# DISTRICT CENSUS HANDBOOK
# 1951

## GONDA DISTRICT

# FOREWORD

Several States, including Uttar Pradesh, have been publishing village statistics by districts at each census. In 1941 they were published in U. P. under the title "District Census Statistics" with a separate volume for each district. In the 1951 census, when the tabulation has been more elaborate than ever in view of the requirements of the country, the district-wise volume has been expanded into a "District Census Handbook", which now contains the District Census Tables (furnishing data with break-up for census tracts within the district), the District Index of Non-agricultural Occupations, agricultural statistics from 1901-02 to 1950-51 and other miscellaneous statistics in addition to the usual village population statistics. The village population statistics also are given in an elaborate form giving the division of the population among eight livelihood classes and other details.

2. It may be added here that a separate set of district-wise volumes giving only population figures of rural areas by villages and of urban areas by wards and mohallas and entitled "District Population Statistics" has already been published. This separate series was necessitated by the urgent requirements of the U. P. Government for elections to local bodies.

3. The number of District Census Handbooks printed so far is fifty-one Special arrangements for speeding up the printing have now been made and it is hoped that the remaining Handbooks will be printed before the end of 1955.

# INTRODUCTION

## A—THE DISTRICT

1. Gonda is one of the two trans-Ghagra districts of the Faizabad division in the north-east of the State. It is bounded on the north by the territory of Nepal, with a belt of forest running at the foot of the low hills of the outer ranges of the Himalayas. The southern borders are washed by the Ghagra which separates it from the districts of Faizabad and Bara Banki. On the east the Arrah river separates it from Nepal for some twenty-two miles, and the remaining portion of the boundary is formed by the Basti District, the dividing line being partly conventional and partly supplied by the Burhi Rapti, Rapti, Suwawan, Kuwana and Manwar rivers. To the west lies the Bahraich district, separated, where possible, by various rivers and streams, but more frequently by artificial boundaries. The district is one of the largest in the State, its area being 2,826 square miles. Its population in 1951 was 18·77 lakhs. It is divided into three tehsils, Utraula,* Gonda and Tarabganj, and contains 13 parganas and 17 thanas.

**Topography**

2. The district falls into three natural divisions—The *tarai*, *uparhar* and *tarhar*. Roughly speaking, the northern one-third across the Rapti is the *tarai*. As in all the submontane tracts, it lies low, water is very near the surface, and floods are frequent. Towards the reserve forest in the north, the tract is intersected by several torrent beds, the high banks of which are cut up by ravines. Their broad beds are covered with shingle and sand. Further south swamps are frequent and the soil is a heavy clay, admirably suited for the growth of fine rice. The riparian belts on either side of the Rapti are subject to frequent flooding.

From the Rapti southwards the level rises to the *uparhar* or central upland plain, which is a slightly raised plateau extending from the line of the Rapti to a broken sandy ridge, known as the *uparhar* edge, running from north-west to south-east a few miles north of the Terhi river and passing a short distance to the south of the town of Gonda. It is intersected by streams and several drainage channels dividing it into a series of fertile strips alternating with belts of lighter and uneven soil and stretches of jungle along the streams. It embraces the southern part of Utraula tehsil, the large pargana of Gonda and some portions of Tarabganj tehsil in parganas Mahadewa and Nawabganj.

Further south the *uparhar* drops some fifteen feet to the level of the Ghagra, where there is a broad belt of lowlying land known as the *tarhar* or moist area, influenced directly by the Ghagra and its tributaries the Sarju and Terhi. It comprises nearly the whole of Tarabganj tehsil and the Paharapur pargana of Gonda tehsil. The whole of it is covered with a network of small streams, and in wet years a large portion of it is liable to inundation. The sub-soil is everywhere composed of pure river sand, betraying its origin, and above this is a crust of alluvial loam of varying thickness and quality. At places ridges of sand crop up and between them are depressions with a loam soil of great fertility. The drainage is defective and this part of the district is liable to suffer damage in seasons of heavy floods from abnormal rainfall.

**Soils**

3. The soil of the *tarai* is generally a stiff, heavy clay, but in places this gives way to a rich alluvial loam. In the *uparhar* loam predominates to the extent of about two-thirds, while the remainder, which is found in parts of pargana Mankapur, the high land adjoining the rivers and the *uparhar* edge, is of a lighter quality and contains a larger proportion of sand. The *uparhar* produces good crops of wheat and rice. In the *tarhar* the soil is a light and porous loam, in places, and especially along the Terhi, degenerating into almost pure sand. There is practically no clay in the *tarhar*. Maize and wheat are the main crops.

**Classification of area**

4. The figures of classification of area during the last fifty years are given in Table 2 of Part III of this volume. The proportion of area under the various categories works out as follows for 1950-51 :

| Particulars | Actual figures (in acres) | Percentage |
|---|---|---|
| Cultivated area .. .. .. .. .. | 1,231,834 | 67·8 |
| Culturable waste (excluding current fallow) .. .. .. | 254,339 | 14·0 |
| Current fallow .. .. .. .. .. .. | 58,216 | 3·2 |
| Forest .. .. .. .. .. .. | 104,093 | 5·7 |
| Area not available for cultivation of which— .. .. .. | 169,623 | 9·3 |
| (*a*) *Covered with water* .. .. .. .. | *95,493* | *5·2* |
| (*b*) *Under sites, roads and buildings* .. .. .. | *64,873* | *3·6* |
| (*c*) *Barren* .. .. .. .. .. | *9,257* | *0·5* |

The figure in the above table regarding culturable waste taken from the Season and Crop Report is, however, misleading. The State Agriculture Department conducted in 1949-50 a detailed

*Since the last census the northern parganas of the district have been separated from Utraula and they now form the Balrampur Tehsil.

enquiry through the district officers regarding the nature of this area in each district. The following analysis of the area resulted from this enquiry :

| Particulars | Area (in acres) | Percentage |
|---|---|---|
| **Total culturable waste (A+B+C)** .. .. .. .. | **246,811** | **100** |
| A—Area under culturable waste land not available for immediate cultivation .. .. .. .. .. .. | 126,501 | 51·25 |
| (i) Forest under any legal enactment .. .. .. | 914 | 0·37 |
| (ii) Groves .. .. .. .. .. | 44,226 | 17·92 |
| (iii) Forests of timber trees .. .. .. .. | 55,083 | 22·32 |
| (iv) Thatching grasses, shrubs and bushes .. .. .. | 10,328 | 4·18 |
| (v) Land kept for grazing .. .. .. .. | 15,950 | 6·46 |
| B—Area under culturable waste land available for immediate cultivation but which could not be cultivated .. .. .. | 83,368 | 33·78 |
| Of which due to— | | |
| (i) *Kans* growth .. .. .. .. .. | 54 | 0·02 |
| (ii) Threshing floors .. .. .. .. | 2,279 | 0·93 |
| (iii) Malaria .. .. .. .. .. | 2 | .. |
| (iv) Floods .. .. .. .. .. | 349 | 0·14 |
| (v) Lack of drains .. .. .. .. .. | 30 | 0·01 |
| (vi) Lack of water .. .. .. .. .. | 1,506 | 0·61 |
| (vii) Distance from *abadi* .. .. .. .. | 4,088 | 1·66 |
| (viii) Damage from wild animals .. .. .. .. | 371 | 0·15 |
| (ix) Other causes .. .. .. .. .. | 74,689 | 30·26 |
| C—Area under culturable waste land that can be brought under immediate cultivation after some improvements besides the area given against 'B' .. .. .. .. .. .. | 36,942 | 14·97 |

From the above it will appear that of the total area recorded as culturable waste only about 15 per cent. was really capable of being brought under immediate cultivation after some improvements.

Thus the land area cultivated and cultivable including current fallow works out to 82·3 cents. of which 68·7* cents. have already been brought under cultivation and only about 2·0 cents. can be further brought under the plough after some improvements.

**Climate and rainfall**

5. At almost all seasons of the year the prevailing winds blow from the east. The cold weather lasts longer than in the districts to the south, but at the same time frosts are uncommon. The district as a whole has a bad reputation for its damp and enervating climate. This is chiefly due to the prevalence of malaria, owing mainly to the large forest area and the general height of the water level. Different parts of the district exhibit very different degrees of unhealthiness. The worst time of the year is after the rains and the worst sufferers are undoubtedly the *tarai* pargana of Tulsipur and the valley of Kuwana. Goitre is another disease found in the immediate neighbourhood of the *tarhar* rivers. The *uparhar*, especially the eastern part, is comparatively healthy.

The district receives an abundant rainfall. The average for the last quinquennium was 43·2 inches. During the last 45 years the rainfall was less than 18 inches in only one year and has been usually over 40 inches. The distribution varies considerably in the district. The northern parganas receive much more rain than those in the south.

**Irrigation**

6. Wells and tanks and also *jhils* and the streams play an important part in the irrigation of the district. It has no canals. In 1950-51 of the total irrigated area the wells covered 65·4 per cent. and other sources 34·6 per cent. In the *tarhar* and *tarai*, owing to the natural moisture of the soil, there is little need for artificial watering.

**Crops**

7. More acreage is sown under the *kharif* than under the *rabi* crops. In 1950-51 the area under *kharif* was 1,003,553 acres, that under *rabi* 643,454 acres and that under *zaid* crops 1,848 acres. The principal *kharif* crops are rice and maize and the principal *rabi* crops are wheat and gram. The area under sugarcane was 45,103 acres in 1950-51.

## B—Analysis of the Statistics

**Population: General—distribution and density**

1. The table below shows the two basic figures—land area and population—and the derived figures of land area *per capita* :

| Tehsil | Population (in lakhs) | Density (number per square mile) | Land area (in lakhs) of acres) | Land area *per capita* |
|---|---|---|---|---|
| Gonda .. .. .. | 4·94 | 798 | 3·96 | 0·80 |
| Tarabganj .. .. .. | 4·43 | 668 | 4·24 | 0·96 |
| Utraula .. .. .. | 9·40 | 603 | 9·99 | 1·06 |
| *Gonda district* .. .. | *18·77* | *661*† | *18·19* | *0·97* |

*The figure also includes the area classed as current fallow.
†According to the area given by the Surveyor General, it is 664.

This district though eighth in order of area stands ninth in the State in respect of population. Its density is 661 while that of the State is 557. The district has no large towns and even its rural density is as high as 633, the density of the rural parts of the tehsils being : Gonda 742, Tarabganj 649 and Utraula 582. Tehsils Utraula and Tarabganj have a comparatively low density on account of the forest areas included in the former and due to certain *tarai* areas included in the latter.

**Growth of population**

2. The population of the district in 1951 was only 33·8 per cent. higher than what it was fifty years ago. Compared to this the increase in population of the State during the corresponding period has been 30 per cent. The table below exhibits the variation in the total, rural and urban population for the last five decades.

| Census year | Population | | | Variation | | |
|---|---|---|---|---|---|---|
| | Total | Rural | Urban | Total | Rural | Urban |
| 1901 .. | **1,403,529** | 1,343,715 | 59,814 | .. | .. | .. |
| 1911 .. | **1,412,519** | 1,362,509 | 50,010 | **+8,990** (+0·6) | +18,794 (+1·4) | —9,804 (—16·4) |
| 1921 .. | **1,473,389** | 1,419,349 | 54,040 | **+60,870** (+4·3) | +56,840 (+4·2) | +4,030 (+8·1) |
| 1931 .. | **1,576,003** | 1,508,833 | 67,170 | **+102,614** (+7·0) | +89,484 (+6·3) | +13,130 (+24·3) |
| 1941 .. | **1,719,644** | 1,622,214 | 97,430 | **+143,641** (+9·1) | +113,381 (+7·5) | +30,260 (+45·0) |
| 1951 .. | **1,877,484** | 1,785,804 | 91,680 | **+157,840** (+9·2) | +163,590 (+10·1) | —5,750 —(5·9) |

Between 1901 and 1921 the population of the district recorded an increase of 5·3 per cent. when that of the State decreased by 4·0 per cent. It has escaped the epidemic of 1901-11 and the influenza of 1918-19. It recorded an increase of 27·4 per cent. since 1921 against an increase of 35·5 per cent. in the population of the State during the same period. It may be noted that Gonda is the only district that has recorded a decrease of 5·9 per cent. in the urban population during 1941—51. This is due to the wrongly inflated population of the Balrampur municipality of the district at the Census of 1941.

The variation in the population of tehsils during 1941—51 is shown in the marginal table.

| Tehsil | Percentage variation 1941—51 |
|---|---|
| *Gonda district* .. .. .. .. | +9·2 |
| Gonda .. .. .. .. | +9·1 |
| Tarabganj .. .. .. .. | +9·6 |
| Utraula .. .. .. .. | +9·0 |

The increase in the population of the district is below the State average (11·8 per cent.) It is, however, spread evenly throughout the tehsils.

**The Vital Statistics**

3. Births and deaths mainly account for the trends in population growth. Migration also is a factor though of lesser importance. The following table gives the mean decennial birth and death rates and the calculated natural increase and the population growth rates of the last three decades, for the district as a whole and for its rural and urban areas :

| | Total | Rural | Urban |
|---|---|---|---|
| *Mean decennial birth-rate—* | | | |
| 1941—50 .. .. .. .. | **22·8** | 22·7 | 25·3 |
| 1931—40 .. .. .. .. | **31·0** | 31·3 | 25·1 |
| 1921—30 .. .. .. .. | **25·4** | 25·7 | 18·5 |
| *Mean decennial death-rate—* | | | |
| 1941—50 .. .. .. .. | **16·8** | 16·8 | 18·0 |
| 1931—40 .. .. .. .. | **20·7** | 20·8 | 18·1 |
| 1921—30 .. .. .. .. | **17·1** | 17·2 | 14·6 |
| *Mean decennial rate of natural increase—* | | | |
| 1941—50 .. .. .. | **6·0** | 5·9 | 7·3 |
| 1931—40 .. .. .. .. | **10·3** | 10·5 | 7·0 |
| 1921—30 .. .. .. .. | **8·3** | 8·5 | 3·9 |
| *Mean decennial growth-rate—* | | | |
| 1941—50 .. .. .. .. | **8·8** | 9·6 | —6·1 |
| 1931—40 .. .. .. .. | **8·7** | 7·2 | 36·8 |
| 1921—30 .. .. .. .. | **6·7** | 6·1 | 21·7 |

There are large omissions in the registration of births as well as deaths and so the above rates do not represent the true picture at all. They may, however, be taken to be roughly indicative of trends. Both birth and death rates have fallen during the last decade. The survival rate during the decade 1941-50 has been the lowest apparently due to a relatively larger omissions in the registration of births than in that of deaths.

The figures of natural increase and growth rate suggest a loss during 1921-30 and 1931--40 and again during 1941--50 on account of balance of migration.

The average yearly mortality from various causes in the district during 1941--50 was as follows :

| Causes | Number of deaths | Percentage of total deaths |
|---|---|---|
| Fever .. .. .. .. .. .. | 24,163 | 79·9 |
| Dysentery and diarrhoea .. .. .. .. .. | 83 | 0·3 |
| Respiratory diseases .. .. .. .. .. | 90 | 0·3 |
| Plague, cholera and small-pox .. .. .. .. | 3,371 | 11·1 |
| Others .. .. .. .. .. .. | 2,537 | 8·4 |

As in the rest of the State 'fever' is responsible for majority of deaths. It is one of the few districts of the State which have registered a high percentage of deaths from plague, cholera and small-pox. (*Vide* Table 1, Part III of this Volume)

**Migration**

4. About 94·9 per cent. of the people enumerated in the district at the Census of 1951 were born there, 4·6 per cent. were born in the other districts of the State, 0·2 per cent. were born in other parts of India and 0·3 per cent. were born in other countries. Of the immigrants from the districts of the State as many as 68,116 (males 16,830, females 51,286) were from the districts of the same natural division and 17,914 (males 4,721, females 13,193) were from other parts of the State. The sex proportion shows that most of the migration which is from the neighbouring districts is marriage migration. Of the 2,665 immigrants from the adjacent States 1,341 (males 497, females 844) are from Bihar, 614 (males 355, females 259) are from Punjab and 501 (males 289, females 212) are from Rajasthan.

Of the immigrants who have come from the territories beyond India 2,096 (males 1,073, females 1,023) were born in Pakistan and 3,747 (males 1,409, females 2,338) had their birth place in other territories. The Pakistan-born are mostly the displaced persons who numbered 1,798 in the district. Of the immigrants born in other territories 3,306 (males 1,119, females 2,187) are Nepal-born and 347 (males 225, females 122) are Burma-born. The sex proportion shows that people in the border areas of the districts adjoining Nepal take Nepalese brides.

The district had 150 non-Indian nationals. Of which 132 were Nepalese, 12 British, 4 Americans, 1 Australian and 1 Afghan.

Unfortunately the figures of emigration are not available. On the basis of Vital Statistics, however, the district appears to have lost about 24,000 persons during 1921--30 and 27,000 persons during 1931-40 while during 1941-50 it appears to have gained about 50,000 persons on the balance of migration. It should be borne in mind that these figures include a very large element of registration error. The gain during the last decade appears to be doubtful. Gonda is one of the known emigrating districts of the State. (*Vide* Tables D-IV and D-VI)

**Decline of cultivation *per capita***

5. We may now analyse the growth of population in the district during the last thirty years in relation to the growth of cultivation. The figures for the district are exhibited in the marginal table. (Figures of area shown under the Census years are the quinquennial averages for the five years ending with the crop year immediately preceding the Census year). It is obvious that cultivation has failed to keep pace with population. The cultivated area *per capita* has gone down from 78·9 cents in 1921 to 64·3 cents in 1951. The magnitude of this drop is about one-fifth of the 1921 level. It means that (other things being equal), every man, woman and child must expect to get less food and other agricultural produce from the land in 1951 than in 1921.

| Census years | Population* | Net area sown (in acres) | Area of cultivation *per capita* (in cents) |
|---|---|---|---|
| 1921 .. | 1,473,098 | 1,161,930 | 78·9 |
| 1931 .. | 1,576,003 | 1,150,286 | 79·3 |
| 1941 .. | 1,719,644 | 1,185,599 | 68·9 |
| 1951 .. | 1,877,484 | 1,208,727 | 64·3 |

**Double cropped area *per capita***

6. It may be examined whether this shortage has been compensated by an increase in yield per acre. Increase in yield can be brought about by more double cropping, more irrigation, better fertilization and better culture. The average (quinquennial) area sown more than once was 486,064

*The figures of population of the various censuses relate to the then lay-out of the district.

acres in 1921, 444, 517 acres in 1931, 521, 484 acres in 1941 and 494,492 acres in 1951. The figures of double crop cultivation *per capita* in cents are as follows :

| Particulars | Quinquennial average for the year preceding | | | |
|---|---|---|---|---|
| | 1951 | 1941 | 1931 | 1921 |
| Double crop cultivation *per capita* in cents .. .. | 26·3 | 30·3 | 28·2 | 33·0 |
| Unirrigated double crop cultivation *per capita* in cents .. | 26·0 | 30·2 | 28·1 | 32·9 |
| Irrigated double crop cultivation *per capita* in cents .. .. | 0·3 | 0·1 | 0·1 | 0·1 |

The double crop area *per capita* has decreased since 1941 and is far below that of 1921.

**Irrigated area *per capita***

7. The average area irrigated in the district was 320,193 acres in 1921. The figures were 248,476 acres in 1931, 305,934 acres in 1941 and 322,199 acres in 1951. The average area irrigated more than once was 1,983 acres in 1921, 1,333 acres in 1931, 2,052 acres in 1941 and 5,979 acres in 1951.

The figures of irrigation *per capita* are shown in the table below :

| Particulars | Years | | | |
|---|---|---|---|---|
| | 1951 | 1941 | 1931 | 1921 |
| Irrigated single crop cultivation *per capita* in cents .. | 16·8 | 17·7 | 15·7 | 21·6 |
| Irrigated double crop cultivation *per capita* in cents .. | 0·3 | 0·1 | 0·1 | 0·1 |

The irrigated area *per capita* has also declined since 1941 and is far below that of 1921.

**Cropped area**

8. During the quinquennium 1916—21, 94·5 per cent. of the cropped area was under food crops and 5·5 per cent. was under non-food crops. Thirty years after, during 1946--51 the cropped area under food crops was 92·2 per cent. and under non-food crops 7·8 per cent. The proportionate area under different crops between 1911 and 1951 was as below :

| Quinquennial average of | Total cropped area | Percentage of cropped area under | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| | | Rice | Wheat | Barley | Juar | Bajra | Maize | Gram | Others |
| 1911—16 .. | 1,630,057 | 28·2 | 18·0 | 4·5 | 0·3 | 0·1 | 15·2 | 10·5 | 23·2 |
| 1916—21 .. | 1,616,305 | 31·3 | 17·2 | 4·2 | 0·3 | 0·1 | 14·6 | 9·8 | 22·5 |
| 1921—26 .. | 1,650,194 | 32·4 | 16·2 | 3·8 | 0·2 | 0·1 | 12·5 | 11·8 | 23·0 |
| 1926—31 .. | 1,608,829 | 32·6 | 17·4 | 4·0 | 0·3 | 0·1 | 13·8 | 7·8 | 24·0 |
| 1931—36 .. | 1,638,937 | 29·4 | 19·3 | 3·6 | 0·2 | 0·1 | 13·4 | 8·5 | 25·5 |
| 1936—41 .. | 1,724,344 | 32·3 | 17·5 | 3·3 | 0·2 | 0·1 | 11·1 | 9·7 | 25·8 |
| 1941—46 .. | 1,701,189 | 30·6 | 16·8 | 4·0 | 0·2 | 0·1 | 14·3 | 10·1 | 23·9 |
| 1946—51 .. | 1,686,776 | 30·9 | 16·9 | 4·9 | 0·2 | 0·1 | 14·4 | 7·2 | 25·4 |

The cultivation of linseed and opium has declined. In 1901-02 the area under linseed was 62,276 acres ; in 1950-51 it was only 8,846 acres. In 1901-02 the area under opium was 25,435 acres ; in 1950-51 it was only 1,747 acres. Cultivation of sugarcane has increased. The area under it was only 21,313 acres in 1901-02 while in 1950-51 it was 45,103 acres.

**Live-stock, ploughs and carts**

9. Live-stock in this country live for a large part of the year on the by-products of agriculture supplemented by green fodder crops. They have, therefore, to be co-related not only with the grazing available but also with the total area under cultivation which carries a major portion of supporting the cattle population.

As will appear from Table 3 of Part III, the total number of cattle and buffaloes which decreased between 1930 and 1944 has recorded an increase in 1951. It now stands at 12·38 lakhs.

The number of working cattle and buffaloes in the district was 4·60 lakhs in 1935, 4·65 lakhs in 1944 and 5·32 lakhs in 1951. The number of ploughs was 2·11 lakhs in 1930 as well as in 1935, 2·40 lakhs and 1944 and 2·20 lakhs in 1951. The number of carts is rising since 1920 and now stands at 44·3 thousands. The average net cultivated area per plough works out to 5·6 acres in 1951 against 5·8 acres in 1920 and the average net cultivated area per pair of working cattle works out to 4·6 acres in 1951 as against 5·1 acres in 1935.

Breeding cows and she-buffaloes have increased from 3·76 lakhs in 1944 to 4·09 lakhs in 1951. The cows and female buffaloes in milk per 1,000 of human population were about 36 and 25 respectively. Owing to the poor milk yield the share of milk per head is only a few ounces per day.

The number of sheep is steadily declining since 1930, except for a small rise in 1944. In 1951 it was 38·9 thousands. Goats have been declining ever since 1925 and now stand at 1·30 lakhs.

Horses and ponies which have been declining since 1935 were almost stationary during 1944–51. Donkeys have decreased from 8·2 thousands in 1944 to 4·5 thousands in 1951.

Poultry have decreased from 40·2 thousands in 1944 to 39·6 thousands in 1951.

Distributed on 1,000 of human population the figures of the main categories of live-stock in 1951 are as follows :

| Cattle | Buffaloes | Sheep | Goats | Poultry | Others |
|---|---|---|---|---|---|
| 540 | 119 | 21 | 69 | 21 | 20 |

10. To sum up, the population of the district is growing up at the biological natural rate since 1921, but on the other hand the land area *per capita* and double crop area *per capita* have declined. There is at the same time, no evidence that crop yield per acre has increased. In the circumstances the magnitude of the absolute numerical increase in relation to the practically stationary acreage under cultivation is a great strain on the economy of the district.

**Villages and towns**

11. The district has 2,823 villages and 8 towns. Of the 18·8 lakhs of people who were counted at the census of 1951, 17·9 lakhs were found in villages and 0·9 lakhs in towns, i.e., there are as many as 951 people per 1,000 of the population who live in the rural areas and 49 of them live in the towns. The corresponding figures for the State as a whole are : rural 864, urban 136.

The rural population per inhabited village works out to 633. But the villages do not necessarily comprise of a single compact site. There are 16,580 hamlets in the district. The population per hamlet is 108. The medium-sized village wih inhabitants numbering between 500—2,000 is the dominant type in the district. Of the rural population 66·1 per cent. live in such villages ; 22·1 per cent. in villages of population under 500 ; 10·1 per cent. in villages of population between 2,000—5,000 ; and 1·7 per cent. in villages of population of 5,000 and over.

Towns vary in number of inhabitants more widely than villages. Of the urban population 60·7 per cent. live in towns of population of 20,000 and over (viz. Balrampur and Gonda) ; 33·0 per cent. in towns of population between 5,000 and 10,000 (viz. Nawabganj, Tulsipur, Colonelganj and Utraula) ; and 6·3 per cent. in towns of population under 5,000 (viz. Khargupur and Katra).

It is significant to note that Khargupur has shown an increase of 78·3 per cent. since 1941. Gonda, Utraula and Colonelganj have recorded an increase of 12·2 per cent, 7·7 per cent. and 8·1 per cent. respectively since 1941. The decrease in the population of Balrampur (34·9 per cent.) since 1941 is not real. Its population in 1941 was inadvertently inflated. The other towns have not shown any significant increases. (*Vide* Tables A-III and A-IV)

**Occupations : Livelihood pattern**

12. Out of the total population of 1,877,484 (rural 1,785,804, urban 91,680) 1,621,041 persons (rural 1,608,034, urban 13,007) or 86·3 per cent. depend on agriculture for their means of livelihood and 256,443 persons (rural 177,770, urban 78,673) or 13·7 per cent. depend on non-agricultural sources. The following table shows the distribution of 100 persons of the total, rural and urban population of the district under the different livelihood classes :

| Description | Agricultural classes | | | | | Non-agricultural classes | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | Total | I | II | III | IV | Total | V | VI | VII | VIII |
| Total .. .. | **86·3** | **70·8** | 9·9 | 5·2 | 0·4 | **13·7** | 3·5 | 3·0 | 0·7 | 6·5 |
| Rural .. .. | **90·0** | 73·9 | 10·2 | 5·5 | 0·4 | **10·0** | 2·7 | 1·9 | 0·4 | 5·0 |
| Urban .. .. | **14·2** | 10·7 | 2·2 | 0·6 | 0·7 | **85·8** | 19·7 | 24·9 | 7·4 | 33·8 |

It is obvious that the district is one of the predominantly agricultural districts of the State. Here as many as 86·3 per cent. of the people depend on agriculture as against 74·2 per cent. in the whole State.

Of the total population of the district 934,202 persons (males 368,703, females 565,499) or 49·8 per cent. have been classified as non-earning dependants. The percentage of non-earning dependants in the agricultural population works out to 48·8 and that among the non-agricultural classes to 55·5. It will be observed that in the main they consist of women. The male non-earning dependants are mostly children. 354,624 persons (males 63,225, females 291,399) or 18·9 per cent. of the population are earning dependants. Among agriculturists their proportion is 20·5 per cent. and among non-agriculturists 9·0 per cent. The remaining 588,658 persons (males 540,319, females 48,339) or 31·3 per cent. are self-supporting. Their proportion among agriculturists works out to 30·7 per cent. and that among non-agriculturists to 35·5 per cent. Of the self-supporting persons 497,620 (males 461,739, females 35,881) belong to agricultural classes and 91,038 (males 78,580, females 12,458) to non-agricultural classes. On an average 3 self-supporting persons maintain 5 non-earning dependants.

Of the 91,038 self-supporting persons belonging to the non-agricultural classess, 4,312 persons (rural 3,817, urban 495) earn their livelihood from non-productive sources. Of the remaining 86,726 self-supporting persons (rural 63,547, urban 23,179) 4,927 (rural 729, urban 4,198) or 5·7 per cent. are employers ; 22,254 (rural 12,779, urban 9,475) or 25·7 per cent. are employees and 59,545 (rural 50,039, urban 9,506) or 68·6 per cent. are independent workers.

The distribution of 10,000 self-supporting persons of non-agricultural occupations classified according to economic divisions is as follows:

| Name of division | Self-supporting persons by divisions |
|---|---|
| **All Industries and Services** | **10,000** |
| 0—Primary industries not elsewhere specified | 296 |
| 1—Mining and quarrying | 1 |
| 2—Processing and manufacture—foodstuffs, textiles leather and products thereof | 1,076 |
| 3—Processing and manufacture—metals, chemicals and products thereof | 200 |
| 4—Processing and manufacture—not elsewhere specified | 1,021 |
| 5—Construction and utilities | 249 |
| 6—Commerce | 2,085 |
| 7—Transport, storage and communications | 480 |
| 8—Health, education and public administration | 575 |
| 9—Services not elsehwere specified | 4,017 |

The principal large scale industries of the district are rice mills and distilleries. The important cottage industries are ropes and *sutli* and basket and *chik* making.

**Variation in livelihood pattrn**

13. In the district the population dependent on agriculture was 85·7* per cent. in 1951. The agricultural proportion was 63·4 per cent. in 1901, 85·0 per cent. in 1911 and 76·7 per cent. in 1921. The actual number of persons who depend on agriculture has increased to 1,609,803 in 1951 from 1,129,790 in 1921 or by 42·5 per cent. while the cultivated area has increased by 4·0 per cent. only. This has resulted in progressive fragmentation and subdivision of holdings and pressure on impoverished soil. There appears to have been a gradual decline of village arts and handicrafts. The cumulative result is a fall in the proportion of workers and a corresponding rise in dependency. The proportion of workers in total population in 1951 was only 50·2 per cent. (agricultural 43·5 per cent., non-agricultural 6·7 per cent.) as against 55·9 per cent. (agricultural 44·5 per cent. non-agricultural 11·4 per cent.) in 1921. The proportion of non-earning dependants has consequently increased from 44·1 per cent. (agricultural 32·2 per cent., non-agricultural 11·9 per cent.) in 1921 to 49·8 per cent. (agricultural 42·2 per cent., non-agricultural 7·6 per cent.) in 1951. All this is an index of the increasing unemployment and under-employment. It is only by the diversion of population to cottage and other industries and by providing subsidiary occupations to the agriculturists that the present severe disequilibrium in the economy of the district can be redressed. (*Vide* Tables B-I, B-II and B-III)

**Houses and households**

14. There were 346,145 occupied houses in the district—326,388 in the villages and 19,757 in the towns. That gives an average of 5,471 persons per 1,000 houses or 5·5 persons per house in the rural areas and 4,640 persons per 1,000 houses or 4·6 persons per house in the urban areas.

There were 378,045 house-holds in the district—356,792 in the villages and 21,253 in the towns. That gives an average of 5,002 persons per 1,000 households or 5·0 persons per household in the rural areas and 4,219 persons per 1,000 households or 4·2 persons per household in the urban areas. The marginal table shows the developments in the size of the household since 1921. The rural household has been nearly stationary since 1931 and is almost at par with the average State rural household (5·07). The urban household was increasing till 1941, but it has greatly decreased since then.

| Census year | Persons per 1,000 households of Rural population | Urban population |
|---|---|---|
| 1921 | 4,899 | 4,232 |
| 1931 | 5,047 | 4,646 |
| 1941 | 5,052 | 5,491 |
| 1951 | 5,002 | 4,219 |

Out of 5,002 persons in every 1,000 rural households 2,584 are males and 2,418 females. There is a male excess numbering 166 in every 1,000 rural households. Out of 4,219 persons in 1,000 urban households 2,231 are males and 1,988 females. There is again a male excess numbering 243 in every 1,000 urban households. The type of migration will account for the difference.

Information regarding types of households and household relationships was also collected at this census with the help of a sample of about 4 per cent. According to this in every 1,000 sample households there are 5,228 persons (males 2,718, females 2,510) in the district. The corresponding figure for the total count is 4,958.

The table below shows the distribution by size of 1,000 sample households :

| Descriptions | Small with 3 members or less | Medium with 4—6 members | Large with 7—9 members | Very large with 10 members or more |
|---|---|---|---|---|
| **Total** | **349** | **418** | **166** | **67** |
| Rural | 341 | 423 | 168 | 68 |
| Urban | 464 | 348 | 126 | 62 |

Medium households are the dominant type in the rural areas while the small households are more common in the urban areas. Quite a large number of people migrate to the urban areas unaccompanied by their families.

*The figure includes earning dependants according to their secondary means of livelihood while the figure 86·3 in paragraph 12 includes earning dependants according to their principal means of livelihood and hence the difference.

Family composition of 1,000 sample households is as follows :

| | | | Number in 1,000 households |
|---|---|---|---|
| A | Heads of households .. | Males (married) .. .. | 745 |
| | | Males (widowers) .. .. | 224 |
| | | Females .. .. | 31 |
| | Wives of the heads of households .. | .. .. | 745 |
| | | | *1,745* |
| B | Sons of heads of households .. .. .. .. .. | | 1,076 |
| | Daughters of heads of households .. .. .. .. .. | | 660 |
| | | | *1,736* |
| C | Male relations of heads of households (other than sons) .. .. | | 637 |
| | Female relations of heads of households (other than daughters) .. .. | | 933 |
| | | | *1,570* |
| D | Persons unrelated to the heads of households .. | Males .. .. | 36 |
| | | Females .. .. | 141 |
| | | | *177* |
| | | Grand Total .. | *5,228* |

Sons outnumber the daughters of the heads of households. The latter leave the homes of their parents after marriage. Female relations (other than daughters) outnumber the male relations (other than sons). Such females are generally those who become members of these households by marriage. (*Vide* Tables A-I and C-I)

**Sex-ratio**

15. In the district as a whole the sex-ratio was 931 i.e., there were 931 females to every 1,000 males. It was almost the same in the tehsils. The highest value was 932 in Utraula and the lowest value was 930 in Gonda. The ratio was 931 in Tarabganj.

The ratio is smaller in towns than in villages. For the district as a whole the sex-ratio in villages was 935 and that in towns was only 862.

The corresponding figure of sex-ratio for the district was 957 for 1921, 954 for 1931 and 945 for 1941.

**Age-structure**

16. The number in each age-group in the district is shown below as a percentage of the total number of all ages in the total, rural and urban population separately.

| Age-groups | | Total population | | | Rural population | | Urban population | |
|---|---|---|---|---|---|---|---|---|
| | | Persons | Males | Females | Males | Females | Males | Females |
| Infants and young children .. | 0—4 .. | 12·8 | 6·6 | 6·2 | 6·6 | 6·3 | 5·8 | 5·5 |
| Boys and girls .. .. | 5—14 .. | 23·3 | 12·5 | 10·8 | 12·5 | 10·9 | 12·2 | 9·2 |
| Young men and women .. | 15—34 .. | 33·1 | 17·5 | 15·6 | 17·3 | 15·6 | 20·1 | 15·1 |
| Middle aged men and women .. | 35—54 .. | 22·1 | 11·6 | 10·5 | 11·6 | 10·5 | 13·4 | 9·7 |
| Elderly persons .. .. | 55 and over | 8·7 | 4·2 | 4·5 | 4·2 | 4·5 | 4·1 | 4·9 |

It will be seen that the population is progressive. 36·1 per cent. of the population is of age under 15 and only 8·7 per cent. of it consists of elderly persons. It is significant to note that in the working ages (15—54) the proportion is higher in the urban areas than in the rural areas. (*Vide* Table C-II)

**Marital status**

17. Out of every 10,000 persons in the district there are 5,243 males and 4,757 females*. Among them 2,419 males and 1,478 females are unmarried. If we reckon males and females together, the unmarried people are 39·0 per cent. of the population.

Of the males 46·1 per cent. were unmarried, 45·3 per cent. were married and 8·6 per cent. were widowed or divorced. Among females 31·1 per cent. were unmarried, 54·9 per cent. were married and 14·0 per cent. were widowed or divorced.

Of the married males 8·1 per cent. were of ages below 15, 46·1 per cent. were of ages 15—34, 34·9 per cent. were of ages 35—44 and 10·9 per cent. were of ages 55 and over. Among married females 10.5 per cent. were of ages below 15, 54.9 per cent. were of ages 15--34, 29·6 per cent. were of ages 35—54 and 5·0 per cent. were elderly women.

Marriage is universal. Among males and females aged 35 years and over only 10·9 per cent. of the males and 0·3 per cent. of the females were found unmarried. Most of the females are married before they attain the age of 25. Child marriage is still prevalent. 10·0 per cent. of the males of ages 0—14 and 16·2 per cent. of the females of ages 0—14 were returned as married. (*Vide* Table C-III)

*The corresponding figures for the total count are 5,178 and 4,822.

**Language**

18. 99·87 per cent. of the people of the district returned Hindi, Hindustani or Urdu as their mother-tongue. Among the other mother-tongues spoken the main are Punjabi (0·07 per cent. and Bengali (0·02 per cent.). Of the 18·8 lakhs of people in the district only 1,842 or 0·1 per cent. were bilingual (in an Indian language). (*Vide* Table D-I)

**Religion and special groups**

19. Out of 10,000 population of the district the number of people belonging to different religions is : Hindus 8,082, Muslims 1,911, Sikhs 4 and Christians 3 ; of the 10,000 population in villages the numbers are : Hindus 8,192, Muslims 1,805, Sikhs 2 and Christian 1 ; and of the 10,000 population in towns the numbers are : Hindus 5,947, Muslims 3,972, Sikhs 56 and Christians 25. Muslims, Sikhs and Christians are generally concentrated in the urban areas of the district as is the case in other parts of the State.

There were 144 thousand persons belonging to the Scheduled castes. Their number per 10,000 of population works out to 768. In villages they are 793 for every 10,000 and in towns their number per 10,000 is only 289. In the district there were 54 Anglo-Indians. (*Vide* Tables D-II and D-III)

**Displaced persons**

20. The number of displaced persons in the district at the census was 1,798 (males 956, females 842). Of them 94·9 per cent. have come from West Pakistan and 5·1 per cent. from East Pakistan. (*Vide* Table D-V)

**Literacy**

21. In 1951 the percentage of male literacy was 11·4 while that of female literacy was 1·2. As compared to this the percentage of male literacy in 1931 was 4·9 and that of female literacy was 0·3*. On January 1, 1951 there were 324 primary schools in the district with an enrolment of 26,870. (*Vide* Table D-VII)

## C—Explanatory Note on the Statistics

The statistics in this volume have been presented in three parts:

I—District Census Tables
II—Village, Town, Pargana and Thana Statistics
III—Miscellaneous Statistics

Parts I and II contain census data. A brief account of the system of sorting of census slips and preparation of tables and abstract therefrom is given below.

Part III contains statistics throwing light on special aspects of population and its growth. These have been derived from miscellaneous sources. Table 1, "Vital Statistics", has been prepared from the published and unpublished records of the Director of Medical and Health Services, Table 2, "Agricultural Statistics", from the Annual Season and Crop Reports, Table 3, "Live-Stock, Agricultural Machinery and Implements", from the published figures of Live-Stock Census and Table 4, "List of Primary Schools", from information specially supplied by District Inspector of Schools.

**Processing of census data**

2. The census data presented here has been derived from the census slips by a process of sorting, compilation and tabulation. In previous censuses the slips were first sorted by religion and this division was maintained throughout so that all data were cross-tabulated by religion. This procedure has been abandoned at this census and substituted by a division based on economic characteristics of the population. The whole population has been divided into eight livelihood classes, four of which are of the agricultural category and four of non-agricultural category as follows :

*Agricultural Classes—*

I—Cultivators of land wholly or mainly owned; and their dependants
II—Cultivators of land wholly or mainly unowned; and their dependants
III—Cultivating labourers; and their dependants
IV—Non-cultivating owners of land; agricultural rent receivers; and their dependants

*Non-agricultural Classes—*

V—Production (other than cultivation)
VI—Commerce
VII—Transport
VIII—Other services and miscellaneous sources

---

*The numbers per mille (of the 10 per cent. sample population) of each sex, aged 5 years and over who were returned as literates are as below :

| Males | | Females | |
|---|---|---|---|
| 1951 | 1931 | 1951 | 1931 |
| 123 | 59 | 12 | 4 |

Another special feature of the sorting of this census was the separation, from the very start, of slips of displaced persons and of a 10 per cent. random sample from the remainder. This has enabled the data of displaced persons to be presented separately while the 10 per cent. sample has been utilized for the preparation of Age Tables.

The slips of this census have been copied by Households into a National Register of Citizens, which has been prepared village-wise for rural areas and mohalla/ward-wise for urban areas. Table C-I is based on a 4 per cent. sample extracted from this Register.

**Tracts**

3. The slips were first sorted by villages for the preparation of the Primary Census Abstract. For the purpose of further sorting the State was divided into tracts consisting of (*a*) *rural tracts*, comprising the rural population of each tehsil, (*b*) *urban city tracts*, comprising the population of areas which had been declared as cities, (*c*) *urban non-city tracts*, comprising the population of urban areas of a district excluding areas declared as cities. Each tract was treated as a unit for sorting of slips. All data were compiled first by tracts and then by districts. This volume presents the tract-wise data for one district (with the exception of A and E Tables, which have been presented tehsil-wise), while the district-wise data for the whole State is contained in the following State volumes :

Part I-B—Subsidiary Tables

Part II-A—General Population Tables

Part II-B—Economic Tables

Part II-C—Age and Social Tables

**Explanatory note**

4. Detailed explanatory notes are appended to each State table in the printed volumes of State tables. They apply to the tables in this volume also and should be referred to when necessary. A few notes of some of the tables are reproduced below :

*Table A-I*—Column 5 relating to "hamlets" has been introduced for the first time. Any distinctive cluster or agglomeration of houses has been treated as a "hamlet".

A clear distinction has been made in this census between a "House" and a "Household". A house is any human dwelling having a separate main entrance while a household is any commensal unit living in a census house. In previous censuses the figures under "Occupied Houses" used to be that of households, while the figures under columns 7—9 of the present tables refer to occupied census houses as distinct from households.

*The Economic Tables*—The Indian Census Economic Classification Scheme, 1951 together with the occupational division and sub-division adopted for this census are given in Part II-B of the Report.

*Table B-I*—Each of the eight livelihood classes mentioned above has been divided into three sub-classes, with reference to the economic status, as follows:

(i) Self-supporting persons;

(ii) Non-earning dependants; and

(iii) Earning dependants

These were defined in the instructions to Enumerators as follows:

"A 'self-supporting person' is one who is in receipt of an income and that income is sufficient at least for his own maintenance. To be 'self-supporting' a person need not be able to support his family. All that is necessary is that he should be earning sufficient for his personal needs. For purposes of this question the person enumerated is the unit and not the family or household. Any one who is not a 'self-supporting' person in this sense is a 'dependant'. A 'dependant' may be either an 'earning dependant' or a 'non-earning dependant'. The test is whether he secures a regular (and not casual) income, even though it may be small. Such income may be in cash or kind; it may be continuous or seasonal employment. When the income which he secures is not sufficient to support him that person is an 'earning dependant'. A person who does not earn any income either in cash or kind is a 'non-earning dependant'. Where two or more members of a family household jointly cultivate land and secure an income therefrom, each of them should be regarded as earning part of the income. None of them is, therefore, a non-earning dependant. Each of them should be classed either a 'self-supporting person' or an 'earning dependant' according to the share of income attributable to each. The same applies to any other business carried on jointly. The share of the income is what the head of household deems it to be. This does not mean that every one who works is necessarily a self-supporting person or an earning dependant. Thus, for instance, a house wife who cooks for the family, brings up the children or manages the household is doing very valuable work. Nevertheless, her Economic Status is that of a non-earning dependant, if she does not also earn an income, and should be recorded as such."

*Economically active, Semi-active and Passive persons*—All non-earning dependants are economically passive. They include persons performing house-work or other domestic or personal services for other members of the same family household. But they do not include "unpaid family workers" or persons who take part along with the members of the family household in carrying on cultivation or a home industry as a family enterprise.

All earning dependants are economically semi-active only. Though they contribute to the carrying of economic activities, the magnitude of their individual contribution is deemed to be too small to justify their description as economically active. (Their contribution to economic activity is, however, taken into account in the tabulation of data based on secondary means of livelihood).

All self-supporting persons are ordinarily economically active with the exception of the following classes and groups :

(*a*) All self-supporting persons of Agricultural Class IV.

(*b*) The following groups of self-supporting persons who are included in Non-agricultural Class VIII and derive their principal means of livelihood from miscellaneous sources (otherwise than through economic activity) :

(i) Persons living principally on income from non-agricultural property;

(ii) Persons living principally on pensions, remittances, scholarships and funds;

(iii) Inmates of alms-houses and recipients of doles;

(iv) Beggars and vagrants; and

(v) All other persons living principally on income derived from non-productive activities.

*Table B-II*—For a self-supporting person who has more than one means of livelihood the *secondary means* of livelihood is the livelihood next in importance to his principal means of livelihood. For an earning dependant it is the source from which he secures his own income, where there are more than one subsidiary occupations only the one providing the largest income has been taken into account.

*Table B-III*—"Employers", "Employees" and "Independent Workers" have been defined as follows in the Instructions to Enumerators :

An "employer" is only that person who has necessarily to employ other person in order to carry on the business from which he secures his livelihood. Thus if a person employs a cook or any other person for domestic services, he should not be recorded as an "employer" merely for that reason.

An "employee" is a person who ordinarily works under some other person for a salary or a wage in cash or kind as the means of earning his livelihood. There may be persons who are employed as managers, superintendents, agents, etc. and in that capacity control other workers. Such persons are also employees only and should not be regarded as employers.

An "independent worker" means a person who is not employed by any one else and who also does not employ any body else in order to earn his livelihood. (Sweepers, *dhobis*, *kahars*, etc. who work for several masters are independent workers. If, however, any of them accepts whole-time employment under one master he becomes "employee". Daily wage-earners who work for different masters are likewise independent workers. But if they accept employment under one master, e.g. under a factory, they become "employees").

*Tables C-II, C-III, C-IV and C-V*—The figures presented in these tables are based on single year age returns and have not been smoothed.

*Tables D-V*(i) *and*(ii)—For the purpose of these tables a "displaced person" has been defined as follows :

"A displaced person means any person who has entered India having left or being compelled to leave his home in Western Pakistan on or after the 1st March, 1947, or his home in Eastern Pakistan on or after the 15th October, 1946, on account of civil disturbances or on account of the setting up of the two Dominions of India and Pakistan."
