MOTIF

Jwari (Jowar) is the major food crop of Maharashtrians, more particularly so of the people in the rural areas. It's area under cultivation is more than six times that of wheat and four times that of rice in the State. Not only this but more than two-fifth area under jowar cultivation in India is in Maharashtra. The out-turn during the year 1980-81 was to the tune of 44 lakh tonnes which is about half the total production of the cereals in the State. Thus, its importance is well recognised and accordingly Jowar Reserarch Centre has been established under Panjabrao Agriculture University at Akola, since April 1976. It co-ordinates various schemes, sponsored by the State and Central Governments, for the development and research in Jowar.

FOREWORD

The District Census Handbook (DCH), compiled by the Census organisation on behalf of the State Government, is one of the most valuable products of the census. The DCH is constantly referred to by planners administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulating local level and regional plans and as an aid to district administration. The district census handbook is the only publication which provides Primary Census Abstract (PCA) data up to village level for rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The district census handbook series was initiated during the 1951 census. It contained important tables and PCA for each village and town of the district. During 1961 census the scope of the DCH was enlarged and it contained a descriptive account of the district administrative statistics census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village. and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the format of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column " total population and number of households " has been introduced to examine the co-relation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of SC and ST population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums, in class-I and class-II towns (statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic and other amenities and adult literacy classes/ centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns of civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part-A of the volume contains village and town directory and Part-B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri P. P. Mahana, the Director of Census Operations, Maharashtra on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA
Registrar General, India.

New Delhi:
The 26th April 1982.

ACKNOWLEDEGMENTS

The preceding foreword of the Registrar General and Census Commissioner, India, is quite exhaustive and gives the reader a complete account of the District Census Handbook Project. As has been mentioned therein the publication of District Census Handbook of Maharashtra is a joint venture of the Government of Maharashtra and the Census Organisation of the Government of India. The design for the 1981 District Census Handbooks was evolved centrally by the Census Commissioner, India. The contribution of the Government of Maharashtra comes by way of bearing the cost of printing. We are thankful to the Census Commissioner and to his band of devoted officers in the Social Studies Division for the valuable guidance they have given us, and to the Government of Maharashtra for the readiness they have shown to print and publish these handbooks. Our grateful thanks are also due to the District Inspectors of Land Records for helping us in marking village boundaries of the tahsil maps we have prepared and presented in these handbooks, and for recording a certificate of authenticity on each such map we referred to them.

Shri P. P. Mahana, who held the office of Director of Census Operations, Maharashtra, and guided the operations of the 1981 Census, left this organisation on 14th December 1982. The data presented in these handbooks were collected and compiled under the direction and guidance of Shri Mahana. We would deem it our duty, therefore, to offer him our sincere and grateful thanks for all that he did for this project.

In this directorate, the undersigned exercised overall supervision over the work of the project, while the main brunt of day-to-day supervision was borne by Shri A. S. Dange, Deputy Director. He was ably assisted in this work by Shri Madhav Shyam, Research Officer (Map) and Smt. V. Y. Joshi, Shri G. M. D. Lone and Shri V. S. Nagle, Assistant Directors. The list of their colleagues in the District Census Handbook Unit who put in untiring efforts to bring the project to fruition is fairly long and is not being given here for want of space. However, all these unnamed assistants in various grades who attended to the voluminous work of compilation, typing, comparing, checking and mapping, etc., deserve our heart-felt thanks.

A. W. MAHATME,
Joint Director of Census Operations.

Census Directorate, Maharashtra, Bombay.
Dated 26th January 1984 (Republic Day).

ANALYTICAL NOTE
HISTORY AND SCOPE OF DISTRICT CENSUS HANDBOOK

The District Census Handbook compiled by the State Directorate of Census Operations is, in effect, a joint venture of the State Government and the Census Organisation of the Govc rmei t of India. Its publication was started from 1951 census Not only has it become a regular feature of every census but even its coverage has been enlarged and rationalized. Naturally, this document is constantly being consulted by the planners, administrators, academicians and researchers alike The 1981 district census handbook is the fourth in the unbroken series.

In 1951, district census handbook contained important census tables and the primary census abstract for each village and town in the district. The scope of district census handbook was enlarged at the 1961 census by including descriptive account of the district and administrative statistics in addition to the census tables and the primary census abstract of every village and town. The 1971 district census handbook series was organised in three different parts. Part A related to the village and town directory. Part B to village and townwise Primary Census Abstract (PCA) and part C to analytical report, administrative statistics, census tables, analytical tables based on the PCA and amenity data for every village. However, for Maharashtra State (as also for many other States in India), only Part A and Part B of the district census handbook were published. Part C had to be given up mainly because of the problems relating to printing.

1981 district census handbook is comprised of two parts—Part A and Part B. Part A includes village and town directory and Part B village and townwise primary census abstract. While designing the format of 1981 district census handbook, data on some new items, such as adult literacy centres, primary health sub-centres and community health workers has also been included.

Village and Town Directory as well as primary census abstract included in the district census handbook are expected to meet the requirements of the planners for micro level planning. Similarly, the additional data for town directory in respect of civic and other amenities in Class I and Class II towns are oriented to minimum needs programme especially in respect of slum dwellers. The data on amenities by size of town would be of great interest to the scholars and planners alike.

Brief History of the District

In the ancient period of the Akola district was the part of Dandakaryanya where in some ashrams were noted for being the centres of education. In 1853, Berar which formed a part of the Nizam's dominion was assigned to the East India Company in liquidation of the large debt due on account of arrears of pay of the Hyderabad contingent and as a security for the future payment of that force At that time, Berar was divided into two districts, South Berar (the Balaghat) with headquarters at Hingoli and North Berar with headquarters at Buldana. After 1857, Hingoli with its neighbouring area was restored to the Nizam and Berar was reconstituted into two districts, East Berar with headquarters at Amravati and West Berar with headquarters at Akola. In 1903, the treaties of assignment were superseded by an agreement under which the Nizam leased Berar to the Government of India in perpetuity Administration of Berar was transferred from Hyderabad to the Chief Commissioner of Central Provinces. Some area was also transferred in 1875 to the newly created Basim (Washim) district. Mangrul taluka was newly created in that district in the same year.

In 1857, again when Washim district was created, some parts were transferred and the district and tahsil boundaries were completely overhauled in 1905. Murtizapur tahsil was transferred from Amravati to Akola district and Khamgaon and Jalgaon tahsils were transferred from Akola to Buldana district. The Washim district was broken up and two tahsils of Washim and Mangrulpir were included in Akola district. There were no major changes in the boundaries of the district or its tahsils between 1911 and 1955. With the reorganisation of the states in 1956, the district was transferred from Madhya Pradesh to the Bombay and thus the district forms a part of Maharashtra State since 1st May 1960.

At the time of 1961 census, the district comprised of 6 tahsils which in themselves included 1,507 inhabited villages and 9 towns. At the time of 1971 census, the district had 6 tahsils comprised of 1,708 villages (including 219 uninhabited) and 9 towns. Since 1961 number of tahsils and towns in the district remained unchanged till the reference date of 1st March 1981. However, there have been certain changes as to the number of villages within the tahsils during the decade 1971—81. With the upgrading of hamlets/wadies in the district, the number of villages has gone upto 1,743 (including 197 uninhabited villages).

Location, Relief and Drainage

The district lies between 19°51 and 21°16' North latitude and 76°38' and 77°44' East longitude. The district Akola lies in the Western parts of the Nagpur division of Maharashtra State and is surrounded by Amravati district in the North, Amravati and Yavatmal districts in the East Parbhani and parts of Yavatmal district to the South and Buldana district towards the West. The area of the district is 10,575.0 km^2 and its population in 1981 is 1,826,952. It ranks 15th in area and 20th in population among the 26 districts of Maharashtra State. It seems that Akola is one of the smallest districts in the state in respect of area and its population also.

In relief, the district shares a similarity of topographical arrangements as found in Buldana district It also falls into two physical units. The Northern part of the district lies in the Purna valley which is itself a part of Tapi river basin The river Purna is a chief tributary of the river Tapi, has formed fertile basin the four tahsils of the district viz. Akot in Balapur, Akola and Murtizapur. This portion of the district is known as ' Payanghat '. The southern part is known as ' Balaghat ' and is drained by Penganga (which is a tributary of Godavari river) and its tributaries.

The district has no mountains of importance but Gawilgad hills are spread over the northern part of the district These hilly parts are the branches of Satpuda hills To the south in Washim tahsil, are the ranges of the Ajanta hills which have formed a plateau. This plateau, known as a Balaghat, forms one of the great watersheds in the country as the region to its north is drained by Purna in the western direction to Tapi while that situated on the Plateau and to its south is drained by Penganga towards the east ultimately joining Godavari

The Purna is the chief river of the district. It rises in Betul district of Madhya Pradesh and flows due west across Akola district into Buldana district. It forms

the northern boundary of Murtizapur, Akola and Balapur tahsils and southern boundary of Akot tahsil. The chief tributaries of the Purna on the south bank are the Pendhi, Uma, Katepurna, Nirguna and Man. The Katepurna, which is the largest of all the tributaries, rises within a few kilometres of Washim and flows across the eastern side of Akola tahsil and the north-western corner of Murtizapur. The Penganga, which flows south-east across Washim tahsil, maintains its current throughout the year.

Climate

The climate of this district is characterised by hot summer and general dryness throughout the year except during the south-west monsoon season. The rainy season starts in the beginning of June and lasts upto the end of September. It is followed by sultry weather from the beginning of October to the middle of November, winter from the middle of November to the end of February and dry hot season from the last week of March to the end of May. A good breeze almost always blows during the hot weather and makes the nights comparatively cool and comfortable. The district has extremes of climate. Summers are too hot and the winters are too cold.

Within the district, the seasons show local variations. The hilly tracts of the district consisting of Washim and Mangrulpir tahsils have a slightly heavier rainfall and slightly cooler climate than others. Akola, Akot and Balapur towns are considered to be the hottest places and their's maximum temperature is 45.1°, 47.0° and 49.0° centigrade respectively. The lowest minimum temperature in Akola town is 19.7° centigrade.

The rainfall is not uniform in all parts of the district. Akola district falls in the medium rainfall zone of Maharashtra State having in average rainfall between 750 to 1,000 mm. The rainfall generally increase from the north-west towards the south-east in the district. The rainfall is more in the southern part than in the northern part. The intensity of rainfall is greatest in July. Out of 9 towns of Akola district, the highest annual rainfall in Washim town, i. e. 926.8 mm and the lowest in Telhara town i. e. 767.3 mm. The Statement II of town directory indicates the maximum and minimum temperature and normal annual rainfall in towns of Akola district.

Soil

The soils in the district are basically derived from the Deccan trap rock and are well-known for their fertility The great plain of the Payanghat occupies the northern half of the district and contains mainly rich black soil. The Central part of Washim tahsil and north-western part of Mangrulpir tahsil have good black soil. On the plateau the soils are shallow with murum substratum. On the eastern side from Akola to Akot there is a saline tract on both sides of river Purna in which formerly salt used to be manufactured.

The greater portion of the Murtizapur tahsil is a rich black soil plain gradually rising towards the south. Three quarter of the Balapur tahsil is deep black fertile soil. The richer portion lying towards the norths. This area is devoted entirely to the growth of kharif crops and it is more dependent on the rainfall. The northern half of the Mangrulpir tahsil consists of an undulating table land containing black soil of a productive nature. The southern portion of this tahsil is mountainous and rough, soils being mostly poor and shallow and communications difficult. Akot tahsil is the most fertile portion of the Purna valley and is chiefly a rich black soil country, well cultivated, thickly populated and well wooded with mango groves

Akola taluka is an open widely cultivated tract, possessing rich deep black soil East of the Katepurna river the tract is stony. Near the hills on the southern border, shallow and inferior soils predominate.

In Washim tahsil soils vary considerable both in nature and depth, the richest portion being the centre of the tahsil where there are extensive soil plains devoted chiefly to the growth of wheat and other winter crops.

Census Houses and Households

Columns (4) and (5) of the primary Census abstract give the number of occupied residential census houses and the number of household According to Indian Census, ' Census House ' is a building or a part thereof having a main entrance from the road or common court yard or staircase, etc. It may be occupied or vacant, residential, non-residential or both. A ' household ' is a group of persons who commonly live together and would take their meals from a common kitchen, unless the exigencies of work prevented them from doing so. A 'household ' may be of persons related by blood or unrelated persons or having a mix of both. There may be single member or more than one member households Households of unrelated persons termed as ' institutional households ' include boarding houses, messes, residential hotels, rescue homes, jails, ashrams etc.

Houseless population or houseless households include persons who do not have any fixed place of residence but go on moving from place to place, camp at night, or just live on the streets in gardens or in open place

Distribution of Population in Rural and Urban Areas

As per 1981 census, the population of Akola district stands at 1,826,952 including 937,824 males and 889,128 females. This makes 2 91 per cent of states population over 3.44 per cent of its area. Among the 6 tahsils in the district, Akola tahsil (513, 059) is the most populous (Table 1).

TABLE 1

Population, Number of villages and towns

Serial No.	Name of Tahsil	Population									No. of villages		No. of towns
		Total			Rural			Urban			Total	Inhabited	
		P	M	F	P	M	F	P	M	F			
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)	(14)
1	Akola	513,059	266,306	246,753	287,647	148,361	139,286	225,412	117,945	107,467	351	301	1
2	Akot	280,428	144,006	136,422	217,288	111,491	105,797	63,140	32,515	30,625	287	256	2
3	Murtijapur	246,772	125,931	120,841	178,032	90,692	87,340	68,740	35,239	33,501	311	260	2
4	Mangrulpir	207,865	106,595	101,270	189,990	97,250	92,740	17,875	9,345	8,530	263	226	1
5	Washim	371,683	188,729	182,954	331,879	168,225	163,654	39,804	20,504	19,300	343	332	1
6	Balapur	207,145	106,257	100,888	167,454	85,573	81,881	39,691	20,684	19,007	188	171	2
	District Total..	1,826,952	937,824	889,128	1,372,290	701,592	670,698	454,662	236,232	218 430	1,743	1,546	9

Other tahsils in order of their size of population are Washim (371,683), Akot (280,428), Murtizapur (246,772), Mangrulpir (207,865) and Balapur (207,145). It follows that within the district the most populous tahsil has about two and half times the population of the least populous tahsil.

The basic unit for rural area is a revenue village. A 'village' may be defined as a statutory recognised unit having definite boundary and separate land records. Urban areas on the other side are specially defined for census purposes. The criteria adopted for 1981 census is :

(*a*) All places with a municipality, corporation or cantonment board or notified town areas.

(*b*) All other places which satisfy the following criteria :

(*i*) A minimum population of 5,000;

(*ii*) At least 75 per cent of male working population engaged in non-agricultural (and allied) activities;

(*iii*) A population of atleast 400 persons per km^2.

Out of 1,826,952 persons in the district, 1,372,290 (75.11%) live in the country side and the remaining 454,662 (24 89%) in the towns. Thus in Maharashtra state (where 35.03 per cent of the total population is urban) Akola is fairly urbanised district

Size Class and Status of Towns

For the purposes of comprehensive analysis of varied demographic characteristics, towns have been divided into the following classes by population size :

Class I	.. ..	100,000 and above
Class II	.. ..	50,000—99,999
Class III	.. ..	20,000—49,999
Class IV	.. ..	10,000—19,999
Class V	.. ..	5,000—9,999
Class VI	.. ..	below 5,000

On the basis of above classification only one (Akola) is class I, one (Akot) is class II, four (Balapur, Karanja, Murtijapur and Washim) are class III and three (Mangrulpir, Patur and Telhara) are class IV towns (Statement I). There is, however, no class V and VI town in the district. No new town has been added in the district nor has any one been declassified during 1981 census (Table 2).

TABLE 2

New Towns/Towns declassified in 1981 census

Name of the town (1)	Population 1981 census (2)
(*a*) Added	Nil
(*b*) Declassified	Nil.

All the nine towns in the district have Municipal Committees established under the C. P. and Berar Municipal Act, 1922. The municipality of Akola is nearly a hundred years old and at Mangrulpir was established in 1959. There are two big sized towns in this district namely Akola and Akot. The remaining seven towns are either medium sized or small sized.

Urban Agglomeration

There is no urban agglomeration in this district.

Standard Urban Area

Standard Urban Area (S. U. A.) concept introduced in 1971, has been followed in 1981 as well. The essential requirements for the constitution of S. U. A. are :

(*i*) It should have a core town of a minimum population of 50,000 :

(*ii*) The contiguous areas made up of other urban as well as rural administrative units should have mutual socio-economic links with the core town ; and

(*iii*) In all probability this entire area should get fully urbanised within a span of two or three decades.

The constituent units of Akola Standard Urban area in Akola district are as follows :—

Akola S. U. A.—

Urban Components :

1. Akola City (M).

Rural Components :

1. Naigaon.	2. Akola (Rural).
3. Umarkhed.	4. Umari (Pr. Akola).
5. Umari (Pr. Balapur).	6. Malkapur.
7. Khadki Bk.	8. Kaulkhed.

Table 3 shows villages by population ranges and their percentage to total inhabited villages in the district.

TABLE 3

Distribution of Inhabited villages by population ranges

Range of population (1)	No of villages in each range (2)	Percentage of villages in each range (3)
—200	236	15 26
200—499	399	25 81
500—1,999	787	50.91
2,000—4,999	105	6 79
5,000—9,999	12	0 /
10,000+	7	0 45
All ranges ..	1,546	100 00

A village on an average has a population of 888 persons and 6.7 km^2 of area. Out of 1,546 inhabited villages, 236 (15.26%) are small sized with a population of below 200 ; 399 (25.81%) in the size class 200—499 ; 787 (50 91%) in the range of 500—1,999 ; 105 (6.79%) in the range of 2,000—4,999 ; 12 (0.78%) in the range of 5,000—9,999 and the remaining 7 (0.45%) in the range of 10,000 and above population. For a broader generalisation the villages have been further grouped as : small sized (population below 500), medium sized (500—1,999), large sized (2,000—4,999) and exceptionally large sized (5,000+). Within the district small sized villages share 41 07 per cent of the total inhabited villages with 11.60 per cent of the rural population in the district ; medium sized 50.91 per cent of villages and 54.12 per cent of the rural population, large sized 6.79 per cent of villages and 22.35 per cent of the rural population and exceptionally large sized 1.23 per cent of villages and 11.93 per cent of rural population.

Population Growth, Density and Sex Ratio

The Akola district registered a growth rate of 21.68 per cent during the decade 1971—81. The decade added 325,474 persons to the 1971 population of the district. However, the growth rate of population in Akola district (21.68%) was slightly lower than that of Maharasntra State (24.54%). During the earlier decade of 1961-71 the growth rate of the district was 26.24 per cent but probably due to draught and scarcity conditions the district population decreased by 4.56 per cent in the decade 1971—81. Within the district there are significant differences in the rates of growth of population in various tahsils. Akola tahsil records the highest growth rate of 31.64 per cent, while Balapur has the lowest growth rate viz ; 15.71 per cent. Only Akola tahsil is above the district average and remaining five tahsils are below the district average. The highest percentage of growth rate in Akola tahsil may be the reason of increase in trade, commerce and industries at Akola and nearby places. It is also observed that during 1971-81 the urban growth rate was higher than the rural growth rate in all the tahsils of Akola district (Table 4).

TABLE 4

Decadal Changes in Distribution of Population

Name of Tahsil	Population						Percentage decadal (1971-81) variation		
	1971			1981					
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
1. Akola	389,745	221,307	168,433	513,059	287,647	225,412	+31 64	+29.98	+33.82
2. Akot	236,689	185,700	50,989	280,428	217,288	63,140	+18.48	+17.01	+23.83

4. Mangrulpir ..	175,158	161,071	14,087	207,865	189,990	17,875	+18.67	+17.95	+26.89
5. Washim ..	313.569	281,073	32,496	371,683	331,879	39,804	+18.53	+18.08	+22.49
6. Balapur ..	179,020	145,972	33,048	207,145	167,454	39,691	+15.71	+14.72	+20.10
District Total ..	1,501,478	1,148,129	353,349	1,826,952	1,372,290	454,662	+21.68	+19.52	+28.67

At the time of 1951 census, the urban growth rate of (22.28%) was very low as compared to the state average (62.42%) (Table 5).

TABLE 5

Growth, Density and Sex-Ratio of Urban Population in the District in relation to the State

N.A.—Not Available.

In 1961, it came up to 25.02 per cent in the district but in the state it came down to 21.32 per cent. During 1961-71 urban growth rate in the district and the state is 34.44 per cent and 40.75 per cent respectively. At the latest census of 1981, the district recorded an urban growth rate of 28.67 per cent against the state average of 39.99 per cent. Among the various towns in the district Akola recorded the highest (33.82%) growth rate (Statement I). Except Akola town, the remaining towns in the district are below the district average in growth rate. Telhara in Akot tahsil, recorded the lowest growth rate (18.50%) during 1971—81.

Akola district has an average density of 173 persons per km². This is sharply lower than the state average density of 204 persons per km2. Within the district, the density varies from 269 persons per km² in Akola tahsil to 130 persons per km² in Mangrulpir tahsil. The high density in Akola tahsil is due to the inclusion of Akola city. Akot tahsil is the second in density because of the very fertile soils and the predominance of labour intensive cultivation of cotton in its cropping pattern. The densities in Mangrulpir and Washim are comparatively lower because of more hilly area and comparatively lower proportions of rich soils.

Table 6 shows distribution of villages according to density ranges.

TABLE 6

Distribution of villages by density

Ranges of density (Per km.²) (1)	Total No of villages in each density range (2)	Percentage of villages in each density range (3)
—10	57	3 69
11—20	28	1.81
21—50	127	8 22
51—100	412	26 65
101—200	680	43.98
201—300	150	9.70
301—500	72	4 66
501+	20	1 29
Not known	..	..
All density ranges ..	1,546	100.00

For convenient understanding of patterns, villages have been grouped under eight different density ranges. Table reveals that about more than three-fourth (1,304) of the inhabited villages recorded density of upto 200 persons per km². In about less than one-seventh (222) villages varied between 201 and 500, and only 20 villages recorded a very high density of more than 500 persons per km². In conformity with the state pattern there has been consistent rise in the urban density of population in the district since 1961. It has increased from 1,329 persons per km² in 1961 to 3,041 persons per km² in 1981 (Table 5). Among the various towns in the district, Akola city recorded the highest density (10,796) and Telhara recorded the lowest (520) as per 1981 census (Statement I).

The following table shows the sex ratios for the district and the state (number of females per 1,000 males) since 1901.

TABLE 6 (i)

Sex Ratio 1901—1981

Year	District	State
1901	968	978
1911	968	966
1921	958	950
1931	952	947
1941	957	949
1951	960	941
1961	938	936
1971	941	930
1981	948	937

This shows that in 1981 census Akola district recorded a sex ratio of 948 females per 1,000 males.

Since 1901 the sex ratio of the population of the district fluctuated between 941 and 968 compared to that of Maharashtra which varied between 930 and 978. In 1901, Akola district had a lower sex ratio than Maharashtra State. Since then at each censuses the sex ratios of Maharashtra State is lower than those of the district. The sex ratio decreased gradually till 1931, when it reached the lowest value of 952 and further it increased in 1941 and 1951, but has fallen up to 938 in 1961 and increased to 948 in 1981. The 1961 census has recorded the lowest sex ratio since 1901 in the district.

The following table shows the sex ratio for each tahsil in the district for total areas.

TABLE 6 (ii)

Sex Ratio by Tahsils, 1981

District/Tahsils	Females per 1,000 males
Akola District	948
Akola tahsil	927
Akot tahsil	947
Murtijapur tahsil	960
Mangrulpir tahsil	950
Washim tahsil	969
Balapur tahsil	950

Within the district, the sex ratio varies from 969 in Washim tahsil to 927 in Akola tahsil. Akola tahsil which includes Akola city has the lowest sex ratio (927). Washim tahsil has the highest sex ratio (969).

The urban sex ration (925) in the district is higher than that of the state (850). Trend over the past few decades. (Table 5) reflects the gradual rise in the urban sex ration of the district and the state since 1961

Scheduled Castes and Scheduled Tribes

For evolving any suitable plan for socio-economic uplift of the scheduled castes and scheduled tribes, the Government need to have the necessary data about them and for this, census is the main source. One of the highlights of 1981 census, as that of 1971 and 1961 censuses, was the collection of detailed information on the socio-economic characteristics of scheduled caste and scheduled tribe population. There is no standard defination of scheduled castes or scheduled tribes. Scheduled castes include castes, races of tribes as are declared to be scheduled castes by the President of India by public notification under article 341 (1) of the Indian Constitution. Similarly, scheduled tribes mean all such tribes of tribal community or part or group. Within such tribe or tribal community as are declared by the Preisdent of India, to be treated as Scheduled tribes under article 342 (1) of the Indian Constitution. For Maharashtra State, 59 castes and 47 tribes have been declared to be recognised as scheduled castes and scheduled tribes respectively and the list of scheduled castes and scheduled tribes in the state is given below.

39. Parja.
40. Patelia
41. Pomla
42. Rathawa.
43. Sawar, Sawara
44. Thakur, Thakar, Ka Thakur, Ka Thakar, Ma Thakur, Ma Thakar
45. Thoti (in Aurangabad, Bid, Nanded, Osmanabad and Parbhani districts and Rajura tahsil of Chandrapur district)
46. Varli
47. Vitolia, Kotwalia, Barodia

At the time of 1981 census scheduled caste population in Akola district was 100,616 including 51,071 males and 49,545 females. They constitute 5 51 per cent of the total district population as against 4.77 per cent in 1971. Out of the total scheduled caste population

in the district 75,920 (75.46%) live in rural and the remaining 24,696 (24.54%) in the urban areas. In the district, 409 villages have no scheduled caste population (Table 7).

TABLE 7

Proportion of Scheduled Caste population to Total Population in the Villages

Percentage range of Scheduled Caste population to total population (1)	No of villages in each range (2)	Percentage of villages in each range (3)
No SC Population	409	26 45
—5	730	47 22
6—10	230	14 88
11—15	89	5.76
16—20	38	2 46
21—30	30	1 94
31+	20	1 29
All ranges	1,546	100 00

Among the remaining 1,137 villages, the share of scheduled caste population is less than 5 per cent in 730 villages ; 6 to 10 per cent in 230 villages ; 11 to 15 per cent in 89 villages ; 16 to 20 per cent in 38 villages ; 21 to 30 per cent in 30 villages and more than 30 per cent in 20 villages in the district.

Table 7 (1) shows tahsilwise proportion of scheduled caste and scheduled tribe population to the total population for 1971 and 1981.

TABLE 7 (1)

Scheduled caste and Scheduled Tribe Population 1971 and 1981.

District/Tahsil	Percentage of Scheduled Caste population to total population		Percentage of Scheduled Tribe population to total population	
	1971	1981	1971	1981
(1)	(2)	(3)	(4)	(5)
Akola District	4 77	5 51		6 28
Akola tahsil	4 30	5 15	..	4 86
Akot tahsil	4 14	4 84	..	6.98
Murtijapur tahsil	4 66	5 16		4 03
Mangrulpir tahsil	3 82	5 35		11 11
Washim tahsil	7.23	7 67		6 24
Balapur tahsil	3.35	3 98		6 75

As per 1981 census, the scheduled tribe population in Akola district stands at 114,759 comprising of 58,399 males and 56,360 females. Thus, they comprise 6.28 per cent of the population of the district. In the district 90.96 per cent of the scheduled tribe population is rural by residence and 9.04 per cent resides in the urban areas. In fact there was no notified scheduled tribe population in the district prior to 1981 and therefore no tables for scheduled tribes were presented in 1971 census. This sudden emergence of this population in 1981 is due to the removal of area restrictions for recognizing certain tribes as scheduled tribes in the state. In other words certain tribes which were not formerly recognised as scheduled tribes have been recognised as such now.

Out of 1,546 inhabited villages in the district, 656 villages have no scheduled tribe population (Table 8).

TABLE 8

Proportion of Scheduled Tribes Population to Total Population in the Villages

Percentage range of scheduled tribe population to total population (1)	No of villages in each range (2)	Percentage of villages in each range (3)
No ST Population	656	42 43
—5	406	26 26
6—15	205	13 26
16—25	104	6.73
26—35	47	3.04
36—50	30	1.94
51+	98	6 34
All ranges	1,546	100 00

Among the remaining 406 villages, the proportion of scheduled tribe population is less than 5 per cent in 205 villages; 6 to 15 per cent in 104 villages, 16 to 25 per cent in 47 villages, 26 to 35 per cent in 30 villages; 36 to 50 per cent and the remaining 98 villages fall in above 50 per cent

In urban areas, the scheduled castes and scheduled tribes constitute 5.43 per cent and 2.28 per cent of the total population respectively (Table 9).

TABLE 9

Proportion of Scheduled Caste / Scheduled Tribes population in towns

Name and Civic status of the town (1)	Total population (2)	Total Scheduled Caste population (3)	Total Scheduled Tribe population (4)	Percentage of Scheduled Caste population to total population (5)	Percentage of Scehduled Tribe population to total population (6)
Akola City (M. Cl)	225,412	11,278	5,028	5 00	2 23
Akot (M Cl)	51,936	2,583	742	4 97	1.43
Balapur (M Cl)	25,422	731	573	2 88	2 25
Karanja (M Cl)	39,749	2,213	1,181	5 57	2.97
Mangrulpir (M Cl)	17,875	756	700	4 23	3 92
Murtijapur (M Cl)	28,991	2,023	865	6 98	2 98
Patur (M Cl)	14,269	621	242	4 35	1 70
Telhara (M Cl)	11,204	862	292	7 69	2 61
Washim (M. Cl.)	39,804	3,629	753	9.12	1.89
All towns	454,662	24,696	10,376	5 43	2.28

Concentration of scheduled castes is more than the district average in the towns of Karanja, Murtijapur, Telhara and Washim, and scheduled tribes in the towns of Karanja, Mangrulpir, Murtijapur and Telhara.

Literacy

Any person who is able to both read and write with understanding in any language is recorded as a literate by the Indian Census. The latest 1981 census revealed that 47.82 per cent of the total population in the district is literate against the state average literacy rate of 47.18 per cent. Among the various districts in the state, Akola district ranks 9th in terms of literacy rate. Literacy rates by population ranges of villages are also indicated in Table 10.

Within the district the literacy rate is maximum (54.36%) in Akola tahsil and the minimum (39.37%) in Washim tahsil (Table 12). It is also observed that size of the villages and literacy rate are positively corelated (Table 10).

TABLE 10

Literacy Rates by Population Ranges of Villages

Range of Population (1)	No. of villages in each range (2)	Literacy rate (3)
—200	236	37.67

10,000+	7	56.91
All ranges	1.546	44 22

Among the various towns in the district Telhara recorded the highest literacy rate 62.33 per cent in 1981 (Table 11)

TABLE 11

Literacy Rate for Towns

Name and civic status of the town (1)	Literacy rate (2)
Akola City (M Cl)	60 94
Akot (M Cl)	55 99
Balapur (M. Cl)	51 95
Karanja (M Cl.)	55 34
Mangrulpir (M. Cl)	57 77
Murtijapur (M Cl)	61.06
Patur (M Cl.)	54.00
Telhara (M. Cl.)	62.33
Washim (M Cl)	56.09
All Towns	58 66

As against the literacy rate was the lowest (51.95%) in Balapur town..

During the span of 80 years (1901—81) the literacy rate in the district increased from 4.49 per cent in 1901 to 47.82 per cent in 1981 [Table 11 (i)].

TABLE 11 (i)

Progress of Literacy 1901—81

Year	Total	Males	Females
1901	4.49	8.50	0.34
1911	4.34	8.29	0.26
1921	5.79	10.59	0.78
1931	7.86	14.21	1.20
1941	22.50	39.41	4.83
1951	22.60	35.70	9.00
1961	31.20	44.81	16.69
1971	39.55	51.84	26.48
1981	47.82	59.54	35.45

The progress in literacy was slow till 1931 when hardly 7.86 per cent of the district population was literate. The post 1931 period experienced a comparatively faster growth. Literacy rose from 22.50 per cent in 1941 to 47.82 per cent in 1981. In 1941, one in every five persons (22.50%) was literate. The ratio narrowed to one in about three (31.20%) in 1961, one in about two and half (39.55%) in 1971 and nearly one in two (47.82%) in 1981. This remarkable improvement may be due to the expansion of educational facilities during the first two five year plans and compulsory primary education for children. The rapid improvement in female literacy rate from 1.20 per cent in 1931 to 35.45 per cent in 1981 is note worthy achievement. The scheme of compulsory primary education introduced for children in 1954 may be another contributing factor of improvement in literacy in the district Literacy rate of two sexes differs sharply. The literacy rate of males (59.54%) was slightly higher than the females (35.45%) in 1981. This rate for males (51 84%) was almost double than that of females (26.48%) in 1971. Sexwise literacy has thus been narrowing although it continues to be wide in itself.

Like male female differentials there exists disparity in the literacy rates of rural and urban areas. As against 44.22 per cent of literates in rural areas and there were 58 66 per cent of literates in urban areas of the district as per 1981 census. Between the two sexes, the differential is larger for females (30.57% rural, 50.43% urban) than for the males (57.28% rural, 66.25% urban).

Within the district, Akola tahsil has the highest literacy rate for males and females as well as for urban area.

Working population

"Work" may be defined as participation in economically productive activity. The participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction.

There has been some conceptual change for defining the worker at the 1981 census. A trichotomy of main workers, marginal workers and non-workers has been adopted instead of the dichotomy of workers and non-workers in 1971 and 1961 However, while accepting this conceptual change the feasibility of making the data comparable with the previous censuses was duly considered, conceptually, the main workers plus the marginal workers of 1981 are almost comparable with the 'workers plus non-workers with secondary work' of 1971 and 'workers' of 1961. Further, for 1981 census on the recommendation of Planning Commission and Central Statistical Organisation, only four

industrial categories of main workers i. e. cultivators, agricultural labourers, workers engaged in household industries and other workers have been adopted against the nine industrial categories of workers in 1971 and 1961.

For main workers major part of the preceding year (at least 6 months or 183 days) was adopted while those who worked for sometime during the preceding year but not for the major part, have been treated as marginal workers. All those who had not worked at all during the last year, were recorded as non-workers. Persons engaged in household duties students, dependants, retired persons, rentiers, beggars are some of the categories grouped as non-workers.

1981 census recorded 42 61 per cent of the district population as main workers, 2.21 per cent as margina workers and the remaining 55.18 per cent as non-workers (Table 12).

The corresponding figures for the State as such are 38·71 per cent, 3.85 per cent and 57.44 per cent, respectively. Thus more than two-fifths of the population of the district and the State is engaged in economically productive activity. Compared to 1971, there has been little decrease in the work participation rate both in the district (39.97 % in 1971 and 42.61 % in 1981) and in the State (36.48% in 1971 and 38.71% in 1981). Within the district, the work participation rate recorded at 1981 census was the highest (47.92%) in Mangrulpir tahsil and the lowest (36.54%) in Akola tahsil. Male participation rate (53 31%) is higher than that of the female (31.33%) as per 1981 census. The female participation rate in the district increased from 27.01 per cent in 1971 to 31,33 per cent in 1981 and in the State 19.70 per cent to 23·98 per cent By contrast, there was a marginal rise in the district male participation rate (52 16 per cent in 1971 to 53 31 per cent in 1981). In the State also there is a marginal rise i. e. 52 09 per cent in 1971 to 52.51 per cent in 1981.

1981 work participation rate is more in the rural (47.41%) than the urban (28.13%). Between the two sexes the differential is larger among the females in rural areas (38.61%) than the urban areas (8.98%). The participation rate of the males in rural areas (55.82%) is more than the urban areas (45.83%)

1981 census results revealed that among the main workers in the district, 28.71 per cent are cultivators, 50.83 per cent are agricultural labourers, 1.23 per cent engaged in household industry and the memaining 19.23 per cent engaged in other services. The corresponding percentages for the State are 35.12 per cent, 26 63 per cent, 2.55 per cent and 35.70 per cent. Evidently, three-fourth of the workers in the district are directly engaged in agriculture as cultivators or agricultural labourers. Male and female participation as cultivators in the district is lower than that of the State. Whereas the position is reverse for the participation rate of agricultural labourers. This aspect is more significant for females than males.

In the district, marginal workers were recorded 2.21 per cent of the total population. The participation of males is 1.02 per cent and females is 3.47 per cent. The high incidence of marginal workers among females as compared to males is understandable as the former besides, looking after their household duties and to engage themselves in some economically productive activity to lend support to their male counterparts.

Availability of Amenities—Education

The district has made substantial progress specifically in case of education. Educational amenity is available of 88 16 per cent villages in the district and these villages contain 98.60 per cent of the rural population of the district (Table 13 and 14).

TABLE 13

The situation regarding schools is best in all the six tahsils of Akola district. More than ninety per cent villages have educational facilities in three tahsils namely Akola, Washim and Balapur. In the remaining tahsils, situation regarding schools is good i.e. Akot (79.30%) Murtijapur (85.38%) and Mangrulpir (87.61%). There are, however, 183 villages in the district which do not have educational amenity. Out of these, 182 villages have less than 500 population and one village fall in the next population range of 500—1,999. In the remaining two population ranges there is not a single village without education facilities (Table 15).

All ranges ..	1,546	1,363 (88.16)	335 (21.67)	1,546 (100.00)	457 (29.56)	376 (24 32)	794 (51.36)	668 (43.21)	989 (63.97)

Among the villages without eductional amenity, the same is available within the distance of 5 kms in respect of 144 villages; at a distance of 5-10 kms for 31 villages, and at a distance of beyond 10 kms. for 8 villages in the district (Table 16).

TABLE 16

Distribution of Villages not having certain amenities, arranged by distance ranges from the places where these are available

Village not having the amenity of	No. of villages where the amenity is not available and available at distance of				
	—5 Kms.	5—10 kms.	10 kms.	Distance unspecified region	Total (Cols. 2—5)
(1)	(2)	(3)	(4)	(5)	(6)
1. Education	144	31	8	..	183
2. Medical	562	407	242	..	1,211

5. Market/Hat . . .	576	403	191		1,170
6. Communications	432	226	94		752

The above situation shows that Akola district is improving a rapid progress in case of educational facilities.

Distribution of villages according to the distance from the nearest town and availability of different amenities is indicated in Table 17.

TABLE 17

Distribution of Villages according to the distance from the nearest town and availability of different amenities.

Table 18 indicates schools per ten thousand of population in towns.

TABLE 18

Schools per ten thousand population in towns

Class, name and civic status of town	No per ten thousand population			
	Higher Secondary/ Inter/PUC/Junior College	Secondary/ Matriculation	Junior secondary/ Middle	Primary
(1)	(2)	(3)	(4)	(5)
I Akola City (M Cl.)	0.22	1.29	1 24	2 97
II Akot (M. Cl.)	1.73	1 73	1.73	2.89
III Balapur (M Cl.)	0.79	1 18	1 18	3.93
III Karanja (M. Cl.)	1.76	1.76	2.01	3.27
IV Mangrulpir (M. Cl.)	2.24	2 24	2.24	3.36
III Murtijapur (M. Cl.)	2.07	2.07	2.76	3.45
IV Patur (M. Cl.)	1.40	1.40	2.10	2.80
IV Telhara (M. Cl.)	1.79	1.79	2.68	3.57
III Washim (M. Cl.)	1.51	1.26	1.26	2.51
All Towns ..	0.95	1 47	1.56	3.06

On an average, the population to institution ratio in urban areas in the district is, 10,000 : 0.95 Higher Secondary/Int/PUC/Junior Colleges ; 10,000 : 1.47 Secondary/Matriculation Schools ; 10,000 : 1.56 Junior Secondary/Middle Schools and 10,000 : 3.06 Primary Schools. In other words, among urbanities there is a Higher Secondary/Int/PUC/Junior College for every 10,574 persons, Secondary/Matriculation Schools for every 6,786 persons, Middle Schools for every 6,404 persons and Primary Schools for every 3,271 persons in the district.

Medical

The medical amenities are spread over to 335 villages in the district. This shows that 21.67 per cent villages have the network of medical facility. From the population point of view 50.03 per cent of the rural population is benefitted by this amenity. This situation is not very satisfactory in respect of medical facilities. It is true, that in rural areas of Maharashtra State, unwillingness on the part of medical personnel to work in the rural sector is one of the main causes. However, the establishment of primary health centres, opening of rural dispensaries and cottage hospitals are bound to steadily change the medical situation in future.

Within the district Balapur tahsil, where 33.33 per cent of the villages are equipped with some kind of medical facility and 62.10 per cent of its population gets the benefit (Table 14) On the other hand, in Murtijapur tahsil where 13.46 per cent villages covering 37.38 per cent of its population enjoy the facility in the villages itself. It is not a good condition in the point of medical facility because only 50 per cent people got this facility.

Among the 1,211 villages which do not have any medical facility, the same is available at a distance of upto 5 kms for 562 villages, at a distance of 5—10 kms in respect of 407 villages and beyond 10 kms for the remaining 242 villages in the district (Table 16). It is also observed that all the big sized 19 villages (5,000+) are equipped with some kind of medical facility within the village, while 32 villages are in the population range below 500 (Table 15).

Table 19 gives the number of beds per 1,000 of population in the towns.

TABLE 19

No. of Beds in Medical-Institutions in Towns

Class, name and civic status of the town	No of Beds in Medical Institutions per 1,000 population
(1)	(2)
I Akola City (M Cl.)	3.68
II Akot (M. Cl.)	0.15
III Balapur (M. Cl.)	2 24
III Karanja (M. Cl.)	0.68
IV Mangrulpir (M. Cl.)	0.50
III Murtijapur (M. Cl.)	1 38
IV Patur (M. Cl.)	..
IV Telhara (M. Cl)	1.79
III Washim (M. Cl.)	3.32
All Towns ..	2.47

On an average there are 2.47 beds per thousand of population in the urban areas of the district. Out of 9 towns only 2 towns ; namely Akola (3.68%) and Washim (3.32%) are above the district average for urban areas. No medical institution is available in Patur town of Balapur tahsil.

Drinking Water

It is heartening to note that all the villages in the district have drinking water amenity.

Post and Telegraph

The post and telegraph amenities are spread over to 457 villages in the district. This shows that 29.56 per cent villages have the network of post and telegraph facility. From the population point of view 60.23 per cent of the rural population is benefitted by this amenity. Amongst the various tahsils of the district Akola leads with 34 22 per cent of its villages having the benefit of post and telegraph. Balapur ranks second with 33.33 per cent of its villages benefitting from the same. The coverage of villages in the remaining Murtijapur and Mangrulpir tahsils are between 20.38 per cent and 30.97 per cent (Table 13).

Among the 457 villages with the post and telegraph amenity, 34 villages are in the population range of less than 500 ; 300 villages in the range of 500—1,999 ; 104 villages in the population range of 2,000—4,999 and remaining 19 villages in the range of 5,000+ respectively.

1,089 villages in the district do not have facility of post offices. Among them, it is available within a distance of 5 kms for 789 villages, at a distance of 5—10 kms for 241 villages and beyond 10 kms for the remaining 59 villages in the district.

Market/Hat

Market/hat are spread over to 376 (24.32%) villages in the district and these villages account 48.36 per cent of the district's rural population Within the district Akola tahsil has the highest markets 105 (34.88%) and the Mangrulpir tahsil has the lowest markets 29 (12.83%).

Among the 1,170 villages where market/hat is not held, the same is available within a distance of about 5 kms for 576 villages. Inhabitants of another 403 villages have to walk a distance of 5—10 kms to obtain this facility. There are yet another 191 villages whose inhabitants have to treat a distance of beyond 10 kms to get this amenity. Of the 376 villages where markets/hats are held, 58 villages are in the population range of less than 500 and 218 fall in the population range of 500—1,999. The remaining 82 and 18 fall in the population range of 2,000—4,999 and 5,000+ respectively.

Communications

In the district, 794 (51.36%) villages have the availability of bus stop/railway station/water way within the village and they serve near about three-fourth (71.82%) of the rural population of the district. Among the remaining 752 villages, it is available within a distance of about 5 kms in respect of 432 villages, at a distance of 5—10 kms in respect of 226 villages and beyond 10 kms for 94 villages. Among the 794 villages, 210 villages with this amenity are in the population range below 500, 467 villages with this amenity are

in the range of 500—1,999, 98 villages in the range of 2,000—4,999 and 19 villages in the range of 5,000+.

Approach by pucca road

In the district, 668 (43.21%) villages are approachable by pucca road and they serve 63 53 per cent of the rural population of the district The position is not good in Mangrulpir and Akot tahsils where only 33 19 per cent and 34.77 per cent of the villages are linked with pucca roads. Of the 668 villages linked with pucca roads, 168 villages have less than 500 population and 390 fall in the population range of 500—1,999. The remaining 91 and 19 fall in the population range of 2,000—4,999 and 5,000 + respectively

Power Supply

The rural electrification programme assigned importance from the third five year plan and this has resulted in accelerating the supply of power in the rural areas There are, however, 989 (63 97%) villages in the district now get the power supply which cover more than three fourth (79 30%) of its rural population. Power supply is available more than three fourth in Murtijapur (79.23%) and Balapur (75.44%) tahsils in the district. The lowest percentage of villages having power supply is in Washim tahsil (48.80%). Among the villages with availability of power supply, 330 are in the population range of below 500 and 542 fall in the population range of 500—1,999. The remaining 98 and 19 fall in the population range of 2,000—4,999 and 5,000 +, and their proportion to total villages is 93 33 and 100.00 per cent respectively.

Villages which do not have any amenity (except drinking water) are 71 in number (Appendix III) and they account for 0.37 per cent of the district's rural population. Tahsilwise break-up of these villages is ; Akola (16), Akot (16), Murtijapur (8), Mangrulpir (16), Washim (8) and Balapur (7) Further, 67 of these villages are in the population range of below 200 and 4 in the range of 200—499. The non-availability of any kind of amenity (except for drinking water) in 71 villages, 183 villages without any school, 1,211 villages devoid of medical facility, 1,089 villages not having postal facility, no market/hat in 1,170 villages, 752 villages without the facility of bus stop/railway station/water way, 878 villages not approachable through pucca road and 557 villages not having power supply, is certainly not a happy situation except education and power supply.

Land Utilisation

Columns 15 to 19 of the village directory give land use pattern of each village in the district. Classification of land use adopted here corresponds to the classification recommended by the Ministry of Food and Agriculture.

Forest

The forests are mainly in Balapur, Akola and Mangrulpir tahsils on the Balaghat plateau of Ajanta hills, the Narnala reserves of the Satpura ranges and in the Payanghat along the plains of the Purna river. The forest areas in the district is 1,295.22 km^2. The forests in the district fall in the " Dry Deciduous Type ." The main species of the forests is teak. The other important species are Babul, Anjan, Bamboo and Sandalwood Sandalwood forests are patchy and are the results of plantation. Akola and Washim are the important forest produce collection centres.

Irrigated, Un-Irrigated and Culturable Waste Areas

Data pertaining to irrigated area (by source), un-irrigated area and culturable waste is given under Columns 16, 17 and 18 respectively of the Village Directory. Within the district, total cultivated area is 86.27 per cent. It is more than three-fourth of the total area (Table 20).

TABLE 20

Distribution of villages according to the Land Use (in hectares)

Serial No.	Name of tahsil	No. of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to the total cultivable area
(1)	(2)	(3)	(4)	(5)	(6)
1	Akola	301	176,640 49	86.42	3.23
2	Akot	256	130,622.63	90.73	1.33
3	Murtijapur	260	141,893 27	89.31	1.68
4	Mangrulpir	226	148,775.24	87 83	0.97
5	Washim	332	268,077.22	84.53	2.49
6	Balapur	171	125,953 96	80 41	2.48
	Total of all tahsils ...	1,546	991,962 81	86 27	2.11

The four tahsils are above the district average in respect of cultivated area i. e. Akola (86.42%), Akot (90 73%), Murtijapur (89.31%)and Mangrulpir(87.83%). The remaining tahsils are below the district average i. e. Washim (84.53%) and Balapur (80.41%).

The Akola district has extremely small area under irrigation. In the district only 2 11 per cent of the cultivated area is irrigated. Within the district Akola Washim and Balapur tahsils are above the district average and Akot, Murtijapur and Mangrulpir tahsils are below the district average (Table 20). The important sources of irrigation are wells and tanks.

Staple Food

As in the other areas of the state, in this district also there are two agricultural seasons viz ; Kharif and Rabi. But the district has much more area under kharif than rabi. The crops which are taken in the early south-west monsoon are called kharif crops, while those harvested in the winter are known as rabi crops

Among the non-food crops, cotton occupied an important place in the district. The principal crops grown in kharif season are cotton, jowar, groundnut, tur, udid and mung. Wheat and gram are the main rabi crops. Unlike many other districts jowar is not grown in the rabi season. Sugarcane which is a perennial crop is grown on a very small area The cropping pattern within the district varies according to soils and climatic conditions. Akot tahsil has the largest proportion of area under cotton. Washim tahsil having cooler climate has the largest proportion under wheat. Mangrulpir tahsil is favourable for groundnut.

Among the food crops in the district, jowar is the most important crop. The second in order of importance is wheat and third is rice. Jowar and wheat constitutes the main staple food for the villages in Akola district. Table 21 indicates that wheat is the staple food in all the tahsils of the district.

TABLE 21

Main Staple food in the Majority of Village in each tahsil

Serial No.	Name of Tahsil	Main staple food
(1)	(2)	(3)
1	Akola	Wheat, Jowar
2	Akot	Wheat, Jowar
3	Murtijapur	Wheat, Jowar
4	Mangrulpir	Rice, Wheat
5	Washim	Wheat, Jowar
6	Balapur	Wheat, Jowar

Jowar is also consumed in all the tahsils, except Mangrulpir Rice constitutes a part of staple food in Mangrulpir tahsil

The following table shows the harvesting period for reference

Crop	Month	Harvesting-period
(1)	(2)	(3)
(i) *Kharif*		
Jowar	June-August	November-January
Tur	June-July	November-January
Cotton	June	November-January
(ii) *Rabi*		
Wheat	October-November	February-March
Gram	October-November	February-March

Municipal Finance

Table 22 gives per capita receipts and expenditure (in rupees) for every town in the district.

TABLE 22

Per capita receipt and expenditure in towns

Class, name and Civic Status of the town	Per capita								
	Receipt (in Rs)			Expenditure (in Rs)					
	Total	Receipt through taxes	Receipt from all other sources	Total Expenditure	General administration	Expenditure on public health and conveniences	Public works	Expenditure on public institutions	Other aspects
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
I Akola City (M. Cl) .	107 01	61 08	45 93	88 17	17 41	43 70	5 48	17 05	4 53

IV Patur (M. Cl) . .	57 40	12.62	44.78	57.33	12 83	9 60	0 84	9 53	24.53
IV Telhara (M. Cl) .	103.71	31.59	72.12	106.66	20.17	24 99	13 66	15 08	32 76
III Washim (M. Cl.) ..	77 76	40 20	37 56	77 53	11 10	31 25	5 28	16.41	13.49
Total	94 66	44 48	50 18	84.06	18.59	31.24	5 94	14 69	13 60

On an average the per capita receipts is Rs. 94.66, out of which Rs. 44.48 is received through local taxes and the remaining Rs. 50.18 from all other sources. The total expenditure incurred per head is Rs. 84 06, of which Rs. 18.59 on general administration, Rs. 31.24 on public health and conveniences, Rs. 5.94 on public works, Rs. 14.69 on public institution and Rs. 13.60 on all other aspects. Among all the towns, both the receipts received and the expenditure incurred per head are the highest in Karanja and Telhara respectively.

Minerals

The part of the district is covered by Deccan Trap which is used for building purposes. Deposits of minerals have not been so far in the district. Mining activity in the district is, therefore, restricted only to the quarring of stones.

Fisheries

Fishing activity in the district is naturally restricted to inland water only, rivers, tanks and ponds being the chief sources. These resources comprise of the Gram-Panchayat and other local bodies. The important rivers of the district are Purna and Penganga. The tanks at Risod, Haral and Karanja are used for pisciculture.

Since fishing industry has limited scope, some of them take to seasonal agriculture. Generally important varieties of fish which are found in Akola district are Murrel, Dhadkya, Botri, Padhan, Tambu, Karvadi Poshti, Dhoarea, Chela, Katva, Seenghan, Chandni, Kolus, Magur, Zinga etc. Fisherman in the district belong to the communities called Dheemer, Bhoi and Kahar.

Industries

Akola district is predominently agricultural with about 80 per cent of its total working population engaged in agricultural pursuits as per the 1981 census. Agro-based industries like ginning and pressing factories and oil mills are the common types. As per new industrial policy of Government of India, development of small and village industries provide new job to unemployment.

There are some large scale manufacturing factories producing textiles and hydro-genated oil (Vanaspati). The cotton spinning and weaving mill of Akola town producing both cotton yarn and cloth. There are a number of ginning and pressing units combined with oil-milling providing work almost all the year round.

Number of small scale establishments like dal-mills, oil-presses, confectionery, bidi-making, saw-mills, soap-making, metal-plating and enginneering etc ; in the district.

In the cottage and small scale industries sector, handloom, khadi and village industries, handicrafts and professions like shoe-making, carpentary, brick-making, pottery, oil-ghanies, etc., are some of the important industries in the district. Some of these manufacturing industries are traditional crafts, conducted on household and cottage industries. Cotton weaving in handloom is also common in some parts of the district. They are mostly Momins and Koshties. These persons are spread all over the district and are mainly in Akot, Washim and Balapur tahsils. Mattrosses from Akot and Balapur are well known in the country. There is also a factory manufacturing wooden toys in Akola.

Trade and Commerce

Raw cotton is the most important article of export, in addition to cotton-seed, oil-seeds, oil-cake, jowar, betel leaves, cattle etc.Betel leaves are grown extensively in Akot and nearby villages are well known because they can be preserved for about two months. They are largely exported to Delhi, Amritsar, Burhanpur, Ambala, Ahmadabad, Surat, Jalgaon and Dhule. Foodgrains market centre is at Risod in Washim tahsil. Umbarda in Murtijapur tahsil is a cattle market centre and specially bullocks are sold at this market throughout the year and people from distant places come there to purchase bullocks and other cattle. The chief articles of imports are rice, wheat, gur, pulses, salt, miscellaneous provisions, coconuts, fruits, tobacco, medicines, stationery, etc.

TABLE 23

Most important commodities manufactured, imported and exported in towns

Class, name and Civic status of the town	Most important commodities		
	Manufactured	Exported	Imported
(1)	(2)	(3)	(4)
I Akola City (M. Cl.)	Cotton bales	Cotton bales	Raw Cotton
II Akot (M. Cl.)	Sweet oil	Ginned and hand pressed cotton.	Cloth
III Balapur (M. Cl.)	Handloom Carpets	Handloom Carpets	Yarn
III Karanja (M. Cl.)	Plastic ropes	Edible oil	Raw cotton
IV Mangrulpir (M. Cl.)		Jowar	Gur
III Murtijapur (M. Cl.)	Cotton bales	Cotton bales	Sugar
IV Patur (M. Cl.)	Agricultural implement	Cotton bales	Raw cotton
IV Telhara (M. Cl.)	Cotton bales	Cotton bales	Cloth
III Washim (M. Cl.)	Washing soap	Jowar	Cloth

The distribution of goods beyond the wholesale trade centres is done at market places and weekly bazars held at different places and on different days of the week.

Table 24 indicates proportion of slum population to total population and density of slum per km² in town.

TABLE 24

Proportion of slum population in town

Class, name and civic Status of the town	Proportion of the slums population to total population of the town	Density in slums (Per km²)

Total	18.54	94,970

Places of Tourists Importance

Some important historical fort at Akola, Balapur and Karanja towns. A large number of visitors are visiting at Shirpur (a large village in Washim tahsil) to see the temple of Padmaprabha, one of the 24 Tirthankars of the Jains. In addition to the above places some important fairs are held in various parts of the district. All these places give to trading and allied activities like hotels, handicrafts and other fancy articles.

VILLAGE DIRECTORY

SECTION I

PART A—VILLAGE AND TOWN DIRECTORY

SECTION I—VILLAGE DIRECTORY

Note Explaining the Abbreviations used in the Village Directory.

The 'Village Directory' gives the list of villages, their area, population, amenities such as educational, medical, communications, drinking water facilities etc. available to them and also the land use of each village. For this purpose, villages have been arranged tahsilwise in order of their location code number. The inclusion of alphabetical list of villages and the map of every tahsil depicting location of villages by population size, urban-spread and important-infrastructural facilities available therein will further help the readers in identifying any village in the tahsil.

'Village' is a statutory recognised unit having a definite boundary and separate land records. In case, a village is treated as an outgrowth of urban agglomeration, data on amenities and land use for that village have not been given in the Village Directory but shown alongwith the urban component. For those villages which have partly merged in an outgrowth, data pertaining to remaining part of the village is shown in the Village Directory and for the part merged or treated as an outgrowth, the details have been given under the concerned urban agglomeration. If a village, has fully merged in the town, the same has been specified as such in the Village Directory. However, all such villages do appear in the village Primary Census Abstract for any cross reference. Similarly, villages treated as Census Towns (urban) for the first time in 1981 Census are shown both in the Village Directory and the Village Primary Census Abstract for making any cross reference and no data relating to the amentities available have been indicated in the Village Directory. However, land use data for all such villages can be seen in the Appendix-II of the Village Directory.

If a village has fully merged into another village, the location code number and name of the merged village are given both in the village Primary Census Abstract and the Village Directory at the appropriate place. Data in respect of these two villages put together appear against the village with which the other village has merged.

The "un-inhabitated" villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e. the location code number, name and area of the village. In addition to all the above details, following four appendices to village Directory have also been included :—

Appendix (i)- Tahsilwise abstract of educational, medical and other amenities ;

Appendix (ii) Land utilisation data for census towns ;

Appendix (iii) Tahsilwise list of villages with no amenities available ; and

Appendix (iv) Tahsilwise list of villages according to proportion of Scheduled Castes/Scheduled Tribes population.

The first two appendices were also prepared for 1971 District Census Handbook. Appendics (iii) and (iv), added in 1981, are expected to help the planners for planning inputs in areas/villages where basic infrastructure is lacking and also for evolving suitable plans for the welfare of Scheduled Castes and Scheduled Tribes.

The Village Directory form has 20 columns and the details given under each column are as under :—

Column 1 gives the location code number of each village as the same is essential for identification of the village.

Column 2 indicates name of the village. For filling up of this column, 1971 Direct Census Handbook has been used as the basis.

Column 3 shows area figures (in hectares) as supplied by the State Revenue Department. For towns however, the area figures are in km^2.

Column 4, which gives population and the number of households in each village has been introduced for 1981 census to examine the corelation between the amenities available to the population and the number of households. Figures given within brackets against total population in this column refer to the number of households in the village.

Data on amentities such as educational, medical, communications, availability of drinking water, days of market/hat etc. are shown under columns 5 to 11 of the Village Directory. Additional feature for 1981 District Census Handbook is that in case if amenity is not available within the referent village, a dash (—) is shown in the column and next to it, in brackets the distance from the village in broad ranges viz., upto 5 km, 5-10 km, and 10+km. to the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provision of goods and services as well, so as to minimise the regional imbalances in the process of development.

Cloumn 5 exhibits the availability of educational facilities viz. primary or elementary school, junior secondary or middle school, matriculation or secondary school, higher secondary/intermediate/pre-university/junior college, college, industrial school, training school, adult literacy school/centre and other educational institutions (Sanskrit pathshala, senior basic school, makhtab etc.).

If in a village, secondary school has middle and primary classes also the same has been counted as three schools i.e. secondary, middle and primary school. In case, there are more than one institutions of any type in a village their number is indicated within brackets against the prescribed abbreviation. Following abbreviations have been used for presenting data on educational amenities :

Primary or Secondary School	P
Junior Secondary or Middle School ..	M
Matriculation or Secondary School ..	H
Higher Secondary / Intermediate / Pre-University/Junior College (PUC).	PUC
College, any college (graduate level and above) like Arts, Science, Commerce, etc.	C
Industrial School	I
Training School	Tr.
Adult Literacy Class/Centre	AC
Other Educational Institutions	O

Column 6, provides data on medical facilities available in the village. If in a village no medical facility is available 'dash' (—) has been placed and within the brackets the distance in broad ranges (upto 5 kms, 5—10 kms and above 10 kms of the nearest place where the most modest medical amentity scuh as dispensary/ community health worker is available) has been indicated. Various types of medical institutions included and codes used for them are as follows :

Hospital	H
Maternity and Child Welfare Centre	MCW
Maternity Home	MH
Child Welfare Centre	CWC
Health Centre	HC
Primary Health Centre	PHC
Primary Health Sub-centre	PHS
Dispensary	D
Family Planning Centre	FPC
T. B. Clinic	TB
Nursing Home	NH
Registered Private Practitioner	RP
Subsidised Medical Practitioner	SMP
Community Health Worker	CHW
Others	O

Column 7 gives information regarding availability of drinking water within the village. In case more than one source is available for drinking water, the same has been mentioned. Following abbreviations have been used for indicating the source of drinking water in the village :

Tap water	T
Well water	W
Tank water	Tk
Tube-Well water	TW
Hand pump	Hp
River water	R
Fountain	F
Canal	C
Lake	L
Spring	S
Nallah	N
Others	O
Information Not Available	NA

Column 8 shows postal facilities such as post office, telegraph office, post and telegraph office and telephone connections available in the village. Various abbreviations adopted for indicating this information are :—

Post Office	PO
Telegraph Office	TO
Post and Telegraph Office	PTO
Telephone Connection	Phone

Column 9 gives information on day or days of the market/hat held in the village. This information is based on local enquiry and generally relate to weekly or bi-weekly market., If in any case, the market is held monthly or fortnightly it has been recorded accordingly in this column. In case weekly or bi-weekly or monthly market/hat is not being held, the column has been left blank.

Column 10 represents information as to whether the village is served by any mode of public transport like bus, rails and water-way and the same has been indicated as follows :—

Bus Stop	BS
Railway Station	RS
Navigable Water-way (including river, canal and back-water etc.).	NW

Column 11 refers to the state of roads etc. in the village. This will help us in determining as to whether the village is approachable both in fair and foul weather. Following abbreviations have been used for stating this information.

Pucca Road	PR
Kaccha Road	KR
Navigable River	NR
Navigable Canal	NC
Navigable waterway (Other than river or canal).	NW
Foot Path	FP

Column 12 gives the distance in Kilometres within bracket from the nearest town. In case, the nearest town is located in another state the name of the state has also been indicated.

Column 13 relates to the availability of power supply to the village. The various sources of power supply have been indicated through the following codes :—

Electricity for Domestic purpose	ED
Electricity for Agriculture	EAg
Electricity for Other purpose like Industrial, Commercial etc.	EO
Electricity for all purposes listed above	EA

In case the power supply is realeased only for specific purpose, say agriculture or other, it has been stated accordingly.

Column 14 gives staple food (only in terms of grains of the majority people of the village during the major part of the year. This may be rice, wheat, jowar, maize ragi, etc. or a combination of grains where it is difficult to determine a particular grain.

Columns 15 to 19 give the details about land utilization. The land use pattern given in the Village Directory conforms to the classification recommended by the Ministry of Food and Agriculture, Government of India which maintains the land record under the following five categories :—

(1) Forests.

(2) Not available for cultivation—
  (a) lands put to non-agricultural uses.
  (b) barren and unculturable land.

(3) Other uncultivated lands excluding fallow land.
  (a) permanent pastures and other grazing lands.
  (b) lands under miscellaneous tree crops and grooves not included in the net area sown.
  (c) culturable wastes.

(4) Fallow lands.
  (a) Fallow lands other than current fallows.
  (b) current fallows.

(5) Net area sown.

Column 15 shows all the lands classed as forest under any legal enactment dealing with forest or administer as forests, whether state owned or private. In case, any portion of such land is not actually wooded but put some agricultural use, that portion is included under the appropriate heading of cultivated or in-cultivated land.

Columns 16 and 17 cover all agricultural lands including the net area sown with crops and orchard and also the current and other fallow lands. Net area sown represent the area sown under various crops and orchard Areas sown more than once in the same year have been counted only once. Column 16 indicates extent of irrigated lands under various types of irrigation e. g. canal, tank, wells, tubewells etc. and codes adopted for indicating various sources of irrigation are as under :—

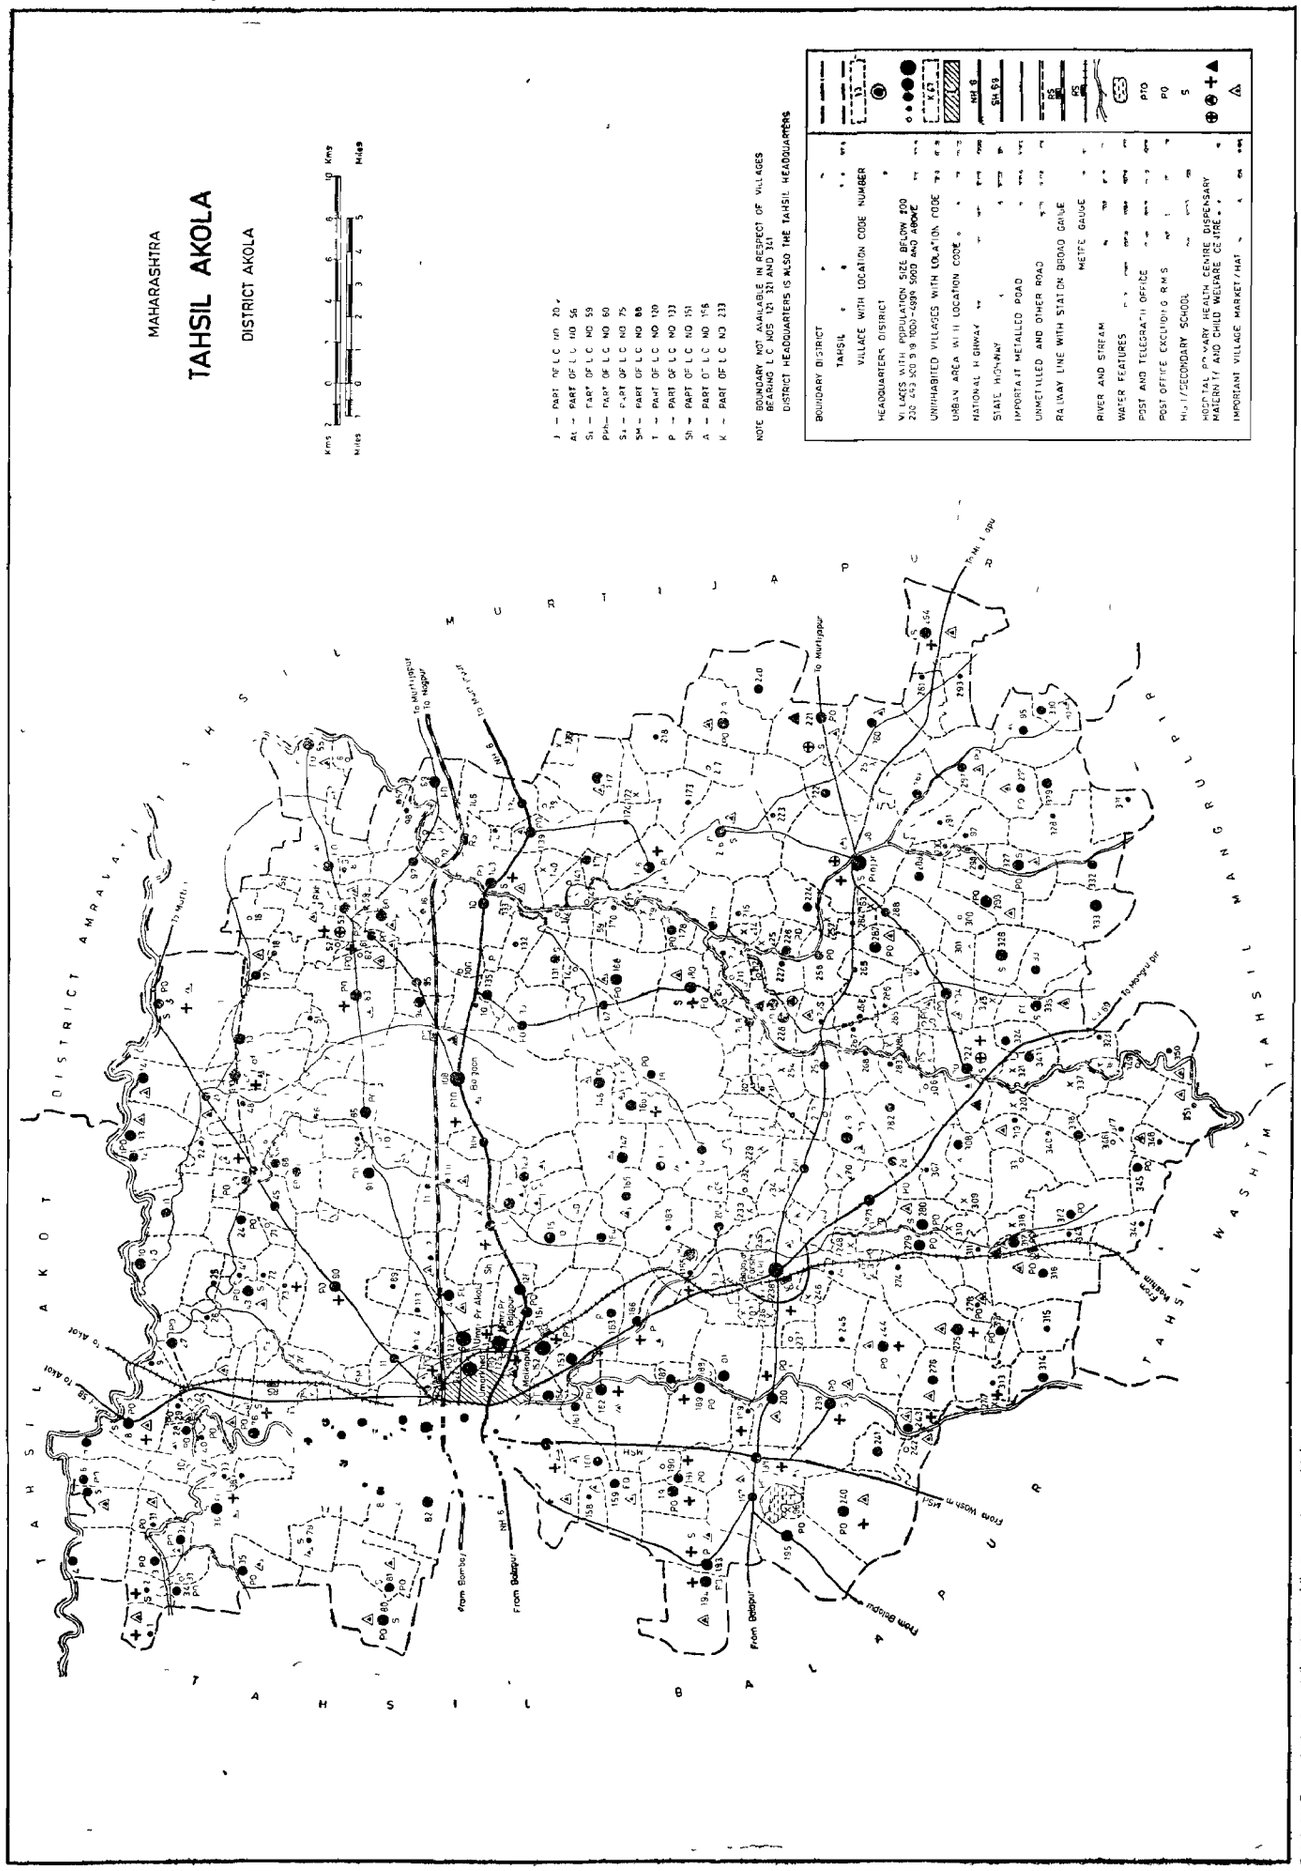

Government Canal	GC
Private Canal	PC
Well (without Electricity)	W
Well (with Electricity)..	WE
Tube Well (without Electricity)	TW
Tube Well (with Electricity)	TWE
Tank	Tk
River	R
Lake	L
Water Fall	WF
Others	O
Total	T

Column 18 gives information on culturable wastes lands and includes land available for cultivation whether or not taken up for cultivation once. Area taken up o cultivation once but not cultivated during the preceding five years or more in succession is also covered under this column. Such lands may either be fallow or covered with shrubs and jungles which are not put to any use. These lands may be assessed or unassessed and found in isolated blocks or within the cultivating holdings. Lands under thatching grass, bamboo, bushes and other grooves for fuels etc., which are not included under orchards or forests, are included in this category. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest areas, are also included in this column.

Column 19 shows land not available for cultivation such as barren, unculturable land and land put to non-agricultural uses. All lands covered under buildings roads, railways, rivers, canals etc. form part of the land under non-agricultural uses. Barren and unculturable lands include mountains, rocks, deserts etc. which cannot be brought under cultivation, except at a very high cost.

Column 20 has been filled up on the basis of local enquiry. Besides, recording the particulars of places of importance, it gives information on number of newspapers coming in the village, motor cycles/scooters, cars/jeeps and tractors available in the villages. Appropriate codes listed below have been used for presenting this information and number of items available is mentioned against the code used :—

N .. Copies of Newspapers coming in the village.
M .. Motor cycles/scooters available in the village.
C .. Cars/jeeps available in the village.
T .. Tractors available in the village.
PS .. Police Station.

(*N B.*—Ranges with 'Nil' entries have been omitted)

SECTION II

TOWN DIRECTORY

SECTION II—TOWN DIRECTORY

Note Explaining The Abbreviations Used in Town Directory.

The 'Town Directory' gives for each town the area, population in 1981 and past censuses, growth rates, density, sex ratio, physical aspects of towns, communications, municipal finances, civic, medical, educational and other amenities, and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. Seven statements (I to VI and IV-A) have been included for presentation of this data. All the towns in the district are arranged in alphabetical order. In case of all urban agglomerations the particulars for each constituent town of agglomeration have been furnished separately, also. Obviously separate information could not be furnished in respect of outgrowths which did not qualify to be treated as independent towns. However, in all such cases asterisk mark has been placed against their names to indicate that they have outgrowths and details of their particulars have been merged with the referrent towns.

Data presented in the seven statements have largely been procured from the municipal bodies and for non-municipal towns the respective tahsildars supplied the information.

Statement I shows status and growth history of the towns in the district. Column 2 in this statement indicates class, name and civic administration status of a town (as in 1980). Class of the town indicated under this column has been introduced to facilitate the analysis of town directory data at the State and the national level. Census towns have no urban civic status. Following abbreviations have been used to indicate the civic status of the town :—

Municipal Corporation/Corporation ..	M. Corp.
Municipality	M.
Municipal Council	M. Cl.
Non-Municipal	N. M.
Cantonment Board/Cantonment ..	C. B.
Notified Area/Notified Area Committee/ Notified Committee.	N. A. C.
Census Town	C. T.

Columns 7 to 15 give population and growth rate of towns since 1901 and would help in drawing the trends in their growth rate Columns 5, 6, 16 and 17 to 19 showing area in km², number of households including houseless households, density and sex ratio respectively are new additions and are expected to facilitate in analysing the town directory data both at the State and the national level.

Statement II shows physical aspects and location of each town. In physical aspects only the rainfall and temperature data as obtained from the Director-General of Meteorological Survey of India have been shown. Towns for which information could not be obtained from Meteorological Survey of India, the same has been collected locally or calculated in relation to the nearest town, to the extent possible. Columns 6 to 12 have been filled up on the basis of local enquiry. Distances respectively from the state, district and tahsil head quarters and the nearest city (Urban area with a population of 100,000+) would help in determining the location of a town. Communication facilities available are shown by railway station, bus route and navigable river/canal.

Statement III deals with municipal finances for the statutory and also non-statutory town bodies managing civic administration of the town provided they have separate budgets and accounts of their own.

Statement IV provides information of the civic and other amenities available in the town. Total population given under column 4 and Scheduled Castes/Scheduled Tribes population given in column 5 have been added to help in measuring amenities in respect of population size of the weaker sections of the community in the town. The information on the road length within the town shown under column 6 has been obtained from municipality (except for the highways). Codes used are :—

Pucca road	PR
Kuccha road	KR

Columns 7 to 11 reflect the information on system of sewerage, number of latrines and method of disposal of night soil.

Codes used are .—

Sewer/Sewerage	S
Open surface drains	OSD
Box surface drains	BSD
Sylk drains	SD
Cesspool method	CD
Pit system	PT
Head Loads	HL
Baskets	B
Wheel Barrows	WB
Septic Tank Latrines	ST

Columns 12 and 13 indicate sources of protected water supply to the inhabitants of the towns. The information of major source of water supply is given in the column 12 and on major source of storage and capacity under column 13. For stating this information following codes have been used :—

Overhead Tank	OHT
Service Reservoir	SR
River Infiltration Gallery	IG
Borewell pumping system	BWP
Pressure Tank	PT
Tubewell water/Hand pump	TW
Tap Water	T
Well water	W
Tank water	TK

Column 14 gives information regarding availability of fire fighting services In case, it is not available in the referrent town, the name of the nearest place where it is available has been mentioned and the distance from the town has also been indicated within brackets. Columns 15 to 19 pertain to the humber of electricity supply connections available for domestic, industrial, commercial and road lighting points etc.

The newly added Statement IV-A provides data on civic and other amenities in the notified or recognised slum of towns with a population of above 50,000 (*i. e*) class I and II towns.).

Statement V gives information regarding availability of medical, educational, recreational and cultural facilities available in the town. 1981 population figures for each town have also been indicated and this will facilitate in analysing data on facilities available on the people.

Data on medical facilities have been obtained from the district and sub-divisional medical officers and shown under columns 4 and 5. All types of medical institutions whether allopathic, ayurvedic or homoeopathic have been covered and indicated by way of following codes .—

Hospital	H
Dispensary	D
Health Centre	HC
Family Planning Centre	FC
T. B. Clinic	TB
Nursing Home	NH
Ayurvedic	A
Unani	U
Homoeopathic	Hom
Others	O

In case, more than one institution of any type is available, the exact number is shown within the brackets.

The information on educational amenities (cols. 6 to 9) is exhibited as :

Arts only	A
Science only	S
Arts and Science only	AS
Commerce only	C
Arts and Commerce only	AC
Combined for all categories—Arts, Science and Commerce.	ASC
Law	L

Column 10 pertains to the number of recognized typewriting and vocational training institutes (grouped as others) wich include applied art/painting college, pharmacy college, B. Ed. college, teacher's training school, music/dancing institute, nursing school, etc. Various codes used for indicating this data are :—

Shorthand	SH
Typewriting	Type
Shorthand and Typewriting	Sh. Type
Others	O

Keeping in view the 'Minimum Needs Programme of the Planning Commission, the information regarding adult literacy classes/centres etc. has also been collected and presented under column 15. Similarly, in view of the spurt in the employment of women in towns, information on number of working women's hostels and seats available therein has been given under column 16. This information would help in formulating plans for opening new hostels in order to meet the housing needs of the single working woman.

Columns 17 to 20 show recreational and cultural facilities available in the town. These include stadia, cinema, auditoria/drama, community halls, public libraries indicated as 'PL' and the reading rooms indicated as 'RR'.

Statement VI presents information regarding trade commerce, industry and banking services in the town. Columns 3 to 11 indicate three most important commodities imported, exported and manufactured in the town. Information on number of banks available in the town appears under column No. 12. Columns 13 and 14 show number of agricultural and non-agricultural credit societies respectively in each town.

STATEMENT I

Note.—The source for the total area figures in respect of the districts is the Surveyor General of India, while that for the total area figures in respect of the tahsil is the State Land Records Department. The total areas, as also the rural areas, for the tahsils in district, may not, therefore, strictly add up to the corresponding figures shown against the district.
