PREFACE

Districtwise village statistics have been published at most of the Censuses. A list showing the population of villages in each district was published after the 1891 Census. No such list was brought out in 1901. In 1911 Village Directories were prepared for all districts, but could be published only for thirteen on account of the out break of the First World War. At the 1921 Census they were published for all districts in the form of District Census Statistics. In 1931 they were compiled for all districts, but were not published owing to financial stringency, leading to loss of valuable data. At the 1941 Census even though restricted tabulation was undertaken on account of the Second World War, yet the utility of District Census Statistics was recognized and they were published. At the Census of 1951 two volumes were brought out for each district—the District Census Handbook and the District Population Statistics. Government have decided to continue the publication of District Census Handbooks. The 1961 District Census Handbooks contain more data than ever published before. Village Directories, besides giving the population of villages by industrial categories, also contain useful information about schools, hospitals, post offices, etc.

As revised District Gazetteers are going to be published, introductory matter in the District Census Handbooks has been given in brief to avoid duplication.

Information for the District Census Handbooks was collected mainly from three sources viz., State Tabulation Office, District Officers, Heads of Departments and their district level officers. In all cases, confirmation has been obtained from Heads of Departments concerned. I am extremely grateful to District Officers and the various Heads of Departments for their whole hearted co-operation in furnishing the desired information.

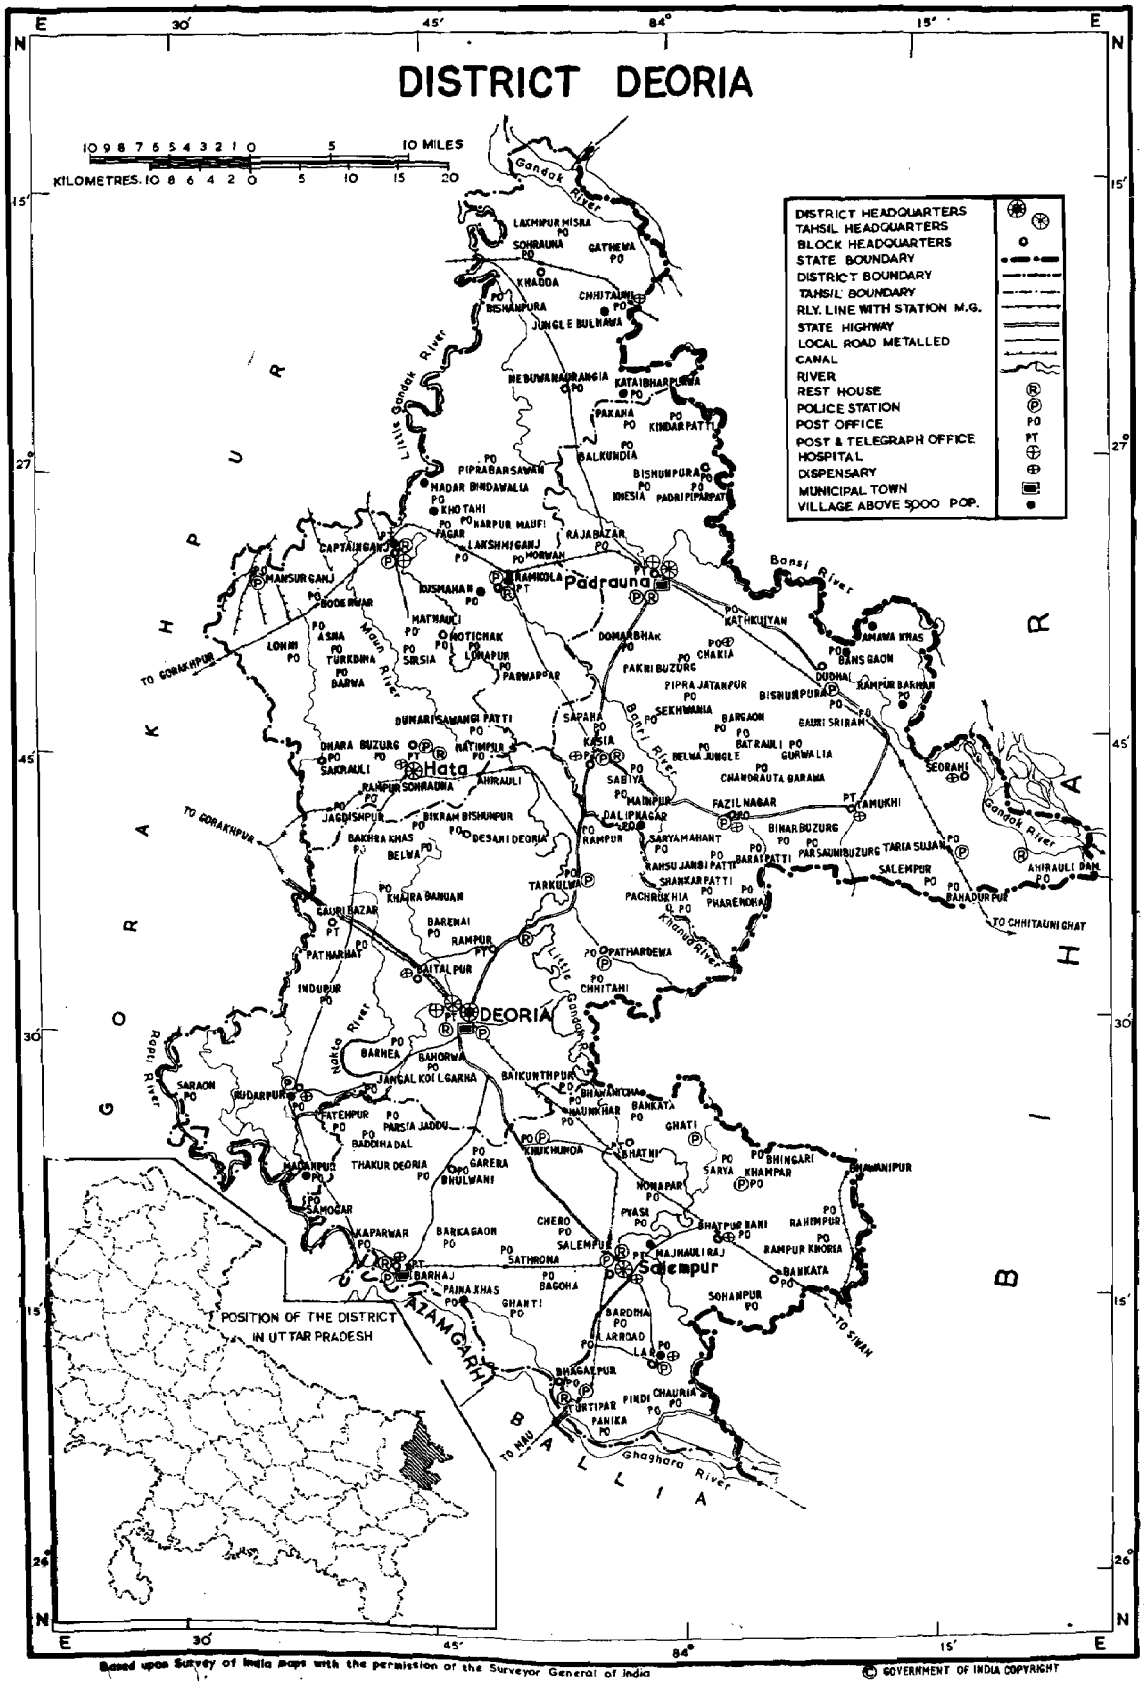

It is hoped that the District Census Handbooks will prove useful to the various Government departments and scholars.

The printing of the Handbooks commenced from August, 1963.

INTRODUCTION

The District

1. The district of Deoria occupies the extreme north-east corner of Uttar Pradesh. It has been carved out of the old district of Gorakhpur in 1946. On the west the border marches with Gorakhpur. To the north and east are the Champaran and Saran districts of Bihar, the dividing line being partly artificial and in part supplied by the Great and Little Gandak rivers. It is bounded on the south by the Ghaghara, which separates it from Azamgarh and Ballia. According to the Surveyor General of India, the district covers an area of 5,405·0 Sq. kms. (2,087·0 Sq. miles.)

2. The district has four tahsils Hata, Padrauna, Deoria and Salempur. The largest in area is Padrauna (1,461·3 Sq. kms. or 564·3 Sq. miles) and the smallest Deoria (1,266·5 Sq. kms. or 489·0 Sq. miles). Hata and Salempur tahsils have an area of 1,411·8 Sq. kms. or 545·1 Sq. miles and 1,284·4 Sq. km. or 495·9 Sq. miles respectively. Hata is an entirely rural tahsil and the remaining three tahsils have one town each namely, Padrauna M. B., Deoria M. B. and Gaura Barhaj M. B. while at 1951 Census there were seven towns. The four towns namely Lar, Rudarpur, Rampur and Captainganj of the 1951 Census have been declassified as rural towns due to non-fulfilment of urban conditions laid down in 1961 Census.

3. Deoria lies on Lucknow-Katihar trunk line of North Eastern Railway (metre gauage), passing through Gonda-Basti-Gorakhpur-Deoria-Chhpra and Muzaffarpur. The metalled roads are also connect Deoria with Gorakhpur and Ballia.

4. On account of proximty to the Himalayas, the district presents in its general aspect the appearance of a level alluvial plain. Tahsil Padrauna forms the northern portion of the district. As a whole the tahsil is a fertile plain with a great slope in a south-easterly direction, the level surface being diversified only by the river valleys and a few sandy ridges, one of which Kasia and Padrauna rises to a height of about 386 feet above the sea and is the greatest natural eminance in the district. There are many extensive tracts of bush and scrub jungle in the north, and in places along the Gandak wide stretches of grassy waste are to be found. Tahsil Deoria is a fertile plain with a gentle undulating surface, marked in places by low sandy pits. The south part of the district comprises of tahsil Salempur, of which a greater part is 'Bangar' and is stretch of fertile and tilled soil, the level surface being broken by only occasional ridges of sand and the few river valleys, the chief of which is Little Gandak.

5. Great Gandak, the important river of the district, flows in a south-easterly direction and for a short distance forms the boundary with Champaran district of Bihar. This river is subject to violent and sudden floods which cost extensive inundation of villages situated in Hata and Padrauna tahsils. Next is the Little Gandak an old channel of Great Gandak. It touches the district in Hata tahsil and forms the western boundary of the district. Thereafter it crosses the district dividing into two parts and enters into Salempur tahsil to join the river Ghaghara. River Rapti a powerful stream, separates the south western part of the district from

Gorakhpur. The river frequently changes its course and its *Kachhar* is liable to floods. The deep stream of river Ghaghara forms the boundary between this district and Azamgarh and Ballia districts on the south. The bed of the river is flanked by steap and well defined banks but occasionally the water rises in heavy floods with disastrous results. Bansi, Banri, Khanua, Maun, Gorra, Bathua, Kurna and Nakta are the tributaries of the aforesaid rivers.

6. As the geology of the district exposes nothing beyond ordinary river alluvium, the mineral products are necessarily few and unimportant. Saltpetre principally occurs in Salempur Tahsil and is manufactured in the crude state in considerable quantities. The chief characteristic of the soil of Padrauna tahsil and of an extensive block in the eastern extremity of Deoria tahsil is '*Bhat*'. The *bhat* tracts consists of alluvium, the distinguishing feature being its remarkable whiteness which is due to the unusual proportion of carbonate of lime in the soil.

7. The climate of the district is far more equable than that in the western districts. Extremes of heat and cold are rarely experienced. Dust storms are of rare occurrence. The northern portion of the district—specially those parts which are bordering on the 'Tarai'—are unhealthy. Immediately after rains fever is much prevalent in these areas. The people in that areas are generally of poor physique. The monsoon breaks out somewhat earlier. Generally the rains commence from the second week of June and last upto the first week of October. The average rainfall during the last decade (1951-60) was 135·9 cms. (53·5") higher than the normal rainfall of 123·4 cms. (41·6").

8. As this district is very thickly populated and the population is mainly rural, depending largely on agriculture, there is an intense demand of timber for agricultural implements, carts and house building. Firewood for domestic use and for sugar mills is alo in great demand. Grass provides grazing material for cattles and is also used as a thatching material. The marketable products include timber, firewood, grass, honey, wax, hide, canes and bamboos.

9. Tigers, now a days, are confined to adjoining forests near river Gandak in upper north but in very rare number. Other wild animals and birds are panther, black duck, sambhar, jungle fowl, black patridge, *nilgai*, chital, wild pigs, jackals etc., geese and ducks of numerous varieties are found during winter season, when the rivers and ponds are full.

10. The percentage of cultivated area in 1960-61 was 81·4 as against 79·6 in 1950-51. The *Kharif* and *Rabi* are the main harvests, the *kharif* being more important for the district as a whole. The principal *kharif* crop is paddy, followed by maize. The chief *rabi* crop is wheat, followed by barley, peas and gram. Sugarcane is the main cash crop of the district.

2. Statistics

A—General Population

The district occupies the 24th position in area and 7th position in population in the whole State. There has been a minor increase of 3·4 Sq. kms. (1·3 Sq. miles) in area since 1951 which is due to the revised calculation of area by the Board of Revenue. The table giving variation in population since 1901 shows that there has been a continuous increase, the increase being the highest during the last decade (1951-61). The population rose by 272,448 during this period giving a percentage increase of 12·96 which is lower than the State

average of 16·7. The order of tahsils by population in 1951 was Padrauna, Salempur, Deoria and Hata while in 1961 the order is Padrauna, Deoria, Salempur and Hata. The largest population growth has, however, been in tahsil Hata amounting to 15·2 per cent. The percentage increase in tahsils Deoria, Padrauna and Salempur is 13·8, 12·1 and 11·0 respectively.

2. The density of population in the district is 438 persons per Sq. km. (1,134 persons per Sq. mile) which is above than the State average of 250 persons per Sq. km. (648 per Sq. mile). The most densely populated tahsil is Deoria, its density being 480 persons per Sq. km. (1,235 per Sq. mile). Next come Salempur having density of 465 persons per Sq. km. (1,205 per Sq. mile), Padrauna 421 persons per Sq. km. (1,090 per Sq. mile) and Hata 396 persons per Sq. km. (1,025 per Sq. mile). The rural density is 429 persons per Sq. km. (1,111 per Sq. mile) and the urban 2,666 persons per Sq. km. (6,904 per Sq. mile). The highest rural density is in tahsil Deoria, 460 persons per Sq. km. (1,192 per Sq. mile) and urban density in Padrauna M. B. of Padrauna tahsil 10,957 persons per Sq. km. (28,380 per Sq. mile).

3. The district has 3,809 villages of which 3,552 are inhabited and 257 un-inhabited. The number of villages has registered an increase of 262 since 1951. 976 persons per 1,000 in the district live in rural areas. The average population per inhabited village is 652. The villages having a population of less than 500, are 1,895 (53·3 per cent of the inhabited villages). The number of medium sized villages with a population 500-1,999 is 1,519 (42·8 percent). The number of large sized villages having a population of 2,000 and above is 138 (3·9 percent). More than half of the rural population (59·3 percent) lives in medium sized villages. The percentage of the population living in small and large sized villages is 21·6 and 19·1 respectively.

4. Nearly 24 persons per 1,000 persons of the distric live in towns. There is no class I or class II town in the district. Deoria M. B. (28,407) is class III town and Gaura Barhaj M. B. (15,264) and Padrauna M. B. (13,906) belong to class IV towns. Of the urban population 49·3 percent live in Deoria M. B., 26·5 percent in Gaura Barhaj M. B. and 24·2 in Padrauna M.B. The largest population growth, during the decade has been in Deoria M. B. (amounting to 40.9 percent). The percentage increase in Padrauna M. B. is 33·8 and Gaura Barhaj M. B. has registered a decrease (—6·5 percent) during the decade.

5. The sex ratio, i.e., the number of females per 1,000 males in 1921 was 966, in 1931 944, in 1941 988, in 1951 1,003 and in 1961 1,002, which is higher than the State average of 909. The rural sex-ratio is 1,007; it is 433, 1,007, 1,015 and 1,075 in tahsils Hata, Padrauna, Deoria and Salempur respectively. The urban sex ratio is 808. In Padrauna M.B., Deoria M. B. and Gaura Barhaj it is 814, 727 and 974 respectively. The rural sex ratio is higher than the urban mainly due to male migration to urban areas. In 1951 the rural sex ratio was 1,007 and urban 879.

6. General Population Tables A-I to A-IV and their Appendices have been reproduced in this volume.

B—Economic

Workers—The population of the district is distributed between workers and non-workers in the ratio of 40·7: 59·3. The corresponding distribution of workers and non-workers for the

State is 39·1: 60·9. Among workers 90·9 per cent work as Cultivators and Agricultural Labourers, including Next come Household Industry and other Manufacturing, jointly claiming 4·2, followed by Other Services 2·9 per cent and Trade and Commerce 1·4 per cent. In other categories the number of workers is small. Female participation is significant as their percentage among total workers is 30·0. The extent of female participation in agricultural activities is higher than in non-agricultural activities accounting for 93·4 per cent and 6·6 per cent respectively.

2. Of the rural population 40·9 per cent are workers and the remaining 59·1 per cent non-workers. The corresponding figures for the urban are 31·7 and 68·3 respectively. Thus the proportion of workers is lower in towns than in villages. Among rural workers 92·4 per cent are Cultivators and Agricultural Labourers, and workers engaged in non-agricultural activities account for 7·6 per cent only. There is a preponderance of non-agricultural workers in the urban, their percentage being 86·4 as against a small percentage of 13·6 in the agriculture sector. The important non-agricultural categories of workers in the urban area are Other Services, Trade and Commerce and Household Industries including Other Manufacturing. The percentage of workers in Other Services is 35·3, in Trade and Commerce 23·6 and in Household Industry and Other Manufacturing 19·0.

3. The largest number of workers is in the age group 15-34 accounting for 44·2 per cent, followed by the next age-group 35-59 which accounts for 38·9 per cent. The percentage of workers below the age of 15 is 8·3 and that in the age group 60 and over is 8·6. The population of workers in lower and higher age groups is quite small.

4. The largest number of persons in industries other than cultivation is in the production of sugar and syrup from sugarcane (8,954), followed by in miscellaneous services (6,756), and in production of rice atta, flour etc. by milling, dehusking and processing of crops and foodgrains (4,397). Occupationally the bulk of the workers comprises upon working proprietors retail trade (9,943) and general labourers (6,631).

5. **Non-workers**—These constitute 5·3 per cent of the total population. Among non-workers, females predominate, constituting 63·8 per cent. More than half of the non-workers (64·9 per cent) are in the age group 0-14, being mostly infants and dependants. In all other age groups females are mostly engaged in household duties. The distribution pattern of non-workers among males and females is very dissimilar. Among male non-workers 21·6 per cent are full time students and 78·0 per cent dependants who jointly account for 99·6 per cent. The corresponding figures are 1·1, 52·6 and 53·7 respectively among females. High percentage of dependants among males is explained by their near absence from household duties which claim a negligible percentage as against 46·3 among females.

6. The more important General Economic Tables of the B-Series have been reproduced.

C—Social and Cultural

Literacy—The percentage of literacy in the total population is 14·1 as against the State average of 17·7. It ranks 40th in literacy in the whole State.
