PREFACE

Districtwise village statistics have been publised at most of the Censuses. A list showing the population of villages in each district was published after the 1891 Census. No such list was brought out in 1901. In 1911 Village Directories were prepared for all districts, but could be published only for thirteen on account of the out break of the First World War. At the 1921 Census they were published for all districts in the form of District Census Statistics. In 1931 they were compiled for all districts, but were not published owing to financial stringency, leading to loss of valuable data. At the 1941 Census even though restricted tabulation was undertaken on account of the Second World War, yet the utility of District Census Statistics was recognized and they were published. At the Census of 1951 two volumes were brought out for each district—the District Census Handbook and the District Population Statistics. Government have decided to continue the publication of District Census Handbooks. The 1961 District Census Handbooks contain more data than ever published before. Village directories, besides giving the population of villages by industrial categories, also contain useful information about schools, hospitals, post offices, etc.

As revised District Gazetteers are going to be published, introductory matter in the District Census Handbooks has been given in brief to avoid duplication.

Information for the District Census Handbooks was collected mainly from three sources, viz., State Tabulation Office, District Officers, Heads of Departments and their district level officers. In all cases confirmation has been obtained from Heads of Departments concerned. I am extremely grateful to District Officers and the various Heads of Departments for their whole hearted co-operation in furnishing the desired information.

It is hoped that the District Census Handbooks will prove useful to the various Government departments and scholars.

The printing of the Handbooks commenced from August, 1963.

INTRODUCTION

1. The District

The district of Varanasi lies between the parallels of 24°·56′ and 25°·35′ North latitude and 82°·14′ and 83°·24′ East meridians of longitude. It is bounded on the west by the Allahabad district, on the North-West and North by Jaunpur, on the North-East and East by Ghazipur, on the South by Mirzapur and on the South-East by the State of Bihar, separated by the Karamnasa river. Its original name was 'Kashi' which owes its importance to its being a centre of religion and culture, holding a very high position among holy places of this country. It is mentioned as one of the 16 *Mahajanapadas* in the annals of the sixth century B. C. It was here that about 2,500 years ago Gautam Buddha preached his first sermon in the famous deer park at Sarnath. The total area of the district is 5,275·8 sq. km (2,037·0 sq. miles).

2. The district comprises 4 tahsils viz., Bhadohi, Varanasi, Chandauli and Chakia. The largest tahsil in area is Varanasi 1,524·7 sq. km. (588·7 sq. miles) and the smallest Bhadohi 1,081·8 sq. km. (417·7 sq. miles). The areas of the remaining two tahsils are Chandauli 1,320·4 sq. km. (509·8 sq. miles) and Chakia 1,348·9 sq. km. (520·8 sq. miles). The number of towns is 7, viz. Bhadohi M. B., Gopiganj T. A., Varanasi M. C. including Banaras Hindu University and Varanasi Rly. Colony, Varanasi Cantt., Ramnagar M. B., Mughalsarai M. B. and Northern Rly. Colony including Mughalsarai N. A. The 1951 towns of Chakia, Gyanpur and Gangapur have not been treated as towns for non-fulfilment of urban conditions in 1961 Census. Towns of Sheopur and Banaras Hindu University have been merged in Varanasi M. C.

3. The district is very well connected by roads, rail and air. By rail it is served by the broadgauge Northern Railway and the metre-gauge North-Eastern Railway systems. The aerodrome near Bapatpur links the district by air. Varanasi is an important junction of Northern, North-Eastern, and Eastern Railways. Railways lines lead all around the junction. There are about 38 railway stations and a network of about 168 miles of railway lines in the district. There is also an adequate network of roads in the district. The most important road of the district is the Grand Trunk Road with a mileage of about 74 miles in the district. The other important pukka roads with mileage within the district are Varanasi-Ballia (19 miles), Varanasi-Lucknow (20 miles), Chandauli-Sakaldiha (19 miles) and Varanasi-Azamgarh (16 miles).

4. River Ganga, Banganga, Varuna, Gomti, Nand, Hathi, Karamnasa, Garai and Chandraprabha mainly form the drainage system of the plains in the district. The most prominent physical feature of the district is the River Ganga itself. Its course is a succession of bold and almost semi-circular curves on the outside of which the bank is usually high and abrupt, while in the inside its place is taken by a shelving stretch of sand, generally sterile or producing nothing beyond thatching grass, but occasionally covered with a rich and fertile deposit left behind by the annual floods. The portion of the district to the West of the Ganga is well drained, while there is a considerable area in Chandauli to the east which is not directly served by rivers. North of the Garai river in this tahsil lies a large stretch of low country with no outlet for the surface water with the single exception of the small stream Lambuia.

In this tract water collects in large *Jhils* and forms swamps, and in years of heavy rainfall a number of villages are inundated. Some portions of the clay tracts of Varanasi tahsil also suffer from defective drainage.

5. The upland of Varanasi can be divided into two physical units : (i) the Ganga Valley Plain, covering over four-fifths of the total area, and (ii) the Southern Upland which rises abruptly from the plain. The plain exhibits, as a whole, a dead level and alluvial character, stopping imperceptibly towards east or south-east, the maximum, elevation in the west or north-west being over 300 feet in the east or south-east less than 200 feet above sea level. The whole plain shows two types of ground (i) Khadar (or low land) which is subject to periodical inundation by the rivers, and (ii) Bangar (or upland) which lies above the flood limit of the rivers. The difference in physical aspect also lies in its different parts from north to south, and west to east in regard to drainage and subsoil water level. According to this the plain can be sub-divided into three units (i) the Saryupar Plain or the Trans-Ghaghara plain (ii) the Ganga-Ghaghara Doab, and (iii) the Gangapar or Trans-Ganga Plain.

6 Geologically speaking, the Ganga plain is the least interesting. It is formed by alluvial accumulation in the Indo-Gangetic trough lying between the Peninsula and the recently built Himalayas through long period of time. But no definite information is available regarding the total thickness of the alluvium in the valley. Surface features and gravity observations, however, point out that it is deepest in the central portion of the Ganga valley and shallows west of Delhi and east of the Rajmahal hills. Geologically the southern upland can be classified into two sub-divisions : (i) the Vidhayan formations which lie mainly north of the Son, and (ii) crystalline and gneissic area corresponding with the Sonpar.

7. The climate of the district is dry and healthy. The heat is intense in May and June. The *loo* (hot westerly wind) blows with intensity in these months. The rainfall is influenced by the shift of axis of the trough of low pressure which runs usually from Allahabad to Gaya over the plains. When the axis shifts to the south it enables the easterly or south-easterly winds to give widespread rainfall in the plains, and when it moves towards the Himalayas the rainfall in the plains is greatly decreased. The summer monsoon ceases normally by the first week of October. With the retreat of the monsoon and subsequent clearing of sky, temperature rises slightly after the middle of September and it begins to fall gradually after the middle of October ; but one does not feel the cool breeze of the winter before November. It may further be observed that whenever the monsoon is vigorous in July or August leading to heavy rainfall, the winter rainfall in January is often high.

8. From early records it would appear that the region was at one time covered by vast forests of *sal, shisam, jamun, mahua, semal* and other trees, but at present less than 2 per cent of the total area is under forests.

9. The percentage of cultivated area during 1960-61 was 63·2, as against 61·2 for 1950-51. The *rabi* and *kharif* are the main crops, the *rabi* being more important for the district as a whole. The principal *rabi* crop is wheat, followed by gram. The chief *kharif* crops are *bajra* and *juar*. Sugarcane, *Sanai* and Potato are the main cash crops.

2. Statistics

A—General Population

1. The district occupies 26th position in area and 8th position in population in the

whole State. There has been an increase of 101·0 sq. km. (39·0 sq. miles) since 1951 partly due to transfer of area and partly due to revised calculation of area by the Board of Revenue. The Table giving variation in population since 1901 shows that there has been an increase in population since 1911, the percentage increase being the highest during the last decade (1951-61). The population rose by 384,604 during this period giving a percentage increase of 19·4 which is higher than the State average of 16·7. The order of tahsils by population in 1951 was Varanasi, Chandauli, Bhadohi and Chakia, which has remained the same in 1961. The largest population growth has been in tahsil Chakia amounting to 24·9 per cent chiefly due to migration caused by developmental activities undertaken during the decade. The percentage increase in tahsils Chandauli, Bhadohi and Varanasi has been 20·3, 19·7 and 18·4 respectively.

2. The density of population in the district is 448 persons per sq. km. (1,160 per sq. mile) which is higher than the State average of 250 persons per sq. km. (648 per sq. mile). The most densely populated tahsil is Varanasi, comprising the city of Varanasi, its density being 810 persons per sq. km. (2,098 per sq. mile). Next is Bhadohi having a density of 429 persons per sq. km. (1,112 per sq. mile). Chandauli 394 persons per sq. km. (1,020 per sq. mile) and the last is Chakia 106 persons per sq. km. (274 per sq. mile). The rural density of the district is 351 persons per sq. km. (908 per sq. mile) and the urban is 4,744 persons per sq. km. (12,281 per sq. mile). The highest rural density 508 persons per sq. km. (1,315 per sq. mile) is in tahsil Varanasi as also the highest urban density 5,698 persons per sq. km. (14,751 per sq. mile). Varanasi tahsil is the most populous tahsil of the State as it situated in the fertile Gangetic plain. Besides this, silk cottage industry is also an important factor.

3. The district has 4,232 villages of which 3,624 are inhabited and 608 un-inhabited. The number of inhabited villages has registered a decrease of 7 since 1951. 766 persons per 1,000 in the district live in rural areas. The average population per inhabited village is 499 as against 430 in 1951. But the villages do not necessarily comprise of a single compact site. Most of the villages are of small size with a population below 500. The number of such villages is 2,350 (64·9 per cent). The percentage of medium-sized villages with a population between 500-1,999 is 32·8 and that of large-sized villages having a population of 2,000 and over is only 2·3. More than half of the rural population (58·1 per cent) lives in medium-sized villages. The percentage of rural population living in large and small-sized villages is 28·6 and 13·3 respectively. The number of villages having a population exceeding 5,000 is only three, two in tahsil Varanasi and one in tahsil Chandauli.

4. 234 persons per 1,000 live in towns The urban population is high on account of Varanasi City. Varanasi (489,864) and Mughalsarai (21,086) are town-groups and belong to Classes I and III towns respectively. Varanasi town-group comprises Varanasi Municipal Corporation, Banaras Hindu University, Varanasi Railway Colony and Varanasi Cantt., and Mughalsarai town-group comprises Mughalsarai M. B. and Northern Railway Colony Mughalsarai N. A. The municipal boards of Bhadohi (20,302) and Ramnagar (16,088) are Class III and IV towns and their population ranges between 20,000 to 49,999 and 10,000 to 19,999 respectively. The Gopiganj T. A. (5,806) is Class V town having population between 5,000 to 9,999. Tahsil Chakia, the only tahsil of district, has no

urban area. Of the total urban population 88·0 per cent live in Varanasi Town-group, 4·0 per cent each in Bhadohi M. B. and Mughalsarai Town-group, 3·0 per cent in Ramnagar M. B. and 1·0 per cent in Gopiganj T. A. The largest growth of population during the decade has been in Varanasi Town-group amounting to 37·7 per cent. The percentage increase in the population of Mughalsarai Town-group has been 36·3 and of Bhadohi M. B., Gopiganj T. A. and Ramnagar M. B. is 23·8, 16·3 and 14·7 respectively.

5. The sex-ratio, i.e, number of females per 1,000 males was 997 in 1921; 957 in 1931; 956 in 1941; 955 in 1951 and 950 in 1961. The sex-ratio of the district is higher than the State average of 9·9. It is noticeable that the sex-ratio decreased during the decade 1931 to 1961. The sex-ratio is 997 for rural and 809 for urban areas. The rural sex-ratio is 1,052 in tahsil Bhadohi, 993 in tahsil Varanasi, 969 in tahsil Chandauli and 949 in tahsil Chakia. The corresponding figures for the urban are 812 for Varanasi Town-group, 688 for Mughalsarai Town-group, 885 for Bhadohi M. B., 785 for Ramnagar M. B. and 869 for Gopiganj T. A.

6. General Population Tables A-I to A-IV and their Appendices have been reproduced in this volume.

B—Economic

1. **Workers**—Of the entire population 37·0 per cent are workers and the rest non-workers. The percentage of workers is lower than the State average of 39·1. Among workers 59·1 per cent are Cultivators including Agricultural Labourers. Next come Household Industry including other manufacture (18·2 per cent), followed by Other Services (11·4 per cent), and Trade and Commerce (6·2 per cent). In other categories the number is small jointly accounting for 5·1 per cent. The percentage of female workers among the total workers is 25·4. Among female workers in different categories, the percentage is high in Cultivators and Agricultural Labourers (75·2 per cent), followed by Household Industry other than manufacture (18·2 per cent) and Other Services (8·9).

2. Of the rural population 38·5 per cent are workers and the remaining 61·5 per cent non-workers. The corresponding figures for the urban are 32·0 and 68·0. Thus the proportion of workers is lower in towns than in villages which shows a greater degree of dependency. Among rural workers 73·6 per cent are Cultivators and Agricultural Labourers, and only 26·4 per cent are engaged in non-agricultural activities. As usual, non-agricultural workers predominate in urban areas, the percentage of agriculturists being only 2·4. Non-agricultural occupations in the towns in order of importance are Household Industry including other manufacture, Miscellaneous Services, Trade and Commerce and Transport. Their respective percentages being 38·6, 26·5, 19·4 and 9·9.

3. The largest number of workers is in the age-group 15-34 accounting for 47·9 per cent, followed by the next higher age-group 35-59 accounting for 37·1 per cent. The percentage of workers below the age of 15 is 6·8 and in the age-group 60 and over is 8·2. The percentage of workers in lower and higher age-groups is, therefore, small.

4. The largest number of persons at work other than cultivation is in miscellaneous services (33,228), followed by retail trade in various commodities (19,675), transportation (13,892) and cotton weaving in handloom (11,697). Occupationally the bulk of the workers are drawers and weavers (41,160), followed by proprietors of the retail trade (35,456) and general labourers (34,359).

5. **Non-workers**—These constitute 63·0 per cent of the total population. Among non-workers females predominate, constituting 62·4 per cent. More than half of the non-workers (62·8 per cent) are in the age-group 0-14, being mostly infants and dependants. In all other age-groups females are mostly engaged in household duties. The distribution pattern of non-workers among males and females is very dissimilar. Among male non-workers 26·9 per cent are full-time students and 70·8 per cent dependants who jointly account for 97·7. The corresponding figures are 3·5, 52·3 and 55·8 respectively among females. High percentage of dependants among males is explained by their near absence from household duties who claim a negligible percentage as against 43·8 per cent among females.

6. The more important General Economic Tables of the B-Series have been reproduced.

C—Social and Cultural

1. **Literacy**—The percentage of literacy in the total population is 23·6 as against the State average of 17·7. It ranks 6th in literacy in the whole State. Literacy percentage among males is 36·8 and females 9·6 as against the corresponding figures of 25·2 and 5·3 in 1951. There has been an improvement both in male and female literacy during the last decade. Of the total number of literates 74·0 per cent are without any educational standard, 15·8 per cent are of Primary or Junior Basic standard and 10·2 per cent of High School standard and above.

2. The percentage of literacy in the rural population is 18·4 as against 40·6 in the urban. In the rural area 31·6 per cent males and 5·1 per cent females are literate, and in the urban 52·3 per cent males and 26·2 per cent females.

3. **Age Structure and Marital Status**—Persons in the age-group 15-34 account for 31·4 per cent of the population followed by 5-14 26·7 per cent), 35-54 (18·2 per cent), 0-4 (15·3 per cent) and 55 and over (8·3 per cent). The population of the district is progressive as the percentage of persons in young and very young age-groups is 42·0 as against a small percentage (8·3) of elderly persons (55 years and above).

4. The percentage of never-married, married and widowed or divorced persons are 44·3, 48·6 and 7·0 respectively. The corresponding figures for the rural are 43·4, 49·4 and 7·1 and for urban 47·2, 46·2 and 6·4. Among males 49·1 per cent are never-married, 46·1 per cent married, and 4·8 per cent widowed or divorced. Among females 39·3 per cent are never-married, 51·3 per cent married and 9·3 per cent widowed or divorced. The duration of residence of 51·7 per cent of the total immigrants is over 10 years. 72·9 per cent immigrants were returned from rural areas and 27·1 per cent from the urban. Among them 24·5 per cent are males and 75·6 per cent females. The large percentage of females is explained by marriage migration. The percentage of workers and non-workers among them is 28·1 and 71·9 respectively. Among workers 51·6 per cent are engaged in cultivation including other agricultural activities, 19·3 per cent in miscellaneous services, 13·0 per cent in household industries including other manufacture, 6·7 per cent in transport and 6·4 per cent in trade and commerce. The percentage of immigrants from other countries is negligible. The corresponding figures for the urban are 78·7 per cent born within the district including 66·8 per cent in place of enumeration, 12·8 per cent in other districts of the State, 6·3 per cent in other parts of the country and 2·1 per cent in other countries Immigrants from other countries live largely in the urban area of the district.

3. The following Table shows that immigrants from Bihar are the largest in number and smallest from Himachal Pradesh :

	States	Persons	Males	Females
1	Bihar	30,211	10,688	19,523
2	Punjab	4,368	2,317	2,051
3	Madhya Pradesh	1,948	890	1,058
4	Rajasthan	1,706	854	852
5	Delhi	550	266	284
6	Himachal Pradesh	19	12	7

The number of immigrants from other districts of the State is 167,551 (Males 58,173, females 109,378). Females outnumber males in case of Bihar, Madhya Pradesh and Delhi. The main reason appears to be marriage migration.

4. Migration Tables have not been reproduced.
