PREFACE

District Census Handbooks were introduced for the first time on the occasion of the 1951 Census in almost all other States in India except Jammu and Kashmir where, due to unsettled conditions prevailing then, no Census could be held. Before 1951 also some of the States produced a compilation known as District Census Statistics but so far as Jammu and Kashmir is concerned, neither any District Handbooks nor any District Statistics nor even any District Gazetteers except the one produced by Mr. Bates in about 1874 was ever compiled in the past.

There is hardly any matter of interest in the district life which has not been dealt with exhaustively in the present publication. Broadly speaking, the book consists of three parts. The first part gives a description of the physical features, past history, social and economic structure of the people and administrative achievements. The descriptive part has been divided into six chapters, one dealing with the district as a whole, one relating to Jammu city and the other four to the tehsils of Jammu, Samba, Ranbirsinghpora and Akhnoor. It is followed by a number of appendices containing the administrative statistics supplied by the various departments of the State Government.

Part two of the Handbook contains Census tables on population, sex-ratio, economic structure, literacy, languages etc. etc. together with tables on rural crafts.

The third part known as Village Directory contains, by and large, the most valuable data. It gives in respect of each village the size of its area, number of households, sex-wise population and literacy figures, number of male and female scheduled castes and classification of the working population by nine industrial groups. Further, educational, medical and public health institutions, if any, set up in a village have also been indicated against it. Similarly, the fact that a particular village is connected by road or has been provided with electricity or other facilities has also been noted against its name.

The book has been enriched by providing photographs of shrines and fairs and festivals. In addition, the following maps have also been inserted at appropriate places :—

(1) Map of Jammu and Kashmir State showing its various districts and tehsils ;

(2) Map of Jammu district showing district and tehsil headquarters, roads, post and telegraph offices, medical institutions, dak bungalows, rest houses and other important places ;

(3) Map of Jammu city showing the location of main Government offices, main goods transport, main passengers transport, wholesale and retail trade centres, chemical centres, city and ward boundaries, areas of new industrial expansion and residential expansion etc ;

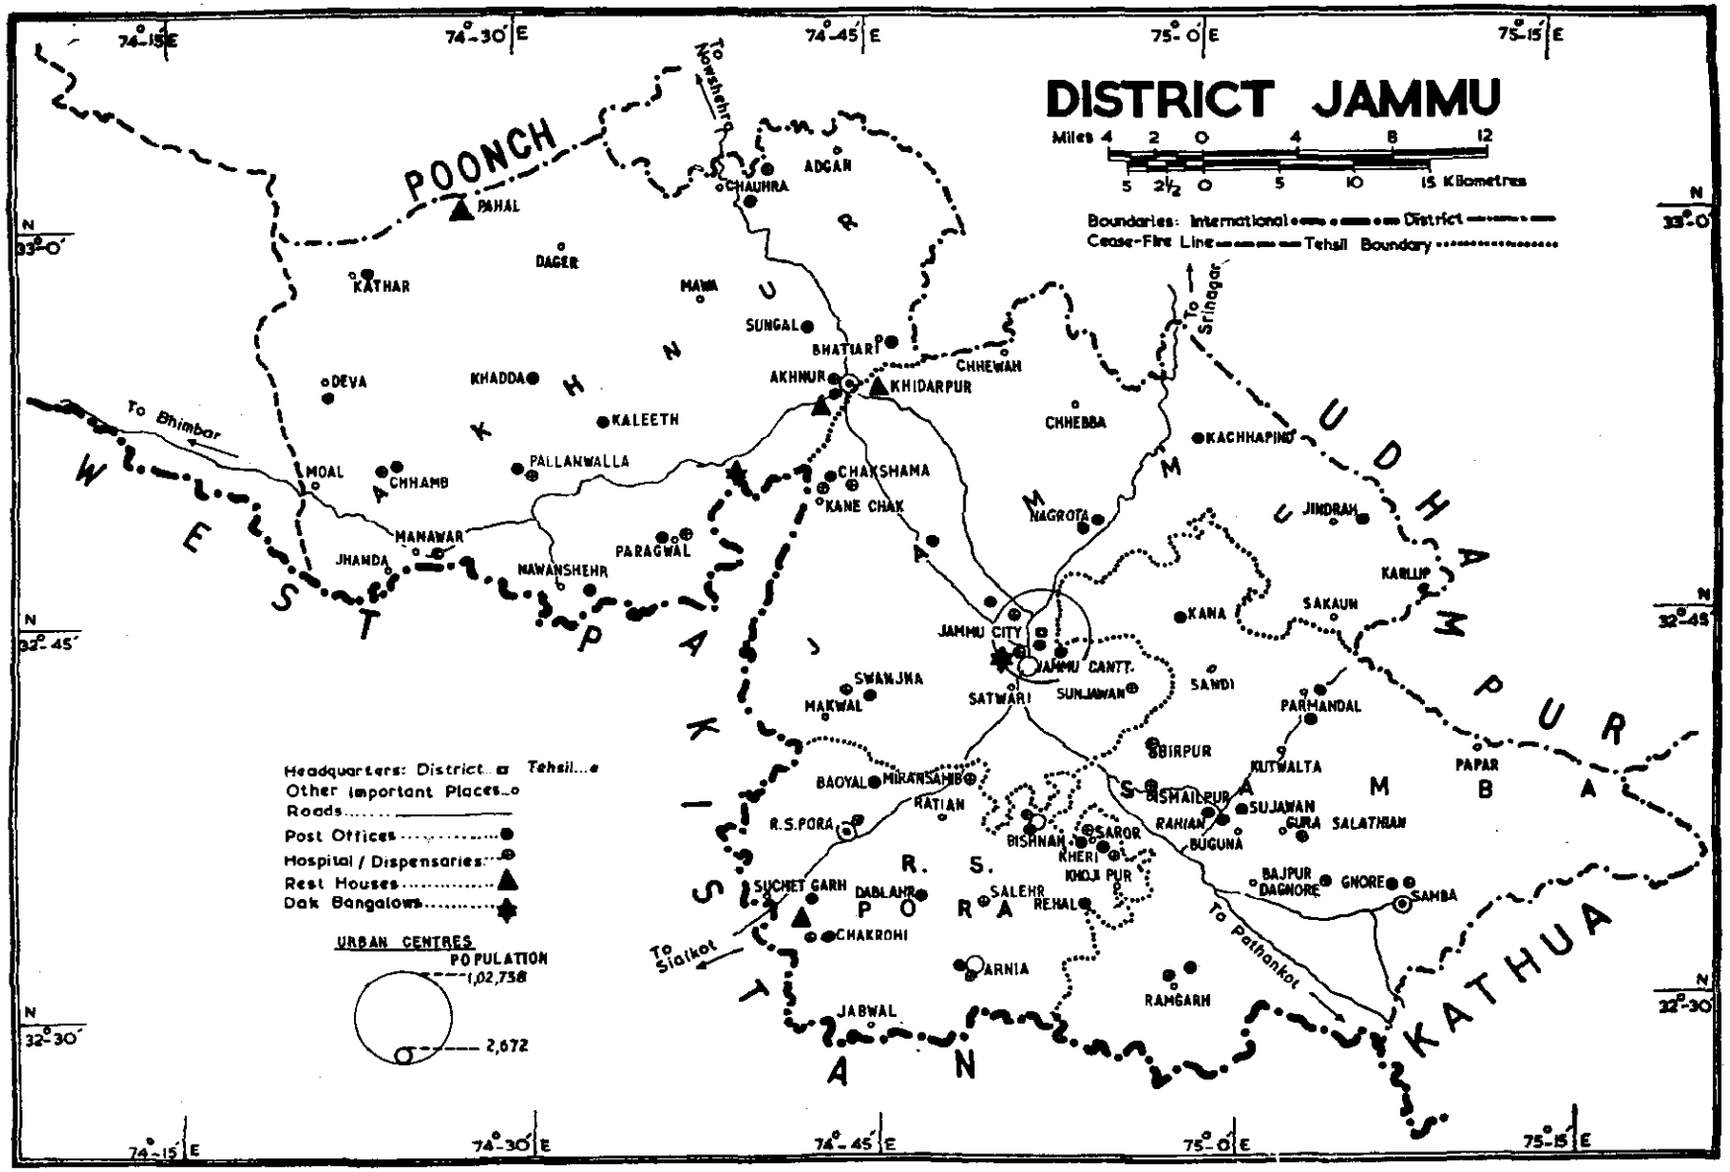

(4) Maps of Jammu, Samba, Ranbirsinghpora and Akhnoor tehsils showing the names and boundaries of each of its towns and villages along with their Census code numbers.

It would not have been possible to undertake this unwieldy and tough work if the various administrative departments of the State Government had not extended fullest co-operation and made available information of diverse type relating to their respective spheres of work. As a matter of fact, this co-operation would not have been forthcoming if the State Government had not themselves taken keen interest to facilitate the work of the Census Department. They have also been good enough to agree to meet the cost on paper, printing and binding of the Handbooks.

The data was originally collected by S. Amar Singh, ex-Tehsildar, who was temporarily re-employed in the Census Department. It was latter tabulated by Shri Chuni Lal Chehra, Statistical Assistant. I place on record my thanks to both for the work done by them. The proof reading was done by Shri Syed Kamal-ud-Din, Shri Abdul Aziz Teli and Shri G. M. Bhat and the maps were prepared by Shri Masood Ahmad Cartographer. I thank them all for the interest they have taken in the work assigned to them.

CHAPTER I

THE DISTRICT

Introduction

Like almost all other districts of the State, Jammu district also derives its name from its headquarter, the city of Jammu which is the winter capital of the State Government. Historians are unanimous in the view that the city was originally founded by Raja Jamboo Lochan who lived in fourteenth century B.C. It is said that the Raja had gone out one day for hunting when he happened to witness a tiger and a goat drinking water from one and the same pond. This extra-ordinary phenomenon set him thinking and he decided to build a city at this site so that the strong and weak could live together in peace and with tolerance. Eventually, he founded the city which came to be known as 'Jamboo' after his own name. With the passage of time and due to its frequent use, the pronunciation of the name got slightly distorted and the city was known as 'Jammu' as it is called now.

Boundaries

The district is bounded in the north and north-east by the tehsils of Reasi and Udhampur of Udhampur District, in the east and south-east partly by tehsil Ramnagar of Udhampur district and partly by tehsil Bashohli of Kathua district, in south and south-west by Gurdaspur district of Punjab and Sialkot district in Pakistan and in north-west by tehsil Nowshehra of District Poonch and parts of tehsil Bimber now in the occupation of Pakistan Government.

Physical Aspects

Notwithstanding the heterogeneous character of its topography and the varying climate of its different parts, geologists have divided the State into four natural regions viz.,

1. The Sub-montane or Semi-mountainous region
2. The Outer Hills
3. The Jhelum Valley
4. The Indus Valley

District Jammu falls in the sub-montane region which includes all other low level areas of Jammu Province, namely, the tehsils of Kathua, Hiranagar and Nowshehra.

The city of Jammu with an elevation of 1030' above the sea level forms the terminus of the Shiwalik ranges, which rise gradually from behind the town. These hills are interwoven in the interior dividing the region into isolated areas, enclaves and inaccessible tracts which functioned in the past as ramparts guarding the independence of the people against external aggression.

Early History

Before and even in the earlier parts of Mughal rule, Jammu Province consisted of petty principalities, important among these being those of Jammu, Kishtwar, Bhaderwah, Bashohli, Reasi etc. During 12th century when Mahmood Ghori invaded India and over-ran Punjab, Rajputs took refuge in the mountainous tracts of Jammu Province and carved out separate estates which they ruled as independent sovereigns. This independence could not however be maintained for long and soon after Mughal rulers subdued the Rajas and made them pay tributes in recognition of their dependence.

After the disintegration of the Mughal Kingdom, however, the Rajas recovered their strength and proclaimed their independence once again. With the installation of Sikh rule in Punjab, however, Jammu and all other adjoining areas were annexed by Maharaja Ranjit Singh with his territories. Mian Kishore Singh who was the direct descendant of Raja Dhrev Dev, an earlier ruler of Jammu, held a prominent and respectable position in the court of Maharaja Ranjit Singh at Lahore. His son Gulab Singh joined the army of Ranjit Singh while in teens and in course of time distinguished himself as a gallant warrior and became an accredited lieutenant of Ranjit Singh. Gulab Singh was eventually made the Raja of Jammu by the Treaty of Amritsar dated 16-3-1846. Later on, he annexed Kashmir with Jammu as a result of the sale deed executed by the British after the fall of Sikh rule in Punjab.

The descendants of Maharaja Gulab Singh ruled over Jammu and Kashmir upto 1948 when Maharaja Hari Singh left the State and his son

Yuvaraj Karan Singh was appointed Regent. With the enactment of a new Constitution for the State which was adopted on 17th November 1956, the monarchy came to an end and the head of the State who is being elected by the Legislature came to be known as the Sadar-i-Riyasat.

Area and its classification

The area of the dictrict as it was constituted in 1941 stood at 1147 sq. miles. During the inter-Census period 1941-61, the jurisdiction of the district was extended by the annexation of Nayabat Chhamb of the erstwhile tehsil Bhimber now on the other side of the Cease-fire line. There has been no field survey after 1941, but the present area of the district as worked out by the Directorate of Map Publication, Dehradun, by planimetering is provisionally estimated at 1248.6 sq. miles. The Directorate of Statistical Bureau of the State Government have however intimated that the area of the district as estimated in 1960-61 stood at 1253.2 sq. miles as per classification given below :—

Kind of land	Area in Acres	Area in Sq. miles	Percentage of total area
1	2	3	4
1. Forests ...	119,123	186.1	15%
2. Land put to non-agricultural uses ...	128,662	201.0	16%
3. Barren and uncultivable land ...	132,238	206.6	16%
4. Permanent pastures	13,291	20.8	2%
5. Land under miscellaneous crops ...	15,322	24.0	2%
6. Culturable waste ...	62,212	97.2	8%
7. Fallow land other than current fallows	10,686	16.7	1%
8. Current fallows ...	70,412	110.0	9%
9. Net area sown ...	250,097	390.8	31%

Climate and Rainfall

The climate of Jammu district is more or less similar to that obtaining in the adjoining districts of Punjab with the only difference that as this district is the terminus of a series of mountains, the nights in summer are generally cooler. The average maximum and minimum temperatures for the last 10 years stood at 34.31° C and 13.93° C respectively. The year 1953 has however been the hottest, the temperature having shot up to 47.2° C (117° F). The minimum temperature was recorded in December 1959 at 2° C.

Rainfall is generally inadequate and often untimely. The district (excluding Tehsil Akhnoor) had its maximum rainfall in 1955 when the average for the three tehsils, of Ranbirsinghpora, Jammu and Samba stood at 1357.21 mms. The deficiency in rainfall is made up mainly by the Ranbir Canal which now irrigates an area of 119,669 acres. Of the two rivers Chenab and Tawi, which feed the Ranbir and other Canals, the former enters the district at Akhnoor and forms the border line of the tehsils of Jammu and Akhnoor and the latter flanks the city and passes through Jammu Tehsil. A number of other small rivulets and streams also pass through the district but these are of no help for irrigational purposes, being dry practically throughout the year except in rainy seasons when they get inundated and cause considerable damage to crops and property.

The People

The district is inhabited by Hindus, Muslims, Sikhs, Jains, Christians, Budhists and depressed classes. Hindus include all the 4 Varnas of the Shashtric period, namely, the Brahmins, Kshattryas, Vaishyas and the Sudras. Each of these consists of a long range of divisions and subdivisions which is made still more extensive by the tendency to multiply the distinction by geographical, linguistic, occupational and family names.

The Brahmins, or more precisely the Dogra Brahmins as they are called to distinguish them from Mohyals and Kashmiri Pandits, claim the largest population in the district. They are predominantly agriculturists and generally literate. Brahmins are not so well-built as the Rajputs but they are more intelligent.

Rajputs who belong to Kshattrya Varna are a martial class and are mostly serving in the Army or employed in agriculture. They profess Hinduism, Islam and Sikhism.

Rajputs are generally tall, well-built and handsome. They are straight-forward in their dealings and incapable of making intrigues. The large majority of Rajputs were illiterate about 2 decades ago. Since then, there has been a remarkable growth in their literacy percentage.

The Jamwal Rajputs enjoy the highest status among all the sub-castes of Rajput Community. Minhas, Chib, Jaral, etc. rank next in order of social status. Salaria, Chadak, Bagu, Bajyal, etc. form the third category. All others hold fourth rank in the social hierarchy.

Besides Rajputs, other castes inhabiting the district consists of Arora, Jhiwar, Jogi, Khatri, Labana, Mahajan, etc.

Muslims are mostly agriculturists though a few of them are also employed in Government Services.

Jains belong to the business community almost without any exception. They are mostly concentrated in one locality of Jammu city which is known after them and called Babra Bazar.

Sikhs follow a number of occupations other than agriculture.

General Administration

The Collector who also functions as Deputy Commissioner and District Magistrate is the head of Civil administration of the district and is assisted by the following officers :—

1. Additional District Magistrate
2. Assistant Commissioner
3. Tehsildars and Naib Tehsildars
4. Superintendent of Police and Deputy Supdts. of Police.

For administrative purposes, the district has been divided into four Tehsils, Jammu, Samba, Ranbirsinghpora and Akhnoor. Each of these has further been sub-divided into a number of Police Stations, depending upon population, area involved and the topography. In all, there are 12 police stations head-quartered in various rural and urban areas of the tehsils as indicated below :—

(1)	Tehsil Jammu	Urban :	1. City Police Station
			2. Pacca Danga Police Station
			3. Saddar Police Station
		Rural :	1. Jajjar-Kotli Police Station
			2. Kahana Chak Police Station
(2)	Tehsil Samba	Urban :	1. Samba Police Station
		Rural :	1. Ramgarh Police Station
(3)	Ranbirsinghpora Tehsil	Urban :	1. Ranbirsinghpora Police Station
			2. Bishna Police Station
(4)	Akhnoor Tehsil	Urban :	1. Akhnoor Police Station
		Rural :	1. Chhamb Police Station
			2. Khour Police Station

Villages and Towns

The district consists of 1 city, 6 towns, 1,037 inhabited and 13 unihabited villages. This does not include 155 villages which were completely depopulated as a result of the mass migration of the inhabitants during and after the tribal raids of 1947. Below is given the distribution of 1,000 persons between the rural and urban sectors of the district together with similar proportions for 1,000 males and females :—

		Population per 1000		
		Persons	Males	Females
Rural	...	753	741	766
Urban	...	247	259	234

The average population per inhabited village stands at 375. The largest number of villages however consists of those with a population of less than 200. Villages having a population of 2000-4999 are smallest in number. There is no village with a population of 5000 or more.

The following statement gives the percentages of population by various categories of villages according to population groups :—

Less than 200	200-499	500-999	1,000-1,999	2,000-4,999
11%	32%	28%	22%	7%

Except for Jammu city and the cantonment which fall in class I (above 100,000 population) and class V (5,000-9,999 population) respectively, all other urban areas belong to class VI (less than 5,000 population). Following are the percentages of the total urban population of the district inhabiting each of these areas :—

1.	Jammu City ...	80%
2.	Jammu Cantt. ...	4%
3.	Samba ...	4%

4.	Ranbirsinghpora	...	4%
5.	Akhnoor	...	3%
6.	Arnia	...	3%
7.	Bishna	...	2%

Bishna and Arnia were village areas in 1941 and were declared towns during the inter-census period. Below are given the population figures of the urban areas of 1961 together with their population as returned at the 1941 Census :—

Name of urban area	1941 Population	1961 Population	Percentage decennial growth (1951-61)
Jammu City	50,379	102,738	+ 34.20
Jammu Cantt.	8,468	5,519	— 21.08
Samba	3,287	4,361	+ 14.04
Ranbirsinghpora	2,150	4,820	+ 38.31
Arnia	3,545	3,827	+ 3.83
Bishna	1,993	2,672	+ 14.53
Akhnoor	3,398	3,839	+ 6.11

It is obvious that there has been an abnormal growth of population in Jammu City and Ranbirsinghpora town. This is due mainly to the rehabilitation of displaced persons of the State as also immigrants from other parts of India and Pakistan.

The 1941 population of Jammu Cantonment includes 3,925 persons of the then State forces, the civil population being only 4,543. In 1961, the army personnel have been enumerated in the States where they were born irrespective of their being present there at the time of Census.

***Houses and Households**

The sub-joined statement gives the number of dwellings, shop-com-dwellings and workshop-cum-dwellings as also the average number of persons per dewelling in the district and its rural and urban areas :—

	No. of dwellings, shop-cum-dwellings and workshop-cum-dwellings	Average number of persons per dwelling
Total	104,257	5.2
Rural	79,847	5.1
Urban	24,410	5.4

This shows that the average size of a household is more or less normal both in the rural and urban sectors of the district.

The total number of occupied houses in the district stands at 178,651 of which 129,420 are in the rural and 49,231 in urban areas. In other words, the average number of persons occupying a rural and an urban house stands at 3.1 and 2.7 respectively. An occupied census house means any structure other than the one which was found vacant at the time of Census, used not only as a dwelling but for any other purpose. Thus, an occupied Census house includes workshop, shop, garage, office, educational and medical institution, hotel and restaurant, and the like.

Since a very large number of displaced persons and immigrants have settled in the district, about 82% households live either in no regular room or in one regular room only. Below are given the percentages of various categories of households according to number of rooms occupied by each :—

No regular room	...	2.3%
1 regular room	...	79.5%
2 regular rooms	...	12.3%
3 regular rooms	...	3.5%
4 regular rooms	...	1.4%
5 and more regular rooms	...	1.0%

The average number of persons per household and average number occupying a room in the rural and urban areas of the district stand as under :—

	1 room Average No. of persons		2 rooms Average No. of persons		3 rooms Average No. of persons		4 rooms Average No. of persons		5 rooms and more Average No. of persons	
	Per household (i)	Per room (ii)	Per household (iii)	Per room (iv)	Per household (v)	Per room (vi)	Per household (vii)	Per room (viii)	Per household (ix)	Per room (x)
Rural	4.93	4.93	6.04	3.02	6.92	2.31	7.35	1.84	7.64	1.32
Urban	4.64	4.64	5.98	2.99	6.85	2.28	7.38	1.85	9.35	1.49

It is clear from the above that households both in the rural and urban sectors living in dwellings with less than 4 rooms are over crowded.

*Data relating to households, dwellings, size of accomodation etc. is based on Housing Survey conducted 2 or 3 months before the actual Census. This data has been published in Vol. VI, Part IV—*Report on Housing and Establishment.*

Population and density

The population of the district as returned at the 1961 Census stands at 516,932, the rural sector being inhabited by 389,156 and the urban by 127,776 persons. The subjoined statement gives the density per square mile of the district and its rural and urban areas for 1961 and 1941 :—

	1961			1941		
	Area in Sq. miles	Population	Density	Area in Sq. miles	Population	Density
Total	1,248.6	516,932	414	1,147.0	431,362	376
Rural	1,233.7	389,156	315	1,139.8	363,680	319
Urban	14.9	127,776	8,628	7.2 (7.16)	67,682	9,453

The total density in 1961 is not only higher than that for 1941 but both total and rural densities by far exceed the corresponding 1961 densities of the State, which stand at 66 and 55 respectively. The density of the urban areas of the district is also fairly high, when compared with the State density of 5,031 per sq. mile. These increases are not due so much to normal growth of population as to the heavy influx of immigrants. The district holds 7th position by area and 4th by population in the State but ranks next only to Srinagar in so far as density is concerned. This is because, notwithstanding the mass migrations of 1947, displaced persons from Pakistan and various parts of the State on the other side of the Cease-fire line as immigrants from Punjab and other States have, in a large measure, concentrated in this district.

Growth of Population

The subjoined statement gives the growth of population from decade to decade since 1901 for the district as a whole and for its rural and urban sectors : –

Year	Total	Rural	Urban	Percentage decade variation		
				Total	Rural	Urban
1901	343,369	307,239	36,130	..	..	..
1911	328,523	285,088	43,435	-4.3	-7.2	+20.2
1921	335,891	292,730	43,161	+2.2	+2.7	-0.6
1931	372,850	322,052	50,798	+11.0	+10.0	+17.7
1941	428,719	361,037	67,682	+15.0	+12.1	+33.2
1951 (estimated)	472,826	378,348	94,478	+10.3	+4.8	+39.6
1961	516,932	389,156	127,776	+9.3	+2.9	+35.2

During the first three decades of the present century, Jammu suffered heavily from several epidemics, particularly plague and malaria which raged its towns and villages in a virulent form from year to year. The havoc caused by these gave a severe blow to the growth of population which, instead of registering any increase, fell by 4.3% during the decade 1901-11. Even during the succeeding decade, the rate of growth was very slow.

***Migration**

Persons born in the district itself comprise 78.3% of its population, all others being immigrants who hail mostly from areas of the State now on the other side of the Cease-fire line, Pakistan and other States in India. These together constitute about 21.7% of the district population as indicated below :—

	Number	Percentage of district population
1. Persons born in other districts of the State including the areas on the other side of the Cease-fire line ...	57,828	11.2
2. Persons born in countries outside India ...	37,600	7.3
3. Persons born in other States in India ...	16,257	3.1
4. Unclassifiable ...	417	0.1

Migrants from countries outside India include 37,407 displaced persons from Pakistan alone. Of the remaining, 162 belong to Nepal and 31 to various other countries.

Among people born in other States in India, the largest number consists of those who have migrated from Punjab. Most of these are employed in army, public health, Government service, etc. Others are engaged in manufacturing other than household industry, construction, trade and commerce and agriculture.

The figures of emigration are not available separately for each district of the State.

Sex Ratio

The number of females per 1,000 males in the district as a whole stands at 886 as against

*Data relating to migration has been obtained from D-Series Tables, which have been published in Vol. VI, Part II-C, Cultural and Migration Tables.

915 and 801 in the rural and urban areas respectively. One explanation for the low proportion of females in the urban areas is that majority of the Secretariat Staff, the personnel of other moving offices, labour from Kashmir, Legislator and businessmen, who were enumerated in Jammu City, were not accompanied by their families.

The following statement giving the sex-ratio for the last six decades for the district and its rural and urban sectors will show that there has been a considerable increase in the proportions of females during this period. In 1901, there were only 626 females per 1,000 males in the urban areas as against 801 in 1961. In the rural sector, the corresponding increase has not been so pronounced though here also the proportion has registered over 3% increase :-

	Females per 1,000 males						
	1901	1911	1921	1931	1941	1951	1961
Total	852	814	839	828	850	869	886
Rural	883	846	873	866	893	905	915
Urban	626	623	641	622	647	740	801

While the low proportion of females is the resultant action of several forces, the main cause has been early marriage of girls and the consequent great dangers to which they expose themselves at the time of child-birth. With the expansion of education, enactment of the Infant Marriage Prevention Act, realisation of the risks attendant on early marriages, improvement in the standard of midwifery and of the treatment of maternity cases, the proportion of females has been steadily growing from decade to decade. Although it is still very much below the All India ratio of 941, it is hoped that the disparity will disappear before long. In any case, in view of the fact that as many as 3,354 married females in the age-group 10-14 were enumerated in this district at the Census of 1961 and at least 14 of them were reported to be widows, the measures already taken require to be enforced more vigorously than before.

A closer examination of the structure of sex-ratio shows that the female population in the district as a whole and its rural areas is more or less of the same size as that of males upto the age of 14 years, though as will be seen from the sub-joined statement, the proportion of females gradually tends to decline from year to year :—

	Sex-ratio		
Age Group	*Total*	*Rural*	*Urban*
0— 4	950	955	932
5— 9	929	932	917
10—14	907	916	880
15—19	868	916	757
20—24	954	1,058	750
25—29	1,000	1,103	776
30—34	908	978	736
35—39	834	874	724
40—49	770	799	687
50—59	708	720	668
60+	743	739	758

The sex-ratio of the age-group 15-19 is, however, very low not only when compared with the corresponding proportion of females in the age-group 10-14 but even in relation to the age-groups 20-24 and 25-29. This could be due to high mortality rate brought about by early marriages in the age-group 10-14.

After the age of 29, the proportion of females again declines and is as low as 708 in the age-group 50-59.

These fluctuations hold almost equally true in the case of rural females. In so far as the urban sector is concerned, the fall in the sex-ratio starts at the age of 5 and the disparity of females with the male population goes on increasing till the age of 59. It is possible that this may, among other reasons, be due to employment of literate females or marriages of females in rural areas of the district or in other districts.

Age Structure

The age structure of the district and its rural and urban sectors is given in the following statement :—

Age Group	Percentage of total population			Percentage of rural population			Percentage of urban population		
	Persons	Males	Females	Persons	Males	Females	Persons	Males	Females
Infants, boys and girls (0-14) ...	42.6	41.5	43.7	43.6	43.1	44.1	39.4	37.1	42.3
Youngmen and women (15-34) ...	31.9	31.2	32.8	30.4	29.0	32.0	36.7	37.6	35.5
Middle aged Persons (35-54) ...	17.1	18.0	15.9	17.1	18.0	16.0	17.0	18.0	15.7
Elderly Persons (55 and above) ...	8.3	9.2	7.4	8.8	9.8	7.7	6.8	7.2	6.4

The age structure shows that majority of the population consists of infants, boys and girls both in the district and in its rural and urban areas. The least proportion of persons of this category has been returned from the male population of urban areas where infants, boys and girls comprise only 37.1% of the total population as against 43.1% of the rural sector.

Youngmen in the age-group 15-34 are in greater proportion in the urban areas than in the rural. This disparity is reflected in both the sexes though it is not as marked among females as in the males.

Vital Statistics

There have been 136,150 births and 41,209 deaths during the decade ending 1960, giving a net increase of 94,941. These figures do not include the deaths and births for the years 1957, 1958, 1959 and 1960 of Arnia Town of Tehsil Ranbirsinghpora which has a total population of 3,827. A comparison of the population figures of 1941 Census with those of 1961 shows that the total increase during the period of 20 years has been 85,570 as against the net increase of 94,941 caused by deaths and births during 10 years only. The anomaly is explained by the large scale migrations which took place in 1947.

The sub-joined statement gives the rates of birth, death, sex-ratio at birth and net effect of deaths and births per 1000 population for the decade 1951-60 on the estimated population of these years :—

Year	Estimated Population	Births	Birth rate per 1000 population	Deaths	Death rate per 1000 population	Sex-ratio per 1000 males at birth	Net increase of births per 1000 population
1951	472,826	11,469	24.26	4,521	9.56	830	14.7
1952	477,237	11,930	25.00	4,249	8.90	815	16.1
1953	481,648	11,780	24.46	4,891	10.15	888	14.3
1954	486,059	12,354	25.42	4,148	8.53	908	16.9
1955	490,470	12,945	26.39	3,571	7.28	866	19.1
1956	494,881	13,645	27.57	4,273	8.63	817	18.9
1957	499,292	14,258	28.56	4,732	9.48	867	19.1
1958	503,703	16,662	33.08	2,751	5.46	874	27.6
1959	508,114	16,969	33.40	2,894	5.70	892	27.7
1960	512,525	14,138	27.58	5,179	10.10	831	17.5

It is apparent that except for the years 1958 and 1959, the birth rate has been always below 28.60 per 1000 population and the death rate above 7 per 1000. There being no explanation available for the abrupt rise in birth rate and the sudden fall in the rate of deaths per 1000 population during 1958 and 1959, the death and birth figures for these two years seem to be doubtful.

Marital Status

There is no married person in the age-group 0-9 in the entire district. Even in the age-group 10-14, the number of married persons is fairly small, at least so far as the male population is concerned. Altogether, 786 males within the age-group 10-14 are married against 3,354, the corresponding number of married females of this age. Among the latter, there are 14 widows, 4 divorced or separated persons and 140 of unspecified status.

The subjoined statement gives the sex-wise proportions by marital status of the district and its rural and urban sectors for every 100 persons of each sex belonging to each age-group :—

	Age group	Never Married		Married		Widowed		Divorced or Separated		Unspecified status	
		Males	Females	Males	Females	Males	Females	Males	Females	Males	Females
Total	0—9	100	100	..	..	..	..	..	..	..	..
	10—14	97	86	3	13	..	N	N	N	N	1
	15—54	31	7	65	83	4	9	N	N	N	1
	55—69	4	N	73	36	23	63	N	N	N	1
	70+	3	N	57	11	39	89	1	..	N	N
Rural	0—9	100	100	..	..	..	..	..	..	..	..
	10—14	96	83	4	16	..	N	N	N	N	1
	15—54	29	5	67	85	4	10	N	N	N	N
	55—69	4	N	72	37	23	63	1	N	N	N
	70+	3	N	58	11	38	89	1	..	N	N
Urban	0—9	100	100	..	..	..	..	..	..	..	..
	10—14	99	96	N	3	..	..	..	..	1	1
	15—54	37	14	60	77	3	8	N	N	N	1
	55—69	4	N	75	35	21	65	N	N	N	N

Education

It appears from Part III of the Census Report of the State for 1941 that the State Government had planned to provide for boys in course of time a primary school in every village with a population of over 500. The report further says that at that time the number of boys' and girls' Primary/Basic Activity Schools in tehsils Jammu (excluding city), Ranbirsinghpora and Akhnoor stood at 28, 20 and 43 respectively. The number of boys and / or girls schools in tehsil Samba was not known, but it is unlikely that it could be more than 30, the average for the other 3 tehsils. On this basis, it may be assumed that there were in all 121 institutions of this category in the district. The names and the population of the villages in which these schools were located are not also traceable from the Census Report but it is possible that while some of them may have been functioning in villages with population of over 500, others may have been located in less populated areas. In any case, there were in all 1,165 villages in 1941 with population of above or below 500. In other words, only 10.4% villages had till then been provided with Primary/ Basic Activity Schools. It is possible that the proportion might be lesser if worked for only such villages whose population was 500 or more.

In 1961, there were 284 Primary/Basic Activity Schools for boys and girls. The number of inhabited villages of all population groups being 1037 only, the percentage of villages with Primary/Basic Activity Schools works out to 27.

The total number of girls' Primary/Basic Activity Schools in 1961 stood at 85, of which 8 belong to the urban and 77 to the rural areas. The corresponding number of 1941 is not known except that there were six schools in tehsil Akhnoor.

In view of the very low proportion of literate persons in the State, the Government decided in 1930 to introduce a scheme of Compulsory Education for boys upto the 4th Primary standard. Accordingly, the primary Education Act 1930 (Act No. 3 of 1986) was passed and made applicable in the first instance to the two cities of Jammu and Srinagar and the towns as Sopore, Udhampur and Mirpur. The Act provided, among other things, that it would be the duty of the parents residing within the areas to which the Act applied to cause their children between the age of 6 and 11 years to attend a recognised school for primary Education. The Commission of Enquiry of 1942 had also emphasised in its recommendations

the urgent necessity of compulsion for Primary Education being introduced in villages where public conscience in favour of education had yet to be roused.

In actual effect, however, not only the scope of the Act was never extended to other areas but it was not enforced even in the cities and towns to which it was made applicable. The original plan that villages with a population of over 500 should have a Primary or a Basic Activity School was not, as explained above, also adhered to and while many villages with less than 500 population were provided with such Schools, a large number of others whose population is by far greater are still without any Primary or Basic Activity School.

The progress of conversion of Primary into Basic Activity Schools as proposed in 1939 by the Committee of Educationists set up in pursuance of the recommendations of the Un-employment Commission has been remarkable during the period 1947-61. There were only 2 such institutions in 1941, one in Jammu, the other at Srinagar. In Jammu district alone, the corresponding number in 1961 stood at 103 of which 86 are for boys and 17 for girls. The total number of Primary and Basic Activity Schools in the district being 307, it is clear, that the progress of conversion has not been slow.

The fundamental principle of basic education which encompasses a course of 7 years is to diversify education according to the difference in mental and physical equipment of the child and exploitation of eye and hand in making education more effective and significant. The method of education employed in these institutions and the syllabi prescribed have been conceived on sound lines and should give a pupil substantial advantage over his counterpart in an ordinary Primary School. The fact, however, remains that Basic Education which is particularly suitable for girls is not proceeding on the same pace in respect of girls schools as the conversion of Primary Schools for boys. It is not also known whether any relationship has been established between the Basic Activity Schools and Higher educational institutions. That such a relationship should be crystallized is an imperative necessity if the practical bias for arts and crafts created during the Basic Education course is not to be allowed to go waste and is to be developed further.

The following statement gives the number of educational institutions of various categories for boys and girls in 1961 together with the total number of students borne on the rolls of each category :—

Sex	Colleges/Higher Secondary/ High Schools		Lower High/Middle/ Central Schools		Primary/Basic Activity Schools		Total	
	Number of institutions	Number of pupils	Number of institutions	Number of pupils	Number of institutions	Number of pupils	Number of institutions	Number of pupils
1	2	3	4	5	6	7	8	9
Boys	41	19,955	63	13,243	222	16,144	326	49,342
Girls	12	7,909	22	3,485	85	5,438	119	16,832
Total	53	27,864	85	16,728	307	21,582	445	66,174

It is clear that there were in all 21,582 boys and girls borne on the rolls of Primary and Basic Activity Schools functioning in the rural and urban sectors of the district. This gives a proportion of 26% only in a total population of 82,894 in the age-group 6-11 in the district as a whole.

The district has 8 colleges, 3 for Arts and Science and 5 pertaining to Commerce, Teachers Training, Polytechnic, Ayurvedic and Agriculture. Of sheet, one Arts College is meant for girls exclusively.

The total number of Higher Secondary Schools stands at 5 including one for girls.

Of the 40 High Schools, 10 are meant for Girls and 30 for Boys. The sub-joined statement gives the number of Boys and Girls in Colleges, Higher Secondary Schools and High Schools :—

Sex	Colleges		Higher Secondary Schools		High Schools	
	No. of institutions	No. of pupils	No. of institutions	No. of pupils	No. of institutions	No. of pupils
1	2	3	4	5	6	7
Boys	7	2,025	4	3,076	30	14,854
Girls	1	549	1	632	10	6,728

There is obviously some overcrowdedness in colleges and high schools meant for girls and in the higher secondary schools for boys.

The boys' schools are manned by 1,384 teachers and the girls' by 474.

Literacy

The incidence of literacy which stands at 18.6% is most pronounced in Jammu among all the districts of the State. This is particularly reflected in the urban sector where the percentage is as high as 41.5% as against 11.1% of the rural areas. It is interesting to note that the percentage of female literates in the urban areas is almost double than that of male literates in the rural sector.

The sub-joined statement gives the sex-wise and total literacy percentages of the district as a whole and of its rural and urban sectors :—

Percentage of literate and educated persons to total population

Total			Rural			Urban		
P	M	F	P	M	F	P	M	F
18.6	25.7	10.6	11.1	17.8	3.7	41.5	48.4	32.9

Following are the proportions of literate persons in the various age groups : —

Age-groups	Percentage of literates to the population in the age-group
0—14	12%
15—34	29%
35—59	18%
60+	11%
Age not stated	2%

The number of urban literate males and females per 1,000 urban population of each sex is highest in Jammu District among all the districts of the State. Of every 1,000 males of Jammu, 484 are literate as against 336 of Srinagar. Similarly, the number of female literates per 1,000 population stands at 329, the corresponding proportion in Srinagar being 147 only. The sub-joined statement shows at a glance the distribution of literate non-worker males and females in urban areas per 1,000 population by educational levels :—

	Literate without educational qualifications	Primary or Junior Basic	Matriculation or Higher Secondary	University degree or Post-graduate degree other than technical degree	Technical degree or diploma equal to degree or post-graduate degree
	(i)	(ii)	(iii)	(iv)	(v)
Males	124	38	43	8	..
Females	203	68	39	7	N

The number and percentages of persons possessing educational qualifications are given below in respect of the urban areas of the district :—

	Number	Percentage of urban population
Primary or Junior Basic ...	10,571	8.3
Matriculation or Higher Secondary ...	11,373	8.1
Technical Diploma not equal to degree ...	67	0.1
Non-Technical Diploma not equal to degree ...	3	N
University or post-graduate degree other than technical degree ...	2,770	2.2
Degree in Engineering ...	20	N
Degree in Medicine ...	40	N
Degree in Agriculture ...	6	N
Degree in Veterinary and Dairying ...	4	N
Degree in Technology ...	1	N
Teaching ...	240	0.2

The corresponding statistics for the rural sector stand as under :—

Primary or Junior Basic ... 7,170 or 1.9% of the rural population

Matriculation and above ... 2,654 or 0.7% of the rural population

The largest number of literate persons in the urban areas with or without educational qualifications is employed in Government and private services or in other activities, such as, priest-hood, legal service, insurance, community services, etc. About 47% of those with Primary or Junior Basic Standard are employed in other services and majority of the remaining are engaged in trade and commerce, manufacturing other than household industry and transport, storage, etc. Only 29% persons from among those who have passed matriculation or a higher examination other than a degree or diploma are working in trade and commerce, construction, manufacturing and transport, etc., all others being engaged in other services.

By and large, the holders of degrees, technical and non-technical, are either employed in construction or in other services. Only a small percentage is working in manufacturing other than household industry, trade and commerce, etc.

The sub-joined table gives the distribution of 100 literate workers with various educational qualifications according to industrial classification :—

Educational levels	Total Workers	In Cultivation	As Agricultural labourer	In Mining, and Quarrying	At Household Industry	In Manufacturing other than household Industry	In Construction	In Trade and Commerce	In Transport, Storage and Communications	In Other services
1	2	3	4	5	6	7	8	9	10	11
Primary or Junior Basic ..	100	2	N	N	1	12	4	23	11	47
Matriculation or Higher Secondary	100	N	N	N	N	4	6	14	5	71
Technical diploma not equal to degree	100	..	..	..	..	..	25	..	..	75
Non-technical diploma not equal to degree ..	100	..	..	..	..	..	..	..	..	100
University or post-graduate degree other than technical degree ..	100	N	..	N	..	2	3	5	1	89
Engineering ..	100	..	..	..	..	5	45	..	..	50
Medicine ..	100	..	..	..	..	..	..	..	..	100
Agriculture ..	100	..	..	..	..	..	..	..	..	100
Veterinary and Dairying ..	100	..	..	..	..	..	..	..	..	100
Technology ..	100	..	..	..	..	..	..	..	..	100
Teaching ..	100	..	..	..	..	..	..	..	..	100
Others ..	..	..	..	..	..	..	..	..	..	..

In the rural areas also, majority of literate persons with educational qualifications are engaged in other services. The next important sector of employment in this case is however cultivation. The percentages of persons possessing educational qualifications who are employed in trade and commerce, transport, construction, etc. are very small as indicated below :—

Educational levels	Total Workers	In Cultivation	As Agricultural labourer	In Mining and Quarrying	At Household Industry	In Manufacturing other than Household Industry	In Construction	In Trade and Commerce	In Transport, Storage and Communications	In Other services
1	2	3	4	5	6	7	8	9	10	11
Primary or Junior Basic ..	100	26	N	N	1	1	1	4	2	65
Matriculation and Above ..	100	18	..	N	N	1	2	3	1	75

Language

No less than 81 % people of the district have returned Dogri as their mother-tongue. Those with Punjabi as mother-tongue constitute 12%. The largest number of persons in the State whose mother-tongue in Hindi has been returned from District Jammu, though the corresponding proportion in this case stands at 3% of the district population only. Among other languages, Kashmiri and Gojri alone claim 2% and 1% population respectively. Afghani/Kabuli/Pakhto/Pashto/Pathani, Bakerwali, Bengali, Bhadrawahi, Bihari, Boria, Chetori, English, Garhwali, German, Gilgiti, Gojri, Gorkhali, Gujarati, Jatki, Kaghani, Kannada, Kishtwari, Konkani, Kumauni, Ladakhi, Madrasi, Malayalam, Marathi, Mehari, Mirpuri, Multani, Nepali, Oriya, Pahari—unspecified, Persian, Punchi, Rajasthani, Sindhi, Tamil, Telugu, Tibetan and Urdu together comprise 1%.

The number of persons in the district as a whole who speak subsidiary languages in addition to their mother-tongues is 69,519 or 13% of the total population. Among these, those whose mother-tongues are Dogri, Hindi, Kashmiri and Punjabi claim high percentages as indicated below :—

Dogri 62 % Hindi 6% Kashmiri 7% Punjabi 21%

The sub-joined statement shows the various subsidiary languages spoken :—

Mother-tongue	*Subsidiary language*
1. Bakerwali	1. Dogri
	2. Urdu

	5. Punjabi

Health

With the implementation of developmental plans and the consequent multiplication of public health institutions, the health condition of the people has considerably improved. The rate of growth of population for the two decades 1941 to 1961 has been 20.6% against 20.8%, the corresponding rate for the State as a whole. Since, however, Jammu is one of the main districts of the State, which has undergone considerable dislocation of population during and after 1947, this percentage may not reflect the actual rate of growth. The vital statistics for the period 1951 to 1960, however, show that there has been a net increase of 94,941 births or 20.1% on the 1951 population estimated at 472,826.

It is gratifying to note that some of the epidemics which haunted the district in a virulent form from year to year before 1941 have completely been eradicated. Plague, for instance, which accounted for 2,680, 5,251, 9,134 and 23,840 deaths during the decades 1931 to 1940, 1921 to 1930, 1911 to 1920 and 1901 to 1910 respectively has completely disappeared and has not been heard of at any time during the last two decades.

This is also true to some extent of typhoid and fever which caused as many as 2,844 deaths in 1953 and 1,731 even in 1956. The epidemics seem to have been checked since 1958 when the death toll fell to 439 only. In 1959, the number was further reduced to 354.

Likewise, there has been a sharp decline in the deaths caused by cholera, small-pox and tuberculosis whose numbers have fallen from 251, 49 and 122 in 1951 to 63, 24 and 57 respectively in 1959.

There has however been a steady increase in the number of deaths due to dysentery. The epidemic accounted for 153 deaths only in 1951 against 265 in 1953, 769 in 1957 and 387 in 1959.

Medical

Only 12 medical institutions functioned in 1941 in the rural and urban sectors of the district except tehsil Samba in respect of which necessary data is not available in the previous Census Report. These consisted of two hospitals, one for males and other for females, a tuberculosis dispensary, 6 allopathic dispensaries, 1 Unani and 1 Ayurvedic dispensary and a chemical laboratory for blood tests. The corresponding number in 1961 stands at 49 as indicated below :—

Hospitals	...	4
Allopathic dispensaries	...	17
Ayurvedic dispensaries	...	26
Unani dispensary	...	1
Land reclamation Unit Bain Bajalta		1

Of these, 35 are in the rural and 14 in the urban sector of the district. Broadly speaking, the average number of persons catered by each institution in the rural and urban areas stands at 11,119 and 9,127 respectively.

The total number of beds provided in hospitals stands at 462 or 8.9 per 10,000 population. This works out to less than 0.4 bed per square mile.

The above institutions are manned by the following technical personnel :—

Doctors	...	46
Nurses	...	53
Mid-Wives	...	26
Dais	...	55
Dawasaz	...	25
Health Visitors	..	10
Compounders	...	76
Hakims and Vaids	...	16
Vaccinators	...	7

The total number of patients treated in the out-door and in-door departments of the allopathic institutions stands at 440,067. Of these, 11,258 were treated as in-patients.

No beds are provided in the Ayurvedic and Unani dispensaries. The total number of out-patients treated by these institutions stands at 249,742.

The allopathic institutions carried out 13,906 operations of which 2,261 were major.

Among the Ayurvedic and Unani dispensaries, those functioning in Tehsil Ranbirsinghpora carried out as many as 1,050 minor and 4 major operations. The number of operations performed by similar dispensaries in the other three tehsils did not however exceed 384.

Water Supply

There are 33 tube-wells including 1 filtration plant in the District. Of these, 17 have been

built in the rural areas and 16 including the filtration plant in the urban sector. The rural tube-wells feed 45 villages which have been provided with protected water supply.

In all other parts of the district, water available in ponds, rivers, canals and wells is used both for drinking and other purposes. The State Government are however embarking on an elaborate plan of building a net-work of tube-wells so as to provide protected water supply in every village.

Religion

The district is inhabited by Hindus, Muslims, Sikhs, Christians and a small number of Budhists, Jains, etc. Hindus comprise 83% of the population, Muslims 10%, Sikhs 6% and Jains and Christians 1%. The number of Budhists in the district as a whole is very small.

In the urban sector, 76% population consists of Hindus, 14% of Muslims, 8% of Sikhs and 1% each of Christians and Jains.

The corresponding percentages of the population of various communities in 1941 are given below :—

Hindus	Muslims	Sikhs	Budhists	Others
59%	37%	3%	N	1%

The increase in the number of Hindus is partly due to the influx of immigrants from Pakistan, Punjab and other States in India and partly due to the rehabilitation of displaced persons who belonged to areas of the State now on the other side of the Cease-Fire Line. Likewise, the fall in the percentage of Muslims is explained by the large scale migrations which followed the tribal raids of 1947.

Area under cultivation

The net area sown during 1959-60 measured 268,157 acres or 419.0 sq. miles. Of this, 122,903 acres or 192.0 sq. miles consisting of 102,053 acres owned by Government and 20,850 acres belonging to private individuals were irrigated by canals and 899 acres by wells. The remaining area was cultivated with the help of natural rivers, ponds and tanks.

It has been indicated earlier that according to data supplied by the Directorate of Statistical Bureau of the State Government, the net area sown in 1960-61 stood at 390.8 sq. miles only. The Statistical Bureau have not furnished any reasons for the contraction of the cultivated area from 419.0 sq. miles in 1959-60 to 390.8 sq. miles in 1960-61. They have, however, confirmed that the figures supplied are correct.*

At any rate, land area per capita works out to 0.52 acres and the irrigated area at 0.24 acres only.

Irrigation

1. The most important source of irrigation is the Ranbir Canal. It was constructed in 1904 and its uptodate cost stands at rupees 48.64 lakhs. The canal takes off from river Chenab near Akhnoor and measures 39.4 miles besides 251 miles of its various distributaries. It catered an area of 116,682 acres or 182.3 sq. miles during 1959-60.

According to the information supplied by the State Irrigation Department, the area irrigated by Ranbir Canal has gone up from 82,478 acres or 128.8 sq. miles in 1929 to 119,669 acres or 187.0 sq. miles in 1960-61.

2. Partap Canal — This was also built in 1904 but the cost involved was Rs. 6 lakhs only. Like Ranbir Canal, it is also fed by river Chenab from which it takes off about six miles below Akhnoor. The main canal has a length of 10.15 miles only but its distributaries measure 19.30 miles. The area irrigated by this canal during 1959-60 did not exceed 4,460 acres or 7.0 sq. miles. The aggregate area irrigated by this canal during the Rabi and Kharif, 1929 stood at 2,736 acres or 4.3 sq. miles against 4,789 acres or 7.5 sq. miles in 1960-61.

3. New Partap Canal — This is still under construction and is estimated to cost Rs. 120 lakhs. The first 12 miles of the main canal and 14 miles of its distributaries have already been built, but the amount spent on the project so far is not known.

Crops

Wheat is the principal crop grown in the cultivable lands where facilities for irrigation are not generally available. Below are given the names of

*Planning Department's letter No. SB/64 (IV-I) - 49 dated 2-6-1965.

the various crops grown, together with the area covered by each :—

Name of the crop	Area in Acres	Area in Sq. miles
1. Wheat ...	152,374	238.1
2. Rice ...	65,562	102.4
3. Other food grains (including pulses and millets) ...	41,045	64.1
4. Bajra ...	39,387	61.5
5. Maize ...	29,273	45.7
6. Other non-food crops and fodder crops ...	15,163	23.7
7. Barley ...	11,776	18.4
8. Other food crops	6,319	9.9
9. Oil seeds ...	3,524	5.5
10. Fibres ...	3,044	4.8
11. Fruits and vegetables ...	2,852	4.5
12. Sugar cane ...	2,126	3.3
13. Jawar ...	942	1.5
14. Condiments and spices ...	302	0.5
15. Drugs and Narcotics	259	0.4

The above figures are inclusive of 105,791 acres or 165.3 sq. miles which grow double crops in a year.

Yield per acre

The yield rates of principal crops will be found at the appropriate place at the end of the report. From these it will be seen that there has been a decline in the yield rates of some of the crops from 1957-58 onwards. Among these, mention may be made of paddy, maize, barley, mustard, linseed, jawar and bajra. Following have been the average yield rates per acre of land for a period of nine years from 1951-52 to 1959-60 in respect of some of the important crops :—

1. Paddy ...	13.37 mds.
2. Maize ...	6.48 ,,
3. Wheat ...	6.87 ,,
4. Barley ...	5.94 ,,
5. Sugarcane ...	7.39 ,,
6. Mustard ...	3.04 ,,
7. Linseed ...	3.02 ,,
8. Tobacco ...	8.45 ,,
9. Jawar ...	4.36 ,,
10 Bajra ...	7.18 ,,
11. Gram ...	4.18 ,,

Cropped area

The sub-joined statement shows the percentages of area under principal food crops and other food and non-food crops for each of the years from 1950-51 to 1959-60 :—

Year	Percentage of area under crops to total cropped area: Rice	Wheat	Barley	Jawar	Bajra	Maize	Fruits and vegetables	Oil seeds	Other food crops	Non-food crops and fodder crops	Total cropped area in acres
1950—51	15	30	7	N	14	9	N	1	22	2	249,429
1951—52	13	31	13	N	13	13	1	1	14	1	263,025
1952—53	15	30	5	N	13	10	1	1	23	2	287,973
1953—54	15	34	6	N	11	9	1	1	21	2	305,432
1954—55	16	34	6	N	11	9	1	1	20	2	293,802
1955—56	16	39	3	N	11	9	1	1	17	3	319,991
1956—57	19	38	3	N	10	8	1	1	18	2	342,040
1957—58	19	39	3	N	9	9	1	1	16	3	340,078
1958—59	16	41	3	1	11	8	1	1	15	3	358,208
1959—60	17	41	3	N	11	8	1	1	14	4	373,948

It is clear that the cropping pattern has undergone some change so far as areas under wheat and non-food crops are concerned. In 1950-51, only 30% cropped area was under wheat cultivation as against 41% in the year 1959-60. The corresponding increase in the area under rice cultivation has however been very small. During 1956-57 and 1957-58, the cropped area covered by rice fields was 19% as against 17% of 1959-60.

The area under barley, bajra, maize and other food crops have also shrunk during the decade. In 1959-60 other food crops which include pulses and millets, sugar-cane, condiments and spices, fibres, drugs and narcotics, etc. were grown on only 14% cropped area against 22% in 1950-51.

The areas covered by non-food crops have increased by about 100% during the decade. In 1950-51, only 2% of the cropped area was under non-food crops and fodder crops as against 4% in 1959-60.

Cultivating Households

Table B-XII and B-XV, appended to the report will show that there are 55,920 households in the rural sector of the district (the number of households according to 20% sample being 11,184) approximately. About 35% of these cultivate lands measuring from 2.5 to 4.9 acres. The next largest majority of households consists of those which cultivate an area of 5.0 acres to 7.4 acres each as indicated below :—

Size of land	No. of households	Percentage
Less than 1 acre	911	8
1.0—2.4 acres	2,125	19
2.5—4.9 ,,	3,877	35
5.0—7.4 ,,	2,634	24
7.5—9.9 ,,	792	7
10.0—12.4 ,,	441	4
12.5—14.9 ,,	138	1
15.0—29.9 ,,	253	2
30.0—49.9 ,,	12	N
50+ ,,	1	N

The population of cultivating households in the rural areas of the district stands at 303,380. Of these 34.4% or 104,375 are family workers. The sub-joined statement gives the percentages of family workers in respect of households with different sizes of holdings :—

Size of land	Population	Number and percentage of family workers
Less than 1 acre	22,520	6,195 or 28%
1.0—2.4 acres	50,745	16,665 or 33%
2.5—4.9 ,,	102,815	35,995 or 35%
5.0—7.4 ,,	74,835	26,655 or 36%
7.5—9.9 ,,	24,245	8,855 or 37%
10.0—12.4 ,,	13,800	5,290 or 38%
12.5—14.9 ,,	5,255	1,730 or 33%
15.0—29.9 ,,	8,555	2,830 or 33%
30.0—49.9 ,,	600	155 or 26%
50 and above	10	5 or 50%

The total number of hired workers stands at 2,845 approximately. This gives an average of about 1 hired worker per twenty households. Hired labour is mostly employed by households cultivating areas varying from 2.5 acres to 7.4 acres. These two categories alone claim 1,440 workers or over 50% of the total hired labour.

Livestock

Before the tribal raids of 1947, the district had a rich livestock wealth numbering 488,055 excluding mules, donkeys, camels, pigs, etc. During the following six years, when large scale migrations took place, there was a fall of over 34% reducing the number to 321,829 only. With the rehabilitation of displaced persons and the expansion of the activities of Animal Husbandry Department, the number of livestock again increased and by 1956 stood at 493,419. According to the livestock Census of 1961, the number has again come down to 463,260.

What has been stated above for the livestock as a whole is true of the cattle except so far as their growth during the quinquennium 1956-61 is concerned. As a result of the tribal raids, the number of cattle fell from 219,071 of 1945 to 166,209 in 1951. By 1956, the cattle population again multiplied and rose to 235,775. The livestock Census of 1961 shows that the number of cattle in the district stood at 264,423.

In the case of buffaloes also, the population which had fallen to 71,576 in 1951 against 98,314 of 1945, the growth has been fairly good,

the number of buffaloes in 1956 being 89,449 and 100,720 in 1961.

So far as sheep are concerned, the peak figure of 18,170 in 1945 has been gradually declining and has been reduced to 8,156 in 1961. In this case however the number varies according to the season in which the Census is taken as majority of the goats are owned by nomads who keep on migrating from plains to hilly areas according to the availability of by-products of agriculture and green fodder. This is the main reason why there are large disparities in the quinquennium Census figures. In 1945, the number stood at 145,211, which fell in consequence of the tribal raids to 66,508 in 1951. By 1956, the goat population increased at a high pace reaching the peak figure of 149,879. The 1961 Census was taken when the nomads had moved to hills along with their livestock. This explains the heavy fall during the quinquennium 1956-61.

There has been a steep fall in the number of horses and ponies during the period 1945-51. Though some improvement was effected during the following five years, the number has again declined from 5,900 in 1956 to 4,853 in 1961.

The following statement gives the distribution of livestock per thousand persons of the district in 1961, by various categories :--

	Cattle	Buffaloes	Sheep	Goats	Horses & Ponies	Others (mules, donkeys, camels, & pigs)
Total Livestock	264,423	100,720	8,156	85,108	4,853	3,464
Livestock per thousand human population	512	195	16	165	9	7

Animal Husbandry Department

There are only 12 Veterinary units in the entire district. In 1958-59 also the number of these institutions was only 12.

Co-operatives

Originally, co-operative movement was started in Jammu and Kashmir with the exclusive aim of providing rural credit and protecting economically backward sections particularly cultivators from being exploited by money lenders etc. Later, the activities of the societies were reorientated and they were classified into several categories including Primary, Marketing, Industrial and Multipurpose societies. The industrial societies, more commonly known as Induscos, were constituted to provide relief to handicraft workers engaged on nominal wages by middlemen who appropriated the bulk of profits earned on the goods produced.

The Co-operative Department have not, however, been able to supply separately the details of work done by each of these categories and they have instead furnished the data collectively for all the societies put together. At any rate, the statistics supplied by them have been incorporated in the statement appended to the Report. The following are some of the salient features of the data given in the statement.

With the exception of 1954-55 when the number of societies and of members came down to 399 and 9,624 from 464 and 9,799 of the previous year, there has been a progressive increase both in the number of societies and in membership right upto 1955-56. During the following year, the number of societies was abruptly reduced from 477 to 214, although there was an increase of 2,573 members during the same period. In the next three years, the number of societies and of members went on steadily increasing but in 1960-61, only 393 societies functioned against 503 of the previous year. The membership, however, increased from year to year and reached the peak figure of 29,268 in 1960-61.

No explanation is available for the fluctuation in 1954-55 and 1960-61. So far, however, as the year 1956-57 is concerned, enquiries made from the Co-operative Department have disclosed that the fall in the number of societies is due to weeding out of uneconomic units and merging them with neighbouring societies. The members of dissolved societies have been enrolled in the newly constituted societies with larger jurisdiction alongwith fresh recruits.

Reasons accounting for the abnormal decrease in the share capital during the years 1952-53 and 1953-54 are not also available. In subsequent years, except 1959-60, there has been a remarkable appreciation in the size of share capital which amounted to Rs. 940,105 in 1960-61.

The loans advanced and the payments made against the same have been, more or less, commensurate except so far as the year 1958-59 is concerned. During this year, the loans advanced amounted to Rs. 1,300,243 as against Rs. 311,218

and Rs. 685,371 of the previous and the following year respectively. The repayments made against this loan are said to have been of a colossal size and are estimated at Rs. 3,232,152. The variation is too large to be accounted for by the aggregate amount of unrealised loans from 1951-52 to 1957-58.

Similar fluctuations are noticeable in the funds owned by the societies. The data for 1952-53 shows that a sum of Rs. 219,870 only was owned by the societies as against Rs. 781,905 in the previous year. Similarly, there has been a heavy fall in 1958-59 and a phenominal increase in the following year.

The working capital has also shrunk during the years 1952-53, 1953-54 and 1958-59 only. No reasons accounting for the heavy falls during these years are available. According to the statement, the total working capital in 1960-61 stood at Rs. 9,051,946.

Community Development

Blocks—Complete information regarding the activities of the blocks is available for the year 1958-59 only. Of the total number of 51 Community Development Blocks in the State, 7 or about 14% have been set up in district Jammu. This is in keeping with the size of population and of cultivable area of the district which constitute 15% and 17% of the population and cultivable area of the State respectively. Following are the places where the blocks have been set up :—

1. Nowabad 2. Dansal	Tehsil Jammu
1. Vijaypur	Tehsil Samba
1. Bishna 2. Ranbirsinghpora	Tehsil Ranbirsinghpora
1. Aknoor 2. Chhamb	Tehsil Akhnoor

The blocks have distributed 18,080 maunds of Ammonium Sulphate among the cultivators during the year 1958-59. This gives an average of one maund per 15 acres of land.

The area under fruit trees is over 4,731 acres. By the year 1958-59, fruit trees numbering 28,013 and 46,391 other trees had been planted by the Department.

Besides 27 wells which were newly constructed in 1958-59, about 30 others were renovated. In addition, village roads measuring 71.5 miles were also built. Improvements were effected to the existing roads over an aggregate length of 31.5 miles.

There were 152 Panchayats in the district with a total membership of 1,557 or 10-11 persons per Panchayat. The number of cases instituted stood at 1,675 of which 1,269 or 76% were decided during the year.

Besides an area of 52,681 acres in which improved method of cultivation is being employed, the blocks also took up 683 holdings for demonstration. In addition, 362 seed multiplication farms of varying sizes were also set up during the year. The total quantity of improved seeds distributed among the farmers stood at 6,545 maunds.

Communication

The aggregate length of roads of all kinds in the district is 7.9% of the total road mileage in the State. Before 1947, the only important roads which passed through the district consisted of :—

1. Jammu—Suchetgarh Road
2. Banihal Cart Road
3. Jammu—Akhnoor Road
4. Jammu—Ranbirsinghpora Road
5. Jammu—Samba Road

After the tribal raids, some of the fair weather roads were surfaced, other were metalled or shingled and a few others were newly built as indicated below :—

i Surfaced	...	136.0 miles
ii. Metalled or Shingled	...	30.5 ,,
iii Fair Weather	...	36.5 ,,
iv. Jeepable	...	2.5 ,,
	Total	205.5 ,,

This gives an average of 0.40 linear miles per 1,000 population.

The construction of fair weather roads has opened many rural areas, particularly the historic village of Mansar, the new township of Arnia and villages Chakori, Dablhar, etc.

There are 13 bridges on the Jammu-Pathankot National Highway, of which 4 are considered

safe for all traffic and 2 have a loading capacity of 25 tons. Of the remaining, 5 are designed to take a load of 19 tons and 2 of 12.5 tons each.

In addition, there are also 8 bridges on the district roads. All of these are safe for heavy traffic.

An elaborate road development programme was evolved and implemented during the two successive Five Year Plans which preceded the Census of 1961. The district was connected with Pathankot, the nearest rail-head, by a fairly wide tarred road built at an enormous cost. Another road connecting Jammu with Poonch, a distance of 153 miles, was also constructed, thus removing a long standing grievance of the inhabitants of the two districts. In addition, several other roads connecting the city of Jammu with various tehsil headquarters and towns were also built. Side by side, bus services were introduced which considerably eased the difficulty of transport experienced in the past. As a sequence to these measures, the volume of traffic between Jammu and its neighbouring districts as also with Srinagar and Pathankot has enormously increased.

A by far more important facility has been provided by constructing an Aerodrome in the outskirts of Jammu city. The suspension of communications between Jammu and Srinagar due to the blockade of Banihal road as a result of which many people used to be stranded in Jammu in winter for weeks together takes place now rarely, if ever. The flight between Jammu and Srinagar is of half an hour's duration and costs less than Rs. 40/- per passenger.

Before 1947, the State Government owned and administered a limited number of Post and Telegraph offices. With the transfer of Communications to the Centre, a large number of Post Offices have been opened in many places of the district. According to the postal authorities, the number of Post Offices in the district has gone up from 40 of 1950-51 to 88 in 1960-61, giving an average of .21 per 1,000 of population as against .09 ten years ago.

The number of Telegraph offices has also increased both in the city as also in the rural sector of the district. Chhamb, Akhnoor, Samba, Ranbirsinghpora etc. are some of the areas which are now telegraphically connected with Jammu.

The old telephone exchange in Jammu has been dismantled and replaced by an automatic system. The subscribers can now dial any local number direct and not through telephone exchange, as was the practice in the past. Though actual statistics are not available, the number of telephone connections has also considerably increased. In addition, public call trunk offices have been established in Akhnoor, Samba and Ranbirsinghpora.

Electricity

The district is deficient in electric energy as its only power house installed on the bank of Ranbir Canal has a very limited capacity. The State Government are, therefore, purchasing electric power in bulk from the Joginder Nagar power station of Punjab Government.

Surveys for the exploitation of the natural resources available to the State are, however, being made in many areas. As a result, one big hydro-electric power station is shortly being built at Salal in tehsil Reasi. This project is expected to yield energy required not only for domestic and industrial purposes by the districts of Jammu and Udhampur, but it is hoped that there would be sufficient surplus power which can be made available to feed areas outside the State, if necessary. The project involves a colossal expenditure of Rs. 997 lakhs and is expected to be completed by the end of Third Plan.

At present, electricity is being supplied to 6 out of 7 urban areas of the district, Arnia being the only town which has yet to be electrified. In addition, 41 villages or about 4% of the total number of villages of the district which are mostly lying on the Jammu-Pathankot road have also been provided with electricity. The number of electrified villages in the State being only 156, it is obvious that 26.3% villages of the State which have been provided with electric power fall in Jammu district alone.

Industrial Classification

Over 32% population of the district or 166,991 persons are workers and the remaining comprising about 68% non-workers. The sub-joined statement gives the distribution per thousand population of workers and non-workers by sex in the rural and urban sectors of the district :—

	Total		Rural		Urban	
	Workers	Non-Workers	Workers	Non-Workers	Workers	Non-Workers
Total ..	323	677	333	667	294	706
Males ..	521	479	528	472	500	500
Females ..	99	901	119	881	35	965

An examination shows that the proportion of female non-workers in the rural sector is not as high as in the urban areas. This is because a large number of women, besides attending to their household work, are also engaged in rice pounding for sale or wages, or in domestic service for wages for others, or selling fire-wood, or making and selling of cowdung cakes or grass, etc. Employment of this nature is not available in the urban areas.

The proportions of male workers and non-workers in the urban areas of the district are equal. The higher proportion of rural male workers is accounted for by the fact that majority of the male population including minors, work in the fields for cultivation of land.

The proportions of male and female workers and non-workers in the rural and urban sectors of the district per 1,000 male and female population of each of these sectors together with similar proportions of each category of workers and of each class of non-workers are indicated below :—

	WORKERS				NON-WORKERS				
		Rural		Urban		Rural		Urban	
		Males	Females	Males	Females	Males	Females	Males	Female
	1	2	3	4	5	6	7	8	9	10
1.	Total Workers	528	119	500	35	Total non-workers	472	881	500	965
2.	As cultivator	374	105	20	2	Full time students	129	25	226	176
3.	As agricultural labourer	18	2	3	1	Household duties	0	479	0	488
4.	In mining, quarrying, etc.	8	2	3	N	Dependents, infants and disabled	328	373	228	292
5.	At household industry	16	6	6	4	Retired, rentier or independent means	7	3	22	4
6.	In manufacturing other than household industry	5	N	56	1	Beggar, vagrants, etc.	4	1	6	2
7.	In construction	7	N	23	N	Inmates of institutions	N	N	5	2
8.	In trade and commerce	13	N	81	N	Persons seeking employment for the first time	3	0	7	1
9.	In transport, storage, etc.	5	N	34	N	Persons employed before but now out of employment and seeking work	1	0	6	N
10.	In other services	82	4	274	27					

The statement shows that 77% of the rural workers of the district are cultivators or employed as agricultural labourers. The proportions of male and female workers engaged in cultivation or employed as agricultural labourers to the total number of workers of each sex stand at 74% and 90% respectively. The only other industrial category which claims a comparatively higher proportion of workers than others consists of people employed in other services. The proportion of male and female workers in this sector to the total number of workers of each sex stands at 16% and 3% respectively.

In so far as the urban areas are concerned, majority of the workers comprising 56% are engaged in other sevices. Those employed in trade and commerce claim the next large majority, the corresponding proportion being 15%. The only other activity which provides employment to a relatively appreciable number of persons of either sex is manufacturing other than household industry. The proportion of such workers does not however exceed 11%.

The proportion of female workers in the urban areas is very low in all categories except other

services which absorb 77% of the total number of female workers.

The largest number of non-workers consists of dependents, infants and disabled persons. They comprise over 48% non-working population of the district.

Persons who look after household duties only constitute the second large majority of non-workers and claim a proportion of over 33%. The only other category of non-workers which has an appreciable population consists of full time students.

The number of male dependents is about twice that of full-time male students, the respective proportions being 63% and 32% of the total male non-workers. Non-workers of other categories claim very small proportions.

Majority of the female non-workers are engaged in household duties and comprise 53% of the female non-working population. The next important category of female non-workers is that of dependents who constitute 39%. Full-time students are comparatively in a minority claiming about 7% only. The incidence of other categories of non-workers is negligible.

In the rural areas also, most of the non-workers are dependents or women attending to household work. The former claim over 52% and the latter more than 34%. So far as the male non-working population is concerned, they consist mostly of dependents and in a lesser degree of full-time students. The proportion of the former is 69% and of the latter 27%.

Female non-workers consist either of those engaged in household duties or of dependents, the proportions being 54% and 42% respectively. The female student population claims a proportion of 3% only.

As in the case of rural sector, most of the urban non-workers consist of dependents, those engaged in household duties and full-time students. They comprise respectively 36%, 31% and 29%.

Male non-workers consisting of dependents and full-time students are almost in equal proportion, each claiming about 45%. Rentiers and pensioners, etc. comprise over 4% non-workers.

Majority of female non-workers of urban areas consist of women attending to household work whose proportion stands at 51%. Dependent females also claim a proportion of 30%. The proportion of full-time students does not however exceed 18%.

Occupational Classification

The sub-joined statement gives the number and occupational classification of workers other than those working as cultivators or agricultural labourers in the rural and urban sectors of the district together with their respective percentages in each category :—

Division	Total workers			Percentage		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
All Divisions	65,607	29,899	35,708	100	100	100
0—Professional, Technical and Related Workers	3,773	760	3,013	6	3	9
1—Administrative, Executive and Managerial Workers	5,243	3,465	1,778	8	12	5
2—Clerical & Related Workers	5,898	1,603	4,295	9	5	12
3—Sales Workers	7,792	2,462	5,330	12	8	15
4—Farmers, Fishermen, Hunters, Loggers and Related Workers	3,194	2,755	439	5	9	1
5—Miners, Quarrymen and Related Workers	45	31	14	N	N	N
6—Workers in Transport and Communication Occupations	3,115	885	2,230	5	3	6
7 & 8—Craftsmen, Production Process Workers and Labourers, not elsewhere classified	28,452	15,718	12,734	43	53	36
9—Service, Sport and Recreation Workers	8,026	2,182	5,844	12	7	16
10—Workers not classifiable by Occupation	69	38	31	N	N	N

It is clear from the above that majority of the working population of the district and its rural and urban sectors consists of craftsmen, etc.

Industries

At the time of the Census of 1961, there were 4,262 workshops and factories in the district. Of these 2,668 had been returned from the rural and 1,594 from the urban sector. The former consist mostly of workshops and some factories engaged in foodstuffs, basic metals and leather and leather products. The number of factories and workshops manufacturing cotton textiles, non-metallic mineral products, wooden articles, miscellaneous textiles, transport equipment, etc. is comparatively very small. Other industries in the rural areas which claim still lesser number of establishments include rubber, petrol and coal producing concerns, chemical and chemical products, beverages and machinery of all kinds other than transport and electrical equipment.

The industries found in the urban sector fall in the following groups to the extent noted against each :—

Foodstuffs		16%
Textile-miscellaneous	...	14%
Miscellaneous manufacturing industries	...	14%
Basic metals and their products except machinery and transport equipment	...	12%
Leather and leather products	...	11%
Transport equipment	...	10%
Textile-cotton	...	5%
Manufacture of wood and wooden products	...	4%
Chemicals and chemical products	...	4%
Non-metallic mineral products other than petroleum and coal	...	3%
Printing and publishing	...	2%
Beverages	...	2%

There are a few industries also, such as, those engaged in the production of rubber, petroleum, coal, machinery of all kinds other than transport and electrical equipment, textile-wool, textile-silk and tobacco products but their number is very small and equal to 1% or less of the total number of factories and workshops in the urban areas.

The following statement gives the classification of factories and workshops by size of employment in the rural and urban sectors of the district :—

Size of employment	Number of factories	
	Rural	Urban
One person	2,014	639
2 to 5 persons	590	792
6 to 9 persons	24	94
10 to 19 persons	17	42
20 to 49 persons	9	19
50 to 99 persons	9	4
100 and above persons	5	4

The above classification is based on the data collected in connection with the housing survey conducted towards the end of 1960. The Labour Commissioner of the State Government has, however, stated that the number of factories providing employment to more than 100 persons per day is ten. At any rate, five of the factories function in the rural and four in the urban sector. Most of the former manufacture structural clay products, such as bricks, tiles etc. The urban factories are engaged in :—

(a) production of ice

(b) spinning and weaving of silk textiles

(c) manufacturing of boxes and packing cases other than plywood

and (d) publishing of newspapers and periodicals.

Household Industry

About 2.1% households in the district are engaged in household industries only. These industries are carried on with or without the help of hired labour within the premises of the house or in the village in the rural areas and only within the premises of the dwellings in the urban sector. Following are the proportions of households employed in various household industries :—

Household Industry	Total number of households	Percentage
1 All Industries	2,050	100%
36 Basic metals and their products except machinery ahd transport equipment	365	18%

28	Manufacture of wood and wooden products	300	15%
23	Textile — cotton	240	12%
31	Leather and leather products	240	12%
20	Food Stuffs	235	12%
34-35	Non-metallic mineral products other than pertroleum and coal	235	11%
27	Textile — miscellaneous	225	11%
04	Livestock and hunting	90	4%
39	Miscellaneous manufacturing industries	85	4%
38	Transport equipment	20	1%
21	Beverages	5	N
24	Textile — jute	5	N
33	Chemicals and chemical products	5	N

The sub-joined statement gives the percentages of households employing 1 worker, 2 workers, etc. in each household industry :—

Principal household Industry	Distribution per 100 households engaged in household industry with				
	1 worker	2 workers	3—5 workers	6—10 workers	More than 10 workers
All Industries	62	26	11	1	...
04 Livestock and hunting	50	28	22	...	...
20 Food Stuffs	68	21	11	...	...
21 Beverages	...	100	...	...	...
23 Textile - cotton	35	44	21	...	...

Wages Statistics

Following were the average daily wages of skilled and unskilled agricultural labour and skilled labour during the decade 1951-1960 :—

Skilled agricultural labourer			Unskilled agricultural labourer			Skilled labourer		
Adult male	Adult female	Child	Adult male	Adult female	Child	Adult male	Adult female	Child
Rs. 2.70	Rs. 1.74	Rs. 1.65	Rs. 1.73	Rs. 1.34	Rs. 1.12	Rs. 3.34	Rs. 1.56	Rs. 1.53

The detailed statistics appended to the report will show that the wages of labour of all categories have progressively increased during the decade. The daily wages of a male skilled labourer, unskilled agricultural labourer and a skilled labourer stood at Rs. 2.16, Rs. 1.40 and Rs. 2.56 respectively in 1951. The corresponding rates obtaining in 1960 were Rs. 3.41, Rs. 2.18 and Rs. 4.25 respectively. Similar increases have taken place in the wages of women and children.

Cost of Living

According to the information supplied by the

Deputy Commissioner, Jammu, the average cost of living in the rural sector stands at Rs. 1.15 per day as indicated below :—

Wheat	7.3 chk.	valued at 20 nP.
Rice	6.0 ,,	,, ,, 22 nP.
Spices and onions	1.0 ,,	,, ,, 6 nP.
Vegetables	2.3 ,,	,, ,, 5 nP.
Mutton	1.5 ,,	,, ,, 22 nP.
Fruits	1.5 ,,	,, ,, 6 nP.
Milk & Curds	3.3 ,,	,, ,, 6 nP.
Fuel	28.0 ,,	,, ,, 9 nP.
Miscellaneous		valued at 19 nP.

The corresponding average cost in urban areas is estimated at Rs. 1.70.

Scheduled Castes

Scheduled Castes are found in Jammu Province only and are mostly concentrated in District Jammu, where they claim over 53% scheduled caste population of the State which stands at 284,131.

Of the 13 scheduled castes recognised in the constitution for Jammu and Kashmir, the following 11 only are found in this District :—

1. Barwala
2. Basith
3. Batwal
4. Chamar or Ramdasia
5. Chura
6. Doom or Mahasha
7. Gardi
8. Jolaha
9. Megh or Kabir Panthi
10. Ratal
11. Saryara

Literacy — The incidence of literacy among scheduled castes is very low. Out of every 100 persons, 94 are illiterate, 5 literate without educational qualifications and 1 read upto primary or junior basic standard. The number of matriculates and persons with higher qualifications is negligible. This is also true, more or less, of the rural sector, where the literacy percentage is only 5. In the urban areas, however, 12 out of every 100 persons are literate and of these 9 are without any educational qualifications, 2 read upto primary or junior basic standard and 1 matriculate. The number of degree-holders is exceedingly small.

As stated earlier, the literacy percentage of the District, as a whole, is 18.6 and of its rural and urban sectors 11.1 and 41.5 respectively. While the literacy percentage of all classes of people inhabiting the rural areas of the district is very low, the incidence of literacy among scheduled castes inhabiting the urban sector is still more poor.

Industrial classification—No less than 67% population of scheduled castes consist of non-workers. The sub-joined statement gives the distribution of workers by industrial classification :—

1.	Cultivation ...	23%
2.	Agricultural labour ...	2%
3.	Household Industry ...	1%
4.	Manufacturing other than Household industry ...	1%
5.	Other services ...	6%

The number of people who make their living by trade and commerce, construction, transport, storage and communications is negligible.

The following table, which gives the industrial classification of workers in the rural and urban sectors, shows that the non-working population among scheduled castes is more or less uniform in the towns and villages and that while most of the rural workers are engaged in cultivation, majority of urban workers consist of Government servants, etc.

Total Population	Total Workers	As cultivator	As agricultural labourer	In Mining, Quarrying etc.	At household industry	In manufacturing other than household industry	In construction	In trade & commerce	In Transport, storage & communications	In other services	Non-workers
1	2	3	4	5	6	7	8	9	10	11	12
Rural 100	33	25	2	N	1	N	N	N	N	5	67
Urban 100	31	4	1	1	1	4	1	1	1	17	69

Marital Status—The sub-joined statement indicates the marital status of scheduled castes by various age-groups per 100 population :—

Age Group	Total Population	Percentage of marital status to total Scheduled Caste population				Unspecified Status
		Never married	Married	Widowed	Divorced or separated	
All ages	100	48	45	7	N	N
0—14	100	96	4	N	N	N
15—44	100	22	72	5	N	1
45+	100	1	70	29	N	N
Age not stated	100	98	1	1	..	..

It is clear from the above statistics that despite Infant Marriages Prevention Act of 1928, marriages of children in the age-group 0-14 are still in vogue among scheduled castes. Further, a reference to Table SCT-II, Part A which is appended to the Report, will show that, there are also some persons in this age-group who have been widowed or divorced, though their number is not large.

Revenue Receipts

As the receipt and expenditure budgets of the State do not give district-wise figures, it has not been possible to ascertain for any year the revenue contributed by Jammu district to the State exchequer. This data has, however, been collected from a few departments for some of the years from 1950-51 to 1960-61 and is appended to the Report. Following are the receipts from some of the important sources for the year 1960-61 :—

Land Revenue	...	Rs. 583,988
Entertainment Tax	...	,, 249,860
Motor-spirit Tax	...	,, 866,423
Stamp Tax	...	,, 358,929
Sales Tax	..	,, 559,315
Electricity	...	,, 1,590,898
(Lighting		Rs. 817,572)
(Industrial		Rs. 773,326)
Irrigation	...	Rs. 407,457 (Abiana only)
Water works	...	Rs. 72,072

The statements giving the Land Revenue figures which appear at the end of the Report show that there are colossal arrears in the district. According to these figures, the total demand for 1960-61 stood at Rs. 2,002,884. The irrecoverable amount except Samba tehsil was Rs. 1,341,509/-. These arrears seem to have been carried forward from year to year for a long time past. In 1951, the total irrecoverable Land Revenue stood at Rs. 625,130.

The sub-joined statement gives the current demand (excluding arrears) and actual receipts of Land Revenue for the years 1951-52 and 1960-61 :—

Year	Total demand	Revenue Recovered	Revenue Recoverable
	Rs.	Rs.	Rs.
1951-52	731,569	441,093	11,700
1960-61	796,029	576,805	34,319

The Revenue from other sources has been progressively increasing during the five years preceding the Census. This will be clear from the following statement :—

Year	Entertainment Tax	Motor-Spirit Tax	Stamp Tax	Sales Tax
	Rs.	Rs.	Rs.	Rs.
1955-56	96,443	614,869	213,894	168,998 (Year 1957-58)
1960-61	248,960	866,423	358,929	559,315

Agrarian Reforms

Immediately after the assumption of office in 1948, the popular Government introduced a number of bold measures to tackle the complex problem of building rural economy. Besides the fact that thousands of rural inhabitants were landless and made their living by working as agricultural labourers on big landed estates, there were many others whose land holdings were uneconomic and who had to supplement their economic resources by raising loans from money lenders, wad-dars and other intermediaries. There were still others who mortgaged their belongings and particularly the produce of their fields in advance to defray expenditure on social customs, like marriages, births, deaths etc.

The State Government resumed all the jagirs and muafis with effect from 13th April, 1948 and compensated the muafidars and jagirdars by grant of life-time maintenance allowances in their favour. A legislation entitled. Big Landed Estates Abolition Act of 1950, was also enacted limiting the size of agricultural holdings held in proprietory rights to 182 kanals only. Lands which thus became available were allotted to agricultural labourers and to those whose holdings were uneconomic.

While no district-wise statistics indicating the number of beneficiaries and aggregate size of the allotments made are available, it goes without saying that the incidence of agricultural labourers has substantially decreased. This will be evident from the fact that in the State as a whole, the number of agricultural labourers in 1941 stood at 64,316 as against 18,417 in 1961. According to the latest statistics issued by the State Statistical Bureau in 1960-61, about 4.5 lakh acres of land were expropriated from about 9,000 proprietors and about 2.3 lakh acres were transferred to the tillers alongwith ownership rights. The number of beneficiaries from 1951 to 1954 is estimated at 584,909.

Debt Conciliation Boards were also set up in each district to scale down the debts which had assumed dreadful proportions. The Board generally wrote off the interests and adjusted the payments already made against the orginal loan.

Natural Calamities

Complete record of the natural calamities suffered by the district during the period of 20 years from 1941 is not available. The information given by the Deputy Commissioner regarding the floods of 1957 and 1959 has, however, been appended to the Report.

The 1957 floods involved a death toll of 4 persons and 738 cattle. In addition, hundreds of houses and water-mills and large areas of cultivated and uncultivated lands were either washed away or submerged. The exact loss incurred is not known but it is estimated to have exceeded to Rs. 20 lakhs. Relief was provided by the State Government to the flood sufferers both in cash and kind. Besides blankets, shirts, jercies, shoes, pants etc., a cash loan of Rs. 154,729 and a free cash relief of Rs. 7,120 was also distributed.

The district was again visited by floods in July 1959. This time the loss was not as colossal as in 1957. It is reported that 6 persons lost their lives and 321 cattle perished. The sufferers were provided with blankets, wheat, etc., besides a cash loan of Rs. 14,905 and a gratuitous relief of Rs. 50,065.

Fairs and Festivals

Among the most important festivals celebrated by the people, mention may be made of Baisakhi, Janam Ashtami, Dussehra, Dewali, Basant, Holi, Lohri, Mela Bahu Fort, Jhiri fair, Purmandal fair, Rakhi, Idd and Muharram, which attract thousands of people from various parts of the district.

Baisakhi

On the Baisakhi festival, people take baths early in the morning in Tawi and Chenab river and at various other canals. They then visit the neighbouring temples. People in Jammu mostly assemble in Rughnath Mandir where a large number of temples is concentrated at one place. In the afternoon, a mela is held on the banks of Ranbir Canal where men, women and children dressed in gorgeous cloths engage themselves in playing, singing and taking sweets and fruits, etc.

Groups of people, young and old, organise themselves into dancing parties and play the well known folk dance called Bhangra. In the city also similar dances are held. The dancers halt at short intervals attracting large audiances which cause temporary obstruction to the traffic.

Janam Ashtimi

On Janam Ashtimi day, the image of Lord Krishna is taken out from the temple and carried in a procession through the main bazars. The processionists keep on reciting hymns and bhajans praising Lord Krishna. During the day, they also observe fast which is broken on the appearance of moon at midnight.

Dussehra

Arrangements for the celebration of Dussehra festival are made by Sanatan Dharam Sabha or some other religious organisation. Huge effigies of Ravana, Meghnath and Kumbakaran built mostly of crackers are erected in open spaces, such as, Parade Ground, Satwari, etc. A procession of Rama, Lachman and Hanuman is taken out through the city or the town after which it enters the space where the effigies have been installed. The procession makes three rounds and rescues Sita from a small shed built near the effigies. This represents the house in which Sita is beleived to have been imprisoned. The effigies are then fired at by Rama and Lachman with burning arrows. The crackers catch fire and the whole area resounds with explosions.

Dewali

Dewali festival is celebrated to jubliate the

return of Rama, Sita and Lachman to the city of Ayudia after the conquest of Lanka. On this day, sweets are consumed in large quantities and distributed among friends and others. In the evening, temples, shops and houses are illuminated as a mark of rejoicing. People worship Goddess Lakshmi at their houses or in the neighbouring temples.

Basant

Like the Baisakhi, the celebration of Basant also starts with the taking of baths in rivers. People put on yellow coloured turbans and keep on flying kites for the whole day. Basant is not so much of a religious festival and only signifies the advent of the spring.

Holi

Holi is the most cherished festival of the people. It is celebrated for two days during which red, green and other colours are sprinkled both in powder and liquid form on every passer-by. Many people remain indoors on this day due to the apprehension that they would be besmeared if they appear in public.

Lohri

The festival is celebrated in mid-winter and takes place on the last day of Poh (December). Bonfires are set up at night and the devotees sing hymans while dancing around them. It is also believed that the day signifies the climax of the cold season and the approach of spring.

From early dawn of the day of festival, young people organise small parties and play, what is known as, 'dandaras'. They usually visit houses which have had some auspicious function or other during the year, such as a birth or a marriage. Arraying themselves in costumes of different colours, the players strike the sticks which they hold in their hands with one another to the beating of drums, flute and pipes. One of the players dances vigorously carrying on his head a 'chhajja' – an artificial pea-cock made of bamboo sticks and multi-coloured papers. The festival is the gayest in Jammu and the atmosphere reverbrates with the beating of drums and other musical instruments.

Mela Bahu Fort

Bahu Fair also known as Ramanawmi fair is held twice a year during the Novratras, falling in the months of Baisakh and Assuj (April and September). Twentyfive to thiry thousand people assemble at the historical fort of Bahu, overlooking the city of Jammu, to worship the Image of Goddess Kali, which stands installed inside the temple at the top of the fort.

Bahu fort which is two miles away from the city is said to have been built by Raja Bahu Lochan, brother of Jamboo Lochan, who founded the city of Jammu. Bahu has been the ancient capital of Dogra rulers, before the city of Jammu was founded.

Jhiri Fair

The fair is held to commemorate the death of a peasant, Bawa Jitoo by name, who is said to have laid his life fighting for the rights of the peasants. Thirty to fortyfive thousand kisans from various parts of Jammu province visit the shrine of Bawa in village Kalyanpur, 15 miles from Jammu city on Jammu-Akhnoor road. The festival is held on Kartik Purnima in November and is a day of great rejoicing for Jammu kisans.

As the story goes, Bawa Jitoo came from Ghar village, near Katra, to till the waste land of Bir Singh, a Jagirdar, who later refused to handover to him his rightful share in the produce of the land which the Bawa had tilled. Bawa expressed his resentment by commiting suicide. This created a commotion among other peasants who joined hands to put an end to the tyrannies of the landlords.

Purmandal Fair

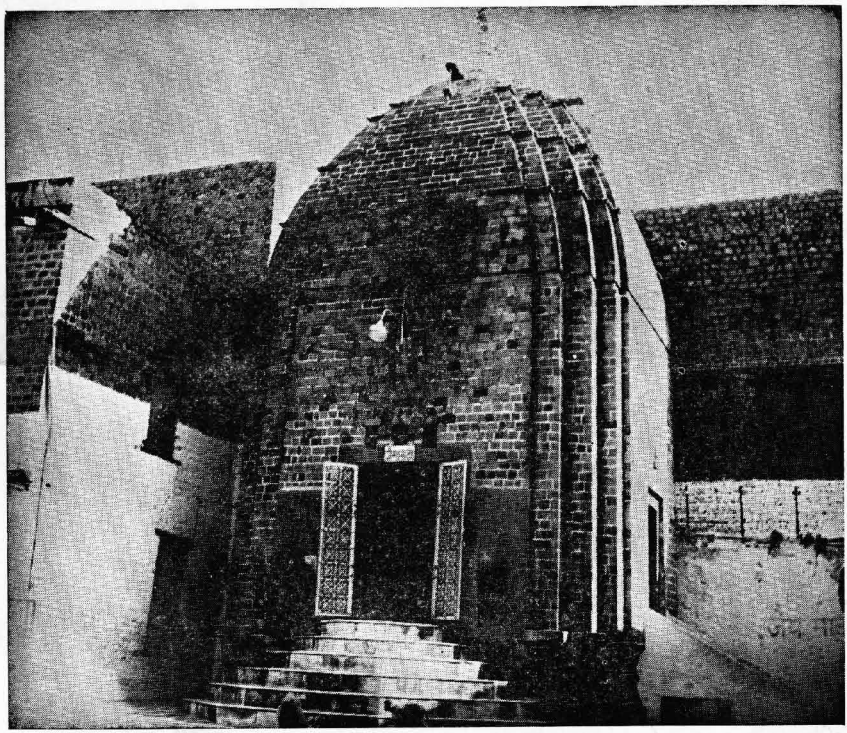

The fair at Purmandal temple, situated at a distance of 16 miles to the east of Jammu city, is held on 14th of Chet (close of March) and lasts for three days. Thousands of people from different parts of the State as also from adjacent States visit the temple and have a dip in the artificial springs built on the sandy bed of underground stream Devak, which is said to be a branch of river Ganges and originates at Sudmahadev.

After the dip, the pilgrims visit the ancient Shiva temple where they worship an image of a hooded snake which rises from the bottom of a cistern.

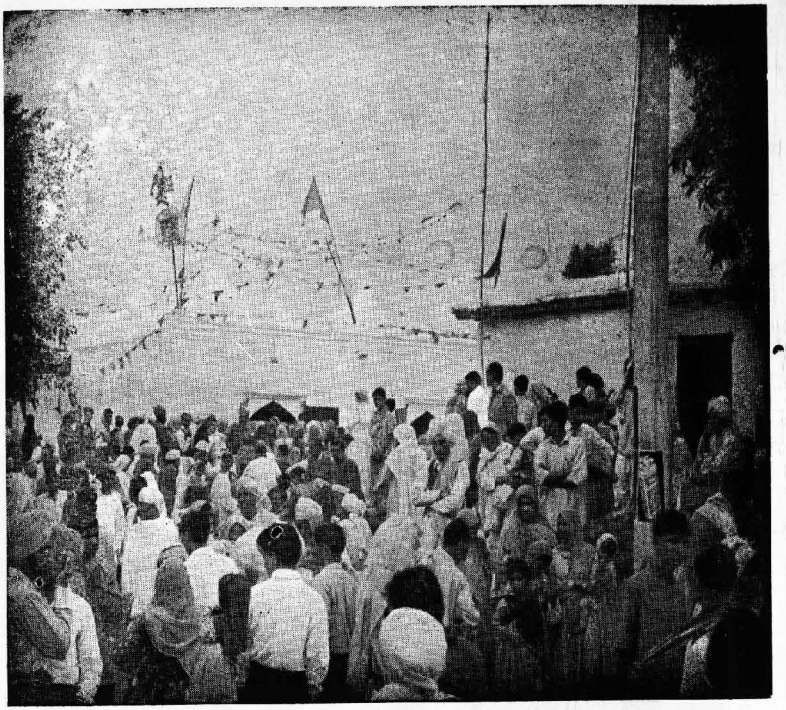

Halwais, fruit sellers and confectioners set up temporary stalls during the fair to cater the people participating in the fair.

Rakhi

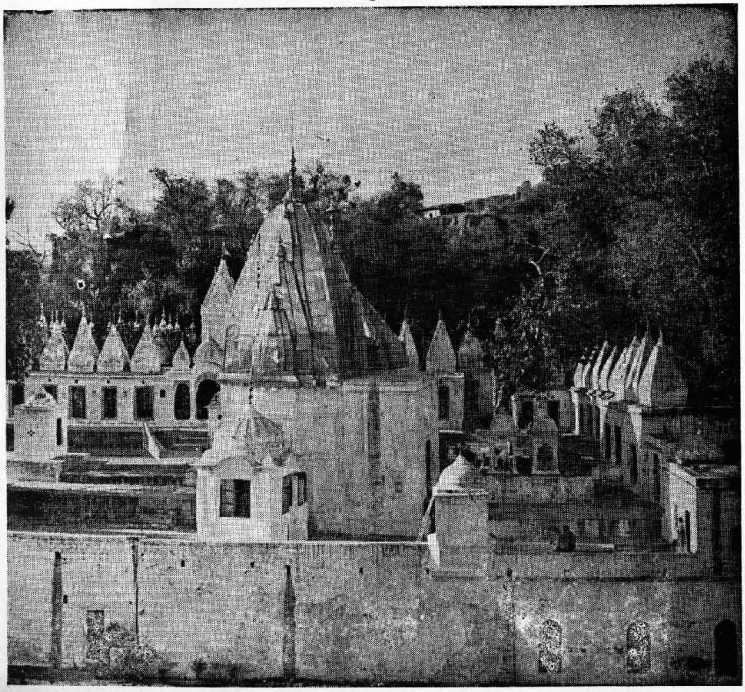

On this occasion, brothers and sisters reaffirm

Temple of goddess Kali in Bahu fort, Jammu

Congregation at the Shrine of Bawa Jitoo (tehsil Jammu) during Jhiri fair

Purmandal temple

their filial relationship. The sister ties a sacred thread on the right wrist of her brother and in return the brother pays her some money or makes some present. This function symbolises the pledge which the brother makes to respect the relationship with his sister.

Among the Muslim festivals, Idd and Muharram are the only important functions. Early in the morning of Idd, people take baths, wear new clothes and attend congregational prayers at a central place which is reserved permanently for this purpose. After lunch, they keep on moving about, playing and singing.

On the Muharram day, a procession is taken out in the memory of martyrdom of Imam Hussain, the prophet's grandson. The processionists beat their chests with hands and iron chains and recite eligies which recall the happenings of the battle of Karbala in which Imam was treacherously killed.

CHAPTER II

JAMMU CITY

General

Jammu city is the winter capital of the State Government and extends to an area of 4 square miles. The major part of the city is situated on the slope of a hill as a result of which it is gifted with a natural drainage system. Except for one good road bordering the western sector of the city, there are no roads worth the name interlinking the different localities which are connected by narrow lanes only. While new buildings are being erected strictly according to recognised principles of town planning and sanitation, the old one are huddled together and suffer from acute congestion. During the last 20 years, the city has expanded in the south and south-west where a number of new colonies have sprung up. The Roulki colony, the new home of displaced persons belonging to areas of the State on the other side of the Cease-fire Line, as also of others coming from West Pakistan is a remarkable achievement of the State Government. At Gandhinagar, a large number of quarters of three different grades have been constructed for the residence of Government officials, besides many bungalows built by private people and others.

The city stands divided into 15 wards though there is no record of the exact demarcations separating one ward from the other. This is equally true of the boundaries of mohallas about which the municipal records are silent. The Census of 1961 had therefore to be undertaken by dividing the city into 120 blocks carved out of 51 mohallas, some of which had to be split up into 2 or more blocks for this purpose. This necessitated slight adjustments in the boundaries of some of the wards and mohallas which was necessary in order to avoid overlappings and yet to retain the entity of each mohalla and ward in the Census schedules.

Temperature and Rainfall

The city is situated at a height of 1,030 feet above the Sea-level. The average temperature recorded during the last ten years has been 34.31° centigrade. Average rainfall during the same period was 1,094.45 millimeters. In summer, the days are very hot but as the city is very near the mountains, the nights are cool.

*Houses and Households

According to the Census figures, there were 18,730 dwellings, shop-cum-dwellings and workshop-cum-dwellings in the city at the end of 1960. These were inhabited by 104,609 persons as indicated by houselists or 5.6 persons on an average per dwelling. The number of occupied census houses stood at 38,342 giving the average per house at 2.7 persons only.

The sub-joined statement gives the average number of persons per household and per room in dwellings of varying accommodation in the city as a whole and in each of its constituent wards :—

City/Ward	1 room		2 rooms		3 rooms		4 rooms		5 rooms and more	
	Average number of persons		Average number of persons		Average number of persons		Average number of persons		Average number of persons	
	Per household	Per room	Per household	Per room	Per household	Per room	Per household	Per room	Per household	Per room
	1	2	3	4	5	6	7	8	9	10
City ..	4.71	4.7	5.971	2.98	6.79	2.26	7.53	1.88	9.47	1.49
Ward 1 ..	4.30	4.30	5.12	2.56	6.35	2.12	6.73	1.68	9.79	1.59
Ward 2 ..	4.22	4.22	6.07	3.04	6.67	2.22	9.00	2.25	10.67	1.60
Ward 3 ..	4.59	4.59	5.58	2.79	7.40	2.47	7.25	1.81	11.23	1.64

*Data relating to households, dwellings, size of accommodation etc. is based on Housing Survey conducted two or three months before the actual census. This data has been published in Volume VI, Part IV—Report on Housing and Establishment.

	(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
Ward 4 ..	4.95	4.95	7.20	3.60	7.74	2.58	9.50	2.38	21.67	2.83
Ward 5 ..	5.26	5.26	5.98	2.99	7.50	2.50	6.50	1.63	13.00	2.21
Ward 6 ..	5.12	5.12	6.55	3.28	8.33	2.78	8.50	2.13	11.00	1.16
Ward 7 ..	4.85	4.85	5.11	2.55	6.32	2.11	7.46	1.87	8.86	1.48
Ward 8 ..	4.48	4.48	6.59	3.30	7.56	2.52	9.00	2.25	12.63	2.02
Ward 9 ..	5.02	5.02	5.91	2.96	6.42	2.14	7.11	1.78	8.63	1.24
Ward 10 ..	4.74	4.74	6.09	3.05	6.78	2.26	7.13	1.78	7.75	1.32
Ward 11 ..	4.59	4.59	6.84	3.42	6.15	2.05	6.33	1.58	9.00	1.50
Ward 12 ..	5.77	5.77	7.50	3.75	6.00	2.00	8.00	2.00	8.00	1.25
Ward 13 ..	4.75	4.75	6.06	3.03	6.93	2.31	10.69	2.67	9.94	1.54
Ward 14 ..	4.34	4.34	5.83	2.92	6.11	2.04	8.58	2.15	7.94	1.23
Ward 15 ..	4.53	4.53	5.75	2.88	6.11	2.04	5.65	1.41	6.21	1.12

It is clear that there is not a single ward in which dwellings with accommodation of 2 rooms or less per household are not overcrowded. In some of the wards, such as, 5, 9 and 12, the average number of persons per room in dwellings of one room only exceeds 5. Even in the case of dwellings with three rooms, the number of persons per room exceeds 2 in all wards except 12.

Ward 4 appears to be most overcrowded, there being no dwelling, whatever its accommodation, which is not occupied by more than 2 persons per room. This is more or less true also of ward 5 though in this case dwellings with 4 rooms do not appear to be overcrowded.

Below is given the distribution of 1,000 households according to number of rooms occupied :—

No regular room	1 regular room	2 rooms	3 rooms	4 rooms	5 rooms and more
20	569	225	95	49	42

The predominant material of wall of majority of the dwelling houses is burnt brick which accounts for over 86% dwellings. The distribution of 1,000 houses of the city and each of its wards according to the predominant wall and roof materials is indicated in the sub-joined statement :—

City/Ward	Material of Wall							Material of Roof						
	Timber	Mud & unburnt bricks	Burnt bricks	C. I. sheets or other metal sheets	Stone	Cement concrete	All other material	Grass, leaves, etc.	Tiles, Slates, shingle	Corrugated iron, zinc or other metal sheets	Asbestos, cement sheets	Brick and lime	Concrete & stone slabs	All other material
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Jammu City	2	67	863	1	60	7	N	656	36	10	7	184	103	4
Ward 1	..	29	927	..	44	..	..	691	15	5	10	152	127	..
Ward 2	..	9	889	..	83	19	..	741	19	..	..	222	18	..
Ward 3	..	13	961	..	13	13	..	654	56	..	4	212	74	..
Ward 4	5	52	901	..	42	..	..	879	5	5	5	70	42	..
Ward 5	..	33	921	..	46	..	..	700	..	..	4	234	58	4
Ward 6	..	100	879	..	21	..	..	864	7	14	..	65	50	..
Ward 7	..	135	788	..	75	2	..	546	4	11	..	203	236	..
Ward 8	4	73	857	..	66	..	..	675	4	3	3	294	21	..

(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)	(14)	(15)
Ward 9	..	7	872	..	100	21	..	657	..	7	36	164	93	43
Ward 10	..	47	896	..	26	31	..	740	62	..	31	94	42	31
Ward 11	..	14	842	5	116	18	5	517	51	23	23	344	42	..
Ward 12	..	200	720	..	..	80	..	933	..	..	..	..	67	..
Ward 13	..	19	944	..	37	..	..	693	200	7	..	33	67	..
Ward 14	..	27	967	..	6	..	..	653	..	..	..	280	67	..
Ward 15	8	110	795	1	86	..	..	567	42	24	6	198	161	2

The statement shows that ward 12 is inhabited by the poorest households in the city. In this ward, the proportion of dwellings with walls made of burnt bricks is the lowest compared to the other wards of the city. Similarly, there is no other ward where the incidence of dwellings with roofs made of grass, leaves, bamboo, etc. is as high as in ward 12.

Wards 4 and 6 seem to be dominated by poorer sections though the proportions of houses with walls made of burnt bricks in these wards are much higher when compared with ward 12.

Population and Density

The population of the city, as returned at the 1961 Census, stands at 102,738 registering an increase of 103.93% over the population of 1941 which stood at 50,379. This phenominal growth is partly due to the settlement of displaced persons in Roulki colony and other areas from which large scale migrations have taken place and partly to the fact that the Census was taken in the month of February, 1961 when the city was inhabited, among others, by :—

1. Kashmiri Government officials employed in Secretariat and administrative departments which move with the Government to Jammu during winter,

2. Kashmiri labour which usually comes down to Jammu during winter for employment,

3. Members of the two Houses of Legislature and their families (the Census was taken while the budget session of the Legislature was on),

4. Kashmiri shop-keepers and their families, such as, butchers, bakers, rafugars, tailors, shoemakers, etc.

The sub-joined statement gives the densities of the population as returned at the 1941 and 1961 Censuses :—

1961			1941		
Area in Sq. Miles	Population	Density	Area in Sq. Miles	Population	Density
4	102,738	25,685	2	50,379	25,190

It is clear that due to the extension of the jurisdiction of the city, there has not been any large increase in the density notwithstanding the fact that the population has more than doubled during the last 20 years.

Growth of population

Below is given the decennial growths of population of the city from 1901 onwards together with the decade variation :—

Year	Population	Decade variation	Pecentage decade variation
1,901	36,130	...	...
1,911	31,726	— 4,404	—12.19
1,921	31,506	— 220	— 0.69
1,931	38,613	+ 7,107	+22.56
1,941	50,379	+11,766	+30.47
1,951	76,558	+26,179	+51.96
1,961	102,738	+26,180	+34.20

The variations shown for 1951 and 1961 have only a statistical value for reasons already given in Chapter I.

Sex-ratio

Owing to the prevalence of early marriage, non-availability of adequate medical facilities and unhygienic conditions etc., the sex-ratio in 1901 was as low as 626 females per 1000 males. There has since been a progressive increase in this ratio from decade to decade as indicated in the following table :—

Year	Males	Females	Sex-ratio
1901	22,221	13,909	626
1911	19,362	12,364	639
1921	19,121	12,385	648
1931	23,361	15,252	653
1941	29,817	20,562	690
1951	43,699	32,859	752
1961	57,581	45,157	784

Even now, the sex-ratio is very low, but it is hoped that there would be a marked increase in another decade or so as a result of the numerous measures taken by the State Government.

Marital Status

It appears that notwithstanding the enactment of 'Infant Marriages Prevention Act of 1928', there are still stray cases of minor girls and even boys below the age of 14 being married. At any rate, the incidence of such marriages being very low, it is very likely that in course of time this obnoxious practice will completely disappear. The following table gives the percentage of marital status for each sex by broad age groups :—

Age group	Never Married		Married		Widowed		Divorced or Separated		Unspecified status	
	Males	Females	Males	Females	Males	Females	Males	Females	Males	Females
0—9	100	100	..	..	..	..	..	..	..	..
10—14	99	97	N	2	..	..	..	..	1	1
15—54	39	15	59	76	2	8	N	N	N	1
55—69	4	1	75	34	21	65	N	N	N	N
70+	5	1	53	10	42	89	..	..	..	N
Age not stated	90	93	10	4	..	..	..	..	..	3

Education

The Education Department have intimated that there are 53 educational institutions of different grades in the city with a total student population of 21,234 of whom 13,121 are boys and 8,113 girls. According to the 1961 Census, however, the number of full-time students stands at 22,207 giving a variation of 973. These seem to be borne on the rolls of private schools which are not affiliated to the university and the activities of which are confined to religious teachings only.

At any rate, the male and female population in the age-group 5-19 being 19,574 and 16,625 respectively, it would appear that 67% boys and 48.8% girls of this age-group attend Government owned or aided educational institutions. These percentages are highest when compared to all other urban parts of the State.

The sub-joined statement gives the number of institutions of each grade separately for boys and girls as also the total number of students borne on the rolls of each category :—

Sex	*Colleges*		*Higher Secondary* Schools		*High Schools*		*Lower High/* Middle/Central Schools		*Primary/Basic* Activity Schools		*Total*	
	No. of institutions	No. of pupils	No. of institutions	No. of pupils	No. of institutions	No. of pupils	No. of institutions	No. of pupils	No. of institutions	No. of pupils	No. of institutions	No. of pupils
1	2	3	4	5	6	7	8	9	10	11	12	13
Boys ..	5	1,923	1	1,516	9	4,423	9	3,086	10	2,173	34	13,121
Girls ..	1	549	1	632	6	4,669	3	1,070	8	1,193	19	8,113
Total ..	6	2,472	2	2,148	15	9,092	12	4,156	18	3,366	53	21,234

Literacy

The literacy percentage of Jammu city, as returned at the 1961 Census, viz., 45.00% indicates a fall of 0.38% as compared with the corresponding percentage of 1941. It may be pointed out here that the Census Commissioner of the State for 1941 Census, expressed doubts about the accuracy of the literacy percentage of 45.38 returned at the 1941 Census, as he felt that this was out of all proportion with the corresponding literacy figures of other areas in the State. These apprehensions appear to have been well-founded, as there has

been a lot of expansion in the field of education in Jammu city during the last 20 years and yet the literacy percentage has not exceeded 45.00%.

Language

The data collected at the Census of 1961 shows that the mother-tongue of about 55% people inhabiting the city of Jammu is Dogri. Punjabi ranks next and claims over 22% speakers. Other languages spoken consist of Hindi (11.6%), Kashmiri (8.5%), Urdu (0.8%), Pahari-unspecified (0.6%) and other languages (1.7%). The following statement gives the number of speakers of various languages :—

S. No.	Language	No. of people
1.	Dogri ...	56,082
2.	Punjabi ...	22,775
3.	Hindi ...	11,963
4.	Kashmiri ...	8,765
5.	Urdu ...	865
6.	Pahari-unspecified ...	627
7.	Nepali ..	390
8.	Boria ...	208
9.	Bhadrawahi ...	194
10.	Kishtwari ..	126
11.	Bengali ...	101
12.	Marathi ...	101
13.	Sindhi ...	86
14.	Mirpuri ...	78
15.	Tamil ...	65
16.	Gojri ...	53
17.	Gujarati ...	41
18.	Telugu ...	39
19.	Madrasi ...	37
20.	English ...	33
21.	Malayalam ...	28
22.	Multani ...	21
23.	Tibetan ...	15
24.	Ladakhi ...	13
25.	Garhwali ...	9
26.	Afghani/Kabuli/Pakhto/Pashto/ Pathani ...	8
27.	Punchi ...	7
28.	Gilgiti ...	5
29.	German ...	1
30.	Gorkhali ...	1
31.	Kannada ...	1

Urdu and Punjabi are the medium of communication between the speakers of Dogri and other languages.

Dogri is a dialect of Indo-European Family and its script is said to have been invented by Raja Shakti Karan who ruled Jammu about 3,000 years ago. Maharaja Ranbirsingh who ruled the State from 1,857 A. D. to 1,885 A.D., introduced some modifications in the dialect so as to bring it as close as possible to Gurmukhi. The two dialects were known as Purani (old) and Navi (new) Dogri, but the latter did not survive for long.

With the passage of time, Dogri has absorbed numerous words from several other languages, particularly, Punjabi, Urdu, Persian and even English. While words of languages other than English have crept into Dogri due to the social contacts and day to day dealings etc. of Dogras with the speakers of these languages, English words had to be adopted for want of their appropriate equivalents in Dogri. Among these, mention may be made of radio, harmonium, loud speaker, bicycle, tube, tyre, truck, meter, car, seat, handle, military, police, driver, petrol, engine, pencil, fountain-pen, slate, pass, fail, coat, button, hockey, football, circket, school, college, hotel, restaurant, glass, plate and numerous other words.

Dogri is not only a spoken language but has also its written character known as Takri derived from Takkas, a tribe which had originally settled in Sialkot, West Pakistan. Sometime back, a grammer of the language was also written by one Prof. Gauri Shanker, a native of the State, who is said to have conducted some research work on the subject. The following extract from the Indian Linguistic 1931, Bulletin of Linguistic Society of India containing the comments of this Professor on the scripts of Dogri appears to be interesting :—

"The Dogra Script now current is the old one. This alphabet is very imperfect. Theoritically it has all the letters found in Devanagri except a few which are not employed in the dialect e.g. *r* and *lr*. The vowels are loosely written. One peculiarity of the script is the very frequent employment of the initial forms of vowels for their medial, e. g. *da* is written *d+a*".

Being a dialect of Punjabi language, Dogri has many affinities with it. The distinction between the two is discernible only by the pronunciation of some words, use of vowels and consonants etc. Thus while in Punjabi the equivalent of English

word *in* is *vich*, a Dogra would instead read the word as *bich* replacing *v* by *b*. Similarly, *vaste* (for) in Punjabi has been distorted to *baste* in Dogri. Again, a Punjabi would call a minister by the name *Vazir* while a Dogra would instead use the word *Bazir*.

Another important distinction is that Dogri has retained letter *r* in the words derived from Sanskrit while it has been dropped in corresponding Punjabi words. This is elucidated by the following instances:—

Dogri	*Punjabi*	*Sanskrit*	*English*
Nidra	Nid	Nidra	Sleep
Trorana	Torena	Trut	To break
Khetter	Khet	Ksetra	Field
Trae	Tin	Tri	Three
Treh	Teh	Trisa	Thirst
Gra	Gro	Grama	Village

Medical Institutions

There are 4 hospitals and 5 dispensaries in the city. The latter consist of 1 Allopathic, 3 Ayurvedic and 1 Unani dispensaries. Broadly speaking, the average number of persons catered by each institution stands at 11,415.

There is no arrangement for the treatment of in-patients in any of the dispensaries. The hospitals have however been provided with 462 beds as indicated below :—

Name of Hospital	*Number of beds*
1. S. M. G. S. Hospital	300
2. Isolation Hospital	12
3. Chest Diseases Hospital	130
4. Leper Hospital	20

This means that the number of beds per 10,000 population and per sq. mile stands at 45 and 116 respectively.

The number of persons treated in the outdoor department and as in-patients as also the operations performed in 1960-61 in the owned and administered by the Government are given below :—

	Out-door patients	Indoor patients	Major operations	Minor operations
Allopathic Hospitals and Dispensaries	190,431	10,004	2,251	7,538
Ayurvedic Dispensaries	46,661	...	...	8
Total	237,092	10,004	2,251	7,546

Following are the details of the staff employed :—

Doctors	...	37
Nurses	...	53
Midwives	...	22
Dais	...	38
Dawasaz	...	2
Health visitors	...	2
Compounders	...	59
Hakims and Vaids	...	2

Water Supply

The city being situated on the bank of River Tawi, most of the water consumed by the inhabitants is pumped from the river. There are 9 tube-wells and a filtration plant yielding about 44.46 lakh gallons of water per day. In addition, two tube-wells have been sunk in Gandhinagar, a third in Bakhshinagar and another in the Industrial Estate, Jammu. The total output of water from these is estimated at 13.5 lakh gallons per day.

According to the information supplied by the Chief Engineer Electrical Department, there are 9,399 water-tap connections in the city.

Except for a few places in the rural areas where protected water supply fed by tube-wells is available by and large, the people have to depend on the water of rivers, canals, ponds, etc. for drinking purposes.

Electricity

The hydro-electric generating station installed on the bank of Ranbir Canal in the outskirts of the city is designed to produce only 1,000 kilowatts which is hardly enough even to meet the requirements of one or two sectors of the city. In the circumstances, energy is purchased in bulk from the Jogindernagar power station at Pathankot which is about 70 miles away. An incidental advantage of this arrangement has been that all the villages enroute from Pathankot to Jammu have also been electrified.

Industrial Classification

Workers and non-workers are in the proportion of 3 to 7. Majority of the former consists of those who are employed in other services. Trade and Commerce is the next important sector of employment. This is true both of the total and the male population of the city but among females 90% of the workers are engaged in other

services as indicated below :—

As cultivator	...	...
As agricultural labourer	...	...
In mining, quarrying, etc.	...	1 %
At household industry	...	5 %
In manufacturing other than household industry	...	2 %
In construction	...	N
In trade and commerce	...	2 %
In transport, storage and communications	...	N
In other services	...	90 %

Economic conditions

Before 1947, Jammu was the terminus of the branch railway line taking off from Wazirabad, a town on the old North-western Railway, now in West Punjab. Goods imported from abroad or from other States in India, were dumped in the first instance in Jammu before being despatched onwards to various distributing and consuming centres. The city was thus a very important commercial area ranking next only to Amritsar.

With the closure of the Jhelum Valley Road and the dismantling of the railway line connecting Jammu with Sialkote, the rail-head was transferred to Pathankot at a distance of 70 miles from the city. The Pathankot-Jammu-Srinagar road being now the only surface route which gives access into the State, all exports from and imports into the State are routed by this road. This is one of the main reasons why the transport service of the State Government has been developed on a very large scale. Since, however, the rail-head is now far away from the city and because further with the improvement of the National Highway and the construction of a fairly wide tarred road from Pathankot to Jammu, the carriage of goods from Pathankot to Srinagar and vice versa does not take more than one day for the major part of the year, Jammu city has lost to a large extent its previous importance as a distributing commercial centre. This has however been set off in a substantial measure by the abolition of custom's barrier which operated previously at Lakhenpur on Jammu-Pathankot road and obstructed free trade with the rest of the country. Except for the octroi duty and freight payable from Pathankot to Jammu, there is now no disparity in the rates at which goods can be had at either of these places. The temptation to make purchases at cheaper rates at Pathankot and to evade the payment of custom's duty by smuggling the goods into the State has thus ceased to exist.

There has therefore been a sizable increase in the commercial activities of Jammu city and in the number of its commercial establishments. The abnormal growth of the population caused by the rehabilitation of the displaced persons and immigrants and consequent increase in the demand for consumer goods has more than atoned the depression in commercial activity which is making remarkable progress.

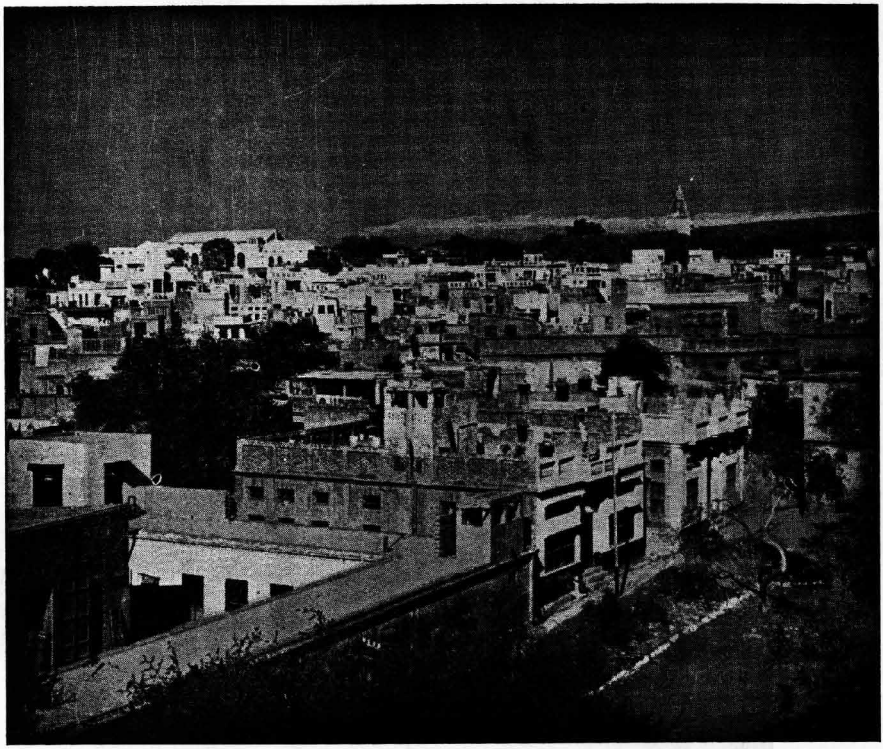

On the industrial side also, the city is advancing at a rapid speed. A large number of industries have been established in the newly constructed industrial estate at Gandhinagar. Private capital is not shy and with the assistance made available by the State Government, new industries are springing up in various parts of the city. Calico printing, which was once the monopoly of a few persons only in Samba, is now thriving in Jammu. The number of workshops and worksheds engaged in engineering works is also multiplying from day to day.

The prices of essential commodities except those controlled by the State Government have however been soaring up as in many other parts of the country. Fortunately, the economic standards have also gone up and the spending capacity of the people has increased though not in the same proportion. Unemployment is not more pronounced than in most other cities including Srinagar.

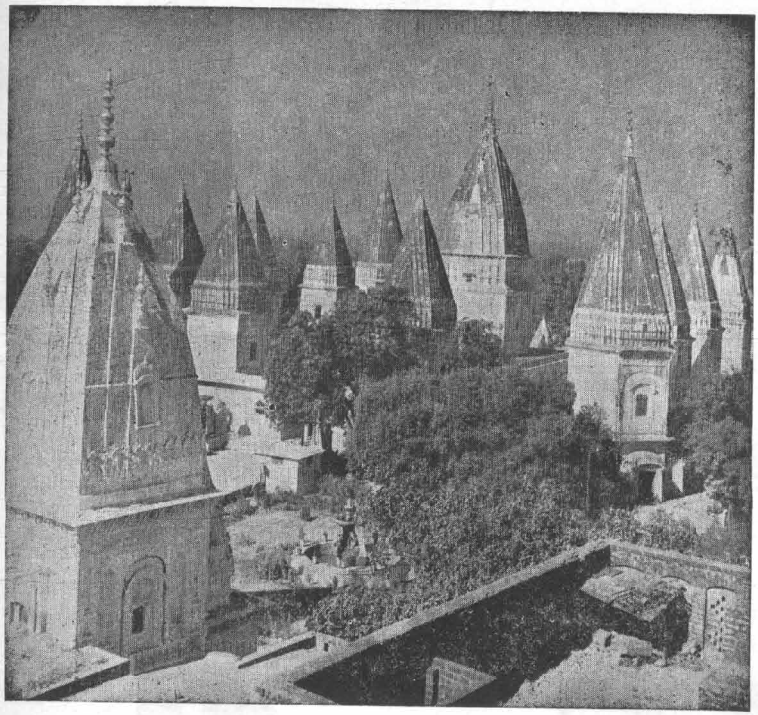

Important achievements

Following are some of the important achievements of the city during the period of 20 years ending 1961 :—

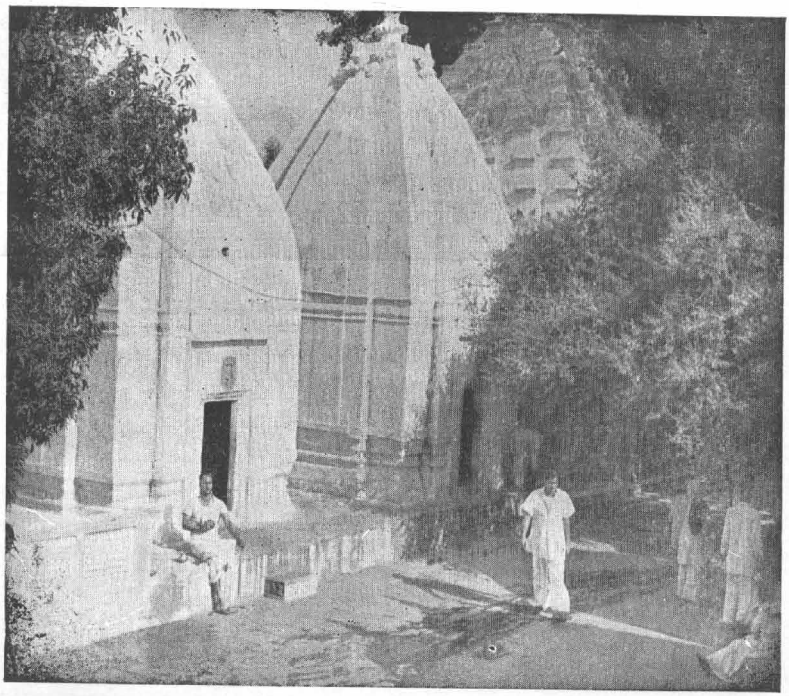

1. Establishment of a Radio Station
2. Construction of an Airport
3. Establishment of new colleges, viz., Government Arts College, Teachers' Training College, S. P. Rajput College of Commerce, Government College for Women, Government Unani and Ayurvedic College and Government Polytechnic.
4. Establishment of a number of High, Middle and Primary Schools for male and female education.

5. Establishment of S.M.G.S. Hospital with 300 beds
6. Establishment of Chest Diseases Hospital with 130 beds
7. Construction of an Industrial Estate with 39 worksheds of different grades
8. Establishment of a Government Transport Yard and Workshop
9. Expansion of Government Tourist Centre
10. Construction of 4 new cinema halls at Residency Road, Canal Road, College Road and Cantonment
11. Construction of a new road from Mubarik-mandi via Babra - Bazar to Purani-mandi and widening of old Urdu Bazar Road, now known as Rajinder-bazar
12. Construction of new Police Buildings
13. Establishment of a number of restaurants and hotels, viz, Premier, Cosmo, Ashok, Standard, etc.

Before 1960, the Secretariat offices and those of Heads of Departments and other officers were being housed in the old Palace at Muharak-mandi. A new Secretariat has now been built near the Ajayib-garh at a cost of Rupees Forty Lakhs approximately.

Unlike Srinagar, there were no exhibition buildings in Jammu and the Arts exhibition was being organised in the Parade Grounds where temporary stalls built of portable corrugated iron sheets were being set up. The Government has since constructed permanent stalls in a fairly spacious area on the right bank of river Tawi close to the bridge.

Dogra Paintings

During the earlier period of Dogra rule, Jammu became widely known for its exquisite art in paintings. Artists of very high order sprang up from several places, particularly Bashohli, Jammu, Ramnagar, etc. The Bashohli paintings which consisted of elaborately designed frescoes and constituted a treasure of fine art were deposited in the famous Rang-Mahal but are extinct now. Murals of great artistic value are however still available in the old Palace at Ramnagar. Besides dealing with pahari paintings, such as scenes from scriptures, etc., they also reflect the contemporary history of Maharaja Ranjit Singh.

The Dogra paintings do not give any indications of the names of artists by whom they were produced. The apparel depicted in many of the paintings displays a distinct Muslim influence. Others, such as the murals of the famous rock shrines of Purmandal (District Jammu), though qualitatively inferior are more diverse in variety.

A Dogra Art Gallery has now been set up in Jammu City where all the paintings other than those deposited in the Ramnagar Palace are displayed.

Temples, Mosques, etc.

The city of Jammu is popularly known as a city of temples due to its very large number of temples, some of which are concentrated in one particular place like Rughnath Mandir.

Rughnath temples, as they are known, consist of 14 separate temples which are concentrated in one place. The main temple contains the images of Shri Rama, Sita and Lakshman. Other temples are dedicated to the incarnations of Lord Vishnu. According to the popular belief, there are 13 lakhs Saligrams in the halls built around the central temple, but there is no recorded information available to indicate whether this number has ever been verified. The walls of the temple have been decorated with beautiful mythological figures and scenes.

Maharaja Ranbirsingh, who was a great pattern of art and culture, established a large Sanskrit Pathshala in the premises of the temple. The Pathshala which has been a renowned centre of Sanskrit learning, contains valuable books on Sanskrit literature, some of which are said to have been translated into different languages.

Other important temples include :—

1. Gajadar Mandir at Mubarik-mandi
2. Lakshmi Mandir in Pacca-Danga
3. Purani-mandi Mandir
4. Panj-bakhtar Mandir
5. Rani Mandir near Kachi-chhawani
6. Rameshwar Mandir

Important among the mosques are the Juma-masjid in Mastgarh and Talab-khatikan mosque near Rajinder-bazar. In addition, there are also some important Muslim shrines which are held

sacred both by Hindus and Muslims. Among these may be mentioned :—

1. Pir Mitha Shrine
2. Shrine of Baba Jeevan Shah near Residency road
3. Shrine of Panj Pir
4. Shrine of Baba Ibrahim
5. Shrine of Roshan Shah Walli at Gumat

The last named is said to have been repaired by Maharaja Pratap Singh.

People belonging to all castes and creeds participate in the Urs or the anniversary of Pir Mitha which is celebrated every year in the month of October. The historical background of the shrine, as believed commonly, is that a Faqir, Sayid Qutub Ali by name, who hailed from Sabazwari in Persia visited Jammu and a large number of Hindus and Muslims rallied around him and became his followers. The saint preferred milk and sweets among all eatables and was therefore called Pir Mitha (sweet saint).

Yet another important Muslim shrine exists in the premises of the airport in Jammu Cantonment. This is also visited by members of all religions on Thursdays, and an 'Akhara' and 'Bhandara' are held every year in the month of July.

Caves

There is only one important cave worth the name in Jammu City. This is known as Pir Khoh of Jamwant cave. It is said that a saint Pir Garib Nath by name used to meditate in the temple known after the name of Lord Shiva which had been built earlier inside the cave. Hindus assemble in large numbers at the cave in the month of February to worship Lord Shiva.

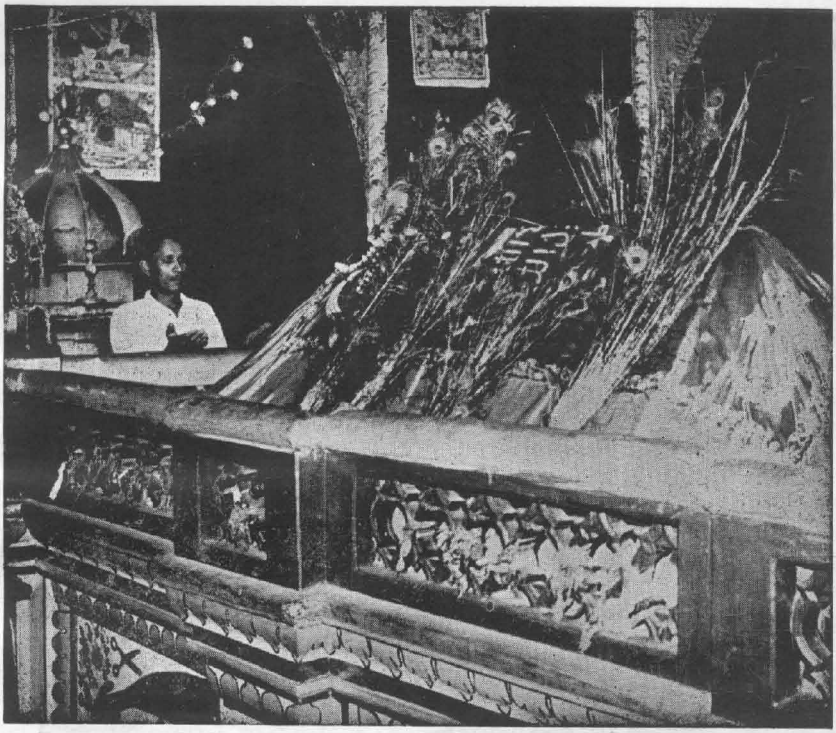

Forts

There is only one important fort on the left bank of river Tawi, said to have been built by Raja Bahu Lochan. The Bahu Fort, as it is known, is famous for the Hindu temple which was built by the Raja inside it. A fair is held at the fort every year in the month of March.

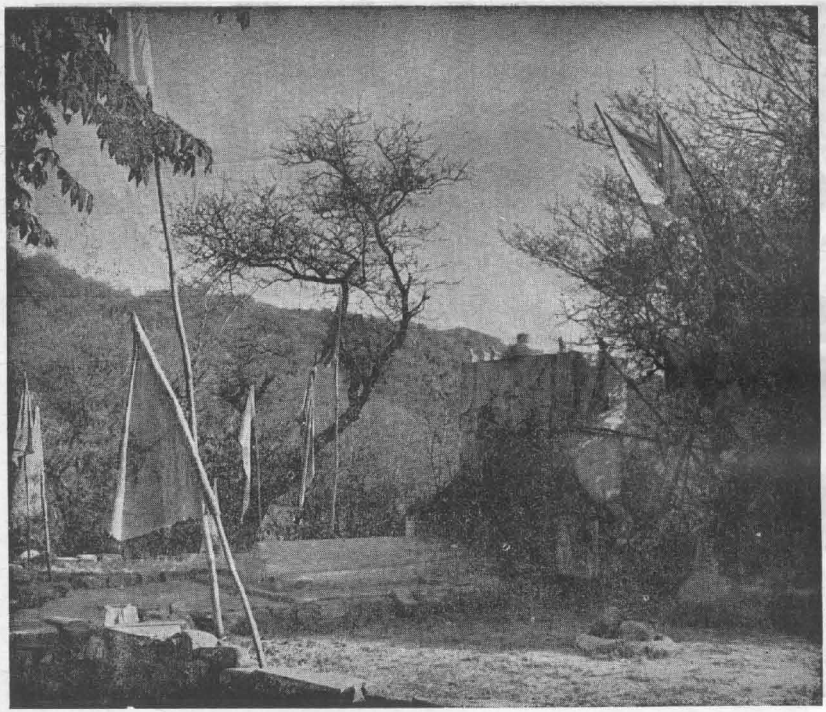

Fairs and Festivals

Following are the important fairs celebrated in Jammu City :—

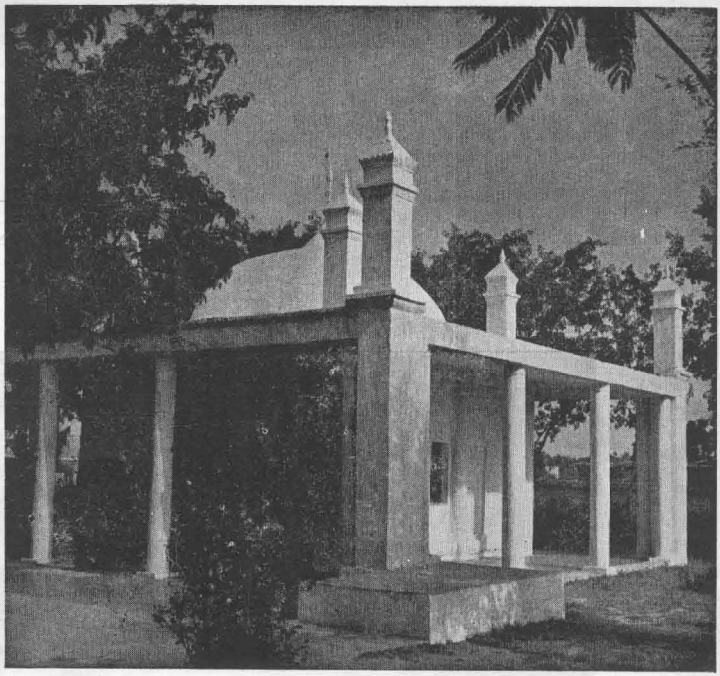

1. Ram Navmi fair held in September and March in Bahu Fort
2. Holi in February
3. Shivratri in February
4. Baisakhi at Canal Head on the first day of Baisakh
5. Dussehra in September
6. Bahu fort mela in March
7. Muharram
8. Id-ul-Fitr
9. Id-ul-Zuha

CHAPTER III

JAMMU TEHSIL

Area

Except for the transfer of village Kothar from tehsil Ramnagar of district Udhampur, there has been no jurisdictional change in tehsil Jammu during the inter-census period 1941-61. The area of the tehsil as given in the Census Report of 1941 stood at 346 sq. miles as against which it is now estimated, on the basis of planimetering, at 349.5 sq. miles. The increase of 3.5 sq. miles represents the area covered by village Kothar. The State Revenue Department have, however, estimated the area at 353.5 sq. miles, which is obviously wrong, as the area given in 1941 and in the previous Census Reports is based on the field surveys conducted by the Surveyor General of India. At any rate, the Revenue Department figures show that an area of about 38.2 sq. miles of the tehsil is covered by forests and the assessed area stands at 353.5 sq. miles. These figures also do not seem to be free from error.

Temperature and Climate

There is no equipment anywhere in the rural area of the tehsil to measure the temperature which is more or less the same as in Jammu city. The average rainfall during the last decade preceding 1961 has been 1210.472 mms. or 47.66 inches.

Villages and Towns

The tehsil consists of one city, one cantonment and 308 villages of which two are uninhabited. This is exclusive of 30 villages which have been completely depopulated after the tribal raids of 1947. The total population of the tehsil stands at 233,311 of which about 54% belongs to the rural and over 46% to the urban sectors. The sub-joined statement gives the distribution of 1,000 persons between the rural and urban sectors and of 1,000 males and females in these areas :—

	Population per 1,000		
	Persons	Males	Females
Rural	536	522	553
Urban	464	478	447

Except for a few, most of the villages are of a small size and their population is less than 500. The following statement shows the proportions of the villages of various population groups :—

Less than 200	200-499	500-999	1,000-1,999	2,000-4,999
38%	38%	15%	7%	2%

Villages in the population group 200-499 claim the highest proportion of population of the tehsil as indicated below :—

Less than 200	200-499	500-999	1,000-1,999	2,000-4,999
9%	30%	24%	24%	13%

*Houses and Households

The total number of dwellings, shop-cum-dwellings and workshop-cum-dwellings in the tehsil is 45,333 of which 25,205 fall in the rural and 20,128 in the urban sectors. The average number of persons per dwelling in the tehsil as a whole works out to 5.2 and in the rural and urban areas to 5.0 and 5.4 respectively.

There are in all 80,923 occupied houses in the tehsil. This gives an average of 2.9 persons per house. The number of occupied houses in the rural and urban sectors being 40,538 and 40,385 the corresponding averages for these sectors come to 3.1 and 2.7 respectively.

The sub-joined statement gives the average number of persons per household and per room in dwellings of different categories in the rural and urban sectors of the tehsil :—

	1 room Average No. of persons		2 rooms Average No. of persons		3 rooms Average No. of persons		4 rooms Average No. of persons		5 rooms and more Average No. of persons	
	Per household (i)	Per room (ii)	Per household (iii)	Per room (iv)	Per household (v)	Per room (vi)	Per household (vii)	Per room (viii)	Per household (ix)	Per room (x)
Rural	4.84	4.84	6.08	3.04	6.65	2.22	6.75	1.69	7.87	1.44
Urban	4.64	4.64	5.96	2.98	6.83	2.27	7.38	1.85	9.45	1.49

*Data relating to households, dwellings, size of accomodation etc. is based on Housing Survey conducted 2 or 3 months before the actual Census. This data has been published in Vol. VI, Part IV—Report on Housing and Establishment.

More than 74% households live in single rooms and about 15% in dwellings with 2 rooms only. The number of households occupying no regular rooms is however 1.5% only.

The predominant material used in the construction of walls of the large majority of dwellings in the rural sector is mud which alone accounts for 667 dwellings per 1,000. Stone is the next important material but the proportion of such houses is only 232 per 1,000. There are very few houses with walls made of burnt and unburnt bricks.

About 86% dwellings in the urban sector which include Jammu Municipality have walls made of burnt bricks. The material used in others consists of stones, mud or unburnt bricks.

In so far as the roof material is concerned, about 95% rural dwellings are covered with grass, wood, reeds or bamboo. Even in the urban sector, the proportion of such dwellings is over 64%. It is, however, a fact that more than 20% and about 10% urban dwellings have roofs built of brick and lime, and concrete and stone slabs respectively.

The roofs of all the dwellings except a few are flat and are generally used in summer for sleeping purposes. People with limited means use a corner of the roof as a latrine. Sanitary fittings are, however, installed in buildings of modern type.

Population and Density

The tehsil has the third largest population among all the tehsils of the State and highest among those of Jammu District. The fact that the tehsil ranks 22nd by area, indicates that it is relatively very much overcrowded. The sub-joined statement gives the comparative densities in 1961 and 1941 for the tehsil as a whole and for its rural and urban areas :—

	1961			1941		
	Area in Sq. miles	Population	Density	Area in Sq. miles	Population	Density
Total	349.5	233,311	668	346.0	156,556	452
Rural	341.6	125,054	366	340.1	97,709	287
Urban	7.9	108,257	13,703	5.9	58,847	9,974

The density of the tehsil for 1961 holds 3rd position in the entire State, Srinagar and Ranbirsinghpora being the only other tehsils where the corresponding densities stand at 2,147 and 682 respectively. This is due to the heavy concentration of displaced persons and immigrants from the other side of the Cease-fire line and West-Pakistan and other States in India.

In the rural sector, the tehsil ranks 7th, the corresponding densities of tehsils Pulwama, Srinagar, Badgam, Baramulla, Sonawari and Ranbirsinghpora being higher than that of Jammu. So far as the urban sector is concerned, tehsil Jammu ranks fourth, the highest being claimed by Udhampur at 19,737 per sq. mile.

Sex ratio

The proportions of females per 1,000 males in the rural and urban sectors and in the tehsil as a whole are given below for the six decades from 1901 onwards :—

	1901	1911	1921	1931	1941	1951	1961
Total	781	746	760	748	760	808	842
Rural	852	831	841	839	861	878	892
Urban	626	573	590	586	618	724	787

As in the case of the district, the proportions of females for the entire tehsil and its rural and urban sectors have progressively been increasing from 1911 to 1961 but are still very much below the corresponding proportions of the State and its rural and urban areas.

Education

According to the information supplied by the Education Department, the total number of educational institutions of various grades owned or aided by the Government which are functioning in the rural sector of the tehsil stands at 113 with a population of 12,124 students, comprising 9,994 boys and 2,130 girls. As this information was supplied by the Education Department late in 1961, the number of students returned at the Census stands at 9,452 only, giving a difference of 2,672. Another important reason for this disparity is that students who are due to appear in matriculation and middle school examinations in early March are allowed preparation time in the month of February. It is possible that some of these students may have been preparing for their examinations at their homes in other tehsils of the district due to which they could not be included in the census figures of Jammu tehsil.

The population of males and females within the age group 5-19 in the rural sector of the

tehsil stands at 22,179 and 20,641. In other words, the percentages of boys and girls attending rural schools whose age does not exceed 19 years are approximately 45.1% and 10.3% respectively.

There are 7 colleges in the tehsil, six of which including one reserved for girls only are functioning in Jammu city. In addition, there are two Higher Secondary Schools, one for boys and the other for girls. The number of high schools in the tehsil is 23 including 7 exclusively meant for girls. The total number of pupils on roll in these 32 institutions is 18,355 comprising 11,855 males and 6,500 females.

The total number of Lower High Schools, Middle Schools and Central Schools is 34, of which 26 are meant for boys and 8 for girls. The number of pupils attending the boys' schools stands at 6,140 and of those borne on the rolls of girls' schools 1,675.

Primary and basic activity schools number 105 with a total roll of 9,723. The boys' schools numbering 74 are attended by 7,005 pupils. The number of girls borne on the rolls of the remaining 31 schools stands at 2,718.

Literacy

The tehsil ranks top-most among all the tehsils of the State for its high literacy percentage. In Srinagar tehsil and its rural and urban sectors, the literacy percentages stand at 22%, 6% and 25% respectively as against 27%, 12% and 44% of Jammu. The sub-joined statement gives the sex-wise literacy percentages for the tehsil and its rural and urban areas :—

Total			Rural			Urban		
P	M	F	P	M	F	P	M	F
27%	34%	19%	12%	19%	4%	44%	51%	36%

Medical Institutions

The total number of medical institutions set up by the Government or aided by them is 22. These comprise 5 hospitals, 4 allopathic, 12 ayurvedic, and 1 unani dispensaries. Of the hospitals, 4 are functioning in Jammu city and 1 in the Cantonment.

There are 462 beds in the four hospitals of the city. The number of beds in the cantonment hospital is not known.

In addition to the hospitals, 5 dispensaries have also been set up in urban areas. The remaining 12 despensaries are functioning in the rural sector.

It is clear that a rural dispensary serves 10,421 persons on an average as against 12,028, the corresponding average of the urban sector.

The following table gives the number of in-patients, out-patients and major and minor operations carried out in the tehsil as a whole during the year 1960-61 :—

	Out-patients	In-patients	Major Operations	Minor Operations
Hospitals and allopathic dispensaries ...	223,772	10,029	2,251	7,842
Ayurvedic and unani dispensaries ...	128,322	...	...	286
Total ...	352,094	10,029	2,251	8,128

Following are the details of the staff employed :—

Doctors	...	39
Nurses	...	53
Midwives	...	22
Dais	...	42
Dawasaz	...	11
Health Visitors	...	7
Compounders	...	62
Hakims and Vaids	...	5
Vaccinators	...	1

Water Supply

The urban areas of the tehsil have been provided with protected water supply which is either obtained from tube-wells or by pumping from river Tawi. There are only 9 tube-wells in the rural sector and these have been built in the following villages :—

1. Chhani Hamit
2. Ambh
3. Palora
4. Seri Panditan
5. Bhalwal
6. Top Sher Khaniyan
7. Raipur
8. Ranjan
9. Ban

These tub-wells feed 30 villages as indicated in the Village Directory appended to the Report.

The inhabitants of other villages consume water drawn from wells and even tanks and ponds.

Religion

Except for Jammu city, the figures showing the community-wise population are not available for other urban areas of the tehsil. The rural sector and the city of Jammu which claim populations of 125,054 and 102,738 respectively are inhabited by the following communities to the extent noted against each :—

	Rural areas	Jammu city
Buddhist	1	...
Christians	311	872
Hindus	108,129	74,242
Jains	5	1,018
Muslims	8,795	17,714
Sikhs	7,810	8,892
Religion not known	3	..

The corresponding population figures of these communities as returned at 1941 Census are given below :—

	Rural areas	Jammu city
Buddhists	...	1
Hindus	58,108	30,564
Muslims	38,700	15,920
Sikhs	638	2,135
Jains, Christians, others	263	1,759
Total	97,709	50,379

It is clear from the above figures that the population of Hindus in the rural sector has almost doubled during the inter-Census period and that of Muslims has shrunk to 77% of their population in 1941. The population of Sikhs has however registered an abnormal increase during the same period having gone up by over twelve times than what it was before.

In the city, the growth of population among Hindus and more particularly in Sikhs has proceeded at, what may appear, an alarming speed. It may however be stated that these fluctuations are not at all related to the normal growth of population and have in all cases been brought about by the large scale migrations and immigrations which followed the tribal raids of 1947. Most of the Hindus enumerated in 1961 are displaced persons from the erstwhile districts of Mirpur and Muzaffarabad, etc. Similarly, not a few of the Sikhs who lost their home and hearth in the districts of Muzaffarabad, Baramulla, Mirpur and Poonch have also been rehabilitated in this tehsil. Above all, there has been a huge influx of immigrants from West-Pakistan and other parts of India.

The fall in the population of Muslims is accounted for by their mass migrations to the other side of the Cease-Fire Line and to Pakistan.

Crops

According to the information made available by the Directorate of Statistical Bureau of the State Government, the tehsil extends to an area of 353.5 sq. miles or 2,26,238 acres. The net area sown, as estimated in 1960-61, has been placed at 98.1 sq. miles (62,753 acres) or 27.7% of the total area. The following statement indicates the classification of the land :—

Area and percentage	Area according to village papers	Area under forests	Land put to non-agricultural uses	Barren and uncultivable land	Permanent pastures and other grazing lands	Land under misc. tree crops	Culturable waste	Fallow land other than current fallows	Current fallows	Net area sown
1	2	3	4	5	6	7	8	9	10	11
Area in acres	226,238	24,466	72,283	14,362	320	13,839	17,879	1,045	19,291	62,753
Area in square miles ..	353.5	38.2	113.0	22.4	0.5	21.6	27.9	1.6	30.2	98.1
Percentage of total area ..	100	10.8	32.0	6.4	0.1	6.1	7.9	0.5	8.5	27.7

Enquiries made from the Tehsildar concerned have, however, disclosed that the total cultivated area under all crops stands at 96,308 acres or 150.5 sq. miles. Wheat, rice, bajra, maize and barley are reported to be the principal crops which are grown on more than 81% of the total cultivated area, as indicated below :—

	Area irrigated by					Total cultivated area under all crops	Area under principal crops					Area under other crops	Area under double crops	Best cultivated region of tehsil	
	Govt. canals	Private canals	Wells	Other sources	Total		Wheat	Rice	Bajra	Maize	Barley	Other food grains including Pulses, Millets etc.		Name	Area
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16
Area in acres	17,928	6,880	9	..	24,817	96,308	33,763	19,032	11,998	10,673	2,679	18,163	23	Maidani Illaqa	44,618
Area in square miles ..	28.0	10.8	N	..	38.8	150.5	52.8	29.7	18.7	16.7	4.2	28.4	N		69.7

It is apparent that about 26% of the cultivated area is irrigated by Government or private canals and wells etc. Further, the size of the area under double crops is extremely small and is limited to 23 acres only.

Permanent pastures and other grazing lands measure 320 acres or 0.5 square miles only. These cater 137,876 heads of cattle.

Livestock

The livestock figures of the tehsil are available for 1956 and 1961 only. These are given below :—

	Cattle	Buffaloes	Sheep	Goats	Horses & Ponies	Mules	Donkeys	Camels	Pigs	Total
1956	78,371	24,156	7,648	50,080	2,609	368	325	259	74	163,890
1961	78,581	28,408	2,355	25,658	2,089	206	286	230	53	137,876

The statement indicates that the livestock wealth of the tehsil has been reduced by over 26,000 or 16% during the quinquennium 1956-1961. The fall is mainly reflected in goats and sheep and to a small extent in horses, mules, donkeys, etc. As already explained earlier, the 1961 Census was taken at a time when the nomads and others who own sheep and goats had migrated to higher altitudes due to non-availability of grazing areas in the tehsil.

The sub-joined statement gives the distribution of livestock per 1,000 population of the tehsil in 1961 :—

Cattle	Buffaloes	Sheep	Goats	Horses & Ponies	Others
337	122	10	110	9	3

Community Development

Of the seven Community Development blocks in the district, 2 have been set up in Jammu tehsil, one in village Nowabad and the other in Dansal. The data supplied by the Directorate of Community Development shows that the total area sown during the year 1958-59 stood at 100,759 acres or 157 sq. miles. Improved seeds weighing 103.75 maunds are said to have been distributed during the year. The total area which was cultivated according to improved method stood at 45,426 acres or 71 sq. miles. With a view to extending this area and producing better seeds, 182 seed multiplication farms have so far been set up in the tehsil. In addition, fertilizers and manures consisting mainly of ammonium sulphate were also distributed to the extent of 10,989.25 maunds approximately bringing the area under chemical fertilization to 9,989 acres or 16 sq. miles.

The area under fruit trees is reported to be 4,038 acres or 6 sq. miles. During the year 1958-59, 2,000 fruit and 6,000 other trees are said to have been planted.

Only one new well has been constructed during the above year besides 8 others having been renovated.

There are 44 panchayats in the tehsil with a total membership of 460. In 1958-59, as many as 685 cases were instituted in the panchayats and of these 560 were decided.

Communication

The total mileage of the roads connecting the various parts of the tehsil stands at 84 miles of which 79 miles are surfaced and 5 miles consist of fair-weather roads. This gives a linear road mileage of 0.36 per 1,000 population. The proportion of road mileage in the tehsil to the total mileage of the district works out to 40.9%

The names of the roads and the lenght of each are given in the statement appended to the Report.

Electricity

Besides the urban areas consisting of the city and cantonment, 26 villages or 8.5% villages of the tehsil have also been electrified. The total number of villages in the district as a whole which have been provided with electric power being only 41, it is clear that 63.4% of these belong to Jammu tehsil only.

Employment

Unemployment is more pronounced in this tehsil than in the State as a whole. Non-workers constitute 68% of the total population of the tehsil as against 57%, the corresponding percentage of the State. Over 40% workers are employed as cultivators and agricultural labourers. The remaining 60% or so consist of those engaged in :—

1.	mining, quarrying, livestock, etc. ...	2%
2.	household industry ...	2%
3.	manufacturing other than household industry ...	6%
4.	construction ...	2%
5.	trade and commerce ...	8%
6.	transport, storage and communications	4%
7.	other services ...	36%

Occupational Classification

As in the case of district as a whole, majority of the working rural population consists of craftsmen. The number of persons holding administrative, executive and managerial assignments or those engaged as farmers, fishermen or in sports and recreation though not as large compare favourably with other occupations.

Industries

Important among the industries found in the tehsil are :—

		No. of Establishments
1.	Garment making ...	369
2.	Manufacturing of sundry hardware, such as bolts, wirenets, etc. ...	329
3.	Making of sweetmeats and condiments ...	297
4.	Manufacturing and repairing of leather shoes and other leather goods	284
5.	Production of rice, atta, flour by milling, etc. ...	270
6.	Manufacture of jewellery, silverware, etc. ...	262
7.	Repairing and servicing of motor vehicles ...	212
8.	Wooden furniture and fixtures ...	87
9.	Bakery products ...	66
10.	Manufacture of brass and bell metal products ...	63
11.	Repairing of bicycles ...	62
12.	Soap manufacturing	58
13.	Repairing of watches and clocks	52
14.	Manufacture of medicines ...	44
15.	Manufacture of copper utensils ...	39
16.	Repairing of radios ...	35
17.	Binding industry ...	34
18.	Sawing and planing of wood ...	29
19.	Cotton ginning ...	24
20.	Making of indigenous sugar ...	19
21.	Cotton cloth weaving on handlooms and powerlooms ...	19
22.	Production of ice ...	19
23.	Printing and publishing of news papers and books ...	14
24.	Manufacture of armaments ...	13
25.	Dyeing and bleaching of cotton cloth ...	10
26.	Manufacture of hosiery and other knitted fabrics	10
27.	Brick manufacture ...	7
28.	Manufacture of umbrellas ...	6
29.	Manufacture of packing cases ...	4
30.	Manufacture of rubber goods for industrial purposes ...	2

Scheduled Castes

The tehsil claims a total scheduled caste population of 57,420 of which 47,703 has been returned from the rural and 9,717 from the urban sectors. The sex-wise distribution of the population stands at 30,342 males and 27,078 females giving a sex-ratio of 892 per 1,000 males.

It is clear from the above that scheduled castes claim 25% of the entire population of the tehsil and 38% of the total scheduled caste population of the district. The corresponding proportions in the rural and urban sectors stand as under :—

Percentage of scheduled castes to tehsil population		Percentage of scheduled castes of the tehsil to the total scheduled caste population of the district	
Rural	Urban	Rural	Urban
38	9	35	64

Literacy—The incidence of literacy particularly in the rural sector is extremely low and does not exceed 4%. In Jammu city, however, the corresponding percentage is 15% approximately.

The sub-joined statement gives the proportion of literate persons by sex in the rural sector of Jammu tehsil and in Jammu city :—

	Percentage of literacy	
	Males	Females
Jammu Tehsil (Rural)	7.0%	0.5%
Jammu City	23.0%	5.0%

Of the total number of 1,778 literate males in the rural sector of the tehsil, only 201 and 30 have passed (i) primary or basic examination and (ii) matriculation and higher examinations respectively, all others being without any educational qualifications. Among the 113 literate females in the rural areas, 106 are without any qualification and only 7 have passed the primary school examinations.

In Jammu city, the position is not as depressing. Out of 1,103 literate males, 205 have passed primary and 101 matriculation and higher examinations. In so far as females are concerned, there are 28 primary passed and 2 with matriculation and above in a total literate population of 213.

Industrial Classification—Of the total rural scheduled caste population, 16,793 persons are workers giving the percentage of non-workers at 65% as against 56% and 67% of the rural sectors of the State and district respectively.

The proportion of female workers is however very small being approximately one to six as compared with males.

Male workers are mostly engaged in cultivation and in other services. Agricultural labour is the next important sector in which over 900 persons of both sexes are absorbed. Household industry, mining, quarrying, etc., manufacturing other than houschold industry and construction provide employment to a much lesser number of persons. The number of people engaged in trade and commerce and in transport is exceedingly small.

Land Revenue

Figures of Land Revenue realisation for the period of 10 years preceding the Census of 1961 have been appended to the Report. These show that the demand has gone up from Rs. 191,524 in 1951-52 to Rs. 232,393 in 1960-61. The actual receipts against these demands stood at Rs. 139,251 and Rs. 165,654 respectively. As in the case of district, no less than Rs. 52,073 out of the total balance of Rs. 52,273 in 1951-52 represented irrecoverable arrears. These have swollen to Rs. 171,689 in 1957-58 when presumably due to a part of the arrears being written off, the irrecoverable balance was reduced to Rs. 109,903. Similarly, the irrecoverable balance of Rs. 110,841 of 1959-60 shrank to Rs. 61,491 in the following year.

The figures of demand and recoveries for the period prior to 1948, when land reforms were introduced, are not available.

Fortnightly Wholesale Prices

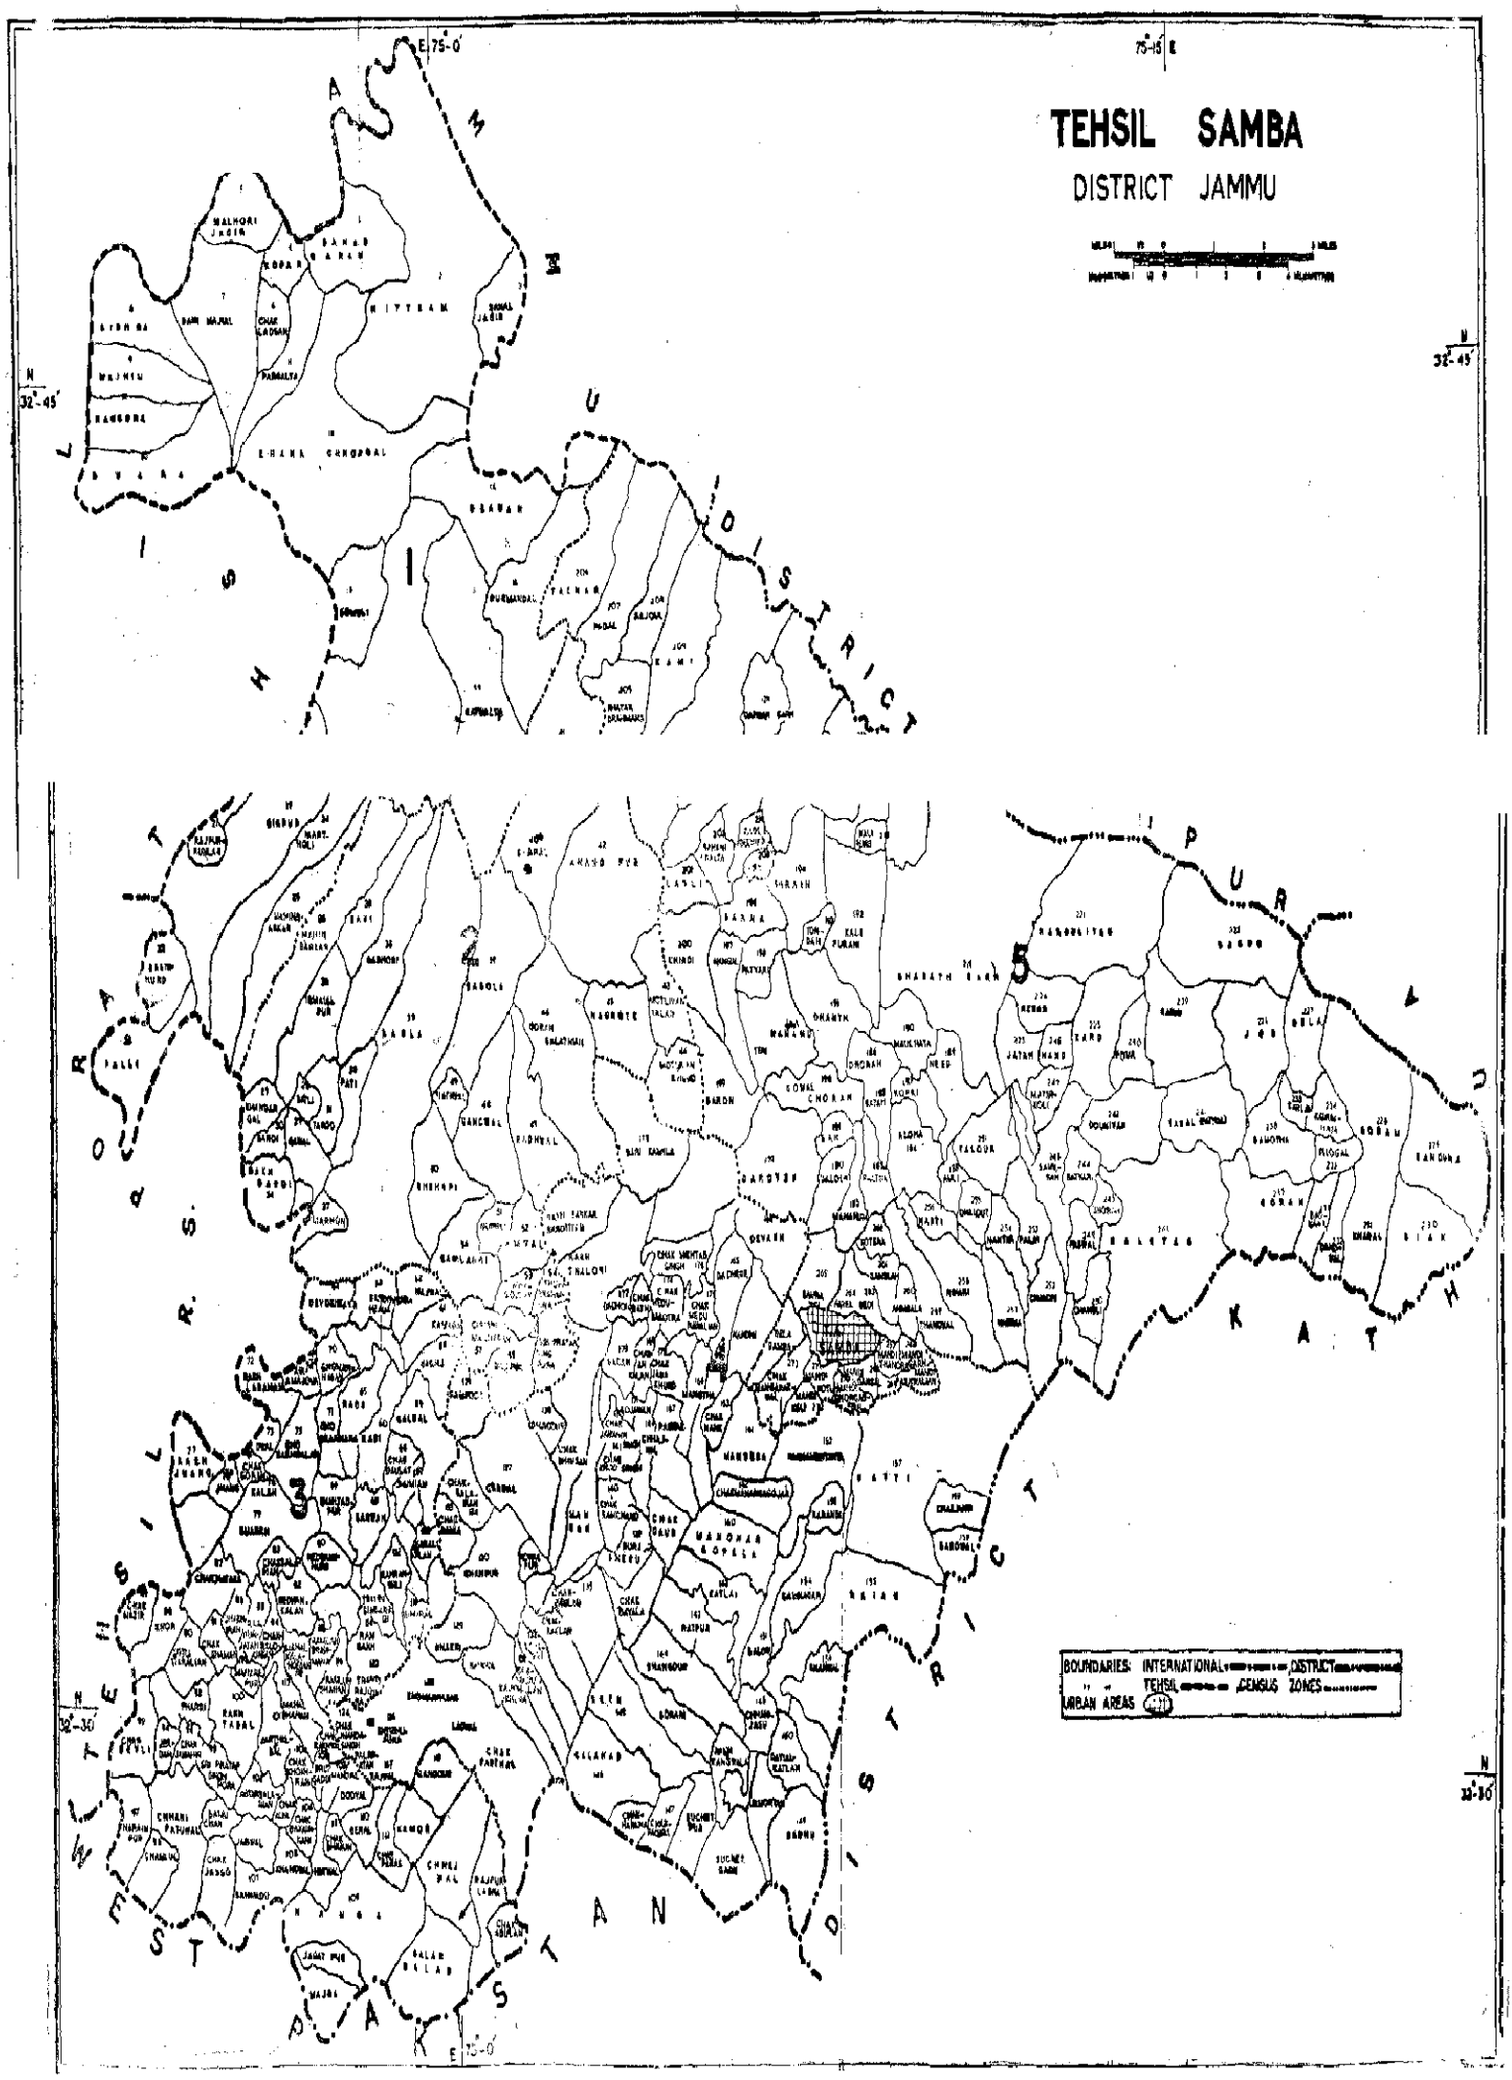

Wheat—The wholesale price of wheat has generally been fluctuating from Rs. 14/- to Rs. 23/- per maund during the seven years preceding 1961. There has been invariably an upward trend in these rates during the month of March when the old stocks are about to exhaust and new crops have yet to be harvested. The tendency of inflation in prices is however curbed by the Government who make imported wheat available to the public.

Rice—There has been no fluctuation in the price of rice during the 2 years, 1959 and 1960, when it was sold at Rs. 16/- per maund. This is apparently the price at which sales are made by the Government from their own stocks of locally precured and imported rice and not the market rates. Prior to 1959, however, the rates have been fluctuating and have soared very high during August 1957 to September 1958. In August,

1958, rice was being sold at Rs. 42/- per maund as against only Rs. 21/- at which sales were effected only two months after.

Maize—Normally, maize is available at Rs. 13/- per maund but there have been occasions when its price has gone up beyond all expectation. In March 1958, it was sold at Rs. 25/- per maund but the rate fell to Rs. 13.50 only in the following month.

Bajra—The sale rate of bajra has registered a progressive increase since 1958. It was sold at Rs. 10/- per maund only during the months of January and February of 1956 and 1957 against Rs 13/- to Rs. 16/-, the corresponding rates of the following years. This is presumably because the yield rate per acre has declined by about 50% from 1955-56 onwards.

BOUNDARIES: INTERNATIONAL
DISTRICT
TEHSIL
CENSUS ZONES
URBAN AREAS

The sex-ratio in the urban areas has shrunk from 914 in 1931 to 899 in 1961. This seems to be due to the fact that some of the Government servants, shop-keepers and others working in Samba town are not accompanied by their families due to shortage of accommodation. In any case, the sex-ratio compares favourably with the corresponding proportions of the district and its rural and urban sectors.

Education

There are altogether 87 Government owned and aided educational institutions of different grades in the tehsil consisting of 65 which are ear-marked for boys and 22 for girls. According to the information supplied by the State Education Department, the number of students borne on the rolls of all the schools stands at 8,518. Of these, 1,132 students attend the urban schools and all others belong to schools in the rural areas. The latter consists of 6,107 boys and 1,279 girls. According to the Census figures, however, the total number of students in the rural areas stands at 5,638 only. As the information supplied by the Education Department was received late in 1961, it is possible that the difference of 1,748 may be due to new admissions made in 1961.

Below are given the numbers of schools of different grades set up in the rural sector :—

	Boys	Girls
Total	64	21
High Schools	6	...
Middle Schools	3	2
Central Schools	4	2
Primary/Basic Activity Schools	51	17

The population of males and females in the age-group 5-19 inhabiting the rural areas stands at 14,025 and 12,691 respectively. This means that the percentages of boys and girls of this age-group who attend schools stand at 43.5 and 10.1 respectively.

There are only two schools in Samba town, one for boys and the other for girls. The former is a higher secondary school with primary and middle classes attached to it. The latter consists of 10 classes and prepares girls for primary, middle and matriculation examinations.

Taking both the rural and urban sectors together, the number of boys and girls attending schools of different grades stands as under :—

	No. of schools	Boys	Girls	Total
Higher Secondary Schools (Boys)	1	513	...	513
High Schools (Boys)	6	2,378	...	2,378
High Schools (Girls)	1	...	619	619
Lower High/Middle/Central Schools (Boys)	7	982	...	982
Lower High/Middle/Central Schools (Girls)	4	...	475	475
Primary/Basic Activity Schools (Boys)	51	2,747	...	2,747
Primary/Basic Activity Schools (Girls)	17	...	804	804
Total	87	6,620	1,898	8518

Literacy

Samba occupies 4th position among the tehsils of the State so far as literacy percentage is concerned. The only other tehsils which claim higher percentages are Jammu, Srinagar and Hiranagar. The rural literacy of the tehsil is however still higher ranking only next after Hiranagar and Jammu. Even so far as urban areas are concerned, the town of Samba holds 8th position.

The fact however remains that according to the information collected at the Census, only 13% people of the tehsil as a whole are literate. The sub-joined statement gives the literacy percentage by sex separately for the tehsil and its rural and urban areas :—

	Percentage of literates to total population		
	Persons	Males	Females
Total ...	13%	21%	5%
Rural ...	12%	19%	4%
Urban ...	36%	47%	23%

Medical Institutions

There are 13 Government medical institutions in the tehsil besides those run by private practitioners. Of these, 6 are allopathic and 7 ayurvedic (including one land reclamation unit). The former includes 1 primary health centre set up in Samba town, which is, according to the information supplied by the planning Department,

equipped with 10 beds. These have not been included in the number of beds in the district as a whole mentioned in the previous chapter as the figures of the Planning Department could not be reconciled with those intimated by the Medical Department.

The remaining 12 dispensaries are situated in the rural areas and cater on an average 6,221 persons as against 4,361, the corresponding average for the town of Samba.

The number of persons treated in the institutions as in-patients, out-patients, etc. during the year 1960-61 is given below :—

	Allopathic dispensaries	Ayurvedic dispensaries	Total
Out-patients ...	68,447	38,306	106,753
In-patients ...	739	...	739
Major Operations	...	...	...
Minor Operations	1,762	97	1,859

Following are the details of the staff employed :—

Doctors	...	1
Midwives	...	2
Dais	...	6
Dawasaz	...	6
Compounders	...	7
Hikims and Vaids	...	5
Vaccinators	...	4

Water Supply

There are 8 tube-wells in the tehsil, of which one has been sunk in Samba town. The other seven have been built at the following places in the rural areas and feed 14 villages in all as indicated in the Village Directory appended to the Report :—

1. Gorah Salathian
2. Sangwal
3. Raya
4. Daghor
5. Sochani
6. Ismailpur
7. Birpur

Other villages depend on ponds, tanks and nallahs.

Religion

The community-wise population of the tehsil as a whole and of Samba town are not available. Tha following table gives the population of each community in the rural sector of the tehsil during 1961 and 1941 together with variation in each case :—

	1961	1941	Variation	Percentage Variation
Christians ...	66	55	+11	+20%
Hindus ...	63,371	49,574	+13,797	+27.8%
Jains ...	394	...	+394	...
Muslims ...	7,469	34,637	—27,168	—78.4%
Sikhs ...	3,355	1,911	+1,444	+75.6%
Religion not known ...	2	...	+2	
Total ...	74,657	86,177		

A comparison of the total rural population of 1961 and 1941 shows that there has been a decrease of 11,530 persons or 13.4%. This is because unlike tehsil Jammu, there have not been any large scale immigrations in Samba. The growth rate of Hindus, though high, is not abnormal. So far as Sikhs are concerned, however, the 1961 population includes a large number of displaced persons and immigrants. The fall in Muslim population is due to mass migrations to Pakistan.

Crops

According to the information made available by the Directorate of Statistical Bureau of the State Government, the tehsil extends to an area of 322.9 sq. miles or 206,644 acres. The net area sown, as estimated in 1960-61, has been placed at 84.8 sq. miles (54,258 acres) or 26.3% of the total area. The following statement indicates the classification of the land :—

Area and percentage	Area according to village papers	Area under forests	Land put to non-agricultural uses	Barren and uncultivable land	Permanent pastures and other grazing lands	Land under misc. tree crops	Culturable waste	Fallow land other than current fallows	Current fallows	Net area sown
1	2	3	4	5	6	7	8	9	10	11
Area in acres	206,644	26,048	18,844	68,292	782	319	23,700	1,555	12,846	54,258
Area in sq. miles ..	322.9	40.7	29.5	106.7	1.2	0.5	37.0	2.4	20.1	84.8
Percentage of total area ..	100	12.6	9.1	33.0	0.4	0.2	11.5	0.7	6.2	26.3

Enquiries made from the Tehsildar concerned have, however, disclosed that the total cultivated area under all crops stands at 70,820 acres or 110.7 sq. miles. Wheat, bajra, rice, maize and barley are reported to be the principal crops which are grown on 76% of the total cultivated area, as indicated below :—

	Area irrigated by					Total cultivated area under all crops	Area under principal crops					Area under other crops	Area under double crops	Best cultivated region of tehsil	
	Govt. canals	Private canals	Wells	Other sources	Total		Wheat	Bajra	Rice	Maize	Barley	Other food grains including pulses, Millets etc.		Name	Area
	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Area in acres	708	11	153	..	872	70,820	28,959	9,981	6,203	6,131	2,535	17,011	18,562	Ramgarh Salhar	16,793
Area in sq. miles ..	1.1	N	0.3	..	1.4	110.7	45.2	15.6	9.7	9.6	4.0	26.6	29.0		26.2

The above statistics indicate that the size of cultivated area irrigated by Government and private canals and wells etc. is exceedingly small and does not exceed 1.2% as against 26% the corresponding proportion in Jammu tehsil. The area under double crops in Samba is, however, by far larger and is estimated at 18,562 acres.

Permanent pastures and other grazing lands measure 782 acres or 1.2 sq. miles only. These cater 106,809 heads of cattle.

Livestock

Following are the livestock figures as returned at the Censuses held in 1956 and 1961 :—

Year	Cattle	Buffaloes	Sheep	Goats	Horses and ponies	Mules	Donkeys	Camels	Pigs	Total
1956	51,492	14,984	1,431	43,252	928	68	351	237	24	112,767
1961	60,138	18,263	1,808	24,931	769	96	346	455	3	106,809

As in the case of tehsil Jammu, the statement shows that the livestock wealth of the tehsil has shrunk by about 6,000 during the quinquennium 1956-61. In this tehsil, also, the drop is mainly reflected in goats which had moved to higher altitudes in 1961 when the census was taken. There has, however, been an appreciable increase in the number of cattle due to which the overall decrease is not so pronounced as in Jammu.

Following is the distribution of livestock per 1,000 population of the tehsil :—

Cattle	Buffaloes	Sheep	Goats	Horses & ponies	Others
761	231	23	316	10	11

Community Development

There is only one Community Development Block in the tehsil, headquartered in village Vijaypur.

According to the information made available by the Community Development Department an area of 28,112 acres or 44 sq. miles was sown during the year 1958-59. During the same period a quantity of 3,226 maunds of improved seeds is also said to have been distributed.

Improved methods of cultivation were employed in an area of 4,213 acres or 7 sq. miles. It is hoped that in course of time, the extent of this area will be enlarged when sufficient quantities of improved seeds would be made available from the newly established 91 seed multiplication farms.

Ammonium sulphate weighing 4,728 mds. 8 seers is also said to have been distributed during the year 1958-59.

The Department has taken up 90 holdings for demonstration. This measure is likely to prompt the people to take to the new methods of cultivation and to improve the yield rate thereby.

Besides 933 compost pits, the Department has also built 24 wells for supply of drinking water. The number of wells renovated stands at 14.

Village roads measuring 68 furlongs have also been constructed. This is in addition to 92 furlongs of old roads which have been improved.

The areas under fruit and other trees stand at 62.5 and 82 acres respectively. The Department has planted 933 fruit and 37,821 other trees in the two areas.

There are 25 panchayats in the block with a total membership of 275. The number of cases instituted was 249 and of these 233 were decided.

Communication

The tehsil claims a total road length of 39 miles of which 25 miles are surfaced and the remaining 14 miles consist of fair-weather roads. The linear road mileage per 1,000 population thus works out to 0.49%. In the district as a whole, the tehsil claims 19% road mileage which seems to be commensurate with its size.

Details of the roads and the length of each will be found at the end of the Report.

Electricity

Samba Tehsil is situated on the National Highway and the electric transmission lines built from Jogindernagar power station at Pathankot to Jammu pass through the tehsil. This should have facilitated the electrification of a large number of rural areas of the tehsil. According to the information supplied by the Electric Department, however, only 6 villages or 2% of the total number of villages of the tehsil have, besides Samba town, been electrified so far. The electrified villages of the tehsil thus comprise only 14.6% of the total number of villages in the district which have been supplied with electricity.

Employment

The incidence of non-workers in the tehsil as a whole and its urban sector is more pronounced than in tehsil Jammu. The proportion of workers who cultivate land or work as agricultural labourers to the total working population is about 74%. The remaining 26% are engaged in :—

1.	Mining, quarrying, etc.	2%
2.	Household Industry	3%
3.	Manufacturing other than household Industry	1%
4.	Construction	1%
5.	Trade and commerce	3%
6.	Transport, storage and communications	1%
7.	Other services	15%

Occupational Classification

In this tehsil also, majority of the workers comprise craftsmen. The next important category consists of those who are employed in administrative, executive and managerial assignments. Other occupations account for smaller number of persons.

Industries

Following are the important industries in the tehsil :—

	No. of establishments
1. Cotton cloth weaving on handlooms	165
2. Manufacture of agricultural implements	97
3. Production of rice, atta, flour, etc. by milling, dehusking and processing of food grains	81
4. Making of leather boots, shoes, chappals, etc.	60
5. Making of earthen-ware, such as, pottery, etc.	59
6. Oil pressing ghani kolhu or by small machines	38
7. Repair of leather footwear	30
8. Weaving of woollen cloth on handlooms	25
9. Goldsmithy and jewellery	23

10. Tailoring work	22
11. Making of rope, mats, boxes, hand-fans and umbrellas from palm leaves and moong grass	19
12. Manufacture of wooden furniture and fixtures	14
13. Making of sweet-meats	10
14. Production of indigenous sugar, gur, from sugar-cane, etc.	5
15. Repair of cycle and rickshaw parts	5
16. Production of dairy products, such as, ghee, butter, cheese, etc.	4
17. Manufacture of structural wooden goods	4
18. Repairing and servicing of watches and clocks	2
19. Cotton ginning, cleaning and pressing etc.	1
20. Manufacture and repairing of musical instruments	1
21. Making of lac, bangles, buttons, garlands, etc.	1

Scheduled Castes

Population— The tehsil is inhabited among others by 27,587 persons of scheduled castes of whom 16,005 are males and 11,582 females. Except for 783 persons, enumerated in Samba town, all others belong to the rural areas. Following is the sex-wise break-up in the two sectors :—

	Males	*Females*
Rural	15,601	11,203
Urban	404	379

It is evident that the sex-ratio is very low in the tehsil as a whole and stands at 724 per 1,000 males. This is also true of the rural areas but in the urban sector, the corresponding ratio stands at 938. The low proportion of rural females seems to be due to the inadequacy of medical facilities.

The scheduled caste population of tehsil Samba constitutes 18% of the total scheduled caste population in the district and 35% of the total tehsil population. Following are the corresponding proportions in the rural and urban sectors :—

Percentage of Scheduled Castes to		Percentage of Scheduled Castes of the tehsil to the total Scheduled Caste population of the district	
Rural population of tehsil	Urban population of tehsil	Rural	Urban
36	18	20	5

Literacy – Literacy figures are available for the rural sector of the tehsil only. These show that of the total population of 26,804, only 1,603 or 6% are literate. The corresponding literacy percentages of males and females stand at 10% and 0.5% respectively.

Among the literate persons 1,386 or 86% consist of those who do not possess any educational qualifications. Of the remaining 217, 159 have passed primary or junior basic and 58 matriculation and higher examinations. These include 4 females who have passed primary or junior basic examination and 1 female with matriculation and above as her qualification.

Industrial classification — The working population of scheduled castes in the rural sector consists of 8,469 persons (7,365 males and 1,104 females) or 32% of the total scheduled caste population. The corresponding percentages for males and females stand at 47% and 10% respectively.

Male workers are mostly engaged in cultivation and to some extent in other services. Agricultural labour provides employment to only 264 persons and household industry to 318. The former includes 17 and the latter 102 females. The number of persons engaged in mining and quarrying also stands at 123 including 20 females. Other categories do not claim large number of workers.

Land Revenue

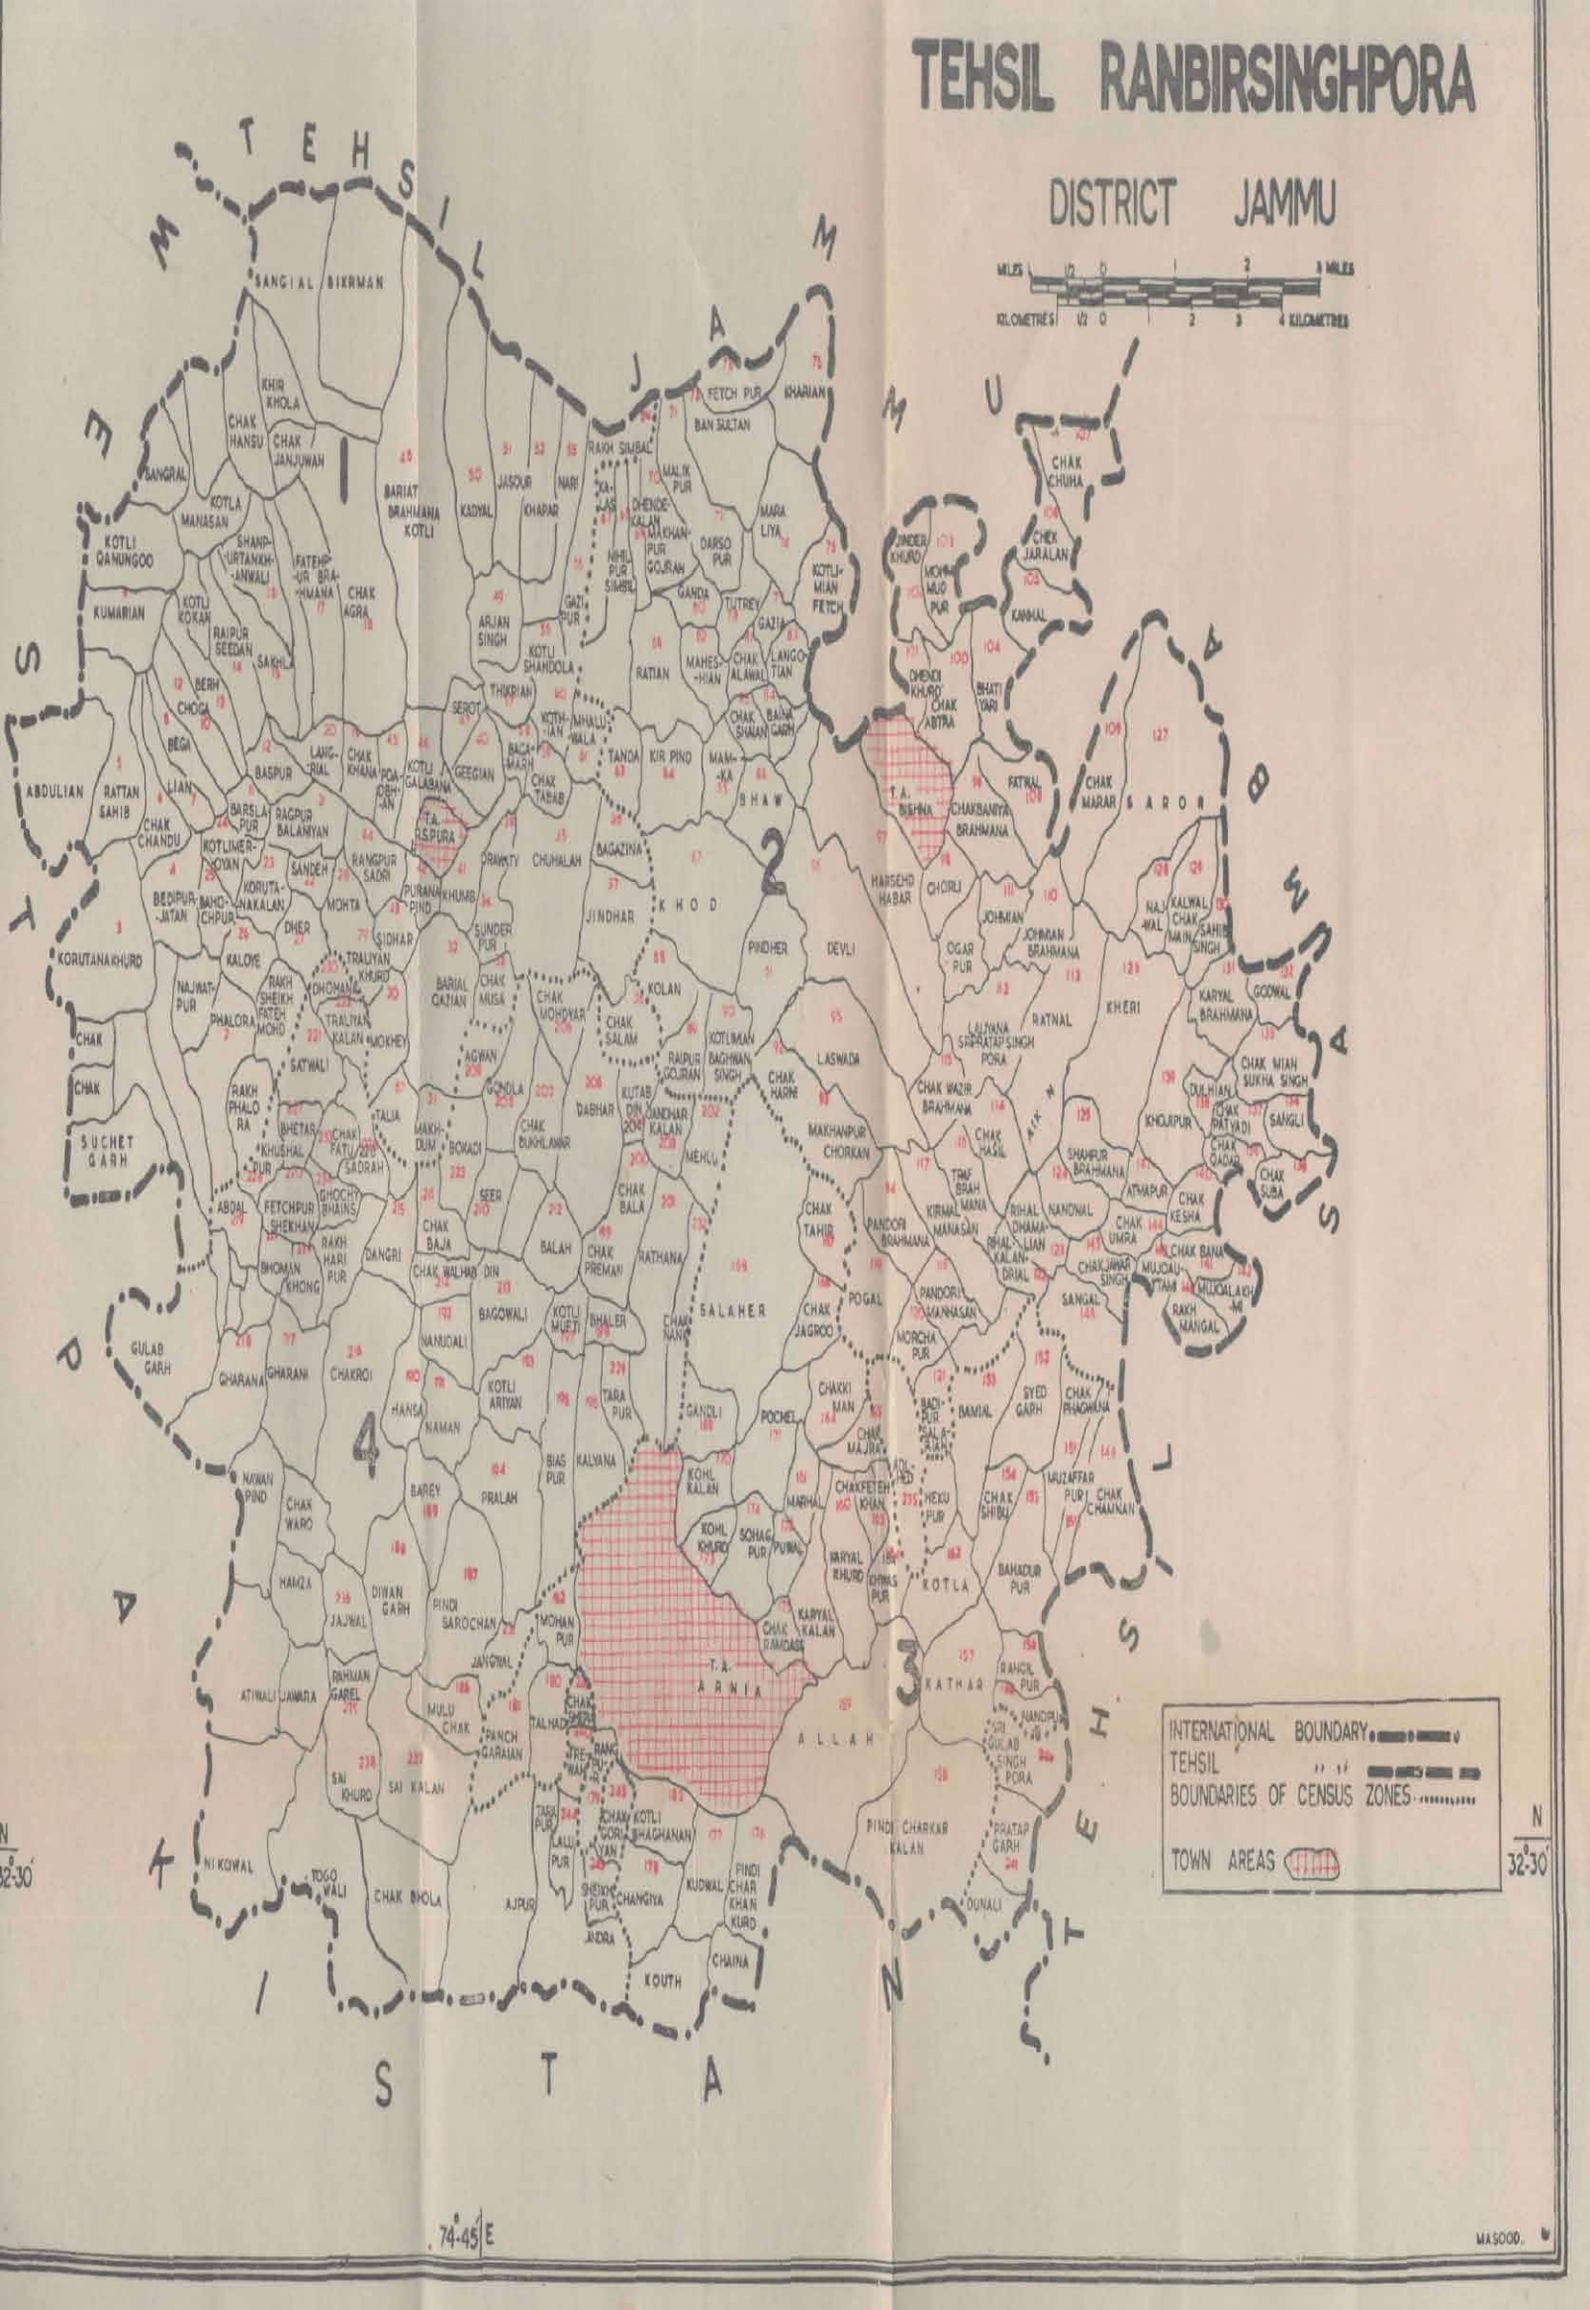

The statement of Land Revenue figures appended to the Report shows that there has not been any material improvement in the Land Revenue demand which stood at Rs. 122,933.53 in 1951 as against Rs. 125,338.29 in 1960. Large balances have been shown against the demands of each year but information indicating how much of these balances is irrecoverable against each year's demand has not been made available. The tehsildar has, however, stated that the total recoverable balance for the period 1951-60 stood at Rs. 36,325.28 and that the irrecoverable balance was estimated at Rs. 504,685.

Fortnightly wholesale prices

The fortnightly wholesale prices are available for the period of 3 years from 1958 to 1960 only. These show that the prices of all the food-crops had gone-up during the months of January, February, March, 1959 after which the inflation in prices was arrested with the help of the new harvests. During 1960, however, the increase in the price of rice which shot up from Rs 27.50 to Rs. 31 per maund was stabilized and continued upto the end of the year. Even in the case of wheat, there was a slight inflation and the price obtaining from August to December, 1960 stood at Rs. 17/- as against the previous rate of Rs 16.50 per maund in July 1960. Maize and bajra have not registered any appreciable increase, the corresponding rates in September 1958 being Rs. 14.50 as against Rs. 15/- per maund in December, 1960.

TEHSIL RANBIRSINGHPORA

DISTRICT JAMMU

The sex-ratio in the urban areas has shrunk from 914 in 1931 to 899 in 1961. This seems to be due to the fact that some of the Government servants, shop-keepers and others working in Samba town are not accompanied by their families due to shortage of accommodation. In any case, the sex-ratio compares favourably with the corresponding proportions of the district and its rural and urban sectors.

Education

There are altogether 87 Government owned and aided educational institutions of different grades in the tehsil consisting of 65 which are ear-marked for boys and 22 for girls. According to the information supplied by the State Education Department, the number of students borne on the rolls of all the schools stands at 8,518. Of these, 1,132 students attend the urban schools and all others belong to schools in the rural areas. The latter consists of 6,107 boys and 1,279 girls. According to the Census figures, however, the total number of students in the rural areas stands at 5,638 only. As the information supplied by the Education Department was received late in 1961, it is possible that the difference of 1,748 may be due to new admissions made in 1961.

Below are given the numbers of schools of different grades set up in the rural sector :—

	Boys	Girls
Total	64	21
High Schools	6	...
Middle Schools	3	2
Central Schools	4	2
Primary/Basic Activity Schools	51	17

The population of males and females in the age-group 5-19 inhabiting the rural areas stands at 14,025 and 12,691 respectively. This means that the percentages of boys and girls of this age-group who attend schools stand at 43.5 and 10.1 respectively.

There are only two schools in Samba town, one for boys and the other for girls. The former is a higher secondary school with primary and middle classes attached to it. The latter consists of 10 classes and prepares girls for primary, middle and matriculation examinations.

Taking both the rural and urban sectors together, the number of boys and girls attending schools of different grades stands as under :—

	No. of schools	Boys	Girls	Total
Higher Secondary Schools (Boys)	1	513	...	513
High Schools (Boys)	6	2,378	...	2,378
High Schools (Girls)	1	...	619	619
Lower High/Middle/Central Schools (Boys)	7	982	...	982
Lower High/Middle/Central Schools (Girls)	4	...	475	475
Primary/Basic Activity Schools (Boys)	51	2,747	...	2,747
Primary/Basic Activity Schools (Girls)	17	...	804	804
Total	87	6,620	1,898	8518

Literacy

Samba occupies 4th position among the tehsils of the State so far as literacy percentage is concerned. The only other tehsils which claim higher percentages are Jammu, Srinagar and Hiranagar. The rural literacy of the tehsil is however still higher ranking only next after Hiranagar and Jammu. Even so far as urban areas are concerned, the town of Samba holds 8th position.

The fact however remains that according to the information collected at the Census, only 13% people of the tehsil as a whole are literate. The sub-joined statement gives the literacy percentage by sex separately for the tehsil and its rural and urban areas :—

	Percentage of literates to total population		
	Persons	Males	Females
Total ...	13%	21%	5%
Rural ...	12%	19%	4%
Urban ...	36%	47%	23%

Medical Institutions

There are 13 Government medical institutions in the tehsil besides those run by private practitioners. Of these, 6 are allopathic and 7 ayurvedic (including one land reclamation unit). The former includes 1 primary health centre set up in Samba town, which is, according to the information supplied by the planning Department,

equipped with 10 beds. These have not been included in the number of beds in the district as a whole mentioned in the previous chapter as the figures of the Planning Department could not be reconciled with those intimated by the Medical Department.

The remaining 12 dispensaries are situated in the rural areas and cater on an average 6,221 persons as against 4,361, the corresponding average for the town of Samba.

The number of persons treated in the institutions as in-patients, out-patients, etc. during the year 1960-61 is given below :—

	Allopathic dispensaries	Ayurvedic dispensaries	Total
Out-patients ...	68,447	38,306	106,753
In-patients ...	739	...	739
Major Operations	...	...	...
Minor Operations	1,762	97	1,859

Following are the details of the staff employed :—

Doctors	...	1
Midwives	...	2
Dais	...	6
Dawasaz	...	6
Compounders	...	7
Hikims and Vaids	...	5
Vaccinators	...	4

Water Supply

There are 8 tube-wells in the tehsil, of which one has been sunk in Samba town. The other seven have been built at the following places in the rural areas and feed 14 villages in all as indicated in the Village Directory appended to the Report :—

1. Gorah Salathian
2. Sangwal
3. Raya
4. Daghor
5. Sochani
6. Ismailpur
7. Birpur

Other villages depend on ponds, tanks and nallahs.

Religion

The community-wise population of the tehsil as a whole and of Samba town are not available. Tha following table gives the population of each community in the rural sector of the tehsil during 1961 and 1941 together with variation in each case :—

	1961	1941	Variation	Percentage Variation
Christians ...	66	55	+11	+20%
Hindus ...	63,371	49,574	+13,797	+27.8%
Jains ...	394	...	+394	...
Muslims ...	7,469	34,637	—27,168	—78.4%
Sikhs ...	3,355	1,911	+1,444	+75.6%
Religion not known ...	2	...	+2	
Total ...	74,657	86,177		

A comparison of the total rural population of 1961 and 1941 shows that there has been a decrease of 11,530 persons or 13.4%. This is because unlike tehsil Jammu, there have not been any large scale immigrations in Samba. The growth rate of Hindus, though high, is not abnormal. So far as Sikhs are concerned, however, the 1961 population includes a large number of displaced persons and immigrants. The fall in Muslim population is due to mass migrations to Pakistan.

Crops

According to the information made available by the Directorate of Statistical Bureau of the State Government, the tehsil extends to an area of 322.9 sq. miles or 206,644 acres. The net area sown, as estimated in 1960-61, has been placed at 84.8 sq. miles (54,258 acres) or 26.3% of the total area. The following statement indicates the classification of the land :—

CHAPTER V

RANBIRSINGHPORA TEHSIL

Area

Like tehsil Samba, there has been no jurisdictional change in tehsil Ranbirsinghpora also during the period 1941-61. According to the Census Report of 1941, the area of the tehsil extended to 157 sq. miles. The Directorate of Map Publication, Dehra-dun have now intimated that the area as arrived at by planimetering stands at 157.6 sq. miles. According to the State Revenue Department, the area of the tehsil is 155.3 sq. miles.

Temperature & climate

The tehsil being situated at a height of 1000' above the sea-level, summers are very warm and winters mild. There is, however, no equipment anywhere in the tehsil to measure the temperature but as its height is lower than that of Jammu, the tehsil is warmer in summer.

The average rainfall of the tehsil is also the lowest among all the tehsils of the district being 904.01 mms. only. The maximum rainfall was recorded in 1955 at 1,319.28 mms. and the least in 1954 when it measured only 482.85 mms.

Villages & Towns

There are 240 inhabited and 6 uninhabited villages and 3 towns in the tehsil. These do not include 55 villages of the tehsil which have been completely de-populated after the tribal raids of 1947.

The tehsil has a total population of 107,438 persons of whom 96,119 belong to the rural and 11,319 to the urban areas. In other words, the population of the tehsil is distributed between the rural and urban sectors in the proportions of 90 to 10 approximately. The corresponding proportions of males and females stand at 89 to 11 in the case of males and 90 to 10 so far as females are concerned.

The largest sector of the population belongs to the villages in the population group 200-499. Those with a population of 1,000-1,999 rank next as indicated below : —

Less than 200	200-499	500-999	1,000-1,999
8%	37%	21%	34%

It is interesting to note that villages in the population group of less than 200, though numerically the next largest group, claim only 8% of the population as against 38%, the corresponding proportions of similar villages of tehsil Jammu. The following statement gives the percentages of the villages of each population group to the total number of villages in the tehsil :—

Less than 200	200-499	500-999	1,000-1,999
33%	44%	13%	10%

***Houses & Households**

There are 22,207 dwellings, shop-cum-dwellings and workshop-cum-dwellings in the tehsil, of which 19,708 belong to the rural and 2,499 to urban areas. The average number of persons per dwelling thus comes to 5.2, 5.2 and 5.3 in the tehsil and in its rural and urban sectors respectively.

The total number of occupied houses stands at 38,197. This gives an average of 3.0 persons per house. In the rural and urban sectors which claim 33,290 and 4,907 houses respectively, the corresponding averages stand at 3.1 and 2.7.

The housing statistics show that except for households living in dwellings with 4 rooms, all others are overcrowded. This will be clear from the following statement :—

	1 room		2 rooms		3 rooms		4 rooms		5 rooms and more	
	Average number of persons		Average number of persons		Average number of persons		Average number of persons		Average number of persons	
	Per household	Per room	Per household	Per room	Per household	Per room	Per household	Per room	Per household	Per room
	1	2	3	4	5	6	7	8	9	10
Rural	5.01	5.01	6.14	3.07	7.34	2.45	6.71	1.68	11.00	2.20
Urban	4.85	4.85	6.23	3.12	7.37	2.46	7.00	1.75	11.75	2.00

*Data relating to households, dwellings, size of accommodation etc. is based on Housing Survey conducted two or three months before the actual census. This data has been published in Volume VI, Part IV—Report on Housing and Establishment.

The congestion is accounted for by the huge influx of displaced persons who have been allotted evacuee lands in the tehsil. This is borne out by the fact that 80% households of the tehsil live in dwellings with one regular room only. The sub-joined statement shows the percentages of households classified by the number of rooms occupied by them :—

No regular room	1 regular room	2 rooms	3 rooms	4 rooms	5 rooms and more
3.0	80.0	13.6	2.8	0.5	0.1

The predominant material used in the construction of walls of rural dwellings is mud. These comprise 76.4% of the total number of dwellings in the rural sector. The next important material is burnt bricks which account for 23% dwellings. The number of houses with walls made of unburnt bricks and other materials is negligible.

In the urban sector also, houses with mud walls are in majority but their percentage does not exceed 52.4. Dwellings having walls made of burnt bricks comprise 43.6%. Others are mostly built of unburnt walls.

The predominant material of roof of about 97% dwellings is grass, leaves, bamboo, etc., both in the rural and urban sectors. Houses with roofs made of tiles and shingle comprise only 0.3% in the rural and 1.6% in the urban areas. The proportion of dwellings having roofs made of bricks and lime are however larger. In the rural areas, the dwellings of this category comprise 2.4% but in towns, the corresponding proportion stands at 1% only. There are no dwellings with roofs made of corrugated iron sheets in the urban areas, and even in the rural sector, the proportion of such houses does not exceed 0.1%.

Population & Density

The tehsil ranks 30th by area and 11th by population in the State but its density which stands at 682 per sq. mile is next highest ranking only after Srinagar. In the rural sector, however, the density of the tehsil which works out to 634 is the highest among all the tehsils of the State. So far as urban areas are concerned, the density is fairly low and does not exceed 1,938 per sq. mile, the same as that of Kishtwar and Anantnag.

Below are given the densities of the tehsil and its rural and urban areas in 1961 and 1941 :—

	1961			1941		
	Area in Sq. miles	Population	Density	Area in Sq. miles	Population	Density
Total	157.6	107,438	682	157.0	96,521	615
Rural	151.7	96,119	634	156.8	94,371	602
Urban	5.9 (5.84)	11,319	1,938	0.2 (0.19)	2,150	11,316

Sex Ratio

In 1911, the sex-ratios of the tehsil and of its rural and urban parts were very low, being 819,821 and 756 respectively. The sub-joined statement shows that there has been an appreciable growth in the female population during the last six decades :—

	Sex-ratio from 1901 to 1961						
	1901	1911	1921	1931	1941	1951	1961
Total	920	819	828	850	876	908	934
Rural	920	821	828	853	878	90	939
Urban	..	756	810	736	772	851	892

The 1961 sex-ratio of the tehsil compares favourably with the corresponding ratio of the district and the State which stand as under :—

	Total	Rural	Urban
District	886	915	801
State	878	884	844

Education

There are 95 educational institutions of different categories in the tehsil with an aggregate roll call of 13,308. Of these, 67 are meant for boys and 28 for girls. The former are attended by 10,536 and the latter by 2,772 students.

The data collected at the Census however shows that there were only 8,879 students attending the rural schools in 1961 as against 10,126 (8,294 boys and 1,832 girls), the number intimated by the Education Department. In this case also, it is possible that the Education Department figures include the new admissions made in 1961. At any rate, the population of males and females living in rural areas in the age-group 5-19 being 17,707 and 16,114, it follows that the percentage of boys and girls of these age-groups who attend schools stands at 46.8 and 11.4 respectively.

The following statement gives the number of boys and girls schools of different denominations together with the number of pupils borne on the rolls of each category :—

Sex	Colleges		Higher Secondary Schools		High Schools		Lower High/ Middle/Central Schools		Primary/Basic Activity Schools		Total	
	No. of institutions	No. of pupils	No. of institutions	No. of pupils	No. of institutions	No. of pupils	No. of institutions	No. of pupils	No. of institutions	No. of pupils	No. of institutions	No. of pupils
1	2	3	4	5	6	7	8	9	10	11	12	13
Boys ..	1	69	1	545	4	2,181	18	4,434	43	3,307	67	10,536
Girls ..	..	..	..	..	1	540	7	1,030	20	1,202	28	2,772

Literacy

The tehsil holds 5th position in the State on the basis of literacy which stands at 13.1%. The rural sector of the tehsil, however, ranks only 4th among other tehsils but the same cannot be said of the urban areas. Even as it is, the literacy percentage of 12.1% and 21.5% in the rural and urban areas respectively are by far higher than those of the State. Below are given the sex-wise literacy percentages for the tehsil as a whole and for its rural and urban sectors :—

Total			Rural			Urban		
P	M	F	P	M	F	P	M	F
13%	20%	5%	12%	19%	5%	22%	29%	13%

Medical Institutions

This tehsil does not seem to have been provided with medical institutions as liberally as Jammu and Samba. There are only 7 dispensaries of which 4 are functioning in the rural and 3 in urban areas. The former consists of 3 ayurvedic and 1 allopathic institutions. The other 3 are all allopathic dispensaries and have been set up in the towns of Bishna, Arnia and Ranbirsinghpora. It is thus clear that the average number of persons catered by the rural and urban medical institutions stand at 24,030 and 3,773 respectively.

The District Statistical Handbook produced by the State Planning Department shows that the allopathic dispensary at Ranbirsinghpora, also caters in-patients with a total capacity of 10 beds. The following statement gives the number of out-patients, in-patients and major and minor operations carried out by these institutions during the year 1960-61 :—

Out-patients	...	131,924
In-patients	..	153
Major Operations	...	8
Minor Operations	...	2,142

The out-patients include 60,918 persons treated by the ayurvedic dispensaries which are also said to have carried out 4 major and 1,050 minor operations. It is interesting to note that the total number of major and minor operations performed by the three urban allopathic dispensaries is almost the same as those of the 3 ayurvedic dispensaries.

The details of the staff employed in the various medical institutions except the one functioning in Bishna are given below :—

Doctors	...	2
Nurses	...	..
Midwife	...	1
Dais	...	3
Dawasaz	...	3
Health Visitor	...	1
Compounders	...	3
Hakims and Vaids	...	3
Vaccinator	...	1

Water Supply

There are no arrangements for supply of protected drinking water either to the urban or to the rural areas of the tehsil. This is the only tehsil in the district where not a single tube-well has been sunk so far. The people have, therefore, to depend on the water supplied by tanks, ponds, nallahs and canals both for domestic and other purposes.

Religion

The tehsil is inhabited by Hindus, Muslims, Sikhs and a few Christians, Jains and Budhists. The following statement gives the community-wise distribution of the rural population in 1961 and 1941 :—

		1961	1941
Buddhists	...	1	...
Hindus	...	77,202	45,252
Muslims	...	9,350	44,889
Sikhs	...	9,402	3,453
Christians, Jains and Others	...	164	777

The statement shows that there has been an abnormal increase in the population of Hindus and Sikhs during the inter-Census period. As in the other tehsils of the district, this increase is accounted for by the rehabilitation of displaced persons from other parts of the State, West Pakistan and various States in India. Similarly, the heavy fall in the Muslim population is due to the mass migration of Muslims to the other side of the international border. It my be remarked here that all the 55 de-populated villages of the tehsil were inhabited by Muslims only before the tribal raids of 1947.

There has been a heavy fall in the population of Christians, Jains and Others. As the figures of these communities are not separately available from the census data of 1941, it is not possible to identify the particular community in which this decrease is reflected.

Crops

According to the information made available by the Directorate of Statistical Bureau of the State Government, the tehsil extends to an area of 155.3 sq. miles or 99,371 acres. The net area sown, as estimated in 1960-61, has been placed at 93.2 sq. miles (59,654 acres) or 60% of the total area. The following statement indicates the classification of the land :—

Area and percentage	Area according to village papers	Area under forests	Land put to non-agricultural uses	Barren and uncultivable land	Permanent pastures and other grazing lands	Land under misc. tree crops	Culturable waste	Fallow land other than current fallows	Current fallows	Net area sown
1	2	3	4	5	6	7	8	9	10	11
Area in acres	99,371	..	11,536	1,448	..	1	3,522	828	22,382	59,654
Area in sq. miles	155.3	..	18.0	2.3	..	N	5.5	1.3	35.0	93.2
Percentage of total area	100	..	11.6	1.5	..	N	3.6	0.8	22.5	60.0

Enquiries made from the Tehsildar concerned have, however, disclosed that the total cultivated area under all crops stands at 108,500 acres or 169.5 sq. miles. Rice, wheat, maize, barley and bajra are reported to be the principal crops which are grown on more than 88% of the total cultivated area, as indicated below :—

	Area irrigated by					Total cultivated area under all crops	Area under principal crops					Area under other crops	Area under double crops	Best cultivated region of tehsil	
	Govt. canals	Private canals	Wells	Other sources	Total		Rice	Wheat	Maize	Barley	Bajra	Other food grains including Pulses, Millets, etc.		Name	Area
	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Area in acres	76,646	..	97	..	76,743	108,500	46,105	40,161	4,290	4,091	844	13,009	18,309	Chakla Nehari	84,607
Area in sq. miles	119.8	..	0.1	..	119.9	169.5	72.0	62.8	6.7	6.4	1.3	20.3	28.6		132.2

According to the above data about 71% of the total cultivated area of 108,500 acres is irrigated by Government canals and wells etc. There is no other tehsil in the State where artificial irrigation is employed for cultivation of such a huge area. Like tehsil Samba, the size of area under double crops in Ranbirsinghpora is also much larger than that of Jammu.

According to the Tehsildar, no area in the tehsil has been reserved for pastoral and grazing purposes.

Livestock

Unlike other tehsils of the district, the livestock wealth of the tehsil has registered an increase of more than 6,000 during the quinquennium 1956-61. This is because the fall in the number of goats at the time of livestock census which was taken after the Bakerwals had migrated to higher altitude

has been very small as indicated in the sub-joined statement. On the other hand, there has been appreciable increase in the number of cattle which has gone up from 37,952 of 1956 to 47,638 in 1961.

Year	Cattle	Buffaloes	Sheep	Goats	Horses & Ponies	Mules	Donkeys	Camels	Pigs	Total
1956	37,952	30,741	360	3,111	1,579	37	309	27	99	74,215
1961	47,633	29,111	755	1,221	1,303	33	155	39	113	80,368

Below is given the distribution of livestock per 1,000 population of the tehsil in 1961 : –

Cattle	...	443
Buffaloes	...	271
Sheep	...	7
Goats	...	11
Horses and Ponies	...	12
Others (Mules, Donkeys, Camels and Pigs)	...	3

Community Development

There are two community development blocks in tehsil Ranbirsinghpora, one headquartered in the town of Ranbirsinghpora and the other in Bishna.

During the year 1958-59, the two blocks are said to have distributed 606 maunds of improved seeds and about 1,557 maunds of ammoniunm sulphate among the cultivators. There are 61 seed multiplication farms in the tehsil and it is hoped that when their produce becomes available in larger quantities, improved seeds would be distributed on a wider scale

Improved methods of cultivation were applied to an area of 2,947 acres or 4.6 sq miles. In addition, 42 holdings were taken up for demonstration.

The department has built 732 compost pits so far. In addition, 16 wells have been newly constructed and 43 others renovated to meet the demand for drinking water.

Fruit and other trees occupy 453 and 134 acres respectively. The department has planted 22,345 fruit trees in the former and 1,468 other trees in the latter area.

During the year 1958-59, kacha roads measuring 14 miles have been built. This is in addition to the improvements made to other roads measuring 2½ miles.

There are 41 Panchayats in the two blocks with an aggregate membership of 348. The number of cases instituted before the Panchayats during the year 1958-59 was 205 only. Of these, 143 cases are said to have been decided.

Communication

The tehsil has a total road mileage of 40.5 miles which consists of metalled, fair-weather and jeepable roads as indicated below : —

Metalled or shingled roads	...	20.5 miles
Fair-weather roads	...	17.5 ,,
Jeepable roads	...	2.5 ,,

The names of the roads and the length of each are mentioned in the statement appended to the Report.

The linear mileage of roads per 1,000 population works out to 0 38 miles. In the district as a whole, the tehsil roads constitute 19.7% of the total road mileage.

Electricity

Of the three towns of Ranbirsinghpora, Bishna and Arnia, the first 2 only have been provided with electricity. In the rural areas, only 7 or 3% out of 240 inhabited villages have been electrified. The percentage of electrified villages of the tehsil to the total number of villages in the district which have been provided with electricity comes to 17%.

Employment

Like Samba, 70% of the population of the tehsil consists of non-workers only. In this case also, 71% workers are engaged in cultivation. The next important sector of employment is other services in which 14% of the working population is absorbed. The strength of agricultural labour does not exceed 5% of the working population. The remaining 10% are engaged in : —

1.	Mining, quarrying, etc.	...	1%
2.	Household Industry	...	4%
3.	Manufacturing other than Household Industry	..	1%
4.	Construction	...	N
5.	Trade and Commerce	...	3%

6. Transport, storage and communication 1%

Occupational Classification

Majority of those engaged in occupations other than cultivation, consists of craftsmen who number 3,613 or 60% in a total population of 6,042. Other important occupations are :—

1. Administration
2. Salesmanship
3. Farming, hunting, etc.
4. Service, sport, recreation and the like

Industries

Following are the important iudustries in the tehsil as a whole :—

	Number of establishments
1. Manufacturing of agricultural implements ...	110
2. Production of rice, atta, flour, etc. by milling, dehusking and processing of food grains ..	88
3. Cotton cloth weaving on handlooms	72
4. Making of earthenware, such as pottery, etc. ...	65
5. Tailoring works ...	62
6. Making of leather boots, shoes, chappals, etc. ...	56
7. Goldsmithy and jewellery ...	29
8. Repair of cycles and rickshaw parts	19
9. Making of bricks and other clay products ...	19
10. Repair of leather footwear ...	16
11. Making of sweetmeats ...	14
12. Manufacture of wooden furniture and fixture ...	14
13. Oil pressing ghani, kolhu or by small machines ...	7
14. Dyeing of cloth ...	6
15. Slaughtering, preservation of meat and fish and canning of fish ...	3
16. Bakery products ...	3
17. Production of soda water, etc. ...	3
18. Weaving of woollen cloth on handlooms ...	2
19. Sawing, planing and milling of wood	2
20. Manufacture of animal drawn and hand drawn vehicles ...	2
21. Cotton ginning, cleaning, pressing, etc. ...	1

Scheduled Castes

Of the total scheduled caste population of 151,508 in Jammu District, 29% or 43,408 persons belong to tehsil Ranbirsinghpora. Following is the rural and urban distribution of the scheduled castes by sex :—

	Persons	Males	Females
Rural	39,259	20,499	18,760
Urban	4,149	2,188	1,961

This shows that the sex-ratio of scheduled castes in the tehsil as a whole is 913 and in its rural and urban areas 915 and 896 respectively.

It is evident that scheduled castes constitute 40% population of the tehsil. The corresponding percentages for the rural and urban sectors stand at 41% and 37% respectively.

Literacy — The literacy figures are not available for any of the towns of the tehsil. In the rural areas, the number of literate persons of scheduled caste community stands at 2,699 of whom 2,065 are males and 634 females. Literate persons who do not possess any qualifications number 1,595 males and 528 females or 2,123 in all. This reduces the number of qualified persons to 576 of whom 470 are males and 106 females. Among males. 388 have passed primary or junior basic examinations and 82 matriculation and higher examinations. So far as females are concerned, the number of those who have passed primary or junior basic examinations is almost four times that of matriculates and others, the actual number being 84 and 22 respectively.

Following are the literacy percentages of literate scheduled castes to the total scheduled caste population in the rural sector :—

Persons	Males	Females
7%	10%	3%

Industrial classification—The number of workers in the entire rural scheduled caste population stands at 9,807 males and 1,972 females or 11,779 persons. This means that the workers constitute 30% of total scheduled caste population of the tehsil. Among males, the proportion of workers

is very high and stands at 48%, but the corresponding proportion in females is only 11%.

As in other tehsils of the district, the large majority of workers of either sex is engaged in cultivation. Other services and agricultural labour are the next important sectors of employment, the former absorbing over 1,800 persons and the latter about 900. The only other classes of workers which claim more than 100 workers consist of household industries and manufacturing other than household industries.

Land Revenue

The statement giving the figures of land revenue demand, recoveries made and the recoverable balances from 1951-52 onwards to 1960-61 has been appended to the Report. The accuracy of the figures given in the statement is, however, doubtful as it is unlikely that the demand should have remained static for four or five years continously as shown for the period 1951-52 to 1954-55 and 1955-56 to 1959-60. At any rate, in this case also, large balances have been left unrecovered at the end of every year and what is more, the bulk of these is said to be irrecoverable.

Fortnightly wholesale prices

Wholesale prices are available from 1953 to 1960 only. Even as it is, these relate to wheat and rice only except so far as 1960 is concerned.

During 1953 to 1955, the prices of wheat fluctuated, during the closing months of the crop year, from Rs. 10 to Rs. 13 per maund. Towards the end of 1956, the price shot up to Rs. 15 and could be had at Rs. 20/- per maund in April, 1957. During the major part of the year 1958, the rates varied from Rs. 15 to Rs. 19 per maund but in January 1959, there was again a sudden rise from Rs. 17 to Rs. 20 per maund. In February 1959, wheat became somewhat scarce and could not be had for less than Rs. 23 per maund. With the availability of the new crop, the rates came down to Rs. 18 per maund only with slight fluctuations upwards and downwards depending upon the period of the year and the size of the stocks maintained by the Government.

In the case of rice also, the rates have registered a steady increase from Rs. 16 per maund in April, 1953 to Rs. 28 in November, 1960. During the intervening period, there have been large fluctuations in the rates which stood at Rs. 15 per maund only from October, 1954 to February, 1955 and went up to Rs. 35 per maund in April and May, 1958.

The rates of paddy have remained steady throughout the year 1960. So far as maize is concerned, the normal rate of Rs. 10 to Rs. 11 per maund went up to Rs. 12 in October and November, 1960. In December 1960, the rates registered a further increase of Rs. 2 raising the price to Rs. 14 per maund. This is also true of barley which was sold at Rs. 10 or less per maund for the first 8 months of the year 1960 but could not be had for less than Rs. 11 during September to November and Rs. 12 in December, 1960.

There has been no change in the prices of moong and grams.

CHAPTER VI

AKHNOOR TEHSIL

Area

Akhnoor is the only tehsil in the district which has gained territorially during the inter-Census period 1941-61. The extended area consists of the Chamb sector of the erstwhile tehsil of Bhimber which has fallen on this side of the Cease-Fire Line. According to the Census Report of 1941, the tehsil as then constituted claimed an area of 317 sq. miles only. The Directorate of Map Publication, Dehra Dun have estimated the area of the tehsil including the Chamb Niabat at 419.8 square miles. The State Revenue Department has however stated that the area of the tehsil according to the present jurisdiction stands at 421.5 sq. miles of which 107.2 sq. miles consist of forests only.

Temperature and Climate

The tehsil includes plain and hilly areas and its lowest height above the sea level is 1,200'. There is no equipment anywhere in the tehsil to measure the temperature which is more or less the same as in Jammu. The average rainfall for the year 1960 has been 128.23 mms., the maximum having been recorded in August at 779.200 mms. and the minimum in October at 11.5 mms.

Villages and Towns

Besides 23 depopulated villages, most of which belong to Niabat Chamb, there are 222 inhabited villages and 1 town in the tehsil with a total population of 97,165 of whom 93,326 or 96% belong to the rural sector. The distribution of 1,000 males and 1,000 females between the rural and urban areas of the tehsil is indicated below :—

	Persons	Males	Females
Rural	960	959	962
Urban	40	41	38

The largest sector of the population belongs to villages with a population of 500-999. The following statement shows that except for the population group 200-499, the proportions in which villages of other groups are populated are very small :—

Less than 200	200-499	500-999	1,000-1,999	2,000-4,999
9%	29%	37%	15%	10%

Numerically, however, majority of the villages belong to the population group 200-499. Those with a population of less than 200 come next as shown in the following statement :—

Less than 200	200-499	500-999	1,000-1,999	2,000-4,999
33%	38%	23%	5%	1%

The number of villages in the last two groups is very small, being only 11 and 3 respectively.

*Houses and Households

There are 20,637 dwellings, shop-cum-dwellings and workshop-cum-dwellings in the tehsil including 945 of Akhnoor town. The average number of persons per dwelling in the tehsil as a whole stands at 4.9. The corresponding average of the rural areas is also 4.9 but so far as the urban sector is concerned, the average does not exceed 4.7.

The number of occupied houses stands at 31,393 which except for 2,158 or about 7% belong to the rural areas. The average number of persons per occupied house works out to 3.2, 3.3 and 2.0 for the tehsil and its rural and urban areas respectively.

The sub-joined statement gives the average number of persons per household and per room in the rural and urban dwellings consisting of varying number of rooms :—

	1 room		2 rooms		3 rooms		4 rooms		5 rooms and more	
	Average No. of persons		Average No. of persons		Average No. of persons		Average No. of persons		Average No. of persons	
	Per household (i)	Per room (ii)	Per household (iii)	Per room (iv)	Per household (v)	Per room (vi)	Per household (vii)	Per room (viii)	Per household (ix)	Per room (x)
Rural	4.81	4.81	5.72	2.86	7.20	2.40	..	..	7.50	1.36
Urban	3.96	3.96	5.63	2.82	7.40	2.47	8.00	2.00	8.00	1.60

*Data relating to households, dwellings, size of accommodation etc. is based on Housing Survey conducted 2 or 3 months before the actual census. This data has been published in Vol. VI, Part IV—Report on Housing and Establishment.

TEHSIL AKHNOOR

DISTRICT JAMMU

74°-30' E

74°-45' E

N 33°-0'

N 32°-45'

DISTRICT POONCH

DISTRICT UDHAMPUR

TEHSIL JAMMU

WEST PAKISTAN

BOUNDARIES: INTERNATIONAL, DISTRICT
" " TEHSIL, CENSUS ZONE
URBAN AREAS

MASOOD

concerned, the sex-ratio has been declining during most of the decades and has come down to 842 in 1961 as against 890 in 1911. Even as it is, the urban sex-ratio of the tehsil is much higher than that of the district.

Education

The information supplied by the Education Department shows that there were 92 schools of different denominations in the rural and urban sectors of the tehsil with a total student population of 8,455 of whom 7,186 are boys and 1,269 girls. The number of students attending rural schools only stands at 7,035 including 1,019 girls. The Census figures however show that the number of students attending rural schools stood at 6,931 of whom 6,178 were males and 753 females. The difference of 104 may be due to the fact that the Education Department figures include some of the new admissions made after the Census was taken.

According to the Census, the male and female population of the rural areas of the tehsil in the age-group 5-19 stood at 16,410 and 15,489 respectively. This means that 36.7% boys and 6.6% girls whose age ranges from 5 to 19 years attend the schools.

The sub-joined statement gives the number of educational institutions of different categories for boys and girls together with the number of pupils of each sex in each category :—

	Colleges		Higher Secondary Schools		High Schools		Lower High/Middle/ Central Schools		Primary / Basic Activity Schools	
	No. of institutions	No. of pupils	No. of institutions	No. of pupils	No. of institutions	No. of pupils	No. of institutions	No. of pupils	No. of institutions	No. of pupils
	2	3	4	5	6	7	8	9	10	11
Boys	..	..	1	502	4	1,912	12	1,687	54	3,085
Girls	..	..	..	..	1	250	3	305	17	714
Total	..	..	1	502	5	2,162	15	1,992	71	3,799

Literacy

Compared to the other tehsils of the district, the incidence of literacy in Akhnoor is much less pronounced. The tehsil holds 15th position in the State with a literacy percentage of 8.8% only. In the urban sector, however, the literacy percentage is higher than that of Ranbirsinghpora and stands at 33.3%. So far as the rural areas are concerned, the corresponding percentage is 7.7% only. The following statement gives the sex-wise literacy percentages of the tehsil and its rural and urban sectors :—

Total			Rural			Urban		
P	M	F	P	M	F	P	M	F
9%	15%	2%	8%	14%	1%	33%	42%	23%

Medical Institutions

The tehsil is catered by 8 dispensaries only, of which 3 are allopathic and 5 ayurvedic. The town of Akhnoor has been provided with one allopathic dispensary and the remaining 7 consisting of 2 allopathic and 5 ayurvedic dispensaries have been set up in the rural areas. The average number of patients catered by each dispensary thus works out to 13,332 and 3,839 for the rural and urban sectors respectively.

According to the information received from the Civil Surgeon, there are no arrangements for the treatment of in-patients in any of the medical institutions in the tehsil. The District Statistical Handbook issued by the State Planning Department however shows that there are 10 beds in the dispensary at Akhnoor and 2 in the one functioning at Chamb.

The sub-joined statement gives the number of out-patients, in-patients and minor and major operations carried out during the year 1960-61 by the allopathic and ayurvedic dispensaries :—

	Out-patients	In-patients	Operations	
			Major	Minor
Allopathic	65,584	337	6	949
Ayurvedic	22,196	...	...	1
Total	87,780	337	6	950

The following staff has been provided in the medical institutions :—

Doctors	Mid-wife	Dais	Dawasaz	Health visitors	Compounders	Vaids & Hakims	Vaccinator
4	1	4	5	2	4	3	1

Water Supply

Only 2 tube-wells have been sunk, one in the town of Akhnoor and the other in the village Dhoke-Khalsa. The former feeds the town-area and the latter the villages of Dhoke-Khalsa and Nardi. In all other areas, people consume water obtained from ponds, tanks, nallahs and canals.

Religion

The community-wise figures of the town of Akhnoor and of the tehsil as a whole are not available. The sub-joined statement however gives the rural population of each community in 1961 and 1941 :—

	1961	1941
Hindus	83,302	53,588
Muslims	7,930	31,049
Sikhs	1,885	652
Christians, Jains and others	209	134

While there has been an overall increase of less than 8,000 persons only, it is clear that as a result of the merger of Chamb Niabat and the rehabilitation of displaced persons, the population of Hindus has gone up by 55%. This has been set-off to the extent of over 23,000 by the migration of Muslims to the other side of the Cease-Fire Line.

Crops

According to the information made available by the Directorate of Statistical Bureau of the State Government, the tehsil extends to an area of 421.5 sq. miles or 269,790 acres. The net area sown, as estimated in 1960-61, has been placed at 114 7 sq. miles (73,432 acres) or 27.2% of the total area. The following statement indicates the classification of the land :—

Area and percentage	Area according to village paper	Area under forests	Land put to non-agricultural uses	Barren and uncultivable land	Permanent pastures and other grazing lands	Land under misc. tree crops	Culturable waste	Fallow land other than current fallows	Current fallows	Net area sown
1	2	3	4	5	6	7	8	9	10	11
Area in acres ..	269,790	68,609	25,999	48,136	12,189	1,163	17,111	7,258	15,893	73,432
Area in sq. miles	421.5	107.2	40.6	75.2	19.1	1.8	26.7	11.4	24.8	114.7
Percentage of total area ..	100	25.4	9.6	17.9	4.5	0.4	6.4	2.7	5.9	27.2

Enquiries made from the Tehsildar concerned have, however, disclosed that the total cultivated area under all crops stands at 94,824 acres or 148.2 sq. miles. Wheat, bajra, maize, rice and barley are reported to be the principal crops which are grown on 80% of the total cultivated area, as indicated below :—

	Area irrigated by					Total cultivated area under all crops	Area under principal crops					Area under other crops	Area under double crops	Best cultivated region of tehsil	
	Govt. canals	Private canals	Wells	Other sources	Total		Wheat	Bajra	Maize	Rice	Barley	Other food grains including Pulses, Millets, etc		Name	Area
	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Area in acres	3,345	1,132	84	..	4,561	94,824	44,305	20,136	5,363	4,647	1,454	18,919	..	Pattwar halqa Matta & Bahore	4,039
Area in sq. miles ..	5.2	1.8	0.1	..	7.1	148.2	69.2	31.5	8.4	7.3	2.3	29.5	..		6.3

The data supplied by the Directorate of Statistical Bureau shows that a substantial portion of the tehsil is covered by forests and that the size of barren and uncultivable land is also fairly large. For this reason not more than 5% of the cultivated area is irrigated by Government and private canals and wells.

Permanent pastures and other grazing lands measure 12,189 acres or 19.1 sq. miles. These cater 141,671 heads of cattle.

Livestock

The tehsil has the next largest number of livestock in the district. As in other tehsils, there has been a fall of over 20,000 in the number of goats enumerated at the Census of 1961, but this has been set-off to a very large extent by the increase in the number of cattle and buffaloes. The following statement gives the livestock figures for 1956 and 1961 :—

Year	Cattle	Buffaloes	Sheep	Goats	Horses and Ponies	Mules	Donkeys	Camels	Pigs	Total
1956	67,960	19,571	2,977	53,436	784	155	427	296	4	145,610
1961	78,066	24,938	3,238	33,288	692	454	527	464	4	141,671

The number of livestock per 1,000 population would thus stand as under :—

Cattle	Buffaloes	Sheep	Goats	Horses & Ponies	Others (mules, donkeys etc.)
803	257	33	343	7	15

Community Development

Two of the seven Community Development Blocks in the district have been set up in this tehsil. Of these, one is headquartered in Akhnoor town and the other at Chamb.

According to the data supplied by the Directorate of Community Development, improved seeds and ammonium sulphate weighing over 94 maunds and about 806 maunds respectively were distributed during the year 1958-59. Demonstrations of improved methods of cultivation were also given in 331 holdings of different sizes.

The tehsil has 28 seed multiplication farms and the total area in which improved methods of cultivation were employed measured 95 acres.

The area comprising orchards, etc. stands at 339 acres including 178 acres on which fruit trees are grown. The department planted 2,753 and 1,102 fruit and other trees respectively during the year 1958-59.

One well has been built and 12 renovated to augment the drinking water supply. In addition, 702 compost pits have also been built.

According to the information of the department, new kacha roads measuring 504 furlongs have been constructed during the year 1958-59. In addition, 160 furlongs of old roads are also said to have been improved.

The two blocks consist of 42 panchayats with a total membership of 438. The number of cases instituted stood at 536 of which 343 were decided.

Communication

The tehsil has a total road mileage of 42 miles which are maintained by the Public Works Department. Of these, 32 miles consist of surfaced roads. The other 10 miles have either been metalled or shingled.

The tehsil claims 20.4% mileage of the total road length of the district and the linear mileage per 1,000 population stands at 0.43 miles.

Electricity

Besides the town of Akhnoor, 2 other villages only have been electrified. The percentage of electrified villages to the total number of inhabited villages in the tehsil and to the total electrified villages in the district thus come to 1% and 5% respectively.

Employment

Among other tehsils of the district, Akhnoor has the smallest proportion of non-workers which comprises 62% of the population as against 68% of tehsil Jammu and 70% of Samba and Ranbirsinghpora. Further, the proportion of those engaged in cultivation to the total working population, which stands at 80%, is also the highest in this tehsil. Very few workers are employed as agricultural labourers. Following are the proportions of workers of different categories other than those engaged in cultivation :—

Agricultural Labourer	N
Mining, Quarrying, etc.	1%
Household Industry	3%
Manufacturing other than Household Industry	N

Construction	3%
Trade and Commerce	2%
Transport, Storage and Communication	N
Other Services	11%

Occupational Classification

Large majority of the people belonging to occupations other than cultivation consist of craftsmen, etc. Those holding administrative, executive and managerial assignments constitute the second large majority. Service, sport, and recreation workers rank third. Other occupations are mentioned below :—

1. Professional, technical and related workers
2. Clerical and related workers
3. Sales workers
4. Farmers, fishermen and related workers
5. Miners, quarrymen and related workers
6. Workers in transport and communication occupations

Industries

Following are the important industries in the tehsil and the number of establishments claimed by each :—

	No. of establishments
1. Making of leather boots, shoes, chappals, etc. ...	209
2. Manufacture of agricultural implements ...	200
3. Production of rice, atta, flour, etc. by milling, dehusking and processing of food-grains ...	188
4. Tailoring work ...	53
5. Goldsmithy and jewellery ...	37
6. Making of earthenware, such as, pottery, etc. ...	33
7. Making of sweetmeats ...	22
8. Carpentary works ...	22
9. Oil pressing ghani, kolhu or by small machines ...	21
10. Cotton cloth weaving on handlooms ...	16
11. Manufacture of structural wooden goods ...	15
12. Repair of leather footwear ...	15
13. Bakery products ...	6
14. Manufacture of wooden furniture and fixtures ...	6
15. Making of rope mats, boxes, etc.	5
16. Weaving of woollen cloth on handlooms ...	4

Scheduled Castes

Only 15% scheduled caste population of the district belongs to tehsil Akhnoor, though, as in the case of tehsil Jammu, it constitutes 25% of the total population of the tehsil.

Except for 501 scheduled caste persons belonging to the town of Akhnoor, all others numbering 22,592 have been enumerated in the rural areas. The former consists of 241 males and 260 females and the latter of 11,673 males and 10,919 females. This gives a sex-ratio of 938 per 1,000 males for the tehsil as a whole and of 935 and 1,079 for the rural and urban sectors respectively. Reasons for the very high ratio of urban females are not however available.

The following statement shows the percentages of rural and urban scheduled caste population to the tehsil population and to the total scheduled caste population of the district :—

Percentage of scheduled castes to tehsil population		Percentage of scheduled castes of the tehsil to the total scheduled caste population of the district	
Rural	Urban	Rural	Urban
24%	13%	17%	3%

Literacy—Like tehsil Jammu, the incidence of literacy in the rural areas of tehsil Akhnoor is also very low and stands at 4% only. Among males, however, 6% population consists of literates against 1%, the corresponding proportion of females.

The total number of literate persons stands at 834 only, of whom 742 are males and 92 females. None of the females has passed any examination. As for males, 657 are literate without educational qualification, 60 have passed primary or basic examinations and 25 matriculation and higher examinations.

Industrial classification—The industrial classification of the rural scheduled caste population of the tehsil shows that 37% of the population or 8,417 persons are workers.

In the male population, 53% comprise the working class but the corresponding proportion among females stands at 20% only. No less than 82% male workers consist of cultivators and agricultural labourers. The corresponding proportion in the case of females is still higher and stands at 94% approximately. The next important sector of employment of males is other services which claims about 10% workers. Household industry provides employment to about 4% and construction to more than 2% workers. The proportions of other categories of workers are small.

Land Revenue

Data showing the land revenue demand, recoveries made and the balances for the period 1950-51 to 1960-61 has been appended to the Report. This shows that the demand has increased from Rs. 215,594 in 1951-52 to Rs. 239,669 in 1953-54. From 1955-56 onwards, the demand has remained static and there have been no fluctuations in it for a period of over six years. The statement also shows that huge arrears exceeding Rs. 5 lakhs had been left unrecovered by 1951-52. These have swollen up to Rs. 1,267,519 by the end of 1960-61 as there is hardly any year in which large balances were not left unrecovered against the current demands.

Fortnightly wholesale prices

As stated earlier, wheat, rice, barley, maize and bajra are the principal crops of the tehsil. A statement showing the fortnightly prices of these crops from 1951 onwards has been appended to the Report.

The statement shows that there have been fluctuations in the price of wheat which has ranged from Rs. 12 to Rs. 13 per maund to Rs. 20. It appears that the tendency of inflation has been arrested after 1956 and that the rates has been stabilized at Rs. 15 to Rs. 17 depending upon the quality of the wheat.

In the case of rice also, the prices have varied in larger dimensions than wheat. In November, 1951 and June 1953, the rate stood at Rs. 30 and Rs. 32.50 respectively. On the other hand, the rate prevailing in August, 1954 came down to Rs. 15 only. During the year 1960, the rate shot up to Rs. 35 per maund in the month of May. This is because rice is not taken by many people and is therefore comparatively scarce.

Barley was being sold at Rs. 5.50 per maund in January, 1953 but in the month of June, it could not be had for less than Rs. 10 per maund. In this case also, the rates have been fluctuating from time to time depending upon the yield of each year.

The price of maize has generally oscillated between Rs. 10 to Rs. 12 per maund, though according to the fortnightly reports, it could be had for Rs. 8 only during the first quarter of the year 1956. As against this, the price obtaining in September, 1958 was very high and stood at Rs. 20 per maund.

Like maize, the price of bajra has also been unsteady throughout the period of 10 years from 1951-60. It was sold at Rs. 13.50 in August 1951, at Rs. 17 during the last half of the year 1952 and at Rs. 20 in March, 1953. In October of the same year, the rates fell down to Rs. 9 per maund only. The lowest rate at which bajra could be had at any time was in March-May 1956 when the rate came down to Rs. 6 only. In 1957, when foodstuffs were scarce due to the floods, the rate of bajra also shot up to Rs. 16.50. During 1960, however, the rates did not exceed Rs. 14 per maund.

APPENDIX 4—IRRIGATION STATISTICS

(i) MAJOR, MEDIUM AND MINOR IRRIGATION PROJECTS

S. No.	Name of the canals	Year of opening	Length in miles		Cost in Lakhs of Rs.	Location of off-take		
						River	Tributary	Place
1	2	3	4		5	6	7	8
1.	Ranbir ..	1904	1. Main Canal	39.40				
			2. Distributaries	251.00	48.64	Chinab	..	Akhnoor
2.	Pratap ..	1904	1. Main Canal	10.15				
			2. Distributaries	19.30	6.00	Chinab	..	6 miles below Akhnoor
	New Pratap ..	June, 1961	1. Main Canal (completed)	12.00				
			2. Distributaries	14.00	120.00	Chinab	..	Akhnoor

Improvements made to the old canals in Jammu District consist mainly of extending some of its distributaries and addition of new minors. Particulars of these are given below :—

S. No.	Name of Scheme	Year of opening	Length in miles	Cost in Rs.	Location of off-take
1	2	3	4	5	6
1.	Bhadror minor Distributary No. 1 (Ranbir canal) ..	1957	6.00	97,000	Distributary No. 8 RD. 12,600
2.	Kuhl RD. 8,500 Distributary 2 B. (Ranbir canal) ..	1958	3.00	13,000	Distributary No. 1 RD. 8,500
3.	Re-opening Distributary 3 D. (Ranbir canal)..	1956	2.00	9,000	Ranbir canal RD. 39,000
4.	Tail extension Distributary 3 F. (Ranbir canal) ..	1958	0.50	2,000	Distributary 3 F. Tail
5.	Kuhl Chatha ..	1960	3.00	22,000	Distributary No. 1

NOTE :— 1. Major scheme means a scheme costing more than Rs. 1 crore.
2. Medium „ „ „ „ „ between Rs. 10 lakhs and 1 crore.
3. Minor „ „ „ „ „ below Rs. 10 lakhs.

ANNEXURE TO APPENDIX 10(i)

STANDARD INDUSTRIAL CLASSIFICATION

Minor Group (Code)	Description
045	Rearing of silk worms and production of cocoons and raw silk.
200	Production of rice, atta, flour, etc. by milling, dehusking and processing of crops and foodgrains.
202	Production of indigenous sugar, gur from sugar cane or palm juice and production of candy.
204	Slaughtering, preservation of meat and fish and canning of fish.
205	Production of bread, biscuits, cake and other bakery products.
206	Production of butter, ghee, cheese and other dairy products.
207	Production of edible fats and oils (other than hydrogenated oil).
209	Production of other food products such as sweetmeat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge.
214	Production of aerated and mineral water.
215	Production of ice.
216	Production of ice cream.
219	Production of other beverages.
224	Manufacture of snuff.
230	Cotton ginning, cleaning, pressing and baling
233	Cotton dyeing, bleaching.
234	Cotton weaving in powerlooms.
235	Cotton weaving in handlooms.
237	Printing of cotton textile.
254	Wool weaving in powerloom.
255	Wool weaving in handloom.
270	Manufacture of carpet and all other similar type of textile products.
271	Manufacture of hosiery and other knitted fabrics and garments.
272	Embroidery and making of crepe, lace and fringes.
273	Making of textile garments including rain-coats and head-gear.
277	Manufacture of coir and coir products.
278	Manufacture of umbrellas.
280	Sawing and planning of wood.
281	Manufacture of wooden furniture and fixtures.
282	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows.
283	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures.
287	Manufacture of boxes and packing cases other than plywood.
288	Manufacture of materials from cork, bamboo, cane, leaves and other allied products.
301	Printing and publishing of books.
302	All other types of printing including lithography, engraving, etching, block making and other worn connected with printing industry.
303	All types of binding, stitching, sizing and other allied work connected with binding industry.
310	Currying, tanning and finishing of hides and skins and preparation of finished leather.
311	Manufacture of shoes and other leather foot wear.
314	Rapair of shoes and other leather footwear.
315	Repair of all other leather products except footwear.
320	Manufacture of tyres and tubes.
322	Manufacture of rubber goods used for industrial purpose.
335	Manufacture of medicines, pharmaceutical preparation, perfumes, cosmetics and other toilet preparations except soap.
336	Manufacture of soap and other washing and cleaning compounds.
339	Manufacture of other chemicals and chemical products not covered above (including inedible oils and fats).
340	Manufacture of structural clay products such as bricks, tiles.
341	Manufacture of cement and cement products.
342	Manufacture of lime.
343	Manufacture of structural stone goods, stone dressing and stone crushing.
350	Manufacture of earthenware and earthen pottery.
353	Manufacture of glass bangles and beads.
356	Manufacture of earthen toys and artwares except earthen image, busts and statues.
362	Manufacture of armaments.
364	Manufacture of iron and steel furniture.
365	Manufacture of brass and bell metal products.
367	Manufacture of metal products (other than of iron brass, bell metal and aluminium) such as tin can.
368	Enamelling, galvanising, planting (including electroplanting) polishing and welding of metal products.

ANNEXURE TO APPENDIX 10(i)

STANDARD INDUSTRIAL CLASSIFICATION

Minor Group (Code)	Description
369	Manufacture of sundry hardwares such as G.I. pipe, wire net, bolt, screw, bucket, cutlery. (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38 and 39).
375	Manufacture of electric lamps and fans.
376	Manufacture of insulated wires and cables.
378	Manufacture of electronic equipment such as radio, microphone.
384	Repairing and servicing of motor vehicles.
388	Repairing of bicycles and tricycles.
389	Manufacture of other transport equipment not covered above such as animal and handdrawn vehicles.
390	Manufacture of optical instruments and lenses, opthalmic goods and photographic equipment and supplies.
392	Assembling and repairing of watches and clocks.
393	Manufacture of jewellery, silverware and wares using gold and other precious metals.
394	Manufacture and tuning of musical instruments.
396	Manufacture of sports goods.
399	Manufacture and repair work of goods not assignable to any other group.

Note :— Description has been given in respect of only such of the minor groups which appear in Appendix 10—(i)

CHAPTER VIII

CENSUS TABLES

GENERAL POPULATION TABLES

CENSUS TABLES

The 1961 Census was designed to collect more comprehensive data than that attempted at any previous Indian Census in view of the Five Year Plans undertaken by the Government as also because of the growing need for basic data by the different administrative departments.

The census data relating to Jammu and Kashmir has been incorporated in Volume VI of the series of publications designated Census of India, 1961. The volume has been divided into 10 parts, some of which have been further subdivided, depending upon the quantum of material relating to each.

The Tabulation Plan of the 1961 Census envisaged the compilation of 5 sets of tables known as A – General Population Tables, B—Economic Tables, C – Social and Cultural Tables, D—Migration Tables and E—Housing Tables series. The B—Series Tables were split up in two parts, one giving the general economic data and the other in which the data has been tabulated with household and not the individual as the unit. In addition to these five sets, special tables relating to scheduled castes and scheduled tribes were to be prepared and printed as a separate part. As there are no scheduled tribes in Jammu and Kashmir, tables giving the data of scheduled tribes were not prepared for this State. Another set of tables regarding rural arts and crafts found in different parts of the State was also compiled and printed as a separate part of Volume VI.

The District Census Handbook does not include D-Series (Migration Tables) and E-Series (Tables on Housing). These have been separately printed and constitute Part II-C and Part IV of Volume VI.

So far as other series are concerned, the following tables only have been omitted :—

Name of series	Tables omitted
A—Series General Population Tables	Union Primary Census Abstract.
B—Series (Table I to IX) General Economic Tables	B-II. Workers and non-workers in cities, town groups and towns arranged territorially classified by sex and broad-age group.
B—Series (Tables X to XVII) Household Economic Tables	Nil
C—Series Social and Cultural Tables	C-IV—Single Year Age Returns. C-VI—Bilingualism.
SCT—Series (Special tables for Scheduled Castes)	Nil
Rural Craft Tables	Table III—Distribution of articles of rural crafts by material used. Table IV—Designs. Table V—Consumption and sale. Table VI—Cost of production, sale price and earnings.

GENERAL POPULATION TABLES

The General Population Tables, more commonly known as A-series, consist of four main tables and Union Primary Census Abstract. In addition, Table A-I has been supplemented by three appendices and one sub-appendix. Tables A-II and A-IV are also accompanied by one appendix each. Besides, these, explanatory notes have been furnished to appendix II to A-I and A-IV tables.

Table A—I

The table gives information regarding area, density, number of villages and towns, occupied residential houses and the total and sex-wise population. The information has been separately tabulated for the district and each of its constituent tehsils as also for each urban area falling in a tehsil.

The area figures of the State on this side of the Cease-fire Line were neither available with the Directorate of Land Records of the State Government nor with the Survey of India. These have, therefore, been provisionally worked out by fresh planimetering on the basis of the boundary alignments supplied by the Census Department to the Directorate of Map Publication, Dehra Dun. In the case of urban areas, the area figures have been supplied by Deputy Commissioners, Tehsildars and the Administrators of Municipal Corporations and authorities of Local Bodies concerned.

It will be seen from the table that two sets of area figures, one in square miles and the other in square kilometres, have been shown in columns 3a and 3b against each territorial unit. The rural figures have been worked out by deducting from the total area, as worked out by the Survey of India, the figures of urban areas supplied by Deputy Commissioners, Tehsildars etc.

The density of population has, in all cases, been indicated in terms of square miles.

Every village with well defined boundaries for revenue assessment having residential houses densely or sparsely populated has been treated as a village irrespective of the number of hamlets of which it may be constituted. A village with no habitations at all has been classed as an uninhabited village.

The definition of an urban area, as adopted at the Census of 1961, was that it should not have a population of less than 5,000 and at least 75% of these should consist of non-agriculturists. Another indispensable criterion which an area was to satisfy so as to qualify for being classed as urban was that it should have a density of not less than 1,000 persons per square mile.

Notwithstanding these three tests, it was agreed upon that all Corporations, Municipalities and Cantonment Boards should, irrespective of their population, be treated as towns. An exception was also made for areas which though having a population of less than 5,000 possessed definite urban characteristics like places of tourist importance where all civic amenities have been provided.

An occupied residential house was defined as the building or a part of the building used for residential purposes and having a separate entrance of its own and independent of the entrances of other parts, giving on the road or a common staircase or a common courtyard which lead to a main gate.

Areas which have been declared as towns for the first time have been printed in italics so as to distinguish them from others.

As will be seen from the figures given in columns 3a and 3b of the table, Jammu is a comparatively small district extending to an area of 1248.6 sq. miles or 3233.8 sq. Kilometres. The Population of the district as returned at the 1961 Census stands at 516,932 the rural sector being inhabited by 389,156 and the urban by 127,776 persons. The district holds 7th position by area and 4th by population in the State but ranks next only to Srinagar in so far as overall and urban densities are concerned. As it has absorbed large number of immigrants from outside, the district has the highest rural density among all the districts of the State.

There are in all 1037 inhabited villages in the district, the largest among all the districts except Anantnag and Baramulla which include 1191 and 1042 villages respectively. The tehsilwise figures are ; Jammu 306, Samba 269, Ranbirsinghpora 240 and Akhnoor 222.

Of the 43 urban areas in the State, as many as seven are claimed by Jammu district. The aggregate population of these stands as 127,776 persons or about 22 percent of the total urban population of the State. One of its urban areas namely Jammu city has the second largest urban population in the State.

Appendix I to Table A-I gives the 1941 territorial units constituting the present set up of the district. The data given in the appendix is, however, provisional and subject to incorporation, adjustment and correction when the actual surveys are made.

The District of Jammu which measured 1147 sq. miles in 1941 has not lost territorially during the last two decades. On the other hand, 46 additional villages being the residual parts of tehsil Bhimbar of district Mirpur were annexed to the district and merged with tehsil Akhnoor. In addition village Kothar of tehsil Ramnagar, district Udhampur with an assessed area of 3017 Kanals (0.6 sq. miles) was also transferred to Jammu district. If the increases thus caused are accounted for according to their assessed areas only, it would appear that the area of the district has increased by 70.6 sq. miles. The gross area of the district in 1961, which includes barren lands and areas under forests and hills however stands at 1248.6 sq. miles indicating a net gain of 101.6 sq. miles in its jurisdictions since 1941.

The sub-appendix to Appendix I indicates the area to which the city of Jammu extended in 1941 and 1961. It also contains the list of places which were treated rural in the past and were later on merged with the municipal area.

Appendix II to table A-I relates exclusively to villages inhabited by 5,000 or more persons and towns with a population under 5,000. It gives the number and aggregate population of all such villages and towns upto tehsil level as also the percentages of their respective populations to the rural and urban population of the district.

Like Anantnag, Ladakh, Doda, Udhampur and Kathua, there is not a single village in Jammu district having a population of 5,000 or more. The district, however, includes five towns, three in Ranbirsinghpora and one each in Samba and Akhnoor tehsils whose population is less than 5,000.

The 1941 Census Report shows that there was no village in the district as now constituted, with a population of more than 5,000. As is clear from the appendix this position has remained unchanged even during the following two decades. None of its urban areas was deurbanised during the inter-census period. On the other hand, two areas, viz. Arnia and Bishna, which were previously borne on rural list, have been treated as towns in 1961. Though neither satisfies the minimum population test of 5,000, a number of urban amenities have been provided in the towns for the convenience of immigrants who have concentrated in sizable numbers in both places.

Appendix III to table A-I gives the sex-wise and total population down to tehsil level of housless persons and those enumerated in institutions. The figures have been given for each territorial unit as a whole as also for its rural and urban sectors.

An institution as defined at the Census of 1961 represents a census household occupied by un-related persons who live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. The sub-joined statement gives the types of institutions found in Jammu district as also the number of institutions of each category :—

1.	Boarding Houses	...	12
2.	Commercial Establishments	...	5
3.	Dak Bungalows, Rest Houses, Circuit Houses, etc.	...	4
4.	Excise Officials Mess	...	2
5	Factories and Workshops	...	3
6.	Hospitals	...	4
7.	Hotels	...	12
8.	Inns and Dharamsalas	...	4
9.	Jails	...	1
10.	Police Lines	...	2
11.	Police Stations	...	5
12.	Religious Institutions	...	7
13.	Social Welfare Institutions	...	1
14.	Soyamber Board Hostels, etc.	...	3
15.	Miscellaneous	...	9

In striking contrast with most other districts

of the State, the proportion of houseless and institutional population in Jammu district is fairly high. This is because the Census was taken in the month of February when a large number of Kashmiri peasants had moved down to Jammu in search of employment. As the accomodation available in the Sarai (Inn) in Jammu city where they usually stay is limited and because many among them work as labourers in rural areas of the district, not a few of them sleep on pavements and in open areas. Further, the budget session of the State Legislature also synchronised with the period when the census was taken. Many legislators and their families who were present in Jammu had taken their lodging in hotels, Dak Bungalows and similar institutions where boarding and catering facilities are available. Another equally important reason for the high proportion of institutional population is that like Srinagar City, several educational institutions in Jammu have been provided with hostels and boarding houses for the convenience of students hailing from rural areas. Further the institutional population also includes the in-patients of S. M. G. S. Hospital, Jammu, one of the two largest hospitals in the State, as also the inmates of Central Jail Jammu. Finally the inclusion of army personnel born in Jammu district and enumerated elsewhere in the country, in the institutional Population has also inflated the proportion of such population.

Table A—II

This table furnishes the total and sex-wise population of the district for the 6 censuses from 1901 to 1961 as also the percentage variation in each decade. In the absence of reliable vital statistics data, the table, as it gives the growth of population from decade to decade, is the main source for estimating the population.

The district has, notwithstanding its territorial gains resulting from the merger of the residual parts of tehsil Bhimbar, district Mirpur and the influx of immigrants lost in population due to large scale migrations which had among other things the effect of completely depopulating as many as 155 villages. The adjusted population of 1941 viz., 428,719 has been worked out by adding/subtracting the population of the following areas :—

1. Population of 46 villages (including 19 uninhabited) of Bhimbar tehsil, district Mirpur on this side of the Cease-fire Line transferred to district Jammu=24,071.
2. Population of village Kothar tehsil Ramnagar district Udhampur transfered to district Jammu=992 and
3. Population of 155 villages declared uninhabited as a result of migrations=27,706.

The following statement gives the decennial variations of the adjusted population and the actual census figures for the four decades 1901 to 1941 :—

Year	Adjusted Population	Census Population	+ —
1941	428,719	431,362	—2,643
1931	372,850	375,240	—2,390
1921	335,891	337,544	—1,653
1911	328,523	329,283	— 760
1901	343,369	344,018	— 649

Appendix to table A-II is an extract of the main appendix to this table (published in Part II-A, Volume VI) which gives the disposition of the various districts of the State in 1941 and 1961. It is designed to indicate separately the 1941 population of the District, the number of its towns and villages, wholly and partly, in Pak or Chinese occupation, the area of such villages and towns and their 1941 population. The appendix also shows the administrative localities now on this side of the Cease-Fire Line as also their 1941 and 1961 area and population.

Jammu is one of the districts which did not suffer any territorial loss as a result of the splitting up of the State by the Cease-Fire Line. No area of the district as it was constituted in 1941 or as it was realigned subsequently, came under Pak or Chinese occupation. Columns 3 and 4 of the appendix have accordingly been left blank.

Column 6 of the appendix gives the details of the territorial units of which the district was constituted in 1941 and also lists the changes in the jurisdiction of its constituent tehsils during the decade.

As will be seen from the appendix, the district boundaries were further extended consequent upon the transfer of 46 villages of tehsil Bhimbar of district Mirpur to one of its tehsils, namely Akhnoor. In addition, village Kothar of tehsil Ramnagar, district Udhampur was also transferred to Jammu tehsil.

Table A—III

State Table A-III, as distinguished from the

Union table, gives down to the tehsil level, the number of inhabited villages, the total and sex-wise rural population classified by 7 population sizes, viz. (1) less than 200, (2) 200-499, (3) 500-999, (4) 1,000-1,999, (5) 2,000-4,999, (6) 5,000-9,999 and (7) 10,000 and above.

The following statement gives the percentages of villages and of the population claimed by class of villages in 1921, 1941 and 1961 :—

Year	Less than 500		500—999		1,000—1,999		2,000—4,999		5,000—9,999		10,000+		Unclassified population
	Percentage of No. of villages in this class to total No. of villages	Percentage of population in this class to total population	Percentage of No. of villages in this class to total No. of villages	Percentage of population in this class to total population	Percentage of No. of villages in this class to total No. of villages	Percentage of population in this class to total population	Percentage of No. of villages in this class to total No. of villages	Percentage of population in this class to total population	Percentage of No. of villages in this class to total No. of villages	Percentage of population in this class to total population	Percentage of No. of villages in this class to total No. of villages	Percentage of population in this class to total population	
1	2	3	4	5	6	7	8	9	10	11	12	13	14
1921	87	57	9	22	3	13	1	8	..	..	..	..	N
1941	83	50	12	23	4	16	1	9	N	2	..	..	..
1961	77	43	16	28	6	22	1	7	..	..	..	..	..

The statement shows that the proportion of villages of less than 500 population has been progressively declining since 1921 and has shrunk from 87 percent of 1921 to 77 percent in 1961. This has had the inevitable effect of reducing the proportion of the population of these villages also which has gone down from 57 percent to 43 percent. The population groups 500-999 and 1,000-1,999 have however registered marked increases both in the number of villages constituting these groups in 1921 and 1961 as also in their percentages of population to the total rural population. There has been no increase in the number of villages and the percentage of their population in the group 2,000-4,999.

Table A—IV

Table A-IV gives the towns and town-groups classified by population in 1961 with variations since 1941. It has been prepared at district level and gives the name of each town/town-group together with its area as also the status it holds, viz., municipality, town area, notified area etc.

For purposes of the Census of 1961, urban areas have been classified into 6 categories in descending order of their population, as indicated below :—

Class	Population
I	100,000 and above
II	50,000—99,999
III	20,000—49,999
IV	10,000—19,999
V	5,000— 9,999
VI	Less than 5,000

The data has been tabulated for all classes of urban areas in the district. There is no town of Classes II, III or IV in the district. Of the total number of seven towns in the district, five belong to class VI and one each to class I and Class V.

The appendix to Table A-IV indicates the names of new towns which have been added to the urban list of the district in 1961 as also of those which were treated as towns in 1941 but were declassified as rural in 1961. It gives the status, area and the 1941 and 1961 populations of all such towns. Towns which have been declared urban for the first time have been printed in italics.

I. *Akhnoor* (T. A.)	U	0.71	1.84	5,407	..	..	1	787	3,839	2,084	1,755

Note— 1. †Towns treated as such for the first time in 1961 are printed in italics.

2. The total area shown against District/Tehsil under columns 3a and 3b represents the area as supplied by the Surveyor General of India. The urban areas are based on the area of individual towns furnished by the local authorities. The rural area of district and tehsil is obtained by subtracting the urban area from the Surveyor General area figures.

3.* The square kilometres and density figures of urban areas of Tehsil and District are worked out using the area figures corrected upto two places of decimals obtained by adding the areas of towns in the respective units and not using the area figures given in the table. In addition to this, the area figures relating to square kilometres are further adjusted to make the Tehsil/District totals tally.

4. The following abbreviations have been used for the status of town, e. g.

I. (M. C.)—Municipal Committee

II. (T. A.)—Town Area Committee

III. (Cantt.)—Contonment

5. (a) T—Total

(b) R—Rural

(c) U—Urban

APPENDIX I TO TABLE A—I

Statement showing 1941 Territorial Units Constituting the present set-up of Jammu District

"The area of the district is as supplied by the Surveyor-General as a result of planimetering in 1963. The area figures against District and Tehsils are those appearing in part II-A, 1941 and include the entire area of the District/Tehsil, whereas the area of a village or a group of villages relates to 1961 figures and pertains to the land which is assessed to land revenue".

THE STATEMENT IS PROVISIONAL AND SUBJECT TO INCORPORATION, ADJUSTMENT AND CORRECTION

District/Tehsil	1941 Territorial Units	
	Name	Area in Sq. miles

SUB-APPENDIX TO APPENDIX I OF TABLE A—I

Statement showing Area for 1941 and 1961 for those Municipal Towns which have undergone changes in area since 1941 census

Name of Municipal Area	Area in Square miles		Remarks
	1941	1961	
1	2	3	4
Jammu (M. C.)	2	4	† Due to jurisdictional alternations

NOTE—

As a result of the congestion of urban population in the post-partition period, the State Government extended the jurisdiction of the city by merging with it the following areas which were previously contiguous with its boundaries :—

1. Gandhi Nagar
2. New Basti (Upper Narwal)
3. Raipur Satwari (Pathankot Road)
4. Bakshi Nagar
5. New Plot
6. Gorah
7. Rehari Colony
8. Passage to Rajpura
9. Passage to Palora

2. T. A.—Town area committee.

GENERAL ECONOMIC TABLES

GENERAL ECONOMIC TABLES

Economic data collected at the Census of 1961 has been presented in 17 tables known as B—Series and published in Part II-B and Part III of Volume VI, Census of India, 1961. The first 9 tables have been incorporated in Part II-B under the title "General Economic Tables". The remaining 8 tables in which the data has been presented with household as the unit are known as Household Economic Tables and constitute Part III of Volume VI.

The General Economic Tables have been compiled from the data collected in answer to the economic questions convassed in the Individual Slip. In all five questions listed below were asked to elicit information on the economic characteristics of the person enumerated :—

Question 8 ... Working as cultivator

Question 9 ... Working as agricultural labourer

Question 10 ... Working at household industry
- a) nature of work
- b) nature of household industry
- c) if employee

Question 11 ... Doing work other than questions 8, 9 or 10.
- a) nature of work
- b) nature of industry, profession, trade or service)
- c) class of worker
- d) name of establishment

Question 12 ... Activity, if not working

In order to facilitate a correct appraisal of the data given in the tables, the definition of a worker as adopted for the 1961 Census is reproduced below :—

"The basis of work will be satisfied in the case of seasonal work like cultivation, livestock, dairying, household industry etc. if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce, the basis of work will be satisfied if a person was employed during any of the fifteen days preceding the day on which his household was visited for enumeration".

An adult woman who was engaged in household duties but doing no other productive work to augment the family resources was not treated as a worker. If, however, in addition to her household work, she was engaged in work such as rice pounding for sale or wages or in domestic service for wages for others or minding cattle or selling fire wood or making and selling cowdung, cakes etc. She was treated as a worker.

This change in the definition of a worker has had the advantage of persons working in family economic activities who were heretofore treated as non-workers or partly dependents being now classified as workers.

A distinguishing feature of 1961 Census has been the classification of workers into 9 industrial categories according to Standard Industrial Classification. Following is a further description of these categories together with the nature of activity represented by each :—

Category I—Working as cultivator

A person was treated as a cultivator if he or she was engaged either as employer, single worker or family worker in (a) cultivation of land or supervision or direction of cultivation of land owned or held from Government and (b) cultivation of land or supervision or direction of cultivation of land held from private persons or institutions for payment in money, kind or share. A person who had given out his land to others for cultivation for money, kind or share of crop and who did not even supervise or direct cultivation of land was not treated as working as cultivator. Similarly, a person who worked in another person's land for wages in cash, kind or share was not also treated as cultivator.

Category II—Working as agricultural labourer

A person who worked as agricultural labourer on the lands of other person or persons for wages in money, kind or share of the produce was treated as agricultural labourer.

Category III—Working in mining, quarrying, livestock, forestry, fishing, hunting, plantation, orchards and allied activities

This category stands for workers employed in afforestation or plantation of such other crops as tea etc. or those engaged in fishing or extraction of stone, lignite, coal, clay or employed in the production and rearing of livestock.

Category IV—Working at household industry

A Household Industry was defined as an industry conducted by the Head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas. An industry which was being run on the scale of a registered factory was not treated as a household industry. Professions, such as those of a pleader, doctor, barber, waterman or an astrologer, were not treated as household industry.

Category V—Working in manufacturing other than household industry

This category represents workers engaged in manufacturing of products outside the scope of household industry. It relates to production, processing, servicing, repairing and manufacturing etc.

Category VI—Working in construction

The category includes workers engaged in all types of constructions including construction and maintenance of telegraph and telephone lines, water ways and water reservoirs, such as bunds, canals, tanks, tube wells, embankments etc.

Category VII—Working in trade and commerce

Workers engaged wholly or mainly in retail and wholesale trading have been included in this category. It also represents workers in commercial activities like banking, money lending, insurance etc.

Category VIII—Working in transport, storage and communications

The category represents workers in transport, storage and communication and includes aircraft pilots, bus drivers, conductors, telephone operators, signallors, wireless operators, postmen etc.

Category IX—Other services

Other services include workers in—

a) public services
b) educational and scientific services
c) religious and welfare services
d) legal services
e) business services
f) community services and trade and labour associations
g) recreation services
h) personal services
i) services not elsewhere classified
j) medical and health services
k) electricity, gas, water and sanitary services.

Non-workers have been divided into 8 categories. These have been discussed in the Fly-leaf to Table B—IX.

Table B—I

The table has been prepared for the district as a whole and for its rural and urban sectors. It gives the sex-wise population of each of these units as also of workers and non-workers by four broad age groups, 0-14, 15-34, 35-59, 60+ and age not stated. As these age groups correspond to the different stages of life which have special significance for capacity to work, viz. children, young persons, middle aged persons and elderly persons, it may well be regarded as a summary economic table of the district.

Table B—III

Table B—III has been split up into two parts, one dealing with the urban and the other with the rural areas. The first part has been presented upto district level and the second part down to the tehsils. Both give the distribution of workers and non-workers by educational levels and by industrial categories. It is hoped that the information given in the table will be of great help in assessing the size of available educated manpower in the district.

The proportions of workers in the State as a whole as also in its rural sector are more or less the same as the corresponding proportions in India, which stand at 42.9% and 45.1% respectively as against 42.8% and 45.3% in the State. In the urban areas of the State, however, only 30.2% persons are workers, whereas the

corresponding proportion for the entire country stands at 33.5%. This shows that the incidence of non-workers in the urban sector of Jammu and Kashmir is more pronounced than that obtaining in the urban areas of all the States put together.

The proportions of workers in Jammu district as a whole as also in its rural sector are lowest among all the districts of the State. This appears to be due partly to the concentration of displaced persons and partly to the smaller number of Rural Crafts in the district. So for, however, as the urban areas are concerned, the proportion of workers is slightly better than Srinagar district and stands at 29.4 percent.

The main object of the table is to give the incidence of literacy in each of the 9 industrial categories of workers and among non-warkers. It was with this object in view that question No. 6, viz. Literacy and Education, was included in the Enumeration Slip.

A literate person was defined as one who could both read and write and not one who could only read or only write in any language. With a view to ensuring effective application of this definition, instructions were issued to the census staff to verify, in each case, whether the person claiming to be literate was able to read a simple letter either in print or manuscript and whether further he could write a simple letter. In the case of literate persons, a further enquiry was to be made, whether the person enumerated had passed any recognised examination as proof of an educational standard attained. The name of the highest examination passed was to be recorded against question 6 of the Enumeration Slip.

It may be remarked here that the first part of the table relating to urban areas is designed to collect more detailed information about the educational levels of the workers and non-workers. Part-B of the table, in which data relating to rural areas has been presented, provides only three broad categories of literate persons, namely, literate without educational qualifications, those who have passed primary or junior basic examination and those possessing matriculation and higher qualifications.

Part A of the table shows that there are 37,511 workers in a total population of 127,776 inhabiting the urban areas of the district. The workers include 17,574 illiterate persons or 46.9 percent of the total working population. Literate workers without educational levels comprise 20.3 percent and those whose educational qualifications are limited to primary or junior basic examinations constitute another 10.7 percent of the total number of workers in the district. It follows that literates with higher educational qualifications claim no less than 22.1 percent of the working population. As will be seen from the table, a large majority of these consist of workers who have passed matriculation or higher secondary examination only.

The preceding paragraph gives an analysis of the distribution of all urban workers by different levels of education. An examination of the sex-wise data reveals that the proportions of female literate workers are very low in all categories of educational levels particularly among those who have passed diplomas or degrees.

Table B—IV

The table has been split up into three parts so as to indicate separately the industrial classification by sex and (i) class of worker of persons at work at household industry (ii) class of worker of persons at work in non-household industry, trade, business, profession or service and (iii) divisions, major groups and minor groups of persons at work other than cultivation. All the three parts have been prepared down to tehsil level, but the branch of industry has been given upto major groups for the entire district in parts (a) and (b) and upto minor groups in part (c) of the table. So far as the data relating to tehsils is concerned, the figures have been presented upto divisions only in all the three parts.

Part-A of the table shows that the household industries returned from the rural and urban sectors of Jammu District fall under two major groups of Division 0 and 15 major groups of Division 2 & 3. Full description of the industries represented by these divisions and major groups is given below :—

Division	0	Agriculture, Livestock, Forestry, Fishing and Hunting
Major group	02	Forestry and Logging
	04	Livestock and Hunting
Division	2 & 3	Manufacturing
Major group	20	Foodstuffs
	23	Textile-Cotton
	24	Textile-Jute
	25	Textile-wool

26	Textile-Silk
27	Textile-Miscellaneous
28	Manufacture of Wood and Wood Products
29	Paper and Paper Products
30	Printing and Publishing
31	Leather and Leather Products
33	Chemicals and Chemical Products
34 - 35	Non-Metallic Mineral Products other than Petroleum and Coal
36	Basic Metals and their Products except Machinery and Transport Equipment
38	Transport Equipment
39	Miscellaneous Manufacturing Industries.

As the participation of the members of the household in an industry carried on at home is an indispensable condition for its classification as a household industry, it was not deemed necessary to ascertain the status of such workers except in case of those among them who worked as employees in the household industry of some other households. It is therefore that the distribution of workers in Part-A of the Table has been given by two categories only, namely, employees and others.

An employee was defined as a person who usually works under some other person for salary or wages in cash or kind. Managers, Superintendents etc. who might in their capacity as such be employing or controlling other workers on behalf of their own employers were also treated as employees and not as employers.

The figures given in Part B of the table relate to workers engaged in Categories III and V to IX of Industrial Classification, namely those engaged in :—

III	Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities
V	Manufacturing other than Household Industry
VI	Construction
VII	Trade and Commerce
VIII	Transport, Storage and Communications
IX	Other Services.

Workers of these categories were further subdivided into the following 4 classes : —

1. Employer

An employer was defined as a person who had to employ other persons in order to perform the work (other than cultivation, agricultural labour and household industry) in which he was engaged. In order to properly identify an employer, care was taken to ensure that he was not only responsible for his own personal work but also for giving work to others in connection with the business in which he was engaged.

2. Employee

A person who usually worked under some other person for salary or wages in cash or kind was treated as an employee.

3. Single worker

A single worker was defined as a person who worked by himself but not as Head of household in a Household Industry. The test applied for verifying whether a person could be classed as a single worker was that he should neither have been employed by any one nor himself employed anybody else, not even members of his household, except casually.

4. Family worker

A person who worked without receiving wages in cash or kind in an industry, business or trade conducted mainly by the members of the family was treated as family worker provided that he worked at least one hour every day during the working season. Such of the members of the household who helped solely in the household duties were not treated as family workers.

Part C of the table gives the distribution of workers by three digit industrial classification in respect of workers engaged in household industry and in non-household industry and does not include cultivators and agricultural labourers. A copy of the Standard Industrial Classification giving the description of each division, major group and minor group has been appended as an annexure to Table B-IV, Part—C. It may be remarked here that :—

(a) Minor Groups 000 to 004 and 005 (partly) relating to Category I (Cultivators) and Category II (Agricultural labourers) and

(b) Minor Group 999 (fresh entrants to labour market) relating to non-workers

being outside the scope of this table do not find place in it.

Further, the table does not include such of the minor groups in which the number of workers is less than 1% of the total number of workers given against the concerned division. In case, however, of division 2 & 3, only such minor groups which claim less than 0.5% workers of the division have been omitted. All these minor groups have been listed in the appendix to this table.

Table B—V

The table gives the occupational classification of Categories III to IX, viz. all workers except those employed in agricultural sector.

The term occupation used in the previous Census Reports implied means of subsistence or livelihood or the supporting sector of economy. In 1961, however, a precise connotation has been assigned to this term by making the 'function' or 'exact work' which a person performs in any branch of economic activity as the basis of occupational classification.

The occupational classification is based on the National Classification of Occupations adopted by the Government of India, a copy of which will be found at the end of the table. By this classification, the occupations have been divided into 11 Divisions, 75 Groups and 331 Families.

Following are the limitations of 'National Classification of Occupations' as adopted for Census of 1961 :—

(i) Occupational family '0X4' has been deleated from the N. C. O.

(ii) Occupational families 400-401 relating to Category I (Cultivators) and 414 relating to Category II (Agricultural labourers) do not find place in Table B—V.

(iii) Similarly occupational group X0 and its families X00, X08 and X09 relating to Non-workers (workers without occupations) also do not find place in Table B—V.

(iv) Occupational family '063'has been changed as '069'.

(v) Occupational family '673'—'Teleprinter Operators' is a new addition in the family of occupations

(vi) There have been changes in the description of some occupational families. Correct description of all such cases are listed below :—

010 Chemists except Pharmaceutical Chemists

047 Optometrists and Opticians

072 Statisticians and Actuaries

073 Geographers

202 Ticket sellers and Ticket Inspectors including Ushers and Ticket Collectors (excluding those on moving transport)

211 Typists

280 General and other Ministerial Assistants and Clerks

290 Office Attendants, Ushers, Hall Porters etc. not elsewhere classified

660 Inspectors, Supervisors, Station Masters and Permanent Way Inspectors

690 Ticket Sellers, Ticket Inspectors including Ushers and Ticket Collectors on moving transport

771 Shipwrights and Body Builders (wood)

Like Table B—IV Part—C, families against which the number of workers is less than 1% of the total number of workers in the concerned Division and less than 0.5% in the case of Division 7-8 have been omitted from the table. These have, however, been listed separately in the appendix to the table.

The data has been presented for all such families of National Classification of Occupations as are found in Jammu district separately for total and urban and persons, males and females. So far, however, as the tehsils are concerned, the presentation of the data has been restricted to divisions only.

Table B—VI

The table gives the distribution of urban workers of categories III to IX by broad age groups, sex and educational levels, classified by occupational divisions. The age-groups adopted are the same as those given in Table B-I and B-II.

So far as the educational levels are concerned, the workers have been classified by the standards mentioned in Table B-III Part-A with the difference that no separate column has been provided for illiterate workers.

The table exhibits figures only for occupational divisions but even so it shows the pattern of

educational level of working force and the principal occupations which attract qualified persons.

As the table gives the distribution of urban workers other than those engaged in Cultivation (Category I) or employed as Agricultural labourers (Category II), Division 4 excludes families 400 (culivators owners), 401 (Cultivators Tenants) and 414 (Agricultural labourers). Similarly, group XO of Division X which represents workers without occupations has also been excluded as the table relates to workers only.

Figures of individual occupational divisions by age-groups are not available and have not, therefore, been presented in columns 3 to 5 of the table.

Table B—VII

Table B—VII is designed to indicate the principal and subsidiary work of such of the workers who are engaged in more than one activity.

It has already been indicated in the general note on B-Series tables that four questions were convassed in the Enumeration Slip to ascertain the type of activity in which the person enumerated, if working, was engaged. In the case of a person engaged in more than one activity, the name of the particular activity in which he spent most of the time was also ascertained. This was treated as his principal work and the other activity in which he spent lesser time was regarded as his secondary work.

The table has been split up into two parts. Part A gives the cross tabulated data of persons whose principal and secondary work consist of any two of the following :—

I Cultivation

II Agricultural labour

III Household Industry

It presents the data sex-wise in respect of the district and its rural and urban sectors as also for the areas of its constituent tehsils. The data for the district has been presented in the case of household industry, whether it appears as a principal or subsidiary work, by divisions and major groups. So far, however, as the tehsils are concerned, the presentation of the data has been limited to divisions only.

Major groups of household industry in which the proportion of persons doing secondary work is less than 5% of the number of persons whose principal work is household industry have been omitted from the table. These have, however, been listed separately in the appendix to the table.

Full description of the divisions and major groups has already been given at the end of Table B-IV, Part C.

Part B of the table gives cross tabulated data in respect of principal and secondary work of persons engaged in any of the activities represented by categories III and V to IX (non-household industry). The figures have been presented sex-wise down to the major groups in the case of the district and upto divisions in respect of the tehsils.

Table B—VIII

The table indicates the incidence of unemployment among persons of either sex aged 15 and above. It has been split up into two parts, one relating to the urban areas and the other to the rural sector. Part—A of the table gives the total and sex-wise number by broad age groups and educational levels of unemployed persons in the urban areas and their distribution among those seeking employment for the first time and others who were employed before but are now out of employment and seeking work. The educational levels adopted for this table are the same as those given in Table B—III, Part—A.

Part—B of the table deals with the rural sector of the district and of its constituent tehsils. It gives similar educational levels of unemployed persons of both sexes, aged 15 and above, as given in Table B-III, Part-B.

Table B—IX

The table gives the total and sex-wise distribution of non-workers by broad age groups and the type of activity. The data has been presented separately for the district and its rural and urban sectors as also for each tehsil.

Non-workers have been classified into the following 8 categories : —

1. Full time students or children attending school who do no other work, such as making of articles at home for sale, nor even help their own family cultivation, industry, trade or business on part-time basis.

2. Persons engaged in unpaid home duties (like a house-wife or other adult females) who

do no other work, such as making of articles at home for sale or wages, nor help regularly even on part-time basis in family cultivation, industry, trade or business.

3. Dependents including infants or children and persons permanently disabled from work because of illness or old age.

4. Retired persons other than those re-employed, rentiers, persons living on agricultural or non-agricultural royalty, rent or dividend as also persons of independent means for securing which they do not have to work nor they do any other work.

5. Beggars, vagrants or independent women without indication of source of income and others of un-specified source of existence.

6. Convicts in jails (other than under trial prisoners) who used to work before being apprehended and inmates of penal, mental or charitable institutions.

7. Persons not employed before but seeking employment for the first time.

8. Persons employed before but now out of employment and seeking employment.

Persons who did not work and could not be readily classified in any of the above categories were included in category 5, viz. beggars, vagrants etc. Similarly, persons who were not working at the time of Census but who had been offered work which they had not joined, were classed as dependents and included in category 3.

B-I—WORKERS AND NON-WORKERS CLASSIFIED BY SEX AND BROAD AGE-GROUPS

ANNEXURE TO TABLE B-IV PARTS A, B & C

STANDARD INDUSTRIAL CLASSIFICATION

This Classification groups the industries into

9 Divisions

45 Major Groups

343 Minor Groups

The divisions and major groups with their Code numbers are listed below :—

DIVISIONS

0 Agriculture, Livestock, Forestry, Fishing and Hunting

1 Mining and Quarrying

2 & 3 Manufacturing

4 Construction

5 Electricity, Gas, Water and Sanitary Services

6 Trade and Commerce

7 Transport, Storage and Communication

8 Services

9 Activities not adequately described

MAJOR GROUPS

Division 0—Agriculture, Livestock, Forestry, Fishing and Hunting

00—Field produce and Plantation crops

01—Plantation Crops

02—Forestry and logging

03—Fishing

04—Livestock and Hunting

Division 1—Mining and Quarrying

10—Mining and Quarrying

Division 2 & 3—Manufacturing

20—Foodstuffs

21—Beverages

22—Tobacco Products

23—Textile - Cotton

24—Textile - Jute

25—Textile - Wool

26—Textile - Silk

27—Textile - Miscellaneous

28—Manufacture of Wood and Wood products

29—Paper and Paper Products

30—Printing and Publishing

31—Leather and Leather Products

32—Rubber, Petroleum and Coal Products

33—Chemicals and Chemical Products

34—35—Non-Metallic Mineral Products other than Petroleum and Coal

36—Basic Metals and their products except machinery and transport equipment

37—Machinery (all kinds other than Transport) and Electrical equipment

38—Transport Equipment

39—Miscellaneous Manufacturing Industries

Division 4—Construction

40—Construction

Division 5—Electricity, Gas, Water and Sanitary Services

50—Electricity and Gas

51—Water Supply and Sanitary Services

Division 6—Trade and Commerce

60-63—Wholesale Trade

64-68—Retail Trade

69—Trade and Commerce Miscellaneous

Division 7—Transport, Storage and Communication

70-71—Transport

72—Storage and Warehousing

73—Communications

Division 8—Services

80—Public Services

81—Educational and Scientific Services

82—Medical and Health Services

83—Religious and Welfare Services

84—Legal Services

85—Business Services

86—Community Services and trade and labour associations

87—Recreation Services

88—Personal Services

89—Services (not elsewhere classified)

Division 9—Activities not adequately described

90—Activities unspecified and not adequately described (This includes new entrants to the labour market)

Major Group (Code)	Description	Minor Group (Code)
1	2	3
	Division 0—Agriculture, Livestock, Forestry, Fishing and Hunting	
00	*Field Produce and Plantation Crops*—	
	Production of cereal crops (including Bengal gram) such as rice, wheat, jowar, bajra, maize	000
	Production of pulses, such as arhar, moong, masur, urd, khesari, other gram . .	001
	Production of raw jute and kindred fibre crops	002
	Production of raw cotton and kindred fibre crops	003
	Production of oilseeds, sugarcane and other cash crops	004
	Production of other crops (including vegetables) not covered above . .	005
	Production of fruits and nuts in plantation, vines and orchards	006
	Production of wood, bamboo, cane, reeds, thatching grass, etc. . . .	007
	Production of juice by tapping palms .	008

Major Group (Code) 1	Description 2	Minor Group (Code) 3
	Production of other agricultural produce (including fruits and nuts not covered by code number 006 and flowers) not covered above	009
01	*Plantation Crops—*	
	Production of tea in plantation	010
	Production of coffee in plantation	011
	Production of rubber in plantation	012
	Production of tobacco in plantation	013
	Production of ganja, cinchona, opium	014
	Production of other plantation crops not covered above	015
02	*Forestry and Logging—*	
	Planting, replanting and conservation of forests	020
	Felling and cutting of trees and transportation of logs	021
	Preparation of timber	022
	Production of fuel including charcoal by exploitation of forests	023
	Production of fodder by exploitation of forests	024
	Production of gums, resins, lac, barks, herbs, wildfruits and leaves by the exploitation of forests	025
	Production and gathering of other forest products not covered above	026
03	*Fishing—*	
	Production of fish by fishing in sea	030
	Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries	031
	Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, pond	032
04	*Livestock and Hunting—*	
	Production and rearing of livestock (large heads only) mainly for milk and animal power, such as cow, buffalo, goat	040
	Rearing of sheep and production of wool	041
	Rearing and production of other animals (mainly for slaughter) such as pig	042
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming	043
	Rearing of bees for the production of honey, wax and collection of honey	044
	Rearing of silkworms and production of cocoons and raw silk	045
	Rearing of other small animals and insects	046
	Trapping of animals or games propagation	047
	Production of other animal husbandry products, such as skin, bone, ivory and teeth	048
Division 1—Mining and Quarrying		
10	*Mining and Quarrying—*	
	Mining of Coal	100
	Mining of iron ores	101
	Mining of gold and silver ores	102
	Mining of manganese	103
	Mining of mica	104
	Mining of other non-ferrous metallic ores	105
	Mining of crude petroleum and natural gas	106
	Quarrying of stone (including slate), clay, sand, gravel, limestone	107
	Mining of chemical earth, such as soda ash	108
	Mining and quarrying of non-metallic products not classified above such as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt	109
Division 2 & 3—Manufacturing—		
20	*Foodstuffs—*	
	Production of rice, atta, flour, etc., by milling, dehusking and processing of crops and foodgrains	200
	Production of sugar and syrup from sugarcane in mills	201
	Production of indigenous sugar, gur from sugar cane or palm juice and production of candy	202
	Production of fruit products, such as jam, jelly, sauce and canning and preservation of fruits	203
	Slaughtering, preservation of meat and fish and canning of fish	204
	Production of bread, biscuits, cake and other bakery products	205
	Production of butter, ghee, cheese and other dairy products	206
	Production of edible fats and oils (other than hydrogenated oil)	207
	Production of hydrogenated oils (Vanaspati)	208
	Production of other food-products, such as sweetmeat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge	209
21	*Beverages—*	
	Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery	210
	Production of country liquor	211
	Production of indigenous liquor such as toddy, liquor from mahua, palm juice	212
	Production of other liquors not covered above	213
	Production of aerated and mineral water	214
	Production of ice	215
	Production of ice-cream	216
	Processing of tea in factories	217
	Processing of coffee in curing works	218
	Production of other beverages	219

Major Group (Code)	Description	Minor Group (Code)
1	2	3
22	*Tobacco Products—*	
	Manufacture of bidi	220
	Manufacture of cigars and cheroots	221
	Manufacture of cigarette and cigarette tobacco	222
	Manufacture of hookah tobacco	223
	Manufacture of snuff	224
	Manufacture of jerda and other chewing tobacco	225
	Manufacture of other tobacco products	226
23	*Textile-Cotton—*	
	Cotton ginning, cleaning, pressing and baling	230
	Cotton spinning (other than in mills)	231
	Cotton spinning and weaving in mills	232
	Cotton dyeing, bleaching	233
	Cotton weaving in power looms	234
	Cotton weaving in handlooms	235
	Manufacturing of khadi textile in handlooms	236
	Printing of cotton textile	237
	Manufacturing of cotton nets	238
	Manufacturing of cotton, cordage, rope and twine	239
24	*Textile-Jute—*	
	Jute pressing and baling	240
	Jute spinning and weaving	241
	Dyeing and bleaching of jute	242
	Printing of jute textile	243
	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta	244
25	*Textile-Wool—*	
	Wool baling and pressing	250
	Wool cleaning and processing (Scouring)	251
	Wool spinning and weaving in mill	252
	Wool spining other than in mills	253
	Wool weaving in power loom	254
	Wool weaving in handloom	255
	Embroidery and artwork in woollen textile	256
26	*Textile-Silk—*	
	Spinning and weaving of silk textile in mill	260
	Dyeing and bleaching of silk	261
	Spinning of silk other than in mills	262
	Weaving of silk textile by power loom	263
	Weaving of silk textile by handloom	264
	Printing of silk textile	265
	Manufacture of silk cordage, rope and twine	266
27	*Textile-Miscellaneous—*	
	Manufacture of carpet and all other similar type of textile products	270
	Manufacture of hosiery and other knitted fabrics and garments	271
	Embroidery and making of crepe lace and fringes	272
	Making of textile garments including raincoats and headgear	273
	Manufacture of made up textile goods except wearing apparel, such as curtains, pillow cases, bedding materials, mattress, textile bags	274
	Manufacture of waterproof textile products such as oil cloth, tarpaulin	275
	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling	276
	Manufacture of coir and coir products	277
	Manufacture of umbrellas	278
	Processing and manufacture of textile products not covered above	279
28	*Manufacture of wood and wood products—*	
	Sawing and planing of wood	280
	Manufacture of wooden furniture and fixtures	281
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows	282
	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures	283
	Manufacture of other wooden products such as utensils, toys, artwares	284
	Manufacture of veneer and plywood	285
	Manufacture of plywood products, such as tea chest	286
	Manufacture of boxes and packing cases other than plywood	287
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products	288
	Manufacture of other wood and allied products not covered above	289
29	*Paper and Paper Products—*	
	Manufacture of pulp from wood, rags, waste-paper and other fibres and the conversion of such pulp into any kind of paper and paper board in mill	290
	Manufacture of pulp from wood, rags, waste-paper and other fibres and the conversion of such pulp into any kind of paper and paper board handmade	291
	Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp	292

Major Group (Code)	Description	Minor Group (Code)
1	2	3
30	*Printing and Publishing—*	
	Printing and publishing of newspapers and periodicals	300
	Printing and publishing of books	301
	All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry	302
	All types of binding, stitching, sizing and other allied work connected with binding industry	303
31	*Leather and Leather Products—*	
	Currying, tanning and finishing of hides and skins and preparation of finished leather	310
	Manufacture of shoes and other leather footwear	311
	Manufacture of clothing and wearing apparel (except footwear) made of leather and fur	312
	Manufacture of leather products (except those covered by code Nos. 311,312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles	313
	Repair of shoes and other leather footwear	314
	Repair of all other leather products except footwear	315
32	*Rubber, Petroleum and Coal Products—*	
	Manufacture of tyres and tubes	320
	Manufacture of rubber footwear	321
	Manufacture of rubber goods used for Industrial purposes	322
	Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat	323
	Production of petroleum, kerosene and other petroleum products in petroleum refineries	324
	Production of coaltar and coke in coke oven	325
	Manufacture of other coal and coaltar products not covered elsewhere	326
33	*Chemicals and Chemical Products—*	
	Manufacture of basic industrial chemicals such as acids, alkalis and their salts not elsewhere specified	330
	Manufacture of dyes, paints, colours and varnishes	331
	Manufacture of fertilizers	332
	Manufacture of ammunition, explosives and fire works	333
	Manufacture of matches	334
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap	335
	Manufacture of soap and other washing and cleaning compounds	336
	Manufacture of turpentine, synthetic, resin and plastic products and materials (including synthetic rubber)	337
	Manufacture of common salt	338
	Manufacture of other chemicals and chemical products not covered above (including inedible oils and fats)	336
34	*Non-metallic Mineral Products other than Petroleum and Coal—*	
	Manufacture of structural clay products such as bricks, tiles	340
	Manufacture of cement and cement products	341
	Manufacture of lime	342
	Manufacture of structural stone goods, stone dressing and stone crushing	343
	Manufacture of stonewares, other than images	344
	Manufacture of stone images	345
	Manufacture of plaster of paris and its products	346
	Manufacture of asbestos products	347
	Manufacture of mica products	348
35	Manufacture of earthenware and earthen pottery	350
	Manufacture of chinaware and crockery	351
	Manufacture of porcelain and its products	352
	Manufacture of glass bangles and beads	353
	Manufacture of glass apparatus	354
	Manufacture of earthen image, busts and statues	355
	Manufacture of earthen toys and artwares except those covered by code No. 355	356
	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above	357
	Manufacture of other non-metallic mineral products not elsewhere specified	359
36	*Basic Metals and their Products except Machinery and Transport Equipment—*	
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods	360
	Manufacture including smelting, refining of non-ferrous metals and alloys in basic forms	361
	Manufacture of armaments	362
	Manufacture of structural steel products such as joist, rail, sheet, plate	363
	Manufacture of iron and steel furniture	364
	Manufacture of brass and bell metal products	365
	Manufacture of aluminium products	366

Major Group (Code) 1	Description 2	Minor Group (Code) 3
	Manufacture of metal products (other than of iron brass, bell metal and aluminium) such as tin can	367
	Enamelling, galvanising, plating (including electroplating) polishing and welding of metal products	368
	Manufacture of sundry hardwares such as G. I. Pipe, wire net, bolt, screw, bucket, cutlery. (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37 38 and 39)	369
37	*Machinery (All kinds other than Transport and Electrical Equipment)*—	
	Manufacture and assembling of machinery (other than electrical) except textile machinery	370
	Manufacture and assembling of prime mover and boilers, other than electrical equipment, such as diesel engines, road rollers, tractors	371
	Manufacture of machine tools	372
	Manufacture of textile machinery and accessories	373
	Manufacture of heavy electrical machinery and equipment such as motors, generators, transformers	374
	Manufacture of electric lamps and fans	375
	Manufacture of insulated wires and cables	376
	Manufacture of all kinds of battery	377
	Manufacture of electronic equipment such as radio, microphone	378
	Manufacture of electric machinery and apparatus, appliances not specified above	379
38	*Transport Equipment*—	
	Manufacture, assembly and repairing of locomotives	380
	Manufacture of wagons, coaches, tramways and other rail road equipment other than that covered by code No. 363	381
	Manufacture and assembling of motor vehicles of all types (excepting motor engines)	382
	Manufacture of motor vehicles engines parts and accessories	383
	Repairing and servicing of motor vehicles	384
	Manufacture of bicycles and tricycles and accessories such as saddle, seat frame, gear	385
	Building and repairing of water transport equipment such as ships, boats and manufacture of marine engines	386
	Manufacture and repair of air transport equipment including aeroplanes, aeroengines	387
	Repairing of bicycles and tricycles	388
	Manufacture of other transport equipment not covered above such as animal drawn and hand drawn vehicles	389
39	*Miscellaneous Manufacturing Industries*	
	Manufacture of optical instruments and lenses, opthalmic goods and photographic equipment and supplies	390
	Manufacture of scientific, medical and surgical instruments and equipment and supplies	391
	Assembling and repairing of watches and clocks	392
	Manufacture of jewellery, silverware and wares using gold and other precious metals	393
	Manufacture and tuning of musical instruments	394
	Manufacture of stationery articles not covered elsewhere such as pencil, penholder, fountain pen	395
	Manufacture of sports goods	396
	Manufacture and repair work of goods not assignable to any othe group	399
Division 4—Construction		
40	*Canstruction*—	
	Construction and maintenance of building including erection, flooring, decorative constructions, electrical and sanitary installations	400
	Construction and maintenance of roads, railways, bridges, tunnels	401
	Construction and maintenance of telegraph and telephone lines	402
	Construction and maintenance of water ways and water reservoirs such as bund, embankments, dam, canal, tank, tubewells, wells	403
Division 5—Electricity, Gas, Water and Sanitary Services		
50	*Electricity and Gas*—	
	Generation and transmission of electric energy	500
	Distribution of electric energy	501
	Manufacture of gas in gas works and distribution to domestic and industrial consumers	502
51	*Water Supply and Sanitary Services*—	
	Collection, purification and distribution of water to domestic and industrial consumers	510
	Garbage and sewage disposal, operation of drainage system and all other types of work connected with public health and sanitation	511
Division 6—Trade and Commerce		
60	*Wholesale Trade*	
	Wholesale trading in cereals and pulses	600
	Wholesale trading in vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry and other foodstuffs (not covered elsewhere)	601

Major Group (Code)	Description	Minor Group (Code)
1	2	3
	Wholesale trading in all kinds of fabrics, and textiles products such as garments, hessian, gunny bag, silk and woollen yarn, shirtings, suitings, hosiery products	602
	Wholesale trading in beverages, such as tea (leaf) coffee (seed and powder) aerated water	603
	Wholesale trading in intoxicants such as wines, liquors	604
	Wholesale trading in other intoxicants such as opium, ganja etc.	605
	Wholesale trading in tobacco, bidi, cigarettes and other tobacco products	606
	Wholesale trading in animals	607
	Wholesale trading in straw and fodder	608
61	Wholesale trading in medicines and chemicals	610
	Wholesale trading in fuel and lighting products such as coke, coal, kerosene, candle	611
	Wholesale trading in toilets, perfumery and cosmetics	612
	Wholesale trading in metal, porcelain and glass utensils, crockery, chinaware	613
	Wholesale trading in wooden, steel and other metallic furniture and fittings	614
	Wholesale trading in footwear	615
	Wholesale trading in tyres, tubes and allied rubber products	616
	Wholesale trading in petrol, mobiloil and allied products	617
	Wholesale trading in other household equipment not covered above	618
62	Wholesale trading in bricks, tiles and other building materials	620
	Wholesale trading in wood, bamboo, cane thatches and similar products	621
63	Wholesale trading in paper and other stationery goods	630
	Wholesale trading in agricultural and industrial machinery equipment and tools and appliances other than electrical	631
	Wholesale trading in electrical machinery and equipment like motor, battery, electric fan, bulb	632
	Wholesale trading in all kinds of transport and storage equipment	633
	Wholesale trading in skins, leather and fur	634
	Wholesale trading in clocks, eye glasses, frames	635
	Wholesale trading in hardware and sanitary equipment	636
	Wholesale trading in scientific, medical and surgical instruments	637
	Wholesale trading in precious metals and stones, gold and silverwares and jewellery	638
	Wholesale trading in all goods not covered above	639
64	*Retail Trade—*	
	Retail trading in cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry	640
	Retail trading in beverages such as tea (leaf), coffee (seed and powder), aerated water	641
	Retail trading in intoxicants such as wines, liquors	642
	Retail trading in other intoxicants such as opium, ganja etc.	643
	Retail trading in tobacco, bidi, cigarettes and other tobacco products	644
	Retail trading in fuel, such as coke, coal, firewood and kerosene	645
	Retail trading in foodstuffs like sweetmeat, condiments, cakes, biscuits etc.	646
	Retail trading in animals	647
	Retail trading in straw and fodder	648
65	Retail trading in fibres, yarns, dhoti, saree, readymade garments of cotton, wool, silk and other textiles and hosiery products; (this includes retail trading in piece goods of cotton, wool, silk and other textiles)	650
	Retail trading in toilet goods, perfumes and cosmetics	651
	Retail trading in medicines and chemicals	652
	Retail trading in footwear, head-gear such as hat, umbrella, shoes and chappals	653
	Retail trading in tyres, tubes and allied rubber products	654
	Retail trading in petrol, mobiloil and allied products	655
66	Retail trading in wooden, steel and other metallic furniture and fittings	660
	Retail trading in stationery goods and paper	661
	Retail trading in metal, porcelain and glass utensils	662
	Retail trading in earthenware and earthen toys	663
	Retail trading in other household equipment not covered above	664
67	Retail trading in bricks, tiles and other building materials	670
	Retail trading in hardware and sanitary equipment	671
	Retail trading in wood, bamboo cane, bark and thatches	672
	Retail trading in other building materials	673
68	Retail trading in agricultural and industrial machinery equipment, tools and appliances	680

Major group (Code) 1	Description 2	Minor Group (Code) 3
	Retail trading in transport and storage equipments	681
	Retail trading in electrical goods like electric fans, bulb, etc.	682
	Retail trading in skins, leather and furs and their products excluding footwear and head-gear	683
	Retail trading in clock and watch, eye glass, frame	684
	Retail trading in scientific, medical and surgical instruments	685
	Retail trading in precious stones and jewellery	686
	Retail trading in musical instruments, gramophone record, pictures and paintings including curio dealing	687
	Book-selling	688
	Retail trading in goods unspecified	689
69	*Trade and Commerce Miscellaneous*—	
	Importing and exporting of goods and commodities	690
	Real estate and properties	691
	Stocks, shares and futures	692
	Providents and insurances	693
	Money lending (indigenous)	694
	Banking and similar type of financial operation	695
	Auctioneering	696
	Distribution of motion pictures	697
	All other activities connected with trade and commerce not covered above, including hiring out of durable goods such as electric fan, microphone, rickshaw etc.	699
Division 7—Transport, Storage and Communication		
70	*Transport*—	
	Transporting by railways	700
	Transporting by tramway and bus service	701
	Transporting by motor vehicles (other than omnibus)	702
	Transporting by road through other means of transport such as hackney carriage, bullock cart, ekka	703
	Animal transporting by animals such as horses, elephant, mule, camel	704
	Transporting by man such as carrying of luggage, hand cart driving, rickshaw pulling, cycle rickshaw driving	705
	Transporting by boat, steamer, ferry, etc. by river, canal	706
	Tranporting by boat, steamer, ship, cargo boat by sea or ocean	707
	Transporting by air	708
	Transporting by other means not covered above	709
71	Services incidental to transport such as packing, carting travel agency	710
72	*Storage and Ware Housing*—	
	Operation of storage such as ware-houses	720
	Operation of storage such as cold storage	721
	Operation of storage of other type	722
73	*Communication*—	
	Postal, telegraphic, wireless and signal communications	730
	Telephone communication	731
	Information and broadcasting	732
Division 8—Services		
80	*Public Services*—(This does not include Govt., Quasi-Govt. or local body activities, other than administrative, in such fields as transport, communication, information and broadcasting, education and scientific services, health, industries, production, construction, marketing and operation of financial institution each of which is classified in the appropriate industry groups)	
	Public services in Union and State army including territorial corps and volunteer corps	800
	Public Service in Navy	801
	Public Service in Air Force	802
	Public Service in Police	803
	Public Service in administrative departments and offices of Central Government	804
	Public Service in administrative departments and offices of quasi-Government organisation, municipalities, local boards, etc.	805
	Public Services in administrative departments and offices of State Governments	809
81	*Educational and Scientific Services*—	
	Educational services such as those rendered by technical colleges, technical schools and similar technical and vocational institutions	810
	Educational services such as those rendered by colleges, schools and similar other institutions of non-technical type	811

Major Group (Code) 1	Description 2	Minor Group (Code) 3
	Scientific services and research institutions not capable of classification under any individual group	812
82	*Medical and Health Services*—	
	Public health and medical services rendered by organisations and individuals such as by hospitals, sanatoria, nursing homes, maternity and child welfare clinic as also by hakimi, unani, ayurvedic, allopathic and homeopathic practitioners	820
	Veterinary services rendered by organisations and individuals	821
83	*Religious and Welfare Services*—	
	Religious services rendered by religious organisations and their establishments maintained for worship or promotion of religious activities, includes missions, ashrams and other allied organisations	830
	Religious and allied services rendered by pandit, priest, procepter, fakir, monk	831
	Welfare services rendered by organisations operating on a non-profit basis for the promotion of welfare of the community such as relief societies, red-cross organisation for the collection and allocation of contributions for charity	832
84	*Legal Services*—	
	Legal services rendered by barrister, advocate, solicitor, mukteer, pleader, mukurie, munshi	840
	Matrimonial services rendered by organisations and individuals	841
85	*Business Services*—	
	Engineering services rendered by professional organisations or individuals	850
	Business services rendered by organisations of accountants, auditors, book-keepers or like individuals	851
	Business services rendered by professional organisations or individuals such as those of advertising and publicity agencies	852
	Business services rendered by professional organisations or individuals such as those rendered by news-agency, newspaper correspondent, columnist, journalists, editors, authors	853
86	*Community Services and Trade and Labour Association*—	
	Services rendered by trade associations, chambers of commerce, trade unions and similar other organisations	860
	Services rendered by civic, social, cultural, political and fraternal organisations such as rate payers association, club, library	861
	Community services such as those rendered by public libraries, museums, botanical and zoological gardens etc.	862
87	*Recreation Services*—	
	Production of motion picture and allied services such as processing, editing, etc.	870
	Recreation services rendered by cinema houses by exhibition of motion pictures	871
	Recreation services rendered by organisations and individuals such as those of theatres, opera companies, ballet and dancing parties, musicians, exhibitions, circus, carnivals	872
	Recreation services rendered by indoor and outdoor sports by organisations and individuals including horse, motor, etc.	873
88	*Personal Services*—	
	Services rendered to households such as those by domestic servants, cooks	880
	Services rendered to households such as those by governess, tutor, private secretary	881
	Services rendered by hotels, boarding houses, cafes, restaurants and similar other organisations to provide lodging and boarding facilities	882
	Laundry services rendered by organisations and individuals. This includes all types of cleaning, dyeing, bleaching, drycleaning services	883
	Hair-dressing, other services rendered by organisation and individuals such as those by barber, hair-dressing saloon and beauty shops	884
	Services rendered by portrait and commercial photographic studios	885
89	*Services (Not elsewhere classified)*—	
	Services rendered by organisations or individuals not elsewhere classified	890
	Division 9—Activities not adequately described—	
90	Activities unspecified and not adequately described including activities of such individuals who fail to provide sufficient information about their industrial affiliation to enable them to be classified	900
	Fresh entrants to the Labour Market	999

B-V—OCCUPATIONAL CLASSIFICATION BY SEX OF PERSONS AT WORK OTHER THAN CULTIVATION

Note—Families having less than 1% of the workers of the respective Division, (less than 0.5% in the case of families of Division 7—8) have not been shown in this table. Divisions thus effected are marked with an asterisk (*).

ANNEXURE TO TABLE—B—V

NATIONAL CLASSIFICATION OF OCCUPATIONS

(CODE STRUCTURE)

which classifies occupations into

331 Occupational Families (three digit code numbers)

75 Occupational Groups (two digit code numbers)

11 Occupational Divisions (One digit code numbers)

Divisions, Groups and Families

0 Professional, Technical and Related Workers
Workers in this division perform various religious, educational, legal, artistic and other literary functions; carry out research in engineering and scientific subjects and utilise scientific knowledge and methods to solve technological, economic, social, industrial and other problems.

00 Architects, Engineers and Surveyors

000 Architects
001 Civil Engineers (including overseers)
002 Mechanical Engineers
003 Electrical Engineers
004 Chemical Engineers
005 Metallurgical Engineers
006 Mining Engineers
007 Surveyors
009 Architects, Engineers and Surveyors, n. e. c.

01 Chemists, Physicists, Geologists and other Physical Scientists

010 Chemists except Pharmaceutical Chemists
011 Pharmaceutical Chemists
012 Physicists
013 Meteoroligists
014 Geologists and Geophysists
015 Mathematicians
019 Chemists, Physicists, Geologists and other Physical Scientists, n. e. c.

02 Biologists, Veterinarians, Agonomists and Related Scientists

020 Biologists and Animal Scientists
021 Veterinarians
022 Silviculturists
023 Agronomists and Agricultural Scientists
029 Biologists, Veterinarians, Agronomists and Related Scientists, n. e. c.

03 Physicians, Surgeons and Dentists

030 Physicians and Surgeons, Allopathic
031 Physicians, Ayurvedic
032 Physicians, Homeopathic
033 Physicians, other
034 Physiologists
035 Dentists
039 Physicians, Surgeons and Dentists, n. e. c.

04 Nurses, Pharmacists and other Medical and Health Technicians

040 Nurses
041 Midwives and Health Visitors
042 Nursing Attendants and Related Workers
043 Pharmacists and Pharmaceutical Technicians
044 Vaccinators
045 Physiotherapists, Masseurs and Related Technicians
046 Sanitation Technicians
047 Optometrists and Opticians
049 Medical and Health Technicians, n. e. c. (excluding Laboratory Assistants see *091*).

05 Teachers

050 Teachers, University
051 Teachers, Secondary Schools
052 Teachers, Middle and Primary Schools
053 Teachers, Nursery and Kindergarten Schools
059 Teachers, n. e. c.

06 Jurists

060 Judges and Magistrates
061 Legal Practitioners and Advisers
062 Law Assistants
069 Jurists and Legal Technicians, n. e. c. (including petition writers)

07 Social Scientists and Related Workers

070 Economists
071 Accountants and Auditors
072 Statisticians and Actuaries
073 Geographers
074 Psychologists
075 Personnel Specialists
076 Labour and Social Welfare Workers
077 Sociologists and Anthropologists
078 Historians, Archeologists, Political Scientists and Related Workers
079 Social Scientists and Related Workers, n. e. c.

08 Artists, Writers and Related Workers

080 Authors
081 Editors, Journalists and Related Workers

ANNEXURE TO TABLE B—V—*contd.*

082 Translators, Interpreters and Language Specialists

083 Painters, Decorators and Commercial Artists

084 Sculptors and Modellers

085 Actors and Related Workers

086 Musicians and Related Workers

087 Dancers and Related Workers

089 Artists, Writers and Related Workers, n. e. c.

09 *Draughtsmen and Science and Engineering Technicians, n. e. c.*

090 Draughtsmen

091 Laboratory Assistants

099 Science and Engineering Technicians, n. e. c.

0x *Other Professional, Technical and Related Workers*

0x0 Ordained Religious Workers

0x1 Non-ordained Religious Workers

0x2 Astrologers, Palmists and Related Workers

0x3 Librarians, Archivists and Related Workers

0x9 Other Professional, Technical and Related Workers, n. e. c.

Administrative, Executive and Managerial Workers

Workers in this Division formulate Government Policies and execute and implement government decisions, rules and regulations and plan, organise, supervise and co-ordinate activities of economic enterprise in production of goods or performance of services. Excluded from this Division are administrative and managerial occupations in farming (Group 40) Professional, Technical and Related Workers (Division-0) and Clerical Workers (Division-2)

10 *Administrators and Executive Officials, Government*

100 Administrators and Executive Officials, Central Government

101 Administrators and Executive Officials, State Government

102 Administrators and Executive Officials, Local Bodies

103 Administrators and Executive Officials, Quasi-Government

104 Village Officials

109 Administrators and Executive Officials, Government, n. e. c.

11 *Directors and Managers, Wholesale and Retail Trade*

110 Directors and Managers, Wholesale Trade

111 Directors and Managers, Retail Trade

12 *Directors, Managers and Working Proprietors, Financial Institutions*

120 Directors, Managers and Working Proprietors, Banks

121 Directors, Managers and Working Proprietors, Insurance

129 Directors, Managers and Working Proprietors, Financial Institutions, n. e. c.

13 *Directors, Managers and Working Proprietors, Other*

130 Directors, Managers and Working Proprietors, Minning, Quarrying and Well Drilling

131 Directors, Managers and Working Proprietors, Construction

132 Directors, Managers and Working Proprietors, Electricity, Gas, Water and Sanitary

133 Directors, Managers and Working Proprietors, Manufacturing

134 Directors, Managers and Working Proprietors, Transport and Communication

135 Directors, Managers and Working Proprietors, Recreation, Entertainment and Catering Services

136 Directors, Managers and Working Proprietors, Other Services

139 Directors, Managers and Working Proprietors, n. e. c.

2 Clerical and Related Workers

Workers in this division maintain account books and receive and disburse cash, write shorthand, typewrite records and operate tele-printer; operate various office machines; perform clerical duties; and attend to routine unskilled tasks in office.

20 *Book-Keepers and Cashiers*

200 Book-keepers, Book-keeping and Accounts Clerks

201 Cashiers

202 Ticket Sellers and Ticket Inspectors including Ushers and Ticket Collectors (Excluding those on moving transport)

21 *Stenographers and Typists*

210 Stenographers

211 Typists

22 *Office Machine Operators*

220 Computing Clerks and Calculating Machine Operators

221 Punch Card Machine Operators

229 Office Machine Operators n. e. c.

28 *Clerical Workers Miscellaneous*

280 General and other Ministerial Assistants and Clerks

289 Miscellaneous Office Workers including Record keepers, Muharrers, Despatchers, Packers and Binders of Office papers

29 *Unskilled Office Workers*

290 Office attendants, Ushers, Hallporters, etc. n. e. c.

3 Sales Workers

Workers in this Division own wholesale or retail trade establishments and are engaged in activities connected with buying and selling of goods and services and lending money.

ANNEXURE TO TABLE B—V—*contd.*

30 *Working Proprietors, Wholesale and Retail Trade*

300 Working Proprietors, Wholesale Trade

301 Working Proprietors, Retail Trade

31 *Insurance and Real Estate Salesmen, Salesmen of Securities and Services and Auctioneers*

310 Agents and Salesmen, Insurance

311 Agents, Brokers and Salesmen, Real Estate

312 Brokers and Agents, Securities and Shares

313 Auctioneers

314 Valuers and Appraisers

319 Insurance and Real Estate Salesmen, Salesmen of Securities and Services, and Auctioneers, n. e. c.

32 *Commercial Travellers and Manufacturer's Agents*

320 Commercial Travellers

321 Manufacturer's Agents

329 Commercial Travellers and Manufacturer's Agents, n. e. c.

33 *Salesmen, Shop Assistants and Related Workers*

330 Salesmen and Shop Assistants, Wholesale and Retail Trade

331 Hawkers, Pedlars and Street Vendors

339 Salesmen, Shop Assistants and Related Workers, n.e.c.

34 *Money-Lenders and Pawn-Brokers*

340 Money-lenders (including indigenous Bankers)

341 Pawn-Brokers

4 Farmers, Fishermen, Hunters, Loggers and Related Workers

Workers in this Division manage or cultivate farms and plantations; rear animals, birds and insects; hunt and trap wild animals, birds and other game; catch, cultivate and cure fish; gather shell, sponge and pearls; develop, protect and exploit forest resources and perform other related functions.

40 *Farmers and Farm Managers*

400 Cultivators (Owners)

401 Cultivators (Tenants)

402 Farm Managers, Inspectors and Overseers

403 Planters and Plantation Managers

404 Farmers and Farm Managers, Animals, Birds and Insects Rearing

409 Farmers and Farm Managers, n.e.c.

41 *Farm Workers*

410 Farm Machinery Operators

411 Farm Workers, Animals, Birds and Insects Rearing

412 Gardners (malis)

413 Tappers (Palm Rubber trees, etc.)

414 Agricultural Labourers

415 Plantation Labourers

419 Farm Workers n.e.c.

42 *Hunters and Related Workers*

420 Hunters

421 Trappers

429 Hunters and Related Workers, n.e.c.

43 *Fishermen and Related Workers*

430 Fishermen, Deep Sea

431 Fishermen, Inland and Coastal Waters

432 Conch and Shell gatherers, Sponge and Pearl Divers

439 Fishermen and Related Workers, n.e.c.

44 *Loggers and Other Forestry Workers*

440 Forest Rangers and Related Workers

441 Harvesters and Gatherers of Forest Products including lac (except logs)

442 Log Fellers and Wood Cutters

443 Charcoal Burners and Forest Product Processers

449 Loggers and Other Forestry Workers, n.e.c.

5 Miners, Quarrymen and Related Workers

Workers in this division extract mineral products from under ground or by surface excavation, refine and treat them to obtain desired grade and quality.

50 *Miners and Quarrymen*

500 Miners

501 Quarrymen

502 Drillers, Mines and Quarries

503 Short Firers

509 Miners and Quarrymen, n.e.c.

51 *Well Drillers and Related Workers*

510 Well Drillers, Petroleum and Gas

511 Well Drillers, Other than Petroleum and Gas

52 *Mineral Treaters*

520 Mineral Treators

59 *Miners, Quarrymen and Related Workers, n.e.c.*

590 Miners, Quarrymen and Related Workers n.e.c.

6 Workers in Transport and Communication Occupations

Workers in this division, supervise, control and operate transport services for transporting passengers and freight; and supervise and maintain communication services on land, water or in air.

60 *Deck Officers, Engineer Officers and Pilots, Ship*

600 Deck Officers and Pilots, Ship

601 Ship Engineers

61 *Deck and Engine-Room Ratings (Ship), Barge Crews and Boatmen*

610 Deck Ratings (Ship), Barge, Crews and Boatmen

ANNEXURE TO TABLE B—V—*contd.*

611 Engine-Room Ratings, Firemen and Oilers, Ship

62 Aircraft Pilots, Navigators and Flight Engineers

620 Aircraft Pilots

621 Flight Engineers

622 Flight Navigators

63 Drivers and Firemen, Railway Engine

630 Drivers

631 Firemen

64 Drivers, Road Transport

640 Tramcar Drivers

641 Motor Vehicle and Motor Cycle Drivers

642 Cycle Rickshaw Drivers and Rickshaw Pullers

643 Animal Drawn Vehicle Drivers

649 Drivers, Road Transport, n.e.c. (including Palki and Doli Bearers)

65 Conductors, Guards and Brakesmen (Railway)

650 Conductors

651 Guards

652 Brakesmen

66 Inspectors, Supervisors, Traffic Controllers and Despatchers, Transport

660 Inspectors, Supervisors, Station Masters and Permanent Way Inspectors

661 Traffic Controllers

662 Signalmen and Pointsmen

67 Telephone, Telegraph and Related Telecommunication Operaters

670 Telephone Operators

671 Telegraphists and Signallers

672 Radio Communication and Wireless Operators

673 Teleprinter Operators

679 Telephone, Telegraph and Related Tele-communication Operators, n.e.c.

68 Postmen and Messangers

680 Postmen

681 Messangers (including Dak Peons)

69 Workers in Transport and Communication Occupations n.e.c.

690 Ticket Sellers, Ticket Inspectors, including Ushers & Ticket Collectors on moving transport

691 Conductors, Road Transport

692 Workers in Transport Occupations, n.e.c.

693 Inspectors, Traffic Controllers and Despatchers, Communication

694 Workers in Communication Occupations, n.e.c.

7-8 Craftsmen, Production Process Workers and Labourers not Elsewhere Classified

Workers in these divisions process, assemble and shape various substances to manufacture articles or produce goods; install, maintain and repair machines and equipment; construct, maintain and repair machines and equipment; construct, maintain and repair, buildings, highways, bridges and other structures; pack and store goods and handle material & perform various other tasks in crafts, production and related processes. Included are Labourers not elsewhere classified.

70 Spinners, Weavers, Knitters, Dyers and Related Workers

700 Fibre Preparers, Ginners, Cleaners, Scourers, etc.

701 Blow-room Workers and Carders

702 Spinners, Piecers and Winders

703 Warpers and Sizers

704 Drawers and Weavers

705 Pattern Card Preparers

706 Bleachers, Dyers and Finishers (excluding Printers)

707 Knitters and Lace Makers

708 Carpet Makers and Finishers

709 Spinners, Weavers, Knitters, Dyers and Related Workers, n.e.c.

71 Tailors, Cutters, Furriers and Related Workers

710 Tailors, Dress Makers and Garment Makers

711 Hat and Head-gear Makers

712 Furriers

713 Upholsterers and Related Workers

714 Pattern Makers, Markers and Cutters, Textile Products, Leather Garments and Gloves

715 Sewers, Embroiderers and Darners, Textile and Fur Products

719 Tailors, Cutters, Furriers and Related Workers, n.e.c.

72 Leather Cutters, Lasters and Sewers (Except Gloves and Garments) and Related Workers

720 Shoe makers and shoes repairers

721 Cutters, Lasters, Sewers, Footwear and Related Workers

722 Harness and Saddle Makers

729 Leather Cutters, Lasters and Sewers (except Gloves and Garments) and Related Workers, n.e.c.

73 Furnacemen, Rollers, Drawers, Moulders and Related Metal Making and Treating Workers

730 Furnacemen, Metal

731 Annealers, Temperers and Related Heat Treaters

732 Rolling Mill Operators, Metal

733 Blacksmiths, Hammersmiths and Forgemen

734 Moulders and Coremakers

735 Metal Drawers and Extruders

ANNEXURE TO TABLE B—V—*contd.*

739 Furnacemen, Rollers, Drawers, Moulders and Related Metal-Making and Treating Workers, n.e.c.

Precision Instrument Makers, Watch Makers, Jewellers and Related Workers

740 Precision Instrument Makers, Watch and Clock Makers and Repairmen

741 Jewellers, Goldsmiths and Silversmiths

742 Jewellery Engravers

75 Tool-Makers, Machinists, Plumbers, Welders, Platers and Related Workers

750 Fitter-Machinists, Tool-makers and Machine Tool Setters

751 Machine Tool Operators

752 Fitter-Assemblers and Machine Erectors (Except Electrical and Precision Instrument Fitter-Assemblers)

753 Mechanics-Repairmen (Except Electrical and Precision Instrument Repairmen)

754 Sheet Metal Workers

755 Plumbers and Pipe Fitters

756 Welders and Flame Cutters

757 Metal Plate and Structural Metal Workers

758 Electro-Platers, Dip Platers and Related Workers

759 Tool-Makers, Machinists, Plumbers, Welders, Platters and Related Workers n.e.c. (including Metal-Engravers other than printing)

76 Electricians and Related Electrical and Electronics Workers

760 Electricians, Electrical Repairmen and Related Electrical Workers

761 Electrical and Electronics Fitters

762 Mechanics-Repairmen, Radio and Television

763 Installers and Repairmen, Telephone and Telegraph

764 Linemen and Cable Jointers

769 Electricians and Related Electrical and Electronics Workers, n.e.c.

77 Carpenters, Joiners, Cabinet Makers, Coopers and Related Workers

770 Carpenters, Joiners, Pattern Makers (Wood)

771 Shipwrights and Body Builders (Wood)

772 Sawyers and Wood Working Machinists

773 Coach and Body Builders

774 Cart Builders and Wheel Wrights

775 Cabinet Makers

779 Carpenters, Joiners, Cabinet Makers, Cooper and Related Workers, n. e. c.

78 Painters and Paper Hangers

780 Painters and Paper Hangers

79 Bricklayers, Plasterers and Construction Workers, n. e. c.

790 Stone Cutters, Stone Carvers and Stone Dressers

791 Bricklayers, Plasterers and Masons

792 Glaziers

793 Cement Finishers and Terrazzo and Mosaic Workers

794 Hut Builders and Thatchers

795 Well Diggers

799 Bricklayers, Plasterers and Construction Workers, n. e. c.

80 Compositors, Printers, Engravers, Book Binders and Related Workers

800 Type-setting Machine Operators

801 Compositors

802 Proof-Readers and Copy Holders

803 Printers (Paper)

804 Printers (Textile)

805 Photo-Litho Operators, Photo-Lithographers

806 Engravers, Etchers and Block Makers (Printing)

807 Stereotypers

808 Book Binders

809 Compositors, Printers, Engravers, Book Binders and Related Workers, n. e. c.

81 Potters, Kilnmen, Glass and Clay Formers and Related Workers

810 Furnacemen, Kilnmen and Ovenmen

811 Potters and Related Clay Formers

812 Blowers and Benders, Glass

813 Moulders and Pressers, Glass

814 Grinders, Cutters, Decorators and Finishers

815 Pulverisors and Mixers, Cement, Clay and Other Ceramics

819 Potters, Kilnmen, Glass and Clay Formers and Related Workers, n. e. c.

82 Millers, Bakers, Brewmasters and Related Food and Beverage Workers

820 Millers, Pounders, Huskers and Parchers, Grains and Related Food Workers

821 Crushers and Pressers, Oil Seeds

822 Dairy Workers (Non-Farm)

823 Khandsari, Sugar and Gur Makers

824 Bakers, Confectioners, Candy and Sweetmeat Makers

825 Makers of Aerated Water and Brewers

826 Food Canners, Preservers and Related Workers

827 Butchers

828 Coffee and Tea Blenders and Related Workers

829 Millers, Bakers, Brewmasters and Related Food and Beverage Workers, n. e. c.

ANNEXURE TO TABLE B—V—*concld.*

83 *Chemical and Related Process Workers*

830 Batch and Continuous Still Operators

831 Cookers, Roasters and Other Heat Treaters, Chemical and Related Processes

832 Crushers, Millers and Calenderers, Chemical and Related Processes

833 Paper Pulp Preparers

834 Paper Makers

839 Chemical and Related Process Workers, n. e. c.

84 *Tobacco Preparers and Products Makers*

840 Curers, Graders and Blenders, Tobacco

841 Cigarette Machine Operators

842 Cheroot, Cigar and Bidi Makers

843 Snuff and Zarda Makers

849 Tobacco Preparers and Product Makers, n. e. c.

85 *Craftsmen and Production Process Workers, n. e. c.*

850 Basketry Weavers and Related Workers

851 Tyre Builders, Vulcanisers and Related Rubber Products Makers

852 Plastics Products Makers

853 Tanners, Fellmongers, Pelt Dressers and Related Workers

854 Photographic Dark Room Workers

855 Makers of Musical Instruments and Related Workers

856 Paper Products Makers

859 Craftsmen and Production Process Workers, n. e. c.

86 *Testers, Packers, Sorters and Related Workers*

860 Checkers, Testers, Sorters, Weighers and Counters

861 Packers, Labellers and Related Workers

87 *Stationary Engine and Excavating and Lifting Equipment Operators and Related Workers*

870 Operators, Stationary Engines and Related Equipment

871 Boilermen and Firemen

872 Crane and Hoist Operators

873 Riggers and Cable Splicers

874 Operators of Earth-moving and Other Construction Machinery, n. e. c.

875 Materials-handling Equipment Operators

876 Oilers and Greasers, Stationary Engines, Motor Vehicles and Related Equipment

879 Stationary Engine and Excavating and Lifting Equipment Operators and Related Workers, n. e. c.

89 *Labourers, n. e. c.*

890 Loaders and Unloaders

891 Labourers, n. e. c.

9 Service, Sport and Recreation Workers

Workers in this Division render protective, personal and domestic services, take photographs, operate cameras and are engaged in sport and recreational activities

90 *Fire Fighters, Policemen, Guards and Related Workers*

900 Fire Fighters and Related Workers

901 Police Constables, Investigators and Related Workers

902 Customs Examiners, Patrollers and Related Workers

903 Watchmen and Chowkidars

909 Fire Fighters, Policemen, Guards and Related Workers, n. e. c.

91 *House Keepers, Cooks, Maids and Related Workers*

910 House Keepers, Matrons, Stewards (Domestic and Institutional)

911 Cooks, Cook-Bearers (Domestic and Institutional)

912 Butlers, Bearers, Waiters, Maids and Other Servants (Domestic)

913 Ayas, Nurse-maids

919 House Keepers, Cooks, Maids and Related Workers, n. e. c.

92 *Waiters, Bartenders and Related Workers*

920 Waiters, Bartenders and Related Workers (Institutional)

93 *Building Care-Takers, Cleaners and Related Workers*

930 Building Care-Takers

931 Cleaners, Sweepers and Watermen

94 *Barbers, Hairdressers, Beauticians and Related Workers*

940 Barbers, Hairdressers, Beauticians and Related Workers

95 *Launderers, Dry Cleaners and Pressers*

950 Laundrymen, Washermen and Dhobies

951 Dry-cleaners and Pressers

96 *Athletes, Sportsmen and Related Workers*

960 Athletes, Sportsmen and Related Workers

97 *Photographers and Related Camera Operators*

970 Movie Camera Operators

979 Other Photographers

99 *Service, Sport and Recreation Workers, n. e. c.*

990 Embalmers and Undertakers

999 Service, Sport and Recreation Workers, n. e. c.

X Workers not Classifiable by Occupation

Workers classified in this Division are those persons seeking employment who are literates, but have not received any professional, technical or vocational training or work experience; persons reporting occupations that cannot be identified; persons reporting occupations not sufficiently described to permit classification and workers not reporting any occupations. Excluded are those persons seeking employment only in specific occupations.

x0 *Workers Without Occupation*

x00 Workers, without Occupations; Matriculates and above

x08 Workers without Occupations, Literates

x09 Workers without Occupations, Other

x8 *Workers Reporting Occupation Unidentifiable or Unclassifiable*

x80 Workers reporting occupations unidentifiable or unclassifiable

x9 *Workers not Reporting Occupation*

x90 Workers not reporting occupation

HOUSEHOLD ECONOMIC TABLES

HOUSEHOLD ECONOMIC TABLES

One of the distinguishing features of the 1961 Census has been the introduction of household schedule through which economic data has been collected for the household as a whole and not in respect of each individual as has been the past tradition. This departure has been deemed necessary as in countries of such economic status as ours, where not all the goods produced enter the money market and where a good proportion of the products is consumed by the family itself, collection of information on the basis of individuals is likely to be misleading unless it is supplemented by the data for the entire household.

In India, where the bulk of the population lives in rural areas and agriculture is the occupation of 70% of the population and cultivation is conducted by members of a household, with, in many cases, household industry as a compulsive adjunct, the household itself and not the individual, acts as an integral economic unit of production. This was felt to be particularly valid for those households which produce, mainly for self consumption and additionally for the market. This sector of the economy, is for various obvious reasons, the most resistant to displacement or transfer of population from what they are engaged in, because the population engaged in such activity finds that all of its effort, however, seasonal, is really wanted, and it is difficult to leave it in preference to any other. On the other hand, it is not easy to bring work from elsewhere to this population to fill its period of unemployment or under-employment. Before one makes facile assumptions about marginal productivity of labour being negative, it was thought worthwhile to investigate this sector with the help of such a schedule. A Household Schedule was, therefore, framed for this purpose which provided for area of land cultivated by a household on ownership, or on tenancy basis or on both and household industry, if any, conducted by the household and the number of family workers and hired workers employed in these activities.

It is necessary to reproduce here the definitions of some of the terms used in the tables.

A household industry was defined as an industry conducted by the head of the household himself and/or mainly members of the household at home or within the village in rural areas and at home in urban areas. The following three-fold test was prescribed to justify the classification of an industry as a household industry.

(a) Household industry should embrace manufacture, processing or servicing and may include sale but should not be confined simply to buying and selling. At least part of the goods offered for sale from the household should be manufactured or processed by members of the household.

(b) Household Industry should be on the household scale where the workers mainly will be the Head of the household himself and/or, members of the household, the role of hired workers from outside being of secondary importance. Thus, in any Household Industry, members of the household, should be in a position to lend a hand in the industry whenever they find time in the course of their daily chores. Household Industry cannot, therefore, be on the scale of a registered factory but can use machinery and employ power like steam engine or oil engine or electricity to drive the machinery.

(c) Location also is important, for proximity decides participation by members of the household. In a village, this participation is possible if the Household Industry is located at home or within the village, because village organisation is such as makes it possible for members of the household to move about freely in the village to look after their work. In urban areas, such a free movement is not possible and, therefore, in urban areas only those industries which are located at home should be considered for being classified as Household Industries. Where, however, part of the work is done outside the house, e. g., preparing and dyeing the yarn for weaving and winding into warp and woof or cleaning metal surfaces before electroplating in baths, it should still be considered a Household Industry even in urban areas, as the main operation of weaving or of electroplating is conducted within the house and only one or two operations are conducted outside.

A cultivator was defined as a person engaged either as employer, single worker or family worker in cultivation of land or supervision or direction of cultivation of land (a) owned or hired from Government, and (b) held from private persons or institutions for payment in money, kind or share. A person who had given out his land to others for cultivation for payment in money, kind or share of crop and who did not even supervise or direct cultivation of land was not treated as a cultivator. Similarly, a person working in another person's land for wages in cash, kind or share was not also treated as a cultivator.

A person who worked without receiving wages in cash or kind in his own family in an industry, business or trade conducted mainly by members of family was treated as a family worker. Such of the members of the household as attended to household duties only where deemed as non-workers and were not included among family workers.

A person who was employed by a household other than his own to work in any of the activities connected with cultivation or household industry for payment in cash, kind or share of the produce was treated as a hired worker. An important condition for the classification of a person as a hired worker was that he/she should have been in whole time employment during the last working season or in whole time employment during the current season.

For the purpose of census, the head of the household was defined as a person on whom fell the chief responsibility for the maintenance of the household. It was made clear that the head of the household need not necessarily be the eldest male member but may even be a female or a younger member of either sex, provided he or she was actually acknowledged as such. In the case of institutions, the manager or superintendent or the person who was regarded by common consent as the head was to be treated as the head of the household.

As single workers and employers do not figure anywhere in Household Economic Tables, it is not necessary to reproduce the definitions of such workers.

All the Household Economic Tables have been prepared on the basis of 20% sample of households excluding those classified as institutional. The definition of an institutional household has already been given in Fly-leaf to appendix III to Table A-I of the General Population Tables.

Table B-X

The table has been prepared from the data extracted from 20% sample household schedules. The figures have been tabulated for (a) all areas upto the district level, (b) urban sector of the district and (c) the rural area of each tehsil. It gives the distribution of the households according as they are engaged in cultivation only, household industry only or both or neither.

Table B-XI

The table consists of two parts, one dealing with the rural sector and the other pertaining to urban areas only. The former has been prepared down to tehsil level and the latter upto the district. In either case, the data is based on 20% sample of household schedules.

As is clear from column 1 of the table, the data relates only to such of the households which cultivate lands (i) owned or held from Government, (ii) held from private persons or institutions for payment in money, kind or share or (iii) partly held from Government and partly from private persons for payment in money, kind or share. The table does not include households which give their lands to private persons for cultivation for payment in money, kind or share.

Cultivating households referred to in column 2 of the table represent both such of the households as are engaged in cultivation only as also those which besides cultivating lands also run some household industry. In other words, the figures given in column 2 of this table are the sum total of the corresponding figures of columns 5 and 7 of the previous table for rural and urban sectors.

The household schedule from which the data has been compiled consists of three parts, viz., cultivation, household industry and workers at cultivation and/or household industry.

The portion of the household schedule relating to cultivation was to be filled in only in respect of households which actually cultivated land or gave the land to private person for cultivation for payment in cash, kind or share. For this purpose, the households where divided

into three categories, namely (a) those who cultivated lands owned or held from Government (b) those who held lands from private persons or institutions for payment in money, kind or share and (c) those who have given their lands to private persons for cultivation for payment in money, kind or share. In each of the three cases, the total of separate plots or parcels of land in different places owned or held or taken or given have been lumped together.

It may, however, be stated here that in the case of households falling in categories (a) and (b) referred to above, only those plots and parcels of land which were cultivated by the household itself, such as, lands which lie within the village or in adjacent village or within such a distance as would enable the households to work on the land or actively supervise the cultivation, were regarded as areas cultivated by them. Lands owned or held in distant places where distance itself was a bar to active cultivation or its supervision or direction were not included in the lands actually cultivated by these two categories. On the other hand, category (c) included land in any part of the country, whatsoever. In such cases the aggregate area, no matter where such lands were situated, was treated as land given to private persons for cultivation for payment in money, kind or share.

The following table shows, at a glance, the distribution of 100 rural cultivating households by size of land cultivated :—

Less than 1 acre	1.0 to 2.4 acres	2.5 to 4.9 acres	5.0 to 7.4 acres	7.5 to 9.9 acres	10.0 to 12.4 acres	12.5 to 14.9 acres	15.0 to 29.9 acres	30.0 to 49.9 acres	50+ acres	Unspecified
8	19	35	24	7	4	1	2	N	N	..

Table B-XII

This table has also been prepared separately for the rural areas down to tehsil level and for the urban sector upto districts. The data given in the table relates to households which are engaged in cultivation only and not to those engaged both in cultivation and household industry. As before, the institutional households have not been accounted for while taking out the sample.

The table is designed to give the classification of cultivating households according to the size of land cultivated, each such class being further cross-tabulated with reference to the number of hired workers and sex-wise number of family workers. Ten class ranges of land have been devised varying from less than 1 acre to 50 or more acres. An additional class has been provided to cover households in whose cases the size of land could not be ascertained.

The definitions of family worker and hired worker have already been given in the general note on Household Economic Tables.

Table B—XIII

In this case two separate tables have been prepared upto district level, one for the rural and the other for urban areas. The table gives the code numbers and detailed description of household industries according to Indian Standard Industrial Classification upto major groups except industries under such other major groups which claim less than 10% households in the respective divisions. The latter have been given in an abbreviated form in the appendix accompanying the table. The divisions thus affected are marked with an asterisk (*).

The statistics given in the table relate to households engaged both in cultivation and household industry and not to households which are engaged in cultivation only. It shows by cross-tabulation the distribution of households, engaged in a particular household industry, by the size classes of land referred to in Table B—XII.

A comparison of the rural parts of Tables B-XII and B—XIII shows that the number of households engaged both in cultivation and household industry is extremely small and stands at 4.6% of the aggregate number of households engaged in cultivation only and engaged both in cultivation and household industry.

Table B—XIV

The table consists of two parts, Part-A gives the distribution of households for all areas of the State, its territorial divisions and districts and their rural and urban sectors by the number of persons employed and the divisions and major groups under which the principal household industries are classifiable according to the Indian Standard Industrial Classification. Part-B of the

table indicates the names of the industries by minor groups and the distribution of households engaged in such industries for all areas down to the districts and their rural and urban sector. It does not, however, give the classification of households by the number of persons employed.

Industries under such major groups which claim less than 10% households of their respective divisions have been omitted from Part-A of the table and listed in an abbreviated form in the appendix accompanying the table. The divisions thus affected are marked with an asterisk (*).

A distinguishing feature of the table is that it relates to households engaged in household industry only and excludes all others engaged in cultivation only or both cultivation and household industry.

Table B—XV

The table has been prepared upto tehsil and district level for rural and urban areas respectively. It indicates the distribution of households by various size classes of land classified by the number of persons employed in both cultivation and household industry. The definitions of family and hired workers have already been given in the general note on Household Economic Tables.

Table B—XVI

The table gives for all areas and their respective rural and urban sectors upto district level the number of households, their family workers by sex and hired workers classified by the number of months in a year for which each household industry is being run by the households concerned. The data has been shown collectively and separately in respect of the households engaged in both cultivation and household industry and households engaged in household industry only. In this case also, the code numbers and names of industries have been given according to the Indian Standard Industrial Classification upto Major groups. Such of the industries which claim less than 10% households of the Division concerned have, however, been omitted from the table and listed in the appendix. The divisions thus affected are marked with an asterisk (*).

Table B—XVII

The table gives the distribution of rural households other than those classed as institutional households according as they are (a) engaged neither in cultivation nor in household industry (b) engaged in household industry only and (c) engaged in cultivation with or without household industry. Category (c) has further been subclassified into ten holding groups according to the size of land cultivated by them.

The table also gives the total and sex-wise population of the sample households of each category and their distribution by five size classes of households. In the case of category (c) this classification has also been shown in respect of each size class of land.

Further, the table indicates the distribution of urban households of all categories put together by the number and sex-wise population of each size of households.

The actual number of all households and their population (except institutional population) as returned at the 1961 Census for the district and its rural and urban sectors has been given in the table at the end of the data relating to the district.

It is clear from column 2 of the table that 73.4% households in the rural sector are engaged in cultivation. These include 45.4% households whose holdings are less than 5 acres in size.

B-X—SAMPLE HOUSEHOLDS (i) ENGAGED NEITHER IN CULTIVATION NOR HOUSEHOLD INDUSTRY, (ii) ENGAGED EITHER IN CULTIVATION OR HOUSEHOLD INDUSTRY BUT NOT IN BOTH AND (iii) ENGAGED BOTH IN CULTIVATION AND HOUSEHOLD INDUSTRY FOR *ALL AREAS*

SOCIAL AND CULTURAL TABLES

SOCIAL AND CULTURAL TABLES

The Social and Cultural Tables, also known as C-Series Tables have been published in Part II-C, Volume VI of Census of India, 1961. The series consists of eight tables, as detailed below :—

C-I	Composition of Sample Households by relationship to head of family classified by size of land cultivated
C-II	Age and Marital Status.
C-III Parts A, B & C	Age, Sex and Education
C-IV	Single Year Age Returns
C-V	Mother-Tongue
C-VI	Bilingualism
C-VII	Religion
C-VIII Part A	Classification by literacy and industrial category of workers and non-workers among Scheduled Castes

It has, however, been decided to include Tables C-I to C-III, C-V, C-VII and C-VIII Part A only in the District Hand Books. Further, the appendix to Table C-III in which the particulars of employed and unemployed, scientific and technical personnel have been tabulated, has also been omitted as the appendix gives the figures for the State as a whole and not for individual districts.

Except for Table C-I, which alone is based on the data extracted from 20% sample Household Schedules, all other tables have been prepared on full count. In the case of C-II, C-V and C-VII, figures have been given down to the tehsil level, but in C-I and C-III, the presentation of the data has been restricted to the district only.

Table C-I

The data given in the table is the first of its kind and has not been collected at any previous census held in the State. The table is of sociological interest and presents a broad economic picture in the joint family system.

The data presented in the table has been compiled on 20% sample basis and gives the number of sample households, their total and sex-wise population, the numbers of male and female heads of households and of their spouses, as also the sex-wise numbers of married, never married, widowed and divorced or separated relations and unrelated persons.

In the case of urban areas, the data only indicates the structure and the composition of households and does not portray their economic activities. So far, however, as the rural areas are concerned, the households have been classified into three categories, viz. (a) those engaged neither in cultivation nor household industry, (b) those engaged in household industry only and (c) those engaged in cultivation. The last named category has further been classified by size of holding groups besides those whose size class is not known.

Table C-II

The table gives valuable demographic data of age structure and marital status separately for total, rural and urban population of the district as a whole and for rural areas of its constituent tehsils. The age groups conform to international requirements.

The table will prove helpful in ascertaining whether the proportions in the various marital status conditions have increased or decreased since last Census and whether any trend is discernible in the age of marriage. The data of married females by age-group can also be utilised for forecasting future births from age specific birth rates.

Table C-III

The table gives the statistics of literate population by age, sex and educational levels as also the sex-wise number of illiterate persons in each age group. In all, the following ten age groups, besides an additional one relating to persons who did not specify any age have been adopted :—

0-4, 5-9, 10-14, 15-19, 20-24, 25-29, 30-34, 35-44, 45-59 and 60 and above.

The table has been split up into three parts, each giving figures upto the district level. Part A relates to all areas, Part B to the urban sector and Part C to the rural areas.

Parts A and C are designed to give for each age group sex-wise figures of total, literate and illiterate population. The statistics of literates have,

however, been tabulated by three educational levels, namely:--

(i) Those who have not passed any examination

(ii) Those who have passed Primary or Junior Basic Examination and

(iii) Those who have passed Matriculation and higher examinations.

In the case of urban areas where the incidence of literacy is comparatively high and larger facilities for higher education are available, a more elaborate and comprehensive description of the educational levels has been attempted. Part B of the table therefore gives the distribution of literate persons by the following seven major categories:--

1. Literates without educational standards
2. Those who have passed primary or Junior Basic Examination
3. Those who have passed Matriculation or Higher Secondary Examination
4. Persons possessing technical diploma not equal to degree
5. Persons possessing non-technical diploma not equal to degree
6. Those possessing University degree or Post-Graduate degree other than technical degree
7. Those possessing technical degree or diploma equal to degree or Post-Graduate degree.

The last category has further been sub-divided into 7 divisions, viz., Engineering, Medicine, Agriculture, Veterinary and Dairying, Technology, Teaching and others. It is hoped that these statistics will prove of great use for making an assessment of the man power available for the implementation of various developmental schemes.

Table C-V

The table gives the total and the sex-wise population of the speakers of each mother-tongue for the district as a whole and for its rural and urban areas as also in respect of the rural sector of each tehsil. The mother-tongues have been arranged in alphabetic order to facilitate the tracing of number of speakers of a particular language.

The definition of mother-tongue as adopted at the Census of 1961 is a language spoken in childhood by a person's mother to the person or mainly spoken in the household. If the mother of the person had died in his infancy, the language mostly spoken in the person's home in childhood was treated as his mother-tongue. In the case of infants and deaf mutes, the language usually spoken by the mother was regarded as the mother tongue of the infant etc.

Table C-VII

This is an important sociological table giving the community-wise population of the district and of each of its constituent tehsils. The data relating to the district has been exhibited separately in respect of its rural and urban areas, but that pertaining to the tehsils has been given in respect of rural areas only.

Before 1951, religion was treated as the unit of tabulation and most of the demographic data, such as marital status, literacy and other characteristics was tabulated by the communities. Further, the classification of the population was being presented by religion down to the village level. In 1951, no data regarding race, caste etc. was collected and instead livelihood classes were adopted as the unit of tabulation. At the present, census the industrial classification has been given greater emphasis and most of the data has been presented on this basis. Another distinguishing feature of the 1961 table is that the figures have this time been tabulated separately for rural and urban areas of each district.

Table C-VIII-Part A

According to tabulation plan prescribed for 1961 Census, Table C-VIII is to consist of two parts, one dealing with Scheduled Castes and the other with Scheduled Tribes. As there are no Scheduled Tribes in Jammu and Kashmir, only Part-A of the table has been compiled.

The table gives population of Scheduled Castes for the district as a whole and for its rural and urban sectors together with the distribution of this population by literacy and industrial classification of workers as also the number of non-workers. In addition, similar data has also been presented at tehsil level with the difference that it relates to rural sector only.

A distinguishing feature of this table when compared with earlier Censuses is that the classification of workers by industrial categories has been confined to Scheduled Castes only and the tabulation of similar data for important communities, as was done in the past, has been dispensed with. The table is important as it will constitute the basis for the allocation of reserved seats in Parliament and State Legislatures.

C-I—COMPOSITION OF SAMPLE HOUSEHOLDS BY RELATIONSHIP TO HEAD OF FAMILY CLASSIFIED BY SIZE OF LAND CULTIVATED (Based on 20% Sample)

District	Total Rural Urban	Total No. of sample house-holds	Total sample household population			Composition of households

SPECIAL TABLES FOR SCHEDULED CASTES

SPECIAL TABLES FOR SCHEDULED CASTES

The SCT series comprise five main tables (SCT-I to SCT-V) and three special tables (SC-I, ST-I, ST-II), which are designed to give broad demographic and economic data of Scheduled Castes and Scheduled Tribes. Four of the main tables, namely, SCT-I, SCT-II, SCT-IV and SCT-V, have been further sub-divided into two parts each, one dealing with Scheduled Castes and the other with Scheduled Tribes. SCT-III which relates to education of Scheduled Castes and Scheduled Tribes has, however, been split up into four parts, which give separately the rural and urban statistics of Scheduled Castes and Scheduled Tribes. Table SC-I pertains to Scheduled Castes only and ST-I and ST-II to Scheduled Tribes only.

Since, however, there are no Scheduled Tribes in Jammu and Kashmir and the entire Scheduled Caste population is concentrated in Jammu province, the following tables only have been prepared and included in the present publication :—

1. SCT-I Part A	: Industrial Classification of persons at work and non-workers by sex for Scheduled Castes.
2. SCT-II Part A	: Age and Marital Status for Scheduled Castes
3. SCT-III Part A(i)	: Education in urban areas only for Scheduled Castes
4. SCT-III Part B(i)	: Education in rural areas only for Scheduled Castes
5. SCT-IV Part A	: Religion for Scheduled Castes
6. SCT-V Part A	: Sample households engaged in cultivation classified by interest in land and size of land cultivated in rural areas only for members of Scheduled Castes (Households of members of Scheduled Castes in a 20 percent Sample of all households)
7. SC-I	Persons not at work classified by sex, type of activity and educational level for Scheduled Castes

Table SCT-I Part A has further been supplemented by an appendix indicating the absolute figures and the percentages of Scheduled Castes to the total population in each of the districts and its rural and urban areas.

Except for Table SC-I which presents the data for tehsils also, all other tables have been prepared upto district level only.

The data incorporated in the above tables is based on the replies given by the Scheduled Castes to the questions convassed in the Enumeration Slip and Household Schedule at the Census of 1961.

All the SCT Tables, except Table SCT-V Part A which alone is based on the data extracted from 20% Sample Household Schedules, have been prepared on full count.

The following definition of Scheduled Castes has been laid in Article 49(1) of the Constitution of Jammu and Kashmir :

"Scheduled Castes means the castes, races or tribes or parts of, or groups within castes, races or tribes which are for the purposes of the Constitution of India deemed to be Scheduled Castes in relation to the State under the provisions of Article 341 of that Constitution".

Article 341 of the Constitution of India empowers the President to specify, by public notification, with respect to States specified in Part A or Part B of the First Schedule, after consultation with the Governor or Rajpramukh thereof the castes, races or tribes or parts of, or groups within castes, races or tribes which shall, for the purposes of the Constitution of India, be deemed to be Scheduled Castes in relation to that State. Further according to para 6 of Fifth Schedule of the Constitution of India, scheduled areas are defined as such areas which the President may, by order declare to be scheduled areas.

In pursuance of these stipulations, the President made the Constitution (Scheduled Castes) Order of 1950 specifying the castes, races or tribes which shall be deemed to be the Scheduled Castes in a State. Since, however, the Constitution of Jammu and Kashmir came into force on the 26th

January, 1957, the Presidential Order of 1950 which excluded the State of Jammu and Kashmir was amended and the following Castes were declared as Scheduled Castes for the State of Jammu and Kashmir :—

1. Barwala
2. Basith
3. Batwal
4. Chamar or Ramdasia
5. Chura
6. Dhyar
7. Doom or Mahasha
8. Gardi
9. Jolaha
10. Megh or Kabirpanthi
11. Ratal
12. Saryara
13. Watal

Table SCT-I Part A

The table has been presented in two parts, one indicating the data for the rural and the other for the urban sector of the district. Each part gives the total and sex-wise population of individual castes and their distribution among workers and non-workers as also the industrial classification of the workers. The table also indicates the number of workers engaged in special occupations such as tanning and currying of hides and skins and scavenging in which members of the castes may be engaged.

Appendix to Table SCT-I Part A has been specially devised for the District Handbook. As stated above, it gives, by total, rural and urban, the general and the Scheduled Caste population down to tehsil level as also the percentage of the latter to the former.

The appendix shows that Ranbirsinghpora tehsil has returned the highest proportions of Scheduled Castes to the total population among all the tehsils of Jammu district. In so far as the absolute figures are concerned, Jammu tehsil takes the lead with a population of 57,420 scheduled castes as against 43,408 of Ranbirsinghpora, 27,587 of Samba and 23,093 of Akhnoor.

Table SCT-II Part A

This is an important table as it furnishes valuable data in respect of civil conditions for all ages of the entire Scheduled Caste population in the district. The three broad-age groups provided in the table, viz. 0-14, 15-44 and 45 + correspond to different stages of life viz. children, young and middle aged persons and elderly persons. Persons who did not specify any age have been categorized separately and classified under the head "Age not stated".

Question 3 of the individual slip relates to the marital status of the person enumerated. Instructions were issued to the enumerators to include every person in one or the other of the following four categories according to the reply given by him :—

1. Never Married
2. Married
3. Widowed
4. Divorced or Separated

A person married whether for the first or another time was treated as "Married". Such other persons who are recognised by customs or society as married as also those in stable de facto union were also categorised as "Married". Even if a marriage was disputed in the locality, if the person concerned claimed that he or she was married or was in stable de facto union their marital status was shown as "Married".

A widowed person was defined as one whose husband or wife was dead and had not married again.

A person divorced in a lawful manner either by decree of a law court or by a regular social or religious custom but who had not married, or a person who had separated from wife or husband and was living apart with no apparent intension of living together again was treated as a separated or divorced person.

Persons in whose individual slip the enumerators had omitted to make any entry against Question 3 were treated as of unspecified status.

Table SCT-III Part A (i) and SCT-III Part B (i)

Table SCT-III which furnishes sex-wise statistics of literate and illiterate population of Scheduled Castes by individual castes and educational levels has been prepared in two parts, namely, SCT-III Part A (i) dealing with the urban areas of the district and SCT-III Part B (i) relating to rural sector.

The definition of literacy as adopted at the 1961 Census has already been given in Fly-leaf to Table B-III of the General Economic Tables.

In view of the relatively high incidence of literacy in the urban areas and the poor percentage of literates in the rural population, it has not been deemed necessary to adopt the same educational standards for the classification of literate persons in the rural and urban areas. While;

therefore, the statistics of literates in the rural areas have been tabulated for (i) mere literates, (ii) primary or junior basic and (iii) matriculates and above, in the case of urban areas the data relating to literate persons has been given for the following seven major categories :—

1. Literate without educational level
2. Primary or Junior Basic
3. Matriculation or Higher Secondary
4. Technical diploma not equal to degree
5. Non-technical diploma not equal to degree
6. University degree or post-graduate degree
7. Technical degree or diploma equal to degree or post-graduate degree.

The overall literacy percentages among the males and females inhabiting the rural sector of the district as a whole stand at 17.8% and 3.7% respectively. The corresponding percentages of males and female Scheduled Castes in the rural areas, however, do not exceed 8.4 and 1.4. Even in the urban areas, only 18.8% and 3.9% male and female Scheduled Castes are literate as against 48.4% males and 32.9% females in the entire urban population.

Table SCT-IV—Part A

This table purports to indicate the religion professed by members of various Scheduled Castes. An important feature of the table is that unlike the Census of 1941 in which members of Scheduled Castes were shown as belonging to Hindu religion only, the 1961 Census figures indicate that some Scheduled Castes also belong to Sikh religion.

It is clear from the table that except for a very small number of Scheduled Caste Sikhs who mostly belong to Barwala, Chamar or Ramdasia, Chura and Megh or Kabir Panthi castes, all others profess Hindu religion. In fact, the population of Hindu Scheduled Castes in the district is much larger than the entire population in the State of those who claim to be the followers of Sikhism or Buddhism.

Table SCT-V—Part A

This table is similar to Household Economic Table B-XI. The data given in the table relates to such of the Scheduled Caste households which could be traced from 20 percent sample of all households of Jammu district.

The definition of a cultivator has already been given in the Fly-leafs to Household Economic Tables. Households engaged in Cultivation have been divided into three categories according as the land cultivated is :—

1) Owned or held from Government.

2) Held from private persons or institutions for payment in money, kind or share, and

3) Partly held from Government and partly from private persons or institutions for payment in money, kind or share.

The first of these categories represents all pieces of land, owned or held in owner-like possession, such as land held directly from Government under a grant, lease or assignment, (i) with rights permanent, heritable and transferable possession, (ii) with rights of payment and heritable possession, but without the right of transfer and (iii) temporary or conditional lease of any kind with the Government.

Similarly, category 2 referred to above includes land (i) with rights of permanent, heritable possession but without right of transfer and (iii) held in a variety of tenancies or tenures.

The third category of households consists of those which partly cultivate land held from Government and partly from private persons for payment in money, kind or share. It, therefore, includes not only one or more varieties of lands into which category (i) is classifiable as indicated above, but also those of category (ii).

Table SC—I

The table has been prepared for the total non-working population of all Scheduled Castes collectively. The data has been presented separately for total/rural/urban upto district. So for as the rural areas are concerned, the figures have been given down to tehsil level.

The definition of worker and non-worker has already been given at some length in the Fly-leafs to General Economic Tables. It is, however, necessary to point out here that except for (i) full time students, (ii) persons seeking employment for the first time and (iii) persons employed before but now out of employment and seeking work, the educational levels of all other categories of non-workers have been given collectively in columns 11 and 12 of the table.

According to this table, the proportions of workers and non-workers among Scheduled Castes are almost the same as in the district as a whole, as indicated below :—

	Percentage of non-workers among Scheduled Castes	Percentage of non-workers in the district
Total	67	68
Rural	67	67
Urban	69	71

It is also clear from the table that the incidence of literacy in the non-working population of Scheduled Castes is less pronounced and is limited to 5.6% only. The corresponding proportion in the case of district as a whole is comparatively better and works out to 16.1%.

RURAL CRAFT TABLES

RURAL CRAFT TABLES

The data relating to rural crafts is being printed in a separate publication entitled Part—VII of Volume VI of the Census of India 1961. The volume contains seven tables out of which the following three have been incorporated in the District Handbooks :—

Table I—List of rural crafts and number of persons employed in production : –

The table also indicates the number of villages in which each craft is found.

Table II– Distribution of artisan communities :—
The table gives the names of crafts, name of caste or community to which the workers engaged in the craft belong. In addition, it also gives the number of villages and families as also the number of total adult workers in respect of each craft.

Table VII—List of very skilled craftsmen of each community :—

The table gives for each surveyed village the name of the craft and of its skilled craftsmen together with the name of the community to which they belong.

VILLAGE DIRECTORY

ALPHABETICAL LIST OF VILLAGES

JAMMU TEHSIL

1961 Location Code No.	Name of Village
108	Agor
232	Alora
114	Ambh
178	Aqil Pur
14	Badgah
52	Badsu
151	Baghmarhsarkari
308	Bahadur Khan
286	Bahu
124	Bajyal
101	Bamyal
90	Ban
94	Bangali
119	Baran
184	Barnayi
3	Batlalabar
183	Batoli Brahmana
24	Batona
277	Bawali Yana
201	Bhadrod
53	Bhage
37	Bhagwani
87	Bhalwal
158	Bhalwal Har Makund
219	Bhangor
116	Bhardhrochan
227	Bhar Mali
104	Bhata
48	Bhawta
275	Bhor
5	Biral
17	Blahad
78	Botoliman Goiriyan
216	Chak Astran
172	Chak Bathali
118	Chak Bhalwal
251	Chak Bhopat
213	Chak Bhula
234	Chak Bhurah
231	Chak Bindrali
211	Chak Budhu
80	Chak Chand Gawan
12	Chak Chilah
160	Chak Chuhan
220	Chak Dali
174	Chak Dargu
163	Chak Dina
154	Chak Galwade
235	Chak Gandu
270	Chak Ganeshu
143	Chak Gangoo
252	Chak Gosian
190	Chak Gulami
152	Chak Hira
147	Chak Jafar
169	Chak Jagir
298	Chak Jalu
248	Chak Jogi
134	Chak Kahna
153	Chak Kalasa
299	Chak Kalu
209	Chak Lahori
301	Chak Lala
204	Chak Lal Din
246	Chak Lalu Shah
256	Chak Malikha
265	Chak Manga
127	Chak Mohani
122	Chak Naiun
253	Chak Nawade
241	Chak Panotra
197	Chak Poniwan Wazirian
71	Chak Rakwalan
297	Chak Ratnu
203	Chak Reyi
260	Chak Sardar
244	Chak Sardar Attar Singh
126	Chak Shaman
247	Chak Sheru
109	Chak Singha
215	Chak Singha
207	Chak Taru
81	Chanor
59	Chappar
41	Charangal
55	Chhadali

ALPHABETICAL LIST OF MOHALLAS

JAMMU MUNICIPALITY

1961 Location Code No.	Name of Mohalla
5(A)	Ambphala (Rehari)
11	Bakshi Nagar
22	Chand Nagar
36	Chowgan Fathu
3	Chowgan Salathian
14	Company Bagh
39	Dewan Mendir
2	Dhounthli
8	Dogra Hall
49	Gandhi Nagar
21	Gandu Chowni
24	Gumat
16	Gurrah Colony
41	Jallahaka Mohalla
45	Jogi Gate
31	Kachi Chowni
25	Kanji House
1	Karan Nagar
37	Koli Jani
13	Krishan Nagar
42	Mast Garh
29	Mohalla Acharjian
32	Mohalla Afghana
35	Mohalla Bhabrian
48	Mohalla Dalpatian
30	Mohalla Devidwara
28	Mohalla Ghumaran
43	Mohalla Jatkatian
33	Mohalla Khilonian
27	Mohalla Malhotrian
7	Mohalla Naranian
26	Mohalla Pharian
6	Mohalla Ustad
50	New Basti
9	New Plots
34	Pacca Danga
40	Pakki Dhakki
19	Panch Bakhtar
4	Panjtrithi
38	Parade Ground
44	Pir Mitha
18	Pratap Garh
17	Ragh Nath Pura
23	Rani Mandir
5 (B)	Rehari
10	Rehari Colony
12	Reshamghar-Bakshi Nagar
46	Residency Mohalla
20	Residency Road
15	Roulki Colony
47	Talab Khitikan
51	Tawipar

NOTE

The following abbreviations have been used in the above Village / Town Directory :—

(i) Education

T	for Technical Institutions
C	for Higher Institutions including Colleges
HS	for Higher Secondary School
H	for High School
LH	for Lower High School
M	for Middle School
Cen	for Central School
P	for Primary School
BA	for Basic Activity School
MK	for Makhtab
PS	for Pathshalla

(ii) Medical and Public Health

HOS	for Hospital
FPC	for Family Planning Centre
MCW	for Maternity and Child Welfare Centre
HU	for Health Unit
HC	for Health Centre
RHC	for Rural Health Centre
MU	for Malaria Unit
D	for Dispensaries

(iii) Drinking Water

S	for Safe or Protected Water Supply including Pipes and Tube Wells

(iv) Communication and Transport

PO	for Post Office
TO	for Telegraph Office or Public Call Office
R	for Village connected by vehicular road

(v) Electricity

E	for Electrified

ERRATA
