# DISTRICT CENSUS HANDBOOK
# 1951

## SULTANPUR DISTRICT

# FOREWORD

Several States, including Uttar Pradesh, have been publishing village statistics by districts at each census. In 1941 they were published in U. P. under the title "District Census Statistics" with a separate volume for each district. In the 1951 census, when the tabulation has been more elaborate than ever in view of the requirements of the country, the district-wise volume has been expanded into a "District Census Handbook", which now contains the District Census Tables (furnishing data with break-up for census tracts within the district), the District Index of Non-agricultural Occupations, agricultural statistics from 1901-02 to 1950-51 and other miscellaneous statistics in addition to the usual village population statistics. The village population statistics also are given in an elaborate form giving the division of the population among eight livelihood classes and other details.

2. It may be added here that a separate set of district-wise volumes giving only population figures of rural areas by villages and of urban areas by wards and mohallas and entitled "District Population Statistics" has already been published. This separate series was necessitated by the urgent requirements of the U. P. Government for elections to local bodies.

3. The number of District Census Handbooks printed so far is fifty Special arrangements for speeding up the printing have now been made and it is hoped that the remaining Handbooks will be printed before the end of 1955.

RAJESHWARI PRASAD, I.A.S.,
*Superintendent, Census Operations,*
*Uttar Pradesh*

| | | |
|---|---|---|
| 1 | Vital Statistics | 164—167 |
| 2 | Agricultural Statistics—(i) Rainfall | 168—169 |
| | (ii) Area as classified with details of area under cultivation | 170—173 |
| | (iii) Cropped Area | 174—189 |
| | (iv) Irrigated Area | 190—193 |
| 3 | Live-Stock, Agricultural Machinery and Implements | 194—197 |
| 4 | List of Primary Schools | 198—200 |

# INTRODUCTION

## A—THE DISTRICT

1. The district of Sultanpur is bounded on the north by Faizabad and on the south by Pratapgarh. To the north-west lies Bara Banki and to the west Rae Bareli, while on the east are the Jaunpur and Azamgarh districts. Its area is returned as 1,699 square miles, and its population in 1951 was 12·82 lakhs. It contains 4 tehsils, which are divided into 10 parganas. There are 13 thanas in the district.

**Topography**

2. With the exception of a very gradual and scarcely perceptible slope from north-west to south-east, the surface of the district is generally level, being broken only by the valley of the Gomti and the ravines by which its drainage is effected. Almost the whole of it lies in the watershed of the Gomti, only the southern portion draining towards the Sai. The former divides the district into two unequal tracts the larger of which lies in the south. Each of these tracts has the same three natural zones running parallel to the river. They are the, the Gomti valley with its light soil, alluvium and ravines ; a higher lying belt of adequately drained medium loam ; and a low lying tract of rice land containing vast *usar* plains and innumerable depressions.

The Gomti valley is composed of a light and sandy or gritty and reddish soil (*tikar*) which lends itself easily to erosion. The numerous water courses which carry down the surplus rain water from the uplands, have led to the formation of deep ravines, especially in the lower reaches where there are bare brown tracts, cut up into ugly ridges and relieved only by patches of unprofitable jungle. There are some stretches of rich alluvium which grow good *rabi* crops without irrigation. The tract is liable to flooding

The loam tracts are a level country, highly cultivated and well-wooded. The soil is fertile medium to light loam fully irrigated and adequately drained. There are some patches of land which suffer either from excessive drainage or from *usar*.

The rest of the district, which is exactly half the total area consists of usarous rice lands interspersed with large arid plains and swampy *jhils* and marshes. Drainage is poor. The soil is predominantly clay and stubborn to the plough. Much of the ground is sterile or infected with *reh*.

**Soils**

3. The predominant soil of the district is loam or *dumat*, its percentage in the district being 70·3. Clay is known by the usual name of *matiar* and it forms 16·7 per cent. of the area. The other soils are *bhur* and *tarai* and the artificial soils *kachhiana* and *goind*. *Bhur* is a sandy soil while *tarai* is rich alluvium. *Kachhiana* and *goind* are the heavily manured lands.

**Classification of area**

4. The figures of classification of area during the last fifty years are given in table 2 of Part III of this Volume. The proportion of area under the various categories works out as follows for 1950-51 :

| Particulars | Actual figures (in acres) | Percentage |
|---|---|---|
| Cultivated area ... ... ... ... ... ... | 686,077 | 62·6 |
| Culturable waste (excluding current fallow) ... ... ... ... | 175,974 | 16·1 |
| Current fallow ... ... ... ... ... ... | 19,642 | 1·8 |
| Forest ... ... ... ... ... ... ... | 1,446 | 0·1 |
| Area not available for cultivation of which ... ... ... ... | 212,709 | 19·4 |
| (*a*) *Covered with water* ... ... ... ... | *64,168* | *5·8* |
| (*b*) *Under sites, roads and buildings* ... ... ... ... | *42,420* | *3·9* |
| (*c*) *Barren* ... ... ... ... ... | *106,121* | *9·7* |

The figure in the above table regarding culturable waste taken from the Season and Crop Report is, however, misleading. The State Agriculture Department conducted in 1949-50 a

detailed enquiry through the District Officers regarding the nature of this area in each district. The following analysis of the area resulted from this enquiry :

| Particulars | Area (in acres) | Percentage |
|---|---|---|
| **Total culturable waste (A + B + C)** ... ... ... ... | 176,537 | 100 |
| A—Area under culturable waste land not available for immediate cultivation ... | 104,164 | 59·00 |
| (i) Forest under any legal enactment ... ... ... | 429 | 0·24 |
| (ii) Groves ... ... ... ... ... | 66,917 | 37·91 |
| (iii) Forests of timber trees ... ... ... ... | 6,465 | 3·66 |
| (iv) Thatching grasses, shrubs and bushes ... ... ... | 10,364 | 5·87 |
| (v) Land kept for grazing ... ... ... ... | 19,989 | 11·32 |
| B—Area under culturable waste land available for immediate cultivation but which could not be cultivated | 40,730 | 23·07 |
| Of which due to— | | |
| (i) *Kans* growth ... ... ... ... ... | 101 | 0·06 |
| (ii) Threshing floors ... ... ... ... ... | 3,016 | 1·71 |
| (iii) Malaria ... ... ... ... ... ... | ... | ... |
| (iv) Floods ... ... ... ... ... ... | 97 | 0·05 |
| (v) Lack of drains ... ... ... ... ... | 357 | 0·20 |
| (vi) Lack of water ... ... ... ... ... | 15,545 | 8·81 |
| (vii) Distance from *abadi* ... ... ... ... | 1,117 | 0·63 |
| (viii) Damage from wild animals ... ... ... ... | ... | ... |
| (ix) Other causes ... ... ... ... ... | 20,497 | 11·61 |
| C—Area under culturable waste land that can be brought under immediate cultivation after some improvements besides the area given against 'B' | 31,643 | 17·93 |

From the above it will appear that of the total area recorded as culturable waste only 17·93 per cent. was really capable of being brought under immediate cultivation after some improvements.

Thus the land area cultivated and cultivable including current fallow *per capita* works out to 68·8 cents of which 55·0* cents have already been brought under cultivation and only about 2·5 cents can be further brought under the plough after some improvements.

**Climate and rainfall**

5. The climate is mild, temperate and healthy. From October to June westerly winds prevail. The rainy season commences about the middle of June and continues till the end of September ; the wind during this period hardly ever leaves the east. Rainfall is adequate and well-distributed. The average for the last quinquennium was 39·96 inches. During the last 45 years it has been less than 21 inches in only one year and has usually been over 34 inches.

**Irrigation**

6. Irrigation is drived from wells, canals, swamps, tanks and depressions. Of the total irrigated area in 1950-51 wells covered about 68·5 per cent., canals 4·0 per cent. and other sources 27·5 per cent.

**Crops**

7. More acreage is sown under the *kharif* than under the *rabi* crops. In 1950-51 the area under *kharif* was 514,558 acres, that under *rabi* was 376,293 acres and that under *zaid* crops was 17,715 acres. The principal *kharif* crop of the district is rice and the principal *rabi* crop is gram followed by barley and wheat.

## B—Analysis of the Statistics

**Population: General distribution and density**

1. The table below shows the two basic figures—land area and population—and the derived figures of land area *per capita* :

| Tehsil | Population (in lakhs) | Density (number per square mile) | Land area (in lakhs of acres) | Land area *per capita* |
|---|---|---|---|---|
| Amethi ... ... ... ... | 2·41 | 660 | 2·34 | 0·97 |
| Kadipur ... ... ... ... | 3·16 | 719 | 2·81 | 0·89 |
| Musafirkhana ... ... ... ... | 3·05 | 769 | 2·54 | 0·83 |
| Sultanpur ... ... ... ... | 4·20 | 826 | 3·25 | 0·77 |
| *Sultanpur district* ... ... ... ... | *12·82* | *750* | *10·94* | *0·85* |

* The figure also includes the area classed as current fallow.

† According to the area given by Surveyor General; it is 755.

This district though thirty-sixth in order of area stands twentieth in respect of population in the State. Its density (750) is well above the State figure (557). It has not been inflated by the presence of large towns, (the only town in the district being Sultanpur municipality), and even the rural density is as high as 740, the density of the rural parts of the tehsils being : Amethi 660, Kadipur 719, Musafirkhana 769 and Sultanpur 793. (*Vide* Tables A-I and E)

**Growth of population**

2. The population of the district in 1951 was only 18·3 per cent. higher than what it was fifty years ago. Compared to this the increase in the population of the State during the corresponding period has been 30 per cent. The table below exhibits the variations in the total, rural and urban population for the last five decades.

| Census year | Population | | | Variation | | |
|---|---|---|---|---|---|---|
| | Total | Rural | Urban | Total | Rural | Urban |
| 1901 ... ... | 1,083,904 | 1,074,354 | 9,550 | | | |
| 1911 ... ... | 1,048,524 | 1,039,005 | 9,519 | —35,380 (—3·3) | —35,349 (—3·3) | —31 (—0·3) |
| 1921 ... ... | 1,003,912 | 995,066 | 8,846 | —44,612 (—4·3) | —43,939 (—4·2) | —673 (—7·1) |
| 1931 ... ... | 1,051,284 | 1,039,950 | 11,334 | +47,372 (+4·7) | +44,884 (+4·5) | +2,488 (+28·1) |
| 1941 ... ... | 1,100,368 | 1,087,242 | 13,126 | +49,084 (+4·7) | +47,292 (+4·5) | +1,792 (+15·8) |
| 1951 ... ... | 1,282,160 | 1,264,664 | 17,496 | +181,792 (+16·5) | +177,422 (+16·3) | +4,370 (+33·3) |

Between 1901 and 1921 the population of the district recorded a decrease of 7·4 per cent. when that of the State decreased by 4·0 per cent. only. The district had fared badly during 1901—11 due to plague and migration while due to heavy mortality from influenza epidemic a decrease of 4·3 per cent. was recorded during the decade 1911—21. Since 1921 the decline was arrested and the population of the district recorded an increase of 27·7 per cent. Against this the increase in the population of the State during the same period was of 35·5 per cent. During the decades 1921—30 and 1931—40 the increase was much below the State average while during 1941—50 the population has increased (16·5 per cent.) by more than the State average (11·8 per cent.). In the last decade the highest increase was recorded by Musafirkhana tehsil (25·8 per cent.), the percentage increase in other tehsils being : Amethi 20·9, Kadipur 11·5 and Sultanpur 12·0.

**Vital Statistics**

3. Births and deaths mainly accounts for the trends in the population growth. Migration also is a factor though of lesser importance. The following table gives the mean decennial registered birth and death-rates and the natural rate of increase and population growth-rates of the last three decades for the district as a whole and for its rural and urban areas.

| | Total | Rural | Urban |
|---|---|---|---|
| *Mean decennial birth-rate* | | | |
| 1941—50 ... ... ... | 19·4 | 19·3 | 26·5 |
| 1931—40 ... ... ... | 27·3 | 27·3 | 32·9 |
| 1921—30 ... ... ... | 31·2 | 31·5 | ... |
| *Mean decennial death-rate* | | | |
| 1941—50 ... ... ... | 14·8 | 14·7 | 20·4 |
| 1931—40 ... ... ... | 19·8 | 19·8 | 20·3 |
| 1921—30 ... ... .. | 25·8 | 26·1 | ... |
| *Mean decennial rate of natural increase* | | | |
| 1941—50 ... ... ... | 4·6 | 4·6 | 6·1 |
| 1931—40 ... ... ... | 7·5 | 7·5 | 12·6 |
| 1921—30 ... ... ... | 5·4 | 5·4 | ... |
| *Mean decennial growth-rate* | | | |
| 1941—50 ... ... ... | 15·3 | 15·1 | 28·5 |
| 1931—40 ... ... ... | 4·6 | 4·4 | 14·7 |
| 1921—30 .. ... ... | 4·6 | 4·4 | 24·7 |

There are large omissions in the registration of births and deaths and so the above rates do not represent the true picture at all. They may, however, be taken to be roughly indicative of trends. Both birth and death-rates have fallen during the last decade, but due to a comparatively smaller fall in the death-rate, the survival rate is low.

The figures of natural increase and growth-rate suggest a loss of population during 1921—30 and 1931—40 and a gain during 1941—50.

The average yearly mortality from various causes in the district during 1941—50 was as follows :

| Causes | Number of deaths | Percentage of total deaths |
|---|---|---|
| Fever | 14,426 | 82·0 |
| Dysentery or diarrhoea | 59 | 0·3 |
| Respiratory diseases | 30 | 0·2 |
| Plague, cholera and small-pox | 1,593 | 9·0 |
| Others | 1,490 | 8·5 |

As in the rest of the State ' fever ' is responsible for majority of deaths. But ' fever ' covers a number of ailments which the reporters are unable to identify. (*Vide* Table I, Part III of this volume).

**...ligration**

4. About 91·1 per cent. of the people enumerated in the district at the census of 1951 were born there 8·6 per cent. were born in other district of the State, 0·2 per cent. were born in other parts of India and 0·1 per cent. were born in other countries. Of the immigrants from the districts of the State as many as 60,076 (males 8,602, females 51,474) are from other districts of the same natural division and only 50,435 (males 27,650, females 22,785) are from other parts of the State. The sex proportion suggests that most of the migration from the neighbouring districts is marriage migration of 1,126 immigrants from adjacent States 408 (males 214, females 194) are from Bihar and 367 (males 83, females 284) are from Madhya Pradesh.

Of the immigrants who have come from territories beyond India 735 (males 415, females 320) were Pakistan-born and 795 (males 467, females 328) had their birth place in other territories. The Pakistan-born are generally the displaced persons who numbered 640 (males 370, females 270) in the district. Of the immigrants born in other territories 708 were Burma-born and 72 were Nepal-born.

The only Non-Indian national in the district was a Nepali.

Unfortunately, the figures of emigration are not available. On the balance of migration according to vital statistics, however, the district appears to have lost about 8,000 persons in 1921—30, 32,000 persons in 1931—40 and to have gained about 127,000 persons in 1941—50. But it should be kept in mind that the figures contain an element of registration error and are only indicative of trends. (*Vide* Tables D-IV and D-VI)

**Decline of cultivation** ***per capita***

5. We may now analyse the growth of population in the district during the last thirty years in relation to the growth of cultivation during the same period. (Figures of area shown under census years are quinquennial averages for the five years ending with crop year immediately preceding the census year). It is obvious that cultivation has failed to keep pace with population. The cultivated area has gone down to 52·2 cents in 1951 from 63·2 cents in 1921. The magnitude of this drop is about one-sixth of 1921 level. It means that (other things being equal) every man, woman and child must expect to get less food and other agricultural produce from the land in 1951 than in 1921.

| Census year | Population | Net area sown (in acres) | Area of cultivation *per capita* (in cents) |
|---|---|---|---|
| 1921 | 1,003,912 | 633,923 | 63·2 |
| 1931 | 1,051,284 | 634,669 | 60·4 |
| 1941 | 1,100,368 | 643,616 | 58·6 |
| 1951 | 1,282,160 | 668,042 | 52·2 |

**Double crop cultivation** ***per capita***

6. It may be examined whether this shortage has been compensated by an increase in the yield per acre. Increase in yield can be brought about by more double cropping, more irrigation better fertilisation and better culture. The average quinquennial area sown more than once was 211,640 acres in 1921, 205,791 acres in 1931, 197,017 acres in 1941 and 224,876 acres in 1951.

| Particulars | Quinquennial average for the year preceding | | | |
|---|---|---|---|---|
| | 1951 | 1941 | 1931 | 1921 |
| Double crop cultivation *per capita* in cents | 17·6 | 18·0 | 19·6 | 21·1 |
| Unirrigated double crop cultivation *per capita* in cents | 17·1 | 17·7 | 18·5 | 20·5 |
| Irrigated double crop cultivation *per capita* in cents | 0·5 | 0·3 | 1·1 | 0·6 |

It may be noted that the double crop cultivation *per capita* has been decreasing since 1921.

**Irrigated area** ***per capita***

7. The average area irrigated in the district was 297,970 acres in 1921, 252,465 acres in 1931, 276,669 acres in 1941 and 277,493 acres in 1951. The average area irrigated more than once was 5,850 acres in 1921, 11,619 acres in 1931, 2,765 acres in 1941 and 6,158 acres in 1951. The figures of irrigation *per capita* are shown below :

| Particulars | Years | | | |
|---|---|---|---|---|
| | 1951 | 1941 | 1931 | 1921 |
| Irrigated single crop cultivation *per capita* in cents | 21·2 | 24·9 | 22·9 | 29·1 |
| Irrigated double crop cultivation *per capita* in cents | 0·5 | 0·3 | 1·1 | 0·6 |

The irrigated area *per capita* has declined since 1941 and is much below the 1921 figure.

**Cropped area**

8. During the quinquennium 1916—21, 93·8 per cent. of the cropped area was under food crops and only 6·2 per cent. was under non-food crops. Thirty years after during 1946—51 the cropped area under food crops was only 92·9 per cent. and that under non-food crops was 7·1 per cent. The proportionate area under different crops between 1911 and 1951 was as below :

| Quinquennial average of | Total cropped area | Percentage of cropped area under | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| | | Rice | Wheat | Barley | Juar | Bajra | Maize | Gram | Others |
| 1911—16 ... | 836,677 | 26·9 | 12·3 | 12·5 | 4·2 | 0·7 | 1·6 | 11·7 | 30·1 |
| 1916—21 ... | 825,889 | 29·3 | 11·9 | 11·8 | 4·1 | 0·7 | 1·3 | 10·0 | 30·9 |
| 1921—26 ... | 841,279 | 29·3 | 12·0 | 11·0 | 4 1 | 0·4 | 0·8 | 12·7 | 29·7 |
| 1926—31 ... | 839,626 | 29·5 | 12·6 | 10·8 | 4·5 | 0·3 | 0·9 | 12·2 | 29·2 |
| 1931—36 ... | 825,514 | 27·5 | 13·5 | 11·3 | 4·8 | 0·4 | 1·2 | 10·9 | 30·4 |
| 1936—41 ... | 841,427 | 28·3 | 13·1 | 10·5 | 4·4 | 0·4 | 1·2 | 11·9 | 30·2 |
| 1941—46 ... | 868,929 | 28·0. | 11·1 | 10·4 | 4·6 | 0·6 | 1·3 | 12·8 | 31·2 |
| 1946—51 ... | 897,574 | 29·8 | 10·7 | 10·8 | 4·3 | 0·4 | 1·2 | 12·5 | 30·3 |

**Live-stock, ploughs and carts**

9. Live-stock in this country live for a large part of the year on by-products of agriculture supplemented by green fodder crops. They have, therefore, to be corelated not only with the grazing available but also with the total area under cultivation which carries a major portion of the burden of supporting the cattle population.

As will appear from Table 3 of Part III the total number of cattle and buffaloes which decreased during 1935—44 from about 770 thousands to 676 thousands has increased from 676 thousands in 1944 to 712 thousands in 1951.

The number of working cattle and buffaloes which decreased from 314 thousands in 1935 to 307 thousands in 1944, increased to 328 thousands in 1951. The number of working cattle appears to be governed by the number of ploughs and carts. The number of ploughs has gone up from about 154 thousands in 1935 to 170 thousands in 1951, due apparently to progressive fractionalisation of holdings. The number of carts was about 4,500 in 1935 ; it increased to 5,400 in 1951. The average net cultivated area per plough works out to 4·0 acres in 1951 as against 4·2 acres in 1920 and the average net cultivated area per pair of working cattle was 4·2 acres in 1951 as against 4·1 acres in 1935.

Breeding cows and she-buffaloes have also increased from about 205 thousands in 1944 to 224 thousands in 1951. The cows and she-buffaloes in milk per 1,000 of human population work out to 32 and 29 respectively. Owing to the poor milk yield the share of milk per head is only a few ounces per day.

The number of sheep which increased from about 64 thousands in 1935 to 71 thousands in 1944 has now gone down to 65 thousands in 1951 apparently due to shortage of pasture. Goats which decreased from 233 thousands in 1935 to 151 thousands in 1944 increased to 175 thousands in 1951.

Horses and ponies which were about 13 thousands in 1935 decreased to 7 thousands in 1951. Donkeys have also gone down in number from 990 to 924 during 1944—51.

Poultry has increased from about 45 thousands in 1944 to 53 thousands in 1951.

Distributed on 1,000 of human population the figures of the main categories of live-stock in 1951 are as follows :

| Cattle | Buffaloes | Sheep | Goats | Poultry | Others |
|---|---|---|---|---|---|
| 427 | 128 | 50 | 136 | 41 | 50 |

10. To sum up, the population is growing up at the biological natural rate of increase since 1921 but on the other hand the land area *per capita* has been steadily declining. The magnitude of the absolute numerical increase in relation to the practically stationary acreage under cultivation is a great strain on the economy of the district.

**Villages and towns**

11. The district has 2,479 villages and only 1 town. Out of 1,282 thousands people 1,265 thousands were enumerated in the rural areas in 1951 and 17 thousands in the urban areas, i.e., there were 986 persons per 1,000 of population who lived in villages and only 14 of them lived in town. The corresponding figures for the State as a whole were : rural 864, urban 136.

The rural population per inhabited village works out to 510. The villages generally do not comprise of a single compact site. There are 9,820 hamlets in the district. The population per hamlet works out to 129. The medium-sized village of population between 500—2,000, is the dominant type in the district. Of the rural population 58·2 per cent. live in such villages. 31·4 per cent. of the rural population live in villages of population under 500 and 10·4 per cent. live in villages of population between 2,000 and 5,000.

All the urban population lives in Sultanpur municipality, the only town in the district. In the last decade it has recorded 33·3 per cent. increase in its population. (*Vide* Tables A-III and A-IV)

**Occupations: Livlihood pattern**

12. Out of the total population of 1,282,160 (rural 1,264,664, urban 17,496) 1,134,851 (rural 1,133,595, urban 1,256) or 88·5 per cent. depend on agriculture for their means of livelihood and 147,309 (rural 131,069, urban 16,240) or 11·5 per cent. depend on non-agricultural sources. The following table gives the distribution of 100 persons of total, rural and urban population of the district:

| Description | Agricultural classes | | | | | Non-agricultural classes | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | Total | I | II | III | IV | Total | V | VI | VII | VIII |
| **Total** .. ... | 88 5 | 71·7 | 5·9 | 10·6 | 0·3 | 11·5 | 3·5 | 2·2 | 0·2 | 5·6 |
| Rural ... .. | 89·6 | 72·6 | 5·9 | 10·8 | 0·3 | 10·4 | 3·3 | 1·8 | 0·2 | 5·1 |
| Urban ... ... | 7·2 | 6·0 | 0·6 | 0·1 | 0·5 | 92·8 | 15·6 | 30 8 | 3·0 | 43·4 |

The district is one of the predominantly agricultural districts of the State. Here as many as 88·5 per cent. of the people are engaged in agriculture as against 74·2 per cent. in the State.

Of the total population of the district 667,515 persons (males 260,831, females 406,684 or 52·1 per cent. have been classified as non-earning dependants. The percentage of non-earning dependants in the agricultural population works out to 51·9 and among non-agricultural population to 53·1. It will be seen that in the main they consist of women. The male non-earning dependants are mostly children. 263,101 persons (males 83,725, females 179,376) or 20·5 per cent. are earning dependants. Among agriculturists their proportion is 21·4 per cent. and among non-agriculturists 13·8 per cent. The remaining 351,544 persons (males 296,905, females 54,639) or 27·4 per cent. are self-supporting persons. Their proportion among agriculturists is 26·7 per cent. and among non-agriculturists they form 33·1 per cent. Of the self-supporting persons 302,736 (males 257,913, females 44,823) belong to agricultural classes and 48,808 (males 38,992, females 9,816) belong to non-agricultural classes. On an average a self-supporting person maintains two non-earning dependants.

Of the 48,808 self-supporting persons of non-agricultural population 2,507 (rural 2,325, urban 182) earn their livelihood from non-productive sources. Of the remaining 46,301 self-supporting persons (rural 41,134, urban 5,167) 472 (rural 211, urban 261) or 1·0 per cent. were employers, 7,702 (rural 5,582, urban 2,120) or 16·6 per cent. were employees and 38,127 (rural 35,341, urban 2,786) or 82·4 per cent. were independent workers.

The distribution of 10,000 self-supporting persons of non-agricultural occupations classified according to economic divisions is as follows :

| Name of division | Self-supporting persons by divisions |
|---|---|
| **All Industries and Services** ... .. ... ... ... | 10,000 |
| 0—Primary industries not elsewhere specified ... ... ... ... ... | 167 |
| 1—Mining and quarrying ... ... ... ... ... | 3 |
| 2—Processing and manufacture—foodstuffs, textiles, leather and products thereof ... ... | 1,769 |
| 3—Processing and manufacture—metals, chemicals and products thereof ... ... ... | 239 |
| 4—Processing and manufacture—not elsewhere specified ... ... ... ... | 875 |
| 5—Construction and utilities ... ... ... ... ... | 123 |
| 6—Commerce ... ... ... ... ... | 1,799 |
| 7—Transport, storage and communications ... ... ... ... ... | 251 |
| 8—Health, education and public administration ... ... ... ... ... | 919 |
| 9—Services not elsewhere specified ... ... ... ... ... | 3,855 |

There is no large scale industry in this district worth the name. Among cottage and small scale industries the principal are *tat-patti*, hemp ro ] ( and *sutli* and ropes and *ban* of *moonj* and *bhabar*.

**Variation in the livelihood pattern**

13. In this district, the proportion of population depending on agriculture for their livelihood was 87·3* per cent. in 1951. The proportion stood at 80·1 per cent. in 1901, 83·5 per cent. in 1911 and 74·1 per cent. in 1921. The actual number of persons who depend on agriculture has increased to 1,119,316 in 1951 from 743,984 in 1921, i.e., by 50·4 per cent. while the cultivated area has increased only by 5·4 per cent. This has resulte d in progressive fragmentation and sub-division of holdings and pressure on impoverishe d soil. There appears to have been a gradual decline in village arts and crafts. The cumulative result is a fall in the proportion of workers and a corresponding rise in the dependency.

*The figure includes earning dependants according to their secondary means of livelihood, while the figure 88·5 in paragraph 12 includes earning dependants according to their principal means of livelihood and hence the difference.

The proportion of workers in the total population in 1951 was only 47·9 per cent. (agricultural 41·3 per cent., non-agricultural 6·6 per cent.) as against 54·4 per cent. (agricultural 41·5 per cent. non-agricultural 12·9 per cent.) in 1921. The proportion of non-earning dependants has consequently increased from 45·6 per cent. (Agricultural 32·6 per cent., non-agricultural 13·0 per cent.) in 1921 to 52·1 per cent. (agricultural 46·0 per cent., non-agricultural 6·1 per cent.) in 1951. All this is an index of the increasing unemployment and under-employment. It is only by a diversion of the population to cottage and other industries and by providing subsidiary occupations to agriculturists that the present severe disequilibrium in the economy of the district can be redressed. (*Vide* Tables B-I, B-II and B-III)

**Houses and households**

14. There were 241,408 occupied houses in the district—239,352 in the rural areas and 2,056 in the urban areas. That gives an average of 5,284 persons per 1,000 houses or 5·3 persons per house in the rural areas and 8,510 persons per 1,000 houses or 8·5 persons per house in the urban areas.

There were 262,304 households in the district—258,632 in the rural areas and 3,672 in the urban areas. That gives an average of 4,888 persons per 1,000 households or 4·9 persons per household in the rural areas and 4,630 persons per 1,000 households or 4·6 persons per household in the urban areas. The marginal table below shows the developments in the size of the households since 1921. The rural household has been increasing since 1921 but is still smaller than the average State rural household (5·07). The urban household has also been increasing since 1921.

| Census year | Persons per 1,000 households of | |
|---|---|---|
| | Rural population | Urban population |
| 1921 ... | 4,471 | 4,165 |
| 1931 ... | 4,523 | 4,205 |
| 1941 ... | 4,585 | 4,607 |
| 1951 ... | 4,888 | 4,630 |

Out of 4,888 persons in every 1,000 rural households 2,441 are males and 2,447 are females. There is a female excess of 6 in every 1,000 rural households. Out of 4,630 persons in every 1,000 urban households 2,580 are males and 2,050 are females. There is a male excess of 530 in every 1,000 urban households. The type of migration will account for the difference.

Information regarding type of household and household relationships was also collected at this census with the help of a sample of about 4 per cent. According to this in every 1,000 sample households there are 4,803 persons (males 2,431, females 2,372) in the district. The corresponding figure for the total count is 4,885.

The table below shows the distribution by size of 1,000 sample households.

| Description | Small with 3 members or less | Medium with 4—6 members | Large with 7—9 members | Very large with 10 members or more |
|---|---|---|---|---|
| Total ... ... ... | 357 | 422 | 155 | 66 |
| Rural ... ... ... | 356 | 423 | 155 | 66 |
| Urban ... ... ... | 451 | 326 | 167 | 56 |

Medium households are the dominant type in the villages while small households are more numerous in the urban areas.

Family composition of 1,000 sample households is as follows :

| | | Number in 1,000 households |
|---|---|---|
| A | Heads of households ... Males (married) ... | 609 |
| | Heads of households ... Males (widowers) ... | 276 |
| | Heads of households ... Females ... | 115 |
| | Wives of heads of households ... | 609 |
| | | *1,609* |
| B | Sons of heads of households ... | 950 |
| | Daughters of heads of households ... | 679 |
| | | *1,629* |
| C | Male relations of heads of households (other than sons) ... | 591 |
| | Female relations of heads of households (other than daughters) ... | 727 |
| | | *1,318* |
| D | Persons unrelated to the heads of the households Males ... | 5 |
| | Persons unrelated to the heads of the households Females ... | 242 |
| | | *247* |
| | **Grand Total** ... | *4,803* |

Sons outnumber the daughters of the heads of households. The latter leave the homes of their parents after marriage. Female relatives (other than daughters) outnumber the male relatives (other than sons). Such females are generally those who become members of these households by marriage. (*Vide* Tables A-I and C-1).

**Sex-ratio**

15. In the district as a whole the sex-ratio is 999, i.e., there were 999 females to every 1,000 males. It varies among the tehsils. The highest value was 1,012 in Amethi tehsil and the lowest value was 986 both in Kadipur and Musafirkhana tehsils. In Sultanpur tehsil it was 1,011.

The sex-ratio was higher in the rural areas than in the urban areas. For the district as a whole the sex-ratio in villages was 1,002 and that in the urban areas was 768.

The corresponding figure of sex-ratio in the district was 1,030 in 1921, 1,024 in 1931, 1,046 in 1941 and 999 in 1951.

**Age-structure**

16. The number in each age-group in the district is shown below as a percentage of the total number of all ages in the total, rural and urban population :

| Age-group | | Total population | | | Rural population | | Urban population | |
|---|---|---|---|---|---|---|---|---|
| | | Persons | Males | Females | Males | Females | Males | Females |
| Infants and young children | 0—4 | 12·6 | 6·5 | 6·1 | 6·6 | 6·1 | 5·3 | 6·9 |
| Boys and girls | 5—14 | 24·8 | 13·3 | 11·5 | 13·3 | 11·5 | 12·6 | 11·2 |
| Young men and women | 15—34 | 30·8 | 15·3 | 15·5 | 15·2 | 15·5 | 21·7 | 14·4 |
| Middle-aged men and women | 35—54 | 21·9 | 10·9 | 11·0 | 10·9 | 11·0 | 12·6 | 8·3 |
| Elderly persons | 55 and over | 9·9 | 4·9 | 5·0 | 4·8 | 5·1 | 4·1 | 2·9 |

It will be seen that the population is progressive. 37·4 per cent. of the population is of age under 15 and only 9·9 per cent. of it consists of elderly persons, i.e., 55 and over. Again it may be noted that proportionately 'larger' numbers in the working ages (15—54) are found in the urban areas. This is the effect of migration of male workers to the towns from the villages, many of whom are unaccompanied by their families. (*Vide* Table C-II)

**Marital status**

17. Out of every 10,000 persons in the district, there are 5,092 males and 4,908 females*. Among them 2,087 males and 1,376 females are unmarried. If we reckon males and females together the unmarried people are 34·6 per cent. of the population.

Of the males 41·0 per cent. were unmarried, 50·8 per cent. were married and 8·2 per cent. were widowed or divorced. Among females 28·0 per cent. were unmarried, 57·3 per cent. were married and 14·7 per cent. were widowed or divorced.

Of the married males 13·9 per cent. were below 15, 42·6 per cent. were of ages 15—34, 31·8 per cent. were of ages 35—54 and 11·7 per cent. were of ages 55 and over. Among females 16·1 per cent. were below 15, 50·0 per cent. were of ages 15—34, 28·5 per cent. were of ages 35—54 and 5·4 per cent. were of ages 55 and over.

Marriage is universal. Among males and females aged 35 years and over only 7·5 per cent. of the males and 0·6 per cent. of the females were found unmarried. Most of the females are married before they attain the age of 25. Child marriage is still prevalent. 18·1 per cent. of the males of ages 0—14 and 25·7 per cent. of the females of ages 0—14 were returned as married. (*Vide* Table C-III)

**Languages**

18. Over 99·9 per cent. of the people of the district returned Hindi, Hindustani or Urdu as their mother-tongue. Among the other mother-tongues spoken the main is Punjabi (0·05 per cent.) Of the 12·8 lakhs of people of the district only 697 or 0·05 per cent. were bilingual (in an Indian language). Those whose mother-tongue is other than Hindi, Hindustani or Urdu are generally the migrants who are able to speak any of these as subsidiary language. Persons returning Hindi, Hindustani or Urdu as their secondary language were 589 or 84·5 per cent. of those who were bilingual in some Indian language. (*Vide* Table D-I)

**Religion and special groups**

19. Out of 10,000 population of the district the number of people belonging to different religions is : Hindus 8,816, Muslims 1,178, Sikhs 5, and Christian 1. Of the 10,000 population in villages the numbers are : Hindus 8,848, Muslims 1,151 and Sikh 1. Of the 10,000 population in the urban areas the numbers are : Hindus 6,517, Muslims 3,169, Sikhs 276 and Christians 38. Muslims, Sikhs and Christians are generally concentrated in the urban areas of the district as is the case in the other parts of the State.

There were 206 thousands people belonging to the Scheduled castes in the district. Their number per 10,000 of population works out to 1,604. In villages they are 1,620 for every 10,000 and in the towns they are 460 per 10,000 of population. The district had no Anglo-Indians. (*Vide* Tables D-II and D-III)

**Displaced persons**

20. The number of displaced persons in the district at this census was 640 (males 370, females 270) a large majority of whom were concentrated in Sultanpur municipalty. 94·7 per cent. of the displaced persons were from West Pakistan, 0·6 per cent. from East Pakistan and 4·7 per cent. from districts which could not be traced. (*Vide* Table D-V).

**Literacy**

21. In 1951 the percentage of male literacy was 12·6 in the district while that of female literacy was 1·2. In 1931 the literacy was 5·8 per cent. for males and 0·3 per cent. for females†. On January 1, 1951 there were 431 primary schools with an enrolment of 43,506. (*Vide* Table D-VII).

---

* The corresponding figures for the total count are 5,003 and 4,997.

† The numbers per mille (of the 10 per cent. sample population) of each sex aged 5 years and over who were returned as literate are as below :

| Males | | Females | |
|---|---|---|---|
| 1951 | 1931 | 1951 | 1931 |
| 159 | 67 | 14 | 4 |

## C—Explanatory Note on the Statistics

The statistics in this volume have been presented in three parts :

I—District Census Tables

II—Village, Town, Pargana and Thana Statistics

III—Miscellaneous Statistics

Parts I and II contain census data. A brief account of the system of sorting of census slips and preparation of tables and abstract therefrom is given below.

Part III contains statistics throwing light on special aspects of population and its growth. These have been derived from miscellaneous sources. Table 1, "Vital Statistics", has been prepared from the published and unpublished records of the Director of Medical and Health Services, Table 2, "Agricultural Statistics", from the Annual Season and Crop Reports, Table 3, "Live-Stock, Agricultural Machinery and Implements", from the published figures of Live-Stock Census and Table 4, "List of Primary Schools", from information specially supplied by District Inspector of Schools.

**Processing of census data**

2. The census data presented here has been derived from the census slips by a process of sorting, compilation and tabulation. In previous censuses the slips were first sorted by religion and this division was maintained throughout so that all data was cross-tabulated by religion. This procedure has been abandoned at this census and substituted by a division based on economic characteristics of the population. The whole population has been divided into eight livelihood classes, four of which are of the agricultural category and four of non-agricultural category as follows :

*Agricultural Classes—*

I—Cultivators of land wholly or mainly owned ; and their dependants

II—Cultivators of land wholly or mainly unowned ; and their dependants

III—Cultivating labourers ; and their dependants

IV—Non-cultivating owners of land ; agricultural rent receivers ; and their dependants

*Non-agricultural Classes—*

V—Production (other than cultivation)

VI—Commerce

VII—Transport

VIII—Other services and miscellaneous sources

Another special feature of the sorting of this census was the separation, from the very start, of slips of displaced persons and of a 10 per cent. random sample from the remainder. This has enabled the data of displaced persons to be presented separately while the 10 per cent. sample has been utilized for the preparation of Age Tables.

The slips of this census have been copied by Households into a National Register of Citizens, which has been prepared village-wise for rural areas and mohalla/ward-wise for urban areas. Table C-I is based on a 4 per cent. sample extracted from this Register.

**Tracts**

3. The slips were first sorted by villages for the preparation of the Primary Census Abstract. For the purpose of further sorting the State was divided into tracts consisting of (*a*) *rural tracts*, comprising the rural population of each tehsil, (*b*) *urban city tracts*, comprising the population of areas which had been declared as cities, (*c*) *urban non-city tracts*, comprising the population of urban areas of a district excluding areas declared as cities. Each tract was treated as a unit for sorting of slips. All data were compiled first by tracts and then by districts. This volume presents the tract-wise data for one district (with the exception of A and E Tables, which have been presented tehsil-wise) while the district-wise data for the whole State is contained in the following State volumes :

Part I-B—Subsidiary Tables

Part II-A—General Population Tables

Part II-B—Economic Tables

Part II-C—Age and Social Tables

**Explanatory notes**

4. Detailed explanatory notes are appended to each State table in the printed volumes of State tables. They apply to the tables in this volume also and should be referred to when necessary. A few notes of some of the tables are reproduced below :

*Table A-I*—Column 5 relating to "hamlets" has been introduced for the first time. Any distinctive cluster or agglomeration of houses has been treated as a "hamlet".

A clear distinction has been made in this census between a "House" and a "Household". A house is any human dwelling having a separate main entrance while a household is any commensal unit living in a census house. In previous censuses the figures under "Occupied Houses" used to be that of households, while the figures under columns 7—9 of the present tables refer to occupied census houses as distinct from households.

*The Economic Tables*—The Indian Census Economic Classification Scheme, 1951, together with the occupational division and sub-division adopted for the census are given in Part II-B of the Report.

*Table B-I*—Each of the eight livelihood classes mentioned above has been divided into three sub-classes, with reference to the economic status, as follows :

(i) Self-supporting persons ;

(ii) Non-earning dependants ; and

(iii) Earning dependants

These were defined in the Instructions to Enumerators as follows :

"A 'self-supporting person' is one who is in receipt of an income and that income is sufficient at least for his own maintenance. To be 'self-supporting' a person need not be able to support his family. All that is necessary is that he should be earning sufficient for his personal needs. For purposes of this question the person enumerated is the unit and not the family or household. Any one who is not a 'self-supporting' person in this sense is a 'dependant'. A 'dependant' may be either an 'earning dependant' or a 'non-earning dependant'. The test is whether he secures a regular (and not casual) income, even though it may be small. Such income may be in cash or kind ; it may be continuous or seasonal employment. When the income which he secures is not sufficient to support him that person is an 'earning dependant'. A person who does not earn any income either in cash or kind is a 'non-earning dependant'. Where two or more members of a family household jointly cultivate land and secure an income therefrom, each of them should be regarded as earning part of the income. None of them is, therefore, a non-earning dependant. Each of them should be classed either a 'self-supporting person' or 'an earning dependant' according to the share of income attributable to each. The same applies to any other business carried on jointly. The share of the income is what the head of household deems it to be. This does not mean that every one who works is necessarily a self-supporting person or an earning dependant. Thus, for instance, a housewife who cooks for the family, brings up the children or manages the household is doing very valuable work. Nevertheless, her economic status is that of a non-earning dependant, if she does not also earn an income, and should be recorded as such."

*Economically active, Semi-active and Passive persons*—All non-earning dependants are economically passive. They include persons performing house-work or other domestic or personal services for other members of the same family household. But they do not include " unpaid family workers" or persons who take part along with the members of the family household in carrying on cultivation or a home industry as a family enterprise.

All earning dependants are economically semi-active only. Though they contribute to the carrying on of economic activities, the magnitude of their individual contribution is deemed to be too small to justify their description as economically active. (Their contribution to economic activity is, however, taken into account in the tabulation of data based on secondary means of livelihood.)

All self-supporting persons are, ordinarily economically active with the exception of the following classes and groups :

(*a*) All self-supporting persons of Agricultural Class IV.

(*b*) The following groups of self-supporting persons who are included in non-agricultural Class VIII and derive their principal means of livelihood from miscellaneous sources (otherwise than through economic activity) :

(i) Persons living principally on income from non-agricultural property ;

(ii) Persons living principally on pensions, remittances, scholarships and funds ;

(iii) Inmates of alms-houses and recipients of doles ;

(iv) Beggars and vagrants ; and

(v) All other persons living principally on income derived from non-productive activities.

*Table B-II*—For a self-supporting person who has more than one means of livelihood the *secondary means* of livelihood is the livelihood next in importance to his principal means of livelihood. For an earning dependant it is the source from which he secures his own income, where there are more than one subsidiary occupations only the one providing the largest income has been taken into account.

*Table B-III*—"Employers", "Employees" and "Independent Workers" have been defined as follows in the Instructions to Enumerators :

> An "employer" is only that person who has necessarily to employ other person in order to carry on the business from which he secures his livelihood. Thus if a person employs a cook or any other person for domestic services, he should not be recorded as an "employer" merely for that reason.
>
> An "employee" is a person who ordinarily works under some other person for a salary or a wage in cash or kind as the means of earning his livelihood. There may be persons who are employed as managers, superintendents, agents, etc., and in that capacity control other workers. Such persons are also employees only and should not be regarded as ' employers '.
>
> An "independent worker" means a person who is not employed by any one else and who also does not employ any body else in order to earn his livelihood. (Sweepers, *dhobies*, *kahars*, etc., who work for several masters are independent workers. If, however, any of them accepts whole-time employment under one master he becomes " employee ". Daily wage-earners who work for different masters are likewise independent workers. But if they accept employment under one master, e.g., under a factory, they become "employees".)

*Tables C-II, C-III, C-IV and C-V*—The figures presented in these tables are based on single year age-returns and have not been smoothed.

*Tables D-V* (i) *and* (ii)—For the purpose of these tables a "displaced person" has been defined as follows :

> "A displaced person means any person who has entered India having left or being compelled to leave his home in Western Pakistan on or after the 1st March, 1947, or his home in Eastern Pakistan on or after the 15th October, 1946, on account of civil disturbances or on account of the setting up of the two Dominions of India and Pakistan."
