INTRODUCTION

In the past, village statistics for each district used to be printed after the Census, giving the population of each village and showing the distribution of communities and of literate persons. In view of the importance of the 1951 Census, at which, in addition to the usual population data, valuable information was collected concerning the social and economic life of the people, it was decided to publish a District Census Handbook containing the more important Census abstracts and tables.

There are five general population tables of the 'A' series, three economic tables of the 'B' series, five household and age (sample) tables of the 'C' series, seven social and cultural tables of the 'D' series and one table 'E' giving summary figures for the district and tahsils. As far as possible, these tables furnish district data with break-up for Census tracts within the district.

Certain statistics about individual villages in the tahsils are contained in the Primary Census Abstract which gives the detailed distribution of the population in each village according to the economic classification of the people. It also contains particulars about the literates. A person who could write a simple letter and could read one in print or manuscript was regarded as a literate person for purposes of the Census.

The Primary Census Abstract is followed by a simple table giving distribution of the displaced persons and their means of livelihood in the different villages of the district at the time of Census.

Census statistics of the urban and rural population have a variety of important uses. They are of considerable help in studying the economic conditions, social and political changes and demographic trends as indicated by rates of population growth, family characteristics, mobility of population, age structure, size and composition of the economically active population, and the like. The results of such studies in comparing the conditions and characteristics of the urban and rural people in the matter of births, deaths, sex composition, sanitation, levels of living, etc., would be of great value in economic planning and development of social welfare work in the State and its different parts.

Each district was, therefore, divided for purposes of the Census into a number of rural and urban tracts according to the size of the population. Thus, in the Akola district, as there is no city, one urban tract consisting of all the towns of the district was constituted and is referred to in the tables as "the Akola district non-city urban tract". The rural areas of the tahsils of the Akola district form separate Census tracts and are referred to as "Akola tahsil rural", Washim tahsil rural" tracts etc.

At the 1951 Census, the economic classification was substituted for the classification based on religion. The people have been divided into two broad livelihood categories, namely, the agricultural classes and the non-agricultural classes. There are four agricultural classes defined as below:—

I. Cultivators of land wholly or mainly owned; and their dependants.

II. Cultivators of land wholly or mainly unowned; and their dependants.

III. Cultivating labourers; and their dependants.

IV. Non-cultivating owners of land; agricultural rent receivers; and their dependants.

There are similarly four non-agricultural classes defined as persons including dependants who derive their principal means of livelihood from—

V. Production other than cultivation.

VI. Commerce.

VII. Transport.

VIII. Other services and miscellaneous sources.

The above eight classes have been referred to as livelihood classes.

Each of the above eight livelihood classes has been divided into three sub-classes with reference to the economic status as below:—

(i) Self-supporting Persons;
(ii) Non-earning Dependants; and
(iii) Earning Dependants.

All non-earning dependants are economically passive. They include persons performing housework or other domestic or personal services for other members of the same family household. But they do not include "unpaid family workers" or persons who take part along with the members of the family household in carrying on cultivation or a home industry as a family enterprise.

All earning dependants are economically semi-active only. Though they contribute to the carrying on of economic activities, the magnitude of their individual contribution is deemed to be too small to justify their description as economically active. Their contribution to economic activity is, however, taken into account in the tabulation of data in economic table B-II which gives details of persons having secondary means of livelihood including the details of the earning dependants.

All self-supporting persons are, ordinarily, economically active. But there are certain classes and groups which constitute an exception to this rule. These are mentioned below:—

(i) All self-supporting persons of Agricultural Class IV.

(ii) The following groups of self-supporting persons who are included in Non-Agricultural Class VIII, and derive their principal means of livelihood from miscellaneous

TABLE A-I
Area, Houses and Population

This table shows, for the district and the tahsils, the number of towns and villages, number of occupied houses and total, urban and rural population, Male and Female. The area figures given in this table were furnished by the Deputy Commissioner, and were rounded to the nearest integer. These area figures differ from the district figures supplied by the Surveyor-General of India, which have been adopted in the main Census Report. The Surveyor-General could not supply the area of the tahsils and, therefore, the Deputy Commissioner's figures have been adopted in this table.

2. The urban population of the district is 210,232 and the urban/rural ratio is 22 : 78.

THE ECONOMIC TABLES

The Indian Census Economic Classification Scheme 1951 is briefly explained in the introduction to this Book. For a detailed exposition, of the subject, "The Census of India 1951, Volume VII, Madhya Pradesh, Part II-B" may be referred to. Chapter V of "The Census of India 1951—Madhya Pradesh Administration Report, Part I" deals with the details of how the actual economic enquiry was made; while certain aspects of the results of the enquiry are reviewed in "The Census of India 1951, Volume VII—Madhya Pradesh, Part I—Report".

2. The economic tables show the figures of the entire population including the displaced persons, and also of the displaced persons separately.

ECONOMIC TABLE B-III

Employers, Employees and Independent Workers by Industries and Services, Divisions and Sub-Divisions

The self-supporting persons in non-agricultural classes are classified according to their secondary economic, status, namely, Employer, Employee and Independent Worker and are distributed in the various Divisions and Sub-divisions of Industries and Services in this table. Distribution of the self-supporting persons into the different groups of Industries and Services will be found in the District Index of Non-Agricultural Occupations at the end of this table.

2. The non-agricultural classes classified in Economic Table I correspond to the Divisions and Sub-divisions into which they are distributed in this table as follows :—

(*a*) Non-Agricultural Class V (Production other than cultivation) corresponds to Divisions 0—4. (0—Primary Industries not elsewhere specified, 1. Mining and quarrying ; 2. Processing and manufacture—Foodstuffs, Textiles, Leather and Products thereof ; 3. Processing and Manufacture—Metals, Chemicals and Products thereof ; 4. Processing and manufacture not elsewhere specified).

(*b*) Non-Agricultural Class VI (Commerce) corresponds to Division 6 (Commerce).

(*c*) Non-Agricultural Class VII (Transport) corresponds to sub-divisions 7·0 to 7·4 of Division 7. (Transport, Storage and Communications).

(*d*) Non-Agricultural Class VIII (Other Services and Miscellaneous Sources) includes Division 5 (Construction and Utilities), Division 7 (Transport, Storage and Communications) with the exception of sub-divisions 7·0 to 7·4 ; Division 8 (Health, Education and Public Administration) and Division 9 (Services not elsewhere specified). This also includes other miscellaneous sources of livelihood from unproductive activities including —

(*a*) Persons living principally on income from non-agricultural property;

(*b*) Persons living principally on pensions, remittances, scholarships and funds ;

(*c*) Inmates of Jails, Asylums, Alms-houses and recipients of doles ;

(*d*) Beggars and vagrants; and

(*e*) All other persons living principally on income derived from non-productive activities.

The above sources of livelihood from non-productive activities are not, however, included in Economic Table No. III which is limited to Industries and Services. Hence there will be a difference to this extent between the total self-supporting persons of the non-agricultural classes in Economic Table 1 and the total of this table.

The reconciliation is effected in a separate fly-leaf.

TABLE C-1

Household, Size and Composition

This table is prepared from a four per cent sample of the households recorded in the National Register of Citizens relating to each village or ward. The selection of the sample was made as follows:—

The total number of households in the particular National Register for the village or ward was divided by 25 and to the remainder 1 was added. The number thus arrived at was taken as the first sample household and every 25th household was then marked off for purposes of selection.

TABLE C-II (Sample)

Livelihood Classes by Age Groups

This table is prepared from the data collected from the ten per cent sample slips separated at the time of initial sorting of the enumeration slips, as explained in the introduction to this Book. As mentioned there, no smoothing formula has been adopted in preparing the table and the figures have been tabulated as actually returned in suitable age-groups.

TABLE C-III

Age and Civil Condition

This table contains the information with regard to age and civil condition of the general population on the basis of the data collected for the ten per cent sample slips, as in the case of table C-II. It also contains the figures for all the displaced persons in the district. The figures for the sample population and the displaced persons population are exhibited side by side and not in separate tables to effect economy.

2. The figures have been tabulated as returned without the use of any smoothing formula as in the case of table C-II.

3. In this table, the figures for the divorced and widowed persons are shown together; the figures for divorced persons are separately given in the table below :—

TABLE C-IV

Age and Literacy

This table was also prepared on the basis of data collected from the 10 per cent sample slips of general population, as in the case of Table C-II. The figures relating to all the displaced persons in the district are also given side by side, as in the case of Table C-III. No smoothing formula has been made use of.

2. In this table the figures of illiterates include figures of partially literates that is those who can read a simple letter but cannot write one. The details of such persons are given below:—

TABLE E

Summary Figures of the District and Tahsil

In this table area, percentage variation, density of population and distribution of population by livelihood classes are shown for the district and all the tahsils with the corresponding rural and urban break-up.

2. The area figures adopted in this table are those supplied by the Deputy Commissioner. They are rounded to the nearest integer. In comparing the area figures with those given in the State Tables, the remarks contained in the fly-leaf to Table A-I should be remembered.

3. The density has been calculated on the actual area figures supplied by the Deputy Commissioner but not on the figures shown in column (2) of the table.

4. In calculating the percentage variation in population, the actual adjusted population of rural and urban areas at each Census was adopted.
