. Marthandavarma Maharaja, the maker of modern Travancore played a remarkable role in the history of the state. With a view to expand his kingdom, he interfered in the politics of these principalities and was forced to attack Kayamkulam. After a war of 68 days, Kayamkulam was surrendered and the treaty of Mannar was signed. Before 1750 the principalities of Purakkad, Thekkumkur and Vadakkumkur were annexed. In 1753, Karappuram became part of Travancore. After the annexation of these northern principalities the Maharaja of Travancore gave patronage to the development of these areas, particularly Mavelikkara where he constructed warehouses (pandakasalas) and established some important offices. The construction of Krishnapuram palace (which is a protected monument of the State department of Archaeology) is also worth mentioning.

36. During the reign of Dharmaraja, a notable event was the invasion of Tippu Sultan and Travancore made alliance with the East India Company. A public road was opened from Purakkad to Quilon via., Kirshnapuram Rajakesava Das, the then Dewan of Travancore known as the 'maker of modern Alleppey' opened a new port at Alleppey and gave all facilities for traders from far and near. Several roads and canals were constructed for easy transportation. Veluthampi Dalava also took keen interest to develop Alleppey by constructing network of roads. The revolt led by Veluthampi Dalava against the British took place mainly at Alleppey. Pandalam was annexed to Travancore in early 19th century during the reign of Rani Parvathy Bai.

37. During 19th and 20th centuries this district attained progress in administrative, economical and educational spheres. This district is proud of having eminent scholars and workers in various spheres, culture, art and literature. Many English medium schools were opened at various places in this district. One of the five subordinate courts opened in connection with the re-organisation of the judicial system of Colonel Munro was located at Mavelikkara. This district is credited by the functioning of the first post office at Alleppey in the erstwhile Travancore state in 1857. The first factory on manfuacture of coirmats and mattings was established by Mr. James Durragh, an American in 1859. A town improvement committee was set up in 1894.

38. Under the leadership of Shri T. K. Madhavan and Sahitya Panchananan P. K. Narayana Pillai, the district had an important role for the eradication of untouchability. They had made contacts with Mahathma Gandhi and other freedom fighters. After the Belgaum Congress in 1924 and Vaikom Satyagraha in 1925, the approach roads to the temples of the district, especially in Ambalapuzha Sreekrishna Swami Temple were thrown opened to Hindus of all castes. The people in the district were deeply involved in the 'Nivarthana' agitation of the district led by Shi P. K. Kunju.

39. Alleppey district had its own contribution to the freedom struggle. The first political strike in Kerala took place at Alleppey in 1938. The political reforms of Sir C. P. Ramaswamy Iyer were opposed by the public. The historic violent struggles of Punnapra and Vayalar in 1946 and the oppressive measures of Sir C. P. Ramaswamy Iyer stiffened the attitude of the people against him. Ultimately he has to relinguish the post of Dewan.

40. After India became independent, the popular ministry was installed in Travancore on 24th March 1948 on 1st July 1949 Travancore and Cochin were integrated and the Maharaja of Travancore became the Rajpramukh of Travancore-Cochin state and this position continued till the formation of Kerala state on

106/727—10

1st November 1956. On 1st October, 1956 many changes were made at the taluk and village levels. Kuttanad and Chengannur were newly formed on 1st November 1956, the re-organization day.

**Jurisdictional changes since 1956**

41. The area presently comprising of Alleppey district was carved out of Quilon and Kottayam districts of 1951 census on 17th August 1957 corresponding to new year day of 1133 M.E. Some outlying pattom enclaves were merged with the district in 1959. Except for the transfer of Srayikad and Azheelkalthura karas of Puthuppally village of Karthigappally taluk of this districts to Perinad village of Karunagappally taluk of Quilon district, there was no change in the administrative boundary of the district during the decade 1961-71. The only jurisdictional change in the decade 1971-81 was the renaming of Chennamkary village of Kuttanad taluk as Kavalam village which was effected as per the notification No. G. O. (Rt.) 68/73/RD, dated 24th January 1973.

**Administrative units**

42. While discussing the Administrative units, it is necessary to explain the two systems of administrative set-up. Under the revenue system the district is divided into revenue divisions, taluks and further into revenue villages and their constituent units known as karas. However, for local administration, the district is divided into statutory towns and Panchayats. For the implementation of development activities, panchayats are grouped into community development blocks. Therefore, all these units viz., taluks, village, kara, statutory town, community development block and panchayat have their own relevance and importance. This handbook contains data for all these units.

43. This district comprises of two revenue divisions viz. Alleppey division consisting of Shertallai, Ambalapuzha, Kuttanad and Karthigapplly taluks and Chengannur division consisting of Thiruvalla, Chengannur and Mavelikkara taluks. There are altogether 99 villages distributed in the 7 taluks of this district as given below:

TABLE 1

**VILLAGES AND TOWNS AS ON 1st MARCH 1981**

**Topography**

44. Alleppey district is a sandy slip of land intercepted by lagoons, rivers and canals. This district is divided into two natural divisions viz., midland and lowland. Shertallai, Ambalapuzha, Kuttanad and Karthigappally taluks lie in the lowland region and Thiruvalla, Chengannur and Mavelikkara lie in both the midland and low land regions. There are no mountains or hills in the district except a few rocky formations in the eastern portion of Chengannur and Thiruvalla taluks.

(a) River system

45. The important rivers flowing through this district are Manimala, Achankovil and Pamba.

*(i) Manimala river*

46. Originating from the Mathevara hills in Peermade taluk at an altitude of about 1219 m. above mean sea level Manimala river flows through Kanjirappally taluk and enter into the district at Maveli desom where it turns westward upto Vellavur and then flows southwardly upto Vennikulam and south-westerly upto Valanjavattam where it joins with Pamba river. A branch of this river flows through Kavumbhagom and joins the Pamba river at Muttar. This river passes through Kottangal, Mallappally, Anicad, Kallooppara, Thiruvalla, Kavumbhagom, Thalavadi and Muttar. The total length of the river is 57 km. and are navigable to a length of 34 km. of which motor boat can ply for a length of 20 km. It has a catchment area of 310 sq. km. and an annual run off of 2058 mcm.

*(ii) Achankovil river*

47. The Achankovil river also known as Kulakkada river passes through Karthigappally, Mavelikkara and Chengannur taluks. It is formed by the confluence of several streams originating from Pasukidamettu, Ramakkal Teri and Rishimalai of Quilon district. Achankovil river enter into this district at about 5 kms. west of Kaippattur. Then it flows westwardly to reach Chennithala and takes south-westerly direction till it joins Pamba river at Veeyapuram of Karthigappally taluk. It passes through Pandalam, Thonnallur, Noornad, Thazhakkara, Chennithala, Thriperumthura, Pallipad and

Veeyapuram. The length of the river till joins with Pamba is 128 km. and has a catchment area of 1155 sq. km. with an estimated run off of 2152 mcm. It is navigable upto 32 kms. from the mouth of the river.

*(iii) Pamba river*

48. Pamba, the third longest river in the state, is formed by several streams originating from Pulichimala, Nagamalai and Sundaramalai in the Peermade plateau at an altitude of about 1676 m. above mean sea level. The main tributaries of the river are Kakki Aar, Arudai Aar, Kakkad Aar and Kall Aar. This river enteres into the district at Thottapuzhasseri. At Pandanad it bifurcates and one branch flows south-westerly in which Manimala river joins. The other branch takes its course westward and it again bifurcate and flows around Parumala where Achankoil river joins with it. Then it flows northward and empties into Vembanad lake at Kainakary and Pulincunnu villages through several branches such as Pallathurthi Aar, Nedumudi Aar, Muttar etc. The river passes through Aranmula, Chengannur, Pandanad and Veeyapuram. The river is navigable for 73 km. in which motor boat can be used for 42 kms. from the mouth. The maximum length of the river is about 177 km. with a total drainage area of 1976 sq.km. and an annual run off estimated as 6309 mcm.

(*b*) BACKWATERS

49. Vembanad and Kayamkulam are the two important backwaters of the district. Stretching between Alleppey and Cochin, Vembanad lake borders Kanayannur and Cochin taluks of Ernakulam district, Shertallai, Ambalapuzha and Kuttanad taluks of Alleppey district and Changanacherry, Kottayam and Vaikom taluks of Kottayam district. It covers an area of 204 sq. km. with a length of about 84 km. and an average width of about 3.2 km. Five important rivers viz. Pamba, Achankoil, Manimala, Meenachil and Muvattupuzha discharge itself into this lake. The Vembanad lake is a part of the Alleppey section which is the most important area of the west coast canal system. There is a beautiful island filled with coconut plantation and luxuriant vegetation in the centre of the lake known as 'Pathiramanal' or 'mysterious sand of midnight'. Pallipuram and Perumpallam are the other two islands in the lake. The Thanneermukkam regulator, the largest mud regulator of its kind in India is constructed across the neck of Vembanad lake between Thanneermukkam and Vechur to prevent tidal action and intruision of saline water into the lake.

50. Extending from Panmana to Kanthigappally with an area of 59.52 sq. km. Kayamkulam lake has a length of 30.5 km. and an average breadth of 2.4 km. This shallow lake is connected with Ashtamudi lake by Chavara-Panmana thodu. Kayamkulam bar is an open outlet to the sea.

**Canals**

51. This district is intersected by a net work of canals. Apart from the west-coast canal system this district have many inland canals which are used for navigation and for commercial purposes.

**Sea-coasts**

52. Alleppey district has a flat and unbroken sea-coast of 82 km. in length. An interesting phenomenon of this sea coast is the shifting of mud bank towards the end of June when the level of the back waters rise by the high monsoon discharge of swollen rivers. This mud bank shifts its position from year to year along the Alleppey-Purakkad coastal region within 25 km. from Alleppey and the region is busy with large-scale fishing activities.

**Climate**

53. The district has a hot and humid climate along its coastal areas and slightly cooler and drier climate in its interior. As elsewhere in the state this district has four seasons, the dry weather December to February, hot weather from March to May, south-west monsoon from June to September and the retreating or north-east monsoon from October and November.

54. The average annual temperature of this district varies approximately between 21·7° to 31.9° c. The highest temperature recorded during 1976-79 at the Alleppey observatory was 33.5° c in the month of April 1979 while the lowest was 21·7°c in the month of December 1976. As in the rest of the state, this district also gets the benefit of two outstanding monsoons viz. south-west monsoon and the north-east monsoon. The south-west monsoon locally known as '*Edavapathy*' starts by the end of May or by the early days of June and lasts till September. The north-east monsoon, locally known as '*Thulavarsham*' occurs during October and November. Intermittant rains also occur in other seasons. The average normal rainfall in the district is 3,012.2 mm. There are large variations in the average rainfall from year to year as is observed from the annual rainfall figures viz. (1960—3,635.3 m.m, 1970—2,271.3 mm., 1976—1,562.4 mm., 1977—2,449.6 mm. 1978—1,817.5 mm.). The district benefits considerably from the south-west monsoon (51.73 per cent in 1976, 49.39 per cent in 1977, 56.59 per cent in 1978 of the total annual rainfall).

**Forests**

55. There is a very small area (in Perumpatty village of Thiruvalla taluk) under forests in this district and this forms a small portion of Valiakavu Reserve of Ranni range of Ranni Forest division.

**Soils**

56. The important soils of this district are sandy, peaty, alluvial and laterite. The sandy soils are found in the western portion of

Shertallai, Ambalapuzha and Kuttanad taluks. These type of soil is deficient in major plant food and water holding capacity and can be improved by the addition of organic matter. It is slightly acidic. Coconut is mostly grown in the soil. *The peaty or kari soil occurs as a small belt on* the eastern region of Shertallai and Ambalapuzha taluks and western portion of Kuttanad taluk. Peculiar in formation it is clay soil with poor aeration and drainage. It is characterised by deep black colour, high content of organic matter and strongly acidic. Rich in nitrogen and Potash, it is deficient in Phosphates and lime. Due to the formation of sulphuric acid, iron and Aluminum sulphate this soil is noted for its poor *fertility and low yields. The alluvial soil occurs* in the residuary portions of Kuttanad, north-eastern portion of Karthigappally taluk, western region of Thiruvalla and Chengannur taluks and north-eastern region of Mavelikkara taluk. It is mostly found in the deltaic regions of three rivers, Manimala, Achankoil and Pamba. It is heavy in texture consisting of fine silt and is subject to the periodic inundation of salt water. It has a high content of organic matter, nitrogen and potash and is very deficient in phosphate and lime. This soil is suitable for growing paddy, sugarcane etc. The laterite soil is found in the major portions of Thiruvalla, Chengannur and Mavelikkara taluks. It is formed by weathering of acidic rocks under alternate wet and dry tropical conditions. This type of soil is characterised by vesicular structure and accumulation of hydrated oxides of iron and aluminium. Most of bases and silica have been removed by drastic leaching. Near the waterfall the soil is soft and can be cut into blocks which hardens on exposure. This is used for building purposes. This soil is not fertile in natural condition. On fertilisation the soil is suitable for growing coconut, arecanut, pepper etc.

**Geology and economic minerals**

57. In Alleppey district the geological formation can be classified into four distinct categories:

*(i)* a belt of crystalline rocks of archean group

*(ii)* a belt of residual laterites

*(iii)* a narrow belt of warkalli beds of tertiary group

*(iv)* a western most belt of recent deposits

All these belts are orientated more or less in a north-south direction. Charnockite is the most prevalent crystalline rock in the district. Residual laterite which is the resultant product of the *insitu* alteration of crystalline rocks, occurs as a zone west of the crystalline rocks. Warkalli beds (tertiary formation) consist of a succession of variegated clays and sand stone, at times carrying lignitic material. The coastal belt of recent deposits include marine, lacustrine and alluvial deposits. Glass and foundry, sand and lime shell are the only two minerals which occur in large quantities in the district and are commercially exploited. The sand deposits occur between Shertallai and Alleppey town. The area forms a line stretching 35 km. along the western side of Vembanad lake. Sand is being mined and transported to glass factories. White sand mixed with lime powder is being used in the Pallathara Bricks and Tiles Ltd., at Pallipuram for the manufacture of sand bricks. Vast deposits (estimated to be 20 to 25 lakh tons) of lime shell occur in Vembanad lake, near Muhamma over an area of 15 sq. km. These deposits are being mainly exploited by Travancore Cements Ltd., at Kottayam, Pallathara *Bricks and Travancore Electro-Chemicals and* also in small quantities by a number of lime shell co-operatives in Alleppey and Kottayam districts. Chengannur is a traditional place of stone cutting and stone carving.

**Agriculture and land use**

58. The production of rice in the state is mainly concentrated in Kuttanad area of the district and hence Alleppey district is known as the 'rice bowl' of the state. In the early decades of 19th century paddy cultivation in a large scale was attempted, in the vast area reclaimed from Vembanad lake. The various experiments proved the feasibility of annual cultivation which was started in early 20th century. Only one crop called Punja crop is possible in these areas after pumping out water from the padasekharam. This punja cultivation starts in September-October and harvests in January. More than 50 per cent of the total area under punja cultivation is in this district. The construction of Thottappally Spillway and the salt water barrier at Thanneermukkam and construction of permanent bunds helped to bring down floods and intrusion of salinity and there is some improvements in paddy cultivation. In recent years a second crop is attempted in the eastern portion of Kuttanad during April-September called Kulappala cultivation. In Onattukara region comprising of Karthigappally taluk and portions of Mavelikkara taluk, paddy is produced under the two crops viz. Virippu or Kanni crop associated with autumn season and mundakan crop associated with winter season. After the second crop it is usual to cultivate gingely and this area is well known for gingely crop. Two Rice Research stations one at Mancompu in Kuttanad and other at Kayamkulam are working for the improvement of rice cultivation.

Coconut is the next important cultivation in this district. This district ranks second among the districts of Kerala in the production of coconut. The Central Coconut Research station is located at Kayamkulam. The another important crop is tapioca. A tapioca research station is also functioning at Thiruvalla. Sugarcane is cultivated in Mavellikkara,

Koipram, Mallappally, Chengannur, Aranmula Pandalam, and Thiruvalla. The other crops cultivated in this district are pepper, ginger, turmeric, arecanut, coffee, rubber. coco etc.

**Irrigation**

59. Even though the district is blessed with heavy rainfall and important rivers which are flowing through this district, the cultivation is mainly depend upon channal and channal-fed tanks. The oldest irrigation scheme in the district is Kainakary Embankment scheme constructed by the Public Works Department. The Kuttanad Development Scheme is the major irrigation scheme in the recent times. Under the scheme the construction of salt water barrier at Thanneermukkam to control the intrusion of saline water and the Spill way of Thottappally to bring down the flood water are worth mentioning.

60. The major irrigation project is the Pamba irrigation project utilising the tail race waters of Sabarigiri hydro-electric project in the Pamba basin. It irrigates Chengannur, Mavelikkara, Thiruvalla and Karthigappally taluks of Alleppey district.

The main canal bifurcates after traversing a length of 20 kms. The right bank which crosses Pamba river has a length of 60 km. feeds an ayacut of 3642 hectares. Kaviyur branch, one of the 16 branches diverts into. Manimala river which utilizes Kuttanad water supply scheme and irrigates the area of right bank of Manimala river. The left branch canal after traversing 47 km. bifurcates into Haripad and Kandallur branches at Karthigappally taluk. This canal crosses Achankoil river. The canal with its 30 branches has a length of 157 km. to feed an ayacut of 14164 hectares. The barrage has a central spill way section. There are a large number of cross drainage work in the Pamba canal due to the undulating terrain in the initial reaches. There are 9 tunnels of total length of 10.35 km. and 37 aquaducts of which Neduvaramcode aquaduct is the longest having a length of 1123 km. Besides the major irrigation scheme there are a number of minor irrigation schemes which facilitate the cultivation of about 23492 hectares of land.

**Tenancy**

61. The land in Alleppey district, as elsewhere in the erstwhile Travancore state, at the time of 1961 census could be mainly categorised into two categories viz., 'janmam' land (belonging to jenmies and landlords) and 'Pandaravaka land' (belonging to Sarkar). Pandaravaka land mainly comes under three categories (1) puramboke land which is used or reserved for public purposes or for the communal use of the villages (2) Tarisu—waste land at the disposal of the government which was available for registry (3) Registered land which came under two categories *(i)* Dry land (Parambas) and wet land (Nilams). There had been some Kandukrishi land also in this district. The land was the 'Sthanam' property of the then Maharaja of Travancore. The Maharaja surrendered all the rights on the Kandukrishi land to the Government and the same has since been assigned to the tenants on registry under the rules specially framed for the purpose. The next two decades after 1961 witnessed radical changes in the agrarian front. The enactment of the Kerala Land Reforms Act, 1963 was an important landmark in the history of agrarian reform in the state. This act repealed the Kerala Agrarian Relations Act, 1960, the Malabar Tenancy Act, 1929, the Cochin Verumpattomdars Act VIII of 1118 M.E. (1942-43 A.D.), the Madras Cultivating Tenants (Payment of Fair Rent) Act, 1956 and the Travancore-Cochin Prevention of Eviction of Kudikidappukars Act, 1955 and enacted a single statute governing the relationship between landlord and tenant throughout the state. The main objects of the Kerala Land Reforms Act, 1963 were:

(1) To confer fixity of tenure on tenants
(2) To fix the fair rent in respect of holdings
(3) To confer the right of purchase of the landlord's rights, title and interest on the cultivating tenants.
(4) To define the rights and liabilities of Kudikidappukars
(5) To place the ceiling on the ownership and possession of land and provide for the disposal of excess land.

Besides, there were also some provisions of secondary importance. The Act came into force from early 1970. The nature of the provisions of this act indicates that this statute does not affect the land tenures not specifically mentioned in it. This Act, as amended from time to time, considerably helped the tenants to become owners of tenancy land. Many hutment dwellers could purchase their homesteads with all the appurtenants thereto. The excess land above the ceiling area was also distributed. Thus another notable impact of these reforms was the reduction in the number of landless agricultural households and the abolition of absentee landlordism.

**Animal Husbandry**

62. Most of the places of Alleppey district are waterlogged and the green grass is not sufficient in many places and hence this district is poor in cattle wealth. But majority of the weaker section depend upon the livestock and poultry. According to the livestock census held in 1977 total livestock population of the district was accounted as 4.86 lakhs of which 3.58 lakhs are cattles, 1.16 lakhs goat and 509 pigs. The production of milk is very low compared to state and other districts. Total poultry was estimated

106/727—11

as 17.06 lakhs in which 15.5 lakhs were fowls, 1.6 lakh ducks and rest others. Government has undertaken a programme to improve cattles and hence for the better production of milk and eggs. The artificial insemination centre at Mavelikkara is the important one in the district. A dairy extension unit is functioning at Mavelikkara to improve the supply of nutritious milk. Central Hatchery, Chengannur, Poultry Training Institute, Chengannur, Chick Sexing School, Duck Farm at Niranam are the important institutions functioning in the district for the development of poultry industry. There are 6 veterinary hospitals, 27 dispensaries, 10 veterinary sub-centres, 2 mobile dispensaries, 36 artificial insemination centres etc., in this district, to look after the health of livestock.

**Fisheries**

63. Alleppey is a district of marine resources and it is an important source of national income. This district has a large sea coast of 31.7 km. in length and the large number of people living in this coastal region have to depend upon the fishing resources and fishing activities. This district has the benefit of both marine and inland fishing. There are 30 marine fish landing and 27 inland fish landing villages in this district. Kuttanad comprises of annually inundated paddy fields and net work of canals is one of the major inland fishing centre of the district. The prawn, oil sardine, and mackerals are the economically important species of the marine fisheries. This district is well-known for its important annual phenomenon called chakara which develops towards the end of June during monsoon at Purakkad. The large quantity of prawn exploited in these region during chakara attracts thousands of fishermen of the Kerala sea coast. It is the important wealth of the district. It is estimated that 70,000 tonnes of marine fish (i.e. more than 20 per cent of the fish-landing in the state) was landed during 1976-77. As regards the inland fisheries the most common types are mullets, etroplus, barbus, cat fish macronees and eels. Mechanised and non-mechanised fishing crafts are used in this district. The most popular equipments used are dug out canoes, drag nets, gill nets, trawl net, cast nets etc. There is a fresh water fish farm functioning at Edathua sponsored by I. C. A. R. The other two fish farms are located at Arattupuzha and Ayiramthengu. Refrigeration facilities are also available in this district. This district has 6 fish carrying yards at Azheekkal, Kallikkad, Thottappally, Thumboli, Pallithode and Arathunkal.

**Electricity and power**

64. All the revenue villages and karas and the towns in the district are electrified. There is a considerable difference in the village size of Kerala state from the rest of the country. The villages in other states can be compared with desoms in the state. This district has no power generating station. Electric power is supplied from the 110 K.V. Station at Pallam in Kottayam district, which is connected with sub-stations at Punnapra, Alleppey, Shertallai, Aroor, Mavelikkara and Thiruvalla.

**Industry**

65. Though this district is considered as industrially backward, some traditional industries based on coir, and coir products, coconut oil, marine products, handloom and several kinds of handicrafts are dominating from very early times. Since coconuts are produced abundantly especially in the low land regions of this district, the raw materials can be available in plenty and hence the production of coir yarn and other coir products have been continuing as the traditional industry of the economically backward people. Foreigners had carried on trade in coir products from ancient times. Different varieties of coir yarn are manufactured on a commercial scale. The different stages in the processing of coir yarn are generally run by the female members as the cottage industry. Coir mats and matting are manufactured in the factories. The manufacture of mats and mattings was first introduced by Mr. James Durragh, an American in 1859. Afterwards many factories were established in Alleppey and the neighbouring areas.

66. The Coir Board was set up under the coir Industry Act, 1953. In 1959, a Coir Research Institute was established at Kalavur. There is a Central Coir marketing society under which several co-operative societies are functioning to improve the industry to a greater extend. The Government has introduced coir purchase scheme, financial help to individuals, establishment of showrooms, expenditure for the implementation of coir development scheme etc., for the development of coir industry. There is a national coir training and design centre at Alleppey.

67. The other important industry in the district is the extraction of coconut oil. There are more than 60 units in this district. Copra is manufactured and exported in a large scale. Handloom industry is the other traditional industry in this district. Handloom weaving is mainly concentrated in Budhanoor, Kulanada, Chennama-Pallipuram, Chettikulangara, Bharanikavu, Vallikunnam, Panavally, Aroor and Vayalar. According to the handloom census conducted in 1976, there are 105 looms in the factory sector and 315 looms in the individual sector. There are 48 powerlooms installed in two powerloom societies. Cashew industry is the another industry and there are 5 cashew processing units functioning in this district.

68. Cane and rattan work industry, mainly concentrated at Chengannur and Thiruvalla taluk, bamboo and reed weaving at Muhamma,

screwpine mat weaving at Karthigappally and Mavelikkara are the important traditional handicrafts industries carried on as cottage industries. Table mats, window curtain, vanity bags, etc., with Korah grass, palm fibre, screwpine, banana fibre etc., are manufactured and exported from these units. Other important handicrafts industries are bell metal casting, manufacture of Kathakali accessories, granite carving manufacture of musical instruments, Aranmula metal and mirror making and embroidary and lace making. Some village industries such as handmade paper, non-edible oil, pottery etc., are undertaken by the Khadi and Village Industries Board.

69. There are 18 large and medium industries of which Kerala State Drugs and Pharmaceuticals, Alleppey, Foam Matting India Ltd., Alleppey and Pallathara Bricks and Tiles Ltd. owned by Government, Scooters Kerala Ltd. and Mannam Sugar Mills Ltd., Pandalam under Co-operative concerns and Private companies, like Travancore Sugars and Chemicals, Kerala Spinners, Alleppey, Prabhuram Mills, Chengannur, Bristol Boat Ltd., Alleppey, Aluminium Industries Ltd., Mannar, Excell Glass Ltd., Alleppey, High Range Brevaries Ltd., Shertallai, Vineers and Laminations Ltd., Othara etc., are important. Mini industrial programme was also implemented in this district. District Industries Centre under the industrial policy of the Government of India and several small scale industrial units such as Chemical based units, canning and preservation of fish, manufacture of furniture and packing cases, sawing of timber, etc., are functioning in this district. As per the information provided in the Action Plan for 1983-84 and 1984-85 by the District Industries Centre there are 2026 registered small scale units providing employment to 29,287 persons.

**Transport**

*(a) Roads*

70. The district is covered by a net work of roads. The National Highway (NH 47) passes through Shertallai, Ambalapuzha and Karthigappally taluks of this district. There are 8 state highways besides several village roads and town roads in this district. The total length of roads maintained by P.W.D. as on 1st April 1982 was 1,376 km. Kerala State Road Transport Corporation runs regular services on the important roads of this district. Private motor transport plays an important part in the transport system of the district. Since this district is covered by a net work of backwaters, rivers and canals several bridges facilitate the transportation of the district. Some of the important bridges of this district are Thottappally road bridge located on Alleppey-Quilon road (NH 47), Kollakkadavu bridge at Mavelikkara-Chengannur road across Achankoil river. Thondara bridge at the southern boundary of the Thiruvalla Municipal town on M. C. Road across Manimala river, Arattukadavu bridge across Achankoil river on Mavelikkara-Thiruvalla Road, Panni bridge across Pamba river on Mavelikkara-Thiruvalla Road etc. Besides some old bridges of Pandalam, Chengannur, Varattar and Manimala on the M.C. Road, Kayamkulam on NH 47 and Vallamkulam on Thiruvalla-Kozhencherry Road there are a number of bridges in the Alleppey town. The National Highway will be connected with M.C. Road through Pallathuruthy, Nedumudi and Muttar bridges.

*(b) Railways*

71. The railway has a length of only 39 km. in this district which enters in the district between Oachira and Kayamkulam and leaves the district between Thiruvalla and Changanacherry. There are five railway stations in the district viz., Kayamkulam, Mavelikkara, Cheriyanad, Chengannur and Thiruvalla. The new broad-guage line between Ernakulam and Quilon through Alleppey is under construction. This will connect the industrial belt of Cochin with the industrially backward Alleppey.

*(c) Canals*

72. Waterways plays an important role in the transportation system of this district. Most of the areas of this district are water logged and the only means of communication is possible through boats and ferry services. The Cochin-Alleppey section consisting of Vembanad lake extending from Cochin to Alleppey along Shertallai and Ambalapuzha taluks is the most important area of the west-coast canal system which starts from Hosdurg and ends at Trivandrum. Apart from this there are number of navigable rivers and inland canals. The Cochin-Alleppey section lies in Ambalapuzha and Karthigappally taluks. Alleppey town is connected with Changanacherry town by Alleppey-Changanacherry canal passing through Kuttanad area. The Vadai and commercial canals take off from Vembanad lake and run parallel through Alleppey town and connected with link canals at both ends. Some of the inland canals falling in this district are Alleppey-Ambalapuzha, Alleppey-Changanacherry, Alleppey-Commercial canal, Alleppey-Kottayam, Alleppey-Vadai, Alleppey-Thalavadi, Alleppey-West junction, Ambalapuzha-Purakkad, Kakkazham-Kayamkulam salt shell, Muhamma-Poochakkal canal etc.

*(d) Port*

73. Alleppey, one of the two intermediate ports on the west-coast of Kerala and the first commercial port in the princely state of Travancore was organised by Raja Kesavadas the then Dewan of Travancore. The port is an open road stead about 61 km. south of Cochin. Shipping Operation can be carried out only for 9 months i.e., from September to May. During south-west monsoon period the port is practically closed

for shipping operation. Since the rise of Cochin Port, the importance of this port was dwindled. There is a light house built in 1862 to guide the ships and crafts to a distance of 26 km. Messages from steamers are received and transmitted by the light signalling arrangement at the port.

*(e) Aerodrome*

74. There is no Aerodrome in this district. The nearest one is at Cochin.

## PLACES OF IMPORTANCE

### Alleppey (Ambalapuzha Taluk)

75. Alleppey is the district as well as the taluk headquarter situated 157 km. from Trivandrum and 62 km. from Cochin on the National Highway (NH 47). It has an area of 46.77 sq. km. and a population of 169,940 according to 1981 census. It is, known as 'Venice of Travancore' as it is almost surrounded by sea and backwaters and has many canals intersecting it. The town is linked with Kottayam and Cochin through backwaters by boat services. This is a very ancient town founded in 1762 by Raja Kesava Das who cleared the jungle country and built three ships for trade and invited merchants from Bombay and Sindh to settle down here. For several decades Alleppey remained the chief depot of Travancore Government for the sale of forest and other produces and the seat of the state commercial agent. The pier is 1270 feet long and there is also a light house (built in 1862). The sea port has lost its importance due to nearness of Cochin port but the town as yet continues to be an important commercial centre of Kerala. The chief commodities manufactured are coir, copra and coconut oil. Alleppey is the world's chief supplier of coir yarn and coir mattings. Famous snake boat race is held every year on Independence Day for the Nehru Trophy as a part of Independence Day celebrations. It is most thrilling to all those present to have a symphony of enchanting music, rhythm, speed, action and colour on the blue waters at 'Vattakkayal'. A distance of 4,850 feet is usually covered by the snake boats in less than five minutes. This carnival attracts thousands of tourists every year from far and near. Alleppey is said to be the home of the first post office when postal communication was introduced in Travancore in 1857. It is a centre of a large net work of inland water transport services.

The boat jetty is a busy part of the town. The town has a first class Rest House overlooking the maiden near the sea to cater to the needs of the tourists. (ii) POPULATION

103. The population of the district as on the sun rise of 1st March 1981 (the reference date of 1981 census) was recorded as 2,350,145 which works out of 9·23 per cent of the total population of the state. The population of the district has an increase of about 17 lakhs during 30 years. Among the taluks Shertallai ranks first with a population of 434,680 and Kuttanad is at the lowest rank with 207,891 persons. The percentage of urban population of the district is 15·89 which works out to 7·8 per cent of the total urban population of the state. Of 3·7 lakhs of urban population of the district 1·9 lakh are in Ambalapuzha taluk which constitute 50·87 per cent of the total population of the taluk. The next position in the urban proportion is in Karthigappally taluk with 16·78 per cent followed by Chengannur taluk (10 per cent). The urban proportion of Shertallai (9.32 per cent). Thiruvalla (8·03 per cent) and Mavelikkara (7·51 per cent) are less than 10 per cent of the total population. Kuttanad taluk has no urban area.

(iii) SEX RATIO

104. The sex ratio (females per 1000 males) of the district is 1050 which is more than the sex ratio of the state (1032). The sex ratio was in favour of males till 1931 census. In 1901 census the sex ratio was 986 female per 1000 males. Then it increased nominally and it decreased to 978 in the next decade. The sex ratio again increased steadily and in 1941 females attained the same position in number. From 1951 onwards females outnumbered males and in 1981 census there is an excess of 50 females for every 1000 males. Among taluks Chengannur leads with sex ratio of 1084 followed by Thiruvalla (1073), Mavelikkara (1072) and Karthigappally (1070). The other three taluks have a lower sex ratio of 1,026 in Ambalapuzha taluk, 1,018 in Kuttanad and 1,015 in Shertallai which is the lowest in total as well as in rural and urban areas. In rural areas also the highest sex ratio is in Chengannur taluk whereas in urban areas the highest sex ratio is 1,094 in Thiruvalla taluk.

(iv) DENSITY

105. According to 1981 census the density of population of the district is 1,248 persons per sq. km. Alleppey gets the first rank in this regard. In 1901 census the density of population of the district was 354 persons per sq. km. which is more than the 1981 density of Wayanad (260) and Idukki (190) districts. It had shown a steady increase in the subsequent decades and was more than doubled in 1951 and more than three-fold in 1971 census. Among taluks the highest density is recorded in Ambalapuzha with 2100 persons per sq.km. and the lowest in Kuttanad taluk with 782 persons per sq. km. Karthigappally taluk has the second position with 1627. Shertallai, Chengannur and Mavelikkara taluk have the density of more than the district average of 1248. Thiruvalla taluk has a density of 1050 persons per sq. km. The rural density of the district is 1128 persons per sq. km. which is also the highest among the districts. The urban density of the district is 2585 persons per sq. km. Among the taluks while Ambalapuzha holds I rank in urban density with 3636 persons per sq. km. Karthigappally taluk gets the 1st position in the rural density of population with 1500.

(v) GROWTH RATE

106. The population was increased from 6.7 lakhs in 1901 to 7·6 lakhs in 1911 recording a growth rate of 14.83 per cent. In the next two decades it was increased as 14.53 per cent and 24·33 per cent respectively. During 1931-41 it was dropped by about 50 per cent i.e. from 24.33 per cent to 12.69 per cent. In the next decade there was a sudden spurt in the growth rate recording 19.41 per cent. In the succeeding decades the growth rate was decreased to 19.03 and then to 17.73. In the present decade it has gone down to 10.56 per cent which is very low compared to that of the state (19·24 per cent). In the urban areas the growth rate during 1971-81 is only 3·34 per cent in contrast to 10.93 per cent in rural areas. Among the taluks the highest growth rate of 14.50 per cent has been recorded by Shertallai taluk and the lowest of 6.13 per cent by Thiruvalla taluk. Among the rural areas of the taluks the growth rate is at the highest in Karthigappally taluk with 24.03 per cent and the lowest in Chengannur taluk (2.25 per cent) while in urban areas the highest growth rate of 86.71 per cent has been recorded by Chengannur taluk. The decrease of urban population in Karthigappally and Mavelikkara taluks is caused by the declassification of urban areas in the 1981 census. It is significant to note that in total, rural and urban area in the district as well as in taluks the growth rate of female population is higher than that of male population except in the case of the urban area of Shertallai taluk.

(vi) LITERACY

107. Among the districts of Kerala, Alleppey district ranks second with a general literacy rate of 78.52 per cent, which is substantially higher than the state rate of 70.42 per cent. The percentage of literacy has recorded an increase of 8 points from 70.44 per cent in 1971 to 78.52 per cent in 1981. The male and female literacy rate of the district are 82.12 and 75.10 respectively as against 75.26 and 65.73 for the state. As regards the rural-urban literacy rate, the urban literacy rate of 78.83 is slightly higher than the rural literacy rate of 78.47. One characterstic feature worth noting is that irrespective of male-female literacy or by rural-urban, about three fourth of the people are literate in the district.

Among the taluks of the district, the highest literacy rate of 83.40 has been observed for Thiruvalla taluk and the lowest 75.24 for Karthigappally taluk. In all the taluks except Karthigappally, the urban literacy rates for both males and females are higher than the corresponding rural literacy rates.

(vii) SCHEDULED CASTES

108. Scheduled caste population of the district as per 1981 census is 235,423 as against 200,770 in 1971 census. This works out to 9.24 per cent of the total scheduled caste population of the state and 10.02 per cent of the total population of the district. The proportion of scheduled castes in the rural areas of the district is 11 per cent and that of urban area is 4.85 per cent. 92.31 per cent of the total scheduled caste live in the rural areas of the district. Among the taluks the proportion of scheduled caste is highest in Chengannur taluk with 16.32 per cent followed by Mavelikkara with 15.84 per cent. It is lowest in Ambalapuzha taluk with 3.70 per cent. The same trend is seen in the rural areas also. With regard to urban area Mavelikkara taluk leads the other taluks with 12.66 per cent and the proportion of scheduled castes is lowest in Ambalapuzha taluk (2.43 per cent).

(viii) SCHEDULED TRIBES

109. There are 3,273 scheduled tribes in the district which constitute 0.14 per cent of the total population. During the decade there is an abnormal increase of scheduled tribe population from 435 in 1971. The proportion of scheduled tribes in rural areas is 0.13 and that of urban area is 0.20 per cent. Among taluks the percentage of scheduled tribes to total population is highest in Shertallai taluk with 0.29 per cent followed by Ambalapuzha with 0.19 per cent and Thiruvalla with 0.17 per cent. In Kuttanad taluk there are only 18 scheduled tribes, the percentage being 0.01. In Chengannur and Mavelikkara taluks the proportion of scheduled tribes are also small with 0.03 per cent and 0.04 per cent respectively. In respect of rural areas Shertallai taluk leads with 0.32 per cent and Thiruvalla tops with 0.91 per cent in the case of urban areas. But in the urban areas of taluk the actual number of scheduled tribes are more in Ambalapuzha taluk with 342 persons and 265 persons in Thiruvalla taluk. In the urban areas of Karthigappally taluk there are 88 scheduled tribes. In other taluks the scheduled tribes are less than 25.

(ix) MAIN WORKERS

110. The total number of main workers in Alleppey district as recorded in 1981 census are 615,651 of which 445,508 are males and 170,143 are females i.e. 26.20 per cent of the total population of the district is returned as main workers as against 26.68 per cent in the state. The work participation rates of males and females at the district level are 38.86 and 14.14 per cent respectively. The work participation rate in rural areas are higher than that in urban areas. The same trend is discernible among male and female workers also. The female participation rate is only 9.99 corresponding to male participation rate of 37.12 in urban areas. Coming to the taluks the work participation rate is the highest in Shertallai taluk with 30.84 per cent closely followed by Kuttanad with 30.03 per cent and lowest in Mavelikkara taluk with 23.61 per cent. The male participation rate is highest in Thiruvalla taluk (40.74 per cent) followed by 40.62 per cent in Shertallai taluk and lowest in Karthigappally taluk (36.86 per cent). Kuttanad taluk has recorded the largest proportion of female participation rate (21.25) closely followed by Shertallai with 21.21 per cent. In Shertallai, Ambalapuzha and Karthigappally taluks the rural participation rate is slightly higher than that of urban in the case of both males and females whereas in Chengannur, Thiruvalla and Mavelikkara taluks female participation rates in the urban areas are slightly higher than that of rural.

(x) MARGINAL WORKERS

111. The percentage of marginal workers to total population of the district is 5.73 per cent in Alleppey district as against 3.85 per cent in the state as a whole. Among the taluks of the district, Shertallai taluk has recorded the largest proportion of marginal workers with 10.56 per cent and Thiruvalla the lowest proportion with 2.76 per cent. In the case of males and females in the district and taluks the percentage of marginal workers to total population in rural areas are higher than that of urban areas. The highest proportion of marginal workers in rural and urban areas is also in Shertallai taluk with 10.88, 7.35 per cent respectively and lowest with 2.87 for rural areas in Thiruvalla taluk, and 0.94 per cent for urban areas in Chengannur taluk. The proportion of male and female marginal workers in the district are 5.06 and 6.38 per cent respectively.

112. As far as the combined works participation rate (total workers to total population which is comparable to the 1971 figures) is concerned, at the district level there is an increase of 3.78 per cent from 28.15 in 1971 to 31.93 per cent in 1981. All the taluks of the district have registered an increase in the participation rates. Shertallai taluk has recorded highest participation rate of 41.40 and Thiruvalla taluk the lowest participation rate of 27.47 in 1981.

**Non-workers**

113. The percentage of non-workers is highest in Thiruvalla taluk with 72.53 per cent closely followed by Chengannur with 72.25 compared to 68.07 of the district. The lowest proportion of non-workers is in Shertallai taluk with 58.60 per cent. It is also noticed that the proportion of female non-workers are more in urban areas, the highest being in the urban areas of Chengannur taluk with 88.77 per cent. Another notable feature is that taluk which has the largest proportion of literates, also has the largest proportion of non-workers. Though literacy among women is satisfactory as compared to males literacy, they are mostly non-workers.

**Village-wise census data**

(i) POPULATION

114. As mentioned earlier, there are 99 villages in the district of which 97 are in rural areas and are all inhabited. 94.85 per cent of the villages have a population of 10,000 and over as is seen from the following table.

TABLE 5

**DISTRIBUTION OF VILLAGES BY POPULATION RANGES**

| Range of population | No. of villages in each range | Percentage of village in each range |
|---|---|---|
| 1 | 2 | 3 |
| **Total** | **97** | **100·00** |
| Less than 200 | .. | .. |

| 2000–4999 | .. | .. |
| 5000–9999 | 3 | 3·09 |
| 10000+ | 92 | 94·85 |

There are 47 villages with population range 10,000-19,999; 33 villages with population range 20,000-29,999; 9 villages with population range 30,000-39,999 and 3 villages with population 40,000 and above namely; Aroor, Vayalar West and Punnapra. Aroor in Shertallai taluk is the most populous village (49,239) of the district.

(ii) DENSITY

115. The sub-joined table gives distribution of villages in the district by density range.

TABLE 6

**DISTRIBUTION OF VILLAGES BY DENSITY**

| Range of density (per sq. km.) | Total number of villages in each density range | Percentage of villages in each density range |

116. All the villages in the district have scheduled caste population. 51 villages (52.58 per cent) of the total 97 villages have schedule caste population upto 10 per cent. There are 26 villages forming 26.80 per cent of the total villages of the district which have scheduled caste population between 11-15 per cent. 19 villages (19.59 per cent) have scheduled caste between 16-20 per cent. In three villages of the district namely, Arnamula (22.46 per cent), Ala (20.66 per cent) and Mulakuzha (20.02 per cent) the proportion of scheduled caste population exceeds 20 per cent.

117. The proportion of scheduled tribe population of the district is only 0.14 per cent. 77.48 per cent of the total scheduled tribes live in rural areas of the district and 22.52 per cent scheduled tribe persons are living in towns. The

subjoined table gives the proportion of scheduled tribe population to the total population in the villages of the district.

TABLE 8

**PROPORTION OF SCHEDULED TRIBE POPULATION TO TOTAL POPULATION IN THE VILLAGES**

| Percentage range of scheduled tribe population to total population | Number of villages in each range | Percentage of villages in each range |

| 7. Thiruvalla (M) | 29,225 | 1,687 | 265 | 5·77 | 0·91 |

All the towns in the district have scheduled caste population, the highest 4,219 being in Kayamkulam municipal town and the lowest 809 in Pathirappally non-municipal town. In percentages, Mavelikkara has the highest 12.66 per cent and Alleppey Municipal town has the lowest 2.28 per cent of scheduled caste population. All the town have scheduled tribe population. Alleppey municipal town has the highest scheduled tribe population of 274 which forms 0.16 per cent of the total population of the city. In terms of percentage Pathirappally non-municipal town tops with 0.32 per cent.

119. 92 out of the total 97 villages of district having a population of over 10,000 have an average literacy rate of 78.45. The sub-joined tables gives literacy rates by population range of villages.

TABLE 10

**Analysis of village directory data**

121. The village directory data supplied by the village officials with reference date as 1st October, 1979 are presented in this volume. The

106/727—14

data cover the entire rural area of the district. The data for urban area (both statutory towns and census towns) are presented in the town directory. The succeeding paragraphs deal with the analysis of village directory data. The following table 12 gives a consolidated picture of the taluk-wise distribution of villages according to the availability of different amenities such as educational, medical, drinking water, post and telegraph, market, communication, approach to village by pucca roads and power supply.

TABLE 12

**DISTRIBUTION OF VILLAGES ACCORDING TO THE AVAILABILITY OF DIFFERENT AMENITIES**

122. All the villages of the district are inhabited. All the 97 villages in the district, except two namely Alleppey (portion) in Ambalapuzha taluk and Vadakkekara (portion) in Chengannur taluk the portion of which are included in the municipalities have the facility of least primary education. Except one village namely; Alleppey (portion) all other villages in the district can avail medical facilities of one kind or the other. All the villages of the district have drinking water facility, communication facilities, power supply and are approachable by pucca road. All the villages of the district except Alleppey (portion) can avail postal facilities, 71 villages of the district have market/hat facilities.

123. The proportion of rural population served by different amenities is furnished in table 13.

TABLE 13

**PROPORTION OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES**

| District/Taluk | Total Population of inhabited villages in the taluk | Proportion of rural population served by the amenities of: Educational | Medical | Drinking water | Post and Telegraph | Market/hat | Communications | Approach by pucca road | Power supply |

From the above table it can be observed that a very small proportion of the population is lacking educational, medical, postal facilities and a good proportion of the population (20.35 per cent) still lack market/hat facilities.

124. The subjoined table gives the distribution of villages where educational, medical, postal and market facilities are not available by distance ranges from the places where these amenities are available.

TABLE 14

## DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE

| Villages not having the amenity of | Number of villages where the amenity is not available and available at a distance of | | | |
|---|---|---|---|---|
| | —5. km | 5–10 km. | 10+ km. | Total (Cols. 2–4) |
| 1 | 2 | 3 | 4 | 5 |
| Educational | 2 | .. | .. | 2 |
| Medical | 1 | .. | .. | 1 |
| Post and Telegraph | 1 | .. | .. | 1 |
| Market/hat | 13 | 8 | 5 | 26 |

Two villages which lack educational facilities and the one village which does not have the benefit of medical and postal facilities in their jurisdiction can avail these facilities by travelling to a neighbouring town or village which lie within a distance range of 5 km. Of 26 villages which lack the privilege of market/hat facilities in their jurisdiction, 13 can make use of the facility by travelling to village/town within 5 km. 8 can avail this facility by travelling 5-10 km. and the remaining villages have to travel more than 10 km. for making use of market/hat facility.

125. In table 14 it was pointed out that in respect of educational, medical, postal and market facilities population of some of the villages have to depend upon other villages or towns. In the Village Directory, an attempt has also been made to classify the villages according to the proximity of the nearest town (statutory or census town). Villages distributed according to four ranges of distance from the nearest town along with the number of villages with their percentage served by each amenity are given in the annexed table 15.

TABLE 15

## DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST TOWN AND AVAILABILITY OF DIFFERENT AMENITIES

126. Majority of villages, 50 out of the total 97 villages in the district lie in a distance range 6-15 km. from the nearest town. 26 villages have the privilege of being within a distance of 5 km. from an urban area and all these have drinking water, communication and power supply facilities and are approachable by pucca roads and of these 26 villages, 24 have educational and 25 have medical and postal and 17 have market/hat facilities. All the 50 villages having a town within 6-15 km. and all the 21 villages having a town within 16-50 km. have all the basic amenities of educational, medical, drinking water, postal, communications, power supply and approach by pucca road. But as regards the market/hat facility 42 out of 50 (84.0 per cent) lying in distance range of 6-15 km. from the nearest town. Out of 21 villages within a distance of 16-59 km. from an urban area, 12 villages have the benefit of this facility.

127. Table 16 gives the villages classified by population range and amenities available. Of the 97 villages, one comprises the population range 500-1999, one has a population less than 500 and the remaining 95 villages have population over 5,000. Except for market facility which can be availed by the population of only 71 villages of population 5,000 and above, all the 95 villages of population 5,000 and above have all other basic amenities under review. One village of population range 500-1999 lacks education and market/hat facility and one village of population below 500 does not have educational, medical, postal and market/hat facility in its jurisdiction and these villages can avail the basic amenities other than these in their jurisdiction.

128. Rice is the main staple food of the people in all taluks of this district as in the other districts of the state.

129. The Ministry of Food and Agriculture has recommended adoption of the following categories of land use in the presentation of data.

1. Forests
2. Land not available for cultivation
   (a) Land put to non-agricultural uses
   (b) Barren and uncultivable land
3. Other uncultivated land excluding fallow land
   (a) Permanent pastures and other grazing land
   (b) Land under miscellaneous tree crops and gross not included in the net area sown
   (c) Culturable waste
4. Fallow lands
   (a) Fallow lands other than current follows
   (b) Current fallows
5. Net area sown.

130. The village directory which is presented for the rural areas of the district, gives data on land use pattern. However, there is slight alteration on classification of land use data in the village directory. The first category i.e. forest, remains unchanged. Fallow land [category 4 (a) + (b)] and net areas sown (category 5) are grouped together and treated as agricultural land but in the presentation in the village directory they are classified as irrigated and un-irrigated Culturable waste includes category 3 (a+b+c) while area not available for cultivation comprises tory, the land use data are presented under 5 of categories 2 (a+b). Thus in the village direccategories viz. forests, irrigated area, un-irrigated area, culturable waste and area not available for cultivation.

131. Table 17 gives land use data for the district and its taluks. Cultivated land (both irrigated and un-irrigated) in the district works out to 85.30 per cent. Forests occupy a small portion (0.38 per cent) of the total area of the district and this area lies in the Perumpetty village of Thiruvalla taluk. The remaining area is shared by culturable waste with 3.63 per cent and area not available for cultivation with 10.69 per cent. As regards taluks of the district, Kuttanad taluk has the largest proportion of 66.32 per cent and Mavelikkara has the lowest proportion (20.66 per cent) of irrigated area. Mavelikkara taluk which leads all the other taluks in total cultivated area with 93.29 per cent, has the largest proportion of un-irrigated area of 72·63 per cent. Shertallai taluk has the largest proportion of culturable waste with 12.05 per cent and also area not available for cultivation which is 20.12 per cent. The taluk with least culturable waste (1·04 per cent) is Thiruvalla.

TABLE 17

| Mavelikkara | .. | 20·66 | 72·63 | 1·28 | 5·43 | 100·00 |

The percentage of culturable waste and area not available for cultivation when taken jointly is largest (32.17 per cent) in Shertallai taluk and is lowest (6.71 per cent) in Mavelikkara taluk.

132. The following tables gives the taluk-wise distribution of cultivable area and the percentage of irrigated area to total cultivable area.

TABLE 18

**DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE**

| District/taluk | Number of inhabited villages | Total area in hectares* | Percentage of cultivable area to total area | Percentage of irrigated area to total cultivable area |

| Mavelikkara | 14 | 27,337·74 | 94·57 | 21·84 |

*The total area is according to village papers and does not agree with the area figures undr rural areas, derived from the area figures supplied by the Surveryor General, India.

88.93 per cent of the total area of the district falls under cultivable land and 43.82 per cent of the total cultivable area, is irrigated. Among taluks, the proportion of cultivable arae is largest (94.57 per cent) in Mavelikkara taluk, followed by Chengannur (92.25 per cent) and is lowest (79.98 per cent) in Shertallai taluk.

133. The highest benefit of irrigation is available for Kuttanad taluk which has 72.89 per cent of irrigated area to total cultivable area. In Shertallai and Ambalapuzha taluks also about 2/3rd of total cultivable area is irrigated. Mavelikkara with only 21.84 per cent of its cultivable area as irrigated gets the least benefit in irrigation. Karthigappally, Chengannur, Thiruvalla are also comparatively poorly irrigated taluks with the percentage of irrigated area to total cultivable area in these taluks being 38.07, 32.92 and 24.04 respectively.

**Analysis of town directory data**

134. Growth, density and sex ratio of urban population of the district for three decades from 1951 onwards compared to that of the state are illustrated in the subjoined table.

| | 1981 | 1,038 | 1,021 |

135. The data depicts an increase in every census so far as the absolute figures of urban population are concerned but the proportion of urban population in the district reflects a fluctuating trend. The percentage urban population of the district increased from 14.64 in 1951 to 17.19 in 1961 and then declined in the next two decades to 16.92 in 1971 and 15.89 in 1981. The urban growth rate which registered a growth of 39.80 per cent during 1951-61, has recorded a steep fall in the next two decades, the rate declining to 15.87 in 1971 and a mere 3.84 in 1981. The decline in percentage of urban population and urban growth rate during 1961-71 may partly be attributed to reduction in jurisdiction of Chengannur town where population declined from 22,277 in 1961 to 13,316 in 1971. The fall in percentage of urban population and urban growth rate during the decade 1971-81 is partly due to de-classification of Haripad and Pandalam which were towns in 1971, as rural areas in 1981. These together had a population of 35,186 as against the population of 21,068 of the newly added town Pathirappally in 1981 census. The percentage urban population of the district (14.64 in 1951, 17.19 in 1961, 16.92 in 1971) which continued to be higher than the corresponding proportion of urban population of the state (13.48 in 1951, 15.11 in 1961, 16.24 in 1971) durnig 1971-81 was lower than corresponding state figures in 1981, which was 15.89 as against 18.74 of the state. The district urban growth rate when compared to state was higher in 1951 census but was lower in the next three decades 1961, 1971, 1381. The district figures being 56.12, 39.80, 15.87 and 3.84 in 1951, 1961, 1971 and 1981 respectively as against the corresponding state figures of 52.72, 39.89, 35.72 and 37.64.

136. The density of urban population of the district which has shown consistant increasing trend during the last three decades and was lower than the corresponding state density during the decades 1951-61 and 1961-71 was significantly higher than the state density in 1981. The density figures of the district during 1961, 1971 and 1981 were 2,251, 2,564 and 2,856 as against the corresponding state figures of 2,285, 2,585 and 2,669 respectively. In all the four decades, sex ratio (females per 1,000 males) of the district for urban population revealed a consistent increasing trend. The sex ratio of the district for urban population being 985 in 1951, 1,014 in 1961, 1,020 in 1971 and 1,038 in 1981 as against the corresponding state sex ratio of 992, 991, 997 and 1,021 showing that the sex ratio of the district which was lower than the state sex ratio in 1951, has been consistently higher than the state sex ratio during the last three decades. Except in 1951 when there is preponderence of males over females in the district, the females outnumber males in 1961, 1971 and 1981.

137. The newly formed towns declassified towns with their population in 1981 are furnished below:

106/727—15

TABLE 20

**NEW TOWN/TOWNS DECLASSIFIED IN 1981 CENSUS**

| Town | Treated as town for the first time in | Population (1981) | Town | Treated as town for the first time in | Population (1981) |

| | | | Pandalam | 1951 | 21,416 Pandalam (south) |

Pathirappally is the only newly added town in 1981 census with a population of 21,068. Of the two towns which were declassified in 1981 census, Haripad has been treated as a town since 1891 census and Pandalam as an urban area since 1951 census. The two towns were declassified as they were predominently rural in character.

138. In the statement III of the Town directory, municipal finance is shown for various items. Data are available only in respect of 6 municipal towns of the district. Among the six municipal towns of the district, the highest per capita receipt of Rs. 39.71 is observed for Shertallai town and the lowest per capita receipt of Rs. 27.18 for Chengannur town. Receipt through taxes is the major source of finance in respect of Alleppey, Chengannur and Thiruvalla town. For the remaining towns the receipts from other sources such as municipal properties, government grant, loan, advance etc., are the main source of finance. The highest per capita expenditure of Rs. 41.78 is noticed for Mavelikkara town and the lowest per capita expenditures of Rs. 20.03 for Chengannur town. The main items of expenditure are for general administration, public health and conveniences, public institutions, public works etc. In respect of, Alleppey, Chengannur, and Thiruvalla towns, per capita receipt exceeds the per capita expenditure and for the remaining three towns viz. Kayamkulam, Mavelikkara and Shertallai, per capita expenditure exceeds the per capita receipt. Table 21 gives per capita receipt and expenditure in towns of the district.

Alleppey town has two arts and science colleges, Chengannur, Kayamkulam, Mavellikkara and Thiruvalla town each has one arts and science colleges. Shertallai and Pathirappally towns do not have any college in there jurisdiction. There are neither higher secondary schools nor junior colleges in the urban areas of the district. Although Alleppey city has the highest number of schools in its jurisdiction (secondary/matriculation-14, junior secondary and middle-18 and primary-35), yet the proportion of secondary schools is only 0.08 as compared to highest 0.27 per 10,000 population for Thiruvalla followed closely by Chengannur 0.24 and Mavelikkara 0.23. The lowest proportion of secondary schools per 10,000 population is 0.05 in respect of Pathirappally census town. The highest proportion of junior and middle schools per 10,000 population is 0.32 in respect of Chengannur town and lowest of 0.05 for Pathirappally census town. This proportion of Alleppey city is 0.11. As regards primary schools in Alleppey city, the proportion of these schools for 10,000 population is 0.21 as against highest 0.89 in Thiruvalla town and the lowest 0.10 in Pathirappally census town.

140. Number of beds in medical institutions per 1,000 population for each town in the district is furnished in the following table.

TABLE 23

## NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS

| Class, name and civic status of the town | | Number of beds in medical institutions per 1,000 population |
|---|---|---|
| 1 | | 2 |
| I | Alleppey (M) | 7·15 |
| III | Chengannur (M) | 2·82 |
| II | Kayamkulam (M) | 1·50 |

| III | Pathirappally (NM) | .. |
| III | Shertallai (M) | 3·61 |
| III | Thiruvalla (M) | 4·24 |

Alleppey city has the privilege of the highest proportion (7.15) beds per 1,000 population, followed closely by Mavelikkara town (6.88). Kayamkulam town has the lowest proportion (1.50) of beds per 1,000 population. Pathirappally census town does not have any hospital in its jurisdiction although this town has 2 dispensaries, 2 family planning centres and 2 other medical institutions for health care, there are no bed facilities in these institutions.

141. Of all the towns in the district, notified slums exist only in Kayamkulam municipal town. The total area under notified slums is 3.20 hectares. The population of this slum area known as Puthenkandam colony is 350 forming 0.57 per cent of the town population. The density of population of slum area is 10,938 as against the density of 2,814 persons per sq. km. of Kayamkulam town.

142. The most important commodity manufactured, exported and imported in each town of the district as reported by Municipal Commissioner/Tahsildar are presented in the subjoined table.

TABLE 24

## MOST IMPORTANT COMMODITY MANUFACTURED, EXPORTED AND IMPORTED IN TOWNS

| Class, name and civic status of the town | | Manufactured | Exported | Imported |
|---|---|---|---|---|
| 1 | | 2 | 3 | 4 |
| I | Alleppey (M) | Coir and oil | Pepper | Rice |
