PREFACE

The District Census Handbooks were published for the first time in 1951 as part of the Census publication programme.

Each Handbook contained a general account of the district and its people, census tables and statistics on the area, houses, population, general amenities and distribution of population by livelihood classes for each village and town. The 1961 District Census Handbooks were a distinct improvement on the 1951 volumes. A uniform procedure was adopted for the preparation of the Handbooks. Each Handbook contained three parts as detailed below:

Part A. General, dealing with a general introduction about the district, its progress on various fields of general amenities since 1951 and an analysis of population by various demographic characteristics.

Part B. Census data, dealing with the census tables of 1961 pertaining to the district.

Part C. Village/Town Directory, dealing with the amenities, Primary Census Abstract down to the level of karas/muris/desoms in the case of rural areas and blocks and wards in the case of urban areas and number of industrial establishments by type.

District and taluk maps were also incorporated in each District Census Handbook.

In 1971 also it has been decided to adopt more or less the same pattern and publish the District Census Handbooks in three parts as given below:

Part A. Town and Village Directory

Part B. Village and Town Primary Census Abstract

Part C. Administrative Statistics and Report

It is proposed to print and publish Parts A & B relating to a District in a single volume with a view to making it available to the public as soon as the information is collected and compiled. Part C will be printed as a separate volume.

The collection and compilation of data for Part A were done by the office of the Director of Census Operations, Kerala through specially designed schedules for villages and towns. The information on rural areas was furnished by the Tahsildars and on the urban areas by the concerned Municipal/Corporation Commissioners. While Part B of the Handbook presents the Village and Town Primary Census Abstract, Part C gives the Report and Administrative Statistics processed from information collected from the various Central and State Government Offices.

A special feature of the publication of the Handbook in 1971 is the presentation of Primary Census Abstract not only for villages but also for the panchayats. This is the first time that an attempt has been made to present panchayat-wise figures. The additional work involved in the new venture is more than justified in view of the growing importance of panchayats in administration.

On the recommendation of the Registrar General, India, the Government of Kerala have agreed to bring out these volumes as State Government publications and issued orders in G. O. MS. No. 199/70/PD dated 17th June 1970. The printing of the Handbooks was undertaken by the Superintendent of Government Presses, Trivandrum.

It is not possible to have compiled a book of this kind without the co-operation and goodwill extended by the various State and Central Government Offices. I am grateful to them for their co-operation. The District Census Handbook section of my office functioned under the direct control of Shri B. T. Pillai, Deputy Director of Census Operations (Tabulation) and he was assisted by a Tabulation Officer and necessary staff. Shri S. Jayashanker was the Tabulation Officer in charge of the section at the time of addressing the various departments for collection of information. At the time of compilation of the District Census Handbook Smt. C. Kamalam took charge as the Tabulation Officer. I feel very happy in acknowledging the valuable contributions made by these officers and other members of the staff in my office, especially Smt. K. Sulabhamma, Statistical Assistant and Smt. K. Saradambal and Smt. A. Parvathi Kumari, Computors and Shri G. Sivadasan, Assistant Compiler in the compilation of this important work. Sarvashri K. Krishna Pillai and R. Prabhakaran have prepared the maps included in this volume. The brunt of the proof reading was cheerfully borne by Shri N. Ravindranathan Thampi, Printing Inspector and Sarvashri N. Aravindan and N. Madhavan, Proof Readers.

I would like to place on record my deep sense of gratitude to Shri P. Kurien John, Superintendent of Government Presses for the warm co-operation extended by him for the timely printing of the Handbook. I also wish to place on record my appreciation of the excellent work done by Shri T. Velayudhan, Assistant Superintendent, Government Press, Ernakulam and his efficient colleagues in executing the printing of this book neatly and in record time.

I shall be failing in my duty if I do not place on record my gratefulness to Shri A. Chandra Sekhar, I.A.S., Registrar General for the valuable guidance and help extended to me in this work.

Trivandrum,
10th April, 1973

K. NARAYANAN,
Director of Census Operations.

PART A

TOWN AND VILLAGE DIRECTORY

INTRODUCTION

This Part comprises Town and Village Directory of Alleppey district. The Town Directory furnishes data for each town in the district in respect of the status of the town administration, its origin, growth of population, functional category of the town, physical aspects and location, latest municipal finance, civic and other amenities, medical, educational and cultural facilities, trade, industry, commerce and banking facilities. The Village Directory includes details of amenities available in each village in respect of educational and medical institutions, power supply, drinking water supply, post and telegraph, communications, weekly markets, places of religious, historical or archaeological interest and particulars of land use.

2. The details were furnished by the Tahsildars and the Commissioners of Municipalities and compiled and processed at the office of the Director of Census Operations.

Census Town

3. Owing to the growing importance of urbanisation, the 1961 Census laid down a uniform threefold criteria for classification of places as towns. Corporations, Municipalities, Cantonments and Townships were automatically recognised as towns. The following were the three criteria adopted for treating the other areas as towns:

(i) Places with a minimum population of 5,000 persons;

(ii) A density of not less than 1,000 persons per sq. mile;

(iii) At least 75% of the male population should follow non-agricultural livelihoods.

However, places which did not satisfy the above criteria but had definite urban characteristics like newly established industrial areas, large housing settlements, places of tourist and pilgrim importance, etc. were also treated as towns as exceptional cases on the recommendation of the State Government. The definition of census town remained unchanged in 1971.

4. There are eight towns in Alleppey district, viz., Alleppey, Chengannur, Haripad, Kayamkulam, Mavelikkara, Pandalam, Shertalai and Thiruvalla. Of these Alleppey, Kayamkulam, Mavelikkara, Shertalai and Thiruvalla are municipalities and the others are towns declared as such for census purposes. All of them were towns in 1961 also. While there has been an increase in jurisdiction of Mavelikkara and Haripad towns, there is reduction in jurisdiction in respect of Chengannur town. The following table gives the list of census towns in 1961 and 1971.

Standard Urban Area

5. The 1961 Census reports contained particulars of town-groups. These town-groups were formed with a view to identifying functionally linked urban areas, urban spills beyond the administrative boundaries and metropolitan conurbation. In most cases the town-groups did not bring out spatially contiguous territory of urban-rural settlements. Therefore, in 1971, the 'town-group' concept was given up and a new concept of 'Standard Urban Area' was evolved. The Standard Urban Area may be defined as the projected growth area of a city or a town as it would be in 1991 taking into account not only the towns and villages which will get merged into it but also the intervening areas which are potentially urban. All municipal towns with an estimated population of 50,000 or more by 1971 were considered to be treated as standard urban areas. The demarcation of standard urban area was jointly done by the Town Planning Department of the Government of Kerala, Office of the Director of Census Operations, Kerala, Office of the Registrar-General, India and the Central Town and Country Planning Organisation, New Delhi There are two standard urban areas in Alleppey district, viz. Alleppey and Kayamkulam. The Standard Urban Area of Alleppey is the area covered by Alleppey municipality and the peripheral villages with urban potentialities and that of Kayamkulam is the area covered by Kayamkulam municipality and the rural portion of Kayamkulam village. The constituent units of the standard urban area are given below:

TOWN DIRECTORY

6. The Town Directory is presented in the form of six statements.

Statement I

7. This statement gives the civic administration status, population from 1901 to 1971 and the predominant functional category of each town for 1961 and 1971.

8. The functional character of a town was decided in 1961 as per the following procedure. In 1961 the workers were grouped under nine industrial categories as shown below :—

I Cultivators
II Agricultural labourers
III Mining, quarrying, live-stock, forestry, fishing, hunting and plantations, orchards and allied activities
IV Household industry
V Manufacturing other than household industry
VI Construction
VII Trade and commerce
VIII Transport, storage and communications
IX Other services

These nine industrial categories of workers were first grouped as—

(i) Agriculture and its allied activities (Categories I, II and III)
(ii) Industries including construction (Categories IV, V and VI)
(iii) Trade and commerce (Category VII)
(iv) Transport, storage and communications (Category VIII) and
(v) Other services (Category IX)

The percentage of workers in each of the above five groups to the total workers in the town was worked out. If any one single group takes in 40 per cent or more of the total workers that town will be designated by the corresponding function, viz., primary activity for the first group, industrial for the second, commercial for the third, transport for the fourth and service for the fifth group. If the highest percentage is less than 40, then the next predominant group is added. If the two groups together take in a minimum of 60 per cent of the total workers, the town will then be designated by both the functions, e.g., industrial-cum-transport. When the sum of the two groups does not reach 60 per cent then the third predominant group is taken into account and the town is designated by all the three functions.

9. The same procedure is followed in deciding the predominant functional character of the town in 1971 also. It must, however, be pointed out that in 1971 census the workers were grouped under slightly different nine industrial categories. They are :

I Cultivators
II Agricultural labourers
III Live-stock, forestry, fishing, hunting and plantations, orchards and allied activities
IV Mining and quarrying
V Manufacturing, processing, servicing and repairs
(a) Household industry
(b) Other than household industry
VI Construction
VII Trade and commerce
VIII Transport, storage and communications
IX Other services

The above categories are grouped as :

(i) *Primary activity*: Agriculture and its allied activities (Categories I, II, III and IV)

(ii) *Industrial*: Industries including construction (Categories V (a), V (b) and VI)

(iii) *Commercial*: Trade and commerce (Category VII)

(iv) *Transport*: Transport, storage and communications (Category VIII)

(v) *Service*: Other services (Category IX)

Based on the above criteria the towns of the district have been classified into the following functional categories.

TABLE 3

FUNCTIONAL CATEGORY OF TOWNS 1971

Functional category	Name of town (s)
1	2
Primary activity	Haripad, Pandalam
Industrial	Shertalai
Primary activity-cum-service	Mavelikkara
Service-cum-primary activity	Thiruvalla
Primary activity-cum-commercial-cum-industrial	Kayamkulam
Industrial-cum-service-cum-commercial	Alleppey
Service-cum-primary activity-cum-commercial	Chengannur

Statement II

10. The second statement gives the location and physical aspects of the town. It also furnishes details of the nearest railway station, navigable river/canal, sea-port, etc. The bus route and road facilities available in each town are also given in the statement. Alleppey, the headquarters of the district, is the only city in the district with a population of more than one lakh. Alleppey municipality has got a sea-port within its limits. The distances of other towns from Alleppey have also been indicated in the statement. Railway facilities are available only in respect of Chengannur, Kayamkulam, Mavelikkara and Thiruvalla towns within a distance of 10 km. All the towns have navigable river/canal within a limit of 10 km.

Statement III

11. The third statement gives an idea of the municipal finance of the municipalities. It has been possible to present the statement of receipt and expenditure for the year 1969–70 obtained from the official sources only for the municipalities. In respect of the other towns, which are not municipal towns, these figures could not be furnished. Table 4 gives the *per capita* receipt and expenditure of the municipalities.

M—Municipality

Statement IV

12. Statement IV indicates the civic and other amenities available in the towns i.e. details on system of sewerage, method of disposal of night-soil, drinking water facilities, electrical facilities, etc. Except Chengannur, Mavelikkara and Thiruvalla all the other towns have got protected water supply schemes. Alleppey and Kayamkulam municipalities have got the facility of fire fighting service. All the towns in this district are electrified.

Statement V

13. Medical, educational, recreational and cultural facilities available in the various towns are furnished in this statement. All the towns have got medical and educational facilities. There is a medical college in the district situated in Punnapra village, 10 km. away from Alleppey municipal town. Taking into consideration all the medical institutions (other than private institutions) there are 912 beds in the urban areas of the district. This works out to an average of three beds per 1,000 population as against eight beds for 1,000 population in Trivandrum district.

14. The School Educational system adopted in Kerala is as follows. At present the duration of school course is 10 years. Standards I to IV constitute the Lower Primary Section while standards V to VII constitute the Upper Primary (Middle) Section. The Secondary (High) School Section has standards VIII, IX and X.

Statement VI

15. Statement VI gives details in respect of trade, commerce, industry and banking.

VILLAGE DIRECTORY

16. The Village Directory gives details in respect of medical, educational, electrical and drinking water facilities available in the villages besides giving an idea of the pattern of land use in the villages. The area of each village, in square kilometres is also indicated, in the Village Directory. In this connection it may be pointed out that the area figures were collected from the Tahsildars as well as from the Director of Survey and Land Records. In a few cases it is seen that the area of the village as given by the Tahsildars do not agree with the area furnished by the Director of Survey and Land Records. Since the break up of the area of villages according to type of land-use is presented in this part and since this information can be furnished only by the Tahsildars the area figures as given by Tahsildars are adopted. In part B of District Census Hand Book where the Primary Census Abstract is presented down to the village level, the area of villages as furnished by the Director of Survey and Land Records is adopted. The table given below shows the distribution of villages by size.

TABLE 5

Educational facilities

17. The extent of educational facilities available in the villages can be studied more profitably with the following table. It gives the categorisation of villages according to the distances from the nearest town. The number of villages having primary schools, middle schools, high schools and colleges for these categories are also indicated. All the villages except two are within a distance of 25 km. from the nearest town. 11 villages have colleges, 79 villages have high schools and 89 villages have middle schools.

Medical facilities

18. Under medical facilities, details of both public and private institutions are given. Almost all the villages in the district have got medical facilities of one kind or the other. The table below gives the number of medical institutions per 100 sq. km. of area in each taluk.

TABLE 7

Communication facilities

19. From the point of view of communications it is seen that though most of the villages in the district are served by pucca roads only 4 villages have railway facilities within 2 km. The following table gives the distribution of the villages by the distance from the nearest railway station.

Post and Telegraph facilities

20. Ninety-two villages have post offices, 36 villages have telegraph offices and 51 villages have public call facilities. The table given below furnishes the details of post and telegraph facilities available in each taluk of the district.

Land utilisation

21. For the first time an attempt has been made to collect data on land utilisation. For this purpose the total area has been classified into five types viz. (1) forest area (2) irrigated land (3) unirrigated land (4) culturable waste and (5) area not available for cultivation. The pattern of land use in the various taluks of this district is approximately brought out in the following table:—

TABLE 10

22. An abstract showing the educational, medical and other facilities available in the rural areas of each taluk and the district is also presented in this volume.

Definitions

23. The definitions of certain terms adopted are furnished below:

I. Classification of electrical energy (Adopted by K.S.E.B.)

Domestic : Lights and combined installations of lights and fans and radios for domestic and non-commercial purposes. Domestic consumers and non-commercial institutions whose connected loads other than that of lights and fans exceed 1 KW and domestic heat and small power including refrigeration, cookers, sewing machines and other appliances for domestic use upto and including 3 H.P.

PART B

PRIMARY CENSUS ABSTRACT

INTRODUCTION

Situation and administrative units

Alleppey, the smallest district in the State is bounded on the north and north-east by Ernakulam and Kottayam districts respectively, on the east and on the south by the Quilon district and on the west by the Arabian sea. It lies between north latitudes 9°05′ and 9°52′ and east longitudes 76°17′ and 76°48′. This district has seven taluks viz. Shertalai, Ambalapuzha, Kuttanad, Thiruvalla, Chengannur, Mavelikkara and Karthigapally. There are 99 revenue villages and 8 towns. Of the eight towns viz. Shertalai, Alleppey, Thiruvalla, Chengannur, Mavelikkara, Pandalam, Haripad and Kayamkulam, 5 are municipalities and the others are non-municipal towns declared as such for census purposes. There are 17 development blocks and 96 panchayats in the district as on 1st April 1971. The following table gives the details of the administrative units of the district :

TABLE 1

Area and physical features

2. The total extent of Alleppey district as furnished by the Surveyor General, India is 1,884·0 km². As far as the district-wise area figures are concerned, the figures furnished by the Surveyor General, India have been adopted while for the taluks, the figures furnished by the State Director of Survey and Land Records have been presented in this part. Area of municipalities were obtained from the local bodies.

3. Based on the physical features, the entire State is divided into three natural divisions viz. (i) the mountainous region—highland (ii) the flat coastal belt—lowland and (iii) the undulating area in between the above two regions—midland. The classification into natural divisions is as follows. The region which lies below 25 feet above the mean sea level is classified as lowland, between 25 feet and 250 feet above mean sea level as midland and the remaining region which is covered by forests and mountains as highland. Shertalai, Ambalapuzha, Kuttanad and Karthigapally taluks lie entirely in lowland region whereas Thiruvalla, Chengannur and Mavelikkara taluks lie in midland and lowland regions. The following table gives the population of the districts by natural divisions.

Population and growth rate

4. The census enumeration was originally programmed to commence on the 10th February and end on 28th February 1971, the reference date for the census being the sunrise of 1st March 1971. The mid-term Elections to the Fifth Parliament made it necessary to postpone the census enumeration by a month. The enumeration, therefore, commenced on the 10th March and ended on 31st March 1971 with the reference date as the sunrise of 1st April 1971. The population of Alleppey district as at the sunrise of 1st April 1971 is 2,125,722 of which 1,048,082 are males and 1,077,540 are females. The net addition to the population of the district between 1961 and 1971 is 320,205, thereby recording a decennial growth rate of 17·73% during the decade as against the State growth rate of 26·29%. The rate of growth recorded during the previous decade 1951–61 was 19·03%. The table given hereunder shows the population of the district from 1901 onwards and the decennial growth rates.

5. Among the taluks of the district, Ambalapuzha, the smallest taluk in the district has the highest growth rate of 22·08% during the decade while Kuttanad ranks last with 10·92%. Highest percentage of population of the district is claimed by Shertalai taluk with 17·86%, while Kuttanad comes last with 8·83%. Table 4 below furnishes taluk-wise population and decennial growth rate.

Rural-urban distribution

6. Owing to the growing importance of urbanisation, the 1961 Census laid down a uniform threefold-criteria for classification of places as towns. Corporations, Municipalities, Cantonments and Townships were automatically recognised as towns. The following were the threefold-criteria adopted for treating the other areas as towns:—

(i) Places with a minimum population of 5,000 persons,

(ii) A density of not less than 1,000 persons per sq. mile 400 persons per sq. km.) and

(iii) Atleast 75% of the male population should follow non-agricultural livelihoods.

However, places which did not satisfy the above criteria but had definite urban characteristics like newly established industrial areas, large housing settlements, places of tourist and pilgrim importance etc. were also treated as towns as exceptional cases on the recommendation of the State Government. The definition of census town remained unchanged in 1971.

7. There are 8 towns in Alleppey district viz. Shertalai, Alleppey, Thiruvalla, Chengannur, Mavelikkara, Pandalam, Haripad and Kayamkulam. All of them were towns in 1961 also. While there has been an increase in jurisdiction of Mavelikkara and Haripad towns, there is a reduction in jurisdiction in respect of Chengannur town. All the above 8 towns together take in 16·92% of the total population of the district. The following table presents the rural-urban distribution of population of Alleppey district from 1901.

8. The following table gives the rural-urban distribution of population in the taluks of the district. The percentage of urban population is highest in Ambalapuzha taluk with 48·59%. The only city in the district Alleppey with a population of above one lakh lies in this taluk.

Density of population

9. The density of population of the district has increased from 958 persons per sq. km. in 1961 to 1128 persons in 1971. The same trend is also noticed in all the taluks of the district. Ambalapuzha taluk has got the highest density with 1,472 persons per sq. km. in 1971 and Kuttanad taluk has the lowest with 706. The taluk-wise density is given hereunder:

Sex-ratio

10. Sex-ratio (defined as the number of females per 1,000 males) of the district shows a fluctuating trend from decade to decade. Taking the population of the district as a whole, from 1901 to 1931, males outnumber females, whereas from 1941 onwards females outnumber males. In the case of rural areas males outnumber females from 1901 to 1921 and thereafter the trend is reversed. As far as the urban areas are concerned there is preponderance of females only in 1961 and 1971 when compared to previous censuses. The table below gives the sex-ratio of the district for the period 1901–71.

11. Among the taluks, Karthigapally taluk has the highest sex-ratio in 1971 (1057), the lowest being Kuttanad taluk with 1,002 females per 1,000 males. In 1961 also the highest sex-ratio was in Karthigapally taluk, while lowest sex-ratio was in Ambalapuzha taluk. Table 9 furnishes the taluk-wise sex-ratio with rural-urban break up for 1961 and 1971.

Literacy

13. According to 1971 census, this district has the highest literacy rate with 70·44 per cent as against the State rate of 60·42 per cent. The literacy rate of the district has increased from 56·90 per cent in 1961 to 70·44 per cent in 1971. The same trend is noticed in the case of males and females and also in all the taluks. Among the taluks, Thiruvalla has the highest literacy rate of 78·29 per cent the lowest being in Shertalai taluk with 66·07 per cent. The following table gives the taluk-wise literacy rates of the total population, males and females.

Occupied residential houses and households

15. Occupied residential houses have shown an increase of 13·63 per cent in the district during the last ten years as against the State rate of 21·93 per cent. Among the taluks, Chengannur ranks first with 17·31 per cent, the last being Kuttanad with 1·83 per cent. The rural-urban distribution of occupied residential houses is indicated in the following table.

Working population

21. The total number of workers in the district as per the 1971 Census count is 598,468 of which 452,061 are males and 146,407 are females. 28.15% of the total population is returned as workers. The work participation rates for males and females are 43.13 and 13.59 respectively. The percentage of workers to total population shows a decline from 33.72 in 1961 to 28.15 in 1971. The same trend is noticed in all the taluks of the district. The decline in the percentage of working force to a large extent would be attributable to the definition placed on the term 'worker' in the 1971 Census.

22. In 1971, a worker was defined as 'a person whose main activity is participation in any economically productive work by his/her physical or mental activity' whereas in 1961 Census a worker was taken to mean a person who engaged himself/herself in any economically productive work without regard to his/her main activity. According to the 1971 definition 'a man or a woman who is engaged primarily in household duties such as cooking for own household or performing one's own household duties or a boy or girl who is primarily a student attending an institution, even if such a person helps in the family economic activity, but not as a full-time worker should not be treated as a worker for the main activity. Such participation in economically productive work was regarded as secondary work of the particular person. But such categories of persons were classified as workers during 1961 Census. In 1961, in the case of regular employment in any trade, profession, service, business or commerce a person was taken as a worker if he was employed during any of the fifteen days, preceding the day on which he was enumerated. But in 1971 Census the reference period was only one week prior to the date of enumeration in the case of regular work in trade, profession, service, etc. The data relating to the secondary work and the results of the survey regarding the comparability of economic questions in 1961 and 1971 censuses will throw some more light on the reasons for the decline of the working force in 1971. The following table gives the workers and work participation rates for the district and taluks:

24. The total population has been divided broadly into two, viz. workers and non-workers. The workers have been further divided into industrial categories. In 1961 the workers were grouped under nine industrial categories as shown below :—

I Cultivators

II Agricultural labourers

III Mining, quarrying, live-stock, forestry, fishing, hunting and plantations, orchards and allied activities

IV Household industry

V Manufacturing other than household industry

VI Construction

VII Trade and commerce

VIII Transport, storage and communications

IX Other services

In 1971 census, the workers were grouped under slightly different nine industrial categories. They are

I Cultivators

II Agricultural labourers

III Live-stock, forestry, fishing, hunting and plantations, orchards and allied activities

IV Mining and quarrying

V Manufacturing, processing, servicing and repairs

(a) Household industry

(b) Other than household industry

VI Construction

VII Trade and commerce

VIII Transport, storage and communications

IX Other services

25. Among the total workers, 16.01% are cultivators and 30.66% are agricultural labourers. 24.47% of the male workers are agricultural labourers and 20.55% are cultivators, while among females 49.77% are agricultural labourers and 1.97% are cultivators.

26. The following table gives the distribution of workers of the district into nine industrial categories by sex.

* This represents ' Geographical area ' figure supplied by the Surveyor General. Figures for urban area are those supplied by the local bodies. Area figures for rural area are derived by subtracting the urban area from the total area of the District. The total of the area figures of the taluks will not tally with the district figure because the former represents ' land use ' area and are derived from the figures supplied by the Director of Survey and Land Records.
