PREFACE

Districtwise village statistics have been published at most of the Censuses. A list showing the population of villages in each district was published after the 1891 Census. No such list was brought out in 1901. In 1911 Village Directories were prepared for all districts, but could be published only for thirteen on account of the out break of the First World War. At the 1921 Census they were published for all districts in the form of District Census Statistics. In 1931 they were compiled for all districts, but were not published owing to financial stringency, leading to loss of valuable data. At the 1941 Census even though restricted tabulation was undertaken on account of the Second World War, yet the utility of District Census Statistics was recognized and they were published. At the Census of 1951 two volumes were brought out for each district—the District Census Handbook and the District Population Statistics. Government have decided to continue the publication of District Census Handbooks. The 1961 District Census Handbooks contain more data than ever published before. Village Directories, besides giving the population of villages by industrial categories, also contain useful information about schools, hospitals, post offices, etc.

As revised District Gazetteers are going to be published, introductory matterin the District Census Handbooks has been given in brief to avoid duplication.

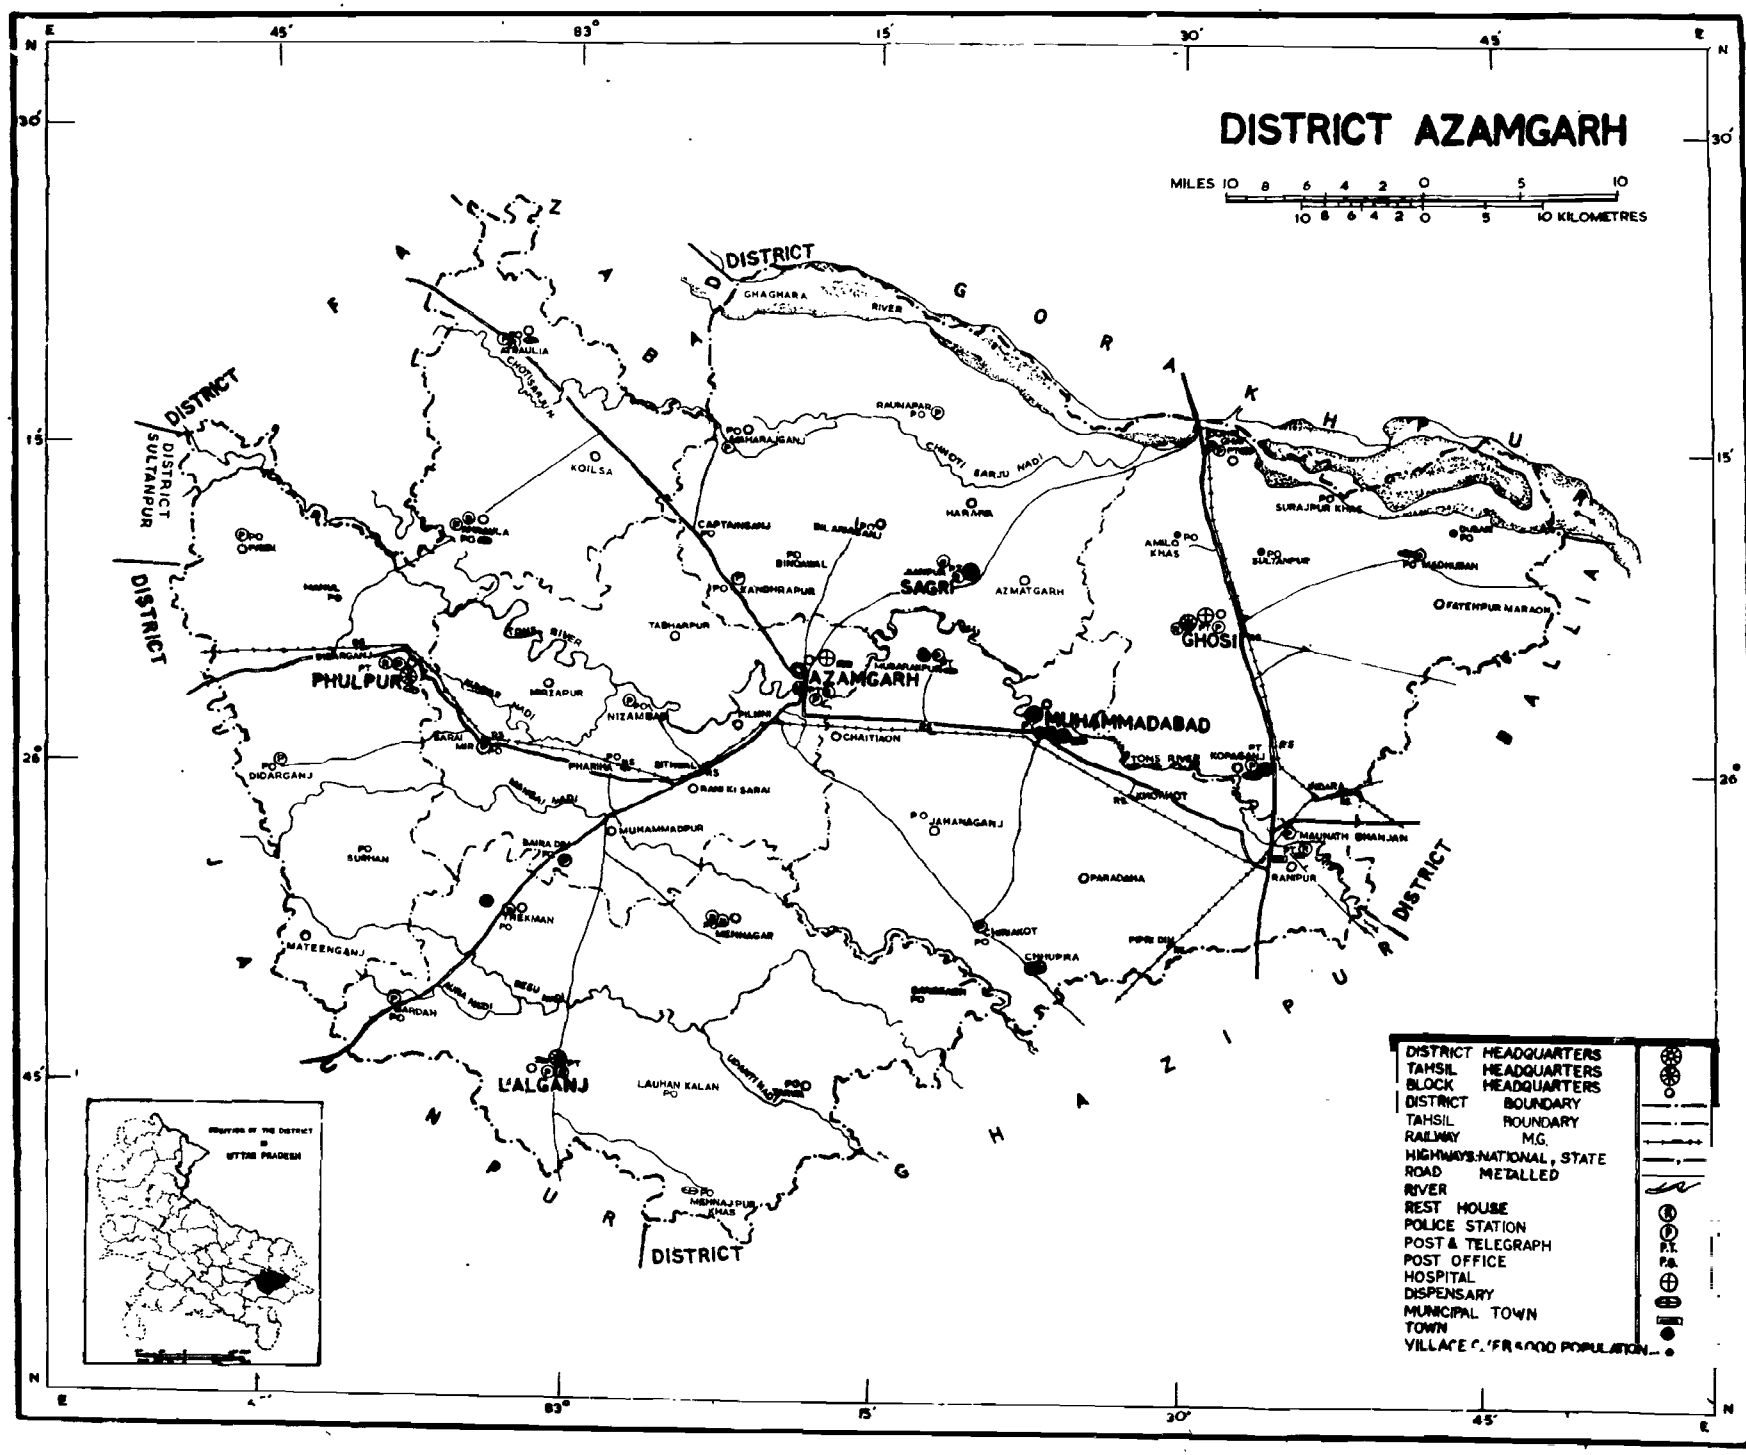

Information for the District Census Handbooks was collected mainly from three sources *viz.*, State Tabulation Office, District Officers, Heads of Departments and their district level officers. In all cases confirmation has been obtained from Heads of Departments concerned. I am extremely grateful to District Officers and the various Heads of Departments for their whole-hearted co-operation in furnishing the desired information.

It is hoped that the District Census Handbooks will prove useful to the various Government departments and scholars.

The printing of the Handbooks commenced from August, 1963.

INTRODUCTION

The District

The district of Azamgarh comprises a somewhat irregularly shaped tract of country lying south of the Ghaghara river, between the parallels of 25°38′ — 26°27′ north latitude and the meridians of 82°40′ — 83°52′ east longitude. It is bounded on the east by Ballia, on the south-east by Ghazipur, on the south-west Jaunpur, on the west for a short distance by Sultanpur, on the north-west by Fhizabad, on the north by Gorakhpur and on the north-east by Deoria district. The river Ghaghara separates the district from the Gorakhpur to Deoria district, while the boundry with the other districts is purely artificial. According to the Surveyor General, India, the area of the district is 5,755 sq. km. (2,222 sq. miles).

2. The district has six tahsils, *viz* Sagri, Ghosi, Azamgarh, Muhammadabad, Phulpur and Lalganj. Phulpur is the largest tahsil having a total area of 1,152.6 sq. kms. (445·0 sq. miles) and Azamgarh the smallest with an area of 811·2 sq. kms. (313·2 sq. miles). There were 11 towns in 1951 Census, but due to non-fulfilment of urban conditions, six of them, namely, Sarai Mir, Nizamabad, Dohri Ghat, Amila, Phulpur and Atraula have been declassified as rural in 1961 Census. There are 5 towns in this Census. The names of these towns in decreasing order of population are Maunath Bhanjan M.B., Azamgarh M.B., Mubarakpur T.A., Kopaganj T.A. and Muhammadabad T.A.

3. The district is served by the Allahabad-Aunrihar-Bhatni main line, the Shahganj-Indara-Ballia and the Indara-Dohrighat branch lines of the North-Eastern Railway (metre gauge). Indara Jn., situated in the eastern part of the district, is the link of the railway communications where all the three lines converge. The National Highway No. 29--Gorakhpur--Ghazipur--Varanasi serves the eastern part of the district passing through Dohrighat, Ghosi, Mubarakpur and Mau. A stretch of 28 miles of this road falls in the district. The other important asphalt and *kankan* roads passing through the district are: Lucknow–Sultanpur-Ballia, Jaunpur---Azamgarh, Faizabad--Azamgarh, Varanasi-Azamgarh, and Ghazipur-Azamgarh roads. Beside these, there are so many motorable *kachcha* and *puckka* roads which connect the various places within the district.

4. In its general aspect the district is a level plain without any hills, the only variations in the surface being caused by the bad lands along the streams that drain it. Except in the proximity of the Ghaghara the country slopes down gently towards the south-east. Here and there will be found depressions of varying depth and

extent, in which the surface drainage of the interior collects. On the other hand, there are some high lying *Usar* plains. There are only two natural divisions---the southern low-lying tract and the northern high-lying tract. They differ markedly from one another. In the latter a distinction may be drawn between the interior uplands which consist of comparatively old formations of alluvial deposit, and the reverine alluvium which lies in the valleys of the rivers and is liable to change. The dividing line of the two tracts lies roughly along the metalled road which runs from Shahganj through Azamgarh to Mau.

5. The northern tract is divisible into two portions, the uplands known as the *bangar* and the lowlands in the vicinity of the Ghaghara called the *Kachhar*. The *bangar* is the most fertile and most stable portion of the district. A portion of it is cut off from the rest in the north-east by the Chhoti Sarju. This is drained partly by that river and partly by some minor channels. The rest of the *bangar* is is drained by the Tons river and its affluents. The soil of the *bangar* tract is a good firm loam which, in the neighbourhood of the rivers becomes light and in a few cases even sandy. Clay is found in the narrow depressions in which the various drainage channels originate, and there are isolaten patches of clay and *usar* resembling those found in the southern tract.

The *Kachhar* area consists of two portions, one being the valley of the present Ghaghara and the other an old bed. The soil is, for the most part, sandy covered in the depressions with deposits of clay silt of varying thickness.

6. The Ghaghara is a great river, navigable through-out its length in this district, and indeed for a long distance beyond the boundaries of Azamgarh by boats of as much as 1,000 mds. cargo. It swells during the rains to an immense size, and, as the current is then very strong and rapid, the damage done by flooding is frequently severe. The minor channels that traverse the district have already been mentioned. None of them are in any sense important streams. Lakes and *jhils* of the district are not only very numerious, but in many cases of considerable size. The important of them are, in the southern tract, those known as *Kotail*, *Jamnawan*, *Gumadih*, *Kumbh*, *Pukh*, *Asuna* and, the largest of, the *Gambhiran*. In the northern section of the district, however, the only lakes that deserve mention are *Koila*, *Kasila-Gasila*, *Kaili*, *Duhia-Birna*, *Ara*, *Tehnan* and *Manchhil*. The *Salona Tal* in Sagri is estimated to be over 12,000 feet long by 9,000 feet broad, its depth being some 20 feet. The *Pakri-Pewa Tal* in Ghosi is 6 miles long, 2 miles board and some 25 feet deep; while the *Narja Tal* in Muhammadabad and the *Ratoi Tal* in Ghosi cover each some 5,000 acres.

7. There are no forests in the district and, strictly speaking, no jungles worthy of the name. Along the Ghaghara there are large expanses of sandy grounds known as *dewaras* covered with *jhau* or tamarisk ; but the *kachhar* tracts are generally deficient in trees. In the interior of the district there are a few woods of *paras* or *dhak*, *sihor*, *babul* and other wild trees. On the other hand, it is a fairly well wooded district. The number of groves in the northern *bangar* tracts filled with mango and other

trees is large and gives a pleasing variety to the landscape. The commonest tree is the Mango; but the *mahua, shisham, nim, pipal, bargad, gular, amaltas, bakain, kachnar, jamun, imli,* and *sirsa* are all to be found singly or in clumps around the village sites or in the fields.

8. The geology of Azamgarh exhibits nothing beyond the ordinary Gangetic alluvium, and consequently the mineral products are but few. They are confined to the saline earths from which saltpetre and salt are educed, to brick-earth, and to the limestone conglomerate known generally as *kankar.* Saltpetre can be educed from the *usar* soil in every portion of the district but in Mahul, Atraula and Maunath Bhanjan parganas the admixture in it of sodium chloride is much greater than elsewhere. *Kankar* in varying quantities and in smaller or larger nodules occurs in most of the stiffer clay beds almost everywhere throughout the old alluvial uplands of the district.

9. On the whole the climate of the district is relaxing but not unhealthy. The rainy season begins in the second or third week of June and lasts still the begining of October. Winter commences from the middle of October and lasts till the middle of March. During this period the prevailing wind is westerly and ground frosts are of occasional occurance, which injure the field crops, especially peas and *arahar.* April, May and first half of June are the hot months. The average rainfall for the last decadium was about 818·3 cms. (322·16 inches). The heaviest rainfall (448·3 cms./176·53 inches) occured in the month of September, 1956.

10. The wild animals of the district are unimportant both as regards their actual number and the variety of species. There are none of the larger carnivora, and even wolves are scarce. Foxes and jackals, as in other districts, are abundant and wild pigs are to be found along the lowlans of the Ghaghara and the larger streams. *Nilgai* or blue bulls are occasionally met with in the scrub and *dhak* jungles.

11. The percentage of cultivated area during 1960-61 was 75·2 as against 73·8 during 1950-51. There are two harvests in the district, main and important, of which is *kharif* and the next *rabi.* The principal *kharif* crop is rice while the principal *rabi* crop is barley followed by peas. Sugarcane is also one of the important crops of the district.

2. Statistics

A–General Population

The district occupies the 21 st position in area and 5th position in population in the whole State. There has been an increase of 21·7 sq. kms. (8·4 sq. miles) in area since 1951 partly on account of transfer of villages and partly due to revised calculation of the area done by the Board of Revenue U.P. The table giving variation since 1901 shows that there has been a progressive increase in population since 1921 the increase being most phenomenal during the decade (1931-41). During the last decade the population rose by 301,495 giving a percentage increase of 14·31 which is lower than the State average of 16·7. The order of tahsils by population in 1951 was Phulpur, Muhammadabad, Ghosi, Azamgarh, Lalganj and Sagri. This order has not changed in 1961. The largest population growth has, however, been in tahsil Muhammadabad (20·4 per cent). The percentage increase in tahsils

Sagri, Ghosi, Azamgarh, Phulpur and Lalganj is 12·8, 15·4, 13·6, 12·2 and 12·4 respectively.

2. The density of population in the district is 419 persons per sq. km. (1,085 per sq. mile) which is higher than the State average of 250 persons per sq. km. (648 per sq. mile). The most densly populated tahsil is Azamgarh, its density being 487 persons per sq. km. (1,262 per sq· mile). Next si Muhammadabad having a density of 479 persons per sq. km. (1,241 per sq. mile) followed by Ghosi 439 persons per sq. km· (1,138 per sq. mile), Phulpur 389 persons per sq. km. (1,009 per sq. mile), Sagri 384 persons per sq. km. (995 per sq. mile) and Lalganj 355 persons per sq. km. (919 per sq. mile). The rural density is 401 persons per sq. km. (1,038 per sq. mile) and the urban 5,269 persons per sq. km. (13,646 per sq. mile). The highest rural density of 453 persons per sq. km. (1,174 per sq. mile) and highest urban density of 11,337 persons per sq. km. (29,363 per sq. mile) is in tahsils Azamgarh and Ghosi (Kopaganj T.A.), respectively.

3. The district has 5,651 villages of which 4,916 are inhabited and 735 un-inhabited. The number of inhabited villages has registered an increase of villages since 1951. Out of every 1,000 persons in the district, 962 live in rural areas. The average population per inhabited village is 466, as against 408 in 1951. Most of the villages are small having a population of less than 500 each, the number of such villages being 3,367 (68·5 per cent). The percentage of medium size villages having a population of 500-1,999 is 29·3 and that of large size villages having a population 2,000 and over is 2·2. More than half (55·0 per cent) of the rural population lives in medium size villages. The percentage living in small and large-size villages is 31·6 and 13·4, respectively.

4. Only 48 out of every 1,000 persons of the district live in towns. There is no town of 50,000 or more population in the district. Maunath Bhanjan M.B. (48,785) and Azamgarh M.B. (32,391) are class III towns while Mubarakpur T.A. (16,133) and Kopaganj T.A. (11,158) come in class IV and Muhammadabad T.A. (6,706) belongs to class VI. Of the urban population, 42·4 per cent live in Maunath Bhanjan M.B., 28·1 per cent in Azamgarh M.B., 14·0 per eent in Mubarakpur T.A., 9·7 per cent in Kopaganj T.A. and 5·8 per cent in Muhammadabad T.A. The largest proportionate growth during the decade has been in Maunath Bhanjan M.B. i.e. 40·2 per cent. The corresponding figures for Kopaganj T.A., Muhammadabad T.A., Azamgarh M.B. and Mubarakpur T.A. are 38·9, 23·2, 21·6 and 12·5 respectively.

5. The sex-ratio, i.e. the number of females per 1,000 males in 1921 was 969; in 1931, 969; in 1941, 988, in 1951, 1,016 and in 1961, 1,032. The sex-ratio in 1961 is higher than the State average of 909. The sex ratio remained stationary during 1921-31 and since 1931, it has increased continuously. It has become favourable to females now. The rural sex-ratio is 1,040. In all the tahsils female predominate. The tahsilwise sex-ratio is Sagri (1,017), Lalganj (1,095), Phulpur (1,051), Ghosi (1,027), Azamgarh (1,009) and Muhammadabad (1,002). The urban sex-ratio is 880—Kopaganj T.A. 1,064; Azamgarh M.B. 752, Maunath Bhanjan M.B. 900, Mubarakpur T.A. 957 and Muhamadabad T.A. 941. The rural sex-ratio is higher

than the urban mainly due to rural-urban male migration in search of employment. In 1951 the rural sex-ratio was 1,024 and the urban 887. While the sex-ratio has increased in the rural areas, it has decreased in urban areas during this decade (1951-61).

6. General Population Tables A-I to A-IV with appendices have been reproduced in this Volume.

B–Economic

Workers—Of the entire population 39·0 per cent are workers and the rest non-workers. The corresponding percentage of workers for the State is 39·1. Among workers 81·0 per cent work as Cultivators and Agricultural Labourers. Next come Household Industry including Manufacturing jointly claiming 11·1 per cent, followed by Other Services (4·3) and Trade and Commerce (2·4). In other categories the number of workers is small. Female participation is quite higher (31·7 per cent) than the State average of 22·1 per cent. It is surprising that the percentage of female participants in both the agricultural and non-agricultural activities as well as in the total workers is the same i.e. 31·7. In all the categories of work, the female participation is lower than that of males except in Agricultural Labour, where it is 53·3 per cent.

2. The largest number of workers (45·4 per cent) belong to the age-group 15-34, after which comes the next age-group 35-59, accounting for 37·2. The percentage of workers, below the age of 15, is 8·4 and in the age-group 60 and above 9·0. The proportion of workers in lower and higher age-groups is expectedly small.

3. The largest number of persons at work other than cultivation, is engaged in Cotton Weaving Industry (41,561), followed by Retail Trade in provisions and dairy products (10,848), Miscellaneous Services (9,906) and Production and rearing of cows, buffalos, goats, mainly for milk and animal power (9,451). Occupationally the bulk of the workers (48,293) are Weavers, Spinners, Knitters, Dyers, etc., followed by Retail Traders (18,768), Millers, Pounders, Huskers (16,773) and those rearing animals, birds etc., (12,170).

4. **Non-workers**—They constitute 61·0 per cent of the total population. More than one-third are males and a little less than two-thirds females. More than half of non-workers are in the age-group 0-14, being mostly infants and dependants. In all other age-groups of females are mostly engaged in Household Duties except of age-group 60 and over, in which dependants and disabled women are higher. Among males 90·9 per cent are in the age-group 0-14, more than three-fourths are infants and dependants, 6·5 per cent in the age-group 15-34, mostly students, 1·7 per cent in the age-group 60 and over, most of them dependants and disabled and 0·9 per cent in the age-group 35-59, mostly dependants.

5. More important Economic Tables of 'B-Series' have been reproduced.

C—Social and Cultural

Literacy—The percentage of literacy in total population is 16·3 as against the State average of 17·7. The rank of the district in literacy is 31st in the whole State. Literacy percentage among males is 26·4 and among females 6·4 as against the corresponding figure of 15·8 and 2·1 in 1951. There has been an improvement both in male and female literacy during the last decade. Of the total number of literates 77·3 percent are without any educational level 17·3 per cent are of Primary or Junior Basic level and 5·4 per cent of High School level and above.

2. The percentage of literacy in the rural population is 15·2 as against 38·1 in the urban. In the rural area 25·1 per cent males and 5·6 per cent females are literate and in the urban 50·6 per cent males and 23·8 per cent females.

Age Structure and Marital Status—Persons in the age-group 15-34 account for 28·9 per cent of the population followed by 5-14 (28·3 per cent), 35-54 (18·6 per cent), 0-4 (15·4 per cent) and 55 and over (8·8 per cent). The population of the district is progressive as the percentage of persons in young and very young age-group is 43·7 as against a small percentage (8·8) of elderly persons (55 years and above).

2. The percentage of never married, married and widowed or divorced persons are 41·0, 52·0 and 7·0 respectively. The corresponding figures for the rural are 40·0, 52·0 and 8·0; for urban 49·0, 46·0 and 5·0. Among males 46·0 per cent are never married, 48·0 per cent married, and 6·0 per cent widowed or divorced. Among females 36·0 per cent are never married 55·0 per cent married and 9·0 per cent widowed or divorced.
